Teacher/Student Lesson 1: The
Capital Letter M:
Chalkboard/Main Lesson Book
Drawing & Verse**

Summary of Living Lessons
Transcription: The Capital M

The document titled "Living Lessons Transcription: The Capital M" introduces the letter M through a creative narrative involving mountains. It begins with a description of a mountain that was "greatly agitated," leading to a gathering of people who were curious about the commotion.

The narrative emphasizes the mysteries of mountains, noting that "all we see is their surface."

As the story unfolds, it highlights the changing colors of mountains with the seasons, mentioning how they can be "covered in snow" during winter and display vibrant colors like "pinks to oranges to yellows" in the spring.

The author shares personal observations, stating that in their region, the mountains appear "completely orange in the spring, full of poppies everywhere."

The narrative also explores the reasons behind these seasonal changes, suggesting factors such as "mudslides, maples, or marigolds" that contribute to the mountains' appearance.

The lesson concludes with a playful mention of a "maze through the mountain" that winds up and down, reinforcing the theme of exploration and discovery.

1
00:00:01.400 --> 00:00:04.550
Hello our schoolers and welcome to letter M.

2
00:00:32.220 --> 00:00:37.730
A mountain was once greatly agitated.

3
00:01:02.380 --> 00:01:06.250
Loud groans and noises were heard.

4
00:01:35.090 --> 00:01:42.820
Mountains hold such great mysteries because all we see is

5
00:01:42.830 --> 00:01:43.800
their surface.

6
00:02:18.150 --> 00:02:20.960
Crowds of people came from all

7
00:02:20.970 --> 00:02:23.900
over to see what was the matter.

- 8
00:02:55.060 --> 00:02:58.930
While they were assembled in
- 9
00:02:58.940 --> 00:03:21.460
anxious expectation of some
terrible calamity, a mouse came.
- 10
00:03:57.970 --> 00:04:00.660
Have you noticed the mountains
around where you live?
- 11
00:04:02.770 --> 00:04:05.480
Have you noticed how they change
colors with the seasons?
- 12
00:04:10.260 --> 00:04:16.870
The mountains just reflect
everything that lives in them and
- 13
00:04:16.880 --> 00:04:17.650
on them.
- 14
00:04:32.200 --> 00:04:34.930
So many creatures call the
- 15
00:04:34.940 --> 00:04:36.090
mountain their home.
- 16
00:04:48.050 --> 00:04:50.360
In the winter they might be
- 17
00:04:50.370 --> 00:04:51.180
covered in snow.
- 18
00:05:02.590 --> 00:05:06.010
In the spring their colors could
- 19
00:05:06.020 --> 00:05:12.460
range from pinks to oranges to yellows.
- 20
00:05:14.730 --> 00:05:16.680
Where I come from the mountains
- 21
00:05:16.690 --> 00:05:21.080
look completely orange in the
spring, full of poppies everywhere.
- 22
00:06:16.230 --> 00:06:19.520
In other places they might look golden.
- 23
00:06:21.010 --> 00:06:22.320
Why could that be?
- 24
00:06:23.930 --> 00:06:32.680
Maybe because of the mudslides,
the maples or the marigolds that
- 25
00:06:32.690 --> 00:06:35.020
run all through the mountains.
- 26
00:06:35.110 --> 00:08:47.860
M. The maze through the mountain
- 27
00:08:47.870 --> 00:08:51.200
winds up and down.
- 28
00:08:52.330 --> 00:08:57.800

Mudslides, maples, marigolds brown.

29

00:08:59.270 --> 00:09:00.220

Thanks for watching!
