## KEY POINTS

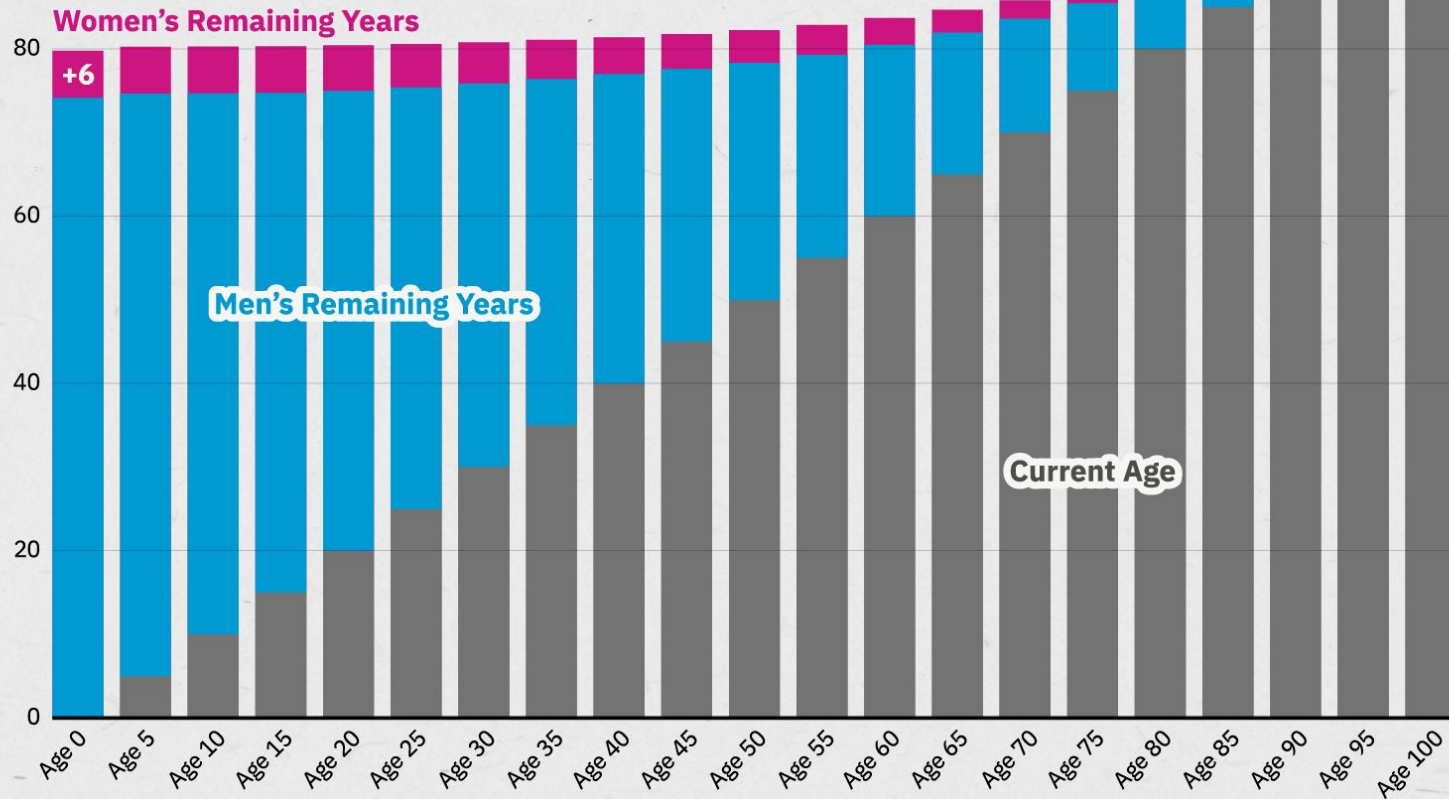

- Warren Buffett's biggest advantage in investing is time.
- Had he retired at 65, he may have never become a household name.

Average life expectancy **naturally increases as we get older**, while the gap between women and men's life expectancies decreases.

Note: Figures have been rounded.

The life expectancy at a given age is the average remaining number of years expected prior to death for a person at that exact age, born on January 1, using the mortality rates for 2020 over the course of their remaining life.

# Level 1: Pure Stocks

Passive investor

**Level 2:  
Wheel  
Strategy**

2 ways to buy shares

- Buy it DIRECTLY
- Sell Cash Secured Put Options
- Sell Covered Calls on it

**But there is a flaw  
to this strategy**

it takes away capital from growth

# Level 3: Best of Both World

Active Investor - Weekly (no need daily)

# What is Level 3?

A strategy that can provide income and allow capital gains.

## How does it work?

- **Sequence** the sell puts and calls
- **Actively manage** it to optimise the premium

## Benefits

- **Safety** , when managed properly
- **Exit early to recycle your capital**
- **Buy shares at a huge discount**
- **Protect against short term price changes**
