

## CyberSafe: Home Sweet Hmm - Extensions

LEVEL UP your coding skills with [Prodigy Learning](#) and their [Coding Credentials](#) program! The agent is an amazing resource in Minecraft that is often under-utilized by students. Consider checking out Prodigy Learning and their coding courses, and revisiting the lesson to use the agent to help with design challenges, such as building an elevator or creating a labyrinth in the museum gardens.

### Other Extension Ideas:

Consider using The Agent within Minecraft: Education Edition to help with the following scenario

In this lesson we saw an engaging parkour game embedded in the learning. Perhaps students could use the Agent to code their own parkour map building pillars at differing heights at challenging distances. Parkour is a Minecraft favourite and coding the course could be a fun reward for successful completion of the CyberSafe lesson.

### Other Formal Extensions:

1. Create a build of a cyber safe home in Minecraft
2. Check out these cybersecurity lessons from code.org [Code.org Cybersecurity Lessons](#)
3. Write a song or poem to remind yourself and others to HMM... Stop and think, before you click!
4. Collaborate with your peers to create a "Top 5 Safety Online" tips poster
5. Participate in the [Minecraft Build Challenge](#): Minecraft Instruction Book; create an instruction book on [how to report another player](#) if they violate the [community standards](#)
