

Great Tech Story - Extensions

LEVEL UP your coding skills with [Prodigy Learning](#) and their [Coding Credentials](#) program! The agent is an amazing resource in Minecraft that is often under-utilized by students. Consider checking out Prodigy Learning and their coding courses, and revisiting the lesson to use the agent to help with design challenges, such as building an elevator or creating a labyrinth in the museum gardens.

Other Extension Ideas:

- Design and build new sustainable technologies for your home, school, or community that take into account safety, fairness, affordability, and environmental impact in the way they are made, used, and disposed. Consider solving problems in technologies for communication, transportation, education, entertainment, healthcare, travel, and food systems. Students can complete this extension activity at the end of the 5 activities in the lesson. There is a “Build Plate” for students to complete the extension activity.
