Gains from the sale of players' registration rights, in which 50% is simultaneously repurchased, are adjusted for 50% of their amount in order to recognize in the income statement the income accrued for the portion of the deferred rights actually transferred through the sale. The remaining amount of the gain, instead, will only be realized upon termination of the player-sharing agreement when the player leaves the company. If there is a loss on the sale of the players' right which precedes the signing of the player-sharing contract, this loss, on the contrary, is not adjusted for IFRS purposes. This is due to the fact that the loss is comparable to the effect of an impairment test of the deferred right, under the assumption that the moment in time in which the right is disposed of represents the moment in which that loss arose.

EXOR Holdings System

Financial income is recognized according to the accrual principle on the basis of the effective rate of return.

Dividends from investments accounted for at cost are recognized in the income statement when they are approved and only from the earnings generated after the purchase of the investment holding. Instead, when the dividends are distributed from reserves generated before acquisition, the dividends are recognized as a deduction from the cost of the investment holding.

Dividends from available-for-sale investments and investments held for trading are recognized in the income statement upon approval of the appropriation.

Commission expenses

Commissions payable to brokers are recorded at the time the Cushman & Wakefield Group recognizes its brokerage commission revenues and are generally not paid until after the collection of the related commissions receivable.

Other nonrecurring income (expenses)

Other nonrecurring income (expenses) include the gains and/or the losses on the disposal of non-current assets other than discontinued operations or assets held for sale (the results of the latter are included in “Profit (loss) from discontinued operations or assets held for sale”). They may also include impairment losses on assets, restructuring costs, accruals and utilizations of provisions for liabilities.

Earnings per share

Basic earnings per share is calculated by dividing the profit attributable to the equity holders of the parent by the weighted average number of shares outstanding during the year, excluding treasury stock. Diluted earnings per share is calculated by adjusting the weighted average number of shares outstanding to assume conversion of all dilutive potential shares. The profit attributable to the equity holders of the parent is also adjusted to take into account the effects, net of taxes, of the conversion.

Basic and diluted earnings per share is calculated on the result from continuing operations and the result from discontinued operations or assets held for sale.

Segment information

Given the nature of the investments held through the subsidiary IFIL S.p.A., segment information coincides with the consolidated data of each operating subsidiary and associate holding company, each of which represents an investment in a primary reporting segment.

6. Principal sources of uncertainty in making financial statement estimates

The preparation of financial statements and related disclosures that conforms to IFRS requires estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. The estimates and assumptions are based on experience and other factors that are considered to be relevant. Actual results could differ from those estimates. Estimates and assumptions are reviewed periodically and the effects of any changes are recognized in the income statement in the period in which the estimate is revised if the revision only affects that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The situation caused by the present economic and financial crisis has led to the need to make assumptions about future performance which are characterized by significant uncertainty; as a consequence, therefore, it cannot be excluded that results may arise during the next year which differ from estimates, and which therefore might require adjustments, even significant, to be made to the carrying amount of the items in question, which at the present moment can clearly neither be estimated nor predicted.
The following are the critical judgments and the key assumptions concerning the future that have been made in the process of applying the accounting policies and that may have the most significant effect on the amounts recognized in the consolidated financial statements or that have a risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

- the impairment test on goodwill and on the C&W Inc. Group trademarks which resulted in an impairment loss recorded for € 7 million ($9.5 million) at December 31, 2008 (see Note 19 to the consolidated financial statements);
- the impairment loss of € 7 million on the residual amount of the registration rights for the player Andrade, given that it will be impossible for the player to recover to play professionally due to a serious injury (please refer to Note 13 to the consolidated financial statements);
- the impairment loss of € 5 million on the video archives of Juventus F.C., carried out on the basis of the commercial exploitation plan and estimated cash and economic flows acquired and expected (please refer to Note 13 to the consolidated financial statements);
- the fair value adjustment to equity of the remaining investment in Intesa Sanpaolo which, at year-end 2008, showed an original purchase price in excess of the market price for € 55 million; this impairment loss, equal to 15%, was not considered objective evidence of an impairment at December 31, 2008 (please refer to Note 23 to the consolidated financial statements);
- other listed and unlisted investments accounted for at cost or fair value for which their measurement indicated no evidence of impairment.

Recoverable amount of non-current assets

Non-current assets include property, plant and equipment, intangible assets (including goodwill), investments and other financial assets and deferred tax assets. Each consolidated company periodically reviews the carrying amount of non-current assets held and used and assets that must be disposed of when events and circumstances warrant such a review. This review is performed using estimates of future cash flows from the use or disposal of the asset, as established in company plans, and suitable discount rates in order to calculate present value. If the carrying amount of a non-current asset is considered impaired, the companies of the Group record an impairment loss for the amount by which the carrying amount of the asset exceeds its estimated recoverable amount from use or disposal determined by reference to the Group companies' most recent plans.

Pension plans and other post-employment benefits

Group companies sponsor pension plans and other health care plans in various countries. Management uses several statistical and judgmental factors that attempt to anticipate future events in calculating the expense, the liability and the assets related to these plans. These factors include assumptions about the discount rate, expected return on plan assets, rate of future compensation increases and health care cost trend rates. In addition, the Group companies' actuarial consultants also use subjective factors such as resignations and mortality rates in making relevant estimates.

Contingent liabilities

The actions and claims against the companies of the Group are often the result of difficult and complex factual and legal issues, which are subject to many uncertainties and complexities, including but not limited to the facts and circumstances of each particular action and claim, the jurisdiction and the differences in applicable law. The companies of the Group accrue a liability when it is determined that an adverse outcome is probable and the amount of the loss can be reasonably estimated. In the event an adverse outcome is possible or an estimate is not determinable, the matter is disclosed in the Notes.

7. Adoption of new accounting standards, amendments and interpretations issued by the IASB

Interpretations and amendments to standards effective from January 1, 2008 but not applicable to the Group

The following interpretations and amendments, applicable for 2008, relate to matters that are not applicable to the Group.

- IFRIC 12 – Service Concession Arrangements (applicable from January 1, 2008).
- IFRIC 14 – IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction (applicable from January 1, 2008).
- Amendment to IAS 39 – Financial Instruments: Recognition and Measurement and IFRS 7 – Financial Instruments: Disclosures that would permit the reclassification of some non-derivative financial assets which are classified under the “fair value through profit or loss category” in particular circumstances. The amendment also permits the transfer of loans and receivables from the “available-for-sale” category to the “held to maturity” category where the entity has the intention and ability to hold such instruments for a specific future period. Although this amendment applies from July 1, 2008, it has had no effect on the financial statements presented herein as none of the reclassifications permitted by the amendment were carried out by the Group.

Accounting standards, amendments and interpretations not yet effective and not early adopted by the Group.

On November 30, 2006, the IASB issued IFRS 8 – Operating Segments that will become effective on January 1, 2009 and supersedes IAS 14 – Segment Reporting. The new standard requires the information provided in segment reporting to be based upon the components of the entity that management uses to make decisions about operational matters. The standard requires these operating segments to be identified on the basis of internal reports that are regularly reviewed by the entity's management in order to allocate resources to the segment and assess its performance. The adoption of this standard will have no effect on the measurement of items in the financial statements.

On March 29, 2007, the IASB issued a revised version of IAS 23 – Borrowing costs. The standard is applicable from January 1, 2009. The main change from the previous version is the removal of the option of immediately recognizing as an expense borrowing costs that relate to assets that take a substantial period of time to get ready for use or sale. The standard will be applicable prospectively to borrowing costs relating to qualifying assets capitalized starting from January 1, 2009.

On September 6, 2007, the IASB issued a revised version of IAS 1 – Presentation of Financial Statements which applies from January 1, 2009. The revised standard requires an entity to present changes in its equity resulting from transactions with owners in a statement of changes in equity. All non-owner changes (meaning changes in comprehensive income) are required to be presented either in a single statement of comprehensive income or in two statements (a separate income statement and a statement of comprehensive income). Transactions with non-owners may not be presented in the statement of changes in equity.
Adoption of this standard will have no effect on the measurement of items in the financial statements.

On January 10, 2008, the IASB issued a revised version of IFRS 3 – Business Combinations and an amended version of IAS 27 – Consolidated and Separate Financial Statements. The main changes that revised IFRS 3 will make to existing requirements are the elimination of the need to measure at fair value every asset and liability at each step in a step acquisition for the purpose of calculating a portion of goodwill. Instead, goodwill will be measured as the difference at acquisition date between the value of any investment in the business held before the acquisition, the consideration transferred and the net assets acquired. Moreover, for a business combination in which the acquirer achieves control without purchasing all of the acquiree, the remaining (non-controlling) equity interests are measured either at fair value or by using the method already provided in IFRS 3. The revised IFRS 3 also requires acquisition related costs to be recognized as expenses and the acquirer to recognize the obligation to make an additional payment (contingent consideration) as part of the business combination.
In the amended IAS 27, the IASB has added a requirement specifying that changes in a parent's interest in a subsidiary that do not result in the loss of control must be accounted for as equity transactions and recognized within equity. Moreover when a parent loses control of a subsidiary but retains an ownership interest it must initially measure any retained investment at fair value. At the date when control is lost, the difference between the fair value and the carrying amount of the retained interest must be recognized in profit or loss. Finally, the amendment to IAS 27 requires losses pertaining to non-controlling interests to be allocated to non-controlling interest equity, even if this results in the non-controlling interest having a deficit balance. The new rules will apply prospectively from January 1, 2010.

On January 17, 2008, the IASB issued an amendment to IFRS 2 – Vesting Conditions and Cancellations which clarifies that for the purpose of share-based payments measurement, vesting conditions are service conditions and performance conditions only. It also specifies that all cancellations, whether by the entity or by other parties, should receive the same accounting treatment. The Group will apply this amendment retrospectively from January 1, 2009; no effects are expected from its adoption.

On May 22, 2008, the IASB issued a series of amendments to IFRS ("Improvements"); details are provided in the following paragraphs of those identified by the IASB as resulting in accounting changes for presentation, recognition and measurement purposes, leaving out amendments regarding changes in terminology or editorial changes which are likely to have minimal effects in terms of accounting and effects on the consolidated financial statements.

- IFRS 5 – Non-Current Assets Held for Sale and Discontinued Operations: this amendment, applicable prospectively from January 1, 2010, requires an entity that is committed to a sale plan involving loss of control of a subsidiary to classify all the assets and liabilities of that subsidiary as held for sale, regardless of whether the entity will retain a non-controlling interest in its former subsidiary after the sale.
- IAS 1 – Presentation of Financial Statements (revised in 2007): this amendment, applicable from January 1, 2009, requires an entity to classify assets and liabilities arising from derivative financial instruments that are not classified as held for trading between current and non-current assets and liabilities. Adoption of this standard will have no effect on the measurement of items in the financial statements.
- IAS 16 – Property, Plant and Equipment: this amendment, applicable from January 1, 2009, requires an entity that in the course of its ordinary activities routinely sells items of property, plant and equipment that it has held for rental to others, to transfer such assets to inventories when they cease to be rented and become held for sale. As a consequence, the proceeds from the sale of such assets shall be recognized as revenue. Cash payments to manufacture or acquire assets held for rental to others or subsequently held for sale are cash flows from operating activities (and not from investing activities).
- IAS 19 – Employee Benefits: this amendment, applicable prospectively from January 1, 2009 to changes in benefits that occur after that date, clarifies the definition of positive/negative past service costs and states that in the case of a curtailment, only the effect of the reduction for future service shall be recognized immediately in the income statement, while the effect arising from past service periods shall be considered a negative past service cost. The Board also revised the definition of short-term employee benefits and long-term employee benefits and the definition of a return on plan assets, stating that this amount should be net of any costs for administering the plan (other than those included in the measurement of the defined benefit obligation).
- IAS 23 – Borrowing Costs: this amendment, applicable from January 1, 2009, revises the definition of borrowing costs.
- IAS 28 – Investments in Associates: this amendment, applicable from January 1, 2009 with prospective application also permitted, requires that for investments accounted for using the equity method a recognized impairment loss should not be allocated to any asset (and in particular to goodwill) that forms part of the carrying amount of the investment in the associate, but to the carrying amount of the investment overall. Accordingly, any reversal of that impairment loss is recognized in full.
- IAS 36 – Impairment of Assets: this amendment, applicable from January 1, 2009, requires additional disclosures to be made in the case in which an entity determines the recoverable amount of a cash-generating unit using discounted cash flows.
- IAS 38 – Intangible Assets: this amendment, applicable retrospectively from January 1, 2009, requires expenditure on advertising and promotional activities to be recognized in the income statement. Further, it states that expenditures incurred to provide future economic benefits to an entity, but where no intangible asset is recognized, must, for the supply of goods, be recognized as an expense when it has the right to access the goods. In the case of the supply of services, an entity shall recognize the expenditure as an expense when it receives the services. Moreover, the standard has been revised in order to allow entities to use the unit of production method for determining the amortization charge for an intangible asset with a finite useful life.
- IAS 39 – Financial Instruments: Recognition and Measurement: this amendment, applicable from January 1, 2009, clarifies how to calculate the revised effective interest rate on ceasing fair value hedge accounting and notes additionally that the prohibition on the reclassification of financial instruments into or out of the fair value through profit or loss category after initial recognition should not prevent a derivative from being accounted for at fair value through profit or loss when it does not qualify for hedge accounting and vice versa.

On July 31, 2008, the IASB issued an amendment to IAS 39 – Financial Instruments: Recognition and Measurement which is to be applied retrospectively from January 1, 2010. The amendment clarifies how the existing principles underlying hedge accounting should be applied in particular situations.

In November 2008, the IASB also issued IFRIC 17 – Distribution of Non-cash Assets to Owners, establishing that the determination of the value of the distribution of non-cash assets should consider their fair value when it becomes mandatory to record the relative payable to the stockholders.

The amendment is applicable from January 1, 2010, for annual periods beginning on or after July 1, 2009.

In March 2009, the IASB issued an amendment to IFRS 7 – Financial Instruments: Disclosures which is applicable from January 1, 2010, or annual periods beginning on or after July 1, 2009. The amendment requires disclosure about the measurement of fair value (methods used and, if valuations techniques are used, the assumptions adopted in determining the fair value of each class of financial asset or liability) and the liquidity risk (analysis of the maturities of financial liabilities represented by derivatives or other liabilities).

Standards, amendments and interpretations not applicable by the Group

The following standards (already applicable or applicable in the future), amendments and interpretations have also been issued, relating to matters that were not applicable to the Group at the date of the financial statements.

IAS 20 – Government Grants and Disclosure of Government Assistance: this amendment, applicable prospectively from January 1, 2009, states that the benefit of a government loan at a below-market rate of interest shall be treated as a government grant and then accounted for in accordance with IAS 20.

IAS 28 – Investments in Associates, and IAS 31 – Investments in Joint Ventures: these amendments, applicable from January 1, 2009, require specific new disclosures to be made for investments in associates and joint ventures measured at fair value in accordance with IAS 39. IFRS 7 – Financial Instruments: Disclosures and IAS 32 – Financial Instruments: Presentation have accordingly also been amended.

IAS 29 – Financial Reporting in Hyperinflationary Economies: the previous version of the standard did not reflect the fact that a number of assets and liabilities may or must be measured on the basis of a current value rather than historical value. This amendment, made in order to reflect this, is effective from January 1, 2009.

IAS 32 – Financial Instruments: Presentation and to IAS 1 – Presentation of Financial Statements - Puttable Financial Instruments and Obligations Arising on Liquidation: this amendment requires puttable financial instruments and instruments, or components of instruments that impose on an entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation, to be classified as equity instruments. This amendment is effective prospectively from January 1, 2009.

IAS 40 – Investment Property: this amendment, applicable prospectively from January 1, 2009, states that property under construction falls within the scope of IAS 40 and not that of IAS 16.

Interpretations:

- IFRIC 13 – Customer Loyalty Programmes (applicable from January 1, 2009).
- IFRIC 15 – Agreements for the Construction of Real Estate (applicable from January 1, 2009 but not yet endorsed by the European Union).
- IFRIC 16 – Hedges of a Net Investment in a Foreign Operation (issued on July 3, 2008). The main change expected to arise from this interpretation is the elimination of the possibility for an entity to apply hedge accounting for a hedge of the foreign exchange differences between the functional currency of a foreign operation and the presentation currency of the parent's consolidated financial statements. Moreover, the interpretation clarifies that in a hedge of a net investment in a foreign operation the hedging instrument may be held by any entity or entities within the group and that IAS 21 – The Effects of Changes in Foreign Exchange Rates shall be applied to determine the amount that needs to be reclassified from equity to profit or loss for the hedged item when an entity disposes of the investment. This interpretation, effective from January 1, 2009, had not yet been endorsed by the European Union at the date of these consolidated financial statements.
- IFRIC 18 – Transfers of Assets from Customers (applicable from January 1, 2010, for annual periods beginning on or after July 1, 2009).

8. Change in the scope of consolidation

The changes in the scope of consolidation are presented below.

Cushman & Wakefield Group

In 2008, the C&W Group made some acquisitions for a total investment of $31 million (€ 22 million).
The total net fair value of the property, plant and equipment and intangible assets acquired amounts to $4.4 million (€ 3 million), while the goodwill recorded is equal to $33.2 million (€ 24 million).

Alpitour Group

In 2008, the group sold the entire investment in the subsidiary Kiwengwa Ltd (a company controlled 100% by Horizon Holidays S.A. and Alpiturismo Service of Tourism Lta) for a total equivalent amount of € 4 million. This transaction gave rise to a gain of approximately € 1 million on consolidation.
Moreover, two subsidiaries in the hotel sector were sold: Mediterranean Tourist Company S.A. and Blue Marine Tunisie S.A..
Società a Valore Sicuro S.r.l. was formed. This company is 100% controlled by Alpitour S.p.A., which conducts insurance brokerage activities under a project for the diversification and expansion of the range of insurance services offered directly to the end customer.

EXOR Holding System

With a view toward simplifying the Group's structure, the following transactions were entered into:

- on September 29, 2008, a decision was taken to put Ifilgroup Finance Limited, an Irish-registered company controlled 100% by Ifil Investissements S.A., into a voluntary wind-up;
- on November 7, 2008, a decision was taken to put Ifil Investment Holding, a Dutch-registered company controlled 100% by IFIL, into a voluntary wind-up. On the same day, Ifil Investment Holding transferred 224,194 Ifil Investissements S.A. shares which it held (20.184% of capital stock) to IFIL as an advance on the liquidation. After this transaction, IFIL directly holds 100% of the capital stock of Ifil Investissements.

Other information

With regard to the balance sheet at December 31, 2007 presented in these consolidated financial statements for comparison purposes, some reclassifications have been made to the data published at December 31, 2007 for a better reading of the balance sheet. Such reclassifications, moreover, do not have any effect on the profit or equity.

9. Segment information

Information by business segment and by geographical area, presented as set forth in IAS 14 – Segment Reporting, is prepared according to the same accounting policies adopted in the preparation and presentation of the consolidated financial statements of the Group.

The primary reporting format consists of the business segments whereas the geographical areas make up the secondary reporting format. This distinction is based upon the nature of the risks and rewards inherent in the Group's activities and reflects the organizational structure.

The segment information presented by the EXOR Group agrees with the consolidated data of each subsidiary and associate holding company, every one of which represents an investment in a major business segment: C&W Group, Alpitour Group, Juventus Football Club, Fiat Group, Sequana Group and the EXOR Holdings System.
The segment information relating to continuing operations is presented in the following tables; the segment information relating to discontinued operations or assets held for sale is presented in Note 26.

The analysis of the income statement by business segment is as follows:

€ in millions	Cushman & Wakefield Group	Alpitour Group	Juventus	Fiat Group	Sequana Group	EXOR Holdings System	**Total**
2008							
Revenues	1,229	1,237	197			1	**2,664**

The following table presents an analysis of the revenues of the Group in the various geographical markets, irrespective of the origin of the goods and services, and an analysis of the carrying amount of the segment assets and investments in property, plant and equipment and intangible assets on the basis of the geographical location of the assets.

€ in millions	Revenues	Segment assets	Investments in property, plant and equipment and intangible assets
2008			
Italy	1,265	473	70
Europe excluding Italy	457	426	10
United States	746	516	19
Rest of the world	196	247	5
Total at December 31, 2008	**2,664**	**1,662**	**104**

€ in millions	Revenues	Segment assets	Investments in property, plant and equipment and intangible assets
2007			
Italy	1,223	526	76
Europe excluding Italy	458	155	12
United States	787	779	12
Rest of the world	193	145	5
Total at December 31, 2007	**2,661**	**1,605**	**105**

10. Revenues

Details of revenues are as follows:

€ in millions	**2008**	2007	Change
Revenues from rendering tourist services	**1,237**	1,236	1
Real estate brokerage commissions	**779**	819	(40)
Revenues from property management activities (a)	**196**	149	47
Radio and television rights and media revenues	**137**	115	22
Revenues from financial consulting and property management services	**140**	200	(60)
Corporate real estate business consulting services and research	**110**	81	29
Revenues from sponsorships and advertising (b)	**43**	39	4
Revenues from season tickets and ticket office sales	**13**	9	4
Other services	**9**	13	(4)
Total revenues	**2,664**	2,661	3

(a) These are reimbursements for property management services rendered by the Cushman & Wakefield Group and received from the owners of the properties.

(b) Includes consideration (€ 13 million) for the July 1, 2007 – June 30, 2010 agreement between the Fiat Group and Juventus F.C. which gives the Fiat Group the right to exploit the images of Juventus F. C..

11. Other revenues from current operations

Details of other revenues from current operations are as follows:

€ in millions	**2008**	2007	Change
Gains on the sale of players' registration rights	**16**	19	(3)
Other income (a)	**18**	14	4
Operating grants	**1**	3	(2)
Total other revenues from current operations	**35**	36	(1)

(a) This mainly includes contributions for advertising and promotions, cost recoveries and other income of the Alpitour Group (€ 9 million) and insurance compensation and sundry income of Juventus F.C. (€ 7 million).

12. Personnel costs

Details of the composition of personnel costs are as follows:

€ in millions	**2008**	2007	Change
Salaries and wages	**(881)**	(898)	17
Employee costs relating to the property management activities of the Cushman & Wakefield Group (a)	**(196)**	(149)	(47)
Share of results paid to partners of the EMEA division of the Cushman & Wakefield Group	**(20)**	(48)	28
Social security contributions	**(52)**	(41)	(11)
Health insurance	**(30)**	(21)	(9)
Employee stock options	**(5)**	(12)	7
Other employee costs	**(21)**	(11)	(10)
Temp work costs	**(7)**	(5)	(2)
Employee severance indemnities expense	**(6)**	(5)	(1)
Total personnel costs	**(1,218)**	(1,190)	(28)

(a) The corresponding reimbursement by the owners of the properties is recorded in Revenues.

13. Other nonrecurring income (expenses)

Details are as follows:

€ in millions	**2008**	2007	Change
Impairment losses on assets	**(19)**	(9)	(10)
Net other income (expenses)	**(3)**	(19)	16
Total other nonrecurring income (expenses)	**(22)**	(28)	6

In 2008, impairments losses on assets were recognized by the subsidiaries Juventus F.C. (€ 12 million) and Cushman & Wakefield (€ 7 million) for:

- residual amount of the registration rights of the player Andrade, given that it will be impossible for the player to recover to play soccer professionally following a serious injury which occurred in July 2008, for € 7 million;
- video archives of Juventus F.C., carried out on the basis of the commercial exploitation plan and the estimated cash and economic flows acquired and expected, for € 5 million;
- goodwill recognized on the acquisition of the C&W Group in March 2007 (€ 7 million).

In 2008, net other income (expenses) comprise:

- income of € 8 million relating to the fair value change in the cash settled stock option plan approved on behalf of management of the subsidiary Alpitour;

- special fee on behalf of Mr Gabetti for € 5 million approved by the board of directors' meeting held on May 13, 2008;
- expenses for € 1 million relating to the penalty paid by the subsidiary Alpitour after it withdrew in advance from a rent contract on an Italian hotel structure;
- expenses associated with the C&W Group restructuring plan for € 6 million;
- € 2 million for the excess of IFIL's consolidated equity attributable to EXOR compared to the cost of IFIL shares purchased in January 2008;
- net expenses of Juventus F.C. for € 1 million, relating to the sale of Campi di Vinovo, formalized in 2007.

In 2007, impairment losses on assets included:

- the impairment loss of € 7 million, relating to the Juventus F.C. archives, carried out on the basis of the commercial exploitation plan and the estimated cash and economic flows acquired and expected;
- the impairment loss of € 2 million, regarding the design costs of the new Stadio delle Alpi that were capitalized in the past and are no longer recoverable in view of subsequent developments on the project.

In 2007, net other income (expenses) included:

- transaction costs and expenses incurred to close the dispute over the sale of La Rinascente for € 8 million;
- accrual for the current-year cost of € 13 million for the stock option plan approved for management of the subsidiary Alpitour;
- income of € 3 million from the reduction ruled by the Court of Appeals of Turin on the pecuniary administrative sanction imposed on IFIL S.p.A. by Consob;
- net loss from the sale of the investment in Campi di Vinovo, a company previously controlled by Juventus F.C., and the "Mondo Juve" business segment for € 1 million.

14. Financial income (expenses)

Details of the composition of financial income (expenses) are as follows:

€ in millions	2008	2007	Change
Gains (losses) on sales of investments:			
Intesa Sanpaolo (a)	**86**		86
Turismo&Immobiliare		1	(1)
Kelibia Beach S.A.		6	(6)
Gain on the contribution of the Fiorio Management business to AW Events S.r.l.		2	(2)
Net gains	**86**	9	77
Cost of net debt			
Income on current securities and cash and cash equivalents	**26**	33	(7)
Net income on exchange rate and interest rate hedging transactions	**4**	3	1
Exchange differences	**10**	(1)	11
Interest expenses on loan transactions	**(88)**	(73)	(15)
Commissions for unused credit lines	**(2)**	(3)	1
Total cost of net debt	**(50)**	(41)	(9)
Other financial income (expenses)			
Dividends received	**139** (b)	112	27
Interest income on other financial assets	**21**	12	9
Changes in the fair value of financial assets and liabilities	**(67)**	(1)	(66)
Total other financial income (expenses)	**93**	123	(30)
Financial income (expenses)	**129**	91	38

(a) Sale of 1.45% stake in ordinary capital stock.

(b) Received from Intesa Sanpaolo for € 110 million (unchanged compared to 2007), SGS for € 26 million and Gruppo Banca Leonardo for € 3 million (€ 2 million in 2007).

15. Income taxes

Details of income taxes recorded in the income statement are as follows:

€ in millions	**2008**	2007	Change
Current income taxes	**(27)**	(37)	10
Deferred income taxes	**(1)**	(6)	5
Total income taxes	**(28)**	(43)	15

In 2008, national income taxes are calculated at a rate of 27.5% on the estimated taxable income for the year. The income taxes for other jurisdictions are calculated at the enacted tax rates in the various countries.

In 2007, current national income taxes were calculated at 33% and deferred income taxes at 27.5%.

The reconciliation between the tax charge recorded in the consolidated financial statements and the theoretical tax charge (IRES), calculated on the basis of the tax rate in effect in Italy, is the following:

€ in millions	**2008**	2007
Profit before income taxes	**104**	129
Current tax rate in Italy	**27.5%**	33%
Theoretical income taxes	**(29)**	(42)
Effective income taxes	**(28)**	(43)
Difference	**(1)**	1
The difference can be analyzed as follows:		
Tax effect of difference between foreign tax rates and the theoretical Italian tax rate	**(1)**	(2)
Effect of tax rate reduction on deferred income taxes		(2)
Tax effect of other permanent differences	**(17)**	(27)
Deferred tax benefits not recognized	**3**	25
Other differences	**14**	7
Difference	**(1)**	1

16. Share of the profit (loss) of companies accounted for by the equity method

Details are as follows:

€ in millions	**2008**	2007	Change
Fiat Group	**467** (a)	566 (a)	(99)
Sequana Group	**(115)**	20 (b)	(135)
Sundry Cushman & Wakefield Group companies	**(1)**	1	(2)
Sundry Alpitour Group companies	**1**	0	1
Total	**352**	587	(235)

(a) Includes net negative consolidation adjustments for € 7 million (-€ 1 million in 2007), mainly for the assignment of preferred dividends to the minority interest.

(b) Includes a positive consolidation adjustment for € 8 million for the writedown of goodwill on the AWA Group since it was partially amortized by IFIL in prior years.

For additional information on the companies accounted for by the equity method, reference should be made to Note 22.

17. Profit (loss) from discontinued operations or assets held for sale

In 2008, there were no discontinued operations.

In 2007, the loss from discontinued operations or assets held for sale was € 8 million and included the share of the profit of Sequana for the first half of 2007 (+€ 46 million) and the loss realized on the sale of the 22% stake in the same company (-€ 54 million).

18. Earnings per share

		2008	2007
Average number of ordinary shares (all outstanding)		**160,044,740**	86,450,000
Average number of savings shares (all outstanding)		**9,168,894**	-
Average number of preferred shares outstanding, net of treasury stock		**66,080,860**	71,441,160

per savings share – basic	€	*n.a.*	n.a.
per savings share – diluted	€	*n.a.*	n.a.
Earnings (loss) from discontinued operations and assets held for sale attributable to preferred shares	€ in ml	*n.a.*	n.a.
per preferred share – basic	€	*n.a.*	n.a.
per preferred share – diluted	€	*n.a.*	n.a.

(a) The earnings attributable to the equity holders of the parent (€ 302 million) are increased by the earnings attributable to the minority interest of IFIL (€ 133 million) in that the EXOR shares issued on March 1, 2009 to service the merger exchange ratio have dividend rights from the date of January 1, 2008.

(b) Number of shares coming from the capital stock increase, net of treasury stock.

(c) For purposes of the calculation of 2008 earnings per share, the number of ordinary shares outstanding was increased by the average number of "potentially dilutive" ordinary shares which could arise from a hypothetical exercise of stock options. Moreover, the earnings attributable to the Group were adjusted to take into account the dilutive effects arising from the theoretical exercise of stock options granted by subsidiaries and associates of the Group using their own equity instruments.

19. Goodwill

The composition of goodwill by business segment is as follows:

€ in millions	**12/31/2008**	12/31/2007	Change
Goodwill on 48,750,000 IFIL ordinary shares purchased in 2007	**68**	68	0
IFIL Group	**68**	68	0
Goodwill on the acquisition of the Cushman & Wakefield Group (Group's share)	**322**	284	38
Goodwill on other companies of the Cushman & Wakefield Group	**53**	31	22
C&W Group Inc	**375**	315	60
Jumboturismo S.A.	**11**	11	0
Altamarea V&H Compagnia Alberghiera S.p.A.	**8**	8	0
Viaggidea S.p.A.	**6**	6	0
AW Events S.r.l.	**2**	2	0
Alpitour Group	**27**	27	0
Net goodwill	**470**	410	60

The analysis of the changes in goodwill, referring entirely to the C&W Group in 2008, is as follows:

€ in millions	**12/31/2008**	12/31/2007
GROSS AMOUNT		
Opening balance	**414**	964
Changes		
Increases through business combinations:		
- Cushman & Wakefield Group (Group's share)	**0**	318
Goodwill on the purchase of IFIL ordinary shares		68
Increase in the initial goodwill of the Cushman & Wakefield Group as a result of the change in percentage of consolidation	**3**	3
Deconsolidation of the Sequana Group	**0**	(935)
Exchange differences	**19** (a)	(35)
Increases and other changes	**43**	31
Total changes	**65**	(550)
Closing balance	**479**	414
ACCUMULATED IMPAIRMENT LOSSES		
Opening balance	**(4)**	(204)
Changes		
Exchange differences		
Impairment losses recognized in the income statement (Group's share)	**(5)**	(1)
Deconsolidation of the Sequana Group		200
Other changes		1
Total changes	**(5)**	200
Closing balance	**(9)**	(4)
NET AMOUNT	**470**	410

(a) Of which € 17 million is due to the goodwill originating from the acquisition of the C&W Group Inc.

Goodwill recognized on the acquisition of the C&W Group Inc. is deemed representative of the aggregate of the future economic benefits from the investment and cannot be identified separately.

Impairment test on the goodwill and trademarks of the Cushman & Wakefield Group

The main assumptions used in the calculation of the impairment test are presented below.

For the purpose of impairment testing, the C&W Group allocates the goodwill and trademarks to the Cash-Generating Units (CGU) identified by geographical area, which represent the lowest level within the C&W Group at which these assets are monitored.

The carrying amount of goodwill and trademarks are allocated as follows:

€ in millions	Goodwill	Trademarks	Total
United States	192	94	286
Canada	30	17	47
Latin America	14	7	21
EMEA	107	56	163
Asia	32	9	41
	375	**183**	**558**

in millions	U.S. $	€
United States	130.4	94
Canada	23.5	17
Latin America	10.0	7
EMEA	78.4	56
Asia	12.7	9
Total Cushman & Wakefield Group trademarks	**255.0**	**183**

The recoverable amount of a CGU to which goodwill and trademarks are allocated is the greater of its value in use and its fair value less costs to sell. The impairment testing at December 31, 2008 for all CGUs is based on their estimated fair value less costs to sell.

The estimated fair value less costs to sell for each of the CGUs is determined by an independent expert. The valuation method required the determination of an indicated Total Invested Capital (TIC) amount using both the discounted cash flow method and the market approach methods, which were weighted 60% and 40%, respectively, in determining the indicated fair value of equity less costs to sell for each of the CGUs.

Discounted Cash Flow Method (DCF)

The fair value less costs to sell determined using the DCF method was weighted 60% in determining the final fair value less costs to sell for each of the CGUs. Under the discounted cash flow method, cash flows were projected for each of the CGUs based on their respective revenue and EBITDA assumptions, as outlined above, along with an estimate of a terminal year value, based on market assumptions. The 2009 revenue and EBITDA assumptions were developed in connection with the company's annual operating plan process, while the projections for 2010 through 2012 were based on the expected growth in those years relative to the 2009 annual plan.

Market Approach Method

The fair value less costs to sell determined under the market approach was weighted 40% in determining the final fair value less costs to sell for each of the CGUs. Under the market approach, the multiple and EBITDA assumptions were used to calculate a fair value for each CGU for each of the years 2008, 2009 and 2010, and then those fair values were weighted to calculate an indicated TIC value for each CGU. The multiple assumptions in these calculations were derived from data publicly available relating to the guideline companies, including information relating to their revenue and EBITDA historical performance as well as that expected in 2009 and in subsequent years.

The key assumptions used to estimate the fair values under both methods are as follows:

Assumptions	USA	CANADA	SOUTH AMERICA	MEXICO	EUROPE	ASIA
Specific CGU assumptions						
Discount rate	15.0%	15.5%	19.5%	17.8%	17.5%	18.8%
CGU specific risk	2.0%	2.0%	1.0%	1.0%	3.5%	3.0%
Tax rate	40.0%	36.5%	25.5%	28.0%	26.4%	30.4%
Working capital %	-1.5%	-1.5%	-1.5%	-1.5%	-1.5%	-1.5%
Long-term growth rate	3.0%	3.0%	4.0%	4.0%	3.0%	4.0%
Terminal value model	fading	fading	fading	fading	fading	fading
Competitive advantage period in years	3	3	3	3	3	5
2008 EBITDA multiple	9.0x	n/a	n/a	n/a	n/a	n/a
2009 EBITDA multiple	7.0x	8.5x	n/a	9.0x	8.5x	9.0x
2010 EBITDA multiple	6.0x	7.0x	8.0x	7.0x	6.3x	8.0x
General assumptions						
Control premium	25.0%					
Consolidated tax rate	33.5%					
Equity risk premium	7.1%					
Cost to sell	1.0%					

The discount rates were established through the assessment of a number of inputs, including the expected return on equity, entity specific risk, country specific premiums, local cost of equity, the local statutory tax rate and debt to equity ratios. The CGU specific risk assumptions were determined after consideration of the execution risk of achieving the forecasted results for 2009 and beyond. The tax rates represent the statutory tax rates in the respective tax jurisdictions. The working capital percentage reflects recent experience and is in line with market participant levels, while the long-term growth rates were based on the estimated long-term gross domestic product and inflation. The terminal value was estimated using a derivation of the fading growth model, which more appropriately measures value during the period over which it is estimated earnings growth will reduce to the stable long-term growth rate. The EBITDA multiples for 2008 through 2010 were determined through an assessment of our guideline company multiples and taking into account local market differences. The control premium, equity risk premium and the cost to sell assumptions were all determined based on recent activity and trends in the market.

In addition to the key assumptions outlined above, the Company developed assumptions with respect to its expected future revenue and EBITDA growth and normalized EBITDA and EBITDA margins, as follows:

UGC	2007	2008 (Partial year)	2009	2010	2011	2012
United States						
Revenue growth	n/a	n/a	3.6%	8.6%	9.1%	8.9%

Normalized EBITDA margin	12.0%	13.8%	12.9%	9.6%	10.7%	12.4%
EBITDA margin	12.0%	13.8%	12.9%	9.6%	10.7%	12.4%
Mexico						
Revenue growth	n/a	n/a	-5.2%	10.0%	10.0%	10.0%
EBITDA growth	n/a	n/a	-61.8%	65.3%	15.8%	15.1%
Normalized EBITDA margin	1.1%	44.1%	8.7%	13.0%	13.7%	14.3%
EBITDA margin	1.1%	44.1%	8.7%	13.0%	13.7%	14.3%
Europe						
Revenue growth	n/a	n/a	-6.5%	10.5%	11.0%	6.0%
EBITDA growth	n/a	n/a	44.9%	42.8%	27.0%	15.0%
Normalized EBITDA margin	12.5%	24.2%	12.0%	14.0%	16.0%	17.3%
EBITDA margin	12.5%	24.2%	10.8%	14.0%	16.0%	17.3%
Asia						
Revenue growth	n/a	n/a	3.9%	15.0%	25.0%	30.0%
EBITDA growth	n/a	n/a	107.7%	17.4%	31.0%	54.4%
Normalized EBITDA margin	19.9%	19.1%	13.6%	13.9%	14.6%	17.3%
EBITDA margin	19.9%	19.1%	13.6%	13.9%	14.6%	17.3%

The resulting fair values less costs to sell and related carrying values of each of the CGUs as of the October 1, 2008 goodwill assessment date are as follows (in millions of U.S.$):

	USA	CANADA	SOUTH AMERICA	MEXICO	EUROPE	ASIA
Fair value less costs to sell	421.5	40.5	51.1	13.6	375.6	106.5
Book value of equity	431.0	37.6	32.7	7.1	322.1	83.9
	(9.5)	2.9	18.4	6.5	53.5	22.6

Due to the global credit market crisis in 2008 and the resulting impact on the business, which resulted in a significant decline in EBITDA in 2008 as compared to 2007 and the original planned results for 2008, combined with reduced expectations for 2009, the carrying amount of the United States CGU was determined to be higher than its recoverable amount and, therefore, an impairment loss of € 7 million ($9.5 million) was charged to the consolidated income statement of the Group for the year 2008 in “Other nonrecurring income (expenses)”. This impairment loss was completely allocated to goodwill on the 2007 acquisition of the C&W Group Inc. There were no such impairment losses on goodwill recorded in 2007.

The key assumptions used to determine the fair value less costs to sell represent C&W Group Inc.'s management’s best assessment of future trends in the real estate industry and are based on both external sources and internal sources, including historical data.

The estimated fair values less costs to sell are particularly sensitive to changes in the discount rate and revenue assumptions. For example:

- a 100 basis point increase in the discount rate would increase the impairment for the United States CGU by $26.4 million (€ 19 million); and
- a 10% decrease in future planned revenues would increase the impairment charge by $38.4 million (€ 27.6 million).

The fair value of the Canada CGU is more or less aligned to its carrying amount, therefore:

- a 150 basis point increase in the discount rate would cause the carrying value to exceed the recoverable amount and, therefore, cause an impairment $3 million (€ 2 million); and
- a 10% decrease in future planned revenues would cause the carrying value to exceed the recoverable amount and, therefore, cause an impairment of $3 million (€ 2 million).

C&W Group Inc. management does not believe that it is reasonably possible that a change in a key assumption on which it has based its determination of the CGU's recoverable amount would cause the CGU's carrying amount to exceed its recoverable amount.

20. Other intangible assets

The changes in other intangible assets are as follows:

At December 31, 2007	217	84	155	0	456
At December 31, 2008	**220**	**93**	**148**	**0**	**461**

The increase in intangible assets refers to the acquisition of players' registration rights by Juventus F.C. (€ 51 million), investments by the C&W Group (€ 14 million) and the Alpitour Group (€ 1 million).

Impairments of € 12 million are recognized by the subsidiary Juventus F.C. and included in “Other nonrecurring income (expenses)”; additional details are provided in Note 13.

At December 31, 2008, there are no commitments for the purchase of intangible assets.

In 2008, there are no research and development expenditures charged to the income statement.

Intangible assets completely amortized but still in use total € 23 million and refer to the concessions, licenses and trademarks of the Alpitour Group for € 16 million and other intangible assets for € 7 million.

“Concessions, licenses and trademarks” include:

– the amount attributed on acquisition of the C&W Group (March 2007) to the “Cushman & Wakefield” trademark, widely recognized by the market, for $255 million (€ 183 million at December 31, 2008).
  This trademark, which the C&W Group intends to renew continually, is classified as an asset with an “indefinite useful life” in that it will contribute to future cash flows indefinitely and is therefore not amortized but tested annually for impairment (Note 19).
– the government concession rights of the Alpitour Group, amortized over the duration of the original concessions.

Other intangible assets include the C&W Group's customer relationships (amortized over 16 years) and non-compete covenants (amortized over 4 years).

Players' registration rights are amortized on a straight-line basis over the period of the contracts; Juventus F.C. library products are assets with an indefinite life and are therefore tested for impairment.

21. Property, plant and equipment

The changes in property, plant and equipment are as follows:

€ in millions	Land	Buildings	Plant and machinery	Industrial equipment	Other assets	Construction in progress	Advances	**Total**

Increases in property, plant and equipment (€ 37 million) include investments made by the Alpitour Group (€ 16 million) mainly for restructuring work on the Hotel Donna Camilla Savelli in Rome and equipping the aircraft of Neos S.p.A., investments made by the C&W Group for € 17 million and those made by Juventus F.C. for € 4 million.

In 2008, no borrowing costs were capitalized. In 2007, the Alpitour Group had capitalized borrowing costs for € 1 million.

Commitments for the acquisition of property, plant and equipment amount to € 3 million at December 31, 2007 and relate to the C&W Group.

At December 31, 2008, the gross carrying amount of property, plant and equipment completely depreciated but still in use amounts to € 7 million (€ 19 million at December 31, 2007).

Finance lease contracts on property, plant and equipment

The carrying amount of property, plant and equipment includes € 19 million of assets leased under finance contracts at December 31, 2008 by Juventus F.C. for the Vinovo training center.

At December 31, 2007, the balance of € 22 million included the assets leased under finance contracts by Juventus Football Club S.p.A. and the Alpitour Group.

Leasing information is as follows:

Total other investments and other financial assets	**117**		52		**350**	160
Total	**1,413**		2,675		**350**	160

(a) Includes goodwill of € 5 million originating from the acquisition of 100% of the capital stock of Ancom USA Inc by the subsidiary Ifil Investissements in 2007.

The original purchase cost of the remaining interest held in Intesa Sanpaolo is € 352 million (€ 2.982 per share); at December 31, 2008, the negative fair value adjustment recognized in equity amounts to € 55 million. Such reduction in value compared to the original cost, equal to 15%, is not considered objective evidence of its impairment at December 31, 2008.

The investment in SGS is measured at fair value on the basis of the market price at December 31, 2008, equal to CHF 1,100 per share, (at the CHF/Euro exchange rate of

1.485), with the unrealized gain of € 399 million recognized in equity. The original carrying amount of the investment in SGS is € 470 million.

The investment in Gruppo Banca Leonardo was adjusted to fair value using the “warrant equity method with excess capital”, where the Group is valued through attainment of a ROE sustainable in the long term in line with the ROE in 2007. The valuation was confirmed by a comparison with the valuation using market multiples.

Non-current financial assets include:

- Perfect Vision Limited convertible bonds, subscribed to by the subsidiary Ifil Investissements, yielding a fixed rate of 5% until conversion of the bonds in 2013, which will give Ifil Investissements a 40% equity stake in Vision Investment Management Limited.
  This is a compound financial instrument issued in U.S. dollars. The principal portion measured using amortized cost at December 31, 2008 is equal to € 67 million and the relative interest recognized in the income statement is € 2 million; the exchange differences resulting from the valuation using the year-end exchange rate recognized in the income statement amount to € 7 million. The embedded derivative was measured at fair value with a corresponding entry to the income statement for € 4 million.
- the bonds issued by DLMD, maturing on July 27, 2010, subscribed to in 2007 by the subsidiary Ifil Investissements as part of the operation for the sale of the 22% stake in Sequana to DLMD. Such bonds are guaranteed by 10,806,343 Sequana shares in addition to cash collateral of approximately € 7 million.
  In July 2008, certain clauses of the bonds were renegotiated as a result of which the bonds were subdivided into Senior and Junior bond portions. The redemption of the Junior portion, in exchange for a higher yield, is subordinate to that of the Senior portion. Ifil Investissements holds a nominal amount of € 27 million, of which € 12 million refers to the Senior portion and € 15 million to the Junior portion.
  At December 31, 2008, the Junior portion was prudently written down for the full nominal amount.

Current financial assets include:

- bonds, and other short-term financial instruments held by foreign subsidiaries of the Holdings System, which do not meet the conditions for classification as “Cash and cash equivalents”;
- equity shares and bonds held by IFIL S.p.A. for trading, listed on the major European and United States markets, measured at fair value based on market prices translated, where necessary, at year-end exchange rates, with recognition of the change in fair value in the income statement for € 11 million. Therefore, for the measurement of the securities, the company did not avail itself of the amendment, applicable from July 1, 2008, to IAS 39 – Financial Instruments: Recognition and Measurement and IFRS 7 – Financial Instrument: Disclosure;
- securities subscribed to by Alpitour (residual amount of € 36 million) as part of the securitization of trade receivables (for additional information, reference should be made to Note 39).

The analysis of changes during 2008 is as follows:

	Non-current financial assets		Current financial assets	
€ in millions	**12/31/2008**	12/31/2007	**12/31/2008**	12/31/2007
Opening balance	**2,675**	2,673	**160**	1,109
Increases	**91**	201	**617**	125
Decreases	**(521)**	(12)	**(363)**	(909)
Increases through business combination of the Cushman & Wakefield Group		2		
Fair value recognized in equity	**(422)**	(97)	**(4)**	
Reversal of the accumulated fair value on the stake sold in the investment in Intesa Sanpaolo	**(415)**			
Fair value recognized through the income statement	**(11)**		**(59)**	
Deconsolidation of the Sequana Group		(105)		(172)
Exchange differences	**8**	(1)		(1)
Change in the scope of consolidation		29		2
Other changes and reclassifications	**8**	(15)	**(1)**	6
Total changes	**(1,262)**	2	**190**	(949)
Closing balance	**1,413**	2,675	**350**	160

Increases in non-current financial assets (€ 91 million) refer to investments made by the subsidiary Ifil Investissements. They include:

- the subscription to Perfect Vision Limited convertible bonds for € 58 million;
- the investment in Banijay Holding S.A.S. (17.03% of capital stock) for € 21 million, as part of the total commitment assumed by Ifil Investissements for € 42 million;
- the investments in NoCo B for € 12 million.

Decreases in non-current financial assets (€ 521 million) refer to:

- sale of the 1.45% stake in Intesa Sanpaolo ordinary capital stock for € 513 million;
- reimbursement of Ocean Club Méditerranée bonds for € 5 million;
- reduction of interest-earning deposits of the Alpitour Group € 3 million.

At December 31, 2008, the negative change in the investment in Intesa Sanpaolo, equal to € 1,268 million, is the result of the reversal of the carrying amount (-€ 928 million) of the stake sold (1.45% of ordinary capital stock) and the adjustment of the remaining interest to fair value at the end of the year (-€ 340 million).
The reversal of the carrying amount of the interest sold (-€ 928 million) includes the original purchase cost of € 513 million and the accumulated fair value of € 415 million.

The negative change in "fair value recognized in equity" (-€ 422 million) comprises the fair value adjustment at year-end 2008 of the investments in Intesa Sanpaolo (-€ 340 million), SGS (-€ 87 million) and Gruppo Banca Leonardo (+€ 5 million).

The change in fair value recognized through the income statement includes the impairment loss on the Junior portion of the bonds issued by DLMD for € 15 million and the positive value on the embedded derivative for € 4 million separated from the Vision bonds.

Increases in current financial assets (€ 617 million) include investments in securities and investments held for trading made by the subsidiary IFIL S.p.A. (€ 398 million) and the subsidiary Ifil Investissements (€ 180 million) and securities subscribed to by the subsidiary Alpitour (€ 36 million) and other for € 3 million.

Decreases in current financial assets are the result of the realization of investments in which a part of the liquidity was temporarily invested. The remaining balance of liquidity is included in “Cash and cash equivalents”.

The fair value of current securities is calculated using the market price at the balance sheet date.

Non-current other financial assets, excluding investments, by maturity, are as follows:

€ in millions	**12/31/2008**	12/31/2007
Within 1 year	**1**	5
From 1 to 3 years	**15**	32
From 3 to 5 years	**76**	2
Beyond 5 years	**25**	13
Non-current other financial assets, excluding investments	**117**	52

24. Other assets

Details are as follows:

Other receivables from related parties	**1**	2	(1)
Total other receivables	**182**	207	(25)
Total other current assets	**515**	652	(137)
Total other non-current and current assets	**608**	739	(131)

Other assets include receivables from the sale of the remaining investment in Campi di Vinovo S.p.A. and the "Mondo Juve" business segment for € 34 million (€ 24 million presented in non-current assets and € 10 million in current receivables) by the subsidiary Juventus F. C. in addition to the receivable from Costruzioni Generali Gilardi S.p.A. for the sale of the investments in Campi di Vinovo S.p.A. for € 8 million (of which € 5 million presented in non-current assets and € 3 million in current receivables). The receivables due from Campi di Vinovo were discounted to present value based on an estimate of collections times (various installments from 2009 to 2013) and are guaranteed. If this guarantee is used it would mean that Juventus F.C. would develop the initiative on its own.

In 2008, Campi di Vinovo S.p.A. concluded the administrative procedures connected with the commercial permits, including the design modification envisaged by the contract sealed between Juventus F.C. and the buyer Costruzioni Generali Gilardi S.p.A. on July 26, 2007.
On December 22, 2008, Costruzioni Generali Gilardi S.p.A. notified Juventus F.C. that the other company with which it had signed an agreement for the development of the "Mondo Juve" commercial center indicated that it did not wish to execute the contract. As a result of the difficulty in executing the above contract, Costruzioni Generali Gilardi S.p.A. was not able to make the payment by December 31, 2008 as established in the agreements signed with Juventus F.C. on July 26, 2007 (€ 12.5 million). Following Costruzioni Generali Gilardi S.p.A.'s explicit request, on February 5, 2009, Juventus F.C. and Costruzioni Generali Gilardi S.p.A. then signed a private contract for the novation and integration of the previous agreements in order to change the payment terms of the installment due on December 31, 2008 as follows: € 4 million by February 20, 2009 (duly paid) and the remaining € 8.5 million by December 20, 2009, which can be extended by agreement between the parties upon payment of interest to Juventus F.C.. As for the other payment dates fixed in the July 26, 2007 contract (€ 12.5 million at the end of the first year after the commercial center is opened to the public and, in any case, no later than December 31, 2012, and € 17.4 million at the end of the second year after the opening of the commercial center to the public and, in any case, no later than December 31, 2013), these dates may be postponed if and when Costruzioni Generali Gilardi S.p.A. obtains the extension of the commercial permits relating to the initiative (currently expiring in 2013).

The breakdown of other assets by maturity is as follows:

€ in millions	Within1 year	From 2 to 5 years	Beyond 5 years	**Total**
Other non-current assets	2	89	2	**93**
Trade receivables and commissions receivable	333			**333**
Other receivables	121		61	**182**
Balances at December 31, 2008	**456**	**89**	**63**	**608**
Other non-current assets		80	7	**87**
Trade receivables and commissions receivable	445			**445**
Other receivables	188		19	**207**
Balances at December 31, 2007	**633**	**80**	**26**	**739**

25. Cash and cash equivalents

The reconciliation of cash and cash equivalents in the statement of cash flows and the corresponding line items on the balance sheet is as follows:

€ in millions	**12/31/2008**	12/31/2007	Change
Cash and cash equivalents	**975**	919	56
Bank overdrafts and bank borrowings	**(2)**	0	(2)
Net cash and cash equivalents	**973**	919	54

Cash and cash equivalents include demand or short-term deposits and readily negotiable money market instruments and bonds; such investments are allocated over an appropriate number of counterparts, with the principal purpose of having investments which can readily be convertible into cash. The counterparts are chosen according to their creditworthiness and reliability.
However, in consideration of the current financial crisis, market conditions which might negatively affect normal operations of financial transactions cannot be excluded.

26. Assets held for sale

At December 31, 2008, assets held for sale amounting to € 3 million include the costs capitalized for the development of the commercial areas outside the Stadio Delle Alpi, following the preliminary contract signed between Juventus Football Club and Nordiconad Soc. Coop. for the purchase and sale of a business segment.

At December 31, 2007, assets held for sale amounting to € 3 million included property, plant and equipment of the companies Kiwengwa Ltd (€ 1 million) and Mediterranean Tourist Company (€ 2 million) held by the Alpitour Group which were sold in April 2008 for a total equivalent amount of € 7 million on the basis of a preliminary agreement signed in December. In addition, the investment in Semana S.r.l., held by Juventus Football Club (€ 30 thousand), was sold on March 4, 2008 to ESE S.p.A., which was already a stockholder of the company.

27. Equity

Equity attributable to the equity holders of the parent – Capital stock

At December 31, 2008, the capital stock, fully subscribed to and paid-in, amounts to € 163,251,460 and consists of 86,450,000 ordinary shares (52.96% of capital stock) and 76,801,460 (47.04% of capital stock) preferred shares all with a par value of € 1 each. The ordinary capital stock of the company is held entirely by Giovanni Agnelli e C. S.a.p.az.. Only preferred shares are listed on the Electronic Share Market of the Italian Stock Exchange (Blue Chip segment).

On March 1, 2009, the capital stock of EXOR was increased from € 163,251,460 to € 246,229,850 through the issue of 73,809,496 ordinary shares and 9,168,894 savings shares, all with a par value of € 1, with dividend rights from January 1, 2008. Such shares were attributed to the stockholders of the merged company IFIL in a ratio of 0.265 EXOR ordinary shares for each IFIL ordinary share and 0.265 EXOR savings shares for each IFIL savings share.

Following the merger, the capital stock of EXOR amounts to € 246,229,850 and consists of 160,259,496 ordinary shares, 76,801,460 preferred shares and 9,168,894 savings shares, all with a par value of € 1.

The directors have the right, for a period of five years from the date of the resolution passed on May 14, 2008, to increase, one or more times, also in divisible form, the capital stock up to an amount of € 561,750,000.

The ordinary and preferred shares are registered shares while the savings shares can either be registered or bearer shares, as elected by the stockholders, or as set out by law. The preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code and the second paragraph of art. 13 of the bylaws (regulations for conducting stockholders' meetings). The savings shares do not have voting rights in the stockholders' meetings. Pursuant to art. 146 of Legislative Decree 58/98, the savings shares have voting rights in the special stockholders' meetings of the holders of savings shares.

Pursuant to art. 27 of the bylaws, the profit of each year shall be appropriated as follows:

- 5% to the legal reserve until it reaches one-fifth of capital stock;
- the remaining profit, as dividends, unless otherwise resolved by the stockholders' meeting, in accordance with the applicable provisions, taking into account that, in the order of priority (i) the savings shares shall be entitled to a preference dividend, cumulative according to the following second paragraph, equal to 31.21% of their par value and a dividend higher than that of the ordinary shares equal to 7.81% of the same par value, and (ii) the preferred shares shall be entitled to a preference dividend and higher than that of the ordinary shares by 5.17% of their par value, which is not cumulative from one year to the next.

When in any one year, the dividends attributed to the savings shares are lower than that indicated above, the difference shall be added to the preference dividend of the next two years.
In the event the ordinary and/or savings shares are delisted, the preference dividend and the dividend higher than that of the ordinary shares to which the savings shares are entitled, shall automatically be increased to the extent that they are equal to, respectively, 32.15% and 8.75%
In the event of the distribution of reserves, the savings shares shall have the same rights as the other shares.
The board of directors, during the course of the year, to the extent that it considers it appropriate and possible in relation to the results of operations, may resolve to pay interim dividends on the dividends of the same year.

In accordance with art. 28 of the bylaws, dividends that are not claimed within 5 years of the date they become payable will be statute-barred and become the property of the company and appropriated to the Extraordinary Reserve.

In accordance with art. 30 of the bylaws, in the event of a wind-up, the assets of the company shall be distributed in the following order of priority:

- savings shares shall have a pre-emptive right up to the amount of € 3.78 per each savings share;
- preferred shares shall have a pre-emptive right up to the par value of the same shares;
- ordinary shares shall have up to the par value of the same shares;
- all three classes of stock shall have any balance remaining in an equal pro rata amount.

The objectives identified by EXOR and the companies in the “Holdings System” are to create value for all stockholders, safeguard business continuity, diversify investments by sector and geography and support the growth of investment holdings.
EXOR thus aims to maintain an adequate level of capitalization which allows it to generate a satisfactory economic return for stockholders and guarantee economic access to external sources of financing.

EXOR constantly monitors changes in the consolidated debt level of the Holdings System in relation to the current asset value of its investments and dividend flows from the operating holdings.
Although currently insignificant, a very prudent approach is adopted with regard to the use of financial leveraging.

Equity attributable to the equity holders of the parent – Retained earnings and other reserves and Gains (losses) recognized directly in equity

Details are as follows:

	Retained earnings				Gains (losses) recognized directly in equity

IFI – preferred shares	**5,360,300**	**13.15**	**70.5**	**6.98**

28. Stock option plans

At December 31, 2008, there are no stock option plans with underlying EXOR stock.

Stock option plans with underlying IFIL stock

The ordinary session of the IFIL stockholders' meeting held on May 13, 2008 approved a stock option plan for the chief executive officer, Carlo Barel di Sant'Albano, for 3,000,000 stock options corresponding to the same number of ordinary shares and for the employees of the IFIL Group (IFIL S.p.A. and the companies in the "Holdings System") who are or will be regarded as key people in the organization on the basis of the positions held or activities performed, for a maximum of 12,000,000 stock options. At December 31, 2008, a total of 6,525,000 options had been granted to 17 key employees.

The Plan is aimed at attracting and retaining managerial resources who hold important positions in the company while at the same time involving them in achieving performance objectives and aligning the economic incentives to the value of the company for the stockholders. The vesting period of the options granted will start from May 14, 2014 to May 14, 2016 and precisely: the first part, equal to 25% of the options, will vest on May 14, 2014, the second part, again equal to 25% of the options, will vest on May 14, 2015 and the third part, equal to 50% of the options, will vest on May 14, 2016.

The exercise price of the options granted is € 5.291 and equal to the arithmetic average of the official stock market prices of IFIL ordinary shares recorded at Borsa Italiana S.p.A. in the month prior to the date of the stockholders' meeting that approved the Plan.

The Plan will be implemented by granting the recipients free options on treasury stock purchased by IFIL S.p.A. or by companies of the "Holdings System" in accordance with existing laws.

From an accounting standpoint, the plan represents an "equity-settled stock-based payment transaction" discussed under paragraph 10 and subsequent articles of IFRS 2 and requires that the fair value of the services received be measured in reference to the fair value of the equity instruments at the grant date.

The fair value of services received must be recorded during the option vesting period with a corresponding increase in equity.

The valuation was made by an independent expert assuming that the options would be exercised by May 15, 2016 using the Black-Scholes model based on the following parameters:

Valuation date	5/13/2008
IFIL stock price at grant date	€ 5.286
Exercise price	€ 5.291
Volatility calculated using a trend analysis model (%)	30.56%
Vesting period	8 years
Expected dividends (%)	2.15%
Risk-free interest rate	4.1114%
Turnover rate (%)	1%

The fair value of the 9,525,000 options granted was determined to be € 15,263 thousand, divided as follows:

€ in thousands	Number of options granted	Total cost	Cost referring to the year
Chief executive officer IFIL S.p.A.	3,000,000	4,807	376
Key employees IFIL S.p.A. (13)	4,425,000	7,091	554
Total IFIL S.p.A.	7,425,000	11,898	930
Key employees of Ifil Investissements S.A. and other subsidiaries in the Holdings System (4)	2,100,000	3,365	273
Total	**9,525,000**	**15,263**	**1,203**

The cost referring to the year amounts to € 1,203 thousand, of which € 376 thousand is classified as fees of the chief executive officer and € 827 thousand as personnel costs. The corresponding entry of € 1,203 thousand is recorded in the stock option reserve.
The plan will continue in EXOR S.p.A. with the underlying ordinary shares of the same company. The adjusted number of options granted is 2,524,125 and the adjusted exercise price is € 19.97.

Stock option plan with underlying Alpitour stock

On December 15, 2005, in execution of the resolution passed by the board of directors' meeting held on November 11, 2005, the Executive Committee of IFIL S.p.A. approved a stock option plan for two managers of the Alpitour Group designed to promote their loyalty to the IFIL Group and provide an incentive to develop and appreciate the investments of the IFIL Group in the tourism sector.

The plan calls for purchase options on Alpitour shares to be granted to the chairman and chief executive officer, D.J. Winteler, and the general manager, F. Prete, respectively, equal to 6% (2,127,000 shares) and 5% (1,772,500 shares) of Alpitour's capital stock.
After approval on the part of IFIL S.p.A., the Alpitour S.p.A. board of directors may in the future grant purchase options on Alpitour shares to other managers who hold important operating positions equal to 4% of Alpitour's capital (now 1,418,000 shares).
The purchase options may be exercised, at one or more times, during the period between the dates of the approval of the 2006/2007 and 2008/2009 Alpitour financial statements at the price of € 2.24 per share, corresponding to the valuation of the Alpitour Group, equal to € 79.4 million, performed in December 2005 by a specially appointed expert.
IFIL S.p.A. and the managers of Alpitour S.p.A., finally, exchanged reciprocal purchase and sale options, exercisable during the same above period, on Alpitour shares that will have been purchased by the same managers; the exercise price will be established on the basis of the appraisal which will be performed using the same valuation principles applied in the December 2005 valuation.

From an accounting standpoint, the plan is a cash-settled stock-based payment transaction subject to paragraph 30 and subsequent paragraphs of IFRS 2, which requires the liability of the plan to be measured at fair value and, therefore, the options of the plan, at every reporting date, until plan expiration.

At December 31, 2008, the fair value of each option right of the plan is estimated at € 2.07 for a total of € 8,075 thousand (€ 15,871 thousand at December 31, 2007) recorded in "Other current liabilities". The reduction of the liability from last year (€ 7,796 thousand) was recognized in the income statement in "Other nonrecurring income (expenses)", as the portion relating to the current year.

The estimate was performed by an independent expert who applied a binomial model of valuation to the options based on the following parameters:

Stock price at grant date (€)	(a)	2.24
Exercise price (€)	(a)	2.24
Underlying stock price at 12/31/2008 (€)	(b)	4.14
Estimated volatility (%)	(c)	48.05%
Remaining option life (months)	(d)	13
Estimated dividends (%)	(e)	0.00
Risk-free interest rate (%)	(f)	4.39%

(a) The exercise price of the options was assumed to be equal to the par value of one ordinary Alpitour S.p.A. share at the grant date, quantified on the basis of an estimate performed by an independent expert.

(b) The fair value of the underlying share (Alpitour S.p.A. ordinary share) at the date of reference of December 31, 2008, was quantified on the basis of an internal estimate prepared by applying valuation principles consistent with those used in December 2005 by the independent expert.

(c) The expected volatility has also been determined by referring to the historical volatility, measured over a period consistent with the remaining life of the shares in the plan, of a sample of listed companies operating in the same sector as Alpitour S.p.A..

(d) The expiration date of the options was established as the date of the approval of the Alpitour S.p.A. financial statements for the year 2008/2009, fixed, conventionally, as January 31, 2010. At the date of reference of December 31, 2008, the options thus have a remaining life of 13 months (1 year and 1 month). The options vested at the end of the vesting period (January 31, 2008) and can be exercised from that date until the contractual expiration date (January 31, 2010).

(e) The application of the valuation model assumes the absence of the payment of dividends.

(f) The risk-free interest rate is assumed to be equal to the return on government securities having a residual life consistent with the expiration of the options in the plan.
An assumption was also included in the "binomial" model for the early exercise of the option rights during the period between the end of the vesting period and contractual expiration date of the options.

Cushman & Wakefield Group stock option plans

There are two separate stock option plans which are summarized in the following table: "Employee Stock Purchase Plan Options" and "Management Options":

	Employee Stock Purchase Plan			Management Options		
	Tranche 1	Tranche 2	Total	EBITDA	EBITDA Margin	Total
Date of board of directors' meeting	12/19/05	12/19/05		3/30/07	3/30/07	
Number of options granted	11,166	7,385	18,551	8,070	5,380	13,450
Grant date	12/14/05	06/29/06		4/1/07	4/1/07	
Vesting date	1/1/08	1/1/09		2008/2012	2008/2012	
Exercise price at grant date	$548	$782		$1.259	$1.259	
Term of options post-vesting	10 years	10 years		10 years	10 years	
Options forfeit prior to December 31, 2006	(938)		(938)			
Options assumed by C&W Group at April 1, 2007	10,228	7,385	17,613	8,070	5,380	13,450

The Employee Stock Purchase Plan options outstanding at December 31, 2008 have an exercise price in the range of $548 and $782 and an average remaining contractual life of approximately 7 years.

The Management Options outstanding at December 31, 2008 have an exercise price of $1,259 and an average remaining contractual life of approximately 8 years.

	2008			
	Employee Plan		Management Options	
	Number of shares	Average exercise price ($)	Number of shares	Average exercise price ($)
Outstanding at 1/1/2008	12,054	685.91	13,450	1,258.68
Granted during the period	-	-	2,195	1,251.17
Exercised during the period	(16)	548.02	-	1,258.68
Forfeited during the period	(302)	548.02	(950)	1,258.68
Cancelled during the period	(7,092)	782.39	(328)	1,258.68
Outstanding at 12/31/2008	4,644	782.39	14,367	1,279.41
Exercisable at 12/31/2008	4,644	548.02	1,092	1,258.68

	2007			
	Employee Plan		Management Options	
	Number of shares	Average exercise price ($)	Number of shares	Average exercise price ($)
Outstanding at 4/1/2007	17,613	646.29	13,450	1,258.68
Granted during the period	-	-	-	-
Exercised during the period	-	-	-	-
Forfeited during the period	(597)	663.05		
Cancelled during the period	(4,962)	548.02		
Outstanding at 12/31/2007	12,054	685.91	13,450	1,258.68
Exercisable at 12/31/2007	4,962	548.02	-	-

In accordance with the provisions of IFRS 2, the appraisal was based on the Black-Scholes pricing model using the following assumptions:

	Employee Plan		Management Options	
	Tranche 1	Tranche 2	Tranche 1	Tranche 2
Stock price at grant date ($)	578.68	906.73	1,190 – 1,332	1,298.87
Exercise price at grant date ($)	548.02	782.39	1,190 – 1,332	1,258.68
Estimated volatility (%)	35%	35%	40%	35%
Remaining option life (years)	6.5	6.5	10.0	10.0
Expected dividends (%)	1.20	1.22	n.a.	n.a.
Risk-free interest rate (%)	4.22%	5.12%	3.85 – 4.00	4.74

The volatility is based on the historical volatility of comparable public companies.
Because the C&W Group does not have historical exercise data, it used the midpoint between the vesting date and the contractual term to determine the expected term of the stock options.

During 2008, costs of € 5 million were capitalized for both stock option plans.

29. Equity attributable to the minority interest

		12/31/2008			12/31/2007		
€ in millions	%	**Capital and reserves**	**Profit (loss)**	**Total**	Capital and reserves	Profit (loss)	Total
IFIL Group	30	**1,684**	**126**	**1,810**	2,020	221	2,241

30. Provisions for employee benefits

The companies of the Group provide post-employment benefits for their active employees and retirees, either directly or by contributing to independently administered funds. The way these benefits are provided varies according to the legal, fiscal and economic conditions of each country in which the Group companies operate, the benefits generally being based on the employees' remuneration and years of service. Post-employment benefits are provided under defined contribution and/or defined benefit plans.

In the case of defined contribution plans, the Group companies pay contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. Once the contributions have been paid, the Group has no further payment obligations. The contribution cost is recognized when the employee has rendered his/her service and this cost is recorded in the income statement in "Personnel costs".

Defined benefit plans may be unfunded, or they may be wholly or partly funded by contributions by a company, and sometimes by its employees, into a company, or fund, that is legally separate from the employer and from which the employee benefits are paid. Finally, the companies of the Group grant certain other long-term benefits to its employees; these benefits include those generally paid when an employee attains a certain level of seniority or when a specified event occurs. In this case the measurement of the obligation reflects the probability that payment will be required and the length of time for which payment is expected to be made.

Details of the provisions for employee benefits recognized in the financial statements at December 31, 2008 and 2007 are the following:

	Non-current part		Current part	
€ in millions	**12/31/2008**	12/31/2007	**12/31/2008**	12/31/2007

Pension plans	**13**	10	**0**	0
Total post-employment benefits	**37**	34	**2**	4
Other employee benefits	**5**	11	**40**	109
Total provisions for employee benefits	**42**	45	**42**	113

Post-employment benefits

Employee severance indemnities

Employee severance indemnities relating to the companies of the Group operating in Italy represent the obligation due to employees by law (recently amended by Law 296/06) that has accrued and which will be paid upon termination of employment. In certain circumstances, a portion of the indemnity may be paid as an advance during the employee's service life. This is an unfunded defined benefit plan, considering the benefits almost entirely accrued, with the sole exception of the revaluation.

After the change made to the regulations for employee severance indemnities by Law 296 dated December 27, 2006 (Budget Law 2007), and subsequent decrees and regulations, for those employees who have asked, the portion of employee severance indemnities accruing from January 1, 2007 has been transferred to a complementary pension plan chosen by the employees and these therefore fall under defined contribution plans.

For those employees who did not elect the transfer of the accrued portion of employee severance indemnities, beginning January 1, 2007, the calculation of employee severance indemnities, including the portion accruing, will be made according to the usual actuarial method.

In accordance with IAS 19 – Employee Benefits, the Italian companies of the Group have included employee severance indemnities in defined benefit plans and measure them with actuarial techniques using the Project Unit Credit Method.

Besides employee severance indemnities, established by art. 2120 of the Italian Civil Code, the parent EXOR S.p.A. guarantees other forms of benefits (termination benefits, loyalty bonuses, health care plans, defined benefit and defined contribution pension plans) under company or individual supplementary agreements. These are described in Note 27 to the separate financial statements.

Pension plans

The C&W Group funds a certain number of defined contribution plans set up pursuant to the laws in force in the countries in which it operates.

The European partnership (C&W UK) also provides a form of hybrid pension plan (UK Plan) which has features of both defined contribution and defined benefit plans.

C&W UK ceased its contributions to the plan effective March 31, 2002 and, subject to certain transitional agreements, introduced a defined benefit plan for employees starting from that date.

Changes in the present value of post-employment benefit obligations and the fair value of assets servicing the plans during the course of the last two years are as follows:

€ in millions	Balance at 12/31/2007	Current service cost	Financial expenses	Actuarial gains (losses)	Benefits paid	Losses (gains) on curtailments and/or settlements	Exchange differences	Change in scope of consolidation and other changes	**Balance at 12/31/2008**

Pension plans		3			(1)	47		(4)		**45**
Total post-employment benefit plans	-	3	-	-	(1)	47	-	(4)	-	**45**
Total net liabilities at December 31, 2007	**27**	**96**	**3**	**(5)**	**(48)**	**96**	**(1)**	**(7)**	**(3)**	**158**

(a) The balances at December 31, 2006 are net of the amounts relating to the Sequana Group which was deconsolidated in 2007.

Post-employment benefits are calculated on the basis of the following actuarial assumptions:

	December 31, 2008		December 31, 2007	
	Employee severance indemnities	**Pension plans**	Employee severance indemnities	Pension plans
Discount rate		**6.00%**	4.6-4.7%	6.00%
Future salary increase (inflation included)	**2.2-3.7%**		2-3,5%	
Inflation rate	**2.20%**		2.00%	
Expected return on plan assets		**7.00%**		7.13%

The assumptions used for the calculation of pension funds are as follows:

- the discount rate is the rate of return at the reporting date on AA credit-rated bonds that have maturity dates approximating the terms of the C&W Group's obligations and that are denominated in the same currency in which the benefits are expected to be paid;
- the mortality rate is based on statistical tables;
- the expected return on plan assets servicing the plan is based on the total return of the portfolio and not the sum of the expected returns of the individual assets. This rate approximates the historical annual rate of the plan assets.

The “UK Plan” assets include marketable equity securities in both United Kingdom and United States companies and fixed-rate debt securities.
The investment policies and strategies for the plan assets are established to achieve a reasonable balance between risk, likely return and administration expenses, as well as to maintain funds at a level to meet minimum funding requirements. In order to ensure that an appropriate investment strategy is in place, an analysis of the plan’s assets and liabilities is completed periodically.

	Fair value of plan assets		Expected return	Fair value of plan assets		Expected return
	December 31, 2008		**2008**	December 31, 2007		2007
	Target in %	€ in millions	in %	Target in %	€ in millions	in %
Equity securities	**87.2%**	**11**	**6.00%**	87.2%	38	7.13%
Debt instruments	**7.5%**	**17**	**6.00%**	7.5%	5	7.13%
Cash	**5.3%**	**2**	**6.00%**	5.3%	2	7.13%

The estimated expense for contributions to be paid to the defined benefit plan in 2009 amounts to £ 1.5 million (€ 2 million).

The expected long-term rate of return on assets is 6.16% (7.13% in 2007). The expected long-term rate of return is based on the portfolio as a whole and not on the sum of the returns on individual asset categories. The return is based exclusively on historical returns, without adjustments.

The total amounts recognized in the income statement for post-employment benefits are the following:

€ in millions	**2008**	2007
Current service cost	**5**	6
Financial expenses	**3**	3
Expected return on plan assets	**(3)**	(3)
Losses (gains) on curtailments and/or settlements	**0**	(1)
Total (income) expenses for post-employment benefits	**5**	5

Other employee benefits

Other employee benefits, of which € 5 million is non-current and € 40 million is current, mainly include the liabilities of the C&W Group.

31. Provisions for other liabilities and charges

The composition of the provisions is as follows:

	Current portion		Non-current portion	
€ in millions	**12/31/2008**	12/31/2007	**12/31/2008**	12/31/007
Restructuring provisions	**3**	0	**0**	0
Other risks provisions	**14**	14	**99**	100
Tax provision	**6**	0	**6**	1
Total	**23**	14	**105**	101

During the fourth quarter of 2008, in response to the credit markets' impact on the global economy and the business, the C&W Group announced a number of cost cutting initiatives, including reductions in spending in a number of direct expense categories and a global reduction in workforce. These reduction efforts were necessary to improve the C&W Group's cost structure and its general operating efficiencies.
The C&W Group recorded an accrual for a restructuring charge of approximately € 5 million during the fourth quarter of 2008, primarily attributable to workforce reductions and other related benefits, and utilized the provision account for € 2 million.

The current portion of the other risks provisions (€ 14 million) includes amounts set aside for pending disputes of the C&W Group for € 11 million and the Alpitour Group for € 3 million.

The non-current portion of the other risks provision is due within five years.

Changes in the current and non-current provisions in 2008 and 2007 are as follows:

€ in millions	Balance at 12/31/2007	Accruals	Release of provisions used	Other changes	**Balance at 12/31/2008**
Restructuring provisions	0	5		(2)	**3**
Other risks provisions	114	21	(18)	(4)	**113**
Tax provision	1	4		7	**12**
	115	30	(18)	1	**128**
Effect on the income statement:					
Operating profit (loss) from current operations		24	(18)		
Other nonrecurring income (expenses)		6			

€ in millions	Balance at 12/31/2006	Accruals	Release of provisions used	Release of provisions not used	Sequana Group deconsolidation	Cushman & Wakefield Group acquisition	Other changes	**Balance at 12/31/2007**
Restructuring provisions	66	7	(14)		(76)		17	0

Ecological risks provisions	34	3	(2)	(1)	(34)			0
Other risks provisions	128	30	(9)	(11)	(30)	8	(2)	114
Tax provision	0			(1)		2		1
	533	42	(31)	(55)	(396)	10	12	115
Effect on the income statement:								
Operating profit (loss) from current operations		16	(13)	(2)				
Other nonrecurring income (expenses)		21	(18)	(43)				
Other financial income (expenses)		5		(10)				

32. Pending litigation

IFIL S.p.A. and subsidiaries in the "Holdings System"

Proceedings relative to the contents of the press releases issued by IFIL S.p.A. and Giovanni Agnelli e C. S.a.p.az on August 24, 2005

On February 21, 2006, Consob notified Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone as well as IFIL and Giovanni Agnelli e C. of its objections in respect of the start of a sanctionary proceeding under art. 187-septies of the Consolidated Law on Finance under the assumption that each of those individuals violated art. 187-ter, paragraph 1 (Market Manipulation) of the Consolidated Law on Finance in relation to the content of the press releases diffused by IFIL and Giovanni Agnelli e C. on August 24, 2005 and that the companies violated the responsibility of entities pursuant to art. 187-quinquies of the Consolidated Law on Finance and joint and several responsibility pursuant to art. 6, paragraph 3 of Law 689/1989.

On February 13, 2007, the Consob sanctionary measure (Resolution 15760) was notified which, at the conclusion of the proceeding, applied the following pecuniary administrative sanctions:

- to Gianluigi Gabetti (chairman of IFIL and chairman of Giovanni Agnelli e C.) € 2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL and € 2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to Franzo Grande Stevens (director of IFIL) € 2 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL and € 1 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to Virgilio Marrone (chief executive officer and general manager of IFI) € 500 thousand in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to IFIL € 4.5 million;
- to Giovanni Agnelli e C. € 3 million;

and the additional following administrative sanctions: temporary inability to assume positions of administration, direction and control in listed companies or in companies that are part of the same group of listed companies:

- to Gianluigi Gabetti: for six months;
- to Franzo Grande Stevens: for four months;
- to Virgilio Marrone: for two months.

The persons and companies involved in the sanctionary measure filed appeals with the Court of Appeals of Turin. In the opposing judgment, the Court of Appeals, in its decision of December 5, 2007, reduced the administrative sanctions from a total of € 16 million to € 6.3 million. The reduction for IFIL was from € 4.5 million to € 1 million and for Giovanni Agnelli e C. from a total of € 3 million to € 600 thousand and for Gianluigi Gabetti from a total of € 5 million to € 1.2 million in addition to a reduction of two months, from six to four months, in respect of the additional administrative suspension.

In July 2008, IFIL filed an appeal with the Court of Cassation against the ruling by the Court of Appeals of Turin. Appeals were also filed with the Court of Cassation by the other parties involved in the Consob sanctionary measure. In October 2008, Consob notified the company that it had filed a counter-appeal and an incidental appeal asking for the rejection of the main appeal and the cancellation of the reduction of the sanctions originally levied. Consob acted in the same manner against the other petitioners. In November 2008, IFIL filed a counter-appeal with the Court of Cassation against Consob's incidental appeal. The other parties referred to in Consob's incidental appeal also filed a counter-appeal with the Court of Cassation.

In the penal proceedings for the same press releases, on November 7, 2008, the Preliminary Hearing Judge of the Turin Court committed Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone to trial for the offense pursuant to art. 185 of the Consolidated Law on Finance, as well as IFIL and Giovanni Agnelli e C., as those responsible administratively under Legislative Decree 231/2001, setting a hearing for March 26, 2009.

Alpitour Group

In reference to the damages to the “Bravo Club” resort in Zanzibar caused by the fire in January 2001, a case is pending before the competent authorities in Tanzania to establish the compensation for damages due from Royal Insurance. During 2005, Royal Insurance was sentenced, in the judgment of first instance, to pay the damages requested in addition to interest and legal fees. The insurance company appealed this decision and the case is now being judged in the second instance. Based on available information, it is believed that there is reasonable certainty that the judgment of the first instance will be upheld.

Furthermore, in 2008, the case of the Alpitour Group versus INPS was settled.

Cushman & Wakefield Group

The C&W Group is a party to various matters in litigation. These matters generally relate to disputes and claims involving commission agreements, employment agreements, and other contractual matters.

The Group believes that while some of these matters may be ultimately resolved against it, such claims will not have a material effect on the financial position and results of operations of the Group.

Juventus F.C.

Almeida Gomes De Andrade's registration rights

On July 9, 2008, during a personalized training session at Pinzolo, the player Almeida Gomes De Andrade Jorge Manuel was the victim of another serious injury to his left knee (relapse of the fracture of the rotula) twice operated in the past season. A new osteosynthesis operation was thus needed. The post-surgery prognosis is a number of months.

Given the impossibility for the player to recover to play professionally, the Company has proceeded to fully write down the residual book value of the player's registration rights with a negative effect on income in the 2007/2008 financial year for € 7 million.

As a consequence of this, on August 8, 2008, the company sent a request to terminate the contract to the Arbitration Board of the National Professional League that organized the medical examination of the player, conducted on October 2, 2008, and confirmed the player's inability.

In November, in turn, the player resorted to the Arbitration Board to ask for the termination of the contract as Juventus had failed to pay the wages due while the arbitration process was pending, asking for the related damages. The company appeared, challenging the unfounded nature of the player's action.

The attempt at conciliation failed and the Arbitration Board must therefore give its ruling relating to the demands for contractual termination by the parties. The first hearing was held on February 13, 2009 and the following hearings were postponed. At the current time it is not possible to predict the outcome of this dispute.

Guardia di Finanza access

On July 3, 2008, the *Guardia di Finanza* entered company headquarters to conduct a general examination of substance as permitted by and pursuant to art. 32 and art. 33 of DPR 600/73, art. 51 and art. 52 of DPR 633/1972 and art. 35 of Law 4/1929, concerning the period from July 1, 2005 to the date of access for direct taxes and from January 1, 2006 to the date of access for VAT and other indirect taxes.

Moreover, following the company's involvement, pursuant to Legislative Decree 231 of 2001, in the proceedings pending at the Turin Courts for financial misrepresentation, the examination has also been extended to the years 2001/2002, 2003/2004 and 2004/2005, which would otherwise have been partly statute barred.
The examination is currently in progress.

VAT receivables on income from UEFA Champions League

Following resolution 174/E, on May 25, 2004, the Revenue Agency of Turin approved the right to the reimbursement of VAT regarding UEFA competitions for the 2000/2001 and 2001/2002 seasons for a total of € 5 million. Following this approval, the company proceeded to recognize the related receivable with a corresponding entry to extraordinary income. Part of the receivable was received in June 2004 for € 1.2 million.
The remaining amount of approximately € 4 million was sold without recourse to a factoring company in December 2004 and was derecognized from the balance sheet from that date. Of the total amount sold to the factoring company, the Revenue Agency later reimbursed the amount in installments for € 3 million. In July 2008, the Revenue Agency notified Juventus and the factoring company of its refusal to pay the last installment of € 2 million citing disputes over the justification of the request for reimbursement presented by Juventus. This refusal is in contrast with the original acknowledgment of the receivable in May 2004. On October 15, 2008, the company appealed together with the factoring company to the tax authorities to challenge the assertions of the Revenue Agency and in any case reserves the right to take any possible action to protect itself later in civil proceedings.
At this moment in time it is not possible to predict the outcome of this dispute.

Proceedings at the Turin Courts

In reference to the proceedings underway at the Turin Courts for financial representation, after the original filing of charges only against some former directors, on October 16, 2008, notification was received at the company office of the conclusion of inquiries and the filing of documents also against the company, held to be responsible under Legislative Decree 231 of 2001, limited to some transactions for the sale/purchase of football players. Given the lack of any organizational model, the company proposed the compromise of the payment of € 70,000.
In these same proceedings, on October 29, 2008, the judge for the preliminary investigations, at the request of the public prosecutors, decided instead to close the part of the inquiry regarding the sale of Campi di Vinovo S.p.A..
The preliminary hearing is currently in progress.

Proceedings at the Naples Courts

With regard to the proceedings in course in Naples (R.G. 276585/06), by order of March 24, 2009, the Courts, in upholding the appeals presented by the Juventus F.C. defense, ordered the “exclusion of all civil parties from the process” and consequently the loss of the effectiveness of the constitution of third-party liability”. Juventus F.C. is therefore definitely out of the case pending in Naples.

Como Calcio Bankruptcy

The bankruptcy of Como Calcio in June 2006 led to action brought against Juventus F.C. involving a claim for payment of € 1,580,000 allegedly still due to Como Calcio for the sale of the registration rights of the players Piccolo and Pederzoli.
Juventus F.C. appeared before the courts and requested that the liquidator's demands be rejected as the sum had already been paid and asked that Mr Preziosi be summoned to court so that Juventus could be relieved of responsibility and held unaccountable in the event of a judgment against it. The first hearing in the case was adjourned to March 12, 2008 so that Mr Preziosi could be summoned. Mr Preziosi was summoned and appeared and asked that the demands against him be rejected. The inquiry is closed and a hearing is scheduled to set out the conclusions on July 9, 2009.

33. Consolidated net financial position

The composition of the gross and net financial position of the consolidated companies is as follows:

€ in millions	Gross debt position	Financial assets	Net financial position (debt)/liquidty
EXOR S.p.A.	(171)	0	(171)
IFIL S.p.A. and the "Holdings System"	(973)	1,132	159
Cushman & Wakefield Group	(170)	62	(108)
Alpitour Group	(73)	107	34
Juventus Football Club S.p.A.	(17)	28	11
Total	**(1,404)**	**1,329**	**(75)**

In accordance with Consob Communication 6064293 dated July 28, 2006, the composition of the net financial position of the EXOR Group is provided below:

€ in millions	**12/31/2008**	12/31/2007	Change
Non-current financial liabilities			
IFIL 2007/2017 bonds	**(745)**	(744)	(1)
IFIL 2006/2011 bonds	**(199)**	(200)	1
Debt	**(348)**	(214)	(134)
Total non-current financial liabilities	**(1,292)**	(1,158)	(134)
Non-current other financial assets	**4**	8	(4)
Non-current net financial position (A)	**(1,288)**	(1,150)	(138)
Current financial liabilities			
Debt	**(65)**	(347)	282
Current portion of medium/long-term debt	**(31)**	(52)	21
Derivative financial instruments	**(16)**	0	(16)
Total current financial liabilities	**(112)**	(399)	287
Current financial assets			
Bonds and equity shares held for trading	**347**	152	195
Derivative financial instruments	**1**	6	(5)
Receivables and other financial assets	**2**	2	0
Total current financial assets	**350**	160	190
Cash and cash equivalents	**975**	919	56
Current net financial position (B)	**1,213**	680	533
Consolidated net financial position (A+B)	**(75)**	(470)	395

34. Bonds and other debt

The composition is as follows:

	Non-current portion		Current portion	
€ in millions	**12/31/2008**	12/31/2007	**12/31/2008**	12/31/2007
IFIL bonds 2007/2017	**(745)**	(744)	**(22)**	(22)
IFIL bonds 2006/2011	**(199)**	(200)	**(1)**	(1)
Debt	**(348)**	(214)	**(74)**	(376)
Derivative financial instruments	**0**	0	**(16)**	0
Total bonds and other debt	**(1,292)**	(1,158)	**(113)**	(399)

The bonds issued by IFIL S.p.A. were admitted for trading on the Luxembourg Stock Exchange.

The bonds contain covenants that are common in international practice for bond issues of this type. In particular, they contain negative pledge clauses (the obligation to extend any real present or future guarantees given as collateral on the assets of the issuer on other bonds and other credit instruments to these bonds to the same degree), disallowing a change of control and providing for periodic disclosure. The 2006/2011 bonds also establish other commitments such as respecting a maximum debt limit in relation to the amount of the portfolio and maintaining a rating by one of the major agencies. Non-compliance with these covenants allows the bondholders to ask for the immediate redemption of the bonds. Finally, standard events of default are envisaged in the case of serious non-fulfillment such as, for example, failure to pay interest. These covenants were complied with at December 31, 2008.

Standard & Poor's rated the two bond issues “BBB+”, in line with the current rating of IFIL S.p.A. long-term debt.

The 2007/2017 bonds were issued at a price equal to 99.554% of their face value with a 5.375% annual coupon which guarantees a return equal to the 10-year swap rate plus a spread of 80 basis points, at the time of issue.

The IFIL 2006/2011 bonds, issued on June 9, 2006 for a nominal amount of € 200 million, maturing June 9, 2011, pay interest at the 3-month Euribor rate plus a spread of 68 basis points.

Debt recorded in current and non-current liabilities for € 422 million (€ 59 million at December 31, 2007) includes debt of EXOR S.p.A. (€ 167 million), the C&W Group (€ 165 million), the Alpitour Group (€ 73 million) and Juventus F.C. (€ 17 million).

EXOR S.p.A.

With regard to EXOR S.p.A., non-current bank debt amounts to € 150 million (€ 100 million at December 31, 2007). In order to guarantee fixed interest rates, interest rate swap contracts were put into place for the full amount; at December 31, 2008, the fair value of such contracts is negative for € 5 million.

Bank debt is classified as non-current according to the remaining term of the line granted and the duration of the hedging contracts.

Current bank debt amounts to € 16 million (€ 294 million at December 31, 2007) and includes a loan of € 14 million due by January 2009 and bank overdrafts for the remaining amount of € 2 million.

Cushman & Wakefield Group

The debt of the C&W Group amounts to € 165 million (€ 73 million at December 31, 2007) and includes the following categories of debt:

- Senior Revolving Credit Facility secured on May 29, 2007 for $350 million. At December 31, 2008, the outstanding balance is $219 million (€ 157 million), of which $154 million (€ 111 million) at the average rate of 3.97%, $14.1 million (€ 10 million) at the average rate of 5.40% and $8.9 million (€ 6 million) at the average rate of 4.67%;
- Seller Note – Le Page for $5.5 million (€ 4 million) at a rate of 7%;
- Seller Note – Burnham for $2.5 million (€ 2 million).

The Senior Credit Facility is covered by four covenants to be maintained for the entire term of the credit facility including leverage ratios as defined in the contract.
The financial covenants have been complied with from the time the credit facility was secured until December 31, 2008.

Alpitour Group

The debt of the Alpitour Group totaling € 73 million (€ 103 million at December 31, 2007), comprises:

- debt relating to the securitization of trade receivables (€ 45 million);
- syndicated loan, coordinated by BNL and Efibanca (€ 23 million);
- CRS loan (€ 4 million) and other (€ 1 million).

The medium and long-term loan contracts state that the Alpitour Group must comply with the covenants calculated on consolidated equity, economic and financial data (mainly net debt/equity and Ebitda/net debt). In view of the seasonal nature of the business, these ratios, as established by the relevant contracts, are calculated on an annual basis at the year-end closing date.
At October 31, 2008, these ratios were fully within the limits established by the covenants.

Juventus F.C.

Debt of Juventus F.C. refers entirely to the debt with Unicredit Leasing S.p.A., formerly Locat S.p.A., for the lease of the Vinovo sports training center and other minor leases for € 17 million, of which € 9 million is due beyond 5 years.

Derivative financial instruments, equal to € 16 million, comprise some interest rate swap contracts put into place by IFIL S.p.A. to guarantee a fixed interest rate over the entire bond period 2006-2011 (the fair value at December 31, 2008 is negative for € 5 million), interest rate swap contracts put into place by EXOR S.p.A. on non-current debt (the fair value at December 31, 2008 is negative for € 5 million) as well as foreign exchange forward contracts put into place by the C&W Group to hedge possible changes in exchange rates on intercompany trading transactions (the fair value at December 31, 2008 is negative for € 6 million).

35. Deferred income taxes

The composition and the change in deferred tax assets is as follows:

€ in millions	Property, plant and equipment and intangible assets	Tax losses	Revenues taxed in prior years	Tax-deferred gains	Other	**Total**
Balance at December 31, 2007	2	6	9	0	9	**26**
Income taxes charged (reversed) to the income statement		(5)	(4)	(5)	6	**(8)**
Taxes relating to items credited to equity					(1)	**(1)**
Net other movements						**0**
Balance at December 31, 2008	**2**	**1**	**5**	**(5)**	**14**	**17**

€ in millions	Property, plant and equipment and intangible assets	Tax losses	Revenues taxed in prior years	Tax-deferred gains	Employee benefits	Deferred compensation plan	Other	**Total**

(a) Relating to taxes on the fair value of the investment in Intesa Sanpaolo S.p.A..

The analysis of unused tax loss carryforwards on which deferred tax assets have not been calculated is as follows:

	Taxable base				Estimated tax
€ in millions	Within 1 year	From 2 to 4 years	Beyond 4 years	Total	benefit
At December 31, 2008					
Current tax losses	154	413	572	1,139	311
At December 31, 2007					
Current tax losses	204	463	633	1,300	347

Deferred tax assets on tax losses are recognized to the extent that their recoverability is highly probable in the following year or in the medium term, taking into account the taxable income forecast in medium-term operating plans.

36. Other liabilities

Details of other liabilities are as follows:

€ in millions	**12/31/2008**	12/31/2007	Change
Other non-current liabilities			
Other non-current liabilities and other payables	**49**	93	(44)
Other non-current payables to related parties	**2**	1	1
Commissions payable	**6**	6	0
Deferred compensation plans	**1**	1	0
Total other non-current liabilities	**58**	101	(43)
Other current liabilities			
Trade payables			
Trade payables	**208**	234	(26)
Trade payables to related parties	**10**	10	0
	218	244	(26)
Commissions payable	**108**	134	(26)
Total trade payables	**326**	378	(52)
Other current liabilities			
Payables for direct taxes	**25**	17	8
Payables for indirect taxes	**13**	22	(9)
Payables to employees and similar	**56**	33	23
Payables on purchases of property, plant and equipment	**35**	29	6
Other payables	**91**	139	(48)

Total trade payables and other current liabilities	**562**	644	(82)
Total other non-current and current liabilities	**620**	745	(125)

For additional information on payables to related parties, reference should be made to Note 39.

Other non-current and current liabilities by maturity are as follows:

€ in millions	Within 1 year	From 2 to 5 years	Beyond 5 years	**Total**
Other non-current liabilities		47	11	**58**
Trade payables	326			**326**
Other current liabilities	236			**236**
Balances at December 31, 2008	**562**	**47**	**11**	**620**
Other non-current liabilities		91	10	**101**
Trade payables	378			**378**
Other current liabilities	266			**266**
Balances at December 31, 2007	**644**	**91**	**10**	**745**

37. Commitments

Details are as follows:

€ in millions	**12/31/2008**	12/31/2007
Commitments undertaken		
Sureties, guarantees of notes and other guarantees	**76**	137
Commitments for the purchase of investments and financial assets	**78**	71
Commitments for the purchase of property, plant and equipment	**0**	3
Goods on deposit with third parties	**1**	1
Commitments to make loans	**7**	0
Total commitments undertaken	**162**	212
Commitments received		
Sureties, guarantees, guarantees of notes and other guarantees	**158**	187
Other commitments	**59**	63
Total commitments received	**217**	250

Commitments by due date are as follows:

€ in millions	Until canceled	Within 6 months	Between 6 months and 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
At December 31, 2008							
Commitments undertaken	81	28	21	25		7	**162**
Commitments received		110	35	55	17		**217**
At December 31, 2007							
Commitments undertaken	81	60	29	37	5	0	**212**
Commitments received	0	177	41	4	28	0	**250**

Future minimum lease payments relating to operating leases are as follows:

€ in millions	From 0 to 6 months	Between 6 months and 1 year	From 2 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
At December 31, 2008	**48**	**44**	**143**	**98**	**116**	**449**
At December 31, 2007	28	28	81	51	58	246

In 2008, floating-rate lease contracts total € 17 million (€ 18 million in 2007). There are no fixed-rate leases.

Lease expenses recognized in the 2008 income statement amount to € 87 million (€ 75 million in 2007). They refer to lease contracts of the Alpitour Group which include leases of hotel complexes (€ 25 million) and dry-lease installments by the subsidiary Neos (€ 18 million), as well as installments paid by C&W Group for operating leases (€ 44 million).

Commitments undertaken at December 31, 2008 amount to € 162 million and mainly refer to sureties, guarantees of notes and other guarantees for € 76 million, as well as commitments for the purchase of investments and financial assets for € 78 million, and commitments to make loans for € 7 million.

Sureties, guarantees of notes and other guarantees (€ 76 million) mainly include sureties on behalf of suppliers of tourist services, financial offices and public entities provided by the Alpitour Group and other guarantees of the Alpitour Group for € 42 million, in addition to sureties of Juventus F.C. for € 34 million provided by leading credit institutions.

Commitments for the purchase of investments and other financial assets (€ 78 million) refer to commitments undertaken by the subsidiary Ifil Investissements, as follows:

- commitment for a maximum remaining investment of $46 million (€ 33 million) in the limited partnership NoCo B LP which groups a series of funds managed by Perella Weinberg Partners L.P.; as of December 31, 2008 Ifil Investissements S.A. has invested $16 million (€ 11 million);
- commitment to invest € 24 million in the Perella Weinberg Real Estate fund. As of December 31, 2008 Ifil Investissements has invested € 1 million;
- commitment for a further investment of € 21 million in Banijay Holding S.A.S..

Commitments to make loans refers to the commitment undertaken by C&W Group with its employees.

Commitments received amount to € 217 million and refer to sureties, guarantees, guarantees of notes and other guarantees for € 158 million (of which € 155 million is for sureties provided by third parties to Juventus F.C. and € 3 million for sureties provided by public entities and suppliers of tourist services to the Alpitour Group) and sales commitments of the Alpitour Group for € 59 million for travel bookings.

The main sureties relating to Juventus F.C. are as follows:

- surety of € 41 million provided by leading credit institutions on behalf of Sky Italia S.r.l. to guarantee the contract for the sale of television broadcasting rights for championship home games for the 2008/2009 season;
- surety of € 25 million issued by leading credit institutions in favor of Reti Televisive Italiane S.p.A. to guarantee the contract for the sale of television broadcasting rights for the championship home games for the 2008/2009 season;
- surety of € 42 million provided by Sportfive Italia on behalf of Sportfive S.p.A. to guarantee the commercial contract for the exclusive naming right, as well as some sponsor promotional rights, relating to the new stadium;
- other sureties for € 4 million.

Other guarantees received by Juventus F.C., for € 43 million, refer to guarantees for the receivable from Campi di Vinovo S.p.A. and notes.

Procedures for the identification and control of commitments

The information regarding commitments, in addition to all other data and information used for consolidation purposes, is transmitted to EXOR S.p.A. through the consolidation process of the IFIL Group under the responsibility of the legal representatives of the individual companies and the holding companies consolidated by IFIL that are required to prepare consolidated financial statements who sign a representation letter addressed to the parent.
On the basis of information known to EXOR S.p.A., no significant commitments have been omitted by the companies of the Group.

38. Additional information on financial instruments and financial risk management policies

The carrying amounts and the relative income (expenses) originating from each category of asset and liability classified in accordance with IAS 39 are presented as follows:

	December 31, 2008		
€ in millions	Carrying amount	Income	Expenses
Financial assets			
At fair value through profit or loss			
- held for trading	348		(55)
- designated initially			
Derivative instruments designated as hedges	1		
Investments held to maturity	8		
Loans and receivables (a)	1,603	47	(3)
Available-for-sale assets	1,319	214	
Total	**3,279**	**261**	**(58)**
Financial liabilities			
At fair value through profit or loss			
- held for trading			
- designated initially			
Derivative instruments designated as hedges	16	8	(4)
Debt at amortized cost	970		(53)
Debt at cost	751		(34)
Total	**1,737**	**8**	**(91)**

(a) Includes cash and cash equivalents for € 975 million.

	December 31, 2007		
€ in millions	Carrying amount	Income	Expenses
Financial assets			
At fair value through profit or loss			
- held for trading	154	4	
- designated initially	0		
Derivative instruments designated as hedges	6		
Investments held to maturity	12		
Loans and receivables (a)	1,382	33	0
Available-for-sale assets	2,635	112	
Total	**4,189**	**149**	**0**
Financial liabilities			
At fair value through profit or loss			
- held for trading	0		
- designated initially	0		
Derivative instruments designated as hedges	0		
Debt at amortized cost	970		(32)
Debt at cost	963		(38)
Total	**1,933**	**0**	**(70)**

(a) Includes cash and cash equivalents for € 919 million.

Financial assets and liabilities for which the fair value can not be objectively determined and that are recorded at cost have not been included in the asset and liability categories indicated in IAS 39.

Fair value of financial assets and liabilities and the criteria for the estimation of fair value

Financial assets held for trading represented by listed securities are measured using the market price at year-end and the change in fair value is recognized in the income statement in financial income (expenses).

Available-for-sale financial assets represented by listed securities are measured at fair value using the market price at year-end and the unrealized gains or losses are recognized in equity. For additional information on the measurement of available-for-sale financial assets, reference should be made to Note 23.

Available-for-sale financial assets represented by unlisted securities may be measured by independent experts. To this end, it should be noted that the investment in Gruppo Banca Leonardo was aligned to fair value based on an estimate resulting from the application of the "warrant equity method with excess capital" measurement criteria.

For trade receivables and payables, moreover all due within one year, the fair value is not significant in that their carrying amount approximates fair value.

Derivative financial instruments are measured at fair value using the discounted cash flow method.

Risk management

EXOR S.p.A. and the companies of the Holdings System

EXOR S.p.A. is not exposed to credit risk since the counterparts are mainly represented by high-credit-quality leading banking institutions.

IFIL S.p.A. and the companies which form the Holdings System are exposed to credit risk insofar as they invest a portion of their cash in bonds issued by leading bank and corporate counterparts, that, in any case, are selected according to their credit worthiness. Instead, the relevant investments denominated in currencies other than the Euro, U.S. dollars in particular, are exposed to currency risks; in view of the permanent characteristics of such investments, transactions to hedge the risk of exchange rate fluctuations on those currencies were not put into place.

As far as liquidity risk is concerned, financing needs and cash flows are managed with the aim of optimizing financial resources. In particular, outgoing cash flows from current operations are substantially financed by incoming flows from ordinary business activities.
Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or difficulties in raising sufficient funds that can be readily used. In this sense, the subsidiary IFIL S.p.A. operates so that it has financial resources available by issuing bonds and acquiring irrevocable credit lines with expiration dates and amounts consistent with its investment plans.

IFIL S.p.A. also assesses and manages its exposure to fluctuations in interest rates in accordance with its financial management policies and uses derivative financial instruments to fix some of the financing obtained at a pre-set interest rate. The only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on one of the bonds issued.

Alpitour Group

The Alpitour Group regularly assesses its exposure to various types of risks and manages these risks using traditional and derivative instruments in accordance with its management and control policy. This policy does not allow the use of derivatives for speculative purposes but they are used for the management of fluctuations in exchange rates, interest rates and fuel prices for hedging purposes.

The Alpitour Group, and particularly the aviation division, is subject to the risk of fluctuations in fuel prices largely in connection with international political stability and other outside factors. Since fuel is a primary factor in air transport, price fluctuations could have a significant impact on the Group's margin and, consequently, the fuel price risk exposure is hedged by commodity swaps and zero cost collars.
The exposure to exchange rate risks on commercial transactions in foreign currencies is mainly hedged by forward and zero cost collar contracts.
The exposure to interest rate risks on medium- and long-term loans is mainly hedged by interest rate swaps and zero cost collars.

Cushman & Wakefield Group

Credit risk exposure of the C&W Group is mainly influenced by the characteristics of each individual client. Other risk factors, including the default risk of the industry and country in which customers operate has less of an influence on credit risk. That depends on the type of services rendered and knowledge of the quality of the clients.

Juventus F.C.

Juventus F.C. does not have significant concentrations of credit risk and has appropriate procedures in place to minimize such risk exposure. Receivables from Italian soccer companies are guaranteed by the compensation mechanism of the National Professional League while receivables from foreign soccer companies are largely guaranteed by sureties or other guarantees.
A large part of Juventus F.C.'s transactions (sales and purchases) are in Euro; thus the company is not subject to fluctuations in exchange rates to any relevant degree.
The company manages liquidity risk by keeping the bank loans secured from leading credit institutions at levels that avert financial pressure situations and are sufficient to meet operating and investment needs.

Credit risk

Credit risk exposure is principally represented by trade receivables and the concentration of credit risk, however, is mitigated by a large number of counterparts.

Trade receivables are expressed in the financial statements net of the provision for impairment for the risk that counterparts will be unable to fulfill their contractual obligations, the creditworthiness of the customer and historical data.

Credit risk regarding the other financial assets of the Group, which include cash and cash equivalents, available-for-sale assets, receivables and some derivatives, have a maximum risk equal to the carrying amount of the assets in the case of the insolvency of the counterpart.

The amount of financial assets past due and not impaired, represented by trade receivables in the category "loans and receivables", is detailed as follows:

	Past due and not impaired						
€ in millions	30 days	30 to 60 days	60 to 90 days	90 to 180 days	180 to 360 days	more than 360 days	Total
2008							
Trade receivables	**1**	**20**	**5**	**7**	**3**	**0**	**36**

	Past due and not impaired						
€ in millions	30 days	30 to 60 days	60 to 90 days	90 to 180 days	180 to 360 days	more than 360 days	Total
2007							
Trade receivables	136	20	21	11	3	3	194

Movements in the provision for the impairment of receivables and other financial assets for the years 2008 and 2007 are as follows:

€ in millions	**12/31/2008**	12/31/2007
Beginning balance	**30**	23
Accruals	**9**	8
Uses	**(5)**	(6)
Acquisition of the Cushman & Wakefield Group	**0**	7
Exchange differences	**1**	1
Other changes	**0**	(3)
Ending balance	**35**	30

Information on the credit risk of the EXOR Group is presented below.

EXOR S.p.A. and the companies in the Holdings System

EXOR S.p.A. and the companies in the Holdings System are exposed to credit risk insofar as they invest a portion of their cash in bonds issued by leading bank and corporate counterparts, that are in any case selected according to their credit worthiness. At December 31, 2008 and December 31, 2007, there are no financial assets past due and not written down.

Alpitour Group

Transactions for the sale of receivables

At October 31, 2008, the balance relating to the monthly securitization program of trade receivables begun by the Alpitour Group in 2006 amounts to € 45 million. The securitization operation formalized by Alpitour S.p.A. with Banca Calyon in Milan provides for a revolving credit line which can be used on a monthly basis up to a net amount of € 55 million against the sale of the trade receivables. Furthermore, in accordance with the contract terms, in exchange for the monthly sale of receivables and the amount of utilization requested (monthly program), Alpitour is obliged to subscribe to short-term securities (30-day maturities) issued by a French-registered associate of the Calyon Group, the amount of which is determined on the basis of the quality of the receivables sold and the relative degree of concentration. At October 31, 2008, short-term securities were subscribed to for an amount of € 36 million against a monthly program of € 45 million; the net use of the securitization line at the year-end closing date is therefore equal to € 9 million against a credit line made available by Calyon for € 55 million.

The Alpitour Group does not have any particular concentrations of credit risk since its credit exposure is distributed over a large number of counterparts and customers.
Trade receivables are expressed net of the provision for receivables impairment which amounts to € 24 million at December 31, 2008 (€ 22 million at December 31, 2007).

Cushman & Wakefield Group

The credit risk of the C&W Group is represented by the carrying amount of financial assets recorded in cash and cash equivalents for $82.2 million (€ 59 million) and the carrying amount of trade receivables for $308 million (€ 221 million).
Trade receivables are expressed net of the provision for receivables impairment which amounts to $14.5 million (€ 10 million) at December 31, 2008.

Liquidity risk

The companies of the Group control the liquidity risk by planning investments of liquidity, monitoring the maturities of financial investments and financial assets and the expected cash flows from operations.
The residual contract maturities for all the financial liabilities which fall under the application of IAS 39 are indicated below.
The table has been prepared by allocating the remaining cash flows from existing contracts, including principal and interest; with regard to floating-rate loans, the most recent fixed-rate coupon rate with the bank counterpart was used for the projection of future maturities, taking into account the effect of the hedging transactions.

	December 31, 2008					
	Nominal amount					
€ in millions	Within 6 months	Between 6 months and 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**

Payables to suppliers and commissions payable	(377)					**(377)**
Total	**(816)**	**(13)**	**(217)**	**(381)**	**(962)**	**(2,389)**

Comments in respect of EXOR S.p.A. and the companies forming the Holdings System are presented below.

Outgoing flows from current operations are substantially financed by incoming flows from ordinary business and cash availability.

Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or difficulties in raising sufficient funds that can be readily used to support operating and investment activities. In this sense, the EXOR Group operates so as to have irrevocable credit lines available with expiration dates and amounts consistent with its investment plans.

At December 31, 2008, the EXOR Group has unused credit lines for € 2,615 million (€ 2,680 million at December 31, 2007).

Overall credit lines of the Alpitour Group total € 290 million, of which € 53 million is used for short-term financing and € 19 million for medium-term financing.

To supplement its internally generated cash flows and the maximum peak of seasonal cash flow demands which arise at the start of the second quarter of the year, the C&W Group secured a $350 million Senior Credit Facility on May 29, 2007. This facility will be used to support acquisition opportunities and fund seasonal cash flow requirements during the year.

The breakdown of maturities by credit line is as follows:

	December 31, 2008						
	Nominal amount						
€ in millions	Until canceled	Between 0 and 6 months	From 6 months to 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
Portion of credit lines utilized	34	5	3	211	175		**428**
Portion of credit lines not utilized	1,425		210	535	445		**2,615**
Total credit lines	**1,459**	**5**	**213**	**746**	**620**	**0**	**3,043**

	December 31, 2007						
	Nominal amount						
€ in millions	Until canceled	Between 0 and 6 months	From 6 months to 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
Portion of credit lines utilized	175	221	3		193		**592**
Portion of credit lines not utilized	1,309	174	100	375	722		**2,680**
Total credit lines	**1,484**	**395**	**103**	**375**	**915**	**0**	**3,272**

Market risk

The EXOR Group is principally exposed to exchange rate and interest rate risks, since the Group operates internationally in different currency areas and uses financial instruments which generate interest, in addition to price risks on equity shares and other listed financial assets.

Financial risks are managed by each subgroup in which the Group's activities are divided.

Exchange rate risk

An analysis of debt by currency is as follows:

€ in millions	EUR	GBP	USD	Other	**Total**
At December 31, 2008					
IFIL bonds 2007/2017	(767)				**(767)**
IFIL bonds 2006/2011	(200)				**(200)**
Debt	(279)	(35)	(113)	(11)	**(438)**
Total debt	**(1,246)**	**(35)**	**(113)**	**(11)**	**(1,405)**
At December 31, 2007					
IFIL bonds 2007/2017	(766)				**(766)**
IFIL bonds 2006/2011	(201)				**(201)**
Debt	(521)		(58)	(10)	**(589)**
Total debt	**(1,488)**	**0**	**(58)**	**(10)**	**(1,556)**

The Group is exposed to risks from fluctuations in exchange rates which can affect the results of operations and equity.

The transactions put into place by the companies of the Group to hedge the above currency positions are described below.

EXOR S.p.A. and the companies in the Holdings System

EXOR S.p.A: does not have either financial assets or liabilities denominated in currencies other than the Euro. Consequently, there is no direct currency risk.

IFIL S.p.A. does not have financial liabilities denominated in currencies other than the Euro. Some of the assets held for trading and cash and cash equivalents at December 31, 2008 (respectively, € 16 million and € 14 million) are denominated in currencies other than the Euro. These are securities held for trading and cash and cash equivalents which have both been adjusted to the year-end exchange rate.

The subsidiary Ifil Investissements is exposed to exchange rate risk on bonds issued by Perfect Vision Ltd. in U.S. dollars. A change in the exchange rate of the American currency against the Euro either up or down by 10% would have an effect on the result for € 7 million.

Alpitour Group

The Alpitour Group, since it operates internationally, is exposed to market risk from fluctuations in exchange rates.
Alpitour S.p.A. has forward contracts in place for a total nominal amount of € 5 million to manage the risk of fluctuations in exchange rates hedging the exposure in foreign currencies for the next year. The fair value of IRS at October 31, 2008 is estimated at a positive € 902 thousand.

Cushman & Wakefield Group

Exchange rate risk relating to the operations of the C&W Group is limited since the companies of the Group conduct their operations in their functional currency.
Exposure to currency risk can only come from intercompany commercial transactions. To mitigate this risk, in 2008 the Group has 32 forward exchange rate contracts outstanding on the main currencies to which it is exposed. The fair value of these financial instruments at December 31, 2008 is negative for $6,236 thousand (€ 4,481 thousand).
The exchange risk relating to debt is limited to the foreign currency debt referring to the portion of the Senior Revolving Credit Facility: in Euro for $14.1 million, in GBP for $42 million and in CAD for $14.9 million.
The C&W Group believes that the companies exposed to this risk will generate sufficient cash flows in the future to repay their debt, therefore, no hedging instruments have been put into place.

Sensitivity analysis for exchange rate risk

A sensitivity analysis at the balance sheet date has been carried out in respect of the financial instruments exposed to the exchange rate risk of the Eur/USD, Eur/GBP and risks referring to other currencies represented principally by trade receivables and payables, financial assets and derivative financial instruments of the Alpitour Group and the C&W Group.

Alpitour Group

The sensitivity analysis for the exchange risk of the Alpitour Group used the data of the financial statements at October 31, 2008 and is based on the following assumptions:

- the amount shown in the financial statements for financial assets and liabilities has been adjusted by applying a symmetrical percentage change of 10% to the year-end exchange rate;
- the amount of derivative financial instruments for the management of the fuel risk has been adjusted on the basis of a 5% increase or decrease in the price of fuel;

- for derivative financial instruments (forward purchase of U.S. dollars), the effects have been calculated assuming that the volatility of the markets is unchanged at year-end.

The Alpitour Group is exposed to exchange rate risk on financial assets for € 7 million and on financial liabilities for € 19 million.
A 10% increase or decrease in the exchange rates of the major foreign currencies against the Euro would have an effect on the result for € 1.2 million and a positive effect on equity for € 0.7 million.

Cushman & Wakefield Group

The sensitivity analysis for the exchange rate risk of the C&W Group has been calculated by adjusting the amount shown in the financial statements for financial assets and liabilities by applying a symmetrical percentage change of 10% to the year-end exchange rate. The C&W Group is exposed to exchange rate risk on financial assets for € 167 million and on financial liabilities for € 111 million.
A 10% increase or decrease in the exchange rates of the major foreign currencies against the Euro would affect equity by € 4 million.

Interest rate risk

The companies of the Group use external financial resources obtained in the form of financing and invest available liquidity in monetary and financial market instruments. Any change in market interest rates can affect the cost and yield of the various forms of financing, causing an impact on the level of the Group's financial expenses.
The interest rate risk is managed by the individual consolidated groups which establish the appropriate mix between fixed-rate and floating-rate financing using interest rate swaps and zero cost collars.

The fair value effect of the transactions hedging interest rate risk put into place by the consolidated companies is as follows:

€ in thousands	**12/31/2008**	12/31/2007	Change
IFIL S.p.A. and the Holdings System	**(5,119)**	3,938	(9,057)
EXOR S.p.A..	**(4,910)**	1,776	(6,686)
Alpitour Group	**13**	168	(155)
Total	**(10,016)**	5,882	(15,898)

EXOR and the companies in the Holdings System

EXOR S.p.A. has some interest rate swap contracts in place at December 31, 2008, for a notional amount of a total of € 150 million to hedge the risk of fluctuations in interest rates on bank debt with fair value for a negative € 4,910 thousand (positive for € 1,776 thousand at December 31, 2007).

IFIL S.p.A. has some interest rate swap contracts in place at December 31, 2008, for a notional amount of a total of € 200 million to hedge the risk of fluctuations in interest rates on the IFIL bonds 2006-2011 with fair value for a negative € 5,119 thousand (positive for € 3,938 thousand in 2007).

Alpitour Group

Alpitour S.p.A. has interest rate swap contracts and zero cost collars, for a notional amount of a total of € 15 million, to hedge the risk of fluctuations in interest rates on the syndicated loan secured on November 30, 2006. The fair value of these contracts at October 31, 2008 is estimated at a positive € 13 thousand (a positive € 168 thousand at October 31, 2007).

Juventus F.C.

Juventus F.C.'s debt mainly bears interest at floating rates. The company, however, does not believe it necessary to initiate procedures to limit the risks connected with the volatility of interest rates since any impact related to them is considered insignificant.

Cushman & Wakefield Group

The C&W Group is exposed to interest rate risks associated with the Revolving Credit Facility of $350 million. At this time, management has not put into place any form of hedging.

The fair value recorded in the cash flow hedge reserve refers to the hedge of cash flows relating to interest expenses on loans which will arise in the years 2009 to 2011 (approximately € 16 million for the years 2009 to 2010 and approximately € 5 million for the year 2011).

Analysis of debt by interest rate

The analysis of debt by interest rate at December 31, 2008 shows that the rates are mainly between 3% and 4% for € 278 million, between 4% and 5% for € 1,000 million, between 5% and 7.5% for € 115 million, with further debt for € 12 million considered at a 0 rate.
The analysis of debt by interest rate at December 31, 2007 showed that the rates were mainly between 4% and 5% for € 595 million and between 5% and 7.5% for € 958 million.

Sensitivity analysis for interest rate risk

A sensitivity analysis at the balance sheet date has been carried out in respect of financial instruments exposed to interest rate risk. In the case of floating-rate liabilities, the analysis assumes that the exposure at the end of the year remained constant for the entire year. The assumptions used for the model are as follows:

- for debt: a symmetrical change of 50 basis points is applied;
- for interest rate swaps: the change in fair value is recalculated applying a parallel and symmetrical shift of 50 basis points to the current interest rate curve at the balance sheet date. In determining the above effect, account is taken of the consequent impact on the reversal of the cash flow hedge reserve to the income statement.

An increase or decrease in the interest rates of 50 basis points, all other variables remaining constant, would produce a higher or lower pre-tax result of the Group for the year 2008 of € 4.6 million (€ 3.6 million in 2007); the cash flow hedge reserve would be higher or lower by € 0.2 million.

Price risk

EXOR and the companies in the Holdings System

EXOR and the Holdings System are exposed to price risk originating from investments in the capital stock of other companies held for trading or for strategic purposes, classified in the categories of available-for-sale and assets held for trading and current securities.

Alpitour Group

The Alpitour Group, particularly the aviation division, is subject to the risk of fluctuations in fuel prices that are largely associated with international political equilibrium and other outside factors. Since fuel is a primary factor in air transport, price fluctuations could have a significant impact on the Alpitour Group's margin. Price risk exposure is hedged by commodity swaps and zero cost collars with high standing Italian and international financial institutions. At October 31, 2008, the subsidiary Neos has commodity swaps and zero cost collars outstanding for a notional amount of € 13 million. The fair value of these hedges is an estimated positive value of € 154 thousand. At October 31, 2007, there were no contracts outstanding since they had been closed during the year.

Cushman & Wakefield Group

The C&W Group is exposed to equity price risk arising from available-for-sale equity securities held for meeting the European (EMEA) pension plan obligations. The investment decisions for this plan are made by the Trustees of the plan, based on consultation with the investment and actuarial advisors of the Trustees.

Sensitivity analysis for price risks

Considering price risk exposure at the balance sheet date, if the prices of securities are 5% higher or lower, the fair value reserve on available-for-sale assets recorded in equity would be € 60 million higher or lower and the amount of fair value recognized in the income statement on the securities and investments included in the category of assets held for trading and cash and cash equivalents would be € 15 million higher or lower.

Details are as follows:

39. Intragroup and related party transactions

At December 31, 2008, the EXOR Group is directly controlled by Giovanni Agnelli e C. S.a.p.az., a company registered in Italy which holds the entire ordinary capital stock.

The transactions between the company and its consolidated subsidiaries, which are related parties of the same company, are eliminated in the consolidated financial statements of the EXOR Group and are therefore not presented in this note.

Related party transactions are carried out in accordance with existing laws on the basis of reciprocal economic gain.

Receivables and payables are not guaranteed and are settled in cash. Guarantees have neither been granted nor received.

Costs have not been recognized during the period for non-existent or doubtful liabilities in relation to amounts due from related parties.

The balance sheet and income statement balances generated by transactions carried out in 2008 with related parties, identified in accordance with IAS 24 and communicated by the companies of the Group, are summarized in the following tables. Transactions are indicated only if close to € 1 million, which is the unit of measure for the presentation of the consolidated figures of the EXOR Group.

€ in millions	Trade receivables	Trade payables	Investments	Other assets	Financial assets	Other liabilities	Costs	Revenues
Purchase of 14,538 Cushman & Wakefield shares by Ifil Investissements, from the same issuing company			12 (a)

Fiat Group								13 (d)
Total IFIL Group	**2**	**(10)**	**12**	**1**	**0**	**(8)**	**(10)**	**22**

a) On June 27, 2008, the subsidiary Ifil Investissements purchased 14,538 C&W Group Inc. shares held as treasury stock by that company, for an investment of € 12 million.
b) Details are presented in Note 32 to the separate financial statements.
c) Income reflects the fair value change in the stock option plan approved by management of the subsidiary Alpitour.
d) Consideration for the July 1, 2007 – June 30, 2010 agreement between the Fiat Group and Juventus F.C. which gives the Fiat Group the right to exploit the images of Juventus F.C..

40. Fees to directors and statutory auditors

In 2008, the fees to the directors and statutory auditors of EXOR S.p.A., to perform their duties in the parent and also in other companies included in consolidation, are as follows:

€ in thousands	EXOR S.p.A.	Subsidiaries (a)	Total
Directors	1,002	7,496	8,498
Statutory Auditors	146	130	276
Total	**1,148**	**7,626**	**8,774**

(a) This does not include the fees paid by Fiat and its subsidiaries since the Fiat Group is not included in the scope of consolidation.

In 2007, fees amounted to € 3,290 thousand, of which € 1,150 thousand was paid by EXOR and € 2,140 thousand by the subsidiaries.

EXOR S.p.A. also signed a third-party liability insurance policy for the directors with a group of insurance companies for a maximum claim per incident and per year of € 50 million for coverage in the event of requests for reparation of non-fraudulent acts.

In 2008, the chairman, John Elkann, did not receive any fee for his post. The fees of the directors Gianluigi Gabetti and Pio Teodorani-Fabbri are not linked to either the economic results of the company or targets set by the board of directors.
A part of the fees of the general manager, however, is tied to the economic results of the company and the attainment of specific targets.

At December 31, 2008, Mr Tiberto Brandolini d'Adda holds 304,153 options to subscribe or purchase the same number of Sequana shares between May 2009 and May 2013 at a price per share of € 20.46; moreover, Sequana has allocated 12,340 of its shares free to Mr Tiberto Brandolini d'Adda, which will available from March 29, 2010.

Moreover, in 2008, the director, Franzo Grande Stevens, rendered professional services to Fiat S.p.A. for € 1 million (including acting as the secretary to the board of directors).

Additional information on fees, as requested by national law (Consob Regulation 11971 dated May 14, 1999 and later amendments), is provided in the Notes to the separate financial statements of EXOR S.p.A..

41. Employees

The breakdown of the average number of employees is provided as follows:

average number of employees	**2008**	2007
Breakdown by category		
Managers	**2,038**	1,526
Middle management and clerical staff	**11,310**	12,256
Pilots and flight attendants	**277**	259
Soccer players	**56**	54
Blue-collar	**4,204**	3,366
	17,885	17,461

42. Pro-forma consolidated data prepared by consolidating the Fiat Group line-by-line

Pending possible amendments to IAS 27 proposed in Exposure Draft ED 10 “Consolidated Financial Statements” that should definitively clarify the criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, the EXOR Group has continued to exclude the Fiat Group, in which the subsidiary IFIL S.p.A. has a 30.45% holding in ordinary capital stock, from line-by-line consolidation consistently with the method followed for the first-time adoption of IFRS and the preparation of the consolidated financial statements at December 31, 2005 and thereafter.

However, the pro-forma consolidated balance sheet, pro-forma consolidated income statement and the composition of the pro-forma consolidated net financial position prepared by consolidating the Fiat Group line-by-line are presented below.

EXOR Group – Pro-forma consolidated income statement prepared by consolidating the Fiat Group line-by-line.

44. Approval of the consolidated financial statements and authorization for publication

The consolidated financial statements at December 31, 2008 were approved by the board of directors on March 25, 2009 which authorized their publication starting from March 31, 2009.

Turin, March 25, 2009

On behalf of the Board of Directors
The Chairman
John Elkann

Attestation of the separate financial statements according to art. 154-bis, paragraph 5, of Legislative Decree 58/98

We, the undersigned, Carlo Barel di Sant'Albano, chief executive officer, and Aldo Mazzia, manager responsible for the preparation of the financial reports of EXOR S.p.A. (formerly IFI S.p.A.) attest, pursuant to the provisions of art. 154-bis, paragraphs 3 and 4, of Legislative Decree 58 dated February 24, 1998:

- the adequacy with respect to the company's structure and
- the effective application

of the administrative and accounting procedures applied in the preparation of the separate financial statements at December 31, 2008.

We also attest that:

- the separate financial statements:
  - have been prepared in accordance with applicable International Financial Reporting Standards recognized by the European Community pursuant to EC Regulation 1606/2002 of the European Parliament and Council, dated July 19, 2002, in addition to the provisions enacted for the implementation of art. 9 of Legislative Decree 38/2005;
  - correspond to the amounts shown in the accounts, books and records;
  - provide a fair and correct representation of the financial conditions, results of operations and cash flows of the issuer;
- the Report on Operations includes a reliable operating and financial review of the issuer as well as a description of the main risks and uncertainties to which it is exposed.

REPORT OF THE INDEPENDENT AUDITORS ON THE FINANCIAL STATEMENTS PURSUANT TO ART. 156 OF LEGISLATIVE DECREE No. 58 OF FEBRUARY 24, 1998

To the Shareholders of
EXOR S.p.A.

1. We have audited the financial statements of EXOR S.p.A. (formerly IFI – Istituto Finanziario Industriale S.p.A.) as of and for the year ended December 31, 2008, which comprise the balance sheet, the income statement, the statements of changes in equity and cash flows and the related explanatory notes. These financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005 are the responsibility of the Directors of EXOR S.p.A. Our responsibility is to express an opinion on these financial statements based on our audit.

2. We conducted our audit in accordance with the Auditing Standards recommended by CONSOB, the Italian Commission for listed Companies and the Stock Exchange. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the prior year's financial statements, the balances of which are presented for comparative purposes, reference should be made to our auditors' report issued on April 3, 2008.

3. In our opinion, the financial statements present fairly the financial position of EXOR S.p.A. as of December 31, 2008 and the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005.

4. As illustrated in the report of operations on March 1, 2009 became effective the merger by incorporation of the subsidiary IFIL Investments S.p.A. in IFI – Istituto Finanziario Industriale S.p.A. which changed its name to EXOR S.p.A., The accounting and fiscal effects of the merger start from January 1, 2009.

5. The Directors of EXOR S.p.A. are responsible for the preparation of the report on operations in accordance with the applicable laws and regulations. Our responsibility is to express an opinion on the consistency of the report on operations with the financial statements, as required by art. 156, paragraph 4-bis, letter d), of the Legislative Decree 58/98. For this purpose, we have performed the procedures required under Auditing Standard n. 001 issued by the Italian Accounting Profession and recommended by CONSOB. In our opinion the report on operations is consistent with the financial statements of EXOR S.p.A. as of December 31, 2008.

REPORT OF THE INDEPENDENT AUDITORS ON THE CONSOLIDATED FINANCIAL STATEMENTS PURSUANT TO ART. 156 OF LEGISLATIVE DECREE No. 58 OF FEBRUARY 24, 1998

To the Shareholders of
EXOR S.p.A.

1. We have audited the consolidated financial statements of EXOR S.p.A. (formerly IFI - Istituto Finanziario Industriale S.p.A.) and its subsidiaries ("EXOR Group") as of and for the year ended December 31, 2008, which comprise the consolidated balance sheet, the consolidated income statement, the consolidated statements of changes in equity and cash flows and the related explanatory notes. These consolidated financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005 are the responsibility of the Directors of EXOR S.p.A. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

2. We conducted our audit in accordance with the Auditing Standards recommended by CONSOB, the Italian Commission for listed Companies and the Stock Exchange. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the prior year's consolidated financial statements, the balances of which are presented for comparative purposes, reference should be made to our auditors' report issued on April 3, 2008.

3. In our opinion, the consolidated financial statements present fairly the financial position of EXOR Group as of December 31, 2008 and the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005.

4. For a better understanding of the consolidated financial statements, attention is drawn to the following information:

   (a) On March 1, 2009, became effective the merger by incorporation of the subsidiary IFIL Investments S.p.A. in IFI - Istituto Finanziario Industriale S.p.A., which changed its name to EXOR S.p.A.

   (b) EXOR Group, pending possible amendments to IAS 27 proposed in the Exposure Draft ED 10 "Consolidated Financial Statements", that should definitively clarify the criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, has continued to exclude the Fiat Group, in which the subsidiary IFIL Investments S.p.A. had a 30.45% holding of ordinary capital stock, from line-by-line consolidation, consistently with the method followed for the first-time adoption of IFRS and the preparation of the consolidated financial statements at December 31, 2005 and thereafter. However, in note 42 to the consolidated financial statements are presented the pro-forma consolidated financial data prepared consolidating line-by line the Fiat Group.

5. The Directors of EXOR S.p.A. are responsible for the preparation of the report on operations in accordance with the applicable laws and regulations. Our responsibility is to express an opinion on the consistency of the report on operations with the financial statements, as required by art. 156, paragraph 4-bis, letter d), of the Legislative Decree 58/98. For this purpose, we have performed the procedures required under Auditing Standard n. 001 issued by the Italian Accounting Profession and recommended by CONSOB. In our opinion the report on operations is consistent with the consolidated financial statements of the EXOR Group as of December 31, 2008.

DELOITTE & TOUCHE S.p.A.

BOARD OF STATUTORY AUDITORS' REPORT TO THE STOCKHOLDERS' MEETING HELD ON APRIL 27/28, 2009

Stockholders,

In compliance with art. 2429 of the Italian Civil Code and with art. 153 of Legislative Decree 58/1998, the board of statutory auditors reports on the scope and findings of the control activities carried out during the year 2008 – during the course of which began, among other things, the process leading, with effect on March 1, 2009, to the merger by incorporation of IFIL Investments and to the change of name to EXOR - also referring to and considering the work performed by the preceding standing members of the board of statutory auditors Mr Gianluca Ferrero and Mr Giorgio Giorgi until cessation of their term of office on May 15, 2008.

We have participated in the ten meetings of the board of directors, during which we were informed about the activities and the main operating, financial and balance sheet transactions completed or being undertaken by the company and its direct subsidiaries.

We have obtained assurance that the transactions which the company has approved and undertaken were in compliance with the law and with the company's bylaws, were based upon the principles of good administration, were not in conflict with any resolutions passed by the stockholders and were not in conflict of interest.

During the seven meetings we have held and from our meetings with the persons responsible for the main relevant corporate functions, with the manager responsible for the preparation of the financial reports and with the representatives of the audit firm – with whom we met on three occasions and whose work we have made use of - we consider that we have acquired the necessary information as to the company's compliance with the principles of diligent and proper administrative management.

Based on what we have ascertained and verified, we have concluded that the administrative and accounting system, conforming to the Model of corporate administrative and accounting control previously adopted by the company, was capable of representing correctly the company's affairs during the year 2008.

Further, as for our responsibilities, we have concluded that the company's organizational structure and internal control system were adequate in relation to its dimensions and activities in the same period.

With regard to the requirements of art. 114, paragraph 2 of Legislative Decree 58/1998, the directives imparted to the subsidiaries appear to us to be appropriate.

With regard to Corporate Governance, the directors noted in the specific report on the subject, indicating that IFI - Istituto Finanziario Industriale, now EXOR, had not adopted the Code of Self-discipline in view of the company's particular capital structure - no ordinary shares being listed since entirely held by Giovanni Agnelli e C. S.a.p.az. – considering the system adopted for Corporate Governance regulation to be suitable to the capital structure and sufficient to ensure transparency.

The board of statutory auditors concluded that the regulations and procedures in place, as ascertained and verified, were adequate to the purposes established for them by the directors.

Since, on March 1, 2009, the merger by incorporation of IFIL Investments in IFI Istituto Finanziario Industriale became effective and on that day the latter company changed its name to EXOR, the directors in a meeting held on March 2, 2009 – the first after the completion of the operation – adopted the rules of Corporate Governance described in the report, which rules, mutatis mutandis, as they observe in the report, are in line with those already in force in the merged IFIL Investments.

Bearing in mind the pre-existing corporate governance structure, so far as concerns our responsibilities, we take note that the directors have provided EXOR with the corporate governance model described in the Code of Self-discipline, related to the company's new characteristics and the increased scope of its operations and thereby with principles and rules of corporate governance which are stated to be in conformity with the aforesaid Code, setting out in the report to which we refer you for full information on the matter, the grounds for deviations from some of the Code's requirements.

With reference to the other matters identified by CONSOB in communication DEM/1025564 dated April 6, 2001, we observe the following:

- we have been regularly informed of matters falling under our jurisdiction;
- the periodic verifications and the tests to which we have subjected the company have not brought to light any atypical or unusual transactions with third parties, with related parties or with group companies such as might give rise to doubts about the correctness or completeness of the information in the financial statements, about the presence of conflicts of interest or about the safeguarding of the company's assets;
- the directors, in Note 32 to the separate financial statements, disclose the existence of and provide comments on the exchange of goods and services between EXOR, group companies and related parties, stating that for such transactions were carried out by reference to arm's length reciprocal economic gain;
- from the meetings with the auditors no significant facts or situations came to our attention which necessitated the performance of further controls on our part which we should report to you;
- we have not received nor had notice of any complaints under ex art. 2408 of the Italian Civil Code and petitions;
- in our contacts with the corresponding boards of the parent company and the subsidiary company no matters have been addressed which would require to be communicated;
- we have expressed the opinions required of us by law;
- by means of a letter dated February 19, 2009, Deloitte & Touche has informed us that:

  " (…) during 2008, IFI - Istituto Finanziario Industriale S.p.A. ("IFI" or the "company"), in addition to the engagement for the audits of the separate financial statements and the consolidated financial statements and for the limited audit of the consolidated half-year report (aggregate fees of Euro 31,320 for 404 hours exclusive of the hours and fees for the subsidiary companies whose audits are assigned separately) conferred to us the following engagements:

  - limited audit of the pro-forma data contained in the information document prepared by IFI in order to provide information about the merger by incorporation of the subsidiary IFIL Investments S.p.A. for the purposes of the requirements of art. 70 of the regulation for issuers approved by Consob Resolution 11971 of May 14, 1999 and subsequent amendments and additions, for a fee of Euro 26,000;
  - limited audit of the balance sheet position of IFI at June 30, 2008 prepared under the requirements of art. 2501-quater of the Italian Civil Code and drawn up in accordance with the International Financial Reporting Standard on interim financial reporting (IAS 34 – Interim Financial Reporting) for a fee of Euro 2,000.

  In the same year, no engagements were conferred to parties related to Deloitte & Touche S.p.A.(...)".

We have also examined the draft separate financial statements of EXOR which present a profit of Euro 49,137,819 illustrated by the directors in their Report on Operations and in the Notes.

The chief executive officer and the manager responsible for the preparation of the financial reports have issued the attestation required under art. 154-bis, paragraph 5 of Legislative Decree 58/1998.

In the closing meeting to review our respective activities relating to the year 2008, Deloitte & Touche, the appointed external auditors, illustrated to us their audit report dated March 30, 2009 which concludes as follows:

"(…) In our opinion, the separate financial statements present fairly the financial position of EXOR S.p.A. as of December 31, 2008 and the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005. (…)",

in drawing attention to the merger.

On the basis of the information we obtained directly pertaining to the scope and structure and of the conclusions reached by Deloitte & Touche, we are of the view that the document may be approved together with the proposal for the appropriation of the profit for the year and the attribution of the further dividend to all the classes of stock.

Since the appointment of its board of statutory auditors ended on March 1, 2009 with the completion of the merger by incorporation, we have also examined the draft separate financial statements of IFIL Investments - prepared, in the analogous circumstances, by the directors of EXOR in their meeting on March 25 - which presents a profit of Euro 356,476,843 illustrated in the Report on Operations and in the Notes.

The chief executive officer and the manager responsible for the preparation of the financial reports of EXOR, also with respect to them, have issued the attestation required under art. 154-bis, paragraph 5 of Legislative Decree 58/1998.

Deloitte & Touche, appointed to perform the audit, illustrated to us their audit report dated March 30, 2009 which concludes as follows:

"(…) In our opinion, the separate financial statements present fairly the financial position of IFIL Investments S.p.A. as of December 31, 2008 and the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005. (…)",

in drawing attention to the merger.

On the basis of the information we obtained directly pertaining to the scope and structure and of the conclusions reached by Deloitte & Touche, we are of the view that the document may be approved together with the proposal for the appropriation of the profit for the year.

We draw your attention to the requirement for appointments to be made to the company's bodies for the three-year period 2009-2011.

Turin, April 2, 2009

The Board of Statutory Auditors

Lionello Jona Celesia, Chairman
Giorgio Ferrino
Paolo Piccatti

BOARD OF STATUTORY AUDITORS' REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS AT DECEMBER 31, 2008

Stockholders,

We have taken note of the fact that in their meeting on March 25, 2009 the directors also prepared and approved the consolidated financial statements of the EXOR Group which present a consolidated profit of Euro 428 million, of which Euro 302 million is attributable to the equity holders of the parent, presented together with the Report on Operations, which, in its overall content, refers also to the separate financial statements.

The chief executive officer and the manager responsible for the preparation of the financial reports have issued the attestation required under art. 154-bis, paragraph 5 of Legislative Decree 58/1998.

In the closing meeting to review our respective activities relating to the year 2008, Deloitte & Touche, the appointed external auditors, illustrated to us their audit report dated March 30, 2009 which concludes as follows:

"(…) In our opinion, the consolidated financial statements present fairly the financial position of EXOR Group as of December 31, 2008 and the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005. (…)",

drawing attention both to the merger by incorporation and to the continued exclusion from line-by-line consolidation of the FIAT Group for which, for completeness of information, pro-forma consolidated data is provided in Note 42.

We have also taken note of the fact that in their meeting held on March 25, 2009 the EXOR directors also prepared and approved the consolidated financial statements of the IFIL Investments Group since the term of office of the board of directors of this company ended on March 1, 2009 with the completion of its merger by incorporation into IFI – Istituto Finanziario Industriale.

The document presents a profit of Euro 438 million of which Euro 445 million is attributable to the equity holders of the parent, and is presented together with the Report on Operations which, in its overall content, refers also to the separate financial statements, and the specific Notes.

The chief executive officer and the manager responsible for the preparation of the financial reports of EXOR, also with respect to them, have issued the attestation required under art. 154-bis, paragraph 5 of Legislative Decree 58/1998.

Deloitte & Touche, appointed to perform the audit, illustrated to us their audit report dated March 30, 2009 which concludes as follows:

"(…) In our opinion, the consolidated financial statements present fairly the financial position of IFIL Group as of December 31, 2008 and the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005. (…)",

drawing attention both to the merger by incorporation and to the continued exclusion from line-by-line consolidation of the FIAT Group for which, for completeness of information, pro-forma consolidated data is provided in Note 42.

Since the audit firm appointed to the financial audit has expressed its positive opinion under art. 156 of Legislative Decree 58 dated February 24, 1998 on both consolidated financial statements, further observations from ourselves do not appear necessary.

Turin, April 2, 2009

The Board of Statutory Auditors

Lionello Jona Celesia, Chairman
Giorgio Ferrino
Paolo Piccatti

Below is set out a list of the boards of directors and of statutory auditors on which, as of the date on which their report was issued, the members of the company's board of statutory auditors served in the other companies as defined in Booklet V, Title V, Chapter V, VI and VII of the Italian Civil Code, pursuant to art. 144 quinquiesdecies of the Regulation for Issuers (the financial year in which the appointment ends is indicated in brackets.).

Expiry of the terms of office

The terms of office of the board of directors, the board of statutory auditors and the independent auditors will expire concurrently with the stockholders' meeting that will be held to approve the financial statements for the year ending December 31, 2011.

LETTER TO SHAREHOLDERS

Dear Shareholders,

2009 was a very significant year for our Company. First and foremost in March we were able to complete the merger between IFIL and IFI, the two historical holding companies listed on the Italian Stock Exchange, to create EXOR, a company now 47% held by the market and 53% by Giovanni Agnelli e C., the private company fully owned by my family.

One of my main priorities after taking over as Chairman of IFIL in May 2008 was to explore ways to simplify the ownership structure of my family's investments in order to provide greater clarity and alignment with the interests of all our shareholders.

The origins of EXOR date back to 1927 when my great great-grandfather, Senator Giovanni Agnelli, founded IFI to manage his shareholdings in Fiat as well as his other investments. Over the years IFI and IFIL (a company originally established in 1919 by a group of Piedmontese industrialists and subsequently acquired by IFI), along with IFINT (established in 1964 and later renamed Exor Group) pioneered our investment activities at home and internationally, in good times and in bad, providing the foundations of the Company you own.

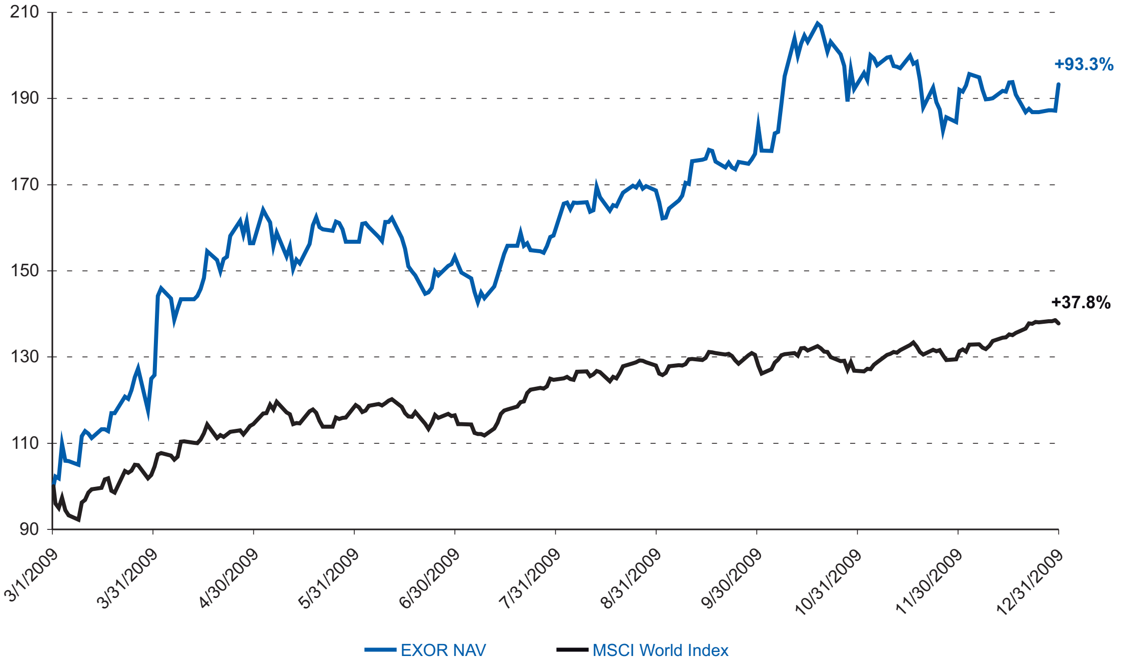
Today we look back proudly to the past but with our attention firmly focused on building the best long-term future for all of our shareholders.

How do we measure our performance?

I believe the best way to measure our performance is through the evolution of EXOR's NAV or Net Asset Value. This metric corresponds to the value of all of EXOR's investments and is determined as follows: we calculate the daily stock market values of our listed investments while for the private ones we rely on the annual appraisal values provided by Ernst & Young's independent experts specifically mandated for the purpose. The aggregate of these values is then adjusted for the Company's NFP, or Net Financial Position, which is defined as all financial assets less financial liabilities. To obtain the Net Asset Value, according to market practice we subtract our ordinary holding costs capitalized over a 10 year period.

€ millions	3/1/2009	**12/31/2009**	**Change**
Listed Investments	2,464	5,110	2,646
Private Investments	750	785	35
Investment Value	**3,214**	**5,895**	**2,681**
Financial liabilities	(1,157)	(1,131)	26
Financial assets	1,121	1,183	62
Net Financial Position	**(36)**	**52**	**88**
Ordinary holding costs capitalized over 10 years	**(210)**	**(210)**	**–**
Net Asset Value	**2,968**	**5,737**	**2,769**

The NAV evolution is measured not only in absolute terms but also relative to the MSCI World Index as can be seen in the chart below. This index denominated in Euros - which is diversified by sector, currency and geography – is the most meaningful external benchmark for our NAV.



As the chart above shows, EXOR's 2009 NAV performance was very positive. This was primarily due to the strong stock market performance of Fiat, our single largest investment, and also to the market recovery that occurred during the year. We are well aware that starting this measurement in March 2009 as financial markets approached their low point has helped our performance.

When asked about what the market would do, John Pierpont Morgan used to say: “It will fluctuate.”
We know we have to live with volatility. Having this in mind, our objective is to make long-term investments and, as Warren Buffett says, “to be fearful when others are greedy, and be greedy when others are fearful.”

INVESTMENTS

Let me describe briefly how our investments performed in 2009. Last year the world economy faced the worst economic and especially manufacturing recession in sixty years. In this environment our investee companies reacted operationally by taking out costs and financially by preserving liquidity and refinancing themselves.

Fortunately, we did not have to undertake any capital increase to support them, and the large majority of them will distribute a dividend in 2010, having been able to achieve positive results.

We have decided to present our investments according to whether they are listed or private and to list them by value (in brackets is the percentage ownership).

LISTED INVESTMENTS

- **Fiat (30.45%)**
  An automotive company operating in cars, industrial vehicles, car components, agricultural and construction equipment.
  Fiat, our single largest investment, today accounts for more than half of EXOR's NAV. For Fiat, as for all companies operating in the automotive sector, 2009 was an extremely challenging year due to a significant fall in revenues. However, under the outstanding leadership of Sergio Marchionne and as a result of the extraordinary commitment shown by all those who work at Fiat, the company succeeded in generating cash and delivered an operating profit for the year. The most significant event during the 12 months was undoubtedly the agreement with Chrysler, which from the very beginning - and even more so today - represented a great opportunity for Fiat. The words of the President of the United States Barack Obama, who called Fiat the best partner for the re-launch of Chrysler, made us feel very proud and filled the organization with enormous determination to succeed.

- **SGS (15%)**
  A world leader in the verification, testing, control and certification business.
  In one of the most difficult periods in recent economic history SGS proved once more to be an exceptional business, capable of delivering a higher level of operating profitability with total revenues almost unchanged compared to the previous year. We are extremely encouraged by the results achieved by SGS and, above all, by the numerous opportunities that the market offers. Indeed, the demand for inspection, verification and certification services continues to grow steadily.

- **Juventus FC (60%)**
  One of the world’s most prestigious professional soccer clubs.
  Juventus has achieved financial stability, recording a net profit for 2009. It has made good progress both with the new stadium wholly owned by Juventus, where construction is proceeding on schedule, and with the development of the nursery for young talent that will produce tomorrow's champions. These key elements put Juventus in a position to compete at its best when the new UEFA rules on financial fair play come into effect. On the sporting front the season saw worse results than we originally hoped for, but I am confident that with time the required success which the club’s many fans all around the world deserve will be delivered.

- **Sequana (26.65%)**
  A European player in paper production and distribution.
  2009 represented an important turning point for Sequana. Operating in a highly competitive sector, in a very difficult year, the company returned to an operating profit in every division. Furthermore, Sequana’s debt was reduced largely due to Arjowiggins’s operating performance and to the improvement of Antalis’ working capital.

Private investments

- **Cushman & Wakefield (71.3%)**

  The largest private company operating in commercial real estate services.

  The global crisis in the commercial property market had a significant impact on all companies operating in the sector including Cushman & Wakefield, which faced a large drop in revenues. However, the company responded rapidly, reducing its costs significantly. I would like to thank Bruce Mosler for all he has accomplished and also to extend my best wishes to Glenn Rufrano who has now taken the helm as CEO. We have a great deal of confidence in Glenn's experience and in his ability to strengthen Cushman & Wakefield as the market recovers.

- **Alpitour (100%)**

  Italy's largest integrated tourism and leisure group.

  Despite the significant decline in sales in the tourism sector Alpitour closed the year with a net profit. Furthermore, in a challenging year the company was able to gain market share, strengthening its leadership position in the Italian tourism sector. If Alpitour has been able to do so, the credit goes to Daniel John Winteler and his team.

- **Gruppo Banca Leonardo (9.74%)**

  A pan-European bank specializing in advisory and wealth management businesses.

  In spite of a difficult year, Banca Leonardo maintained strong levels of profitability in its principal operating businesses.

  This was particularly the case in its Italian advisory and in its French wealth-management activities, where funds under management increased to the levels seen before the onset of the financial crisis.

- **Vision Investment Management (40%)**

  An asset management company specializing in funds of hedge funds in the Asian markets.

  The year under review was particularly testing for Vision, not only because of market conditions, but also as a result of the conduct of some hedge funds that negatively affected sentiment towards the industry as a whole. We remain convinced that the Asian wealth-management sector in which Vision operates is set to grow strongly over the coming years. Before the competitive pressures increase again Vision has an excellent opportunity to increase its market share.

- **Banijay Holding (17.03%)**

  A new player in European television production.

  Banijay spent 2009 operating in an environment characterized by an overall 15% decline in advertising revenues for the European broadcasters that are its largest clients. In this difficult context, Banijay continued to roll out its plans for growth both through the acquisition of companies in television production and content distribution as well as through the organic development of new formats. As a result of this rapid development Banijay has achieved primetime success in the French, German and Spanish markets.

- **Perella Weinberg Partners (1.96%)**
  A firm active in the advisory and wealth management businesses in the USA and Europe.
  2009 was a positive year for Perella Weinberg Partners. This was due to a number of high profile mandates including advisory roles with France Télécom on its acquisition of the Swiss operator Sunrise, and with Education Media & Publishing Group on the restructuring of its $8 billion debt. The bank's wealth management activities continued their healthy growth, more than doubling assets under management.

Our investments are led by highly talented individuals who generally have a large part of their personal wealth invested in these companies. This alignment of interests gives us even greater faith in the prospects of these businesses.

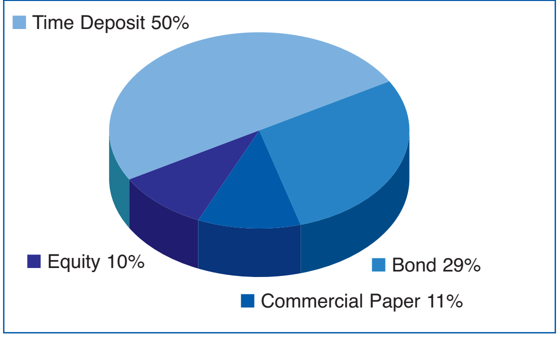
Net Financial Position

The Company's net financial position as of 31 December 2009 was €52 million. Gross debt totalled approximately €1.13 billion which consisted of two bonds (one of €200 million due in June 2011 and the other of €750 million due in June 2017) and bank debt of €150 million currently utilized and repayable within the next 12 months (EXOR has also €760 million of committed credit lines currently undrawn). To set against these financial liabilities EXOR had financial assets of approximately €1.18 billion.

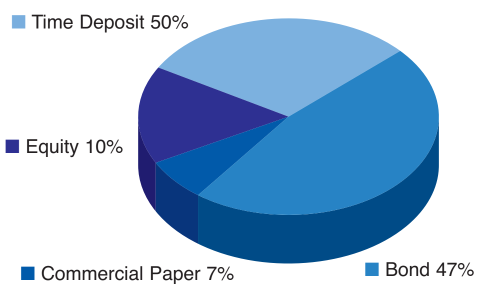
During the year we focused a great deal of attention on the management of our financial assets. In an environment of near-zero interest rates we increased our allocation to equities and bonds paying careful attention to risk.

We have also been actively monitoring the liquidity profile keeping in mind that our financial assets might be better deployed were an interesting long-term investment opportunity to emerge.

FINANCIAL ASSETS AS OF MARCH 1st, 2009



FINANCIAL ASSETS AS OF DECEMBER 31st, 2009



I wish to state clearly that we are committed to a conservative balance sheet structure and to deploying our financial assets with a high level of rigour.

2010

Whilst most economies are showing signs of a recovery, we expect it to be slow with activity picking up primarily in emerging markets, where I have spent a good deal of the past three months travelling, particularly in China, India and Brazil. Our investee companies are operating in these countries and are intent on doing more: this fills me with a good deal of confidence for our future.

But 2010 is likely to remain challenging and all our investee companies are working under this assumption. We believe a number of investment opportunities will present themselves during the current year. With Carlo Sant'Albano and the EXOR team we want to be ready to capture them, particularly in Europe and the United States (where it's easier for us to move), as long as they meet the following four criteria:

1) People: we like outstanding individuals, both as people and as professionals, who have a record of success and who "think and act like owners".

2) Financial results: we look for companies that have strong cash and earnings generating capacity and a sound financial structure.

3) Competitive positioning: we like companies that have a sustainable competitive advantage over the long term and that are already or are capable of becoming best-in-class in what they do.

4) Governance: we seek to be directly represented on the Boards of Directors of these companies, so we can closely monitor their performance and contribute to their development.

To these four investment criteria I would add one more condition which I believe is indispensable: the price must be right.

We will discuss further our financial statements and other important issues relating to EXOR at the Annual General Meeting which this year will take place on April 29 at the Unione Industriale di Torino.

If you have any matters you wish to raise during the shareholder meeting please send us a short email with your question to meeting@exor.com. The emails we receive will be summarized and grouped together by subject matter. During the course of the meeting we will answer as many questions as possible.

I look forward to welcoming you there.

John Elkann

EXOR GROUP PROFILE

EXOR S.p.A. is the new corporate name that IFI – Istituto Finanziario Industriale S.p.A. – assumed on March 1, 2009, the effective date of the deed of merger by incorporation of the subsidiary IFIL S.p.A., signed on February 20, 2009.
EXOR is one of Europe's leading investment companies and is controlled by Giovanni Agnelli e C. S.a.p.az. which holds 51.08% of capital stock and, in particular, 59.1% of ordinary capital stock, 39.24% of preferred capital stock and 11.75% of savings capital stock.
Listed on the Italian Stock Exchange (since March 2, 2009, all classes of EXOR stock are traded on the Electronic Share Market), EXOR has a Net Asset Value of approximately € 5.7 billion. It is headquartered in Turin, Corso Matteotti 26.
EXOR is the majority stockholder of the Fiat Group. Balancing risks and expected returns, it invests for the medium- to long-term in various sectors, mainly in Europe, the United States and in the two main emerging markets of China and India.
EXOR's objective is to increase its Net Asset Value and outperform the Morgan Stanley Capital World Index (MSCI World).

The following are the main investments which, as a result of the merger of IFIL, now refer directly to EXOR.

Fiat (more than approximately 30% of ordinary and preferred capital stock and about 3% of savings capital stock) is listed on the Electronic Share Market of the Italian Stock Exchange (Blue Chip segment). Founded in 1899, the Fiat Group operates in the sectors of automobiles (Fiat, Lancia, Alfa Romeo, Abarth, Ferrari, Maserati and Fiat Veicoli Commerciali), agricultural and construction equipment (Case and New Holland), trucks and commercial vehicles, buses and special-purpose vehicles (Iveco, Irisbus, Astra and Magirus) and components and production systems (Fiat Powertrain Technologies, Magneti Marelli, Teksid and Comau); it is also active in publishing and communications (La Stampa and Publikompass). Other sectors also offer financial services to the sales networks and the clientele in addition to rental services to customers. In June 2009, the Fiat Group and Chrysler Group LLC finalized the agreement for a global strategic alliance. This represents an important step toward positioning both Fiat and Chrysler among the leaders of the new generation of global automakers.

SGS (15% of capital stock) is a Swiss company listed on the Virt-x market. Founded in 1878, the company is today the global leader in verification, inspection, control and certification activities with more than 56,000 employees and a network of more than 1,000 offices and laboratories throughout the world.

C&W Group (approximately 71% of capital stock) is the largest privately held company for real estate services. C&W Group has its headquarters in New York, where it was founded in 1917, and has 231 offices and about 13,000 employees in 58 countries.

Alpitour (100% of capital stock) is the largest integrated Italian tourism group. It operates with more than 3,500 employees and has 2.5 million customers across all areas of the tourism business: Tour Operating (Alpitour, Francorosso, Viaggidea, Villaggi Bravo, Volando, Karambola and Jeans), Hotels (Alpitour World Hotel & Resorts), Incoming (Jumbo Tours), Aviation (Neos), Distribution (Welcome Travel Group), Incentive & Eventi (A World of Events).

Juventus Football Club (60% of capital stock) is listed on the Electronic Share Market of the Italian Stock Exchange (Star Segment). Founded in 1897, it is one of the most prominent professional soccer teams in the world.

Sequana (approximately 26.7% of capital stock) is a diversified French paper group, listed on the NYSE Euronext market with production and distribution activities operating through:
- **Arjowiggins** (100% holding), the world leader in the manufacture of high value-added paper products, on 4 continents with 6,300 employees and 27 production facilities;
- **Antalis** (100% holding), the leading European group in the distribution of paper and packaging products, with over 6,900 employees in 51 countries.

Gruppo Banca Leonardo (approximately 9.7% of capital stock) is a privately held and independent international investment bank offering a complete range of services in investment banking, wealth management, private equity and other activities connected with financial markets.

Vision Investment Management, founded in 2000, is one of the most important hedge fund managers specialized in Asian markets.
Five-year bonds issued by Perfect Vision were subscribed to in April 2008. The bonds give mandatory conversion into shares at maturity which will deliver a 40% stake in Vision Investment Management.

Banijay Holding (approximately 17% of capital stock with voting rights) is headquartered in Paris. The company is a new player in European TV production with a strategy aimed at rapid external growth through the acquisition of companies specialized in the production of TV formats and content for distribution via TV, Internet and mobile phones.

Perella Weinberg Partners is an independent company offering financial advisory and asset management services in the United States and Europe.

The following chart is updated to mid-March 2009 and presents the major sectors of business in which the Group has investment holdings. Percentage holdings refer to ordinary capital stock.

(a) EXOR also holds 30.09% of Fiat preferred capital stock and 2.93% of Fiat savings capital stock.
(b) Post-conversion of convertible bonds.
(c) Percentage interest held in the NoCo A LP limited partnership.

Financial communications and investor relations

In 2009, EXOR continued to provide information to investors, financial analysts, as well as the national and international financial Press.

EXOR, at its first stockholders' meeting in April, held a conference call in which about 80 investors and financial analysts participated. The initiative, which the Company intends to propose annually as an opportunity for dialog with the markets, opened the way to providing important details on investment holdings, financial results and EXOR's objectives.

On March 1, 2009, the new corporate website www.exor.com went online and was later expanded and improved with content making consultation of the menu and comprehension of EXOR's activities easier and immediate.

CORPORATE GOVERNANCE

In its meeting of March 29, 2010, the EXOR S.p.A. board of directors' meeting approved, *inter alia*, the “Annual report on corporate governance and company's ownership structure” prepared in accordance with Legislative Decree 58, dated February 24, 1998, art. 123 bis, as integrated and amended (TUF – Consolidated Law on Finance).
This document was published with the 2009 Annual Report and is available on the website www.exor.com.

PRINCIPAL RISKS AND UNCERTAINTIES TO WHICH EXOR S.p.A. AND COMPANIES IN CONSOLIDATION ARE EXPOSED

Risks associated with general economic conditions

EXOR's earnings and financial position and those of its main subsidiaries are influenced by various macro-economic factors – including increases or decreases in gross national product, the level of consumer and business confidence, changes in interest rates on consumer loans, the cost of raw materials and the rate of unemployment – existing in the various countries in which they operate. During 2008, the global economy entered into a period of recession which continued to impact heavily on the first half of 2009. Conditions eased in the second half of the year, due in part to significant measures put in place by major governments and monetary authorities. The significant weakness in general economic conditions resulted in a sharp contraction in demand in the first half of 2009 in the sectors and markets in which EXOR and the main subsidiaries operate compared to the prior year's levels. This fall in volumes eased in the second half of the year.

However, despite measures put in place by governments and monetary authorities, or as a consequence of changes in such measures which reduce or eliminate their beneficial effects, should the current global economic weakness and consequent impact on demand for the products and services of the investment holdings continue in the future, the activities, strategy and future prospects of EXOR could be adversely affected with consequent negative impacts on its earnings and financial position.

Additionally, even in the absence of an economic recession or deterioration of credit markets, any macro-economic event - such as increases in energy prices, fluctuations in the price of commodities or other raw materials, adverse shifts in specific factors such as interest and currency rates, changes in government policy, outbreak of an epidemic or a contraction in infrastructure spending - potentially having negative consequences in the sectors in which EXOR and its main investment holdings operate, could have a material adverse effect on their activities and future prospects, as well as their earnings and financial position. Similar risks exist by virtue of the fact that some important investment holdings operate in sectors which have historically been highly cyclical and which tend to reflect the general performance of the economy, in certain cases even amplifying the effect.

Risks associated with EXOR's activities

EXOR conducts investment activities which involve normal risks such as high exposure to certain sectors or investments, difficulties in identifying new investment opportunities that meet the characteristics of the Company's objectives or difficulties in disposing of investments owing to changes in general economic conditions. The potential difficulties connected with making new investments such as unexpected costs or liabilities could have an adverse effect on the Company's earnings and financial position.

The ability to access capital markets or other forms of financing and the related costs are dependent, among other things, on the Company's credit rating.

Any downgrade by the rating agencies could limit the Company's ability to access capital markets and increase the cost of capital, with a consequent adverse effect on its earnings and financial position.
Standard & Poor's has rated EXOR's debt BBB+/negative/A-2.

EXOR's policy and that of the companies in the Holdings System is to keep liquidity in demand or short-term deposits and readily negotiable money market instruments and bonds, allocating such investments over an appropriate number of counterparts, with the principal purpose of having investments which can readily be converted into cash.
The counterparts are chosen according to their creditworthiness and reliability.
However, in consideration of the current financial crisis, market conditions which might negatively affect the normal operations of financial transactions cannot be excluded.

EXOR's earnings not only depend on the current value of its main holdings but also on the dividends they pay and, in the end, reflect their earnings and financial performance and investment and dividend payment policies. A deterioration in the financial market condition and the earnings of the main holdings could affect EXOR's earnings and cash flows.

EXOR mainly operates through its investments in subsidiaries and associates in the motor vehicle market (Fiat Group), in real estate services (C&W Group), in paper (Sequana Group), in tourism (Alpitour Group) and in professional soccer (Juventus Football Club). As a result, EXOR is exposed to the typical risks of the markets and industries in which such holdings operate.

In March 2010, the investment in Fiat (equal to 30.45% of ordinary capital stock, 30.09% of preferred capital stock and 2.93% of savings capital stock) represented more than 60% of the current value of EXOR's investment portfolio, calculated on the basis of the NAV method described on page 11.
Therefore, the performance of the Fiat Group has a very significant impact on EXOR's earnings and financial position.

EXOR and its subsidiaries and associates are exposed to fluctuations in currency and interest rates and use financial hedging instruments, compatible with the risk management policies adopted by each of them. Despite these hedging transactions, sudden fluctuations in currency or interest rates could have an adverse effect on earnings and financial position.
The subsidiaries and associates are generally exposed to credit risk which is managed by specific operating procedures. Given its activities, EXOR is not significantly exposed to such risk.
EXOR and its subsidiaries and associates are exposed to risks connected with the outcome of pending litigation for which they set aside, if appropriate, specific risk provisions. However, negative effects on the earnings and financial position of EXOR and/or its subsidiaries and associates connected with such risks cannot be excluded.

The following paragraphs indicate the principal specific risks and uncertainties of the companies in consolidation (C&W Group, Alpitour and Juventus Football Club).

C&W Group

The operations of C&W Group are directly influenced by the general economic environment and the international and local real estate business and the political situations in the countries in which it operates.

The economic factors which influence operations are the general economic situation, employment levels, interest rates, access to credit to fund transactions and the effects of tax and regulatory policies.

Economic recession, increases in interest rates or declines in demand in the real estate sector could have an adverse effect on the earnings and financial position of C&W Group.

In addition, these adverse conditions would also affect commission expense, which varies in relation to the revenues of C&W Group. Brokers, in fact, are generally paid on the basis of commissions and compensation correlated to the group's revenues. Consequently, a negative effect on C&W Group's operating margins due to the deterioration of market conditions is partly offset by such a correlation.

Alpitour Group

The trend in demand for tourist packages is always acutely affected by outside factors such as political risks (conflicts, institutional changes, unilateral acts of government and terrorism), the international economic situation, natural disasters and health scares such as pandemics.

The international political situation, especially in situations of war and terrorist threats, could generate a contraction in demand for the services offered by the Alpitour Group. Areas located in developing countries or plagued by unstable political and social instability are clearly more exposed to this type of risk.

Another risk factor is caused by the ravages of weather such as tsunamis, hurricanes and earthquakes and pandemics or epidemics which could cause a sharp decline in demand for tourism services to the affected destinations.

A negative international economic environment could significantly impact the propensity of clients to purchase tourist packages, leading them to place more emphasis on primary needs.

The Alpitour Group (with the exception of incoming activities) operates mostly with Italian clientele in that the product offered features qualitative standards that mirror the expectations and requirements of Italian demand. Therefore, the business is strongly influenced by domestic economic conditions and the highly season nature of operations which means that the majority of revenues is concentrated in the summer season.

The typical activities of the Alpitour Group use services provided by third parties, mainly suppliers of air and hotel services and travel agencies, whether individual or part of networks. The risk that such services will not be rendered efficiently and without interruption could compromise the earnings of the Alpitour Group and damage its image.
The Alpitour Group, through its vertical integration, the presence of all the links in the tourism chain, the diversification of key suppliers and the specific sales policies geared to sustaining demand in the low season, believes that it can manage and minimize such risks.

The tourism sector is strongly anchored to information technology processes which cover the entire business cycle starting from the booking system. The risk of the interruption, even temporarily, of information systems could cause difficulties in operations and in supplying services to clients.

With continual updating and maintenance of its systems and designing specific disaster recovery plans, as well as commercial contracts with leading suppliers of substitute technologies, the Alpitour Group has undertaken the actions necessary to monitor and meet such risks.

Juventus Football Club

In the second half of the financial year 2009/2010, Juventus Football Club's earnings and financial position should not be significantly affected by the current economic crisis since most of its revenue items are tied to existing contracts. Nonetheless, if the weak and uncertain situation continues, the activities, strategies and prospects of the company could be negatively affected especially as concerns radio and TV rights (rights are currently being assigned for the 2010/2011 and 2011/2012 soccer season), sponsorships (negotiations are underway for the main sponsorship contract which expires on June 30, 2010) and relative expected revenues from the new stadium project now under construction, and also sales activities targeting team supporters.

Players' registration rights represent Juventus Football Club's productive factor. Sports activities are subject to risks connected with the physical condition of the players so that any injuries at any point in time could significantly affect the earnings and financial position of Juventus Football Club.

At the same time, given that the business also focuses on the commercial exploitation of the brand, trademark infringement by third parties is another risk Juventus Football Club faces. The arrival on the market of a large number of imitation goods bearing the Juventus Football Club trademark or the occurrence of events that may impair the market value of the trademark could have an adverse effect on its earnings and financial position.

Economic results are significantly affected, directly and indirectly, by the results achieved by the team in the various tournaments it plays in, especially the UEFA Champions League. Direct entry to the tournament is currently assured to the top three teams in the Serie A Championships, while the fourth-placed team has the opportunity of qualifying through a preliminary qualifying round. Failure to qualify for the tournament could have a significant adverse effect on the earnings and financial position of Juventus Football Club.

Fiat Group

In the consolidated financial statements of the EXOR Group, the investment in the Fiat Group is accounted for by the equity method (details are provided in Notes 5 and 42 to the consolidated financial statements). Therefore, the Fiat Group is not included among the companies in consolidation.

Nevertheless, to complete the information presented in this section, the 2009 Report on Operations of the Fiat Group expounded on the exposure to risks in connection with the following:

- general economic conditions
- financing requirements
- ratings
- fluctuations in currency and interest rates
- policy of targeted industrial alliances
- relationships with employees and suppliers
- management
- high level of competitiveness in the industries in which the group operates
- sales in international markets and exposure to changes in local conditions
- environmental policy and government regulations
- ability to offer innovative products
- emerging markets

Additional information is provided in the 2009 Report on Operations of the Fiat Group, to which reference can be made, also available on the website www.fiatgroup.com.

SIGNIFICANT EVENTS IN 2009

Merger by incorporation of the subsidiary IFIL in IFI

The deed of merger by incorporation of the subsidiary IFIL in IFI was signed on February 20, 2009. The deed established that the merger would be effective, pursuant to art. 2504-bis, paragraph 2 of the Italian Civil Code, from March 1, 2009 and that the transactions carried out by IFIL in the early months of 2009 would be recorded in the merging company's financial statements, also for tax purposes, pursuant to art. 172, paragraph 9 of D.P.R. 917/96, starting from January 1, 2009.

The registration of the deed of merger in the Companies Register of Turin took place on February 24, 2009.

IFI assumed the new name of “EXOR S.p.A.” from March 1, 2009. Previously, in January 2009, IFI had purchased the EXOR brand from Old Town S.A. (formerly EXOR Group S.A.), a subsidiary of Giovanni Agnelli e C., for a price of € 100 thousand.

The EXOR capital stock increase to service the exchange of shares was recognized at the fair value of the 73,809,496 ordinary shares and 9,168,894 savings shares issued, respectively equal to € 5.36 and € 3.86 corresponding to the opening stock market prices on March 2, 2009, the first day of market trading of those shares. Of the total of € 431 million, € 83 million was allocated to capital stock, corresponding to the par value, and € 348 million to additional paid-in capital.

EXOR's capital stock post-merger is therefore equal to € 246,229,850 subdivided in 160,259,496 ordinary shares (approximately 65%), 76,801,460 preferred shares (approximately 31.2%) and 9,168,894 non-convertible savings shares (approximately 3.8%), all with a par value of € 1 each and normal dividend rights.

The total expenses for the operation incurred in 2008 and 2009 by IFIL and EXOR amounted to approximately € 17 million; such expenses (referring to costs for financial advisers, legal fees, experts assigned by the court, stockholders' meetings, notary and audit and other minor charges) were recorded as a deduction from additional paid-in capital.

The ordinary, preferred and savings shares have been listed on the Electronic Share Market under the stock symbol EXOR since March 2, 2009. The IFIL ordinary and savings shares were withdrawn from trading on the Electronic Share Market on March 2, 2009.

Further details on the accounting and tax treatment of the merger are described in Note 2 to the separate financial statements of EXOR S.p.A. at December 31, 2009.

The Information Document on the merger and updates are available on the website www.exor.com.

Changes in the names of the companies in the Holdings System

Following the merger, as from March 2, 2009:

- the Luxembourg subsidiary, Ifil Investissements S.A., took the new name of EXOR S.A.;
- the Ireland subsidiary, Ifil International Finance Ltd, took the new name of EXOR Capital Ltd.;
- the subsidiary, IFIL USA Inc., took the new name of EXOR Inc.

As from March 27, 2009, the subsidiary, Ifil Asia Ltd, took the new name of EXOR Limited.

Credit line extended to C&W Group

In its meeting held on March 25, 2009, the EXOR S.p.A. board of directors approved a 3-year subordinated credit line for C&W Group for $50 million, drawn down at December 31, 2009 for $40 million (€ 27.8 million).

The transaction guarantees EXOR a return in line with market rates and its purpose is to provide the subsidiary with additional debt capacity and also to use such capacity to fund any investment opportunities. At expiration on May 30, 2012, in the event of non-payment, EXOR will have the right to convert the loan to shares of the subsidiary C&W Group Inc. at a price equal to the lowest of the valuations made quarterly by an independent third party over the period of the credit line, discounted by 30%.

Resolutions passed by the stockholders' and board of directors' meetings

The EXOR S.p.A. stockholders' meeting held on April 28, 2009 approved the 2008 separate financial statements of the merged company IFIL S.p.A. and those of EXOR S.p.A., resolving to distribute dividends of € 0.3190 per ordinary share, € 0.3707 per preferred share and € 0.4580 per savings share for a total maximum amount of € 81.7 million, of which € 46.6 million will be drawn from retained earnings and € 35.1 million (corresponding to € 0.1459 per each share of the three classes of stock) from the extraordinary reserve. The dividends are payable starting from May 14, 2009.
The stockholders' meeting also elected the board of directors and the board of statutory auditors for the years 2009, 2010 and 2011.

In the meeting held by the board of directors after the stockholders' meeting, the following appointments were made: John Elkann Chairman, Gianluigi Gabetti Honorary Chairman, Tiberto Brandolini d'Adda and Pio Teodorani-Fabbri Vice Chairmen and Carlo Barel di Sant'Albano Chief Executive Officer, conferring the relative powers. The board also appointed the members of the internal control committee, the compensation and nominating committee and the strategy committee as indicated on page 3 of this report.
In the meeting held on May 13, 2009, the board of directors decided to equally divide among its members the fee approved by the stockholders' meeting, amounting to € 170,000 per year. Furthermore, pursuant to art. 2389 of the Italian Civil Code, the board approved the annual fees which are disclosed in Note 40 to the separate financial statements of EXOR S.p.A. at December 31, 2009.

Sales of Intesa Sanpaolo ordinary shares

During 2009, EXOR S.p.A. sold 78,000,000 Intesa Sanpaolo ordinary shares (0.66% of the class) on the market for proceeds of € 217.2 million with a net loss of € 15.4 million on consolidation (net gain of € 21.7 million in the separate financial statements).
After these disposals, EXOR holds 40,000,000 Intesa Sanpaolo ordinary shares (0.34% of the class).

Buyback of treasury stock

Under the treasury stock buyback program approved by the board of directors on March 25, 2009, during 2009, EXOR purchased 2,550,000 ordinary shares (1.59% of the class) at an average cost per share of € 11.6 and a total of € 29.6 million, 1,605,000 preferred shares (2.09% of the class) at an average cost per share of € 6.67 and a total of € 10.7 million and also 208,400 savings shares (2.27% of the class) at an average cost per share of € 8.26 and a total of € 1.7 million. The overall investment amounts to € 42 million (about 84% of the total maximum amount of € 50 million stated in the program).

In October, the subsidiary Exor Services (formerly Soiem) sold 214,756 EXOR ordinary shares (0.13% of the class) previously held for proceeds of € 2.8 million.

Exor Services also reimbursed EXOR for the payment at one time made by IFIL for the carrying amount of its stock held by the subsidiary.

At December 31, 2009 EXOR S.p.A. holds the following treasury stock:

Class of stock	Number of shares	% of class	Carrying amount Per share (€)	Carrying amount Total (€ml)
ordinary	2,550,000	1.59	11.60	29.6
preferred	6,965,300	9.07	11.66	81.2
savings	208,400	2.27	8.26	1.7
				112.5

Subscriptions to Banijay Holding capital stock increases

On July 27, 2009, EXOR S.A. subscribed to 61,818 Banijay Holding shares for an equivalent amount of € 6.2 million and on December 2, 2009 another 60,101 shares for an equivalent amount of € 6 million for two distinctive capital increases.
Following these transactions, EXOR S.A. holds 334,419 Banijay Holding shares equal to 17.08% of capital stock and 17.17% of voting rights and has its own representative on the board of directors of the company. These investments are part of the commitment undertaken in May 2008 to invest a total of € 42.5 million in the company (of which € 33.5 million has already been paid).

Purchases of Fiat savings stock

In September and October, EXOR S.p.A. purchased 2,338,629 Fiat savings shares (2.93% of the class) from Fondazione Giovanni Agnelli for a total investment of € 13 million.
EXOR S.p.A. currently holds 332,587,447 Fiat ordinary shares (30.45% of the class), 31,082,500 Fiat preferred shares (30.09% of the class) and 2,338,629 Fiat savings shares (2.93% of the class). The investment represents 28.7% of current Fiat capital stock overall.

Other investments

As a result of investment commitments in the NoCo B L.P. limited partnership, which groups a series of funds managed by Perella Weinberg Partners L.P., during the year 2009, EXOR S.A. invested $2.7 million (€ 1.7 million) and € 1.9 million in the Perella Weinberg Real Estate I fund. Subsequently, following the liquidation of the Perella Weinberg Alpha Cap and ADS funds, the NoCo B L.P. limited partnership reimbursed EXOR S.A. a total equivalent amount of approximately $11.8 million (€ 8.2 million).

At December 31, 2009, the remaining investment commitments for NoCo B and the Perella Weinberg Real Estate I fund amount to US $55.4 million (€ 38.5 million) and € 22 million, respectively.

Transactions simplifying the Group's structure

With a view towards simplifying the Group's structure, the following transactions were entered into:

- on May 20, 2009, the voluntary wind-up was closed for Ifil Investment Holding, a Dutch-registered company, wholly-owned by EXOR S.p.A.; the wind-up was approved on November 7, 2008;
- on September 18, 2009, the voluntary wind-up was closed for Ifilgroup Finance Limited, an Irish-registered company wholly-owned by EXOR S.A.; the wind-up was approved on September 29, 2008;
- on November 4, 2009, the deed was signed for the merger by incorporation of Ifil New Business S.r.l. (a non-operating subsidiary wholly-owned by EXOR S.p.A.) in Exor Services S.c.p.a. (formerly Soiem S.p.A.).

Moreover, voluntary wind-ups are currently in progress for Eufin Investments, (approved on December 2, 2009) and IFIL France, both wholly-owned subsidiaries of EXOR S.A.

Finally, in January 2010, the subsidiary Soiem S.p.A. was transformed into a consortium company with shares and took the name of Exor Services S.c.p.a.. This transaction falls under the framework of concentrating some of the activities conducted on behalf of Group companies in Exor Services S.c.p.a. with the aim of achieving greater efficiency and lower costs.
In consideration of this, in November 2009, EXOR S.p.A. sold 0.25% of the company's capital stock to Giovanni Agnelli e C. for approximately € 29 thousand which corresponds to the value of the pro-rata share of equity.

Proceedings relative to the contents of the press releases issued by IFIL and Giovanni Agnelli e C. on August 24, 2005

With regard to the ruling opposing the administrative sanctions imposed by Consob, the Court of Cassation rejected the appeals filed. Therefore, the ruling by the Court of Appeals of Turin, which had reduced the sanctions, has been upheld.

As far as the penal proceedings before the Turin Court are concerned, the final discussion is coming to a close and the conclusion with a ruling is scheduled for April 22, 2010.

SIGNIFICANT EVENTS IN THE FIRST QUARTER OF 2010

Buyback of treasury stock

Under the treasury stock buyback program approved by the board of directors on March 25, 2009, during the first quarter of 2010 EXOR purchased 434,000 ordinary shares (0.27% of the class) at an average cost per share of € 11.83 and a total of € 5.1 million, 396,000 preferred shares (0.52% of the class) at an average cost per share of € 6.67 and a total of € 2.6 million and also 11,400 savings shares (0.12% of the class) at an average cost per share of € 8.93 and a total of € 0.1 million. The overall investment for 2009 and 2010 amounts to € 49.9 million and essentially reaches the € 50 million maximum amount authorized for the buyback program.

EXOR currently holds the following treasury stock:

	Number	% of	Carrying amount	
Class	of shares	class	Per share (€)	Total (€ml)
ordinary	2,984,000	1.86	11.6	34.7
preferred	7,361,300	9.58	11.4	83.8
savings	219,800	2.40	8.3	1.8
				120.3

Sale of Intesa Sanpaolo stock

On January 15, 2010, EXOR S.p.A. sold 30,000,000 Intesa Sanpaolo ordinary shares (0.25% of the class) on the market for proceeds of € 90 million and a gain on consolidation of € 0.6 million (€ 14.8 million in the separate financial statements).
After these disposals, EXOR holds 10,000,000 Intesa Sanpaolo ordinary shares (about 0.09% of the class).

Dividends and distributions of reserves to be received

Dividends and distributions of reserves approved by certain investment holdings are as follows:

	Class of		Dividends			
Investment holding	stock	Number	Per share		Total (€ml)	
Fiat S.p.A.	ordinary	332,587,447	€	0.17	56.5	
Fiat S.p.A.	preferred	31,082,500	€	0.31	9.6	
Fiat S.p.A.	savings	2,338,629	€	0.325	0.8	
Alpitour S.p.A. (distribution of reserves)	ordinary	35,450,000	€	0.21	7.5	(a)
Total collections, Exor S.p.A.'s share					**74.4**	
SGS S.A.	ordinary	1,173,400	CHF	60.00	48.1	(b)
Sequana	ordinary	13,203,139	€	0.35	4.6	
Gruppo Banca Leonardo	ordinary	25,255,537	€	0.08	2.0	
Gruppo Banca Leonardo (distribution of reserves)	ordinary	25,255,537	€	1.00	25.3	(a)
Total collections, Exor S.p.A.'s share					**80.0**	

(a) The amounts will be recorded as a deduction from the carrying amount of the investments since they were drawn from capital reserves.
(b) CHF 70.4 million translated at the exchange rate of 1.4638.

Other investments

As a result of investment commitments in the NoCo B L.P. limited partnership, which groups a series of funds managed by Perella Weinberg Partners L.P., on January 28, 2010, EXOR S.A. invested another $9.3 million (€ 6.6 million) in the NoCo B L.P. limited partnership.

BUSINESS OUTLOOK

EXOR S.p.A. expects to report a profit for the year 2010.

At the consolidated level, the year 2010 should show a significant improvement in economic results which, however, will largely depend upon the performance of the principal investment holdings. Their most recent forecasts are presented below.

Fiat Group

After a particularly difficult 2009, with uneven trading conditions across the Fiat Group's international scope of operations, 2010 is positioning itself as a year of transition and stabilization.

The Fiat Group expects all of its Sectors to improve performance over the prior year, with the exception of the Automobiles business, the performance of which will be impacted by the reduction of eco-incentive programs which underpin demand in Western Europe.

The Fiat Group's forecasts include a continuation of the rigorous cost containment action initiated as early as the latter part of 2008, and which were implemented vigorously throughout 2009.

The capital expenditure programs which formed part of the 2007-2010 industrial plan outlined to the financial community in November 2006 underwent a severe contraction in 2009, in response to the uncertainty of the demand function for the Fiat Group's various businesses and the tightening of credit markets. This contraction is expected to ease in 2010, with the resumption of a normalized level of capital commitments across all Sectors, yielding a 30% to 35% rise in expenditures over 2009.

Targets for the year are heavily influenced by the non-renewal of eco-incentives on new car purchases in Italy. In particular, the Fiat Group expects to close 2010 with:

- revenues of € 50 billion
- trading profit of € 1.1 to € 1.2 billion
- net profit near breakeven
- net industrial debt above € 5 billion

The Fiat Group will, in any event, have more than adequate resources to transition to what is expected to be a normalized trading environment in 2011 and later years.

While working on the achievement of its objectives, the Fiat Group will continue to implement its strategy of targeted alliances in order to optimize capital commitments and reduce risks.

On April 21, 2010, the Fiat Group will present its Strategic Business Plan 2010-2014.
On that occasion, besides presenting the market with its economic and financial targets for each sector, the Fiat Group will announce the policies that will guide the strategic development and the positioning of each of its businesses and the Group.

C&W Group

The measures taken in the last three months of 2008 and in 2009 to eliminate inefficiencies, to reduce expenses and to maintain strong financial discipline, particularly during the early stages of the global economic recovery, have positioned C&W Group well for 2010. The Group's return to year-over-year revenue growth in the fourth quarter of 2009 against the backdrop of improvement in general market conditions, provides confidence that the Group continues to leverage its brand premium and leadership position in major markets and select service disciplines to gain market share. With cost containment measures in place, C&W Group's focus on selectively recruiting and retaining the sector's premier talent in the world's major business districts, and its continued emphasis on the diversification of its services and geographic reach, the outlook is positive for stronger revenues and more stable earnings in 2010.

Alpitour Group

The ongoing climate of general uncertainty continues to inevitably weigh upon the tourism industry. The first few months of the new financial year were again hurt by the structural weakness in demand with the exception of the holiday period at the end of the year, the results of which are considered to be positive. Despite the market picture, during the early months of the new year, the sales of Tour Operating, which represents the core business of the Alpitour Group, displayed a growth in volumes of approximately 5% compared to the prior year.

As far as the economic forecast for the current year is concerned, at the market level, the winter season is still expected to show signs of some difficulties and a weak demand while evidence of a recovery and a return to a climate of trust are anticipated in conjunction with the start of the summer season. Given this situation, the goals of the Alpitour Group are to better the economic results reported in 2009 in terms of both profit and margins, to consolidate the return on invested capital and further improve the financial situation as well as reconfirm its position as market leader also from the standpoint of innovation.

Juventus Football Club

Trends in the second half of the 2009/2010 financial year will be adversely affected by the absence of income from the transfer of players' registration rights, lower proceeds from participating in European tournaments and also the effect of a lower number of games scheduled to be played in the second half.

Accordingly, on the basis of the information currently available and barring any extraordinary events, the company's financial year is expected to close with a limited negative net result.

Sequana Group

For 2010, Sequana's objective is to improve the operating margin, reduce costs and the Group's debt and report a higher operating profit than in 2009.

REVIEW OF THE RESULTS OF THE SEPARATE FINANCIAL STATEMENTS

The year 2009 shows a profit of € 88.8 million. In 2008, the last year ended previous to the merger of IFIL, EXOR had reported a profit of € 49.1 million. For purposes of comparison with the 2009 figures, a pro-forma income statement has been drawn up for 2008 (prepared by the aggregating the EXOR and IFIL income statements line by line and eliminating income and expenses arising from transactions between the two companies, mainly dividends distributed by IFIL to EXOR and expenses/income on the loan made by IFIL to EXOR) which shows a pro-forma profit for the year 2008 of € 333 million. The net reduction of € 244.2 million is due to lower dividends from investment holdings (-€ 135.7 million) and lower gains on the disposal of Intesa Sanpaolo stock (-€ 145.8 million) as well as lower net financial expenses (+€ 46.1 million) and net general expenses (+€ 0.8 million), higher net non-recurring expenses (-€ 12.4 million), higher other taxes and duties (-€ 0.3 million) and, lastly, the release of deferred tax liabilities to income (+€ 3.1 million).

The shortened income statement and statement of financial position, as well as comments on the most significant line items are presented below.

EXOR S.p.A. – Income Statement - Shortened

1. Dividends from investments

In 2009, dividends from investments mainly include dividends collected from the subsidiary EXOR S.A. for € 120 million.

In 2008, this line item had included dividends (collected by IFIL) paid by Fiat (€ 145.4 million) and Intesa Sanpaolo (€ 110.2 million) and dividends received from Emittenti Titoli (€ 0.1 million).

2. Gains on disposals of investments

In 2009, the net gain of € 21.7 million is due to the sale of 78,000,000 Intesa Sanpaolo shares, equal to 0.66% of its ordinary capital stock. Proceeds on the sale total € 217.2 million.

In 2008, the net gain of € 167.5 million had referred to the sale, by IFIL, of 171,916,165 Intesa Sanpaolo shares, equal to 1.45% of its ordinary capital stock. Net proceeds had amounted to € 598.4 million.

3. Net financial expenses

Net financial expenses amount to € 19.4 million. This is a net reduction of € 46.1 million compared to 2008 (€ 65.5 million) due to higher financial income of € 22.1 million, lower financial expenses of € 27.4 million and higher exchange losses of € 3.4 million.

4. Net general expenses

Net general expenses total € 21.6 million and show a reduction of € 0.8 million compared to 2008 largely on account of lower personnel costs.

5. Investments

Juventus Football Club S.p.A.	120,934,166	0.61	74.2	0.89	**107.9**
Total			**3,083.6**		**3,847.6**

6. Equity

Equity at December 31, 2009 is € 3,539.8 million (€ 1,889.5 million at December 31, 2008). The positive change of € 1,650.3 million is detailed in the following table.
Further details are provided in the statement of changes in equity of the separate financial statements of EXOR S.p.A. at December 31, 2009.

€ in millions	
Equity at December 31, 2008	**1,889.5**
Fair value of EXOR S.p.A. capital increase to service the exchange of IFIL ordinary and savings shares held by non-controlling interests	431.0
Recognition of merger surplus	499.2
Recognition of exchange difference	747.0
Allocation of expenses relative to the merger	(17.1)
Fair value adjustments of investments net of deferred taxes	25.4
EXOR treasury stock purchases	(42.0)
Dividends distributed by EXOR S.p.A.	(81.7)
Other net changes	(0.3)
Profit for the year	88.8
Net change during the year	**1,650.3**
Equity at December 31, 2009	**3,539.8**

7. Net financial position

The balance is composed as follows:

	12/31/2009			12/31/2008		
€ in millions	**Current**	**Non-current**	**Total**	Current	Non-current	Total
Financial assets	**281.4**	**71.7**	**353.1**	0.3	0.4	0.7
Financial receivables from subsidiary	**28.2**	**0.0**	**28.2**			0.0
Cash and cash equivalents	**337.4**	**0.0**	**337.4**	0.5	0.0	0.5
Total financial assets	**647.0**	**71.7**	**718.7**	0.8	0.4	1.2
EXOR bonds 2007-2017	**(22.4)**	**(745.2)**	**(767.6)**			0.0
EXOR bonds 2006-2011	**(0.2)**	**(199.7)**	**(199.9)**			0.0
Bank debt and other financial liabilities	**(38.3)**	**(125.0)**	**(163.3)**	(21.6)	(150.0)	(171.6)
Debt with subsidiary					(199.5)	(199.5)
Total financial liabilities	**(60.9)**	**(1,069.9)**	**(1,130.8)**	(21.6)	(349.5)	(371.1)
Net financial position of Exor S.p.A.	**586.1**	**(998.2)**	**(412.1)**	(20.8)	(349.1)	(369.9)

The negative change of € 42.2 million in 2009 is due to the following flows:

€ in millions		
Net financial position at December 31, 2008		**(369.9)**
Net indebtedness of IFIL S.p.A. at December 31, 2008		(190.5)

REVIEW OF THE CONSOLIDATED RESULTS OF THE EXOR GROUP – SHORTENED

EXOR S.p.A., through the subsidiary EXOR S.A., holds some important investments and controls some companies which contribute to the Group's investment activities and financial resource management. These companies constitute, together with the services company, Exor Services (formerly Soiem), the so-called Holdings System (the complete list of these companies is presented below).

In order to facilitate the analysis of the equity and financial position and the results of operations of the Group, EXOR presents shortened consolidated financial statements (statement of financial position and income statement) prepared by applying the "shortened" consolidation criteria. Such shortened consolidated financial statements are presented along with the annual consolidated financial statements and the half-year condensed consolidated financial statements of each year. The quarterly consolidated data is also presented in the shortened format in the quarterly reports at March 31 and September 30 of each year.
In the preparation of the shortened consolidated statement of financial position and income statement, the separate financial statements or accounting data drawn up in accordance with IFRS by the Parent and the subsidiaries in the Holdings System are consolidated line-by-line; the investments in the operating subsidiaries and associates (Fiat, Sequana, C&W Group, Alpitour and Juventus Football Club) are accounted for by the equity method, on the basis of their consolidated or separate (in the case of Juventus Football Club) financial statements or accounting data prepared in accordance with IFRS.

The following table shows the consolidation methods used for the investment holdings; after the merger of the subsidiary IFIL S.p.A., which took place on March 1, 2009, the percentage of consolidation is the same as the percentage of interest.

	12/31/2009	12/31/2008	
	% of consolidation	% of consolidation	% interest
Companies of the Holdings System consolidated line-by-line			
- IFIL Investments S.p.A. (merged on March 1, 2009)	**-**	100	70
- Exor S.A. (formerly Ifil Investissements S.A.) (Luxembourg)	**100**	100	70
- Exor Capital Limited (formerly Ifil International Finance Ltd) (Ireland)	**100**	100	70
- Exor Services S.c.p.a. (formerly Soiem S.p.A.) (Italy)	**99.75**	100	70
- Exor Inc. (formerly Ifil USA Inc.) (USA)	**100**	100	70
- Exor Limited (formerly Ifil Asia Ltd) (Hong Kong) (a)	**100**	100	70
- Ifil France S.a.s. (France) - in a wind-up	**100**	100	70
- Ancom USA Inc (USA)	**100**	100	70
- Ifil New Business S.r.l. (Italy) (b)	**-**	100	70
- Eufin Investments Unlimited (Great Britain) - in a wind-up	**100**	100	70
- Ifil Group Finance Ltd (Ireland) - wound up in 2009	**-**	100	70
Investments in operating subsidiaries and associates, accounted for by the equity method			
- Fiat Group	**29.59**	29.40	20.58
- Sequana Group	**26.84**	26.91	18.84
- C&W Group	**78.88** (c)	74.43	52.10
- Alpitour Group	**100**	100	70
- Juventus Football Club S.p.A.	**60**	60	42

(a) Dormant since January 31, 2010.
(b) Merged in Exor Services S.c.p.a. on November 4, 2009.
(c) Percentage calculated on issued capital stock, net of treasury stock held and net of the estimate of treasury stock purchases from non-controlling interests by C&W Group.

The EXOR Group closes the year 2009 with a loss of € 388.9 million; the year 2008 ended with a consolidated profit of € 435.4 million, of which € 301.8 million was attributable to owners of the Parent and € 133.6 million to non-controlling interests of the subsidiary IFIL (merged on March 1, 2009).
The negative change in the consolidated result of € 824.3 million is due to the net decrease in the results of investment holdings (-€ 655.3 million), the reduction in the net financial result (-€ 155.5 million) and other net changes (-€ 13.5 million).

The consolidated equity attributable to owners of the Parent at December 31, 2009 is € 5,305.4 million, with an increase of € 1,689.8 million compared to € 3,615.6 million at December 31, 2008. The positive change is mainly due to the merger by incorporation of the subsidiary IFIL (+€1,706.2 million) and the consolidated loss for the year 2009 (-€ 388.9 million); other net changes (+€ 372.5 million) are provided in Note 14.

The consolidated net financial position of the “Holdings System” at December 31, 2009 shows a positive balance of € 51.6 million and an increase of € 63.1 million compared to the negative balance at the end of 2008 (-€ 11.5 million). Further details are provided in Note 16.

The shortened consolidated **income statement** and consolidated **statement of financial position** and comments on the most significant line items are presented in this section.

1. Share of the profit (loss) of investments accounted for by the equity method

In 2009, the share of the profit (loss) of investments accounted for by the equity method is a loss of € 319.1 million (a profit of € 336.2 million in 2008). The negative change of € 655.3 million reflects:

- an inversion of the result reported by the Fiat Group which led to a negative change of € 716.4 million;
- a return to a profit position by Sequana Group and Juventus Football Club which led to positive changes of € 120.7 million and € 7.6 million, respectively;
- an increase in the attributable loss of C&W Group (-€ 66.4 million);
- a reduction in the profit of the Alpitour Group which result in a negative change of € 0.8 million.

	Profit (Loss) (in millions)		EXOR's share (€ in millions)		
	2009	2008	**2009**	2008	Change
Fiat Group	€ **(837.8)**	€ 1,612.1	**(247.9)**	474.0	(721.9)

Total			**(319.1)**	336.2	(655.3)

(a) Includes non-cash impairment charges for intangible assets (-$76.7 million), restructuring charges in connection with cost reduction actions (-$29.9 million), costs associated with the relocation of the company's New York headquarters (-$7.5 million) and related tax benefits (+$19.3 million).

(b) Includes non-cash impairment charges for intangible assets (-$10.9 million), restructuring charges in connection with cost reduction actions (-$7.8 million) and related tax benefits (+$3.1 million).

(c) Impairment charge for goodwill represented by acquisition costs incurred by EXOR S.A..

Comments on the operating performance of the investments accounted for by the equity method are presented in the following sections.

2. Dividends from investments

In 2009, dividends from investments amount to € 40.5 million and include dividends received from SGS for € 38.4 million, Gruppo Banca Leonardo for € 2 million (€ 26.2 million and € 2.8 million in 2008, respectively) and Emittenti Titoli for € 0.1 million (unchanged compared to 2008). In 2008, dividends had also been received from Intesa Sanpaolo S.p.A. for € 110.2 million.

3. (Losses) Gains on disposals of investments

In 2009, the line item includes the net loss of € 15.4 million realized on the disposal on the market of a 0.66% stake in Intesa Sanpaolo ordinary capital stock. Further details are provided in the following Note 10.

In 2008, this line item had included the net gain of € 85.8 million realized on the disposal on the market of a 1.45% stake in ordinary capital stock of Intesa Sanpaolo.

4. Fair value adjustments to current and non-current financial assets

In 2009, fair value adjustments amount to a negative € 36.4 million (a negative € 67.2 million in 2008) and include the impairment charge of € 35.9 million on the embedded derivative relating to the Vision convertible bonds, the impairment charge of

€ 9.2 million on the bonds issued by DLMD recorded in non-current financial assets (of which € 2.3 million relates to the Junior portion and € 6.9 million to the Senior portion) and net revaluations of € 8.7 million relating to current financial assets. Further details on the bonds issued by DLMD are provided in the following Note 11.
The net revaluations of current financial assets refer to equity securities and bonds held for trading by EXOR S.p.A. for € 2.1 million (-€ 11.1 million in 2008) and the subsidiary EXOR S.A. for € 6.6 million (-€ 41.2 million in 2008).
The fair value of current securities is calculated using market prices at the end of December 2009 translated, if appropriate, at the year-end exchange rates.

In 2008, net impairment charges had amounted to € 67.2 million, of which € 52.3 million related to current financial assets (equity securities and bonds held for trading by Ifil Investissements (now EXOR S.A.) for € 41.2 million and IFIL for € 11.1 million).
An impairment charge of € 14.9 million had also been recognized on the Junior portion of the DLMD bonds recorded in non-current financial assets.

5. Interest and other financial income

In 2009, interest and other financial income amounts to € 71.8 million (€ 73.5 million in 2008) and includes:

€ in millions	**2009**	2008	Change
Financial income on securities held for trading	**37.2**	9.5	27.7
Interest income on:			
- bonds	**24.3**	29.3	(5.0)
- receivables from banks	**3.6**	12.3	(8.7)
- receivables from the tax authorities	**1.1**	1.4	(0.3)
- C&W Group loan	**1.7**	0.0	1.7
Exchange gains	**2.5**	10.9	(8.4)
Interest from interest rate hedge	**1.3**	7.9	(6.6)
Other income	**0.1**	2.2	(2.1)
Total	**71.8**	73.5	(1.7)

6. Interest and other financial expenses

In 2009, interest and other financial expenses amount to € 78.5 million (€ 93.9 million in 2008) and include:

€ in millions	**2009**	2008	Change
EXOR bond interest expenses	**49.7**	51.6	(1.9)
Financial expenses on securities held for trading	**15.3**	18.8	(3.5)
Exchange losses	**3.7**	0.4	3.3
Interest from interest rate hedges	**5.4**	0.0	5.4
Bank interest and other financial expenses	**4.4**	23.1	(18.7)
Total	**78.5**	93.9	(15.4)

7. Net general expenses

In 2009, net general expenses amount to € 28.8 million; the decrease of € 1.9 million compared to the prior year (€ 30.7 million) is basically due to the reduction in personnel costs.
The line item includes the figurative cost of the EXOR stock option plan of € 1.9 million in 2009 and € 1.3 million in 2008.

8. Non-recurring other income (expenses) and general expenses

In 2009, the line item is a negative € 12.9 million (a positive € 1.6 million in 2008) and includes:

€ in millions	**2009**	2008	Change
Fair value adjustment to Alpitour stock option plan	**(4.2)**	7.8	(12.0)
Costs for directors and employees	**(5.1)**	(5.6)	0.5
Legal fees for defense in pending cases	**(2.8)**	(1.5)	(1.3)
Sundry other income (expenses)	**(0.8)**	0.9	(1.7)
Total	**(12.9)**	1.6	(14.5)

Costs for directors and employees amounting to € 5.1 million (€ 5.6 million in 2008) include the special indemnity relative to the termination of the employment relationship resolved in favor of the former chief executive officer and general manager of IFI S.p.A., Virgilio Marrone, for € 3.3 million and expenses relating to headcount reductions for € 1.8 million (€ 0.6 million in 2008). In 2008, these costs had also included the special fee of € 5 million voted in favor of Mr Gabetti by the IFIL board of directors on May 13, 2008.

Legal fees for defense in pending cases total € 2.8 million (€ 1.5 million in 2008) and mainly refer to expenses incurred for assistance in the cases relating to the content of the press releases issued by IFIL and Giovanni Agnelli e C. on August 24, 2005 for € 2.6 million (€ 1.2 million in 2008).

Sundry other income (expenses) shows an expense balance of € 0.8 million in 2009 and an income balance of € 0.9 million in 2008. In 2009, the line item includes the cost of maintenance for the building owned by the subsidiary Exor Services of € 0.6 million and other expenses of € 0.2 million.
In 2008, the line item had included income arising from the excess of EXOR's share of IFIL's consolidated equity compared to the cost of IFIL shares purchased in January 2008 for € 2.3 million and also expenses incurred by EXOR S.A. for investment transactions for € 1.4 million.

9. Investments accounted for by the equity method

Details are as follows:

	Carrying amount at		
€ in millions	**12/31/2009**	12/31/2008	Change
Fiat Group	**3,057.0**	3,062.2	(5.2)
Sequana Group	**198.0**	189.9	8.1
C&W Group	**405.0**	482.5	(77.5)
Alpitour Group	**80.6**	84.2	(3.6)
Juventus Football Club S.p.A.	**69.5**	65.9	3.6
Others, in a wind-up	**0.0**	0.3	(0.3)
Total	**3,810.1**	3,885.0	(74.9)

10. Non-current other financial assets – Investments measured at fair value

Details are as follows:

€ in millions	12/31/2009 %	12/31/2009 Carrying amount	12/31/2008 %	12/31/2008 Carrying amount	Change
Intesa Sanpaolo S.p.A. (a)	0.34	**126.6**	1.00	297.2	(170.6)
SGS S.A. (a)	15.00	**1,068.5**	15.00	869.2	199.3
Gruppo Banca Leonardo S.p.A.	9.74	**84.7**	9.76	87.6	(2.9)
NoCo A LP	1.96 (b)	**19.0**	1.96 (b)	19.5	(0.5)
Banijay Holding S.A.S.	17.08	**33.6**	17.03	21.4	12.2
Total		**1,332.4**		1,294.9	37.5

(a) Based on the stock market price at year-end with recognition of unrealized gains and losses in equity.
(b) Percentage of interest in the limited partnership.

At December 31, 2009, the reduction in the investment in **Intesa Sanpaolo** of € 170.6 million is the result of the derecognition of the carrying amount (-€ 196.5 million) of the stake sold (0.66% of ordinary capital stock) and the adjustment of the residual interest to fair value at the end of the year (+€ 25.9 million).
The derecognition of the carrying amount of the stake sold (-€ 196.5 million) includes the ordinary purchase cost of € 232.6 million and the cumulative negative fair value of € 36.1 million.
The loss of € 15.4 million derives from the comparison between the net proceeds of € 217.2 million and the original cost of purchase of € 232.6 million. The cumulative negative fair value of € 36.1 million was recorded as an increase to the specific reserve in consolidated equity.
The stock market price per share of Intesa Sanpaolo ordinary shares at December 30, 2009 was € 3.165.
The original purchase cost of the residual amount of the investment in Intesa Sanpaolo is € 2.98 per share, for a total of € 119.3 million; at December 30, 2009, the net positive adjustment to fair value amounts to € 7.3 million.

The increase in the investment in **SGS** of € 199.3 million is the result of the fair value adjustment at December 31, 2009.
The per share market price of SGS stock at December 31, 2009 is equal to CHF 1,351, corresponding to € 910.62 at the exchange rate of 1.4836.
The original carrying amount of the investment in SGS is € 400.31 (CHF 593.9) per share, for a total of € 469.7 million; at December 31, 2009, the net positive adjustment to fair value (CHF 757.11 equal to € 510.32 per share) amounts to € 598.8 million.

The reduction in the investment in **Gruppo Banca Leonardo** is due to the negative adjustment to fair value of € 2.9 million. The estimate was made by an independent expert.

The increase in the investment in **Banijay Holding** of € 12.2 million is the result of the subscription to two capital stock increases by EXOR S.A. The estimate made by an independent expert confirmed that the fair value does not differ from the carrying value of the investment.

11. Non-current other financial assets – Other investments

Details are as follows:

€ in millions	**12/31/2009**	12/31/2008		Change
Other investments at fair value				
- NoCo B LP	**25.9**	23.8		2.1
- DLMD bonds	**6.3**	13.4		(7.1)
- RHO real estate fund shares	**10.0**	0.0		10.0
- Other	**4.2**	0.3		3.9
	46.4	37.5		8.9
Other investments at amortized cost				
- Perfect Vision Limited convertible bonds	**67.5**	70.7	(a)	(3.2)
- Other bonds held to maturity	**86.9**	0.0		86.9
	154.4	70.7		83.7
Total	**200.8**	108.2		92.6

(a) Including the embedded derivative of € 3.9 million, which, at December 31, 2009, has been written down for the entire amount.

In July 2008 and subsequently in July and December 2009, certain clauses were renegotiated for the **DLMD bond issue** which was subdivided into Senior and Junior bond portions. The redemption of the Junior portion, scheduled for 2010, in exchange for a higher yield, is subordinate to that of the Senior portion.

At December 31, 2009, EXOR S.A. holds a nominal amount of bonds for € 27.2 million, of which € 12.3 million represents Senior bonds and € 14.9 million Junior bonds. At December 31, 2008, an impairment charge had been recognized on the entire nominal amount of the Junior bonds. At December 31, 2009, further impairment charges were recognized for a total of € 9.2 million, of which € 2.3 million relates to accrued interest income on the Junior portion and € 6.9 million on the Senior portion, written down by an amount up to the market value at December 31, 2009 of the guarantee obtained.
The Senior portion that was not written down, equal to € 6.3 million, is guaranteed by EXOR S.A.'s share of the 10,806,343 Sequana shares guaranteeing, by contract, DLMD's entire bond issue and measured at the stock market price at December 31, 2009.

12. Goodwill

At December 31, 2008, goodwill had amounted to € 67.6 million and originated from purchases of IFIL stock in 2007.
Following the merger, the entire amount was recorded as a deduction from equity, consistently with the allocation of the exchange reserve to equity.

13. Comparison between carrying amounts and market prices of listed investments and other financial assets

Details are as follows:

				Market price			
		Carrying amount		12/30/2009		2/26/2010	
	Number	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)
Investments							
Fiat S.p.A.							
- ordinary shares	332,587,447	8.35	**2,777.9**	10.26	**3,412.3**	7.69	**2,557.6**
- preferred shares	31,082,500	8.35	**259.6**	5.99	**186.1**	4.73	**147.1**
- savings shares	2,338,629	8.35	**19.5**	6.29	**14.7**	5.00	**11.7**

Total			**4,519.6**		**5,021.5**		

(a) List price at December 31, 2009.
(b) Measurement of the remaining 10,000,000 ordinary shares in portfolio at the end of February.

14. Equity attributable to owners of the Parent and non-controlling interests

Details are as follows:

€ in millions	**12/31/2009**	12/31/2008	Change
Capital stock	**246.2**	163.3	82.9
Reserves	**5,171.7**	3,522.8	1,648.9
Treasury stock	**(112.5)**	(70.5)	(42.0)
Total equity attributable to owners of the Parent	**5,305.4**	3,615.6	1,689.8
Equity attributable to non-controlling interests	**0.0**	1,706.2	(1,706.2)
Total	**5,305.4**	5,321.8	(16.4)

Details of the composition and changes in treasury stock are presented in Significant Events in 2009 in this Report.

The change during the year is analyzed as follows:

€ in millions	Capital stock issued and reserves attributable to owners of the Parent	Attributable to non-controlling interests	Total
Equity at December 31, 2008	**3,615.6**	**1,706.2**	**5,321.8**
Fair value of EXOR S.p.A. capital increase to service the exchange of IFIL ordinary and savings shares held by non-controlling interests	431.0	(431.0)	0.0
Allocation to owners of the Parent of the interest of the former non-controlling interests of IFIL (a)	1,275.2	(1,275.2)	0.0
Allocation of expenses relative to the merger	(17.1)		(17.1)
Other changes connected with the merger	14.0		14.0
Derecognition of the cumulative negative fair value on the stake sold in Intesa Sanpaolo (Note 10)	36.1		36.1
Fair value adjustments on:			
- remaining investment in Intesa Sanpaolo (+€ 25.9 million, net of -€ 0.4 million of deferred taxes) (Note 10)	25.5		25.5
- investment in SGS S.A. (Note 10)	199.3		199.3
- NoCo B	6.5		6.5
- Gruppo Banca Leonardo (Note 10)	(2.9)		(2.9)
- Other	0.4		0.4
Treasury stock purchases	(42.0)		(42.0)
Sale of EXOR treasury stock by Exor Services	2.8		2.8
Attributable exchange differences on translating foreign operations (+€ 149.5 million) and other net changes shown in the equity of the investments consolidated and accounted for by the equity method (+€ 82 million)	231.5		231.5
Dividends distributed by EXOR S.p.A.	(81.6)		(81.6) (b)
Consolidated loss attributable to owners of the Parent	(388.9)		(388.9)
Net change during the year	**1,689.8**	**(1,706.2)**	**(16.4)**
Equity at December 31, 2009	**5,305.4**	**0.0**	**5,305.4**

(a) Difference between the fair value of the EXOR S.p.A. capital increase and the carrying amount of the consolidated equity of the IFIL Group attributable to non-controlling interests.

(b) Net of € 0.1 million of intragroup dividends.

15. Provisions for other liabilities and charges

At December 31, 2008, the provisions for other liabilities and charges amounted to € 81.6 million and were originally charged in 2003 for the reorganization of the Group.

Following the merger, this amount was recorded as an increase in equity, consistently with the accounting treatment followed when the provision was set up.

16. Consolidated net financial position of the Holdings System

The consolidated net financial position of the Holdings System at December 31, 2009 shows a positive balance of € 51.6 million and a positive change of € 63.1 million compared to a negative balance at year-end 2008 (-€ 11.5 million).

The balance is composed as follows:

	12/31/2009			12/31/2008		
€ in millions	**Current**	**Non-current**	**Total**	Current	Non-current	Total
Financial assets	**604.5**	**87.2**	**691.7**	312.4	0.6	313.0
Financial receivables from subsidiary	**28.2**	**0.0**	**28.2**	0.0	0.0	0.0
Cash and cash equivalents	**462.5**	**0.0**	**462.5**	820.1	0.0	820.1
Total financial assets	**1,095.2**	**87.2**	**1,182.4**	1,132.5	0.6	1,133.1
EXOR bonds 2007-2017	**(22.4)**	**(745.2)**	**(767.6)**	(22.4)	(744.7)	(767.1)
EXOR bonds 2006-2011	**(0.2)**	**(199.7)**	**(199.9)**	(0.6)	(199.5)	(200.1)
Bank debt and other financial liabilities	**(38.3)**	**(125.0)**	**(163.3)**	(27.4)	(150.0)	(177.4)
Total financial liabilities	**(60.9)**	**(1,069.9)**	**(1,130.8)**	(50.4)	(1,094.2)	(1,144.6)
Consolidated net financial position of the Holdings System	**1,034.3**	**(982.7)**	**51.6**	1,082.1	(1,093.6)	(11.5)

Current financial assets include equity securities listed in major international markets and listed bonds with maturities of more than three months issued by leading financial institutions. Such securities, if held for trading, are measured at fair value on the basis of the market price at year-end, translated, if appropriate, at year-end exchange rates, with a corresponding entry to income; if held to maturity, they are measured at amortized cost. Derivative financial instruments are also used.

Non-current financial assets include bonds issued by leading issuers and classified in other investments held-to-maturity, measured at amortized cost.

Financial receivables from subsidiaries include the amount drawn down by C&W Group on the credit line (for a maximum $50 million) extended by EXOR S.p.A. for € 28.2 million ($40 million) including accrued interest at the end of the year.

Cash and cash equivalents include demand deposits or short-term deposits and highly liquid money market instruments and bonds. Investments are spread over an appropriate number of counterparts since the primary objective is the ready conversion into cash. The counterparts are chosen according to their creditworthiness and reliability.

The positive change of € 63.1 million in 2009 is due to the following flows:

€ in millions		
Consolidated net financial position of the Holdings System at December 31, 2008		**(11.5)**
Dividends received from investments		40.5
- SGS S.A.	38.4	
- Gruppo Banca Leonardo S.p.A.	2.0	
- Emittenti Titoli S.p.A.	0.1	
EXOR treasury stock purchases		(42.0)
- 2,550,000 ordinary shares (1.59% of the class)	(29.6)	
- 1,605,000 preferred shares (2.09% of the class)	(10.7)	
- 208,400 savings shares (2.27% of the class)	(1.7)	
Disposals and reimbursements		228.2
- Intesa Sanpaolo (0.66% of ordinary capital stock)	217.2	
- 214,756 EXOR ordinary shares (0.13% of the class) held by Exor Services (formerly Soiem)	2.8	
- Reimbursements from NoCo B LP	8.2	
Investments		(42.4)
- Banijay Holding (subscription to capital stock increases)	(12.2)	
- Fiat, purchase of 2,338,629 savings shares (2.93% of the class)	(13.0)	
- Rho Immobiliare closed-end real estate fund shares	(10.0)	
- Investments in NoCo B LP	(3.6)	
- Other non-current financial assets, net	(3.6)	
Dividends distributed by EXOR S.p.A. (a)		(81.6)
Other changes		(39.6)
- Collection of receivables from the Italian tax authorities	16.2	
- Net general expenses (excluding the figurative cost of EXOR stock option plan)	(26.9)	
- Non-recurring other income (expenses) and general expenses (excluding fair value adjustment of the Alpitour stock option plan)	(8.7)	
- Other taxes and duties	(4.0)	
- Net financial income (b)	1.4	
- Expenses incurred for merger and other net changes	(17.6)	
Net change during the year		**63.1**
Consolidated net financial position of the Holdings System at December 31, 2009		**51.6**

(a) Net of € 0.1 million of intragroup dividends.

(b) Includes fair value adjustments to current and non-current financial assets (-€ 36.4 million), interest and other financial income (+€ 71.8 million), interest and other financial expenses (-€ 78.5 million) net of the fair value adjustment to DLMD bonds (€ 6 million) and Vision convertible bonds (€ 38.5 million) which are recorded in non-current financial assets and, consequently, are not included in the net financial position.

At December 31, 2009, EXOR S.p.A. has irrevocable credit lines for € 910 million, of which € 810 million due after December 31, 2010, as well as revocable credit lines for € 832 million.

On February 9, 2010, Standard & Poor's confirmed its rating of EXOR's long-term and short-term debt (respectively "BBB+" and "A-2") with a negative outlook.

17. Reconciliation between the consolidated net financial position of the Holdings System and the consolidated net financial position – line-by-line consolidation

€ in millions	**12/31/2009**	12/31/2008	Change
Consolidated net financial position of the Holdings System	**52**	(12)	64
Net financial position of investments consolidated line-by-line:			
- C&W Group	**(124)**	(108)	(16)
- Alpitour Group	**67**	34	33
- Juventus Football Club S.p.A.	**10**	11	(1)
Consolidated net financial position - line-by-line consolidation	**5**	(75)	80

The composition of the consolidated net financial position - line-by-line consolidation is presented in Note 33 to the consolidated financial statements of the EXOR Group.

18. Reconciliation between the shortened consolidated financial statements and the consolidated financial statements

The following table presents a reconciliation between the shortened consolidated financial statements and the consolidated financial statements prepared in accordance with IFRS.

The first column ("Shortened consolidation") presents the data that has been commented on in the preceding pages, reclassified according to the consolidated financial statement formats.

The second column ("Eliminations and consolidation adjustments") shows the adjustments necessary to eliminate the share of profit or loss and the carrying amount of the investments in C&W Group, Alpitour Group and Juventus Football Club (accounted for in the shortened consolidated financial statements by the equity method) in order to arrive at the line-by-line consolidation of their financial statements or accounting data, which is shown in the respective columns.

(a) Direct holding.
(b) Indirect holding through spouse.
(c) IFIL ordinary shares held at December 31, 2008 have been indicated as EXOR ordinary shares, taking into account the exchange ratio of the merger.

It should be noted that a family member of the CEO, Carlo Sant'Albano, holds 7,685 EXOR ordinary shares.

There are no key managers with strategic responsibilities in EXOR S.p.A..

Direction and coordination

EXOR S.p.A. is not subject to direction and coordination of any other company or entity and is fully independent in the definition of its general strategic and operating guidelines. Pursuant to art. 2497 of the Italian Civil Code, the subsidiary Exor Services S.c.p.a. has identified EXOR S.p.A. as the entity which exercises direction and coordination.

Programming document on security

The Company has prepared the programming document on security on November 30, 2009 for the year 2009 according to the provisions of Legislative Decree 196 dated June 30, 2003, attachment B – technical specifications regarding minimum security measures. The document has been drawn up by the person in charge of the treatment of the data.

Related party transactions

The statement of financial position balances and income statement transactions with related parties are disclosed in specific notes to the separate financial statements and the consolidated financial statements.

Information pertaining to personnel

The information is reported in the notes to the separate and consolidated financial statements.

REVIEW OF PERFORMANCE BY THE MAIN OPERATING SUBSIDIARIES AND ASSOCIATES AND RELEVANT SUBSIDIARIES OF THE HOLDINGS SYSTEM

(30.45% of ordinary capital stock, 30.09% of preferred capital stock and
2.93% of savings capital stock)

The consolidated results of the Fiat Group can be summarized as follows:

			Change	
€ in millions	**2009**	2008	Amount	%
Net revenues	**50,102**	59,564	(9,462)	(15.9)
Trading profit (loss)	**1,058**	3,362	(2,304)	(68.5)

€ million	**2009**	2008	%
Automobiles (Fiat Group Automobiles, Maserati, Ferrari)	**28,351**	29,380	(3.5)
Agricultural and Construction Equipment (CNH-Case New Holland)	**10,107**	12,781	(20.9)
Trucks and Commercial Vehicles (Iveco)	**7,183**	10,894	(34.1)
Components & Production Systems (FPT, Magneti Marelli, Teksid, Comau)	**10,327**	13,793	(25.1)
Other Businesses	**1,096**	1,394	(21.4)
Eliminations	**(6,962)**	(8,678)	-
Net revenues	**50,102**	59,564	(15.9)

In 2009, the **Automobiles** businesses have revenues of € 28,351 million, down 3.5% over 2008. **Fiat Group Automobiles** post revenues of € 26.3 billion, a 2.4% decrease over 2008, with 2,150,700 passenger cars and light commercial vehicles for the year delivered (in line with 2008). FGA closed the year with its highest ever fourth quarter revenues. Full year market share for passenger cars increased in Western Europe to 8.8% (+0.6 percentage points), with increases in Italy to 32.8% (+0.9 percentage points) and several other key markets. In Brazil, where overall demand rose 12.6%, Fiat maintained its leadership position, with an overall share of 24.5% in a market that grew 12.6%. In 2009, **Maserati** reports revenues of € 448 million, down 45.7% over the previous year. A total of 4,489 cars were delivered to the network during the year, representing a 48.7% year-on-year decrease attributable to the significant decline in demand in the company's reference markets. **Ferrari** has revenues of € 1,778 million, down 7.4% over 2008 due to lower sales volumes and a less favorable sales mix. A total of 6,235 vehicles were delivered to the network during the year, a decrease of 4.5% against an approximate 35% contraction for Ferrari's reference segment globally.

Agricultural and Construction Equipment (CNH) is down 20.9% to € 10.1 billion from 2008, reflecting the severe global construction equipment industry decline and weaker market conditions for the agricultural business (compared to record high 2008 levels, particularly for combines). CNH achieved share gains for higher-powered tractors in North America and for combines in Latin America. CNH market share improved for construction equipment in Latin America for both heavy vehicles and light vehicles.

Trucks and Commercial Vehicles (Iveco) report revenues of € 7.2 billion, down 34.1% year-over-year, with declines in vehicles delivery (-45.9% to 103,866 vehicles) reflecting the sharp market decline, particularly in Europe and in the heavy vehicles segment.

Components & Production Systems post revenues of € 10.3 billion, down 25.1% from 2008 reflecting the decline in volumes in all Sectors.

Trading profit (loss)

In 2009, the Group's full year **trading profit** is € 1,058 million, compared to € 3,362 million for 2008 (down 68.5%). Decisive cost containment measures helped mitigate the impact of revenue declines and contributed to the achievement of a 2.1% trading margin. An analysis of trading profit (loss) by Business/Sector is as follows.

€ million	**2009**	2008	Change
Automobiles (Fiat Group Automobiles, Maserati, Ferrari)	**719**	1,102	(383)
Agricultural and Construction Equipment (CNH-Case New Holland)	**337**	1,122	(785)
Trucks and Commercial Vehicles (Iveco)	**105**	838	(733)
Components & Production Systems (FPT, Magneti Marelli, Teksid, Comau)	**(40)**	402	(442)
Other Businesses and Eliminations	**(63)**	(102)	39
Total trading profit	**1,058**	3,362	(2,304)
Trading margin (%)	**2.1**	5.6	

Fiat Group Automobiles record a € 470 million trading profit for 2009 (trading margin of 1.8%) compared to € 691 million for 2008 (2.6% margin). The decrease is primarily attributable to weaker demand for light commercial vehicles which was partially offset by cost containment measures. **Maserati** has a 2009 trading profit of € 11 million (€ 72 million for 2008), with a realignment of production levels and rigorous cost containment measures partly offsetting the significant decline in volumes. **Ferrari** closes 2009 with a trading profit of € 238 million, compared to € 339 million for 2008. The year-on-year decrease reflects the negative impact of volumes and product mix (both particularly favorable in 2008), in addition to unfavorable currency movements. These negative effects were partially offset by efficiency gains achieved.

CNH has a trading profit of € 337 million for 2009, compared to € 1,122 million for 2008. Cost containment measures and positive pricing only partially offset the drastic volume declines in the construction equipment market.

Despite steep volume declines, **Iveco** delivers a trading profit of € 105 million for 2009 (€ 838 million for 2008) due to realignment of production levels and rigorous cost containment measures, as well as margin support from the after-sales activities, Latin America and special vehicles business.

Components & Production Systems report an aggregate trading loss of € 40 million, compared to a € 402 million trading profit for 2008. Significant cost containment measures were only able to partially compensate the negative performance for the year caused by a contraction in volumes.

Operating profit (loss)

Operating profit is € 359 million for 2009, compared to € 2,972 million for 2008. The decrease reflects lower trading profit (down € 2,304 million).

Net unusual expense of € 699 million (net unusual expense of € 390 million for 2008) consists of **restructuring costs** of € 312 million (€ 165 million for 2008) and **other unusual items** of € 391 million (€ 245 million for 2008) which includes writedowns by the Automobiles business of certain investments in platforms and architectures related to the strategic realignment with Chrysler Group LLC in addition to other asset impairment losses recognized by various Sectors of the Group as a consequence of the global economic crisis.

Net financial expense

Net financial expense totals € 753 million for 2009 (€ 947 million for 2008) and includes a € 117 million gain in the mark-to-market value of two stock option-related equity swaps (a € 263 million loss for 2008). Excluding the effect of those equity swaps, financial expense for the year increased € 186 million, primarily due to the higher level of debt existing during the year.

Profit (loss) before taxes

The Group records a **loss before taxes** of € 367 million for 2009 (profit before taxes of € 2,187 million for 2008). This reflects a significantly lower operating profit (down € 2,613 million) and a decrease in investment income (down € 135 million), which were partially compensated by lower net financial expense.

Income taxes

Income taxes total € 481 million for 2009 (€ 466 million for 2008), relating to the taxable income of companies operating outside Italy and employment-related current income taxes (IRAP).

Consolidated profit (loss) for the year

The **consolidated loss for the year** is € 848 million for 2009 (€ 267 million loss excluding the impact of unusual items), compared to a profit of € 1,721 million for 2008.

The **loss attributable to owners of the Parent** of the Fiat Group is € 838 million for 2009 (a profit of € 1,612 million for 2008).

Equity

Equity attributable to owners of the Parent of the Fiat Group at December 31, 2009 amounts to € 10,301 million. The net decrease of € 53 million compared to the balance at December 31, 2008 (€ 10,354 million) is mainly due to the effect of the loss for the year and the negative impact of dividends distributed, offset in part by the positive effect of exchange differences on translating foreign operations denominated in currencies other than Euro and the positive change in the cash flow hedge reserve.

Net debt

At December 31, 2009, **net debt** totals € 15,898 million, down € 2,056 million from the € 17,954 million at December 31, 2008.

Net industrial debt of the Group decreased € 1.5 billion to € 4.4 billion, driven primarily by rigorous working capital management, including significant destocking across all businesses. Liquidity at year-end stood at € 12.4 billion, guaranteeing the Group adequate resources to cover scheduled maturities well beyond 2011.

(15% of capital stock through EXOR S.A.)

The highlights of the consolidated results of the SGS Group in 2009 are as follows:

			Change	
CHF in millions	**2009**	2008	Amount	%
Sales	**4,712**	4,818	(106)	-2.2
Operating profit	**794**	937	(143)	-15.3
Profit attributable to owners of the Parent	**566**	692	(126)	-18.2
Consolidated net financial position	**476**	248	228	n.s.

During 2009, the SGS Group recorded sales of CHF 4.71 billion, with an increase of 2.5% (at constant exchange rates) year-over-year.
All the divisions and geographical areas in which the Group operates registered stable or better trends in terms of sales except for the Minerals division (-10.4%) and Automotive division (-4.6%) which were hurt the most by the difficult economic situation.

Operating profit before non-recurring items rose to CHF 814 million (+0.5%) while operating profit is CHF 794 million, contracting CHF 143 million (-15.3%) compared to the prior year. The reduction is mainly due to the absence in 2009 of some non-recurring income that had been recorded in 2008.

Results according to the various business sectors are as follows:

	Sales		*Growth rate*	Operating profit		Operating margin	
CHF in millions	**2009**	2008		**2009**	2008	**2009**	2008

Total	**4,712**	4,818	*(2.2%)*	**814**	810	***17.3%***	*16.8%*

The profit attributable to owners of the Parent is CHF 566 million, decreasing 18.2% over 2008. This contraction is largely due to net non-recurring income of CHF 113 million that had been recorded in 2008 and relating to the collection of a receivable from the Philippine government.

The net financial position at December 31, 2009 is positive for CHF 476 million. During the course of 2009, net investments were made for CHF 209 million, two acquisitions for CHF 11 million, treasury stock sales for CHF 15 million and dividends were distributed for CHF 375 million.

Notwithstanding the difficulty in making forecasts in the current market scenario, the SGS Group expects to continue to grow also in 2010 from the standpoint of both revenues and profit.

(71.03% of capital stock through EXOR S.A.)

C&W Group's financial performance was adversely affected for the full-year 2009 by the continuation of the weaker economic environment that intensified at the end of 2008 and which marked a low for the commercial real estate sector in the first half of 2009 in terms of transaction activity on a global basis. C&W Group managed to mitigate the effects of the significant decrease in business activities on its financial performance through proactive and targeted cost management initiatives which were executed in late 2008 and throughout 2009. Due to stabilization and in some cases, modest improvements in the business environment for commercial real estate sales and leasing transactions, C&W Group's business activities increased in the fourth quarter 2009, as compared with the same period in 2008. The increase in activities resulted in fourth quarter 2009 net revenues of $410.4 million, which represented an increase of $40.6 million, or 11%, as compared with the corresponding period in 2008 ($369.8 million).

In 2009, C&W Group's **gross revenues** were $1,548.2 million, a decline of $285.2 million, or 15.6%, as compared with $1,833.4 million in 2008.
Net revenues decreased $300.1 million, or 20%, to $1,201.5 million, down from $1,501.6 million for the corresponding period in 2008.

Declines in gross revenues were primarily due to a decrease in revenues in the Americas and EMEA of $174.4 million and $105.8 million, respectively. In the Americas, the decrease was largely attributable to a decline in gross revenue of $135 million in the United States and $20.9 million in Canada. Asia Pacific experienced a decrease in gross revenue of $4.1 million, which was mitigated by the acquisition of Pacific Investment Corporation in the second half of 2009, which immediately increased the properties under management throughout Japan.

The following details present the breakdown of gross revenues and net revenues by geographical area.

			Change	
$ in milions	**2009**	2008	Amount	%
Americas	**1,117.7**	1,292.1	(174.4)	-13.5
EMEA	**343.6**	449.4	(105.8)	-23.5
Asia Pacific	**86.9**	91.0	(4.1)	-4.5
Corporate	**0.0**	0.9	(0.9)	n.s.
Gross revenues	**1,548.2**	1,833.4	(285.2)	-15.6
Americas	**808.0**	998.7	(190.7)	-19.1
EMEA	**323.3**	423.1	(99.8)	-23.6
Asia Pacific	**70.2**	78.9	(8.7)	-11.0
Corporate	**0.0**	0.9	(0.9)	n.s.
Net revenues	**1,201.5**	1,501.6	(300.1)	-20.0

The **Americas** region, including the United States, Canada and Latin America, accounts for 72% of gross revenues and 67% of net revenues for 2009 (gross revenues at $1,117.7 million, -14% compared with 2008; net revenues at $808 million, -19% compared with 2008).
EMEA accounts for 22% of gross revenues and 27% of net revenues (gross revenues at $343.6 million, -24% compared with 2008; net revenues at $323.3 million, -24% compared with 2008).
Asia Pacific accounts for 6% of gross revenues and 6% of net revenues (gross revenues at $86.9 million, -5% compared with 2008; net revenues at $70.2 million, -11% compared with 2008).

Among the firm's global service disciplines, the **Transaction Services** business represents 53% of total net revenues, followed by **Capital Markets** and **Client Solutions**, which comprise 24% and 21%, respectively.

Commission expense for 2009 decreased $117.3 million, or 24%, to $377.8 million, down from $495.1 million for 2008. The decrease is due primarily to a decrease in the United States of $100.2 million, driven by reductions in net revenues in an environment of slower transaction activity and changes to the performance targets for brokerage professionals, which reduced the commission rates payable to brokers earning under certain targets. These factors contributed to the decrease in commission expense as a percentage of net revenues in the United States to 49% in 2009 from 52% in 2008.

Total operating expenses for the year ended December 31, 2009 decreased by $82.8 million, or 8%, from $1,020.9 million for 2008 to $938.1 million for 2009. Total operating expenses for 2009 include certain non-recurring/incremental charges totaling $114.1 million, including non-cash impairment charges for intangible assets of $76.7 million, restructuring charges in connection with cost reduction actions of $29.9 million, and costs associated with the relocation of C&W Group's world headquarters of $7.5 million.
The 2008 total operating expenses included non-recurring/incremental charges totaling $18.7 million, including non-cash impairment charges for intangible assets and investments of $10.9 million and restructuring charges in connection with cost reduction actions of $7.8 million. Excluding the impact of the non-recurring/incremental charges in 2009 and 2008, the decrease in total operating expenses in 2009, as compared with 2008, is $178.2 million, or -18%.

The decrease in operating expenses in 2009 is due primarily to significant cost reduction initiatives that began in 2008 and continued throughout 2009, including decreases in employment and related discretionary expenses. The employment decreases were accomplished through the elimination of approximately 1,300 positions associated with the reduction of workforce initiatives taken in the fourth quarter of 2008 through 2009. Collectively, C&W Group's cost reduction initiatives referenced above are expected to reduce annual run-rate expenses by approximately $300 million.

C&W Group reported an operating loss (EBIT) of $114.4 million and $14.4 million in the years ended December 31, 2009 and 2008, respectively. The operating profit for both periods was adversely impacted by the non-recurring/incremental charges and the restructuring charges outlined above. In addition, the 2009 operating profit was negatively impacted by the relocation costs discussed above. Excluding the impact of these charges in both years, C&W Group's operating profit/(loss) (EBIT) would have been $(0.3) million in 2009 and $4.3 million in 2008.

For the year ended December 31, 2009, C&W Group incurred a net loss of $125.5 million, of which $127 million is attributable to the owners of the Parent, as compared with a net loss of $30.9 million, of which $29.6 million is attributable to the owners of the Parent, for the prior year. C&W Group's operating performance for the year was adversely impacted by the sharp fall in business activities, which negatively impacted net revenues and the significant level of non-recurring/incremental charges incurred, partially offset by the cost reduction initiatives, all as outlined above. In addition, $61.9 million of the $76.7 million in impairment charges for intangible assets relates to goodwill for which C&W Group receives no tax benefit. Excluding the after-tax effect of the non-recurring/incremental charges, the net losses attributable to the owners of the Parent for 2009 and 2008 would have been $32.2 million and $14 million, respectively.

As of December 31, 2009, C&W Group's net financial position is $(178.5) million, as compared to $(150.2) million at the end of December 2008. The year-over-year increase is primarily due to working capital requirements and the funding of C&W Group's cost reduction initiatives during 2009. Included in the $178.5 million above is $40 million that C&W Group borrowed against a $50 million 3-year subordinated credit line extended by EXOR in 2009. C&W Group used the credit line on two occasions in 2009, initially to meet financing needs and to provide flexibility for growth, and on the second occasion to lower its cost of borrowing by reducing C&W Group's leverage ratio and placing it in a lower tier of its bank debt interest rate pricing grid.

(100% of capital)

Alpitour World is an integrated business with a presence guaranteed by a broad network of specialized companies that follow the entire tourism chain step by step: from productive factors (Hotel and Aviation) to organization and aggregation of services, handled by the companies of the Tour Operating, Incoming and Incentive & Eventi division, all the way up to distribution in Italy through the Welcome Travel network of agencies, and abroad through Jumbo Tours and online via the Group's website www.alpitourworld.com.
With a client following in 2008/2009 that reached 2.5 million, the Alpitour Group, thanks to partnerships with an international profile, has a stable position as one of the top ten major European tourist operators.

Tour Operating is the core business of Alpitour World. With its established trademarks, Alpitour World is the undisputed market leader in Italy. The growth in the propensity of clients to use the internet not only for information purposes but also as a booking channel has led the Group to open a new travel channel with the www.alpitourworld.com platform and create a new tour operator, Jeans, exclusively targeting online clientele. The Group's leadership can be measured on various fronts, foremost among them being the pool of captured clientele: in the tour operating segment alone, Alpitour World has taken more than 800 thousand clients on vacation in the last year.

Through Alpitour World Hotels & Resorts, the Alpitour Group can count on a direct and qualified presence in the hotel sector. Alpitour World Hotels & Resorts, with its operating headquarters in Rome, offers a portfolio of 19 structures including hotels, villages and resorts, located in cities but also in some of the most beautiful tourist spots on the sea in Italy and around the world.

With Neos, a company controlled entirely by the Group, Alpitour World has its own fleet of planes able to reach world vacation destinations: five B737-800 and two B767-300ER aircraft for short/medium haul and also long haul flights. Cost optimization, high operating efficiency and strong integration with the Tour Operating division have allowed Neos to confront, without difficulty, a delicate time in the airplane industry which is particularly exposed to the negative consequences of the world economic crisis and competition from low cost airlines. Since 2009, Neos is the sole Italian airline to have winglet on all its aircraft, thus reducing fuel consumption and improving the environmental impact. Neos' operating headquarters are at Milan Malpensa, Bologna and Verona.

Direct control over accommodation services on many programmed destinations is a strong point for Alpitour World: a constant control over destinations gives Alpitour World a privileged role in relations with the business community and local services. In the incoming sector, the Group operates through Jumbo Tours, a company conceived in Spain in 1977 to manage accommodations/incoming services abroad which over the years has become one of the most prominent companies in the sector. Located in nine countries throughout the world, it operates B2B online sales with the Jumboonline.es platform which in 2008-2009 boasted more than 460,000 customers.

Welcome Travel Group is Alpitour World's agency network (882 agencies at October 31, 2009: 44 owned outright, 29 in partnerships and 809 affiliates). Created to build a point of reference for the domestic market in the distribution of tourist and business services, year after year Welcome Travel is affirming itself as one of the main distribution networks in Italy, offering its customers a wide range of services, from leisure to business.

A World of Events. MICE (Meeting, Incentive, Convention and Events) Sector is the segment of tourist offerings which is transitioning through its most important moment of change and development, although having suffered sharp fluctuations over the last few years. In this business area, Alpitour World can rely of the strength and experience of A World of Events, a company created in July 2007 by the merger of Francorosso Incentive and Fiorio Management, which counts among its clients important Italian and foreign companies and multinationals.

Earnings and financial highlights for the financial years 2008/2009 and 2007/2008 are as follows:

			Change	
€ in millions	**2008/2009**	2007/2008	Amount	%
Net sales	**1,090.2**	1,237.3	(147.1)	-11.9
Contribution margin	**197.9**	209.6	(11.7)	-5.6
EBITDA	**41.7**	43.7	(2.0)	-4.6
Profit from ordinary operations	**17.5**	21.8	(4.3)	-19.7
Profit attributable to owners of the Parent	**2.3**	3.0	(0.7)	-23.3

€ in millions	**10/31/2009**	10/31/2008	Amount
Equity attributable to owners of the Parent	**80.6**	84.2	(3.6)
Consolidated net financial position	**66.5**	33.6	32.9

The economic picture during the 2008-2009 financial year was marked by an economic and financial crisis which caused a notable contraction in consumption.
Despite the difficulties caused by this situation, which particularly hurt the tourist sector, the 2008-2009 financial year closed with sales of € 1,090.2 million compared to € 1,237.3 million in the prior year, registering, however, a better trend than market.
The contribution margin for the year is € 197.9 million (€ 209.6 million for the year ended October 31, 2008). As a percentage of sale, this is an improvement to 18.2% against 16.9% in the prior year. Notwithstanding an extremely challenging economic environment, the Alpitour Group put into place goal-oriented policies for rationalization and flexibility aimed at direct overheads and a reduction in structure costs as well as commercial policies geared to sustaining profit margins and sales, the combined effects of which made it possible to effectively contain and compensate the negative effects generated by a overall weak market.
EBITDA is basically in line with the prior year: € 41.7 million against € 43.7 million in the prior year. The EBITDA margin improved considerably from 3.5% to 3.8%.
The 2008-2009 profit from ordinary operations is € 17.5 million compared to € 21.8 million in the prior year. The consolidated profit attributable to the owners of the Parent is € 2.3 million compared to € 3 million in 2007/2008.

As for the financial position, there was a notable improvement in the consolidated net financial position which reached € 66.5 million, almost double that of € 33.6 million at October 31, 2008, even though investments were significant.

Consolidated sales by division of the Alpitour Group are as follows:

			Change	
€ in millions	**2008/2009**	2007/2008	Amount	%
Tour operating	**805.2**	872.9	(67.7)	-7.8
Hotel	**89.7**	98.9	(9.2)	-9.3
Aviation	**163.8**	151.0	12.8	8.5
Distribution	**30.8**	34.6	(3.8)	-11.0
Incoming	**212.2**	271.2	(59.0)	-21.8
Incentive & Eventi	**18.8**	35.2	(16.4)	-46.6
Total	**1,320.5**	1,463.8	(143.3)	-9.8
Elimination of intragroup transactions	**(230.3)**	(226.5)	(3.8)	1.7
Total	**1,090.2**	1,237.3	(147.1)	-11.9

Concerning the Tour Operating business, volumes contracted in the financial year 2008/2009 compared to the prior year by 5% (803 thousand passengers against 845 thousand in 2007/2008) and sales decreased by 7.8% owing to the difficult economic context. Moreover, demand for tourist services was adversely affected by extraordinary events such as the attack in Cairo and the terrorist assault perpetrated by ETA at Palma de Mallorca, both destinations which recorded a decline during the summer season. Another factor which penalized the tourism market came from the spread of the pandemic, better known as “swine flu”, which inevitably was a determining factor in consumers' destination choices to Mexico and the United States, further worsening the climate of confidence by final consumers towards trips in general.

At the same time, however, the decline in sales volumes registered by tour operating was considerably lower than that recorded by the market (-20%) and this enabled the Group to appreciably increase its share of the charter market.

With a view towards protecting its margins and maintaining sales at discounted prices at an ongoing level, the company has again launched early booking campaigns in which customers are offered lower rates. Such actions have indeed made it possible to optimize the costs and the risks related both to services on land and plane seat availability, besides producing benefits in the programming of operations.

Specific company policies geared to cutting back and adding flexibility to direct overheads and structure costs in addition to targeted commercial policies aimed at maintaining sales prices have allowed the group to limit and effectively confront the consequences generated by the market crisis.

The hotel sector in 2008/2009 recorded sales of € 89.7 million against € 98.9 million in the prior year, including € 39.2 million from tour operators of the group (€ 33.4 million in 2007/2008). The decrease in sales from last year (approximately -9.3%) is largely the result of the deconsolidation of “Villaggio Bravo Kiwengwa” (sold to others in January 2008) and the reduction in the number of Italian hotel structures owing to the expiration of leases and the early withdrawal from some rent contracts.

Specific actions which led to a review of the product portfolio, combined with policies to reduce costs, allowed the hotel division to defend and increase its margins against sales even in this exceedingly difficult market scenario.

The aviation division reported sales of € 163.8 million in 2008/2009 (€ 151 million in 2007/2008), including € 100 million with the group (€ 86.7 million in 2007/2008). The overall contraction in volumes, owing to the economic picture and the consequent weak tourist sector was fully compensated by the acquisition of traffic for ad hoc solutions and wet leases. Operations during the year also benefited from a new B737-800 which started operations on short/long hauls, further increasing seat availability.

As for the distribution sector, the consolidation of the coordination activities of the owned points of sale begun in prior years, the strengthening of franchising relations with affiliated agencies, together with strategic plans aimed at the rationalization and reorganization of the agency network, have partly offset the negative effect of the general slowdown in demand. In this scenario, in the year 2008/2009, the distribution sector reported sales of € 30.8 million (-10.8% compared to € 34.6 million in 2007/2008). Brokered sales volumes in 2008/2009 by the Welcome Travel agency network totaled approximately € 700 million.

The incoming sector posted sales of € 212.2 million in 2008/2009 (€ 271.2 million in 2007/2008), including € 75.4 million with the Alpitour Group (€ 87.7 million in the prior year). Such trends principally reflect the overall slowdown in demand for tourist services as a result of the negative economic situation which not only influenced the Italian market but also the markets of Northern Europe (Great Britain and Germany) which represent important markets for the Jumbo Tours Group. Such reduction in sales also contributed to the considerable decline in incoming activities in Italy as a destination.

The M.I.C.E. sector, headed by the company A World of Events, had sales of € 18.8 million in the year 2008/2009 (€ 35.2 million in the prior year). These results were adversely affected by the depressed economic picture which weighed heavily on the propensity of companies to invest in the M.I.C.E. sector.

(60% of capital stock)

The following data and comments are taken from the half-year report of Juventus Football Club S.p.A. at December 31, 2009.
Since Juventus Football Club's financial year ends on June 30 of every year and its activity is highly seasonal in nature, typical of the sector and particularly determined by the calendar of sport events, the data presented should not be construed as representing the basis for a full-year projection.

€ in millions	**I Half 2009/2010**	I Half 2008/2009	Change
Revenues	**134.7**	124.0	10.7
Operating income	**25.0**	17.8	7.2
Net income	**14.2**	14.6	(0.4)

€ in millions	**12/31/2009**	6/30/2009	Change
Shareholders' equity	**115.8**	101.8	14.0
Net financial position	**10.5**	25.6	(15.1)

Revenues for the first half of the financial year 2009/2010 total € 134.7 million. This is an increase of 8.6% compared to € 124 million in the first half of the prior financial year due mainly to higher income from radio and television rights recorded following a greater number of home games played in the Italian Championships during the six months and higher income from the UEFA Champions League.

Operating costs in the first half totaling € 95.4 million rose by 4.1% compared to € 91.6 million in the corresponding period of the prior financial year largely on account of higher expenses for the percentage share of radio and television rights and higher costs for players and technical staff.
Amortization and impairment losses on players' registration rights in the six months total € 16.7 million. This is an increase compared to € 13.9 million in the first half of 2008/2009 and is mostly due to the effect of investments and disposals made during the first phase of the Transfer Campaign 2009/2010 and the impact of the extension of the amortization of the registration rights of players' following the renewal of the relative contracts.
The other amortization, depreciation and impairment losses and accruals in the first half of the financial year 2009/2010 amount to € 0.7 million.

Non-recurring revenues in the first half have been recorded for € 3.1 million in respect of the disposal to the Nordiconad group of the commercial areas adjacent to the new stadium being built.

Operating income in the first half is € 25 million compared to € 17.8 million in the first half ended December 31, 2008 while net income amounts to € 14.2 million against € 14.6 million in the same period of the prior year.

Shareholders' equity at December 31, 2009 is € 115.8 million, an increase compared to € 101.8 million at June 30, 2009, attributable primarily to the net income for the period.

The net financial position at December 31, 2009 is positive for € 10.5 million and decreased from € 25.6 million at June 30, 2009 due to the effect of payments made for the first phase of the transfer campaign and investments for the building of the new stadium.

As regards significant events during the first half of the financial year 2009/2010 and significant events subsequent to December 31, 2009, the following is noted:

Stadium Project

During the first six months of the financial year, work continued according to schedule on the construction of the new stadium on the land formerly occupied by the Delle Alpi stadium. At December 31, 2009, the work already completed amounts to € 7.3 million or 10.4% of the total estimated construction cost alone (€ 70 million).

Campi di Vinovo S.p.A. sale

In reference to the sale to Costruzioni Generali Gilardi S.p.A. (hereafter "CGG") of the investment in Campi di Vinovo S.p.A. (hereafter "CdV") and the transfer to CdV of the commercial center business to be built on CdV's land, the transactions of which took place in the financial year 2007/2008, on December 22, 2009 Juventus Football Club and CGG signed a further private contract for the novation and integration of the March 31, 2006 contract for the sale of the Campi di Vinovo S.p.A. shares. The purpose of the contract was to review the contractual relations and obligations binding on the parties in light of the dispute pending between CGG and a third party company with which CGG had signed an agreement for the development of the commercial center. The new private agreement establishes that CdV will assume the liabilities originally estimated to be borne by Juventus Football Club with the public sector (€ 19.2 million) and also the commitment to sustain any costs for the construction of the Debouché junction on the southern Turin bypass. In consideration of this, the total remaining payments due to Juventus Football Club from CdV and/or CGG, in accordance with the March 31, 2006 agreement, as amended, have been reduced by € 19.2 million in respect of the installment due on December 20, 2009 and on subsequent installments.

Following the new agreements, Juventus Football Club will no longer have any commitment and/or liability towards the public sector. Accordingly, the relative provisions for risks and charges set aside in prior years for € 19.2 million have been released.

With signing of the new agreement, CGG, with the consent of Juventus Football Club, transferred its liability to Juventus Football Club to its parent, Finanziaria Gilardi S.p.A., together with the CdV shares. The remaining receivables from Finanziaria Gilardi S.p.A. and CdV for a total of € 17.2 million due December 31, 2013 are guaranteed by Campi di Vinovo S.p.A. shares pledged as collateral.

Transfer Campaign 2009/2010

The overall transactions finalized during the 2009/2010 Transfer Campaign led to an increase in capital invested of € 53 million. The economic impact of the gains and losses on the transfer of players' registration rights is a gain € 12.7 million, whereas temporary acquisitions and disposals of players' registration rights result in a loss of € 0.1 million on an annual basis.

The global financial effect, including capitalized expenses and implicit financial income and expenses on deferred collections and payments is a negative € 41.9 million.

SEQUANA

(26.65% of capital stock through EXOR S.A.)

In the particularly difficult market environment of 2009, the Sequana Group bettered its results and reached the targets outlined in the strategic plan: improvement of the operating margin, reduction of fixed overheads, continuation of the debt reduction policy and disposal of non-strategic businesses.

The highlights of the consolidated results of the Sequana Group in 2009 are as follows:

		2008		Change vs 2008
€ in millions	**2009**	Pro-forma (a)	Reported	Pro-forma
Net sales	**4,088**	4,842	4,951	(754)
Gross operating profit	**213**	212	221	1
Trading profit	**137**	128	136	9
Current profit	**73**	64	68	9
Profit (loss) attributable to owners of the Parent	**20**	(401)	(428)	421
Equity attributable to owners of the Parent	**738**	706	706	32
Consolidated net debt	**651**	791	791	(140)

(a) The 2008 pro-forma results were restated to take into account the 2009 sale of the Produits Promotionnels business of Antalis, and Antonin Rodet.

For purposes of a more meaningful comparison between the two years, the comments that follow and the changes in amount and percentage regarding the income statement figures in the table are calculated on the "Pro-forma" 2008 results on a like-for-like basis.

Sales in 2009 amount to € 4,088 million, decreasing 15.6% compared to 2008 and 13.5% at constant exchange rates, with an unfavorable exchange effect of € 117 million. Fixed overheads decreased € 93 million in 2009 (€ 161 million in two years).
Gross operating profit is stable at € 213 million compared to 2008 and the gross operating margin is 5.2%, an improvement compared to 4.4% in the prior year.
Current profit is € 137 million compared to € 128 million in 2008 (+7.5%) and the current margin is 3.4% (2.6% in 2008).
Trading profit is € 73 million, an improvement of € 9 million compared to 2008 (+14.5%). After non-recurring expenses of € 53 million (mainly charges for restructuring production and distribution activities and expenses relating to discontinued operations), the profit of the Sequana Group is € 20 million.

Consolidated net debt at December 31, 2009 is € 651 million compared to € 791 million at December 31, 2008. This is a reduction of € 81 million in the second half of 2009 and € 140 million for the entire year. The reduction in net debt is due to an improvement in results and in the management of working capital despite the absorption of resources for restructuring charges and the negative impact of businesses disposed of for a total of € 126 million.
The debt to equity ratio is 0.88 at December 31, 2009 compared to 1.13 at December 31, 2008.

In 2009, Sequana also accelerated the process to transform the group, changing from a holding company to an operating group, with the creation of a group executive committee which will enable decisions to be put into action more rapidly and contribute to the operating effectiveness of Antalis and Arjowiggins.

With a declining market in Europe of 10% in 2009, Antalis reported sales of € 2,790 million, contracting 14.6% compared to 2008 pro-forma sales (-11.3% at constant exchange rates). The exchange effect (mainly with regard to the British pound) was an unfavorable € 122 million in 2009.

Gross operating profit is € 96 million, down 16.4% compared to the prior year, while trading profit of € 75 million (-14.2% against 2008, -12.3% at constant exchange rates) shows a margin of 2.7%.
Following the disposal of Produits Promotionnels business, in 2009, Antalis, focused on its core business: the distribution of paper and packaging products.

With sharp reductions in the market of the majority of its businesses, Arjowiggins reported sales of € 1,534 million in 2009, a decrease of 15.2% compared to 2008 pro-forma sales (-15.4% at constant exchange rates). The development strategy in "green" paper (recycled paper) and in special paper enabled Arjowiggins to strengthen its leadership position in these market segments. The group also benefited in 2009 from greater commercial synergies between Antalis and Arjowiggins.

Gross operating profit amounts to € 128 million compared to € 113 million in 2008; the gross operating margin grew from 6.2% to 8.3%. Trading profit of € 74 million increased 30% from the prior year and the trading margin is 4.8%.
In 2009, Arjowiggins disposed of the Décor Asie and Carbonless paper businesses which had already been classified in assets held for sale at December 31, 2008.

EXOR S.A.

(100% of capital stock)

The highlights of the financial statements at December 31, 2009, prepared under the laws of Luxembourg, are as follows:

€ in millions	**2009**	2008	Change
Loss for the year	**(76.8)**	(13.8)	(63.0)
Equity	**2,258.9**	2,455.6	(196.7)
Non-current financial assets	**2,287.1**	2,511.5	(224.4)
Net financial position	**(26.1)**	(52.8)	26.7

The loss for the year 2009 is due to the impairment losses on financial assets for € 128.8 million. Such impairment losses refer to the investment held in C&W Group Inc. (€ 90.1 million), DLMD bonds (€ 9.2 million) and Perfect Vision bonds (€ 27.9 million), and also other financial assets (€ 1.6 million).

In 2008 as well, the loss had originated from impairment losses on financial assets for a total of € 64.6 million, of which € 15 million referred to DLMD bonds, € 49.5 million on equity shares recorded in current assets and € 0.1 million on other financial assets.

At December 31, 2009, non-current financial assets include the following investments and bonds:

The loss for the year 2009 is due to non-recurring expenses for employee termination incentives (€ 0.5 million) and for maintenance of the building owned by the company (€ 0.6 million) which, in accordance with the accounting policies for the preparation of IFRS financial statements have been charged in full to the income statement for the year.

MOTION FOR THE APPROVAL OF THE SEPARATE FINANCIAL STATEMENTS AND THE APPROPRIATION OF PROFIT FOR THE YEAR

Dear Shareholders,

We invite you to approve the separate financial statements for the year ended December 31, 2009 and, considering that the legal reserve is equal to one-fifth of capital stock, we motion to appropriate the profit of € 88,822,747.37 as follows:

- to the 157,275,496 ordinary shares currently outstanding, dividends per share of € 0.27, equal to a maximum €	42,464,383.92
- to the 69,440,160 preferred shares currently outstanding, dividends per share of € 0.3217, equal to a maximum €	22,338,899.47
- to the 8,949,094 savings shares currently outstanding, dividends per share of € 0.3481, equal to a maximum €	3,115,179.62
- to the extraordinary reserve, the remaining amount, equal to a minimum of €	20,904,284.36
Profit for the year 2009	**88,822,747.37**

The dividends proposed are payable to the shares outstanding, excluding therefore, those directly held by EXOR S.p.A. at the ex-dividend date.

Turin, March 29, 2010

On behalf of the Board of Directors
The Chairman
John Elkann

EXOR S.p.A. – NOTES TO THE SEPARATE FINANCIAL STATEMENTS

1. General information on the activities of the Company

EXOR S.p.A. is the new name that IFI S.p.A. assumed on March 1, 2009, the effective date of the deed of merger by incorporation of the subsidiary IFIL S.p.A. (the Merger).

EXOR S.p.A. is a corporation organized under the laws of the Republic of Italy; its head office is located in Turin, Italy, Corso Matteotti 26. EXOR is one of Europe's leading investment companies and is controlled by Giovanni Agnelli e C. S.a.p.az. which holds 51.08% of capital stock, specifically 59.11% of ordinary capital stock, 39.24% of preferred capital stock and 11.75% of savings capital stock.
Since March 2, 2009, EXOR's three classes of stock (ordinary, preferred and savings) are traded on the Electronic Share Market under the stock symbol EXOR.

Further information is provided in the Report on Operations under "EXOR Group Profile".

2. Merger accounting and tax aspects

On February 20, 2009, the deed of Merger was signed which established that the Merger would be effective for legal purposes, pursuant to art. 2504-bis, paragraph 2 of the Italian Civil Code, from March 1, 2009 and that the transactions carried out by IFIL in the early months of 2009 would be recorded in the EXOR financial statements, also for tax purposes, pursuant to art. 172, paragraph 9 of D.P.R. 917/96, starting from January 1, 2009.

The registration of the deed of Merger in the Companies Register of Turin occurred on February 24, 2009.

Further information on the Merger is provided in the Merger Information Document and the updates available on the website www.exor.com.

The accounting and tax treatment of the Merger is described below.

Accounting aspects

The Merger transaction was recorded and recognized in both the separate and consolidated financial statements of EXOR in accordance with Italian accounting principles and also IFRS.

On the basis of its economic nature, the Merger consisted of a reorganization of existing companies which did not result in transfers of control of these companies and which involved the acquisition of the stock held by the non-controlling interests of IFIL in exchange for EXOR capital stock.

As a result, this transaction was not within the scope of IFRS 3 - "Business Combinations".

In the absence of references to specific IFRS standards or interpretations, account was taken of the fact that IAS 1, paragraph 13, requires in general terms that the financial statements provide a reliable and faithful representation of the effects of transactions, other events and conditions in accordance with the definitions and recognition criteria set out in IFRS Frameworks for assets, liabilities, income and expenses and that IAS 1, paragraph 15, establishes the obligation of selection, in accordance with the hierarchy stated in IAS 8, of the accounting principles suitable for reaching the overall objective of a reliable and faithful presentation.

Given the characterizing elements of the Merger transaction (absence of economic exchange with third parties and continuance of control), the Merger was recorded according to the guidelines of IAS 8, paragraph 10. Since the transaction, by its very nature, did not have significant effects on cash flows, the selection of accounting criteria favored policies appropriate for ensuring the continuity of the values.

The application of the policy of continuity of the values to the Merger transaction meant that importance was given to the pre-existence of the control relationship between the companies involved in the transaction (EXOR, the Parent surviving company and IFIL, the merged subsidiary), as well as the cost incurred by the surviving company for the acquisition of the investment in the merged company.

In other terms, the Merger with the nature of a restructuring has determined the convergence of the consolidated financial statements of EXOR towards the separate financial statements of EXOR post-Merger, thus bringing about the so-called "legal consolidation".

The entry of the assets from IFIL in the separate financial statements of EXOR did not result in higher current values of such assets compared to those expressed in the consolidated financial statements, or a higher goodwill, in that, as already described, the Merger did not involve any economic exchange with third parties or an acquisition in the economic sense.

With regard to the accounting treatment of the exchange of EXOR ordinary and savings shares assigned to the non-controlling interests of IFIL, which can be considered similar to an increase in the share ownership of IFIL under long-term control, according to literature on the subject of consolidated financial statements there are two theories:

- that of the "economic entity" which considers the group as an aggregate, and exchanges among stockholders as "equity transactions". If this theory is applied to the transactions originating the acquisition of further stock ownership after reaching control, then the difference between the cost of acquisition and the carrying amount of the non-controlling interests acquired should be allocated to equity of the group;
- that of the "parent company", which considers stockholders as non-controlling interests.
  If this theory is applied, the difference between the cost of acquisition and the carrying amount of the non-controlling interests acquired should be considered as goodwill.

EXOR has used the "economic entity" theory since it is consistent with the treatment which will be covered by the new version of IAS 27, paragraphs 30 and 31, on the subject of consolidated financial statements.

With regard to the accounting of the Merger in the separate financial statements of EXOR, the following is therefore noted.

The carrying amount of the investment in IFIL (€ 2,242.5 million) has been eliminated against the corresponding share of equity of IFIL (€ 2,741.7 million); the difference between such carrying amounts is the Merger urplus (€ 499.2 million) which has been recorded as an increase in the reserves of EXOR; finally, the Merger Surplus has been used to proportionally reinstate the IAS reserves and the tax-deferred reserves of IFIL as described in Note 29.

To service the exchange ratio (0.265 ordinary shares for one IFIL ordinary share and 0.265 savings shares for one IFIL savings share) EXOR has issued 73,809,496 ordinary shares and 9,168,894 savings shares of par value € 1 each with dividend rights at January 1, 2008.

Such EXOR capital stock increase (which represents the purchase of the non-controlling interests of IFIL) was recorded at the fair value of the 73,809,496 ordinary shares and

9,168,894 savings shares issued, respectively equal to € 5.36 per share and € 3.86 per share, corresponding to the opening market price on March 2, 2009, the first day the stocks were traded on the stock market. The total amount of € 431 million was allocated for € 83 million, corresponding to the par value, to capital stock, and for € 348 million to additional paid-in-capital. The difference between the fair value of the capital stock increase thus determined (€ 431 million) and IFIL's non-controlling interests' share of IFIL's equity (€ 1,178 million) has been recorded as an increase in the reserves of EXOR in "Share exchange difference" (€ 747 million). The share exchange difference has been proportionally used to reinstate the tax-deferred reserves of IFIL as described in Note 29.

In accordance with IAS 32, paragraph 35, the expenses incurred in 2008 and in 2009 by IFI and IFIL for the Merger (€ 17 million) have been recorded as a deduction from additional paid-in-capital.

Tax aspects

The Merger is effective for accounting purposes from January 1, 2009; consequently, the effective date for tax purposes is also the same under the retroactive clause pursuant to art. 172, paragraph 9 of D.P.R 917 dated December 22, 1986 (T.U.I.R).

In terms of the effects of tax imposition (art. 172 of T.U.I.R.), the Merger is fiscally a "neutral" transaction and there are no positive or negative components of income arising for the participating parties (IFI, IFIL and respective stockholders) since:

- the transfer of assets to EXOR did not result for IFIL in the realization of hidden gains or losses in the transferred assets or liabilities, nor the realization of goodwill;
- the shares, assets and rights received by EXOR were assumed by EXOR at the same tax amount and at the same other tax conditions (for example, the Participation Exemption regime for investments) which IFIL had;
- the Merger did not give rise to the realization of any taxable gains or deductible losses or the generation of revenues for IFIL's stockholders, whose stocks were exchanged. The Merger Surplus and the share exchange difference have no fiscal relevance for EXOR.

IFIL's tax-deferred reserves have been reinstated in the financial statements of EXOR according to the manner established by art. 172, paragraph 5 of T.U.I.R.

Pursuant to art. 172, paragraph 7, of T.U.I.R., the tax loss carryforwards of EXOR and IFIL have been brought forward and can be used for compensation purposes by EXOR.

3. General principles for the basis of presentation of the separate financial statements

Starting from the financial year 2006, the separate financial statements of EXOR S.p.A. have been prepared in conformity with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and recognized by the European Community in accordance with Regulation 1606/2002 of the European Parliament and Council dated July 19, 2002. The designation IFRS also includes all valid International Accounting Standards (IAS), as well as all interpretations of the International Financial Reporting Interpretations Committee (IFRIC), formerly the Standing Interpretations Committee (SIC).

The disclosure required by IFRS 1 – First-time Adoption of IFRS, relative to the effects of the transition to IFRS, was presented in a specific Appendix to the separate financial statements at December 31, 2006.

The separate financial statements have also been prepared in accordance with the provisions contained in Consob Resolutions 15519 and 15520 dated July 27, 2006 and in Consob Communication 6064293 dated July 28, 2006, pursuant to art. 9, paragraph 3, of Legislative Decree 38 dated February 28, 2005.

4. Formats of the separate financial statements and other information

The separate income statement is presented using a classification based on the nature of the revenues and expenses, with the presentation of investment income (charges) and financial income (expenses) taking preference since these items are characteristic of EXOR S.p.A.'s activities.

Since the year 2009, in view of the significance of the amounts, Non-recurring other income (expenses) and general expenses are presented separately from net general expenses that are recurring. The line item includes any exceptional or non-recurring costs such as termination incentives, consulting fees for extraordinary investment acquisition and disposal transactions, special bonuses to directors and employees, legal fees for defense and adjustments to liabilities for the Alpitour stock option plan. Moreover, other taxes and duties are also presented separately. The figures for 2008 have been appropriately reclassified for purposes of comparison.

In the separate statement of financial position, the current/non-current distinction has been adopted for the presentation of assets and liabilities.

The statement of comprehensive income presents the total income and expense recognized in the income statement and increases or decreases in reserves.

The separate statement of cash flows is presented using the indirect method, which reconciles cash and cash equivalents at the beginning and the end of the year.

The year-end closing date is December 31 of each year and covers a period of 12 months.

The Euro is the Company's functional currency and presentation currency.

In the separate financial statements, the amounts are expressed in Euro.
The notes are expressed in thousands of Euro, unless otherwise indicated.
Significant events in 2009 and in the first quarter of 2010, the principal risks and uncertainties and the business outlook are presented in specific paragraphs of the Report on Operations.

Besides the figures for the year 2009 and those published for the year 2008, the separate financial statements also present the comparative pro-forma figures for 2008 which present the effects of the Merger as if it had taken place retroactively.

In the pro-forma statement of financial position and pro-forma income statement, the pro-forma figures for 2008 have been prepared according to the following criteria:

- the statements of financial position of EXOR and IFIL have been aggregated line by line;
- the treasury stock held by IFIL has been canceled (pro-forma 1 entry);
- the carrying amount of the investment held by EXOR in IFIL has been eliminated against the corresponding share of equity of IFIL and the difference has been recorded in the "Merger Surplus" (pro-forma 2 entry);
- the remaining share of the equity of IFIL has been shown in the "Non-controlling interests in capital stock and reserves of the company being merged" (pro-forma 3-entry);

– the receivable and payable balances on the loan extended by IFIL to IFI have been eliminated; the Merger Surplus has been reclassified to “Retained earnings and other reserves”; the carrying amount of the shares of the Parent held by Exor Services (formerly Soiem) has been recorded as an increase in “Shares held by EXOR” (pro-forma 4 entry);

– the income statements for the year 2008 of EXOR and IFIL have been aggregated line by line; the balances resulting from transactions between the two companies (dividends distributed by IFIL to EXOR, financial income (expenses) on the loan extended by IFIL to IFI, performance of services and recoveries of costs) have been eliminated (pro-forma 5 entry);

– the statements of cash flows and statements of comprehensive income for 2008 of EXOR and IFIL have been aggregated line by line; the changes resulting from transactions between the two companies (as described above) have been eliminated.

5. Related party transactions, unusual and/or atypical transactions and significant non-recurring events and transactions

Related party transactions

The statement of financial position and income statement balances generated by transactions with related parties are shown separately in the financial statement formats and commented in Note 42.

Stock option plan with underlying Alpitour stock

At December 31, 2009, the liability for the stock option plan with underlying Alpitour stock amounts to € 12.2 million compared to € 8.1 million at December 31, 2008. The difference of € 4.1 million is charged to the income statement under “Non-recurring other expenses from related parties”. Further information is provided in Note 32.

Beside what has been indicated, there are no significant non-recurring events or transactions or significant unusual and/or atypical transactions to be reported as required by Consob Communication 6064293 dated July 28, 2006.

6. Significant accounting policies

General principle

The financial statements of EXOR S.p.A. are expressed in Euro and are prepared under the historical cost convention, except where the use of fair value is required for the measurement of available-for-sale financial instruments and those held for trading, as well as for the going concern assumption.

Despite operating in a difficult economic and financial environment, the directors have in fact assessed that no material uncertainties exist (as defined in paragraph 25 of IAS 1) about its ability to continue as a going concern.

Investments accounted for at cost

Investments in subsidiaries and associates are stated at cost and tested for impairment if, and only if, there is objective evidence of an impairment due to one or more events which occurred after initial recognition which have an impact on the future cash flows of the subsidiaries and associates and on the dividends which they could distribute. This objective evidence is a significant and prolonged decline in the market prices to below cost of a directly and indirectly owned subsidiary or associate, together with its continuing negative operating performance. In these cases, the impairment is determined as the difference between the carrying amount of the investment and its recoverable amount, usually determined on the basis of the higher of the value in use and fair value less costs to sell.

At the end of each reporting period, EXOR S.p.A. assesses whether there is any objective evidence that an impairment loss of an investment recognized in prior years may no longer exist or may have decreased. A significant or prolonged rise in the market price of the subsidiary or associate, together with its continuing positive operating performance is considered as objective evidence. In these cases, the recoverable amount of the investment is re-measured and, if appropriate, the carrying amount is increased up to the cost of the investment.

Available-for-sale investments and non-current other financial assets

These are measured at fair value which coincides, for listed investments, with the market price on the last day of the period. Unrealized gains and losses are recognized directly in equity, net of the relevant deferred tax effect. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity is reversed and recognized in the income statement. Such impairment losses may not later be reversed through the income statement.

Upon disposal of the asset, the accumulated gains or losses recorded in equity are credited or debited to the income statement.

Financial assets held for trading

Financial assets held for trading include equity shares, credit instruments and other forms of investment of liquidity, as well as derivative instruments for trading.

Financial assets purchased originally for resale in the short-term are measured at year end at fair value using, for listed securities, the market price translated, if appropriate, at the year-end exchange rate; the fair value adjustment is recorded with a corresponding entry in the income statement.

Held-to-maturity securities

Held-to-maturity securities are non-derivative assets with fixed or determinable payments and fixed maturities that EXOR has the positive intention and ability to hold to maturity.
Financial assets cannot be classified as held-to-maturity if, during the course of the current year or during the two preceding years, other than an insignificant amount of held-to-maturity investments has been sold or reclassified before their maturity, except sales or reclassifications that:

a) are so close to maturity or to the call option date of the financial asset that changes in the market rate of interest would not have a significant effect on the fair value of the financial asset;
b) occur after the Company has received substantially all of the financial asset's original principal through ordinary scheduled payments or prepayments;
c) are attributable to an isolated event that is beyond the Company's control, is non-recurring and could not have been reasonably anticipated by the Company.

Securities held with the intent to keep them in portfolio until maturity are recorded and measured at amortized cost.

The amortized cost of a financial asset is the amount at which the financial asset was initially measured net of repayments of principal, decreased by the total amortization of any difference between the initial amount and the maturity amount using the effective interest method, less any writedown (made directly or through the use of an accrual) for impairment or uncollectibility.

The effective interest rate is a method used for calculating the amortized cost of a financial asset and allocating the interest over the period of reference. The effective interest rate is the rate that exactly discounts future cash flows for estimated collections (including transaction costs paid) over the expected life of the financial instrument or, if appropriate, over a shorter period.

Receivables and payables

Receivables are initially recognized at their nominal amount which substantially coincides with fair value.
If there is objective evidence of an impairment loss or a risk that the Company will not be able to collect the contractual amount (principal and interest) at the contractually agreed dates, a provision is set aside which corresponds to the difference between the asset's carrying amount and the present value of estimated recoverable future cash flows, discounted at the effective interest rate.
Payables are initially recognized at their nominal amount, reduced by expenses incurred to assume them and increased by interest expense due, if any. Payables are subsequently measured at amortized cost using the effective interest method.

Treasury stock

The cost of any treasury stock purchased and/or held, also through subsidiaries, as a result of specific stockholder resolutions, is recognized as a deduction from equity and, therefore, the reserve offsetting treasury stock in portfolio is not shown separately. The proceeds from any subsequent sale are recognized as movements in equity.

Employee benefits – Pension plans

Pension plans are currently either defined contribution or defined benefit plans.

Under defined contribution plans the Company pays contributions to outside, legally separate entities with administrative autonomy, which frees the employer from any subsequent obligation as the outside entity assumes the commitment to pay what is due to the employee. Following the changes in regulations for employee severance indemnities pursuant to Law 296 dated December 27, 2006 (Budget Law 2007) and later decrees and regulations, defined contribution plans include the portions of employee severance indemnity accruing from January 1, 2007. However, since EXOR S.p.A. has

less than 50 employees, employee severance indemnities are calculated using the customary actuarial method established in IAS 19 and adopted in prior years, except for the exclusion of the pro rata application of the service rendered for employees who transfer the entire amount accrued to the supplementary pension fund.
Consequently, for those who transfer the entire amount accrued to the supplementary pension fund, the Company records the contribution paid as an expense and no additional obligation is recognized.

Defined benefit plans include post-employment benefits, other than those under defined contribution plans. Under defined benefit plans, the Company has the obligation to set aside the costs relating to the benefits guaranteed to its employees in service. The actuarial risk and the investment risk are thus substantially borne by the Company.
Defined benefit plans, which include employee severance indemnities, taking into account what was described above, are measured by actuarial techniques using the Projected Unit Credit Method.
As provided by the amendment to IAS 19 – Employee Benefits, issued by the IASB in December 2004, EXOR has elected to recognize actuarial gains and losses immediately in the period in which they arise, outside the income statement, in a statement of comprehensive income.
All cumulative actuarial gains and losses that existed at January 1, 2005 have been recognized in equity.
For defined benefit plans, the expenses relating to the increase in the present value of the obligation, due to the fact that the payment date of the benefits is nearing, are recognized in financial expenses.
Payments relative to defined contribution plans are recognized as an expense in the income statement as incurred.
Defined benefit plans may be unfunded or they may be wholly or partly funded by contributions paid by the employer and the employee plan participants to an entity, or fund, that is legally separate from the employer and from which the employee benefits are paid.

The liability for defined benefit plans is calculated on an individual basis and takes into account life expectancy, personnel turnover, salary changes, revaluation of the yields, inflation and the present value of the amounts to be paid.

Employee benefits – Stock option plans

Stock option plans with underlying EXOR stock

Stock-based payments to employees are measured at the fair value of the equity instruments at the grant date.
In accordance with IFRS 2 – Share-based Payment, the full amount of the fair value of stock options at the grant date is recognized in the income statement in personnel costs on a straight-line basis over the period from the grant date to the vesting date with a corresponding entry directly in equity, based upon an estimate of the number of options that is expected to vest. Changes in fair value after the grant date have no effect on the initial measurement.

The compensation component deriving from stock option plans with underlying EXOR stock but relating to employees in other companies of the Holdings System, under IFRIC 11, is recorded as a capital contribution in favor of the subsidiaries in which the beneficiaries of the stock option plans are employees and consequently recorded as an increase in the relative value of the investments, with a corresponding entry recorded directly in equity.

Stock option plans with underlying stock of the subsidiary Alpitour

This is a stock option plan that requires a monetary payment equal to the increase in the value of the company. The fair value of the liability of the plan is re-measured at each reporting date until its extinction.
The cost is recognized in the income statement in “Non-recurring other expenses” with a corresponding entry to “Other payables to related parties”.
If the payable to related parties decreases, the resulting income is recognized in the income statement in “Non-recurring other income from related parties”.

Debt

Interest-bearing debt is recognized at cost which corresponds initially to the fair value of the amount received net of directly attributable costs. Debt is subsequently measured at amortized cost. The difference between amortized cost and the amount to be repaid is recognized in the income statement on the basis of the effective interest rate over the period of the loan.

Debt is classified in current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

Derivative financial instruments and hedge relationships

Derivative financial instruments are recognized initially at fair value at the date the contracts are entered into and are subsequently measured at fair value at year-end. The resulting gains or losses are recognized in the income statement immediately, unless the derivative is designated and is effective as a hedging instrument, in which case the times for recognition in the income statement depend upon the nature of the hedge relationship. EXOR designates certain derivatives as fair value hedges of certain assets or liabilities recognized in the financial statements or as cash flow hedges of certain highly probable forecast transactions.
A derivative is classified as a non-current asset or liability if the maturity date of the instrument is beyond 12 months and it is not expected to be realized or settled within 12 months. Other derivatives are classified as current assets or liabilities.

Financial instruments qualify for hedge accounting only when there is formal designation and documentation, including the Company's risk management objective and strategy, and the hedge, verified periodically, is highly effective.
When financial instruments qualify for hedge accounting, the following accounting treatment applies:

- Fair value hedge: where a derivative financial instrument is designated as a hedge of the exposure to changes in fair value of a recognized asset or liability that is attributable to a particular risk and could affect the income statement, the gain or loss from re-measuring the hedging instrument at fair value is recognized in the income statement, together with the change in fair value of the hedged item. The gain or loss from the change in fair value of the hedging instrument is recognized on the same line of the income statement as the hedged item.
- Cash flow hedge: where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows of a recognized asset or liability or a highly probable forecast transaction and could affect profit or loss, the effective portion of any gain or loss of the derivative financial instrument is recognized directly in equity. The cumulative gain or loss is removed from equity and recognized in the income statement at the same time in which the hedged transaction affects the income statement. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in equity and is recognized in the income statement at the same time the related transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in equity is recognized in the income statement immediately.

If the conditions of IAS 39 are not met, the transactions, even if they have been set up for the purpose of managing risk exposure, are classified and measured as trading transactions. In that case, the difference from fair value is recognized in the income statement.

Financial income and expenses, other revenues and costs

Dividends are recognized in the income statement when they are approved by the stockholders.

Dividends from available-for-sale investments are in any case recognized in the income statement.

Financial income and expenses are recognized according to the accrual principle on the basis of the effective rate of return.

Revenues from services are recognized by reference to the stage of completion of the service at the end of the reporting period.

The expenses incurred for the Merger by EXOR and by the merged company IFIL in 2008 have been recognized in “Current assets – Other receivables” and, as a result, do not impact the profit for the year. Such expenses together with those incurred in 2009, by EXOR and IFIL, have been charged directly as a deduction from additional paid-in capital which originated from recording the capital stock increase carried out to service the exchange of the canceled IFIL shares.

Transactions in foreign currencies

Transactions in foreign currencies are recorded at the foreign exchange rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the end of the reporting period are translated at the foreign exchange rate prevailing at that date. Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements are recognized in the income statement.

Income taxes

Current income taxes are calculated according to the tax laws in force.

Taxes on income are recognized in the income statement except to the extent that they relate to items directly charged or credited to equity, in which case the related income tax effect is recognized directly in equity.

Temporary differences between the amounts of assets and liabilities in the financial statements and the corresponding amounts for tax purposes give rise to temporarily deferred tax liabilities on the taxable temporary differences recorded in a specific provision in liabilities. Deferred tax assets relating to the carryforward of unused tax losses, as well as those arising from deductible temporary differences, are recognized to the extent that it is probable that future profits will be available against which they can be utilized.

Deferred tax assets and liabilities are measured at the tax rates expected to apply to taxable income in the periods in which the temporary differences will reverse. Deferred income tax assets and liabilities are offset where there is a legally enforceable right of offset.

Deferred tax assets and liabilities are shown separately from other tax receivables and payables in a specific line item under non-current assets or liabilities.

Principal sources of uncertainty in making financial statement estimates

The preparation of financial statements and related disclosures that conform to IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results could differ from those estimates. Estimates particularly refer to the measurement of investments. Estimates and assumptions are reviewed periodically and the effects of any changes are recognized immediately in the income statement in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The situation caused by the present economic and financial crisis has required assumptions to be made regarding future performance which are characterized by significant uncertainty; as a consequence, therefore, it cannot be excluded that results may arise during the next year which differ from estimates, and which therefore might require adjustments, even significant, to be made to the carrying amount of the items in question, which at the present moment can clearly neither be estimated nor predicted. The main items affected by these situations of uncertainty are investments accounted for at cost and available-for-sale investments.

In particular:

- the carrying amounts of listed investments accounted for at cost or fair value were lower than stock market prices at the end of 2009;
- for the other unlisted investments accounted for at cost or fair value, their measurement indicated no evidence of impairment.

No particular or significant issues have arisen, however, in relation to estimates used for the recognition of percentage of completion contract work in progress, employee benefits, taxes or provisions also taking into consideration their level of materiality.

7. Adoption of new accounting standards, amendments and interpretations issued by the IASB

<u>Accounting standards, amendments and interpretations to standards applied from January 1, 2009</u>

IAS 1 Revised – Presentation of Financial Statements. The revised version of the standard, applicable from January 1, 2009, requires an entity to present all changes in its equity resulting from transactions with owners in a statement of changes in equity. All non-owner changes (that is, changes in comprehensive income) are required to be presented either in a single statement of comprehensive income showing performance for the period or in two statements (a separate income statement and a statement of comprehensive income). In any event, transactions with non-owners may not be presented in the statement of changes in equity.

EXOR has adopted the revised standard retrospectively from January 1, 2009, electing to present all non-owner changes in two statements entitled respectively “separate income statement” and “separate statement of comprehensive income”. EXOR has consequently modified the presentation of its “statement of changes in equity”.

As part of its 2008 annual improvements project, the IASB published an amendment to IAS 1. The amendment, applicable from January 1, 2009, requires an entity to classify derivative financial instruments not held for trading between current and non-current assets and liabilities. The adoption of this amendment did not have any effect on the presentation of items in the financial statements.

Amendment to IFRS 7 – Financial Instruments: Disclosures. The amendment, effective from January 1, 2009, was issued in order to improve the disclosure requirements for fair value measurements and reinforce existing principles for disclosures concerning the liquidity risk associated with financial instruments. In particular, the amendment requires disclosures to be made that are based on a hierarchy of the inputs used in valuation techniques to measure fair value. The adoption of the amendment only affected the disclosures in the notes and had no effect on the recognition and measurement of items in the financial statements.

Amendment to IFRS 1 – First Time Adoption of International Financial Reporting Standards. The amendment allows companies adopting IFRS for the first time from January 1, 2009 and electing to recognize investments in subsidiaries, associates and joint ventures in the separate financial statements at cost, to use one of the following methods:

- cost determined in accordance with IAS 27;
- revalued cost, measured on a fair value basis at the date of transition to IFRS or the carrying amount of the investment at the date of transition measured in accordance with local GAAP.

In addition, the amendment to IAS 27 – Consolidated and Separate Financial Statements requires that all dividends received from subsidiaries, joint ventures and associates be recognized in the parent company's income statement when the right to receive those dividends is established regardless of whether they relate to profit arising before or after the date the interest was acquired. Revisions to IAS 36 – Impairment of Assets require that, when evaluating whether impairment exists, if an investee company has distributed a dividend, the following must be considered:

- whether the carrying amount of the investment in the separate financial statements exceeds the book value of that company's equity (including any associated goodwill) as recognized in the consolidated financial statements;
- whether the dividend exceeds the comprehensive income of the investee for the period to which the dividend relates.

The company adopted the amendment to IAS 27 prospectively from January 1, 2009. However, no accounting effects resulted from its application since the dividends recorded in the 2009 income statement have been distributed by subsidiaries which had not been the object of acquisition. In accordance with the amendment made to IAS 36, the new impairment indicators have been considered for purposes of the recognition of impairment losses, if any, on investments.

Amendment to IFRS 2 – Share-based payment: Vesting Conditions and Cancellations. For the purpose of measuring share-based payments, only service conditions and performance conditions may be considered vesting conditions.
The amendment also specifies that all cancellations, whether by the entity or by other parties, should receive the same accounting treatment.

Improvement to IAS 19 – Employee Benefits. This amendment clarifies the definition of positive/negative past service costs and states that in the case of a curtailment, only the effect of the reduction for future service shall be recognized immediately in the income statement, while the effect arising from past service periods shall be considered a negative past service cost. The board also revised the definition of short-term employee benefits and long-term employee benefits and the definition of a return on plan assets, stating that this amount should be net of any costs for administering the plan (other than those included in the measurement of the defined benefit obligation). The amendment is applicable prospectively to changes in plans occurring on or after January 1, 2009, Improvement to IAS 28 – Investments in Associates, and IAS 31 – Investments in Joint Ventures. The amendments, applicable from January 1, 2009, require that for investments accounted for by the equity method a recognized impairment loss should not be allocated to the individual assets (and in particular goodwill) that form part of the carrying amount of the investment in the associate, but to the carrying amount of the investment overall. Accordingly any reversal of that impairment loss is recognized in full.

Specific additional disclosures are also required for investments in associates and joint ventures measured at fair value in accordance with IAS 39, correspondingly amending IFRS 7 – Financial Instruments: Disclosures and IAS 32 – Financial Instruments: Presentation.

Amendments and interpretations effective from January 1, 2009 but not applicable to EXOR

The following standards and interpretations have also been issued and are effective from January 1, 2009 and relate to matters that were not applicable to the Company at the date of the financial statements:

- Amendment to IAS 16 – Property, Plant and Equipment.
- Amendment to IAS 32 – Financial Instruments: Presentation and IAS 1 – Presentation of Financial Statements – Puttable Financial Instruments and Obligations Arising on Liquidation.
- IAS 20 – Accounting for Government Grants and Disclosure of Government Assistance.
- IAS 38 – Intangible Assets.
- IAS 23 Revised – Borrowing costs.
- Improvement to IAS 28 – Investments in Associates and IAS 31 – Investments in Joint Ventures.
- Improvement to IAS 29 – Financial Reporting in Hyperinflationary Economies.
- Improvement to IAS 36 – Impairment of Assets.
- Improvement to IAS 39 – Financial Instruments: Recognition and Measurement.
- Improvement to IAS 40 – Investment Property.
- IFRIC 13 – Customer Loyalty Programmes.
- IFRIC 15 – Agreements for Construction of Real Estate.
- IFRIC 16 – Hedges of a Net Investment in a Foreign Operation.

Accounting standards, amendments and interpretations not yet effective and not early adopted by the EXOR

On January 10, 2008, the IASB issued a revised version of IFRS 3 – Business Combinations and an amended version of IAS 27 – Consolidated and Separate Financial Statements. The main changes that revised IFRS 3 makes to existing requirements are the elimination of the need to measure every asset and liability at fair value at each stage in a step acquisition of subsidiaries. Goodwill is only to be measured on acquiring control, as the difference at acquisition date between the value of any investment in the business held before the acquisition, the consideration transferred and the net assets acquired. Moreover, for a business combination in which the acquirer achieves control without purchasing all of the acquiree, the remaining (non-controlling) equity interests are measured either at fair value or by using the method already provided previously in IFRS 3. The revised IFRS 3 also requires acquisition-related costs to be recognized as expenses and the acquirer to recognize the obligation to make an additional payment as part of the business combination (contingent consideration).

In the amended version of IAS 27, the IASB has added a requirement specifying that changes in a parent's interest in a subsidiary that do not result in the loss of control must be accounted for as equity transactions and recognized within equity. Moreover, when a parent loses control of a subsidiary but retains an ownership interest it must initially measure any retained investment at fair value. At the date when control is lost, the difference between the fair value and the carrying amount of the retained interest must be recognized in the income statement. Finally, the amendment to IAS 27 requires losses pertaining to non-controlling interests to be allocated to non-controlling interest equity, even if this results in the non-controlling interest having a deficit balance. The new rules will apply prospectively from January 1, 2010.

As part of its 2008 annual improvements project, the IASB issued an amendment to IFRS 5 – Non-Current Assets Held for Sale and Discontinued Operations. This amendment, to be applied prospectively from January 1, 2010, requires an entity that is committed to a sale plan involving loss of control of a subsidiary to classify all the assets and liabilities of that subsidiary as held for sale, regardless of whether the entity will retain a non-controlling interest in its former subsidiary after the sale.

On July 31, 2008, the IASB issued an amendment to IAS 39 – Financial Instruments: Recognition and Measurement. This amendment, to be applied retrospectively from January 1, 2010, clarifies how to apply the standard for what can be designated as a hedged item in particular situations.

In November 2008, the IFRIC also issued interpretation IFRIC 17 – Distributions of Non-cash Assets to Owners. The interpretation clarifies that dividends payable should be measured at the fair value of the net assets to be distributed when it becomes mandatory to recognize the relative liability to the stockholders. Moreover, an entity should recognize the difference between the dividends paid and the carrying amount of the net assets used for payment in the income statement.
The interpretation is effective prospectively from January 1, 2010, for annual periods beginning on or after July 1, 2009.

On January 29, 2009, the IFRIC issued interpretation IFRIC 18 – Transfers of Assets from Customers (applicable from January 1, 2010, for annual periods beginning on or after July 1, 2009). The interpretation clarifies the accounting treatment to be followed for agreements in which an entity receives from a customer an item of property, plant and equipment that the entity must then use either to connect the customer to a network or to provide the customer with ongoing access to a supply of goods or services.

On March 12, 2009, the IASB issued amendments to IFRIC 9 – Reassessment of Embedded Derivatives and to IAS 39 – Financial Instruments: Recognition and Measurement. The amendments allow entities to reclassify certain financial instruments out of the ‘fair value through profit or loss’ category in specific circumstances. The amendments clarify that on the reclassification of a financial asset out of the ‘fair value through profit or loss’ category all embedded derivatives have to be assessed and, if necessary, separately accounted for in the financial statements. The amendments are effective retrospectively from December 31, 2009; at the date of these financial statements, the European Union had yet to complete the endorsement process required for the amendments to be applicable.

On April 16, 2009, the IASB issued a series of amendments to IFRS (Improvements to IFRSs). Details are provided in the following paragraphs of those identified by the IASB as resulting in accounting changes for presentation, recognition and measurement purposes, leaving out any amendments regarding changes in terminology or editorial changes which are likely to have minimal effects on accounting and effects on the separate financial statements and amended standards or interpretations not applicable by EXOR.

- IFRS 2 – Share-based Payment. This amendment, applicable from January 1, 2010 (with early application permitted), clarifies that following the change made by IFRS 3 to the definition of a business combination, the contribution of a business on the formation of a joint venture and the combination of entities or businesses under common control do not fall within the scope of IFRS 2.
- IFRS 5 – Non-current Assets held for Sale and Discontinued Operations. This amendment, which shall be applied prospectively from January 1, 2010, clarifies that IFRS 5 and other IFRSs that specifically refer to non-current assets (or disposal groups) classified as held for sale or discontinued operations set out all the disclosures required in respect of those assets or operations.

- IAS 1 – Presentation of Financial Statements. This amendment, applicable from January 1, 2010 (with early application permitted), clarifies that an entity should classify a liability as current if it does not have unconditional right to defer the settlement for at least twelve months after the end of the year, even when there is an option by the counterpart that could require a settlement in the form of equity instruments.
- IAS 7 – Statement of Cash Flows. This amendment, applicable from January 1, 2010, clarifies that only expenditures that result in a recognized asset in the statement of financial position are eligible for classification as investing activities in the statement of cash flows; cash flows originating from expenditures that do not result in a recognized asset (as could be the case for advertising and promotional activities and staff training) must be classified as cash flows from operating activities.
- IAS 17 – Leasing. Following the changes, the general conditions required by IAS 17 for classifying a lease as a finance lease or an operating lease will also be applicable to the leasing of land, independent of whether the lease transfers ownership by the end of the lease term. Before these changes, the standard required the lease to be classified as an operating lease if ownership of the leased land was not transferred at the end of the lease term because land has an indefinite useful life. The amendment is applicable from January 1, 2010. At the date of adoption, the classification of all land elements of unexpired leases must be reassessed, with any lease newly classified as a finance lease to be recognized retrospectively.
- IAS 36 – Impairment of Assets. This amendment, applicable prospectively from January 1, 2010, states that each unit or group of units to which goodwill is allocated for the purpose of impairment testing shall not be larger than an operating segment as defined by paragraph 5 of IFRS 8 – Operating Segments before any aggregation on the basis of similar economic characteristics and other similarities as permitted by paragraph 12 of IFRS 8.
- IAS 38 – Intangible Assets. IFRS 3 (as revised in 2008). The revised IAS 38 states that if an intangible asset acquired in a business combination is separable or arises from contractual or other legal rights, sufficient information exists to measure its fair value reliably; amendments are made to IAS 38 to reflect that revision of IFRS 3. Moreover, these amendments clarify the valuation techniques commonly used to measure intangible assets at fair value when assets are not traded in an active market; in particular, such techniques include discounting the estimated future net cash flows from an asset, and estimating the costs the entity avoids by owning an intangible asset and not having to license it from another party in an arm’s length transaction or the costs to recreate or replace it (as in the cost approach). The amendment is applicable prospectively from January 1, 2010; if an entity applies the revised IFRS 3 for an earlier period it shall also apply this amendment.
- IAS 39 – Financial Instruments: Recognition and Measurement. This amendment restricts the non-applicability of IAS 39 under paragraph 2(g) of the standard to forward contracts between an acquirer and a selling stockholder to buy or sell an acquiree in a business combination at a future acquisition date when the completion of the business combination is not dependent on further actions of either party and only the passage of a normal period of time is required. Option contracts, whether or not currently exercisable, which allow one party to control the occurrence or non-occurrence of future events and on exercise will result in control of an entity are therefore included in the scope of IAS 39. The amendment also clarifies that embedded prepayment options whose exercise price compensates the lender for the loss of interest income resulting from the prepayment of the loan shall be considered closely related to the host debt contract and therefore not accounted for separately. Finally, the amendment clarifies that the gains or losses on a hedged instrument must be reclassified from equity to profit or loss during the period that the hedged forecast cash flows affect profit or loss. The amendment is effective prospectively from January 1, 2010; early application is permitted.

- IFRIC 9 – Reassessment of Embedded Derivatives. This amendment is applicable prospectively from January 1, 2010 and excludes from the scope of IFRIC 9 embedded derivatives in contracts acquired in a business combination, a combination of entities or businesses under common control or the formation of a joint venture.

At the date of these financial statements, the European Union had yet to complete the endorsement process required for the improvements to be applicable.

In June 2009, the IASB issued an amendment to IFRS 2 – Share-based Payment: Group Cash-settled Share-based Payment Transactions. The amendment clarifies the scope of IFRS 2 and the interactions of IFRS 2 and other standards. In particular, it clarifies that an entity that receives goods or services in a share-based payment arrangement must account for those goods or services no matter which entity in the group settles the transaction, and no matter whether the transaction is settled in shares or cash; moreover, it clarifies that a ‘group’ has the same meaning as in IAS 27 – Consolidated and Separate Financial Statements, that is, it includes only a parent and its subsidiaries. In addition, the amendment clarifies that an entity must measure the goods or services it received as either an equity-settled or a cash-settled share-based payment transaction assessed from its own perspective, which may not always be the same as the amount recognized in the consolidated financial statements. The amendment also incorporates guidance previously included in IFRIC 8 - Scope of IFRS 2 and in IFRIC 11 - IFRS 2 – Group and Treasury Share Transactions. As a result, the IASB has withdrawn IFRIC 8 and IFRIC 11. The amendment is effective from January 1, 2010; at the date of these financial statements, the European Union had yet to complete the endorsement process required for the amendment to be applicable.

On October 8, 2009, the IASB issued an amendment to IAS 32 – Financial Instruments: Classification of Rights Issues. The amendment addresses the accounting for rights issues (rights, options or warrants) that are denominated in a currency other than the functional currency of the issuer. Previously such rights issues were accounted for as derivative liabilities. However, the amendment requires that, provided certain conditions are met, such rights issues are classified as equity regardless of the currency in which the exercise price is denominated.
The amendment is applicable retrospectively from January 1, 2011. The adoption of this amendment will not have any effect on the financial statements of the company.

On November 4, 2009, the IASB issued a revised version of IAS 24 – Related Party Disclosures. The revised IAS 24 simplifies the disclosure requirements for government-related entities and clarifies the definition of a related party. The revised standard is effective for annual periods beginning on or after January 1, 2011. The revised standard had not yet been endorsed by the European Union at the date of these financial statements.

On November 12, 2009, the IASB issued a new standard IFRS 9 – Financial Instruments. The new standard addresses the classification and measurement of financial assets, having an effective date for adoption of January 1, 2013. The new standard represents the completion of the first part of a project to replace IAS 39. The new standard uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the many different rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments and the contractual cash flow characteristics of the financial assets. IFRS 9 also requires a single impairment method to be used. The new standard had not yet been endorsed by the European Union at the date of these financial statements.

On November 26, 2009, the IASB issued a minor amendment to IFRIC 14 - Prepayments of a Minimum Funding Requirement. The amendment applies when an entity is subject to minimum funding requirements and makes an early payment of contributions to cover those requirements. The amendment permits such an entity to treat the benefit of such an early payment as an asset. The amendment has an effective date for adoption of January 1, 2011; the amendment had not yet been endorsed by the European Union at the date of these financial statements.

On November 26, 2009, the IFRIC issued the interpretation IFRIC 19 – Extinguishing Financial Liabilities with Equity Instruments that provides guidance on how to account for the extinguishment of a financial liability by the issue of equity instruments. The interpretation clarifies that when an entity renegotiates the terms of a financial liability with its creditor and the creditor agrees to accept the entity's shares or other equity instruments to settle the financial liability fully or partially, then the entity's equity instruments issued to a creditor are part of the consideration paid to extinguish the financial liability and are measured at their fair value. The difference between the carrying amount of the financial liability extinguished and the initial measurement amount of the equity instruments issued is included in the profit or loss for the period.
The amendment has an effective date for adoption of January 1, 2011; the amendment had not yet been endorsed by the European Union at the date of these financial statements.

8. Risk management

The maximum theoretical exposure to credit risk for EXOR S.p.A. at December 31, 2009 is represented by the carrying amount of financial assets presented in the financial statements. The Company seeks to mitigate such risks by investing a large part of its liquidity in securities issued by leading bank and corporate counterparts selected according to their creditworthiness.
EXOR does not have financial liabilities denominated in currencies other than Euro.
In its meeting held on March 25, 2009, the EXOR board of directors voted to extend a 3-year subordinated credit line for $50 million to C&W Group. The loan was partly drawn down by C&W Group for an amount of $40 million at December 31, 2009.
In order to protect itself from fluctuations in the €/USD on the loan, EXOR put into place forward sales contracts with leading credit institutions for the same amount and expiration date of the U.S. dollars to be received from C&W Group.

A part of the assets held for trading and cash are denominated in currencies other than Euro. Since these are securities held for trading and cash, both have been adjusted to the year-end exchange rate.

With regard to liquidity risk, financing needs and cash flows are managed with the aim of optimizing financial resources. In particular, outgoing cash flows from current operations are basically financed by incoming flows from ordinary business activities.
Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or difficulties in raising sufficient funds that can be readily used. In this sense, EXOR operates so that it has financial resources available by issuing bonds and securing irrevocable credit lines with expiration dates and amounts consistent with its investment plans.

EXOR assesses and manages its exposure to fluctuations in interest rates in accordance with its financial management policies and uses derivative financial instruments to fix some of the financing obtained at a pre-set interest rate; in particular, the only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on some of the existing loans received.

9. Dividends from investments

Dividends amount to € 120,029 thousand (€ 255,745 thousand in 2008) and have been received from the following companies:

€ in thousands	**2009**	2008 (pro-forma)
EXOR S.A.	**119,960**	0
Fiat S.p.A. - Ordinary shares	**0**	133,035
Fiat S.p.A. - Preferred shares	**0**	12,433
Intesa Sanpaolo S.p.A. - Ordinary shares	**0**	110,168
Emittenti Titoli S.p.A.	**69**	109
Total dividends	**120,029**	255,745

In 2008, dividends had been received from IFIL (€ 72,621 thousand) and Emittenti Titoli (€ 109 thousand) for a total of € 72,730 thousand.

10. Gains on disposals of investments

Gains on disposals of investments amount to € 21,685 thousand in 2009 and include the net gain of € 21,677 thousand from the sale of 78,000,000 Intesa Sanpaolo shares, equal to a 0.66% stake in ordinary capital stock. Net proceeds total € 217,172 thousand.

In 2008, gains on disposals of investments had included the net gain of € 167,468 thousand from the sale by IFIL of 171,916,165 Intesa Sanpaolo shares, equal to a 1.45% stake in ordinary capital stock. Net proceeds were € 598,350 thousand.

11. Financial expenses from third parties

These include:

€ in thousands	2009	2008 (pro-forma)	Change
Interest on bonds 2007/2017	**40,830**	40,414	416
Interest on bonds 2006/2011	**7,308**	11,162	(3,854)
Expenses on early closing of interest rate hedging transactions on 2006/2011 bonds	**1,568**	0	1,568
Interest expenses on bank debt	**2,811**	17,185	(14,374)
Bank commissions	**1,452**	2,137	(685)
Interest rate hedging expenses	**5,345**	3,737	1,608
Charges from discounting to present value	**12**	8	4
Financial expenses on securities held for trading:			
- Losses on stock trading	**9,058**	16,740	(7,682)
- Losses on put/call sales	**1,317**	260	1,057
- Fair value adjustments	**3,960**	14,312	(10,352)
- Other expenses	**4,931**	16	4,915
Total financial expenses from third parties	**78,592**	105,971	(27,379)

12. Financial income from third parties

This includes:

€ in thousands	2009	2008 (pro-forma)	Change
Interest income on receivables from:			
- tax authorities	**1,122**	1,381	(259)
- banks	**3,592**	12,241	(8,649)
Interest rate hedging income	**1,303**	7,889	(6,586)
Income on securities held for trading:			
- Gains on put/call sales	**15,549**	1,845	13,704
- Gains on stock trading	**14,008**	3,417	10,591
- Fair value adjustments	**6,085**	3,214	2,871
- Interest on fixed-rate securities	**8,925**	1,475	7,450
- Dividends	**2,041**	2,672	(631)
- Other income	**4,119**	2,235	1,884
Sundry income	**95**	30	65
Total financial income from third parties	**56,839**	36,399	20,440

13. Personnel costs

These amount to € 8,724 thousand (€ 11,157 thousand in 2008) and show a total net decrease of € 2,433 thousand.
Details are as follows:

€ in thousands	2009	2008 (pro-forma)	Change
Salaries	**5,139**	6,639	(1,500)
Social security contributions	**1,370**	1,755	(385)
Employee severance indemnities, other long-term benefit plans and defined benefit plans and payments of plan contributions	**616**	1,496	(880)
Figurative costs of EXOR stock option plan (a)	**886**	554	332
Other personnel costs (b)	**713**	713	0
Total personnel costs	**8,724**	11,157	(2,433)

(a) Information on the EXOR stock option plan is provided in Note 32.
(b) These costs include € 308 thousand (€ 281 thousand in 2008) of costs from related parties.

The decrease in salaries and social security contributions is mainly due to the reduction in the workforce and a different workforce composition.

In fact, in 2009, three managers and four employees left the Company; four employees were transferred to the subsidiary Soiem (now Exor Services) and three new employees were hired.

At the end of 2009, employees number 42 (50 at the end of 2008).
The average number of employees in 2009 was 42, summarized by category as follows:

	2009	2008 (pro-forma)
Managers	**11**	13
Middle management	**17**	17
Clerical staff	**11**	16
Messengers	**3**	7
Average number of employees	**42**	53

Compensation policies

The overall compensation is composed of a fixed and a variable portion, as well as additional benefits.
The fixed compensation is connected to the responsibilities of the person's role, the level of individual expertise and the experience acquired; since 2009, variable compensation is discretionary; previously, it was liked to an evaluation system according to fixed objectives both individually and as a team.
Further discretionary bonuses may be paid for exemplary performance in transactions which create value for the Company.
The additional benefits, mainly in reference to personnel with management responsibilities, include supplementary pension plans, health care plans, death and disability insurance coverage, loyalty bonuses and, where provided for, the use of a company car.
Further information on employee benefits is presented in Note 36.

14. Purchases of goods and services from third parties

These amount to € 4,500 thousand and increased by € 63 thousand compared to 2008 (€ 4,437 thousand). The main costs are indicated below:

€ in thousands	2009	2008 (proforma)	Change
Sundry consulting and services	**1,754**	1,573	181

Sundry expenses	**172**	220	(48)
Total purchases of goods and services from third parties	**4,500**	4,437	63

(a) Includes out-of pocket expenses.

15. Other operating expenses

These total € 578 thousand (€ 713 thousand in 2008).
Details are as follows:

€ in thousands	2009	2008 (pro-forma)	Change
Donations	**344**	467	(123)
Consob supervisory contribution	**152**	130	22
Association dues	**60**	97	(37)
Sundry taxes and duties	**8**	11	(3)
Dividends statute-barred	**2**	0	2
Sundry expenses	**12**	8	4
Total other operating expenses	**578**	713	(135)

16. Non-recurring other income (expenses) and general expenses – Personnel costs

These amount to € 4,499 thousand (€ 624 thousand in 2008) and refer to the special indemnity relative to the termination of the employment relationship resolved in favor of the former chief executive officer and general manager of IFI S.p.A., Virgilio Marrone (€ 3,265 thousand), expenses relating to workforce reductions (€ 1,234 thousand), of which € 947 thousand is for termination incentives and € 287 thousand for accruals to the Redundancy Solidarity fund. Further details are provided in Note 38.

17. Non-recurring other income (expenses) and general expenses – Purchases of goods and services from third parties

These amount to € 1,444 thousand (€ 1,216 thousand in 2008) and refer to legal expenses incurred for assistance in the proceedings relating to the content of the press releases issued by IFIL and Giovanni Agnelli e C. on August 24, 2005.

18. Other taxes and duties – Non-deductible VAT

Both in 2009 and in 2008 (pro-forma), prorated non-deductible VAT was 100%. Non-deductible VAT was € 3,515 thousand in 2009 and € 3,175 thousand in 2008. The particular significance of these amounts was determined by the invoicing of services rendered in relation to the Merger and the legal expenses for defense in proceedings in progress.

19. Income taxes

The income for tax purposes calculated by applying tax rules generates a taxable loss of about € 6 million. The income taxes recorded in the income statement (€ 73 thousand) refer to the separate income taxes of the CFC (Controlled Foreign Companies) paid in 2009.

In 2009, deferred taxes were released for € 3,233 thousand set aside in the past by IFI on the reversal of the impairment loss on IFIL stock since this amount was in excess owing to the cancellation of IFIL stock following the Merger.

Given that, currently, the probability of recovery against future taxable income is not assured, no deferred tax assets have been booked on the tax losses for the years 2005 to 2009 (€ 396 million, in total).

Details are as follows:

	2009				2008 (EXOR)	
€ in millions	**EXOR**	**IFIL**	**Total**	**Theoretical tax effect (27.5% rate)**	Amount	Theoretical tax effect (27.5% rate)
Tax losses carryforwards (for a maximum of 5 years)						
- year 2004 (a)					20	
- year 2005	**33**	**117**	**150**		33	
- year 2006	**29**	**135**	**164**		29	
- year 2007	**10**	**56**	**66**		10	
- year 2008	**3**	**7**	**10**		3	
- year 2009	**6**	**-**	**6**		0	
Total tax losses carried forward	**81**	**315**	**396**	**109**	95	26

(a) At December 31, 2009, the possibility of utilizing the part of tax losses referring to the year 2004 has expired.

Considering that the Irap taxable base is negative, the following table shows the reconciliation between pre-tax profit and taxable income for Ires purposes.

€ in millions	**2009**	2008
Pre-tax profit	**86**	49
Increases:		
- temporary differences (a)	**40**	17
- permanent differences	**6**	1
Total increases	**46**	18
Decreases:		
- 95% of dividends received	**(114)**	(69)
- 95% of the gain on the sale of the stake in Intesa Sanpaolo	**(20)**	
- deductions of permanent differences	**(4)**	0
- deductions of prior years' temporary differences (b)	**0**	(1)
Total decreases	**(138)**	(70)
Loss for the year for tax purposes	**(6)**	(3)

(a) Mainly includes non-deductible net interest expenses for the year.

(b) Includes fees and compensation referring to prior years paid this year and other expenses incurred in previous years and deductible for tax purposes in the current year.

For the years up to December 31, 2004, the ordinary deadline for tax utilization has expired.

20. Non-current assets – Investments

The changes during the year are described in the following paragraphs.

As a result of the Merger, EXOR took over the investments held by IFIL. Since the Merger was characterized by the absence of economic exchange with third parties and the continuance of control, the investments have been transferred at their same values, without the emergence of hidden gains or losses.
The carrying amount of the investment in IFIL held by IFI was eliminated against the corresponding share of accounting equity of IFIL; the difference that arose between the accounting values constitutes the Merger Surplus which was recognized as an increase in the reserves of EXOR.
During 2009, the investments were affected by the following transactions listed below:

Fiat S.p.A. (savings shares). In September and October 2009, EXOR S.p.A. purchased 2,338,629 Fiat savings shares (2.93% of the class) from Fondazione Giovanni Agnelli for a total investment of € 13,042 thousand at an average price per share of € 5.577. EXOR S.p.A. currently holds 332,587,447 Fiat ordinary shares (30.45% of the class), 31,082,500 Fiat preferred shares (30.09% of the class) and 2,338,629 Fiat savings shares (2.93% of the class). The investment represents 28.7% of current Fiat capital stock overall.

EXOR S.A. The investment in EXOR S.A. increased by € 437 thousand following the recognition of the portion of the EXOR S.p.A. stock option plan relating to employees of EXOR S.A. and subsidiaries.

Exor Services S.c.p.a. (formerly Soiem S.p.A.). In order to achieve greater efficiency in carrying out certain activities of an auxiliary nature on behalf of the Group, Soiem S.p.A. was transformed into a consortium company with shares. In consideration of this, in November 2009, EXOR sold 45,800 shares of the company to Giovanni Agnelli e C. at an average price per share of € 0.638 for a total of € 29 thousand, equal to the share of the value of equity of the company at that date. The transaction resulted in a gain of € 4 thousand.

With a view towards simplifying the Group's structure, in November 2009, Ifil New Business S.r.l. was merged in Exor Services S.c.p.a. (formerly Soiem S.p.A.). After the Merger, EXOR canceled the carrying amount of the investment in Ifil New Business (€ 25 thousand) and increased the carrying amount of the investment in Exor Services by the same amount against the shares issued by Exor Services to service the exchange for a nominal amount of € 20 thousand.

Other changes in investments accounted for at cost. In 2009, the voluntary wind-ups were closed for Ifil Investment Holding and Deutsche Morgan Grenfell Capital Italy SA. Consequently, the carrying values of these companies were eliminated.

Intesa Sanpaolo S.p.A. During 2009, 78,000,000 ordinary shares were sold for net proceeds of € 217,172 thousand and a gain of € 21,677 thousand. The derecognition of the carrying amount of the stake sold (€ 196,482 thousand) includes the original purchase cost of € 195,495 thousand and cumulative fair value of € 987 thousand.

The gain of € 21,677 thousand comes from the comparison between the net proceeds of € 217,172 thousand and the original purchase cost of € 195,495 thousand. The cumulative fair value on the stake sold, equal to € 987 thousand, was deducted from the specific reserve in equity.
The adjustment to fair value of the remaining shares at the end of the period, equal to € 25,840 thousand, has been recorded, net of deferred taxes, as an increase in the same reserve. The original purchase of the remaining stake of the investment in Intesa Sanpaolo, represented by 40,000,000 ordinary shares, is € 100,254 thousand (€ 2.506 per share).

At December 31, 2008, there were still 19,500,000 call options on Intesa Sanpaolo stock expiring in February 2009. At the established expiration date, the options were not exercised by the counterparts and therefore the premiums received at the date of sale of the options have been recognized as financial income from third parties (€ 301 thousand). In 2009, 25,000,000 put options on Intesa Sanpaolo shares were sold as were 80,600,000 call options on Intesa Sanpaolo shares; put options were also purchased on 10,000,000 Intesa Sanpaolo shares. The premiums received amounted to € 17,741 thousand; those paid € 2,983 thousand. The options exercised or closed in advance have generated financial income of € 8,574 thousand.

At December 31, 2009, there remained call options sold on 40,000,000 Intesa Sanpaolo shares expiring in January and March 2010 at a strike price of € 3 per share; the fair value adjustment of the options led to financial expenses of € 1,186 thousand. At the expiration date in January, the options were exercised with the consequent sale of the underlying shares.

<u>Rho Immobiliare fund.</u> In December 2009, EXOR purchased 400 shares of the closed-end Italian real estate mutual fund denominated “Rho Immobiliare – Fondo Comune di Investimento Immobiliare di tipo chiuso” for a total of € 10 million.

Comparison between the carrying amounts and market prices of listed investments:

		Carrying amount		Market price December 30, 2009		Market price February 26, 2010	
	Number	Per share (€)	Total (€ thsd)	Per share (€)	Total (€ thsd)	Per share (€)	Total (€ thsd)

Total			**3,083,653**		**3,847,628**		

(a) This refers to the measurement of 10,000,000 ordinary shares in portfolio at the end of February.

Furthermore:

- there are no investments requiring the assumption of unlimited responsibility for their obligations (art. 2361, paragraph 2 of the Italian Civil Code);
- there are no investments held as collateral for financial liabilities and contingent liabilities.

The following list of investments held by EXOR S.p.A. presents the additional disclosures required by the Italian Civil Code (art. 2427, paragraph 5) and Consob (Communication 6064293 dated July 28, 2006).

	Capital stock			EXOR investment					Equity	Profit
	Number of shares/quotas	Par value	Amount	Number of shares/quotas	% ownership of Cap. St.	% ownership of Cl. of st.	Carrying amount Per share €	Carrying amount €/000	€/000	(loss) €/000

(a) Data taken from the consolidated financial statements at December 31, 2009.
(b) Data taken from the separate financial statements at December 31, 2009.
(c) Data taken from the consolidated financial statements at October 31, 2009.
(d) Data taken from the half-year report at December 31, 2009.

The higher carrying amount of the investment held in Alpitour S.p.A. compared to its consolidated net equity is not considered an impairment, also in the light of the valuation carried out through an independent appraisal.

21. Current and non-current assets – Held-to-maturity financial instruments

Details are as follows:

€ in thousands	**12/31/2009**	12/31/2008
Non-current assets	**71,389**	0
Current assets	**5,007**	0
Total	**76,396**	0

These are represented by bonds issued by leading counterparts. The bonds classified in non-current assets will be repaid between January 15, 2012 and July 30, 2012; those classified in current assets will be repaid on November 30, 2010.

The bonds are recorded and measured at amortized cost.

22. Current assets – Financial assets held for trading

Details are as follows:

€ in thousands	12/31/2009
Bonds	224,233
Equity shares	42,783
Call options	103
Futures contracts	3,520
Total	**270,639**

Equity shares and bonds are listed in the main European and United States markets. Such shares are measured at fair value at year end using the market price translated, if appropriate, at the year-end rate. Changes in fair value are recognized in the income statement under financial income (expenses) from third parties.

Options purchased are measured at fair value at year end using the market price of the listed underlying assets and the relative level of implicit volatility calculated according to the financial models normally recognized by the market; the options denominated in currencies other than Euro are translated at the year-end exchange rate. The contra-entry fair value adjustment is recognized in the income statement under financial income (expenses) from third parties.

23. Current assets – Cash and cash equivalents

Details are as follows:

€ in thousands	**12/31/2009**	12/31/2008	Change
Bank deposits	**53,355**	548	52,807
Time deposits	**284,000**	0	284,000
Total cash and cash equivalents	**337,355**	548	336,807

These represent current account bank balances in Euro and other currencies besides the Euro, repayable on demand, and liquid assets deposited at leading credit institutions due on February 9, 2010.

Cash and cash equivalents approximate fair value at year-end.

The associated credit risks should be considered limited since the counterparts are leading bank institutions.

24. Current assets – Other financial assets

These amount to € 5,766 thousand (€ 257 thousand at December 31, 2008) and are essentially composed of the portion of interest earned at December 31, 2009 on bonds in portfolio at that date.

25. Current assets – Tax receivables

Tax receivables from the tax authorities refer to:

€ in thousands	**12/31/2009**	12/31/2008	Change
Receivables for prior years' taxes, refunds requested	**43,135**	19,328	23,807
Receivables for current and prior years' taxes, carried forward	**1,764**	3	1,761
VAT receivable	**0**	63	(63)
Total tax receivables	**44,899**	19,394	25,505

The change in receivables from the tax authorities for the year 2009 is summarized as follows:

€ in thousands	Refunds requested	Carried forward	VAT	Total
Balances at December 31, 2008	19,328	3	63	19,394
Merger	38,877	4,312		43,189
Refunds received from the tax authorities	(16,192)			(16,192)
Used for compensation of withholdings and VAT payable		(516)	(63)	(579)
Infragroup sale		(3,362)		(3,362)
Receivables arising during the year (withholdings paid)		1,292		1,292
Interest earned during the year	1,122			1,122
IRES tax advance on CFC		35		35
Balances at December 31, 2009	**43,135**	**1,764**	**0**	**44,899**

26. Current assets – Other receivables

At December 31, 2009, these amount to € 442 thousand. At December 31, 2008, they had totaled € 3,988 thousand, of which € 3,939 thousand was for deferred expenses incurred in 2008 relating to the Merger.

In 2009, such expenses have been allocated together with those incurred in 2008 by the merged company IFIL (€ 3,405 thousand) as well as the expenses incurred in 2009 by EXOR and IFIL (€ 9,750 thousand) as a deduction from additional paid-in-capital for a total of € 17,094 thousand.

27. Equity

Capital stock

At December 31, 2009, the capital stock of EXOR, fully subscribed to and paid-in, amounts to € 246,229,850 and consists of 160,259,496 ordinary shares (65.09% of capital stock), 76,801,460 preferred shares (31.19% of capital stock) and 9,168,894 savings shares (3.72% of capital stock), all with a par value of € 1.

At December 31, 2009, capital stock includes € 1,342 thousand from transfers of revaluation reserves set up in the past by the merged company IFIL which, in the event of distribution, would form part of the taxable income of the Company.

On March 1, 2009, the capital stock of EXOR was increased from € 163,251,460 to € 246,229,850 through the issue of 73,809,496 ordinary shares and 9,168,894 savings shares, all with a par value of € 1, with dividend rights from January 1, 2008. Such shares were attributed to the stockholders of the merged company IFIL in a ratio of 0.265 EXOR ordinary shares for each IFIL ordinary share and 0.265 EXOR savings shares for each IFIL savings share.

The EXOR capital stock increase to service the exchange of the shares of the merged company IFIL was recognized at the fair value of the 73,809,496 ordinary shares and 9,168,894 savings shares issued, respectively equal to € 5.36 and € 3.86 corresponding to the opening stock market prices on March 2, 2009, the first day of market trading of these shares. Of the total of € 431 million, € 83 million was allocated to capital stock, corresponding to the par value, and € 348 million to additional paid-in capital.

The directors have the right, for a period of five years from the date of the resolution passed on May 14, 2008, to increase, one or more times, also in divisible form, the capital stock up to an amount of € 561,750,000.
The ordinary and preferred shares are registered shares while the savings shares can either be registered or bearer shares, as elected by the stockholders, or as set out by law. The preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code and the second paragraph of art. 13 of the bylaws (regulations for conducting stockholders' meetings). The savings shares do not have voting rights in the stockholders' meetings. Pursuant to art. 146 of Legislative Decree 58/98, the savings shares have voting rights in the special stockholders' meetings of the holders of savings shares.

Pursuant to art. 27 of the bylaws, the profit of each year is appropriated as follows:

- 5% to the legal reserve until it reaches one-fifth of capital stock;
- the remaining profit to the shares, as dividends, unless otherwise resolved by the stockholders' meeting, in accordance with the applicable provisions, taking into account that, in the order of priority (i) the savings shares shall be entitled to a preference dividend, cumulative according to the following second paragraph, equal to 31.21% of their par value and a dividend higher than that of the ordinary shares equal to 7.81% of the same par value, and (ii) the preferred shares shall be entitled to a

preference dividend and higher than that of the ordinary shares by 5.17% of their par value, which is not cumulative from one year to the next.

When in any one year, the dividends attributed to the savings shares are lower than that indicated above, the difference shall be added to the preference dividend of the next two years.
In the event the ordinary and/or savings shares are delisted, the preference dividend and the dividend higher than that of the ordinary shares to which the savings shares are entitled shall automatically be increased to the extent that they are equal to, respectively, 32.15% and 8.75%.
In the event of the distribution of reserves, the savings shares shall have the same rights as the other shares.
The board of directors, during the course of the year, to the extent that it considers it appropriate and possible in relation to the results of operations, may resolve to pay interim dividends on the dividends of the same year.

In accordance with art. 28 of the bylaws, dividends that are not claimed within five years of the date they become payable will be statute-barred and become the property of the Company and appropriated to the extraordinary reserve.

In accordance with art. 30 of the bylaws, in the event of a wind-up, the assets of the Company shall be distributed in the following order of priority:

- savings shares shall have a pre-emptive right up to the amount of € 3.78 per each savings share;
- the holders of preferred shares shall have a pre-emptive right up to the par value of the same shares;
- ordinary shares shall have up to the par value of the same shares;
- all three classes of stock shall have any balance remaining in a proportional amount according to law.

The objectives identified by EXOR and the companies in the Holdings System are to create value for all stockholders, safeguard business continuity, diversify investments by sector and geography and support the growth of investment holdings.

EXOR thus aims to maintain an adequate level of capitalization which allows it to generate a satisfactory economic return for stockholders and guarantee economic access to external sources of financing.
EXOR constantly monitors changes in the consolidated debt level of the Holdings System in relation to the current asset value of its investments and dividend flows from the operating holdings.
Although currently insignificant, a very prudent approach is adopted with regard to the use of financial leveraging.

A: For capital increases; B: For coverage of losses; C: For distribution to stockholders.

(a) Since the legal reserve is equal to one-fifth of capital stock, the reserve is distributable (art. 2431 of the Italian Civil Code).

(b) The revaluation reserves can be used for free increases of capital stock. If used to cover losses, they must be later replenished, if not, then no dividends can be distributed. They may not be used to set up the reserve for the purchase of treasury stock. The monetary revaluation reserves can be reduced only by resolution of the stockholders' meeting and in observance of the prescriptions indicated in art. 2445, paragraphs 2 and 3 of the Italian Civil Code.

(c) The reserve is freely distributable except for the portion coming from the reallocation of the contra-entry reserve to treasury stock in portfolio.

In the years 2006, 2007 and 2008, reserves were not used to absorb losses.

At December 31, 2009, tax-deferred reserves are recorded for a total of € 345,041 thousand, of which € 343,009 thousand relates to monetary revaluation reserves and € 2,032 thousand to the legal reserve. The tax-deferred revaluation reserves Law 408/90, Law 413/91 and Law 576/75 recorded for a total of € 261,647 thousand in equity of the merged company IFIL S.p.A., have been reinstated in the equity of EXOR S.p.A. by using part of the merger surplus reserve and the share exchange difference. Further details are provided in Note 29.

31. Equity – Treasury stock

Under the treasury stock buyback program approved by the EXOR S.p.A. board of directors on March 25, 2009, during 2009, purchases were made for 2,550,000 ordinary shares (1.59% of the class) at the average cost per share of € 11.60 and a total of € 29,584 thousand, 1,605,000 preferred shares (2.09% of the class) at the average cost per share of € 6.67 and a total of € 10,708 thousand, and also 208,400 savings shares (2.27% of the class) at the average cost per share of € 8.26 and a total of

€ 1,722 thousand. The overall investment amounts to € 42,014 thousand (approximately 84% of the maximum amount of € 50 million stated in the Program).

At December 31, 2009, EXOR S.p.A. held the following treasury stock:

	Number	Carrying amount		% of
	of shares	Per share (€)	Total (€ thsd)	class
Ordinary shares	2,550,000	11.60	29,584	1.59
Preferred shares	6,965,300	11.66	81,185	9.07
Savings shares	208,400	8.26	1,722	2.27
Balance at December 31, 2009	**9,723,700**		**112,491**	

Changes during the year are as follows:

		Amount	
	Number	Per share (€)	Total (€ thsd)
Ordinary shares			
Balance at December 31, 2008	0	0.00	0
Increase from merger due to shares held by Exor Services (formerly Soiem)	214,756	12.87	2,763

Balance at December 31, 2009	**208,400**	**8.26**	**1,722**

32. Stock option plans

Stock option plans with underlying EXOR stock

The ordinary session of the IFIL stockholders' meeting held on May 13, 2008 had approved the stock option plan (Stock Option Plan IFIL 2008 - 2019) for the chief executive officer, Carlo Barel di Sant'Albano, for 3,000,000 stock options corresponding to the same number of IFIL ordinary shares and for the employees of the IFIL Group (IFIL S.p.A. and the companies in the Holdings System) who are or will be regarded as key people in the organization on the basis of the positions held or activities performed, for a maximum of 12,000,000 stock options.

Following the Merger, the stock option plan was taken over by EXOR S.p.A.. Therefore, the EXOR S.p.A. board of directors held on March 2, 2009 made the adjustments to the stock option Plan resulting from Merger, particularly adjusting the ratio between the number of options and the number of underlying shares and the exercise price on the basis of the Merger's exchange ratio.

The Stock Option Plan EXOR 2008-2019 thus covers a maximum number of 15,000,000 options corresponding to a maximum of 3,975,000 EXOR ordinary shares. At the end of the reporting period, a total of 9,475,000 options have been granted to 17 people, including the chief executive officer, corresponding, on the basis of the exchange ratio, to 2,510,875 EXOR ordinary shares. The Plan grants the recipients free options on treasury stock purchased by the Company or by companies in the Holdings System in accordance with existing laws. The Plan does not provide for the issue of new shares so there are no dilutive effects on capital stock. The treasury stock held by IFIL, including those to service the Plan, were canceled and did not form part of the exchange ratio under the Merger in accordance with the law. The board of directors' meeting held on March 25, 2009 approved a plan to purchase treasury stock of the three classes partly to service the above stock option Plan.

The fair value of the 9,525,000 options granted was determined to be € 15,263 thousand, divided as follows:

€ in thousands	Number of options granted	Number of EXOR shares exercisable	Total cost	Cost referring to the year
Options granted originally:				
Chief Executive Officer EXOR S.p.A.	3,000,000	795,000	4,807	601
Key employees EXOR S.p.A. (13)	4,425,000	1,172,625	7,091	886
Total EXOR S.p.A.	7,425,000	1,967,625	11,898	1,487
Key employees of EXOR S.A. and other subsidiaries in the Holdings System (4)	2,100,000	556,500	3,365	437
Total	**9,525,000**	**2,524,125**	**15,263**	**1,924**

In 2009, 50,000 options originally assigned to key employees of EXOR S.p.A. were forfeited. Therefore, at December 31, 2009 there are 9,475,000 options.

The adjusted exercise price is € 19.97 for each EXOR share.

The cost referring to the year amounts to € 1,487 thousand, of which € 601 thousand is classified as emoluments for the chief executive officer and € 886 thousand as personnel costs. The cost relating to key employees of EXOR S.A. and other companies in the Holdings System was recognized as an increase in the amount of the investment in EXOR S.A. The corresponding entry for the total of € 1,924 thousand is recorded in the stock option reserve.

Stock option plan with underlying Alpitour stock

With reference to the stock option plan approved by IFIL S.p.A. for two managers of the Alpitour Group in December 2005, it should be noted that after the Merger, EXOR S.p.A. took over the relative commitments.

The plan calls for purchase options on Alpitour shares to be granted to the chairman and chief executive officer, D.J. Winteler, and the general manager, F. Prete, respectively, equal to 6% (2,127,000 shares) and 5% (1,772,500 shares) of Alpitour’s capital stock.
After approval on the part of EXOR S.p.A., the Alpitour S.p.A. board of directors may in the future grant purchase options on Alpitour shares to other managers who hold important operating positions equal to 4% of Alpitour’s capital (now 1,418,000 shares).
After reconfirmation of the positions of the two managers for another three years, the EXOR S.p.A. board of directors' meeting held on May 13, 2009 extended the period in which the options could be exercised to January 2013 (date of the approval of the Alpitour financial statements for the financial year 2011/2012 by the stockholders' meeting).
EXOR S.p.A. and the managers of Alpitour S.p.A., finally, exchanged reciprocal purchase and sale options, exercisable during the same above period, on Alpitour shares that will have been purchased by the same managers; the exercise price will be established on the basis of an appraisal which will be performed using the same valuation principles applied in the December 2005 valuation.

From an accounting standpoint, the plan is a cash-settled stock-based payment transaction subject to paragraph 30 and subsequent paragraphs of IFRS 2, which requires the liability of the plan to be measured at fair value and, therefore, the options of the plan, at every reporting date, until plan expiration.

At December 31, 2009, the fair value of each option right of the plan is estimated at € 3.14 for a total of € 12,233 thousand (€ 8,075 thousand at December 31, 2008) recorded in "Other current liabilities with related parties". The increase in the liability compared to the prior year (€ 4,158 thousand) was recognized in the income statement in "Non-recurring other expenses from related parties" as the portion relating to the current year.

The estimate was performed by an independent expert who applied a binomial model of valuation to the options based on the following parameters:

1. The exercise price of the options has been assumed to be equal to the par value of one ordinary Alpitour share at the grant date, quantified on the basis of an estimate performed by an independent expert, equal to € 2.24.
2. The current price of an Alpitour ordinary share at the reference date of December 31, 2009 has been determined in € 4.98.
3. The last expiration date to exercise options has been established as the date of the approval of the Alpitour S.p.A. financial statements for the year 2011/2012, fixed, conventionally, as January 31, 2013. At the date of reference of December 31, 2009, the options thus have a remaining life of 37 months (3 years and 1 month).
4. The expected volatility has also been determined by referring to the historical volatility, measured over a period consistent with the remaining life of the shares in the plan, of a sample of listed companies operating in the same sector as Alpitour.
5. The application of the valuation model assumes the absence of the payment of dividends.
6. The risk-free interest rate has been assumed to be equal to the return on government securities having a residual life consistent with the expiration of the options in the plan.
7. An assumption has also been included in the "binomial" model for the early exercise of the option rights during the period between the end of the vesting period and contractual expiration date of the options.

33. Non-current liabilities – Non-convertible bonds

Details are as follows:

Issue date	Maturity date	Issue price	Coupon	Rate	Nominal amount (€/000)	Effect of amortized cost measurement (€/000)	**Balance** (€/000)
6/9/2006	6/9/20011	99.900	Quarterly	3-month Euribor + spread	200,000	270	**199,730**
6/12/2007	6/12/2017	99.554	Annually	Fixed 5.375%	750,000	4,846	**745,154**
Total					**950,000**	**5,116**	**944,884**

Following the Merger, EXOR became the universal successor of IFIL, as a result of which EXOR assumed, starting from the effective date of the Merger, all the assets and liabilities, rights and obligations of IFIL.

EXOR has therefore replaced IFIL as the issuer of the non-convertible bonds 2006/2011 and 2007/2017, both of which are traded on the Luxembourg Stock Exchange.

In order to guarantee fixed interest rates over the entire term of the 2006/2011 bonds, in previous years some interest rate swaps had been put into place on the full amount. During 2009, owing to changes in financial market conditions, such contracts were early terminated with a payment of € 8,260 thousand.

The bonds contain covenants that are common in international practice for bond issues of this type. In particular, they contain negative pledge clauses (the obligation to extend any real present or future guarantees given as collateral on the assets of the issuer on other bonds and other credit instruments to these bonds to the same degree) providing for periodic disclosure. The 2006/2011 bonds also establish other commitments such as

respecting a maximum debt limit in relation to the amount of the portfolio and maintaining a rating by one of the major agencies. Non-compliance with these covenants allows the bondholders to ask for the immediate redemption of the bonds. Finally, standard events of default are envisaged in the case of serious non-fulfillment such as, for example, failure to pay interest. These covenants were complied with at December 31, 2009.
Finally, a change in control, if any, of EXOR would give the bondholders the right to ask for early repayment of the 2006/2011 and 2007/2017 bonds for a total of € 950 million.

Standard & Poor's rated the two bond issues "BBB+", in line with the current rating of EXOR S.p.A. long-term debt.

34. Current and non-current liabilities – Bank debt

Non-current bank debt amounts to € 125 million (€ 150 million at December 31, 2008).

Bank debt is classified as non-current according to the remaining term of the line granted and the duration of the hedging contracts.

Current bank debt amounts to € 25.1 million (€ 16.2 million at December 31, 2008) and includes a loan of € 25 million due by the end of January 2010 and bank overdrafts for the remaining amount (€ 0.1 million).

In order to guarantee fixed interest rates, interest rate swaps were put into place on € 150 million; at December 31, 2009, the fair value of these contracts is negative for € 4.5 million.

With regard to the periods in which outgoing cash flows will reverse in relation to the interest rate swap contracts, reference should be made to Note 39.
At December 31, 2009, the Company has credit lines for € 1,742 million, of which € 832 million is revocable and € 910 million is irrevocable. The expiration dates of the credit lines are as follows:

€ in millions	
Within 1 year	100
Between 2 and 3 years	725
Between 4 and 5 years	85
Total	**910**

The loan contracts relating to irrevocable credit lines provide for commitments to be observed that are typical of the practices in the sector for this type of debt. In particular, some of the main commitments on certain contracts refer to periodical disclosure obligations, prohibition of new real guarantees on the assets of the Company without the consent of the creditor, non-subordination of the credit and, in some cases, compliance with financial ratios. Finally, clauses provide for early repayment in the event of serious non-fulfillment such as, for example, failure to pay interest or events that are especially detrimental such as bankruptcy.
In the event of a change in control of EXOR, some lender banks would have the right to ask for the early repayment of the irrevocable credit lines for a total of € 155 million.

35. Non-current liabilities – Deferred tax liabilities

Deferred income taxes originated from temporary differences between the carrying amount and the fiscally recognized amount of the investments held in Intesa Sanpaolo and Fiat.

The changes during the year are as follows:

€ in thousands	To equity	To income statement	Total
Balance at December 31, 2008			**3,333**
Increase as a result of Merger	21,603		**21,603**
Release as a result of partial sale of stake in Intesa Sanpaolo	(12)		**(12)**
Accrual for increase in fair value of remaining stake in Intesa Sanpaolo	355		**355**
Reversal of deferred taxes accrued by IFI on potential impairment reversal on investment in IFIL		(3,233)	**(3,233)**
Changes during the year	**21,946**	**(3,233)**	**18,713**
Balance at December 31, 2009			**22,046**

36. Non-current liabilities – Provisions for employee benefits

The composition is as follows:

€ in thousands	**12/31/2009**	12/31/2008
Employee severance indemnities	**3,071**	1,966
Other provisions for employees	**169**	47

(Gains) losses on curtailments and/or settlements			**0**			0
Plan changes			**0**			0
Balance at end of year	**3,071**	**169**	**3,240**	1,966	47	2,013

The analysis of employee benefits is as follows.

Employee severance indemnities

Employee severance indemnities represent the obligation due to employees by Italian law (recently amended by Law 296/06) that has accrued and which will be paid upon termination of employment. In certain circumstances, a portion of the indemnity may be paid as an advance during the employee's service life. This is an unfunded defined benefit plan, considering the benefits almost entirely accrued, with the sole exception of the revaluation.

After the change made to the regulations for employee severance indemnities by Law 296 dated December 27, 2006 (Budget Law 2007), and subsequent decrees and regulations, for those employees who have asked, the portion of employee severance indemnities accruing from January 1, 2007 has been transferred to a complementary pension plan chosen by the employees and these therefore fall under defined contribution plans.

For those employees who did not elect the transfer of the accrued portion of employee severance indemnities beginning January 1, 2007, the calculation of employee severance indemnities, including the portion accruing, will be made according to the usual actuarial method.

Besides employee severance indemnities, established by art. 2120 of the Italian Civil Code, EXOR S.p.A. guarantees other forms of benefits (termination benefits, loyalty bonuses, health care plans, defined benefit and defined contribution pension plans) under Company or individual supplementary agreements, described below.

Termination benefits

This is a fixed amount in addition to employee severance indemnities which will be paid at the time and in relation to the termination of the employment relationship, at the currently expected retirement age, on the basis of existing legislation, at the age of 65 for men and at the age of 60 for women. Any raising of the retirement age for whatsoever reasons will have no effect on the payment of these benefits. In the eventuality of the termination of employment for whatsoever reason prior to the legal retirement age indicated above, the benefits shall be paid for the amount accrued up to the date of termination of employment, compared with and in proportion to the years of service since January 1, 2000 up to the date of the termination of employment. No interest or revaluations of any sort accrues on the amount.

Health care plans

Health care plans, historically offered to management staff, have been extended to all employees since the end of 2007, and require the payment of defined contributions to outside funds and entities which pay the health care benefits.

Pension plans

The Company's pension plans are for employees categorized as managers and are covered by company agreements and regulations.
They can be "defined benefit" or "defined contribution" plans and provide for the payment of contributions to outside funds that are legally separate and have autonomous assets.
The plans provide for a contribution by the employer and a contribution by the employee plan participant, also by conferring a part of his/her employee severance indemnity.
The liabilities for contributions payable are included in "Other payables". The contribution cost for the period accrues on the basis of the service rendered by the employee and is recognized in personnel costs.

Other benefits

Other benefits include loyalty bonuses payable to all employees.
Loyalty bonuses accrue and are paid after a certain number of years of service (25, 30, 35 and 40 years).

Other information

The actuarial calculations required to determine the liability of defined benefit plans are performed by an independent actuary at the end of each year. At December 31, 2009 and December 31, 2008, the liability has been calculated on the basis of the following actuarial assumptions:

	12/31/2009	12/31/2008
Discount rate	**4.10%**	4.80%
Expected remuneration increase	**1.9-3.4%**	2.2-3.7%
Cost-of-living increase	**1.90%**	2.20%

In addition to the above financial indexes, account has also been taken of all the demographic assumptions relating to the probability of events such as death, disability, dismissal and retirement of the employees.

37. Current liabilities – Other financial liabilities

These refer to:

€ in thousands	**12/31/2009**	12/31/2008	Change
Bonds and loans – current portion (interest and hedges)	**22,965**	398	22,567
Fair value of cash flow hedge derivatives	**4,527**	4,910	(383)
Derivative financial instruments held for trading	**7,763**	0	7,763
Commissions on unused credit lines	**202**	152	50
Payables to stockholders and other debt	**268**	0	268
Total current other financial liabilities	**35,725**	5,460	30,265

38. Non-current and current liabilities – Other payables

These include:

	12/31/2009		12/31/2008	
€ in thousands	**Non-current**	**Current**	Non-current	Current
Payable to INPS for Solidarity Fund under D.M. 158 of 4/28/2000	**193**	**173**	189	77
Payable to employees	**0**	**1,810**	0	317
Contributions payable	**0**	**653**	0	202
Payable to statutory auditors for emoluments	**0**	**151**	0	150
Sundry	**0**	**189**	0	2
Total other payables	**193**	**2,976**	189	748

Under D.M. 158 dated April 28, 2000, a “Solidarity Fund to support earnings, employment, reconversion and professional requalification of employees in the credit sector” has been set up at Inps which enjoys separate financial and asset management. The Fund, in exceptional situations, pays benefits to support earnings at the request of the employer until the right is accrued for a retirement or old age pension within a period of 60 month from the date of cessation of the employment relationship.

The above liabilities (in total € 366 thousand, of which € 173 thousand is current and € 193 thousand non-current) represent the special contribution that EXOR will pay to cover the extraordinary benefits payable to former employees, including the related contribution.

39. Additional information on financial instruments and financial risk management policies

The carrying amounts and the relative income (expenses) originating from each category of asset and liability classified in accordance with IAS 39 are presented as follows:

	12/31/2009		
€ in thousands	carrying amount	income	expenses
Financial assets			
At fair value through profit or loss

Fair value of financial assets and liabilities and fair value estimation criteria

IFRS 7 requires financial instruments recognized in the statement of financial position at fair value to be classified on the basis of a hierarchy that reflects the significance of the inputs used in determining fair value. The following levels are used in this hierarchy:

- Level 1 – listed prices in active markets for the assets or liabilities being measured;
- Level 2 – inputs other than listed prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) on the market;
- Level 3 – inputs that are not based on observable market data.

The following table provides an analysis under this hierarchy of financial assets and liabilities measured at fair value at December 31, 2009:

€ in thousands	Note	**Level 1**	**Level 2**	**Level 3**	Total
Assets at fair value					
Non-current assets					
Available-for-sale investments		126,600		10,000	136,600
Current assets					
Financial assets held for trading		270,536	103		270,639
Total assets		**397,136**	**103**	**10,000**	**407,239**
Liabilities at fair value					
Current liabilities					
Other financial liabilities			12,290		12,290
Total liabilities		**0**	**12,290**	**0**	**12,290**

In 2009, there were no transfers from Level 1 to Level 2 or vice versa.
Available-for-sale investments classified in Level 3 refer to the purchase price of 400 shares of the closed-end Italian real estate mutual fund denominated "Rho Immobiliare – Fondo Comune di Investimento Immobiliare di tipo chiuso". The purchase was finalized in December 2009.

The fair value of listed securities in an active market is equal to the market price at the end of the reporting period.
For trade receivables and payables and other current assets and liabilities due within one year, the fair value is not significant in that their carrying amount approximates fair value.

Credit risk

The maximum theoretical exposure to credit risk for EXOR S.p.A. at December 31, 2009 is represented by the carrying amount of financial assets shown in the financial statements. Nevertheless, the Company seeks to mitigate such risk by investing a good part of its liquidity in securities issued by leading bank and corporate counterparts selected according to their creditworthiness.
At December 31, 2009 and December 31, 2008, there are no financial assets past due and not written down and provisions for receivables impairment.

Liquidity risk

The details of residual contract maturities for all financial liabilities which fall under the application of IAS 39 are indicated in the table below.

The table is prepared on the basis of the allocation of the remaining cash flows from existing contracts, including principal and interest; with regard to floating-rate loans, the most recent fixed coupon rate with the bank counterpart was used for the projection of future maturities, taking into account the effect of hedging transactions.

	2009					
€ in thousands	Within 6 months or until canceled	Between 6 months and 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
Non-convertible bonds						
EXOR bonds 2011	1,397	1,397	201,397			204,191
EXOR bonds 2017	40,313		80,625	80,625	870,937	1,072,500
Non-current bank debt	3,013	27,993	100,268			131,274
Current bank debt	533	25,518				26,051
Trade payables and other payables to related parties	298					298
Trade payables and other payables to third parties	2,611					2,611
Derivative financial instruments designated as hedges	4,527					4,527
Total	**52,692**	**54,908**	**382,290**	**80,625**	**870,937**	**1,441,452**

	2008					
€ in thousands	Within 6 months or until canceled	Between 6 months and 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
Non-current bank debt	3,521	3,482	157,233			164,236
Current bank debt	16,181					16,181
Payables to related parties (a)	199,687					199,687
Trade payables to third parties	189					189
Derivative financial instruments designated as hedges	4,910					4,910
Total	**224,488**	**3,482**	**157,233**	**0**	**0**	**385,203**

(a) These refer to the subsidiary IFIL S.p.A. merged in 2009.

Outgoing flows from current operations are financed for the most part by incoming flows from ordinary activities and cash availability.

Liquidity risk could thus arise only in the event of investment decisions in excess of cash availability which are not preceded by sufficient liquidations of assets or the receipt of suitable sources of financing that can be readily used. In this sense, EXOR S.p.A. operates so as to have irrevocable credit lines available with expiration dates and amounts consistent with its investment plans.

At December 31, 2009, the Company has credit lines for € 1,742 million, of which € 910 million are irrevocable.

The expiration dates of the credit lines are as follows:

€ in millions	Lines agreed	Of which, irrevocable
Within 1 year	932	100
Between 2 and 5 years	810	810
Total	**1,742**	**910**

Market risk

EXOR S.p.A. is principally exposed to currency, interest rate and price risks.

Currency risk

EXOR S.p.A. does not have financial liabilities denominated in currencies other than Euro.

A part of the assets held for trading and cash at December 31, 2009 for € 13,471 thousand and € 7,912 thousand, respectively, are denominated in currencies other than Euro. Since these are securities held for trading and cash, both are adjusted to year-end exchange rates.

EXOR S.p.A. has extended a U.S. dollar loan to C&W Group with an equivalent Euro amount, including interest, of € 28,163 thousand at December 31, 2009. The dollar flows which are expected to be received have been forward sold to leading banking counterparts in order to neutralize the risks associated with the fluctuation of the U.S. dollar exchange rate against the Euro.

Interest rate risk

The analysis of debt by interest rate shows that the rates are between 4% and 5.75% in 2009 (between 4% and 5.5% in 2008).

EXOR S.p.A. has some interest rate swap contracts in place at December 31, 2009, for a total notional amount of € 150 million for the purpose of managing exposure to fluctuations in interest rates on bank debt, with a fair value for a negative € 4,527 thousand.

A sensitivity analysis was performed on the financial instruments exposed to interest rate risk at the end of the reporting period. The analysis assumes that the exposure for floating-rate liabilities at the end of the year has remained unchanged for the entire year. The assumptions used for the model are as follows:

- for debt: a symmetrical change of 50 basis points is applied;
- for interest rate swaps: the fair value is recalculated applying a parallel and symmetrical shift of 50 basis points to the current interest rate curve at the end of the reporting period.

The effects of a change with an increase or decrease of 50 basis points in interest rates would be the following:

	12/31/2009		12/31/2008	
€ in thousands	**income statement**	**statement of financial position**	income statement	statement of financial position
+50 bsp				
cash and cash equivalents/financing	**827**		(1,079)	
hedging instruments		**193**		188
-50 bsp				
cash and cash equivalents/financing	**(827)**		1,079	
hedging instruments		**(186)**		(188)

Price risk

EXOR S.p.A. is exposed to price risk originating from investments in the capital stock of other companies held for trading or for strategic purposes; such investments are classified in the following categories:

- investments accounted for at cost;
- available-for-sale investments;
- assets held for trading.

Sensitivity analysis for price risk

Considering price risk exposure at the end of the reporting period, if the prices of securities, classified as available-for-sale investments and assets held for trading are 5% higher or lower, the reserve for available-for-sale securities reserve recorded in equity would be € 6,830 thousand higher or lower and the amount recognized in the income statement would be € 13,532 thousand higher or lower.

40. Fees to members of the board of directors and board of statutory auditors

(art. 78 of Consob Regulation adopted by Resolution 11971 dated May 14, 1999 and subsequent amendments)

All amounts in the following table are expressed in thousands of Euro.

Name	Post held	Term of office	Expiration of term of office	Fee for post held (a)	Non-monetary benefits	Bonuses and other incentives	Other compensation
Directors in office							
Elkann John	Chairman	1/1-12/31	2011	837			634

Total Statutory Auditors				**146**	**0**	**0**	**234**

(a) The directors (Elkann, Gabetti, Teodorani-Fabbri, Sant'Albano, Brandolini d'Adda, Agnelli, Camerana, Ferrero Ventimiglia, Nasi, Rattazzi and Grande Stevens) have waived their right to the fee resolved by the stockholders' meeting for the post of director (€ 83 thousand) and instructed the Company to devolve such fees for charitable and cultural purposes.

(b) The director Sant'Albano has relinquished to EXOR the fees resolved by Fiat (€ 77,000) and Juventus Football Club (€ 17,500).

(c) Refers to the fee as chairman of the board of statutory auditors of the merged company IFIL S.p.A..

(d) Represents the special indemnity relating to the cessation of the employment relationship.

There are no key managers with strategic responsibilities in EXOR S.p.A..

The Company signed a third-party liability insurance policy with a group of insurance companies for a maximum claim per incident and per year of € 50 million for coverage in the event of requests for reparation of non-fraudulent acts.

The proposals for the fees of the executive directors are formulated and approved directly by the board of directors which, after a review by the compensation and nominating committee, in accordance with art. 2389, paragraph 2, of the Italian Civil Code, has the power to establish the fees of directors vested with special responsibilities in accordance with the deed of incorporation.

In the meeting held on May 13, 2009, the board of directors decided to equally divide among its members the fee approved by the stockholders' meeting, amounting to € 170,000 per year, and, furthermore, pursuant to art. 2389 of the Italian Civil Code, approved the following annual fees:

- € 1,000,000 to the chairman John Elkann, in addition to health care coverage;
- € 1,000,000, besides all out-of-pocket travel expenses outside the municipality of residence, for the mandate for strategical coordination, to the honorary chairman Gianluigi Gabetti; he is also entitled to death and permanent disability insurance coverage for professional or non-professional-related accidents and the use of a secretarial service and a car with driver also after the expiry of the term of office;
- € 1,250,000 to the chief executive officer, Carlo Barel di Sant'Albano, who is also entitled to the following:
    - a variable fee up to a maximum of € 1,250,000, 50% of which is linked to the increment in EXOR's NAV;
    - the use of an apartment in Turin made available by the company;
    - the use of two company cars, in addition to one used for company business;
    - death and permanent disability insurance coverage for professional or non-professional-related accidents;
    - health care coverage, the same as for company executives;
    - a sum equal to € 2,500,000, corresponding to two years' annual fixed fee for the post of chief executive officer, to be paid at the end of the term of office, except in the case of the reconfirmation of the post, voluntary resignation or failure to accept the reconfirmation of the post, termination for just cause or reaching pensionable age;
- € 100,000 to the vice chairman Pio Teodorani-Fabbri for the coordination and supervision activities of the Rome office;
- € 35,000 to the internal control committee (of which € 15,000 to the chairman and € 10,000 to each of the other two members);
- € 35,000 to the compensation and nominating committee (of which € 15,000 to the chairman and € 10,000 to each of the other two members);
- € 40,000 to each of the directors Victor Bischoff, Christine Morin-Postel and Antoine Schwartz as members of the strategy committee;
- € 100,000 to the secretary to the board of directors, Virgilio Marrone, in addition to death and permanent disability insurance coverage for professional or non-professional-related accidents and the use of a company car.

The directors will also be reimbursed for the expenses incurred in carrying out the activities connected with their posts.

41. Stock options granted to directors

(art. 78 of Consob Regulation adopted by Resolution 11971 dated May 14, 1999 and subsequent amendments)

Name	Company	Options held at beginning of year			Options granted (exercised) during year			Options held at end of year		
		Number of options	Average exercise price	Exercise period (month/year)	Number of options	Average exercise price	Exercise period (month/year)	Number of options	Average exercise price	Exercise period (month/year)
Barel di Sant'Albano Carlo (a)	EXOR	3,000,000	19.97	5/16-12/19	0	0.00	0	3,000,000	19.97	5/16-12/19

(a) The average price was changed as a result of the Merger, from € 5.291 to € 19.97.

On November 3, 2006, under the stock option plan approved by the board of directors of Fiat S.p.A., Alessandro Nasi had been granted 15,000 options giving him the right to purchase a specific number of Fiat ordinary shares at a set price of € 13.37 per share. The plan is for a period of 8 years. The following is noted:

- 3,750 options are the only rights that vested and can be exercised;
- 3,750 options are forfeit since the plan performance targets were not met;
- the remaining 7,500 options could vest if the 2010 plan target is reached.

At December 31, 2009, therefore, 11,250 options remain which could be exercised from the first quarter of 2011 to November 2014.

On April 26, 2008, under the stock option plan approved by CNH Global NV for its employees and for those of the subsidiaries, Alessandro Nasi was granted 509 options (of which 338 can be exercised) at the grant price of $48.12 each. The rights may be exercised between January 2009 and January 2014.
In April 2009, Alessandro Nasi was granted another 8,659 options (of which 2,886 can be exercised) at the grant price $13.58 each. The options may be exercised between January 2010 and January 2015.

42. Transactions with related parties

The board of directors has adopted principles of conduct for carrying out transactions with related parties which are described in the Report on Corporate Governance, also available on the corporate website (http://www.exor.com).

With regard to the year 2009, the transactions between EXOR S.p.A. and the related parties identified in accordance with IAS 24 have been carried out as set forth in existing laws, on the basis of reciprocal economic gain.

With the exception of the comments made subsequently in respect of the loan extended to C&W Group, receivables and payables are not guaranteed and are settled in cash. Guarantees have neither been granted nor received.

Losses have not been recognized during the year for uncollectible or doubtful receivables in relation to amounts due from related parties.

A summary of the statement of financial position and income statement balances generated by transactions with related parties carried out during 2009 is presented below. All amounts are expressed in thousands of Euro.

Counterpart	Investments	Financial receivables	Trade receivables	Trade payables and other payables
Fondazione Agnelli (a)	13,042			
C&W Group (b)		28,163

% incidence of total transactions with related parties to total of income statement line items	**2.84%**	**65.04%**	**59.76%**	**44.97%**	**94.59%**

The most important transactions are commented below with reference to the notes in the preceding tables.

a) Purchase of 2,338,629 Fiat savings shares from Fondazione Agnelli.
b) 3-year subordinated credit line extended to C&W Group for $50 million, drawn down for $40 million at December 31, 2009. Being a transaction between related parties, as established by the rules of Corporate Governance, the credit line was approved by the board of directors on March 25, 2009. The purpose of the loan is to provide the subsidiary with additional debt capacity and also to use such capacity to fund any investment opportunities. At expiration on May 30, 2012, in the event of non-payment, EXOR will have the right to convert the loan to shares of the subsidiary C&W Group Inc. at a price equal to the lowest of the valuations made quarterly by an independent third party over the period of the credit line, discounted by 30%. The counterparts have provided second-level guarantees to EXOR against the loan.
c) Of which € 16 thousand refers to Mr Marrone as chief executive officer of IFI for the period January 1 – February 28, 2009; € 601 thousand represents the figurative cost of the EXOR stock options granted to the chief executive officer; € 141 thousand refers to the rent of his residence, € 1,218 thousand represents the special emolument paid to the chief executive officer.
d) Compensation waived of corporate boards (€ 83 thousand), performance of services (€ 156 thousand), emoluments for posts on corporate boards (€ 104 thousand).
e) Purchases of goods and services by the subsidiary Exor Services S.c.p.a. for € 3,303 thousand relate to the lease of the offices of the headquarters in Corso Matteotti 26 and computer, telephone and logistics services.
f) Consulting services rendered to the Company by the director Franzo Grande Stevens who, during 2009, also rendered professional services to Fiat S.p.A. for € 1 million (also in respect of his position as secretary to the board of directors).
g) A liability of € 12,233 thousand is reported in other payables in respect of the beneficiaries of the Alpitour stock option plans approved at the end of 2005. The EXOR board of directors' meeting held on May 13, 2009 extended the option exercise period to January 2013 following the reconfirmation of the two managers for another three years. The increase in the payable compared to the prior year (€ 4,158 thousand) is reported in non-recurring other expenses from related parties.

At December 31, 2009, Mr Tiberto Brandolini d'Adda holds 304,153 options to subscribe or purchase the same number of Sequana shares between May 2009 and May 2013 at a price per share of € 20.46; moreover, Sequana has allocated 12,340 free shares to Mr Tiberto Brandolini d'Adda, which will available from March 30, 2010.
In 2009, Sequana paid Mr Tiberto Brandolini d'Adda, chairman of the board of directors of the Company, a fee of € 297 thousand.

43. Guarantees, commitments and pending litigation

As concerns the proceedings relative to the contents of the press releases issued by IFIL and Giovanni Agnelli e C. on August 24, 2005, the Court of Cassation rejected the appeals; therefore, the ruling by the Court of Appeals of Turin which had reduced the sanctions has been upheld.
As for the penal proceedings before the Turin Court, the final discussion is coming to a close and the conclusion with a ruling is scheduled for April 22, 2010.

Further information is provided in the Notes to the consolidated financial statements.

44. Fees paid to the audit firm (art. 149 – *duodecies* of Consob Regulation 11971 dated May 14, 1999 and subsequent amendments)

The professional services rendered to the EXOR Group by the audit firm in 2009 are the following:

€ in thousands	Party which rendered the service	Parent EXOR S.p.A.	Consolidated subsidiaries	**Total**
Type of services				
Audit	Deloitte & Touche S.p.A.	90	396	**486**
	Deloitte network		3,835	**3,835**

- with related parties	**28,163**	(199,456)	227,619
- with third parties	**(440,237)**	(170,432)	(269,805)

46. Approval of the separate financial statements and authorization for publication

The separate financial statements at December 31, 2009 were approved by the board of directors on March 29, 2010 which authorized their publication starting from March 31, 2010.

Turin, March 29, 2010

On behalf of the Board of Directors
The Chairman
John Elkann

Attestation of the Separate Financial Statements According to art. 154-bis, Paragraph 5, of Legislative Decree 58/98

We, the undersigned, Carlo Barel di Sant'Albano, chief executive officer, and Aldo Mazzia, manager responsible for the preparation of the financial reports of EXOR S.p.A. attest, pursuant to the provisions of art. 154-bis, paragraphs 3 and 4, of Legislative Decree 58 dated February 24, 1998:

- the adequacy with respect to the Company's structure and
- the effective application

of the administrative and accounting procedures applied in the preparation of the separate financial statements at December 31, 2009.

We also attest that:

- the separate financial statements:
    - have been prepared in accordance with applicable International Financial Reporting Standards recognized by the European Community pursuant to EC Regulation 1606/2002 of the European Parliament and Council, dated July 19, 2002;
    - correspond to the amounts shown in the accounts, books and records;
    - provide a fair and correct representation of the financial conditions, results of operations and cash flows of the issuer;
- the Report on Operations includes a reliable operating and financial review of the issuer, as well as a description of the principal risks and uncertainties to which it is exposed.

Turin, March 29, 2010

Chief Executive Officer Carlo Barel di Sant'Albano	Manager responsible for the preparation of the financial reports Aldo Mazzia

REPORT OF THE INDEPENDENT AUDITORS ON THE FINANCIAL STATEMENTS PURSUANT TO ART. 156 OF LEGISLATIVE DECREE No. 58 OF FEBRUARY 24, 1998

To the Shareholders of
EXOR S.p.A.

1. We have audited the financial statements of EXOR S.p.A. as of and for the year ended December 31, 2009, which comprise the statement of financial position, the income statement, the statements of comprehensive income, changes in equity and cash flows and the related notes to the financial statements. These financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005 are the responsibility of the Directors of EXOR S.p.A. Our responsibility is to express an opinion on these financial statements based on our audit.

2. We conducted our audit in accordance with the Auditing Standards recommended by CONSOB, the Italian Commission for listed Companies and the Stock Exchange. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the prior year's financial statements, whose data presented for comparative purposes have been reclassified to take account of the change in presentation of financial statements introduced by IAS 1, reference should be made to our auditors' report issued on March 30, 2009. In order to improve the comparative analysis, as explained in the paragraph "Formats of the separate financial statements and other information", the Directors have prepared the comparative 2008 pro-forma figures which retroactively present the effects of the merger by incorporation of IFIL. The procedures of pro-forma figures preparation and related disclosures included in the notes to financial statements have been audited by us for the purpose of expressing our opinion on the financial statements as of December 31, 2009.

3. In our opinion, the financial statements of EXOR S.p.A. as of December 31, 2009 comply with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005; accordingly, they give true and fair view of the financial position of EXOR S.p.A. and the results of its operations and its cash flows for the year then ended.

4. The Directors of EXOR S.p.A. are responsible for the preparation of the report on operations and the annual report on Corporate Governance in accordance with the applicable laws and regulations. Our responsibility is to express an opinion on the consistency of the report on operations and of the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998, paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) in the annual report on Corporate Governance, with the financial statements, as required by law. For this purpose, we have performed the procedures required under Auditing Standard n. 001 issued by the Italian Accounting Profession (CNDCEC) and recommended by CONSOB. In our opinion, the report on operations and the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998 paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) included in the annual report on Corporate Governance are consistent with the financial statements of EXOR S.p.A. as of 31 December, 2009.

DELOITTE & TOUCHE S.p.A.

Note	**27**	**27**			**27**	**27**	**27**	**27**	**27**		**27**	

(a) The EXOR capital stock increase to service the exchange of the shares of the merged company IFIL was recognized at the fair value of the 73,809,496 ordinary shares and 9,168,894 savings shares issued, equal to € 5.36 and € 3.86, respectively, corresponding to the opening stock market prices on March 2, 2009, the first day of market trading of these shares. Of the total of € 431 million, € 83 million was allocated to capital stock, corresponding to the par value, and € 348 million to additional paid-in capital.

(b) Non-controlling interests at December 31, 2008 had amounted to € 1,810 million, of which € 1,706 million represented the non-controlling interests of the IFIL Group. The difference of € 1,275 million between that amount and the fair value of the EXOR capital increase described above (€ 431 million) was allocated to owners of the Parent and then entries were made to eliminate the share of the reserves regarding cash flow hedges (-€ 1 million), exchange differences on translating foreign operations (-€ 10 million), changes in fair value of available-for-sale financial assets (+€ 102 million) and the share of comprehensive income of the investments accounted for using the equity method (-€ 80 million) previously recorded in the consolidated financial statements of the IFIL Group.

The reconciliation between cash and cash equivalents in the statement of cash flows and the corresponding line items in the statement of financial position is presented in Note 25.

EXOR GROUP – NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. General information on the activities of the Group

EXOR S.p.A. is the new name that IFI S.p.A. assumed on March 1, 2009, the effective date of the deed of merger by incorporation of the subsidiary IFIL S.p.A. (the Merger).

EXOR S.p.A. is a corporation organized under the laws of the Republic of Italy; its head office is located in Turin, Italy, Corso Matteotti 26. EXOR is one of Europe's leading investment companies and is controlled by Giovanni Agnelli e C. S.a.p.az. which holds 51.08% of capital stock, specifically 59.11% of ordinary capital stock, 39.24% of preferred capital stock and 11.75% of savings capital stock.
Since March 2, 2009, EXOR's three classes of stock (ordinary, preferred and savings) are traded on the Electronic Share Market under the stock symbol EXOR.

Further information is provided in the Report on Operations under "EXOR Group Profile".

2. Accounting policies used in the preparation of the consolidated financial statements

The 2009 consolidated financial statements have been prepared under the historical cost convention, adjusted as required for the measurement of certain financial instruments, and under the going concern assumption. The Group companies, in fact, have assessed that, despite operating in a difficult economic and financial environment, no material uncertainties exist (as defined in paragraph 25 of IAS 1) about its ability to continue as a going concern.

The 2009 consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and adopted by the European Union, and with the provisions implementing art. 9 of Legislative Decree 38/2005. The designation IFRS also includes all valid International Accounting Standards (IAS), as well as all interpretations of the International Financial Reporting Interpretations Committee (IFRIC), formerly the Standing Interpretations Committee (SIC).

The consolidated financial statements have also been drawn up in accordance with the provisions contained in Consob Resolutions 15519 and 15520 and in Consob Communication 6064293 dated July 28, 2006, pursuant to art. 9, paragraph 3, of Legislative Decree 38 dated February 28, 2005.

The consolidated financial statements of the EXOR Group are expressed in millions of Euro.

3. Formats of the consolidated financial statements

The consolidated income statement is presented by nature of expense which is considered more representative than the presentation based on the function of expenses used by the operating companies consolidated line-by-line.

The consolidated statement of financial position makes a distinction between current and non-current assets, in accordance with IAS 1.

The consolidated statement of changes in equity has been modified according to the new version of IAS 1 (revised in 2007) and specifically presents owner changes in equity and in separate columns the individual income and expense items recognized directly in equity.

The statement of comprehensive income is presented separately.

The consolidated statement of cash flows is presented using the indirect method. Income and expenses for the year are adjusted by the effects of non-monetary transactions, by past or future deferrals or accruals of operating collections or payments and by financial elements due to investment or financing activities.

The Euro is the functional currency and presentation currency of the Group.

4. Unusual and/or atypical transactions and significant non-recurring events and transactions and related party transactions

Pursuant to Consob Communication 6064293 dated July 28, 2006, during 2009, there have been no unusual and/or atypical transactions or significant non-recurring events and transactions, also on the basis of information received from the companies of the Group, which are required to be disclosed as defined by that Communication.

Minor non-recurring transactions are disclosed in Note 14.

The statement of financial position and income statement balances originating from transactions with related parties are summarized and commented in Note 38.

5. Significant accounting policies

Consolidation

The companies in which the Group has the power to exercise control, directly or indirectly, by determining the financial and operating policies of an enterprise so as to gain benefits from its activities are consolidated line-by-line, attributing to the non-controlling interests the share of equity and the net result.

The financial statements of subsidiaries as defined above are included in the consolidated financial statements from the date that control by the Group commences until the date that control ceases.

Pending possible amendments to IAS 27 proposed in the Exposure Draft ED 10 "Consolidated Financial Statements", that should definitively clarify the criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, the EXOR Group has continued to exclude the Fiat Group, in which it has a 30.45% holding of ordinary capital stock, from line-by-line consolidation consistently with the method followed for the first-time adoption of IFRS and the preparation of the consolidated financial statements at December 31, 2005 and thereafter.
However, in order to provide more meaningful disclosure, Note 41 presents pro-forma consolidated data as if the Fiat Group had been consolidated line-by-line.

The investment in the Fiat Group, the companies controlled and excluded from consolidation, the joint ventures, the associates and the other investments are accounted for according to the criteria indicated in "Investments in unconsolidated companies".

The results of discontinued operations or assets held for sale which meet the specific requirements of IFRS 5 are shown separately and correspond to the results achieved up to the time of disposal, after taxes and other direct attributable costs, as well as the gains (losses) on their sale.

The share of the equity and the results of operations attributable to the non-controlling interests are disclosed separately. The non-controlling interests in equity are determined on the basis of the fair value attributed to the assets and liabilities at the date of the acquisition of control, excluding any goodwill referring to them.

When losses in a consolidated subsidiary pertaining to the non-controlling interests exceed the non-controlling interests in the subsidiary's capital stock, the excess is charged to the Group, unless the non-controlling interests are expressly committed to reimbursing the losses, in which case the excess is recorded as an asset in the consolidated financial statements. If no such commitment is in place, should profits be realized in the future, the non-controlling interests' share of those profits will be attributed to the Group, up to the amount necessary to recover the losses previously absorbed by the Group.

The effects of subscribing to capital stock increases when there are different issue prices for the various classes of stock, and also increases and decreases of the non-controlling interests in subsidiaries, are recognized as changes in equity.

Date of reference: investments are consolidated using the financial statements at December 31, the closing date of the Parent, which covers a 12-month period, or accounting data prepared as of the same date (when the closing date differs from that of the Parent), adjusted, where necessary, to conform with the accounting principles of the Group. The Alpitour Group, which fiscal year ends on October 31 of each year, is consolidated line-by-line on the basis of the consolidated financial statements ended on that date, since it is impossible to obtain the consolidated accounting data at December 31, on a timely basis without disproportionate expense. Between November 1 and December 31, 2008 and 2009, there were no significant transactions or events which would have required adjustments to the consolidated financial statements of the Alpitour Group. This treatment is allowed by IAS 27 – Consolidated and Separate Financial Statements.

Intragroup transactions: intragroup balances and significant transactions and any unrealized gains and losses between companies consolidated line-by-line are eliminated. Unrealized gains and losses arising from transactions with companies accounted for by the equity method are eliminated to the extent of the Group's interest in those companies. Intragroup losses are not eliminated if they are considered representative of an effective lower value of the asset sold.

Business combinations

Acquisitions of companies and business segments are recorded using the purchase method of accounting. The cost of an acquisition is measured as the sum of the fair value (at the acquisition date) of the assets given (consideration paid), liabilities incurred or assumed and any equity instruments issued by the Group in exchange for the acquisition of the control of the acquired company, plus each cost directly attributable to the acquisition. The identifiable assets, liabilities and contingent liabilities of the company acquired, which meet the conditions for recognition under IFRS 3, are recognized at their fair value at the acquisition date, except for non-current assets (or groups of assets held for sale) which are classified as held for sale, in accordance with IFRS 5, and are recognized and measured at fair value net of selling costs.

Goodwill originating on acquisition is recognized in assets and recorded initially at cost, measured as the excess of the cost of acquisition over the Group's interest in the fair value of the recognized identifiable assets, liabilities and contingent liabilities. If this interest exceeds the cost of acquisition, the values are re-examined and if there is still an excess, it is recognized immediately in the income statement.

The share of non-controlling interests in the company acquired is recognized initially at the fair value of the assets, liabilities and contingent liabilities recognized.

Investments in unconsolidated companies

The investments in the Fiat Group and in associates (principally Sequana) are accounted for by the equity method in the attached consolidated financial statements. Under this method, such investments are stated at cost, increased or decreased by the Group's share of the changes of the post-acquisition movements in the net assets of the company and any impairment of the investment. When the Group's share of any losses in the unconsolidated companies exceeds its interest, the Group only recognizes the losses if it has assumed legal or constructive obligations or has made payments on behalf of these companies.

Any excess of the cost of acquisition over the Group's interest in the fair value of the assets, liabilities and contingent liabilities of the investees recorded at the date of acquisition is recognized as goodwill. Goodwill is included in the carrying amount of the investment and is tested for impairment in accordance with IAS 36.

Intangible assets

Goodwill: in the case of acquisitions of businesses, the acquired identifiable assets, liabilities and contingent liabilities are recorded at fair value at the date of acquisition.
The excess of the cost of acquisition over the Group's interest in the fair value of those assets and liabilities is classified in the assets in the statement of financial position. Goodwill relating to the non-controlling interests of subsidiaries acquired is eliminated. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized in the income statement at the date of acquisition.

On disposal of a part or the whole of a business which was previously acquired and which gave rise to the recognition of goodwill, the residual amount of the related goodwill is included in the determination of the gain or loss on disposal.
In the context of IFRS first-time adoption, the Group elected not to apply IFRS 3 – Business Combinations retrospectively to the acquisitions of businesses that occurred before January 1, 2004; as a consequence, goodwill arising on acquisitions before the date of transition to IFRS has been retained at the previous Italian GAAP amounts, subject to being tested for impairment at that date.

Other intangible assets: purchased or internally-generated are recognized as assets in accordance with IAS 38 – Intangible Assets when they are controlled by the enterprise, where it is probable that the use of the asset will generate future economic benefits and where the costs of the asset can be determined reliably.
Such assets are measured at purchase or manufacturing cost and amortized systematically on a straight-line basis over their estimated useful lives, if these assets have finite useful lives, taking into account estimated realizable value and writedowns for impairment losses. Intangible assets with indefinite useful lives and those not yet in production are not amortized, but tested for impairment annually and more frequently, whenever there is an indication that the asset may be impaired. When, subsequently, there is an indication that an impairment loss may no longer exist or may have decreased, the carrying amount of the asset is increased up to the new estimated recoverable amount which cannot exceed the amount which would have been determined had no impairment loss been recognized. The reversal of an impairment loss is recognized immediately in the income statement.

Intangible assets with a finite useful life are amortized from the time they are ready for use on a straight-line basis over the estimated useful life.

Other intangible assets recognized following the acquisition of an enterprise are capitalized separately from goodwill if they meet the definition of intangible asset and if their fair value can be measured reliably. The costs of such intangible assets are represented by their fair value at the date of acquisition.

Amortization plans and any realizable value are reviewed at least annually.

Players' registration rights: are intangible assets with a finite useful life equal to the duration of the players' contracts signed with the players. The players' registration rights are recorded at cost discounted to present value, including any incidental expenses.

Players' registration rights are amortized on a straight-line basis over the term of the contracts between the company and each individual player. The original amortization plan can be extended following the early renewal of the contract, starting from the same season in which the contract is renewed. For youth players registered as “giovani di serie”, amortization is taken over five years on a straight-line basis.

Players' registration rights are recognized on the date affixed by the National Professional League giving execution to the contracts for national transfers and the transfer date indicated by the Italian Soccer Federation for international transfers.

Players' registration rights also include sharing receivables and payables ex. art 102-bis of the N.O.I.F (Internal Organizational Rules issued by the Italian Soccer Federation – F.I.G.C.)”.

Player sharing receivables represent the value of the simultaneous repurchase of 50% of the registration rights of the players sold. They are recognized at the adjusted cost and are not amortized as they are used by other companies. Player sharing receivables are written down when the estimated remaining useful life at the end of the sharing period is permanently below the amount recognized. Adjusted cost is the lower of the cost incurred originally under the legal form of agreement between the parties and the actual repurchase value.

Player sharing payables represent the value of the sale of 50% of the registration rights of the players sold. They are recognized at nominal value as a deduction from the value of the registration rights of the player sold to show the actual purchase value. As a result, the amortization of the players' registration rights sold relating to the player sharing agreement is calculated on that lower cost.

When there are indications of an impairment in the players' registration rights (for example, serious injury or significant losses from disposals made subsequent to the reporting date) an impairment loss is recorded for the remaining carrying amount.

Property, plant and equipment

Property, plant and equipment are stated at purchase or production cost less accumulated depreciation and impairment losses, if any.

Purchase cost includes all directly attributable costs necessary to make the asset ready for use. When there are current obligations for decommissioning, the carrying amount includes the estimated costs (discounted to present value) to be incurred when the productive structure is decommissioned which is recognized with a corresponding entry to a specific provision account.

Any capital investment grants are recorded in the statement of financial position in liabilities and subsequently allocated systematically to the income statement in relation to the relative depreciation of the assets.

Borrowing costs associated with investments are, since January 1, 2009, capitalized and amortized over the useful life of the assets to which they refer.

Assets acquired under finance leases are recognized in property, plant and equipment with a corresponding entry to financial payables to lessors and depreciated on the basis indicated below. Whenever there is reasonable certainty that the asset will not be purchased at the end of lease, depreciation is taken over the period of the lease, if shorter than the useful life of the asset.
If an asset has significant components with different useful lives, these components are recorded and depreciated separately.

Subsequent purchase costs are capitalized only if they increase the future economic benefits of the assets to which they refer.
Costs for repairs and periodical maintenance are incurred to restore or maintain expected future economic benefits on the basis of the original estimate of the performance of the asset. Such costs are recorded in the income statement when incurred. Therefore, the carrying amount of a tangible asset does not include the periodical costs incurred to maintain an asset in service, such as the costs of labor, consumable materials and small parts to be replaced.

Property, plant and equipment are depreciated systematically using the straight-line method, from the time they are ready for use, over their estimated useful lives and taking into account estimated realizable value. The carrying amounts are periodically tested for impairment.

The estimated useful lives for the main categories of property, plant and equipment are as follows:

Buildings	from 20 to 50 years
Light constructions	5 years
Plant and machinery	from 3 to 10 years
Sports equipment	6 years
Health equipment	8 years
Aircraft maintenance equipment	8 years
Cruise liners	from 10 to 20 years
Aircraft equipment	8 years
Motor vehicles	from 4 to 8 years
Electronic and electrical office machines	from 3 to 6 years
Furniture, fixtures and ordinary office machines	from 4 to 8 years

The depreciation plan and the estimate of realizable value are reviewed annually.

The cost of land is recorded separately and is not depreciated since it has an indefinite life.

Impairment losses

At every end of the reporting period, the Group reviews the carrying amount of its property, plant and equipment and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If there are indications of impairment, the recoverable amount of those assets is estimated to determine the amount of the impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.
Intangible assets with an indefinite life, including goodwill, are tested annually for impairment or whenever there are indications that the assets might be impaired.

The recoverable amount of the asset is the higher of fair value less costs to sell and the value in use. In assessing the value in use, the pre-tax estimated future cash flows are discounted to present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset.

If the recoverable amount of an asset (or a cash-generating unit) is lower than the relative carrying amount, the asset is reduced to the recoverable amount. An impairment loss is recognized in the income statement immediately unless the asset is represented by land or buildings other than investment property recognized at revalued amounts, in which case the loss is recognized in the respective revaluation reserve.

Where an impairment loss for assets other than goodwill subsequently no longer exists, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but not in excess of the carrying amount that would have been recorded had no impairment loss been recognized. A reversal of an impairment loss is recognized in the income statement immediately unless the asset is measured at revalued cost, in which case the reversal is made to the revaluation reserve.

Non-current other financial assets

Financial investments are recognized and reversed on the trade date if the purchase or sale of an investment is made through a contract which terms require the delivery according to the terms established by the reference market and are initially measured at fair value, increased by transaction costs.

Such financial investments are classified in the following categories: available-for-sale investments and securities and other held-to-maturity financial assets.

Available-for-sale investments are measured at fair value which coincides, for listed investments, at the market price on the last day of the reporting period translated, if necessary, at the year-end exchange rate. Unrealized gains and losses are recognized directly in equity, net of the relevant deferred tax effect. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity should be reversed and recognized in the income statement. Given the limited number of available-for-sale investments, such evidence is assessed case by case. The reversal of such impairment losses are subsequently only made through equity. Upon disposal of the asset, the cumulative gains or losses previously recognized in a specific equity reserve are transferred to the income statement.

Available-for-sale securities represented by debt securities, are initially recognized at cost and subsequently measured at fair value. The difference is recognized in equity. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity is reversed and recognized in the income statement. Such impairment losses, when the reasons which gave rise to them no longer exist, are reversed in the income statement but only up to the initial amount.

Held-to-maturity securities are non-derivative assets with fixed or determinable payments and fixed maturities that the Group has the positive intention and ability to hold to maturity.

It is not possible to classify any financial asset as held-to-maturity if, during the course of the current year or during the two preceding years, other than an insignificant amount of held-to-maturity investments has been sold or reclassified before their maturity, except sales or reclassifications that:

a) are so close to maturity or to the call option date of the financial asset that changes in the market rate of interest would not have a significant effect on the fair value of the financial asset;
b) occur after the Group has received substantially all of the financial asset's original principal through ordinary scheduled payments or prepayments;
c) are attributable to an isolated event that is beyond the Group's control, is non-recurring and could not have been reasonably anticipated by the Group.

The amortized cost of a financial asset is the amount at which the financial asset was initially measured net of repayments of principal, decreased by the total amortization of any difference between the initial amount and the maturity amount using the effective interest method, less any writedown (made directly or through the use of an accrual) for impairment or uncollectibility.

The effective interest rate is a method for calculating the amortized cost of a financial asset and allocating the interest over the period of reference. The effective interest rate is the rate that exactly discounts future cash flows for estimated collections (including transaction costs paid) over the expected life of the financial instrument or, if appropriate, over a shorter period.

Bonds with mandatory conversion into stock are recognized by separating the bond component from the embedded derivative represented by the obligation to convert the bonds into the stock of the issuer at an established maturity date.

At initial recognition, the component represented by the bond is calculated by discounting the cash flows of the instrument to present value using the market rate of a non-convertible bond, recording the embedded derivative as the difference from the price paid.

Subsequently, the bond component is measured at amortized cost whereas the embedded derivative is measured at fair value with a corresponding entry to the income statement.

Current financial assets

Current financial assets include equity shares, credit instruments and other forms of investment of liquidity, as well as derivative instruments for trading.

Financial assets purchased originally for resale in the short-term are measured at year end at fair value using, for listed securities, the market price translated, if necessary, at the year-end exchange rate. The fair value adjustment of current financial assets is recorded with a corresponding entry to the income statement.

Cash and cash equivalents

Cash and cash equivalents represent highly liquid short-term financial investments which can be readily converted into cash and are subject to an insignificant risk of a change in their value.

Inventories

Inventories are stated at the lower of purchase or production cost and estimated realizable value determined using the weighted average cost method or FIFO (First In, First Out).

Inventories of finished and semifinished goods include direct costs of materials and labor and indirect variable and fixed overheads, excluding general and administrative expenses. The market value takes into account writedowns for inventory obsolescence.

Assets held for sale

Assets, or a group of assets and liabilities (that must not be offset), which are highly probable of being sold within the next year and are available for immediate sale in their current condition, are classified on specific lines in the statement of financial position. If they represent significant sectors of activities, the relative results are shown separately in the income statement. In order to meet this condition, management must be committed to a plan to sell, which is highly probable of taking place within one year of classification in this category. The disclosure relating to the results of such assets, is shown separately also for the prior period.

Such assets are stated at the lower of the net carrying amount and fair value less costs to sell. Any impairment loss that arises should be recorded in the income statement and, eventually, is reversed subsequently if the reasons for the impairment no longer exist, but only up to the initial amount. From the time the asset is recognized as an asset held for sale, amortization and depreciation cease. Financial expenses and expenses attributable to the liabilities of a disposal group classified as held for sale should continue to be recognized.

When the conditions which led to the recognition of an asset as held for sale no longer exist, it should be reclassified to non-current assets and stated at the lower of the carrying amount before being designated as held for sale and its recoverable amount at the date of the subsequent decision not to sell the asset; the difference is recognized in the income statement.

Receivables and payables

Receivables are initially recognized at their nominal amount which substantially coincides with fair value.

If there is objective evidence of an impairment loss or a risk that the Group will not be able to collect the contractual amount (principal and interest) at the contractually agreed dates, a provision is set aside which corresponds to the difference between the asset's carrying amount and the present value of estimated recoverable future cash flows, discounted at the effective interest rate.

Payables are initially recognized at their nominal amount, reduced by expenses incurred to assume them and increased by interest expense due, if any. Payables are subsequently measured at amortized cost using the effective interest method.

Receivables sold with recourse remain in the statement of financial position of the assignor which records a payable to the buyer against collection and the financial expense to be incurred. Receivables sold without recourse are only derecognized if it can be demonstrated that the risks and rewards relating to the asset have been effectively transferred to the assignee.

Consequently, all receivables sold which do not meet IAS 39 derecognition requirements remain in the Group financial statements even though they have been legally sold. A corresponding financial liability is recorded in the consolidated statement of financial position under debt. Gains and losses relating to the sale of such assets are not recognized until the assets are removed from the Group statement of financial position.

Debt

Interest-bearing debt is recognized at cost which corresponds to the fair value of the amount received net of directly attributable costs. Debt is subsequently measured at amortized cost. The difference between amortized cost and the amount to be repaid is recognized in the income statement on the basis of the effective interest rate over the period of the loan.

Debt is classified in current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

Derivative financial instruments and hedge relationships

Derivative financial instruments are recognized initially at fair value at the date the contracts are entered into and are subsequently measured at the fair value at year-end. The resulting gains or losses are recognized in the income statement immediately, unless the derivative is designated and is effective as a hedging instrument, in which case the times for recognition in the income statement depend upon the nature of the hedge relationship. The Group designates certain derivatives as fair value hedges of certain assets or liabilities recognized in the financial statements or as cash flow hedges of certain highly probable forecast transactions.

A derivative is classified as a non-current asset or liability if the maturity date of the instrument is beyond 12 months and it is not expected to be realized or settled within 12 months. Other derivatives are classified as current assets or liabilities.

Financial instruments qualify for hedge accounting only when there is formal designation and documentation, including the company's risk management objective and strategy, and the hedge, verified periodically, is highly effective.

When financial instruments qualify for hedge accounting, the following accounting treatment applies:

- Fair value hedge: where a derivative financial instrument is designated as a hedge of the exposure to changes in fair value of a recognized asset or liability that is attributable to a particular risk and could affect the income statement, the gain or loss from re-measuring the hedging instrument at fair value is recognized in the income statement, together with the change in fair value of the hedged item. The gain or loss from the change in fair value of the hedging instrument is recognized on the same line of the income statement as the hedged item.

- Cash flow hedge: where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows of a recognized asset or liability or a highly probable forecast transaction and could affect profit and loss, the effective portion of any gain or loss of the derivative financial instrument is recognized directly in equity. The cumulative gain or loss is removed from equity and recognized in the income statement at the same time in which the hedged transaction affects the income statement. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in equity and is recognized in the income statement at the same time the related transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in equity is recognized in the income statement immediately.

If the conditions of IAS 39 are not met, the transactions, even if they have been set up for the purpose of managing risk exposure, are classified and measured as trading transactions. In that case, the difference from fair value is recognized in the income statement.

Employee benefits – Pension plans

The companies of the Group offer their employees various forms of pension plans with specific characteristics that vary according to the law, the regulations and the practices in the countries in which they operate.

Pension plans are currently either defined contribution or defined benefit plans.

Under defined contribution plans, contributions are paid to outside, legally separate entities with administrative autonomy, which free the employer from any subsequent obligation as the outside entity assumes the commitment to pay what is due to the employee.
Consequently, the Group companies record the contribution paid as an expense and no additional obligation is recognized.

Defined benefit plans include post-employment benefits, other than those under defined contribution plans. Under defined benefit plans, the Group companies have the obligation to set aside the costs relating to the benefits guaranteed to their employees in service and pay retired employees. The actuarial risk and the investment risk are thus substantially borne by the companies of the Group.

Defined benefit plans, which, for the Italian companies, include employee severance indemnities accrued to December 31, 2006, are measured by actuarial techniques using the Project Unit Credit Method.

As provided by the amendment to IAS 19 – Employee Benefits, issued by the IASB in December 2004, the Group elected to recognize actuarial gains and losses immediately in the period in which they arise, outside the income statement, in a statement of comprehensive income.

All cumulative actuarial gains and losses that existed at January 1, 2004 have been recognized in equity.

For defined benefit plans without plan assets, the expenses relating to the increase in the present value of the obligation, due to the fact that the payment date of the benefits is nearing, are recognized in financial expenses.
Payments relative to defined contribution plans are recognized as an expense in the income statement as incurred.

The liability for defined benefit plans is calculated on an individual basis and takes into account life expectancy, personnel turnover, salary changes, revaluation of the yields, inflation and the present value of the amounts to be paid. The specific assumptions of each plan take into account the local economic conditions.
Defined benefit plans are in some cases covered by financial assets managed outside the Group companies. In those cases, the amount recognized in the financial statements for such liabilities corresponds to the difference between the present value of future services (actuarial liability) and the market value of the assets invested that are intended to cover the liability, increased by losses or decreased by unrecognized (or not yet recorded) gains and, in any case, taking into account the surplus cap limit for assets established by paragraph 58 of IAS 19. When the result of this calculation shows a net obligation it is recognized in a provision under liabilities; in the reverse case, an asset is recognized.

The scheme for the employee severance indemnities of the Italian companies was considered a defined benefit plan up to December 31, 2006. The regulations for the employee severance indemnities scheme was modified by Law 296 dated December 27, 2006 (Budget Law 2007), and subsequent decrees and regulations issued in the early months of 2007. In view of these changes and particularly with reference to companies with at least 50 employees, the employee severance indemnities scheme is now considered a defined benefit plan only for amounts accrued prior to January 1, 2007 (and not yet paid at the end of the reporting period) whereas after that date it is considered a defined contribution plan. For Italian companies with less than 50 employees, the employee severance indemnities scheme remains a post-employment benefit under a defined benefit plan. The amount already accrued must be projected to estimate the amount payable upon termination of employment and subsequently discounted to present value using the Projected Unit Credit Method. This actuarial method is based upon demographic and financial assumptions in order to arrive at a reasonable estimate of the amount of benefits which had already been accrued for each employee based on his/her service life.
Using the actuarial calculation, a charge is made to the income statement to “Personnel costs” for the current service cost which defines the amount of rights accrued during the year by the employee and to “Financial income (expenses)” for the interest cost which constitutes the figurative expense which the company would have incurred by securing a loan on the market equal to the amount of employee severance indemnities.

Employee benefits – Stock option plans

Stock-based payments to employees are measured at the fair value of the equity instruments at the grant date. In accordance with IFRS 2 – Share-based Payment, the full amount of the fair value of stock options at the grant date is recognized in the income statement in personnel costs on a straight-line basis over the period from the grant date to the vesting date with a corresponding entry directly in equity, based upon an estimate of the number of options that is expected to vest. Changes in fair value after the grant date have no effect on the initial measurement.

In accordance with IFRS 2, this standard is applied to stock options granted after November 7, 2002 and not yet vested at the effective date of IFRS 2 (January 1, 2005).

In the event the plans require a monetary payment equal to the increase in the value of shares of the enterprise, the fair value of the liability of the plan is re-measured at each reporting date until its extinction and the cost is recognized in the income statement.

Provisions for other liabilities and charges

Provisions for other liabilities and charges refer to costs and expenses of a determinate nature which are certain or likely to be incurred but, at the end of the reporting period, are uncertain as to the amount or as to the date on which they will arise. Accruals are recorded when there is an obligation, legal or constructive, resulting from a past event, when it is probable that the use of resources will be required to satisfy the obligation and when a reliable estimate of the amount of the obligation can be made.

The amount recognized in the financial statements as the provision for other liabilities and charges expresses the best estimate of the monetary resources necessary to extinguish the current obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When the accrual is determined by using estimated cash flows to extinguish the obligation, the carrying amount is represented by the discounted present value of those cash flows.

Changes in estimates are recorded in the income statement in the period in which the change occurs.

The accruals mainly refer to restructuring expenses. An accrual for restructuring operations is booked on condition that a detailed and formal restructuring plan has been approved and that the restructuring has begun or the details of the restructuring plan have been made public and that valid expectations of it have been raised.

Treasury stock

The cost of any treasury stock purchased and/or held, also through subsidiaries, as a result of specific stockholder resolutions are recognized as a deduction from equity. Therefore, the reserve offsetting treasury stock in portfolio is not shown separately. The proceeds from any subsequent sale are recognized as movements in equity.

Income taxes

Current income taxes are calculated according to the tax laws in force in the countries in which the companies of the Group operate on the basis of the taxable income for the year. Taxable income is different from the income expressed in the consolidated financial statements in that it excludes costs and revenues that become taxable or deductible in other years and also excludes items which are never taxable or deductible.

Taxable temporary differences between the amounts of assets and liabilities in the financial statements and the corresponding amounts for tax purposes are recorded in deferred tax liabilities. Deferred tax assets relating to the carryforward of unused tax losses, as well as those arising from deductible temporary differences, are recognized to the extent that it is probable that future profits will be available against which they can be utilized.

Deferred tax assets and liabilities are measured at the tax rates expected to apply to taxable income in the periods in which temporary differences will reverse. Deferred income tax assets and liabilities are offset where there is a legally enforceable right of offset.

Deferred tax assets and liabilities are shown separately from other receivables and tax payables in a specific line item under non-current assets or liabilities.

Current and deferred income taxes are recognized in the income statement except for those relating to items debited or credited directly in equity which are recognized directly in equity. With regard to business combinations, the tax effect is taken into consideration in determining the excess of the cost of acquisition over the fair value of the assets, liabilities and contingent liabilities, while no tax effect is attributed to the residual amount represented by goodwill.

Transactions in foreign currency and consolidation of foreign operations

The financial statements of each Group company are presented in the functional currency of the economic environment in which they operate. For purposes of the consolidated financial statements of the Group, the financial data of these companies is translated into Euro which is the currency of the Parent and the presentation currency of the consolidated financial statements.

In the preparation of the financial statements of the individual companies of the Group, the transactions expressed in currencies other than the functional currency are recorded at the exchange rate in effect at the transaction date. Monetary assets and liabilities denominated in foreign currencies at the end of the reporting period are translated at the foreign exchange rate prevailing at that date. Non-monetary items are measured at historical cost and are not translated. Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements are recognized in the income statement.

For purposes of the presentation of the consolidated financial statements, the assets and liabilities of foreign operations with functional currencies different from the Euro and which are included in the scope of consolidation are translated using the exchange rate in effect at the end of the reporting period (current exchange method). Items in the income statement and cash flows in the statement of cash flows are translated at the average exchange rate for the year. The translation differences resulting from the application of this method are classified in equity until the sale of the investment.
Goodwill and fair value adjustments generated by the acquisition of a foreign entity are recognized in the respective currency and translated at the year-end exchange rates.

Revenue recognition

Revenues are formed mainly by sales of services produced within the major business segments of the Group and are stated net of any adjusting items.
Revenues from services are recognized by reference to the stage of completion of the transaction at the statement of financial position date and measured on the basis of the services rendered.

In particular, revenues are recognized in the principal business segments as follows:

C&W Group

The C&W Group's revenues are categorized into transaction services and non-transaction services. Non-transaction services include primarily capital market services and client solutions (financial advisory, asset management, valuation, corporate real estate services, and research). Fees related to transaction services are recognized as revenue at the time the related services are fully performed and the amount can be measured reliably, unless significant material future contingencies exist, in which case they are recognized when the contingency is resolved.
Asset management fees are recognized as revenue when earned, typically on a monthly basis as services are rendered.
Other revenues for fees related to non-transaction services are recognized when the assignment has been completed. Fees for ongoing professional services are recognized as revenue when earned, which is when services are rendered.
The C&W Group recognizes certain reimbursements (primarily salaries and related charges) mainly related to the facilities and property management operations as revenue when the underlying reimbursable costs are incurred.

Alpitour Group

Sales of tourist packages, airplane transportation services and brokering revenues are recognized based on the departure date.

Revenues for hotel services and services rendered in connection with the incoming sector are recognized in the income statement at the service performance date.

Premiums connected with reinsurance activities are recognized in the income statement on the client's departure date since the insurance coverage is strictly related to the travel package.

Juventus Football Club

Revenues from games, from radio and television rights and media income are recognized at the actual moment of the event (when the game is played). Revenues from season tickets are recognized when the tickets are paid even if payment is received at the end of the season preceding the season to which the tickets refer and are deferred on the accrual basis using the same principle (when the game is played).

Revenues from the performance of services (including sponsorships) are recognized on the basis of the stage of completion of the service or upon completion of the service.

Revenues are recorded net of returns, discounts and allowances.

Gains and losses from the sale of players' registration rights are recognized according the date affixed by the National Professional League giving execution to the contracts for national transfers and the transfer date indicated by the Italian Soccer Federation for international transfers.

Gains from the sale of players' registration rights, in which 50% is simultaneously repurchased, are adjusted for 50% of their amount in order to recognize in the income statement the income accrued for the portion of the deferred rights actually transferred through the sale. The remaining amount of the gain, instead, will only be realized upon termination of the player-sharing agreement when the player leaves the company. If there is a loss on the sale of the players' right which precedes the signing of the player-sharing contract, this loss, on the contrary, is not adjusted for IFRS purposes. This is due to the fact that the loss is comparable to the effect of an impairment test of the deferred right, under the assumption that the moment in time in which the right is disposed of represents the moment in which that loss arose.

EXOR Holdings System

Financial income is recognized according to the accrual principle on the basis of the effective rate of return.

Dividends from investments accounted for at cost, from available-for-sale investments and from investments held for trading are recognized in the income statement upon approval of the appropriation.

Commission expenses

Commissions payable to brokers are recorded at the time C&W Group recognizes its brokerage commission revenues and are generally not paid until after the collection of the related commissions receivable.

Non-recurring other income (expenses)

Non-recurring other income (expenses) includes the gains and/or the losses on the disposal of non-current assets other than discontinued operations or assets held for sale (the results of the latter are included in “Profit (loss) from discontinued operations or assets held for sale”). They may also include impairment losses on assets, restructuring costs, accruals and utilizations of provisions for liabilities.

Earnings per share

Basic earnings per share is calculated by dividing the profit attributable to owners of the Parent by the weighted average number of shares outstanding during the year, excluding treasury stock. Diluted earnings per share is calculated by adjusting the weighted average number of shares outstanding to assume conversion of all dilutive potential shares. The profit attributable to owners of the Parent is also adjusted to take into account the effects, net of taxes, of the conversion.
Basic and diluted earnings per share is calculated on the result from continuing operations and the result from discontinued operations or assets held for sale.

Segment information

Given the nature of the investments, the segment information coincides with the consolidated data of each operating subsidiary and associate holding company, each of which represents an investment in a primary reportable segment.

6. Principal sources of uncertainty in making financial statement estimates

The preparation of financial statements and related disclosures that conforms to IFRS requires estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. The estimates and assumptions are based on experience and other factors that are considered to be relevant. Actual results could differ from those estimates. Estimates and assumptions are reviewed periodically and the effects of any changes are recognized in the income statement in the period in which the estimate is revised if the revision only affects that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The situation caused by the present economic and financial crisis has required assumptions to be made regarding future performance which are characterized by significant uncertainty; as a consequence, therefore, it cannot be excluded that results may arise during the next year which differ from estimates, and which therefore might require adjustments, even significant, to be made to the carrying amount of the items in question, which at the present moment can be clearly neither estimated nor predicted.
The following are the critical judgments and the key assumptions concerning the future that have been made in the process of applying the accounting policies and that may have the most significant effect on the amounts recognized in the consolidated financial statements or that have a risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

- the impairment test on goodwill and internally development software of C&W Group which, at December 31, 2009, resulted in impairment charges, respectively, of $61.9 million (€44.4 million) and $14.8 million (€11 million). Further details on impairment testing are provided in Note 19;
- the impairment charge of €3 million on the video archives of Juventus Football Club, carried out on the basis of the commercial exploitation plan and estimated cash and economic flows acquired and expected. Further details are provided in Note 13;
- the impairment test on the investment in Gruppo Banca Leonardo which led to recognition of a negative fair value reserve of €3 million;
- the other listed and unlisted investments accounted for at cost or fair value for which their measurement indicated no evidence of impairment;
- the fair value measurements of the bonds issued by DLMD and the embedded derivative relating to the Perfect Vision convertible bonds which resulted, respectively, in impairment charges for €9 million and €36 million.

Recoverable amount of non-current assets

Non-current assets include property, plant and equipment, intangible assets (including goodwill), investments and other financial assets and deferred tax assets. Each consolidated company periodically reviews the carrying amount of non-current assets held and used and assets that must be disposed of when events and circumstances warrant such a review. This review is performed using estimates of future cash flows from the use or disposal of the asset, as established in company plans, and suitable discount rates in order to calculate present value. If the carrying amount of a non-current asset is considered impaired, the companies of the Group record an impairment loss for the amount by which the carrying amount of the asset exceeds its estimated recoverable amount from use or disposal determined by reference to the Group companies' most recent plans.

Pension plans and other post-employment benefits

Group companies sponsor pension plans and other health care plans in various countries. Management uses several statistical and judgmental factors that attempt to anticipate future events in calculating the expense, the liability and the assets related to these plans. These factors include assumptions about the discount rate, expected return on plan assets, rate of future compensation increases and health care cost trend rates. In addition, the Group companies' actuarial consultants also use subjective factors such as resignations and mortality rates in making relevant estimates.

Contingent liabilities

The actions and claims against the companies of the Group are often the result of difficult and complex factual and legal issues, which are subject to many uncertainties and complexities, including but not limited to the facts and circumstances of each particular action and claim, the jurisdiction and the differences in applicable law. The companies of the Group accrue a liability when it is determined that an adverse outcome is probable and the amount of the loss can be reasonably estimated. In the event an adverse outcome is possible or an estimate is not determinable, the matter is disclosed in the Notes.

7. Adoption of new accounting standards, amendments and interpretations issued by the IASB

Accounting standards, amendments and interpretations to standards applied from January 1, 2009

IAS 1 Revised – Presentation of Financial Statements. The revised version of the standard, applicable from January 1, 2009, requires an entity to present all changes in its equity resulting from transactions with owners in a statement of changes in equity. All non-owner changes (that is, changes in comprehensive income) are required to be presented either in a single statement of comprehensive income showing performance for the period or in two statements (a separate income statement and a statement of comprehensive income). In any event, transactions with non-owners may not be presented in the statement of changes in equity.

The Group has adopted the revised standard retrospectively from January 1, 2009, electing to present all non-owner changes in two statements entitled respectively “consolidated income statement” and “consolidated statement of comprehensive income” and has consequently modified the presentation of its “statement of changes in equity”.

As part of its 2008 annual improvements project, the IASB published an amendment to IAS 1. The amendment, applicable from January 1, 2009, requires an entity to classify derivative financial instruments not held for trading between current and non-current assets and liabilities. The adoption of this amendment did not have any effect on the presentation of items in the financial statements.

IAS 23 Revised – Borrowing Costs. The revised version of the standard removes the option, adopted by the Group until December 31, 2008, of immediately recognizing as an expense borrowing costs that relate to assets that take a substantial period of time to get ready for use or sale. As part of its 2008 annual improvements project the IASB also published an amendment to IAS 23 (Revised) in order to revise the definition of the borrowing costs to be capitalized. In accordance with the transition rules, the Group adopted the revised standard prospectively from January 1, 2009, capitalizing borrowing costs directly attributable to the acquisition, construction or production of qualifying assets for which it incurs expenditures, incurs borrowing costs or undertakes activities that are necessary to prepare the asset for its intended use or sale from January 1, 2009.

Amendment to IFRS 7 – Financial Instruments: Disclosures. The amendment, effective from January 1, 2009, was issued in order to improve the disclosure requirements for fair value measurements and reinforce existing principles for disclosures concerning the liquidity risk associated with financial instruments. In particular, the amendment requires disclosures to be made that are based on a hierarchy of the inputs used in valuation techniques to measure fair value. The adoption of the amendment only affected the disclosures in the notes and had no effect on the recognition and measurement of items in the financial statements.

Amendment to IFRS 1 – First Time Adoption of International Financial Reporting Standards. The amendment allows companies adopting IFRS for the first time from January 1, 2009 and electing to recognize investments in subsidiaries, associates and joint ventures in the separate financial statements at cost, to use one of the following methods:

- cost determined in accordance with IAS 27;
- revalued cost, measured on a fair value basis at the date of transition to IFRS or the carrying amount of the investment at the date of transition measured in accordance with local GAAP.

In addition, the amendment to IAS 27 – Consolidated and Separate Financial Statements requires that all dividends received from subsidiaries, joint ventures and associates be recognized in the parent company's income statement when the right to receive those dividends is established regardless of whether they relate to profit arising before or after the date the interest was acquired. Revisions to IAS 36 – Impairment of Assets require that, when evaluating whether impairment exists, if an investee company has distributed a dividend, the following must be considered:

- whether the carrying amount of the investment in the separate financial statements exceeds the book value of that company's equity (including any associated goodwill) as recognized in the consolidated financial statements;
- whether the dividend exceeds the comprehensive income of the investee for the period to which the dividend relates.

The company adopted the amendment to IAS 27 prospectively from January 1, 2009. However, no accounting effects resulted from its application in the consolidated financial statements since this impacts the separate financial statements.

Amendment to IFRS 2 – Share-based payment: Vesting Conditions and Cancellations. For the purpose of measuring share-based payments, only service conditions and performance conditions may be considered vesting conditions.
The amendment also specifies that all cancellations, whether by the entity or by other parties, should receive the same accounting treatment.

Improvement to IAS 19 – Employee Benefits. This amendment clarifies the definition of positive/negative past service costs and states that in the case of a curtailment, only the effect of the reduction for future service shall be recognized immediately in the income statement, while the effect arising from past service periods shall be considered a negative past service cost. The Board also revised the definition of short-term employee benefits and long-term employee benefits and the definition of a return on plan assets, stating that this amount should be net of any costs for administering the plan (other than those included in the measurement of the defined benefit obligation). The amendment is applicable prospectively to changes in plans occurring on or after January 1, 2009.

Improvement to IAS 28 – Investments in Associates, and IAS 31 – Investments in Joint Ventures. The amendments, applicable from January 1, 2009, require that for investments accounted for by the equity method a recognized impairment loss should not be allocated to the individual assets (and in particular goodwill) that form part of the carrying amount of the investment in the associate, but to the carrying amount of the investment overall. Accordingly any reversal of that impairment loss is recognized in full.
Specific additional disclosures are also required for investments in associates and joint ventures measured at fair value in accordance with IAS 39, correspondingly amending IFRS 7 – Financial Instruments: Disclosures and IAS 32 – Financial Instruments: Presentation.

Amendments and interpretations effective from January 1, 2009 but not applicable to the Group

The following standards and interpretations have also been issued and are effective from January 1, 2009 and relate to matters that were not applicable to the Group at the date of the financial statements:

Amendment to IAS 16 – Property, Plant and Equipment.
Amendment to IAS 32 – Financial Instruments: Presentation and IAS 1 – Presentation of Financial Statements – Puttable Financial Instruments and Obligations Arising on Liquidation.
IAS 20 – Accounting for Government Grants and Disclosure of Government Assistance .
IAS 38 – Intangible Assets
Improvement to IAS 29 – Financial Reporting in Hyperinflationary Economies.
Improvement to IAS 36 – Impairment of Assets.
Improvement to IAS 39 – Financial Instruments: Recognition and Measurement.
Improvement to IAS 40 – Investment Property.
IFRIC 13 – Customer Loyalty Programmes.
IFRIC 15 – Agreements for Construction of Real Estate.
IFRIC 16 – Hedges of a Net Investment in a Foreign Operation.

Accounting standards, amendments and interpretations not yet effective and not early adopted by the Group

On January 10, 2008, the IASB issued a revised version of IFRS 3 – Business Combinations and an amended version of IAS 27 – Consolidated and Separate Financial Statements. The main changes that revised IFRS 3 makes to existing requirements are the elimination of the need to measure every asset and liability at fair value at each stage in a step acquisition of subsidiaries. Goodwill is only to be measured on acquiring control, as the difference at acquisition date between the value of any investment in the business held before the acquisition, the consideration transferred and the net assets acquired. Moreover, for a business combination in which the acquirer achieves control without purchasing all of the acquiree, the remaining (non-controlling) equity interests are measured either at fair value or by using the method already provided previously in IFRS 3. The revised IFRS 3 also requires acquisition-related costs to be recognized as expenses and the acquirer to recognize the obligation to make an additional payment as part of the business combination (contingent consideration).

In the amended version of IAS 27, the IASB has added a requirement specifying that changes in a parent's interest in a subsidiary that do not result in the loss of control must be accounted for as equity transactions and recognized within equity. Moreover, when a parent loses control of a subsidiary but retains an ownership interest it must initially measure any retained investment at fair value. At the date when control is lost, the difference between the fair value and the carrying amount of the retained interest must be recognized in the income statement. Finally, the amendment to IAS 27 requires losses pertaining to non-controlling interests to be allocated to non-controlling interest equity, even if this results in the non-controlling interest having a deficit balance. The new rules will apply prospectively from January 1, 2010.

As part of its 2008 annual improvements project, the IASB issued an amendment to IFRS 5 – Non-Current Assets Held for Sale and Discontinued Operations. This amendment, to be applied prospectively from January 1, 2010, requires an entity that is committed to a sale plan involving loss of control of a subsidiary to classify all the assets and liabilities of that subsidiary as held for sale, regardless of whether the entity will retain a non-controlling interest in its former subsidiary after the sale.

On July 31, 2008, the IASB issued an amendment to IAS 39 – Financial Instruments: Recognition and Measurement. This amendment, to be applied retrospectively from January 1, 2010, clarifies how to apply the standard for what can be designated as a hedged item in particular situations.

In November 2008, the IFRIC also issued interpretation IFRIC 17 – Distributions of Non-cash Assets to Owners. The interpretation clarifies that dividends payable should be measured at the fair value of the net assets to be distributed when it becomes mandatory to recognize the relative liability to the stockholders. Moreover, an entity should recognize the difference between the dividends paid and the carrying amount of the net assets used for payment in the income statement.
The interpretation is effective prospectively from January 1, 2010, for annual periods beginning on or after July 1, 2009.

On January 29, 2009, the IFRIC issued interpretation IFRIC 18 – Transfers of Assets from Customers (applicable from January 1, 2010, for annual periods beginning on or after July 1, 2009). The interpretation clarifies the accounting treatment to be followed for agreements in which an entity receives from a customer an item of property, plant and equipment that the entity must then use either to connect the customer to a network or to provide the customer with ongoing access to a supply of goods or services.

On March 12, 2009, the IASB issued amendments to IFRIC 9 – Reassessment of Embedded Derivatives and to IAS 39 – Financial Instruments: Recognition and Measurement. The amendments allow entities to reclassify certain financial instruments out of the ‘fair value through profit or loss’ category in specific circumstances. The amendments clarify that on the reclassification of a financial asset out of the ‘fair value through profit or loss’ category all embedded derivatives have to be assessed and, if necessary, separately accounted for in the financial statements. The amendments are effective retrospectively from December 31, 2009; at the date of these financial statements, the European Union had yet to complete the endorsement process required for the amendments to be applicable.

On April 16, 2009, the IASB issued a series of amendments to IFRS (Improvements to IFRSs). Details are provided in the following paragraphs of those identified by the IASB as resulting in accounting changes for presentation, recognition and measurement purposes, leaving out any amendments regarding changes in terminology or editorial changes which are likely to have minimal effects on accounting and effects on the separate financial statements and amended standards or interpretations not applicable to the Group.

- IFRS 2 – Share-based Payment. This amendment, applicable from January 1, 2010 (with early application permitted), clarifies that following the change made by IFRS 3 to the definition of a business combination, the contribution of a business on the formation of a joint venture and the combination of entities or businesses under common control do not fall within the scope of IFRS 2.

- IFRS 5 – Non-current Assets held for Sale and Discontinued Operations. This amendment, which shall be applied prospectively from January 1, 2010, clarifies that IFRS 5 and other IFRSs that specifically refer to non-current assets (or disposal groups) classified as held for sale or discontinued operations set out all the disclosures required in respect of those assets or operations.
- IAS 1 – Presentation of Financial Statements. This amendment, applicable from January 1, 2010 (with early application permitted), clarifies that an entity should classify a liability as current if it does not have unconditional right to defer the settlement for at least twelve months after the end of the year, even when there is an option by the counterpart that could require a settlement in the form of equity instruments.
- IAS 7 – Statement of Cash Flows. This amendment, applicable from January 1, 2010, clarifies that only expenditures that result in a recognized asset in the statement of financial position are eligible for classification as investing activities in the statement of cash flows; cash flows originating from expenditures that do not result in a recognized asset (as could be the case for advertising and promotional activities and staff training) must be classified as cash flows from operating activities.

  IAS 17 – Leasing. Following the changes, the general conditions required by IAS 17 for classifying a lease as a finance lease or an operating lease will also be applicable to the leasing of land, independent of whether the lease transfers ownership by the end of the lease term. Before these changes, the standard required the lease to be classified as an operating lease if ownership of the leased land was not transferred at the end of the lease term because land has an indefinite useful life. The amendment is applicable from January 1, 2010. At the date of adoption, the classification of all land elements of unexpired leases must be reassessed, with any lease newly classified as a finance lease to be recognized retrospectively.
- IAS 36 – Impairment of Assets. This amendment, applicable prospectively from January 1, 2010, states that each unit or group of units to which goodwill is allocated for the purpose of impairment testing shall not be larger than an operating segment as defined by paragraph 5 of IFRS 8 – Operating Segments before any aggregation on the basis of similar economic characteristics and other similarities as permitted by paragraph 12 of IFRS 8.
- IAS 38 – Intangible Assets: IFRS 3 (as revised in 2008). This states that if an intangible asset acquired in a business combination is separable or arises from contractual or other legal rights, sufficient information exists to measure its fair value reliably; amendments are made to IAS 38 to reflect that revision of IFRS 3. Moreover, these amendments clarify the valuation techniques commonly used to measure intangible assets at fair value when assets are not traded in an active market; in particular, such techniques include discounting the estimated future net cash flows from an asset, and estimating the costs the entity avoids by owning an intangible asset and not having to license it from another party in an arm’s length transaction or the costs to recreate or replace it (as in the cost approach). The amendment is applicable prospectively from January 1, 2010; if an entity applies the revised IFRS 3 for an earlier period it shall also apply this amendment.
- IAS 39 – Financial Instruments: Recognition and Measurement. This amendment restricts the non-applicability of IAS 39 under paragraph 2(g) of the standard to forward contracts between an acquirer and a selling stockholder to buy or sell an acquiree in a business combination at a future acquisition date when the completion of the business combination is not dependent on further actions of either party and only the passage of a normal period of time is required. Option contracts, whether or not currently exercisable, which allow one party to control the occurrence or non-occurrence of future events and on exercise will result in control of an entity are therefore included in the scope of IAS 39. The amendment also clarifies that embedded prepayment options whose exercise price compensates the lender for the loss of interest income resulting from the prepayment of the loan shall be considered closely related to the host debt contract and therefore not accounted for separately. Finally, the amendment clarifies that the gains or losses on a hedged instrument must be reclassified from equity to profit or loss during the period that the hedged forecast cash flows affect profit or loss.

The amendment is effective prospectively from January 1, 2010; early application is permitted.

- IFRIC 9 – Reassessment of Embedded Derivatives. This amendment is applicable prospectively from January 1, 2010 and excludes from the scope of IFRIC 9 embedded derivatives in contracts acquired in a business combination, a combination of entities or businesses under common control or the formation of a joint venture.

At the date of these financial statements, the European Union had yet to complete the endorsement process required for the improvements to be applicable.

In June 2009, the IASB issued an amendment to IFRS 2 – Share-based Payment: Group Cash-settled Share-based Payment Transactions. The amendment clarifies the scope of IFRS 2 and the interactions of IFRS 2 and other standards. In particular, it clarifies that an entity that receives goods or services in a share-based payment arrangement must account for those goods or services no matter which entity in the group settles the transaction, and no matter whether the transaction is settled in shares or cash; moreover, it clarifies that a 'group' has the same meaning as in IAS 27 - Consolidated and Separate Financial Statements, that is, it includes only a parent and its subsidiaries. In addition, the amendment clarifies that an entity must measure the goods or services it received as either an equity-settled or a cash-settled share-based payment transaction assessed from its own perspective, which may not always be the same as the amount recognized in the consolidated financial statements. The amendment also incorporates guidance previously included in IFRIC 8 - Scope of IFRS 2 and in IFRIC 11 – IFRS 2 - Group and Treasury Share Transactions. As a result, the IASB has withdrawn IFRIC 8 and IFRIC 11. The amendment is effective from January 1, 2010; at the date of these financial statements, the European Union had yet to complete the endorsement process required for the amendment to be applicable.

On October 8, 2009, the IASB issued an amendment to IAS 32 – Financial Instruments: Classification of Rights Issues. The amendment addresses the accounting for rights issues (rights, options or warrants) that are denominated in a currency other than the functional currency of the issuer. Previously such rights issues were accounted for as derivative liabilities. However, the amendment requires that, provided certain conditions are met, such rights issues are classified as equity regardless of the currency in which the exercise price is denominated.
The amendment is applicable retrospectively from January 1, 2011. The adoption of this amendment will not have any effect on the financial statements of the Group.

On November 4, 2009, the IASB issued a revised version of IAS 24 - Related Party Disclosures. The revised IAS 24 simplifies the disclosure requirements for government-related entities and clarifies the definition of a related party. The revised standard is effective for annual periods beginning on or after January 1, 2011. The revised standard had not yet been endorsed by the European Union at the date of these financial statements.

On November 12, 2009, the IASB issued a new standard IFRS 9 – Financial Instruments. The new standard addresses the classification and measurement of financial assets, having an effective date for adoption of January 1, 2013. The new standard represents the completion of the first part of a project to replace IAS 39. The new standard uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the many different rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments and the contractual cash flow characteristics of the financial assets. IFRS 9 also requires a single impairment method to be used. The new standard had not yet been endorsed by the European Union at the date of these financial statements.

On November 26, 2009, the IASB issued a minor amendment to IFRIC 14 - Prepayments of a Minimum Funding Requirement. The amendment applies when an entity is subject to minimum funding requirements and makes an early payment of contributions to cover those requirements. The amendment permits such an entity to treat the benefit of such an early payment as an asset. The amendment has an effective date for adoption of January 1, 2011; the amendment had not yet been endorsed by the European Union at the date of these financial statements.

On November 26, 2009, the IFRIC issued the interpretation IFRIC 19 – Extinguishing Financial Liabilities with Equity Instruments that provides guidance on how to account for the extinguishment of a financial liability by the issue of equity instruments. The interpretation clarifies that when an entity renegotiates the terms of a financial liability with its creditor and the creditor agrees to accept the entity's shares or other equity instruments to settle the financial liability fully or partially, then the entity's equity instruments issued to a creditor are part of the consideration paid to extinguish the financial liability and are measured at their fair value. The difference between the carrying amount of the financial liability extinguished and the initial measurement amount of the equity instruments issued is included in the profit or loss for the period.
The amendment has an effective date for adoption of January 1, 2011; the amendment had not yet been endorsed by the European Union at the date of these financial statements.

8. Change in the scope of consolidation

The changes in the scope of consolidation of the Group are presented below.

C&W Group

During 2009, there were no significant acquisitions of investment holdings.

Alpitour Group

During 2009, there were no significant acquisitions of investment holdings.

EXOR Holdings System

With a view towards simplifying the Group's structure, the following transactions took place:

- on May 20, 2009, the voluntary wind-up of Ifil Investment Holding, a Dutch-registered company, wholly-owned by EXOR S.p.A., approved on November 7, 2008, was closed;
- on September 18, 2009, the voluntary wind-up of Ifilgroup Finance Limited, an Irish-registered company, wholly-owned by EXOR S.A., approved on September 29, 2008, was closed.

Moreover, voluntary wind-ups are currently in progress for Eufin Investments, (approved on December 2, 2009) and IFIL France, both wholly-owned subsidiaries of EXOR S.A..

9. Segment reporting

Segment reporting, presented in accordance with IFRS 8 – Operating Segments (replacing IAS 14 – Segment Reporting), is prepared according to the same accounting policies adopted in the preparation and presentation of the consolidated financial statements of the Group.

The operating segments through which the EXOR Group carries out its activities are based on the internal reporting used by the Group's Chief Executive Officer to make strategic decisions. That reporting, which reflects the Group's current organizational structure, is prepared in accordance with the accounting policies described in "Consolidation" under "Significant Accounting Policies" above.

The EXOR Group presents information by business segment which coincides with the consolidated data of each subsidiary and associate holding company, every one of which represents an investment in a major business segment: C&W Group, Alpitour Group, Juventus Football Club, Fiat Group, Sequana Group and the EXOR Holdings System. As a result, the adoption of IFRS 8 – Operating Segments, applicable from January 1, 2009, does not require any changes from the previous information presented on the basis of IAS 14.
The segment information relating to continuing operations is presented in the following tables.

For an analysis of the performance of the various segments, please refer to the section "Review of Performance by the Main Operating Subsidiaries and Associates and Relevant Subsidiaries of the Holdings System" in the Report on Operations.

The income statement by operating segment is as follows:

€in millions	C&W Group	Alpitour Group	Juventus	Fiat Group	Sequana Group	EXOR Holdings System	**Total**
2009							
Revenues	1,110	1,090	227			0	**2,427**

The following table presents an analysis of the revenues of the Group in the various geographical markets, irrespective of the origin of the goods and services, and an analysis of the carrying amount of the segment assets and investments in property, plant and equipment and intangible assets on the basis of the geographical location of the assets.

€in millions	Revenues	Segment assets	Investments in property, plant and equipment and intangible assets
2009			
Italy	1,182	471	91
Europe excluding Italy	367	158	3
United States	693	148	34
Rest of the world	185	76	3
Total at December 31, 2009	**2,427**	**853**	**131**

€in millions	Revenues	Segment assets	Investments in property, plant and equipment and intangible assets
2008			
Italy	1,265	473	70
Europe excluding Italy	463	426	10
United States	746	516	19
Rest of the world	207	247	5
Total at December 31, 2008	**2,681**	**1,662**	**104**

Lastly, in 2009 and 2008, there were no revenues realized with any one third-party customer for an amount of more than 10% of the revenues of the Group.

10. Revenues

Details of revenues are as follows:

€in millions	**2009**	2008	Change
Revenues from rendering tourist services	**1,090**	1,237	(147)
Real estate brokerage commissions	**460**	767	(307)
Revenues from property management activities (a)	**249**	225	24
Radio and television rights and media revenues	**160**	137	23
Revenues from financial consulting and property management services	**207**	140	67
Corporate real estate business consulting services and research	**183**	110	73
Revenues from sponsorships and advertising	**46**	43	3
Revenues from season tickets and ticket office sales	**15**	13	2
Other services	**17**	9	8
Total revenues	**2,427**	2,681	(254)

(a) These are reimbursements received from the owners of the properties for property management services rendered by C&W Group.

11. Other revenues from current operations

Details of other revenues from current operations are as follows:

€in millions	**2009**	2008	Change
Gains on the transfer of players' registration rights	**13**	16	(3)
Other income (a)	**19**	18	1
Operating grants	**1**	1	0
Total other revenues from current operations	**33**	35	(2)

(a) This mainly includes contributions for advertising and promotions, cost recoveries and other income of the Alpitour Group (€8 million) and insurance compensation and sundry income of Juventus Football Club (€10 million).

12. Personnel costs

Details of the composition of personnel costs are as follows:

€in millions	**2009**	2008	Change
Salaries and wages	**(757)**	(881)	124
Employee costs relating to C&W Group property management activities (a)	**(249)**	(225)	(24)
Share of results paid to partners of the EMEA division of C&W Group	**(25)**	(20)	(5)
Social security contributions	**(65)**	(52)	(13)
Health insurance	**(24)**	(30)	6
Employee stock options	**(4)**	(5)	1
Other employee costs	**(16)**	(20)	4
Temp work costs	**(4)**	(7)	3
Employee severance indemnities expense	**(6)**	(6)	0
Total personnel costs	**(1,150)**	(1,246)	96

(a) The corresponding reimbursement by the owners of the properties is recorded in Revenues.

13. Impairment losses on assets

In 2009, impairment losses of €68 million were recorded in respect of:

- goodwill relating to the acquisition of C&W Group for €54 million (of which €45 million is the Group's share) and other intangible assets of C&W Group for €11 million;
- video archives of Juventus Football Club for €3 million.

In 2008, impairment losses for €19 million had been recorded in respect of:

- residual amount of the registration rights of the player Andrade, given that it will be impossible for the player to recover to play soccer professionally following a serious injury which occurred in July 2008, for €7 million;
- video archives of Juventus Football Club, carried out on the basis of the commercial exploitation plan and the estimated cash and economic flows acquired and expected, for €5 million;
- goodwill recognized on the acquisition of C&W Group in March 2007 (€7 million).

14. Non-recurring other income (expenses)

Details of non-recurring other income (expenses) by group are as follows:

€ in millions	**2009**	2008	Change
Holdings System	**(13)**	2	(15)
C&W Group	**(21)**	(6)	(15)
Alpitour Group	**(3)**	(1)	(2)
Juventus Football Club	**3**	(1)	4
Non-recurring other income (expenses)	**(34)**	(6)	(28)

Holdings System

In 2009, net non-recurring other expenses are € 13 million (income in 2008 for € 2 million) and include:

€ in millions	**2009**	2008	Change
Fair value adjustment to the Alpitour stock option plan	**(4)**	8	(12)
Costs for directors and employees	**(5)**	(6)	1
Legal fees for defense in proceedings in progress	**(3)**	(1)	(2)
Sundry other income (expenses)	**(1)**	1	(2)
Total	**(13)**	2	(15)

Costs for directors and employees amounting € 5 million (€ 6 million in 2008) refer to the special indemnity relative to the termination of the employment relationship resolved in favor of the former chief executive officer and general manager of IFI S.p.A., Virgilio Marrone (€ 3 million), and expenses relating to workforce reductions for € 2 million (€ 1 million in 2008). In 2008, these costs had also included the special fee on behalf of Mr Gabetti for € 5 million approved by the IFIL board of directors' meeting held on May 13, 2008.

Legal fees for defense in proceedings in progress total € 3 million (€ 1 million in 2008) and mainly refer to expenses incurred for assistance in proceedings relating to the content of the press release issued by IFIL and Giovanni Agnelli e C. on August 24, 2005.

C&W Group

These expenses total € 21 million (€ 6 million in 2008) and include charges in connection with the restructuring of C&W Group.

Alpitour Group

These expenses total € 3 million (expenses for € 1 million in 2008) and include the costs incurred by the Alpitour Group for implementing the rationalization and reorganization plans aimed at reducing and containing labor costs (€ 2 million) and expenses for penalties paid by the subsidiary Alpitour following the early withdrawal from lease contracts for Italian hotel structures and expenses for the settlement of a legal dispute, for a total of € 1 million (unchanged compared to 2008).

Juventus Football Club

The amount of € 3 million includes the positive economic effect of the sale to Ebano S.r.l., a company in the Nordiconad group, of the business segment relating to the commercial areas outside the new stadium.

15. Financial income (expenses)

Details of the composition of financial income (expenses) are as follows:

€ in millions	2009	2008	Change
Gain (loss) on disposal of stake in Intesa Sanpaolo	**(15)** (a)	86	(101)
Cost of net debt			
Income on current securities and cash and cash equivalents	**48**	26	22
Net gain on exchange rate and interest rate hedging transactions	**(5)**	4	(9)
Exchange differences	**(1)**	10	(11)
Interest expenses on loan transactions	**(71)**	(88)	17
Commissions for unused credit lines	**(1)**	(2)	1
Total cost of net debt	**(30)**	(50)	20
Other financial income (expenses)			
Dividends received	**41** (b)	139 (c)	(98)
Interest income on other financial assets	**6**	21	(15)
Changes in the fair value of financial assets and liabilities	**(38)** (d)	(67) (d)	29
Total other financial income (expenses)	**9**	93	(84)
Financial income (expenses)	**(36)**	129	(165)

(a) Sale of 0.66% stake in ordinary capital stock.
(b) Received from SGS for €38 million, Gruppo Banca Leonardo for €2 million and Alpitour Egypt for Tourism for €1 million.
(c) Received from Intesa Sanpaolo for €110 million, SGS for €26 million and Gruppo Banca Leonardo for €3 million.
(d) Includes negative fair value change on embedded derivative relating to Perfect Vision convertible bonds for -€36 million (positive for €4 million in 2008) and on DLMD bonds for -€9 million (-€15 million in 2008).

16. Income taxes

Details of income taxes recorded in the income statement are as follows.

€ in millions	2009	2008	Change
Current income taxes	**(27)**	(27)	0
Deferred income taxes	**13**	(1)	14
Total income taxes	**(14)**	(28)	14

In 2009, national income taxes are calculated at a rate of 27.5% on the estimated taxable income for the year. The income taxes for other jurisdictions are calculated at the enacted tax rates in the various countries.

The reconciliation between the tax charge recorded in the consolidated financial statements and the theoretical tax charge (IRES), calculated on the basis of the tax rate in effect in Italy, is the following:

€ in millions	2009	2008
Profit before income taxes	**(145)**	104
Current tax rate in Italy	**27.5%**	27.5%
Theoretical income taxes	**40**	(29)
Effective income taxes	**(14)**	(28)
Difference	**54**	(1)
The difference can be analyzed as follows:		
Tax effect of difference between foreign tax rates and the theoretical Italian tax rates	**(24)**	(1)
Effect of tax rate reduction on deferred income taxes	**0**	
Tax effect of other permanent differences	**54**	(17)
Deferred tax benefits not recognized	**4**	3
Other differences	**20**	14
Difference	**54**	(1)

17. Share of the profit (loss) of investments accounted for by the equity method

Details are as follows:

€ in millions	**2009**	2008	Change
Fiat Group	**(249)** (a)	467 (a)	(716)
Sequana Group	**5**	(115) (b)	120
Sundry C&W Group companies	**0**	(1)	1
Sundry Alpitour Group companies		1	(1)
Total	**(244)**	352	(596)

(a) Includes a positive consolidation adjustment for € 1 million (negative for € 7 million in 2008).

Further details on the companies accounted for by the equity method are provided in Note 22.

18. Earnings per share

		2009	2008
Average number of ordinary shares outstanding	number	**158,861,096**	160,044,740
Average number of savings shares outstanding	number	**9,058,702**	9,168,894
Average number of preferred shares outstanding	number	**70,641,243**	66,080,860
Net earnings attributable to owners of the Parent	€ in ml	**(389)**	435 (a)
Earnings attributable to ordinary shares	€ in ml	**(263)**	293
per ordinary share – basic	€	***(1.66)***	*1.831*
per ordinary share – diluted (b)	€	***(1.66)***	*1.810*
Earnings attributable to savings shares	€ in ml	**(12)**	18
per savings share – basic	€	***(1.35)***	*1.970*
per savings share – diluted (b)	€	***(1.35)***	*1.949*
Earnings attributable to preferred shares	€ in ml	**(114)**	124
per preferred share – basic	€	***(1.61)***	*1.882*
per preferred share – diluted (b)	€	***(1.61)***	*1.862*
Earnings from continuing operations	€ in ml	**(389)**	435
Earnings from continuing operations attributable to ordinary shares	€ in ml	**(263)**	293
per ordinary share – basic	€	***(1.66)***	*1.831*
per ordinary share – diluted (b)	€	***(1.66)***	*1.810*
Earnings from continuing operations attributable to savings shares	€ in ml	**(12)**	18
per savings share – basic	€	***(1.35)***	*1.970*
per savings share – diluted (b)	€	***(1.35)***	*1.949*
Earnings from continuing operations attributable to preferred shares	€ in ml	**(114)**	124
per preferred share – basic	€	***(1.61)***	*1.882*
per preferred share – diluted (b)	€	***(1.61)***	*1.862*

(a) For purposes of calculating earnings per share, consideration was given to the earnings attributable to owners of the Parent (€ 302 million) increased by the earnings attributable to the non-controlling interests of IFIL (€ 133 million) since the EXOR shares issued on March 1, 2009 to service the merger exchange had dividend rights from the date of January 1, 2008.

(b) For purposes of calculating 2008 earnings per share, the number of ordinary shares outstanding had been increased by the average number of "potentially dilutive" ordinary shares which could have arisen from a hypothetical exercise of stock options. Moreover, the earnings attributable to owners of the Parent had been adjusted to take into account the dilutive effects arising from the theoretical exercise of stock options granted by subsidiaries and associates of the Group using their own equity instruments.
In 2009, this effect is not taken into account because it is considered non-dilutive.

19. Goodwill

The composition of goodwill by business segment is as follows:

€ in millions	12/31/2009	12/31/2008	Change
Goodwill on 48,750,000 IFIL ordinary shares purchased in 2007	**0**	68	(68)
EXOR Group	**0**	68	(68)
Goodwill on the acquisition of C&W Group (Group's share)	**285**	322	(37)
Goodwill on other companies of C&W Group	**53**	53	0
C&W Group	**338**	375	(37)
Jumboturismo S.A.	**11**	11	0
Altamarea V&H Compagnia Alberghiera S.p.A.	**8**	8	0
Viaggidea S.p.A.	**6**	6	0
AW Events S.r.l.	**2**	2	0
Alpitour Group	**27**	27	0
Net goodwill	**365**	470	(105)

The analysis of the changes in goodwill in 2009, is as follows:

€ in millions	12/31/2009	12/31/2008
GROSS AMOUNT		
Opening balance	**479**	414
Changes		
Merger effect on goodwill on IFIL stock	**(68)**	
Increase in the initial goodwill of C&W Group as a result of the change in percentage of consolidation	**20**	3
Exchange differences	**(6)**	19
Increases and other changes	**(7)**	43
Total changes	**(61)**	65
Closing balance	**418**	479
ACCUMULATED IMPAIRMENT LOSSES		
Opening balance	**(9)**	(4)
Changes		
Exchange differences	**1**	
Impairment losses recognized in the income statement (Group's share)	**(45)**	(5)
Total changes	**(44)**	(5)
Closing balance	**(53)**	(9)
NET AMOUNT	**365**	470

Following the merger by incorporation of IFIL in EXOR, the goodwill arising from the purchases of IFIL stock in 2007 was recognized as a deduction from equity, consistently with the allocation of the exchange reserve to equity.

Goodwill recognized on the acquisition of C&W Group Inc. is deemed representative of the aggregate of the expected future economic benefits from the investment and cannot be identified separately.

C&W Group tests goodwill and other intangible assets with indefinite useful lives annually for impairment on October 1 or whenever events or circumstances indicate that the asset may be impaired.
Alpitour Group also tests property, plant and equipment, intangible assets, goodwill and marketing rights annually.

The main assumptions used in the calculation of the impairment test are as follows:

Impairment test on the goodwill and trademarks with an indefinite life of C&W Group

For the purpose of impairment testing, C&W Group allocates the goodwill and trademarks to Cash-Generating Units (CGU) identified by geographical regions, which represent the lowest level within C&W Group at which these assets are monitored.

The carrying amount of goodwill and trademarks before impairment charges in 2009 is allocated as follows:

	Goodwill (Group's share)		Trademarks		Total	
€ in millions	$	€	$	€	$	€
United States	252.6	185 (a)	130.4	91	383.0	276
Canada	50.0	35	23.5	16	73.5	51
Latin America	21.3	15	10.0	7	31.3	22
EMEA	165.8	115	78.4	54	244.2	169
Asia	46.3	32	12.7	9	59.0	41
	536.0	382	255.0	177	791.0	559

(a) Includes the expenses incurred by the EXOR Group for the acquisition of C&W Group equal to € 10 million.

The recoverable amount of a CGU to which goodwill and trademarks are allocated is the greater of its value in use and its fair value less costs to sell. The annual impairment assessment for all CGUs is based on the greater of its value in use or its estimated fair value less costs to sell.

The estimated fair value less costs to sell for each of the CGUs is determined through independent appraisal using both the discounted cash flow method and the market approach method, which were weighted in determining the fair value less costs to sell for each of the CGUs.

The key assumptions used to determine the fair value less costs to sell represent C&W Group management's best assessment of future trends in the real estate industry and are based on both external sources and internal sources, including historical data.

Discounted Cash Flow Method (DCF)

The fair value less costs to sell determined using the DCF method was weighted 50% in determining the final fair value less costs to sell for each of the CGUs. Under the discounted cash flow method, cash flows were projected for each of the CGUs based on their respective revenue and EBITDA assumptions, as outlined above, along with an estimate of a terminal year value, based on market assumptions and actualized with discount rates considered appropriate. In particular, 2010 revenue and EBITDA assumptions were developed in connection with C&W Group management's annual operating plan process, while the projections for 2011 through 2013 were based on the expected growth in those years relative to the 2010 annual plan.

Market Approach Method

The fair value less costs to sell determined under the market approach was weighted 50% in determining the final fair value less costs to sell for each of the CGUs. Under the market approach, the multiple and EBITDA assumptions were used to calculate a fair value for each CGU for each of the years 2009, 2010 and 2011. The multiple assumptions in these calculations were derived from data publicly available relating to the guideline companies, including information relating to their revenue and EBITDA historical performance as well as that expected in 2010 and in subsequent years.

The key assumptions used to estimate the fair values under both methods are as follows:

	USA	CANADA	SOUTH AMERICA	MEXICO	EUROPE	ASIA
Specific CGU assumptions						
Discount rate	14.0%	15.8%	19.3%	18.8%	16.0%	19.3%
CGU specific risk	2.0%	4.0%	3.0%	4.0%	3.0%	4.5%
Tax rate	40.0%	31.7%	34.0%	28.0%	27.0%	30.3%
Working capital %	-1.0%	-1.0%	-1.0%	-1.0%	-1.0%	-1.0%
Long-term growth rate	3.0%	3.0%	4.0%	3.0%	3.0%	4.0%
Terminal value model (Fading growth model)	fading	fading	fading	fading	fading	fading
2010 EBITDA multiple	10.3x	9.6x	7.2x	6.4x	8.1x	8.3x
2011 EBITDA multiple	8.7x	7.0x	5.1x	5.3x	6.7x	6.2x
General assumptions						
Control premium	15.0%					
Consolidated tax rate	33.5%					
Equity risk premium	6.0%					
Cost to sell	1.0%					

The discount rates were established through the assessment of a number of inputs, including the expected return on equity, entity specific risk, country specific premiums, local cost of equity, the local statutory tax rate and debt to equity ratios.

The CGU specific risk assumptions were determined after consideration of the execution risk of achieving the forecasted results for 2010 and beyond.

The tax rates represent the statutory tax rates in the respective tax jurisdictions. The working capital percentage reflects recent experience of C&W Group and is in line with market participant levels, while the long-term growth rates were based on the estimated long-term gross domestic product and inflation.

The terminal value was estimated using a derivation of the fading growth model, which more appropriately measures value during the period over which it is estimated earnings growth will reduce to the stable long-term growth rate.

The EBITDA multiples for 2010 and 2011 were determined through an assessment of the guideline company multiples and taking into account local market differences. The control premium, equity risk premium and the cost to sell assumptions were all determined based on recent activity and trends in the market.

In addition to the key assumptions outlined above, C&W Group developed assumptions with respect to its expected future revenue and normalized EBITDA growth and normalized EBITDA margins, as follows:

CGU	2009	2010	2011	2012	2013
United States					
Revenue growth	-17.6%	2.8%	9.7%	11.0%	10.0%
Normalized EBITDA growth (a)	61.30%	-10.6%	15.2%	29.9%	30.7%
Normalized EBITDA margin (a)	9.0%	7.8%	8.2%	9.6%	11.4%
Canada					
Revenue growth	-27.9%	10.9%	12.3%	14.5%	16.7%
Normalized EBITDA growth (a)	49.0%	62.3%	37.3%	24.9%	26.1%
Normalized EBITDA margin (a)	7.5%	11.0%	13.5%	14.7%	15.9%
South America					
Revenue growth	-25.7%	-3.4%	12.0%	12.0%	12.0%
Normalized EBITDA growth (a)	-28.5%	-21.1%	41.9%	23.6%	11.8%
Normalized EBITDA margin (a)	12.4%	10.2%	12.9%	14.2%	14.2%
Mexico					
Revenue growth	-36.8%	20.4%	9.7%	10.0%	10.0%
Normalized EBITDA growth (a)	-67.5%	94.0%	22.5%	18.4%	17.5%
Normalized EBITDA margin (a)	11.0%	17.8%	19.9%	21.4%	22.8%
Europe					
Revenue growth	-24.9%	0.0%	11.7%	9.0%	9.0%
Normalized EBITDA growth (a)	40.4%	30.0%	21.0%	13.9%	13.5%
Normalized EBITDA margin (a)	13.0%	16.9%	18.3%	19.2%	19.9%
Asia					
Revenue growth	-13.2%	7.1%	18.0%	18.0%	22.0%
Normalized EBITDA growth (a)	-13.6%	153.2%	34.4%	30.2%	27.0%
Normalized EBITDA margin (a)	6.8%	16.0%	18.3%	20.1%	21.0%

(a) Net of restructuring costs and non-recurring other expenses.

The resulting fair values less costs to sell and related carrying values of each of the CGUs as of the October 1, 2009 goodwill assessment date are as follows:

$ in millions	USA	CANADA	SOUTH AMERICA	MEXICO	EUROPE	ASIA	Total
Fair value less costs to sell	350.0	33.0	44.0	13.0	425.0	97.0	962.0
Book value of equity	395.6	39.4	30.9	8.8	327.4	72.1	874.2
Difference $ in millions	(45.6)	(6.4)	13.1	4.2	97.6	24.9	87.8
Difference $ in millions	(32.7)	(4.6)	9.4	3.0	70.0	17.8	62.9

The assessment at October 1, 2009 showed that the carrying amounts of the United States and Canada CGUs were higher than their recoverable amounts by $45.6 million (€32.7 million) and $6.4 million (€4.6 million), respectively. Moreover, at June 30, 2009, the assessment made at that date had indicated an impairment for the United States CGU of $10 million (€7.5 million) and €10 million for the EXOR Group, due to expenses incurred for the acquisition.

Globally, the impairment charge recorded in 2009 by the EXOR Group is €54 million.

In 2008, an impairment charge on goodwill relating to the C&W Group acquisition had been recognized for €7 million.

The estimated fair values less costs to sell are particularly sensitive to changes in the discount rate and revenue assumptions. For example:

- a 100 basis point increase in the discount rate would increase the impairment charge for the United States CGU by $23 million (€16 million) and for the Canada CGU by $3 million (€2 million);
- a 10% decrease in future planned revenues would increase the impairment charge for the United States CGU by $67 million (€46.5 million) and for the Canada CGU by $8 million (€5.5 million).

C&W Group management does not believe for any of the other CGUs that it is reasonably possible that a change in a key assumption on which it has based its determination of the CGU's recoverable amount would cause the CGU's carrying amount to exceed its recoverable amount.

Impairment test on property, plant and equipment, intangible assets, goodwill and marketing rights of the Alpitour Group

The aggregate carrying amount of the CGUs analyzed amounts to €124 million compared to €136 million in the prior year. Such amounts include goodwill, marketing rights, government and state property concessions, hotel licenses and commercial goodwill for a total of €50 million (€52 million at October 31, 2008).

At October 31, 2009, the recoverable amount of each CGU determined using the two methods described above exceeds their carrying amount so no impairment charges were recognized for any goodwill or other non-current assets.

The Alpitour Group developed a sensitive analysis of the estimated recoverable amount using the discounted cash flow method. The Alpitour Group considers that the discount rate used to discount the cash flows of the CGU is a key parameter in estimating fair value and has determined that assuming an increase of 150 basis points in such rate, also taking into account the estimated realizable value, the carrying amount of the CGUs would not be higher than their recoverable amount.

20. Other intangible assets

The changes in other intangible assets are as follows.

€ in millions	Concessions, licenses and trademarks	Players' registration rights	Other intangible assets	Intangible assets under development and advances	**Total**
Opening balance at January 1, 2008	**255**	**233**	**210**	**0**	**698**

Total changes	(5)	38	(12)	(10)	**11**
Closing balance at December 31, 2009	**(51)**	**(137)**	**(97)**	**(10)**	**(295)**
NET CARRYING AMOUNT					
At December 31, 2008	220	93	148	0	461
At December 31, 2009	**211**	**115**	**124**	**9**	**459**

The increases in intangible assets (€76 million) refer to the acquisition of players' registration rights by Juventus Football Club (€58 million) and investments by C&W Group (€13 million) and the Alpitour Group (€5 million).

The decreases in intangible assets (€77 million) refer to the sale of players' registration rights by Juventus Football Club for €74 million and other assets by the Alpitour Group for €3 million.

Impairments of €14 million were recognized by C&W Group (€11 million) and Juventus Football Club (€3 million) and included in “Non-recurring other income (expenses)”; further details are provided in Note 13.

At December 31, 2009, there are no commitments for the purchase of intangible assets.

In 2009, there are no research and development expenditures charged to the income statement.

Intangible assets completely amortized but still in use total €23 million and refer to the concessions, licenses and trademarks of the Alpitour Group for €16 million and other intangible assets for €7 million.

Concessions, licenses and trademarks include:

- the amount attributed on acquisition of C&W Group (March 2007) to the “Cushman & Wakefield” trademark, widely recognized by the market, for $255 million (€177 million at December 31, 2009). This trademark, which C&W Group intends to renew continually, is classified as an asset with an “indefinite useful life” in that it will contribute to future cash flows indefinitely and is therefore not amortized but tested annually for impairment (Note 19);
- the government concession rights of the Alpitour Group, amortized over the duration of the original concessions.

Other intangible assets include C&W Group's customer relationships (amortized over 14 years) and non-compete covenants (amortized over 12 years).

Players' registration rights are amortized on a straight-line basis over the period of the contracts; Juventus Football Club library products are assets with an indefinite life and are therefore tested for impairment.

21. Property, plant and equipment

The changes in property, plant and equipment are as follows:

€in millions	Land	Buildings	Plant and machinery	Industrial equipment	Other assets	Construction in progress	Total
GROSS AMOUNT							
Opening balance at January 1, 2008	**20**	**85**	**20**	**10**	**115**	**13**	**263**

Closing balance at December 31, 2009	**0**	**(16)**	**(12)**	**(6)**	**(75)**	**(2)**	**(111)**
NET CARRYING AMOUNT							
At December 31, 2008	18	67	11	5	78	17	196
At December 31, 2009	**18**	**64**	**11**	**4**	**80**	**21**	**198**

Increases in property, plant and equipment for €54 million include:

- betterments and work to bring the Alpitour Group hotel structures up to standards and restructuring of the "Sea Club" Village at Maayafushi (for a total of €5 million) and also betterments and restructuring of the Incoming sector offices (€1 million);
- equipping the Alpitour Group's aircraft, mainly chargeable to the new B737-800 (€7 million);
- costs incurred by Juventus Football Club for the construction of the new stadium (€15 million);
- other investments (€26 million), of which €24 million incurred by C&W Group.

Decreases totaling €20 million principally refer to disposals by C&W Group (€10 million) and the Alpitour Group (€7 million). The disposals by the Alpitour Group mostly refer to the sale (in June 2009) of the cruise ship “Lady Sophia” and other disposals as a result of the closing of some lease contracts for Italian hotel structures.

Other changes and reclassification under construction in progress relates to software developed internally by C&W Group and reclassified to intangible assets.

In 2009 and 2008, no borrowing costs were capitalized.

Commitments for the acquisition of property, plant and equipment amount to €4 million at December 31, 2009 and relate to the commitment undertaken by Juventus Football Club as part of a finance lease transaction.

At December 31, 2009, the gross carrying amount of property, plant and equipment completely depreciated but still in use amounts to €6 million (€7 million at December 31, 2008).

Finance lease contracts on property, plant and equipment

The carrying amount of property, plant and equipment at December 31, 2009 includes €22 million (€19 million) at December 31, 2008 of assets leased under finance contracts by Juventus Football Club for the Vinovo Training Center.

Leasing information is as follows:

	Land and Buildings	
€in millions	**2009**	2008
Nominal amount at lease inception	**22**	22
Residual floating-rate lease debt, discounted to present value, at reporting date	**16**	17
Maturity of residual lease debt		
Within 1 year	**2**	2
Between 2 and 5 years	**6**	6
Beyond 5 years	**8**	9
	16	17

The interest rate applied is the 3-month Euribor + a 1.2% spread.

In order to fund the work to expand and reorganize the Vinovo Training Center (the total cost of the work to December 31, 2009 amounts to €4 million), a total of €5 million will be added to the existing leasing contract with Unicredit Leasing S.p.A..

22. Investments accounted for by the equity method

Details are as follows:

	12/31/2009		12/31/2008		
€in millions	**Investment %**	**Carrying amount**	Investment %	Carrying amount	Change
Fiat Group	**29.59**	**3,057**	29.4	3,062	(5)

Highlights of the Fiat Group are presented below (see also Note 41).

	Fiat Group	
€ in millions	**2009**	2008
Currency	**Euro**	Euro
Total assets	**67,235**	61,772
Current and non-current liabilities	**56,120**	50,671
Revenues	**50,102**	59,380
Consolidated profit (loss)	**(848)**	1,721
of which, attributable to the EXOR Group	**(248)**	467
Net financial position	**(3,217)**	(4,821)
Fair value of interest held by the EXOR Group based on stock trading prices at the end of December	**3,613**	1,600

The carrying amount of the investment in the Fiat Group includes goodwill recognized for €33 million whereas goodwill included in the consolidated financial statements of the Fiat Group amounts to €2,776 million (€2,815 million at December 31, 2008). No impairment losses were recognized in 2009 (€12 million in 2008).

Highlights of the Sequana Group are presented below.

	Sequana Group	
€ in millions	**2009**	2008
Currency	**Euro**	Euro
Total assets	**2,875**	3,363
Current and non-current liabilities	**2,133**	2,649
Revenues	**4,088**	4,934
Consolidated profit (loss)	**19**	(430)
Of which, attributable to the EXOR Group	**5**	(115)
Net financial position	**651**	791
Fair value of interest held by the EXOR Group based on stock trading prices at the end of December	**105**	57

Goodwill included in the consolidated financial statements of the Sequana Group amounts to €635 million (€630 million at December 31, 2008) and was tested for impairment, resulting in an impairment loss of €4 million.

23. Financial assets

The composition of financial assets is as follows:

€ in millions	**12/31/2009**	12/31/2008	Change
Non-current financial assets	**1,540**	1,413	127
Current financial assets	**608**	350	258
Total financial assets	**2,148**	1,763	385

	2		5		**7**	**3**
Total other investments and other financial assets	**203**		117		**608**	350
Total	**1,540**		1,413		**608**	350

(a) The carrying amount includes goodwill of € 5 million originating from the acquisition of 100% of the capital stock of Ancom USA Inc by the subsidiary Ifil Investissements in 2007.

The investment in **Intesa Sanpaolo** (€ 127 million) is measured at fair value on the basis of the stock market price at December 30, 2009 (€ 3.165 per share) with recognition of unrealized gains/losses in equity (€ 8 million).
The original purchase cost of the remaining stake held (0.34% of ordinary capital stock) is € 119 million (€ 2.98 per share).

The investment in **SGS** is measured at fair value (with recognition of the unrealized gains in equity) on the basis of the stock market price at December 31, 2009 equal to CHF 1,351 per share (corresponding to € 910.62, at the exchange rate of 1.4836), for a total of € 1,068 million. The original carrying amount of the investment in SGS is € 400.31 (CHF 593.9 per share) for a total of € 470 million. At December 31, 2009, the net positive fair value adjustment (CHF 757.11 equal to € 510.32 per share) amounts to a total of € 598 million.

The investment in **Gruppo Banca Leonardo** is measured at fair value for €85 million. The estimated fair value was determined by an independent expert using the "warrant equity method with excess capital", where the Group is valued through attainment of a ROE sustainable in the long term in line with the ROE in 2008. Such measurement is confirmed by a comparison with a valuation using market multiples.

The investment in **Banijay Holding** is measured at fair value for €34 million. The estimated fair value was determined by an independent expert using the "sum of the parts" method, summing the fair value of the investments held by Banijay Holding in Banijay Entertainment and in Euro Media Group (through the Barry & Co vehicle company). The fair value of the investment which Banijay Holding has in Banijay Entertainment, equal to its entire economic capital, was obtained through the application of the "Unlevered Discounted Cash Flow" method. The fair value of the investment which Banijay Holding has in Euro Media Group, equal to 17.17% of its entire economic capital, was obtained through the application of the simple balance sheet method.
This estimate confirms that the fair value does not differ from the carrying amount of the investment.

Non-current financial assets include:

- **Perfect Vision Limited convertible bonds,** subscribed to by the subsidiary EXOR S.A. in 2008, yielding a fixed rate of 5% until conversion of the bonds in 2013, which will give EXOR S.A. a 40% equity stake in Vision Investment Management Limited.
  At December 31, 2009, the bond principal measured at amortized cost is €67 million including interest capitalized in 2008 and 2009 for €5 million. The embedded derivative which in 2008 had a positive fair value adjustment of €4 million, in 2009 was adjusted to fair value with recognition in the income statement of a negative €36 million. Therefore, the value of the embedded derivative at December 31, 2009 is €32 million and is classified in non-current debt. In 2009, furthermore, in the income statement, negative exchange differences were recognized for €2 million on the measurement of the bonds at the year-end exchange rate and interest income of €3 million.
- In July 2008 and subsequently in July 2009 and in December 2009, certain clauses of the **bonds issued by DLMD** were renegotiated as a result of which the bonds were subdivided into Senior and Junior bond portions. The redemption of the Junior portion scheduled for 2010, in exchange for a higher yield, is subordinate to that of the Senior portion.
  At December 31, 2009 EXOR S.A. holds a nominal amount of bonds for €27 million, of which €12 million represents Senior bonds and €15 million Junior bonds. At December 31, 2008, an impairment loss was recognized on the Junior portion for its entire nominal amount. At December 31, 2009, additional impairment charges were recognized for interest capitalized for a total of €9 million, of which €2 million relates to the Junior portion and €7 million to the Senior portion, written down for an amount up to the market value at December 31, 2009 of the guarantee obtained.
  The Senior portion that was not written down, equal to €6 million, is guaranteed by EXOR S.A.'s share of the 10,806,343 Sequana shares used by contract to guarantee DLMD's bond issue and measured at the stock market price at December 31, 2009.
- Bonds issued by leading issuers and classified under other held-to-maturity investments, measured at amortized cost.

Current financial assets include:

- equity shares listed in major international markets and listed bonds with maturities beyond three months issued by leading issuers and held by the Holdings System for €598 million. Such securities, if held for trading, are measured at fair value, on the basis of the listed market price at year-end, translated, if appropriate, at year-end exchange rates, with a corresponding entry to income. Derivative financial instruments are also used;

– securities subscribed to by Alpitour measured at fair value (residual amount of €3 million) as part of the securitization of trade receivables.

The analysis of changes during 2009 is as follows:

	Non-current financial assets		Current financial assets	
€ in millions	**12/31/2009**	12/31/2008	**12/31/2009**	12/31/2008

Increases	**123**	91	**779**	617
Decreases	**(242)**	(521)	**(521)**	(363)
Fair value recognized in equity	**229**	(422)	**0**	(4)
Reversal of cumulative fair value on the stake sold in the investment in Intesa Sanpaolo	**36**	(415)		
Fair value through profit or loss	**(14)**	(11)	**10**	(59)
Exchange differences	**(3)**	8	**0**	
Other changes and reclassifications	**(2)**	8	**(10)**	(1)
Total changes	**127**	(1,262)	**258**	190
Closing balance	**1,540**	1,413	**608**	350

Non-current financial assets

Increases in non-current financial assets (€123 million) mainly refer to investments made by EXOR S.p.A. (€81 million) and by the subsidiary EXOR S.A. (€41 million).

Investments made by EXOR S.p.A. comprise:

- bonds measured at amortized cost for €71 million;
- RHO Immobiliare closed-end real estate fund shares for €10 million.

Investments made by EXOR S.A. comprise:

- subscription to two distinct capital increases of Banijay Holding for an equivalent amount of €12 million;
- bonds measured at amortized cost for €16 million;
- investments in NoCo B for €4 million;
- capitalized interest on Perfect Vision convertible bonds for €3 million and DLMD bonds for €2 million;
- investments in other financial assets for €4 million.

Decreases in non-current financial assets (€242 million) refer to:

- derecognition of the original purchase cost of Intesa Sanpaolo (€233 million) for the disposal of a 0.66% stake in ordinary capital stock;
- reimbursement, from the limited partnership NoCo B, of the Perella Weinberg Alpha Large Cap and ADS funds following their liquidation for €8 million,
- other decreases for €1 million.

At December 31, 2009, the net decrease in the investment in **Intesa Sanpaolo**, equal to €170 million, is the result of the derecognition of the stake sold in 2009 (-€196 million) which includes the original purchase cost of €232 million, net of the cumulative negative fair value of €36 million, and the adjustment of the remaining interest to fair value at year-end (€26 million).

At December 31, 2008, there were still call options sold on 19,500,000 Intesa Sanpaolo shares expiring in February 2009. At the set expiration date, the options were not exercised by the counterparts and so the premiums received at the date of the options' sale were recognized in financial income (€301 thousand).
In 2009, put options on 25,000,000 Intesa Sanpaolo shares and call options on 80,600,000 Intesa Sanpaolo shares were sold; put options on 10,000,000 Intesa Sanpaolo shares were also purchased. The premium received amounted to €18 million; those paid totaled €3 million. The options exercised or closed in advance generated financial income of €9 million.

At December 31, 2009, there are still call options sold on 40,000,000 Intesa Sanpaolo shares expiring in January and March 2010 with a strike price of €3 per share; a financial expense of €1 million was recorded for the adjustment of the options to fair value. In January 2010, the options were exercised with the consequent sale of the relative shares.

The positive change in "fair value recognized in equity" (+€229 million) comprises the fair value adjustment at the end 2009 of the investments in SGS (+€199 million), in the remaining stake in Intesa Sanpaolo (+€26 million), in Gruppo Banca Leonardo (-€3 million) and in the NoCo B fund (+€7 million).

The change in fair value through profit or loss (-€14 million) mainly refers to the additional impairment losses on the bonds issued by DLMD for €9 million and the embedded derivative on the Perfect Vision convertible bonds for €4 million. The additional impairment loss on the later bonds (€32 million) is discussed in Note 33.

Non-current other financial assets, excluding investments, by maturity, are as follows:

€in millions	**12/31/2009**	12/31/2008
Within 1 year	**6**	1
From 1 to 3 years	**79**	15
From 3 to 5 years	**82**	76
Beyond 5 years	**38**	25
Non-current other financial assets, excluding investments	**205**	117

Current financial assets

Increases in current financial assets (€779 million) include investments in securities and investments held for trading made by the Holdings System (€776 million) and also securities subscribed to by the subsidiary Alpitour (€3 million).

Decreases in current financial assets are the result of the realization of investments in which a part of the liquidity was temporarily invested. The remaining balance of liquidity is included in "Cash and cash equivalents".

The fair value of current securities is calculated using the market price at December 31, 2009.

24. Other assets

Details are as follows:

€in millions	**12/31/2009**	12/31/2008	Change
Other non-current assets			
Commissions receivable	**9**	10	(1)

Total other current assets	**458**	515	(57)
Total other non-current and current assets	**529**	608	(79)

Other assets include receivables of the subsidiary Juventus Football Club from Campi di Vinovo S.p.A. for the sale of the business segment relating to the "Mondo Juve - commercial center" for €10 million, from Finanziaria Gilardi S.p.A. for the sale of the investment in Campi di Vinovo S.p.A. for €7 million, advances paid to the City of Turin and incidental expenses already paid for the long-term lease of the Delle Alpi area for €12 million and receivables from Ebano S.r.l. for the sale of the business consisting of the commercial areas adjacent to the new stadium (€1 million). Such receivables, which are presented under non-current assets, have been adjusted by the amount of implicit income of €2 million on discounting the receivables.

The receivables from Campi di Vinovo S.p.A. and Finanziaria Gilardi S.p.A. (€17 million) are due in December 2013 and refer to the residual receivables due from Costruzioni Generali Gilardi S.p.A. on the sale of the investment in Campi di Vinovo S.p.A. and on the transfer of the business segment consisting of the commercial center to be built on Campi di Vinovo S.p.A. land. Such receivables are guaranteed by Campi di Vinovo S.p.A. shares pledged as collateral.

Campi di Vinovo sale

In reference to the sale to Costruzioni Generali Gilardi S.p.A. (hereafter "CGG") of the investment in Campi di Vinovo S.p.A. (hereafter "CdV") and the transfer to CdV of the commercial center business to be built on CdV's land, the transactions of which took place in the financial year 2007/2008, on December 18, 2009, CGG and CdV paid a total of €2 million to Juventus Football Club as an advance on the installment of the consideration (€8.5 million) for the above sale and transfer due December 20, 2009, as stated in the private supplementary agreement signed on February 5, 2009.

Furthermore, on December 22, 2009, Juventus Football Club and CGG signed a further private contract for the novation and integration of the March 31, 2006 contract for the sale of the Campi di Vinovo S.p.A. shares. The purpose of the contract was to review the contractual relations and obligations binding on the parties in light of the dispute pending between CGG and a third party company with which CGG had signed an agreement for the development of the commercial center. The new private agreement establishes that CdV will assume the liabilities originally estimated to be borne by Juventus Football Club with the public sector (€19.2 million) and also the commitment to sustain any costs for the construction of the Debouché junction on the southern Turin bypass. In consideration of this, the total remaining payments due to Juventus Football Club from CdV and/or CGG, in accordance with the March 31, 2006 agreement, as amended, have been reduced by €19.2 million distributed as follows: €6.5 million entirely covering the installment due on December 20, 2009, €12.5 million entirely covering the installment due on December 31, 2012 and the balance of €0.2 million from the €17.4 million installment due on December 31, 2013.

Following the new agreements, Juventus Football Club will no longer have any commitment and/or liability towards the public sector. Accordingly, the provisions for risks and charges set aside in prior years for €19.2 million have been released.

With signing of the new agreement, CGG, with the consent of Juventus Football Club, transferred its liability to Juventus Football Club to its parent, Finanziaria Gilardi S.p.A., together with the CdV investment. The residual €17.2 million receivables due from Finanziaria Gilardi S.p.A. and CdV on December 31, 2013 are guaranteed by the Campi di Vinovo S.p.A. shares pledged as collateral.

Sale of the commercial areas adjacent to the new stadium to the Nordiconad group

On December 1, 2009, the notarial deed was signed for the sale and transfer to Ebano S.r.l., a Nordiconad group company, of the business segment consisting of a part of the areas leased from the City of Turin, the project, and the related contracts, commercial licenses and building permits. The purpose of the sale is the construction of a new shopping center adjacent to the new stadium.

The consideration on the sale is €20.25 million, of which €13.5 million is for the long-term lease transferred, €1.4 million for the architectural project and €5.4 million in goodwill (including the value of the licenses, permits and contracts transferred). As part of the sale and transfer of the business segment, Ebano S.r.l. assumed €11 million in liabilities payable to the City of Turin. As a result, residual liabilities payable by Juventus Football Club to the City of Turin in relation to the balance of the long-term lease acquired total €1 million, which will be settled during the second half of the current financial year once the Building Permit for the commercial areas inside the stadium (east side) is issued.

Consequently, net proceeds on disposal of the business segment total €9.25 million, of which €8.25 million was collected upon signing the notarial deed. The outstanding €1 million will be collected after final inspection upon completion of the work, for which bank guarantees have been received.
In addition to the above, Ebano S.r.l. will assume €9.135 million in liabilities for infrastructure charges connected with the commercial areas, of which €2.9 million has already been paid to Juventus Football Club.

The sales transaction produced a gain of €3.1 million excluding the outstanding infrastructure liabilities accruing entirely to the current financial year.

The breakdown of other assets by maturity is as follows:

€in millions	Within 1 year	From 2 to 5 years	Beyond 5 years	**Total**
Other non-current assets	3	37	31	**71**
Trade receivables and commissions receivable	310			**310**
Other receivables	103		45	**148**
Balance at December 31, 2009	**416**	**37**	**76**	**529**
Other non-current assets	2	89	2	**93**
Trade receivables and commissions receivable	333			**333**
Other receivables	121		61	**182**
Balance at December 31, 2008	**456**	**89**	**63**	**608**

25. Cash and cash equivalents

The reconciliation of cash and cash equivalents in the statement of cash flows and the corresponding line items in the statement of financial position is as follows:

€in millions	**12/31/2009**	12/31/2008	Change
Cash and cash equivalents	**630**	975	(345)
Bank overdrafts and bank borrowings	**0**	(2)	2
Net cash and cash equivalents	**630**	973	(343)

Cash and cash equivalents include demand or short-term deposits and readily negotiable money market instruments and bonds; such investments are allocated over an appropriate number of counterparts since the primary purpose is having investments which can be readily converted into cash. The counterparts are chosen according to their creditworthiness and reliability.

26. Assets held for sale and Liabilities relating to assets held for sale

At December 31, 2009, there are no assets or liabilities classified as Assets held for sale or Liabilities relating to assets held for sale.

At December 31, 2008, assets held for sale amounting to €3 million included the costs capitalized for the development of the commercial areas outside the Delle Alpi Stadium, following the preliminary contract signed between Juventus Football Club and Nordiconad Soc. Coop.

27. Equity

Capital stock

At December 31, 2009, the capital stock of EXOR, fully subscribed to and paid-in, amounts to €246,229,850 and consists of 160,259,496 ordinary shares (65.09% of capital stock), 76,801,460 preferred shares (31.19% of capital stock) and 9,168,894 savings shares (3.72% of capital stock) all with a par value of €1 each.

At December 31, 2009, capital stock included €1,342 thousand of transfers from the revaluation reserve appropriated in the past by the merged company IFIL which, in the event of distribution, will form part of the taxable income of the Company.

On March 1, 2009, the capital stock of EXOR was increased from €163,251,460 to €246,229,850 through the issue of 73,809,496 ordinary shares and 9,168,894 savings shares, all with a par value of €1, with dividend rights from January 1, 2008. Such shares were attributed to the stockholders of the merged company IFIL in a ratio of 0.265 EXOR ordinary shares for each IFIL ordinary share and 0.265 EXOR savings shares for each IFIL savings share.

The EXOR capital stock increase to service the exchange of the shares of the merged company IFIL was recognized at the fair value of the 73,809,496 ordinary shares and 9,168,894 savings shares issued, respectively equal to €5.36 and €3.86 corresponding to the opening stock market prices on March 2, 2009, the first day of market trading of those shares. Of the total of €431 million, €83 million was allocated to capital stock, corresponding to the par value, and €348 million to additional paid-in capital.

The directors have the right, for a period of five years from the date of the resolution passed on May 14, 2008, to increase, one or more times, also in divisible form, the capital stock up to an amount of €561,750,000.

The ordinary and preferred shares are registered shares while the savings shares can either be registered or bearer shares, as elected by the stockholders, or as set out by law. The preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code and the second paragraph of art. 13 of the bylaws (regulations for conducting stockholders' meetings). The savings shares do not have voting rights in the stockholders' meetings. Pursuant to art. 146 of Legislative Decree 58/98, the savings shares have voting rights in the special stockholders' meetings of the holders of savings shares.

Pursuant to art. 27 of the bylaws, the profit of each year is appropriated as follows:

- 5% to the legal reserve until it reaches one-fifth of capital stock;
- the remaining profit to the shares, as dividends, unless otherwise resolved by the stockholders' meeting, in accordance with the applicable provisions, taking into account that, in the order of priority (i) the savings shares shall be entitled to a preference dividend, cumulative according to the following second paragraph, equal to 31.21% of their par value and a dividend higher than that of the ordinary shares equal to 7.81% of the same par value, and (ii) the preferred shares shall be entitled to a preference dividend and higher than that of the ordinary shares by 5.17% of their par value, which is not cumulative from one year to the next.

When in any one year, the dividends attributed to the savings shares are lower than that indicated above, the difference shall be added to the preference dividend of the next two years.

In the event the ordinary and/or savings shares are delisted, the preference dividend and the dividend higher than that of the ordinary shares to which the savings shares are entitled shall automatically be increased to the extent that they are equal to, respectively, 32.15% and 8.75%.

In the event of the distribution of reserves, the savings shares shall have the same rights as the other shares.

The board of directors, during the course of the year, to the extent that it considers it appropriate and possible in relation to the result of operations, may resolve to pay interim dividends on the dividends of the same year.

In accordance with art. 28 of the bylaws, dividends that are not claimed within five years of the date they become payable will be statute-barred and become the property of the Company and appropriated to the extraordinary reserve.

In accordance with art. 30 of the bylaws, in the event of a wind-up, the assets of the Company shall be distributed in the following order of priority:

- savings shares shall have a pre-emptive right up to the amount of €3.78 per each savings share;
- the holders of preferred shares shall have a pre-emptive right up to the par value of the same shares;
- ordinary shares shall have up to the par value of the same shares;
- all three classes of stock shall have any balance remaining in a proportional amount according to law.

The objectives identified by EXOR and the companies in the Holdings System are to create value for all stockholders, safeguard business continuity, diversify investments by sector and geography and support the growth of investment holdings.

EXOR thus aims to maintain an adequate level of capitalization which allows it to generate a satisfactory economic return for stockholders and guarantee economic access to external sources of financing.
EXOR constantly monitors changes in the consolidated debt level of the Holdings System in relation to the current asset value of its investments and dividend flows from the operating holdings.
Although currently insignificant, a very prudent approach is adopted with regard to the use of financial leveraging.

Other comprehensive income included in the statement of comprehensive income

The composition of “Other comprehensive income” included in the statement of comprehensive income is as follows:

€in millions	**2009**	2008
Effective portion of gains (losses) on cash flow hedges arising during the year	**(8)**	(14)
Effective portion of gains (losses) on cash flow hedges reclassified to income statement	**1**	0
Effective portion of gains (losses) on cash flow hedges	**(7)**	(14)
Gains (Losses) on fair value of available-for-sale financial assets arising during the year	**230**	(425)
Gains (Losses) on fair value of available-for-sale financial assets reclassified to income statement	**36**	(415)
Gains (Losses) on fair value of available-for-sale financial assets	**266**	(840)
Gains (Losses) on exchange differences on translating foreign operations arising during the year	**(2)**	16
Gains (Losses) on exchange differences on translating foreign operations reclassified to income statement	**0**	0
Gains (Losses) on exchange differences on translating foreign operations	**(2)**	16
Actuarial gains (losses) arising during the year	**2**	(6)
Actuarial gains (losses) reclassified to income statement		0
Actuarial gains (losses)	**2**	(6)
Share of other comprehensive income of entities accounted for using the equity method arising during the year	**126**	(292)
Share of other comprehensive income of entities accounted for using the equity method reclassified to income statement	**101**	(84)
Share of other comprehensive income of entities accounted for using the equity method	**227**	(376)
Income taxes relating to other comprehensive income	**(1)**	16
Total other comprehensive income, net of tax	**485**	(1,204)

The income tax effect relating to Other comprehensive income can be analyzed as follows:

	12/31/2009			12/31/2008		
€in millions	**Before tax amount**	**Tax benefit/ (expense)**	**Net-of-tax**	Before tax amount	Tax benefit/ (expense)	Net-of-tax

Gains (Losses) on fair value of exchange differences on translating foreign operations	**(2)**		**(2)**	16	3	19
Actuarial gains (losses)	**2**		**2**	(6)	2	(4)
Share of other comprehensive income of entities accounted for using the equity method	**227**		**227**	(376)		(376)
Total other comprehensive income	**486**	**(1)**	**485**	(1,220)	16	(1,204)

Treasury stock

Under the treasury stock buyback program approved by the board of directors on March 25, 2009, during 2009, EXOR purchased 2,550,000 ordinary shares (1.59% of the class) at the average cost per share of €11.6 and a total of €29.6 million, 1,605,000 preferred shares (2.09% of the class) at the average cost per share of €6.67 and a total of €10.7 million, and also 208,400 savings shares (2.27% of the class) at the average cost per share of €8.26 and a total of €1.7 million. The overall investment amounts to €42 million (approximately 84% of the maximum amount of €50 million stated in the program).

In October, the subsidiary Exor Services (formerly Soiem) sold 214,756 EXOR ordinary shares (0.13% of the class) previously held for proceeds of €2.8 million.
Exor Services also reimbursed EXOR for the payment at one time made by IFIL for the carrying amount of its shares held by the subsidiary.

At December 31, 2009, EXOR S.p.A. held the following treasury stock:

Class	Number of shares	% of class	Carrying amount Per share (€)	Total (€ml)
ordinary	2,550,000	1.59	11.60	29.6
preferred	6,965,300	9.07	11.66	81.2
savings	208,400	2.27	8.26	1.7
				112.5

Non-controlling interests

Details are as follows:

		12/31/2009			12/31/2008		
€in millions	%	**Capital and reserves**	**Profit (Loss)**	**Total**	Capital and reserves	Profit (Loss)	Total
IFIL					1,573	133	1,706
C&W Group	21	**52**	**(18)**	**34**	61	(6)	55
Alpitour Group	(a)	**3**	**2**	**5**	4	1	5
Juventus Football Club S.p.A.	40	**44**	**2**	**46**	46	(2)	44
Total		**99**	**(14)**	**85**	1,684	126	1,810

(a) Non-controlling interests in subsidiaries of the Alpitour Group.

Non-controlling interests at December 31, 2008 had amounted to €1,810 million, of which €1,706 million represented the non-controlling interests of the IFIL Group. The difference of €1,275 million between that amount and the fair value of the EXOR capital increase described previously (€431 million) was allocated to owners of the Parent and then entries were made to eliminate the share of the reserves regarding cash flow hedges (-€55 million), exchange differences on translating foreign operations (-€33 million), changes in fair value of available-for-sale financial assets (+€103 million) and actuarial losses (-€4 million) previously recorded in the consolidated financial statements of the IFIL Group.

Non-controlling interests of C&W Group

At December 31, 2009, C&W Group is owned 71.03% (74.12% of capital stock outstanding) by EXOR and 28.97% (25.88% of capital stock outstanding) by its employees (the Minority Shareholders or non-controlling interests).
C&W Group has an agreement with the Minority Shareholders (the "Minority Shareholders Agreement" or "MSA") which outlines all the rights and obligations of C&W Group and the Minority Shareholders with respect to the ownership of the minority shares.
The Minority Shareholders Agreement provides C&W Group with the right to call for purchase, at its sole discretion beginning on the date a Minority Shareholder ceases to be an employee or independent contractor of C&W Group and ending on the first

anniversary date of the employment termination, of all or a portion of the shares held by the Minority Shareholder at the most recent appraised fair value of C&W Group stock as of the last day of the quarter in which the shares are called, with certain exceptions (the "Call Right").

Upon and subsequent to the third anniversary of EXOR's purchase of C&W Group (March 30, 2010), the Minority Shareholders Agreement provides each of the Minority Shareholders, who are no longer an employee or independent contractor of the Company, the right to require C&W Group to repurchase all, but not less than all, of the shares held by the Minority Shareholder at the most recent appraised fair value of C&W Group stock, with certain exceptions (the "Put Right").

Under the EXOR Shareholder Agreement (ESA), EXOR will cause C&W Group to use commercially reasonable efforts to provide liquidity to the Minority Shareholders following the fifth anniversary of EXOR's purchase of C&W Group at the then appraised fair value of C&W Group shares (the "Liquidity Event").

In addition, in the event of an initial public offering of C&W Group's stock (an "IPO") or sale of C&W Group under the ESA, EXOR and the Minority Shareholders have Drag-Along and Tag-Along Rights, respectively, with respect to the Minority shares.

If EXOR were to exercise its Drag-Along Rights, C&W Group may not exercise its Call Right, and the Minority Shareholders may not exercise their Put Right or Tag-Along rights.

Conversely, if the Minority Shareholders were to exercise their Tag-Along rights, C&W Group may not exercise its Call Right.

The Minority Shareholders' Put Right and Tag-Along Rights give control of the decision to receive cash or shares, in exchange for their Minority shares, to the Minority Shareholders if the shareholder ceases to be an employee or independent contractor of C&W Group before the occurrence of an IPO or sale of C&W Group.

According to IFRS 2 – Share-based payment, applicable in the circumstance, since the shares come from stock option plans, the Minority shares constitute a compound financial instrument comprising a liability component and an equity component.

To value the liability component, C&W Group estimated, based on historical employment attrition rates and related actual and expected stock repurchases, the extent to which the Minority Shareholders would cease to be employees or independent contractors of C&W Group and, therefore, exercise their Put Rights before the occurrence of an IPO or sale of C&W Group by EXOR.

As of December 31, 2009, the liability, which was estimated to be approximately $47 million (€ 33 million) at the then appraised fair value of C&W Group shares, was reclassified from additional paid-in capital within equity to liabilities in the consolidated statement of financial position.

Approximately $12 million (€ 8 million) was recorded within other current liabilities, which represents the expected cash outflow for Minority share repurchases in 2010. The balance of the liability of approximately $35 million (€ 25 million) was recorded within other non-current liabilities as of December 31, 2009.

While C&W Group did not record a liability for its estimated obligations to repurchase shares from Minority Shareholders in its financial statements prior to December 31, 2009, C&W Group determined that the effect of these obligations is not material to its financial statements for prior periods.

In its consolidated financial statements, EXOR maintained the same accounting treatment. Having recorded a part of the equity attributable to the Minority Shareholders of C&W Group, the number of C&W shares to be considered as equity outstanding is lower. For this reason, EXOR has consolidated C&W Group on the basis of an ownership percentage of 78.88%. Such percentage is calculated as a percentage of the number of C&W shares held by EXOR (511,015) to the capital issued by C&W Group (719,453) net of treasury stock held (30,003) and net of the shares held by the Minority Shareholders which are estimated will be purchased by C&W Group according to the agreements outlined above (41,620).

28. Stock option plans

Stock option plans with underlying EXOR stock

The ordinary session of the IFIL stockholders' meeting held on May 13, 2008 had approved the stock option plan IFIL 2008-2019 for the chief executive officer, Carlo Barel di Sant'Albano, for 3,000,000 stock options corresponding to the same number of IFIL ordinary shares and for the employees of the IFIL Group (IFIL S.p.A. and the companies in the Holdings System) who are or will be regarded as key people in the organization on the basis of the positions held or activities performed, for a maximum of 12,000,000 stock options.

Following the merger, the stock option plan was taken over by EXOR S.p.A.. Therefore, the EXOR S.p.A. board of directors held on March 2, 2009 made the adjustments to the stock option Plan resulting from the merger, particularly adjusting the ratio between the number of options and the number of underlying shares and the exercise price on the basis of the merger's exchange ratio.

The Stock Option Plan EXOR 2008-2019 thus covers a maximum number of 15,000,000 options corresponding to a maximum of 3,975,000 EXOR ordinary shares. At the end of the reporting period, a total of 9,475,000 options have been granted to 17 people, including the chief executive officer, corresponding, on the basis of the exchange ratio, to 2,510,875 EXOR ordinary shares. The Plan grants the recipients free options on treasury stock purchased by the company or by companies in the Holdings System in accordance with existing laws. The Plan does not provide for the issue of new shares so there are no dilutive effects on capital stock. The treasury stock held by IFIL, including those to service the Plan, were canceled and did not form part of the exchange ratio under the merger in accordance with the law. The EXOR board of directors' meeting held on March 25, 2009 approved a plan to purchase treasury stock of the three classes partly to service the above stock option Plan.

The fair value of the 9,525,000 options granted was determined to be €15,263 thousand, divided as follows:

€ in thousands	Number of options granted	Number of EXOR shares exercisable	Total cost	Cost referring to the year
Options granted originally:				
Chief Executive Officer, EXOR S.p.A.	3,000,000	795,000	4,807	601
Key employees, EXOR S.p.A. (13)	4,425,000	1,172,625	7,091	886
Total EXOR S.p.A.	7,425,000	1,967,625	11,898	1,487
Key employees of EXOR S.A. and other subsidiaries in the Holdings System (4)	2,100,000	556,500	3,365	437
Total	**9,525,000**	**2,524,125**	**15,263**	**1,924**

In 2009, 50,000 options originally assigned to key employees of EXOR S.p.A. were forfeited. Therefore, at December 31, 2009 there are 9,475,000 options.

The adjusted exercise price is €19.97 for each EXOR share.

The cost referring to the year amounts to €1,924 thousand, of which €601 thousand is classified as emoluments for the chief executive officer and €1,323 thousand as personnel costs. The corresponding entry of €1,924 thousand is recorded in the stock option reserve.

Stock option plan with underlying Alpitour stock

With reference to the stock option plan approved by IFIL S.p.A. for two managers of the Alpitour Group in December 2005, it should be noted that after the merger, EXOR S.p.A. took over the relative commitments.

The plan calls for purchase options on Alpitour shares to be granted to the chairman and chief executive officer, D.J. Winteler, and the general manager, F. Prete, respectively, equal to 6% (2,127,000 shares) and 5% (1,772,500 shares) of Alpitour's capital stock.
After approval on the part of EXOR S.p.A., the Alpitour S.p.A. board of directors may in the future grant purchase options on Alpitour shares to other managers who hold important operating positions equal to 4% of Alpitour's capital (now 1,418,000 shares).
After reconfirmation of the positions of the two managers for another three years, the EXOR S.p.A. board of directors' meeting held on May 13, 2009 extended the period in which the options could be exercised to January 2013 (date of the approval of the Alpitour financial statements for the financial year 2011/2012 by the stockholders' meeting).
EXOR S.p.A. and the managers of Alpitour S.p.A., finally, exchanged reciprocal purchase and sale options, exercisable during the same above period, on Alpitour shares that will have been purchased by the same managers; the exercise price will be established on the basis of an appraisal which will be performed using the same valuation principles applied in the December 2005 valuation.

From an accounting standpoint, the plan is a cash-settled stock-based payment transaction subject to paragraph 30 and subsequent paragraphs of IFRS 2, which requires the liability of the plan to be measured at fair value and, therefore, the options of the plan, at every reporting date, until plan expiration.

At December 31, 2009, the fair value of each option right of the plan is estimated at €3.14 for a total of €12,233 thousand (€8,075 thousand at December 31, 2008) recorded in "Other current liabilities with related parties". The increase in the liability compared to the prior year (€4,158 thousand) was recognized in the income statement in "Non-recurring other expenses from related parties" as the portion relating to the current year.

The estimate was performed by an independent expert who applied a binomial model of valuation to the options based on the following parameters:

1. The exercise price of the options has been assumed to be equal to the par value of one ordinary Alpitour share at the grant date, quantified on the basis of an estimate performed by an independent expert, equal to €2.24.
2. The current price of an Alpitour ordinary share at the reference date of December 31, 2009 has been determined in €4.98.
3. The last expiration date to exercise options has been established as the date of the approval of the Alpitour S.p.A. financial statements for the year 2011/2012, fixed, conventionally, as January 31, 2013. At the date of reference of December 31, 2009, the options thus have a remaining life of 37 months (3 years and 1 month).
4. The expected volatility has also been determined by referring to the historical volatility, measured over a period consistent with the remaining life of the shares in the plan, of a sample of listed companies operating in the same sector as Alpitour.
5. The application of the valuation model assumes the absence of the payment of dividends.
6. The risk-free interest rate has been assumed to be equal to the return on government securities having a residual life consistent with the expiration of the options in the plan.
7. An assumption has also been included in the "binomial" model for the early exercise of the option rights during the period between the end of the vesting period and contractual expiration date of the options.

C&W Group stock option plans

There are two separate stock option plans which are summarized in the following table: “Employee Stock Purchase Plan Options” and “Management Options”:

	Grant date	Number of options granted	Vesting date	Exercise price at grant date	Term of options	Outstanding at December 31, 2009
Employee Stock Purchase Plan						
Tranche 1	12/14/2005	11,166	1/1/2008	$548	10 years	4,307
Tranche 2 (a)	6/29/2006	7,385	1/1/2009	$782	10 years	0
Total Employee Stock Purchase Plan		18,551				4,307
Management Options						
Non-performance based options	1/1/2008	74	2009	$1,318	10 years	0
Performance based options (Ebitda/Ebitda Margin)						
Tranche 1	4/1/2007	13,450	2007-2011	$1,259	10 years	10,672
Tranche 2	1/1/2008	321	2009	$1,318	10 years	0
Tranche 3	6/1/2008	850	2009-2011	$1,252	10 years	850
Tranche 4	6/30/2008	500	2009-2011	$1,252	10 years	500
Tranche 5	9/30/2008	225	2010-2012	$1,190	10 years	225
Tranche 6	11/1/2008	225	2010-2012	$1,190	10 years	225
Total		15,571				12,472
Total Management Options		15,645				12,472
Total Options		34,196				16,779

(a) Tranche 2 options were forfeited during 2008 as the performance condition was not met.

The Employee Stock Purchase Plan options outstanding at December 31, 2009 have an average exercise price of $548 and an average remaining contractual life of approximately 6 years.

The Management Options outstanding at December 31, 2009 have an exercise price of $1,183 and an average remaining contractual life of approximately 8 years.

	2009			
	Employee Stock Purchase Plan		Management Options	
	Number of shares	Weighted average exercise price ($)	Number of shares	Weighted average exercise price ($)
Outstanding at 1/1/2009	4,644	548.02	14,367	1,279.41
Granted during the period				
Exercised during the period	(42)	548.02		
Forfeited during the period	(295)	548.02	(182)	1,302.08
Cancelled during the period			(1,713)	1,296.21
Outstanding at 12/31/2009	**4,307**	**548.02**	**12,472**	**1,183.14**
Exercisable at 12/31/2009	**4,307**	**548.02**	**984**	**1,281.27**

	2008			
	Employee Stock Purchase Plan		Management Options	
	Number of shares	Weighted average exercise price ($)	Number of shares	Weighted average exercise price ($)
Outstanding at 1/1/2008	12,054	685.91	13,450	1,258.68
Granted during the period	-	-	2,195	1,251.17
Exercised during the period	(16)	548.02	-	1,258.68
Forfeited during the period	(302)	548.02	(950)	1,258.68
Cancelled during the period	(7,092)	782.39	(328)	
Outstanding at 12/31/2008	**4,644**	**782.39**	**14,367**	**1,279.41**
Exercisable at 12/31/2008	**4,644**	**548.02**	**1,092**	**1,258.68**

In accordance with the provisions of IFRS 2, the appraisal of the stock option plans was based on the Black-Scholes pricing model using the following assumptions:

	Employee Stock Purchase Plan	Management Options
	Tranche 1	Tranche 1 – Tranche 6
Stock price at grant date ($)	578.68	1.190 – 1.332
Exercise price at grant date ($)	548.02	1.190 – 1.332
Expected volatility (%)	35	35-40
Option life (years)	6.5	10.0
Expected dividends (%)	1.20	n.a.
Risk-free interest rate (%)	4.22	3.85 – 4.74

Volatility is based on the historical volatility of comparable public companies.
Because C&W Group does not have historical exercise data, it used the midpoint between the vesting date and the contractual term to determine the expected term of the stock options.

During 2009, costs of €7 million were capitalized for both stock option plans.

29. Provisions for employee benefits

The companies of the Group provide post-employment benefits for their active employees and retirees, either directly or by contributing to independently administered funds. The way these benefits are provided varies according to the legal, fiscal and economic conditions of each country in which the Group companies operate, the benefits generally being based on the employees' remuneration and years of service. Post-employment benefits are provided under defined contribution and/or defined benefit plans.

In the case of defined contribution plans, the Group companies pay contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. Once the contributions have been paid, the Group has no further payment obligations. The contribution cost is recognized when the employee has rendered his/her service and this cost is recorded in the income statement in "Personnel costs".

Defined benefit plans may be unfunded, or they may be wholly or partly funded by contributions paid by a company, and sometimes by its employees, into a company, or fund, that is legally separate from the employer and from which the employee benefits are paid.
Finally, the companies of the Group grant certain other long-term benefits to its employees; these benefits include those generally paid when an employee attains a certain level of seniority or when a specified event occurs. In this case, the measurement of the obligation reflects the probability that payment will be required and the length of time for which payment is expected to be made.

Details of the provisions for employee benefits recognized in the financial statements at December 31, 2009 and 2008 are the following:

	Non-current part		Current part	
€ in millions	**12/31/2009**	12/31/2008	**12/31/2009**	12/31/2008
Employee severance indemnities	**20**	24	**4**	2
Pension plans	**13**	13	**0**	0
Total post-employment benefits	**33**	37	**4**	2
Other employee benefits	**3**	5	**28**	40
Total provisions for employee benefits	**36**	42	**32**	42

Post-employment benefits

Employee severance indemnities

Employee severance indemnities relating to the companies of the Group operating in Italy represent the obligation due to employees by law (recently amended by Law 296/06) that has accrued and which will be paid upon termination of employment. In certain circumstances, a portion of the indemnity may be paid as an advance during the employee's service life. This is an unfunded defined benefit plan, considering the benefits almost entirely accrued, with the sole exception of the revaluation.

After the change made to the regulations for employee severance indemnities by Law 296 dated December 27, 2006 (Budget Law 2007), and subsequent decrees and regulations, for those employees who have asked, the portion of employee severance indemnities accruing from January 1, 2007 has been transferred to a complementary pension plan chosen by the employees and these therefore fall under defined contribution plans.

For those employees who did not elect the transfer of the accrued portion of employee severance indemnities, beginning January 1, 2007, the calculation of employee severance indemnities, including the portion accruing, will be made according to the usual actuarial method.

In accordance with IAS 19 – Employee Benefits, the Italian companies of the Group have included employee severance indemnities under defined benefit plans and measure them with actuarial techniques using the Project Unit Credit Method.

Besides employee severance indemnities, established by art. 2120 of the Italian Civil Code, EXOR S.p.A. guarantees other forms of benefits (termination benefits, loyalty bonuses, health care plans, defined benefit and defined contribution pension plans) under company or individual supplementary agreements. These are described in Note 36 to the separate financial statements.

Pension plans

The C&W Group funds a certain number of defined contribution plans set up pursuant to the laws in force in the countries in which it operates.
The European partnership (C&W UK) also provides a form of hybrid pension plan (UK Plan) which has features of both defined contribution and defined benefit plans.

C&W UK ceased its contributions to the plan effective March 31, 2002 and, subject to certain transitional agreements, introduced a defined contribution plan for employees starting from that date.

Changes in the present value of post-employment benefit obligations and the fair value of assets servicing the plans during the course of the last two years are as follows:

€ in millions	Balance at 12/31/2008	Current service cost	Financial expenses	Actuarial losses (gains)	Benefits paid	Losses (gains) on curtailments and/or settlements	Exchange differences	Change in scope of consolidation and other changes	**Balance at 12/31/2009**
Present value of obligation:									
Employee severance indemnities	26	3	-	(1)	(4)	-	-	-	**24**
Pension plans	42		3	5	(1)	-	3	-	**52**
	68	3	3	4	(5)	0	3	0	**76**

Total post-employment benefits	68	3	3	4	(5)	0	3	0	**76**
Other long-term benefits	5	1	-	-	0	-	-	(3)	**3**
Other short-term benefits	40	42	-	-	(35)	-	(2)	(17)	**28**
	113	46	3	4	(40)	-	1	(20)	**107**
Of which:									
Funded plans (wholly or partly)	42								**52**
Unfunded plans	71								**55**

€ in millions	Balance at 12/31/2008	Expected return on assets	Contributions paid by company	Actuarial losses (gains)	Benefits paid	Losses (gains) on curtailments and/or settlements	Exchange differences	Change in scope of consolidation and other changes	**Balance at 12/31/2009**
Fair value of the plan assets:									
Pension plans	29	2	2	5	(1)	-	2	-	**39**
Total post-employment benefit plans	29	2	2	5	(1)	-	2	-	**39**
Total net liabilities at December 31, 2009	**84**	**44**	**1**	**(1)**	**(39)**	**-**	**(1)**	**(20)**	**68**

€ in millions	Balance at 12/31/2007	Current service cost	Financial expenses	Actuarial losses (gains)	Benefits paid	Losses (gains) on curtailments and/or settlements	Exchange differences	Change in scope of consolidation and other changes	**Balance at 12/31/2008**
Present value of obligation:									
Employee severance indemnities	28	5		1	(4)			(4)	**26**
Pension plans	55		3	(2)	(1)		(13)		**42**
	83	5	3	(1)	(5)	0	(13)	(4)	**68**
Other post-employment benefits	-								**-**
Total post-employment benefits	83	5	3	(1)	(5)	0	(13)	(4)	**68**
Other long-term benefits	11	4			(10)				**5**
Other short-term benefits	109				(44)		2	(27)	**40**
	203	9	3	(1)	(59)	-	(11)	(31)	**113**
Of which:									
Funded plans (wholly or partly)	55								**42**
Unfunded plans	148								**71**

€ in millions	Balance at 12/31/2007	Expected return on assets	Contributions paid by company	Actuarial losses (gains)	Benefits paid	Losses (gains) on curtailments and/or settlements	Exchange differences	Change in scope of consolidation and other changes	**Balance at 12/31/2008**
Fair value of the plan assets:									
Pension plans	45	3	-	(11)	(1)		(10)	3	**29**
Total post-employment benefit plans	45	3	-	(11)	(1)	-	(10)	3	**29**
Total net liabilities at December 31, 2008	**158**	**6**	**3**	**10**	**(58)**	**-**	**(1)**	**(34)**	**84**

Post-employment benefits are calculated on the basis of the following actuarial assumptions:

	December 31, 2009		December 31, 2008	
	Employee severance indemnities	**Pension plans**	Employee severance indemnities	Pension plans
Discount rate	**4.10%**	**6.00%**	4.80%	6.00%
Future salary increase (inflation included)	**1.9-3.4%**		2.2-3.7%	
Inflation rate	**1.90%**		2.20%	
Expected return on plan assets		**6.00%**		7.00%

The assumptions used for the calculation of pension funds are as follows:

- the discount rate is the yield at the reporting date on AA credit-rated bonds that have maturity dates approximating the terms of C&W Group's obligations and that are denominated in the same currency in which the benefits are expected to be paid;
- the mortality rate is based on statistical tables.

The "UK Plan" assets include marketable equity securities in both United Kingdom and United States companies and fixed-rate debt securities.
The investment policies and strategies for the plan assets are established to achieve a reasonable balance between risk, likely return and administration expenses, as well as to maintain funds at a level to meet minimum funding requirements. In order to ensure that an appropriate investment strategy is in place, an analysis of the plan's assets and liabilities is completed periodically.

	Fair value of plan assets		Expected return	Fair value of plan assets		Expected return
	December 31, 2009		**2009**	December 31, 2008		2008
	Target	Actual		Target	Actual	
Equity securities	**56.0%**	**42.4%**	**6.0%**	87.2%	37.5%	6.0%
Debt securities	**44.0%**	**55.5%**	**6.0%**	7.5%	56.1%	6.0%
Cash	**0.0%**	**2.1%**	**6.0%**	5.3%	6.4%	6.0%

The estimated expense for contributions to be paid to the defined benefit plan in 2010 amounts to £ 1.5 million (€2 million).

The expected long-term rate of return on assets is 6.33% (6.16% in 2008). The expected long-term rate of return is based on the sum of returns of individual asset categories expected to be achieved in the future. The return is based exclusively on historical returns, without adjustments.

The total amounts recognized in the income statement for post-employment benefits are the following:

€in millions	**2009**	2008
Current service cost	**3**	5
Financial expenses	**3**	3
Expected return on plan assets	**(2)**	(3)
Total (income) expenses for post-employment benefits	**4**	5

Other employee benefits

Other employee benefits, of which €3 million is non-current and €28 million is current, mainly include the liabilities of C&W Group.

30. Provisions for other liabilities and charges

The composition of provisions is as follows:

	Current portion		Non-current portion	
€ in millions	**12/31/2009**	12/31/2008	**12/31/2009**	12/31/2008
Restructuring provisions	**9**	3	**0**	0
Other risks provisions	**12**	14	**3**	99
Tax provision	**0**	6	**5**	6
Total	**21**	23	**8**	105

The current portion of the other risks provisions (€ 12 million) includes amounts set aside for pending disputes of C&W Group for € 7 million, the Alpitour Group for € 4 million and Juventus Football Club for € 1 million.

The non-current portion of the other risks provision is due within five years.

Changes in the current and non-current provisions in 2009 and 2008 are as follows:

€ in millions	Balance at 12/31/2008	Accruals	Release of provisions used	Other changes	**Balance at 12/31/2009**
Restructuring provisions	3	21	(15)	0	**9**
Other risks provisions	113	11	(28)	(81)	**15**
Tax provision	12	0	(7)	0	**5**
	128	32	(50)	(81)	**29**
Effect on the income statement:					
Operating profit (loss) from current operations		11	(12)		
Non-recurring other income (expenses)		21	(19)		
Other financial income (expenses)					

€ in millions	Balance at 12/31/2007	Accruals	Release of provisions used	Other changes	**Balance at 12/31/2008**
Restructuring provisions	0	5		(2)	3
Other risks provisions	114	21	(18)	(4)	113
Tax provision	1	4		7	12
	115	30	(18)	1	128
Effect on the income statement:					
Operating profit (loss) from current operations		24	(18)		
Non-recurring other income (expenses)		6			
Other financial income (expenses)					

In 2008, C&W Group, in response to the continuing economic crisis, had begun a plan to cut structure costs and particularly to reduce the workforce.
During 2009, C&W Group approved another plan of cost cutting initiatives and set aside a further € 21 million in the restructuring provision. The provision used in 2009 amounts to € 15 million.

The provision for other liabilities and charges created in 2003 as part of the execution of the reorganization plan of the Group (€ 81 million), after the merger by incorporation of IFIL in EXOR, was recorded as an increase of equity, consistently with the accounting treatment followed when the provision was set up.

The release of provisions used column under other risks provisions includes € 19 million originating from the private contract for novation and integration dated December 22, 2009 and signed by Juventus Football Club and Costruzioni Generali Gilardi S.p.A. under which Campi di Vinovo S.p.A. will assume the liabilities originally estimated to be borne by Juventus Football Club with the public sector. Further details are provided in Note 23.

31. Pending litigation

EXOR S.p.A. and subsidiaries in the Holdings System

Proceedings relative to the contents of the press releases issued by IFIL S.p.A. and Giovanni Agnelli e C. S.a.p.az. on August 24, 2005

On February 21, 2006, Consob advised Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone as well as IFIL and Giovanni Agnelli e C. of notification in respect of the start of a sanctionary proceeding under art. 187-*septies* of Consolidated Law on Finance under the assumption that each of those individuals violated art. 187-ter, paragraph 1 (Market Manipulation) of Consolidated Law on Finance in relation to the content of the press releases diffused by IFIL and Giovanni Agnelli e C. on August 24, 2005 and that the companies violated the responsibility of entities pursuant to art. 187-quinquies of the Consolidated Law on Finance and joint and several responsibility pursuant to art. 6, paragraph 3 of Law 689/1989.

On February 13, 2007, the Consob measure (Resolution 15760) was notified which, at the conclusion of the proceeding, applied the following pecuniary administrative sanctions:

- to Gianluigi Gabetti (chairman of IFIL and chairman of Giovanni Agnelli e C.) €2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL and €2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to Franzo Grande Stevens (director of IFIL) €2 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL and €1 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to Virgilio Marrone (chief executive officer and general manager of IFI) €500 thousand in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to IFIL €4.5 million;
- to Giovanni Agnelli e C. €3 million;

and the additional following administrative sanctions: temporary inability to assume positions of administration, direction and control in listed companies or in companies that are part of the same group of listed companies:

- to Gianluigi Gabetti: for six months;
- to Franzo Grande Stevens: for four months;
- to Virgilio Marrone: for two months.

The persons and companies involved in the sanctionary measure filed appeals with the Court of Appeals of Turin. In the opposing judgment, the Court of Appeals suspended the additional administrative sanctions, and in its decision of December 5, 2007 reduced the administrative sanctions levied from a total of €16 million to €6.3 million. The reduction for IFIL was from €4.5 million to €1 million and for Giovanni Agnelli e C. from a total of €3 million to €600 thousand and for Gianluigi Gabetti from a total of €5 million to €1.2 million in addition to a reduction of two months, from six to four months, in respect of the additional administrative suspension.

In July 2008, IFIL filed an appeal with the Court of Cassation against the ruling by the Court of Appeals of Turin. Appeals were also filed with the Court of Cassation by the other parties involved in the Consob sanctionary measure. In October 2008, Consob notified the company that it had filed a counter-appeal and an incidental appeal asking for the rejection of the main appeal and the cancellation of the reductions of the sanctions originally levied. Consob acted in the same manner against the other petitioners. In November 2008, IFIL filed a counter-appeal with the Court of Cassation against Consob's incidental appeal. The other parties referred to in Consob's incidental appeal also filed a counter-appeal with the Court of Cassation.

In the penal proceedings for the same press releases, on November 7, 2008, the Preliminary Hearing Judge of the Turin Court committed Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone to trial for the offense pursuant to art. 185 of the Consolidated Law on Finance, as well as IFIL and Giovanni Agnelli e C., as those responsible administratively under Legislative Decree 231/2001. The final discussion is coming to a close and the conclusion with a ruling is scheduled for April 22, 2010.

Alpitour Group

In reference to the damages to the "Bravo Club" resort in Zanzibar caused by the fire in January 2001, a case is pending before the competent authorities in Tanzania to establish the compensation for damages due from Royal Insurance. During 2005, Royal Insurance was sentenced, in the judgment of first instance, to pay the damages requested in addition to interest and legal fees. The insurance company appealed this decision and the case is now being judged in the second instance. Based on available information, it is believed that there is reasonable certainty that the judgment of the first instance will be upheld.

C&W Group

On January 3, 2010, a lawsuit seeking class action status was brought against Credit Suisse AG, Credit Suisse Securities (USA) LLC, Credit Suisse First Boston, Credit Suisse Cayman Island Branch and Cushman & Wakefield Inc. in connection with lending activities associated with the development of four luxury resorts, each located in the United States.

In connection with the financing that Credit Suisse provided on the developments, the C&W Group was engaged by Credit Suisse and others to prepare valuations.

The complaint alleges that Credit Suisse devised a "loan to own" scheme whereby it used artificially inflated appraisals prepared by C&W Group to justify making excessive loans which the developers were unable to service. Plaintiffs allege Credit Suisse and C&W Group violated various statutes under U.S. law. Plaintiffs claim $8 billion in economic damages and $16 billion in punitive damages.

Based on management's review of the facts, management believes the plaintiff's case against the Company is without merit. The Company intends to vigorously defend this matter.

Juventus Football Club

Guardia di Finanza access

On July 3, 2008, the *Guardia di Finanza* entered the Juventus Football Club headquarters to conduct a general examination of substance as permitted by and pursuant to art. 32 and art. 33 of DPR 600/73, art. 51 and art. 52 of DPR 633/1972 and art. 35 of Law 4/1929, concerning the period from July 1, 2005 to the date of access for direct taxes and from January 1, 2006 to the date of access for VAT and other indirect taxes.

Moreover, following the company's involvement, pursuant to Legislative Decree 231 of 2001, in the proceedings pending at the Turin Courts for financial misrepresentation, the examination has also been extended to the years 2001/2002, 2003/2004 and 2004/2005, which would otherwise have been partly statute barred.

On July 23, 2009, the Guardia di Finanza concluded the inspection regarding the annual returns from 2001/2002 to 2007/2008 (excluding 2002/2003), issuing the report on its findings on the same date. The report alleges violations, for significant amounts, of the tax regulations on some transactions concerning players' registration rights, the remuneration paid to agents for services rendered and other minor matters.

In January 2010, the former chairman, Giovanni Cobolli Gigli and the current chairman Jean-Claude Blanc were served with a summons by the Attorney General's Office of Turin to present their defense against findings of tax evasion with regard to VAT payable for the years 2005, 2006 and 2007. The summons was a formality following notification by the *Guardia di Finanza* of its audit report to the Attorney General's Office.

At the date of this Report, no assessment has been received from the Revenues Agency. The company and its delegated legal representatives maintain that Juventus has always observed the regulations in force and they will use the rights envisaged by the taxpayers' statute (Law 212/2000), conducting, if necessary, the company's defense in the manner and according to the times established by law.

VAT receivables on UEFA Champions League revenues

Following resolution 174/E, on May 25, 2004, the Revenues Agency of Turin had approved the right to the reimbursement of VAT regarding the UEFA tournaments played in the 2000/2001 and 2001/2002 seasons for a total of €5.4 million. Following this approval, the company proceeded to recognize the related receivable with a corresponding entry to extraordinary income. Part of the receivable was received in June 2004 for €1.2 million.

The remaining amount of approximately €4.2 million was sold without recourse to a factoring company in December 2004 and was derecognized from the statement of financial position from that date. Of the total amount sold to the factoring company, the Revenues Agency later reimbursed the amount in installments for €2.8 million. In July 2008, the Revenues Agency notified Juventus Football Club and the factoring company of its refusal to pay the last installment of about €1.4 million citing disputes over the justification of the request for reimbursement presented by Juventus Football Club. This refusal is in contrast with the original acknowledgment of the receivable in May 2004. On October 15, 2008, the company filed an appeal together with the factoring company in the tax court challenging the assertions of the Revenues Agency and in any case reserving the right to take any possible action to protect itself later in civil proceedings.

On July 17, 2009, notification was received that, following the hearing of May 21,2009, the appeal had been upheld by the Provincial Tax Tribunal of Turin.

On November 2, 2009, the Revenues Agency filed its appeal against this ruling.

On December 23, 2009, the company filed its defense, pending the setting of the hearing by the Regional Tax Tribunal.

Proceedings at the Turin Courts

In reference to the proceedings underway at the Turin Courts for financial misrepresentation, after the original filing of charges against only some former directors, on October 16, 2008, notification was received at the company office of the conclusion of inquiries and the filing of documents also against the company, held to be liable under Legislative Decree 231 of 2001, limited to some transactions for the sale/purchase of football players.

In these same proceedings, on October 29, 2008, the judge for the preliminary investigations, at the request of the public prosecutors, decided instead to close the part of the inquiry regarding the sale of Campi di Vinovo S.p.A.

On November 24, 2009, the former directors standing trial and Juventus Football Club, indicted as administratively liable under Legislative Decree 231/2001, were found not guilty and acquitted of charges of financial misrepresentation by the Court of Turin. Publication of the grounds for the ruling is pending.

Proceedings at the Naples Courts

With the ruling issued on October 20, 2009, based on the Court of Cassation decision issued October 9, 2009, the Court of Naples allowed some plaintiffs to file claims in the suit against Juventus Football Club. The company will present its case as laid down by law, confident of its solid grounds.

On December 14, 2009, the Court of Naples convicted, on first instance, the company's former chief executive officer of sports fraud and aiding and abetting crime, in a trial heard as a shortened proceeding. Publication of the grounds for the ruling is pending.

Como Calcio Bankruptcy

The bankruptcy of Como Calcio in June 2006 led to action brought against Juventus Football Club involving a claim for payment of €1,580,000 allegedly still due to Como Calcio for the sale of the registration rights of the players Piccolo and Pederzoli.
As a result of this claim, the company has set up a provision for same amount.
Juventus Football Club appeared before the courts and requested that the liquidator's demands be rejected as the sum had already been paid and asked that Mr Preziosi be summoned to court so that Juventus Football Club could be relieved of responsibility and held unaccountable in the event of a judgment against it. The first hearing in the case was adjourned to March 12, 2008 so that Mr Preziosi could be summoned. Mr Preziosi was summoned and appeared and asked that the demands against him be rejected. The preliminary hearing on the case is still in progress and it is expected that the sentence can be filed in the early months of 2010.

32. Consolidated net financial position

The composition of the gross and net financial position of the consolidated companies is as follows:

€ in millions	Gross debt	Financial assets	Net financial position (debt) cash
EXOR S.p.A. and the Holdings System	(1,131)	1,183	52
C&W Group	(177)	53	(124)
Alpitour Group	(28)	95	67
Juventus Football Club S.p.A.	(16)	26	10
Total	**(1,352)**	**1,357**	**5**

In accordance with Consob Communication 6064293 dated July 28, 2006, the composition of the net financial position of the EXOR Group is presented below:

€ in millions	**12/31/2009**	12/31/2008	Change
Non-current financial liabilities			
EXOR 2007/2017 bonds	**(745)**	(745)	0
EXOR 2006/2011 bonds	**(200)**	(199)	(1)
Debt	**(290)**	(348)	58
Total non-current financial liabilities	**(1,235)**	(1,292)	57
Non-current other financial assets	**90**	4	86
Non-current net financial position (A)	**(1,145)**	(1,288)	143
Current financial liabilities			
Debt	**(38)**	(65)	27
Current portion of medium/long-term debt and bonds	**(35)**	(31)	(4)
Derivative financial instruments	**(15)**	(16)	1
Total current financial liabilities	**(88)**	(112)	24
Current financial assets			
Bonds and equity shares held for trading	**601**	347	254
Derivative financial instruments	**0**	1	(1)
Receivables and other financial assets	**7**	2	5
Total current financial assets	**608**	350	258
Cash and cash equivalents	**630**	975	(345)
Current net financial position (B)	**1,150**	1,213	(63)
Consolidated net financial position (A+B)	**5**	(75)	80

33. Bonds and other debt

The composition is as follows:

	Non-current portion		Current portion	
€ in millions	**12/31/2009**	12/31/2008	**12/31/2009**	12/31/2008
EXOR 2007/2017 bonds	**(745)**	(745)	**(22)**	(22)
EXOR 2006/2011 bonds	**(200)**	(199)	**(1)**	(1)
Debt	**(290)**	(348)	**(50)**	(74)
Derivative financial instruments	**(32)**	0	**(15)**	(16)
Total bonds and other debt	**(1,267)**	(1,292)	**(88)**	(113)

The bonds issued by EXOR S.p.A. are traded on the Luxembourg Stock Exchange. The bonds contain covenants that are common in international practice for bond issues of this type. In particular, they contain negative pledge clauses (the obligation to extend any real present or future guarantees given as collateral on the assets of the issuer on other bonds and other credit instruments to these bonds to the same degree), disallowing a change of control and providing for periodic disclosure. The 2006/2011 bonds also establish other commitments such as observing a maximum debt limit in relation to the amount of the portfolio and maintaining a rating by one of the major agencies. Non-compliance with these covenants allows the bondholders to ask for the immediate redemption of the bonds. Finally, standard events of default are envisaged in the case of serious non-fulfillment such as, for example, failure to pay interest. These covenants were complied with at December 31, 2009.

Any change of control of EXOR would give bondholders the right to the early reimbursement of the Bonds 2006/2011 and 2007/2017 for a total of €950 million.

On February 9, 2010, Standard & Poor's confirmed its rating of EXOR’s long-term and short-term debt (respectively “BBB+” and “A-2”) with a negative outlook.

The 2007/2017 bonds, issued on June 12, 2007 for a nominal amount of €750 million, have an issue price equal to 99.554% of their nominal value with a 5.375% fixed annual coupon.

The EXOR 2006/2011 bonds issued on June 9, 2006 for a nominal amount of €200 million, maturing June 9, 2011, pay interest at the 3-month Euribor rate plus a spread of 68 basis points.
In order to guarantee fixed rate conditions for the entire period of the bonds 2006/2011, interest rate swaps had been put into place in previous years on the entire amount. In 2009, considering the changed conditions of the financial markets, such contracts were early terminated with a payment €8 million.

Debt recorded in current and non-current liabilities for €340 million (€422 million at December 31, 2008) includes the debt of EXOR S.p.A. (€150 million), C&W Group (€146 million), the Alpitour Group (€28 million) and Juventus Football Club (€16 million).

EXOR S.p.A.

With regard to EXOR S.p.A., non-current bank debt amounts to €125 million (€150 million at December 31, 2008). In order to guarantee fixed interest rates, interest rate swap contracts had been put into place for the full amount; at December 31, 2009 the fair value of such contracts is negative for €4 million (€5 million at December 31, 2008).
Bank debt is classified as non-current according to the remaining term of the line granted and the duration of the hedging contracts.
Current bank debt amounts to €25 million (€16 million at December 31, 2008).

The loan contracts relating to irrevocable credit lines provide for commitments to be observed that are typical of the practices in the sector for this type of debt. In particular, some of the main commitments on certain contracts refer to periodical disclosure obligations, prohibition of new real guarantees on the assets of the company without the consent of the creditor, non-subordination of the credit and, in some cases, compliance with financial ratios. Finally, clauses provide for early expiration in the event of serious non-fulfillment such as, for example, failure to pay interest or events that are especially detrimental such as bankruptcy.
In the event of a change in control of EXOR, some lender banks would have the right to ask for the early repayment of the irrevocable credit lines for a total of €155 million.

C&W Group

The debt of C&W Group amounts to €146 million (€165 million at December 31, 2008) and mainly includes the following categories of debt:

- Senior Revolving Credit Facility for $350 million. At December 31, 2009, the outstanding balance is $199 million (€138 million), of which $137 million (€95 million) at the average rate of 4.59%, $39 million (€27 million) at the average rate of 5.33% $10 million (€7 million) at the average rate of 5.03% and $13 million (€ 9 million) at the average rate of 5.25%;
- Seller Note – Burnham for $2.5 million (€2 million);
- other debt for $10 million (€7 million).

The Senior Credit Facility is covered by numerous covenants to be maintained for the entire term of the credit facility including leverage ratios as defined in the contract.
The financial covenants have been complied with from the time the credit facility was secured until December 31, 2009.

Alpitour Group

The debt of the Alpitour Group totaling €28 million (€73 million at December 31, 2008), comprises:

- debt relating to the securitization of trade receivables (€8 million);
- syndicated loan, coordinated by BNL and Efibanca (€16 million);
- CRS loan (€3 million) and others (€1 million).

The medium and long-term loan contracts state that the Alpitour Group must comply with covenants calculated on consolidated equity, economic and financial data (mainly net debt/equity and Ebitda/net debt). In view of the seasonal nature of the business, these ratios, as established by the relevant contracts, are calculated on an annual basis at the year-end closing date. Such ratios have been fully complied with as at October 31, 2009.
The main changes are as follows:

- repayment of €45 million on Calyon loan which provides for the drawdown of a credit line against the sale of trade receivables and the subsequent drawdown of the same credit line for €8 million;
- repayment of periodical installments on the syndicated loan for €7 million and CRS loan for €1 million.

Juventus Football Club

Debt of Juventus Football Club refers entirely to the debt with Unicredit Leasing S.p.A. relating to the lease on the Vinovo Training Center and other minor leases for €16 million, of which €7 million is due beyond five years.

Non-current derivative financial instruments of the EXOR Group include the embedded derivative relating to the Perfect Vision Limited convertible bonds. The fair value recorded in the income statement in 2009 is negative for €32 million.

Current derivative financial instruments of the EXOR Group totaling €15 million include:

- interest rate swap contracts put into place by EXOR S.p.A. on non-current debt (the fair value at December 31, 2009 is negative for €4.5 million);
- foreign exchange forward contracts put into place by C&W Group to hedge possible changes in exchange rates on intercompany trading transactions (the fair value at December 31, 2009 is negative for €2 million);
- interest rate swap contracts put into place by Alpitour S.p.A. on syndicated and CRS loans and for the partial hedge of the securitization transactions with Calyon in respect of possible changes in interest rates (the fair value at December 31, 2009 is negative for €0.5 million).
- derivative financial instruments on equity shares held for trading by EXOR S.p.A. (the fair value at December 31, 2009 is negative for €8 million).

34. Deferred income taxes

As disclosed under “Significant Accounting Policies”, deferred tax assets and liabilities are offset where there is a legally enforceable right of offset, at the level of individual sector.

The composition and the change in deferred tax assets are as follows:

€in millions	Property, plant and equipment and intangible assets	Tax losses	Revenues taxed in prior years	Tax-deferred gains	Other	**Total**
Balance at December 31, 2008	2	1	5	(5)	14	**17**
Income taxes charged (reversed) to the income statement	1	(1)	(3)	0	(4)	**(7)**
Taxes relating to items credited to equity	0	0	0	0	1	**1**
Net other movements	0	0	0	0	(2)	**(2)**
Balance at December 31, 2009	**3**	**0**	**2**	**(5)**	**9**	**9**

€in millions	Property, plant and equipment and intangible assets	Tax losses	Revenues taxed in prior years	Tax-deferred gains	Other	**Total**
Balance at December 31, 2007	2	6	9	0	9	**26**
Income taxes charged (reversed) to the income statement		(5)	(4)	(5)	6	**(8)**
Taxes relating to items credited to equity					(1)	**(1)**
Net other movements						**0**
Balance at December 31, 2008	**2**	**1**	**5**	**(5)**	**14**	**17**

The composition and the change in deferred tax liabilities are as follows:

€in millions	Property, plant and equipment	Intangible assets	Depreciation and tax charges	Fair Value	Deferred compensation plans	Employee benefits	Actuarial gains (losses)	Tax losses	Other	**Total**
Balance at December 31, 2008	(1)	(126)	6	0	20	1	5	3	6	**(86)**
Income taxes (charged) reversed to the income statement	0	6	(7)		(2)	0	0	16	8	**21**
Income taxes relating to items debited to equity	0	0	0		0	0	(1)	0	(1)	**(2)**
Exchange differences	0	4	0		(1)	0	0	(1)	0	**2**
Net other movements	0	(1)	0	0	0	(1)	0	3	0	**1**
Balance at December 31, 2009	**(1)**	**(117)**	**(1)**	**0**	**17**	**0**	**4**	**21**	**13**	**(64)**

€in millions	Property, plant and equipment	Intangible assets	Depreciation and tax charges	Fair Value	Deferred compensation plan	Employee benefits	Actuarial gains (losses)	Tax losses	Other	**Total**
Balance at December 31, 2007	(2)	(107)	7	(11)	21	4	3	1	2	**(82)**
Business combinations		(19)							2	**(17)**
Income taxes (charged) reversed to the income statement		7	(1)		(2)			1	2	**7**
Income taxes relating to items debited to equity				11		(3)	2	1	2	**13**
Exchange differences		(7)			1				1	**(5)**
Net other movements	1								(3)	**(2)**
Balance at December 31, 2008	**(1)**	**(126)**	**6**	**0**	**20**	**1**	**5**	**3**	**6**	**(86)**

The analysis of unused tax loss carryforwards on which deferred tax assets have not been calculated is as follows:

	Taxable base				Estimated tax
€in millions	Within 1 year	From 2 to 4 years	Beyond 4 years	Total	benefit
At December 31, 2009					
Current tax losses	9	261	686	956	275
At December 31, 2008					
Current tax losses	154	413	572	1,139	311

Deferred tax assets on tax losses are recognized to the extent that their recoverability is highly probable in the following year or in the medium term, taking into account the taxable income forecast in medium-term operating plans.

35. Other liabilities

Details of other liabilities are as follows:

€in millions	**12/31/2009**	12/31/2008	Change
Other non-current liabilities			
Other non-current liabilities and other payables	**81**	49	32
Liabilities with Minority Shareholders of C&W Group (Note 27)	**25**		25
Other non-current payables to related parties	**2**	2	0
Commissions payable	**5**	6	(1)

Total other non-current liabilities	**117**	58	59
Other current liabilities			
Trade payables			
Trade payables	**247**	208	39
Trade payables to related parties	**1**	10	(9)
	248	218	30
Commissions payable	**94**	108	(14)
Total trade payables	**342**	326	16
Other current liabilities			
Payables for direct taxes	**37**	25	12
Payables for indirect taxes	**7**	13	(6)
Payables to employees and similar	**49**	56	(7)
Payables on purchases of property, plant and equipment	**37**	35	2
Other payables	**74**	91	(17)
Liabilities with Minority Shareholders of C&W Group (Note 27)	**8**		8
Other payables to related parties	**12**	8	4
Deferred compensation plans	**6**	8	(2)
Total other current liabilities	**230**	236	(6)
Total trade payables and other current liabilities	**572**	562	10
Total other non-current and current liabilities	**689**	620	69

Further details on payables to related parties are provided in Note 38.

Other non-current and current liabilities by maturity are as follows:

€in millions	Within 1 year	From 2 to 5 years	Beyond 5 years	**Total**
Other non-current liabilities	1	105	11	**117**
Trade payables	342			**342**
Other current liabilities	230			**230**
Balances at December 31, 2009	**573**	**105**	**11**	**689**
Other non-current liabilities		47	11	**58**
Trade payables	326			**326**
Other current liabilities	236			**236**
Balances at December 31, 2008	**562**	**47**	**11**	**620**

36. Commitments

Details are as follows:

€ in millions	**12/31/2009**	12/31/2008
Commitments undertaken		
Guarantees, note guarantees and other guarantees	**101**	76
Commitments for the purchase of investments and financial assets	**72**	78
Commitments for the purchase of property, plant and equipment	**4**	
Goods on deposit with third parties	**0**	1
Commitments to make loans	**6**	7
Other commitments undertaken	**1**	0
Total commitments undertaken	**184**	162
Commitments received		
Guarantees, deposits, note guarantees and other guarantees	**144**	158
Other commitments	**55**	59
Total commitments received	**199**	217

Commitments by due date are as follows:

€ in millions	Until canceled	Within 6 months	From 6 months to 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
At December 31, 2009							
Commitments undertaken	95	20	25	22	14	8	**184**
Commitments received	0	119	5	58	17	0	**199**
At December 31, 2008							
Commitments undertaken	81	28	21	25		7	**162**
Commitments received		110	35	55	17		**217**

Future minimum lease payments relating to operating leases are as follows:

€ in millions	From 0 to 6 months	From 6 months to 1 year	From 2 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
At December 31, 2009	**43**	**42**	**169**	**95**	**215**	**564**
At December 31, 2008	48	44	143	98	116	449

Lease expenses recognized in the 2009 income statement amount to €92 million (€87 million in 2008). They refer to lease contracts of the Alpitour Group which include lease payments on hotel complexes (€21 million) and dry-lease payments by the subsidiary Neos (€19 million), as well as payments paid by C&W Group for operating leases (€52 million).

Guarantees, note guarantees and other guarantees, included in commitments undertaken (€101 million) mainly include guarantees on behalf of suppliers of tourist services, financial offices and public entities provided by the Alpitour Group and other guarantees of the Alpitour Group for €47 million, in addition to bank guarantees provided to Juventus Football Club for €54 million.

Commitments for the purchase of investments and other financial assets (€72 million) refer to commitments undertaken by the subsidiary Exor S.A. as follows:

- commitment to invest a maximum remaining $55 million (€38 million) in the limited partnership NoCo B LP which groups a series of funds managed by Perella Weinberg Partners L.P.; as of December 31, 2009, EXOR S.A. has invested $3 million

(€2 million) and has received reimbursements for $12 million (€8 million) following the liquidation of the Perella Weinberg Alpha Large Cap and ADS funds;
- commitment to invest €22 million in the Perella Weinberg Real Estate fund. As of December 31, 2009, Exor S.A. has invested €2 million;
- commitment to invest a further €9 million in Banijay Holding S.A.S.
- commitments subscribed to by EXOR S.A. on May 14, 2009 for $10 million, later reduced by $7 million in Pimco Talf Investment and Recovery Fund. At December 31, 2009, EXOR S.A. has invested $3.5 million (€3 million). The maximum remaining commitment is $3.5 million (€3 million).

Commitments for the purchase of property, plant and equipment refer to the commitment by Juventus Football Club on the finance lease in place with Unicredit Leasing S.p.A. for work to expand and reorganize the Vinovo Training Center.

Commitments to make loans refer to the commitment undertaken by C&W Group with its employees.

Commitments received amount to €199 million and refer to guarantees, deposits, note guarantees and other guarantees for €144 million (of which €141 million is for guarantees and other guarantees provided by third parties to Juventus Football Club and €3 million for guarantees provided by public entities and suppliers of tourist services to the Alpitour Group) and sales commitments of the Alpitour Group for €55 million for travel bookings.

The main guarantees provided by third parties to Juventus Football Club (€124 million) are as follows:

- guarantee of €41 million provided by leading credit institutions on behalf of Sky Italia S.r.l. to guarantee the contract granting television broadcasting rights for championship home games for the 2009/2010 season;
- guarantee of €26 million provided by leading credit institutions on behalf of Reti Televisive Italiane S.p.A. to guarantee the contract granting television broadcasting rights for the championship home games for the 2009/2010 season;
- guarantee of €42 million provided by Sportfive S.A. to guarantee part of the amounts regarding the commercial contract signed with Sportfive Italia S.r.l./Sportfive GmbH & Co. KG., for the naming and marketing rights for the new stadium;
- guarantee of €12 million provided by leading credit institutions on behalf of Associazione Temporanea di Imprese - Rosso, Gilardi, Consfer e Morganti to guarantee the contract for the construction of the new stadium;
- other guarantees for €3 million.

Other guarantees received by Juventus Football Club, for €17 million refer to pledges guaranteeing receivables from Campi di Vinovo S.p.A. and Finanziaria Gilardi S.p.A. in relation to the sales of the investment and subsequent novation and integration agreements.

Procedures for the identification and control of commitments

Information regarding commitments, in addition to all other data and information used for consolidation purposes, is transmitted to EXOR S.p.A. through the consolidation process under the responsibility of the legal representatives of the individual companies and/or the Groups consolidated by EXOR that are required to prepare a reporting package and who sign a representation letter addressed to the Parent.
On the basis of information known to EXOR S.p.A., no significant commitments have been omitted by the companies of the Group.

37. Additional information on financial instruments and financial risk management policies

Details of the carrying amounts and the relative income (expenses) originating from each category of asset and liability classified in accordance with IAS 39 are presented as follows:

	December 31, 2009		
€in millions	Carrying amount	Income	Expenses
Financial assets			
At fair value through profit or loss			
- held for trading	607	44	
- designated initially			
Derivative instruments designated as hedges	0		
Investments held to maturity	93	2	
Loans and receivables (a)	1,024		(2)
Available-for-sale assets	1,373	25	
Total	**3,097**	**71**	**(2)**
Financial liabilities			
At fair value through profit or loss			
- held for trading	8		
- designated initially	32		32
Derivative instruments designated as hedges	7		
Debt at amortized cost	968		50
Debt at cost	688		28
Total	**1,703**	**0**	**110**

(a) Includes cash and cash equivalents for €630 million.

	December 31, 2008		
€in millions	Carrying amount	Income	Expenses
Financial assets			
At fair value through profit or loss			
- held for trading	348		(55)
- designated initially			
Derivative instruments designated as hedges	1		
Investments held to maturity	8		
Loans and receivables (a)	1,603	47	(3)
Available-for-sale assets	1,319	214	
Total	**3,279**	**261**	**(58)**
Financial liabilities			
At fair value through profit or loss			
- held for trading			
- designated initially			
Derivative instruments designated as hedges	16	8	(4)
Debt at amortized cost	970		(53)
Debt at cost	751		(34)
Total	**1,737**	**8**	**(91)**

(a) Includes cash and cash equivalents for €975 million.

Financial assets and liabilities for which the fair value can not be objectively determined and that are recorded at cost have not been included in the asset and liability categories indicated in IAS 39.

Fair value of financial assets and liabilities and the criteria for the estimation of fair value

Financial assets held for trading represented by listed securities are measured using the stock market price at year-end and the change in fair value is recognized in the income statement in financial income (expenses).

Available-for-sale financial assets represented by listed securities are measured at fair value using the stock market price at year-end and the unrealized gains or losses are recognized in equity. Further details on the measurement of available-for-sale financial assets are provided in Note 26.

Available-for-sale financial assets represented by unlisted securities are measured by independent experts. To this end, the investments in Gruppo Banca Leonardo, Banijay Holding and the embedded derivative on the Perfect Vision convertible bonds were aligned to fair value based on an estimate by independent experts.

For trade receivables and payables, all of which are due within one year, the fair value is not significant in that their carrying amount approximates fair value.

Derivative financial instruments are measured at fair value using the discounted cash flow method.

Fair value hierarchy

IFRS 7 requires financial instruments recognized in the statement of financial position at fair value to be classified on the basis of a hierarchy that reflects the significance of the inputs used in determining fair value.

The following levels are used in this hierarchy:

- Level 1 – listed prices in active markets for the assets or liabilities being measured;
- Level 2 – inputs other than listed prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) on the market;
- Level 3 – inputs that are not based on observable market data.

The following table provides an analysis under this hierarchy of financial assets and liabilities measured at fair value at December 31, 2009:

€in millions	Note	12/31/2009	Level 1	Level 2	Level 3
Financial assets at fair value					
Available-for-sale investments at fair value		1,333	1,195	19	119
Other investments at fair value		45		6	39
Non-current derivative instruments		1		1	
Financial assets held for trading:					
- equity securities		46	46		
- bonds		543	455	3	85
Bonds included in cash and cash equivalents		39	39		
Total assets	**23**	**2,007**	**1,735**	**29**	**243**
Financial liabilities at fair value					
Non-current derivative instruments		(32)			(32)
Current derivative instruments		(15)		(15)	
Total liabilities	**33**	**(47)**	**0**	**(15)**	**(32)**

In 2009, there were no transfers from Level 1 to Level 2 or vice versa.

The following table provides an analysis of the changes in the financial assets and liabilities at fair value in Level 3 in 2009:

		Total gains and losses				
€in millions	12/31/2008	recognized in profit or loss	recognized in equity	Purchases	Sales	12/31/2009
Financial assets at fair value						
Available-for-sale investments	109		(3)	13		119
Bonds	52	(2)		41	(6)	85
Other investments at fair value	24		7	16	(8)	39
Derivative financial instruments	4	(4)				0
Total assets	189	(6)	4	70	(14)	243
Financial liabilities						
Derivative financial instruments	0	(32)				(32)
Total liabilities	0	(32)	0	0	0	(32)
Amount of gains and losses for the year included in income statement on assets and liabilities held to maturity		(38)				

In 2009, there were no transfers from Level 3 to other levels or vice versa.

Significant or insignificant changes in the parameters used to determine the fair value of the financial assets or liabilities included in Level 3 would not have material effects on the income statement or the statement of financial position of the EXOR Group.

Risk management

EXOR S.p.A. and the companies in the Holdings System

EXOR S.p.A. and the companies which form the Holdings System are exposed to credit risk in that they invest a portion of their cash in bonds issued by leading bank and corporate counterparts which, in any case, are selected according to their credit worthiness. Instead, the relevant investments denominated in currencies other than the Euro, U.S. dollars in particular, are exposed to currency risks; in view of the permanent characteristics of such investments, transactions to hedge the risk of exchange rate fluctuations on those currencies were not put into place.

As far as liquidity risk is concerned, financing needs and cash flows are managed with the aim of optimizing financial resources. In particular, outgoing cash flows from current operations are substantially financed by incoming flows from ordinary business activities.

Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or difficulties in raising sufficient funds that can be readily used. In this sense, EXOR S.p.A. operates so that it has financial resources available by issuing bonds and acquiring irrevocable credit lines with expiration dates and amounts consistent with its investment plans.

EXOR S.p.A. also assesses and manages its exposure to fluctuations in interest rates in accordance with its financial management policies and uses derivative financial instruments to fix some of the financing obtained at a pre-set interest rate. The only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on one of its bond issues.

Alpitour Group

The Alpitour Group regularly assesses its exposure to various types of risks and manages these risks using traditional and derivative instruments in accordance with its management and control policy. This policy does not allow the use of derivatives for speculative purposes but they are used for the management of fluctuations in exchange rates, interest rates and fuel prices for hedging purposes.

The Alpitour Group, and particularly the aviation division, is subject to the risk of fluctuations in fuel prices largely in connection with international political stability and other outside factors. Since fuel is a primary factor in air transport, price fluctuations could have a significant impact on the Group's margin and, consequently, the fuel price risk exposure is hedged by commodity swaps and zero cost collars.
The exposure to exchange rate risks on commercial transactions in foreign currencies is mainly hedged by forward and knock-in forward contracts.
The exposure to interest rate risks on medium- and long-term loans is mainly hedged by interest rate swaps and zero cost collars.

C&W Group

Credit risk exposure of C&W Group is mainly influenced by the characteristics of each individual client. Other risk factors, including the default risk of the industry and country in which customers operate has less of an influence on credit risk. That depends on the type of services rendered and knowledge of the quality of the clients.

Juventus Football Club

Juventus Football Club does not have significant concentrations of credit risk and has appropriate procedures in place to minimize such risk exposure. Receivables from Italian soccer companies are guaranteed by the compensation mechanism of the National Professional League while receivables from foreign soccer companies are largely guaranteed by sureties or other guarantees.
A large part of Juventus Football Club's transactions (sales and purchases) are in Euro; thus the company is not subject to fluctuations in exchange rates to any relevant degree.
The company manages liquidity risk by keeping the bank loans secured from leading credit institutions at levels that avert financial pressure situations and are sufficient to meet operating and investment needs.

Credit risk

Credit risk exposure is principally represented by trade receivables and the concentration of credit risk, however, is mitigated by a large number of counterparts.

Trade receivables are expressed in the financial statements net of the provision for impairment for the risk that counterparts will be unable to fulfill their contractual obligations, the creditworthiness of the customer and historical data.

Credit risk regarding the other financial assets of the Group, which include cash and cash equivalents, available-for-sale assets, receivables and some derivatives, have a maximum risk equal to the carrying amount of the assets in the case of the insolvency of the counterpart.

The amount of financial assets past due and not written down, represented by trade receivables in the category "loans and receivables", is detailed as follows:

	Past due and not written down						
€ in millions	30 days	30 to 60 days	60 to 90 days	90 to 180 days	180 to 360 days	more than 360 days	Total
2009							
Trade receivables	**2**	**35**	**10**	**7**	**1**	**0**	**55**

	Past due and not written down						
€ in millions	30 days	30 to 60 days	60 to 90 days	90 to 180 days	180 to 360 days	more than 360 days	Total
2008							
Trade receivables	1	20	5	7	3	0	36

Movements in the provision for the impairment of receivables and other financial assets for the years 2009 and 2008 are as follows.

€ in millions	**12/31/2009**	12/31/2008
Beginning balance	**35**	30
Accruals	**8**	9
Uses	**(5)**	(5)
Exchange differences	**0**	1
Ending balance	**38**	35

Information on the credit risk of the EXOR Group is presented below.

EXOR S.p.A. and the companies in the Holdings System

The maximum credit risk to which EXOR S.p.A. is theoretically exposed at December 31, 2009 is represented by the carrying amounts stated for financial assets in the statement of financial position. However, the company tries to mitigate such risks by investing a good part of its cash in securities issued by leading bank and corporate counterparts that, in any case, are selected according to their credit worthiness.
At December 31, 2009 and December 31, 2008, there are no financial assets past due and not written down and provisions for receivables impairment.

Alpitour Group

Transactions for the sale of receivables

At October 31, 2009, the balance relating to the monthly securitization program of trade receivables begun by the Alpitour Group in 2006 amounts to €8 million. The securitization operation formalized by Alpitour S.p.A. with Banca Calyon in Milan provides for a revolving credit line which can be used on a monthly basis up to a net amount of €55 million against the sale of the trade receivables. Furthermore, in accordance with the contract terms, in exchange for the monthly sale of receivables and the amount of utilization requested (monthly program), Alpitour is obliged to subscribe to short-term securities (30-day maturities) issued by a French-registered associate of the Calyon Group, the amount of which is determined on the basis of the quality of the receivables sold and the relative degree of concentration. At October 31, 2009, under a monthly program of €8 million, short-term securities were subscribed to for an amount of €3 million; the net use of the securitization line at the year-end closing date is therefore equal to €5 million against a credit line made available by Calyon for €55 million.

The Alpitour Group does not have any particular concentrations of credit risk since its credit exposure is distributed over a large number of counterparts and customers.
Trade receivables are expressed net of the provision for receivables impairment which amounts to €24 million at December 31, 2009 (unchanged compared to December 31, 2008).

C&W Group

The credit risk of C&W Group is represented by the carrying amount of financial assets recorded in cash and cash equivalents for $74.8 million (€52 million) and the carrying amount of trade receivables for $300 million (€208 million).

Trade receivables are expressed net of the provision for receivables impairment which amounts to $19 million (€13 million) at December 31, 2009 ($14.5 million at December 31, 2008 equal to €10 million).

Liquidity risk

The companies of the Group control liquidity risk by planning investments of liquidity, monitoring the maturities of financial investments and financial assets and the expected cash flows from operations.

The residual contract maturities for all the financial liabilities which fall under the application of IAS 39 are indicated below.

The table has been prepared by allocating the remaining cash flows from existing contracts, including principal and interest; with regard to floating-rate loans, the most recent fixed coupon rate with the bank counterpart was used for the projection of future maturities, taking into account the effect of the hedging transactions.

	December 31, 2009					
	Nominal amount					
€in millions	Within 6 months	From 6 months to 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**

Total	**(473)**	**(26)**	**(477)**	**(250)**	**(920)**	**(2,146)**

EXOR S.p.A. and the companies forming the Holdings System finance outgoing cash flows from current operations with incoming flows from ordinary business activities and cash availability.

Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or difficulties in raising sufficient funds that can be readily used to support operating and investment activities. In this sense, the EXOR Group operates so as to have irrevocable credit lines available with expiration dates and amounts consistent with its investment plans.

At December 31, 2009, the EXOR Group has unused credit lines for €2,026 million (€2,615 million at December 31, 2008).

Total credit lines of the Alpitour Group amount to €268 million (€290 million at December 31, 2008) of which committed credit lines stand at €194 million. These are drawn down by €27 million, of which €16 million for short-term financing and €11 million for medium-term financing.

To supplement its internally generated cash flows and the maximum peak of seasonal cash flow demands early in the second quarter of the year, C&W Group secured a $350 million Senior Credit Facility on May 29, 2007. This facility will be used to support acquisition opportunities and fund seasonal cash flow requirements during the year.

The breakdown of maturities by credit line is as follows:

	December 31, 2009						
	Nominal amount						
€in millions	Until canceled	From 0 to 6 months	From 6 months to 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
Portion of credit lines utilized	54	13	28	137	142	0	**374**
Portion of credit lines not utilized	999	0	152	690	185	0	**2,026**
Total credit lines	**1,053**	**13**	**180**	**827**	**327**	**0**	**2,400**

	December 31, 2008						
	Nominal amount						
€in millions	Until canceled	From 0 to 6 months	From 6 months to 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
Portion of credit lines utilized	34	5	3	211	175		**428**
Portion of credit lines not utilized	1,425		210	535	445		**2,615**
Total credit lines	**1,459**	**5**	**213**	**746**	**620**	**0**	**3,043**

Market risk

The EXOR Group is principally exposed to exchange rate and interest rate risks since the Group operates internationally in different currency areas and uses financial instruments which generate interest, in addition to price risks on equity shares and other listed financial assets.
Financial risks are managed by each subgroup in which the Group's activities are divided.

Currency risk

An analysis of debt by currency is as follows:

€in millions	EUR	GBP	USD	Other	**Total**
At December 31, 2009					
EXOR bonds 2007/2017	(745)				**(745)**
EXOR bonds 2006/2011	(200)				**(200)**

Total debt	**(1,246)**	**(35)**	**(113)**	**(11)**	**(1,405)**

The Group is exposed to risks resulting from changes in exchange rates which can affect its earnings and equity.

The transactions put into place by the companies of the Group to hedge the above currency positions are described below.

EXOR S.p.A. and the companies in the Holdings System

EXOR S.p.A. does not have either financial assets or liabilities denominated in currencies other than Euro. Consequently, there is no direct currency risk. Some of the assets held for trading and cash at December 31, 2009 (respectively, €13 million and €8 million) are denominated in currencies other than Euro. These are securities held for trading and cash, both of which have been adjusted to the year-end exchange rate.

The subsidiary EXOR S.A. is exposed to exchange rate risk on bonds in U.S. dollars issued by Perfect Vision Ltd. (a total of $97 million) and on the embedded derivative (-$46.5 million). A 10% increase or decrease in the exchange rate of the United States currency against the Euro would have an effect on earnings of -€3 million or +€4 million, respectively.

Alpitour Group

The Alpitour Group, since it operates internationally, is exposed to market risk from fluctuations in exchange rates.

Alpitour S.p.A. has forward and forward knock contracts in place for a total notional amount of €25 million to manage the risk of fluctuations in exchange rates hedging the exposure in foreign currencies for the next year. The fair value of such hedges at October 31, 2009 is estimated at a negative €994 thousand (a positive €902 thousand at October 31, 2008).

C&W Group

Exchange rate risk relating to the operating activities of C&W Group is limited since the companies of the Group conduct their operations in their functional currency.

Exposure to currency risk can only come from intercompany commercial transactions. To mitigate this risk, in 2009, the Group had 54 exchange forward contracts on the main currencies to which it is exposed. The notional value of these financial instruments is $118 million (€81.8 million) with a negative fair value at December 31, 2009 for $2,343 thousand, or €1,626 thousand (a negative $6,236 thousand, or €4,481 thousand at December 31, 2008).

The exchange risk relating to debt is limited to the portion of the Senior Revolving Credit Facility: in Euro for $12.9 million ($14.1 million at December 31, 2008); in GBP for $38.8 million ($42 million at December 31, 2008) and in CAD for $16.2 million ($14.9 million at December 31, 2008).

C&W Group believes that the companies exposed to this risk will generate sufficient cash flows in the future to repay their debt, therefore, no hedging instruments have been put into place.

Sensitivity analysis for exchange rate risk

A sensitivity analysis at the end of the reporting period has been carried out in respect of the financial instruments exposed to the exchange rate risk of the EUR/USD, EUR/GBP and risks referring to other currencies represented principally by trade receivables and payables, financial assets and derivative financial instruments of the Alpitour Group and C&W Group.

Alpitour Group

The sensitivity analysis for the exchange risk of the Alpitour Group used the data of the financial statements at October 31, 2009 and is based on the following assumptions:

- the amount shown in the financial statements for financial assets and liabilities has been adjusted by applying a symmetrical percentage change of 10% to the year-end exchange rate;
- the amount of derivative financial instruments for the management of the fuel risk has been adjusted on the basis of a 5% increase or decrease in the price of fuel.

At October 31, 2009, there are no transactions hedging fluctuations in the price of fuel.

The Alpitour Group is exposed to exchange rate risk on trade receivables and financial assets for €17 million and on trade payables for €47 million.
A 10% increase or decrease in the major foreign currencies against the Euro would have a net effect on earnings with recognition of higher income or expenses for €0.5 million; a 10% increase or decrease in the exchange rate of the U.S. dollar against the Euro would have a negative effect or positive effect on equity of €2.3 million or €3.1 million, respectively.

C&W Group

The sensitivity analysis relative to the currency risk of C&W Group has been calculated by adjusting the amount shown in the financial statements for financial assets and liabilities by applying a symmetrical percentage change of 10% to the year-end exchange rate. C&W Group is exposed to exchange rate risk on financial assets for €159 million and on financial liabilities for €38 million.
A 10% increase or decrease in the exchange rates of the major foreign currencies against the Euro would affect equity by €12 million.

Interest rate risk

The companies of the Group use external financial resources obtained in the form of financing and invest available liquidity in monetary and financial market instruments. Any change in market interest rates can affect the cost and yield of the various forms of financing, causing an impact on the level of the Group's financial expenses.
The interest rate risk is managed by the individual consolidated groups which establish the appropriate mix between fixed-rate and floating-rate financing using interest rate swaps and zero cost collars.

The fair value effect of the transactions hedging interest rate risk put into place by the consolidated companies is as follows:

€in thousands	**12/31/2009**	12/31/2008	Change
EXOR S.p.A. and the Holdings System	**(4,527)**	(10,029)	5,502
Alpitour Group	**(2,911)**	13	(2,924)
Juventus Football Club	**(49)**		(49)
Total	**(7,487)**	(10,016)	2,529

EXOR and the companies in the Holdings System

EXOR S.p.A. has some interest rate swap contracts in place at December 31, 2009, for a notional amount of a total of €150 million to hedge the risk of fluctuations in interest rates on bank debt with a negative fair value for €4,527 thousand (negative for €4,910 thousand at December 31, 2008).

At December 31, 2008, there had been some interest rate swap contracts in place for a notional amount of a total of €200 million to hedge the risk of fluctuations in interest rates on the EXOR bonds 2006-2011 with a negative fair value of €5,119 thousand. At December 31, 2009, the negative fair value is €6,689 thousand and is still recorded in an equity reserve and will be recognized in the income statement when the bonds are repaid, in accordance with the Group's accounting policies.

Alpitour Group

Alpitour S.p.A. has interest rate swap contracts and zero cost collars, for a notional amount of a total of €16 million, to hedge the risk of fluctuations in interest rates on the syndicated loan secured on November 30, 2006, and interest rate swaps relating to the CRS loan for a notional amount of €3 million to partly cover the securitization in place with Calyon for a notional amount of €7 million expiring June 30, 2011. The fair value of these hedges at October 31, 2009 is estimated at a negative €451 thousand (a positive €13 thousand at October 31, 2008).

The subsidiary Neos has interest rate swap contracts for a residual notional amount of €41 million for the management of the interest rate risk on aircraft lease arrangements. The fair value of these hedges at October 31, 2009 is estimated at a negative €2,473 thousand.

Juventus Football Club

Juventus Football Club has adopted a policy to hedge the interest rate risk on two loans granted by leading credit institutions for the construction of the new stadium using derivative financial instruments.

At December 31, 2009, Juventus Football Club has the following:

- a CAP option for the management of interest rate risk on the €25 million loan with a positive fair value of €619 thousand. At December 31, 2009, the fair value change (€436 thousand) compared to the initial premium paid of €1,055 thousand was recognized in the income statement since the fair value of the option is entirely related to the time value of the transaction.
- an interest rate swap contract for the management of the interest rate risk on a €15 million loan with a negative fair value of €90 thousand, recognized in an equity reserve for the effective portion (90.1%) and in the income statement for the remaining portion (9.9%).

At December 31, 2009, neither loan has been used.

C&W Group

The C&W Group is exposed to interest rate risks associated with the Revolving Credit Facility of $350 million. At this time, management has not put into place any form of hedge.

The fair value of the EXOR Group recorded in the cash flow hedge reserve refers to the hedge of cash flows relating to loan interest expense which will arise in the years 2010 to 2011 (approximately €10 million for the year 2010 and approximately €2 million for the year 2011).

Analysis of debt by interest rate

The analysis of debt by interest rate at December 31, 2009 shows that the rates are mainly between 5% and 7.5% for €790 million; between 4% and 5% for €309 million; below 2% for €206 million; between 2% and 3% for €40 million; another €8 million of debt considered at a 0 rate.

The analysis of debt by interest rate at December 31, 2008 showed that the rates were mainly between 3% and 4% for €278 million; between 4% and 5% for €1,000 million; between 5% and 7.5% for €115 million; another €12 million of debt considered at a 0 rate.

Sensitivity analysis for interest rate risk

A sensitivity analysis at the end of the reporting period has been carried out in respect of financial instruments exposed to interest rate risk. In the case of floating-rate liabilities, the analysis assumes that the exposure at the end of the year remained constant for the entire year. The assumptions used for the model are as follows:

- for debt: a symmetrical change of 50 basis points is applied;
- for interest rate swaps: the change in fair value is recalculated applying a parallel and symmetrical shift of 50 basis points to the current interest rate curve at the end of the reporting period. In determining the above effect, account is taken of the consequent impact on the reversal of the cash flow hedge reserve to the income statement.

An increase or decrease in the interest rates of 50 basis points, all other variables remaining constant, would produce a higher or lower pre-tax result of the Group for the year 2009 of €0.6 million; the cash flow hedge reserve would be higher or lower by €1 million.

Price risk

EXOR and the companies in the Holdings System

EXOR and the Holdings System are exposed to price risk originating from investments in the capital stock of other companies held for trading or for strategic purposes, classified in the categories of available-for-sale and assets held for trading and assets included in cash and cash equivalents.

Alpitour Group

The Alpitour Group, particularly the aviation division, is subject to the risk of fluctuation in fuel prices that are largely associated with international political equilibrium and other outside factors. Since fuel is a primary factor in air transport, price fluctuations could have a significant impact on the Alpitour Group's margin. Price risk exposure is hedged by commodity swaps and zero cost collars with counterparts that are high standing Italian and international financial institutions. At October 31, 2009, there are no financial transactions in place for the management of exposure to fuel price risk. At October 31, 2008, the subsidiary Neos had commodity swaps and zero cost collars outstanding for a notional amount of €13 million. The fair value of these hedges is an estimated positive value of €154 thousand.

C&W Group

The C&W Group is exposed to equity price risk arising from available-for-sale equity securities held for meeting the European (EMEA) pension plan obligations. The investment decisions for this plan are made by the Trustees of the plan, based on consultation with the investment and actuarial advisers of the Trustees.

Sensitivity analysis for price risks

Considering price risk exposure at the end of the reporting period, if the prices of securities had been 5% higher or lower, the fair value reserve on available-for-sale assets recorded in equity would have been €62 million higher or lower and the amount of fair value recognized in the income statement on the bonds and investments included in the category of assets held for trading and cash and cash equivalents would be €32 million higher or lower.

Details are as follows:

€ in millions	2009			
	+5% change in price		-5% change in price

38. Intragroup and related party transactions

The EXOR Group is directly controlled by Giovanni Agnelli e C. S.a.p.az., a company registered in Italy.

The transactions between the company and its consolidated subsidiaries, which are related parties of the same company, have been eliminated in the EXOR consolidated financial statements and consequently are not presented in this note.

Related party transactions have been carried out in accordance with existing laws on the basis of reciprocal economic gain.

Receivables and payables are not guaranteed and are settled in cash and guarantees have neither been granted nor received on them.

Costs have not been recognized during the period for non-existent or doubtful liabilities in relation to amounts due from related parties.

The statement of financial position and income statement balances generated by transactions carried out in 2009 with related parties, identified in accordance with IAS 24 and communicated by the companies of the Group, are summarized in the following tables. Transactions are indicated only if close to €1 million, which is the unit of measure for the presentation of the consolidated figures of the EXOR Group.

€ in millions	Investments	Trade receivables	Other assets	Other liabilities	Costs	Revenues	Non-current expenses
Fondazione Agnelli	13 (a)						
Directors for fees and professional services					5 (b)		
Special indemnity to the former chief executive officer and general manager of IFI S.p.A.							3 (c)
Recipients for Alpitour stock option plans 2005				12 (d)			4 (d)
Old Town						1	
Fiat Group companies		2			1	15 (e)	
Alpitour Group companies		1	1			1	
Total EXOR Group	**13**	**3**	**1**	**12**	**6**	**17**	**7**

a) Purchase of 2,338,629 Fiat savings shares from Fondazione Agnelli.
b) Fees to directors of EXOR S.p.A. (€4.5 million) and EXOR S.A. (€0.6 million) referring to 2009.
c) Special indemnity relating to termination of the employment relationship approved for the former chief executive officer and general manager of IFI S.p.A., Virgilio Marrone.
d) Liabilities relating to the beneficiaries of Alpitour stock option plans resolved at the end of 2005. The EXOR board of directors' meeting held on May 13, 2009 extended the period in which the option could be exercised to January 2013 following the reconfirmation of the positions held by the two managers for another three years. The increase in the liability compared to the prior year (€4 million) was presented in non-recurring other expenses.
e) Of which €12 million is for the consideration on the agreement from July 1, 2007 toJune 30, 2010 between the Fiat Group and Juventus Football Club which gives Fiat Group the right to exploit the Juventus Football Club's image and €3 million mainly for incentive, events and convention activities conducted by companies of the Alpitour Group for the Fiat Group.

39. Fees to directors and statutory auditors

In 2009, the fees to the directors and statutory auditors of EXOR S.p.A., to perform their duties in the Parent and also in other companies included in consolidation, are as follows:

€ in thousands	EXOR S.p.A.	Subsidiaries (a)	Total
Directors	6,649	1,028	7,677
Statutory Auditors	146	125	271
Total	**6,795**	**1,153**	**7,948**

(a) This does not include the fees paid by Fiat and its subsidiaries since the Fiat Group is not included in the scope of consolidation.

In the meeting held on May 13, 2009, the board of directors decided to equally divide among its members the fee approved by the stockholders' meeting, amounting to €170,000 per year, and, furthermore, pursuant to art. 2389 of the Italian Civil Code, approved the following annual fees:

- €1,000,000 to the chairman John Elkann, in addition to health care coverage;
- €1,000,000, besides all out-of-pocket travel expenses outside the municipality of residence, for the mandate for strategical coordination, to the honorary chairman Gianluigi Gabetti; he is also entitled to death and permanent disability insurance coverage for professional or non-professional-related accidents and the use of a secretarial service and a car with driver also after the expiry of the term of office;
- €1,250,000 to the chief executive officer, Carlo Barel di Sant'Albano, who is also entitled to the following:
  - a variable fee up to a maximum of €1,250,000, 50% of which is linked to the increment in EXOR's NAV;
  - the use of an apartment in Turin made available by the company;
  - the use of two company cars, in addition to one used for company business;
  - death and permanent disability insurance coverage for professional or non-professional-related accidents;
  - health care coverage, the same as for company executives;
  - a sum equal to €2,500,000, corresponding to two years' annual fixed fee for the post of chief executive officer, to be paid at the end of the term of office, except in the case of the reconfirmation of the post, voluntary resignation or failure to accept the reconfirmation of the post, termination for just cause or reaching pensionable age;
- €100,000 to the vice chairman Pio Teodorani-Fabbri for the coordination and supervision activities of the Rome office;
- €35,000 to the internal control committee (of which €15,000 to the chairman and €10,000 to each of the other two members);
- €35,000 to the compensation and nominating committee (of which €15,000 to the chairman and €10,000 to each of the other two members);
- €40,000 to each of the directors Victor Bischoff, Christine Morin-Postel and Antoine Schwartz as members of the strategy committee;
- €100,000 to the secretary to the board of directors, Virgilio Marrone, in addition to death and permanent disability insurance coverage for professional or non-professional-related accidents and the use of a company car.

The directors will also be reimbursed for the expenses incurred in carrying out the activities connected with their posts.

Additional information on fees, as requested by national law (Consob Regulation 11971 dated May 14, 1999 and later amendments), is provided in the Notes to the separate financial statements of EXOR S.p.A..

40. Employees

The breakdown of the average number of employees is provided as follows:

Average number of employees	**12/31/2009**	12/31/2008
Breakdown by category		
Managers	**1,270**	2,038
Middle management and clerical staff	**11,495**	11,310
Pilots and flight attendants	**289**	277
Soccer players	**61**	56
Blue-collar	**3,835**	4,204
	16,950	17,885

41. Pro-forma consolidated data prepared by consolidating the Fiat Group line-by-line

Pending possible amendments to IAS 27 proposed in Exposure Draft ED 10 “Consolidated Financial Statements” which should definitively clarify the criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, the EXOR Group has continued to exclude the Fiat Group, in which EXOR S.p.A. has a 30.45% holding in ordinary capital stock, from line-by-line consolidation, consistently with the method followed for the first-time adoption of IFRS and the preparation of the consolidated financial statements at December 31, 2005 and thereafter.

However, in order to provide more meaningful disclosure, the pro-forma consolidated statement of financial position, pro-forma consolidated income statement and the composition of the pro-forma consolidated net financial position prepared by consolidating the Fiat Group line-by-line are presented below.

EXOR Group – Pro-forma consolidated income statement prepared by consolidating the Fiat Group line-by-line.

Swiss franc	**1.510**	1.587

43. Approval of the consolidated financial statements and authorization for publication

The consolidated financial statements at December 31, 2009 were approved on March 29, 2010 by the board of directors which authorized their publication starting from March 31, 2010.

Turin, March 29, 2010

On behalf of the Board of Directors
The Chairman
John Elkann

Attestation of the Consolidated Financial Statements According to art. 154-bis, Paragraph 5, of Legislative Decree 58/98

We, the undersigned, Carlo Barel di Sant'Albano, chief executive officer, and Aldo Mazzia, manager responsible for the preparation of the financial reports of EXOR S.p.A. attest, pursuant to the provisions of art. 154-bis, paragraphs 3 and 4, of Legislative Decree 58 dated February 24, 1998:

- the adequacy with respect to the company's structure and
- the effective application

of the administrative and accounting procedures applied in the preparation of the consolidated financial statements at December 31, 2009.

We also attest that:

- the consolidated financial statements:
    - have been prepared in accordance with applicable International Financial Reporting Standards recognized by the European Community pursuant to EC Regulation 1606/2002 of the European Parliament and Council, dated July 19, 2002;
    - correspond to the amounts shown in the accounts, books and records;
    - provide a fair and correct representation of the financial conditions, results of operations and cash flows of the company and its consolidated subsidiaries;
- the Report on Operations includes a reliable operating and financial review of the issuer and the aggregate of the companies included in consolidation as well as a description of the principal risks and uncertainties to which they are exposed.

Turin, March 29, 2010

Chief Executive Officer
Carlo Barel di Sant'Albano

REPORT OF THE INDEPENDENT AUDITORS ON THE CONSOLIDATED FINANCIAL STATEMENTS PURSUANT TO ART. 156 OF LEGISLATIVE DECREE No. 58 OF FEBRUARY 24, 1998

To the Shareholders of
EXOR S.p.A.

1. We have audited the consolidated financial statements of EXOR S.p.A. and its subsidiaries ("EXOR Group") as of and for the year ended December 31, 2009, which comprise the statement of financial position, the income statement, the statements of comprehensive income, changes in equity, and cash flows and the related notes to the consolidated financial statements. These consolidated financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005 are the responsibility of the Directors of EXOR S.p.A. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

2. We conducted our audit in accordance with the Auditing Standards recommended by CONSOB, the Italian Commission for listed Companies and the Stock Exchange. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the prior year's consolidated financial statements, whose data presented for comparative purposes have been reclassified to take account of the change in presentation of financial statements introduced by IAS 1, reference should be made to our auditors' report issued on March 30, 2009.

3. In our opinion, the consolidated financial statements of the EXOR Group as of December 31, 2009 comply with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005; accordingly, they give true and fair view of the financial position of EXOR Group and the results of its operations and its cash flows for the year then ended.

4. For a better understanding of the consolidated financial statements, attention is drawn to the fact that EXOR Group, pending possible amendments to IAS 27 proposed in the Exposure Draft ED 10 "Consolidated Financial Statements", that should definitively clarify the criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, has continued to exclude the Fiat Group, in which EXOR S.p.A. has a 30.45% holding in ordinary capital stock, from line-by-line consolidation, consistently with the method followed for the first-time adoption of IFRS and the preparation of the consolidated financial statements at December 31, 2005 and thereafter. However, in note 41 to the consolidated financial statements are presented the pro-forma consolidated financial data prepared consolidating line-by-line the Fiat Group.

5. The Directors of EXOR S.p.A. are responsible for the preparation of the report on operations and the annual report on Corporate Governance in accordance with the applicable laws and regulations. Our responsibility is to express an opinion on the consistency of the report on operations and of the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998, paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) in the annual report on Corporate Governance, with the consolidated financial statements, as required by law. For this purpose, we have performed the procedures required under Auditing Standard n. 001 issued by the Italian Accounting Profession (CNDCEC) and recommended by CONSOB. In our opinion, the report on operations and the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998 paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) included in the annual report on Corporate Governance are consistent with the consolidated financial statements of EXOR S.p.A. as of 31 December, 2009.

BOARD OF STATUTORY AUDITORS' REPORT ON THE YEAR 2009 TO THE STOCKHOLDERS' MEETING HELD ON APRIL 29/30, 2010

Shareholders,

In the year 2009, as indicated by the directors in their report, the characterizing event was the merger by incorporation of the subsidiary IFIL.

The operation, on which a resolution was passed in 2008, in fact, was concluded on March 1, 2009 when the company also took its new corporate name.

In compliance with art. 2429 of the Italian Civil Code and with art. 153 of Legislative Decree 58/1998, we would like to summarize the contents and outcomes of the activities carried out during the year 2009.

We have participated in the seven meetings of the board of directors, during which we were informed about the activities and the main operating, financial and equity transactions completed or being undertaken by the company and its direct subsidiaries.

We have obtained assurance that the transactions which the company has approved and undertaken were in compliance with the law and with the company's bylaws, were based upon the principles of good administration, were not in conflict with any resolutions passed by the stockholders and were not in conflict of interest.

During the 12 meetings we have held and from our meetings with the manager responsible for the preparation of the financial reports, with the person in charge of internal control, with those responsible for the main relevant corporate functions pertinent to our work and with the representatives of the audit firm – with whom we have met on five occasions and whose results of work we have made use of – we consider that we have acquired the necessary information.

With regard to our responsibilities, we have concluded that:

- the administrative conduct was observant of the principles of diligence and correctness;
- the organizational structure and the internal control system were adequate in relation to the nature and dimensions of the activities carried out;
- the administrative and accounting system was capable of representing correctly the company's affairs, conforming to the existing model of administrative and accounting control;
- the directives imparted to the subsidiaries appear appropriate to the requirements of art. 114, paragraph 2 of Legislative Decree 58/1998,

With regard to Corporate Governance, it should be recalled that IFI – now EXOR – did not adopt the code of self-discipline, partly in view of the company's particular capital structure (unlisted ordinary shares entirely held by Giovanni Agnelli e C. S.a.p.az.), considering the system adopted for Corporate Governance regulation to be suitable to the capital structure and sufficient to ensure transparency. The board of statutory auditors concluded that the regulations and procedures in place were in any case adequate for those purposes.

The directors of EXOR, in the meeting held the day after the merger became effective for legal purposes, approved the Corporate Governance regulations described in their annual report on the subject, which illustrates both the principles and the requirements adopted, and how they should be respected, as we have noted, and those not adopted, explaining the reasons for such exceptions.

As far as our responsibilities are concerned, we can say that EXOR has adopted the model of corporate governance described.

We would like to mention that during the stockholders' meeting held on April 28, 2009, the stockholder Marco Geremia Carlo Bava referred to art. 2408 of the Italian Civil Code and registered grievances.

Given that the limits established by the second paragraph of the article in question have not been met with regard to the consistency of the stockholder's investment and excluding any urgency or serious nature of the matter in question, we have agreed to take account of his comments and have performed an in-depth analysis of the matter to reach the conclusions indicated below.

Concerning the grievance due to lack of a vote on the act of responsibility against the board of directors, we can observe that the stockholder, having only declared – in effect – as if it were that difficult to ask – did neither formulate an effective motion for a resolution nor follow through on his affirmation with a timely and formal request for a vote.

His intentions, therefore, were incomplete, and in any case not suitable to be the subject of a resolution because of the indefiniteness and vagueness due to the absence of motives.

As for the work of the stockholders' meetings, we believe that it has been conducted correctly and in accordance with the relative regulation.

With regard to the amount of the emoluments attributed to certain directors, we consider the relative resolutions in compliance with the law, based upon the collective valuation on the activity and on the commitment of the beneficiaries on behalf of EXOR.

As for the presentation of Fiat's accounting data and the question of its operations, these do not appear to be under the responsibility of this board of statutory auditors, regardless of their merits.

Finally, with respect to requests on the recent prices of Fiat stock, in our work we have not noted any censurable facts.

Therefore, we have not observed violations of the existing laws.

With reference to the other matters identified by CONSOB in communication DEM/1025564 dated April 6, 2001, we observe the following:

- we have been regularly informed of matters falling under our jurisdiction;
- the periodic verifications and the tests to which we have subjected the company have not brought to light any atypical or unusual transactions with third parties, with related parties or with group companies such as might give rise to doubts about the correctness or completeness of the information in the financial statements, about the presence of conflicts of interest or about the safeguarding of the company's assets;
- the directors, in Note 42 to the separate financial statements, disclose the existence of and provide comments on the exchange of goods and services between EXOR, group companies and related parties, stating that such transactions were carried out in accordance with existing laws and by reference to arm's length reciprocal economic gain;
- from the meetings with the auditors no significant facts or situations came to our attention which necessitated the performance of further controls on our part which we should report to you;
- we have not received or had notice of any complaints under art. 2408 of the Italian Civil Code besides those formulated in the last stockholders' meeting and we have not received or we have not been made aware of petitions;
- in our contacts with the board of statutory auditors of the parent no matters have been addressed which would require to be communicated;

- we have expressed the opinions required of us by law;
- by means of a letter dated March 31, 2010, Deloitte & Touche has informed us that:
  " (…) during 2009, EXOR S.p.A. ("EXOR" or the "Company"), in addition to the engagement for the audit of the separate financial statements, for the tests on duly keeping the accounting records and the correct recognition of the operating events in the accounting entries, for the audit of the consolidated financial statements and for the limited audit of the consolidated half-year report (aggregate fees of Euro 90,000 for a total of 1,143 hours excluding the hours and fees for the subsidiary companies whose audits are assigned separately) conferred to us the following engagements:
  - testing relative to the confirmation of the amount of the financial ratios required by the Information Memorandum dated June 6, 2006 relating to the issue by IFIL of "Floating Rate Notes due 2011" for Euro 200 million, for a fee of Euro 5,000.
  - Procedures agreed in reference to specific aspects relating to the internal control system over financial reporting ("ICFR") adopted by the EXOR Group for the year 2009, for a fee of Euro 50,000.

  During the same year, Deloitte ERS S.r.l., an associated firm of Deloitte & Touche S.p.A., performed methodological support activities for the EXOR Group for the definition of the Integrated Compliance Governance Model, for a fee of Euro 35,000 (...)".

We have also examined the draft separate financial statements of EXOR at December 31, 2009 which present a profit of Euro 88,822,747, the information illustrated by the directors in their Report on Operations, relative also to the consolidated financial statements of the EXOR Group at the same date, also formalized in the board of directors' meeting held on March 29, and the specific explanatory notes.

The chief executive officer and the manager responsible for the preparation of the financial reports have issued the attestation required under art. 154-bis, paragraph 5 of Legislative Decree 58/1998 with regard to both the separate financial statements and the consolidated financial statements of the Group.

In its report dated April 1, 2009, Deloitte & Touche, the appointed external auditors, illustrated their conclusions on the separate financial statements of the company as follows:

"(…) In our opinion, the separate financial statements present fairly the financial position of EXOR S.p.A. as of December 31, 2009 and the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005. (…),
In our opinion, the report on operations and the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998 paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) included in the annual report on Corporate Governance are consistent with the financial statements of EXOR S.p.A. as of 31 December, 2009".

Similar conclusions by Deloitte & Touche are illustrated in its report on the consolidated financial statements of the Group and, for a better understanding of the same, draw attention, also this year, to the continued exclusion from line-by-line consolidation of the Fiat Group and to its pro-forma consolidated data prepared by consolidating line-by-line the Fiat Group which is any case presented.

On the basis of the information we obtained directly pertaining to the scope and structure and the conclusions reached by Deloitte & Touche, we are of the view that the separate financial statements of EXOR may be approved together with the proposal for the appropriation of the profit for the year, noting that the legal reserve is already equal to one-fifth of capital stock.

The board of directors, finally, requests authorization for the purchase of treasury stock, in the amount and according to the manner and the times established in the specific report.

As regards our competence, we observe that the motion conforms to existing law.

Turin, April 6, 2010

The Board of Statutory Auditors

Lionello Jona Celesia, Chairman

Giorgio Ferrino

Paolo Piccatti

Below is set out a list, in alphabetical order, of the boards of directors and of statutory auditors on which, as of the date on which this report was issued, the members of the company's board of statutory auditors served in the other companies as defined in Booklet V, Title V, Chapter V, VI and VII of the Italian Civil Code, pursuant to art. 144 *quinquiesdecies* of the Regulation for Issuers (the financial year in which the appointment ends is indicated in brackets).

2010 ANNUAL REPORT

The 2010 Annual Report is available on the website at: http://www.exor.com

---

This is an English translation of the Italian original document “Relazione Finanziaria 2010” approved by the EXOR S.p.A. board of directors on March 28, 2011 which has been prepared solely for the convenience of the reader. The version in Italian takes precedence and for complete information about EXOR S.p.A. and the Group, reference should be made to the full original report in Italian “Relazione Finanziaria 2010”.

LETTER TO SHAREHOLDERS

Dear Shareholders,

I am pleased to report that 2010 saw EXOR's NAV or Net Asset Value (our preferred measure of the company's performance as described in last year's letter) increase by 45.8 % compared to the previous year.

€ millions	12/31/2009	**12/31/2010**	**Change** absolute	%
Listed Investments	5,110	7,435	2.325	+45.5%
Private Investments	785	1,096	311	+39.6%
Investment Value	**5,895**	**8,531**	**2,636**	**+44.7%**
Financial Liabilities	(1,131)	(1,266)	(135)	+11.9%
Financial Assets	1,183	1,309	126	+10.7%
Net Financial Position	**52**	**43**	**(9)**	**(17.3%)**
Ordinary holding costs capitalized over 10 years	**(210)**	**(210)**	**-**	**-**
Net Asset Value	**5,737**	**8,364**	**2,627**	**+45.8%**

In relative terms EXOR's NAV outperformed the MSCI World Index by 28.6%.

	Annual percentage change		
Year	**1 - EXOR NAV**	**2 - MSCI Word Index**	**Relative results (1-2)**
2009	93.3	37.8	55.6
2010	45.8	17.2	28.6
Compounded annual rate	**61.8**	**24.3**	**37.5**

The clear highlight of 2010, and the event that made the single largest contribution to our performance, was the FIAT Group shareholders' decision, wholeheartedly supported by EXOR at the Fiat EGM, to divide their Group into two distinct listed entities: Fiat and Fiat Industrial.

This important development took effect on January 1st 2011 when the two companies started trading separately on the Milan Stock Exchange.

These businesses are now free to concentrate all their efforts on the development of their core businesses: automobiles for Fiat; and capital goods (i.e. light and commercial vehicles, trucks, agriculture and construction equipment) for Fiat Industrial.

Our belief is that this separation will help the market to understand better the nature and potential of these companies. This should translate into a higher valuation for the two standalone entities than they were able to command as one.

I am grateful to Sergio Marchionne for his role in making this important step happen with the support of the extraordinary team he leads. The rationale, the timing and the execution were just perfect.

We can't promise transactions like this every year, but when an opportunity of this scale arises we will do all we can to make it possible.

INVESTMENTS

Before describing briefly how our investments performed I would like to give you a quick overview of the backdrop we worked against last year.

2010 was the year in which the financial crisis morphed into a sovereign-debt crisis, shifting the centre of attention from the private to the public sector.

Concerns over the repayment of the public debt of Greece, Portugal, Ireland and Spain led to a substantial increase in the interest rates paid on sovereign borrowing by a number of countries, including Italy, and raised some doubts on the future of Europe's monetary union.

As a consequence of the crisis over sovereign debt, the Euro lost ground against many currencies. Meanwhile the US had to cope with a slowing pace of economic recovery and a high rate of unemployment. Quantitative Easing (QE), the Federal Reserve's monetary-policy response, weakened the dollar vis-à-vis the currencies of emerging markets and increased the price of gold. (We chose not to invest in gold because it's impossible for us to determine its intrinsic value).

In the latter part of the year, the world's largest economy began to show signs of a return to growth driven by improved consumer confidence, strong manufacturing output and rising exports. This is good news for us since we have the single largest exposure to the US economy.

Finally, in the developing world China's rise as an economic superpower continued. In 2010 it overtook Japan to become the world's second largest economy after the US. We don't do much business in China yet but this is something we are working hard to change over time.

2010 was a year of large currency swings. As well as thinking hard about the effect of this on our business ourselves we sought the advice of some of the wisest people we know on how to manage our foreign-exchange exposures. Taking their counsel into account we concluded that it is hard, if not impossible, for us to predict currency movements and that we would make terrible forex traders. Hence we decided for now not to manage our currency exposure.

As to our investments, we will present them according to whether they are listed or privately held and arrange them by value. The bracketed figure indicates our percentage ownership. For the purposes of this report we will exclude any investment worth less than € 50 million.

LISTED INVESTMENTS

- **Fiat (30.45%)**
  An automotive group operating in cars, car parts, commercial vehicles, trucks, agricultural and construction equipment.

  2010 closed with results ahead of its published targets. Revenues climbed more than 12% to € 56 billion and the Group reported a € 600 million profit. This was the year in which the alliance with Chrysler began to demonstrate its tangible value. The launch of the Fiat 500 in North America after a 27 year absence was a great example of the progress being made in the US.

  During the year Fiat invested significant time and effort in trying to reform the rules of engagement that underpin labor contracts in Italy. Progress has been made and the organization remains committed to change in order to compete more effectively in the marketplace.

- **SGS (15%)**
  The world leader in the verification, testing, control and certification business.

  Revenues were up 4.1% to CHF 4.8 billion and the operating income margin was at a record high of 17.8%. 2010 was an important year for SGS. It made ten acquisitions and 5,300 new employees joined the Group that now employs 64,000 people in 140 countries. The Company also launched its first non-convertible bond and was admitted to the Dow Jones sustainability index. SGS is an extraordinary business led by Chris Kirk and his team who have set very ambitious targets for themselves to be delivered by 2014. They want to increase revenues to CHF 8 billion of which around CHF 700 million would come via acquisitions, generate record margins of 20% and double operating income to CHF 1.6 billion. SGS has a driven and committed leadership team that has developed an impressive culture based on performance.

- **Sequana (28.24%)**
  A European paper production and distribution business.

  2010 ended more positively than 2009 did with a continuous effort to improve operations in a difficult environment characterized by weak demand and increased import costs. Sequana divested a number of businesses in order to concentrate on its core activities and further reduce its debt.

- **Juventus FC (60%)**
  One of the world’s most prestigious football franchises.

  During last season the club produced neither the on-field nor the financial results we expected. Juventus objective is to achieve the difficult balance between sporting results (which are fundamental) and financial equilibrium. I'm more confident about the future, since I've asked my cousin Andrea Agnelli to join as Chairman knowing he will lead the Club with vision and passion. The other good news is that the new stadium – which will be inaugurated next season – is a world class facility.

PRIVATE INVESTMENTS

- **Cushman & Wakefield (69.83%)**
  A global leader in commercial real-estate services.

  Revenues of $ 1.8 billion showed a double-digit increase in 2010. The Company restored profitability at the net income level and reduced debt by more than two-thirds. This is very encouraging for an organization with 13,000 people lead by Glenn Rufrano. We expect great things from them in order to capture profitably the growth we see in the commercial real-estate market around the world.

- **Alpitour (100%)**
  Italy’s largest integrated tourism and leisure group.

  In 2010 Alpitour confirmed its market leadership in the Italian tourism market and, most importantly, it closed the year with its best figures ever. I would like to congratulate Daniel J. Winteler, Fabrizio Prete and all the employees of Alpitour for their impressive achievements.

- **Gruppo Banca Leonardo (17.41%)**
  A pan-European bank operating in advisory and wealth-management businesses.

  Banca Leonardo decided last year to cease its direct investment activities so as to focus on its advisory and wealth management business. These areas continued to grow in 2010 while showing improved levels of profitability.

NEW INVESTMENTS

During 2010 we also made some small but significant investments that followed through on the interest in emerging markets I expressed in last year’s letter. By taking advantage of interesting opportunities in Brazil and India, we planted seeds for the future.

We acquired a stake in BTG Pactual, the “Goldman Sachs of Brazil”, which is run by André Esteves, an incredibly talented and energetic leader. We also made an investment in Café Coffee Day, the “Starbucks of India”, which operates 900 outlets in more than 100 cities. These are small investments but we believe they will grow and give us the opportunity to learn about these increasingly important countries.

In developed markets we provided capital for Almacantar, a venture focusing on London commercial real-estate, and became shareholders in The Economist, the weekly magazine brilliantly edited by John Micklethwait of which I’ve been a board member for some years. I can’t recommend a better publication for anyone wanting to gain a better understanding of our ever-changing world week after week. The business side is superbly run by Andrew Rashbass, the CEO, and his team. This is a highly profitable company in one of the world’s toughest industries.

We are well aware of the need to avoid over-diversification as well as over-concentration. As John Maynard Keynes put it “To carry one’s eggs in a great number of baskets without having time or opportunity to discover how many have holes in the bottom is the surest way of increasing risk and losses”. We will be vigilant in finding the right balance between the two extremes.

NET FINANCIAL POSITION

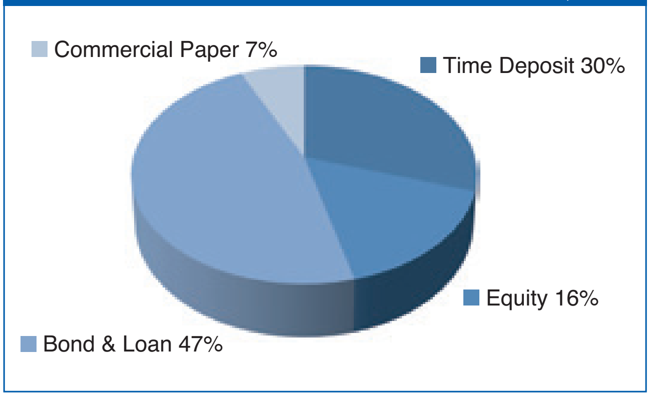
The company's net financial position as of 31 December 2010 was € 43 million. Gross debt was € 1,266 million, which consisted of two bonds (one of € 200 million due in June 2011 and the other of € 750 million due in June 2017) and utilized bank debt of € 316 million (EXOR also had € 725 million of undrawn committed credit lines). To set against these financial liabilities EXOR had financial assets of € 1,309 million.

We decided in 2010 to reduce our holdings of commercial papers and time deposits by more than doubling our equity exposure. We selected "large caps" primarily located in the US based on very simple value metrics: free cash flow, proven resilience during the crisis, growth prospects and, most importantly, price. Our largest position is in Mastercard and we have great faith in Ajay Banga and his team to lead this great business and manage its regulatory and market challenges.

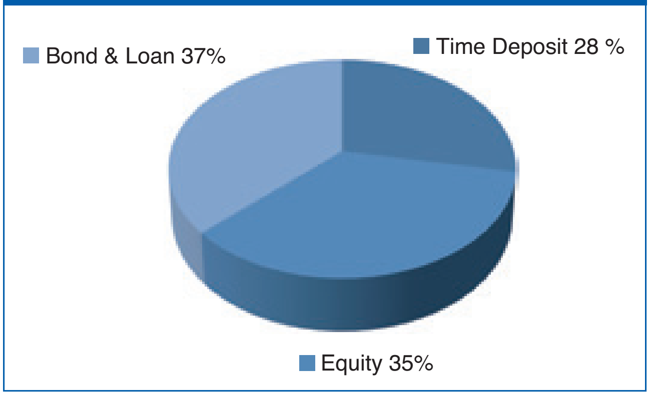
We made significant changes to our bond portfolio in order to avoid sovereign exposures and instead to just focus on corporate bonds, more than 65% of which are investment grade. At the same time we reduced our average duration to two years.

In 2010 we succeeded in generating returns on our financial assets (6.42%) that were higher than the costs of our financial liabilities (5.11%).

FINANCIAL ASSETS AS OF DECEMBER 31st, 2009



FINANCIAL ASSETS AS OF DECEMBER 31st, 2010



We continued to be very focused on our liquidity profile keeping in mind our view that our financial assets are waiting to be better deployed as and when the right long-term investment opportunity emerges. If the right investment were to present itself we would be ready to increase our net debt, but in doing so we would always limit it to less than 20% of our total assets. Since the value of these assets fluctuates (and unfortunately not always upwards), we will make sure we have an appropriate margin of safety.

2011

While I was preparing this letter I looked over many of the different views, predictions and ideas expressed when we entered 2011.

What we've actually experienced since the beginning of the year, and particularly the unfolding of events in North Africa and the tragedy in Japan, proves just how difficult it is to predict the future accurately. This goes to show how we must be prepared to manage the unexpected when it occurs and learn how to operate with unusual levels of uncertainty. We have great faith in our investee companies and their leaders to adapt and evolve in every environment.

I am a big believer of what Darwin discovered in the Galapagos, proving that the species most responsive to change will survive over apparently stronger or more intelligent competitors.

In seeking to embrace change we will continue to look for investments that meet the four criteria we described last year. We cannot promise results, especially like the ones achieved so far, but what I can promise is that:

1) We will invest only when we understand
2) We will choose based on talent
3) We will decide based on value
4) We will focus on the long-term

Thinking about the decade ahead I recalled a particularly inspiring quote, often attributed to Mark Twain.

"Twenty years from now you will be more disappointed by the things that you didn't do than by the ones you did do. So throw off the bowlines. Sail away from the safe harbor. Catch the trade winds in your sails. Explore. Dream. Discover."

I look forward to discussing the year's results and other matters regarding the company's business at our Shareholder Meeting, which will be held on April 28th, 2011 at the Unione Industriale di Torino, Via Vela, 17, starting at 10 00. As you may be aware, from this year and in line with the latest rules and regulations, shareholders also have the right in advance of the meeting to ask questions and receive answers by following the procedure set out on our web site www.exor.com. We have also decided to give non-shareholders the chance to raise questions by sending a short email to the following address: agm@exor.com; they will be grouped together, summarized by subject and answered during the meeting itself.

I hope to see as many of you as possible!

John Elkann

Board of Directors

Chairman and Chief Executive Officer	John Elkann

The terms of office of the board of directors, the board of statutory auditors and the independent auditors will expire concurrently with the shareholders' meeting that will be held to approve the financial statements for the year ending December 31, 2011.

EXOR GROUP PROFILE

EXOR is one of Europe's leading investment companies and is controlled by Giovanni Agnelli e C. S.a.p.az., which holds 51.164% of share capital and, in particular, 59.1% of ordinary share capital, 39.24% of preferred share capital and 12.36% of savings share capital.
Listed on the Italian Stock Exchange, EXOR has a Net Asset Value of approximately €8.4 billion at December 31, 2010. It is headquartered in Turin, Italy, Corso Matteotti 26.
EXOR is the majority stockholder of the Fiat Group and the Fiat Industrial Group. Balancing risks and expected returns, it invests for the medium- to long-term in various sectors, mainly in Europe, in the United States and in the two main emerging markets of China and India.
EXOR's objective is to increase its Net Asset Value and outperform the Morgan Stanley Capital World Index (MSCI).

The following are the main investments:

Fiat (30.45% of ordinary share capital, 30.09% of preferred share capital and 2.93% of savings share capital) is listed on the Electronic Share Market of the Italian Stock Exchange (Blue Chip segment). Founded in 1899, the Fiat Group today is a global industrial group focused in the automobile sector. It manufactures cars for the mass market under the Fiat, Lancia, Alfa Romeo, Fiat Professional brands and luxury cars under the Ferrari and Maserati brands. The Group also operates in the components segment through Magneti Marelli, Teksid and Fiat Powertrain Technologies and in the production systems sector through Comau. Thanks partly to the alliance with Chrysler, Fiat now has a productive and commercial base of sufficient size to be a world competitive manufacturer.

Fiat Industrial (30.45% of ordinary share capital, 30.09% of preferred share capital and 2.93% of savings share capital) is listed on the Electronic Share Market of the Italian Stock Exchange (Blue Chip segment). Created in January 2011 from the demerger from Fiat S.p.A., the Fiat Industrial Group operates through businesses that are all major international players in the sectors of trucks, commercial vehicles, buses, special vehicles (Iveco), tractors, agricultural and construction equipment (CNH – Case New Holland), in addition to engines and transmissions for those vehicles and engines for marine applications (FPT Industrial).

SGS (15.00% of share capital) is a Swiss company listed on the Virt-x market. Founded in 1878, the company is today the global leader in verification, inspection, control and certification activities with more than 64,000 employees and a network of more than 1,250 offices and laboratories throughout the world.

C&W Group (approximately 69.83% of share capital) is the largest privately held company for real estate services. C&W Group has its headquarters in New York, where it was founded in 1917, and has 230 offices and about 13,000 employees in 60 countries.

Alpitour (100% of share capital) is the largest integrated Italian tourism group. It operates with more than 3,000 employees and has 2.7 million customers across all areas of the tourism business: Tour Operating (Alpitour, Francorosso, Viaggidea, Villaggi Bravo, Volando, Karambola and Jeans), Hotels (Alpitour World Hotel & Resorts), Incoming (Jumbo Tours), Aviation (Neos), Distribution (Welcome Travel Group), Incentive & Eventi (A World of Events).

Juventus Football Club (60.00% of share capital) is listed on the Electronic Share Market of the Italian Stock Exchange (Star Segment). Founded in 1897, it is one of the most prominent professional soccer teams in the world.

Sequana (28.24% of share capital) is a diversified French paper group, listed on the NYSE Euronext market, with production and distribution activities operating through:

- **Arjowiggins** (100% holding), the world leader in the manufacture of high value-added paper products, on 4 continents with 6,100 employees and 27 production facilities;
- **Antalis** (100% holding), the leading European group in the distribution of paper and packaging products, with over 6,700 employees in 54 countries.

Gruppo Banca Leonardo (17.41% of share capital) is a privately held and independent international investment bank offering a complete range of services in investment banking, wealth management and other areas linked to financial markets.

Vision Investment Management, founded in 2000, is one of the most important hedge fund managers specialized in Asian markets.
Five-year bonds issued by Perfect Vision are subscribed to in April 2008. The bonds give mandatory conversion into shares at maturity which will deliver about a 42.5% stake in Vision Investment Management.

Banijay Holding (17.09% of share capital with voting rights) is headquartered in Paris. The company is a new player in TV production through a network of companies specialized in the production and distribution of multimedia content.

Perella Weinberg Partners is an independent company offering financial advisory and asset management services in the United States and Europe.

Almacantar (54.98% of share capital and voting rights) is a company operating in the real estate sector which aims to capitalize on commercial investment and development opportunities, mainly in the market for offices, in London and Paris.

The following chart is updated to mid-March 2010 and presents the major sectors of business in which the Group has investment holdings. Percentage holdings refer to ordinary share capital.

(a) EXOR also holds 30.09% of preferred share capital and 2.93% of savings share capital.
(b) Post-conversion of convertible bonds.
(c) Percentage interest held in the NoCo A LP limited partnership.

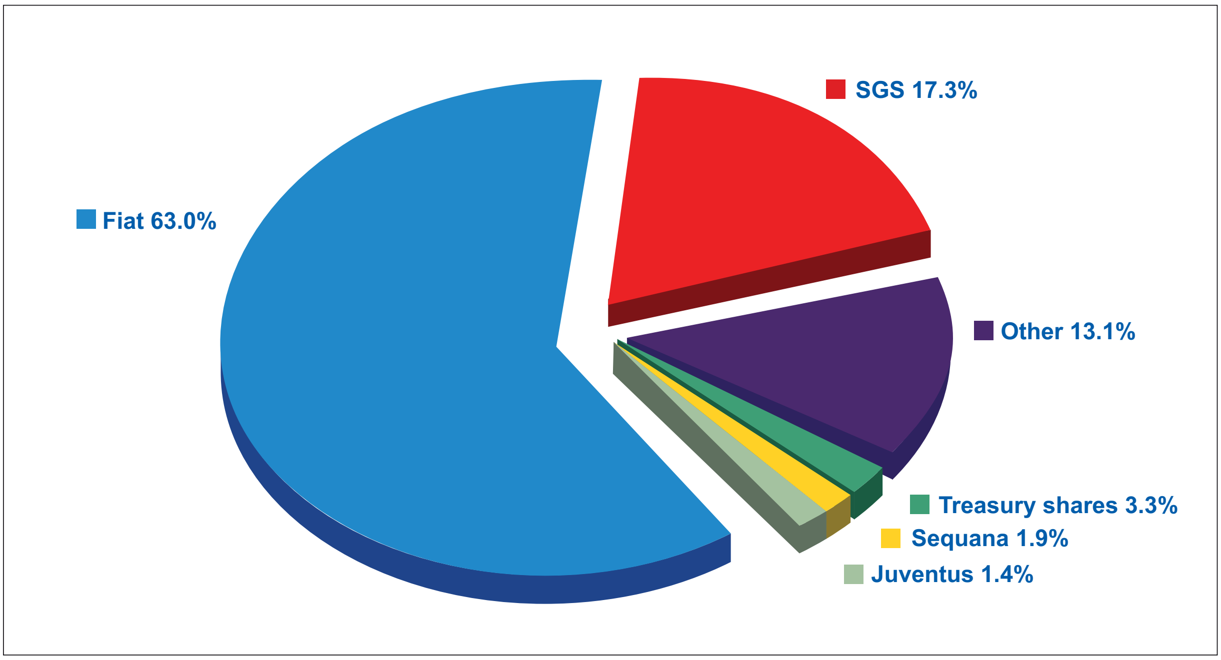
The investment value at December 31, 2010 has been calculated by valuing the listed investments in Fiat, Sequana, SGS, Juventus Football Club at stock trading prices, and the private other investment holdings and other investments at fair value determined annually by independent experts. EXOR ordinary, preferred and savings treasury stock is measured at stock trading prices, except ordinary shares to service the stock option plan, which are measured at the option exercise price (since it is lower than the stock trading price).

NAV is presented with the aim of aiding analysts and investors in forming their own assessments.

The following pie chart shows the composition of the investment value at December 31, 2010 (€8,531 million). "Other" includes the remaining investment in Intesa Sanpaolo, measured at the stock trading price, and the private investments in C&W Group, Gruppo Banca Leonardo, Alpitour, Banijay Holding, Vision, Almacantar, NoCo A and NoCo B and also sundry investments.

Investments denominated in Swiss francs, U.S. dollars and pound sterling are translated at the market trading rates of 1.2504, 1.3362 and 0.86075, respectively.



Change in NAV compared to MSCI Index (Morgan Stanley Capital World Index)

Financial Communications and Investor Relations

In order to ensure complete and updated information on its objectives and developments in corporate-related events, EXOR in 2010 continued its relationships with financial analysts, as well as the national and international financial Press.

The market diffusion of the first Message from the Chairman of EXOR was an occasion for sharing the Company's vision on its development plans with the general public and inaugurating a tradition which is destined to become a point of reference also in years to come.

Besides one-to-one contacts organized regularly with the Investor Relations and Media Offices, some information meetings were organized expressly dedicated to EXOR bondholders, aimed at providing an updated picture on the activities and the prospects of the Company.

Moreover, in April – on the occasion of the shareholders' meeting – a conference call was held which gathered together about one hundred people between analysts and investors. The appointment, which every year closes the day dedicated by EXOR to its stakeholders, allowed top management to give a detailed illustration of the performance of its investment holdings, especially unlisted holdings.

CORPORATE GOVERNANCE

In its meeting held on March 28, 2011, the board of directors approved the “Annual Report on Corporate Governance” prepared in accordance with art. 123 bis of Legislative Decree 58 dated February 24, 1998, with amendments and additions (TUF – Consolidated Law on Finance).
This document was published with this 2010 Annual Report and is posted on the corporate website at: www.exor.com.

MAIN RISKS AND UNCERTAINTIES TO WHICH EXOR S.p.A. AND ITS PRINCIPAL INVESTMENT HOLDINGS ARE EXPOSED

RISKS ASSOCIATED WITH GENERAL ECONOMIC CONDITIONS

The earnings and financial position of EXOR and its principal holdings are influenced by various macro-economic factors – including increases or decreases in gross national product, the level of consumer and business confidence, changes in interest rates on consumer credit, the cost of raw materials and the rate of unemployment – within the various countries in which it operates.

For example, the global economic recession in 2008 and the first half of 2009 had a negative impact on the principal holdings. Weak economic conditions resulted in a significant decline in demand for most of their products and services. In 2010, demand levels for the automobiles business in Europe also reflected the absence of significant measures previously put in place by major governments and monetary authorities. In general, the sectors in which the principal investment holdings operate have historically been subject to highly cyclical demand and tend to reflect the overall performance of the economy, in certain cases even amplifying the effects of economic trends. Given the difficulty in predicting the magnitude and duration of economic cycles, there can be no assurances as to future trends in the demand for or supply of products and services sold by them in any of the markets in which they operates.

Moreover, certain major economies are still in recession or have recently suffered periods of low growth or economic stagnation. These conditions or the return to economic recession in markets that have recently recovered could ultimately affect the industrial development of many businesses. There can be no certainty that measures taken by governments and monetary authorities will be successful in re-establishing the conditions necessary for sustainable economic growth. As such, uncertainty remains as to the global economic outlook and some national economies could experience extended periods of slow economic growth or recession.

Additionally, even in the absence of slow growth or recession, other economic circumstances – such as increases in energy prices, fluctuations in prices of raw materials or contractions in infrastructure spending – could have negative consequences for the industries in which the principal investment holdings operate and, together with the other factors referred to previously, could have a material adverse effect on their business prospects, earnings and/or financial position.

RISKS ASSOCIATED WITH THE ACTIVITIES OF EXOR

EXOR conducts investment activities which involve typical risks such as high exposure to certain sectors or investments, difficulties in identifying new investment opportunities that meet the characteristics of the Company's objectives pursued or difficulties in disposing of investments owing to changes in general economic conditions. The potential difficulties connected with making new investments such as unexpected costs or liabilities could have an adverse effect on the Company's earnings and financial position.
The ability to access capital markets or other forms of financing and the related costs are dependent, among other things, on the Company's credit rating.

Any downgrade by the rating agencies could limit the Company's ability to access capital markets and increase the cost of capital, with a consequent adverse effect on its earnings and financial position.

Standard & Poor's has confirmed EXOR's long-term and short-term debt ratings (respectively, BBB+ and A-2) with a negative outlook.

EXOR's policy and that of the companies in the Holdings System is to keep liquidity in demand or short-term deposits and readily negotiable money market instruments, bonds and equity securities, allocating such investments over an appropriate number of counterparts, with the principal purpose of having investments which can readily be converted into cash. The counterparts are chosen according to their creditworthiness and reliability.
However, in consideration of the current international financial market situation, market conditions which might negatively affect the normal operations of financial transactions cannot be excluded.

EXOR's earnings not only depend on the market value of its principal investment holdings but also on the dividends they pay and, in the end, reflect their earnings and financial performance and investment and dividend payment policies. A worsening of the financial market conditions and the earnings of the principal investment holdings could affect EXOR's earnings and cash flows.

EXOR mainly operates through its investments in subsidiaries and associates in the automobile market (Fiat Group), in Agricultural and Construction Equipment (Fiat Industrial Group from January 2011), in real estate services (C&W Group), in paper (Sequana Group), in tourism (Alpitour Group) and in professional soccer (Juventus Football Club). As a result, EXOR is exposed to the typical risks of the markets and industries in which such subsidiaries and associates operate.

At December 31, 2010, the investment in Fiat (equal to 30.45% of ordinary share capital, 30.09% of preferred share capital and 2.93% of savings share capital) represented more than 60% of the current value of EXOR's investment portfolio, calculated on the basis of the NAV (Net Asset Value) method described on page 5.
Therefore, the performance of the Fiat Group, and, prospectively, the Fiat Industrial Group, has a very significant impact on EXOR's earnings and financial position.

EXOR and its subsidiaries and associates are exposed to fluctuations in currency and interest rates and use financial hedging instruments, compatible with the risk management policies adopted by each of them. Despite these hedging transactions, sudden fluctuations in currency or interest rates could have an adverse effect on earnings and financial position.
The subsidiaries and associates are generally exposed to credit risk which is managed by specific operating procedures. Given its activities, EXOR is not significantly exposed to such risk.
EXOR and its subsidiaries and associates are exposed to risks connected with the outcome of pending litigation for which they set aside, if appropriate, specific risk provisions. However, negative effects on the earnings and financial position of EXOR and/or its subsidiaries and associates connected with such risks cannot be excluded.

The following paragraphs indicate the main specific risks and uncertainties of the companies in consolidation (Fiat Group, C&W Group, Alpitour and Juventus Football Club).

FIAT GROUP

Following is a brief description of risks and uncertainties that could potentially have a significant impact on the activities of Fiat Group post Demerger and those of Fiat Industrial Group. Here, the term "Group" refers indistinctly to each of the two groups. Factors distinctive to each of the two groups are then reported separately. Other risks and uncertainties, which are currently unforeseeable or considered to be unlikely, could also have a significant influence on the operating performance, financial position and future prospects of Fiat S.p.A. and Fiat Industrial S.p.A. and their respective groups.

Fiat Group - Risks associated with financing requirements

The Group's future performance will depend on, among other things, its ability to finance debt repayment obligations and planned investments from operating cash flow, available liquidity, the renewal or refinancing of existing bank loans and/or facilities and possible recourse to capital markets or other sources of financing. Although the Group has measures in place to ensure that adequate levels of working capital and liquidity are maintained, any declines in sales volumes could have a negative impact on the cash-generating capacity of its operating activities. The Group could, therefore, find itself in the position of having to seek additional financing and/or refinance existing debt, including in unfavorable market conditions with limited availability of funding and a general increase in funding costs. Any difficulty in obtaining financing could have a material adverse effect on the Group's business prospects, earnings and/or financial position.

Fiat Group - Risks associated with fluctuations in currency, interest and credit risk

The Group, which operates in numerous markets worldwide, is naturally exposed to market risks stemming from fluctuations in currency and interest rates. The exposure to currency risk is mainly linked to the difference in geographic distribution between the Group's manufacturing activities and its commercial activities, resulting in cash flows from exports denominated in currencies that differ from those associated with production activities.

The Group uses various forms of financing to cover funding requirements for its industrial activities and for financing customers and dealers. Moreover, liquidity for Industrial Activities was also principally invested in variable-rate or short-term financial instruments. The Financial Services companies operate a matching policy to offset the impact of differences in rates of interest on the financed portfolio and related liabilities. Nevertheless, changes in interest rates can result in increases or decreases in revenues, finance costs and margins.

Consistent with its risk management policies, the Group seeks to manage risks associated with fluctuations in currency and interest rates through the use of financial hedging instruments. Despite such hedges being in place, sudden fluctuations in currency or interest rates could have an adverse effect on the Group's business prospects, earnings and/or financial position.

The Group's Financial Services activities are also subject to the risk of insolvency of dealers and end customers, as well as unfavorable economic conditions in markets where these activities are carried out, which the Group seeks to mitigate through the credit approval policies applied to dealers and end customers.

Fiat Group - Risks associated with relationships with employees and suppliers

In many countries where the Group operates, Group employees are protected by various laws and/or collective labor agreements that guarantee them, through local and national representatives, the right of consultation on specific matters, including downsizing or closure of production units and reductions in personnel. The laws and/or collective labor agreements applicable to the Group could impair its flexibility in reshaping and/or strategically repositioning its business activities. The Group's ability to reduce personnel or implement other permanent or temporary redundancy measures is subject to government approvals and the agreement of the labor unions. Industrial action by employees could have an adverse impact on the Group's business activities.

Furthermore, the Group purchases raw materials and components from a large number of suppliers and relies on services and products provided by companies outside the Group. Some of these companies are highly unionized. Close collaboration between a manufacturer and its suppliers is common in the industries in which the Group operates (even if to a lesser extent for the Fiat Industrial Group) and although this offers economic benefits in terms of cost reduction, it also means that the Group is reliant on its suppliers and is exposed to the possibility that difficulties, including those of a financial nature, experienced by those suppliers (whether caused by internal or external factors) could have a material adverse effect on the Group's business prospects, earnings and/or financial position.

Fiat Group - Risks associated with management

The Group's success is largely dependent on the ability of its senior executives and other members of management to effectively manage the Group and individual areas of business. The loss of any senior executive, manager or other key employee without an adequate replacement or the inability to attract and retain new, qualified personnel could therefore have an adverse effect on the Group's business prospects, earnings and/or financial position.

Fiat Group - Risks associated with the high level of competition in the industries in which the Group operates

Substantially all of the Group's revenues are generated in the automobile industry, which is highly competitive and encompasses the production and distribution of passenger cars, agricultural and construction equipment, trucks and commercial vehicles and the related components and production systems. The Group faces competition from other international passenger car and light commercial vehicle manufacturers and distributors in Europe and Latin America and from other international groups and various local agricultural and construction equipment manufacturers and distributors and the related components suppliers in Europe, North America and Latin America. These markets are highly competitive in terms of product quality, innovation, pricing, fuel economy, reliability, safety, customer service and financial services offered.

Competition, particularly in pricing, has increased significantly in the Group's many industry sectors in recent years. In addition, partly as a result of the contraction in demand for automobiles, global production capacity for the car industry significantly exceeds current demand. This overcapacity, combined with high levels of competition and weakness of major economies, could intensify pricing pressures.

Should the Group be unable to adapt effectively to external market conditions, this could have an adverse effect on its business prospects, earnings and/or financial position.

Fiat Group - Risks associated with selling in international markets and exposure to changes in local conditions

A significant portion of the Group's existing activities are conducted and located outside of Italy and the Group expects that revenues from sales outside Italy – and, more generally, outside of the European Union – will account for an increasing portion of total revenues. The Group is subject to risks inherent to operating globally, including those related to:

- exposure to local economic and political conditions;
- import and/or export restrictions;
- multiple tax regimes, including regulations relating to transfer pricing and withholding and other taxes on remittances and other payments to or from subsidiaries;
- foreign investment and/or trade restrictions or requirements, foreign exchange controls and restrictions on repatriation of funds; and/or
- the introduction of more stringent laws and regulations.

Unfavorable developments in any one of these areas (which may vary from country to country in which the Group operates) could have a material adverse effect on the Group's business prospects, earnings and/or financial position.

Fiat Group - Risks associated with environmental and other government regulation

The Group's products and activities are subject to numerous environmental laws and regulations (local, national and international) which are becoming increasingly stringent in many countries in which it operates (particularly in the European Union). Such regulations govern, among other things, products – with requirements for emissions of polluting gases, reduced fuel consumption and safety becoming increasingly stricter – and industrial plants – with requirements for emissions, treatment of waste and water and prohibitions on soil contamination. To comply with such regulations, the Group employs considerable resources and expects it will continue to incur substantial costs in the future.

In addition, government initiatives to stimulate consumer demand for products sold by the Fiat Group post Demerger, such as changes in tax treatment or purchase incentives for new vehicles, can substantially influence the timing and level of revenues. The size and duration of such government measures is unpredictable and outside of the Group's control. Any adverse change in government policy relating to those measures could have a material adverse effect on the Group's business prospects, operating results and/or financial position.

Fiat Group - Risks associated with the ability to offer innovative products

The success of the Group's businesses depends on their ability to maintain or increase share in existing markets and/or to expand into new markets through the development of innovative, high-quality products that provide adequate profitability. In particular, the failure to develop and offer innovative products that compare favorably to those of the Group's principal competitors in terms of price, quality, functionality and features, or delays in bringing strategic new models to market, could result in reduced market share, having a material adverse effect on the Group's business prospects, earnings and/or financial position.

Fiat Group - Risks associated with operating in emerging markets

The Group operates in a number of emerging markets, both directly (e.g., Brazil and Argentina) and through joint ventures and other cooperation agreements (e.g., Turkey, India, China and Russia). The Group's exposure to these countries has increased in recent years, as has the number and importance of such joint ventures and cooperation agreements. Economic and political developments in these markets, including economic crises or political instability, have had and could in future have a material adverse effect on the Group's business prospects, earnings and/or financial position.

FIAT GROUP POST DEMERGER - RISKS FACTORS AND UNIQUE UNCERTAINTIES

Risks associated with the activities of Fiat Group post Demerger being concentrated in the Automobiles and automobile components sector

Pursuant to the Demerger, Fiat S.p.A. transferred its shareholdings in companies operating in the Agricultural and Construction Equipment, and the Trucks and Commercial Vehicles sectors to Fiat Industrial S.p.A., together with the "Industrial & Marine" business line of FPT Powertrain Technologies. Consequently, Fiat S.p.A.'s principal activities are the Automobiles and the automobile-related components & production systems businesses that include Fiat Group Automobiles, Ferrari, Maserati, Magneti Marelli, Teksid and Comau, in addition to the "Passenger & Commercial Vehicles" business line of FPT Powertrain Technologies. By contrast to the profile of Fiat Group prior to December 31, 2010, the future earnings of Fiat Group post Demerger will, therefore, be determined by the financial performance of those businesses only.

In the Automobiles business, sales to end customers are cyclical and subject to changes in the general condition of the economy, the readiness of end customers to buy and their ability to obtain financing and the possible introduction of measures by governments to stimulate demand. The sector is also subject to constant renewal of the product offering through frequent launches of new models. A negative trend in the Automobiles business could have a material adverse impact on the business prospects, earnings and/or financial position of the Fiat Group post Demerger.

Fiat Group post Demerger - Risks associated with the policy of targeted industrial alliances

The Group has engaged in the past, and may engage in the future, in significant corporate transactions such as mergers, acquisitions, joint ventures and restructurings, the success of which is difficult to predict. In particular, although Fiat Group holds a 25% interest in Chrysler Group LLC and has signed agreements for the establishment of a global strategic alliance, there can be no assurance that this alliance will function as intended or produce the expected benefits.

There can be no assurance that Fiat Group post Demerger will succeed in achieving the synergies, cost savings, expansions in its product offerings or other benefits expected from the strategic alliance with Chrysler Group LLC or any other transaction.

The failure of any significant strategic alliance, joint venture or other similar transaction could have an adverse effect on the business prospects, earnings and/or financial position of Fiat Group post Demerger.

Fiat Group post Demerger - Risks associated with credit ratings

The ability to access the capital markets or other forms of financing and the related costs are dependent, amongst other things, on the Group's credit ratings. The Fiat Group's official rating is representative of the rating assigned by each of the major rating agencies.
Specifically, Fitch assigned a BB+ rating with a negative outlook. Moody's assigned a Ba1 rating con a negative outlook. Standard & Poor's assigned a BB+ rating with a negative outlook.

Any further downgrades could increase the Group's cost of capital and potentially limit its access to sources of financing with a consequent material adverse effect on the Group's business prospects, earnings and/or financial position.

FIAT INDUSTRIAL GROUP - RISK FACTORS AND UNIQUE UNCERTAINTIES

Risks associated with the activities of the Fiat Industrial Group post Demerger being concentrated in the Agricultural and Construction Equipment, Trucks and Commercial Vehicles and the Industrial & Marine FPT Powertrain Technologies sectors

Pursuant to the Demerger, Fiat S.p.A. transferred its shareholdings in companies operating in the Agricultural and Construction Equipment and also the Trucks and Commercial Vehicles sectors to Fiat Industrial S.p.A., together with the "Industrial & Marine" business line of FPT Powertrain Technologies. Consequently, from the effective date of the merger, the principal activities of Fiat Industrial will be those relating to such businesses. Therefore, the future earnings of Fiat Industrial will reflect the performance of such activities.

Fiat Industrial Group - Risks associated with the capital goods market

More than other sectors, producers in the capital goods sector, such as CNH, Iveco and FPT Industrial are subject to:

- the condition of financial markets, in particular, the ability to access the securitization market and prevailing interest rates in that market. In North America, in particular, CNH makes considerable use of asset-backed securitization to fund financing offered to dealers and end customers. Negative conditions in the financial markets, and the asset-backed securitization market in particular, could have a significant impact on the Group's business prospects, earnings and/or financial position;
- cyclicality, which can cause sudden declines in demand, with negative effects on inventory levels and product pricing, both new and used. In general, demand in the capital goods sector is highly correlated to the economic cycle and can be subject to even greater levels of volatility.

Fiat Industrial Group - Risks associated with the agricultural and construction equipment markets

Performance of the agricultural equipment market is influenced, in particular, by factors such as

- the price of agricultural commodities and the relative level of inventories;
- the profitability of agricultural enterprises;
- the demand for food products;
- agricultural policies, including aid and subsidies to agricultural enterprises, provided by major governments and/or supranational organizations.

In addition, unfavorable climactic conditions, especially during the spring, a particularly important period for generating sales orders, could have a negative impact on the decision to buy agricultural equipment and, consequently, on Fiat Industrial Group’s revenues.

Performance of the construction equipment market is influenced, in particular, by factors such as:
- public infrastructure spending;
- new residential/non-residential construction.

The above factors can significantly influence the demand for agricultural and construction equipment and, therefore, the financial results of the Fiat Industrial Group.

Fiat Industrial Group - Risks associated with the credit rating

The ability to access the capital markets or other forms of financing and the related costs are dependent, amongst other things, on the Group’s credit ratings.

On January 5, 2011, Moody's Investors Service assigned Fiat Industrial S.p.A. a Corporate Family Rating of Ba1 with a stable outlook.

On February 24, 2011, Standard & Poor’s Rating Services rated Fiat Industrial S.p.A.’s long-term debt BB+ with a negative outlook.

Any downgrades could increase the Group’s cost of capital and potentially limit its access to sources of financing with a consequent material adverse effect on the Group’s business prospects, earnings and/or financial position.

C&W GROUP

The operations of C&W Group are directly influenced by the general economic environment and the international and local real estate business and the political situations in the countries in which it operates.

The economic factors which influence operations are the general economic situation, employment levels, interest rates, access to credit to fund transactions and the effects of tax and regulatory policies.

Economic recession, increases in interest rates or declines in demand in the real estate sector could have an adverse effect on the earnings and financial position of C&W Group.

In addition, these adverse conditions would also affect commission expense, which varies in relation to the revenues of C&W Group. Brokers, in fact, are generally paid on the basis of commissions and compensation correlated to the Group's revenues. Consequently, a negative effect on the Group's operating margins due to the deterioration of market conditions is partly offset by such a correlation.

ALPITOUR GROUP

Alpitour Group - General risks

The trend in demand for tourist packages is always acutely influenced by outside factors such as political risks (conflicts, institutional changes, unilateral acts of government and terrorism), the international economic situation, natural disasters and health scares (e.g. pandemics).

The international political situation, especially in situations of war and terrorist threats, could generate a contraction in demand for the Alpitour Group's services. Areas located in developing countries or plagued by unstable political and social instability are clearly more exposed to this type of risk.

Another risk factor is caused by the ravages of weather such as tsunamis, hurricanes, earthquakes, volcanic eruptions as well as pandemics or epidemics which could cause a sharp decline in demand for tourism services to the affected destinations.

A negative international economic environment could significantly affect the propensity of clients to purchase tourist packages, leading them to place more emphasis on primary needs.

Alpitour Group - Risks typical of the tourism sector

The Alpitour Group (with the exception of incoming activities) operates mostly with Italian clientele in that the product offered features qualitative standards that mirror the expectations and needs of Italian demand. Therefore, the business is strongly influenced by domestic economic conditions, interest rates, taxes, uncertainty over future economic prospects and the shift towards other goods and services in spending choices. Moreover, the fall in consumption after the slowdown in economic growth could lead to a considerable decline the number of passengers.

The style and habits of the Italian clientele mean that the economic performance of the tourism sector is highly seasonal and for the most part revenues are concentrated in the summer season.

The typical activities of the Alpitour Group use services provided by third parties, mainly suppliers of air and hotel services and travel agencies, whether individual or part of networks. The risk that such services will not be rendered efficiently and without interruption could compromise the earnings of the Alpitour Group and damage its image.

The Alpitour Group, because of its vertical integration, the presence of all the links in the tourism chain, the diversification of key suppliers and specific sales policies aimed at sustaining demand in the low season, believes that it can manage and minimize such risks.

Alpitour Group - Risks relating to information technology processes

The tourism sector is firmly anchored to information technology processes which cover the entire business cycle starting from the booking system. The risk of the interruption, even temporarily, of information systems could cause difficulties in operations and in supplying services to clients
By continually updating and maintaining its systems and designing specific disaster recovery plans, as well as holding commercial contracts with leading suppliers of substitute technologies, the Alpitour Group has all the means necessary to monitor and meet such risks.

Alpitour Group - Financial risks

Alpitour Group is exposed to financial risks such as credit risk, liquidity risk, exchange rate risk, interest rate risk and fuel price fluctuations.

The exposure to credit risk is an innate risk of the Group's activities and is mainly represented by the amount of trade receivables. The concentration of credit risk, however, is mitigated by the fact that exposure is spread over a large number of counterparts and customers, as well as by bank guarantees obtained to safeguard against greater exposure. Trade receivables are recognized in the financial statements net of writedowns calculated on the risk of non-fulfillment by the counterparts, determined by considering information available on the clients' solvency and historical data.

The Alpitour Group is subject to liquidity risk which may arise as a result of difficulties in obtaining loans to support operating activities at the appropriate times. Cash flows, financing needs and the liquidity of the group companies are monitored and managed centrally by the group treasury function with the aim of ensuring an effective and efficient management of financial resources. In order to keep refinancing costs to a minimum and ensure that the necessary cash flows are obtained on a timely basis according to the group's operating needs, the central treasury function secures sufficient credit lines.
To this end, the only committed lines and loans outstanding for €168.1 million are considerably higher than the group's financial needs.

The Alpitour Group is exposed to market risk from exchange rate fluctuations, especially the U.S. dollar, since it operates on an international level. The Alpitour Group uses loans and financing transactions to support its operating requirements. The Alpitour Group, and, in particular, the tour operating division, based on the conditions in the contracts for the purchase of air transport services, is exposed to risks of fluctuation in fuel prices mainly in association with international political stability and other outside factors.
The Alpitour Group regularly assesses its exposure to the various types of risk and manages such risks through the use of traditional instruments and derivatives according to its management and control policy. This policy does not allow activities of a speculative nature and the use of derivatives is reserved for exposure to fluctuations in exchange rates, interest rates and fuel prices for hedging purposes.
Exposure to exchange rate risk on commercial transaction in foreign currency is hedged mainly by forward, forward knock-in and zero cost collar contracts. Exposure to interest rate risk on medium/long-term loans is mostly hedged by interest rate swaps and zero costs collars.

Finally, exposure to the risk of fluctuations in fuel prices is hedged by commodity swaps and zero cost collars.
The counterparts of such contracts are leading Italian and international financial institutions with high ratings.
As regards the exchange rate risk and the price fluctuation risk of oil, according to the sales contract conditions of tourist packages, the organizers of the trip have the right to adjust the sales prices for the increase in the costs of the services generated by these two variables.

JUVENTUS FOOTBALL CLUB

Juventus Football Club - Risks connected to general economic conditions (industry risk)

In the short term, Juventus' earnings and financial position are not influenced significantly by overall economic conditions given that most the Company's revenue items stem from long-term contracts. Nonetheless, if the weakness and uncertainty of the Italian and European economy should become long-term, the activities, strategies and prospects of the Company could be adversely affected in particular as concerns radio and TV rights, sponsorships and expected revenues from the new Stadium project, currently under construction, and also sales activities targeted at team supporters.

Juventus Football Club - Risks connected to activities (strategies and operational process risk)

Players' registration rights represent the Company's factor of production. Sports activities are subject to risks connected to physical health and condition. Injuries and accidents, therefore, could potentially have a significant impact at any time on the Company's earnings and financial position.

At the same time, given that the business also focuses on the commercial exploitation of the brand, trademark infringement by third parties is another risk the Company faces. The arrival on the market of a large number of imitation goods bearing the Company's trademark or the occurrence of events that may impair the market value of the trademark could have an adverse effect on its earnings and financial position.

Finally, there are risks connected with supporter behavior which may result in fines, sanctions or other punishments being levied on the company and indirect damages to the club's image which may lead to lower stadium turnout and lower merchandising sales.

Juventus Football Club - Risks connected to the Transfer Campaign (strategic process risk)

The Company's business and financial performance are affected significantly by the acquisitions and disposals made as part of Transfer Campaigns. Difficulty in correlating individual transactions to the mid-term plan and the annual sports management guidelines could potentially have an adverse impact on the Company’s financial position and income statement. Moreover, having a squad of players that does not meet the technical and tactical requirements of the trainer and the strategic needs of the sporting director raises the risk of not being able to optimize the playing side, bringing unexpected costs (amortization charges, players' wages).

Juventus Football Club - Risks connected with failure to qualify for sports tournaments (strategic process risk)

The Company’s financial performance is significantly affected, both directly and indirectly, by the results achieved by the team in the various tournaments it takes part in, especially the UEFA Champions League. Direct entry to the tournament is currently assured to the top three ranking teams in the Serie A Championship, while the fourth-placed team has the opportunity of qualifying through a preliminary qualifying round. Failure to qualify for the tournament, even where due to a reduction in the number of participating teams, would potentially have an adverse impact on the Company’s financial position and income statement.

Juventus Football Club - Risks connected to the dependence on radio and television rights (strategic process risk)

The Company’s revenues are closely tied to proceeds from the sale of radio and television rights, the terms and conditions of those rights, and how such rights are sold. New rules governing the ownership of broadcasting rights to sports events and the distribution of proceeds, applicable starting from the 2010/2011 financial year (introduced by Legislative Decree 9 of January 9, 2008), have reduced and may further reduce Juventus’ revenues, bringing a significant impact on the financial position, income statement and cash flows of Juventus.

Juventus Football Club - Risks connected to the sponsorship market (industry risk)

The financial market crisis and resulting economic recession have had repercussions for sports sponsorships, as sponsors today prefer to shorten the time horizon of the promotional/advertising investments they undertake. The effect of this shift in the market in the short term has been to lower the proportion of long-term sponsorship revenues compared to the past. If the economic crisis should continue, growth in sponsorship revenues may fall below expectations, with the result that Juventus’ financial position, income statement and cash flows may be impacted.

Juventus Football Club - Risks connected to the new Stadium investment (strategic and operational process risk)

The main risks connected to the construction of the new Stadium concern the completion of works to schedule, planned by and no later than June 2011, and, to a lesser extent, the sale of “sky boxes” and VIP stand seats as forecast by the Company. At present, the potential impact of the economic crisis on the Company’s financial position and cash flows raised through the sale of the seats cannot be forecast.

Juventus Football Club - Risks connected to funding requirements (industry risk)

Numerous factors affect Juventus’ financial position. These include the fulfillment of sports and business objectives, as well as trends in general economic conditions and in the markets in which the Company operates.

Juventus satisfies its funding needs for day-to-day operations and planned investments through cash flows raised through its operating activities, cash and cash equivalents, and bank credit facilities. Despite the current market situation, the Company expects to continue generating the funding it requires through its operating activities.

In accordance with the Company’s risk management policy, Juventus has credit facilities in place with a number of premier banking institutions to prevent cash flow shortages from arising. In addition to this, the Company holds its cash and cash equivalents as demand deposits or short-term deposits with a suitable number of different banks, to ensure the prompt availability of the funds. Nevertheless, given the adverse situation of financial markets, the emergence of bank and money market situations that may interrupt normal financial transactions cannot be excluded, which would give rise to cash flow shortages in the event that credit facilities were also restricted.

Juventus Football Club - Risks connected to fluctuations in interest rates and exchange rates (financial process risk)

Juventus uses various forms of funding to assure the cash flows needed for its business. These include credit lines for cash advances and credit commitments, financial leases, and special purpose loans for mid/long-term investments. Changes in interest rates can raise or lower the cost of servicing these loans. The Company has decided to make use of financial instruments to hedge the risk of fluctuations in interest rates. Despite these hedges, sudden changes in interest rates could potentially have an adverse impact on the Company's financial position and income statement.

Juventus conducts almost all its purchase and sale transactions in Euro. As a result, the Company is not exposed in any significant way to the risk of exchange rate fluctuations.

Juventus Football Club - Risks connected to the outcome of pending litigation (compliance risk)

With the assistance of its legal advisors, the company constantly manages and monitors all pending litigation and, on the basis of the predicable outcome, when necessary, proceeds to make accruals in specific provisions.

On the basis of pending litigation, future negative effects, both significant and insignificant, on Juventus' financial position, income statement and cash flows cannot be excluded.

SIGNIFICANT EVENTS IN 2010

Sale of Intesa Sanpaolo shares

On January 15, 2010, EXOR S.p.A. sold 30 million Intesa Sanpaolo ordinary shares (0.25% of ordinary share capital) in the market for proceeds of €90 million and a consolidated gain of €0.6 million.
EXOR still holds 10 million Intesa Sanpaolo ordinary shares (approximately 0.08% of ordinary share capital).

Investment commitment in Almacantar

On April 16, 2010, EXOR S.A. signed a commitment agreement to invest €100 million in Almacantar, a new company operating in the real estate sector.
Founded by Mike Hussey and Neil Jones, two real estate professionals who between them have a strong and successful track record in the European real estate sector, Almacantar aims to capitalize on commercial real estate investment and commercial development opportunities, primarily in the market for offices, in London and Paris.
Following the agreements sealed with EXOR S.A. and with the other shareholders, Almacantar will have €150 million at its disposal to commence its investment strategy.
The agreement also provides that EXOR S.A. will invest another €50 million subject to raising additional capital from new shareholders.
On April 28, 2010, EXOR S.A. subscribed to 10 million Almacantar Class A preferred shares (63.75% of the capital and voting rights) for a total par value of €10 million, initially paying in 25%, the minimum established by law, for a sum of €2.5 million. The remaining €7.5 million was paid in March 2011.

On August 9, 2010, following a share capital increase by Almacantar for €2.5 million, directed to the entry of a new stockholder which fully subscribed to the capital increase, EXOR S.A.'s stake in the capital and voting rights of the company decreased from 63.75% to 54.98%.

Resolutions by the ordinary session of the shareholders' meeting

The ordinary session of the EXOR S.p.A. shareholders' meeting held on April 29, 2010 approved the separate financial statements for the year 2009 and resolved to distribute dividends of €0.27 for each ordinary share, €0.3217 for each preferred share and €0.3481 for each savings share for a maximum total of €67.9 million. The dividends became payable on May 27, 2010.

The shareholders' meeting also resolved to renew the authorization for the purchase and disposal of treasury stock for 18 months up to a maximum of 38 million ordinary and/or preferred and/or savings shares for a maximum disbursement of €450 million.

Treasury stock transactions

Under the treasury stock buyback Programs approved by the board of directors on March 25, 2009 and on May 11, 2010, during 2010, EXOR purchased 1,559,500 ordinary shares (0.97% of the class) at an average cost per share of €14.45 for a total of €22.5 million, 3,274,484 preferred shares (4.26% of the class) at an average cost per share of €10.02 for a total of €32.8 million, and also 213,295 savings shares (2.33% of the class) at an average cost per share of €11.70 for a total of €2.5 million. The total investment in treasury stock amounted to €57.8 million.
Currently EXOR S.p.A. holds the following treasury stock:

		% of class	Carrying amount	
Class of stock	Number of shares	stock	Per share (€)	Total (€ ml)
ordinary	4,109,500	2.56	12.68	52.1
preferred	10,239,784	13.33	11.13	114.0
savings	421,695	4.60	10.00	4.2
				170.3

Subscription to Banijay Holding share capital increase

On May 28, 2010, EXOR S.A. subscribed to 17,171 new Banijay Holding shares for an equivalent amount of €1.7 million.

Following this transaction, EXOR S.A. holds 351,590 Banijay Holding shares equal to 17.09% of share capital and 17.17% of voting rights.

This investment is part of the total commitment of €42.5 million (of which €35.3 million has already been paid) undertaken in May 2008 and directed towards financially supporting Banijay Holding's medium-term development plan.

Investment commitments with the Jardine Matheson Group and Rothschild

On June 9, 2010, EXOR S.A. signed an agreement in which it agreed to commit up to $100 million together with the Jardine Matheson Group and Rothschild in private equity investments in India and China.

As a result of this partnership with these two highly experienced and successful international groups, EXOR will be strongly placed to capture both medium- and long-term investment opportunities in regions with high growth potential across a wide range of sectors.

The partnership, which has $250 million of initial investment capital at its disposal, intends to invest alongside entrepreneurs, corporations and other private equity houses in the midcap segment.

According to the agreement, all the partners will work together to define the partnership's investment and development strategy and identify opportunities, making each investment decision on a unanimous basis. At September 30, 2010, EXOR S.A. made its first investment of €2.8 million.

Renewal of the Sequana shareholders' agreement between EXOR S.A. and DLMD and the DLMD loan restructuring agreement

On July 21, 2010, EXOR S.A. and DLMD, a family investment company controlled by Pascal Lebard (general manager of Sequana), renewed the shareholders' agreement signed in 2007 regarding their investment in Sequana. The pact is for a period of one year and is renewable for successive one-year periods unless terminated.

The pact aims to ensure the coordination of Sequana's shareholders along the lines of the governance model that had been adopted in 2007.

According to the pact, the Sequana board of directors will be composed of ten members. Of these, three will be put forward by EXOR S.A. – including the chairman of the board, Tiberto Brandolini d'Adda – and two will be proposed by DLMD, including the general manager, Pascal Lebard. The remaining five independent directors will be proposed by common agreement between the parties.

At the same time, the debt assumed by DLMD in July 2007, when DLMD acquired the stake in Sequana, was restructured on the basis of an agreement reached with the lenders (The Royal Bank of Scotland, BNP Paribas and EXOR S.A.).

As established in the DLMD debt restructuring agreement, on July 30, 2010, the debt payable to EXOR S.A. was full extinguished against the transfer to EXOR S.A. of 790,190 Sequana shares owned by DLMD (equal to 1.59% of capital). At December 31, 2010, EXOR S.A. and DLMD hold, respectively, 28.24% and 20.22% of Sequana's capital.

Investment in BTG Pactual

On December 6, 2010, an agreement was sealed between BTG Pactual (the premier company in the investment banking sector and one of the leaders in investment management in Brazil) and a consortium of top international investors for the subscription to new BTG Pactual shares representing 18.6% of its capital for an investment of approximately $1.8 billion. EXOR S.A. joined the consortium through the acquisition of investments in Copacabana Prince Partecipações and in BTG Investments with an investment of €19 million, with the aim of making an attractive investment and seizing new investment opportunities in Brazil.

Investment in The Economist

In December 2010, EXOR S.A. purchased 1,140,000 The Economist Newspaper Limited ordinary shares from RIT Capital Partners at a price per share of GBP 21.65 for a total of GBP 24,681,000 (€29.2 million).
At December 31, 2010, EXOR S.A. holds 1,190,000 ordinary shares of the company, equal to 4.722% of capital.

Other investments

As a result of commitments to invest in the NoCo B L.P. limited partnership, which groups a series of funds managed by Perella Weinberg Partners L.P., during 2010 EXOR S.A. invested $18.6 million (€13.7 million) in the NoCo B L.P. limited partnership and €5 million in the Perella Weinberg Real Estate I fund.
Moreover, EXOR S.A. obtained reimbursements from the NoCo B L.P. partnership for $1.4 million (€1.1 million).
At December 31, 2010, the investment commitments in NoCo B and in the Perella Weinberg Real Estate I fund amounted, respectively, to $38.4 million (€28.7 million) and €17 million.

In December 2010, EXOR S.A. signed a commitment agreement for an investment in BDT Capital Partners Fund I, LP for a total amount of $28.6 million; the first payment was for $6.6 million (€5 million).
At December 31, 2010, the remaining investment commitment in BDT Capital Partners Fund I, LP is therefore $22 million (€16.5 million).

Transactions regarding Gruppo Banca Leonardo

On May 31, 2010, EXOR S.A. collected its share of the partial extraordinary distribution of paid-in capital equal to €27.3 million (€1.08 for each of the 25,255,537 Gruppo Banca Leonardo S.p.A. shares held at that date). This amount was deducted from the carrying amount of the investment.

On November 18, 2010, EXOR S.A. purchased 12,627,769 Gruppo Banca Leonardo S.p.A. ordinary shares (4.86% of capital) from a stockholder for an investment of €30 million.

After such transaction, EXOR S.A. held 37,883,306 Gruppo Banca Leonardo S.p.A. ordinary shares equal to 14.57% of its capital.

Criminal cases relative to the contents of the press releases issued by IFIL and Giovanni Agnelli e C. on August 24, 2005

On December 21, 2010, the Turin Court, first criminal section composed of a collegiate body, ruled in absolute favor of the defendants, Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone, fully acquitting them because the fact did not exist and deeming also inexistent ex art. 66 Legislative Decree 231/2001 the administrative offense disputed against IFIL S.p.A. (merged by EXOR S.p.A.) and Giovanni Agnelli e C. S.a.p.az..

SIGNIFICANT EVENTS IN THE FIRST QUARTER OF 2011

Demerger of Fiat activities to Fiat Industrial

During 2010, the Fiat Group initiated and completed a strategic project to separate the Agricultural and Construction Equipment (CNH) and Trucks and Commercial Vehicles (Iveco) activities, as well as the “Industrial & Marine” business line of FPT Powertrain Technologies, from the Automobile and Automobile-related Components and Production Systems activities, which include the sectors Fiat Group Automobiles, Maserati, Ferrari, Magneti Marelli, Teksid, Comau and the “Passenger & Commercial Vehicles” business line of FPT Powertrain Technologies.

The separation of those businesses, in the form of their partial proportional demerger from Fiat S.p.A. and transfer to Fiat Industrial S.p.A., resulted in the creation of the Fiat Industrial Group on January 1, 2011 (consisting of CNH, Iveco and FPT Industrial). From the same date, Fiat Group post Demerger is comprised of Fiat Group Automobiles, Maserati, Ferrari, Fiat Powertrain, Magneti Marelli, Teksid and Comau. On January 3, 2011, Fiat Industrial S.p.A.’s shares began trading on the Mercato Telematico Azionario managed by Borsa Italiana S.p.A..

For every Fiat S.p.A. ordinary, preferred and savings share held, EXOR S.p.A. received a Fiat Industrial S.p.A. share of the corresponding class of stock.

Dividends and distribution of reserves to be received

The following table shows the dividends and the distribution of reserves already approved by some of the investment holdings.

Holding	Class of stock	Number of shares	Dividends Per share	Dividends Total (€/ml)	
Fiat S.p.A.	ordinary	332,587,447	€ 0.09	29.9	
Fiat S.p.A.	preferred	31,082,500	€ 0.31	9.6	
Fiat S.p.A.	savings	2,338,629	€ 0.31	0.7	
Alpitour S.p.A. (distribution of reserves)	ordinary	35,450,000	€ 0.28	10.0	(a)
Total EXOR S.p.A.'s share to be received				**50.2**	
SGS S.A.	ordinary	1,173,400	CHF 65.00	59.8	(b)
Sequana	ordinary	13,993,329	€ 0.40	5.6	
Gruppo Banca Leonardo	ordinary	37,883,306	€ 0.12	5.5	
Total EXOR S.A.'s share to be received				**70.9**	

(a) The amount will be recognized as a deduction of the carrying amount of the investment since the distribution is by withdrawal from paid-in capital.
(b) CHF 76.3 million converted at the rate of 1.2748.

Transactions regarding Gruppo Banca Leonardo

In March 2011, EXOR S.A. purchased a total of 7,576,662 Gruppo Banca Leonardo S.p.A. ordinary shares (2.91% of capital) from three different shareholders at a price per share of €2.38 for a total of €18 million.

EXOR S.A. today holds 45,459,968 Gruppo Banca Leonardo S.p.A. ordinary shares equal to 17.41% of its capital.

Changes in corporate positions, relative compensation and organizational structure

In the meeting held on February 11, 2011, the EXOR board of directors named John Elkann chief executive officer in addition to his post as chairman of the board.

Carlo Barel di Sant'Albano has left the position of chief executive officer and has been appointed chairman of the subsidiary Cushman & Wakefield.

Tobias Brown has been appointed Chief Investment Officer with responsibility for all of EXOR's investment activities.

Alessandro Nasi has been named head of EXOR's U.S. activities.

On March 31, 2011, the chief administration officer and manager responsible for the preparation of the corporate financial reports, Aldo Mazzia, will leave EXOR to take up operational positions at the subsidiary Juventus F.C..

The chief financial officer, Enrico Vellano, has taken overall responsibility for EXOR's support functions and has been named the manager responsible for the preparation of the corporate financial reports as from April 1, 2011.

Based on the motion put forward by the Compensation and Nominating Committee, the board of directors voted to increase Mr Elkann's annual compensation from €1 million to €2 million by virtue of the new operational roles he has assumed within the Company.

On the same date, the board of directors took note that, as a result of Mr Sant'Albano's resignation from the post of chief executive officer, he relinquished the 3,000,000 option rights granted to him under the EXOR Stock Option Plan 2008-2019. Moreover, since this is a voluntary resignation, he will not be entitled to the indemnity of €2.5 million in the event of the expiry of his term of office.
The board of directors also voted to maintain Mr Sant'Albano's existing insurance coverage and the use of the Company's apartment in Turin until December 31, 2011.

Finally, the board of directors, on the basis of the motion submitted by the Compensation and Nominating Committee, voted to grant Mr Elkann, by virtue of the new operational roles assumed by him, 3,000,000 options, corresponding to 795,000 EXOR ordinary shares under the EXOR Stock Option Plan 2008-2019.

BUSINESS OUTLOOK

EXOR S.p.A. expects to report a profit for the year 2011.

At the consolidated level, the year 2011 should show a further improvement in earnings which, however, will largely depend upon the performance of the principal investment holdings. Their most recent forecasts are presented below.

Fiat Group

The Fiat Group recently confirmed the 2011-14 Plan and financial targets set out in the presentation to the financial community in April 2010. In particular, the 2011 targets for Fiat Group post Demerger are as follows:

- revenues of approximately €37 billion;
- trading profit between €0.9 and €1.2 billion;
- net profit at around €0.3 billion;
- net industrial debt between €1.5 and €1.8 billion;
- capex in the range of €4 to €4.5 billion.

Fiat Industrial Group

The Fiat Industrial Group 2011-2014 Plan includes targets for the year 2011 of revenues of approximately €22 billion, a trading profit of €1.3 billion and net industrial debt of €1.9 billion.

C&W Group

In late 2010, the C&W Group board of directors approved a new Strategic Plan that focuses on four areas: create a highly coordinated and aligned global organization, provide a consistent service mix across markets, client prioritization and a focus on operational efficiencies.
C&W Group believes that with strong revenue growth, a profitable finish to 2010, momentum in the market and the economic trending in the Group's favor, the Strategic Plan provides the strong foundation for the Group in 2011 and beyond to build a more powerful and cohesive organization than ever before.

Alpitour Group

As concerns economic forecasts, the start of the current year was characterized by various outside factors which could negatively affect expected results, particularly the "shark" alarm at Sharm El sheik, the attack at the Coptic Christian Church of Alexandria in Egypt on January 1, 2011 and the popular uprisings that exploded in North Africa. Such events could condition the choices of consumers as regards the products Egypt and Tunisia, primary destinations in terms of both volumes and margins.
At market level, the winter season is predicted to continue to be marked by some difficulties and a weak demand, while signs of a recovery and a return to a climate of confidence are likely to coincide with the summer season.

In this scenario, the Alpitour Group aims to increase sales and its market share, better the economic results reported in 2010, raise the return on invested capital and further improve the financial situation. The Alpitour Group also intends to reconfirm itself as the market leader not only in size but also from the standpoint of innovation.

Juventus Football Club

The 2010/2011 economic performance will be adversely affected by the Club's failure to qualify for the UEFA Champions League. This will produce lower revenues from European competitions and lower sales revenues in addition to the effects stemming from the coming into force of the new regulations on television rights.

Therefore, on the basis of information currently available and in the absence of any extraordinary events, Juventus Football Club is expected to close the 2010/2011 financial year with a significant loss.

Sequana Group

For the full-year 2011, taking into account the different current forecasts on the evolution of the prices of raw materials and the internal actions already begun, Sequana expects to report a higher operating profit compared to 2010.

REVIEW OF THE RESULTS OF THE SEPARATE FINANCIAL STATEMENTS

EXOR S.p.A. closes the year 2010 with a profit of €151.8 million, increasing €63 million compared to the profit of €88.8 million in 2009. The increase is due primarily to higher net income from investments (+€66.3 million for dividends received and net gains) and lower net financial expenses (+€4.3 million) which are partly offset by the increase in non-recurring expenses (-€5.8 million) and other net changes (-€1.8 million).

The income statement and statement of financial position, as well as comments on the most significant line items are presented below.

EXOR S.p.A. – Income Statement

€ in millions	Note	2010	2009	Change
Dividends from investments	1	**197.8**	120.0	77.8
Gains on disposals and writedowns of investments	2	**10.2**	21.7	(11.5)

Total Equity and Liabilities		**4,869.8**	**100.0**	4,714.9	100.0	154.9

1. Dividends from investments

In 2010, dividends from investments amount to €197.8 million and include dividends collected from Fiat for €66.9 million, Intesa Sanpaolo for €0.8 million, Emittenti Titoli for €0.1 million and, lastly, from EXOR S.A. for €130 million, of which €33 million in cash and €97 million corresponding to the fair value of financial instruments transferred to EXOR S.p.A.

In 2009,dividends of €120 million mainly came from EXOR S.A. alone.

2. Gains on disposals and writedowns of investments

In 2010, the gain of €14.8 million relates to the sale of 30 million Intesa Sanpaolo ordinary shares (0.25% of ordinary share capital), with proceeds of €90 million, as well as the writedown of €4.6 million to align the carrying amount (€2.506 per share) of the remaining 10 million Intesa Sanpaolo shares to the stock trading price at December 31, 2010 (€2.042).

In 2009, the net gain of €21.7 million was due to the sale of 78 million Intesa Sanpaolo shares (0.66% of its ordinary share capital), with proceeds of €217.2 million.

3. Net financial expenses

Net financial expenses amount to €15.1 million in 2010. This is a net reduction of €4.3 million compared to 2009 (€19.4 million).

4. Net general expenses

Net general expenses total €22.5 million and show an increase of €0.9 million compared to 2009 (€21.6 million).

5. Non-recurring other income (expenses) and general expenses

In 2010 and 2009, these are net expense balances, respectively, for €17.3 million and €11.5 million. They include:

€ in millions	**2010**	2009
Fair value adjustment to the Alpitour stock option plan	**(9.7)**	(4.2)
Expenses arising on employee reduction plan	**(2.9)**	(4.5)
Fees for defense in legal cases	**(4.3)**	(2.6)
Sundry other income (expenses)	**(0.4)**	(0.2)
	(17.3)	(11.5)

The fair value adjustment to the Alpitour stock option plan of €9.7 million in 2010 represents the current year cost to align the payable to beneficiaries to the fair value estimated by an independent expert at December 31, 2010. Further information is provided in note 26 to the separate financial statements.

In 2010, the expenses arising on the employee reduction plan of EXOR S.p.A. and the subsidiary Exor Services amount to €2.9 million. In 2009, besides this type of expense (equal to €1.2 million), the line item included the extraordinary indemnity relative to the termination of the employment relationship resolved in favor of the former chief executive officer and general management of IFI S.p.A., Virgilio Marrone, for €3.3 million.

Fees for defense in legal cases are equal to €4.3 million (€2.6 million in 2009) and refer to the fees incurred for legal assistance in the cases relating to the content of the press releases issued by IFIL and by Giovanni Agnelli e C. on August 24, 2005.

Sundry other income (expenses) shows a net expense balance of €0.4 million in 2010 mainly deriving from the estimated expenses (€0.3 million) in connection with the early liquidation of FIA, proposed by EXOR since it is anticipated that there will no longer be a plurality of beneficiaries and with the aim of reducing administrative costs.

6. Investments

Details are as follows:

€ in millions	**12/31/2010**	12/31/2009	Change
Accounted for at cost			
Fiat S.p.A. (ordinary shares)	**2,619.4**	2,619.4	0.0
Fiat S.p.A. (preferred shares)	**250.4**	250.4	0.0
Fiat S.p.A. (savings shares)	**13.0**	13.0	0.0
	2,882.8	2,882.8	0.0

7. Equity

Equity at December 31, 2010 is €3,552.5 million (€3,539.8 million at December 31, 2009). The positive change of €12.7 million is detailed in the following table.

Further details are provided in the statement of changes in equity of the separate financial statements of EXOR S.p.A. at December 31, 2010.

€ in millions	
Equity at December 31, 2009	**3,539.8**
Dividends paid	(67.9)
EXOR treasury stock buybacks	(57.8)
Reversal of the fair value reserve on Intesa Sanpaolo stock, net of deferred taxes	(25.0)
Other net changes	11.6
Profit for the year	151.8
Net change during the year	**12.7**
Equity at December 31, 2010	**3,552.5**

8. Net financial position

At December 31, 2010, the net financial position is a negative €273.9 million and an improvement of €138.2 million compared to a negative €412.1 million at the end of 2009. The balance is composed as follows:

	12/31/2010			12/31/2009		
€ in millions	Current	Non-current	Total	Current	Non-current	Total
Financial assets	**596.0**	**138.2** (a)	**734.2**	281.4	71.7 (a)	353.1
Financial receivables from subsidiary	**30.6**	**0.0**	**30.6**	28.2	0.0	28.2
Cash and cash equivalents	**219.8**	**0.0**	**219.8**	337.4	0.0	337.4
Total financial assets	**846.4**	**138.2**	**984.6**	647.0	71.7	718.7

EXOR bonds 2006-2011	**(200.1)**	**0.0**	**(200.1)**	(0.2)	(199.7)	(199.9)
Bank debt and other financial liabilities	**(240.3)**	**(50.0)**	**(290.3)**	(38.3)	(125.0)	(163.3)
Total financial liabilities	**(462.8)**	**(795.7)**	**(1,258.5)**	(60.9)	(1,069.9)	(1,130.8)
Net financial position of EXOR S.p.A.	**383.6**	**(657.5)**	**(273.9)**	586.1	(998.2)	(412.1)

(a) These are bonds issued by leading counterparts and listed on active and regulated markets which the Company intends, and is able to hold, until their natural reimbursement date as an investment for a part of its available cash, in order to ensure a constant flow of financial income that could be considered attractive. This designation was decided in accordance with IAS 39, paragraph 9.
Such financial instruments are free of whatsoever restriction and, therefore, can be monetized whenever the Company should so decide in that sense. Their classification as non-current in the financial position has been adopted only in view of the fact that their natural maturity date is 12 months beyond the closing date of the financial statements. There are no trading restrictions and their degree of liquidity or the degree to which they can be converted into cash is considered high.

The positive change of €138.2 million in 2010 is due to the following cash flows:

€ in millions		
Net financial position at December 31, 2009		**(412.1)**
Dividends and reimbursement of reserves received from the investment holdings		205.3

REVIEW OF THE CONSOLIDATED RESULTS OF THE EXOR GROUP – SHORTENED

Through the subsidiary EXOR S.A., EXOR S.p.A. holds some important investments and controls some companies which contribute to the Group's investment activities and financial resource management. These companies constitute, together with Exor Services (a services company), the so-called Holdings System (the complete list of these companies is presented below).

In order to facilitate the analysis of the financial position and the results of operations of the Group, EXOR presents shortened consolidated financial statements (statement of financial position and income statement) prepared by applying the "shortened" consolidation criteria. Such shortened consolidated financial statements are presented along with the annual consolidated financial statements and the half-year condensed consolidated financial statements of each year. The consolidated data is also presented in the shortened format in the quarterly reports at March 31 and September 30 of each year.

In the preparation of the shortened consolidated statement of financial position and income statement, the separate financial statements or accounting data drawn up in accordance with IFRS by EXOR S.p.A. and by the subsidiaries in the "Holdings System" are consolidated line-by-line; the investments in the operating subsidiaries and associates (Fiat, C&W Group, Alpitour, Juventus Football Club and Sequana) are accounted for by the equity method on the basis of their consolidated financial statements or separate financial statements (in the case of Juventus Football Club) or accounting data prepared in accordance with IFRS. The investment in Almacantar (acquired on April 28, 2010) is stated at cost since the company was not yet fully operational at December 31, 2010.

The following table shows the consolidation and valuation methods of the investment holdings.

	% of consolidation	
	12/31/2010	12/31/2009
Companies of the Holdings System consolidated line-by-line (a)		
- Exor S.A. (Luxembourg)	**100**	100
- Exor Capital Limited (Ireland)	**100**	100
- Exor Services S.c.p.a. (Italy)	**99.62**	99.75
- Exor Inc. (USA)	**100**	100
- Ancom USA Inc. (USA)	**100**	100
- Exor LLC (USA)	**99.80**	-
Investments in operating subsidiaries and associates, accounted for by the equity method		
- Fiat Group	**29.59**	29.59
- Sequana Group	**28.37**	26.84
- C&W Group	**78.56** (b)	78.88 (b)
- Alpitour Group	**100**	100
- Juventus Football Club S.p.A.	**60**	60

(a) The list does not include companies in a wind-up and/or wound-up during 2009 and 2010.

(b) The percentage is calculated on issued share capital, net of treasury stock held and net of the estimate of treasury stock purchases from non-controlling interests to be made by C&W Group.

The EXOR Group closes the year 2010 with a consolidated profit of €136.7 million; the year 2009 ended with a consolidated loss of €388.9 million. The positive change amounts to €525.6 million and is due to the improvement in the results of the investment holdings (+€452.3 million), the increase in net financial income (expenses) (+€61.5 million) and other net changes (+€11.8 million).

At December 31, 2010, the consolidated equity attributable to Owners of the Parent is €6,074.9 million, with a net increase of €769.5 million compared to €5,305.4 million at the end of 2009. Further details are provided in note 11.

The consolidated net financial position of the Holdings System at December 31, 2010 is a positive balance of €42.6 million, with a negative change of €9 million compared to the positive balance of €51.6 million at the end of 2009. Additional details are provided in note 12.

The shortened consolidated **income statement** and **statement of financial position** and notes on the most significant line items are presented below.

1. Share of the profit (loss) of investments accounted for by the equity method

In 2010, the share of the profit (loss) of investments accounted for by the equity method is a profit of €133.2 million (a loss of €319.1 million in 2009). The positive change of €452.3 million reflects the improvement in the results of almost all the investment holdings, particularly the return to a profit position of the Fiat Group and the C&W Group; as regards Juventus F.C., the negative change is due to its failure to qualify for the Champions League 2010/2011, expenses to renew the first team and lower revenues due to the effects stemming from the new system for sharing the revenues on television rights.

	Profit (Loss) (in millions)				EXOR's share (€ in millions)		
		2010		2009	**2010**	2009	Change
Fiat Group	€	**520.0**	€	(837.8)	**153.9**	(247.9)	401.8

(a) Includes non-cash impairment charges for intangible assets (-$76.7 million), restructuring charges in connection with structure cost reduction actions (-$29.9 million) and costs associated with the relocation of the company's New York headquarters (-$7.5 million) and related tax benefits (+$19.3 million).

(b) Impairment charge for goodwill represented by acquisition costs incurred by EXOR S.A..

Comments on the operating performance by the main operating subsidiaries and associates are presented in the following sections of the report.

2. Dividends from investments

In 2010, dividends from investments amount to €50.1 million and include dividends collected from SGS for €49.1 million (€38.4 million in 2009), Intesa Sanpaolo for €0.8 million, Emittenti Titoli for €0.1 million (unchanged compared to 2009) and The New Economist Newspaper for €0.1 million (unchanged compared to 2009). In 2009, dividends had also been received from Gruppo Banca Leonardo for €2 million.

The distribution of reserves by Alpitour (€7.5 million) and Gruppo Banca Leonardo (€27.3 million) are accounted for as a deduction from the carrying amounts of the investments.

3. Gains (Losses) on disposals of investments and writedowns, net

In 2010, the line item includes the net gain of €0.6 million realized on the disposal on the market of a 0.25% stake in Intesa Sanpaolo ordinary share capital, as well as the writedown of €9.4 million to align the carrying amount (€2.98 per share) of the remaining 10 million Intesa Sanpaolo shares to the stock trading price at December 30, 2010 (€2.042 per share).

In 2009, this line item had included the net loss of €15.4 million realized on the disposal on the market of a 0.66% stake in Intesa Sanpaolo ordinary share capital.

4. Financial income (expenses)

In 2010, net financial income is €18.3 million. In 2009, net financial expenses were €43.2 million. Details of the composition of the balance are as follows:

€ in millions	2010	2009	Change
Interest and other financial income			
Financial income on securities held for trading	**81.7**	37.2	44.5
Interest income on:			
- bonds	**30.3**	24.3	6.0
- receivables from banks	**1.7**	3.6	(1.9)
- receivables from the tax authorities	**0.7**	1.1	(0.4)
- C&W Group loan	**2.9**	1.7	1.2
Exchange gains	**14.3**	2.5	11.8
Interest from interest rate hedge	**0.4**	1.3	(0.9)
Other income	**0.5**	0	0.5
Interest and other financial income	**132.5**	71.7	60.8
Interest and other financial expenses			
EXOR bond interest expenses	**(48.6)**	(49.7)	1.1
Financial expenses on securities held for trading	**(42.3)**	(15.3)	(27.0)
Exchange losses	**(6.6)**	(3.7)	(2.9)
Interest from interest rate hedges	**(5.4)**	(5.4)	0.0
Bank interest and other financial expenses	**(4.8)**	(4.4)	(0.4)
Interest and other financial expenses	**(107.7)**	(78.5)	(29.2)
Fair value adjustments to current and non-current financial assets			
Positive adjustments	**26.5**	15.0	11.5
Negative adjustments	**(33.0)**	(51.4)	18.4
Fair value adjustments to current and non-current financial assets	**(6.5)**	(36.4)	29.9
Financial income (expenses)	**18.3**	(43.2)	61.5

In 2010, fair value adjustments are negative for €6.5 million (negative for €36.4 million in 2009) and include the impairment charge on the embedded derivative relating to the Vision convertible bonds for €16.7 million (-€35.9 million in 2009), the reversal of the impairment charge on the remaining receivables due from DLMD for €1.6 million, subsequently sold in July 2010 (in 2009, this asset had been written down by €9.2 million), as well as net revaluations to equity shares and bonds held for trading €8.6 million (€8.7 million in 2009).

Considering only the assets and liabilities included in the consolidated net financial position of the Holdings System (see note 12), there is a net financial income balance for €25.8 million (net financial expense balance for €1.7 million in 2009).
Details are as follows:

€ in millions	2010	2009	Change
Interest and other financial income	122.4	65.7	56.7
Interest and other financial expenses	(105.2)	(76.1)	(29.1)
Fair value adjustment of current and non-current assets	8.6	8.7	(0.1)
Financial income (expense) balance generated by the financial position	**25.8**	(1.7)	27.5

5. Net general expenses

In 2010, net general expenses amount to €26.6 million; the decrease of €2.2 million compared to the balance in the prior year (€28.8 million) is due to higher cost recoveries from subsidiaries (-€3.4 million) and higher costs for €1.2 million (of which €0.5 million for compensation to directors).
Net general expenses include the figurative cost of the EXOR stock option plan for about €2 million (€1.9 million in 2009).

6. Non-recurring other income (expenses) and general expenses

In 2010, this line item is a negative €19.9 million (a negative €12.9 million in 2009) and includes:

€ in millions	**2010**	2009	Change
Fair value adjustment to Alpitour stock option plan	(9.7)	(4.2)	(5.5)
Expenses arising on employee reduction plan	(2.9)	(5.1)	2.2
Fees for defense in legal cases	(4.8)	(2.8)	(2.0)
Costs connected with the measurement/execution of investment projects	(2.0)	0.0	(2.0)
Sundry other income (expenses)	(0.5)	(0.8)	0.3
Total	**(19.9)**	(12.9)	(7.0)

The fair value adjustment to the Alpitour stock option plan of €9.7 million in 2010 represents the current year cost to align the payable to beneficiaries to the fair value estimated by an independent expert at December 31, 2010. Further information is provided in note 26 to the separate financial statements.

In 2010, the expenses arising on the employee reduction plan of EXOR S.p.A. and the subsidiary Exor Services amount to €2.9 million. In 2009, besides this type of expense (equal to €1.8 million), the line item included the extraordinary indemnity relative to the termination of the employment relationship resolved in favor of the former chief executive officer and general management of IFI S.p.A., Virgilio Marrone, for €3.3 million.

In 2010, the fees for defense in legal cases are equal to €4.8 million (€2.8 million in 2009) and refer to the fees incurred in the cases relating to the content of the press releases issued by IFIL and by Giovanni Agnelli e C. on August 24, 2005 for €4.2 million (€2.8 million in 2009), and also other legal fees for €0.6 million.

Sundry other income (expenses) shows a net expense balance of €0.5 million in 2010 (€0.8 million in 2009). In 2010, the line item mainly includes the estimate of expenses in connection with the early liquidation of FIA (€0.3 million) proposed by EXOR since it is anticipated that there will no longer be a plurality of beneficiaries and with the aim of reducing administrative costs, as well as other expenses of €0.2 million.
In 2009, the line item had included the maintenance costs for the building owned by the subsidiary Exor Services of €0.6 million and other expenses of €0.2 million.

7. Investments accounted for by the equity method

Details are as follows:

€ in millions	Carrying amount 12/31/2010	Carrying amount 12/31/2009	Change
Fiat Group	**3,421.9**	3,057.0	364.9
C&W Group	**448.4**	405.0	43.4
Sequana Group	**230.9**	198.0	32.9
Alpitour Group	**83.8**	80.6	3.2
Juventus Football Club S.p.A.	**30.7**	69.5	(38.8)
Almacantar S.A. (a)	**10.0**	0.0	10.0
Jardine Rothschild Asia Capital Ltd (b)	**1.4**	0.0	1.4
Total	**4,227.1**	3,810.1	417.0

(a) The investment in Almacantar, purchased on April 28, 2010, is maintained at the cost of €10 million, which corresponds to the increase in share capital subscribed to, of which the minimum was paid in by law (25%, equal to €2.5 million). The remaining stake to be paid (€7.5 million) is recognized in financial payables.

(b) This investment, purchased on September 30, 2010, is maintained at cost.

8. Other non-current financial assets – Investments measured at fair value

Details are as follows:

	12/31/2010		12/31/2009		
€ in millions	%	Carrying amount	%	Carrying amount	Change
SGS S.A.	15.00	**1,472.4**	15.00	1,068.5	403.9
Gruppo Banca Leonardo S.p.A.	14.57	**87.4**	9.74	84.7	2.7
Banijay Holding S.A.S.	17.09	**38.6**	17.08	33.6	5.0
Intesa Sanpaolo S.p.A.	0.08	**20.4**	0.34	126.6	(106.2)
The Economist Newspaper Ltd	4.72	**29.9**	0.20	1.1	28.8
NoCo A LP	2.00 (a)	**19.0**	1.96 (a)	19.0	0.0
Copacabana Prince Participações S.A. (b)	1.62	**15.2**	-	0.0	15.2
BTG Investments LP (b)	0.26	**3.8**	-	0.0	3.8
Total		**1,686.7**		1,333.5	353.2

(a) Percentage interest in the limited partnership, stated at cost.

(b) Stated at cost since it was purchased at the end of 2010.

The increase in the investment in **SGS** of €403.9 million is due to the adjustment to fair value at December 30, 2010.
The stock trading price per share of SGS stock at December 30, 2010 is CHF 1,569 corresponding to €1,254.8 at the exchange rate of 1.2504.
The original carrying amount of the investment in SGS is €469.7 million; at December 31, 2010, the net positive adjustment to fair value recognized in equity amounts to €1,002.7 million.

The net increase in the investment in **Gruppo Banca Leonardo** is determined by the purchases of a further 12,627,769 ordinary shares (4.86% of share capital), with an investment of €30 million, and by the recognition of the reimbursement of reserves as a deduction from the carrying amount of the investment for €27.3 million.

The increase in the investment in **Banijay Holding** for €5 million comes from the subscription of new shares by Exor S.A. for an equivalent amount of €1.7 million and the positive adjustment to fair value for €3.3 million with recognition in equity.

At December 31, 2010, the reduction in the investment in **Intesa Sanpaolo** of €106.2 million is mainly due to the sale of 30 million shares (0.25% of ordinary share capital) for net proceeds of €90 million and a net

gain of €0.6 million. The derecognition of the carrying amount (-€95 million) of the stake sold includes the original purchase cost of €89.4 million and the cumulative positive fair value change of €5.6 million; the latter was recognized as a deduction from a specific reserve in consolidated equity. The remaining stake has been aligned to the stock trading price at December 30, 2010 (€2,042 per share) generating a total impairment charge recognized in the income statement for €9.4 million.
In fact, it was deemed that the stock trading price, consistently below the original cost, represented objective evidence of an impairment loss.

On December 6, 2010, EXOR S.A. invested in **Copacabana Prince Participações** (€15.2 million) and **BTG Investments** (€3.8 million) as part of the agreement sealed between BTG Pactual and a consortium of leading international investors.

9. Other non-current financial assets – Other investments

Details are as follows:

€ in millions	12/31/2010	12/31/2009	Change
Investments at fair value			
- NoCo B LP	**48,3**	25,9	22,4
- DLMD bonds	**0,0**	6,3	(6,3)
- RHO real estate fund shares	**11,4**	10,0	1,4
- Other	**18,0**	3,1	14,9
	77,7	45,3	32,4
Investments at amortized cost			
- Perfect Vision Limited convertible bonds	**76,1**	67,5	8,6
- Other bonds held to maturity	**191,6**	86,9	104,7
	267,7	154,4	113,3
Other investments	**1,4**	0,0	1,4
Total	**346,8**	199,7	147,1

As established in the DLMD bond restructuring agreement, on July 30, 2010, DLMD sold 790,190 Sequana shares to EXOR S.A. These are equal to 1.59% of capital, representing EXOR S.A.'s share of the 10,806,343 Sequana shares pledged by contract to guarantee the entire DLMD bond issue. The stock was purchased at the July 29, 2010 stock trading price (€10.90 per share for a total of €8.6 million) and the purchase price, as established in the contract, was paid by EXOR with the partial write-off of the receivable from DLMD which at June 30, 2010 had been revalued up to the market value of the 790,190 Sequana shares purchased.
On the same date, EXOR S.A. sold the remaining receivable (Senior portion and Junior portion) to DLMD shareholders for €1.

Treasury stock

Under the treasury stock buyback Programs approved by the board of directors on March 25, 2009 and on May 11, 2010, in 2010, EXOR purchased 1,559,500 ordinary shares (0.97% of the class) at the average cost per share of €14.45 for a total of €22.5 million, 3,274,484 preferred shares (4.26% of the class) at the average cost per share of €10.02 for a total of €32.8 million, and also 213,295 savings shares (2.33% of the class) at the average cost per share of €11.70 for a total of €2.5 million. The total investment amounts to €57.8 million.

At December 31, 2010, EXOR S.p.A. holds the following treasury stock:

Class of stock	Number of shares	% of class	Carrying amount Per share (€)	Carrying amount Total (€ ml)
ordinary	4,109,500	2.56	12.68	52.1
preferred	10,239,784	13.33	11.13	114.0
savings	421,695	4.60	10.00	4.2
				170.3

12. Consolidated net financial position of the Holdings System

The consolidated net financial position of the Holdings System at December 31, 2010 shows a positive balance of €42.6 million and a negative change of €9 million compared to the balance at the end of 2009 (+€51.6 million).

The balance is composed as follows:

	12/31/2010			12/31/2009		
€ in millions	**Current**	**Non-current**	**Total**	Current	Non-current	Total
Financial assets	**724.8**	**191.7**	**916.5**	604.5	87.2	691.7

Cash and cash equivalents	**361.5**	**0.0**	**361.5**	462.5	0.0	462.5
Total financial assets	**1,116.9**	**191.7**	**1,308.6**	1,095.2	87.2	1,182.4
EXOR bonds 2007-2017	**(22.4)**	**(745.7)**	**(768.1)**	(22.4)	(745.2)	(767.6)
EXOR bonds 2006-2011	**(200.1)**	**0.0**	**(200.1)**	(0.2)	(199.7)	(199.9)
Financial payables to subsidiaries	**(7.5)**	**0.0**	**(7.5)**	0.0	0.0	0.0
Bank debt and other financial liabilities	**(240.3)**	**(50.0)**	**(290.3)**	(38.3)	(125.0)	(163.3)
Total financial liabilities	**(470.3)**	**(795.7)** (a)	**(1,266.0)**	(60.9)	(1,069.9) (a)	(1,130.8)
Consolidated net financial position of the Holdings System	**646.6**	**(604.0)**	**42.6**	1,034.3	(982.7)	51.6

(a) Does not include the negative fair value of €51.4 million on the embedded derivative relating to Perfect Vision convertible bonds (€32.2 million at December 31, 2009).

Current financial assets include equity securities listed in major international markets, listed bonds issued by leading financial institutions and mutual funds. Such financial instruments, if held for trading, are measured at fair value on the basis of the market price at year-end, translated, if appropriate, at the year-end exchange rates, with recognition of the fair value in profit or loss; if held-to-maturity, they are measured at amortized cost. Derivative financial instruments are also used.

Non-current financial assets include bonds issued by leading counterparts and listed on active and regulated markets which the Group intends, and is able to hold, until their natural reimbursement date as an investment for a part of its available cash, in order to ensure a constant flow of financial income that could be considered attractive, considered interesting. This designation was decided in accordance with IAS 39, paragraph 9.

Such financial instruments are free of whatsoever restriction and, therefore, can be monetized whenever the Group should so decide in that sense. Their classification as non-current in the financial position has been adopted only in view of the fact that their natural maturity date is 12 months beyond the closing date of the financial statements. There are no trading restrictions and their degree of liquidity or the degree to which they can be converted into cash is considered high.

Financial receivables from subsidiaries include the amount drawn down by C&W Group on the credit line (for a maximum of $50 million) extended by EXOR S.p.A., for €30.6 million ($40 million) inclusive of interest accrued to the end of the year.

Cash and cash equivalents include demand deposits or short-term deposits, and readily negotiable money market instruments and bonds. Investments are spread over an appropriate number of counterparties since the primary objective is having investments which can readily be converted into cash. The counterparts are chosen according to their creditworthiness and reliability.

Financial payables to subsidiaries of €7.5 million refer to the amount due to Almacantar for the capital increase subscribed to but not yet paid at December 31, 2010.

The negative change of €9 million is due to the following flows:

REVIEW OF PERFORMANCE BY THE MAIN OPERATING SUBSIDIARIES AND ASSOCIATES AND RELEVANT SUBSIDIARIES IN THE HOLDINGS SYSTEM

(30.45% of ordinary share capital, 30.09% of preferred share capital and 2.93% of savings share capital)

Introduction - Demerger of Fiat activities to Fiat Industrial

During 2010, the Fiat Group initiated and completed a strategic project to separate the Agricultural and Construction Equipment (CNH sector) and Trucks and Commercial Vehicles (Iveco sector) activities, as well as the "Industrial & Marine" business line of FPT Powertrain Technologies (FPT Industrial sector), from the Automobile and Automobile-related Components and Production Systems activities, which include the sectors Fiat Group Automobiles, Maserati, Ferrari, Magneti Marelli, Teksid, Comau and the "Passenger & Commercial Vehicles" business line of FPT Powertrain Technologies (Fiat Powertrain sector).

The separation of those businesses, in the form of their demerger from Fiat S.p.A. and transfer to Fiat Industrial S.p.A. (the "Demerger"), resulted in the creation of the Fiat Industrial Group (consisting of CNH, Iveco and FPT Industrial) on January 1, 2011. From the same date, Fiat Group post Demerger is comprised of Fiat Group Automobiles, Maserati, Ferrari, Fiat Powertrain, Magneti Marelli, Teksid and Comau. On January 3, 2011, Fiat Industrial S.p.A.'s shares began trading on the Mercato Telematico Azionario managed by Borsa Italiana S.p.A..

As the transaction took effect on January 1, 2011, the consolidated financial statements for the year ended December 31, 2010 relate to Fiat Group pre Demerger (hereinafter the Fiat Group). Moreover, in accordance with IFRS 5 – Non-current Assets Held for Sale and Discontinued Operations, as the Demerger became highly probable in December, all businesses to be transferred to the new Fiat Industrial Group are classified and presented as Discontinued Operations in the Fiat Group consolidated financial statements. That presentation has resulted in the following:

- for both 2010 and 2009 (the latter presented for comparative purposes), all revenues and costs relating to Discontinued Operations are reported in the Income Statement as Profit (Loss) from Discontinued Operations;

- all current and non-current assets relating to Discontinued Operations at December 2010 have been reclassified in the statement of Financial Position as Assets Held for Sale and Discontinued Operations;

- all liabilities (excluding equity) relating to Discontinued Operations at December 2010 have been reclassified in the Statement of Financial Position as Liabilities Held for Sale and Discontinued Operations;

- for both 2010 and 2009 (the latter presented for comparative purposes), all cash flows arising from Discontinued Operations have been presented in the Statement of Cash Flows as separate line items under cash flows from operating, investing and financing activities.

In other words, the Fiat Group consolidated financial statements are based on the full consolidation of subsidiaries that are to remain within the scope of operations of Fiat Group post Demerger (i.e., Continuing Operations) and those that will be transferred to Fiat Industrial Group (i.e., Discontinued Operations), with separate presentation for each group of activities.

The consolidated results of the Fiat Group can be summarized as follows:

€ in millions	**2010**	2009	Change
Net revenues	**56,258**	50,102	6,156
Trading profit (loss)	**2,204**	1,058	1,146
Operating profit (loss)	**2,009**	359	1,650
Profit (loss) for the year	**600**	(848)	1,448
Profit (loss) for the year attributable to Owners of the Parent	**520**	(838)	1,358

	Balance at		
€ in millions	**12/31/2010**	12/31/2009	Change
Total assets	**73,442**	67,235	6,207
Net debt	**14,932**	15,898	(966)
Equity attributable to Owners of the Parent	**11,544**	10,301	1,243

Net revenues

Net revenues of the Fiat Group for 2010 total €56,258 million, a 12.3% increase over 2009, when overall trading conditions were particularly weak.

Net revenues according to the Continuing Operations of the Fiat Group (Fiat post Demerger) and Discontinued Operations (Fiat Industrial) are as follows:

€ in millions	**2010**	2009	Change %
Automobiles (Fiat Group Automobiles, Maserati, Ferrari)	**30,130**	28,351	6.3
Components and Production Systems (FPT, Magneti Marelli, Teksid, Comau)	**10,865**	8,789	23.6
Other Businesses (Publishing, Holding Companies and Other)	**1,159**	1,047	10.7
Eliminations	**(6,274)**	(5,503)	
Total Continuing Operations	**35,880**	32,684	9.8
Agricultural and Construction Equipment (CNH/Case New Holland)	**11,906**	10,107	17.8
Trucks and Commercial Vehicles (Iveco)	**8,307**	7,183	15.6
FPT Industrial	**2,415**	1,580	52.8
Eliminations and Other	**(1,286)**	(902)	
Total Discontinued Operations	**21,342**	17,968	18.8
Eliminations between Continuing and Discontinued Operations	**(964)**	(550)	
Total Fiat Group	**56,258**	50,102	12.3

Continuing Operations post revenues of €35,880 million (+9.8%). In 2010, the Automobiles business record revenues of €30,130 million (+6.3%): increased sales of light commercial vehicles, and by Ferrari and Maserati, in addition to positive currency effects, more than offset the decline in passenger cars for Fiat Group Automobiles, following the phase-out of eco-incentives in major European markets. Components and Production Systems achieve a 23.6% increase in revenues to €10,865 million on the back of higher demand. Discontinued Operations record revenues of €21,342 million, up 18.8% over 2009, with significant volume recoveries for all businesses.

Trading profit (loss)

The Fiat Group posts 2010 trading profit of €2,204 million (€1,058 million for 2009). Trading profit for Continuing Operations is €1,112 million (trading margin: 3.1%), compared to €736 million for 2009 (trading margin: 2.3%). Discontinued Operations report a trading profit of €1,092 million (trading margin: 5.1%), up from €322 million for 2009 (trading margin: 1.8%). Overall, the improvements are driven by higher volumes, with the exception of passenger cars for FGA, better product mix and continued focus on costs and industrial efficiencies.

Operating profit (loss)

For 2010, the Fiat Group records operating profit of €2,009 million (€359 million in 2009), which includes €195 million (€699 million in 2009) mainly due to restructuring costs (€176 million), inclusive of related asset write-offs.

Operating profit for Continuing Operations is €992 million (€378 million for 2009): the increase reflects the improvement in trading profit (+€376 million) and a reduction in net unusual expense (€120 million for 2010 compared with a €358 million charge for 2009). Operating profit for Discontinued Operations is €1,017 million: the increase over the €19 million loss for 2009 is due to improved trading performance (+€770 million) and a reduction in net unusual expense (€75 million for 2010 compared to a €341 million charge for 2009).

Net gains on the disposal of investments of the Fiat Group total €15 million, with €12 million attributable to Continuing Operations, including €10 million relating to the accounting impact of the acquisition of the remaining 50% in Fiat-GM Powertrain Polska. Discontinued Operations account for €3 million, primarily related to the gain on the disposal of the interest in the joint venture LBX Company LLC by the Agricultural and Construction Equipment sector.

Restructuring costs for the Fiat Group total €176 million (€312 million in 2009). For Continuing Operations, restructuring costs of €118 million primarily relate to Fiat Group Automobiles (€90 million) and Magneti Marelli (€26 million). For Discontinued Operations, restructuring costs total €58 million and primarily relate to FPT Industrial (€33 million) and Iveco (€19 million).

The Fiat Group reports other unusual expense of €34 million in 2010 (€391 million for 2009), €14 million of which is attributable to Continuing Operations. For Discontinued Operations, other unusual income (expense) is a negative €20 million.

Profit (loss) for the year

Net financial expense for 2010 totals €905 million for the Fiat Group (€753 million for 2009) with the increase primarily due to the cost of maintaining a higher level of liquidity. For Continuing Operations, net financial expense is €400 million (€352 million for 2009) and includes a €111 million gain in the mark-to-market value of two stock option-related equity swaps (a €117 million gain for 2009). For Discontinued Operations, net financial expense totals €505 million (€401 million for 2009).

Investment income of the Fiat Group totals €178 million, up from the €27 million figure for 2009 mainly due to an increase in earnings for joint venture companies. For Continuing Operations, investment income totals €114 million (€77 million in 2009). For Discontinued Operations, investment income is €64 million (loss of €50 million in 2009).

The Fiat Group records profit before taxes of €1,282 million (loss before taxes of €367 million for 2009), €706 million of which relates to Continuing Operations (profit before taxes of €103 million for 2009); Discontinued Operations close 2010 with a profit before taxes of €576 million, compared to a loss before taxes of €470 million for 2009.

Income taxes for 2010 for the Fiat Group total €682 million (€481 million for 2009), of which €90 million for IRAP (€99 million for 2009) and €8 million for taxes relating to prior periods (€24 million for 2009) with the remainder relating to the taxable income of companies operating outside Italy. For Continuing Operations, income taxes total €484 million (€448 million for 2009) and for Discontinued Operations, they come to €198 million (€33 million for 2009).

For 2010, the Fiat Group records a profit of €600 million (loss of €848 million for 2009), €222 million for Continuing Operations (loss of €345 million for 2009) and €378 million for Discontinued Operations (loss of €503 million for 2009).

Profit attributable to Owners of the Parent of the Fiat Group for 2010 is €520 million (loss of €838 million for 2009), €179 million for Continuing Operations (loss of €374 million for 2009) and €341 million for Discontinued Operations (loss of €464 million for 2009).

Equity attributable to Owners of the Parent

Equity attributable to Owners of the Parent of the Fiat Group at December 31, 2010 amounts to €11,544 million, with a net increase of €1,243 million compared to the balance at December 31, 2009.

Net debt

At December 31, 2010, consolidated net debt of the Fiat Group totals €14,932 million, down €966 million over the €15,898 million figure at December 31, 2009. Excluding currency translation differences, net debt falls €1,790 million for the year, with cash generated from operating activities more than offsetting investment needs (principally capital expenditure for the period and portfolio increases for the financial services companies) and dividend payments.

The split in net industrial debt between Continuing Operations and Discontinued Operations, which takes into account the effects deriving from the demerger on January 1, 2011, is €2,753 million and €12,179 million, respectively.

During 2010, net industrial debt for Fiat Group pre Demerger decreases €1,976 million to €2,442 million.

Subsequent events

On January 10, Fiat increased its stake in Chrysler Group LLC from 20% to 25% following achievement of the first of the three Performance Events (i.e., attainment of US regulatory approval and a commitment to produce an engine based on Fiat's FIRE family in the USA) stipulated in the alliance agreement.

On February 9, Moody's Investors Service completed the review of Fiat S.p.A.'s rating which was put under observation for a possible downgrade initiated on July 21, 2010. Fiat S.p.A.'s long-term debt rating was affirmed at Ba1 and its short-term rating at "Not Prime". The outlook is negative.

On February 11, Fiat Powertrain and Penske Corporation reached an agreement for the purchase, by Fiat Powertrain, of Penske Corporation's 50% stake in VM Motori S.p.A. The agreement is subject to the customary clearance by the relevant competition authorities. VM Motori, headquartered in Cento (Italy), is a long-established company specialized in the design and manufacture of diesel engines based on proprietary technology. Pursuant to the agreement, VM Motori will be subject to the joint control of Fiat Powertrain and GM (which acquired a 50% interest in the company in September 2007).

On February 15, during a meeting at the Unione Industriale di Torino, Fiat presented a plan for the relaunch of activities at the Officine Automobilistiche Grugliasco (formerly Carrozzeria Bertone), which has been inactive for several years. The plan centers around a €500 million investment (to begin in the second half of 2011) for production of a new E-segment Maserati for international distribution. Start of production is planned for December 2012.

SGS

(15% of share capital through EXOR S.A.)

The highlights of the consolidated results of the SGS Group in 2010 are as follows:

			Change	
CHF in millions	**12/31/2010**	12/31/2009	Amount	%
Sales	**4,757**	4,712	45	1.0
Operating profit	**836**	794	42	5.3
Profit attributable to Owners of the Parent	**588**	566	22	3.9
Consolidated net financial position	**259**	476	(217)	(45.6)

During 2010, the SGS Group recorded sales of CHF 4.8 billion, with an increase of 4.1% year-over-year (at comparable exchange rates).
All the divisions and geographical areas in which the Group operates registered stable or better trends in terms of sales except for the Automotive division (-26.7%) which was negatively affected by the end of the concession for the mandatory auto test relating to the Irish market, which occurred in January 2010.

Operating profit before non-recurring items rose to CHF 848 million (+3.1%), while operating profit is CHF 836 million, increasing CHF 42 million (+5.3%) compared to the prior year (partly due to the absence of certain non-recurring expenses which had been recorded in 2009 for CHF 20 million).

Results according to the various business sectors are as follows

	Sales		*Growth*	Operating profit		Operating margin	
CHF in millions	**2010**	2009	*rate*	**2010**	2009	**2010**	2009

The profit attributable to owners of the Parent is CHF 588 million, increasing 3.9% over 2009.

The net financial position at December 31, 2010 is positive for CHF 259 million. During the course of 2010, net investments were made for CHF 250 million, 10 acquisitions for CHF 339 million, treasury stock sales for CHF 85 million and dividends paid out for CHF 455 million.

The SGS Group expects to continue to grow in 2011 from the standpoint of both revenues and operating profit despite the significant investments forecast to support business development.

(69.83% of share capital through EXOR S.A.)

The data presented and commented on below is taken from C&W Group's consolidated accounting data as of and for the year ended December 31, 2010, prepared in accordance with IFRS, unless otherwise noted.

			Change

Equity attributable to owners of the Parent	**762.7**	739.7	23.0
Consolidated net financial position	**(52.2)**	(178.5)	126.3

* The difference between the IFRS and U.S. GAAP measures of EBITDA and Income (loss) attributable to Owners of the Parent is primarily due to the accounting for compensation-related taxes and charges and the non-controlling interests' put option rights, in addition to certain income tax adjustments for the Income (loss) difference.

C&W Group's 2010 performance resulted in year-over-year double-digit revenue growth driven by strong operating execution through its leadership position in major markets worldwide.

This revenue growth, combined with continued discipline on operating expenses, resulted in an improvement of $140.1 million in income attributable to Owners of the Parent to $13.1 million for the year ended December 31, 2010, as compared with a loss attributable to Owners of the Parent of $127.0 million for the prior year, as reported under International Financial Reporting Standards ("IFRS").

As reported under accounting principles generally accepted in the United States of America ("U.S. GAAP"), the Company's income attributable to Owners of the Parent increased $141.5 million to $25.7 million for the year ended December 31, 2010, as compared with a loss attributable to Owners of the Parent of $115.8 million for 2009.

Gross revenues increased $207.8 million, or 13.4%, to $1,759.3 million for the year ended December 31, 2010, as compared with $1,551.5 million for the year ended December 31, 2009. The impact from foreign exchange accounted for $6.7 million, or 0.4 percentage points, of the year-over-year increase.

Net revenues increased $189.8 million, or 15.7%, to $1,399.6 million for the year ended December 31, 2010, as compared with $1,209.8 million for the year ended December 31, 2009. The impact from foreign exchange accounted for $6.7 million, or 0.6 percentage points, of the year-over-year increase.

The following presents the breakdown of gross and net revenues by geographical area:

			Change	
$ in millions	**2010**	2009	Amount	%
Americas	**1,282.3**	1,120.7	161.6	14.4
EMEA	**360.8**	343.8	17.0	4.9
Asia	**116.2**	87.0	29.2	33.6
Gross revenues	**1,759.3**	1,551.5	207.8	13.4
Americas	**969.6**	816.0	153.6	18.8
EMEA	**335.2**	323.5	11.7	3.6
Asia	**94.8**	70.3	24.5	34.9
Net revenues	**1,399.6**	1,209.8	189.8	15.7

The Americas region, including the United States, Canada and Latin America, comprised 72.9% and 69.3% of gross and net revenues, respectively, for the year ended December 31, 2010, as compared with 72.2% and 67.4% of gross and net revenues, respectively, for the year ended December 31, 2009.

EMEA, which includes Europe, the Middle East and Africa, comprised 20.5% and 23.9% of gross and commission and net revenues, respectively, for the year ended December 31, 2010, as compared with 22.2% and 26.7% of gross and net revenues, respectively, for 2009.

For the same period, Asia comprised 6.6% and 6.8% of gross and net revenues, respectively, as compared with 5.6% and 5.8% of gross and net revenues, respectively, for the prior year.

For the full year 2010, C&W Group's global primary service lines, including Leasing, Corporate Occupier & Investor Services, Valuation & Advisory and Capital Markets, comprised 55.1%, 19.2%, 11.1% and 13.3% of net revenues, respectively, as compared with 53.1%, 22.1%, 12.7% and 11.2%, respectively, for the full year 2009.

From a service line perspective, the improved net revenue performance for the year ended December 31, 2010 was primarily driven by increases in Leasing and Capital Markets revenues of $129.1 million, or 20.1%, and $51.3 million, or 38.0%, respectively. The increase in Leasing revenues was driven by increased activity, particularly in major business districts worldwide. Capital Markets revenues benefited from the increased availability of credit and capital allotted to real estate investments.

Due to the increase in revenues, commission expense increased $92.2 million, or 24.4%, to $470.0 million for the year ended December 31, 2010, as compared with $377.8 million for the year ended December 31, 2009.

The increase in commission expense is primarily attributable to an increase in the U.S. of $73.5 million, or 22.3%, to $403.4 million in the year ended December 31, 2010, as compared with $329.9 million for 2009. The increase in commission expense in the U.S. is primarily driven by the increases in Leasing and Capital Markets revenues of 21% and 58%, respectively, for 2010, as compared with the prior year.
Commission expense as a percentage of net revenues in the U.S. increased to 50.5% for 2010, as compared with 49.1% for 2009.

Costs of services sold increased $8.6 million, or 15.5%, to $64.2 million for the full year 2010, as compared with $55.6 million for the full year 2009. The increase of $8.6 million is primarily attributable to increases in Latin America and Asia Pacific of $6.9 million and $2.3 million, respectively, partially offset by a decrease in Canada of $0.5 million.

Operating expenses decreased $77.1 million, or 8.7%, to $813.8 million for the year ended December 31, 2010, as compared with $890.9 million for 2009. Excluding the impact from foreign exchange, operating expenses decreased $83.6 million, or 9.4%.
The decrease is primarily driven by reductions in impairment charges on intangible assets and restructuring expenses, which declined $76.7 million and $26.9 million, respectively. There were no impairment charges in 2010 due to improved business conditions, and restructuring expenses decreased to $3.0 million due to the fact

that substantially all of the planned restructuring actions were taken in 2009. In addition, the decrease in operating expenses is also due to reductions in facilities, professional fees, depreciation and amortization, telephone and technology, and employment expenses of $12.5 million, $11.4 million, $6.8 million, $3.6 million and $3.1 million, respectively. These reductions in operating expenses were partially offset by an increase in incentive compensation expense of $62.0 million, as the Group returned to a more normal level of profitability in 2010.

The strong revenue performance, combined with continued discipline surrounding operating expenses and other factors mentioned above, drove a significant improvement in C&W Group's operating results.
For the full year, operating income improved by $166.1 million to income of $51.6 million for 2010, as compared with an operating loss of $114.5 million for the prior year. The prior year's operating loss included non-recurring/incremental charges including non-cash impairment charges for intangible assets of $76.7 million, restructuring charges in connection with cost reduction actions of $29.9 million, and costs associated with the relocation of the Group's world headquarters of $7.5 million.

C&W Group's results led to significantly improved earnings before interest, income taxes, depreciation and amortization ("EBITDA"), net financial position and leverage ratio.

For 2010, C&W Group's EBITDA increased $73.9 million to $92.8 million, as compared with EBITDA of $18.9 million for 2009.

C&W Group's net financial position improved by $126.3 million (+70.8%) to a negative $52.2 million as of December 31, 2010, as compared with a negative $178.5 million as of December 31, 2009.

(100% of share capital)

The sole company in Italy that covers the entire chain of the tourist sector, Alpitour World is the market leader in organized travel. Tour Operating, Hotel, Incoming, Aviation, Distribution and Incentive ed Eventi form Alpitour World, a group today synonymous with 360-degree tourism.

Alpitour World's premier role in Italian tourism can not only be found in the numbers of its clients and sales but also in its constant attention to quality, the continual search for product innovation, the evolution of its organization model and its choice of partners with international acclaim.
In order to confront an ever increasingly volatile market and one that presents new challenges surpassing those of the past, Alpitour World has stepped up the study and design of vacation formats to interpret the evolution of the tastes of its customers. Among the strategies undertaken is also that of protecting and developing market niches that can guarantee new business opportunities as opposed to traditional activities. Moreover, in 2009, a development plan was launched to conquer the top position in the Independent Travellers segment, through the Alpitourworld.com platform.

With over 2.7 million customers in fiscal year 2009/2010 and thanks to specially selected international partnerships, the Group has for years been consistently in the list of the top 10 tour operators in Europe.

The financial highlights for the fiscal years 2009/2010 and 2008/2009 are as follows (note that the fiscal year closes on October 31 of each year):

			Change	
€ in millions	**2009/2010**	2008/2009	Amount	%
Net sales	**1,227.1**	1,090.2	136.9	12.6
Contribution margin	**208.6**	197.9	10.7	5.4
EBITDA	**50.4**	41.7	8.7	20.9
Profit from ordinary operations	**27.5**	17.5	10.0	57.4
Profit attributable to Owners of the Parent	**10.9**	2.3	8.7	n.s.
Equity attributable to Owners of the Parent	**83.8**	80.6	3.1	
Consolidated net financial position	**89.6**	66.5	23.2	

The economic picture in fiscal 2009/2010 is marked by an overall contraction of the tourism market, which last year had already recorded highly negative results. Moreover, the Iceland volcano cloud caused severe repercussions on the sector and, for the Alpitour Group, this led to additional operating costs of €4 million.

Despite the difficulty spawned by this scenario, 2009/2010 closes with sales of €1,227.1 million compared to €1,090.2 million in the prior year, recording an increase of 12.6%.

EBITDA records a decisive growth over the prior year, reaching €50.4 million against €41.7 million in the prior year, signaling an increase of 20.9%. The EBITDA margin rose appreciable from 3.8% to 4.1%.
The profit attributable to Owners of the Parent is €10.9 million compared to €2.3 million in 2008/2009.

As for the financial position, indicators reconfirm the decisive progress which marked the last five years: the consolidated net financial position at October 31, 2010 reaches approximately €90 million (€66.5 million at October 31, 2009), thanks to cash flows during the year which generated more than €23 million in cash, notwithstanding the continuation of the investment plan and the payment of dividends for €7.5 million.

Consolidated sales by division of the Alpitour Group are as follows:

€ in millions	2009/2010	2008/2009	Change	
			Amount	%
Tour Operating	**917.0**	805.2	111.8	13.9
Hotel	**81.2**	89.7	(8.5)	-9.5
Aviation	**183.0**	163.8	19.2	11.7
Distribution	**30.6**	30.8	(0.2)	-0.6
Incoming	**226.2**	212.2	14.0	6.6
Incentive e Grandi Eventi	**28.2**	18.8	9.4	49.7
Total	**1,466.2**	1,320.5	145.6	11.0
Elimination of intragroup transactions	**(239.0)**	(230.3)	(8.7)	3.8
Total	**1,227.1**	1,090.2	136.9	12.6

The Tour Operating business, in fiscal 2009/2010, displays a considerable increase in volumes compared to the prior year: the number of passengers, in fact, grew to about 908 thousand against 803 thousand in 2008/2009 (+13.1%). Sales, which also include revenues from reinsurance, consequently followed the same trend and settled at €917 million (€805.2 million in 2008/2009), increasing 13.9%

Also contributing to the growth of volumes and sales is the newly-formed company Welltour which in March began the sale of tourist packages to the principal destinations of the Mediterranean (Italy, Greece, Croatia, and the Balearic Islands) and Africa (Egypt and Tunisia), recording sales of approximately €37.8 million and approximately 46 thousand passengers up to October 31, 2010.

Specific company policies aimed at cutting back and adding flexibility to direct overheads and structure costs, as well as sales polices geared to maintaining catalog sales prices and protecting margins, made it possible to limit and effectively counter the consequences generated by the continuing market crisis. EBITDA for the year to October 31, 2010 is €15.6 million with an EBITDA margin of 1.7%. Welltour’s start-up costs and also higher reprotection costs following Iceland’s volcanic eruption also took a toll on the EBITDA; if such effects are not considered, EBITDA would be approximately €21.4 million (€17.2 million for the year ended October 31, 2009) with an EBITDA margin of 2.4% (2.1% in 2008/2009).

In 2009/2010, the Hotel Sector recorded sales of €81.2 million compared to €89.7 million in the prior year, including €34.6 million from tour operating of the Group (€39.2 million for the year ended October 31, 2009). The decrease in sales (-9.5%) can largely be ascribed to the effects of the economic crisis in addition to the reduction in the number of hotel structures in Italy as a result of early withdrawal from some lease contracts (Hotel Abi d’Oru and Capo Boi).

Margins, in terms of both the percentage and the amount, have been strongly affected by the reduction in sales and a policy anchored to discounted prices aimed at sustaining sales and occupancy, as well as the impact of the eruption of the Iceland volcano which in April and May caused a notable fall in foreign tourists in the city of Rome. In this environment, where all the major Italian hotel chains recorded enormous difficulties and losses, the Group’s hotel division immediately put in place actions and policies geared to cutting costs and revising the product portfolio in order to limit and partly compensate for the effects of the challenging market situation.

The Aviation Division, headed by the airline company Neos, reported sales of €183 million in fiscal 2009/2010 (€163.8 million in 2008/2009), of which €103.7 million with the Group (€100 million for the year ended October 31, 2009). The structural weakness in demand, which marked the tourism sector in 2009/2010, was more than compensated by the acquisition of traffic for *ad hoc* operations and by wet lease outs which enabled Neos to post 11.7% higher sales.

In 2009/2010, Neos operated with a fleet of five B737-800 aircraft employed on short-medium hauls in the Mediterranean, Egypt and Africa regions and with two B767–300 aircraft used on long hauls. The number of passengers was 958 thousand versus 847 thousand in 2008/2009.

Neos, again in 2009/2010, achieved important operating results thanks both to the ability to attain the highest levels of aircraft utilization and to focused sales policies and cost cuts: EBITDA for the year is €23.4 million (€12.9 million for the year ended October 31, 2009). This is a gain of 80.8% over 2008/2009; the EBITDA margin consequently rose to 12.8% from 7.9% in the previous year.

The Distribution Sector, which operates through the "Welcome Travel" travel agencies, controls a network of 984 agencies (of which 38 owned, 22 partnerships and 924 affiliates), 102 agencies more than at October 31, 2009.

The consolidation of the coordination activities of the owned points of sale begun in prior years, the strengthening of franchising relations with affiliated agencies, together with strategic plans aimed at accelerating the rationalization and reorganization of the agency network, have allowed the distribution division to effectively offset the negative effects of the general slowdown in demand linked to the persisting difficult economic scenario. In this particular context, the sector reported sales of €30.6 million (€30.8 million in 2008/2009) and an intermediate volume, referring to the entire network, of approximately €800 million. The above actions, together with an attentive policy rationalizing and cutting variable overheads and structure costs, allowed the operating margin to grow: EBITDA increased from €1.3 million to €3.1 million and as result of this improvement, the EBITDA margin rose to 10% in 2009/2010 from 4.1% in 2008/2009.

The Incoming Sector (Jumbo Tours Group) recorded sales of €226.2 million in 2009/2010 (of which €83.5 million with the Alpitour Group), showing an increase (+6.6%) compared to the prior year (€212.2 million). The number of passengers managed grew 13.9% over 2008/2009. Moreover, the "Jumbo on line" portal dedicated to B2B sales posted revenues of €93.3 million in 2009/2010 (€72 million in 2008/2009), with the number of customers managed at 619 thousand (460 thousand in the prior year).

By employing sales polices aimed at protecting margins, combined with actions geared to cutting costs, the incoming sector maintained satisfactory operating margins during the year: EBITDA improved to €2.9 million (€2.2 million in 2008/2009), with the EBITDA margin at 1.3% (1% in 2008/2009). However, the EBITDA margin would have been 1.7% for 2009/2010 (1.4% in 2008/2009) had the sales been excluded for all the services, carried out mainly for the tour operator of the group, for which the incoming division, operating as the correspondent at the destination, invoices without any margin, principally for hotel services, since it is paid in the form of a handling fee.

The M.I.C.E. Sector, headed by the company AW Events, registered sales for the year of €28.2 million (€18.8 million in the prior year). The sector was able to take advantage of and fully exploit the recovery in demand which in the prior year had been severely depressed by the economic crisis.

As early as the prior year, AW Events put in place an intensive strategic revision of its business (consolidating the Events division which records a higher margin) and the operating development policies aimed at reaching a leadership role in the medium term in the Italian market. The implementation of these actions made it possible to expand the reference market and to protect the percentage margin thanks partly to its contractual leverage over principal suppliers. Owing to these actions, EBITDA improved significantly compared to the prior year, in terms of the amount (a profit of €0.8 million in 2009/2010, a loss of €1 million in 2008/2009) and the EBITDA margin (2.8% in 2009/2010 versus -5.6% in the prior year).

At the beginning of February 2011, an agreement was sealed between Alpitour S.p.A. and Costa Crociere S.p.A. so that the latter could invest in Welcome Travel with a 50% stake. The agreement, subject to normal regulatory authorizations, proposes to continue the development and growth of the Welcome Travel network.

(60.00% of share capital)

The following data are taken from the half-year report of Juventus Football Club S.p.A. at December 31, 2010. Since Juventus Football Club's financial year ends on June 30 of every year and its activity is highly seasonal in nature, typical of the sector and particularly determined by the calendar of sport events, the interim data presented should not be construed as representing the basis for a full-year projection.

	I Half		
€ in millions	**2010/11**	2009/10	Change
Revenues	**88.8**	125.0	(36.2)
Operating income (loss)	**(37.7)**	25.0	(62.7)
Net income (loss)	**(39.5)**	14.2	(53.7)

€ in millions	**12/31/2010**	6/30/2010	Change
Shareholders' equity	**51.1**	90.3	(39.2)
Net financial position	**(56.8)**	6.4	(63.3)

Revenues for the first half of the financial year 2010/2011 total €88.8 million. This is a decrease of 29% compared to €125 million in the first half of the prior financial year due mainly to lower revenues from participation in UEFA competitions, lower game receipts and revenues from the sale of media rights for the Championship following the coming into force of the new regulations on the centralized sale of television rights, as well as the different time distribution of games.
Income from players' registration rights amount to €14.3 million compared to €13.6 million in the first half of 2009/2010.

Operating costs in the first half of 2010/2011 amount to €100.1 million, increasing 16.8% compared to €85.7 million in the corresponding period of 2009/2010. This is largely due to higher one-off incentive payments made to players leaving the company and higher costs for the temporary acquisition of players' registration rights. The latter are included in the costs for the management of players' rights which grew to €8 million from €2.2 million in the same period of the prior year).

The operating loss and net loss for the first half of 2010/2011 are €37.7 million and €39.5 million, respectively, compared to operating income and net income of €25 million and €14.2 million, respectively, in the corresponding period of the prior year.

Shareholders' equity at December 31, 2010 is €51.1 million, decreasing from €90.3 million at June 30, 2010, whereas the net financial position is a negative balance of €56.8 million compared to a positive balance of €6.4 million at June 30, 2010, decreasing principally because of payments made during the first half for the construction of the new Stadium.

Transfer campaign

The various operations completed in the first and second phases of the Transfer Campaign 2010/2011 entailed a total increase in the capital invested of €26.3 million. In the course of the Transfer Campaign, option rights were also underwritten for the definitive purchase of some soccer players (to be exercised by the end of the 2010/2011 soccer season) which could, if exercised, entail an overall investment of €58.3 million during the financial year 2011/2012.
The economic impact of the gains and losses from the disposal of players' registration rights is positive for €16.3 million. The temporary acquisitions and disposals of players' registration rights determines a net negative effect on an annual basis of €10.6 million The overall financial effect, including implicit finance expenses and income on deferred receipts and payments is a negative €21.3 million.

New Stadium

Construction work on the new Stadium continued in the first six months of the financial year and at December 31, 2010 amounted to €58 million, equal to 66% of the costs envisaged for the construction already contracted. With reference to the financing of the new Stadium, during the same period, the *Istituto per il Credito Sportivo* disbursed a second and third installment, respectively for €7.5 million and €10 million, on the first loan of €50 million. The total sum thus disbursed so far is €30 million.

SEQUANA

(28.24% of share capital through EXOR S.A.)

The highlights of the consolidated results of the Sequana Group in 2010 are as follows:

€ in millions	**2010**	2009	Change
Net sales	**4,333**	4,088	245
Gross operating profit	**224**	213	11
Trading profit	**148**	137	11
Current profit	**61**	73	(12)
Profit attributable to Owners of the Parent	**32**	20	12
Equity attributable to Owners of the Parent	**814**	738	76
Consolidated net debt	**674**	651	23

Net sales in 2010 amount to €4,333 million, increasing 6% compared to 2009 (+2.5% at comparable exchange rates), thanks particularly to the policy of increasing prices applied in both the distribution business and the manufacturing activities in all segments of the market and countries (except for the United States).

Gross operating profit is €224 million (+5.5% compared to 2009) and the gross operating margin is 5.2%, in line with the previous year.
Trading profit is €148 million versus €137 million in 2009 (+7.7%) and the trading profit margin is 3.4%.
The current profit is €61 million, decreasing €12 million compared to 2009 when deferred tax benefits were benefits. After non-recurring expenses (mainly restructuring expenses of Antalis) for €29 million, the profit attributable to Owners of the Parent is €32 million.

Consolidated net debt at December 31, 2010 is equal to €674 million compared to €651 million at December 31, 2009.

The Sequana board of directors will put forward a motion to the shareholders' meeting on May 19 to pay out dividends of €0.40 per share.

As regards the distribution business, in 2010, Antalis records an increase in trading profit of 17.8% to €88 million compared to €75 million in 2009, raising the trading margin to 3% (+0.3 percentage points). Arjowiggins instead displays a 3.3% increase in trading profit to €76 million, against €74 million in 2009, with a stable margin at 4.4%.

As part of its strategy, in 2010, Sequana has continued to focus on distribution activities, in which Antalis is the European leader and to participate in the process to consolidate the market also by aiming at the leadership position with Arjowiggins' production activities.

Arjowiggins is in the process of finalizing the sale of the production facilities of Arches (France) and Dettingen (Germany) to the Swedish Munksjö group, while Antalis has sold its activities of Antalis Office Supplies in Spain and of Firmo in Portugal at the beginning of 2011.
The amount of the sales realized by Sequana totals more than €120 million (in terms of the enterprise value of the companies sold) and reflects the value of its activities; these sales will contribute to a reduction in the group's debt with a positive impact in the first quarter of 2011 of approximately €100 million.

EXOR S.A.

(100% of share capital)

The highlights of the financial statements at December 31, 2010, prepared under the laws of Luxembourg, are as follows:

€ in millions	**2010**	2009	Change
Profit (loss) for the year	**79.2**	(76.8)	156.0
Equity	**2,208.0**	2,258.9	(50.9)
Non-current financial assets	**2,306.0**	2,287.1	18.9
Net financial position	**(43.2)**	(26.1)	(17.1)

The profit for the year 2010 comes from dividends on investments (€53.9 million) and financial income (€55.5 million), net of impairments of financial assets (€14.7 million).

The loss for the year 2009 is due to the impairment losses on financial assets for €128.8 million. Such impairment losses refer to the investment held in C&W Group Inc. (€90.1 million), DLMD bonds (€9.2 million) and Perfect Vision bonds (€27.9 million) as well as other financial assets (€1.6 million).

At December 31, 2010, non-current financial assets include the following investments and bonds:

MOTION FOR THE APPROVAL OF THE SEPARATE FINANCIAL STATEMENTS AND THE PAYMENT OF DIVIDENDS

Dear Shareholders,

We invite you to approve the separate financial statements for the year ended December 31, 2010 and, considering that the legal reserve is equal to one-fifth of share capital, we motion to appropriate the profit of €151,861,007.71 as follows:

- to the 156,149,996 ordinary shares currently outstanding, dividends equal to €0.31 per share, equal to a maximum	€	48,406,498.76
- to the 66,561,676 preferred shares currently outstanding, dividends equal to €0.3617 per share, equal to a maximum	€	24,075,358.21
- to the 8,747,199 savings shares currently outstanding, dividends equal to €0.3881 per share, equal to a maximum	€	3,394,787.93
- to the Reserve for net unrealized exchange gains (art. 2426, para. 8 bis, of the Italian Civil Code)	€	538,769.37
- to the Extraordinary Reserve, the remaining amount, equal to a minimum	€	75,445,593.44
Profit for the year 2010	**€**	**151,861,007.71**

The dividends proposed, equal to a maximum of €75,876,644.90, are payable to the shares outstanding, thus excluding those directly held by EXOR S.p.A. on May 23, 2011, the ex-dividend date. The payment of dividends will begin on May 26, 2011.

Turin, March 28, 2011

On behalf of the Board of Directors
The Chairman and CEO
John Elkann

EXOR S.p.A. – NOTES TO THE SEPARATE FINANCIAL STATEMENTS

GENERAL INFORMATION ON THE ACTIVITIES OF THE COMPANY

EXOR S.p.A. is a corporation organized under the laws of the Republic of Italy; its head office is located in Turin, Italy, Corso Matteotti 26. EXOR is one of Europe's leading investment companies and is controlled by Giovanni Agnelli e C. S.a.p.az. which holds 51.164% of share capital, specifically 59.10% of ordinary share capital, 39.24% of preferred share capital and 12.36% of savings share capital.
EXOR's three classes of stock (ordinary, preferred and savings) are traded on the Electronic Share Market under the stock symbol EXOR since March 2, 2009.

Further information is provided in the Report on Operations under "EXOR Group Profile".

SIGNIFICANT ACCOUNTING POLICIES

Basis of preparation

Beginning from the financial year 2006, the separate financial statements of EXOR S.p.A. have been prepared in conformity with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and recognized by the European Community in accordance with Regulation 1606/2002 of the European Parliament and Council dated July 19, 2002. The designation IFRS also includes all valid International Accounting Standards (IAS), as well as all interpretations of the International Financial Reporting Interpretations Committee (IFRIC), formerly the Standing Interpretations Committee (SIC).

The disclosure required by IFRS 1 – *First-time Adoption of IFRS*, relative to the effects of the transition to IFRS, was presented in a specific Appendix to the separate financial statements at December 31, 2006.

The separate financial statements have also been prepared in accordance with the provisions contained in Consob Resolutions 15519 and 15520 dated July 27, 2006 and in Consob Communication 6064293 dated July 28, 2006, pursuant to art. 9, paragraph 3, of Legislative Decree 38 dated February 28, 2005.

Formats of the separate financial statements and other information

The separate income statement is presented using a classification based on the nature of the revenues and expenses, with the presentation of investment income (expenses) and financial income (expenses) taking preference since these items are characteristic of EXOR S.p.A.'s activities.

Since the year 2009, in view of the significance of the amounts, Non-recurring other income (expenses) and general expenses are presented separately from net general expenses that are recurring. The line item includes any exceptional or non-recurring costs such as termination incentives, consulting fees for extraordinary investment acquisition and disposal transactions, special bonuses to directors and employees, defendant legal fees and adjustments to liabilities for the Alpitour stock option plan. Moreover, indirect taxes and duties are also presented separately.

In the separate statement of financial position, the current/non-current distinction has been adopted for the presentation of assets and liabilities.

The statement of comprehensive income presents the total income and expenses recognized in the income statement and increases or decreases in reserves.

The separate statement of cash flows is presented using the indirect method, which reconciles cash and cash equivalents at the beginning and the end of the year.

The year-end closing date is December 31 of each year and covers a period of 12 months.

The Euro is the Company's functional currency and presentation currency.

In the separate financial statements, the amounts are expressed in Euro.
In the notes, unless otherwise indicated, the data are expressed in thousands of Euro.
Significant events in 2010 and in the first quarter of 2011, the principal risks and uncertainties and the business outlook are presented in specific paragraphs of the Report on Operations.

Related party transactions, unusual and/or atypical transactions and significant non-recurring events and transactions

Related party transactions

The statement of financial position and income statement balances generated by transactions with related parties are shown separately in the financial statement formats and commented in Note 36.

Stock option plan linked to Alpitour shares

At December 31, 2010, the liabilities of the stock option plan linked to Alpitour shares amounts to €21.9 million compared to €12.2 million at December 31, 2009. The difference of €9.7 million was charged to the income statement under “Non-recurring other expenses from related parties”. Further information is provided in Note 26.

Beside what has been indicated, there are no significant non-recurring events or transactions or significant unusual and/or atypical transactions to be reported as required by Consob Communication 6064293 dated July 28, 2006.

General principle

The financial statements of EXOR S.p.A. are expressed in Euro and are prepared under the historical cost convention, except where the use of fair value is required for the measurement of available-for-sale financial instruments and those held for trading, as well as on the going concern assumption.
Despite operating in a difficult economic and financial environment, the directors have in fact assessed that no material uncertainties (as defined in paragraph 25 of IAS 1) exist about its ability to continue as a going concern.

Investments accounted for at cost

Investments in subsidiaries and associates are stated at cost and tested for impairment if, and only if, there is objective evidence of an impairment due to one or more events which occurred after initial recognition which have an impact on the future cash flows of the subsidiaries and associates and on the dividends which they could distribute. This objective evidence is a significant and prolonged decline in the market prices to below cost of a directly and indirectly owned subsidiary or associate, together with its continuing negative operating performance. In these cases, the impairment is determined as the difference between the carrying amount of the investment and its recoverable amount, usually determined on the basis of the higher of the value in use and fair value less costs to sell.
At the end of each reporting period, EXOR S.p.A. assesses whether there is any objective evidence that an impairment loss of an investment recognized in prior years may no longer exist or may have decreased. A significant or prolonged rise in the market price of the subsidiary or associate, together with its continuing positive operating performance is considered as objective evidence. In these cases, the recoverable amount of the investment is re-measured and, if appropriate, the carrying amount is increased up to the cost of the investment.

Available-for-sale investments and non-current other financial assets

These are measured at fair value which coincides, for listed investments, with the market price on the last day of the period. Unrealized gains and losses are recognized directly in equity, net of the relevant deferred tax effect. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity is reversed and recognized in the income statement. Impairment losses recognized in the income statement may not later be reversed through the income statement.
Upon disposal of the asset, the accumulated gains or losses recorded in equity are credited or debited to the income statement.

Financial assets held for trading

Financial assets held for trading include equity shares, credit instruments and other forms of investment of liquidity, as well as derivative instruments for trading.

Financial assets purchased originally for resale in the short-term are measured at year end at fair value using, for listed securities, the market price translated, if appropriate, at the year-end exchange rate; the fair value adjustment is recorded with a corresponding entry in the income statement.

Held-to-maturity securities

Held-to-maturity securities are non-derivative assets with fixed or determinable payments and fixed maturities that EXOR has the positive intention and ability to hold to maturity.
Financial assets cannot be classified as held-to-maturity if, during the course of the current year or during the two preceding years, other than an insignificant amount of held-to-maturity investments has been sold or reclassified before their maturity, except sales or reclassifications that:

a) are so close to maturity or to the call option date of the financial asset that changes in the market rate of interest would not have a significant effect on the fair value of the financial asset;
b) occur after the Company has received substantially all of the financial asset's original principal through ordinary scheduled payments or prepayments;
c) are attributable to an isolated event that is beyond the Company's control, is non-recurring and could not have been reasonably anticipated by the Company.

Securities held with the intent to keep them in portfolio until maturity are recorded and measured at amortized cost.

The amortized cost of a financial asset is the amount at which the financial asset was initially measured net of repayments of principal, decreased by the total amortization of any difference between the initial amount and the maturity amount using the effective interest method, less any writedown (made directly or through the use of an accrual) for impairment or uncollectibility.

The effective interest rate is a method used for calculating the amortized cost of a financial asset and allocating the interest over the period of reference. The effective interest rate is the rate that exactly discounts future cash flows for estimated collections (including transaction costs paid) over the expected life of the financial instrument or, if appropriate, over a shorter period.

Receivables and payables

Receivables are initially recognized at their nominal amount which substantially coincides with fair value.
If there is objective evidence of an impairment loss or a risk that the Company will not be able to collect the contractual amount (principal and interest) at the contractually agreed dates, a provision is set aside which corresponds to the difference between the asset's carrying amount and the present value of estimated recoverable future cash flows, discounted at the effective interest rate.
Payables are initially recognized at their nominal amount, reduced by expenses incurred to assume them and increased by interest expense due, if any. Payables are subsequently measured at amortized cost using the effective interest method.

Treasury shares

The cost of any treasury shares purchased and/or held, also through subsidiaries, as a result of specific shareholder resolutions, is recognized as a deduction from equity and, therefore, the reserve offsetting treasury shares in portfolio is not shown separately. The proceeds from any subsequent sale are recognized as movements in equity.

Employee benefits – Pension plans

Pension plans are currently either defined contribution or defined benefit plans.

Under defined contribution plans the Company pays contributions to outside, legally separate entities with administrative autonomy, which frees the employer from any subsequent obligation as the outside entity assumes the commitment to pay what is due to the employee. Following the changes in regulations for employee leaving entitlement pursuant to Law 296 dated December 27, 2006 (Budget Law 2007) and later decrees and regulations, defined contribution plans include the portions of employee leaving entitlement accruing from January 1, 2007. However, since EXOR S.p.A. has less than 50 employees, employee leaving entitlements are calculated using the customary actuarial method established in IAS 19 and adopted in prior years, except for the exclusion of the pro rata application of the service rendered for employees who transfer the entire amount accrued to the supplementary pension fund.

Consequently, for those who transfer the entire amount accrued to the supplementary pension fund, the Company records the contribution paid as an expense and no additional obligation is recognized.

Defined benefit plans include post-employment benefits, other than those under defined contribution plans. Under defined benefit plans, the Company has the obligation to set aside the costs relating to the benefits guaranteed to its employees in service. The actuarial risk and the investment risk are thus substantially borne by the Company.

Defined benefit plans, which include employee leaving entitlements, taking into account what was described above, are measured by actuarial techniques using the Projected Unit Credit Method.

All cumulative actuarial gains and losses that existed at January 1, 2005 have been recognized in equity.

For defined benefit plans, the expenses relating to the increase in the present value of the obligation, due to the fact that the payment date of the benefits is nearing, are recognized in financial expenses.

Payments relative to defined contribution plans are recognized as an expense in the income statement as incurred.

Defined benefit plans may be unfunded or they may be wholly or partly funded by contributions paid by the employer and the employee plan participants to an entity, or fund, that is legally separate from the employer and from which the employee benefits are paid.

The liability for defined benefit plans is calculated on an individual basis and takes into account life expectancy, personnel turnover, salary changes, revaluation of the yields, inflation and the present value of the amounts to be paid.

Employee benefits – Stock option plans

Stock option plans linked to EXOR shares

Share-based payments to employees are measured at the fair value of the equity instruments at the grant date.

In accordance with IFRS 2 – Share-based Payment, the full amount of the fair value of stock options at the grant date is recognized in the income statement in personnel costs on a straight-line basis over the period from the grant date to the vesting date with a corresponding entry directly in equity, based upon an estimate of the number of options that is expected to vest. Changes in fair value after the grant date have no effect on the initial measurement.

The compensation component deriving from stock option plans linked to EXOR shares but relating to employees in other companies of the Holdings System, is recorded as a capital contribution in favor of the subsidiaries in which the beneficiaries of the stock option plans are employees and consequently recorded as an increase in the relative value of the investments, with a corresponding entry recorded directly in equity.

Stock option plans linked to shares of the subsidiary Alpitour

This is a stock option plan that requires a monetary payment equal to the increase in the value of the company.

The fair value of the liability of the plan is re-measured at each reporting date until its extinction.

The cost is recognized in the income statement in “Non-recurring other expenses” with a corresponding entry to “Other payables to related parties”.

If the payable to related parties decreases, the resulting income is recognized in the income statement in “Non-recurring other income from related parties”.

Debt

Interest-bearing debt is recognized at cost which corresponds initially to the fair value of the amount received net of directly attributable costs. Debt is subsequently measured at amortized cost. The difference between amortized cost and the amount to be repaid is recognized in the income statement on the basis of the effective interest rate over the period of the loan.

Debt is classified in current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

Derivative financial instruments and hedge relationships

Derivative financial instruments are recognized initially at fair value at the date the contracts are entered into and are subsequently measured at fair value at year-end. The resulting gains or losses are recognized in the income statement immediately, unless the derivative is designated and is effective as a hedging instrument, in which case the times for recognition in the income statement depend upon the nature of the hedge relationship. EXOR designates certain derivatives as fair value hedges of certain assets or liabilities recognized in the financial statements or as cash flow hedges of certain highly probable forecast transactions.
A derivative is classified as a non-current asset or liability if the maturity date of the instrument is beyond 12 months and it is not expected to be realized or settled within 12 months. Other derivatives are classified as current assets or liabilities.

Financial instruments qualify for hedge accounting only when there is formal designation and documentation, including the Company's risk management objective and strategy, and the hedge, verified periodically, is highly effective.
When financial instruments qualify for hedge accounting, the following accounting treatment applies:

- Fair value hedge: where a derivative financial instrument is designated as a hedge of the exposure to changes in fair value of a recognized asset or liability that is attributable to a particular risk and could affect the income statement, the gain or loss from re-measuring the hedging instrument at fair value is recognized in the income statement, together with the change in fair value of the hedged item. The gain or loss from the change in fair value of the hedging instrument is recognized on the same line of the income statement as the hedged item.
- Cash flow hedge: where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows of a recognized asset or liability or a highly probable forecast transaction and could affect profit or loss, the effective portion of any gain or loss of the derivative financial instrument is recognized directly in equity. The cumulative gain or loss is removed from equity and recognized in the income statement at the same time in which the hedged transaction affects the income statement. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in equity and is recognized in the income statement at the same time the related transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in equity is recognized in the income statement immediately.

If the conditions of IAS 39 are not met, the transactions, even if they have been set up for the purpose of managing risk exposure, are classified and measured as trading transactions. In that case, the difference from fair value is recognized in the income statement.

Financial income and expenses, other revenues and costs

Dividends are recognized in the income statement when the paying company approves distribution, that is, when the right to receive the dividends is established.

Financial income and expenses are recorded on a prorated basis according to the rate of the effective return.

Revenues from services are recognized by reference to the stage of completion of the service at the end of the reporting period.

The expenses incurred for the Merger were recognized in “Current assets – Other receivables” and, as a result, did not impact the profit for the year 2009. Such expenses were recorded directly as a deduction from additional paid-in capital which originated from recording the share capital increase carried out to service the exchange of the shares of the merged company canceled.

Transactions in foreign currencies

Transactions in foreign currencies are recorded at the foreign exchange rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the end of the reporting period are translated at the foreign exchange rate prevailing at that date. Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements are recognized in the income statement.

Income taxes

Current income taxes are calculated according to the tax laws in force.

Taxes on income are recognized in the income statement except to the extent that they relate to items directly charged or credited to equity, in which case the related income tax effect is recognized directly in equity.

Temporary differences between the amounts of assets and liabilities in the financial statements and the corresponding amounts for tax purposes give rise to temporarily deferred tax liabilities on the taxable temporary differences recorded in a specific provision in liabilities. Deferred tax assets relating to the carryforward of unused tax losses, as well as those arising from deductible temporary differences, are recognized to the extent that it is probable that future profits will be available against which they can be utilized.

Deferred tax assets and liabilities are measured at the tax rates expected to apply to taxable income in the periods in which the temporary differences will reverse. Deferred income tax assets and liabilities are offset where there is a legally enforceable right of offset.

Deferred tax assets and liabilities are shown separately from other tax receivables and payables in a specific line under non-current assets or liabilities.

Principal sources of uncertainty in making financial statement estimates

The preparation of financial statements and related disclosures that conform to IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results could differ from those estimates. Estimates particularly refer to the measurement of investments.

Estimates and assumptions are reviewed periodically and the effects of any changes are recognized immediately in the income statement or in equity in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The situation caused by the present economic and financial crisis has required assumptions to be made regarding future performance which are characterized by significant uncertainty; as a consequence, therefore, it cannot be excluded that results may arise during the next year which differ from estimates, and which therefore might require adjustments, even significant, to be made to the carrying amount of the items in question, which at the present moment can clearly neither be estimated nor predicted. The main items affected by these situations of uncertainty are investments accounted for at cost and available-for-sale investments.

In particular:

- the carrying amounts of listed investments accounted for at cost or fair value were lower than or corresponding to the stock market prices at the end of 2010;
- for the other unlisted investments accounted for at cost or fair value, their measurement indicated no evidence of impairment.

No critical or significant issues have arisen, however, in relation to the estimates used for employee benefits, taxes or provisions, also taking into consideration their level of materiality.

Adoption of new accounting standards, amendments and interpretations issued by the IASB

Accounting standards, amendments and interpretations effective from January 1, 2010 but not applicable to the Company

The following amendments, improvements and interpretations, effective from January1, 2010, relate to issues that were not applicable to the Company at the date of these financial statements, but which may have an impact on the accounting treatment of future transactions or arrangements:

- IFRS 3 (2008) – *Business Combinations*.
- IAS 27 (2008) – *Consolidated and Separate Financial Statements*.
- Improvement to IFRS 5 (2008) – *Non-current Assets Held for Sale and Discontinued Operations*.
- Amendments to IAS 28 – *Investments in Associates* and IAS 31 – *Interests in Joint Ventures* consequent to the amendments to IAS 27.
- Improvements to IAS/IFRS (2009).
- Amendment to IFRS 2 – *Share based Payment:* Group Cash-settled Share-based Payment Transactions.
- IFRIC 17 – *Distributions of Non-cash Assets to Owners*.
- IFRIC 18 – *Transfers of Assets from Customers*.
- Amendment to IAS 39 – *Financial Instruments: Recognition and Measurement:* Eligible Hedged items.

Accounting standards, amendments and interpretations not yet applicable and not early adopted by the Company

On October 8, 2009, the IASB issued an amendment to IAS 32 – *Financial Instruments: Presentation* on "Classification of rights issues", which addresses accounting for rights issues (rights, options or warrants) denominated in a currency other than an issuer's functional currency. Previously such rights issues were accounted for as derivative liabilities. However, the amendment requires that, provided certain conditions are met, such rights are classified as equity regardless of the currency in which the exercise price is denominated. The amendment is applicable retrospectively from January 1, 2011. Adoption of this amendment is not expected to have any impact on the Company's financial statements.

On November 4, 2009, the IASB issued a revised version of IAS 24 – *Related Party Disclosures* that simplifies the disclosure requirements for transactions with government-related entities and clarifies the definition of a related party. The revised standard is effective for annual periods beginning on or after January 1, 2011. Adoption of this standard will have no effect on the measurement of items in the financial statements and with regard to the disclosure for related parties.

On November 12, 2009, the IASB issued IFRS 9 – *Financial Instruments*, which was amended on October 28, 2010. The new standard, effective from January 1, 2013, represents completion of the first phase of a project to replace IAS 39 and introduces new requirements for classifying and measuring financial assets and liabilities and derecognition of financial assets. For financial assets, the standard uses a single approach to determine whether a financial asset is measured at amortized cost or fair value – replacing the many different rules in IAS 39 – which is based on how an entity manages its financial instruments and the contractual cash flow characteristics of the financial assets. For financial liabilities, on the other hand, the principal change relates to the recognition of changes in fair value of financial liabilities measured at fair value through profit or loss, when such changes are due to changes in the credit risk of the liability. According to the new standard, these changes must be recognized in other comprehensive income rather than through profit or loss. At the date of these financial statements, the new standard had not yet been endorsed by the European Union.

On November 26, 2009, the IASB issued a minor amendment to IFRIC 14 – *Prepayments of a Minimum Funding Requirement*. The amendment applies when an entity is subject to minimum funding requirements and makes an early payment of contributions to cover those requirements. The amendment permits an entity to treat the benefit of such early payment as an asset. The amendment has an effective date of January 1, 2011. Adoption of this amendment is not expected to have any impact on the Company's financial statements.

On November 26, 2009, IFRIC issued the interpretation IFRIC 19 – *Extinguishing Financial Liabilities with Equity Instruments* that provides guidance on how to account for the extinguishment of a financial liability through the issue of equity instruments. The interpretation clarifies that when an entity renegotiates the terms of a financial liability with its creditor and the creditor agrees to accept the entity's shares or other equity instruments to settle the financial liability fully or partially, then the entity's equity instruments issued to a creditor are part of the consideration paid to extinguish the financial liability and are measured at their fair value. The difference between the carrying amount of the financial liability extinguished and initial measurement of the equity instruments issued is recognized in profit or loss for the period.
The interpretation is applicable from January 1, 2011. Adoption of this interpretation is not expected to have any impact on the Company's financial statements.

On May 6, 2010, the IASB issued a set of amendments to IFRSs ("Improvements to IFRSs") that are applicable from January 1, 2011. Set out below are those that may lead to changes in the presentation, recognition or measurement of items in the financial statements, excluding those that only relate to changes in terminology or editorial changes having a limited accounting effect and those that affect standards or interpretations that are not applicable to the Company:

- IFRS 7 – *Financial Instruments: Disclosures*: this amendment emphasizes the interaction between the qualitative and quantitative disclosures required by the standard concerning the nature and extent of risks arising from financial instruments. This should help users of financial statements to link related disclosures and hence form an overall picture of the nature and extent of risks arising from financial instruments. In addition, the disclosure requirement relating to financial assets that are past due or impaired, but whose term has been renegotiated, and to the fair value of collateral has been removed.

- IAS 1 – *Presentation of Financial Statements*: the amendment requires the reconciliation in the changes of each component of equity to be presented in the notes or in the primary statements.

At the date of these financial statements, application of these amendments had not yet been endorsed by the European Union.

On October 7, 2010, the IASB issued amendments to IFRS 7 – *Financial Instruments: Disclosures*, applicable for reporting periods commencing on or after July 1, 2011. The amendments allow users of financial statements to improve their understanding of transfers of financial assets, including understanding the possible effects of any risks that may remain with the entity that transferred the assets. The amendments also require additional disclosures if a disproportionate amount of transfers are undertaken around the end of a reporting period. At the date of these financial statements, application of these amendments had not yet been endorsed by the European Union.

On December 20, 2010, the IASB issued a minor amendment to IAS 12 – *Income taxes*, requiring an entity to measure the deferred tax relating to an asset depending on whether the entity expects to recover the carrying amount of the asset through use or sale. As a result of this amendment, SIC 21 – *Income Taxes – Recovery of Revalued Non-Depreciable Assets* will no longer apply. The amendment is applicable from January 1, 2012. At the date of these financial statements, the amendment had not yet been endorsed by the European Union.

RISK MANAGEMENT

The maximum theoretical exposure to credit risk for EXOR S.p.A. at December 31, 2010 is represented by the carrying amount of financial assets presented in the financial statements. The Company seeks to mitigate such risks by investing a large part of its liquidity in securities issued by leading bank and corporate counterparts selected according to their creditworthiness.

In its meeting held on March 25, 2009, the EXOR board of directors voted to extend a 3-year subordinated credit line for $50 million to the subsidiary C&W Group. The loan was partly drawn down by C&W Group for an amount of $40 million at December 31, 2010.

In order to protect itself from fluctuations in the EUR/USD on the loan, EXOR put into place forward sales contracts with leading credit institutions for the same amount and expiration date of the U.S. dollars to be received from C&W Group.

A part of the assets held for trading, cash and financial liabilities are denominated in currencies other than Euro. Since these are securities held for trading, cash and derivative financial instruments they have been adjusted to the year-end exchange rate.

With regard to liquidity risk, financing needs and cash flows are managed with the aim of optimizing financial resources. In particular, outgoing cash flows from current operations are basically financed by incoming flows from ordinary business activities.

Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or difficulties in raising sufficient funds that can be readily used. In this sense, EXOR operates so that it has financial resources available by issuing bonds and securing irrevocable credit lines with expiration dates and amounts consistent with its investment plans.

EXOR assesses and manages its exposure to fluctuations in interest rates in accordance with its financial management policies and uses derivative financial instruments to fix some of the financing obtained at a pre-set interest rate; in particular, the only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on some of the loans received.

NOTES RELATING TO THE MOST SIGNIFICANT ITEMS OF THE INCOME STATEMENT AND STATEMENT OF FINANCIAL POSITION

1. Dividends from investments

Dividends amount to €197,784 thousand (€120,029 thousand in 2009) and were received from the following companies:

€ in thousands	2010	2009
EXOR S.A.	**130,000**	119,960
Fiat S.p.A. - Ordinary shares	**56,540**	0
Fiat S.p.A. - Preferred shares	**9,636**	0
Fiat S.p.A. - Savings shares	**760**	
Intesa Sanpaolo S.p.A. - Ordinary shares	**800**	0
Emittenti Titoli S.p.A.	**48**	69
Total dividends	**197,784**	120,029

The payment of dividends voted by the Exor S.A. shareholders' meeting on November 23, 2010 includes a quota in kind represented by mutual funds in U.S. dollars. The amount of such financial instruments was determined on the basis of the NAV measurement at October 31, 2010 performed by HSBC and Citibank (€96,953 thousand). The remaining amount of dividends was paid in cash (€33,047 thousand).

2. Gains on disposals of investments

Gains on disposals of investments amount to €14,811 thousand in 2010 and derive from the sale of 30 million Intesa Sanpaolo shares (0.25% of ordinary share capital), with net proceeds of €90,000 thousand.

In 2009, the gains amounted to €21,685 thousand and basically came from the sale of 78 million Intesa Sanpaolo shares, equal to 0.66% of ordinary share capital. Net proceeds totaled €217,172 thousand, with a net gain of €21,677 thousand.

3. Impairment losses on investments

Impairment losses on investments amount to €4,643 thousand and represent the alignment of the remaining 10 million Intesa Sanpaolo ordinary shares to the stock trading price at December 30, 2010.
In fact, it is deemed that the stock trading price, consistently below the original carrying amount, represented objective evidence of an impairment loss.

4. Financial expenses from third parties

These include:

€ in thousands	2010	2009	Change
Interest on bonds 2007/2017	**40,859**	40,830	29
Interest on bonds 2006/2011	**3,115**	7,308	(4,193)
Interest rate hedge expenses	**5,442**	5,345	97
Expenses on early closing of interest rate hedge transactions on 2006/2011 bonds	**4,659**	1,568	3,091
Interest expenses on bank debt	**2,201**	2,811	(610)
Bank commissions	**1,465**	1,452	13
Charges from discounting to present value	**10**	12	(2)
Financial expenses on securities held for trading:			
- Losses on shares and securities trading	**18,827**	9,190	9,637
- Fair value adjustments	**15,430**	3,960	11,470
- Losses on put/call sales	**6,466**	1,317	5,149
- Other expenses	**14,145**	4,799	9,346
Total financial expenses from third parties	**112,619**	78,592	34,027

5. Financial income from third parties

This includes:

€ in thousands	2010	2009	Change
Interest income on receivables from:			
- Banks	**1,531**	3,592	(2,061)
- Tax authorities	**740**	1,122	(382)
Interest income and other income on held-to-maturity securities	**9,335**	2,691	6,644
Interest rate hedge income	**448**	1,303	(855)
Income on securities held for trading:			
- Gains on share and bond trading	**27,153**	14,766	12,387
- Gains on put/call sales	**20,160**	15,549	4,611
- Fair value adjustments	**13,365**	6,085	7,280
- Dividends	**8,114**	2,041	6,073
- Interest on fixed-rate securities	**7,339**	6,322	1,017
- Other income	**2,674**	3,361	(687)
Income on discounting to present value	**37**	7	30
Total financial income from third parties	**90,896**	56,839	34,057

6. Gains (losses) on exchange

Details are as follows:

€ in thousands	2010	2009	Change
Losses on exchange			
- realized	**(2,887)**	(947)	(1,940)
- unrealized	**(89)**	(233)	144
	(2,976)	(1,180)	(1,796)
Gains on exchange			
- realized	**6,149**	1,715	4,434
- unrealized	**627**	159	468
	6,776	1,874	4,902
Total gains (losses) on exchange	**3,800**	694	3,106

7. Personnel costs

These amount to €8,813 thousand (€8,724 thousand in 2009) and show a total net increase of €89 thousand. Details are as follows:

€ in thousands	2010	2009	Change
Salaries	**5,192**	5,139	53
Social security contributions	**1,329**	1,370	(41)
Employee leaving entitlement, other long-term benefit plans and defined benefit plans and payments of plan contributions	**577**	616	(39)
Figurative costs of EXOR stock option plan (a)	**926**	886	40
Other personnel costs (b)	**789**	713	76
Total personnel costs	**8,813**	8,724	89

(a) Information on the EXOR stock option plan is provided in Note 26.
(b) These costs include €342 thousand (€308 thousand in 2009) of costs from related parties.

At the end of 2010, employees number 42 (42 at the end of 2009).
The average number of employees in 2010 was 42, summarized by category as follows:

	2010	2009
Managers	**11**	11
Middle management	**17**	17
Clerical staff	**11**	11
Messengers	**3**	3
Average number of employees	**42**	42

The employee reduction plan continued into 2010 for EXOR S.p.A. and the subsidiary Exor Services; this resulted in five employees leaving the Company in the early months of 2011. Further details are provided in Notes 10 and 32.

Compensation policies

The overall compensation is composed of a fixed and a variable portion, as well as additional benefits.
The fixed compensation is connected to the responsibilities of the person's role, the level of individual expertise and the experience acquired; since 2009, variable compensation is discretionary; previously, it was linked to an evaluation system according to fixed objectives both individually and as a team.
Further discretionary bonuses may be paid for exemplary performance in transactions which create value for the Company.
The additional benefits, mainly in reference to personnel with management responsibilities, include supplementary pension plans, health care plans, death and disability insurance coverage, loyalty bonuses and, where provided, the use of a company car.
Further information on employee benefits is presented in Note 30.

8. Purchases of goods and services from third parties

These amount to €4,440 thousand and increased by €132 thousand compared to 2009 (€4,308 thousand). The main costs are indicated below:

€ in thousands	2010	2009	Change
Sundry consulting and services	**2,131**	1,754	377
Travel, entertainment and transport expenses	**469**	478	(9)
Directors' liability insurance	**333**	318	28
Bank and financial commissions	**186**	171	15
Notary fees	**171**	190	(19)
Office management	**158**	161	(3)
Publication and translation of financial reports	**129**	171	(42)
Compensation to corporate boards	**119**	97	22
Securities' listing fees	**110**	215	(105)
Rent	**107**	151	(44)
Audit fees (a)	**102**	92	10
Stockholders' meetings' fees	**99**	100	(1)
Books, newspapers, magazines and other publications	**45**	59	(14)
Rentals	**39**	115	(76)
Stationery and consumable office supplies	**35**	64	(29)
Sundry expenses	**207**	172	35
Total purchases of goods and services from third parties	**4,440**	4,308	132

(a) Includes out-of pocket expenses.

9. Other operating expenses

These total €462 thousand (€578 thousand in 2009).
Details are as follows:

€ in thousands	2010	2009	Change
Donations	**329**	344	(15)
Association dues	**69**	60	9
Consob supervisory contribution	**48**	152	(104)
Indirect taxes and duties	**5**	8	(3)
Dividends statute-barred	**2**	2	0
Sundry expenses	**9**	12	(3)
Total other operating expenses	**462**	578	(116)

10. Non-recurring other income (expenses) and general expenses – Personnel costs

These amount to €2,945 thousand (€4,499 thousand in 2009).
Details are as follows:

€ in thousands	2010	2009	Change
Special indemnity relative to the termination of the employment relationship resolved in favor of the former chief executive officer and general manager of IFI S.p.A., Virgilio Marrone	**0**	3,265	(3,265)
Employee termination incentives	**1,098**	947	151
Redundancy Solidarity fund (DM 158/2000)	**1,847**	287	1,560
	2,945	4,499	(1,554)

In 2010, non-recurring expenses (€2,945 thousand) include expenses only related to the employee reduction plan for EXOR S.p.A. and the subsidiary Exor Services. The latter fully recharged EXOR for the expenses incurred on the basis of the agreed plan.
Further details on the Redundancy Solidarity Fund are provided in Note 32.

11. Non-recurring other income (expenses) and general expenses – Purchases of goods and services from third parties and from related parties

These amount to €4,250 thousand, of which €3,068 thousand refers to third parties and €1,182 thousand to related parties (Note 36). In 2009, these expenses amounted to €2,623 thousand, of which €1,443 thousand referred to third parties and €1,180 thousand to related parties. In both years, these expenses were mainly for fees incurred for legal assistance in the cases relating to the content of the press releases issued by IFIL and Giovanni Agnelli e C. on August 24, 2005.

12. Non-recurring other expenses from third parties

In 2010, these expenses amount to €400 thousand and mainly relate to the provision for expenses (€300 thousand) connected with the early liquidation of FIA, proposed by EXOR since it is anticipated that there will no longer be a plurality of beneficiaries and with the aim of reducing administrative costs.

13. Indirect taxes and duties – Non-deductible VAT

Both in 2010 and in 2009, the prorated non-deductible VAT was 100%. Non-deductible VAT was €1,204 thousand in 2010 and €3,515 thousand in 2009. The particular significance of these amounts was determined by the invoicing of services rendered in relation to the Merger (for 2009 only) and legal fees for the defense for cases in progress.

14. Income taxes

The taxable bases for IRES and IRAP taxes for 2010 could be recalculated if, by May 31, 2011, the change introduced by Legislative Decree 225, art. 2, paragraph 28, of December 29, 2010, converted into Law on February 26, 2011, is applied. According to the law, the difference between tax and statutory taxable income could be reduced pursuant to changes possibly introduced to Legislative Decree 38, art. 2, paragraph 26 of February 28, 2005 by the same Legislative Decree 225/2010.

Bearing this in mind, the income for tax purposes calculated by applying tax rules generates a taxable income of about €4.9 million, against which tax loss carryforwards were used relating to the year 2005. The income taxes recorded in the income statement (€31 thousand) refer to the separate income taxes of the CFC (Controlled Foreign Companies) paid in 2010.

In 2009, deferred taxes were released for €3,233 thousand set aside in the past by IFI on the reversal of the impairment loss on IFIL shares since this amount was in excess owing to the cancellation of IFIL shares following the Merger.

Given that, currently, the probability of recovery against future taxable income is not assured, no deferred tax assets have been booked on the tax losses for the years 2006 to 2010 (€246 million, in total).

Details are as follows:

	2010		2009			
€ in millions	**EXOR**	**Theoretical tax effect (27.5% rate)**	EXOR	IFIL	Total	Theoretical tax effect (27.5% rate)
Tax losses carryforwards (for a maximum of 5 years):						
- year 2005 (a)			33	117	150	
- year 2006	**164**		29	135	164	
- year 2007	**66**		10	56	66	
- year 2008	**10**		3	7	10	
- year 2009	**6**		6	-	6	
Total tax losses carried forward	**246**	**68**	81	315	396	109

(a) At December 31, 2010, the possibility of utilizing the remaining tax losses referring to the year 2005 has expired.

Considering that the Irap taxable base is negative, the following table shows the reconciliation between pre-tax profit and taxable income for Ires purposes.

€ in millions	2010	2009
Pre-tax profit	**152**	86
Increases:		
- temporary differences (a)	**41**	40
- permanent differences	**19**	6
Total increases	**60**	46
Decreases:		
- 95% of dividends received	**(188)**	(114)
- 95% of the gain on the sale of the stake in Intesa Sanpaolo	**(14)**	(20)
- deductions of permanent differences	**(5)**	(4)
Total decreases	**(207)**	(138)
Taxable income (loss)	**5**	(6)
Use of tax loss carryforwards	**(5)**	0

(a) Mainly includes non-deductible net interest expenses for the year.

For the years up to December 31, 2005, the ordinary deadline for tax utilization has expired.

15. Non-current assets – Investments

Details are as follows:

	12/31/2010		12/31/2009		
€ in thousands	% of class of shares	Amount	% of class of shares	Amount	Change
Investments accounted for at cost					
Fiat S.p.A. (ordinary shares)	30.45	**2,619,379**	30.45	2,619,379	0

Exor Services S.c.p.a.	9,981		(13)		**9,968**
Emittenti Titoli S.p.A.	272				**272**
Investments accounted for at cost	3,814,034	437	(7,513)		**3,806,958**
Available-for-sale investments					
Intesa Sanpaolo S.p.A. (ordinary shares)	126,600		(101,537)	(4,643)	**20,420**
RHO Immobiliare fund	10,000	1,392			**11,392**
Total available-for-sale investments	136,600	1,392	(101,537)	(4,643)	**31,812**
Total investments	3,950,634	1,829	(109,050)	(4,643)	**3,838,770**

The changes during the year are described in the following paragraphs.

Exor S.A. The investment in Exor S.A. increased by €437 thousand after recording the portion of the EXOR S.p.A. stock option plan relating to employees of Exor S.A. and subsidiaries.

Intesa Sanpaolo S.p.A. In 2010, 30,000,000 ordinary shares were sold for net proceeds of €90,000 thousand and a gain of €14,810 thousand. The derecognition of the carrying amount of the stake sold (€94,950 thousand) includes the original purchase cost of €75,190 thousand and cumulative positive fair value of €19,760 thousand. The gain of €14,810 thousand comes from the comparison between the net proceeds of €90,000 and the original purchase cost of €75,190 thousand. The cumulative positive fair value on the stake sold, equal to €19,760 thousand, was deducted from a specific reserve in equity.

The remaining 10,000,000 Intesa Sanpaolo ordinary shares was aligned to the stock trading price on December 30, 2010 (€2.042 per share) generating a total writedown of €4,643 thousand. In fact, it is deemed that the stock trading price, consistently below the original carrying amount, represented objective evidence of an impairment loss.

At December 31, 2009, there were still call options sold on 40,000,000 Intesa Sanpaolo shares expiring in January and March 2010 at a strike price of €3 per share. At the established expiration date, 30,000,000 options were exercised with the consequent sale of the underlying shares, as described above. Therefore the premiums received, adjusted to fair value at December 31, 2009, were recognized as financial income from third parties (€5,042 thousand).

The remaining 10,000,000 options were not exercised and thus generated financial income of €2,721 thousand.

The increase in the RHO Immobiliare Fund of €1,392 thousand is due to the fair value increase in the quota certified by the Fund's own manager.

Comparison between the carrying amounts and trading prices of listed investments:

		Carrying amount		Trading price December 30, 2010	
	Number	Per share (€)	Total (€ thsd)	Per share (€)	Total (€ thsd)
Fiat S.p.A.					
- ordinary shares	332,587,447	7.88	2,619,379	15.08	5,016,084
- preferred shares	31,082,500	8.06	250,401	10.85	337,121
- savings shares	2,338,629	5.58	13,042	10.80	25,266
			2,882,822		5,378,471
Juventus Football Club S.p.A.	120,934,166	0.61	74,231	0.96	115,613
Intesa Sanpaolo S.p.A.	10,000,000	2.04	20,420	2.04	20,420
Total			**2,977,473**		**5,514,504**

Furthermore:

- there are no investments requiring the assumption of unlimited responsibility for their obligations (art. 2361, paragraph 2 of the Italian Civil Code);
- there are no investments held as collateral for financial liabilities and contingent liabilities.

The following list of investments held by EXOR S.p.A. presents the additional disclosures required by the Italian Civil Code (art. 2427, paragraph 5) and Consob (Communication 6064293 dated July 28, 2006).

(a) Data taken from the consolidated financial statements at December 31, 2010.
(b) Data taken from the separate financial statements at December 31, 2010.
(c) Data taken from the consolidated financial statements at October 31, 2010.
(d) Data taken from the half-year financial report at December 31, 2010.

The higher carrying amount of the investment held in Alpitour S.p.A. compared to its consolidated equity is not considered an impairment, also in the light of the valuation carried out through an independent appraisal.
The higher carrying amount of the investment held in Juventus F.C. compared to its equity is not considered an impairment, also in the light of its stock market value.

16. Current and non-current assets – Held-to-maturity financial instruments

Details are as follows:

€ in thousands	12/31/2010	12/31/2009
Non-current assets	**138,094**	71,389
Current assets	**0**	5,007
Total	**138,094**	76,396

These are represented by bonds issued by leading counterparts. The bonds classified in non-current assets will be repaid between January 15, 2012 and January 31, 2017.
The bonds are recorded and measured at amortized cost.

17. Current assets – Financial assets held for trading

Details are as follows:

€ in thousands	12/31/2010	12/31/2009	Change
Equity shares	**351,755**	42,783	308,972
Bonds	**136,114**	224,233	(88,119)
Mutual funds	**95,827**	0	95,827
Futures contracts	**5,023**	3,520	1,503
Put options	**417**	0	417
Call options	**82**	103	(21)
Total	**589,218**	270,639	318,579

Equity shares and bonds are listed in the main European and United States markets. Such shares are measured at fair value at year-end using the market price translated, if appropriate, at the year-end rate. Changes in fair value are recognized in the income statement under financial income (expenses) from third parties.

Mutual funds are measured at year-end at fair value using the value determined by the deposit banks of the funds themselves. The banks have measured the funds on the basis of the preliminary NAV at December 31, 2010, since it is the measurement closest to the preparation date of the financial statements. The fair value adjustment is recorded as an offsetting entry in the income statement under financial income (expenses) from third parties.

The futures contracts are measured at year-end on the basis of their fair value using the relative market listing. The fair value adjustment is recorded as an offsetting entry in the income statement under financial income (expenses) from third parties.

Options purchased are measured at fair value at year-end using the market price of the listed underlying assets and the relative level of implicit volatility calculated according to the financial models generally recognized by the market; the options denominated in currencies other than Euro are translated at the year-end exchange rate. The offsetting entry to the fair value adjustment is recognized in the income statement under financial income (expenses) from third parties.

18. Current assets – Cash and cash equivalents

Details are as follows:

€ in thousands	12/31/2010	12/31/2009	Change
Bank deposits	**59,795**	53,355	6,440
Time deposits	**160,000**	284,000	(124,000)
Total cash and cash equivalents	**219,795**	337,355	(117,560)

These represent current account bank balances in Euro and other currencies besides the Euro, repayable on demand, and liquid assets deposited at leading credit institutions due on March 24, 2011.

Cash and cash equivalents approximate fair value at year-end.

The associated credit risks should be considered limited since the counterparts are leading bank institutions.

19. Current assets – Other financial assets

These amount to €6,781 thousand (€5,766 thousand at December 31, 2009) and are essentially composed of the portion of interest earned at December 31, 2010 on bonds in portfolio at that date.

20. Current assets – Tax receivables

Tax receivables from the tax authorities refer to:

€ in thousands	12/31/2010	12/31/2009	Change
Receivables for prior years' taxes, refunds requested	**43,876**	43,135	741
Receivables for current and prior years' taxes, carried forward	**1,802**	1,764	38
Total tax receivables	**45,678**	44,899	779

The change in receivables from the tax authorities for the year 2010 is summarized as follows:

€ in thousands	Refunds requested	Carried forward	Total
Balances at December 31, 2009	43,135	1,764	44,899
Used for compensation of withholdings and VAT payable		(543)	(543)
Infragroup sale		(513)	(513)
Receivables arising during the year (withholdings paid)		1,094	1,094
Interest earned during the year	741		741
Balances at December 31, 2010	**43,876**	**1,802**	**45,678**

21. Equity

Share capital

At December 31, 2010, the share capital of EXOR, fully subscribed to and paid-in, amounts to €246,229,850 and consists of 160,259,496 ordinary shares (65.09% of share capital), 76,801,460 preferred shares (31.19% of share capital) and 9,168,894 savings shares (3.72% of share capital), all with a par value of €1.

At December 31, 2010, share capital includes €1,342 thousand from transfers of revaluation reserves set up in the past by the merged company IFIL which, in the event of distribution, would form part of the taxable income of the Company.

The directors have the right, for a period of five years from the date of the resolution passed on May 14, 2008, to increase, one or more times, also in divisible form, the share capital up to an amount of €561,750,000.

The ordinary and preferred shares are registered shares while the savings shares can either be registered or bearer shares, as elected by the shareholders, or as set out by law. The preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code and the second paragraph of art. 13 of the bylaws (regulations for conducting shareholders' meetings). The savings shares do not have voting rights in the shareholders' meetings. Pursuant to art. 146 of Legislative Decree 58/98, the savings shares have voting rights in the special shareholders' meetings of the holders of savings shares.

Pursuant to art. 27 of the bylaws, the profit of each year is appropriated as follows:

- 5% to the legal reserve until it reaches one-fifth of share capital;
- the remaining profit to the shares, as dividends, unless otherwise resolved by the shareholders' meeting, in accordance with the applicable provisions, taking into account that, in the order of priority (i) the savings shares shall be entitled to a preference dividend, cumulative according to the following second paragraph, equal to 31.21% of their par value and a dividend higher than that of the ordinary shares equal to 7.81% of the same par value, and (ii) the preferred shares shall be entitled to a preference dividend and higher than that of the ordinary shares by 5.17% of their par value, which is not cumulative from one year to the next.

When in any one year, the dividends attributed to the savings shares are lower than that indicated above, the difference shall be added to the preference dividend of the next two years.

In the event the ordinary and/or savings shares are delisted, the preference dividend and the dividend higher than that of the ordinary shares to which the savings shares are entitled shall automatically be increased to the extent that they are equal to, respectively, 32.15% and 8.75%.
In the event of the distribution of reserves, the savings shares shall have the same rights as the other shares.
The board of directors, during the course of the year, to the extent that it considers it appropriate and possible in relation to the results of operations, may resolve to pay interim dividends on the dividends of the same year.

In accordance with art. 28 of the bylaws, dividends that are not claimed within five years of the date they become payable will be statute-barred and become the property of the Company and appropriated to the extraordinary reserve.

In accordance with art. 30 of the bylaws, in the event of a wind-up, the assets of the Company shall be distributed in the following order of priority:

- savings shares shall have a pre-emptive right up to the amount of €3.78 per each savings share;
- the holders of preferred shares shall have a pre-emptive right up to the par value of the same shares;
- ordinary shares shall have up to the par value of the same shares;
- all three classes of stock shall have any balance remaining in a proportional amount according to law.

EXOR thus aims to maintain an adequate level of capitalization which allows it to generate a satisfactory economic return for shareholders and guarantee economic access to external sources of financing.
EXOR constantly monitors changes in the consolidated debt level of the Holdings System in relation to the current asset value of its investments and dividend flows from the operating holdings.
Although currently insignificant, a very prudent approach is adopted with regard to the use of financial leveraging.

22. Equity – Capital reserves

Details are as follows:

Stock option reserve	**5,034**		**0**
Fair value reserve	**1,373**		**0**
Total	**3,324,750**		**3,100,853**

A: For capital increases; B: For coverage of losses; C: For distribution to shareholders.

(a) Since the legal reserve is equal to one-fifth of share capital at December 31, 2010, the reserve is distributable (art. 2431 of the Italian Civil Code).
(b) The revaluation reserves can be used for bonus increases of share capital. If used to cover losses, they must be later replenished, if not, then no dividends can be paid. They may not be used to set up the reserve for the purchase of treasury shares. The monetary revaluation reserves can be reduced only by resolution of the shareholders' meeting and in observance of the prescriptions indicated in art. 2445, paragraphs 2 and 3 of the Italian Civil Code.
(c) The reserve is freely distributable except for the portion corresponding to the amount of treasury shares in portfolio.

In the years 2007, 2008 and 2009, reserves were not used to absorb losses.

At December 31, 2010, tax-deferred reserves are recorded for a total of €345,041 thousand, of which €343,009 thousand relates to monetary revaluation reserves and €2,032 thousand to the legal reserve; if distributed they form part of the taxable income of the Company. The tax-deferred revaluation reserves Law 408/90, Law 413/91 and Law 576/75, recorded for a total of €261,647 thousand in equity of the merged company IFIL S.p.A., were replenished at December 31, 2009 in the equity of EXOR S.p.A. by using part of the merger surplus reserve and the share exchange difference.

25. Equity – Treasury shares

Under the treasury shares buyback program approved by the board of directors on March 25, 2009 and May 11, 2010, during 2010, purchases were made by EXOR for 1,559,500 ordinary shares (0.97% of the class) at the average cost per share of €14.45 and a total of €22.5 million, 3,274,484 preferred shares (4.26% of the class) at the average cost per share of €10.02 and a total of €32.8 million, and also 213,295 savings shares (2.33% of the class) at the average cost per share of €11.70 and a total of €2.5 million. The overall investment amounts to €57,836 thousand.

At December 31, 2010, EXOR S.p.A. held the following treasury shares:

	Number	Carrying amount		% of
	of shares	Per share (€)	Total (€ thsd)	class
Ordinary shares	4,109,500	12.68	52,124	2.56
Preferred shares	10,239,784	11.13	113,985	13.33
Savings shares	421,695	10.00	4,218	4.60
Balance at December 31, 2010	**14,770,979**		**170,327**	

Changes during the year are as follows:

		Amount	
	Number	Per share (€)	Total (€ thsd)
Ordinary shares			
Balance at December 31, 2009	2,550,000	11.60	29,584
Purchases	1,559,500	14.45	22,540
Balance at December 31, 2010	**4,109,500**	**12.68**	**52,124**
Preferred shares			
Balance at December 31, 2009	6,965,300	11.66	81,185
Purchases	3,274,484	10.02	32,800
Balance at December 31, 2010	**10,239,784**	**11.13**	**113,985**
Savings shares			
Balance at December 31, 2009	208,400	8.26	1,722
Purchases	213,295	11.70	2,496
Balance at December 31, 2010	**421,695**	**10.00**	**4,218**

26. Stock option plans

Stock option plans linked to EXOR shares (S.O.E.)

The ordinary session of the IFIL shareholders' meeting held on May 13, 2008 had approved the stock option plan (Stock Option Plan IFIL 2008 - 2019) for the chief executive officer, Carlo Barel di Sant'Albano, for 3,000,000 stock options corresponding to the same number of IFIL ordinary shares and for the employees of the IFIL Group (IFIL S.p.A. and the companies in the Holdings System) who are or will be regarded as key people in the organization on the basis of the positions held or activities performed, for a maximum of 12,000,000 stock options.

Following the Merger, the stock option plan was taken over by EXOR S.p.A.. Therefore, the EXOR S.p.A. board of directors held on March 2, 2009 made the adjustments to the stock option Plan resulting from Merger, particularly adjusting the ratio between the number of options and the number of underlying shares and the exercise price on the basis of the Merger's exchange ratio. Such adjusted exercise price is €19.97 for each EXOR share.

The Stock Option Plan EXOR 2008-2019 thus covers a maximum number of 15,000,000 options corresponding to a maximum of 3,975,000 EXOR ordinary shares. The Plan grants the recipients free options on treasury shares purchased by the Company or by companies in the Holdings System in accordance with existing laws. The Plan does not provide for the issue of new shares so there are no dilutive effects on share capital. The May 11, 2010 board of directors' meeting approved a treasury shares buyback program for the three classes of stock also aimed at servicing the above stock option plan.

An analysis of the changes in the stock options granted is as follows:

Number	Options granted	Ordinary shares linked to plan	Beneficiaries
Original grant	9,525,000	2,524,125	18
Granted in 2010	200,000	53,000	1
Options forfeited	(175,000)	(46,375)	(4)
Situation at December 31, 2010	**9,550,000**	**2,530,750**	**15**

The fair value of the 9,550,000 options outstanding at December 31, 2010 was determined to be €15,670 thousand, divided as follows:

€ in thousands	Number of options granted	EXOR ordinary shares linked to the plan	Total cost	Cost referring to the year
Chief Executive Officer, EXOR S.p.A.	3,000,000	795,000	4,807	601
Key employees, EXOR S.p.A. (10)	4,450,000	1,179,250	7,498	926
Total EXOR S.p.A.	7,450,000	1,974,250	12,305	1,527
Key employees of Exor S.A. and other subsidiaries in the Holdings System (4)	2,100,000	556,500	3,365	
Total	**9,550,000**	**2,530,750**	**15,670**	**1,527**

The cost referring to the year amounts to €1,527 thousand, of which €601 thousand is classified as emoluments for the chief executive officer and €926 thousand as personnel costs. The cost relating to key employees of Exor S.A. and other companies in the Holdings System was recognized as an increase in the amount of the investment in Exor S.A. The corresponding entry for the total of €1,964 thousand is recorded in the stock option reserve.

Stock option plan linked to Alpitour shares

With reference to the stock option plan approved by IFIL S.p.A. for two managers of the Alpitour Group in December 2005, it should be noted that after the merger, EXOR S.p.A. took over the relative commitments.

The plan calls for purchase options on Alpitour shares to be granted to the chairman and chief executive officer, D.J. Winteler, and the general manager, F. Prete, respectively, equal to 6% (2,127,000 shares) and 5% (1,772,500 shares) of Alpitour's share capital.
After reconfirmation of the positions of the two managers for another three years, the EXOR S.p.A. board of directors' meeting held on May 13, 2009 extended the period in which the options could be exercised to January 2013 (date of the approval of the Alpitour financial statements for the financial year 2011/2012 by the shareholders' meeting).
EXOR S.p.A. and the managers of Alpitour S.p.A., finally, exchanged reciprocal purchase and sale options, exercisable during the same above period, on Alpitour shares that will have been purchased by the same managers; the exercise price will be established on the basis of an appraisal which will be performed using the same valuation principles applied in the December 2005 valuation.

From an accounting standpoint, the plan is a cash-settled stock-based payment transaction subject to paragraph 30 and subsequent paragraphs of IFRS 2, which requires the liability of the plan to be measured at fair value and, therefore, the options of the plan, at every reporting date, until plan expiration.

At December 31, 2010, the fair value of the option rights of the plan was estimated at a total of €21,981 thousand (€12,233 thousand at December 31, 2009) recorded in "Current other payables to related parties". The increase in the liability compared to the prior year (€9,748 thousand) was recognized in the income statement in "Non-recurring other expenses from related parties" as the portion relating to the current year.

The estimate was performed by an independent expert who applied a binomial model of valuation to the options based on the following parameters:

- the exercise price of the options has been assumed to be equal to the par value of one ordinary Alpitour share at the grant date, quantified on the basis of an estimate performed by an independent expert, equal to €2.24;
- the last expiration date to exercise options has been established as the date of the approval of the Alpitour S.p.A. financial statements for the year 2011/2012, fixed, conventionally, as January 31, 2013. At the date of reference of December 31, 2010, the options thus have a remaining life of 25 months (2 years and 1 month);
- the expected volatility has also been determined by referring to the historical volatility, measured over a period consistent with the remaining life of the shares in the plan, of a sample of listed companies operating in the same sector as Alpitour;
- the risk-free interest rate has been assumed to be equal to the return on government securities having a residual life consistent with the expiration of the options in the plan;
- an assumption has also been included in the “binomial” model for the early exercise of the option rights during the period between the end of the vesting period and contractual expiration date of the options.

Upon authorization by EXOR S.p.A., the board of directors of Alpitour S.p.A. may grant future purchase options on Alpitour shares equal to 4% of its capital (now 1,418,000 shares) to other managers in key operating positions.

27. Current and non-current liabilities – Non-convertible bonds

The bonds June 9, 2011 were reclassified to current liabilities since they will expire shortly. Details are as follows:

Issue date	Maturity date	Issue price	Coupon	Rate	Nominal amount (€/000)	Effect of amortized cost measurement (€/000)	**Balance** (€/000)
6/9/2006	6/9/20011	99.900	Quarterly	3-month Euribor + spread	200,000	(82)	**199,918**
6/12/2007	6/12/2017	99.554	Annually	Fixed 5.375%	750,000	(4,300)	**745,700**

The bonds contain covenants that are common in international practice for bond issues of this type. In particular, they contain negative pledge clauses (which require that bonds benefit from any existing or future pledges of assets of the issuer granted in connection with other bonds or debt securities having the same ranking) and providing for periodic disclosure. The 2006/2011 bonds also establish other commitments such as respecting a maximum debt limit in relation to the amount of the portfolio and maintaining a rating by one of the major agencies. Non-compliance with these covenants allows the bondholders to ask for the immediate redemption of the bonds. Finally, standard events of default are envisaged in the case of serious non-fulfillment such as, for example, failure to pay interest. These covenants were complied with at December 31, 2010.

Finally, a change in control, if any, of EXOR would give the bondholders the right to ask for early repayment of the 2006/2011 and 2007/2017 bonds for a total of €950 million.

Standard & Poor's rated the two bond issues “BBB+”, in line with the current rating of EXOR S.p.A. long-term debt.

28. Current and non-current liabilities – Bank debt

Non-current bank debt amounts to €50 million (€125 million at December 31, 2009).

The bank debt at December 31, 2009 (€125 million) became due and the relative interest rate swaps terminated in 2010.

Bank debt is classified as non-current according to the remaining term of the credit lines extended.

Current bank debt amounts to €231.1 million (€25.1 million at December 31, 2009) and includes two loans for €75 million due in December 2011, credit lines drawn down for €155.6 million and bank overdrafts for a remaining €0.5 million.
In order to guarantee fixed interest rates, an interest rate swap was put in place on €25 million; at December 31, 2010, the fair value of these contracts is negative for €52 thousand.
With regard to the periods in which outgoing cash flows will reverse in relation to the interest rate swap contracts, reference should be made to Note 33.

At December 31, 2010, the Company has credit lines for €1,557.7 million, of which €707.7 million is revocable and €850 million is irrevocable. The expiration dates of the credit lines are as follows:

€ in millions	
Within 1 year	455
From 2 to 3 years	395
Total	**850**

The loan contracts relating to irrevocable credit lines provide for commitments to be observed that are typical of the practices in the sector for this type of debt. In particular, some of the main commitments on certain contracts refer to periodical disclosure obligations, prohibition of new real guarantees on the assets of the Company without the consent of the creditor, non-subordination of the credit and, in some cases, compliance with financial ratios. Finally, clauses provide for early repayment in the event of serious non-fulfillment such as, for example, failure to pay interest or events that are especially detrimental such as bankruptcy.
In the event of a change in control of EXOR, some lender banks would have the right to ask for the early repayment of the irrevocable credit lines for a total of €355 million.

29. Non-current liabilities – Deferred tax liabilities

Deferred income taxes originated from temporary differences between the carrying amount and the fiscally recognized amount of the investments held in RHO Immobiliare Fund and Fiat.
The changes during the year are as follows:

€ in thousands	To equity	To income statement	**Total**
Balance at December 31, 2009			**22,046**
Release as a result of the partial sale of the Intesa Sanpaolo investment	(271)		**(271)**
Reversal of the impairment loss on the Intesa Sanpaolo investment to historical cost	(90)		**(90)**
Accrual against the fair value increase in the Rho Immobiliare Fund	19		**19**
Changes during the year	**(342)**	**0**	**(342)**
Balance at December 31, 2010			**21,704**

30. Non-current liabilities – Provisions for employee benefits

The composition is as follows:

€ in thousands	12/31/2010	12/31/2009
Employee leaving entitlements	**2,572**	3,071
Other provisions for employees	**63**	169
Total provisions for employee benefits	**2,635**	3,240

Details of the changes during 2010 and 2009 are as follows.

	2010			2009		
€ in thousands	Employee leaving entitlements	Other provisions for employees	Total	Employee leaving entitlements	Other provisions for employees	Total
Balance at beginning of year	**3,071**	**169**	**3,240**	1,966	47	2,013
Increase due to merger with IFIL S.p.A.			**0**	2,158	122	2,280
Current service cost	**247**	**10**	**257**	315	10	325
Financial expenses	**123**	**7**	**130**	178	9	187
Transfers to other companies				(299)	(9)	(308)
Actuarial (gains) losses	**(67)**	**(35)**	**(102)**		1	1
Benefits paid	**(870)**	**(20)**	**(890)**	(1,247)	(11)	(1,258)
Balance at end of year	**2,504**	**131**	**2,635**	3,071	169	3,240

The analysis of employee benefits is as follows:

Employee leaving entitlements

Employee leaving entitlements represent the obligation due to employees by Italian law (amended by Law 296/06) that has accrued and which will be paid upon termination of employment. In certain circumstances, a portion of the indemnity may be paid as an advance during the employee's service life. This is an unfunded defined benefit plan, considering the benefits almost entirely accrued, with the sole exception of the revaluation.

After the change made to the regulations for employee leaving entitlements by Law 296 dated December 27, 2006 (Budget Law 2007), and subsequent decrees and regulations, for those employees who have asked, the portion of employee leaving entitlements accruing from January 1, 2007 has been transferred to a complementary pension plan chosen by the employees and these therefore fall under defined contribution plans.

For those employees who did not elect the transfer of the accrued portion of employee leaving entitlements beginning January 1, 2007, the calculation of employee leaving entitlements, including the portion accruing, will be made according to the usual actuarial method.

Besides employee leaving entitlements, established by art. 2120 of the Italian Civil Code, EXOR S.p.A. guarantees other forms of benefits (termination benefits, loyalty bonuses, health care plans, defined benefit and defined contribution pension plans) under Company or individual supplementary agreements, described below.

Termination benefits

This is a fixed amount in addition to employee leaving entitlements which will be paid at the time and in relation to the termination of the employment relationship, at the currently expected retirement age, on the basis of existing legislation, at the age of 65 for men and at the age of 60 for women. Any raising of the retirement age for whatsoever reasons will have no effect on the payment of these benefits. In the eventuality of the termination of employment for whatsoever reason prior to the legal retirement age indicated above, the benefits shall be paid for the amount accrued up to the date of termination of employment, compared with and in proportion to the years of service since January 1, 2000 up to the date of the termination of employment. No interest or revaluations of any sort accrues on the amount.

Health care plans

Health care plans, historically offered to management staff, have been extended to all employees since the end of 2007, and require the payment of defined contributions to external funds and entities which pay the health care benefits.

Pension plans

The Company's pension plans are for employees categorized as managers and are covered by Company agreements and regulations.

They can be "defined benefit" or "defined contribution" plans and provide for the payment of contributions to external, legally independent funds with assets management autonomy.

The plans provide for a contribution by the employer and a contribution by the employee plan participant, also by conferring a part of his/her employee leaving entitlement.

The liabilities for contributions payable are included in "Other payables". The contribution cost for the period accrues on the basis of the service rendered by the employee and is recognized in personnel costs.

Other benefits

Other benefits include loyalty bonuses payable to all employees.

Loyalty bonuses accrue and are paid after a certain number of years of service (25, 30, 35 and 40 years).

Other information

The actuarial calculations required to determine the liability of defined benefit plans are performed by an independent actuary at the end of each year. At December 31, 2010 and December 31, 2009, the liability has been calculated on the basis of the following actuarial assumptions:

	12/31/2010	12/31/2009
Discount rate	**4.30%**	4.10%
Expected remuneration increase	**1.9-3.4%**	1.9-3.4%
Cost-of-living increase	**1.90%**	1.90%

In addition to the above financial indexes, account has also been taken of all the demographic assumptions relating to the probability of events such as death, disability, dismissal and retirement of the employees.

31. Current liabilities – Other financial liabilities

These refer to:

€ in thousands	**12/31/2010**	12/31/2009	Change
Bonds and loans – current portion (interest and hedges)	**22,863**	22,965	(102)
Fair value of cash flow hedge derivatives	**52**	4,527	(4,475)
Derivative financial instruments held for trading	**8,417**	7,763	654
Commissions on unused credit lines	**222**	202	20
Payables to stockholders and other debt	**270**	268	2
Total current other financial liabilities	**31,824**	35,725	(3,901)

32. Current and non-current liabilities – Other payables

They include:

	12/31/2010		12/31/2009	
€ in thousands	Non-current	Current	Non-current	Current
Payable to INPS for Solidarity Fund under M.D. 158 of 4/28/2000	**810**	**532**	193	173
Payable to employees		**2,631**	0	1,810
Contributions payable		**623**	0	653
Sundry		**640**	0	189
Total other payables	**810**	**4,426**	193	2,825

Under M.D. 158 dated April 28, 2000, a "Solidarity Fund to support earnings, employment, reconversion and professional requalification of employees in the credit sector" has been set up at INPS which enjoys separate financial and asset management. The Fund, in exceptional situations, pays benefits to support earnings at the request of the employer until the right is accrued for a retirement or old age pension within a period of 60 months from the date of cessation of the employment relationship.

The above liabilities (in total €1,342 thousand, of which €532 thousand is current and €810 thousand non-current) represent the special contribution that EXOR will pay to cover the extraordinary benefits payable to former employees, including the related contribution.

33. Additional information on financial instruments and financial risk management policies

The carrying amounts and the relative income (expenses) originating from each category of asset and liability classified in accordance with IAS 39 are presented as follows.

	12/31/2010		
€ in thousands	Carrying amount	Income	Expenses
Financial assets			
At fair value through profit or loss	589,218	58,645	48,166

Fair value of financial assets and liabilities and fair value estimation criteria

IFRS 7 requires financial instruments recognized in the statement of financial position at fair value to be classified on the basis of a hierarchy that reflects the significance of the inputs used in determining fair value. The following levels are used in this hierarchy:

- Level 1 – listed prices in active markets for the assets or liabilities being measured;
- Level 2 – inputs other than listed prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) on the market;
- Level 3 – inputs that are not based on observable market data.

The following table provides an analysis under this hierarchy of financial assets and liabilities measured at fair value at December 31, 2010.

€ in thousands	Level 1	Level 2	Level 3	**Total**
Assets at fair value				
Non-current assets	0	0	0	0
Available-for-sale investments	20,420	0	11,392	31,812
Current assets	0	0	0	0
Financial assets held for trading	492,891	499	95,827	589,217
Total assets	**513,311**	**499**	**107,219**	**621,029**
Liabilities at fair value				
Current liabilities	0	0	0	0
Other financial liabilities	0	8,469	0	8,469
Total liabilities	**0**	**8,469**	**0**	**8,469**

In 2010, there were no transfers from Level 1 to Level 2 or vice versa. Available-for-sale investments classified in Level 3 refer to the fair value at June 30, 2010 (most recent available data) of the 400 shares of the closed-end Italian real estate mutual fund denominated “Rho Immobiliare – Fondo Comune di Investimento Immobiliare di tipo chiuso”.

The reconciliation of the opening and closing balances of available-for-sale investments classified in Level 3 for the determination of fair value is the following:

€ in thousands	
Balance at December 31, 2009	10,000
Total gains(losses) credited directly to equity during the year	1,392
Balance at December 31, 2010	**11,392**

The fair value of listed securities in an active market is equal to the market price at the balance sheet date.

For trade receivables and payables and other current assets and liabilities due within one year, the fair value is not significant in that their carrying amount approximates fair value.

Credit risk

The maximum theoretical exposure to credit risk for EXOR S.p.A. at December 31, 2010 is represented by the carrying amount of financial assets shown in the financial statements. Nevertheless, the Company seeks to mitigate such risk by investing a good part of its liquidity in securities issued by leading bank and corporate counterparts selected according to their creditworthiness.
At December 31, 2010 and December 31, 2009, there are no financial assets past due and not written down and provisions for receivables impairment.

Liquidity risk

The details of residual contract maturities for all financial liabilities which fall under the application of IAS 39 are indicated in the table below.
The table is prepared on the basis of the allocation of the remaining cash flows from existing contracts, including principal and interest; with regard to variable-rate loans, the most recent fixed coupon rate with the bank counterpart was used for the projection of future maturities, taking into account the effect of hedge transactions.

	2010					
€ in thousands	Within 6 months or until canceled	From 6 months to 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
Non-convertible bonds						
EXOR bonds 2011	201,709					**201,709**
EXOR bonds 2017	40,313	0	120,938	80,625	790,312	**1,032,188**
Non-current bank debt	278	278	50,186			**50,742**
Current bank debt	142,968	75,699				**218,667**
Trade payables and other payables to related parties	1,786					**1,786**
Trade payables and other payables to third parties	4,425					**4,425**
Trading and derivative financial instruments designated as hedges	8,469					**8,469**
Total	**399,948**	**75,977**	**171,124**	**80,625**	**790,312**	**1,517,986**

	2009					
€ in thousands	Within 6 months or until canceled	From 6 months to 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
Non-convertible bonds						
EXOR bonds 2011	1,397	1,397	201,397			**204,191**
EXOR bonds 2017	40,313		80,625	80,625	870,937	**1,072,500**
Non-current bank debt	3,013	27,993	100,268			**131,274**
Current bank debt	533	25,518				**26,051**
Trade payables and other payables to related parties	298					**298**
Trade payables and other payables to third parties	2,611					**2,611**
Trading or derivative financial instruments designated as hedges	4,527					**4,527**
Total	**52,692**	**54,908**	**382,290**	**80,625**	**870,937**	**1,441,452**

Outgoing flows from current operations are financed for the most part by incoming flows from ordinary activities and cash availability.

Liquidity risk could thus arise only in the event of investment decisions in excess of cash availability which are not preceded by sufficient liquidations of assets or the receipt of suitable sources of financing that can be readily used. In this sense, EXOR S.p.A. operates so as to have irrevocable credit lines available with expiration dates and amounts consistent with its investment plans.

At December 31, 2010, the Company has credit lines for €1,557.7 million, of which €850 million are irrevocable.

The expiration dates of the credit lines are as follows:

€ in millions	Lines extended	Of which, irrevocable
Within 1 year	1,162.7	455.0
From 2 and 5 years	395.0	395.0
Total	**1,557.7**	**850.0**

Market risk

EXOR S.p.A. is principally exposed to currency, interest rate and price risks.

Currency risk

A part of the assets held for trading and cash at December 31, 2010 for €280,408 thousand and €21,732 thousand, respectively, are denominated in currencies other than Euro. A part of financial liabilities (€227 thousand) are also denominated in currencies other than Euro. Since these are securities held for trading and cash, both are adjusted to year-end exchange rates.

EXOR S.p.A. has extended a U.S. dollar loan to C&W Group for an equivalent Euro amount, including interest, of €30,593 thousand at December 31, 2010. The U.S. dollar flows which are expected to be received have been forward sold to leading banking counterparts in order to neutralize the risks associated with the fluctuation of the U.S. dollar exchange rate against the Euro.

Interest rate risk

The analysis of debt by interest rate shows that the rates are between 1.1% and 5.75% in 2010 (between 4% and 5.75% in 2009).

EXOR S.p.A. has one interest rate swap contract in place at December 31, 2010, for a total notional amount of €25 million for the purpose of managing exposure to fluctuations in interest rates on bank debt, with a fair value for a negative €52 thousand.

A sensitivity analysis was performed on the financial instruments exposed to interest rate risk at the preparation date of the financial statements. The analysis assumes that the exposure for variable-rate liabilities at the end of the year has remained unchanged for the entire year. The assumptions used for the model are as follows:

- for debt: a symmetrical change of 50 basis points is applied;
- for interest rate swaps: the fair value is recalculated applying a parallel and symmetrical shift of 50 basis points to the current interest rate curve at the end of the reporting period.

The effects of a change with an increase or decrease of 50 basis points in interest rates would be the following:

	12/31/2010		12/31/2009	
€ in thousands	**income statement**	**equity**	income statement	equity
+50 bsp				
cash and cash equivalents/financing	**(1,031)**		827	
hedging instruments		**9**		193
-50 bsp				
cash and cash equivalents/financing	**1,031**		(827)	
hedging instruments		**(10)**		(186)

Price risk

EXOR S.p.A. is exposed to price risk originating from investments in the capital of other companies held for trading or for strategic purposes; such investments are classified in the following categories:

- investments accounted for at cost;
- available-for-sale investments;
- assets held for trading.

Sensitivity analysis for price risk

Considering price risk exposure at the reporting date, if the prices of securities, classified as available-for-sale investments and assets held for trading are 5% higher or lower, the available-for-sale securities reserve would be €70 thousand higher or lower and the amount recognized in the income statement relating to securities held for trading would be €29,461 thousand higher or lower.

34. Emoluments to members of the board of directors and board of statutory auditors

(art. 78 of Consob Regulation 11971 dated May 14, 1999, as amended)

All amounts in the following table are expressed in Euro.

Name	Post held	Term of office	Expiration of term of office	Emolument for post held (a)	Non-monetary benefits	Bonuses and other incentives	Other compensation
Directors in office							
John Elkann	Chairman	1/1 - 12/31	2011	1,000,000			588,747
Gianluigi Gabetti	Honorary Chairman	1/1 - 12/31	2011	1,000,000	3,560		
Pio Teodorani-Fabbri	Vice Chairman	1/1 - 12/31	2011	100,000			
Carlo Barel di Sant'Albano (b)	Chief Executive Officer	1/1 - 12/31	2/11/2011	1,250,000	38,236	500,000	930

Total Statutory Auditors				**145,250**	**0**	**0**	**164,572**

(a) The directors (Elkann, Gabetti, Teodorani-Fabbri, Sant'Albano, Brandolini d'Adda, Agnelli, Camerana, Ferrero Ventimiglia, Marchionne, Nasi, Rattazzi and Grande Stevens) have waived their right to the emolument resolved by the shareholders' meeting for the post of director (€131 thousand) and instructed the Company to donate such fees for charitable and cultural purposes.

(b) The director Sant'Albano waived the emoluments resolved by Fiat (€65,000) and Juventus Football Club (€17,500) in favor of EXOR.

There are no key managers with strategic responsibilities in EXOR S.p.A..

The Company signed a third-party liability insurance policy with a group of insurance companies for a maximum claim per incident and per year of €50 million for coverage in the event of requests for reparation of non-fraudulent acts.

The proposals for the emoluments of the executive directors are formulated and approved directly by the board of directors which, after a review by the compensation and nominating committee, in accordance with art. 2389, paragraph 2, of the Italian Civil Code, has the power to establish the fees of directors vested with special responsibilities in accordance with the deed of incorporation.

In its meeting held on May 13, 2009, the board of directors decided to equally divide among its members the compensation approved by the shareholders' meeting, amounting to €170,000 per year. Furthermore, pursuant to art. 2389 of the Italian Civil Code, the board approved the following annual compensation:

- €1,000,000 to the chairman John Elkann, in addition to health care coverage;
- €1,000,000, besides all out-of-pocket travel expenses outside the municipality of residence, for the mandate for strategical coordination, to the honorary chairman Gianluigi Gabetti; he is also entitled to death and permanent disability insurance coverage for professional or non-professional-related accidents and the use of a secretarial service and a car with driver also after the expiry of the term of office;
- €1,250,000 to the chief executive officer, Carlo Barel di Sant'Albano, who is also entitled to the following:
  - a variable fee up to a maximum of €1,250,000, 50% of which is partially linked to the increment in EXOR's NAV;
  - the use of an apartment in Turin made available by the Company;
  - the use of two company cars, in addition to one used for company business;
  - death and permanent disability insurance coverage for professional or non-professional related accidents;
  - health care coverage, the same as for company executives;
  - a sum equal to €2,500,000, corresponding to two years' annual fixed fee for the post of chief executive officer, to be paid at the end of the term of office, except in the case of the reconfirmation of the post, voluntary resignation or failure to accept the reconfirmation of the post, termination for just cause or reaching pensionable age;
- €100,000 to the vice chairman Pio Teodorani-Fabbri for the coordination and supervision activities of the Rome office;
- €35,000 to the internal control committee (of which €15,000 to the chairman and €10,000 to each of the other two members);
- €35,000 to the compensation and nominating committee (of which €15,000 to the chairman and €10,000 to each of the other two members);
- €40,000 to each member of the strategy committee;
- €100,000 to the secretary of the board of directors, Virgilio Marrone, in addition to death and permanent disability insurance coverage for professional or non-professional-related accidents and the use of a company car.

The directors will also be reimbursed for the expenses incurred in carrying out the activities connected with their posts.

It should also be noted that in its meeting of February 11, 2011, the EXOR board of directors appointed John Elkann as chief executive officer in addition to his position as chairman and that Carlo Barel di Sant'Albano relinquished his position as chief executive office and assumed the position of chairman of the subsidiary Cushman & Wakefield.

In its meeting of March 28, 2011, the board of directors approved certain changes to the compensation of the directors which became necessary as a result of the changes in the positions held within the Company. Further details are provided in the Report on Operations under “Significant events in the first quarter of 2011”.

35. Stock options and stock grants awarded to directors

(art. 78 of Consob Regulation 11971 dated May 14, 1999, as amended)

Stock option

Name Post held	Shares linked to plan	Options held at beginning of year			Options awarded (expired) during year			Options held at end of year		
		Number of options	Average exercise price	Exercise period (month/year)	Number of options	Average exercise price	Exercise period (month/year)	Number of options	Average exercise price	Exercise period (month/year)
Barel di Sant'Albano Carlo (a)										
EXOR CEO	EXOR	3,000,000	19.97	16/5-19/12	0	0.00	0	3,000,000	19.97	16/5-19/12
Sergio Marchionne (b) (c) (d)										
EXOR director and Fiat CEO	FIAT	19,420,000	9.64	10/11-16/11	(2,500,000)			16,920,000	9.09	10/11-16/11
Alessandro Nasi										
EXOR director	FIAT	11,250	13.37	11/2-14/11	(7,500)	13.37		3,750	13.37	11/2-14/11
	CNH	509	$48.12	9/1-14/1		$48.12		509	$48.12	9/1-14/1
	CNH	8,659	$13.58	10/1-15/1		$13.58		8,659	$13.58	10/1-15/1
	CNH				15,842	$31.69	11/2-16/2	15,842	$31.69	11/2-16/2

(a) The average exercise price was modified as a result of the Merger from €5.291 to €19.97.

(b) The options awarded in 2004 were 1/3 exercisable only when pre-set performance targets were met. These targets were met in 2008, rendering the entire 2004 plan of 10,670,000 stock options completely vested in 2008. In March 2009, the shareholders' meeting approved the extension of the exercise period, having it start on January 1, 2011 and end on January 1, 2016.

(c) Half of the options awarded in 2006 (5,000,000) were exercisable only when pre-set performance were met; only the first tranche (that is, 25%) of these rights vested. The exercise period starts upon the approval of the 2010 financial statements and ends in November 2014.

(d) The options expired during the year include both options expired and non-vested option during the year.

The features of the stock option plans are described in the following paragraphs:

- Stock option plans linked to EXOR shares, Note 26 of the EXOR separate financial statements;
- Stock option plans linked to FIAT and CNH shares, Note 24 of the EXOR consolidated financial statements.

Stock Grants

Name	Company	Stock grants held at beginning of year		Stock grants awarded (expired) during year		Stock grants held at end of year	
		Number of options	Exercise period (month/year)	Number of options	Exercise period (month/year)	Number of options	Exercise period (month/year)
Sergio Marchionne	FIAT	2,000,000	2/11	2,000,000	2/12	4,000,000 (a)	1/12
Alessandro Nasi	CNH			75,000 (b)		75,000	2/13-2/15
	CNH			5,000 (c)		5,000	9/11-9/13

(a) After the resolution passed by the board of directors' meeting held on February 18, 2011, all the rights are subject only to the continuation of professional relationships with the Fiat Group until the end of 2011. Further information is provided in Note 24 of the EXOR consolidated financial statements.

(b) The rights are subject to reaching pre-set performance targets and vest in three equal amounts on a cumulative basis in the third, fourth and fifth year of the plan, within the dates of December 31, 2012, 2013 and 2014, respectively.

(c) These shares are restricted awards to key manager in the Company. These shares vest in three years up to September 30, 2013 in equal amounts.

36. Transactions with related parties

The board of directors' meeting held on November 12, 2010 adopted the "Procedures for Transactions with Related Parties" pursuant to Consob Regulation 17221 dated March 12, 2010, which went into effect on January 1, 2011. Such procedures are described in the Annual report on Corporate Governance, also available on the corporate website (http://www.exor.com).

With regard to the year 2010, the transactions between EXOR S.p.A. and the related parties identified in accordance with IAS 24 have been carried out as set forth in existing laws, on the basis of reciprocal economic gain.

With the exception of the comments made subsequently in respect of the loan extended to C&W Group, receivables and payables are not guaranteed and are settled in cash. Guarantees have neither been granted nor received.

Losses have not been recognized during the year for uncollectible or doubtful receivables in relation to amounts due from related parties.

A summary of the statement of financial position and income statement balances generated by transactions with related parties carried out during 2010 is presented below. All amounts are expressed in thousands of Euro.

Counterpart	Investments	Financial receivables	Trade receivables	Trade payables and other payables

% incidence of total transactions with related parties to total of income statement line items	**3.06%**	**67.64%**	**88.28%**	**27.81%**	**96.06%**

The most important transactions are commented below with reference to the notes in the preceding tables.

a) Carrying amount of 11,450 Exor Services shares (0.125% of capital) sold at €14 thousand.
b) 3-year subordinated credit line extended to C&W Group for $50 million, drawn down for $40 million at December 31, 2010, after approval by the board of directors on March 25, 2009. The purpose of the loan is to provide the subsidiary with additional debt capacity and also to use such capacity to fund any investment opportunities. At expiration on May 30, 2012, in the event of non-payment, EXOR will have the right to convert the loan to shares of the subsidiary C&W Group Inc. at a price equal to the lowest of the valuations made quarterly by an independent third party over the period of the credit line, discounted by 30%. The counterparts have provided second-level guarantees to EXOR against the loan.
c) €601 thousand represents the figurative cost of EXOR stock options granted to the chief executive officer; €109 thousand refers to the rent of the chief executive officer's home; €1,250 thousand represents the emolument paid to the chief executive officer and €500 thousand is his variable compensation.
d) Compensation waived by the corporate boards (€131 thousand), performance of services (€213 thousand), emoluments for posts on corporate boards (€138 thousand).
e) Purchases of goods and services by the subsidiary Exor Services S.c.p.a. for €3,762 thousand relate to the lease of the offices of the headquarters in Corso Matteotti 26 and computer, telephone and logistics services. The amount does not include the expenses deriving from the employee reduction plan which has been fully recharged to EXOR S.p.A. and recorded in "Non-recurring other income (expenses) and general expenses – Personnel costs".
f) Consulting services rendered to the Company by the director Franzo Grande Stevens who, during 2010, also rendered professional services to Fiat S.p.A. for €1 million (also in respect of his position as secretary to the board of directors).
g) A liability of €21,981 thousand is reported in other payables in respect of the beneficiaries of the Alpitour stock option plans approved at the end of 2005. The EXOR board of directors' meeting held on May 13, 2009 extended the option exercise period to January 2013 following the reconfirmation of the two managers for another three years. The increase in the payable compared to the prior year (€9,748 thousand) is reported in non-recurring other expenses from related parties.

At December 31, 2010, Tiberto Brandolini d'Adda holds 304,153 options to subscribe or purchase the same number of Sequana shares between May 2009 and May 2013 at a price per share of €20.46; moreover, Sequana has allocated 12,340 bonus shares to Tiberto Brandolini d'Adda, which became available from March 30, 2010.
In 2010, Sequana paid Tiberto Brandolini d'Adda, chairman of the board of directors of the company, a fee of €303 thousand.

37. Guarantees, commitments and pending litigation

On December 21, 2010, the Turin Court, first criminal section composed of a collegiate body, ruled in absolute favor of the defendants, Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone, fully acquitting them because the fact did not exist and deeming also inexistent ex art. 66 of Legislative Decree 231/2001 the administrative offense disputed against IFIL S.p.A. (merged by EXOR S.p.A.) and Giovanni Agnelli e C. S.a.p.az..

38. Fees charged by the independent auditors (art. 149 – *duodecies* of art. 78 of Consob Regulation 11971 dated May 14, 1999, as amended)

The professional services provided to the EXOR Group by the independent auditors in 2010 are the following:

€ in thousands	Service Provider	Parent EXOR S.p.A.		Consolidated subsidiaries	**Total**
Type of services					
Audit	Deloitte & Touche S.p.A.	91		9,005	**9,096**

(a) Confirmation of financial ratios.
(b) Agreed upon procedures carried out regarding specific aspects of the internal control system on financial reporting (ICFR).
(c) Support in designing the Compliance Integrated Governance Model.

39. Net financial position

In accordance with the provisions of Consob Communication 6064293 dated July 28, 2006, the composition of the net financial position of EXOR S.p.A. is provided below.

€ in thousands	12/312010	12/312009	Change
Non-current held-to-maturity financial instruments (a)	**138,094**	71,389	66,705
Cash and cash equivalents	**219,795**	337,355	(117,560)
Non-current other financial assets, with third parties	**105**	320	(215)
Other financial assets held for trading	**589,218**	270,639	318,579
Current held-to-maturity financial instruments	**0**	5,007	(5,007)
Financial receivables from related parties	**30,593**	28,163	2,430
Current other financial assets, with third parties	**6,781**	5,788	993
Non-current debt, with third parties	**(795,700)**	(1,069,884)	274,184
Current debt with third parties	**(462,838)**	(60,851)	(401,987)
Net financial position	**(273,952)**	(412,074)	138,122
- with related parties	**30,593**	28,163	2,430
- with third parties	**(304,545)**	(440,237)	135,692

(a) These are bonds issued by leading counterparts listed on active and open markets which the Company, intends, and is able to hold, until their natural reimbursement date as an investment of a part of its available cash so that it can receive a constant attractive flow of financial income. Such designation was made in accordance with IAS 39, paragraph 9.
Such financial instruments are free of whatsoever restriction and, therefore, can be monetized whenever the Company should so decide in that sense. Their classification as non-current in the financial position has been adopted only in view of the fact that their natural maturity date is 12 months beyond the closing date of the financial statements. There are no trading restrictions and their degree of liquidity or the degree to which they can be converted into cash is considered high.

40. Approval of the separate financial statements and authorization for publication

The separate financial statements at December 31, 2010 were approved by the board of directors on March 28, 2011 which authorized their publication, together with the independent auditors' report and the board of statutory auditors' report, within the timeframe set by law.

Turin, March 28, 2011

On behalf of the Board of Directors
The Chairman and CEO
John Elkann

Attestation of the Separate Financial Statements according to art. 154-bis, Paragraph 5, of Legislative Decree 58/98

We, the undersigned John Elkann, chairman and chief executive officer, and Aldo Mazzia, manager responsible for the preparation of the financial reports of EXOR S.p.A. attest, pursuant to the provisions of art. 154-bis, paragraphs 3 and 4, of Legislative Decree 58 dated February 24, 1998:

- the adequacy with respect to the Company's structure and
- the effective application

of the administrative and accounting procedures applied in the preparation of the separate financial statements at December 31, 2010.

We also attest that:

- the separate financial statements:
  - have been prepared in accordance with applicable International Financial Reporting Standards recognized by the European Community pursuant to EC Regulation 1606/2002 of the European Parliament and Council, dated July 19, 2002;
  - correspond to the amounts shown in the accounts, books and records;
  - provide a true and fair view of the financial conditions, results of operations and cash flows of the issuer;

- the Report on Operations includes a reliable operating and financial review of the issuer, as well as a description of the principal risks and uncertainties to which it is exposed.

Turin, March 28, 2011

The Chairman and CEO
John Elkann

Manager responsible for the preparation
of the financial reports
Aldo Mazzia

REPORT OF THE INDEPENDENT AUDITORS ON THE FINANCIAL STATEMENTS PURSUANT TO ART. 14 AND 16 OF LEGISLATIVE DECREE No. 39 OF JANUARY 27, 2010

To the Shareholders of
EXOR S.p.A.

1. We have audited the financial statements of EXOR S.p.A. as of and for the year ended December 31, 2010, which comprise the statement of financial position, the income statement, the statements of comprehensive income, changes in equity and cash flows and the related notes to the financial statements. These financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005 are the responsibility of the Directors of EXOR S.p.A. Our responsibility is to express an opinion on these financial statements based on our audit.

2. We conducted our audit in accordance with the Auditing Standards recommended by CONSOB, the Italian Commission for listed Companies and the Stock Exchange. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the prior year's financial statements, whose data are presented for comparative purposes, reference should be made to our auditors' report issued on April 1, 2010.

3. In our opinion, the financial statements of EXOR S.p.A. as of December 31, 2010 comply with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005; accordingly, they give a true and fair view of the financial position of EXOR S.p.A. and the results of its operations and its cash flows for the year then ended.

4. The Directors of EXOR S.p.A. are responsible for the preparation of the report on operations and the annual report on Corporate Governance in accordance with the applicable laws and regulations. Our responsibility is to express an opinion on the consistency of the report on operations and of the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998, paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) in the annual report on Corporate Governance, with the financial statements, as required by law. For this purpose, we have performed the procedures required under Auditing Standard n. 001 issued by the Italian Accounting Profession (CNDCEC) and recommended by CONSOB. In our opinion, the report on operations and the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998 paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) included in the annual report on Corporate Governance are consistent with the financial statements of EXOR S.p.A. as of 31 December, 2010.

DELOITTE & TOUCHE S.p.A.

Note	**24**	**24**								**24**	

(a) The EXOR share capital increase to service the exchange of the shares of the merged company IFIL was recognized at the fair value of the 73,809,496 ordinary shares and 9,168,894 savings shares issued, equal to €5.36 and €3.86, respectively, corresponding to the opening stock trading prices on March 2, 2009, the first day of market trading of these shares. Of the total of €431 million, €83 million was allocated to share capital, corresponding to the par value, and €348 million to additional paid-in capital.

(b) Non-controlling interests at December 31, 2008 had amounted to €1,810 million, of which €1,706 million represented the non-controlling interests of the IFIL Group. The difference of €1,275 million between that amount and the fair value of the EXOR capital increase described above (€431 million) was allocated to Owners of the Parent and then entries were made to eliminate the share of the reserves regarding cash flow hedges (-€1 million), exchange differences on translating foreign operations (-€10 million), changes in fair value of available-for-sale financial assets (+€102 million) and the share of comprehensive income of the investments accounted for using the equity method (-€80 million) previously recorded in the consolidated financial statements of the IFIL Group.

(c) Of which €7 million relates to the Fiat Group and €2 million to C&W Group.

(d) Of which €24 million relates to the Fiat Group and €2 million to C&W Group.

EXOR GROUP – NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

GENERAL INFORMATION ON THE ACTIVITIES OF THE GROUP

EXOR S.p.A. is one of Europe's leading investment companies and is controlled by Giovanni Agnelli e C. S.a.p.az., which holds 51.164% of share capital and, in particular, 59.1% of ordinary share capital, 39.24% of preferred share capital and 12.36% of savings share capital.
EXOR S.p.A. is a corporation organized under the laws of the Republic of Italy; its head office is located in Turin, Italy, Corso Matteotti 26.
Through its investment in subsidiaries, EXOR is principally present in the following sectors: Automobile and Auto-related Components (Fiat Group), Agricultural and Construction equipment and Trucks and Commercial Vehicles (Fiat Industrial Group, since the January 2011 demerger and transfer, which has been described in depth in the Report on Operations), real estate services (C&W Group), tourism (Alpitour Group) and professional soccer (Juventus Football Club).
Further information is provided in the Report on Operations under "EXOR Group Profile".

It should be noted that EXOR S.p.A. is the name that the former company IFI S.p.A. assumed on March 1, 2009, the effective date of the merger by incorporation of the subsidiary IFIL S.p.A. (hereinafter the "Merger").

SIGNIFICANT ACCOUNTING POLICIES

Basis of preparation

The consolidated financial statements of the EXOR Group at December 31, 2010 have been prepared in accordance with the International Financial Reporting Standards (the "IFRS") issued by the International Accounting Standards Board ("IASB") and adopted by the European Union, and with the provisions implementing article 9 of Legislative Decree 38/2005. The designation "IFRS" also includes all valid International Accounting Standards ("IAS"), as well as all interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), formerly the Standing Interpretations Committee ("SIC").

The 2010 consolidated financial statements are prepared under the historical cost convention, modified as required for the valuation of certain financial instruments, as well as on the going concern assumption. In this respect, despite operating in a continuingly difficult economic and financial environment, the Group companies' assessment is that no material uncertainties (as defined in paragraph 25 of IAS 1) exist about their ability to continue as a going concern.

The consolidated financial statements of the EXOR Group are presented in millions of Euro, which is the function and presentation currency of the Group.

Consolidation of the Fiat Group

Upon first-time adoption of IFRS and the preparation of the financial statements for the years 2005 to 2009, EXOR excluded the Fiat Group from line-by-line consolidation and accounted for its investment (approximately 30% of ordinary share capital) using the equity method.
This method has been adopted and maintained consistently in the consolidated financial statements for the years indicated while waiting for the definitive clarification of the criteria to permit verification of de facto control and the related accounting treatment in accordance with IAS 27 – *Consolidated and Separate Financial Statements* then in effect.

The current interpretation of de facto control, based also on the latest version of the Staff Draft posted to the IASB website on September 29, 2010 of the forthcoming IFRS 10 - "*Consolidated Financial Statements*", requires line-by-line consolidation pursuant to IAS 27 to be extended to companies in which the investor holds the majority of voting rights and the size of such majority, combined with the dispersion of the votes of the other vote holders, gives the investor the power to direct the investee's operating and financial policies in such a manner for them to be considered subsidiaries to be consolidated line-by-line. On such bases, believing that the suppositions existed, also in light of EXOR's incidence in the capital present and voting in recent

shareholders' meetings of Fiat S.p.A., EXOR has consolidated the Fiat Group line-by-line in its consolidated financial statements starting from the year 2010 and restated the consolidated financial statements for the year 2009 presented for comparative purposes.
Therefore, in the consolidated financial statements, besides the data for the year 2010 and those published in 2009, the 2009 restated data in which the Fiat Group is consolidated line-by-line is presented for comparative purposes. It should be noted that the January 1, 2009 statement of financial position restated on a line-by-line consolidation basis is not presented because of the impracticality of obtaining such data in a timely manner.

The line-by-line consolidation of the Fiat Group did not cause any change in the previously published data relating to the consolidated result for the year 2009 and the consolidated equity at December 31, 2009 attributable to the Owners of the Parent EXOR in that the investment in the Fiat Group was accounted for using the equity method which synthetically produces the same effect on the results mentioned above as line-by-line consolidation.

The following are reconciliations between the 2009 published and restated consolidated income statements and statements of financial position

EXOR GROUP – RESTATED CONSOLIDATED FINANCIAL STATEMENT

(a) Reclassified according to the new consolidated statement of financial position format adopted in 2010 following the consolidation of the Fiat Group.
(b) Prepared by consolidating the Fiat Group line-by-line for comparative purposes.

Format of the financial statements

As a result of consolidating the Fiat Group line-by-line, beginning in 2010, the EXOR Group presents an income statement using a classification based on the function of expenses (otherwise known as the "cost of sales" method), rather than based on their nature, as the Fiat Group, the main subsidiary, believes that this provides information that is more relevant. The format selected is that used for managing the business and for management reporting purposes by Fiat Group and is consistent with international practice in the automotive sector. In this income statement, in which the classification of expenses is based on their function, the Trading profit/(loss) is reported specifically as part of Operating profit/(loss) and separate from the income and expense resulting from the non-recurring operations of the business, such as Gains (losses) on the disposal of investments, Restructuring costs and any Other income (expense) defined as unusual and of a similar nature to these items. By doing this, it is believed that the Group's actual performance from normal trading operations may be measured in a better way, while disclosing specific details of unusual income and expenses.

Consequently, the definition of unusual transaction adopted by the EXOR Group differs from that provided in the Consob Communication of July 28, 2006, under which unusual and abnormal transactions are those which, because of their significance or importance, the nature of the parties involved, the object of the transaction or the methods of determining the transfer price or the timing of the event (close to the year-end), may give rise to doubts regarding the accuracy/completeness of the information in the financial statements, conflicts of interest, the safeguarding of an entity's assets or the protection of non-controlling interests.

For the statement of financial position, a mixed format has been selected to present current and non-current assets and liabilities, as permitted by IAS 1. In more detail, both companies carrying out industrial activities and those carrying out financial activities in the Fiat Group are consolidated in the EXOR Group's financial statements. The investment portfolios of financial services companies of the Fiat Group are included in current assets, as the investments will be realized in their normal operating cycle. The financial services companies of the Fiat Group, though, obtain funds only partially from the market: the remaining are obtained from Fiat S.p.A. through the Fiat Group's treasury companies (included in industrial companies), which lend funds both to industrial companies and to financial services companies as the need arises. This financial service structure within the Fiat Group means that any attempt to separate current and non-current debt in the consolidated statement of financial position cannot be meaningful, also at the EXOR level. Suitable disclosure of the due dates of liabilities is moreover provided in the notes.

The statement of cash flows is presented using the indirect method.

The other subsidiaries operating mainly in the services sector (Alpitour Group and C&W Group) as well as Juventus Football Club, EXOR and the other companies in the Holdings System have provided their data according to such formats for the consolidation reporting purposes of the EXOR Group.

In connection with the requirements of the Consob Resolution 15519 of July 27, 2006 as to the format of the financial statements, specific supplementary income statement, statement of financial position and statement of cash flows formats have been added for related party transactions so as not to compromise an overall reading of the statements.

Basis of consolidation

Subsidiaries

Subsidiaries are enterprises controlled by the Group, as defined in IAS 27 – *Consolidated and Separate Financial Statements*. Control exists when the Group has the power, directly or indirectly, to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities. The financial statements of subsidiaries are combined in the consolidated financial statements from the date that control commences until the date that control ceases. Non-controlling interests in the net assets of consolidated subsidiaries and non-controlling interests in the profit or loss of consolidated subsidiaries are presented separately from the interests of the owners of the parent in the consolidated statement of financial position and income statement respectively. Losses applicable to non-controlling interests which exceed the minority's interests in the subsidiary's equity are allocated against the non-controlling interests.

Subsidiaries that are either dormant or generate a negligible volume of business, are not consolidated. Their impact on the Group's assets, liabilities, financial position and profit/(loss) attributable to the Owners of the Parent is immaterial.

The effects arising from the subscription of capital increases at different issue prices for different classes of stocks, as well as the increases/decreases in the interests held in subsidiaries, are recognized in equity.

Jointly controlled entities

Jointly controlled entities are enterprises over whose activities the Group has joint control, as defined in IAS 31 – *Interests in Joint Ventures*. The consolidated financial statements include the Group's share of the earnings of jointly controlled entities using the equity method from the date that joint control commences until the date that joint control ceases.

Associates

Associates are enterprises over which the Group has significant influence, but not control or joint control, over the financial and operating policies, as defined in IAS 28 – *Investments in Associates*. The consolidated financial statements include the Group's share of the earnings of associates using the equity method, from the date that significant influence commences until the date that significant influence ceases. When the Group's share of losses of an associate, if any, exceeds the carrying amount of the associate in the Group's balance sheet, the carrying amount is reduced to nil and recognition of further losses is discontinued except to the extent that the Group has incurred obligations in respect of the associate.

Investments in other companies

Investments in other companies that are available-for-sale financial assets are measured at fair value, when this can be reliably determined. Gains or losses arising from changes in fair value are recognized directly in other comprehensive income until the assets are sold or are impaired, when the cumulative gains and losses previously recognized in other comprehensive income are recognized in the income statement of the period.
Investments in other companies for which fair value is not available are stated at cost less any impairment losses.

Dividends received from these investments are included in other income (expense) from investments.

Transactions eliminated on consolidation

All significant intragroup balances and transactions and any unrealized gains and losses arising from intragroup transactions are eliminated in preparing the consolidated financial statements. Unrealized gains and losses arising from transactions with associates and jointly controlled entities are eliminated to the extent of the Group's interest in those entities.

Foreign currency transactions

Transactions in foreign currencies are recorded at the foreign exchange rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the exchange rate prevailing at that date. Exchange differences arising on the settlement of monetary items or on reporting monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements, are recognized in the income statement.

Consolidation of foreign entities

All assets and liabilities of foreign consolidated companies with a functional currency other than the Euro are translated using the exchange rates in effect at the balance sheet date. Income and expenses are translated at the average exchange rate for the period. Translation differences resulting from the application of this method are classified as equity until the disposal of the investment. Average rates of exchange are used to translate the cash flows of foreign subsidiaries in preparing the consolidated statement of cash flows.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are recorded in the relevant functional currency of the foreign entity and are translated using the period end exchange rate.

The principal exchange rates used in 2010 and 2009 to translate into Euro the financial statements prepared in currencies other than the Euro were as follows:

	Average 2010	**At December 31, 2010**	Average 2009	At December 31, 2009
U.S. dollar	**1.326**	**1.336**	1.395	1.441
Pound sterling	**0.858**	**0.861**	0.891	0.888
French franc	**1.380**	**1.250**	1.510	1.484
Polish zloty	**3.995**	**3.975**	4.328	4.105
Brazilian real	**2.331**	**2.218**	2.767	2.511
Argetine peso	**5.183**	**5.303**	5.201	5.473

In the context of IFRS First-time Adoption, the cumulative translation difference arising from the consolidation of foreign operations outside the Euro zone was set at nil, as permitted by IFRS 1; gains or losses on subsequent disposal of any foreign operation only include accumulated translation differences arising after January 1, 2004.

Business combinations

Business combinations are accounted for by applying the acquisition method. Under this method, the consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred and liabilities assumed by the Group and the equity interests issued in exchange for control of the acquiree. Acquisition-related costs are generally recognized in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognized at their fair value at that date, except for the following which are measured in accordance with the relevant standard:

- deferred tax assets and liabilities;
- assets and liabilities relating to employee benefit arrangements;
- liabilities or equity instruments relating to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquiree;
- assets (or disposal Groups) that are classified as held for sale.

Goodwill is measured as the excess of the aggregate of the consideration transferred in the business combination, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the aggregate of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognized immediately in profit or loss as a bargain purchase gain.

Non-controlling interest is initially measured either at fair value or at the non-controlling interest’s proportionate share of the acquiree's identifiable net assets. The selection of the measurement method is made on a transaction-by-transaction basis.

Any contingent consideration arrangement in the business combination is measured at its acquisition-date fair value and included as part of the consideration transferred in the business combination in order to determine goodwill. Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are recognized retrospectively, with corresponding adjustments to goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the ‘measurement period’ (which may not exceed one year from the acquisition date) about facts and circumstances that existed as of the acquisition date.

When a business combination is achieved in stages, the Group's previously held equity interest in the acquiree is remeasured at its acquisition-date fair value and the resulting gain or loss, if any, is recognized in profit or loss. Changes in the equity interest in the acquiree that have been recognized in Other comprehensive income in prior reporting periods are reclassified to profit or loss as if the interest had been disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete in the consolidated financial statements. Those provisional amounts are adjusted during the measurement period to reflect new information obtained about facts and circumstances that existed at the acquisition date which, if known, would have affected the amounts recognized at that date.

Business combinations that took place prior to January 1, 2010 were accounted for in accordance with the previous version of IFRS 3.

Date of reference

The investments are consolidated using the financial statements at December 31, the closing date of EXOR, which covers a 12-month period, or accounting data prepared as of the same date (when the closing date differs from that of EXOR), adjusted, where necessary, to conform with the accounting principles of the Group. The Alpitour Group, which fiscal year ends on October 31 of each year, is consolidated line-by-line on the basis of the consolidated financial statements ended on that date, since it is impossible to obtain the consolidated accounting data at December 31, on a timely basis without disproportionate expense. Between November 1 and December 31, 2009 and 2010, there were no significant transactions or events which would have required adjustments to the consolidated financial statements of the Alpitour Group. This treatment is allowed by IAS 27 – *Consolidated and Separate Financial Statements*.

Intangible assets

Goodwill

Goodwill arising on business combinations is initially measured at cost as established at the acquisition date, as defined in the paragraph "Business combinations".
Goodwill, if any, relating to the non-controlling interests' share of subsidiaries acquired under the previous version of IFRS 3 are eliminated.

Goodwill is not amortized, but is tested for impairment annually or more frequently if events or changes in circumstances indicate that it might be impaired. After initial recognition, goodwill is measured at cost less any accumulated impairment losses.

On disposal of part or whole of a business which was previously acquired and which gave rise to the recognition of goodwill, the remaining amount of the related goodwill is included in the determination of the gain or loss on disposal. In the event of the sale of non-controlling quotas, goodwill is not modified.

In the context of IFRS First-time Adoption, the Group elected not to apply IFRS 3 – *Business Combinations* retrospectively to the business combinations that occurred before January 1, 2004; as a consequence, goodwill arising on acquisitions before the date of transition to IFRS has been retained at the previous Italian GAAP amounts, subject to impairment testing at that date.

Development

Development costs for vehicle project production (cars, trucks, buses, agricultural and construction equipment, related components, engines, and production systems) are recognized as an asset if and only if both of the following conditions are met: that development costs can be measured reliably and that technical feasibility of the product, volumes and pricing support the view that the development expenditure will generate future economic benefits. Capitalized development costs include all direct and indirect costs that may be directly attributed to the development process.

Capitalized development costs are amortized on a systematic basis from the start of production of the related product over the product‘s estimated average life, as follows:

	No. of years
Cars	4-5
Trucks and Buses	8
Agricultural and Construction Equipment	5
Engines	8-10
Components and Production Systems	3-5

All other development costs are expensed as incurred.

Intangible assets with indefinite useful lives

Intangible assets with indefinite useful lives consist principally of acquired trademarks which have no legal, contractual, competitive, economic, or other factors that limit their useful lives. Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually or more frequently whenever there is an indication that the asset may be impaired.

Players’ registration rights

Players' registration rights are intangible assets with a finite useful life equal to the duration of the players' contracts signed with the players. The players' registration rights are recorded at cost discounted to present value, including any incidental expenses.

Players' registration rights are amortized on a straight-line basis over the term of the contracts between the company and each individual player. The original amortization plan can be extended following the early renewal of the contract, starting from the same season in which the contract is renewed. For youth players registered as “giovani di serie”, amortization is taken over five years on a straight-line basis.

Players' registration rights are recognized on the date affixed by the National Professional League giving execution to the contracts for national transfers and the transfer date indicated by the Italian Soccer Federation for international transfers.

Players' registration rights also include “sharing receivables and payables ex. art 102-bis of the N.O.I.F. (Internal Organizational Rules issued by the Italian Soccer Federation – F.I.G.C.)”.

Player sharing receivables represent the value of the simultaneous repurchase of 50% of the registration rights of the players sold. They are recognized at the adjusted cost and are not amortized as they are used by other companies. Player sharing receivables are written down when the estimated remaining useful life at the end of the sharing period is permanently below the amount recognized. Adjusted cost is the lower of the cost incurred originally under the legal form of agreement between the parties and the actual repurchase value.

Player sharing payables represent the value of the sale of 50% of the registration rights of the players sold. They are recognized at nominal value as a deduction from the value of the registration rights of the player sold to show the actual purchase value. As a result, the amortization of the players' registration rights sold relating to the player sharing agreement is calculated on that lower cost.

When there are indications of an impairment in the players' registration rights (for example, serious injury or significant losses from disposals made subsequent to the reporting date) an impairment loss is recorded for the remaining carrying amount.

Other intangible assets

Other purchased and internally-generated intangible assets are recognized as assets in accordance with IAS 38 – *Intangible Assets*, where it is probable that the use of the asset will generate future economic benefits and where the costs of the asset can be determined reliably.
Such assets are measured at purchase or manufacturing cost and amortized on a straight-line basis over their estimated useful lives, if these assets have finite useful lives.
Other intangible assets acquired as part of the acquisition of a business are capitalized separately from goodwill if their fair value can be measured reliably.

Property, plant and equipment

Cost

Property, plant and equipment are stated at acquisition or production cost and are not revalued.

Subsequent expenditures and the cost of replacing parts of an asset are capitalized only if they increase the future economic benefits embodied in that asset. All other expenditures are expensed as incurred. When such replacement costs are capitalized, the carrying amount of the parts that are replaced is recognized in the income statement.

Property, plant and equipment also include vehicles sold with a buy-back commitment, which are recognized according to the method described in the paragraph Revenue recognition if the buy-back commitment originates from the Trucks and Commercial Vehicles sector.

Assets held under finance leases, which provide the Group with substantially all the risks and rewards of ownership, are recognized as assets of the Group at their fair value or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the financial statement as a debt. The assets are depreciated by the method and at the rates indicated below.

Leases where the lessor retains substantially all the risks and rewards of ownership of the assets are classified as operating leases. Operating lease expenditures are expensed on a straight-line basis over the lease terms.

Depreciation

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

	Fiat Group Depreciation rate		C&W Group Depreciation rate		Alpitour Group Depreciation rate		Juventus F.C. Depreciation rate		Holdings System Depreciation rate	
%	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum
Buildings	2.5%	10.0%			2.0%	10.0%	3.0%	10.0%		
Plant and machinery	5.0%	20.0%			10.0%	30.0%	10.0%	19.0%	3.0%	20.0%
Industrial and commercial equipment	15.0%	25.0%			7.5%	25.0%				
Other assets	10.0%	33.0%	14.0%	33.0%	5.0%	30.0%	12.0%	25.0%	12.0%	20.0%

Land is not depreciated.

Leased assets

Leased assets include vehicles leased to retail customers by the Group's leasing companies under operating lease arrangements. They are stated at cost and depreciated at annual rates of between 20% and 33%.
When such assets cease to be rented and become held for sale, the Group reclassifies their carrying amount to Inventories.

Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets (as defined under IAS 23 – *Borrowing Costs*), which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are capitalized and amortized over the useful life of the class of assets to which they refer.
All other borrowing costs are expensed when incurred.

Impairment of assets

The Group reviews, at least annually, the recoverability of the carrying amount of intangible assets (including capitalized development costs) and property, plant and equipment, in order to determine whether there is any indication that those assets have suffered an impairment loss. If indications of impairment are present, the carrying amount of the asset is reduced to its recoverable amount. An intangible asset with an indefinite useful life is tested for impairment annually or more frequently, if there is an indication that the asset may be impaired.
Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

The recoverable amount of an asset is the higher of fair value less disposal costs and its value in use. In assessing its value in use, the pre-tax estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is recognized when the recoverable amount is lower than the carrying amount.

Where an impairment loss for assets other than goodwill subsequently no longer exists or has decreased, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but not in excess of the carrying amount that would have been recorded had no impairment loss been recognized. A reversal of an impairment loss is recognized in the income statement immediately.

Financial instruments

Presentation

Financial instruments held by the Group are presented in the financial statements as described in the following paragraphs.

Investments and other non-current financial assets comprise investments in unconsolidated companies and other non-current financial assets (held-to-maturity securities, non-current loans and receivables and other non-current available-for-sale financial assets).

Current financial assets, as defined in IAS 39, include trade receivables, receivables from financing activities (retail financing, dealer financing, lease financing and other current loans to third parties), current securities (stocks, credit instruments and other forms of liquid investments, derivative financial instruments for trading) and other current financial assets (which include derivative financial instruments stated at fair value as assets), as well as cash and cash equivalents.

In particular, cash and cash equivalents include cash at banks, units in liquidity funds and other money market securities that are readily convertible into cash and are subject to an insignificant risk of changes in value.

Current securities include short-term or marketable securities which represent temporary investments of available funds and do not satisfy the requirements for being classified as cash equivalents; current securities include both available-for-sale and held for trading securities.

Financial liabilities refer to debt, which includes asset-backed financing, and other financial liabilities (which include derivative financial instruments stated at fair value as liabilities), trade payables and other payables.

Measurement

Investments in unconsolidated companies classified as non-current financial assets are accounted for as described in the section Basis of consolidation.

Non-current financial assets other than investments, as well as current financial assets and financial liabilities, are accounted for in accordance with IAS 39 – *Financial Instruments: Recognition and Measurement*.
Bonds with mandatory conversion into stock are recognized by separating the bond component from the embedded derivative represented by the obligation to convert the bonds into the stock of the issuer at an established maturity date.
At initial recognition, the component represented by the bond is calculated by discounting the cash flows of the instrument to present value using the market rate of a non-convertible bond, recording the embedded derivative as the difference from the price paid.
Subsequently, the bond component is measured at amortized cost whereas the embedded derivative is measured at fair value with a corresponding entry to the income statement.
Current financial assets and held-to-maturity securities are recognized on the basis of the settlement date and, on initial recognition, are measured at acquisition cost, including transaction costs.

Subsequent to initial recognition, available-for-sale and held for trading financial assets are measured at fair value. When market prices are not available, the fair value of available-for-sale financial assets is measured using appropriate valuation techniques e.g. discounted cash flow analysis based on market information available at the balance sheet date.

Gains and losses on available-for-sale financial assets are recognized directly in other comprehensive income until the financial asset is disposed or is determined to be impaired; when the asset is disposed of, the cumulative gains or losses, including those previously recognized in other comprehensive income, are reclassified to the income statement for the period; when the asset is impaired, accumulated losses are recognized in the income statement. Gains and losses arising from changes in the fair value of held for trading financial instruments are included in the income statement for the period.

Loans and receivables which are not held by the Group for trading (loans and receivables originating in the course of business), held-to-maturity securities and all financial assets for which published price quotations in an active market are not available and whose fair value cannot be determined reliably, are measured, to the extent that they have a fixed term, at amortized cost, using the effective interest method. When the financial assets do not have a fixed term, they are measured at acquisition cost. Receivables with maturities of over one year which bear no interest or have an interest rate significantly lower than market rates are discounted using market rates.

Assessments are made regularly as to whether there is any objective evidence that a financial asset or Group of assets may be impaired. If any such evidence exists, an impairment loss is included in the income statement for the period.

Except for derivative instruments, financial liabilities are measured at amortized cost using the effective interest method.
Financial assets and liabilities hedged by derivative instruments are measured in accordance with hedge accounting principles applicable to fair value hedges.

Derivative financial instruments

Derivative financial instruments are used for hedging purposes, in order to reduce currency, interest rate and market price risks. In accordance with IAS 39, derivative financial instruments qualify for hedge accounting only when at the inception of the hedge there is formal designation and documentation of the hedging relationship, the hedge is expected to be highly effective, its effectiveness can be reliably measured and it is highly effective throughout the financial reporting periods for which it is designated.

All derivative financial instruments are measured in accordance with IAS 39 at fair value.
When derivative financial instruments qualify for hedge accounting, the following accounting treatment applies:

- *Fair value hedges* – Where a derivative financial instrument is designated as a hedge of the exposure to changes in fair value of a recognized asset or liability that is attributable to a particular risk and could affect the income statement, the gain or loss from remeasuring the hedging instrument at fair value is recognized in the income statement. The gain or loss on the hedged item attributable to the hedged risk adjusts the carrying amount of the hedged item and is recognized in the income statement.

- *Cash flow hedges* – Where a derivative financial instrument is designated as a hedge of the exposure to variability in future cash flows of a recognized asset or liability or a highly probable forecasted transaction and could affect the income statement, the effective portion of any gain or loss on the derivative financial instrument is recognized directly in other comprehensive income. The cumulative gain or loss is removed from other comprehensive income and recognized in the income statement at the same time as the economic effect arising from the hedged item affects income. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in other comprehensive income and is recognized in the income statement at the same time as the underlying transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in other comprehensive income is recognized in the income statement immediately.

- *Hedges of a net investment* – If a derivative financial instrument is designated as a hedging instrument for a net investment in a foreign operation, the effective portion of the gain or loss on the derivative financial instrument is recognized in other comprehensive income. The cumulative gain or loss is reclassified from other comprehensive income to profit or loss on the disposal of the foreign operation.

If hedge accounting cannot be applied, the gains or losses from the fair value measurement of derivative financial instruments are recognized immediately in the income statement.

Sales of receivables

The Group sells a significant part of its financial, trade and tax receivables through either securitization programs or factoring transactions.

A securitization transaction entails the sale of a portfolio of receivables to a securitization vehicle. This special purpose entity finances the purchase of the receivables by issuing asset-backed securities (i.e. securities whose repayment and interest flow depend upon the cash flow generated by the portfolio). Asset-backed securities are divided into classes according to their degree of seniority and rating: the most senior classes are placed with investors on the market; the junior class, whose repayment is subordinated to the senior classes, is normally subscribed for by the seller. The residual interest in the receivables retained by the seller is therefore limited to the junior securities it has subscribed for. In accordance with SIC 12 – Consolidation – Special Purpose Entities (SPE), all securitization vehicles are included in the scope of consolidation, because the subscription of the junior asset-backed securities by the seller entails its control in substance over the SPE.

Furthermore, factoring transactions may be with or without recourse to the seller; certain factoring agreements without recourse include deferred purchase price clauses (i.e. the payment of a minority portion of the purchase price is conditional upon the full collection of the receivables), require a first loss guarantee of the seller up to a limited amount or imply a continuing significant exposure to the receivables cash flow. These kinds of transactions do not meet IAS 39 requirements for asset derecognition, since the risks and rewards have not been substantially transferred.

Consequently, all receivables sold through both securitization and factoring transactions which do not meet IAS 39 derecognition requirements are recognized as such in the Group financial statements even though they have been legally sold; a corresponding financial liability is recorded in the consolidated statement of financial position as Asset-backed financing. Gains and losses relating to the sale of such assets are not recognized until the assets are removed from the Group statement of financial position.

Inventories

Inventories of raw materials, semifinished products and finished goods, (including assets leased out under operating leases and assets sold under a buy-back commitment that are held for sale) are stated at the lower of cost and net realizable value, cost being determined on a first in-first-out (FIFO) basis. The measurement of inventories includes the direct costs of materials, labor and indirect costs (variable and fixed). Provision is made for obsolete and slow-moving raw materials, finished goods, spare parts and other supplies based on their expected future use and realizable value. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs for sale and distribution.

The measurement of construction contracts is based on the stage of completion determined as the proportion that cost incurred to the balance sheet date bears to the estimated total contract cost. These items are presented net of progress billings received from customers. Any losses on such contracts are fully recorded in the income statement when they become known.

Assets and liabilities held for sale and Discontinued operations

Non-current assets and disposal Groups are classified as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the non-current asset (or disposal Group) is available for immediate sale in its present condition.

When the Group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Group will retain a non-controlling interest in its former subsidiary after the sale.

Non-current assets and disposal Groups classified as held for sale are measured at the lower of their carrying amounts and fair value less costs to sell.

Employee benefits

Pension plans

Employees of the Group participate in several defined benefit and/or defined contribution pension plans in accordance with local conditions and practices in the countries in which the Group operates.

The Group's obligation to fund defined benefit pension plans and the annual cost recognized in the income statement are determined on an actuarial basis using the projected unit credit method. Following the consolidation of the Fiat Group, the EXOR Group adopted the “corridor approach”, meaning that the portion of net cumulative actuarial gains and losses which exceeds the greater of 10% of the present value of the defined benefit obligation and 10% of the fair value of plan assets at the end of the previous year is amortized over the average remaining service lives of the employees. The effects of the adoption of the corridor approach on the EXOR Group are not significant. In the context of IFRS First-time Adoption, the Group elected to recognize all cumulative actuarial gains and losses that existed at January 1, 2004, even though it had decided to use the corridor approach for subsequent actuarial gains and losses.

The post-employment benefit obligation recognized in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognized actuarial gains and losses, arising from the application of the corridor method and unrecognized past service cost, reduced by the fair value of plan assets. Any net asset resulting from this calculation is recognized at the lower of its amount and the total of any cumulative unrecognized net actuarial losses and past service cost, and the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

If changes are made to a plan that alter the benefits due for past service or if a new plan is introduced regarding past service then past service costs are recognized in the income statement on a straight-line basis over the average period remaining until the benefits become vested. If a change is made to a plan that significantly reduces the number of employees who are members of the plan or that alters the conditions of the plan such that employees will no longer be entitled to the same benefits for a significant part of their future service, or if such benefits will be reduced, the profit or loss arising from such changes is immediately recognized in the income statement.

All other costs and income arising from the measurement of pension plan provisions are allocated to costs by function in the income statement, except for interest cost on unfunded defined benefit plans which is reported as part of financial expenses.
Costs arising from defined contribution plans are recognized as an expense in the income statement as incurred.

Post-employment plans other than pensions

The Group provides certain post-employment defined benefits, mainly health care plans. The method of accounting and the frequency of valuations are similar to those used for defined benefit pension plans.

The scheme underlying the employee leaving entitlements in Italy of the Italian Group companies (the TFR) was classified as a defined benefit plan until December 31, 2006. The legislation regarding this scheme and leading to this classification was amended by Law 296 of December 27, 2006 (the “2007 Finance Law”) and subsequent decrees and regulations issued in the first part of 2007. In view of these changes, and with specific reference to those regarding companies with at least 50 employees, this scheme only continues to be classified as a defined benefit plan in the consolidated financial statements for those benefits accruing up to December 31, 2006 (and not yet settled by the balance sheet date), while after that date the scheme is classified as a defined contribution plan.

Equity compensation plans

Some companies of the Group provide additional benefits to certain members of senior management and employees through equity compensation plans (stock option plans and stock grants). In accordance with IFRS 2 – *Share-based Payment*, these plans represent a component of recipient remuneration. The compensation expense, corresponding to the fair value of the instruments at the grant date, is recognized in the income statement on a straight-line basis over the period from the grant date to the vesting date, with the offsetting credit recognized directly in equity. Any subsequent changes to fair value do not have any effect on the initial measurement.

In the event the plans require a monetary payment equal to the increase in the value of the shares or quotas of the related companies, the fair value of the liability of the plan is re-measured at each reporting date until its extinction and the change is recognized in the income statement.

Provisions

The Group records provisions when it has an obligation, legal or constructive, to a third party, when it is probable that an outflow of Group resources will be required to satisfy the obligation and when a reliable estimate of the amount can be made.

Changes in estimates are reflected in the income statement in the period in which the change occurs.

Treasury shares

The cost of any treasury stock purchased and/or held, also through subsidiaries, as a result of specific shareholder resolutions are recognized as a deduction from equity. Therefore, the reserve offsetting treasury stock in portfolio is not shown separately. The proceeds from any subsequent sale are recognized as movements in equity.

Revenue recognition

Fiat Group

Revenue is recognized if it is probable that the economic benefits associated with a transaction will flow to the Group and the revenue can be measured reliably. Revenues are stated net of discounts, allowances, settlement discounts and rebates, as well as costs for sales incentive programs, determined on the basis of historical costs, country by country, and charged against profit for the period in which the corresponding sales are recognized. The Group's sales incentive programs include the granting of retail financing at significant discount to market interest rates. The corresponding cost is recognized at the time of the initial sale.

Revenues from the sale of products are recognized when the risks and rewards of ownership of the goods are transferred to the customer, the sales price is agreed or determinable and receipt of payment can be assumed: this corresponds generally to the date when the vehicles are made available to non-group dealers, or the delivery date in the case of direct sales. New vehicle sales with a buy-back commitment are not recognized at the time of delivery but are accounted for as operating leases when it is probable that the vehicle will be bought back. More specifically, vehicles sold with a buy-back commitment are accounted for as assets in Inventories if the sale originates from the Fiat Group Automobiles business (agreements with normally a short-term buy-back commitment); and are accounted for in property, plant and equipment, if the sale originates from the Commercial Vehicles business (agreements with normally a long-term buy-back commitment). The difference between the carrying value (corresponding to the manufacturing cost) and the estimated resale value (net of refurbishing costs) at the end of the buy-back period is depreciated on a straight-line basis over the same period. The initial sale price received is recognized as an advance payment (liability). The difference between the initial sale price and the buy-back price is recognized as rental revenue on a straight-line basis over the term of the operating lease. Assets sold under a buy-back commitment that are initially recognized in property, plant and equipment are reclassified to Inventories at the end of the agreement term if they are held for sale. The proceeds from the sale of such assets are recognized as revenues.
Revenues from services and from construction contracts are recognized by reference to the stage of completion.

Revenues also include lease rentals and interest income from financial services companies.

C&W Group

C&W Group recognizes revenues rendered for the services lines including: Leasing, Capital Markets, Corporate Occupier and Investor Services, Valuation & Advisory and Corporate Real Estate Business Consulting Services.
Revenues under Leasing (real estate sales and leases) are recognized when executed and the amount can be measured reliably, unless significant material future contingencies exist, in which case they are recognized when the contingency is resolved.
Revenues of Capital Markets are recognized when the contract is closed.
Revenues of Corporate Occupier & Investor Solutions are recognized as the services are being rendered.
Revenues for Valuation & Advisory and Global Business Consulting activities are recognized when the service has been completed or as the services are being rendered.
The C&W Group recognizes certain reimbursements (primarily salaries and related charges) mainly related to the facilities and property management operations as revenue when the underlying reimbursable costs are incurred.

Alpitour Group

Sales of tourist packages, airplane transportation services and brokering revenues are recognized based on the clients' departure date.
Revenues for hotel services and services rendered in connection with the incoming sector are recognized in the income statement at the service performance date.
Premiums connected with reinsurance activities are recognized in the income statement on the client's departure date since the insurance coverage is strictly related to the travel package.

Juventus Football Club
Revenues from games, from radio and television rights and media revenues are recognized at the actual moment of the event (when the game is played). Revenues from season tickets are recognized when the tickets are paid even if payment is received at the end of the season preceding the season to which the tickets refer and are deferred on the accrual basis using the same principle (when the game is played).
Revenues from the performance of services (including sponsorships) are recognized on the basis of the stage of completion of the service or upon completion of the service.
Revenues are recorded net of returns, discounts and allowances.
Gains and losses from the sale of players' registration rights are recognized according to the date affixed by the National Professional League giving execution to the contracts for national transfers and the transfer date indicated by the Italian Soccer Federation for international transfers.
Gains from the sale of players' registration rights, in which 50% is simultaneously repurchased, are adjusted for 50% of their amount in order to recognize in the income statement the income accrued for the portion of the deferred rights actually transferred through the sale. The remaining amount of the gain, instead, will only be realized upon termination of the player-sharing agreement when the player leaves the company. If there is a loss on the sale of the players' right which precedes the signing of the player sharing contract, this loss, on the contrary, is not adjusted for IFRS purposes. This is due to the fact that the loss is comparable to the effect of an impairment test of the deferred right, under the assumption that the moment in time in which the right is disposed of represents the moment in which that loss arose.

Cost of sales

Fiat Group
Cost of sales comprises the manufacturing cost of products and the acquisition cost of purchased merchandise which have been sold. It includes all directly attributable material and production costs and all production overheads. These include the depreciation of property, plant and equipment and the amortization of intangible assets relating to production and writedowns of inventories. Cost of sales also includes freight and insurance costs relating to deliveries to dealers and agency fees in the case of direct sales.

Cost of sales also includes provisions made to cover the estimated cost of product warranties at the time of sale to dealer networks or to the end customer. Revenues from the sale of extended warranties and maintenance contracts are recognized over the period during which the service is provided.

Expenses which are directly attributable to the financial services businesses, including the interest expense related to the financing of financial services businesses as a whole and charges for risk provisions and writedowns, are reported in cost of sales.

C&W Group
Cost of sales includes expenses that are directly attributable to the generation of revenues. An example is employment costs for employees who perform the underlying services that ultimately generate revenues and reimbursed costs relating to managed properties.

Alpitour Group
The types of costs included in cost of sales by the Alpitour Group are divided by business sector:
- Tour Operating: ground service costs, flights and transportation and other costs connected with performing tourist services, commissions paid to travel agencies, personnel costs relating to the product, advertising and promotion strictly connected to promotional activities involving the product, printing and shipment of catalogs, provision relating to the technical reserve connected with reinsurance activities and travel vouchers and commercial exchange differences;
- Hotel: all the operating costs connected with hotel activities, personnel relating to management of the hotels and resorts, amortization of marketing rights, amortization and lease installments relating to hotel resorts, commercial exchange differences, local taxes and local taxes on structures;
- Aviation: airport services, landing and fly-over fees net of recoveries, fuel costs and catering services, maintenance costs and aircraft management, dry leases and wet leases, cost of personnel assigned to manage the aircraft, depreciation of aircraft, exchange differences and hedge effects on fuel and leases;

- Distribution: organized trip purchases, costs for the computer network, over-commissions, operating costs linked to the management of agencies, cost of agency personnel, travel agency lease payments and depreciation of owned travel agencies;
- Incoming: costs for hotel services, costs relating to excursions and tours, rent of means of transport and personnel costs.

Juventus Football Club

Cost of sales mainly includes the costs of registered personnel, amortization and writedowns of players' registration rights, operating and maintenance costs of sports facilities, as well as all the costs incurred for sports events.

Research and development costs

This item includes research costs, development costs not eligible for capitalization and the amortization of development costs recognized as assets in accordance with IAS 38.

Government grants

Government grants are recognized in the financial statements when there is reasonable assurance that the company concerned will comply with the conditions for receiving such grants and that the grants themselves will be received. Government grants are recognized as income over the periods necessary to match them with the related costs which they are intended to offset.

The benefit of a government loan at a below-market rate of interest is treated as a government grant. The benefit of the below-market rate of interest is measured as the difference between the initial carrying amount of the loan (fair value plus transaction costs) and the proceeds received, and is accounted for in accordance with the policies already used for the recognition of government grants.

Taxes

Income taxes include all taxes based upon the taxable profits of the Group. Taxes on income are recognized in the income statement except to the extent that they relate to items directly charged or credited to other comprehensive income, in which case the related income tax effect is recognized in other comprehensive income. Provisions for income taxes that could arise on the distribution of a subsidiary's undistributed profits are only made where there is a current intention to distribute such profits. Other taxes not based on income, such as property taxes and capital taxes, are included in operating expenses. Deferred taxes are provided using the full liability method. They are calculated on all temporary differences between the tax base of an asset or liability and the carrying amounts in the consolidated financial statements, except for those arising from non-tax-deductible goodwill and for those related to investments in subsidiaries where reversal will not take place in the foreseeable future. Deferred tax assets relating to the carry-forward of unused tax losses and tax credits, as well as those arising from temporary differences, are recognized to the extent that it is probable that future profits will be available against which they can be utilized. Current and deferred income tax assets and liabilities are offset when the income taxes are levied by the same taxation authority and where there is a legally enforceable right of offset. Deferred tax assets and liabilities are measured at the substantively enacted tax rates in the respective jurisdictions in which the Group operates that are expected to apply to taxable income in the periods in which temporary differences reverse or expire.

Dividends

Dividends payable by the Group are reported as a movement in equity in the period in which they are approved by shareholders in their annual general meeting.

Earnings per share

Basic earnings per share are calculated by dividing the profit/(loss) attributable to owners of the parent entity assignable to the various classes of shares by the weighted average number of shares outstanding during the year. For diluted earnings per share, the weighted average number of shares outstanding is adjusted assuming conversion of all dilutive potential shares.

Use of estimates

The preparation of financial statements and related disclosures that conform to IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results could differ from those estimates. Estimates and assumptions are reviewed periodically and the effects of any changes are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

In this respect the situation caused by the profound economic and financial crisis which began in 2008 has led to the need to make assumptions regarding future performance which are characterized by significant uncertainty; as a consequence, therefore, it cannot be excluded that results may arise during the next year which differ from estimates, and which therefore might require adjustments, even significant, to be made to the carrying amount of the items in question, which at the present moment can clearly neither be estimated nor predicted. The main items affected by these situations of uncertainty are the allowances for doubtful accounts receivable and inventories, non-current assets (tangible and intangible assets), the residual values of vehicles leased out under operating lease arrangements or sold with buy-back clauses, pension funds and other post-employment benefits, and deferred tax assets.

The following are the critical judgments and the key assumptions concerning the future that the Group companies have made in the process of applying the Group accounting policies and that have the most significant effect on the amounts recognized in the consolidated financial statements or that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Fiat Group - Allowance for doubtful accounts

The allowance for doubtful accounts reflects the estimate of losses inherent in the wholesale and retail credit portfolio. This allowance is based on the Group's estimate of the losses to be incurred, which derives from past experience with similar receivables, current and historical past due amounts, dealer termination rates, write-offs and collections, the careful monitoring of portfolio credit quality and current and projected economic and market conditions. Should the present economic and financial situation persist or even worsen, this could lead to a further deterioration in the financial situation of the Group's debtors compared to that already taken into consideration in calculating the allowances recognized in the financial statements.

Fiat Group - Allowance for obsolete and slow-moving inventory

The allowance for obsolete and slow-moving inventory reflects the estimate of the loss in value expected by the Group, and has been determined on the basis of past experience and historical and expected future trends in the used vehicle market. A worsening of the economic and financial situation could cause a further deterioration in conditions in the used vehicle market compared to that already taken into consideration in calculating the allowances recognized in the financial statements.

Fiat Group - Recoverability of non-current assets (including goodwill)

Non-current assets include property, plant and equipment, intangible assets (including goodwill), investments and other financial assets. The Group reviews the carrying value of non-current assets held and used and that of assets to be disposed of when events and circumstances warrant such a review. This review is performed using estimates of future cash flows from the use or disposal of the asset and a suitable discount rate in order to calculate present value. If the carrying amount of a non-current asset is considered impaired, the Group records an impairment loss for the amount by which the carrying amount of the asset exceeds its estimated recoverable amount from use or disposal determined by reference to its most recent business forecasts.

In view of the present economic and financial situation, the Fiat Group has the following considerations in respect of its future prospects:

- In the current situation, when preparing figures for the consolidated financial statements for the year ended December 31, 2010 and more specifically when carrying out impairment testing of tangible and intangible assets, the various sectors of the Group have taken into account their performance for 2011 as forecast in the budgets of the post-demerger Fiat Group and the Fiat Industrial Group, with assumptions and results consistent with the statements made in the section Significant events subsequent to the year end and outlook. In addition, for subsequent years they have taken into account the forecasts and targets included in the Fiat Group's 2010-2014 Strategic Plan presented to the financial community on April 21, 2010. These forecasts did not indicate the need to recognize any significant impairment losses.
- In addition, should the assumptions underlying the forecast deteriorate further the following is noted:

    - The Group's tangible assets and intangible assets with a finite useful life (which essentially regard development costs) relate to models or products having a high technological content in line with the latest environmental laws and regulations, which consequently renders them competitive in the present economic situation, especially in the more mature economies in which particular attention is placed on the eco-sustainability of those types of products. As a result, therefore, despite the fact that the automotive sector is one of the markets most affected by the crisis in the immediate term, it is considered highly probable that the life cycle of these products can be lengthened to extend over the period of time involved in a slower economic recovery, in this way allowing the Group to achieve sufficient earnings flows to cover the investments, albeit over a longer timescale.
    - Around 61% of capitalized goodwill relates to the CNH business and around 27% to Ferrari. In the case of the goodwill relating to the CNH business (€1,794 million at December 31, 2010), detailed analyses using various methodologies were carried out to test its recoverability; the underlying considerations are described in Note 14. As concerns Ferrari, the exclusivity of the business, its historical profitability and its future earnings prospects indicate that the carrying amount will continue to be recoverable, even in the event of economic and market conditions which remain difficult.

Fiat Group - Residual values of assets leased out under operating lease arrangements or sold with a buy-back commitment

The Group reports assets rented to customers or leased to them under operating leases as tangible assets. Furthermore, new vehicle sales with a buy-back commitment are not recognized as sales at the time of delivery but are accounted for as operating leases if it is probable that the vehicle will be bought back. The Group recognizes income from such operating leases on a straight-line basis over the term of the lease. Depreciation expense for assets subject to operating leases is recognized on a straight-line basis over the lease term in amounts necessary to reduce the cost of an asset to its estimated residual value at the end of the lease term. The estimated residual value of leased assets is calculated at the lease inception date on the basis of published industry information and historical experience.

Realization of the residual values is dependent on the Group's future ability to market the assets under the then-prevailing market conditions. The Group continually evaluates whether events and circumstances have occurred which impact the estimated residual values of the assets on operating leases. More specifically the Group recognized further writedowns in 2009, in addition to those usually made on the basis of historical trends in residual values, to take account of the sudden deterioration in the used vehicle market over the final part of 2008 and throughout the whole of 2009. The used vehicle market was carefully monitored throughout 2010 to ensure that writedowns were properly determined. It cannot however be excluded that additional writedowns may be needed if market conditions should deteriorate even further.

Fiat Group - Sales allowances

At the later of the time of sale or the time an incentive is announced to dealers, the Group records the estimated impact of sales allowances in the form of dealer and customer incentives as a reduction of revenue. There may be numerous types of incentives available at any particular time. The determination of sales allowances requires estimates based on different factors.

Fiat Group - Product warranties

The Group makes provisions for estimated expenses related to product warranties at the time products are sold. These estimates are based on historical information on the nature, frequency and average cost of warranty claims. The Group seeks to improve vehicle quality and minimize warranty expenses arising from claims.

Fiat Group - Pension and other post-retirement benefits

Group companies sponsor pension and other post-retirement benefits in various countries. The Group's main defined benefit plans are to be found in the United Kingdom, Germany and Italy, as well as the United States, particularly in the CNH Group companies. Several statistical and judgmental factors are used that attempt to anticipate future events in calculating the expense, the liability and the assets related to these plans. These factors include assumptions about the discount rate, expected return on plan assets, rate of future compensation increases and health care cost trend rates. In addition, the Group's actuarial consultants also use subjective factors such as withdrawal and mortality rates in making relevant estimates. Regarding the discount rate, in 2010 yields of high quality corporate bonds were not subject to the same level of volatility as in 2008. It cannot be excluded, though, that future significant changes in the yields of corporate bonds may lead to effects on liabilities and unrecognized actuarial gains and losses, taking into account however any simultaneous changes in the returns of plan assets where these may exist.

Fiat Group - Realization of deferred tax assets

At December 31, 2010, the Group had deferred tax assets and theoretical tax benefits arising from tax loss carryforwards of €7,767 million, of which €2,855 million is not recognized in the financial statements. The corresponding totals at December 31, 2009 were €7,784 million and €3,307 million, respectively. These valuation allowances have been recorded to reduce deferred tax assets to the amount that it believes it is probable will be recovered. In making these adjustments, consideration has been given to figures from budgets and forecasts consistent with those used for impairment testing. Moreover, the adjustments that have been recognized are considered to be sufficient to protect against the risk of a further deterioration of the assumptions in these forecasts, taking account of the fact that the net deferred assets accordingly recognized relate to temporary differences and tax losses which, to a significant extent, may be recovered over a very long period, and are therefore consistent with a situation in which the time needed to exit from the crisis and for an economic recovery to occur extends beyond the term implicit in the above-mentioned estimates.

Fiat Group - Contingent liabilities

The Group is the subject of legal proceedings and tax issues covering a range of matters, which are pending in various jurisdictions. Due to the uncertainty inherent in such matters, it is difficult to predict the final outcome of such matters. The cases and claims against the Group often raise difficult and complex factual and legal issues, which are subject to many uncertainties, including but not limited to the facts and circumstances of each particular case and claim, the jurisdiction and the differences in applicable law. In the normal course of business, legal counsel and certain other experts are consulted on matters related to litigation and taxes. The Group accrues a liability when it is determined that an adverse outcome is probable and the amount of the loss can be reasonably estimated. In the event an adverse outcome is possible or an estimate is not determinable, the matter is disclosed.

Holdings System and the other subsidiaries

The following are the critical judgments made in respect of the Holdings System and the other subsidiaries:

- the impairment test conducted by an independent expert on the investment in Banijay Holding and the embedded derivative relating to the Perfect Vision convertible bonds led to the recognition of a positive fair value reserve of €3 million and an impairment charge of €17 million, respectively;
- the other listed and unlisted investments accounted for at cost or at fair value that were assessed, also supported by an independent expert, gave no indications of impairment;
- the impairment test carried out on the goodwill of C&W Group did not indicate an impairment.

Accounting principles, amendments and interpretations adopted from January 1, 2010

The Group adopted the following standards, amendments and interpretations from January 1, 2010.

IFRS 3 (2008) – Business Combinations

In accordance with the transitional provision of the Standard the Group adopted IFRS 3 (revised in 2008) – *Business Combinations*, prospectively, to business combinations for which the acquisition date is on or after January 1, 2010. The main changes to IFRS 3 concern the accounting treatment of step acquisition, the possibility of measuring the non-controlling interests in a partial acquisition at fair value, the recognition of acquisition-related costs as period expenses and the recognition at the acquisition date of any contingent consideration included in the arrangements.

Step acquisitions of a subsidiary

In the case of step acquisitions IFRS 3 (2008) states that a business combination occurs only in respect of the transaction that gives one entity control of another. At that time, the identifiable net assets of the acquiree are measured at fair value and any non-controlling interest is measured either at fair value or at the non-controlling interest's proportionate share of the fair value of the acquiree's identifiable net assets (a method already permitted under the previous version of IFRS 3).

An equity interest previously held in the acquiree and accounted for under IAS 39 – *Financial Instruments: Recognition and Measurement,* or under IAS 28 – *Investments in Associates*, or under IAS 31 – *Interests in Joint Ventures* is treated as if it were disposed of and acquired at fair value at the acquisition date. Accordingly, it is remeasured to its acquisition date fair value and any resulting gain or loss is recognized in profit or loss. Moreover, any changes in the value of the equity interest that were previously recognized in Other comprehensive income are reclassified from equity to profit or loss as if they had been disposed of. Goodwill, or the gain from a bargain purchase, arising from the acquisition of control in a subsidiary is measured as the consideration transferred to obtain control, plus the amount of non-controlling interest (using either option), plus the fair value of previously held non-controlling equity interest, less the fair value of the identifiable net assets of the acquiree.

Under the previous version of the standard controlling interests achieved in stages were dealt with as a series of separate transactions with goodwill recognized as the sum of the goodwill arising on these transactions.

As described in the Scope of consolidation section below on June 30, 2010 the Fiat Group acquired the remaining 50% of the joint venture Fiat GM Powertrain Polska (an investment that had been accounted for in the Fiat Group's consolidated financial statements using proportionate consolidation), thereby obtaining 100% control. The Group accounted for this transaction as the step acquisition of a subsidiary.

Acquisition-related costs

Under IFRS 3 (2008) acquisition-related costs are recognized as an expense in the periods in which the costs are incurred. Under the previous version of the Standard, these costs were included in the acquisition cost of the net assets of the acquired entity. Applying this change to the acquisition of the remaining 50% interest in Fiat GM Powertrain Polska in 2010 led to the recognition of acquisition related costs whose amount is not significant.

Recognition of contingent consideration

Under IFRS 3 (2008) contingent consideration is recognized as part of the consideration transferred in exchange for the acquiree's net assets, measured at its acquisition date fair value. Similarly, where the purchase agreement includes a right to the return of previously-transferred consideration if specified conditions are met, that right to return is classified as an asset by the acquirer. Subsequent changes in this fair value are recognized as adjustments to the original accounting for the acquisition if they come from additional information obtained by the acquirer and occur within 12 months of the acquisition date. All other changes in the fair value of the contingent consideration are recognized in profit or loss.

Under the previous version of the Standard contingent consideration was recognized at the acquisition date only if payment was probable and it could be measured reliably. Any subsequent adjustments to contingent consideration were recognized against goodwill. No effects arose from this change in accounting standard as far as the acquisition of the remaining 50% of the joint venture Fiat GM Powertrain Polska in 2010 is concerned.

The above changes in accounting principles deriving from the adoption of IFRS 3 (2008) did not have significant accounting effects in the current year.

IAS 27 (2008) – Consolidated and Separate Financial Statements

The revisions to IAS 27 principally affect the accounting for transactions and events that result in a change in the Group's interest in its subsidiaries and the attribution of a subsidiary's losses to non-controlling interests. In accordance with the relevant transitional provisions, the Group adopted these changes to IAS 27 prospectively. The adoption of the revised standard has affected the accounting of certain increases and decreases in the Group's ownership interest in its subsidiaries.

IAS 27 (2008) specifies that once control has been obtained, further transactions whereby the parent entity acquires additional equity interests from non-controlling interests, or disposes of equity interests without losing control are transactions with owners and therefore shall be accounted for as equity transactions. It follows that the carrying amounts of the controlling and non-controlling interests must be adjusted to reflect the changes in their relative interests in the subsidiary and any difference between the amount by which the non-controlling interest is adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the parent. There is no consequential adjustment to the carrying amount of goodwill and no gain or loss is recognized in profit or loss. Costs associated with these transactions are recognized in equity in accordance with IAS 32 paragraph 35.

In prior years, in the absence of a specific principle or interpretation, if the Group purchased a non-controlling interest in a subsidiary that it already controlled and recognized any excess of the acquisition cost over the carrying amount of the assets and liabilities acquired as goodwill (the "Parent entity extension method"). If it disposed of a non-controlling interest without losing control, however, the Group recognized any difference between the carrying amount of assets and liabilities of the subsidiary and the consideration received in profit or loss.

In 2010, following the adoption of the above change, the Fiat Group recognized a reduction of €81 million directly in equity in relation to the exercising of the 5% call option on Ferrari S.p.A., as well as in respect of a series of minor acquisitions and sales of non-controlling interests in subsidiaries.

Standards, amendments and interpretations effective from January 1, 2010 but not applicable to the Group

The following amendments, improvements and interpretations have also been issued and are effective from January 1, 2010; these relate to matters that were not applicable to the Group at the date of these financial statements but which may affect the accounting for future transactions or arrangements:

- Improvement 2008 to IFRS 5 – *Non-current Assets Held for Sale and Discontinued Operations*.
- Amendments to IAS 28 – *Investments in Associates* and to IAS 31 – *Interests in Joint Ventures* consequential to the amendment to IAS 27.
- Improvements to IAS/IFRS (2009).
- Amendments to IFRS 2 – *Share based Payment*: Group Cash-settled Share-based Payment Transactions.

- IFRIC 17 – *Distributions of Non-cash Assets to Owners*.
- IFRIC 18 – *Transfers of Assets from Customers*.
- Amendment to IAS 39 – *Financial Instruments: Recognition and Measurement*: Eligible Hedged items.

Accounting principles, amendments and interpretations not yet applicable and not early adopted by the Group

On October 8, 2009, the IASB issued an amendment to IAS 32 – *Financial Instruments: Presentation*, Classification of Rights Issues in order to address the accounting for rights issues (rights, options or warrants) that are denominated in a currency other than the functional currency of the issuer. Previously such rights issues were accounted for as derivative liabilities. However, provided certain conditions are met, the amendment requires such rights issues to be classified as equity regardless of the currency in which the exercise price is denominated. The amendment is effective retrospectively from January 1, 2011; when applied this amendment is not expected to lead to significant effects on the Group's financial statements.

On November 4, 2009, the IASB issued a revised version of IAS 24 – *Related Party Disclosures* that simplifies the disclosure requirements for government-related entities and clarifies the definition of a related party. The revised standard is effective for annual periods beginning on or after January 1, 2011. Application of this amendment is not expected to have any significant effects on the measurement of items in the Group's financial statements.

On November 12, 2009, the IASB issued a new standard IFRS 9 – *Financial Instruments* that was amended on October 28, 2010. The new standard, having an effective date for mandatory adoption of January 1, 2013, represents the completion of the first part of a project to replace IAS 39 and introduces new requirements for the classification and measurement of financial assets and financial liabilities and for the derecognition of financial assets. The new standard uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the many different rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments and the contractual cash flow characteristics of the financial assets. The most significant effect of the standard regarding the classification and measurement of financial liabilities relates to the accounting for changes in fair value attributable to changes in the credit risk of financial liabilities designated as at fair value through profit or loss. Under the new standard these changes are recognized in other comprehensive income and are not subsequently reclassified to the Income statement. The new standard had not yet been endorsed by the European Union at the date of these financial statements.

On November 26, 2009, the IASB issued a minor amendment to IFRIC 14 – *Prepayments of a Minimum Funding Requirement*. The amendment applies when an entity is subject to minimum funding requirements and makes an early payment of contributions to cover those requirements. The amendment permits such an entity to treat the benefit of such an early payment as an asset. The amendment has an effective date for mandatory adoption of January 1, 2011. Application of this amendment is not expected to have any significant effects on the Group's financial statements.

On November 26, 2009, the IFRIC issued the interpretation IFRIC 19 – *Extinguishing Financial Liabilities with Equity Instruments* that provides guidance on how to account for the extinguishment of a financial liability by the issue of equity instruments. The interpretation clarifies that when an entity renegotiates the terms of a financial liability with its creditor and the creditor agrees to accept the entity's shares or other equity instruments to settle the financial liability fully or partially, then the entity's equity instruments issued to a creditor are part of the consideration paid to extinguish the financial liability and are measured at their fair value. The difference between the carrying amount of the financial liability extinguished and the initial measurement amount of the equity instruments issued is included in profit or loss for the period. The interpretation has an effective date for mandatory adoption of January 1, 2011. Application of this interpretation is not expected to have any significant effects on the Group's financial statements.

On May 6, 2010, the IASB issued a set of amendments to IFRSs ("Improvements to IFRSs") that are applicable from January 1, 2011; set out below are those that will lead to changes in the presentation, recognition or measurement of financial statement items, excluding those that only regard changes in terminology or editorial changes having a limited accounting effect and those that affect standards or interpretations that are not applicable to the Group:

- IFRS 3 (2008) – *Business Combinations*: this amendment clarifies that the components of non-controlling interests that do not entitle their holders to a proportionate share of the entity's net assets must be measured at fair value or as required by the applicable accounting standards. For example, therefore, stock options granted to employees must be measured in accordance with the requirements of IFRS 2 in the case of a business combination, while the equity portion of a convertible debt instrument must be measured in accordance with IAS 32. In addition, the Board goes into further detail on the question of share-based payment plans that are replaced as part of a business combination by adding specific guidance to clarify the accounting treatment.

- IFRS 7 – *Financial Instruments: Disclosures*: this amendment emphasizes the interaction between the qualitative and quantitative disclosures required by the standard concerning the nature and extent of risks arising from financial instruments. This should assist users of financial statements to link related disclosures and hence form an overall picture of the nature and extent of risks arising from financial statements. In addition, the disclosure requirement concerning financial assets that are past due or impaired but whose terms have been renegotiated, and that relating to the fair value of collateral have been eliminated.

- IAS 1 – *Presentation of Financial Statements*: the amendment requires the reconciliation in the changes of each component of equity to be presented in the notes or in the primary statements.

- IAS 34 – *Interim Financial Reporting*: by using a series of examples certain clarifications are provided concerning the additional disclosures that must be presented in interim financial reports.

Application of these improvements is not expected to have any significant effects on the Group's financial statements.

On October 7, 2010, the IASB issued amendments to IFRS 7 – *Financial Instruments: Disclosures*. Entities are required to apply the amendments for annual periods beginning on or after July 1, 2011.The amendments will allow users of financial statements to improve their understanding of transfers of financial assets, including an understanding of the possible effects of any risks that may remain with the entity that transferred the assets. The amendments also require additional disclosures if a disproportionate amount of a transfer transaction is undertaken at the end of a reporting period. The amendments had not yet been endorsed by the European Union at the date of these financial statements.

On December 20, 2010, the IASB issued amendments to IFRS 1 – *First-time Adoption of International Financial Reporting Standards*. The first amendment replaces references to a fixed date of "January 1, 2004" with the date of transition to IFRSs. The second amendment provides guidance on how an entity should resume presenting financial statements in accordance with IFRSs after a period when the entity was unable to comply with IFRSs because its functional currency was subject to severe hyperinflation. These amendments are effective from July 1, 2011. The amendments had not yet been endorsed by the European Union at the date of these financial statements.

On December 20, 2010, the IASB issued amendments to IAS 12 – *Income Taxes* that require an entity to measure the deferred tax relating to an asset depending on whether the entity expects to recover the carrying amount of the asset through use or sale. As a result of the amendments, SIC-21 – *Income Taxes – Recovery of Revalued Non-Depreciable Assets* no longer applies. These amendments are effective from January 1, 2012. The amendments had not yet been endorsed by the European Union at the date of these financial statements.

CHANGES IN THE SCOPE OF CONSOLIDATION

As described in the preceding paragraph "Consolidation of the Fiat Group", to which reference should be made for additional information, starting from the year 2010, EXOR has consolidated the Fiat Group line-by-line. Additionally, it should be recalled that the previously-mentioned demerger of the Fiat Group, effective on January 1, 2011, is considered a "business combination involving entities under common control" and, as such, is outside the scope of application of IFRS 3 and IFRIC 17. Accordingly, in the 2011 consolidated financial statements for Fiat S.p.A. post-demerger and Fiat Industrial S.p.A., the opening positions for items in the statement of financial position will be equivalent to the carrying amounts reported in the consolidated financial statements of Fiat Group prior to demerger (as a whole), without generating any effect on the scope of consolidation at the level of the EXOR Group. Consequently, the amounts relating to the business to be transferred to Fiat Industrial published in the consolidated financial statements of Fiat S.p.A. as Discontinued operations as set out in IFRS 5 have been reclassified for purposes of presenting the Fiat Group as a whole in the 2010 EXOR consolidated financial statements (Fiat Group as a whole).

As for the **Alpitour Group, C&W Group** and the **Holdings System,** in 2010 there were no significant changes in the scope of consolidation.

With regard to the **Fiat Group,** in 2010 the following changes took place in the scope of consolidation:

- On February 1, 2010, the sale of Targa Rent S.r.l., a subsidiary of the Fiat Group Automobiles sector, was completed; this investment was already classified as assets held for sale at December 31, 2009.

- The equally held joint venture GAC Fiat Automobiles Co. Ltd. was formed in the first quarter of 2010 to manufacture engines and cars for the Chinese market.

- In the second quarter of 2010, the CNH sector acquired 50% of LLC CNH – KAMAZ Industry, an equally held joint venture set up to manufacture agricultural and construction machinery in the Russian Federation.

- In the second quarter of 2010, the Agricultural and Construction Equipment sector completed the sale of the investment in the joint venture LBX Company LLC.

- On June 30, 2010, the Fiat Group acquired the remaining 50% of the joint venture Fiat Powertrain Polska Sp. z.o.o. (ex Fiat GM Powertrain Polska), thereby obtaining 100% control. The 50% interest acquired was consolidated on a line-by-line basis effective January 1, 2010. The transaction resulted in the recognition of a gain on the aggregation of €10 million.

- Certain subsidiaries in the Components sector whose total assets and revenues are not material to the Group have been consolidated on a line-by-line basis during 2010.

- During the third quarter of 2010, the call option on the 5% of Ferrari S.p.A. share capital held by Mubadala Development Company PJSC was exercised.

- In the fourth quarter of 2010, the Fiat Group Automobiles sector acquired TCA Tecnologia en Componentes Automotivos SA, a company located in the Brazilian state of Pernambuco, measured at cost.

- During the fourth quarter of 2010, the Components sector incorporated the companies Magneti Marelli d.o.o. Kragujevac and Plastic Components and Modules Fuel Tanks S.p.A., both recognized at cost

1. Net revenues

Net revenues may be analyzed as follows:

€ in millions	**Fiat Group (as a whole)**	**C&W Group**	**Alpitour Group**	**Juventus F.C.**	**Holdings System**	**Eliminations**	**Consolidated EXOR Group**
Sales of goods	51,755						51,755
Rendering of services:							
- Tourism			1,227			(4)	1,223
- Capital Market		141					141
- Corporate Occupier & Investor Services		202					202
- Valuation Advisory		117					117
- Global Consulting		14					14
- Commissions on leasing		582					582
- Other services	2,405				2	(2)	2,405
Interest income from customers and other financial income of financial services companies of the Fiat Group	950						950
Contract revenues	733						733
Rents on assets sold with a buy-back commitment	226						226
Rents on operating leases	150						150
Reimbursements of costs for property management services rendered by C&W Group on behalf of the clientele		271					271
Television and radio rights and media revenues				104			104
Sponsorships and advertising				44		(7)	37
Season tickets and ticket office sales				11			11
Other	39			24	3	(2)	64
Total Net revenues 2010	**56,258**	**1,327**	**1,227**	**183**	**5**	**(15)**	**58,985**
Sales of goods	45,958						45,958
Rendering of services:							
- Tourism			1,090			(4)	1,086
- Capital Market		97					97
- Corporate Occupier & Investor Services		190					190

Change in amount	**6,156**	**215**	**137**	**(47)**	**3**	**1**	**6,465**
Change in percentage	**12.3%**	**19.3%**	**12.6%**	**-20.4%**	**n.s.**	**n.a.**	**12.3%**

2. Cost of sales

Cost of sales comprises the following:

€ in millions	Fiat Group (as a whole)	C&W Group	Alpitour Group	Juventus F.C.	Eliminations	Consolidated EXOR Group
Cost of sales	46,875	1,157	1,119	203	(1)	49,353
Interest cost and other financial expenses from financial services companies	863					863
Cost of sales 2010	**47,738**	**1,157**	**1,119**	**203**	**(1)**	**50,216**
Cost of sales	42,457	993	997	184	(1)	44,630
Interest cost and other financial expenses from financial services companies	804					804
Cost of sales 2009	**43,261**	**993**	**997**	**184**	**(1)**	**45,434**
Change in amount	**4,477**	**164**	**122**	**19**	**0**	**4,782**
Change in percentage	**10.3%**	**16.5%**	**12.2%**	**10.3%**	**n.a.**	**10.5%**

3. Selling, general and administrative costs

€ in millions	Fiat Group (as a whole)	C&W Group	Alpitour Group	Juventus F.C.	Holdings System	Eliminations and adjustments	Consolidated EXOR Group
2010							
Selling, general and administrative costs	**4,742**	**126**	**79**	**31**	**45**	**(14)**	**5,009**
2009							
Selling, general and administrative costs	4,296	115	76	25	40	(15)	4,537
Change in amount	**446**	**11**	**3**	**6**	**5**	**1**	**472**
Change in percentage	**10.4%**	**9.6%**	**3.9%**	**24.0%**	**12.5%**	**n.a.**	**10.4%**

Fiat Group

Selling costs comprises mainly marketing, advertising, and sales personnel costs.

General and administrative costs comprise mainly expenses for administration which are not attributable to sales, production and research and development functions.

C&W Group

Selling costs comprises mainly advertising costs.

General and administrative costs comprise mainly expenses for administration which are not attributable to the sales functions.

Alpitour Group

Selling, general and administrative costs include principally personnel costs relating to staff functions, insurance, advertising and promotion, consulting and emoluments to boards.

Juventus FC
General and administrative expenses include mainly the expenses associated with non-registered personnel and general administrative expenses not attributable to the sales functions.

Holdings System
The general expenses of the Holdings System comprise mainly personnel, consulting and sundry services.

4. Research and development costs

In 2010, research and development costs are incurred entirely by the Fiat Group and equal to €1,431 million (€1,398 million in 2009). They comprise all the research and development costs not recognized as assets amounting to €654 million (€646 million in 2009), the writedown of costs previously capitalized of €42 million (€47 million in 2009) and the amortization of capitalized development costs of €735 million (€705 million in 2009). New expenditures for capitalized costs in 2010 incurred by the Fiat Group are €1,282 million (€1,046 million in 2009).

5. Other income (expense)

This item consists of income arising from trading operations which is not attributable to the sale of goods and services (such as royalties and other income from licenses and know-how), net of miscellaneous operating costs which cannot be allocated to specific functional areas, such as indirect taxes and duties, and charges for various provisions not attributable to other items of cost of sales or selling, general and administrative costs.

6. Gains (losses) on the disposal of investments

Gains (losses) on the disposal of investments refer to the Fiat Group and amount to €15 million in 2010 (€4 million in 2009). They mainly comprise the gain on the acquisition of the remaining 50% of the joint venture Fiat GM Powertrain Polska (€10 million) and the gains realized on the sale of the investment in the joint venture LBX Company LLC.

7. Restructuring costs

Restructuring costs amount to €178 million in 2010 and refer to the Fiat Group for €176 million and C&W Group for €2 million. In 2009, restructuring costs totaled €334 million and related to the Fiat Group for €312 million and C&W Group for €22 million.

8. Other unusual income (expense)

In 2010, net other unusual expense amount to €57 million (€462 million in 2009).
The breakdown by sector is as presented below.

Holdings System
In 2010, net other unusual expenses total €7 million and include principally legal expenses deriving from the cases relating to the press releases issued by IFIL and Giovanni Agnelli e C. on August 24, 2005 for €5 million (€3 million in 2009), as well as investment acquisition costs for €2 million.
In 2009, the net balance had also included the writedown of goodwill on the acquisition of C&W Group (€10 million) represented by the acquisition costs incurred by EXOR S.A..

C&W Group

In 2010, net other unusual expenses amount to €7 million ($9 million) and represent the minority shareholders' put option liability through profit and loss deriving from the "Minority Shareholders Agreement".

In 2009, net other unusual expenses were €55 million and included €44 million for the goodwill impairment charge on the acquisition of C&W Group and €11 million for other intangible asset impairments.

Alpitour Group

This item includes costs incurred by the Alpitour Group to implement the rationalization and reorganization plan aimed at reducing labor costs by €1 million (€2 million in 2009) as well as expenses for penalties paid by Alpitour as a result of its early withdrawal from rent contracts and for settlement of disputes for a total of €1 million (€1 million in 2009).

It also includes the charge to the provision for reinsurance claims set aside by the subsidiary Alpitour Reinsurance for the reinsurance of risks.

Juventus FC

Net other unusual expenses stand at €7 million as a result of the settlement agreement reached with the Regional Tax Revenue Office following access by the *Guardia di Finanza* which ended on July 23, 2009.

In 2009, the balance had included the writedown of €3 million on the video archives and €3 million of other income on the sale of the business segment relating to the commercial areas outside the new stadium to Ebano S.r.l., a company in the Nordiconad Group.

Fiat Group

Net other unusual expenses amount to €34 million in 2010. In 2009, the same item consisted of net expenses of €391 million which included the effects of writedowns of €104 million of certain investments in platforms and architectures made by the Automobiles business in relation to the strategic realignment with the Chrysler business, accessory costs of €41 million relating to the acquisition of the interest in Chrysler, other non-recurring charges and costs for the writedown of assets recognized by the Group as the result of the global economic crisis of which €173 million refers to the Iveco Sector.

9. Financial income (expense)

In addition to the items included in the specific lines of the income statement, Net financial income (expense) in 2010 and 2009 also includes the interest income from customers and other financial income of financial services companies included in net revenues for and interest cost and other financial expenses from financial services companies included in cost of sales.

Financial expenses on employment benefits	160						160
Total Interest and other financial expenses	1,803	14	5	6	129	(6)	1,951
Net income (expenses) from derivative financial instruments and exchange differences	86				20		106
Total Financial expense	1,717	14	5	6	109	(6)	1,845
financial expenses of financial services companies	(804)						(804)
Financial expense 2009 excluding financial services companies	**913**	**14**	**5**	**6**	**109**	**(6)**	**1,041**
Net financial income (expense) 2009 excluding financial services companies	**(753)**	**(13)**	**(3)**	**(1)**	**(62)**	**4**	**(828)**

Financial income (expense) of the **Fiat Group** include net financial income of €111 million (€117 million in 2009) arising from the equity swaps on Fiat shares, relating to certain stock option plans.

Financial income (expense) of the **Holdings System** in 2010 include:

- the gain of €1 million realized on the sale of a 0.25% interest in Intesa Sanpaolo (in 2009 losses of €15 million on the sale of a 0.65% interest in Intesa Sanpaolo);
- the negative fair value change on the embedded derivative relating to the Perfect Vision bonds for €17 million (€36 million in 2009). In 2009, there was also a negative fair value change on bonds issued by DLMD for €9 million.

10. Result from investments

€ in millions	**2010**	2009	Change
Share of the profit/(loss) of companies accounted for using the equity method			
- Sequana Group	**9**	5	4
- Sundry Fiat Group companies	**190**	18	172
- Sundry C&W Group companies	**1**	0	1
Share of the profit/(loss) of companies accounted for using the equity method	**200**	23	177
Dividends from Companies in the Holdings System			
- SGS S.A.	**49**	38	11
- Intesa Sanpaolo	**1**	0	1
- Gruppo Banca Leonardo	**0**	2	(2)
Dividends from companies in the Holdings System	**50**	40	10
Dividends from investments	**8**	7	1
Other income from investments	**8**	3	5
Impairment reversals (losses)	**(24)**	3	(27)
Charges for risk provision on investments	**(6)**		(6)
Result from investments	**236**	76	160

The item impairment reversals (losses) includes the impairment charge of €9 million to align the carrying amount (€2.98 per share) of the remaining 10 million Intesa Sanpaolo shares to the stock trading price at December 30, 2010 (€2.042 per share). In fact, it was deemed that the share trading price, consistently below the original carrying amount, represented objective evidence of an impairment loss.

11. Income taxes

Income taxes recognized in the income statement consist of the following:

€ in millions	Fiat Group (as a whole)	C&W Group	Alpitour Group	Juventus	Holdings System	Consolidated EXOR Group
Current taxes:						
- IRAP	90		4	4		98
- Other taxes	739	13	4		7	763
Total Current taxes	**829**	**13**	**8**	**4**	**7**	**861**
Deferred taxes for the period:						
- IRAP	(21)					(21)
- Other taxes	(134)	(9)		1		(142)
Total Deferred taxes	**(155)**	**(9)**		**1**		**(163)**
Taxes relating to prior periods	**8**					8
Total Income taxes 2010	**682**	**4**	**8**	**5**	**7**	**706**
Current taxes:						
- IRAP	99		4	5		108
- Other taxes	545	10	2		6	563
Total Current taxes	**644**	**10**	**6**	**5**	**6**	**671**
Deferred taxes for the period:						
- IRAP	(33)					(33)
- Other taxes	(154)	(21)		8		(167)
Total Deferred taxes	**(187)**	**(21)**		**8**		**(200)**
Taxes relating to prior periods	**24**					**24**
Total Income taxes 2009	**481**	**(11)**	**6**	**13**	**6**	**495**

Overall, the increase in the charge for current and deferred taxes of the Fiat Group in 2010 with respect to 2009 is due mainly to an increase in the taxable profits of non-Italian companies, partially offset by the recognition of deferred tax assets of a non-recurring nature.

Taxes relating to prior periods include the cost arising from certain disputes with the tax authorities.

The reconciliation between the tax charges recorded in the consolidated financial statements and the theoretical tax charge, calculated on the basis of the theoretical tax rate in effect in Italy, is the following:

€ in millions	**2010**	2009
Theoretical income taxes	**351**	(138)
Tax effect of permanent differences	**2**	85
Taxes relating to prior years	**8**	24
Effect of difference between foreign tax rates and the theoretical Italian tax rate	**121**	40
Effect of deferred tax assets not recognized in prior years	**(64)**	0
Effect of deferred tax assets not recognized and write-off of deferred tax assets	**178**	434
Use of tax losses for which no deferred tax assets were recognized	**(21)**	(64)
Other differences	**54**	39
Current and deferred income tax recognized in the financial statements, excluding IRAP	**629**	420
IRAP (current and deferred)	**77**	75
Current and deferred income tax recognized in the financial statements	**706**	495

Since the IRAP tax has a taxable basis that is different from income before taxes, it generates distortions between one year and another. Accordingly, in order to render the reconciliation between income taxes recognized and theoretical income taxes more meaningful, IRAP tax is not taken into consideration; theoretical income taxes are determined by applying only the tax rate in effect in Italy (IRES equal to 27.5% in 2010 and 2009) to profit/(loss) before taxes.

Permanent differences in the above reconciliations include the tax effect of non-taxable income of €162 million in 2010 (€131 million in 2009) and of non-deductible costs of €164 million in 2010 (€216 million in 2009).

Reconciling items relating to deferred tax assets in 2010 gave rise to total tax expense of €93 million resulting from the decision not to recognize assets deriving from temporary differences and tax losses arising during the year of €178 million, partially offset by income deriving from the recognition of previously unrecognized deferred tax assets of €64 million and the effect of utilizing tax losses of €21 million for which deferred tax assets had not been recognized in previous years. In 2009, the effect was a negative €370 million.

Other differences in the above reconciliation include unrecoverable withholding tax of the Fiat Group of €89 million (€57 million in 2009).

Net deferred tax assets at December 31, 2010 consist of deferred tax assets, net of deferred tax liabilities, which have been offset where possible by the individual consolidated companies. The net balance of deferred tax assets and deferred tax liabilities may be analyzed as follows:

€ in millions	**Fiat Group (as a whole)**	**C&W Group**	**Alpitour Group**	**Holdings System**	**Consolidated EXOR Group**
Deferred tax assets	**2,889**	**4**	**9**		2,902
Deferred tax liabilities	**(187)**	**(67)**		**(1)**	(255)
Total 2010	**2,702**	**(63)**	**9**	**(1)**	**2,647**
Deferred tax assets	2,580		9		2,589
Deferred tax liabilities	(152)	(63)		(1)	(216)
Total 2009	**2,428**	**(63)**	**9**	**(1)**	**2,373**

The increase in net deferred tax assets, as analyzed in the following table, is mainly due to:

- the recognition of deferred tax assets of €164 million, arising from temporary differences and tax losses that arose during the year, net of the effect of recognizing or writing off deferred tax assets relating to prior years;
- the corresponding tax effect of items recorded directly in equity amounting to €7 million;
- positive exchange rate differences, change in the scope of consolidation and other changes amounting to €103 million.

Deferred tax assets, net of deferred tax liabilities may be analyzed by source as follows:

€ in millions	12/31/2009	Recognized in income statement	Charged to equity	Changes in the scope of consolidation	Translation differences and other changes	**12/31/2010**
Deferred tax assets arising from:						
- Taxed provisions	1,787	138		(1)	90	**2,014**
- Inventories	333	8			6	**347**
- Taxed allowances for doubtful accounts	207	23		1	16	**247**
- Provision for employee benefits	447	(38)	2		34	**445**
- Intangible assets	462	184				**646**
- writedowns of financial assets	159	9			2	**170**
- Measurement of derivative financial instruments	31		8		7	**46**
- Other	529	(56)	2	14	2	**491**
Total Deferred tax assets	3,955	268	12	14	157	**4,406**
Deferred tax liabilities arising from:						
- Accelerated depreciation	(527)	22		(6)	(28)	**(539)**
- Deferred tax on gains on disposal	(7)	(146)				**(153)**
- Capital investment grants	(6)	2				**(4)**
- Provision for employee benefits	(24)					**(24)**
- Capitalization of development costs	(910)	28		(3)	(20)	**(905)**
- Other	(710)	37	(5)	(13)	(30)	**(721)**
Total Deferred tax liabilities	(2,184)	(57)	(5)	(22)	(78)	**(2,346)**
Theoretical tax benefit arising from tax loss carryforwards	4,186	(514)		4	40	**3,716**
Adjustments for assets whose recoverability is not probable	(3,584)	467		15	(27)	**(3,129)**
Total Deferred tax assets, net of Deferred tax liabilities	2,373	164	7	11	92	**2,647**

The decision to recognize deferred tax assets is taken for each company by assessing critically whether the conditions exist for the future recoverability of such assets on the basis of updated strategic plans, accompanied by the related tax plans. For this reason, the total theoretical future tax benefits arising from deductible temporary differences (€4,406 million at December 31, 2010 and €3,955 million at December 31, 2009), and tax loss carryforwards (€3,716 million at December 31, 2010 and €4,186 million at December 31, 2009), have been reduced by €3,129 million at December 31, 2010 and by €3,584 million at December 31, 2009.

As concerns the Fiat Group, deferred tax assets net of deferred tax liabilities include tax benefits arising from unused tax losses of €1,315 million at December 31, 2010 (€1,259 million at December 31, 2009). At December 31, 2010, further tax benefits arising from unused tax losses of €2,124 million (€2,635 million at December 31, 2009) have not been recognized.

Deferred taxes have not been provided on the undistributed earnings of subsidiaries of the Fiat Group, since the Fiat Group and the Fiat Industrial Group are able to control the timing of the distribution of these reserves and it is probable that they will not be distributed in the foreseeable future.

The totals of deductible and taxable temporary differences and accumulated tax losses at December 31, 2010, together with the amounts for which deferred tax assets have not been recognized, analyzed by year of expiry, are as follows:

		Year of expiry					
€ in millions	**Total at 12/31/2010**	2011	2012	2013	2014	Beyond 2014	Unlimited / indeterminable
Temporary differences and tax losses relating to State taxation (IRES in the case of Italy)							
- Deductible temporary differences	**13,608**	4,004	1,551	1,575	1,436	5,041	1
- Taxable temporary differences	**(7,236)**	(1,687)	(1,131)	(1,063)	(841)	(2,435)	(79)
- Tax losses	**12,805**	1,417	484	240	399	2,316	7,949
- Temporary differences and tax losses for which deferred tax assets have not been recognized	**(10,632)**	(1,983)	(718)	(339)	(564)	(2,570)	(4,458)
Temporary differences and tax losses relating to State taxation	**8,545**	1,751	186	413	430	2,352	3,413
Temporary differences and tax losses relating to local taxation (IRAP in the case of Italy)							
- Deductible temporary differences	**6,748**	1,503	775	743	697	3,030	
- Taxable temporary differences	**(3,836)**	(829)	(635)	(627)	(381)	(1,364)	
- Tax losses	**1,042**	12	10	10	11	274	725
- Temporary differences and tax losses for which deferred tax assets have not been recognized	**(1,133)**	(88)	(21)	(9)	4	(408)	(611)
Temporary differences and tax losses relating to local taxation	**2,821**	598	129	117	331	1,532	114

12. Other information by nature

In 2010, the income statement includes personnel costs of €8,945 million (€7,969 million in 2009).

An analysis of the average number of employees by category is provided as follows:

	Fiat Group (as a whole)	C&W Group	Alpitour Group	Juventus F.C.	Holdings System	Consolidated EXOR Group
Managers	2,243	1,983	51	11	14	4,302

Earnings/(loss) from continuing operations attributable to savings shares	€ in millions	**6**	(12)
per savings share – basic	€	***0.64***	*(1.35)*
per savings share – diluted (a)	€	***0.64***	*(1.35)*
Earnings/(loss) from continuing operations attributable to preferred shares	€ in millions	**42**	(114)
per preferred share – basic	€	***0.62***	*(1.61)*
per preferred share – diluted (a)	€	***0.61***	*(1.61)*

(a) In 2010, the earnings/(loss) attributable to Owners of the Parent was adjusted to take into account the dilutive effects of the theoretical exercise of the plan for stock options granted by subsidiaries and associates of the Group using their own equity instruments.

In 2009, this effect was not considered because it was anti-dilutive.

14. Intangible assets

An analysis of intangible assets, by sector, is as follows:

€ in millions	**Fiat Group (as a whole)**	**C&W Group**	**Alpitour Group**	**Juventus F.C.**	**Holdings System**	**Adjustments**	**Consolidated EXOR Group**
Goodwill	2,928	451	27		33	(84) (a)	3,355
Trademarks and other intangible assets with indefinite useful lives	177	191	4	16			388
Development costs externally acquired	1,400						1,400
Development costs internally generated	2,744						2,744
Patents, concessions and licenses externally	336	11	14				361
Other intangible assets externally acquired	320	87	11				418
Advances and intangible assets in progress externally acquired	12	17					29
Players' registration rights	0			100			100
Total net carrying amount of Intangible assets at 12/31/2010	**7,917**	**757**	**56**	**116**	**33**	**(84)**	**8,795**
Goodwill	2,776	415	27		33	(77) (a)	3,174
Trademarks and other intangible assets with indefinite useful lives	165	178	4	14			361
Development costs externally acquired	1,342						1,342
Development costs internally generated	2,251						2,251

Other intangible assets externally acquired	295	98	11				404
Advances and intangible assets in progress externally acquired	11	8					19
Players' registration rights	0			115			115
Total net carrying amount of Intangible assets at 12/31/2009	7,199	714	58	129	33	(77)	8,056

(a) Elimination of goodwill relating to the quota of C&W Group's Minority Shareholders.

Trademarks and other intangible assets with indefinite useful lives include the amount allocated on acquisition of C&W Group (March 2007) to the "Cushman & Wakefield" trademark, widely recognized by the market, for $255 million (€191 million at December 31, 2010). C&W Group intends to continuously renew the trademark since it is deemed to have an indefinite useful life because it is expected to contribute to cash flows indefinitely and, therefore, is not amortized but tested annually for impairment.

Other intangible assets include C&W Group's customer relationships (amortized over 14 years) and non-compete covenants (amortized over 12 years).

Patents, concessions and licenses externally acquired of the Alpitour Group include mainly the government concession rights for the use of the Maldivian islands (€11 million) amortizable over the duration of the government concessions, and also the commercial goodwill paid on the acquisition of 100% of the share capital of Lido Arenella in 2009.

Trademarks and other intangible assets with indefinite useful lives of Juventus Football Club comprise principally the economic utilization of the historical archives of the Juventus Football Club television images (Library). These are considered assets with indefinite useful lives since the historical library of television images is expected to support itself over time with the possibility of endless use.
The Juventus library is tested annually for impairment on the basis of estimated future cash flows from the commercial contracts for their exploitation.

In 2010 and 2009, the changes in the gross carrying amount of intangible assets were as follows:

€ in millions	12/31/2009	Additions	Disposals	Change in the scope of consolidation	Reclassified to/from Assets held for sale	Translation differences and other changes	12/31/2010
Goodwill	3,884					225	**4,109**
Trademarks and other intangible assets with indefinite useful lives	419	2				28	**449**
Development costs externally acquired	3,343	357	(19)			17	**3,698**

Foreign exchange gains of €310 million in 2010 principally reflect the appreciation of the US dollar and the Brazilian real against the Euro. Foreign exchange gains of €9 million in 2009 principally reflect the appreciation of the Brazilian real against the Euro, partially offset by the depreciation of the US dollar against the Euro.

Goodwill, trademarks and intangible assets with indefinite useful lives

Goodwill is allocated to the EXOR Group's cash-generating units identified as each consolidated Group.
The following table presents the allocation of goodwill across the sectors. The following table shows this allocation:

€ in millions	12/31/2010	12/31/2009	Change
Agricultural and Construction Equipment	**1,794**	1,662	132
Ferrari	**786**	786	0
Production Systems (Comau)	**135**	125	10
Components	**121**	118	3

Total Goodwill	**3,355**	3,174	181

Fiat Group

The recoverable amount of the cash-generating units to which goodwill and other intangible assets with an indefinite useful life have been allocated is determined on the basis of their value in use, defined as the discounted value of the expected future operating cash flows at a rate of return that incorporates the risks associated with the particular cash-generating units as of the valuation date. The discounted cash flows approach is dependent on several critical management assumptions, including estimates of future sales growth, gross margins, operating costs, terminal value growth rates, capital expenditures, changes in working capital requirements and the weighted average cost of capital (discount rate).

With reference to the Agricultural and Construction Equipment sector, the following should be noted. In particular, from 2006 to 2009, the Agricultural and Construction Equipment sector managed its business according to the trademark: Case IH and New Holland for agricultural equipment and Case and New Holland Construction for construction equipment, as well as Financial Services. In 2010, the sector began to manage its business according to Agricultural Equipment, Construction Equipment and Financial Services. CNH therefore identified three cash-generating units according to this new structure: Agricultural Equipment, Construction Equipment and Financial Services.

More in particular, for Ferrari, the cash-generating unit corresponds to the sector as a whole, while in Comau goodwill has been allocated to the System, Pico and Service businesses. In those sectors, the cash-generating unit recoverable amount is determined on the basis of their value in use defined as the discounted value of the expected future operating cash flows resulting from the estimates included in the 2010-2014 strategic plan of the sector, extrapolated for later years on the basis of medium- to long-term growth rates depending on the detailed nature of the operations and the extent to which they are differentiated and on the forecasts made by the individual sector to which the cash-generating units belong. These cash flows are then discounted using rates that take account of current market assessments of the time value of money and the specific risks inherent in individual cash-generating units.

The recoverable amount of the Ferrari and Comau cash-generating units and of the respective goodwill is the value in use and is determined on the basis of the following assumptions:

	2010		2009	
	Terminal value growth rate	**Discount rate before taxes**	Terminal value growth rate	Discount rate before taxes
Ferrari	**2%**	**8.3%**	2%	10.4%
Production Systems (Comau)	**2%**	**9.0%**	0%	9.0%

The recoverable amount of the cash-generating unit to which the Ferrari sector goodwill relates is significantly higher than its carrying amount; in addition, the exclusivity of the business, its historical profitability and its future earnings prospects indicate that this carrying amount will continue to be recoverable, even in the event of economic and market conditions which remain difficult.

In the Comau sector, the sensitivity analysis was carried out on the residual goodwill, which is mainly allocated to the Pico cash-generating unit, but no matters arose to indicate that this may be significantly impaired.

The results obtained for the other sectors of the Fiat Group as a whole and related sensitivity analyses also confirmed the absence of significant impairment losses.

The cash-generating units to which goodwill has been allocated consist of the following product lines:

€ in millions	**Amount allocated to goodwill at December 31, 2010**
Agricultural equipment	1,280
Construction equipment	419
Financial Services	95
Total	**1,794**

To determine the recoverable amount of these cash-generating units, the sector relied on discounted cash flows and, as a further method, on market multiples. In particular, the sector used the discounted cash flows approach as the primary approach for measuring the value in use of the Equipment Operations businesses while using the total asset market multiples approach as the primary approach for measuring the fair value of the Financial Services reporting unit.

Expected cash flows used under this method are developed in conjunction with the budgeting and forecasting process of the sector and represent the most likely amounts and timing of future cash flows based on the long range plan of CNH. The long range plan, which is updated annually and is reviewed by the senior management of CNH, includes, among other things, the expected benefits of planned manufacturing and product development actions as well as expectations regarding product pricing, market share and commodity costs, consistent with the assumptions reflected in the Fiat Group's 2010-2014 Strategic Plan. The sector uses eight years of expected cash flows as management believes that this period generally reflects the underlying market cycles for its businesses.

The discount rates used in the discounted cash flows approach are an estimate of the rate of return that a market participant would expect of each cash-generating unit. To select an appropriate rate for discounting the future earnings stream, a review was made of short-term interest rates and the yields of long-term corporate and government bonds, as well as the typical capital structure of companies in the industry. The discount rates used for each cash-generating unit were suitably increased to take account of the risk inherent in the cash flow projections, as well as the risk level that would be perceived by a market participant. Considering the above mentioned factors, the following discount rates before taxes as of December 31, 2010 were selected by CNH:

	2010	2009
Agricultural equipment	**17.0%**	20.8%-21.1%
Construction equipment	**17.4%**	19.2%

A terminal value is included at the end of the projection period used in the discounted cash flow analyses in order to reflect the remaining value that each cash-generating unit is expected to generate. The terminal value represents the present value in the last year of the projection period of all subsequent cash flows into perpetuity. The terminal value growth rate is a key assumption used in determining the terminal value as it represents the annual growth of all subsequent cash flows into perpetuity. The terminal value growth rate selected in 2010 and 2009 for the Agricultural equipment cash-generating unit was 1% and that selected for the Construction equipment cash-generating unit was 2%.

The total asset market multiples were utilized in determining the fair value of the Financial Services reporting unit under the market approach. CNH used the market approach as the primary approach to measure the fair value of the Financial Services reporting unit as it derives value based primarily on the assets under management. The market approach measures fair value based on prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. Under this approach, CNH makes use of market price data of corporations whose stock is actively traded in a public, free and open market, either on an exchange or over-the counter basis. Although it is clear that no two companies are entirely alike, the corporations selected as guideline companies must be engaged in the same or similar line of business or be subject to similar financial and business risks, including the opportunity for growth.

Revenue and EBITDA market multiples were utilized in determining the fair value of the Equipment Operations cash-generating units as a secondary approach to further supporting the discounted cash flow approach. Because the market approach does not evaluate the CNH cash-generating units' projected cash flows, the sector believes the market approach enables verification of the implied multiples derived from the discounted cash flows approach using market benchmarks. CNH management identified comparable companies by reviewing all publicly traded companies operating in the CNH lines of business. The comparable companies used were determined based on an evaluation of all relevant factors, including whether the companies were subject to similar financial and business risks.

The fair values of each of the three cash-generating units calculated using the above methods in any case exceeded their carrying amounts and their values determined using the discounted cash flow method.

The results obtained for the Trucks and Commercial Vehicles sector and related sensitivity analyses also confirmed the absence of significant impairment losses.
Finally, the estimates and budget data to which the above mentioned parameters have been applied are those determined by Fiat Group management based on past performance and expectations of developments in the markets in which the Group operates. Estimating the recoverable amount of cash-generating units requires discretion and the use of estimates by management. The Group cannot guarantee that there will be no goodwill impairment in future periods. Circumstances and events, which could potentially cause further impairment losses, are constantly monitored by the Fiat Industrial Group.

C&W Group
Goodwill recognized on the acquisition of C&W Group is deemed representative of the aggregate of the expected future economic benefits from the investment and cannot be identified separately.
C&W Group tests goodwill and other intangible assets with indefinite useful lives annually for impairment on October 1 or whenever events or circumstances indicate that the asset may be impaired.

For the purpose of impairment testing, goodwill and trademarks with indefinite useful lives are allocated to the C&W Group's cash-generating units, which are identified as the geographic regions, since these represent the lowest level within C&W Group at which such assets are monitored for internal management purposes.

The aggregate carrying amounts of goodwill and trademarks at December 31, 2010 are as follows:

(in millions)	Goodwill (Group's share)		Trademarks		Total	
	$	€	$	€	$	€
United States	210.7	158	130.4	98	341.1	255
Canada	47.9	36	23.5	18	71.4	53
Latin America	21.2	16	10.0	7	31.2	23
EMEA	163.3	122	78.4	59	241.7	181
Asia	46.7	35	12.7	10	59.4	44
At December 31, 2010	**489.8**	**367**	**255.0**	**191**	**744.8**	**557**
United States	252.6	185	130.4	91	383.0	276
Canada	50.0	35	23.5	16	73.5	51
Latin America	21.3	15	10.0	7	31.3	22
EMEA	165.8	115	78.4	54	244.2	169
Asia	46.3	32	12.7	9	59.0	41
At December 31, 2009	**536.0**	**382**	**255.0**	**177**	**791.0**	**559**

The recoverable amount of a CGU to which goodwill and trademarks are allocated is the greater of its value in use and its fair value less costs to sell. The annual impairment assessment for all CGUs was based on the estimated fair value less costs to sell.
The estimated fair value less costs to sell for each of the cash-generating units was determined through independent appraisal using both the discounted cash flow and the market approach methods, which were weighted equally in determining the fair value less costs to sell for each of the CGUs.

The key assumptions used to determine the fair value less costs to sell represent C&W Group management's best assessment of future trends in the real estate industry and are based on both external sources and internal sources, including historical data.

Discounted Cash Flow Method

The fair value less costs to sell determined under the discounted cash flow method was weighted 50% in determining the final fair value less costs to sell for each of the CGUs. Under the discounted cash flow method, cash flows were projected for each of the CGUs based on their respective revenue and EBITDA assumptions, as outlined above, along with an estimate of a terminal year value, all of which was present-valued based on the discount rate assumption. In particular, 2010 revenue and EBITDA assumptions by C&W Group's management were based on the 2010 annual operating plan, while the 2011 – 2015 revenue and EBITDA assumptions were developed in connection with the Strategic Plan.

Market Approach Method

The fair value less costs to sell determined under the market approach was weighted 50% in determining the final fair value less costs to sell for each of the CGUs. Under the market approach, the multiple and EBITDA assumptions were used to calculate a fair value for each CGU for each of the years 2010, 2011 and 2012. The multiple assumptions in these calculations were derived from data publicly available relating to C&W Group's guideline companies, including information relating to their revenue and EBITDA historical performance as well as that expected in 2011 and in subsequent years.

The key assumptions to determine the estimated fair value less costs to sell for the 2010 annual impairment assessment, with both methods, are the following:

	USA	CANADA	SOUTH AMERICA	MEXICO	EUROPE	ASIA
Specific CGU assumptions						
Discount rate	15.0%	15.8%	17.0%	15.8%	13.3%	17.5%
CGU specific risk	3.5%	4.5%	2.5%	1.5%	3.0%	4.0%
Tax rate	40.0%	31.5%	31.7%	30.0%	21.3%	32.7%
Working capital %	1.0%	1.0%	1.0%	1.0%	1.0%	1.0%
Long-term growth rate	3.0%	3.0%	4.0%	3.0%	3.0%	4.0%
Terminal value model (Fading growth model)	Fading	Fading	Fading	Fading	Fading	Fading
2011 EBITDA multiple	8.7x	11.9x	10.6x	7.2x	10.4x	10.0x
2012 EBITDA multiple	7.4x	8.6x	7.4x	7.2x	8.5x	8.0x
General assumptions						
Control premium	15.0%					
Consolidated tax rate	33.1%					
Equity risk premium	6.0%					
Cost to sell	1.0%					

The discount rates were established through the assessment of a number of inputs, including the expected return on equity, entity specific risk, country specific premiums, local cost of equity, the local statutory tax rate and debt to equity ratios. The CGU specific risk assumptions were determined after consideration of the execution risk of achieving the forecasted results for 2011 and beyond.

The tax rates represent the statutory tax rates in the respective tax jurisdictions. The working capital percentage reflects C&W Group's recent experience and is in line with market participant levels, while the long-term growth rates were based on the estimated long-term gross domestic product growth and inflation. The terminal value was estimated using a derivation of the fading growth model, which more appropriately measures value during the period over which earnings growth is estimated will reduce to the stable long-term growth rate.

The EBITDA multiples for 2011 and 2012 were determined through an assessment of comparable company multiples and taking into account local market differences. The control premium, equity risk premium and the cost to sell assumptions were all determined based on recent activity and trends in the market.

In addition to the key assumptions outlined above, C&W Group developed assumptions with respect to its expected future revenue and Adjusted EBITDA, Adjusted EBITDA margin and Adjusted EBITDA growth as follows:

CGU	2010	2011	2012	2013	2014	2015
United States						
Revenues	731.7	809.9	897.1	1,005.7	1,117.2	1,219.1
Adjusted EBITDA	62.6	67.0	82.1	111.0	139.6	162.9
Adjusted EBITDA margin	8.6%	8.3%	9.2%	11.0%	12.5%	13.4%
Adjusted EBITDA growth	n.a.	6.9%	22.6%	35.2%	25.7%	16.7%
Canada						
Revenues	69.9	74.8	80.2	86.1	93.2	101.1
Adjusted EBITDA	5.0	4.0	5.7	7.0	9.1	11.3
Adjusted EBITDA margin	7.1%	5.4%	7.1%	8.1%	9.7%	11.1%
Adjusted EBITDA growth	n.a.	-18.8%	42.4%	22.1%	29.6%	24.3%
South America						
Revenues	333.5	379.7	426.0	472.4	524.6	579.6
Adjusted EBITDA	50.6	48.5	58.9	71.8	85.2	96.9
Adjusted EBITDA margin	15.2%	12.8%	13.8%	15.2%	16.2%	16.7%
Adjusted EBITDA growth	n.a.	-4.2%	21.5%	21.8%	18.7%	13.8%
Mexico						
Revenues	78.4	89.5	101.7	112.9	122.0	131.4
Adjusted EBITDA	7.7	7.7	10.5	15.2	19.0	22.1
Adjusted EBITDA margin	9.8%	8.6%	10.3%	13.5%	15.5%	16.8%
Adjusted EBITDA growth	n.a.	-0.3%	37.4%	44.6%	24.6%	16.8%
Europe						
Revenues	11.3	13.8	14.7	15.7	16.9	18.0
Adjusted EBITDA	1.3	1.3	1.3	1.5	1.9	2.2
Adjusted EBITDA margin	11.6%	9.1%	8.5%	9.7%	11.0%	12.0%
Adjusted EBITDA growth	n.a.	-4.1%	0.1%	21.2%	21.8%	16.2%
Asia						
Revenues	85.6	102.9	125.8	149.6	172.8	199.9
Adjusted EBITDA	11.8	13.3	16.6	22.1	28.0	35.3
Adjusted EBITDA margin	13.8%	12.9%	13.2%	14.7%	16.2%	17.7%
Adjusted EBITDA growth	n.a.	12.3%	24.8%	32.9%	27.0%	26.1%

The resulting fair values and related carrying values of each of the CGUs as of the October 1, 2010 impairment assessment date were as follows:

$ in millions	USA	CANADA	SOUTH AMERICA	MEXICO	EUROPE	ASIA	TOTAL
At December 31, 2010							
Fair value less costs to sell	570.0	42.0	61.0	11.0	490.0	138.0	1,312.0
Book value of equity	361.8	30.1	44.2	7.4	305.0	87.3	835.8
Difference in $ millions	208.2	11.9	16.8	3.6	185.0	50.7	476.2
Difference in € millions	157.0	9.0	12.7	2.7	139.5	38.2	359.2
At December 31, 2009							
Fair value less costs to sell	350.0	33.0	44.0	13.0	425.0	97.0	962.0
Book value of equity	395.6	39.4	30.9	8.8	327.4	72.1	874.2
Difference in $ millions	(45.6)	(6.4)	13.1	4.2	97.6	24.9	87.8
Difference in € millions	(32.7)	(4.6)	9.4	3.0	70.0	17.8	62.9

At December 31, 2010, the fair value exceeds carrying value sufficiently; for this reason, C&W Group does not believe that it is reasonably possible that a change in a key assumption on which management has based its determination of the CGU's recoverable amount would cause impairment.

In 2009, the impairment test had indicated an impairment of the United States and Canadian CGUs for $45.6 million (€32.7 million) and $6.4 million (€4.6 million), respectively. Moreover, at June 30, 2009, the assessment made at that date had indicated an impairment for the United States CGU of $10 million (€7.5 million) and €10 million at the level of the EXOR Group, due to expenses incurred for the acquisition.
Globally, the impairment charge recorded in 2009 by the EXOR Group amounted to €54 million.

Alpitour Group

The Alpitour Group tests property, plant and equipment, intangible assets, goodwill and marketing rights annually for impairment.

The aggregate carrying amount of the CGUs analyzed amounts to €121 million compared to €124 million in the prior year.

At October 31, 2010, the recoverable amount of each CGU exceeded the relative carrying amount so no impairment charges were recognized on any goodwill or other non-current assets.
The Alpitour Group developed a sensitivity analysis of the estimated recoverable amount using the discounted cash flow method. The Alpitour Group considers that the discount rate used for this method to discount the cash flows of the CGU is a key parameter in estimating fair value and has determined that assuming an increase of 150 basis points in such rate, also taking into account the estimated realizable value, the carrying amount of the CGUs would not be higher than their recoverable amount.

Development costs

The amortization and impairment losses of development costs are reported in the income statement as research and development costs and other unusual income (expense) in the income statement of the Fiat Group.

To test for impairment, the Group allocates the development costs to cash-generating units and assesses their recoverable amount together with the correlated tangible assets, determining the value in use with the discounted cash flow method.

15. Property, plant and equipment

At December 31, 2010, the Group had contractual commitments for the purchase of property, plant and equipment amounting to €858 million (€666 million at December 31, 2009).

Additions of €2,696 million in 2010 relate for €2,604 million to the Fiat Group, for €20 million to the Alpitour Group, for €64 million to Juventus Football Club and for €8 million to the C&W Group.

During 2010, the Group reviewed the recoverable amount of certain buildings, plant, machinery and industrial equipment in order to take into consideration restructuring plans drawn up for certain businesses. This assessment led to the recognition of impairment losses for €168 million (€202 million in 2009). Such

impairment losses relate to the Fiat Group for €167 million, of which €101 million is recognized in trading profit/loss and €66 million in restructuring costs.
In 2010, the column other changes includes the reclassification of the prior year balances for advances and tangible assets in progress to the appropriate categories when the assets were effectively acquired and put into operation, as well as the reclassification to inventories of assets sold with a buy-back commitment and held-for-sale until the agreement expiry date amounting to €167 million in 2010 (€165 million in 2009).

In 2010, the column change in the scope of consolidation, showing an overall increase of €113 million, mainly reflects the line-by-line consolidation of the Fiat Powertrain Polska Sp. z.o.o. In 2009, the column change in the scope of consolidation, showing an overall increase of €53 million, mainly reflected the line-by-line consolidation of the entity Fiat Automobiles Serbia Doo Kragujevac.

In 2010, exchange gains of €404 million principally reflect the appreciation of the U.S. dollar, the Brazilian real and the Polish zloty against the Euro. In 2009, exchange gains of €399 million reflect the appreciation of the Brazilian real against the Euro, partially offset by the depreciation of the U.S. dollar and the Argentine peso against the Euro.

Fiat Group

Revaluations and writedowns consist of the Group's share of the profit or loss for the year of investments accounted for using the equity method for €190 million (€18 million in 2009). In 2010 and in 2009, this item also includes impairment losses recognized during the period for investments accounted for using the cost method.

In 2010, the reduction of €5 million in the change in the scope of consolidation (€2 million in 2009) reflects the line-by-line consolidation of certain minor subsidiaries.

In 2010, acquisitions and capitalizations amount to €132 million (€63 million in 2009) of which €34 million (€48 million in 2009) relates to the capital increase made by the 50/50 jointly controlled entity Fiat India Automobiles Private Limited and €50 million relating to the capital increase made by the 50/50 jointly controlled entity GAC Fiat Automobiles C. Ltd.. The item also refers to the capitalizations of other, minor, companies.

The column Disposals and other changes, showing a reduction of €122 million, consists of a decrease of €94 million as the result of the distribution of dividends by companies accounted for using the equity method (of which €26 million received by FGA Capital), other minor decreases of €36 million, the positive changes of €5 million in the cash flow hedge reserve of Tofas Turk Otomobil Fabrikasi A.S. and of €3 million in the cash flow hedge reserve of FGA Capital.

In 2009, Disposals and other changes, showing a reduction of €71 million, consisted of a decrease of €53 million as the result of the distribution of dividends by companies accounted for using the equity method.

Holdings System

Revaluations and writedowns consist of the Group's share of the profit of Sequana, accounted for using the equity method, for €9 million (€5 million in 2009). This item also includes impairment losses of €9 million recognized to adjust the carrying amount on the remaining Intesa Sanpaolo shares to stock market prices at December 30, 2010.

Positive fair value adjustments recognized in equity total €405 million (€222 million in 2009) and include the fair value adjustment relating to the investments in SGS for €404 million and Banijay Holding for €3 million, as well the derecognition of the positive fair value relating to the investment in Intesa Sanpaolo for €2 million.

In 2010, acquisitions and capitalization amounting to €111 million (€13 million in 2009) include acquisitions of investments made by the subsidiary Exor S.A. Further details are provided in the details that follow.

In 2010, disposals and other changes, showing a reduction of €122 million (€245 million in 2009), consist mainly of the derecognition of the carrying amount of the interest in Intesa Sanpaolo sold for €96 million (€232 million in 2009) and the decrease deriving from the share of the reserves reimbursed by Gruppo Banca Leonardo to Exor S.A. for €27 million.

Rizzoli Corriere della Sera MediaGroup S.p.A. is a listed company in which Fiat is one of the major shareholders, is represented on the board of directors and is a party to a shareholder agreement. As a result the company is classified as an associate. In order to account for this investment using the equity method in the consolidated financial statements of Fiat at December 31, 2010, reference was made to its most recent published financial statements being its Interim Management Statements at September 30, 2010, as those to be issued for 2010 will be published subsequent to the publication of the consolidated financial statements of the Fiat Group.

At December 31, 2010, the item investments, whose carrying amount is measured at fair value with changes recognized directly in Other comprehensive income, includes the investment in Assicurazioni Generali S.p.A. of €3 million (€3 million at December 31, 2009); the item includes also the investment of €14 million in Fin. Priv. S.r.l. (€18 million at December 31, 2009)

Investment in Chrysler

The original investment in Chrysler held by the Fiat Group continues to be carried at nil at December 31, 2010 as an investment in an associate accounted for using the equity method. Under paragraphs 29 and 30 of IAS 28, the Fiat Group is not required to recognize the share of any losses of the associate for as long as Chrysler remains an associate, that is, carried at nil in the financial statements as it has no obligation in respect of those losses. If Chrysler subsequently reports profits, the Fiat Group may only recognize these once its share of the profits equals the share of losses not recognized in prior periods.

For completeness, it is noted that having reached one of the predetermined so called Performance Events envisaged in the Chrysler-Fiat strategic alliance agreements, on January 10, 2011 Fiat received without consideration an additional interest of 5% in Chrysler, and therefore its total holding in Chrysler is currently equal to 25%. Further details about the Fiat Group's rights relating to the investment in Chrysler may be found in Note 30.

Investments measured at fair value with offsetting entry to equity

At December 31, 2010, the changes were as follows:

The increase in the investment in **SGS** of €404 million is due to the fair value adjustment at December 30, 2010 based on the per share trading price of SGS stock at December 30, 2010 equal to CHF 1,569 (corresponding to €1,254.8 at the exchange rate of 1.2504).

The net increase in the investment in **Gruppo Banca Leonardo** is determined by the purchases of a further 12,627,769 ordinary shares (4.86% of share capital), with an investment of €30 million, and by the recognition of the reimbursement of reserves as a deduction from the carrying amount of the investment for €27 million.

The increase in the investment in **Banijay Holding** for €5 million comes from the subscription of new shares by Exor S.A. for an equivalent amount of €2 million and the positive fair value adjustment of €3 million.

At December 31, 2010, the reduction in the investment in **Intesa Sanpaolo** of €107 million is mainly due to the sale of 30 million shares (0.25% of ordinary capital stock) for net proceeds of €90 million and a net gain of €1 million. The derecognition of the carrying amount (-€95 million) of the interest sold includes the original purchase cost of €89 million and the cumulative positive fair value change of €6 million; the latter was recognized as a deduction from the statement of comprehensive income. The remaining stake has been aligned to the stock trading price at December 30, 2010 (€2.042 per share) generating a total impairment charge recognized in the income statement for €9 million.
In fact, it was deemed that the stock trading price, consistently below the original cost, represented objective evidence of an impairment loss.

At December 31, 2009, there were still call options sold on 40,000,000 Intesa Sanpaolo shares expiring in January and March 2010 at a strike price of €3 per share. At the established expiration date, 30,000,000 options were exercised with the consequent sale of the underlying shares, as described above. Therefore the premiums received, adjusted to fair value at December 31, 2009, were recognized as financial income (€5,042 thousand).
The remaining 10,000,000 options were not exercised and thus generated financial income of €2,721 thousand.

On December 6, 2010, Exor S.A. invested in **Copacabana Prince Participações** (€15 million) and **BTG Investments** (€4 million) as part of the agreement sealed between BTG Pactual and a consortium of leading international investors.

Investments measured at cost

The investment in **Almacantar** was acquired on April 28, 2010 by subscription to preferred shares and payment of the minimum allowed by law (25% of capital, equal to €2.5 million).

The **Jardine Rothschild** investment was acquired on September 30, 2010 as part of the agreement between Exor S.A., the Jardine Matheson Group and Rothschild.

Securities measured at fair value with offsetting entry to equity

The increase is due to the investments in **NoCo B** made in 2010, net of the relative reimbursements, for a total of €18 million and the positive fair value adjustment of €4 million.

The increase in the share of the **RHO Immobiliare Fund**, (€1 million) is due to the positive fair value adjustment certified by the Fund's own manager.

Held-to-maturity securities

Held-to-maturity securities include:

- **Perfect Vision Limited converting bonds**, subscribed in 2008 by Exor S.A., yielding a fixed 5% rate up to the established conversion date in 2013, which will deliver a quota of shares equal to 42.5% of the capital of Vision Investment Management Limited.
  At December 31, 2010, the share of capital, measured at amortized cost, is equal to €76 million, including interest capitalized from 2008 to 2010 of €9 million. The positive change of €9 million is determined by the capitalization of interest income for the year 2010 of €3 million and the gain on the exchange difference of about €6 million. The embedded derivative recorded in financial payables amounts to €51 million and the negative fair value adjustment of €17 million is recognized in the 2010 income statement;
- **bonds** issued by leading counterparts and quoted on active and open markets which the Holdings System intends, and is able to hold, until their natural reimbursement date as an investment of a part of its available cash so that it can receive a constant attractive flow of financial income.

Holdings System

The key consolidated data of the Sequana Group is as follows:

€ in millions	**12/31/2010**	12/31/2009
Total assets	**2,988**	2,875
Current and non-current liabilities	**2,174**	2,133
Revenues	**4,333**	4,088
Result	**32**	19
Of which EXOR's share	**9**	5
Net financial debt	**674**	651
Fair value of EXOR's share based on the trading price at the end of December	**163**	105

Goodwill included in the Sequana Group consolidated statements amounts to €643 million (€635 million at December 31, 2009). In 2010, no impairment charges were recognized (€4 million in 2009).

Listed investments

At December 31, 2010, the stock trading prices of investments in listed jointly controlled entities and listed associates of the Fiat Group are as follows:

€ in millions	**Carrying amount 12/31/2010**	**Trading price 12/31/2010**
Tofas - Turk Otomobil Fabrikasi Tofas A.S.	**304**	**728**
Rizzoli Corriere della Sera MediaGroup S.p.A.	**101**	**79**
Turk Traktor Ve Ziraat Makineleri A.S.	**79**	**227**
Al-Ghazi Tractors Ltd.	**22**	**37**
Total Listed investments	**506**	**1,071**

At December 31, 2010, the stock trading prices of listed investments of the Holdings System are as follows:

€ in millions	**Carrying amount 12/31/2010**	**Trading price 12/31/2010**
SGS S.A.	**1,472**	**1,472**
Sequana S.A.	**231**	**163**
Intesa Sanpaolo S.p.A.	**20**	**20**
Total Listed investments	**1,723**	**1,655**

17. Leased assets

The Fiat Group leases out assets, mainly their own products, as part of their financial services businesses of the sectors Trucks and Commercial Vehicles and the Agricultural and Construction Equipment.
This item changed as follows in 2010 and 2009:

€ in millions	12/31/2009	Additions	Depreciation	Translation differences	Disposals and other changes	**12/31/2010**
Gross carrying amount	632	291		55	(304)	**674**
Depreciation and impairment	(175)		(95)	(13)	101	**(182)**
Net carrying amount of Leased assets 2010	457	291	(95)	42	(203)	**492**

€ in millions	12/31/2008	Additions	Depreciation	Translation differences	Disposals and other changes	12/31/2009
Gross carrying amount	674	219		3	(264)	632
Depreciation and impairment	(169)		(91)		85	(175)
Net carrying amount of Leased assets 2009	**505**	**219**	**(91)**	**3**	**(179)**	**457**

At December 31, 2010, minimum lease payments from non-cancellable operating leases amount to €216 million (€178 million at December 31, 2009) and fall due as follows:

€ in millions	**12/31/2010**	12/31/2009
Within one year	**98**	83
Between one and five years	**116**	94
Beyond five years	**2**	1
Total Minimum lease payments	**216**	**178**

18. Inventories

€ in millions	**12/31/2010**	12/31/2009
Raw materials, supplies and finished goods	**8,198**	8,671
Gross amount due from customers for contract work	**147**	79
Total Inventories	**8,345**	**8,750**

There were no inventories pledged as security at December 31, 2010 and 2009.

At December 31, 2010, total Inventories amount to €8,345 million and mainly refer to the Fiat Group (€8,341 million).

Fiat Group

Assets sold with a buy-back commitment by Fiat Group Automobiles sector amount to €637 million at December 31, 2010 and assets which are no longer subject to operating lease arrangements or buy-back commitments and are held for sale by Trucks and Commercial Vehicles and Agricultural and Construction Equipment sectors amount to €159 million at December 31, 2010.

At December 31, 2010, Inventories include those measured at net realizable value (estimated selling price less the estimated costs of completion and the estimated costs necessary to make the sale) amounting to €2,698 million (€2,958 million at December 31, 2009), referring to the Fiat Group.

The amount of inventory writedowns recognized as an expense during 2010 is €489 million (€664 million in 2009). Amounts recognized as income from the reversal of writedowns on items sold during the year were not significant.

The majority of the amount due from customers for contract work relates to the Production Systems sector and can be analyzed as follows:

€ in millions	**12/31/2010**	12/31/2009
Aggregate amount of costs incurred and recognized profits (less recognized losses) to date	**1,245**	1,056
Less: Progress billings	**(1,203)**	(1,058)
Construction contracts, net of advances on contract work	**42**	**(2)**
Gross amount due from customers for contract work as an asset	**147**	79
Less: Gross amount due to customers for contract work as a liability included in Other current liabilities	**(105)**	(81)
Construction contracts, net of advances on contract work	**42**	**(2)**

At December 31, 2010 and 2009, the amount of retentions by customers on contract work in progress was not significant.

19. Current receivables and Other current assets

The composition of the caption is as follows:

€ in millions	**Fiat Group (as a whole)**	**C&W Group**	**Alpitour Group**	**Juventus F.C.**	**Holdings System**	**Eliminations**	**Consolidated EXOR Group**

Total current receivables							
- Due within one year	13,595	243	93	53	35	(30)	13,989
- Due between one and five years	5,529						5,529
- Due beyond five years	423				45		468
Total Current receivables at December 31, 2009	**19,547**	**243**	**93**	**53**	**80**	**(30)**	**19,986**

At December 31, 2010, total current receivables include receivables sold and financed through both securitization and factoring transactions of €8,089 million (€6,588 million at December 31, 2009) by the Fiat Group which do not meet IAS 39 derecognition requirements. These receivables are recognized as such in the Group financial statements even though they have been legally sold; a corresponding financial liability is recorded in the consolidated statement of financial position as asset-backed financing (see Note 27).

Trade receivables

Trade receivables of the EXOR Group amount to €4,370 million at December 31, 2010. The total balance increased by €413 million compare to December 31, 2009.
Trade receivables are shown net of allowances for doubtful accounts of €499 million at December 31, 2010 (€561 million at December 31, 2009). Changes in these allowances, which are calculated on the basis of historical losses on receivables, are as follows in 2010:

€ in millions	**Fiat Group (as a whole)**	**C&W Group**	**Alpitour Group**	**Juventus F.C.**	**Holdings System**	**Consolidated EXOR Group**
Allowances for doubtful accounts at December 31, 2009	524	13	24			561
Provision	96	3	4	1		104
Use and other changes	(162)	(8)	(3)			(173)
Change in the scope of consolidation	7					7
Allowances for doubtful accounts at December 31, 2010	**465**	**8**	**25**	**1**		**499**

The carrying amount of trade receivables is considered to be in line with their fair value.
At December 31, 2010, trade receivables of €8 million of the Fiat Group were pledged as security for loans obtained (€14 million at December 31, 2009).

Receivables from financing activities of the Fiat Group

Receivables from financing activities include the following:

€ in millions	**12/31/2010**	12/31/2009
Retail financing	**6,950**	6,239
Finance leases	**1,055**	1,110
Dealer financing	**5,581**	5,108
Supplier financing	**48**	102
Current financial receivables from jointly controlled financial services entities	**12**	14
Financial receivables from companies under joint control, associates and unconsolidated subsidiaries	**49**	55
Other	**79**	67
Total Receivables from financing activities	**13,774**	**12,695**

Total receivables from financing activities of the Fiat Group increased by €1,079 million over the preceding year. Excluding translation exchange gains, arising mainly from the depreciation of the Euro against the U.S. dollar, the Australian dollar, the Canadian dollar and the Brazilian real, and writedowns, the item increased by €259 million due to the rise in volumes financed in Brazil, net of the gradual settlement of the loans disbursed in Brazil which fell under the scope of debt relief programs (see Note 33).

Receivables from jointly controlled financial services entities include financial receivables by the FGA Capital Group.

Receivables from financing activities of the Fiat Group are shown net of an allowance for doubtful accounts determined on the basis of specific insolvency risks. At December 31, 2010, the allowance amounts to €595 million (€450 million at December 31, 2009). Changes in the allowance accounts during the year are as follows:

€ in millions	12/31/2009	Provision	Use and other changes	**12/31/2010**
Retail financing	230	192	(91)	**331**
Finance leases	80	22	1	**103**
Dealer financing	90	52	(27)	**115**
Supplier financing	4		(2)	**2**
Other	46		(2)	**44**
Total allowance on Receivables from financing	**450**	**266**	**(121)**	**595**

Finance lease receivables mainly relate to vehicles of the Trucks and Commercial Vehicles and Agricultural and Construction Equipment sectors of the Fiat Group leased out under finance lease arrangements. The interest rate implicit in the lease is determined at the commencement of the lease for the whole lease term. The average interest rate implicit in total finance lease receivables varies depending on prevailing market interest rates.

The item may be analyzed as follows stated gross of an allowance of €103 million at December 31, 2010 (€80 million at December 31, 2009):

€ in millions	Due within one year	Due between one and five years	Due beyond five years	Total
Receivables for future minimum lease payments	540	674	100	1,314
Less: unrealized interest income	(54)	(82)	(20)	(156)
Present value of future minimum lease payments at December 31, 2010	**486**	**592**	**80**	**1,158**
Receivables for future minimum lease payments	560	731	76	1,367
Less: unrealized interest income	(61)	(104)	(12)	(177)
Present value of future minimum lease payments at December 31, 2009	**499**	**627**	**64**	**1,190**

No contingent rents were recognized as finance leases during 2010 or 2009 and unguaranteed residual values at December 31, 2010 and 2009 are not significant.

Receivables for dealer financing are typically generated by sales of vehicles and are generally managed under dealer network financing programs as a component of the portfolio of the financial services companies. These receivables are interest bearing, with the exception of an initial limited, non-interest bearing period. The contractual terms governing the relationships with the dealer networks vary from sector to sector and from country to country, although payment terms range from two to six months.

The fair value of receivables from financing activities at December 31, 2010 amounts to €13,959 million (€12,876 million at December 31, 2009). These fair values have been calculated using a discounted cash flow method based on the following discount rates, adjusted where necessary to take account of the specific insolvency risk of the underlying financial instrument.

in %	EUR	USD	GBP	CAD	AUD	BRL	PLN
Interest rate for six months	1.23	0.46	1.05	1.46	5.18	11.62	4.16
Interest rate for one year	1.51	0.78	1.51	1.78	5.20	12.04	4.43
Interest rate for five years	2.56	2.22	2.67	2.61	5.89	12.21	5.47

Other current assets

An analysis of other current assets is as follows:

€ in millions	**Fiat Group (as a whole)**	**C&W Group**	**Alpitour Group**	**Juventus F.C.**	**Holdings System**	**Eliminations**	**Consolidated EXOR Group**
Other tax receivables for VAT and other indirect taxes	1,239	1	5	3			1,248
Receivables from employees	66	10					76
Accrued income and prepaid expenses	276	22		8	1		307
Other	881	34	7	22	2	(1)	945
Total Other current assets 12/31/2010	**2,462**	**67**	**12**	**33**	**3**	**(1)**	**2,576**
Other tax receivables for VAT and other indirect taxes	1,595	3	4	1			1,603
Receivables from employees	67	9					76
Accrued income and prepaid expenses	249	19		3	1		272
Other	867	28	8	20	1		924
Total Other current assets 12/31/2009	**2,778**	**59**	**12**	**24**	**2**	**0**	**2,875**

At the balance sheet date, the carrying amount of other current assets is considered to be in line with fair value.

At December 31, 2010, other current assets of the Fiat Group also include an amount of €88 million (€593 million at December 31, 2009) due from the tax authorities relating to eco-incentives in Italy; the Group will be able to recover this balance by offsetting it against future payments due to the tax authorities.

At December 31, 2010, other current assets of the Alpitour Group include receivables from insurance companies of €3 million.

At December 31, 2010, other current assets of Juventus Football Club comprise receivables from soccer clubs from the sale of players.

20. Current investments and securities

The item consists mainly of short-term or marketable equity shares or bonds which represent temporary investments, but which do not satisfy all the requirements for being classified as cash equivalents. In particular:

€ in millions	Fiat Group (as a whole)	Alpitour Group	Holdings System	Consolidated EXOR Group
Equity shares held for trading	34		342	376
Bonds available for sale	62			62
Bonds and mutual funds held for trading	147	3	370	520
Total bonds and mutual funds	209	3	370	582
Investments and current securities at December 31, 2010	**243**	**3**	**712**	**958**
Equity shares held for trading	46		43	89
Held to maturity securities (amortized cost)	0		11	11
Bonds available for sale	53			53
Bonds and mutual funds held for trading	164	3	541	708
Total bonds and mutual funds	217	3	552	772
Investments and current securities at December 31, 2009	**263**	**3**	**595**	**861**

Current investments and securities include equity shares listed on major international markets, bonds issued by leading issuers and mutual funds. Such financial instruments, if held for trading, are measured at fair value, with recognition of the fair value in the income statement; if held to maturity, they are measured at amortized cost.

21. Other financial assets and Other financial liabilities

These items consist of derivative financial instruments measured at fair value at the balance sheet date. Specifically:

	12/31/2010		12/31/2009

Fiat Group

The fair value of derivative financial instruments is determined by taking into consideration market parameters at the balance sheet date and using valuation techniques widely accepted in the financial business environment. In particular:

- the fair value of forward contracts and currency swaps is determined by taking the prevailing exchange rate and interest rates in the two currencies at the balance sheet date;

- the fair value of currency options is determined using valuation techniques based on the Black-Scholes model or binomial models and market parameters at the balance sheet date (in particular exchange rates, interest rates and volatility rates);

- the fair value of interest rate swaps and forward rate agreements is determined by using the discounted cash flow method;

- the fair value of derivative financial instruments acquired to hedge interest rate risk and currency risk is determined using the exchange rates prevailing at the balance sheet date and the discounted cash flow method;

- the fair value of equity swaps is determined using market prices at the balance sheet date;

- the fair value of derivatives hedging commodity price risk is determined by using the discounted cash flow method, taking the market parameters at the balance sheet date (and in particular the future price of the underlying and interest rates).

The overall increase in Other financial assets, from €636 million at December 31, 2009 to €604 million at December 31, 2010 and in Other financial liabilities from €464 million at December 31, 2009 to €402 million at December 31, 2010 is mostly due to changes in exchange rates and interest rates during the year, and to a positive fair value arising from the equity swaps on Fiat S.p.A. ordinary shares (€107 million).

As this item consists principally of hedging instruments, the change in their value is compensated by the change in the value of the hedged item.

Derivatives for trading consist principally of the following types:

- derivatives (mostly currency based derivatives) acquired to hedge receivables and payables subject to currency risk and/or interest rate risk which are not formally designated as hedges at Group level;

- derivatives relating to Fiat shares (equity swaps) which are described further below;

- an embedded derivative in a bond issue in which the yield is determined as a function of trends in the inflation rate and related hedging derivative, which converts the exposure to floating rate. The total value of the embedded derivative is offset by the value of the hedging derivative.

Holdings System
EXOR S.p.A. also assesses and manages its exposure to fluctuations in interest rates in accordance with its financial management policies and uses derivative financial instruments to fix some of the financing obtained at a pre-set interest rate. Specifically, only one type of derivative financial instrument, interest rate swap, has been used to manage fluctuations in interest rate risks on bank debt.

Alpitour Group
The Alpitour Group regularly assesses its exposure to various types of risks and manages these risks using traditional and derivative instruments in accordance with its management and control policy. This policy does not allow the use of derivatives for speculative reasons but they are used for the management of fluctuations in exchange rates, interest rates and fuel prices for hedging purposes.

The Alpitour Group, and particularly the aviation division, is subject to the risk of fluctuations in fuel prices largely in connection with international political stability and other external factors. Since fuel is a primary factor in air transport, price fluctuations could have a significant impact on the Group's margin and, consequently, the exposure to fuel price risk is hedged by commodity swaps and zero cost collars.
The exposure to exchange rate risks on commercial transactions in foreign currencies is mainly hedged by forward and knock-in forward contracts.
The exposure to interest rate risks on medium- and long-term loans is mainly hedged by interest rate swaps and zero cost collars.

At December 31, 2010 and 2009, the notional amount of outstanding derivative financial instruments is as follows:

€ in millions	Fiat Group (as a whole)	C&W Group	Alpitour Group	Juventus F.C.	Holdings System	Consolidated EXOR Group
Currency risk management	12,561	103	23	0	0	12,687

Fiat Group

At December 31, 2010, the notional amount of other derivative instruments consists of:

- For €204 million (€204 million at December 31, 2009), the notional amount of the two equity swaps, renewed in 2010 and expiring in 2011, arranged to hedge the risk of an increase in the Fiat share price above the exercise price of the stock options granted to the chief executive officer in 2004 and 2006 (see Note 24). At December 31, 2010, the equity swaps have a total positive fair value of €115 million (a positive fair value of €8 million at December 31, 2009). Although these equity swaps were entered into for hedging purposes, they do not qualify for hedge accounting under IFRS and accordingly are defined as trading derivative financial instruments. Following the demerger these equity swaps make reference to the performance of the stock market value of the basket of shares made up of the Fiat S.p.A. share and the Fiat Industrial S.p.A. share.

- For €14 million (€14 million at December 31, 2009), the notional amount of the derivative embedded in a bond with a return linked to inflation rates, as well as the notional amount of the related hedging derivative, which converts the exposure to floating rate.

- For €14 million (€26 million at December 31, 2009), the notional amount of derivatives linked to commodity prices hedging specific exposures arising from supply agreements. Under these agreements, there is a regular updating of the prices on the basis of the performance in the quoted prices of the raw material.

C&W Group

The notional amount at December 31, 2010, $137 million (€103 million) refers to exchange forwards used by C&W Group to hedge currency risk on commercial transactions. At December 31, 2010, the fair value was a negative $1.4 million, equal to €1 million ($2.3 million, equal to €1.6 million at December 31, 2009).

Alpitour Group

The notional amount includes:
- forward knock contracts for a total notional amount of €23 million to manage the risk of changes in the currency rates to hedge exposure in foreign currency for the following year. The fair value of these hedges at October 31, 2010 is estimated at a negative €944 thousand (a negative €994 thousand at October 31, 2009);
- interest rate swap and zero cost collars for a total notional amount of €19 million to manage the risk of changes in the interest rates on loans. The fair value of these hedges at October 31, 2010 is estimated at a negative €214 thousand (a negative €451 thousand at October 31, 2009);

- interest rate swap contracts put in place by the subsidiary Neos for a total residual notional amount of €36 million to manage interest rate risk on aircraft lease transactions. The fair value of these hedges at October 31, 2010 is estimated at a negative €3,726 thousand (a negative €2,473 thousand at October 31, 2009).

Juventus FC

The notional amount at December 31, 2010 refers to:

- "CAP" option contracts to manage the risk of changes in the interest rates on two loan contracts for a total of €60 million put in place with Istituto per il Credito Sportivo for the construction of the new stadium. At December 31, 2010, the positive fair value change in the two options (€177 thousand) is recognized in the income statements since the fair value of the option can be ascribed entirely to the time value of the transaction;
- interest rate swap contracts put in place on April 13, 2010 to hedge the pre-amortization interest rate on the loan for a total of €54 million secured from Istituto per il Credito Sportivo for the construction of the new stadium and to hedge the interest rate on the finance lease with Unicredit Leasing S.p.A. relating to the Vinovo Training Center. The fair value is a negative €381 thousand.

Holdings System

The notional amount of the financial instruments to manage the interest rate risk includes the notional amount of an interest rate contract put in place by EXOR S.p.A. on the amount of the loan of €25 million in order to guarantee the fixed rate for the entire duration of the loan. At December 31, 2010, the fair value is a negative €52 thousand.

At December 31, 2009, EXOR S.p.A. had in place interest rate swap contracts on € 150 million of debt, of which € 125 million expired in 2010.

The notional amount of other derivative financial instruments relates to the embedded derivative relating to the Perfect Vision Limited convertible bonds. The fair value at December 31, 2010 is a negative €51 million.

The following table provides an analysis by due date of outstanding derivative financial instruments at December 31, 2010 based on their notional amounts:

Commodities price risk			
Decrease (Increase) in cost of sales	(5)		(5)
Taxes - income (expenses)	11		11
Ineffectiveness - overhedges	8		8
Net gains (losses) on cash flow hedges recognized in the income statement 2009	**(310)**	**(6)**	**(316)**

In reference to existing derivative financial instruments put in place, the EXOR Group reversed from other comprehensive income to the income statement previously recognized losses of €271 million in 2010 (losses of €316 million in 2009) net of the tax effect.

Fiat Group

The effects arising on the income statement mainly refer to the management of the currency risk and, to a lesser extent, to the hedges relating to the debt of the Group's financial companies and Group treasury.

The policy of the Group for managing currency risk normally requires that future cash flows from trading activities which will occur for accounting purposes within the following twelve months, and from orders acquired (or contracts in progress), whatever their due dates, be hedged. As a result, it is considered reasonable to suppose that the hedging effect arising from this and recorded in the cash flow hedge reserve will be recognized in income, mainly during the following year.
The interest rate and currency derivatives treated as cash flow hedges were entered into by the North American treasury for the purpose of hedging the bond issued in Euros and maturing in 2017; the amount recorded in the cash flow hedge reserve will be recognized in income according to the timing of the flows of the underlying bond.

Where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows of a recognized asset or liability or a highly probable forecast transaction and could affect the income statement, the effective portion of any gain or loss on the derivative financial instrument is recognized directly in other comprehensive income. The cumulative gain or loss is removed from other comprehensive income and recognized in the income statement at the same time as the economic effect arising from the hedged item affects income. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the Income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in other comprehensive income and is recognized at the same time as the related transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in other comprehensive income is recognized in the Income statement immediately.

The ineffectiveness of cash flow hedges of the Fiat Group was not material in 2010 or 2009.
In 2010, there was an overall negative economic effect of €19 million (positive effect of €8 million in 2009) to the Fiat Group from hedges of assets and liabilities which subsequently turned out to be in excess of the future flows being hedged (overhedges); the impact was mainly due to the loss of certain exposures to interest rate risk.

Fair value hedges

The gains and losses arising from the valuation of interest rate and currency derivatives (mostly for managing currency risk) and interest rate derivatives (for managing the interest rate risk) recognized in accordance with fair value hedge accounting and the gains and losses arising from the respective hedged items are set out in the following table:

€ in millions	**Fiat Group (as a whole)**
Currency risk	
Net gains (losses) on qualifying hedges	(50)
Fair value changes in hedged items	50
Interest rate risk	
Net gains (losses) on qualifying hedges	26
Fair value changes in hedged items	(26)
Net gains (losses) on fair value hedges recognized in the income statement 2010	**0**
Currency risk	
Net gains (losses) on qualifying hedges	22
Fair value changes in hedged items	(22)
Interest rate risk	
Net gains (losses) on qualifying hedges	(15)
Fair value changes in hedged items	17
Net gains (losses) on fair value hedges recognized in the income statement 2009	**2**

For the Fiat Group, the ineffective portion of transactions treated as fair value hedges in 2010 was not significant (gains of €2 million in 2009).

22. Cash and cash equivalents

Cash and cash equivalents include:

€ in millions	Fiat Group (as a whole)	C&W Group	Alpitour Group	Juventus F.C.	Holdings System	Consolidated EXOR Group
Cash in hand and at banks and post offices	10,930	59	92	5	67	11,153
Cash with a pre-determined use	694					694
Money market securities	4,029	18			294	4,341
Total Cash and cash equivalents at 12/31/2010	**15,653**	**77**	**92**	**5**	**361**	**16,188**
Cash in hand and at banks and post offices	9,422	51	90	26	218	9,807
Cash with a pre-determined use	530					530
Money market securities	2,274	1			244	2,519
Total Cash and cash equivalents at 12/31/2009	**12,226**	**52**	**90**	**26**	**462**	**12,856**

Amounts shown are readily convertible into cash and are subject to an insignificant risk of changes in value. The carrying amount of cash and cash equivalents is considered to be in line with their fair value at the balance sheet date.

Cash with a pre-determined use of the Fiat Group mainly consists of amounts whose use is restricted to the repayment of the debt relating to securitizations classified as Asset-backed financing.

The credit risk associated with cash and cash equivalents is considered not significant, because it mainly relates to deposits spread across primary national and international financial institutions.

23. Assets and liabilities held for sale

At December 31, 2010, assets and liabilities held for sale include some properties and buildings of the Fiat Group Automobiles Sectors and the amount of an investment in a minor company in Brazil which was classified as held for sale at the acquisition date.

At December 31, 2009, such items, besides those mentioned previously, also comprised the amount of some properties and buildings of the Comau and Agricultural and Construction Equipment sectors and also TargaRent S.r.l. sold in the first quarter of 2010.

24. Equity

Share capital

At December 31, 2010, the share capital of EXOR, fully subscribed to and paid-in, amounts to €246,229,850 and consists of 160,259,496 ordinary shares (65.09% of share capital), 76,801,460 preferred shares (31.19% of share capital) and 9,168,894 savings shares (3.72% of share capital) all with a par value of €1 each.

At December 31, 2009, share capital included €1,342 thousand of transfers from the revaluation reserve appropriated in the past by the merged company IFIL which, in the event of distribution, will form part of the taxable income of the company.

The directors have the right, for a period of five years from the date of the resolution passed on May 14, 2008, to increase, one or more times, also in divisible form, the share capital up to an amount of €561,750,000.

The ordinary and preferred shares are registered shares while the savings shares can either be registered or bearer shares, as elected by the shareholders, or as set out by law. The preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code and the second paragraph of art. 13 of the bylaws (regulations for conducting shareholders' meetings). The savings shares do not have voting rights in the shareholders' meetings. Pursuant to art. 146 of Legislative Decree 58/98, the savings shares have voting rights in the special shareholders' meetings of the holders of savings shares.

Pursuant to art. 27 of the bylaws, the profit of each year is appropriated as follows:

- 5% to the legal reserve until it reaches one-fifth of share capital;
- the remaining profit to the shares, as dividends, unless otherwise resolved by the shareholders' meeting, in accordance with the applicable provisions, taking into account that, in the order of priority (i) the savings shares shall be entitled to a preference dividend, cumulative according to the following second paragraph, equal to 31.21% of their par value and a dividend higher than that of the ordinary shares equal to 7.81% of the same par value, and (ii) the preferred shares shall be entitled to a preference dividend and higher than that of the ordinary shares by 5.17% of their par value, which is not cumulative from one year to the next.

When in any one year, the dividends attributed to the savings shares are lower than that indicated above, the difference shall be added to the preference dividend of the next two years.

In the event the ordinary and/or savings shares are delisted, the preference dividend and the dividend higher than that of the ordinary shares to which the savings shares are entitled shall automatically be increased to the extent that they are equal to, respectively, 32.15% and 8.75%.

In the event of the distribution of reserves, the savings shares shall have the same rights as the other shares.

The board of directors, during the year and since believes it possible and opportune on the basis of the operating results, may resolve to pay an interim dividend for the year.

In accordance with art. 28 of the bylaws, dividends that are not claimed within five years of the date they become payable will be statute-barred and become the property of the Company and appropriated to the extraordinary reserve.

In accordance with art. 30 of the bylaws, in the event of a wind-up, the assets of the Company shall be distributed in the following order of priority:

- savings shares shall have a pre-emptive right up to the amount of €3.78 per each savings share;
- the holders of preferred shares shall have a pre-emptive right up to the par value of the same shares;
- ordinary shares shall have up to the par value of the same shares;
- all three classes of stock shall have any balance remaining in a proportional amount.

EXOR thus aims to maintain an adequate level of capitalization which allows it to generate a satisfactory economic return for shareholders and guarantee economic access to external sources of financing.

EXOR constantly monitors changes in the consolidated debt level of the Holdings System in relation to the current asset value of its investments and dividend flows from the operating holdings.

Dividends paid

Dividends paid by EXOR S.p.A. for the years 2009 and 2008 are analyzed as follows.

		Proposed dividends	
Class of shares	**Number of shares**	**Per share (€)**	**Total (€ ml)**
Ordinary shares	157,245,496	0.27	42.5
Preferred shares	69,307,160	0.3217	22.3
Savings shares	8,945,934	0.3481	3.1
Dividends paid in 2010 referring to the year 2009			67.9

		Dividends proposed	
Class of shares	**Number of shares**	**Per share (€)**	**Total (€ ml)**
Ordinary shares	160,147,496	0.319	51.1
Preferred shares	71,368,160	0.3707	26.4
Savings shares	9,155,694	0.458	4.2
Dividends paid in 2009 referring to the year 2008			81.7

Treasury shares

Under the treasury shares buyback program approved by the board of directors on March 25, 2009 and May 11, 2010, during 2010, EXOR purchased 1,559,500 ordinary shares (0.97% of the class) at the average cost per share of €14.45 and total of €23 million, 3,274,484 preferred shares (4.26% of the class) at the average cost per share of €10.02 and total of €33 million, and also 213,295 savings shares (2.33% of the class) at the average cost per share of €11.70 and total of €2 million. The overall investment amounts to €58 million.

At December 31, 2010 EXOR S.p.A. held the following treasury shares:

		% of	Carrying amount	
Class of shares	Number of shares	class	Per share (€)	Total (€ ml)
Ordinary shares	4,109,500	2.56	12.68	52
Preferred shares	10,239,784	13.33	11.13	114
Savings shares	421,695	4.60	10.00	4
				170

Other comprehensive income

Other comprehensive income may be analyzed as follows:

€ in millions	**2010**	2009
Effective portion of gains/(losses) on cash flow hedges arising during the year	**(145)**	61
Effective portion of gains/(losses) on cash flow hedges reclassified to profit or loss	**324**	328

Total		**8,687**	**434**	**9,121**		8,766	(608)	8,158

Non-controlling interests of C&W Group

At December 31, 2010, the capital issued by C&W Group is owned 69.83% (74.86% of capital outstanding) by EXOR and 30.17% (25.14% of capital outstanding) by its employees (the "Minority Shareholders").
C&W Group has an agreement with the Minority Shareholders (the "Minority Shareholders Agreement" or "MSA") which outlines all the rights and obligations of C&W Group and the Minority Shareholders with respect to the ownership of the minority shares.

According to IFRS 2 – *Share-based Payment* which is applicable in the circumstance, since the shares come from stock option plans, the non-controlling shares constitute a compound financial instrument comprising a liability component and an equity component.
To value the liability component, the C&W Group estimated, based on historical employment attrition rates and related actual and expected stock repurchases the extent to which the Non-controlling Shareholders would cease to be employees or independent contractors of C&W Group and, therefore, exercise their Put Rights before the occurrence of an IPO or sale of C&W by EXOR.

At December 31, 2010, the liability was estimated to be $40 million (€30 million); at December 31, 2009, the liability was estimated to be $47 million (€33 million). The estimates take into account the most recent appraised fair value of the C&W Group shares. The estimated cash disbursement for the purchase of the shares held by the Non-controlling shareholders in 2011 amounts to $33 million, equal to €25 million ($12 million, equal to €8 million at December 31, 2009).

Details of the change in liabilities are the following:

	$ in millions	€ in millions
Balance at December 31, 2009	**47**	**33**
Used to purchase shares	(16)	(12)
Adjustments to the income statement	9	7
Translation difference		2
Balance at December 31, 2010	**40**	**30**

Moreover, having recorded a part of the equity attributable to the Minority Shareholders of C&W Group as a liability, the number of C&W Group shares to be considered as equity outstanding is lower. For this reason, EXOR has consolidated C&W Group on the basis of an ownership percentage of 78.5581%. Such percentage is calculated as a percentage of the number of C&W Group shares held by EXOR (511,015) to the capital issued by C&W Group (731,850) net of treasury stock held (49,174) and net of the shares held by the Minority Shareholders which are estimated will be purchased by C&W Group according to the agreements outlined above (32,183).

Share-based compensation

Stock option plans linked to EXOR shares (S.O.E.)

The ordinary session of the IFIL shareholders' meeting held on May 13, 2008 had approved the stock option plan IFIL 2008-2019 for the chief executive officer, Carlo Barel di Sant'Albano, for 3,000,000 stock options corresponding to the same number of IFIL ordinary shares, and for the employees of the IFIL Group (IFIL S.p.A. and the companies in the Holdings System) who were or would be regarded as key people in the organization on the basis of the positions held or activities performed, for a maximum of 12,000,000 stock options.

Following the merger, the stock option plan was taken over by EXOR S.p.A.. Therefore, the EXOR S.p.A. board of directors held on March 2, 2009 made the adjustments to the stock option plan resulting from the merger, particularly adjusting the ratio between the number of options and the number of shares linked to the plan and the exercise price on the basis of the merger's exchange ratio. Such adjusted exercise price is €19.97 for each EXOR share.

The stock option plan EXOR 2008-2019 thus covers a maximum number of 15,000,000 options corresponding to a maximum of 3,975,000 EXOR ordinary shares. The Plan grants the recipients free options on treasury stock purchased by the Company or by companies in the Holdings System in accordance with existing laws. The plan does not provide for the issue of new shares so there are no dilutive effects on share capital. The May 11, 2010 board of directors' meeting approved a treasury shares buyback program for the three classes of stock also aimed at servicing the above stock option plan.

An analysis of the changes in the stock options granted is as follows:

Number	Options granted	Ordinary shares exercisable	Beneficiaries
Original grant	9,525,000	2,524,125	18
Granted in 2010	200,000	53,000	1
Options forfeited	(175,000)	(46,375)	(4)
Situation at December 31, 2010	**9,550,000**	**2,530,750**	**15**

The fair value of the 9,550,000 options outstanding at December 31, 2010 was determined to be €15,670 thousand, divided as follows:

€ in thousands	Number of options granted	Number of EXOR ordinary shares exercisable	Total cost	Cost referring to the year
Chief Executive Officer, EXOR S.p.A.	3,000,000	795,000	4,807	601
Key employees, EXOR S.p.A. (10)	4,450,000	1,179,250	7,498	926
Total EXOR S.p.A.	7,450,000	1,974,250	12,305	1,527
Key employees of EXOR S.A. and other subsidiaries in the Holdings System (4)	2,100,000	556,500	3,365	437
Total	**9,550,000**	**2,530,750**	**15,670**	**1,964**

The cost referring to the year amounts to €1,964 thousand, of which €601 thousand is classified as emoluments for the chief executive officer and €1,363 thousand as personnel costs. The offsetting entry of €1,964 thousand is recorded in the stock option reserve.

Stock option plan linked to Alpitour shares

With reference to the stock option plan approved by IFIL S.p.A. for two managers of the Alpitour Group in December 2005, it should be noted that after the merger, EXOR S.p.A. took over the relative commitments. The plan calls for purchase options on Alpitour shares to be granted to the chairman and chief executive officer, D.J. Winteler, and the general manager, F. Prete, respectively, equal to 6% (2,127,000 shares) and 5% (1,772,500 shares) of Alpitour's share capital.

After reconfirmation of the positions of the two managers for another three years, the EXOR S.p.A. board of directors' meeting held on May 13, 2009 extended the period in which the options could be exercised to January 2013 (date of the approval of the Alpitour financial statements for the financial year 2011/2012 by the shareholders' meeting).

EXOR S.p.A. and the managers of Alpitour S.p.A., finally, exchanged reciprocal purchase and sale options, exercisable during the same above period, on Alpitour shares that will have been purchased by the same managers; the exercise price will be established on the basis of an appraisal which will be performed using the same valuation principles applied in the December 2005 valuation.

From an accounting standpoint, the plan is a cash-settled stock-based payment transaction subject to paragraph 30 and subsequent paragraphs of IFRS 2, which requires the liability of the plan to be measured at fair value and therefore the options of the plan, at every reporting date, until plan expiration.

At December 31, 2010, the fair value of the option rights of the plan was estimated at a total of €21,981 thousand (€12,233 thousand at December 31, 2009) and is recorded in “Other liabilities”. The increase in the liability compared to the prior year (€9,748 thousand) was recognized in the income statement under “Selling, general and administrative expenses” as the portion relating to the current year.

The estimate was performed by an independent expert who applied a binomial model of valuation to the options based on the following parameters:

- the exercise price of the options has been assumed to be equal to the par value of one ordinary Alpitour share at the grant date, quantified on the basis of an estimate performed by an independent expert, equal to €2.24;
- the last expiration date to exercise the options has been established as the date of the approval of the Alpitour S.p.A. financial statements for the year 2011/2012, fixed, conventionally, as January 31, 2013. At the date of reference of December 31, 2010, the options thus have a remaining life of 25 months (2 years and 1 month);
- the expected volatility has also been determined by referring to the historical volatility, measured over a period consistent with the remaining life of the shares in the plan, of a sample of listed companies operating in the same sector as Alpitour;
- the risk-free interest rate has been assumed to be equal to the return on government securities having a residual life consistent with the expiration of the options in the plan;

- an assumption has also been included in the "binomial" model for the early exercise of the option rights during the period between the end of the vesting period and contractual expiration date of the options.

Upon authorization by EXOR S.p.A., the board of directors of Alpitour S.p.A. may grant future purchase options on Alpitour shares equal to 4% of its capital (now 1,418,000 shares) to other managers in key operating positions.

C&W Group stock option plans

There are two separate stock option plans which are summarized in the following table: "Employee Stock Purchase Plan Options" and "Management Options":

	Grant date	Number of options granted	Vesting date	Exercise price at grant date	Term of options	Outstanding at December 31, 2010
Employee Stock Purchase Plan						
Tranche 1	12/14/2005	11,166	1/1/2008	$548	10 years	**3,975**
Tranche 2 (a)	6/29/2006	7,385	1/1/2009	$782	10 years	**0**
Total Employee Stock Purchase Plan		18,551				3,975
Management Options						
Non-performance based options						
Grant 1	3/22/2010	20,000	2010-2015	$1,175	10 years	**20,000**
Grant 2	11/1/2010	292	2010-2015	$1,465	10 years	**292**
Grant 3	12/1/2010	374	2010-2014	$1,465	10 years	**374**
		20,666				**20,666**
Performance based options (Ebitda/Ebitda Margin)						
Tranche 1	4/1/2007	13,450	2007-2011	$1,259	10 years	**6,032**
Tranche 2	1/1/2008	321	2009	$1,318	10 years	**0**
Tranche 3	6/1/2008	850	2009-2011	$1,252	10 years	**850**
Tranche 4	6/30/2008	500	2009-2011	$1,252	10 years	**500**
Tranche 5	9/30/2008	225	2010-2012	$1,190	10 years	**225**
Tranche 6	11/1/2008	225	2010-2012	$1,190	10 years	**225**
Total		15,571				**7,832**
Total Management Options		**36,237**				**28,498**
Total Options		**54,788**				**32,473**

(a) Tranche 2 options were forfeited during 2008 as the performance condition was not met.

The Employee Stock Purchase Plan options outstanding at December 31, 2010 and 2009 have an average exercise price of $548 and an average remaining contractual life of approximately 5 and 6 years, respectively.

The Management Options outstanding at December 31, 2010 and 2009 have an exercise price of $1,207 and $1,183, respectively, and an average remaining contractual life of approximately 8 years.

	12/31/2010			
	Employee Stock Purchase Plan		Management Options	
	Number of shares	Weighted average exercise price	Number of shares	Weighted average exercise price
Outstanding at 1/1/2010	**4,307**	**$548.02**	**12,472**	**$1,183.14**
Granted during the period			**20,666**	**$1,184.34**
Exercised during the period	**(68.5)**	**$548.02**		
Forfeited during the period	**(263.5)**	**$548.02**		
Cancelled during the period			**(4,640)**	**$1,291.18**
Outstanding at 12/31/2010	**3,975**	**$548.02**	**28,498**	**$1,207.40**
Exercisable at 12/31/2010	**3,975**	**$548.02**	**984**	**$1,281.27**

	12/31/2009			
	Employee Stock Purchase Plan		Management Options	
	Number of shares	Weighted average exercise price	Number of shares	Weighted average exercise price
Outstanding at 1/1/2009	4,644	$548.02	14,367	$1,279.41
Granted during the period				
Exercised during the period	(42)	$548.02		
Forfeited during the period	(295)	$548.02	(182)	$1,302.08
Cancelled during the period			(1,713)	$1,296.21
Outstanding at 12/31/2009	**4,307**	**$548.02**	**12,472**	**$1,183.14**
Exercisable at 12/31/2009	**4,307**	**$548.02**	**984**	**$1,281.27**

On March 22, 2010, the C&W Group granted 20,000 options to an executive. The first 4,000 stock options are scheduled to vest on March 21, 2011 and 4,000 stock options are scheduled to vest each year thereafter through March 21, 2015. The stock options have a 10-year term (March 22, 2020) and an exercise price based on the C&W Group's December 31, 2009 stock price of $1,175. The value of the stock options was calculated using the Black-Scholes pricing model.

On November 1, 2010, C&W Group granted 292 options to an executive. The first 73 stock options are scheduled to vest on January 1, 2012 and 73 stock options are scheduled to vest each year thereafter through January 1, 2015.

On December 1, 2010, C&W Group granted 374 options to an executive. The first 124 stock options are scheduled to vest on January 1, 2012 and the remaining 125 stock options are scheduled to vest each year through January 1, 2014.

Both stock option grants have a 10-year terms with the exercise prices based on C&W Group's September 30, 2010 stock price of $1,465. The value of the stock options for both grants was calculated using the Black-Scholes pricing model.

The expenses recorded in 2010 for all three new stock option grants is $4.2 million (€3 million).

In 2010, 4,640 stock options were cancelled (relating to a stock option plan issued in 2007 for an executive for an original 5,000 options) since the performance criteria were not met. Under the new agreement, the C&W Group granted 3,400 restricted shares to the executive, which vest as follows: 1,250 shares vested on January 1, 2010, 2,150 shares will vest in three equal installments in the three years starting from December 31, 2010. Of those shares, 1,250 depend on the achievement of certain performance objectives agreed to by the executive.

The grant date price per share was $1,110.

Following the changes in the agreement, the incremental fair value of the vested awards amounted to $0.1 million and was recorded as an expense in the income statement.

The unvested awards expense will be recorded over the remaining vesting period.

In accordance with the new award of stock options, C&W Group recorded expenses totaling $1.5 million (€1 million) for the year ended December 31, 2010.

In accordance with the provisions of IFRS 2, the appraisal of the stock option plans was based on the Black Scholes pricing model using the following assumptions:

	Employee Stock Purchase Plan	Management Options
	Tranche 1	Tranche 1 – Tranche 6
Stock price at grant date	$578.68	$1,175-$1,465
Exercise price at grant date	$548.02	$1,190-$1,465
Expected volatility (%)	35	35-47.5
Option life (years)	6.5	10
Expected dividends (%)	1.2	n.a.
Risk-free interest rate (%)	4.22	1.67%-4.74%

Volatility was based on the historical volatility of two public peer companies.
Because C&W Group does not have historical exercise data, it used the midpoint between the vesting date and the contractual term to determine the expected term of the stock options.

In 2010, total expenses were recorded for €9 million for all the stock option plans (€7 million in 2009).

Fiat Group stock option plans
At December 31, 2010 and at December 31, 2009, the following share-based compensation plans relating to managers of Group companies or certain members of the board of directors of Fiat S.p.A. were in place.

Stock option plans linked to Fiat S.p.A. ordinary shares

The stock option plans approved by the board of directors of Fiat S.p.A. prior to 2002 had all fully expired at December 31, 2010. The contractual terms of plans which expired during the year are as follows:

Plan	Beneficiary	Grant date	Expiry date	Strike price (€)	Number of options granted	Vesting date	Vesting portion
Stock Options May 2002 (expired)	Former Chairman of Fiat S.p.A.	May 14, 2002	January 1, 2010	12.699	1,000,000	January 1, 2005	100%
Stock Options September 2002 (expired)	Managers	September 12, 2002	September 12, 2010	10.397	6,100,000	September 12, 2003	25%
						September 12, 2004	25%
						September 12, 2005	25%
						September 12, 2006	25%

On July 26, 2004, the board of directors granted Sergio Marchionne, as a part of his variable compensation as chief executive officer, options to purchase 10,670,000 Fiat S.p.A. ordinary shares at a price of €6.583 per share, exercisable from June 1, 2008 to January 1, 2011. In each of the first three years following the grant date, the CEO acquired the right to purchase, beginning June 1, 2008, a maximum of 2,370,000 shares annually. As of June 1, 2008, he also acquired the right to exercise, effective from that date, the remaining options on 3,560,000 shares as predetermined performance objectives for the reference period had been met. On March 27, 2009, shareholders considered it to be a priority interest for the Group to adopt changes to the plan which would reinstate its retention capability and approved a new vesting period which depended solely on the requirement for the CEO to remain in office, deferring the exercise of these options until January 1, 2011 and extending the exercise period until January 1, 2016, with all the other conditions remaining unaltered.

At December 31, 2010 the features of the stock option plan are as follows:

Plan	Beneficiary	Date of amendment	Expiry date	Strike price (€)	Number of options granted	Vesting date	Vesting portion
Stock Options							
July 2004 (modified)	Chief Executive Officer	March 27, 2009	January 1, 2016	6.583	10,670,000	December 31, 2010	100%

On November 3, 2006, the board of directors of Fiat S.p.A. approved (subject to the subsequent approval of shareholders in general meeting, which was given on April 5, 2007) an eight year stock option plan, which granted certain managers of the Group and the chief executive officer of Fiat S.p.A. the right to purchase a specific number of Fiat S.p.A. ordinary shares at a fixed price of €13.37 each. More specifically, the 10,000,000 options granted to employees and the 5,000,000 options granted to the chief executive officer had a vesting period of four years, with an equal number vesting each year, were subject to achieving certain predetermined profitability targets (Non-Market Conditions or "NMC") in the reference period and may be exercised from the date on which the 2010 financial statements are approved. The remaining 5,000,000 options granted to the chief executive officer of Fiat S.p.A. also had a vesting period of four years with an equal number vesting each year and may be exercised from November 2010. The ability to exercise the options is additionally subject to specific restrictions regarding the duration of the employment relationship or the continuation of the position held.

The contractual terms of the 2006 plan are as follows:

Plan	Beneficiary	Expiry date	Strike price (€)	Number of options granted	Vesting date	Vesting portion
Stock Options November, 2006	Chief Executive Officer	November 3, 2014	13.37	5,000,000	November, 2007	25%
					November, 2008	25%
					November, 2009	25%
					November, 2010	25%
Stock Options November, 2006	Chief Executive Officer	November 3, 2014	13.37	5,000,000	1st Quarter 2008 (*)	25%*NMC
					1st Quarter 2009 (*)	25%*NMC
					1st Quarter 2010 (*)	25%*NMC
					1st Quarter 2011 (*)	25%*NMC
Stock Options November, 2006	Managers	November 3, 2014	13.37	10,000,000	1st Quarter 2008 (*)	25%*NMC
					1st Quarter 2009 (*)	25%*NMC
					1st Quarter 2010 (*)	25%*NMC
					1st Quarter 2011 (*)	25%*NMC

As explained in greater detail in the section "Amendments to the stock option plans and stock grant plans of Fiat S.p.A. arising from the demerger" which follows, vesting conditions for each plan, whether they consisted in the continuation of a professional relationship with the Fiat Group or in the achievement of specific performance objectives, expired on December 31, 2010. With specific reference to options granted under the 2006 Stock Option Plan, for which vesting was subject to the achievement of pre-established profitability targets, only the first tranche (i.e. 25%) of those rights have vested as the profitability targets established in 2006 for the 3-year period 2008-2010 were not met. As a result, the remaining 75% did not.

On February 26, 2008, the board of directors of Fiat S.p.A. passed an incentive plan which was subsequently approved by shareholders in their annual general meeting on March 31, 2008, by which an overall maximum of 4 million financial instruments could be assigned on a periodic basis until 2010 in the form of stock options and/or stock appreciation rights. The plan had the aim of attracting and retaining managers in key roles who had been hired or promoted following the granting of the stock option plan of November 3, 2006 or who had assumed greater responsibilities since the granting of the 2006 plan, and has the features of that plan in terms of performance, vesting and exercise rights. Implementing the first grant under this program on July 23, 2008, the board of directors assigned 1,418,500 stock options having an exercise price of €10.24 and a vesting period of three years that was subject to achieving certain predetermined profitability targets (Non-Market Conditions or “NMC”) in the reference period and together with rights exercisable from the date on which the 2010 financial statements are approved. As these profitability targets had not been met at December 31, 2010, none of the rights granted to employees vested.

The contractual terms of the 2008 plan were as follows:

Plan	Beneficiary	Expiry date	Strike price (€)	Number of options granted	Vesting date	Vesting portion
Stock Options	Manager	November 3, 2014	10.24	1,418,500	1st Quarter 2009 (*)	18%*NMC
July 2008					1st Quarter 2010 (*)	41%*NMC
(forfeited)					1st Quarter 2011 (*)	41%*NMC

A summary of the terms of the stock option plans outstanding at December 31, 2010 is as follows:

	Managers’ compensation			Compensation as board member		
Exercise price (€)	**Options outstanding at 12/31/2010**	Options outstanding at 12/31/2009	**Average remaining contractual life (years)**	**Options outstanding at 12/31/2010**	Options outstanding at 12/31/2009	**Average remaining contractual life (years)**
6.583	-	-	-	10,670,000	10,670,000	5
10.24		956,530		-	-	-
10.397		845,000		-	-	-
12.699	-	-	-		500,000	-
13.37	2,101,250	6,536,875	3.8	6,250,000	8,750,000	3.8
Total	**2,101,250**	8,338,405		**16,920,000**	19,920,000	

Changes during the year were as follows:

	Managers’ compensation		Compensation as board member	
	Number of options	Average exercise price (€)	Number of options	Average exercise price (€)
Outstanding at the beginning of the year	**8,338,405**	**12.71**	**19,920,000**	**9.72**
Granted	-	-	-	-
Forfeited	(5,447,155)	12.79	(2,500,000)	13.37
Exercised	-	-	-	-
Expired	(790,000)	10.397	(500,000)	12.699
Outstanding at December 31, 2010	**2,101,250**	**13.37**	**16,920,000**	**9.09**
Exercisable at December 31, 2010	**-**	**-**	**5,000,000**	**13.37**
Exercisable at December 31, 2009	**845,000**	**10.397**	**500,000**	**12.699**

The options forfeited during the year consist of unvested options regarding employees who have left the Group and options not vesting during the year due to the fact that certain non-market conditions were not reached for the November 2006 and July 2008 plans.

The Group recognized a total nominal cost of €4.9 million in the 2010 income statement for plans outstanding at December 31, 2010 (net income of €7 million in 2009 following the revision of the probability that subsequent tranches will vest).

Granting of ordinary shares of Fiat S.p.A. without payment

On February 23, 2009, the board of directors of Fiat S.p.A. passed an incentive plan which was subsequently approved by shareholders in their annual general meeting on March 27, 2009, based on the granting of rights which, subject to the achievement of predetermined performance targets (*Non-Market Conditions or "NMC"*) for 2009 and 2010 and the continuation of the professional relationship with the Group, provided for 2 million Fiat S.p.A. ordinary shares to be granted to the CEO of Fiat S.p.A. without payment. Under this plan the rights vested in a single tranche on the approval of the Group's 2010 consolidated financial statements by the board of directors and the number of shares granted is determined as 25% of the rights granted in the event of reaching the 2009 targets and 100% of the rights granted in the event of reaching the 2010 targets. The Group's predetermined profitability targets relating to 2009 were reached.

On March 26, 2010, shareholders in general meeting introduced a pure retention component of 2 million additional rights into the Plan on the proposal of the board of directors; the vesting of these rights is subject to the sole condition that the CEO's professional relationship with the Group continues until the approval of the 2011 consolidated financial statements. Moreover, the term of the original plan was also extended until the approval of the 2011 consolidated financial statements and the targets for 2010 and 2011 were redefined.

At December 31, 2010, the contractual terms of the plan were therefore as follows:

Plan	Beneficiary	Number of shares	Vesting date	Vesting portion
Stock Grant 2009 (revised)	Chief Executive Officer	4,000,000	1st Quarter 2010 (*)	500,000 (**)
			1st Quarter 2011 (*)	375,000*NMC (**)
			1st Quarter 2012 (*)	1,125,000*NMC (**)
			1st Quarter 2013 (*)	2,000,000 (**)

On February 18, 2011, the board of directors, having consulted the Compensation Committee, verified the vesting of 375,000 rights based on the achievement of the predetermined operating targets and, in light of the extraordinary transactions occurring during the year, also voted to make vesting of the remaining rights, which was dependent on the achievement of 2011 operating targets, conditional only on the continuation of a professional relationship with the Group until the end of 2011.

As required by IFRS 2 the Fiat Group calculated the total incremental fair value arising from this change to the plan, which amounted to €19 million. This incremental fair value is being recognized in the income statement over the residual vesting period of the plan together with the fair value already calculated at the grant date and determined in 2009. The incremental fair value was calculated on the basis of the price of the Fiat S.p.A. ordinary share at the date of the change, which was €9.75 per share. A total nominal cost of €12.4 million was recognized in the income statement for this plan in 2010 (€6 million in 2009).

Amendments to the stock option plans and stock grant plans of Fiat S.p.A. arising from the demerger

With regard to the above incentive plans and in consideration of the proposed demerger, the board of directors, which met on July 21, 2010, confirmed the continuation of the share-based incentive plans the Group had in place, and voted to adopt, subject to the demerger becoming effective and on the basis of the powers delegated to it by the shareholders' meeting, the appropriate amendments necessary to ensure that these plans fulfill the objectives for which they were adopted, even subsequent to the demerger, while at the same time avoiding a revision of those plans that, even though fully legitimate, might appear to dilute the intended alignment of the interests of management with those of the Company and its shareholders.

More specifically, applying the rules of the respective plans, the Board approved to realign the plans with respect to the shares underlying the stock options and stock grants in strict relation to the allotment ratio applicable for the demerger and to allow employees leaving Fiat S.p.A. and joining Fiat Industrial S.p.A to retain their existing rights.

Those entitled to stock options or stock grants will, therefore, receive one ordinary Fiat S.p.A. share and one ordinary Fiat Industrial S.p.A. share for each right they hold, with the option exercise price (for stock option plans) and the free granting of shares (for the stock grant plan) remaining unchanged.

For the stock option plans, vesting conditions for each plan, whether these be the continuation of a professional relationship with the Group or the achievement of specific performance objectives, will expire on December 31, 2010, prior to the effective date of the demerger.

Similarly, under the stock grant plan the participant will be entitled to receive free of charge one Fiat ordinary share and one Fiat Industrial ordinary share for each right held, subject to the original conditions of the continuation of a professional relationship with the Group and/or achievement of specific performance objectives for 2010 and 2011, consistent with the 2010-2014 Business Plan. The 2011 performance objectives will consist of the portion relating to the post-demerger Fiat Group of the objectives originally established as part of the total objectives for the pre-demerger Fiat Group.

All stock option and stock grant plans, with the exception of the portion of the 2006 Plan relating to managers for which a capital increase was approved, will be serviced by the treasury shares held by Fiat S.p.A. and the ordinary shares of Fiat Industrial that will be allotted to Fiat S.p.A. without payment as a result of the demerger.

As the original conditions of the Plans allowed for amendments where there were extraordinary transactions impacting Fiat S.p.A.'s share capital, a determination of the incremental fair value potentially resulting from such amendments is not required.

Stock Option plans linked to CNH Global N.V. ordinary shares

In the Agricultural and Construction equipment sector, CNH Global N.V. (“CNH”) has granted share-based compensation to directors, officers and employees which are linked to shares and which have the following terms.

CNH Global N.V. outside Directors’ Compensation Plan (“CNH Directors’ Plan”)

This plan provides for the payment of the following to independent outside members of the CNH Global N.V. board of directors in the form of cash, and/or common shares of CNH, and/or options to purchase common shares of CNH:

- an annual retainer fee of $100,000;
- an Audit Committee membership fee of $20,000;
- a Corporate Governance and Compensation Committee membership fee of $15,000;
- an Audit Committee chair fee of $35,000;
- a Corporate Governance and Compensation Committee chair fee of $25,000.

Each quarter the independent outside directors elect the form of payment of ¼ of their Fees. If the elected form is common shares, the independent outside director will receive as many common shares as equal to the amount of Fees the director elects to forego, divided by the fair market value of a CNH Global N.V. common share. Common shares issued vest immediately upon grant, but cannot be sold for a period of six months. If the elected form is options, the outside director will receive as many options as the amount of Fees that the director elects to forego, multiplied by four and divided by the fair market value of a common share, such fair market value being equal to the average of the highest and lowest sale price of a CNH Global N.V. common share on the last trading day of the New York Stock Exchange preceding the start of each quarter. Stock options granted as a result of such an election vest immediately, but shares purchased under options cannot be sold for six months following the date of exercise. Stock options terminate upon the earlier of: (1) ten years after the grant date; or (2) six months after the date an individual ceases to be a director. The Corporate Governance and Compensation Committee has recommended and the board of directors of CNH has approved a proposed amendment to the CNH Directors' Plan. Pursuant to the proposed amendment, all directors will be eligible to receive compensation under the CNH Director's Plan provided that the director is not receiving salary or other employment compensation for current employment services provided to CNH Global N.V or Fiat Industrial Group. The proposed amendment is subject to shareholder approval at the next annual meeting (scheduled for March 29, 2011).

Prior to 2007, CNH also issued automatic option awards, which vest after the third anniversary of the grant date.

At December 31, 2010 and 2009, there were 693,914 and 700,058 common shares, respectively reserved for issuance under the CNH Directors' Plan. Outside directors do not receive benefits upon termination of their service as directors.

A summary of outstanding stock options under the CNH Directors' Plan at December 31, 2010 and 2009 is as follows:

	At December 31, 2010		At December 31, 2009	
Exercise price (in $)	**Number of options outstanding**	**Weighted average remaining contractual life (in years)**	Number of options outstanding	Weighted average remaining contractual life (in years)
10.22 – 16.00			26,063	9.2
16.01 – 26.00	29,076	6.7	30,612	7.2
26.01 – 40.00	44,188	6.4	40,295	6.6
40.01 – 56.00	11,162	7.1	11,162	8.1
56.01 – 66.54	6,414	6.9	9,287	5.5
Total	**90,840**		117,419	

Changes during the year under the CNH Directors' Plan are as follows:

	2010		2009	
	Number of options	**Average exercise price (in $)**	Number of options	Average exercise price (in $)
Outstanding at the beginning of the year	**117,419**	**27.54**	92,508	31.01
Granted	12,904	26.73	29,661	15.51
Forfeited	-	-	-	-
Exercised	(36,610)	15.61	(4,000)	9.23
Expired	(2,873)	59.17	(750)	77.05
Outstanding at the end of the year	**90,840**	**31.24**	117,419	27.54
Exercisable at the end of the year	**117,419**	**31.24**	117,419	27.54

The CNH Equity Incentive Plan (the "CNH EIP")

The plan provides for grants of various types of awards on specific performance targets for the sector linked to the IFRS results of CNH, to officers and employees of CNH Global N.V. and its subsidiaries. As of December 31, 2010, CNH has reserved 15,900,000 shares for the CNH EIP (15,900,000 shares at December 31, 2009). The plan envisages stock options and share incentives as described below.

Stock option plans

Prior to 2006, certain stock option grants were issued which vest rateably over four years from the grant date and expire after ten years. Additionally, certain performance-based options, which had an opportunity for accelerated vesting tied to the attainment of specified performance criteria were issued; however, the performance criteria were not achieved. In any event, vesting of these performance-based options occurred seven years from the grant date. All options granted prior to 2006 have a contract life of ten years.

Except as noted below, the exercise prices of all options granted under the CNH EIP are equal to or greater than the fair market value of CNH Global N.V. common shares on the respective grant dates. During 2009 and 2001, CNH granted stock options with an exercise price less than the quoted market price of CNH common shares at the date of grant. The exercise price of these grants was based upon the average closing price of CNH common shares on the New York Stock Exchange for the thirty-day period preceding the date of grant.

Beginning in 2006, CNH began to issue awards under plans providing performance-based stock options, performance-based shares, and cash. In April 2010, CNH granted approximately 1.5 million performance-based stock options (at target award levels) under the CNH EIP. One-third of the options vested in February 2011 following the approval of 2010 results by the board of directors which met in February 2011. The remaining options will vest equally on the first and second anniversary of the initial vesting date. As the CNH's 2010 results exceeded the target performance levels, it is expected that 2.9 million of these options will vest. Options granted under the CNH EIP in 2010 have a contractual life of five years from the initial vesting date.

The following table summarizes outstanding stock options under the CNH EIP:

	At December 31, 2010			At December 31, 2009	
Exercise Price (in $)	**Number of options outstanding**	**Weighted average remaining contractual life (in years)**	**Average exercise price (in $)**	Number of options outstanding	Average exercise price (in $)
13.58 – 19.99	1,536,464	4	13.66	2,243,243	13.7
20.00 – 29.99	53,333	1.2	21.20	186,760	21.2
30.00 – 39.99	3,734,654	4.4	33.00	1,256,178	37.21
40.00 – 68.85	464,520	2.9	49.33	646,654	52.80
Total	**5,788,971**			4,332,835	

Changes during the period in all CNH stock option plans are as follows:

	2010		2009	
	Number of shares	Average exercise price (in $)	Number of shares	Average exercise price (in $)
Outstanding at the beginning of the year	**4,332,835**	**26.67**	2,718,109	40.82
Granted	2,888,625	31.69	4,144,800	13.58
Forfeited	(324,494)	31.91	(2,404,528)	18.06
Exercised	(992,535)	20.69	(8,136)	18.65
Expired	(115,460)	68.85	(117,410)	68.85
Outstanding at the end of the year	**5,788,971**	**29.07**	4,332,835	26.67
Exercisable at the end of the year	**1,431,524**	**36.40**	1,488,840	37.81

Performance Share Grants

Under the CNH EIP, performance-based shares may also be granted to select key employees and executive officers. CNH establishes the period and conditions of performance for each award. Performance-based shares vest upon the attainment of specified performance objectives.

In September 2010, CNH granted approximately 2 million performance-based, non-vested share awards under the CNH EIP. These performance shares will vest in three equal installments if specified targets are achieved on a cumulative basis during the three-, four- and five-year periods ending December 31, 2012, 2013 and 2014. The fair value of this award is $34.74 per share.

CNH granted performance-based, non-vested share awards under the Top Performance Plan ("TPP") in 2006 through 2009. Vesting of the TPP performance shares was dependent on achievement of specified targets by 2010. In 2006 and 2007, CNH recognized expense for TPP awards based on an assumption that the specified performance targets would be achieved in 2009. In 2008, CNH determined achievement of these performance targets to be improbable and CNH reversed all previously recognized stock-based compensation expense for an amount of €7 million ($11 million). Achievement of the performance targets did not occur in either 2009 or 2010 and these awards were forfeited. CNH did not recognize any stock-based compensation expense related to TPP awards in 2009 or 2010.

The following table reflects performance-based share activity under the CNH EIP:

	2010		2009	
	Number of shares	Weighted average grant date fair value (in $)	Number of shares	Weighted average grant date fair value (in $)
Non-vested at the beginning of the year	**1,349,000**	**31.22**	1,870,500	31.28
Granted	2,027,000	34.74	25,000	11.83
Forfeited	(1,359,000)	31.25	(546,500)	30.52
Vested	-	-	-	-
Non-vested at the end of the year	**2,017,000**	**34.74**	1,349,000	31.22

Restricted Share Grants

In September 2010, CNH granted 302,000 restricted share awards to selected key employees under the CNH EIP. Restricted shares vest in three equal installments over a three-year period ending September 30, 2013. The fair value of this award is $34.74.

The following table reflects restricted share activity under the CNH EIP:

	12/31/2010	
	Number of shares	**Weighted average grant date fair value (in $)**
Non-vested at the beginning of the year	-	-
Granted	326,000	34.56
Forfeited	(2,000)	34.74
Vested	(8,000)	32.35
Non-vested at the end of the year	**316,000**	**34.62**

As of December 31, 2010, there were 4,992,271 CNH Global N.V. common shares (8,332,115 CNH Global N.V. common shares at December 31, 2009) available for issue under the CNH EIP.

The Black-Scholes pricing model was used to calculate the fair value of stock options by the CNH – Case New Holland sector. The weighted-average assumptions used under the Black-Scholes pricing model were as follows:

	2010		2009	
	Directors' Plan	**Equity Incentive Plan**	Directors' Plan	Equity Incentive Plan
Option life (years)	5.0	3.73	5.0	3.73
shares (%)	66.9	74.1	62.9	70.6
Expected dividend yield (%)	0.6	0.5	0.8	0.7
Risk-free interest rate (%)	2.0	1.9	2.2	1.6

Based on this model, the weighted-average fair values of stock options awarded by CNH for the years ended December 31, 2010 and 2009 were as follows:

(in $)	**2010**	2009
Directors' Plan	**14.6**	8.03
EIP	**16.1**	9.03

The total cost recognized in the 2010 income statement for all share-based compensation linked to CNH Global N.V. ordinary shares amounts to €26 million (€10 million in 2009).

Stock option plan linked to Ferrari S.p.A. ordinary shares

Under this scheme, certain employees of Ferrari S.p.A. on the one hand and the chairman and the chief executive officer of the company at the time on the other had the option to acquire respectively 207,200 and 184,000 Ferrari S.p.A. ordinary shares at a price of €175 per share. Under the scheme the options could be exercised until December 31, 2010, wholly or partially, and in part were subject to the listing of the company. As the conditions for the plans to vest were not met, the stock option rights granted did not vest.

Cash-settled share-based payments of the Fiat Group

Various entities belonging to the former joint venture with General Motors reached agreements with certain employees in 2001, 2002, 2003 and 2004 over four cash-settled share-based payment schemes entitled Stock Appreciation Rights (SAR) plans. Under these plans, certain of the Group's employees involved had the right to receive a payment corresponding to the increase in price between the grant date and the exercise date of Fiat S.p.A. ordinary shares. The 2001 and 2002 plans have already expired. In accordance with IFRS 2, the Group measures the liability arising from cash-settled share-based payment transactions at fair value at each reporting date and each settlement date; the changes in the fair value of these liabilities are recognized in the income statement for the period. With reference to the 70,644 rights outstanding at that date, the liability arising at December 31, 2010 was €0.7million (€0.5 million at December 31, 2009). Moreover, 30,192 rights that were still outstanding at December 31, 2010 were no longer so at the date of these financial statements following the expiry of the 2003 plan. Finally, as a consequence of the demerger, from January 1, 2011, the residual Stock Appreciation Rights were converted to the right to receive a payment corresponding to the increase in price between the grant date and the exercise date of the sum of the prices of the Fiat S.p.A. and Fiat Industrial S.p.A. ordinary shares.

25. Provisions for employee benefits

Group companies provide post-employment benefits for their active employees and for retirees, either directly or by contributing to independently administered funds. The way these benefits are provided varies according to the legal, fiscal and economic conditions of each country in which the Group operates, the benefits generally being based on the employees' remuneration and years of service and can take the form of either deferred contribution and/or deferred benefit plans.

In the case of defined contribution plans, the Group pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual, or voluntary basis. Once the contributions have been paid, the Group has no further payment obligations. The entity recognize the contribution cost when the employee has rendered his service and includes this cost by function in cost of sales, selling, general and administrative costs and research and development costs.

Defined benefit plans may be unfunded, or they may be wholly or partly funded by contributions made by an entity, and sometimes by its employees, into an entity, or fund, that is legally separate from the employer and from which the employee benefits are paid. Benefits are generally payable under these plans after the completion of employment. The plans are classified by the Group on the basis of the type of benefit provided as follows: reserve for employee leaving entitlements in Italy (TFR), pension plans, health care plans and other.

Finally, the companies of the Group grant certain other long-term benefits to its employees; these benefits include those generally paid when an employee attains a certain level of seniority or when a specified event occurs. In this case, the measurement of the obligation reflects the probability that payment will be required and the length of time for which payment is expected to be made.

Reserve for Employee leaving entitlements in Italy ("TFR")

Employee severance indemnities relating to the companies of the Group operating in Italy represent the obligation due to employees by law (recently amended by Law 296/06) that has accrued and which will be paid upon termination of employment. In certain circumstances, a portion of the indemnity may be paid as an advance during the employee's service life. This is an unfunded defined benefit plan, considering the benefits almost entirely accrued, with the sole exception of the revaluation.

After the changes made to the regulations for employee leaving entitlement by Law 296 dated December 27, 2006 (Budget Law 2007) and subsequent decrees and regulations, the item reflects the Group's residual obligation entitlement accruing up to December 31, 2006 for companies with more than 50 employees, and accrued over the employee's working life for other companies to be paid upon termination of employment. In certain circumstances, a portion of the indemnity may be paid as an advance during the employee's service life. This is an unfunded defined benefit post-employment plan.

For those employees who did not elect the transfer of the accrued portion of employee leaving entitlement, beginning January 1, 2007, the calculation of employee leaving entitlement, including the portion accruing, will be made according to the usual actuarial method.

Holdings System

Health care plans

Health care, historical offered to management staff, since the end of 2007 has been extended to all employees and defined benefit contributions are paid to external funds which pay the health claims.

Pension plans

Pension plans are addressed to employees who hold the status of manager and are regulated by company agreements and rules.
Pension plans can be either “defined benefit” or “defined contribution” and require the payment of contributions to external, legally independent fund with asset management autonomy.
The plans provide for a contribution by the employer and a contribution by the employee, which can also come from the conferral of a part of the employee’s severance entitlement.
Contributions payable are included in “Other liabilities”; the cost for the year is accrued on the basis of the service rendered by the employee and is recorded in selling, general and administrative expenses.

Other benefits

Other benefits include, for example, loyalty bonuses which can apply to all employees.
Loyalty bonuses are accrued and paid when a specific number of years of service has been reached (25, 30, 35 and 40 years).

C&W Group

Pension plans

The C&W Group funds a certain number of defined contribution plans set up pursuant to the laws in force in the countries in which it operates.
The European partnership (C&W UK) also provides a form of hybrid pension plan (UK Plan) which has features of both defined contribution and defined benefit plans.

C&W UK ceased its contributions to the plan effective March 31, 2002 and, subject to certain transitional agreements, introduced a defined contribution plan for employees starting from that date.

The assumptions used for the calculation of pension funds are as follows:

- the discount rate is the yield at the reporting date on AA credit-rated bonds that have maturity dates approximating the terms of C&W Group's obligations and that are denominated in the same currency in which the benefits are expected to be paid;
- the mortality rate is based on statistical tables.

The “UK Plan” assets include marketable equity securities in both United Kingdom and United States companies and fixed-rate debt securities.
The investment policies and strategies for the plan assets are established to achieve a reasonable balance between risk, likely return and administration expenses, as well as to maintain funds at a level to meet minimum funding requirements. In order to ensure that an appropriate investment strategy is in place, an analysis of the plan’s assets and liabilities is completed periodically.

The estimated expense for contributions to be paid to the defined benefit plan in 2011 amounts to $2.3 million (about €2 million).
The expected long-term rate of return on the assets is 6.05% (6.33% in 2009). The expected long-term rate of return is based on the sum of returns of individual asset categories. The historical returns have been considered for purposes of the estimate of long-term returns.

Fiat Group

Pension plans

The item pension plans consists principally of the obligations of Group companies operating in the United States (mainly to those in the CNH – Case New Holland sector) and in the United Kingdom towards certain employees and former employees of the Group. Under these plans, a contribution is generally made to a separate fund (trust) which independently administers the plan assets. The Group’s funding policy is to contribute amounts to the plan equal to the amounts required to satisfy the minimum funding requirements prescribed by the laws and regulations of each individual country. Prudently, the Group makes discretionary contributions in addition to the funding requirements. If these funds are overfunded, that is if they present a surplus compared to the requirements of law, the Group companies concerned could not be required to contribute to the plan in respect of a minimum performance requirement as long as the fund is in surplus.

The investment strategy for these assets depends on the features of the plan and on the maturity of the obligations. Typically long-term plan benefit obligations are funded by investing mainly in equity securities, as they are expected to achieve long-term growth while exceeding inflation; short and medium-term plan benefit obligations are funded by investing in fixed income securities, which are less volatile.

In the United Kingdom the Group participates among others in a plan financed by various entities belonging to the Group, called the “Fiat Group Pension Scheme”. Under this plan, participating employers make contributions on behalf of their active employees (active), retirees, and employees who have left the Group but have not yet retired (deferred).

Health care plans

The item health care plans comprise obligations for health care and life insurance plans granted to employees of the Group working in the United States and Canada (mostly relating to the CNH – Case New Holland sector). These plans generally cover employees retiring on or after reaching the age of 55 who have had at least 10 years of service. CNH United States salaried and non-represented hourly and Canada employees hired after January 1, 2001 and January 1, 2002, respectively, are not eligible for health care and life insurance benefits under the CNH plans. Until December 31, 2006, these plans were fully unfunded; starting in 2007, the Group began making contributions on a voluntary basis to a separate and independently managed fund established to finance the North American health care plans.

Other

The item Other includes loyalty bonuses, which are due to employees who reach a specified seniority and are generally settled when an employee leaves the company; and for French entities, the *Indemnité de départ à la retraite*, a plan similar to the Italian TFR. These schemes are unfunded.

Provisions for employee benefits at December 31, 2010 and 2009 are as follows:

€ in millions	**Fiat Group (as a whole)**	**C&W Group**	**Alpitour Group**	**Holdings System**	**Consolidated EXOR Group**

Fiat Group

Assumed discount rates are used in measurements of pension and postretirement benefit obligations and interest cost components of net periodic cost. The Group selects its assumed discount rates based on the consideration of equivalent yields on high-quality fixed income investments at the measurement date.

The assumed health care trend rate represents the rate at which health care costs are assumed to increase. Rates are determined based on the Agricultural and Construction Equipment sector specific experience, consultation with actuaries and outside consultants, and various trend factors including general and health care sector-specific inflation projections from the United States Department of Health and Human Services Health Care Financing Administration. The initial trend is a short-term assumption based on recent experience and prevailing market conditions. The ultimate trend is a long-term assumption of health care cost inflation based on general inflation, incremental medical inflation, technology, new medicine, government cost-shifting, utilization changes, aging population, and a changing mix of medical services.

The expected long-term rate of return on plan assets reflects management's expectations on long-term average rates of return on funds invested to provide for benefits included in the projected benefit obligations. The expected return is based on the outlook for inflation, fixed income returns, and equity returns, while also considering asset allocation and investment strategy, premiums for active management to the extent asset classes are actively managed and plan expenses. Return patterns and correlations, consensus return forecasts and other relevant financial factors are analyzed to check for reasonability and appropriateness.

The amounts recognized in the statement of financial position for post-employment benefits for the EXOR Group at December 31, 2010 and 2009 are as follows:

	Employee leaving entitlements in Italy		Pension plans		Health care plans		Other

The changes to the health care plans stated in the obligation and in the composition of defined benefit plan expenses in 2010 mainly relate to the health care plans in North America for the Agricultural and Construction Equipment sector of the Fiat Group.

Changes in the fair value of plan assets servicing the pension plans and health care plans are as follows:

	Pension plans		Health care plans	
€ in millions	**12/31/2010**	12/31/2009	**12/31/2010**	12/31/2009
Fair value of plan assets at the beginning of the year	**1,836**	1,583	**46**	39
Expected return on plan assets	**137**	115	**4**	3
Actuarial gains (losses) generated	**40**	127	**2**	6
Exchange rate differences	**110**	42	**4**	(2)

Benefits paid	**(160)**	(149)	**(59)**	(51)
Change in the scope of consolidation	**20**			
Gains (losses) on settlements		(2)		
Other changes	**3**	1		
Fair value of plan assets at the end of the year	**2,093**	1,836	**56**	46

As discussed earlier, the Fiat Group, and in particular the companies of the CNH – Case New Holland sector, began making contributions on a voluntary basis in 2007 to a separate and independently managed fund established to finance the North American health care plans.

Plan assets for post-employment benefits and health-care benefits mainly consist of listed equity instruments and fixed income securities; plan assets do not include treasury shares of the companies or properties occupied by Group companies. Plan assets may be summarized as follows:

(in %)	**Fiat Group (as a whole)**	**C&W Group**
At December 31, 2010		
Third party equity instruments	40	43
Third party debt instruments	47	54
Properties occupied by third parties	1	0
Other assets	12	3
At December 31, 2009		
Third party equity instruments	37	42
Third party debt instruments	50	56
Properties occupied by third parties	1	0
Other assets	12	2

Assumed health care cost trend rates have a significant effect on the amount recognized in the 2010 income statement. A one percentage point change in assumed health care cost trend rates would have the following effects:

€ in millions	One percentage point increase	One percentage point decrease
Effect on the aggregate of the service costs and interest cost	5	4
Effect on defined benefit obligation	78	66

The present value of the defined benefit obligations, the fair value of plan assets and the surplus or deficit of the plans at the end of 2010 and 2009 are as follows:

€ in millions	At December 31, 2010	At December 31, 2009
Present value of obligation:		
Employee leaving entitlements in Italy	**1,032**	1,025
Pension plans	**2,968**	2,621
Health care plans	**859**	794
Others	**278**	258
Fair value of plan assets:		
Pension plans	**2,093**	1,836
Health care plans	**56**	46
Surplus (deficit) of the plan:		
Employee leaving entitlements in Italy	**1,032**	1,025
Pension plans	**875**	785
Health care plans	**803**	748
Others	**278**	258

The best estimate of expected contribution to pension and health care plans for 2011 is €91 million and €60 million, respectively.

26. Other provisions

Changes in other provisions are as follows:

€ in millions	12/31/2009	Charge	Utilization	Release to income	Other changes	12/31/2010
Group	1,479	1,316	(1,100)	(107)	84	**1,672**

Total Other provisions	5,013	5,159	(4,540)	(327)	201	**5,506**

Fiat Group

The effect of discounting these provisions, €28 million in 2010, has been wholly included in other changes together with exchange gains of €186 million.

The warranty provision represents management's best estimate of commitments given by the Group for contractual, legal, or constructive obligations arising from product warranties given for a specified period of time which begins at the date of delivery to the customer. This estimate has been calculated considering past experience and specific contractual terms. This provision also includes management's best estimate of the costs that are expected to be incurred in connection with product defects that could result in a larger recall of vehicles. This provision for risks is developed through an assessment of reported damages or returns on a case-by-case basis.

At December 31, 2010, the restructuring provision comprises the estimated amount of benefits payable to employees on termination in connection with restructuring plans amounting to €205 million, other costs for exiting activities amounting to €28 million and other costs totaling €62 million. The total balance relates to the restructuring programs of the sectors Fiat Group Automobiles for €88 million, Components for €48 million, Fiat Powertrain for €17 million, Production Systems for €10 million, Metallurgical Products for €7 million, FPT Industrial for €53 million, Agricultural and Construction Equipment for €24 million, Trucks and Commercial Vehicles for €16 million and other sectors for €32 million.

The restructuring provision at December 31, 2009 comprised the estimated amount of benefits payable to employees on termination in connection with restructuring plans amounting to €294 million, other costs for exiting activities amounting to €32 million and other costs totaling €33 million. Taken overall, the balance had related to the restructuring programs of the sectors Fiat Group Automobiles for €101 million, Components for €73 million, Agricultural and Construction Equipment for €50 million, FPT Powertrain Technologies for €63 million, Trucks and Commercial Vehicles for €17 million, Production Systems for €15 million, Metallurgical Products for €9 million and other sectors for €31 million.

C&W Group

In 2008, C&W Group, in response to the continuing economic crisis, had begun a plan to cut structure costs and particularly to reduce the workforce.

During 2009, C&W Group approved another plan of cost cutting initiatives and set aside a further €21 million in the restructuring provision. In 2010, the amount provided is €2 million and the amount used totals €8 million.

The provision for other risks represents the amounts set aside principally in connection with contractual and commercial risks and disputes. The more significant balances of these provisions are as follows:

€ in millions	Fiat Group (as a whole)	C&W Group	Alpitour Group	Juventus F.C.	Consolidated EXOR Group
Sales incentives	1,015				1,015
Legal proceedings and other disputes	787	4			791
Commercial risks	708	10			718
Environmental risks	71				71
Indemnities	60				60
Other reserves for risk and charges	821		4	3	828
Total Other risks at 12/31/2010	**3,462**	**14**	**4**	**3**	**3,483**
Sales incentives	829				829
Legal proceedings and other disputes	743	5			748
Commercial risks	677	7			684
Environmental risks	71				71
Indemnities	53				53
Other reserves for risk and charges	724		4	3	731
Total Other risks at 12/31/2009	**3,097**	**12**	**4**	**3**	**3,116**

A description of these follows:

Fiat Group

- Sales incentives - this provision relates to sales incentives that are offered on a contractual basis to the Group's dealer networks, primarily on the basis that dealers will achieve a specific cumulative level of sales transactions during the calendar year. This provision is estimated based on the information available regarding the sales made by the dealers during the calendar year. The provision also includes sales incentives such as cash rebates announced by the Group and provided by dealers to customers, for which the dealers are reimbursed. The Group records this provision when it is probable that the incentive will be provided and the Group's inventory is sold to its dealers. The Group estimates this provision based on the expected use of these rebates with respect to the volume of vehicles that has been sold to the dealers.

- Legal proceedings and other disputes - this provision represents management's best estimate of the liability to be recognized with regard to:

    - Legal proceedings arising in the ordinary course of business with dealers, customers, suppliers or regulators (such as contractual or patent disputes).
    - Legal proceedings involving claims with active and former employees.
    - Legal proceedings involving different tax authorities.

None of these provisions is individually significant. Each Group company recognizes a provision for legal proceedings when it is deemed probable that the proceedings will result in an outflow of resources. In determining their best estimate of the probable liability, each Group company evaluates their legal proceedings on a case-by-case basis to estimate the probable losses that typically arise from events of the type giving rise to the liability. Their estimate takes into account, as applicable, the views of legal counsel and other experts, the experience of the Group and others in similar situations and the Group's intentions with regard to further action in each proceeding. The Group's consolidated provision combines these individual provisions established by each of the Group's companies.

- Commercial risks - this provision includes the amount of obligations arising in connection with the sale of products and services such as maintenance contracts. An accrual is recorded when the expected costs to complete the services under these contracts exceed the revenues expected to be realized.

- *Environmental risks* – This provision represents management's best estimate of the Group's probable environmental obligations. Amounts included in the estimate comprise direct costs to be incurred by the Fiat Group post-Demerger and the Fiat Industrial Group in connection with environmental obligations associated with current or formerly owned facilities and sites. This provision also includes costs related to claims on environmental matters.

- *Indemnities* - the provision for indemnities relates to contractual indemnities provided by the Group in connection with divestitures carried out in 2010 and prior years. These liabilities primarily arise from indemnities relating to contingent liabilities in existence at the time of the sale, as well as those covering any possible breach of the representations and warranties provided in the contract and, in certain instances, environmental or tax matters. These provisions were determined estimating the amount of the expected outflow of resources, taking into consideration the relevant level of probability of

Fiat Group

Asset-backed financing represents the amount of financing received through both securitization and factoring transactions which do not meet IAS 39 derecognition requirements and is recognized as an asset in the statement of financial position under receivables from financing activities (Note 19).

At December 31, 2010, total Debt had increased by €2,481 million. Excluding exchange differences, which led to an increase in debt of approximately €1.4 billion, and excluding changes in the scope of consolidation, this increase amounted to €994 million.

There was an increase of approximately €1,213 million in asset backed financing, excluding exchange differences. This increase reflects improved market accessibility conditions for securitizations.
The rise in other debt includes among other things the recognition of debt of €122 million arising from exercising the call option on 5% of Ferrari share capital.

The major bond issues outstanding at December 31, 2010 are as follows:

(1) Bonds listed on the Mercato Obbligazionario Telematico of the Italian Stock Exchange (EuroMot) and on the Luxembourg Stock Exchange.

(2) "Fiat Step-Up Amortizing 2001-2011" bonds repayable at face value in five equal annual installments each for 20% of the total issued (€617 million) due beginning from the sixth year (November 7, 2007) by reducing the face value of each bond outstanding by one-fifth. The last installment will be repaid on November 7, 2011. The bonds pay coupon interest equal to: 4.40% in the first year (November 7, 2002), 4.60% in the second year (November 7, 2003), 4.80% in the third year (November 7, 2004), 5.00% in the fourth year (November 7, 2005), 5.20% in the fifth year (November 7, 2006), 5.40% in the sixth year (November 7, 2007), 5.90% in the seventh year (November 7, 2008), 6.40% in the eighth year (November 7, 2009), 6.90% in the ninth year (November 7, 2010) and 7.40% in the tenth year (November 7, 2011).

(3) Bond listed on the Irish Stock Exchange.

(4) Bonds with amounts outstanding equal to or less than the equivalent of €50 million.

The decrease of €441 million in 2010 (excluding exchange rate differences) in bonds is mainly due to:

- the repayment on maturity of a bond having a face value of €1,000 million issued by Fiat Finance and Trade Ltd S.A. in 2000 as part of the Global Medium Term Notes programme;

- the repayment on maturity of the fourth fixed annual installment of approximately €123 million of the "Fiat Step-up amortizing" bond (issued under the Global Medium Term Notes Programme);

- the repayment of other bonds falling due in the amount of approximately €71 million;

- the issue by Case New Holland Inc. of a bond having a nominal value of $1,500 million, maturing in 2017 and paying a fixed coupon of 7.875%, at a price of 99.32% of its nominal value;

- the early repayment of a bond with nominal of $500 million (originally due in 2014) made by Case New Holland Inc..

The bonds issued by the Group are governed by different terms and conditions according to their type as follows:

- Global Medium Term Note (GMTN Programme): a maximum of €15 billion may be used under this Program, of which notes of approximately €7.7 billion have been issued to date; the Program is guaranteed by Fiat S.p.A. The issuers taking part in the program include, among others, Fiat Finance and Trade Ltd. S.A. for an amount outstanding of €6.7 billion and Fiat Finance North America Inc. with a bond having a nominal value of €1 billion;

- other bonds: these refer to a bond issued by Fiat Finance and Trade Ltd. S.A. having a face value of €1 billion, issued at par in 2006, bearing fixed interest at 6.625% and repayable on February 15, 2013;

- a bond issued by Case New Holland Inc., having a nominal value of $1 billion at a price of 97.062%, falling due in 2013 and bearing fixed interest at a rate of 7.75%, payable semi-annually;

- bond issued by CNH America LLC for a total amount outstanding of $254 million and repayable in 2016.

The unaudited prospectuses and offering circulars, or their abstracts, relating to the principal bond issues are available at www.fiatspa.com under “Investor Relations – Financial Reports” and at www.fiatindustrial.com under “Investor Relations – Financial Reports”.
Most of the bonds issued by the Group impose covenants on the issuer and, in certain cases, on Fiat S.p.A. as guarantor, which is standard international practice for similar bonds issued by companies in the same industry sector as the Group. Such covenants include: (i) negative pledge clauses which require that bonds benefit from any existing or future pledges of assets of the issuer and/or Fiat S.p.A. granted in connection with other bonds or debt securities having the same ranking; (ii) *pari passu* clauses, under which no obligations ranking senior to the bonds in question may be assumed; (iii) periodic disclosure obligations; (iv) for certain bond issues, cross-default clauses which require immediate repayment of the bonds under certain events of default on other financial instruments issued by the Group; and, (v) other clauses that are generally applicable to securities of a similar type.

The Group intends to repay the issued bonds in cash at due date by utilizing available liquid resources. In addition, the companies in the Group may from time to time buy back bonds on the market that have been issued by the Group, also for purposes of their cancellation. Such buy backs, if made, depend upon market conditions, the financial situation of the Group and other factors which could affect such decisions.

Committed credit lines expiring after 12 months available to Fiat Group post-demerger amounting to approximately €1.9 billion had been fully used at December 31, 2010.

In order to provide the Fiat Industrial Group with adequate funds, new syndicated committed credit facilities for a total of €4.2 billion were finalized during the year. These facilities were made available to Fiat Industrial Group treasuries in January 2011 once the demerger had become effective.

More specifically these relate to:

- a three-year revolving credit facility of €2 billion;

- a one-year loan of €2.2 billion (extendable for a further year at the discretion of Fiat Industrial), which is intended to be repaid on the basis of new bond issues.

In addition, the Fiat Industrial Group treasuries benefit from the transfer of bilateral bank credit facilities (previously available to Fiat Group treasuries) of over €1 billion.

Holdings System

At December 31, 2010, the debt of the Holdings System totaling €1,258 million presents a net increase of €140 million, of which €131 million refers to the Parent EXOR, deriving for €75 million from the extinguishment of debt which reached maturity, for €50 million from a new bank-secured loan and for €156 million from credit lines drawn down.
The debt payable to Almacantar of €8 million is also included for the quota of the capital increase subscribed by Exor S.A. and not paid in at December 31, 2010.

An analysis of EXOR S.p.A. bonds outstanding at December 31, 2010 is as follows:

Issue date	Maturity date	Issue price	Coupon	Rate	Face value (€ ml)	Amortized cost measurement effect (€ ml)	**Balance** (€ ml)
6/9/2006	6/9/2011	99.900	Quarterly	3-month Euribor + spread	200	(0)	**200**
6/12/2007	6/12/2017	99.554	Annually	Fixed 5.375%	750	(4)	**746**

The bonds contain covenants that are common in international practice for bond issues of this type. In particular, they contain negative pledge clauses which require that bonds benefit from any existing or future pledges of assets of the issuer granted in connection with other bonds or debt securities having the same ranking and provide for periodic disclosure. The 2006/2011 bonds also establish other commitments such as observing a maximum debt limit in relation to the amount of the portfolio and maintaining a rating by one of the major agencies. Non-compliance with these covenants allows the bondholders to ask for the immediate redemption of the bonds. Finally, standard events of default are envisaged in the case of serious non-fulfillment such as, for example, failure to pay interest. These covenants were complied with at December 31, 2010.
Any change of control of EXOR would give bondholders the right to the early repayment of the Bonds 2006/2011 and 2007/2017 for a total of €950 million.

Standard & Poor's rated the two bond issues “BBB+”, in line with its current rating of EXOR S.p.A.’s long-term debt.

At December 31, 2010, EXOR S.p.A. had credit lines for €1,558 million. Of that amount €708 million is revocable and €850 million is irrevocable (of which €455 million is due by December 31, 2011 and €395 million by December 31, 2013).
The loan contracts relating to irrevocable credit lines provide for commitments to be observed that are typical of the practices in the sector for this type of debt. In particular, some of the main commitments on certain contracts refer to periodical disclosure obligations, prohibition of new real guarantees on the assets of the company without the consent of the creditor, non-subordination of the credit and, in some cases, compliance with financial ratios. Finally, clauses provide for early expiration in the event of serious non-fulfillment such as, for example, failure to pay interest or events that are especially detrimental such as bankruptcy.
In the event of a change in control of EXOR, some lender banks would have the right to ask for the early repayment of the irrevocable credit lines for a total of €355 million.

Alpitour Group

The debt of the Alpitour Group totaling €10 million (€28 million at December 31, 2009), comprises a three-year loan of €8 million secured in July 2010 from Mediobanca expiring with a one-time payment in July 2013, bearing interest at a variable rate based on the 6-month Euribor. The Alpitour Group also has a residual five-year loan of €2 million secured in June 2007 from the bank C.R.S. expiring in June 2012, bearing interest at a variable rate based on the Euribor.
The medium and long-term loan contracts state that the Alpitour Group must comply with covenants calculated on consolidated equity, economic and financial data (mainly net debt/equity and net debt/Ebitda). In view of the seasonal nature of the business, these ratios, as established by the relevant contracts, are calculated on an annual basis at the year-end closing date.

The main changes are as follows:

- early termination of the securitization operation put in place during the financial year 2005/2006 (€8 million);
- early reimbursement of the remaining balance of the syndicated loan (coordinated by BNL and Efibanca) (€16 million);
- new loan secured from Mediobanca (€8 million);
- reimbursement of periodical installments on the C.R.S. loan (€1 million).

At December 31, 2010, the Alpitour Group had credit lines for a total of €244 million (€268 million at December 31, 2009), of which committed credit lines total €168 million (€26 million due within one year next year and €142 million due beyond next year).

Juventus FC

The debt of Juventus FC amounting to €63 million comprises the debt due to Unicredit Leasing S.p.A. for the Vinovo Training Center lease transaction and other minor leases for €19 million, the debt due to Istituto per il Credito Sportivo for the new stadium loan for €30 million and the debt payable to banking institutions for bank accounts that were opened for €14 million.

At December 31, 2010, Juventus FC had credit lines for €210 million, of which €84 million was drawn down.

C&W Group

Debt of C&W Group refers for €87 million (€146 million at December 31, 2009) to the amount drawn down on the original $350 million Senior Revolving Credit Facility.

EXOR Group debt by interest rate

The annual interest rates and the nominal currencies of debt at December 31, 2010 are as follows:

€ in millions	Less than 5%	From 5% to 7.5%	From 7.5% to 10%	From 10% to 12.5%	Greater than 12.5%	Total
Euro	8,099	6,797	2,503			17,399
U.S. dollar	5,282	612	1,871	5		7,770
Brazilian real	883	919	426	1,843	151	4,222
Canadian dollar	1,459	7				1,466
Australian dollar	22	803				825
Polish zloty	140	58	12			210
Chinese renminbi	156	126				282
Argentine peso	0			22	46	68
British pound	65	5				70
Other	98		1	12	3	114
Total Debt at 12/31/2010	**16,204**	**9,327**	**4,813**	**1,882**	**200**	**32,426**

Debt with annual nominal interest rates in excess of 12.5% relates principally to the companies of the Fiat Group operating in Argentina and Brazil.

For further information on the management of interest rate and currency risk reference should be made to the previous section Risk Management and to Note 33.

The fair value of outstanding debt of the EXOR Group at December 31, 2010 amounts approximately to €48,708 million. The fair value of debt at December 31, 2009 amounted approximately to €44,612 million. These amounts have been determined using the quoted market price of financial instruments, if available, or discounting the related future cash flows and using the interest rates suitably adjusted to take account of the Group’s current creditworthiness.

At December 31, 2010, the **Fiat Group** had outstanding finance lease agreements for certain property, plant and equipment whose overall net carrying amount, €370 million (€304 million at December 31, 2009), was included in property, plant and equipment (Note 15).

At December 31, 2010, **Juventus** had five finance lease agreements with Unicredit Leasing S.p.A. regarding the Vinovo Training Center, furniture, fixtures and sundry equipment for a total of €27 million.

Minimum future lease payments

€ in millions	**Fiat Group (as a whole)**	**C&W Group**	**Juventus F.C.**	**Consolidated EXOR Group**
Due within one year	54		2	56
Due between one and five years	128	1	8	137
Due beyond five years	149		8	157
Present value of minimum lease payments at 12/31/2010	**331**	**1**	**18**	**350**
Due within one year	46	1	1	48
Due between one and five years	103		5	108
Due beyond five years	119		8	127
Present value of minimum lease payments at 12/31/2009	**268**	**1**	**14**	**283**

Fiat Group

Finance lease payables also relate to suppliers' assets recognized in the consolidated financial statements in accordance with IFRIC 4.

Finally, debt secured by mortgages on assets amounts to €412 million at December 31, 2010, of which €331 million is due to creditors for the above mentioned assets acquired under finance leases. At December 31, 2009, debt secured by mortgages on assets amounted to €358 million, of which €268 million is due to creditors for assets acquired under finance leases. The total carrying amount of assets acting as security for loans amounts to €517 million at December 31, 2010 (€446 million at December 31, 2009). In addition, at December 31, 2010 the Group's assets include current receivables and cash with a pre-determined use to settle asset-backed financing of €8,854 million. At December 31, 2009, the total amount of such asset-backed financing was €7,086 million.

Net financial position

In compliance with the Consob Regulation issued on July 28, 2006 and in conformity with the CESR's "Recommendations for the consistent implementation of the European Commission's Regulation on Prospectuses" issued on February 10, 2005, the net financial position of the Group is as follows:

€ in millions	Fiat Group (as a whole)	C&W Group	Alpitour Group	Juventus F.C.	Holdings System	Eliminations	Consolidated EXOR Group
At 12/31/2010

Net financial position at 12/31/2009	**(3,217)**	**(124)**	**67**	**10**	**52**	**0**	**(3,212)**

The net financial position of C&W Group and the Alpitour Group is adjusted to exclude non-current financial assets (deposits and receivables) in order to comply with the Consob Regulation.

Non-current securities (held-to-maturity) of the Holdings System include bonds issued by leading counterparts and listed on active and open markets which it intends, and is able to hold, until their natural reimbursement date as an investment of a part of its available cash so that it can receive a constant attractive flow of financial income. Such designation was made in accordance with IAS 39, paragraph 9.

The item receivables from financing activities includes the entire portfolio of the financial services entities of the Fiat Group, classified as current assets as they will be realized during the normal operating cycle of these companies.

28. Trade payables

An analysis by due date of trade payables is as follows:

€ in millions	Fiat Group (as a whole)	C&W Group	Alpitour Group	Juventus F.C.	Holdings System	Eliminations	Consolidated EXOR Group
Due within one year	13,239	157	214	33	5	(2)	13,646
Due between one and five years	10	8					18
Due beyond five years	2						2
Trade payables at 12/31/2010	**13,251**	**165**	**214**	**33**	**5**	**(2)**	**13,666**
Due within one year	12,281	124	192	19	4	(2)	12,618
Due between one and five years	13	5					18
Due beyond five years	1						1
Trade payables at 12/31/2009	**12,295**	**129**	**192**	**19**	**4**	**(2)**	**12,637**

The carrying amount of trade payables is considered in line with their fair value at the balance sheet date.

29. Other liabilities

An analysis of other liabilities is as follows:

€ in millions	Fiat Group (as a whole)	C&W Group	Alpitour Group	Juventus F.C.	Holdings System	Eliminations and adjustments	Consolidated EXOR Group
Advances on buy-back agreements	1,832						1,832

Total Other liabilities at 12/31/2009	**5,865**	**159**	**37**	**127**	**19**	**17**	**6,224**

Fiat Group

The item advances on buy-back agreements refers to agreements entered into by the Group during the year or which still remain effective at the balance sheet date. The balance at December 31, 2010 refers for €822 million to assets included in inventories and for €1,010 million to assets included in property, plant and equipment. The item advances on buy-back agreements represents the following:

- at the date of the sale, the price received for the product is recognized as an advance in liabilities;
- subsequently, since the difference between the original sales price and the repurchase price is recognized in the income statement as operating lease installments on a straight-line basis over the lease term, the balance represents the remaining lease installments yet to be recognized in income plus the repurchase price.

The carrying amount of other current liabilities is considered in line with their fair value.

An analysis of other current liabilities (excluding accrued expenses and deferred income) by due date is as follows:

€ in millions	**Fiat Group (as a whole)**	**C&W Group**	**Alpitour Group**	**Juventus F.C.**	**Holdings System**	**Eliminations and adjustments**	**Consolidated EXOR Group**
At December 31, 2010

30. Guarantees granted, commitments and contingent liabilities

An analysis of guarantees granted, commitments and contingent liabilities is as follows:

€ in millions	**12/31/2010**	12/31/2009	Change
Commitments undertaken			
Guarantees, note guarantees and other guarantees	110	101	9
Commitments for the purchase of investments and financial assets	237	72	165
Commitments for the purchase of property, plant and equipment	858	670	188
Commitments to make loans	2	6	(4)
Other commitments undertaken	1	1	0
Total commitments undertaken	**1,208**	850	358
Commitments received			
Guarantees, deposits, note guarantees and other guarantees	64	127	(63)
Other commitments	74	72	2
Total commitments received	**138**	199	(61)

The item guarantees, note guarantees and other guarantees included under commitments undertaken (€110 million) comprises mainly guarantees on behalf of suppliers of tourist services, financial offices and public entities received by the Alpitour Group and other guarantees of the Alpitour Group for €41 million, in addition to bank guarantees received by Juventus Football Club for €69 million.

Commitments for the purchase of investments and other financial assets total €237 million (€72 million at December 31, 2009) and refer to commitments undertaken by the subsidiary Exor S.A. as follows:

- investment commitment for a residual maximum amount of $38 million (€29 million) in the NoCo B LP limited partnership which Groups a series of funds managed by Perella Weinberg Partners L.P.; at December 31, 2010, Exor S.A. invested $18 million (€14 million) and received reimbursements for $1.4 million (€1 million);
- investment commitment in the Perella Weinberg Real Estate for €17 million. At December 31, 2010, Exor S.A. invested € 5 million;
- investment commitment for another €7 million in Banijay Holding S.A.S.;
- investment commitment for a residual €90 million in Almacantar. In 2010, Exor S.A. invested €10 million for the subscription of 63.75% of the capital and voting rights, reduced to 54.98% of the capital and voting rights;
- investment commitment for $96 million (€72 million) in the joint venture with the Jardine Matheson Group and Rothschild;
- purchase commitment for 0.97% of the capital of Banca Leonardo da Silvano Toti Holding S.p.A. for a total of €6 million. In 2010, Exor S.A. purchased 4.86% of the capital for an equivalent amount of €30 million;
- investment commitment for another $22 million, (€16 million) in BDT Capital Partner. The first investment made in 2010 in BDT Capital Partners amounted to $6.6 million (€5 million).

The commitments to make loans refer to the commitment undertaken by C&W Group with its employees.

The commitments to make loans amount to €138 million and refer to guarantees, sureties, note guarantees and other guarantees for €64 million (of which €61 million refers to guarantees and other guarantees provided by third parties to Juventus Football Club and €3 million to guarantees provided by public entities and suppliers of tourist services to Alpitour Group) and sale commitments of the Alpitour Group for €53 million relating to travel bookings.

The main guarantees provided by third parties to Juventus Football Club (€61 million) are as follows:

- guarantee of €42 million received from Sportfive S.A. to guarantee part of the fee relating to the commercial contract entered into with Sportfive Italia S.r.l./Sportfive GmbH & Co. KG., for the naming and marketing rights of the new stadium;
- guarantee of €12 million received from leading credit institutions on behalf of the Temporary Association of Companies - Rosso, Gilardi, Consfer and Morganti to guarantee the contracts for the construction of the new stadium;
- other guarantees for €7 million.

Other guarantees received by Juventus Football Club, for €17 million refer to pledges guaranteeing receivables from Campi di Vinovo S.p.A. and Finanziaria Gilardi S.p.A. in relation to the sale of the investment and subsequent novation and integration agreements.

Guarantees granted of the Fiat Group

At December 31, 2010, the Group had provided guarantees on the debt or commitments of third parties or jointly controlled entities and associates totaling €706 million. At December 31, 2009, the Fiat Group had provided guarantees for an amount of €593 million.

Commitments of the Fiat Group deriving from contractual agreements

The Fiat Group has important commitments and rights deriving from outstanding agreements, summarized in the following.

Teksid

Fiat S.p.A. is subject to a put contract with Renault in reference to the original investment of 33.5% in Teksid, now 15.2%.

In particular, Renault would acquire the right to exercise a sale option to Fiat on its interest in Teksid, in the following cases:

- in the event of non-fulfillment in the application of the protocol of the agreement and admission to receivership or any other redressement procedure;

- in the event Renault's investment in Teksid falls below 15% or Teksid decides to invest in a structural manner outside the foundry sector;

- should Fiat be the object of the acquisition of control by another car manufacturer.

The exercise price of the option is established as follows:

- for the original 6.5% of the share capital of Teksid, the initial investment price as increased by a given interest rate;

- for the remaining amount of share capital of Teksid, the share of the accounting net equity at the exercise date.

Chrysler Group LLC

With specific reference to the Fiat call options under the Chrysler-Fiat strategic alliance Agreements, Fiat, holding 20% of Chrysler at the date of the closing of the Alliance agreements, had the right - conditioned upon the achievement of three separate Performance Events - to receive without consideration up to a further 15% interest in Chrysler. These rights are valued at zero in the consolidated statement of financial position at December 31, 2010, consistently with the accounting for the original 20% investment in Chrysler.

In particular, the first Performance Event occurs when Chrysler receives regulatory approval for an engine based on the Fiat FIRE family for manufacture in U.S. and Chrysler commits to production. Chrysler received the required governmental approvals and achieved this Performance Event on January 10, 2011 by delivering to the U.S. Treasury a letter in which it irrevocably committed to begin production of the FIRE engine in the U.S. Fiat currently holds 25% of Chrysler Group LLC.

The second Performance Event will occur when Chrysler records aggregate revenues of $1.5 billion or more outside NAFTA and enters into one or more franchise agreements regarding the distribution in the Latin America region of Chrysler products. Finally, Fiat will receive the third tranche of 5% interest in Chrysler when Chrysler receives regulatory approval for a vehicle based on Fiat platform or vehicle technology with at least 40 combined miles per gallon and commits to commercial assembly in the United States.

In addition to these rights, for any Performance Event that has not occurred by January 2013, Fiat may acquire the associated 5% equity tranches through a primary call option (the "Alternative Call Option"). Fiat also has a second primary call option (the "Incremental Equity Call Option") to acquire up to a further 16% of Chrysler's equity, subject to a limit on Fiat's ownership at 49.9% prior to full repayment of the U.S. Treasury and Canadian government loans. Fiat may exercise these two call options from January 2013 to June 2016. The Incremental Equity Call Option may not be exercised until the Chrysler aggregate principal of the two loans falls below approximately $4 billion. Fiat may exercise the Alternative Call Option or the Incremental Equity Call Option prior to January 1, 2013 if the loans granted by the U.S. Treasury and the Government of Canada have been repaid and any other related commitment terminated. Fiat also holds two secondary call options to purchase a portion of the membership interest held by the VEBA Trust, and the entirety of the membership interest held by the U.S. Treasury at exercise prices determined in a manner consistent with those described below.

The consideration to be paid for the exercise of these options is determined on the basis of a defined market-based EBITDA multiple (average multiple of reference automakers, not to exceed the then Fiat multiple), applied to Chrysler reported "Modified EBITDA" for the most recent four quarters, less Net Industrial Debt. In the event that at the time of exercise Chrysler is a listed company, such consideration will be based on a volume-weighted average price per share of Chrysler common stock. The Incremental Equity Call Option is recognized in the consolidated statement of financial position on a fair value basis at zero, as the exercise price is not fixed but rather will be based on market values of underlying assets at exercise.

Iveco Finance Holdings Limited

Since 2005, Financial Services activities for Iveco in Western Europe have been managed by Iveco Finance Holdings Limited (IFHL), the joint venture with Barclays Group in which Iveco holds a 49% stake and Barclays a 51% stake. This joint venture provides support for the sector's European sales activities through dealer and end customer financing in France, Germany, Italy and the United Kingdom, and Barclays provides funding up to a maximum of €3.5 billion. The agreements relating to this joint venture contain provisions that are standard for such contracts in relation to management of the company, covenants and default clauses. Under the agreements signed in 2010, the parties stipulated that the joint venture would terminate on May 31, 2012. As is usual for contracts of this type, on that date Iveco will acquire from Barclays Group, and Barclays Group will sell, the interest it holds in that joint venture for a consideration based on the book value of equity. In addition, Iveco is responsible for ensuring repayment of any funding provided to the joint venture by Barclays which is outstanding at that date (which could take place through replacement funding from one or more new lenders or other mechanism). Iveco is evaluating strategic options in relation to this joint venture, including the potential selection of new partners.

Sales of receivables of the Fiat Group

The Fiat Group has discounted receivables and bills without recourse having due dates after December 31, 2010 amounting to €4,624 million, which refer to trade receivables and other receivables for €3,643 million and receivables from financing for €981 million. These amounts include receivables, mainly from the sales network, sold to jointly-controlled financial services companies (FGA Capital) for €2,376 million and to associate financial service companies (Iveco Finance Holdings Limited, controlled by Barclays) for €390 million.

At December 31, 2009, the Fiat Group had discounted receivables and bills without recourse having due dates after that date for a total of €4,611 million. Of this, €3,679 million related to trade receivables and other receivables and €932 million related to receivables from financing. These amounts included receivables, mainly from the sales network, sold to jointly-controlled financial services companies (FGA Capital) for €2,530 million and receivables, mainly from the sales network, sold to associate financial service companies (Iveco Finance Holdings, controlled by Barclays) for €440 million.

Operating lease contracts

At December 31, 2010, the total future minimum lease payments under non-cancellable lease contracts are as follows:

€ in millions	Fiat Group (as a whole)	C&W Group	Alpitour Group	Juventus F.C.	Consolidated EXOR Group
Due within one year	75	53	37		165
Due between one and five years	162	143	120		425

Future minimum lease payments under operating lease agreements at 12/31/2009	**402**	**367**	**207**	**1**	**977**

During 2010, the Group has recorded costs for lease payments of €167 million (€180 million during 2009).

Operating lease contract relate to contracts entered into by:

- Fiat Group for the use of properties and machinery for an average term of about 10-20 and 3-5 years, respectively;
- C&W Group for the use of properties (term of 15 years) and office equipment;
- Alpitour Group for the use of the aircraft under dry lease and wet lease arrangements.

Pending litigation and contingent liabilities

Fiat Group

As a global company with a diverse business portfolio, the Group is exposed to numerous legal risks, particularly in the areas of product liability, competition and antitrust law, environmental risks and tax matters. The outcome of any current or future proceedings cannot be predicted with certainty. It is therefore possible that legal judgments could give rise to expenses that are not covered, or not fully covered, by insurers' compensation payments and could affect the Group's financial position and results. At December 31, 2010, contingent liabilities estimated by the Group amount to approximately €167 million (approximately €111 million at December 31, 2009), for which no provisions have been recognized since an outflow of resources is not considered to be probable. Furthermore, contingent assets and expected reimbursement in connection with these contingent liabilities for approximately €17 million (€20 million at December 31, 2009) have been estimated but not recognized.

Instead, when it is probable that an outflow of resources embodying economic benefits will be required to settle obligations and this amount can be reliably estimated, the Group recognizes specific provisions for this purpose.

Furthermore, in connection with significant asset divestitures carried out in prior years, the Group provided indemnities to purchasers with the maximum amount of potential liability under these contracts generally capped at a percentage of the purchase price. These liabilities refer principally to potential liabilities arising from possible breaches of representations and warranties provided in the contracts and, in certain instances, environmental or tax matters, generally for a limited period of time. At December 31, 2010, potential obligations with respect to these indemnities were approximately €859 million (approximately €879 million at December 31, 2009). Against these obligations, provisions of €60 million (€52 million December 31, 2009) have been made which are classified as other provisions. The Group has provided certain other indemnifications that do not limit potential payment; it is not possible to estimate a maximum amount of potential future payments that could result from claims made under these indemnities.

Furthermore, the question relating to the participation of certain Fiat Group companies, belonging to the CNH and Iveco sectors, in the Oil-for-Food program was concluded in 2008 through two settlement agreements signed with the SEC and US Department of Justice (DOJ). The Fiat Group closed the matter with these authorities by executing a settlement agreement in 2008. This settlement agreement with the DOJ requires the Fiat Group (and, after the demerger, the Fiat Industrial Group) to satisfy certain obligations such as continuing its cooperating with the DOJ and maintaining an adequate Foreign Corrupt Practices Act prevention program.

Since January 2011, Iveco is subject to an investigation being conducted by the European Commission into certain business practices of the leading manufacturers of commercial vehicles in the European Union in relation to possible anti-competitive behavior. The investigation covers several Member States of the European Union. The Group is cooperating fully with the European Commission and, since the investigation is at a very preliminary stage, it is not possible to assess the effects that the investigation may have on the Group, if any.

EXOR S.p.A. and companies in the Holdings System

On December 21, 2010, the Turin Court, first criminal section composed of a collegiate body, ruled in absolute favor of the defendants, Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone, fully acquitting them because the fact did not exist and also deeming inexistent the administrative offense disputed against IFIL S.p.A. (merged by EXOR S.p.A.) and Giovanni Agnelli e C. S.a.p.az. under ex art. 66 of Legislative Decree 231/2001.

Alpitour Group

In reference to the damages to the Bravo Club tourist resort in Zanzibar caused by the fire in January 2001, a case is pending before the competent authorities in Tanzania to establish the compensation for damages due from Royal Insurance. During 2005, Royal Insurance was sentenced, in the judgment of first instance, to pay the damages requested in addition to interest and legal fees. The insurance company appealed this decision and the case is now being judged in the second instance. Based on available information, it is believed that there is reasonable certainty that the judgment of the first instance will be upheld.

C&W Group

On January 3, 2010, a lawsuit seeking class action status was brought against Credit Suisse AG, Credit Suisse Securities LLC (USA), Credit Suisse First Boston, Credit Suisse Cayman Island Branch and Cushman & Wakefield Inc. in connection with lending activities associated with the development of four luxury resorts, each located in the United States.

In connection with the financing that Credit Suisse provided on the developments, the C&W Group was engaged by Credit Suisse and others to prepare valuations.

The complaint alleges that Credit Suisse devised a “loan to own” scheme whereby it used artificially inflated appraisals prepared by C&W Group to justify making excessive loans which the developers were unable to service.

Plaintiffs allege Credit Suisse and C&W Group violated various statutes under U.S. law. Plaintiffs claim $8 billion in economic damages and $16 billion in punitive damages.

C&W Group believes the plaintiff’s case is without merit and intends to vigorously defend this matter.

Juventus Football Club

Guardia di Finanza access

On December 7, 2010, the Regional Tax Revenues Department – Major Taxpayers Office notified the Company about an assessment with a proposal to compromise and an invitation to appear.

In view of the risks related to the potential tax litigation and while maintaining that Juventus has always conducted its business according to the law and in good faith as demonstrated on several occasions by the competent courts, whose decisions have become final, the Company has accepted the offer in compromise, signing a settlement agreement on December 14, 2010 that does not enter into the merits of the dispute and will require a payment of €7.4 million, which has been recorded in other unusual income (expense).

VAT receivables on UEFA Champions League revenues

With reference to the dispute in process regarding the refusal by the Tax Revenues Agency to refund the VAT receivable of €1.4 million (assigned without recourse to a factoring company in 2004 and therefore, no longer included with assets) in relation to the UEFA tournaments played in the 2000/2001 football season, the Tax Revenues Agency filed an appeal on November 12, 2010 with the Court of Cassation against the second instance ruling in favor of Juventus. The Company filed its defense brief on January 4, 2011.

Case before the Turin Court

On November 24, 2009, in the case before the Court of Turin for financial misrepresentation, the former directors standing trial and Juventus Football Club, held to be liable under Legislative Decree 231 of 2001, were found not guilty and acquitted of charges of financial misrepresentation by the Court of Turin,.

On April 2, 2010, the Attorney General's office lodged an appeal (notified on April 8, 2010) against the ruling to acquit former directors of Juventus Football Club, handed down by the trial judge on November 24, 2009. As no notification of appeal has been served on the Company, its acquittal under the ruling handed down on November 24, 2009 is final.

On September 23, 2010, under the mandate conferred to the board of directors on June 28, 2010, the company, before the competent bodies, asked for a discontinuance of an action presented on January 17, 2007 against person or persons unknown.

Case before the Naples Court

With the ruling issued on October 20, 2009, based on the Court of Cassation decision issued October 9, 2009, the Court of Naples allowed some plaintiffs to file claims in the suit against Juventus Football Club. The company will present its case as laid down by law, confident of its solid grounds.

On December 14, 2009, the Court of Naples convicted, on first instance, the company's former chief executive officer of sports fraud and aiding and abetting crime, in a trial heard as a shortened proceeding. At this time, no new claims have been notified to the company.

Como Calcio bankruptcy

On February 17/22, 2011 a settlement agreement was reached with the liquidators of Como Calcio (also signed by Enrico Preziosi) who in June 2006 had taken legal action against Juventus to collect payment of €1.58 million in fees that Como Calcio claimed were still owing on the definitive transfer of the registration rights of the footballers Piccolo and Perderzoli. The same claim was renewed by the liquidators in October 2010 appealing against the bankruptcy ruling of the Court of First Instance. The Company has provisions allocated for this risk covering the amount claimed.

Following the settlement agreement, which entailed a payout of €0.2 million, the dispute can definitively be considered closed. Accordingly, in the third quarter of 2010/2011, Juventus will release the remaining €1.38 million in provisions to income.

31. Segment reporting

EXOR S.p.A. and the companies in the Holdings System mainly invest in equity investments and financial market investments. Through its subsidiaries, EXOR Group is present over a wide range of sectors, particularly Automobiles (Fiat Group), Agricultural and Construction Equipment (which from January 2011 is headed by the Fiat Industrial Group), real estate services (C&W Group), tourism (Alpitour Group) and professional soccer (Juventus F.C.).

For this reason, the EXOR Group has chosen to present segment reporting according to IFRS 8 – *Operating Segments* (replacing IAS 14 – *Segment Reporting*), which coincides with the consolidated data of each subsidiary holding company, every one of which represents an investment in a major business segment: Fiat Group, C&W Group, Alpitour Group, Juventus Football Club and the Holdings System.
The segment reporting relating to continuing activities is therefore presented in the following consolidated income statement and statement of financial position which gives the data of each Group and subsidiary mentioned above.
Such statements serve to highlight the contribution of each of the Groups and Companies to the formation of the consolidated data of the EXOR Group.

Further analyses on the performance of the various segments is presented in the “Review of Performance by the Main Operating Subsidiaries and Associates and Relevant Subsidiaries in the Holdings System” in the Report on Operations.

33. Information on financial risks

Information on the financial risks to which the individual operating sectors are exposed is presented below.

Holdings System

EXOR S.p.A. and the companies which form the Holdings System are exposed to credit risk in that they invest a portion of their cash in bonds issued by leading bank and corporate counterparts which, in any case, are selected according to their credit worthiness. Instead, the relevant investments denominated in currencies other than the Euro, U.S. dollars in particular, are exposed to currency risks; in view of the permanent characteristics of such investments, transactions to hedge the risk of exchange rate fluctuations on those currencies were not put into place.
As far as liquidity risk is concerned, financing needs and cash flows are managed with the aim of optimizing financial resources. In particular, outgoing cash flows from current operations are substantially financed by incoming flows from ordinary business activities.

EXOR S.p.A. also assesses and manages its exposure to fluctuations in interest rates in accordance with its financial management policies and uses derivative financial instruments to fix some of the financing obtained at a pre-set interest rate. The only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on bank debt.

Credit risk

At December 31, 2010 and December 31, 2009, there are no financial assets past due and not written down and provisions for doubtful accounts.

Liquidity risk

EXOR S.p.A. and the companies that form the Holdings System finance outgoing cash flows from current operations with the incoming flows from ordinary business activities and cash resources.

Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or difficulties in raising sufficient funds that can be readily used or to fund operating and investment activities. In this sense, EXOR and the companies in the Holdings System operate so that it has irrevocable credit lines available with expiration dates and amounts consistent with its investment plans.

Market risk

EXOR and the companies that form the Holdings System are principally exposed to exchange rate and interest rate risks and use financial hedging instruments consistently with the policies for the management of risks adopted by each, in addition to price risks on equity shares and other listed financial assets.

Currency risk

Some of the assets held for trading and cash by EXOR S.p.A. at December 31, 2010 (respectively, €280 million and €22 million) are denominated in currencies other than Euro. These are securities held for trading and cash, both of which have been adjusted to the year-end exchange rate. There is also a part of financial liabilities (€227 thousand) denominated in currencies other than Euro. Since these are securities held for trading and cash, both have been adjusted to the rate prevailing at year end.

The subsidiary Exor S.A. is exposed to exchange rate risk on bonds in U.S. dollars issued by Perfect Vision Ltd. (a total of $102 million) and on the embedded derivative (-$69 million). A 10% increase or decrease in the exchange rate of the United States currency against the Euro would have an effect on the result of -€2 million or +€3 million, respectively.

Sensitivity analysis – currency risk

A hypothetical favorable 10% change in the exchange rates of the main foreign currencies against the Euro would product a negative effect on the result of €38 million (of which -€43 million on financial assets and +€5 million on financial liabilities); whereas an unfavorable change of 10% would have a positive effect on the result of €47 million (of which +€53 million on financial assets -€6 million on financial liabilities.

Interest rate risk

EXOR S.p.A. is exposed to interest rate risk associated with bank debt and uses interest rate swaps to mitigate such risk.

Sensitivity analysis – interest rate risk

A hypothetical 10% change in the interest rates would have a net effect on the result of €1 million.

Price risks

The Holdings System is exposed to price risk originating from available-for-sale equity investments, securities held to maturity and from equity shares and bonds held for trading.

Sensitivity analysis – price risk

Considering the exposure to price risk at the balance sheet date, if the prices of securities, classified as equity investments available-for-sale and assets held for trading had been 5% higher or lower, the fair value reserve recorded in equity would have been €88 million higher or lower and the amount of fair value recognized in the income statement on securities held for trading would have been €36 million higher or lower.

Details are as follows:

€ in millions	**2010**			
	Change in price + 5%		**Change in price - 5%**	
	Effect on the result	**Effect on equity**	**Effect on the result**	**Effect on equity**
SGS S.A.		74		(74)
Gruppo Banca Leonardo S.p.A.		4		(4)
Other investments available for sale		7		(7)
Mutual funds		3		(3)
Equity securities held for trading	17		(17)	
Bonds held for trading	19		(19)	
	36	**88**	**(36)**	**(88)**

C&W Group

Credit risk

C&W Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. Other risk factors, including the default risk of the industry and country in which customers operate, have less of an influence on credit risk. This depends on the type of services rendered and knowledge about the quality of the customers.

C&W Group's credit risk is represented by the carrying amount of the financial assets recorded in cash and cash equivalents for $102.7 million (€76.9 million) and commissions receivable $322.1 million (€241 million); at December 31, 2009, the carrying amount of financial assets recorded in cash and cash equivalents was $74.8 million (€52 million) and the carrying amount of commissions receivable was $300 million (€208 million).

Commissions receivable are presented net of the allowance for doubtful accounts which, at December 31, 2010, amount to $11 million, or €8 million ($19 million at December 31, 2009, or €13 million).

At December 31, 2010, C&W Group has receivables past due and not subject to individual writedown for $303 million (€227 million). Receivables past due less than one month amount to $245 million (€184 million); receivables past due more than one month total $58 million (€43 million).

At December 31, 2009, receivables past due and not subject to individual writedown were $287 million (€199 million). Receivables past due less than one month amounted to $255 million (€177 million); receivables past due more than one month totaled $32 million (€22 million).

Liquidity risk

In order to support the cash flows generated internally and the maximum peak of cash flow demands early in the second quarter of the year, on May 29, 2007, C&W Group secured a $350 million Senior Revolving Credit Facility. This loan aims to provide capital for seasonal needs and acquisition financing.

Currency risk

C&W Group's foreign currency risk from operating activities is low since the Group entities predominantly execute their operating activities in their respective functional currencies.

The exposure to credit risk can only derive from intercompany commercial transactions; in 2010, to mitigate such risks, the Group had 60 exchange forward financial derivative contracts on the major currencies to which it is exposed. At December 31, 2010, the notional amount of such instruments in U.S. dollars is equal to $137 million (€103 million) and the fair value was a negative $1.4 million, or about €1 million ($2.3 million, or €1.6 million at December 31, 2009).

The currency risk relating to financial payables is limited to the quota of the Senior Revolving Credit Facility: in Euro for $4 million ($12.9 million at December 31, 2009); in GBP for $6.2 million ($38.8 million at December 31, 2009) and in $ CAD for $10 million ($16.2 million at December 31, 2009).

C&W Group believes that the legal entities which own the debt will generate sufficient cash flows in the future to repay their own debts, therefore hedge instruments were not used.

Sensitivity analysis – currency risk

A 10% change in the main currencies against the U.S. dollar would produce a net effect on the result of $160 thousand (€121 thousand).

Interest rate risk

C&W Group is exposed to interest rate risk associated with the $350 million Revolving Credit Facility. At this time, management has not put in place any type of hedge.

Sensitivity analysis – Interest rate risk

For variable rate liabilities, the sensitivity analysis was prepared assuming that the exposure at year end was the same throughout the year.

A change of 100 basis points in interest rates, assuming that all other variables remain constant, would produce a higher or lower effect on the result for the year ended December 31, 2010 of $2.7 million (€2.1 million).

Alpitour Group

Alpitour Group regularly assesses its exposure to various types of risk and manages such risks using traditional and derivative instruments according to its management and control policy. Under such policy speculative type activities are not allowed and derivative financial instruments are used for the management of exposure to fluctuations in exchange rates, interest rates and fuel prices for hedging purposes.

The Alpitour Group does not have a specific concentration of credit risk since its credit exposure is spread over a large number of counterparts and customers.
Trade receivables are shown net of the allowance for receivables writedown which, at December 31, 2010, amounts to €24 million (an amount substantially unchanged compared to December 31, 2009). The allowance account is calculated on the basis of the risk of non-fulfillment by the counterparts, determined by considering both available information on the solvency of the customers and historical data.
At October 31, 2010, the Alpitour Group has receivables which are past due but not subject to individual writedown for an amount of €11 million, of which €2 million is past due less than one month. At December 31, 2009, such receivables amounted to €17 million, of which €2 million was past due less than one month.

The sensitivity analyses by the Alpitour Group were carried out on the basis of the financial statement data at October 31 2010.

Sensitivity analysis – currency risk and fuel price

The Alpitour Group is exposed to currency risk on commercial and financial assets for €17 million and on commercial payables and financial instruments for €49 million. A change in the currency rates of the main foreign currencies against the Euro of an increase or decrease of 10% would produce a net effect on the result with recognition of higher income or expenses of €1 million; a change in the currency rate of the U.S. dollar against the Euro would produce a negative/positive effect on equity of €2.2 million.
At October 31, 2010, there are no outstanding transactions hedging the risk of fuel price fluctuations.

Sensitivity analysis – interest rate

A hypothetical change of 10% in the interest rate would produce a net effect on equity of €0.2 million based on the fair value of the derivative financial instruments.

Juventus FC

Juventus Football Club does not have a significant concentration of credit risk and has appropriate procedures in place to minimize the exposure to such risk. Receivables from Italian soccer companies are guaranteed by the compensation mechanism of the National Professional League while receivables from foreign soccer companies are largely guaranteed by sureties or other guarantees.
Almost all of Juventus Football Club's transactions (sales and purchases) are in Euro; thus the company is not subject to fluctuations in exchange rates to any relevant degree.
The company manages liquidity risk by keeping the bank loans secured from leading credit institutions at levels that avert financial pressure situations and are sufficient to meet operating and investment needs.
At December 31, 2010, Juventus Football Club has receivables past due and subject to individual writedown for €1 million (€0.4 million at December 31, 2009) and receivables past due and not subject to individual writedown for €5 million, of which €4 million is past due less than one month. At December 31, 2009, such receivables amounted to €7 million, of which €5 million was past due less than one month.

Interest rate risk

Juventus Football Club has adopted a policy to hedge the risks of fluctuation in the interest rates on two loans received from leading banking institutions for the construction of the new stadium of the sports facilities using derivative financial instruments.

Fiat Group
The Group is exposed to the following financial risks connected with its operations:

- credit risk, regarding its normal business relations with customers and dealers, and its financing activities;

- liquidity risk, with particular reference to the availability of funds and access to the credit market and to financial instruments in general;

- market risk (principally relating to exchange rates and interest rates), since the Group operates at an international level in different currencies and uses financial instruments which generate interest. The Group is also exposed to the risk of changes in the price of certain listed shares.

The Group constantly monitors the financial risks to which it is exposed, in order to detect those risks in advance and take the necessary actions to mitigate them.

The following section provides qualitative and quantitative disclosures on the effect that these risks may have upon the Group.

The quantitative data reported in the following do not have any predictive value, in particular the sensitivity analysis on market risks does not reflect the complexity of the market or the reaction which may result from any changes that are assumed to take place.

Credit risk
The maximum credit risk to which the Group is theoretically exposed at December 31, 2010 is represented by the carrying amounts stated for financial assets in the statement of financial position and the nominal value of the guarantees provided on liabilities or commitments to third parties as discussed in Note 30.

Dealers and final customers are subject to specific assessments of their creditworthiness under a detailed scoring system; in addition to carrying out this screening process, the Group also obtains financial and non-financial guarantees for risks arising from credit granted for the sale of cars, commercial vehicles and agricultural and construction equipment. These guarantees are further strengthened where possible by reserve of title clauses on financed vehicle sales to the sales network and on vehicles assigned under finance leasing agreements.

Balances which are objectively uncollectible either in part or for the whole amount are written down on a specific basis if they are individually significant. The amount of the writedown takes into account an estimate of the recoverable cash flows and the date of receipt, the costs of recovery and the fair value of any guarantees received. Impairment losses are recognized for receivables which are not written down on a specific basis, determined on the basis of historical experience and statistical information.

Receivables for financing activities amounting to €13,774 million at December 31, 2010 contain balances totaling €68 million, which have been written down on an individual basis. Of the remainder, balances totaling €279 million are past due by up to one month, while balances totaling €826 million are past due by more than one month. In the case of installment payments, even if only one installment is overdue, the whole amount of the receivable is classified as such. At December 31, 2009, balances of €60 million had been written down on an individual basis out of Receivables for financing activities of the Fiat Group totaling €12,695 million. Of the remainder, balances totaling €426 million were past due by up to one month, while balances totaling €918 million were past due by more than one month.

Trade receivables and other receivables amounting to €6,236 million at December 31, 2010 contain balances totaling €90 million which have been written down on an individual basis. Of the remainder, balances totaling €311 million are past due by up to one month, while balances totaling €526 million are past due by more than one month. At December 31, 2009 balances totaling €67 million had been written down on an individual basis out of trade receivables and other receivables of the Fiat Group totaling €6,178 million. Of the remainder, balances totaling €280 million were past due by up to one month, while balances totaling €568 million were past due by more than one month.

The decrease in the past due component in receivables from financing activities is partially attributable to the gradual collection of loans granted by Banco CNH Capital S.A. as part of the development/subsidized loans program for agriculture of the Brazilian development agency managed through Banco Nacional de Desenvolvimento Economico e Social ("BNDES"). These receivables fell under the scope of the general debt relief programs that were implemented from time to time by the Brazilian government between 2005 and 2008 to support an agricultural industry going through a difficult period. With the rescheduling programs now at an end, the company has taken all the measures necessary to collect installments falling due, adjusting the level of its loan allowances in relation to the extent to which the overdue balances are being repaid. Total rescheduled outstanding loans issued by Banco CNH Capital amount to approximately 1.2 billion reais (approximately €0.5 billion) at December 31, 2010, representing a decrease of approximately 0.8 billion reais over December 31, 2009; Banco CNH Capital had a net overdue balance with its customers of approximately 0.9 billion reais (approximately €0.4 billion), representing a decrease of approximately 0.2 billion reais over December 31, 2009. Although the continual reschedulings of the recent past have contributed to an increase in the uncertainty as to the timing and means by which customers will make repayment, the amounts provided are considered sufficient to cover the residual credit risk. In the meantime, the BNDES has continued its financial support for the company and the subsidized loan programs.

Liquidity risk

Liquidity risk arises if the Group is unable to obtain the funds needed to carry out its operations under economic conditions.

The two main factors that determine the Group's liquidity situation are on the one hand the funds generated by or used in operating and investing activities and on the other the debt lending period and its renewal features or the liquidity of the funds employed and market terms and conditions.

The Group has adopted a series of policies and procedures whose purpose is to optimize the management of funds and to reduce the liquidity risk, as follows:

- centralizing the management of receipts and payments, where it may be economical in the context of the local civil, currency and fiscal regulations of the countries in which the Group is present;
- maintaining an adequate level of available liquidity;
- diversifying the means by which funds are obtained and maintaining a continuous and active presence on the capital markets;
- obtaining adequate credit lines;
- monitoring future liquidity on the basis of business planning.

Management of the Fiat Group believes that the funds currently available, in addition to those funds that will be generated from operating and financing activities, will enable the Fiat Group post-demerger and the Fiat Industrial Group to satisfy the requirements resulting from their investing activities and their working capital needs and to fulfill their obligations to repay their debts at their natural due date.

Currency risk

The Group is exposed to risk resulting from changes in exchange rates, which can affect its earnings and equity. In particular:

- Where a Group company incurs costs in a currency different from that of its revenues, any change in exchange rates can affect the operating profit/(loss) of that company. In 2010, the total trade flows exposed to currency risk amounted to the equivalent of about 27% of sales.

- The principal exchange rates to which the Group is exposed are the following:

    - EUR/USD, relating to sales in dollars made by Italian companies (in particular Ferrari and Maserati) to the North American market and to other markets in which the US dollar is the trading currency, the production/purchases of the CNH – Case New Holland sector in the Euro area and to sales in dollars made by Iveco;

    - EUR/GBP, EUR/CHF, in relation to sales on the UK and Swiss markets and purchases made by the CNH sector in the Euro area;

    - EUR/PLN, EUR/TRY, relating to manufacturing costs incurred in Poland and Turkey for products sold in the Euro area;

    - USD/BRL and EUR/BRL, relating to Brazilian manufacturing operations and the related import and export flows;

    - USD/AUD, mainly in relation to sales made by the CNH sector in Australia;

    - USD/GBP, in relation to the production/purchases of the CNH sector in the UK.

    Taken overall, trade flows exposed to changes in these exchange rates in 2010 made up approximately 84% of the exposure of the Fiat Group to currency risk from trade transactions.

    Taken overall trade flows exposed to changes in these exchange rates in 2010 made up approximately 69% of the Fiat Industrial Group of the exposure to currency risk from trade transactions.

- It is the Group's policy to use derivative financial instruments to hedge a certain percentage, on average between 55% and 85%, of the forecast trading transaction exchange risk exposure for the coming 12 months (including such risk beyond that date where it is believed to be appropriate in relation to the characteristics of the business) and to hedge completely the exposure resulting from firm commitments.

- Group companies may find themselves with trade receivables or payables denominated in a currency different from the money of account of the company itself. In addition, in a limited number of cases, it may be convenient from an economic point of view, or it may be required under local market conditions, for companies to obtain finance or use funds in a currency different from the money of account. Changes in exchange rates may result in exchange gains or losses arising from these situations. It is the Group's policy to hedge fully, whenever possible, the exposure resulting from receivables, payables and securities denominated in foreign currencies different from the company's money of account.

- Certain of the Group's subsidiaries are located in countries which are not members of the European monetary union, in particular the United States, Canada, the United Kingdom, Switzerland, the Czech Republic, Brazil, Poland, Turkey, India, China, Argentina and South Africa. As the Group's reference currency is the Euro, the income statements of those countries are converted into Euro using the average exchange rate for the period, and while revenues and margins are unchanged in local currency, changes in exchange rates may lead to effects on the converted balances of revenues, costs and the result in Euro.

- The assets and liabilities of consolidated companies whose money of account is different from the Euro may acquire converted values in Euro which differ as a function of the fluctuation in exchange rates. The effects of these changes are recognized directly in the item Cumulative Translation Adjustments reserve, included in Other Comprehensive income (see Note 24).

The Group monitors its principal exposure to conversion exchange risk, although there was no specific hedging in this respect at the balance sheet date.

There have been no substantial changes in 2010 in the nature or structure of exposure to currency risk or in the Group's hedging policies.

Sensitivity analysis – currency risk

The potential loss in fair value of derivative financial instruments held for currency risk management (currency swaps/forwards, currency options, interest rate and currency swaps) at December 31, 2010 resulting from a hypothetical, unfavorable and instantaneous change of 10% in the exchange rates of the leading foreign currencies with the Euro would have been approximately €614 million. The potential loss in fair value of derivative financial instruments held for currency risk management at December 31, 2009 resulting from a hypothetical, unfavorable and instantaneous change of 10% in the exchange rates of the leading foreign currencies with the Euro would have been approximately €544 million for the Fiat Group as a whole.

Receivables, payables and future trade flows whose hedging transactions have been analyzed were not considered in this analysis. It is reasonable to assume that changes in exchange rates will produce the opposite effect, of an equal or greater amount, on the underlying transactions that have been hedged.

Interest rate risk

The manufacturing companies and treasuries of the Group make use of external funds obtained in the form of financing and invest in monetary and financial market instruments. In addition, Group companies make sales of receivables resulting from their trading activities on a continuing basis. Changes in market interest rates can affect the cost of the various forms of financing, including the sale of receivables, or the return on investments, and the employment of funds, causing an impact on the level of net financial expenses incurred by the Group.

The financial services companies provide loans (mainly to customers and dealers), financing themselves using various forms of direct debt or asset-backed financing (e.g. securitization of receivables). Where the characteristics of the variability of the interest rate applied to loans granted differ from those of the variability of the cost of the financing obtained, changes in the current level of interest rates can affect the operating profit/(loss) of those companies and the Group as a whole.

In order to manage these risks, the Group uses interest rate derivative financial instruments, mainly interest rate swaps and forward rate agreements, with the object of mitigating, under economically acceptable conditions, the potential variability of interest rates on net profit/(loss).

Sensitivity analysis – interest rate risk

In assessing the potential impact of changes in interest rates, the Group separates out fixed rate financial instruments (for which the impact is assessed in terms of fair value) from floating rate financial instruments (for which the impact is assessed in terms of cash flows).

The fixed rate financial instruments used by the Group consist principally of part of the portfolio of the financial services companies (basically customer financing and finance leases) and part of debt (including subsidized loans and bonds).

With respect to Fiat Group post-demerger, the potential loss in fair value of fixed rate financial instruments (including the effect of interest rate derivative financial instruments) held at December 31, 2010, resulting from a hypothetical, unfavorable and instantaneous change of 10% in market interest rates, would have been approximately €49 million. With reference to the companies that will form part of the Fiat Industrial Group, the potential loss in fair value of fixed rate financial instruments (including the effect of interest rate derivative financial instruments) held at December 31, 2010, resulting from a hypothetical, unfavorable and instantaneous change of 10% in market interest rates, would have been approximately €22 million. For the Fiat Group, the potential loss in fair value of fixed rate financial instruments (including the effect of interest rate derivative financial instruments) held at December 31, 2009 resulting from a hypothetical, unfavorable and instantaneous change of 10% in market interest rates would have been approximately €70 million.

Floating rate financial instruments consist principally of cash and cash equivalents, loans provided by the financial services companies to the sales network and part of debt. The effect of the sale of receivables is also considered in the sensitivity analysis as well as the effect of hedging derivative instruments.

With respect to Fiat Group post-demerger, a hypothetical, unfavorable and instantaneous change of 10% in short-term interest rates at December 31, 2010, applied to floating rate financial assets and liabilities, operations for the sale of receivables and derivative financial instruments, would have caused increased net expenses before taxes, on an annual basis, of approximately €3 million. With reference to the companies that will form part of the Fiat Industrial Group, a hypothetical, unfavorable and instantaneous change of 10% in short-term interest rates at December 31, 2010, applied to floating rate financial assets and liabilities, operations for the sale of receivables and derivative financial instruments, would have caused increased net expenses before taxes, on an annual basis, of approximately €9 million.
With respect to the Fiat Group, a hypothetical, unfavorable and instantaneous change of 10% in short-term interest rates at December 31, 2009, applied to floating rate financial assets and liabilities, operations for the sale of receivables and derivative financial instruments, would have caused increased net expenses before taxes, on an annual basis, of approximately €11 million.

This analysis is based on the assumption that there is a general and instantaneous change of 10% in interest rates across homogeneous categories. A homogeneous category is defined on the basis of the currency in which the financial assets and liabilities are denominated.

Other risks on derivative financial instruments

The Group holds derivative financial instruments, whose value is linked to the price of listed shares (predominately equity swaps on Fiat shares and after the demerger, on a basket of Fiat S.p.A. and Fiat Industrial S.p.A .share).

Although these transactions were entered into for hedging purposes, they do not qualify for hedge accounting under IFRS. As a consequence, the variability of the underlying values could have an effect on the Group's net profit/(loss).

In addition, the Group has entered into derivative contracts linked to commodity prices to hedge specific exposures on supply contracts.

Sensitivity analysis – price risk

As for the companies of the Fiat Group post-demerger, in the event of a hypothetical, unfavorable, and instantaneous change of 10% in the underlying values, the potential loss in fair value of outstanding derivative financial instruments at December 31, 2010 linked to the Fiat share price would have been approximately €32 million (€21 million at December 31, 2009). The increase over the previous year is due to the different price of the share at the end of the year (which is used as a basis for the simulation).

As for the companies of the Fiat Group post-demerger, in the event of a hypothetical, unfavorable and instantaneous change of 10% in the underlying raw materials prices, the potential loss in fair value of outstanding derivative financial instruments at December 31, 2010 linked to commodity prices would have been approximately €1 million. With reference to the companies that will form part of the Fiat Industrial Group, in the event of a hypothetical, unfavorable, and instantaneous change of 10% in the underlying raw materials prices, the potential loss in fair value of outstanding derivative financial instruments at December 31, 2010 linked to commodity prices would not have been significant. For the Fiat Group, in the event of a hypothetical, unfavorable and instantaneous change of 10% in the underlying raw materials prices, the potential loss in fair value of outstanding derivative financial instruments at December 31, 2009 linked to commodity prices would have been approximately €3 million.

34. Fair value hierarchy

IFRS 7 requires financial instruments recognized in the statement of financial position at fair value to be classified on the basis of a hierarchy that reflects the significance of the inputs used in determining fair value. The following levels are used in this hierarchy:

- Level 1 – quoted prices in active markets for the assets or liabilities being measured;
- Level 2 – inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) on the market;
- Level 3 – inputs that are not based on observable market data.

The following table provides an analysis under this hierarchy of the financial assets and liabilities at December 31, 2010 and measured at fair value.

€ in millions	Note	Level 1	Level 2	Level 3	Total
Available-for-sale financial assets at fair value:					
Investments at fair value with changes directly in equity	16	1,510	19	186	1,715
Non-current securities	16	28		78	106
Current securities	20	62			62
Financial assets at fair value held-for-trading:					
Current investments	20	376			376
Current securities	20	424		96	520
Other financial assets	21	5	605		610
Securities readily converted into cash (due within 3 months) measured at fair value	22	4			4
Total Assets at 12/31/ 2010		**2,409**	**624**	**360**	**3,393**
Other financial liabilities	21		(414)	(55)	(469)
Total Liabilities at 12/31/2010			**(414)**	**(55)**	**(469)**

In 2010, there were no transfers from Level 1 to Level 2 or vice versa.

The following table provides changes in Level 3 in 2010:

€ in millions	Balance at 12/31/2009	Gains (losses) recognized in income statement	Gains (losses) recognized in equity	Increase (decrease)	**Balance at 12/31/2010**
Available-for-sale financial assets at fair value:					
Investments at fair value with changes directly in equity	119		3	64	**186**
Non-current securities	66		6	6	**78**
Financial assets at fair value held for trading:					
Current investments	85	11			**96**
Total Assets	**270**	**11**	**9**	**70**	**360**
Other financial liabilities	(51)	(2)		(2)	**(55)**
Total Liabilities	**219**	**9**	**9**	**68**	**305**

In 2010, there were no transfers from Level 3 to other levels or vice versa.

35. Related party transactions

The EXOR Group is directly controlled by Giovanni Agnelli e C. S.a.p.az., a company registered in Italy.

The transactions between the company and its consolidated subsidiaries, which are related parties of the same company, have been eliminated in the EXOR consolidated financial statements and consequently are not presented in this note.

Related party transactions have been carried out in accordance with existing laws on the basis of reciprocal economic gain.

Costs have not been recognized during the period for non-existent or doubtful liabilities in relation to amounts due from related parties.

The effects on the consolidated income statement of the Group for the years 2010 and 2009 are as follows:

		of which: with related parties					
€ in millions	Total 2010	Unconsolidated subsidiaries	Jointly controlled entities	Associated companies	Other related parties	Total related parties	Effect on total (%)
Net revenues	58,985	21	2,322	482	1	2,826	**4.8%**
Cost of sales	50,216	71	3,182	385	84	3,722	**7.4%**
Selling, general and administrative costs	5,009	17	20	39	83	159	**3.2%**

		of which: with related parties					
€ in millions	Total 2009	Unconsolidated subsidiaries	Jointly controlled entities	Associated companies	Other related parties	Total related parties	Effect on total (%)

Other current liabilities	6,224	4	166	5	21	196	3.1%

Transactions with jointly controlled entities

These transactions, which refer solely to the Fiat Group, affected revenues, cost of sales, trade receivables and payables, current receivables from financing activities, asset backed-financing and other financial payables. The effects arising on the financial statements are set out below.

Net revenues

These transactions consist principally of sales of motor vehicles, components, including engines and gearboxes, production systems and the provision of services, to the following companies:

€ in millions	**2010**	2009
Tofas-Turk Otomobil Fabrikasi Tofas A.S., for the sale of motor vehicles	1,152	835
Società Europea Veicoli Leggeri-Sevel S.p.A., for the sale of engines, other components and production systems	701	475
Fiat India Automobiles Limited, for the provision of services, recharges of research costs and the sale of materials	73	113
Iveco Oto Melara Società consortile, for the sale of vehicles and special transport	123	97
FGA Capital for the sale of motor vehicles	103	86
CNH de Mexico de CV, for the sale of agricultural and construction equipment	46	36
Société Européenne de Véhicules Légers du Nord - Sevelnord Société Anonyme, for the sale of engines and other components and production systems	32	30
Turk Traktor Ve Ziraat Makineleri A.S., for the sale of agricultural and construction equipment	26	19
SAIC IVECO Commercial Vehicle Investment Company Limited for technical services	23	2
New Holland HFT Japan Inc., for the sale of agricultural and construction equipment	14	23
Other	29	29
Total Net revenues from jointly-controlled entities	**2,322**	1,745

Cost of sales

These transactions have taken place principally with the following companies:

€ in millions	**2010**	2009
Società Europea Veicoli Leggeri-Sevel S.p.A., for the purchase of motor vehicles	1,318	1,106
Tofas - Turk Otomobil Fabrikasi Tofas A.S., for the purchase of motor vehicles	1,230	991
Société Européenne de Véhicules Légers du Nord - Sevelnord Société Anonyme, for the purchase of motor vehicles	329	427
Turk Traktor Ve Ziraat Makineleri A.S., for the purchase of agricultural equipment	169	137
FGA Capital, for charges on the sale of receivables and the purchase of motor vehicles	72	106
Fiat India Automobiles Limited, for the purchase of engines	34	22
Other	30	36
Total Cost of sales for purchases from jointly-controlled entities	**3,182**	2,825

Trade receivables

These relate to receivables resulting from the revenues discussed above and those arising from the Group’s trade relationships with FGA Capital S.p.A., which mostly regard the sales of vehicles leased out by FGA Capital S.p.A. in turn under operating or finance lease arrangements. In particular:

€ in millions	2010	2009
Fiat India Automobiles Limited	104	170
Tofas - Turk Otomobil Fabrikasi Tofas A.S.	90	83
FGA Capital	96	83
Iveco - Oto Melara Società consortile	52	66
Società Europea Veicoli Leggeri-Sevel S.p.A.	33	47
Société Européenne de Véhicules Légers du Nord - Sevelnord Société Anonyme	1	2
Other	33	18
Total Current trade receivables due to jointly-controlled entities	**409**	469

Trade payables

These relate to payables resulting from the costs discussed above and those arising from the Group’s trade relationships with FGA Capital S.p.A. In particular:

€ in millions	2010	2009
Società Europea Veicoli Leggeri-Sevel S.p.A.	466	290
Tofas - Turk Otomobil Fabrikasi Tofas A.S.	220	250
Société Européenne de Véhicules Légers du Nord - Sevelnord Société Anonyme	51	113
FGA Capital	53	80
Turk Traktor Ve Ziraat Makineleri A.S.	28	
Other	20	60
Total Trade payables due to jointly-controlled entities	**838**	793

Current receivables from financing activities

This item, amounting to €63 million at December 31, 2010 (€62 million at December 31, 2009), mainly relates to receivables of the Group financial services companies due from jointly controlled entities.

Other current assets

This item, amounting to €34 million at December 31, 2010 (€36 million at December 31, 2009), relates mostly to other receivables of €26 million due from FGA Capital (€31 million at December 31, 2009).

Asset-backed financing

This item, amounting to €92 million at December 31, 2010 (€96 million at December 31, 2009), relates to amounts due to FGA Capital for sales of receivables which do not qualify as sales under IAS 39.

Other debt

This item, amounting to €147 million at December 31, 2010 (€209 million at December 31, 2009), includes €144 million (€96 million at December 31, 2009) of other payables of a financial nature due to FGA Capital.

Transactions with associates of the EXOR Group

These transactions mainly affected revenues, trade receivables and asset backed-financing and other financial payables. The effects arising on the financial statements are set out as follows.

Net revenues

These transactions consist principally of sales of motor vehicles and components, including engines and gearboxes, production systems, and the provision of services, to the following companies of the Fiat Group:

€ in millions	**2010**	2009
Iveco Finance Holdings Limited (a subsidiary of the Barclays group), for the sale of industrial vehicles leased out by the associate	126	74

Total Net Revenues from associates	**482**	288

Cost of sales

These transactions consist principally of the purchase of vehicles by the following companies:

€ in millions	**2010**	2009
Chrysler, for the purchase of vehicles	226	
Other	159	125
Total Cost of sales from associates	**385**	125

Trade receivables

This item, amounting to €164 million at December 31, 2010 (€93 million at December 31, 2009), refers mainly to receivables of the companies of the Fiat Group (€161 million).

Asset-backed financing

This item, amounting to €228 million at December 31, 2010 (€216 million at December 31, 2009), includes amounts due to Iveco Finance Holding Limited for sales of receivables which do not qualify as sales under IAS 39.

Transactions with other related parties

Fiat Group

The principal transaction in this category relates to an amount of €84 million (€68 million in 2009) classified in cost of sales; included in this balance is the purchase of steel from the Corus Group, which is part of the Tata Group, for an amount of €59 million (€41 million in 2009). In 2010 the amount includes the purchase of goods of €19 million (€18 million in 2009) for the high range and deluxe upholstery of the Group's automobiles from Poltrona Frau S.p.A., a company listed on the Italian Stock Exchange in which the chairman of the board of directors of Fiat S.p.A. at the time, Luca Cordero di Montezemolo, holds an indirect investment.

The selling, general and administrative costs include the emoluments to directors, statutory auditors and key management.

In the statement of financial position at December 31, 2009, this item also included deposits, financial payables and the fair value of derivative financial instruments arising from transactions with companies of the Crédit Agricole Group, which was no longer a related party in 2010.

Holdings System

The principal transactions are recorded in liabilities and in selling, general and administrative expenses and refer to the liability payable to the beneficiaries of the Alpitour stock option plans authorized at the end of 2005 for €22 million (€12 million in 2009). The increase of €10 million in the liability is recorded in general and administrative expenses.

General and administrative expenses include the emoluments to directors and statutory auditors.

C&W Group

In 2010, C&W Group purchased 320 shares from directors at an average price of $1,120 per share. During the year ended December 31, 2009, the C&W Group repurchased 1,247 shares from directors at an average price of $1,219 per share.

Emoluments to directors, statutory auditors and key management of EXOR

In 2010, the fees of the directors and statutory auditors of EXOR S.p.A., for carrying out their respective functions in the Parent including those in other consolidated companies, are as follows:

€ in thousands	**EXOR S.p.A.**	**Subsidiaries**	**Total**
Directors	4,104	5,391	**9,495**
Statutory Auditors	146	165	**311**
Total	4,250	5,556	**9,806**

In 2009, the emoluments to the directors and statutory auditors amounted to €7,948 thousand of which €6,795 thousand was paid by EXOR S.p.A. and €1,153 thousand by subsidiaries.

In EXOR S.p.A., there are no key management personnel.

The company took out a directors' liability policy with a Group of insurance companies for a maximum per claim and per year of €50 million to cover the directors against compensation for non-fraudulent acts.

The proposals for the compensation of the executive directors are formulated and approved directly by the board of directors which, after an examination by the Compensation and Nominating Committee, in conformity with art. 2389, paragraph 2 of the Italian Civil Code, has the power to establish the compensation of the directors invested with special duties as set out in the bylaws.

In its meeting held on May 13, 2009, the board of directors decided to equally divide among its members the compensation approved by the shareholders' meeting, amounting to €170,000 per year. Furthermore, pursuant to art. 2389 of the Italian Civil Code, the board approved the following annual compensation:

- €1,000,000 to the chairman John Elkann, in addition to health care coverage;
- €1,000,000, besides all out-of-pocket travel expenses outside the municipality of residence, for the mandate for strategical coordination, to the honorary chairman Gianluigi Gabetti; he is also entitled to death and permanent disability insurance coverage for professional or non-professional-related accidents and the use of a secretarial service and a car with driver also after the expiry of the term of office;
- €1,250,000 to the chief executive officer, Carlo Barel di Sant'Albano, who is also entitled to the following:
    - a variable fee up to a maximum of €1,250,000, 50% of which is partially linked to the increment in EXOR's NAV;
    - the use of an apartment in Turin made available by the company;
    - the use of two company cars, in addition to one used for company business;
    - death and permanent disability insurance coverage for professional or non-professional-related accidents;
    - health care coverage, the same as for company executives;
    - a sum equal to €2,500,000, corresponding to two years' annual fixed fee for the post of chief executive officer, to be paid at the end of the term of office, except in the case of the reconfirmation of the post, voluntary resignation or failure to accept the reconfirmation of the post, termination for just cause or reaching pensionable age;
- €100,000 to the vice chairman Pio Teodorani-Fabbri for the coordination and supervision activities of the Rome office;
- €35,000 to the Internal Control Committee (of which €15,000 to the chairman and €10,000 to each of the other two members);

- €35,000 to the Compensation and Nominating Committee (of which €15,000 to the chairman and €10,000 to each of the other two members);
- €40,000 to each member of the Strategy Committee;
- €100,000 to the secretary to the board of directors, Virgilio Marrone, in addition to death and permanent disability insurance coverage for professional or non-professional-related accidents and the use of a company car.

The directors will also be reimbursed for the expenses incurred in carrying out the activities connected with their posts.

It should also be noted that in its meeting of February 11, 2011, the EXOR board of directors appointed John Elkann as chief executive officer in addition to his position as chairman and that Carlo Barel di Sant'Albano relinquished his position as chief executive office and assumed the position of chairman of the subsidiary Cushman & Wakefield.

In its meeting of March 28, 2011, the board of directors approved certain changes to the compensation of the directors which became necessary as a result of the changes in the positions held within the company. Further details are provided in the Report on Operations under "Significant events in the first quarter of 2011".

36. Explanatory notes to the statement of cash flows

The statement of cash flows sets out changes in cash and cash equivalents during the year. As required by IAS 7 – *Statement of Cash Flows*, cash flows are separated into operating, investing and financing activities. The effects of changes in exchange rates on cash and cash equivalents are shown separately under the line item Translation exchange differences.

Cash flows from (used in) operating activities derive mainly from the Group's main revenue producing activities.

The cash flows generated by the sale of vehicles under buy-back commitments, net of the amounts included in Profit/(loss) for the year, are included under operating activities in a single line item which includes changes in working capital, capital expenditures, depreciation and impairment losses. This item also includes gains and losses arising from the sales of vehicles transferred under buy-back commitments that occur before the end of the agreement term without repossession of the vehicle.

Cash flows from operating lease transactions are included under operating activities in a single line item which includes capital expenditures, depreciation, impairment losses and changes in inventories.

Overall, Cash flows for income tax payments net of refunds in 2010 amount to €745 million (€464 million in 2009).

Overall, interest of €1,841 million was paid in 2010 and interest of €1,248 million was received in 2010 (interest of €1,443 million was paid in 2009 and interest of €1,051 million was received in 2009).

Cash flows from (used in) investing activities represent the extent to which expenditures have been made for resources intended to generate future income and cash flows. Only expenditures resulting in an asset recognized in the balance sheet are classified as investing activities in the statement of cash flows.

Finally, on June 10, 2009, the Fiat Group acquired an initial 20% interest in Chrysler without the payment of cash: this transaction was therefore not included in the statement of cash flows for 2009, other than for the effects arising from the payment of the transaction costs arising from the acquisition (legal expenses, financial fees, etc.).

37. Non-recurring transactions and transactions resulting from unusual and/or abnormal operations

The Group did not perform any significant non-recurring transactions or transactions resulting from unusual and/or abnormal operations in 2010 as such are defined by the Consob Communication of July 28, 2006.

38. Subsequent events

Reference should be made to the Report on Operations 2010.

39. Approval of the consolidated financial statements and authorization for publication

The consolidated financial statements at December 31, 2010 were approved on March 28, 2011 by the board of directors which authorized their publication, together with the independent auditors' report and the board of statutory auditors' report, within the timeframe set by law.

Turin, March 28, 2011

On behalf of the Board of Directors
The Chairman and CEO
John Elkann

Attestation of the Consolidated Financial Statements According to art. 154-bis, Paragraph 5, of Legislative Decree 58/98

We, the undersigned, John Elkann, chairman and chief executive officer, and Aldo Mazzia, manager responsible for the preparation of the financial reports of EXOR S.p.A. attest, pursuant to the provisions of art. 154-bis, paragraphs 3 and 4, of Legislative Decree 58 dated February 24, 1998:

- the adequacy with respect to the company's structure and
- the effective application,

of the administrative and accounting procedures applied in the preparation of the consolidated financial statements at December 31, 2010.

We also attest that:

- the consolidated financial statements:
    - have been prepared in accordance with applicable International Financial Reporting Standards recognized by the European Community pursuant to EC Regulation 1606/2002 of the European Parliament and Council, dated July 19, 2002;
    - correspond to the amounts shown in the accounts, books and records;
    - provide a true and fair view of the financial condition, results of operations and cash flows of the company and its consolidated subsidiaries;
- the Report on Operations includes a reliable operating and financial review of the issuer and the aggregate of the companies included in consolidation as well as a description of the principal risks and uncertainties to which they are exposed.

Turin, March 28, 2011

The Chairman and CEO
John Elkann

Manager responsible for the preparation
of the financial reports

REPORT OF THE INDEPENDENT AUDITORS ON THE CONSOLIDATED FINANCIAL STATEMENTS PURSUANT TO ART. 14 AND 16 OF LEGISLATIVE DECREE No. 39 OF JANUARY 27, 2010

To the Shareholders of
EXOR S.p.A.

1. We have audited the consolidated financial statements of EXOR S.p.A. and its subsidiaries ("EXOR Group") as of and for the year ended December 31, 2010, which comprise the statement of financial position, the income statement, the statements of comprehensive income, changes in equity, and cash flows and the related notes to the consolidated financial statements. These consolidated financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005 are the responsibility of the Directors of EXOR S.p.A. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

2. We conducted our audit in accordance with the Auditing Standards recommended by CONSOB, the Italian Commission for listed Companies and the Stock Exchange. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the prior year's consolidated financial statements, whose data presented for comparative purposes have been reclassified according to the presentation adopted after the line by line consolidation of Fiat Group, reference should be made to our auditors' report issued on April 1, 2010. In addition, as illustrated in the paragraph "Consolidation of the Fiat Group" of the notes to the consolidated financial statements, the directors of the company restated in specific columns of the financial statements the 2009 data in which the Fiat Group is consolidated line-by-line. These restatements of comparative data and related disclosures included in the notes to the consolidated financial statements have been audited by us for the purpose of expressing our opinion on the consolidated financial statements as of December 31, 2010.

3. In our opinion, the consolidated financial statements of the EXOR Group as of December 31, 2010 comply with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005; accordingly, they give true and fair view of the financial position of EXOR Group and the results of its operations and its cash flows for the year then ended.

4. As illustrates by the Directors in the paragraph "Consolidation of the Fiat Group" of the notes to the consolidated financial statements, the current interpretation of de facto control, based also on the latest version of the Staff Draft posted to the IASB website on September 29, 2010 of the forthcoming IFRS 10 - "*Consolidated Financial Statements*", requires line-by-line consolidation pursuant to IAS 27 to be extended to companies in which the investor holds the majority of voting rights and the size of such majority, combined with the dispersion of the votes of the other vote holders, gives the investor the power to direct the investee's operating and financial policies in such a manner for them to be considered subsidiaries to be consolidated line-by-line. On such bases, believing that the suppositions existed, also in light of EXOR's incidence in the capital present and voting in recent shareholders' meetings of Fiat S.p.A., EXOR has consolidated the Fiat Group line-by-line in its consolidated financial statements starting from the year 2010 and restated the consolidated financial statements for the year 2009 presented for comparative purposes.

5. The Directors of EXOR S.p.A. are responsible for the preparation of the report on operations and the annual report on Corporate Governance in accordance with the applicable laws and regulations. Our responsibility is to express an opinion on the consistency of the report on operations and of the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998, paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) in the annual report on Corporate Governance, with the consolidated financial statements, as required by law. For this purpose, we have performed the procedures required under Auditing Standard n. 001 issued by the Italian Accounting Profession (CNDCEC) and recommended by CONSOB. In our opinion, the report on operations and the information reported in compliance with art. 123-bis of Italian Legislative Decree n. 58/1998 paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) included in the annual report on Corporate Governance are consistent with the consolidated financial statements of EXOR S.p.A. as of 31 December, 2010.

DELOITTE & TOUCHE S.p.A.

This report has been translated into the English language solely for the convenience of international readers.

BOARD OF STATUTORY AUDITORS' REPORT TO THE SHAREHOLDERS' MEETING ON THE YEAR 2010

Dear Shareholders,

In summarizing the contents and results of our activities during the year, we would first of all like to call your attention to the most important transactions that affected earnings and equity carried out by the directors and described in depth in their Report on Operations, including:

- the sale of Intesa Sanpaolo shares for proceeds of €90 million with a gain of €600 thousand on consolidation;
- the investment commitment of €100 million by Exor S.A. in Almacantar;
- the buyback of treasury shares for a total of slightly under €58 million;
- the investment commitment of €100 million by Exor S.A. for private equity initiatives in India and China with Jardine Matheson and Rothschild;
- the investment of €19 million by Exor S.A. for the subscription of new BTG Pactual shares;
- the purchase by Exor S.A. of The Economist Newspaper Limited ordinary shares for slightly over € 29 million;
- the purchase by Exor S.A. of Gruppo Banca Leonardo S.p.A. ordinary shares for €30 million.

We confirm that these, in addition to other investments which have already been made, comply with the law and the bylaws, are based on principles of proper administration, agree with the resolutions of the shareholders' meetings and produce no conflicts of interest.

We have participated in the five meetings of the board of directors, during which we were informed about the activities and the main operating, financial and equity transactions completed or being undertaken by the company and its direct subsidiaries; we have ensured that at least one person has attended each of the six meetings of the internal control committee, formed by three independent directors.

During the course of the activities carried out in our 10 meetings, we have also obtained information:

- from the manager responsible for the preparation of the financial reports;
- from the person in charge of internal control about the activities of the oversight body required by Legislative Decree 231/2001, of which we have now reviewed the annual report dated March 21, 2011;
- from those in charge of the principal corporate functions, to the extent of our responsibilities;
- from the firm of independent auditors, in five meetings, for the required exchange of information, thus integrating the information obtained at the meetings of the internal control committee, both with regard to the provisions of art. 19 of Legislative Decree 39/2010, also in respect of its independence and to use the results of its work.

The results of our work have again led us to conclude that:

- the administrative conduct was observant of the principles of diligence and correctness;
- the organizational structure and the internal control system were adequate in relation to the nature and scope of the activities carried out;
- the administrative and accounting system was capable of representing correctly the company's affairs, conforming to the existing model of administrative and accounting control;
- the directives, according to art. 114, paragraph 2 of Legislative Decree 58/1998, were appropriately conveyed to the subsidiaries.

As far as our responsibilities are concerned, we can state that EXOR adopts the corporate governance model in which the directors describe the principles and the requirements adopted, and the manner in which they should be observed, as we have noted, and those not adopted, explaining the reasons for such exceptions, in their annual report on Corporate Governance, reviewed by Deloitte & Touche, pursuant to art. 123 bis of Legislative Decree 58/1998.

We confirm that we have ascertained the continuance of the profiles needed to guarantee our independence and that the board of directors has verified the existence of indispensable requirements of those of its members who hold that position.

With reference to the other matters identified by CONSOB in communication DEM/1025564 dated April 6, 2001, we observe the following:

- we have been regularly informed of matters falling under our jurisdiction;
- the periodic verifications and the tests to which we have subjected the company have not brought to light any atypical or unusual transactions with third parties, with related parties or with group companies such as might give rise to doubts about the correctness or completeness of the information in the financial statements, about the presence of conflicts of interest or about the safeguarding of the company's assets;
- the directors, in Note 36 to the separate financial statements, disclose the existence of and provide comments on the exchange of goods and services between EXOR, group companies and related parties, stating that such transactions were carried out in accordance with existing laws and by reference to arm's length reciprocal economic gain; we would also mention that EXOR has adopted, on November 12, 2010, with effect on January 1, 2011, the procedure for transactions with related parties, posting the procedure on its website;
- from the meetings with the auditors no significant facts or situations came to our attention which necessitated the performance of further controls on our part which we should report to you;
- we have not received or had notice of any complaints under ex art. 2408 of the Italian Civil Code and we have not received or we have not been made aware of petitions;
- in our contacts with the board of statutory auditors of the parent no matters have been addressed which would require to be communicated;
- our supervisory activities did not indicate any matters to report;
- we have expressed the opinions required of us by law and formulated the proposal, giving reasons thereto, for the appointment of the audit firm for the nine years 2012-2020;
- by means of a letter dated March 28, 2011, Deloitte & Touche has informed us that:
  "(...) The services other than the audit of the separate financial statements, the tests ascertaining that the accounting records are duly kept and the correction recognition of the operating events in the accounting entries, the audit of the consolidated financial statements and the limited audit of the consolidated half-year financial report (aggregate fees of €90,000 for a total of 1,143 hours) provided during the period indicated above to EXOR S.p.A. by the audit firm (writing this letter) and by other entities in the relative Network, determined on the basis of the information made available to us are indicated as follows (excluding hours and fees of the subsidiaries of the EXOR Group, which engagements are conferred independently):
    - testing relative to the confirmation of the amount of the financial ratios required by the Information Memorandum dated June 6, 2006 relating to the issue by IFIL of "Floating Rate Notes due 2011" for €200 million, for a fee of €5,000.
    - Tests in relation to the possible placement of bonds with institutional investors, for a fee of €12,000.
    - Procedures agreed in reference to specific aspects relating to the internal control system over financial reporting ("ICFR") adopted by the EXOR Group for the year 2010, for a fee of €30,000.
    - Analysis and testing of non-recurring accounting issues, for a fee of €26,000.
    - Methodological support to EXOR Group in designing the Compliance Integrated Governance Model, for a fee of €28,500 (work carried out by Deloitte ERS S.r.l.) (…)".

In the same letter, Deloitte & Touche also noted:

> "(…) As the audit firm charged with the legal audit of the separate financial statements for the year ended December 31, 2010 of EXOR S.p.A. and the consolidated financial statements of EXOR Group, we confirm that, on the basis of the information received to date and the tests carried out, taking into account the regulatory and professional principles that govern audit activities, during the period from January 1, 2010 to today's date, there were no situations that came to our attention that would have compromised our independence or causes for incompatibility pursuant to articles 10 and 17 of Legislative Decree 39/2010 and the relative provision for implementation.(…)".

As to the separate draft financial statements of EXOR at December 31, 2010, which show a profit of €151,861,008, we have reviewed the structure, the approach and the information illustrated by the directors in their Report on Operations, relating also to the consolidated financial statements of the EXOR Group at the same date, also formalized in the board of directors' meeting of March 28, 2011 and the notes thereto.

The chairman and chief executive office and the manager responsible for the preparation of the corporate reports have issued an attestation as set forth in art. 154 bis, paragraph 5, of Legislative Decree 58/1998 on both the separate and consolidated financial statements of the Group.

Deloitte & Touche, charged with the audit, in its report dated April 5, 2011, expresses the following conclusions with regard to the separate financial statements of the company.

> "(...) In our opinion, the separate financial statements of EXOR S.p.A. at December 31, 2010 comply with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005; accordingly, they give a true and fair view of the financial position, of the results of operations and of the cash flows of EXOR S.p.A. for the year then ended. (...)
>
> In our opinion, the Report on Operation and the information reported in compliance with art. 123 bis of Italian Legislative Decree 58/1998, paragraph 1, letters c), d), f), l), m) and paragraph 2, letter b) included in the annual report on Corporate Governance are consistent with the separate financial statements of EXOR S.p.A. at December 31, 2010. (…)".

Similar conclusions by Deloitte & Touche are illustrated in its report on the consolidated financial statements of the Group, in which your attention is drawn to, for a more meaningful understanding of the same, to the consolidation of the Fiat Group on a line-by-line basis, considering the suppositions thereto to exist.

On the basis of the information we obtained directly pertaining to the scope and structure and the conclusions reached by Deloitte & Touche, we are of the view that the separate financial statements of EXOR may be approved together with the proposal for the appropriation of the profit for the year, noting that the legal reserve is already equal to one-fifth of capital stock.

Finally, in observing that the agenda of the next shareholders' meeting regards, besides the annual 2010 financial statements, also:

- the board of directors;
- the purchase and disposal of treasury shares;
- the appointment for the legal audit of the financial statements for the years 2012-2020;
- the amendment to some articles of the bylaws and the title to the seventh article of the same;

we confirm, as far as is necessary, that the reports prepared on this subject by the board of directors illustrates the arguments and puts forward the resolutions in accordance with existing law, and reports the justified proposal of the board of statutory auditors for the conferral of the appointment of the audit firm.

Turin, April 5, 2011

2011 ANNUAL REPORT

The 2011 Annual Report is available on the corporate website at: http://www.exor.com

---

This is an English translation of the Italian original document “Relazione Finanziaria 2011” approved by the EXOR S.p.A. board of directors on April 6, 2012 which has been prepared solely for the convenience of the reader. The version in Italian takes precedence and for complete information about EXOR S.p.A. and the Group, reference should be made to the full original report in Italian “Relazione Finanziaria 2011”

Dear shareholders,

EXOR's Net Asset Value, or NAV, decreased by 24.4% in 2011, underperforming the MSCI World Index denominated in Euros - the benchmark against which we measure our performance - by 19.9%.

EXOR'S NET ASSET VALUE (NAV)

€ millions	12/31/2010	12/31/2011	Change absolute	Change percentage
Listed Investments	7,435	5,655	(1,780)	-23.9%
Private Investments	1,096	1,201	105	+9.6%
Investment Value	**8,531**	**6,856**	**(1,675)**	**-19.6%**
Financial Liabilities	(1,266)	(1,142)	124	-9.8%
Financial Assets	1,309	816	(493)	-37.7%
Net Financial Position	**43**	**(326)**	**(369)**	**n.a.**
Ordinary holding costs capitalized over 10 years	**(210)**	**(210)**	**-**	**-**
Net Asset Value	**8,364**	**6,320**	**(2,044)**	**-24.4%**

Despite our negative 2011 NAV performance we strongly believe that the quality of the companies we own and the ability of their leaders will allow EXOR's NAV to continue to outperform the MSCI World Index over the long term.

EXOR'S NAV PERFORMANCE vs. THE MSCI WORLD INDEX

Annual percentage change

Year	1 - EXOR NAV	2 - MSCI World Index Euro	Relative results (1-2)
2009	93.3	37.8	55.5
2010	45.8	17.2	28.6
2011	-24.4	-4.5	-19.9
Compounded annual rate	**30.6**	**16.5**	**14.1**

Note: data in 2009 starts from March 1st, the date befor EXOR's listing on the Milan stock exchange.

I think it's appropriate to give a brief overview of the challenging 2011 macroeconomic environment, especially in Europe. The sovereign debt crisis spread from Greece to other southern European countries, significantly increasing the cost of borrowing for the likes of Spain and Italy.

Had these two countries defaulted, with a stock of sovereign debt in excess of €2.5 trillion, it probably would have marked the end of the Euro as a common currency. A hard-won Europe-wide solution that balances fiscal austerity and solidarity mechanisms has helped restore confidence in the Euro zone. Italy has been crucial in this process, with the new government moving rapidly to implement structural reforms to ensure the sustainability of its sovereign debt, and it is now playing a proactive role in redesigning the governance of the European Union. These actions have been critical to restoring Europe's credibility with the global capital markets.

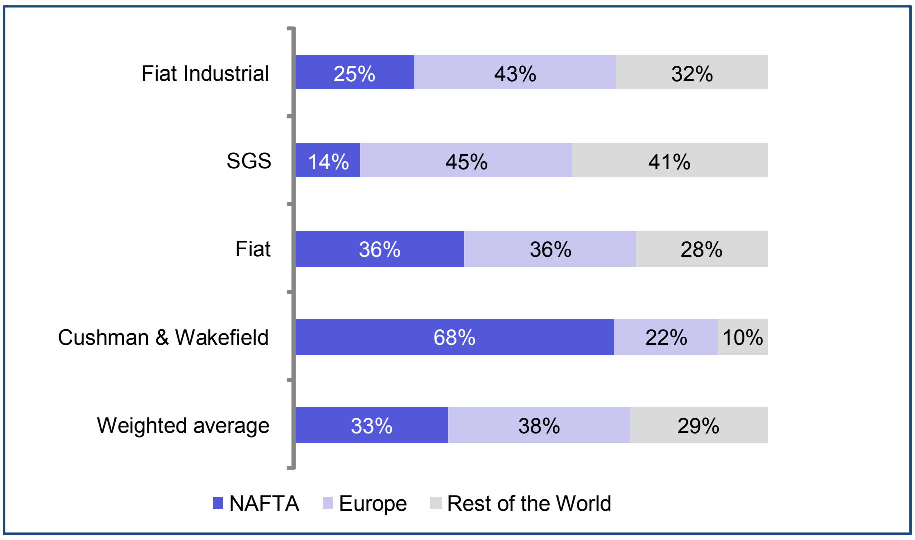
Jean Monnet said that "Europe will be forged in crises, and will be the sum of the solutions adopted for those crises". It is my hope and wish that in a few years, the sovereign debt crisis will come to be seen as having encouraged the necessary steps towards a more unified, stable and, most importantly, competitive Europe. The recent crisis has made clear that monetary union alone is insufficient; a true European Union will only be complete once this is complemented by common fiscal policies, greater solidarity among member states, and a shared financial discipline. Euro zone economies are already linked irreversibly, and I am more convinced than ever that European citizens are heading toward a more integrated political Europe.

Outside Europe the economic outlook in 2011 was mixed. News from the United States was mostly positive with activity increasing throughout the year, marking the end of the recession that began back in 2008. Unemployment has declined and the housing cycle should have reached a bottom, but debt level and government spending remain high. In many emerging countries, on the other hand, economic growth slowed during 2011, but it still remains high, about 6% on average.

Before moving on to our investments, I would like to address two important misperceptions, and in so doing to provide a clearer context in which to judge our NAV performance. I will do this by referencing data from our four largest investments (Fiat Industrial, SGS, FIAT-Chrysler and Cushman & Wakefield), which combined represent 83.5% of EXOR's Investment Value.

First, given our historical roots, it's easy to understand why some may perceive EXOR to be a predominantly European company. And had we decided to benchmark EXOR's NAV performance against the DJ Eurostoxx 50 Index or the FTSE MIB Index, our 2011 performance would have looked significantly better (we underperformed the DJ Eurostoxx 50 Index by just 7.3% and outperformed the FTSE MIB Index by 0.8%). Nevertheless, we have deliberately chosen to benchmark ourselves against the global MSCI World Index given our determination to build a truly global investment company. Our revenue diversification, aimed at achieving an established presence in the NAFTA region (USA, Canada and Mexico) along with a sizeable exposure to emerging markets, has now reached an advanced stage. In 2011 62% of the combined revenues of EXOR's largest investments was generated outside of Europe. Our geographic revenue mix was particularly well balanced, with 33% of revenues generated in the NAFTA region, 38% in Europe and 29% in the Rest of the World (mainly from Latin America and Asia Pacific). By this measure the United States of America is by far our single largest market, accounting for 27% of revenues.

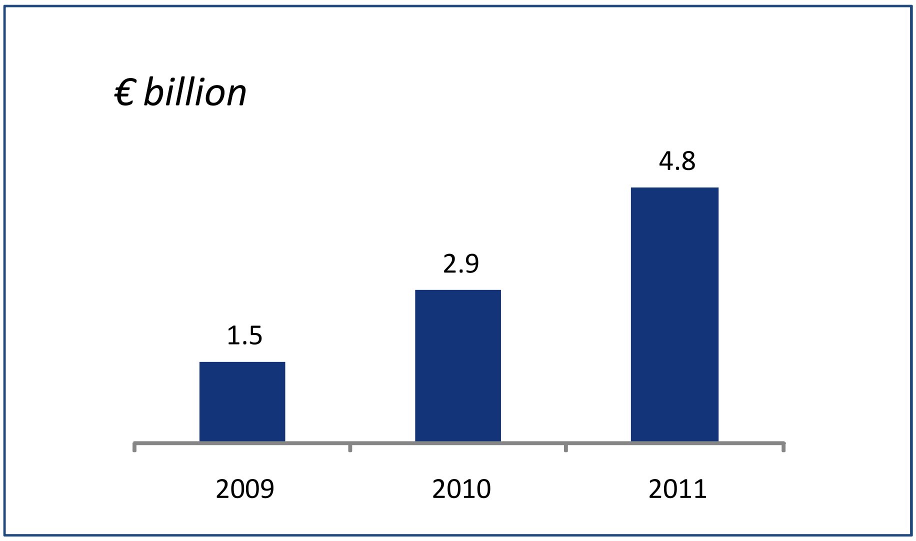
EXOR'S LARGEST INVESTMENTS REVENUES BREAKDOWN – 2011



There is still a noticeable mismatch in perceptions of where our shares happen to be listed and where our businesses actually generate their revenues and profits. A mismatch that also affects other listed European equities and therefore offers potentially interesting investment opportunities.

Second, mainly as a result of our sizeable investment in FIAT-Chrysler (and FIAT Industrial, from this year), we are perceived to be a highly cyclical company. While it is undeniable that some of our investments are significantly exposed to economic cycles (and indeed benefit when cycles rise), their financials proved to be extremely resilient in 2011, which was not a cyclically strong year. The leadership teams of our portfolio companies have been able to improve the economics of their businesses even in the most extreme of macroeconomic contexts: the aggregate adjusted Earnings Before Interest and Taxes (EBIT) of our four largest investments was €4.8 billion in 2011, an increase of 215% over 2009. All four companies contributed to this result and, more importantly, all of them are working hard to increase further their EBIT in 2012.

EXOR'S LARGEST INVESTMENTS
2009-2011 ADJUSTED EBIT EVOLUTION



INVESTMENTS

In this year's letter I would like to describe in greater detail EXOR's four largest investments and their performance. I will address them in order of value.

FIAT Industrial
(30.45% ownership interest; 34.9% of EXOR's Investment Value)

On January 1, 2011, FIAT Industrial began its life as the third largest business in the global capital goods industry by revenues. With 67,000 employees, the group includes CNH (agricultural and construction equipment), IVECO (trucks and commercial vehicles) and FPT Industrial (industrial and marine engines).

FIAT Industrial celebrated its first anniversary at year end with a strong set of results: on revenues of €24.3 billion Fiat Industrial generated an adjusted EBIT of €1.7 billion, well above guidance and ahead of the 2010 results (+14% in revenues terms, +54% for adjusted EBIT). Strong cash flow generation enabled a 35% reduction in net debt to €1.2 billion, and the Board's confidence was reflected in its decision to distribute €240 million in dividends in its first year as a stand-alone business.

2011 was a year of intense activity:

- CNH announced €400 million in investments in three major plants in Argentina, China and Brazil, where it will build some of the world's most powerful and technologically advanced tractors, combines and construction equipment to satisfy demand in these fast-growing areas of the world;
- IVECO launched the New Daily in Turin, the eighth generation of the Light Commercial Vehicles that just over 30 years from launch have sold more than 2.5 million units. At Auto Shanghai IVECO's joint venture, NAVECO, unveiled the new Yuejin Ouka to serve the growing Chinese Light Commercial Vehicles segment. IVECO also found time to take first and second place in the 33rd Dakar race, the world's most famous rally;

- FPT Industrial consolidated its leadership with several major developments in the Engine and Transmissions space, supplying not only Fiat Industrial's needs but also external customers, which account for 33% of its revenues.

The company has strength and depth in management, with competent CEOs heading each of the three businesses. I'm confident that, with the Industrial Executive Council and the benefit of Sergio Marchionne's leadership, they will deliver even greater results in the future.

FIAT Industrial was included in the Dow Jones Sustainability Index (for both the World and Europe) in its first year of operation, and it ranked as Industry Leader in the industrial engineering sector. As shareholders, we are pleased with these achievements as we encourage our companies to manage their businesses according to the best sustainability criteria.

During 2011 FIAT Industrial's Board of Directors proposed to shareholders the conversion of the Company's preference and savings shares into ordinary shares with the aim of streamlining the company's capital structure, benefiting all shareholders through a simplified ownership and the enhanced liquidity of the Company's shares.

SGS
(15% ownership interest;
21.9% of EXOR's Investment Value)

SGS is the world leader in verification, testing, control and certification. Since its founding in 1878, the company has been dedicated to making sure that what we eat, wear, trade, etc. meets the necessary standards.

SGS is a wonderful business, with more than 70,000 employees around the globe lead by Chris Kirk and the Operations Council (whose 24 members are drawn from the different businesses, geographies and main business functions). Thanks to their great work, SGS maintained its profitability and margins even during periods of economic contraction. We are fortunate indeed to be major owners of such a business, and we are determined to seize every opportunity to develop SGS's activities.

Despite a very challenging global trading environment during 2011, SGS delivered an increase in revenue on a constant currency basis of 13.7%, generating a total of CHF 4.8 billion. This was achieved through solid organic revenue growth of 10.5% and was attributable to increases in activity across most geographic areas and businesses, primarily in the Minerals, Consumer Testing, Industrial and Environmental businesses.

Acquisitions continued to be an essential part of SGS's growth plan, enabling the company to leverage its global capabilities and further consolidate its position as a world leader in its field. A record twenty-two acquisitions were completed in 2011, allowing SGS to grow six existing businesses in twelve countries, adding new expertise, faster access to new and emerging markets and, most importantly, highly qualified and talented individuals.

Adjusted EBIT increased by 10.7% in 2011 on a constant currency basis to CHF 815 million. Thanks to its strong cash flow generation, SGS has been a significant source of income for us, with its attractive dividend policy that has provided more than €210 million to EXOR since 2009.

FIAT

(30.47% ownership interest;
18.9% of EXOR's Investment Value)

2011 changed FIAT SpA forever. The spinoff of the capital goods businesses into FIAT Industrial, combined with the increase in FIAT's participation in Chrysler from 20% to 58.5%, allowed FIAT-Chrysler to act as a single company focused on being one of the leading car manufacturers in the world with 197,000 employees and annual shipments of four million vehicles.

As Benjamin Disraeli said: “The secret of success is consistency of purpose.” And if you add great leadership, you have dramatically improved your chances of success. We are fortunate indeed to have Sergio Marchionne leading FIAT-Chrysler. He has worked wonders with the Group Executive Council, the top 22 leaders of the organization.

2011 was a year of many achievements. Revenues climbed to €60 billion, adjusted EBIT reached roughly €2.4 billion, and net industrial debt was in line with guidance at €5.5 billion whilst maintaining a high level of liquidity (ca. €21 billion).

These results are testament to the benefits of FIAT-Chrysler operating as “one firm”, something that can also be seen with the FIAT “500” model now on the streets of North America and the Chrysler products “300-Thema”, “Voyager” and “Freemont” riding the highways of Europe under the Lancia and FIAT brands.

Important labor agreements were reached in Italy during the year, with a new contract allowing for greater flexibility, while on October 26 the UAW ratified a new national four-year labor agreement with Chrysler Group.

Environment and safety continued to be priorities in 2011, with FIAT confirming its position as eco-leader for the fourth consecutive year in Europe and the Chrysler Group products seeing eleven vehicles named “Top Safety Pick for 2012” in December.

We are convinced that the FIAT-Chrysler journey has just begun and we will continue to harvest its fruits in the years to come.

As with FIAT Industrial, during 2011 the FIAT Board of Directors proposed a further simplification to shareholders with the conversion of the Company’s preference and savings shares into FIAT ordinary shares.

Cushman & Wakefield
(69.5% ownership interest;
7.8% of EXOR's Investment Value)

A global leader in commercial real estate services in which EXOR has a 78.3% economic interest, Cushman & Wakefield (C&W) opened for business in 1917 to serve the growing need for commercial real estate created by Manhattan's booming economic activity. This continues today, and the Company is a leader in what has grown to be one of the world's most important markets. Over the decades it has expanded all around the globe, but with a clear focus on big cities such as London, Sao Paolo, Hong Kong and many more.

2011 represented C&W's first full year under CEO Glenn Rufrano. Glenn got off to a good start, meeting his targets throughout the year, working hard on the operations, and also making strategic hires and targeted acquisitions to expand the Company's geographic footprint. These moves have contributed to a balanced business platform designed to provide consistent, high quality service to C&W's global clients.

The Company experienced significant revenue growth in all geographic regions and improved its year-on-year operating performance. It generated US$2 billion in revenue, implying year-on-year growth of 13.4%, which drove a 25% improvement in adjusted EBIT to $65 million.

C&W's strong performance in 2011 was due, in part, to the successful execution of a number of high profile transactions on behalf of clients in all regions, including the sale of Capital Square in Singapore for $715 million, enhancing the firm's brand in that region. Prominent among C&W's other transactions was the €100 million acquisition of two buildings in Dublin, Ireland on behalf of Google, the largest investment in Dublin since 2007. In New York the firm arranged financing for the largest property acquisition of the year at 1633 Broadway.

C&W also executed some of the world's most important office leases, including the largest lease in the U.S. for Shell Oil involving 1.2 million square feet in Texas; the largest lease in Belgium, covering 495,000 square feet, to the European Commission; and the largest lease in New York: one million square feet for Condé Nast at One World Trade Center.

These accomplishments are illustrative of the great work being done by the leadership team and Cushman and Wakefield’s 14,000 employees, all of whom are focused on improving on last year’s results in 2012.

The balance of our investments (approximately 16% of Investment Value) had a mixed year, with a return in aggregate of minus 16%.

The good news came from Banca Leonardo, which performed well in its investment banking and private banking activities, with the former generating revenues of €87 million (a year-on-year increase of 70%) and the latter continuing to generate positive Net New Money inflows during the year. In the wider context, which saw Banca Leonardo withdraw from the asset management business and increase its focus on independent private banking, the company made an advantageous sale of its controlling interest in the French asset management company DNCA, generating a capital gain of €73 million.

Gerardo Braggiotti has proven to be a good steward of our capital, as the bank continued distributing its excess capital to shareholders whilst maintaining a solid capital base (Tier 1 ratio of 39% as of the 2011 year end).

There was, however, less good news from Sequana where weak paper demand, pricing pressure in the market and increased raw material costs led to a net loss of €77 million in 2011. The significant decline in EBIDTA at Arjowiggins, Sequana's paper manufacturing division, from €112 million in 2010 to €50 million in 2011, led to debt covenants being breached at the end of the year. The company is currently negotiating the amendment and extension of its existing credit facilities.

As I signaled last year, we want to reduce the number of small investments in order to concentrate on a few larger ones. We could, however, contemplate investing smaller amounts under two circumstances:

- A minority stake in a good business at attractive valuations with which we would be proud to be associated. *The Economist*, where we own 5%, is a good example of this principle;
- A business venture that starts small but has the potential to grow to be a larger company. Almacantar, a London (UK) property business where we are the largest shareholder, is well placed to develop in this way.

NEW INVESTMENTS

In 2011 we invested some €368 million in what we know really well.

First of all, we invested in EXOR shares through a buyback program. We strongly believe in the fundamentals of our current investments, so what could be better than to buy them at a discount through our own company shares?

We also decided to increase our interests in FIAT Industrial and FIAT-Chrysler. We are confident in their long term perspectives and the market gave us an opportunity to buy them at what we believe to be interesting prices.

Finally we allocated more capital to Almacantar, which is developing well under Mike Hussey's leadership. This facilitated the acquisition of interests in two real estate projects in London's West End: the Centre Point building and Marble Arch Tower.

NET FINANCIAL POSITION

The Company’s net financial position as of December 31, 2011 was negative by €326 million. Gross debt decreased to €1,142 million, consisting of two bonds (one of €750 million due in 2017 and the other of €83 million due in 2031), utilized bank debt of €200 million, and €109 million of accrued interest and other financial liabilities. (EXOR also has €490 million of undrawn committed credit lines.)

The change in our net financial position in 2011 was entirely attributable to the allocation of capital to new investments, as EXOR achieved positive ordinary cash flow at the holding company level.

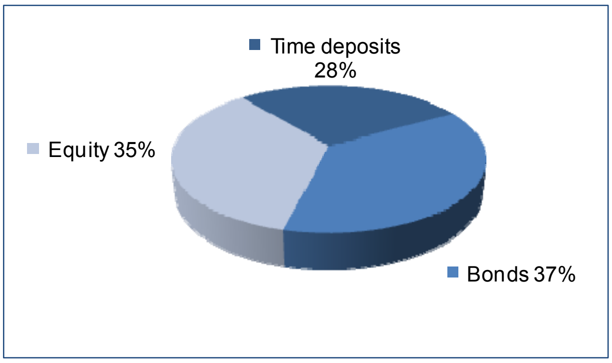
During 2011 the company repaid a €200 million bond and was able to issue through a private placement a ¥10 billion (€83 million) bond maturing in 2031. The issuance of this bond in the Japanese institutional market, the first in EXOR’s history, is an encouraging sign of our ability and desire to be more present in the global capital markets.

We decided in 2011 to diversify our financial assets by increasing exposure to US corporate bonds and to commercial paper, while decreasing our exposure to European corporate and financial institution issuance by 22% and 16% respectively. We continued to avoid sovereign debt, preferring to own corporate debt for now.

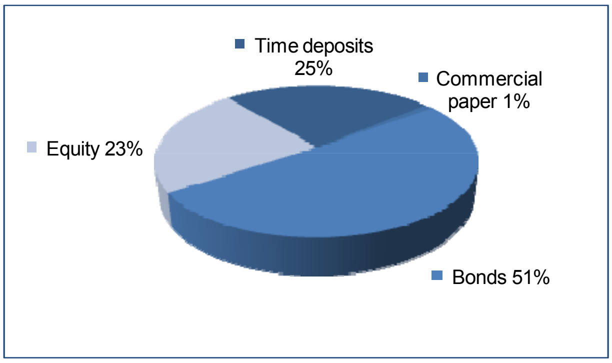
Our exposure to equities, consisting of a concentrated portfolio of selected “large- cap” companies which we started building in 2010, produced positive returns in 2011. Our largest position and star performer has been Mastercard, which during the year benefited from greater clarity in the US debit card regulatory environment and improved consumer spending patterns in the US. We also built a position in Microsoft, a company which we concluded was attractively priced considering its strong competitive advantages, resilience and cash flow generation.

Due to the fact that we decided to maintain a strong liquidity profile (consisting of time deposits, commercial paper and short duration investment grade bonds), our return on financial assets of 3.33% was below the 4.69% cost of our financial liabilities.

FINANCIAL ASSETS AS OF DECEMBER 31st, 2010



FINANCIAL ASSETS AS OF DECEMBER 31st, 2011



In November 2011, S&P confirmed EXOR's long term and short term debt ratings (respectively "BBB+" and "A-2"), and raised the outlook from "negative" to "stable". We view our rating affirmation, and most of all the improvement of its outlook, as recognition of the quality and solidity of our investments as well as the financial discipline we apply in the management of your company.

2012

The new year began with a renewal of positive sentiment regarding the future, and many of the worries with which 2011 ended seemed to fade away. This led to greater optimism in the world's capital markets, with equities rallying and the ability to issue debt significantly improved.

This scenario exceeded my own expectations as 2011 closed. While such a positive development is welcome, I consider it appropriate to remain cautious, particularly while consumption data, especially in the EU, remains weak. As the Romanian dramatist Eugène Ionesco said, "you can only predict things after they have happened," and with this limitation in mind we welcome the turn for the better without getting carried away by it.

Nevertheless, what we can say confidently about 2012 is that it will be a year of continuous simplification for our organization and our investments. I am convinced: for us, simpler is better.

I look forward to discussing the 2011 results and other matters regarding the Company's business at our Shareholders' Meeting to be held on May 29 at the Juventus Stadium, which was inaugurated this season. I very much look forward to meeting our shareholders at this venue, which is one of the newest and most advanced football arenas in Europe. It has made Juventus, of which we own 64%, the only team in Italy to have such a "real asset" on its balance sheet.

We will continue with the arrangement we began last year that has proven popular with shareholders by making it possible to ask questions in advance of the meeting by following the procedure set out on our web site www.exor.com. Non-shareholders will also have the chance to raise questions by sending a short email to the following address: agm@exor.com. The latter will be grouped together, summarized by subject and answered during the meeting itself.

EXOR GROUP PROFILE

EXOR is one of Europe's leading investment companies and is controlled by Giovanni Agnelli e C. S.a.p.az., which holds 51.16% of share capital and, specifically, 59.10% of ordinary capital, 39.24% of preferred capital and 12.36% of savings capital.
Listed on the Italian Stock Exchange, EXOR has a Net Asset Value of more than €6 billion at December 31, 2011. The Company is headquartered in Turin, Italy, Via Nizza 250.
EXOR invests for the long-term, mainly in Europe, in the United States and in the main emerging markets.
EXOR's objective is to increase its Net Asset Value and outperform the Morgan Stanley Capital World Index (MSCI) in Euro.

The following are its main investments:

Fiat Industrial (30.45% of ordinary share capital, 30.09% of preferred share capital and 21.69% of savings share capital and with Fiat also holding 3.1% of ordinary share capital) is listed on the Electronic Share Market (Mercato Telematico Azionario) of the Italian Stock Exchange (Blue Chip segment) managed by Borsa Italiana. Created in January 2011 from the demerger from Fiat, Fiat Industrial operates through businesses that are all major international players in the sectors of trucks, commercial vehicles, buses, special vehicles (with Iveco), tractors, agricultural and construction equipment (with CNH – Case New Holland), in addition to engines and transmissions for those vehicles and engines for marine applications (FPT Industrial).

SGS (15.00% of share capital) is a Swiss company listed on the Virt-x market. Founded in 1878, the company is today the global leader in verification, inspection, control and certification activities with more than 70,000 employees and a network of more than 1,350 offices and laboratories throughout the world.

Fiat (30.47% of ordinary share capital, 30.09% of preferred share capital and 23.59% of savings share capital) is listed on the Electronic Share Market of the Italian Stock Exchange (Blue Chip segment) managed by Borsa Italiana. Founded in 1899, the Fiat Group today is an international group with a clear focus in the automobile sector that designs, produces and sells cars for the mass market under the Fiat, Lancia, Alfa Romeo, Abarth, Fiat Professional brands and luxury cars under the Ferrari and Maserati brands. Its portfolio has recently been expanded to include the Jeep, Chrysler, Dodge and Ram brands, with models produced in North America now being distributed in Europe through the new Lancia-Chrysler and Jeep sales networks, which together count more than 1,000 dealers. Fiat is also active in the components sector through Magneti Marelli, Teksid and Fiat Powertrain Technologies and the production systems sector, through Comau.

C&W Group (69.48% of share capital) is the largest privately held company for real estate services. C&W Group has its headquarters in New York, where it was founded in 1917, and has 243 offices and about 14,000 employees in 60 countries.

Almacantar (36.29% of share capital) is a company active in the real estate sector which realizes commercial investment and development opportunities, mainly in the offices market in London.

Gruppo Banca Leonardo (17.40% of share capital) is a privately held and independent international investment bank offering a complete range of services in investment banking, wealth management and other areas linked to financial markets.

Juventus Football Club (63.77% of share capital) is listed on the Electronic Share Market of the Italian Stock Exchange. Founded in 1897, it is one of the most prominent professional football teams in the world.

Sequana (28.24% of share capital) is a French diversified paper group, listed on the NYSE Euronext market, with production and distribution activities operating through:

- **Arjowiggins** (100% holding), the world leader in the production of high value-added paper products, on 4 continents with over 5,200 employees and 25 production facilities;
- **Antalis** (100% holding), the leading European group in the distribution of paper products and packaging, with over 6,000 employees in 45 countries.

Perella Weinberg Partners (2.00% interest in the limited partnership NoCo A) is an independent company that offers financial advisory and asset management services in the United States and Europe.

Banijay Holding (17.09% of share capital) is headquartered in Paris. The company is a new player in TV production through a network of companies specialized in the production and distribution of multimedia content.

The Economist Newspaper (4.72% of share capital) is a company with its center of operations in London and head of the editorial group that publishes The Economist, a weekly magazine that with a global circulation of more than one million copies represents one of the most important sources of analysis in the international business world.

Alpitour (*) (100% of share capital) is the largest integrated Italian tourism group. It operates with about 3,000 employees and has 3.1 million customers across all areas of the tourism business: Tour Operating (Alpitour, Francorosso, Villaggi Bravo, Viaggidea, Karambola, Volando, Jeans and Welltour), Hotels (Alpitour World Hotels & Resorts), Incoming (Jumbo Tours), Aviation (Neos), Distribution (Welcome Travel Group, with a 50% stake and Bravo Net – HP vacanze).

Vision Investment Management (*) (approximately 42.50% of capital post-conversion), founded in 2000, is one of the most important hedge fund managers specialized in Asian markets.

The following chart is updated to the end of March 2012 and presents the major sectors of business in which the Group has investments. Percentage holdings refer to ordinary share capital.

(a) EXOR also holds 30.09% of preferred share capital and 23.59% of savings share capital.

(b) EXOR also holds 30.09% of preferred share capital and 21.69% of savings share capital. Fiat also holds 3.1% of ordinary share capital.

(c) Post-conversion of convertible bonds.

(d) Percentage interest held in the limited partnership NoCo A LP.

(e) Interest equal to 78.31.

(*) As described in “Significant events in 2011” and “Significant events in the first quarter of 2012”, contracts were signed for the sale of the investments in Alpitour and in Vision Investment Management, subject to conditions precedent which will occur in the first half of 2012.

Key operating and financial data

EXOR Group – Consolidated Data – Shortened (a)

2010 Published	€ million	2011	2010 Restated (b)	Change
136.7	Profit attributable to owners of the parent	**504.2**	136.7	367.5
183.3	Share of earnings (losses) of investments and dividends	**600.7**	172.4	428.3
6,260.8	Investments and other non-current financial assets	**6,764.7**	6,260.8	503.9

Capital stock issued and reserves attributable to owners of the parent	**28.19**	26.25	1.94

(a) Further details on the calculation of basic and diluted earnings per share are provided in Note 13 to the consolidated financial statements.

EXOR S.p.A. – Separate Financial Statement Data

€ million	2011	2010	Change
Profit	**58.7**	151.8	(93.1)
Equity	**3,445.4**	3,552.5	(107.1)
Net financial position	**(448.5)**	(273.9)	(174.6)

The board of directors' meeting held on April 6, 2012 put forward a motion to the ordinary shareholders' meeting called to approve the separate financial statements for the year ended December 31, 2011 for the payment of the following dividends:

Class of shares	**Number of shares outstanding** (a)	**Dividends proposed** **Per share (€)**	 **Total (€ ml)**
Ordinary	153,530,496	0.335	51.4
Preferred	65,110,776	0.3867	25.2
Savings	8,503,189	0.4131	3.5
			80.1

(a) At April 6, 2012.

Dividends paid by EXOR S.p.A. in 2011 from profit for the year ended December 31, 2010 are the following:

Class of shares	**Number of shares**	**Dividends paid** **Per share (€)**	 **Total (€ ml)**
Ordinary	156,149,996	0.31	48.4
Preferred	66,561,676	0.3617	24.1
Savings	8,747,199	0.3881	3.4
			75.9

NET ASSET VALUE

The Net Asset Value (NAV) at December 31, 2011 is €6,320 million, decreasing €2,044 million (-24.4%) from €8,364 million at December 31, 2010.

The composition and change in NAV are the following.

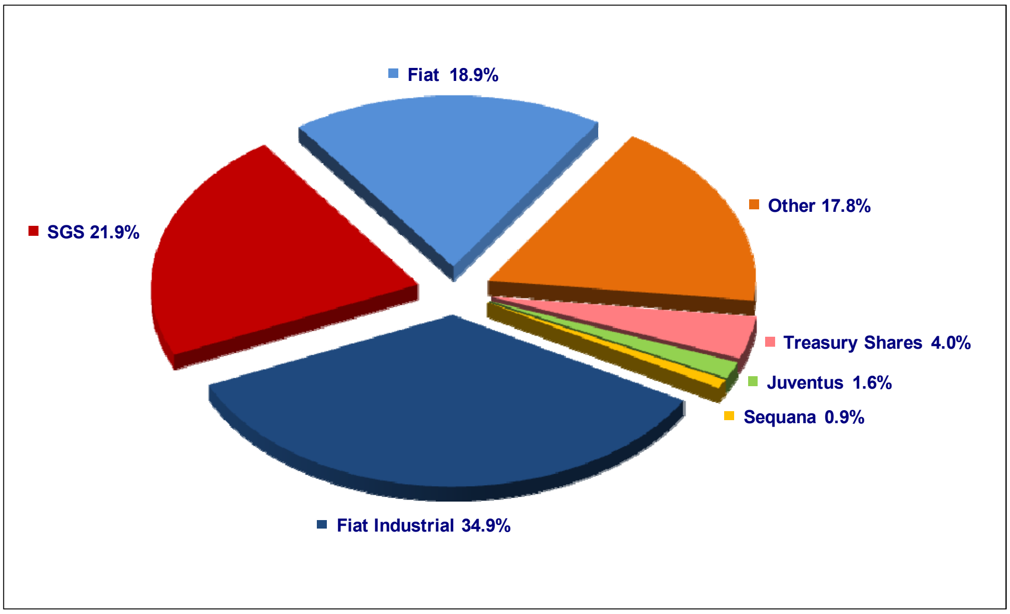
€ millions	03/01/2009	12/31/2010	12/31/2011	Change vs	12/31/2010
				Amount	%
Listed Investments	2,464	7,435	5,655	(1,780)	-23.9%
Private Investments	750	1,096	1,201	105	9.6%
Investment Value	**3,214**	**8,531**	**6,856**	**(1,675)**	**-19.6%**
Financial Liabilities	(1,157)	(1,266)	(1,142)	124	-9.8%
Financial Assets	1121	1,309	816	(493)	-37.7%
Net Financial Position	**(36)**	**43**	**(326)**	**(369)**	**n.a.**
Ordinary holding costs capitalized over 10 years	**(210)**	**(210)**	**(210)**	**-**	**-**
Net Asset Value	**2,968**	**8,364**	**6,320**	**(2,044)**	**-24.4%**

The investment value at December 31, 2011 has been calculated by valuing the listed investments held in Fiat Industrial, SGS, Fiat, Sequana, Juventus Football Club at trading prices, and other investments and private investment holdings at fair value determined annually by independent experts. EXOR ordinary, preferred and savings treasury stock is measured at share trading prices, except ordinary shares used to service the stock option plan, which are measured at the option exercise price if lower than the share trading price.

NAV is presented with the aim of aiding analysts and investors in forming their own assessments.

The following pie chart shows the composition of the value of investments at December 31, 2011 (€6,856 million).
"Other" includes the private investments in C&W Group, Alpitour, Almacantar, Gruppo Banca Leonardo, Banijay Holding, The Economist Newspaper, Vision, NoCo A and Perella Weinberg Funds and also sundry investments.

Investments denominated in Swiss francs, U.S. dollars and Pounds sterling are translated at the market trading rates of 1.2156, 1.2939 and 0.8353 respectively.



Change in NAV compared to MSCI Index (Morgan Stanley Capital World Index) in Euro

In 2011, relations with financial analysts, with retail and institutional investors and with the Italian and international financial press were conducted by EXOR with the aim of promoting transparent and precise information. This has progressed above all because of periodic financial reporting and, particularly, the contents of the Letter to Shareholders: a letter that over the course of the years has become a firm point of reference for communicating with the financial market as well as a privileged occasion for sharing the fundamental elements of the company's strategy with the general public

The Investor Relations and Media Offices illustrated what's new at EXOR, investment portfolio changes and financial results and are available for one-on-one meetings to expand on specific topics.

In April 2011 – on the occasion of the shareholders' meeting – a traditional conference call was set up which during the years has gathered together a growing number of analysts and investors.

The appointment, which every year closes the day dedicated to its stakeholders, allowed EXOR's top management to give a detailed illustration of the performance of its subsidiaries and associates, especially those that are unlisted.

Finally, during the last few weeks of the year, EXOR designed an "Interactive Annual Report" project which will be added to the company's website www.exor.com. The aim is to offer, starting from this Annual Report 2011, another tool that will make it possible to more quickly and effectively consult the Report on Operations.

CORPORATE GOVERNANCE

In its meeting held on April 6, 2012, the board of directors approved the "Annual Report on Corporate Governance" prepared in accordance with art. 123 bis of Legislative Decree 58 dated February 24, 1998, with amendments and additions (TUF – Consolidated Law on Finance).
This document was published with this 2011 Annual Report and is posted on the corporate website at: www.exor.com.

MAIN RISKS AND UNCERTAINTIES TO WHICH EXOR S.p.A. AND ITS PRINCIPAL SUBSIDIARIES ARE EXPOSED

RISKS ASSOCIATED WITH GENERAL ECONOMIC CONDITIONS

The earnings and financial position of EXOR and its principal investment holdings are particularly influenced by the general state of the economy in the countries in which they operates and by the variables which affect performance, including increases or decreases in gross national product, access to credit, the level of consumer and business confidence, the cost of raw materials and the rate of unemployment.

The global economic recession in 2008 and in the first part of 2009 had a negative impact on the principal investment holdings. Currently, the weak economic situation in Europe and Italy elicits a great deal of uncertainty over the industrial and economic future of the eurozone; concerns persist regarding the overall global stability of the region and the suitability of the euro as a single currency. In particular, considerable attention is being given to the sovereign debt of some countries in the European Union and their ability to cope with future financial commitments regardless of the actions taken by individual governments and the European and international monetary authorities to meet debt obligations and the risk of default.

In general, the sectors in which the principal investment holdings operate have historically been subject to highly cyclical demand and tend to reflect the overall performance of the economy, in certain cases even amplifying the effects of economic trends. Given the difficulty of predicting the magnitude and duration of economic cycles, there can be no assurances as to future trends in the demand for or supply of products and services sold by them in any of the markets in which they operate.

Moreover, the markets in which the principal companies operate are exposed to variations in energy and raw material prices or a possible reduction in infrastructure investments.

Accordingly, particular circumstances could have a material adverse effect on the earnings and/or financial position and business prospects of the investment holdings.

RISKS ASSOCIATED WITH EXOR'S ACTIVITIES

EXOR carries out investment activities which involve typical risks such as high exposure to certain sectors or investments, difficulties in identifying new investment opportunities that meet the characteristics of the Company's objectives or difficulties in disposing of investments owing to changes in general economic conditions. The potential difficulties connected with making new investments such as unexpected costs or liabilities could have an adverse effect on the Company's earnings and financial position.
The ability to access capital markets or other forms of financing and the related costs are dependent, among other things, on the Company's credit rating.

Any downgrade by the rating agencies could limit the Company's ability to access capital markets and increase the cost of capital, with a consequent adverse effect on its earnings and financial position.
Standard & Poor's has confirmed EXOR's long-term and short-term debt ratings (respectively, BBB+ and A-2) modifying the outlook from negative to stable.

EXOR's policy and that of the companies in the Holdings System is to keep liquidity available in demand or short-term deposits and readily negotiable money market instruments, bonds and equity securities, allocating such investments over an appropriate number of counterparties, with the principal purpose of having

investments which can readily be converted into cash. The counterparties are chosen according to their creditworthiness and reliability.
However, in consideration of the current international financial market situation, market conditions which might negatively affect the normal operations of financial transactions cannot be excluded.

EXOR's earnings not only depend on the market value of its principal investment holdings but also on the dividends they pay and, in the end, reflect their earnings and financial performance and investment and dividend payment policies. A worsening of the financial market conditions and the earnings of the principal investment holdings could affect EXOR's earnings and cash flows.

EXOR operates through its investments in subsidiaries and associates in Agricultural and Construction Equipment (Fiat Industrial Group), in the automobile market (Fiat Group), in real estate services (C&W Group), in real estate (Almacantar Group), in paper (Sequana Group), in tourism (Alpitour Group) and in professional football (Juventus Football Club). As a result, EXOR is exposed to risks typical of the markets and industries in which such subsidiaries and associates operate.

At the same date, EXOR also holds an investment in SGS (15% of capital) for an equivalent amount of €1,501 million, equal to 21.9% of EXOR’s investment portfolio. Accordingly, EXOR is exposed to risks typical of the market in which such company operates.

At December 31, 2011, the investments in Fiat Industrial (30.45% of ordinary share capital, 30.09% of preferred share capital and 18.15% of savings share capital) and in Fiat (30.47% of ordinary share capital, 30.09% of preferred share capital and 14.08% of savings share capital) represented, respectively, 34.9% and 18.9% of the current value of EXOR's investment portfolio, calculated on the basis of the NAV (Net Asset Value) method described on page 5.

Therefore, the performance of the Fiat Industrial Group and the Fiat Group has a very significant impact on EXOR's earnings and financial position.

EXOR and its subsidiaries and associates are exposed to fluctuations in currency and interest rates and use financial hedging instruments, compatible with the risk management policies adopted by each of them. Despite these hedging transactions, sudden fluctuations in currency or interest rates could have an adverse effect on earnings and financial position.
The subsidiaries and associates are generally exposed to credit risk which is managed by specific operating procedures. Given its activities, EXOR is not significantly exposed to such risk.
EXOR and its subsidiaries and associates are exposed to risks connected with the outcome of pending litigation for which they set aside, if appropriate, specific risk provisions. However, negative effects on the earnings and financial position of EXOR and/or its subsidiaries and associates connected with such risks cannot be excluded.

The following paragraphs indicate the main specific risks and uncertainties of the companies in consolidation (Fiat Industrial Group, Fiat Group, C&W Group, Juventus Football Club and Alpitour Group).

FIAT INDUSTRIAL GROUP

Fiat Industrial Group – Risks connected with global financial markets and general economic conditions

The Group’s earnings and financial position may be influenced by various macroeconomic factors – including increases or decreases in gross domestic product, the level of consumer and business confidence, changes in interest rates on consumer and business credit, energy prices, the cost of commodities or other raw materials – which exist in the various countries in which it operates.

For example, the on-going effects of the global economic recession that began in 2008, including the eurozone crisis, continue to have a negative impact on the earnings of companies within the Group. Weak economic conditions resulted in a significant decline in demand for most of the products produced by the Group. Demand in the capital goods sector, in particular, is highly correlated to the economic cycle and can be subject to even greater levels of volatility. Disruption in global financial markets or any continuation of economic recession could ultimately affect the industrial development of many businesses, including those of the Group.

In Europe, despite measures taken by several governments, international and supranational organizations and monetary authorities to provide financial assistance to eurozone member states of the European Union in economic difficulty and to face the possibility of default by certain European countries on their sovereign debt obligations, concerns persist regarding the debt burden of certain eurozone countries and their ability to meet future financial obligations, the overall stability of the euro and the suitability of the euro as a single currency (or, in more extreme circumstances, the possible dissolution of the euro entirely), given the diverse economic and political circumstances in individual eurozone member states. Such potential developments could adversely affect the businesses and operations of the Group. Although the Group considers dissolution of the euro and disruption of the European Monetary Union a highly unlikely scenario, and although the Group’s diversified product portfolio and international presence lessens its dependence on a single market and exposure to economic conditions or political instability in any one country or region, its businesses are nonetheless sensitive to changes in economic conditions. Accordingly, the present global credit and financial crisis, as well as the failure of European and international rescue packages could have a material adverse effect on the Group’s business prospects, earnings and/or financial position.

Fiat Industrial Group - Risks associated with financing requirements

The Group’s future performance will depend on, among other things, its ability to finance debt repayment obligations and planned investments from operating cash flow, available liquidity, the renewal or refinancing of existing bank loans and/or facilities and possible recourse to capital markets or other sources of financing. Although the Group has measures in place to ensure that adequate levels of working capital and liquidity are maintained, any declines in sales volumes could have a negative impact on the cash-generating capacity of its operating activities. The Group could, therefore, find itself in the position of having to seek additional financing and/or refinance existing debt, including in unfavorable market conditions with limited availability of funding and a general increase in funding costs. Any difficulty in obtaining financing could have a material adverse effect on the Group's business prospects, earnings and/or financial position.

Fiat Industrial Group - Risks associated with the credit rating of Fiat Industrial S.p.A.

On January 5, 2011, Moody’s Investors Service assigned Fiat Industrial S.p.A. a Ba1 Corporate Family Rating and a short-term “Not Prime” rating, with stable outlook. On February 24, 2011, Standard & Poor’s Rating Services confirmed Fiat Industrial’s long-term rating of BB+ with negative outlook, assigned on November 4, 2010, and a short-term rating of B.

The ability to access the capital markets or other forms of financing and the related costs are dependent, amongst other things, on the Group’s credit ratings. Any further downgrades could increase the Group’s cost of capital and potentially limit its access to sources of financing with a consequent material adverse effect on the Group’s business prospects, earnings and/or financial position.

Fiat Industrial Group - Risks associated with fluctuations in currency, interest and credit risk

The Group, which operates in numerous markets worldwide, is naturally exposed to market risks stemming from fluctuations in currency and interest rates. The exposure to currency risk is mainly linked to the difference in geographic distribution between the Group's manufacturing activities and its commercial activities, resulting in cash flows from exports denominated in currencies that differ from those associated with production activities.

The Group uses various forms of financing to cover funding requirements for its industrial activities and for financing customers and dealers. The Financial Services companies operate a matching policy to offset the impact of differences in rates of interest on the financed portfolio and related liabilities. Nevertheless, changes in interest rates can result in increases or decreases in revenues, finance costs and margins.

Consistent with its risk management policies, the Group seeks to manage currency and interest rate risk through the use of financial hedging instruments. Despite such hedges being in place, however, sudden fluctuations in currency or interest rates could have an adverse effect on the Group’s business prospects, earnings and/or financial position.
The Group's Financial Services activities are also subject to the risk of insolvency of dealers and end customers, as well as unfavorable economic conditions in markets where these activities are carried out, which the Group seeks to mitigate through credit policies applied to dealers and end customers.

Fiat Industrial Group - Risks associated with relationships with employees and suppliers

In many countries where the Group operates, Group employees are protected by various laws and/or collective labor agreements that guarantee them, through local and national representatives, the right of consultation on specific matters, including downsizing or closure of production activities and reductions in personnel. Laws and/or collective labor agreements applicable to the Group could impair its flexibility in reshaping and/or strategically repositioning its business activities. The Group’s ability to reduce personnel or implement other permanent or temporary redundancy measures is subject to government approvals and the agreement of the labor unions. Industrial action by employees could have an adverse impact on the Group’s business activities.

Furthermore, the Group purchases raw materials and components from a large number of suppliers and relies on services and products provided by companies outside the Group. Some of these companies are highly unionized. Close collaboration between a manufacturer and its suppliers is common in the industries in which the Group operates and although this offers economic benefits in terms of cost reduction, it also means that the Group is more reliant on its suppliers and is exposed to the possibility that difficulties, including of a financial nature, experienced by those suppliers (whether caused by internal or external factors) could have a material adverse effect on the Group's business prospects, earnings and/or financial position.

Fiat Industrial Group - Risk associated with increase in costs, disruption of supply or shortage of raw materials

Fiat Industrial uses a variety of raw materials in its business including steel, aluminum, lead, resin and copper, and precious metals such as platinum, palladium and rhodium. The prices for these raw materials fluctuate and at times in recent periods, prices have increased significantly in response to changing market conditions. Fiat Industrial seeks to manage this exposure, but it may not be successful in hedging these risks. Substantial increases in the prices for raw materials would increase the Group’s operating costs and could reduce profitability if the increased costs will not be offset by changes in product prices. In addition, certain raw materials are sourced only from a limited number of suppliers and from a limited number of countries. The Group cannot guarantee that it will be able to maintain arrangements with these suppliers that assure access to these raw materials, and in some cases this access may be affected by factors outside of Group’s control and the control of its suppliers. For instance, the recent earthquake and tsunami in Japan have negatively affected commodity markets, and any similar future event may have severe and unpredictable effects on the price of certain raw materials in the future. As with raw materials, the Group is also at risk for supply disruption and shortages in parts and components for use in its products.
Any interruption in the supply or any increase in the cost of raw materials, parts and components could negatively impact Group’s ability to achieve growth in product sales and improved profitability.

Fiat Industrial Group - Risks associated with management

The Group's success is largely dependent on the ability of its senior executives and other members of management to effectively manage the Group and individual areas of business. The loss of any senior executive, manager or other key employee without an adequate replacement or the inability to attract and retain new, qualified personnel could therefore have an adverse effect on the Group's business prospects, earnings and/or financial position.

Fiat Industrial Group - Risks associated with the high level of competition in the industries in which the Group operates

Substantially all of the Group's revenues are generated in highly competitive sectors that include the production and distribution of agricultural and construction equipment, trucks and commercial vehicles, and related powertrain systems. The Group faces competition from other international manufacturers of trucks and commercial vehicles in Europe and Latin America and from global, regional and local agricultural and construction equipment manufacturers, distributors and component suppliers in Europe, North America and Latin America. These markets are highly competitive in terms of product quality, innovation, pricing, fuel economy, reliability, safety, customer service and financial services offered. Competition, particularly in pricing, has increased significantly in the Group's areas of activity in recent years. Should the Group be unable to adapt effectively to external market conditions, this could have an adverse effect on its business prospects, earnings and/or financial position.

Fiat Industrial Group - Risks associated with selling in international markets and exposure to changes in local conditions

A significant portion of the Group's existing activities are conducted and located outside of Italy and the Group expects that revenues from sales outside Italy – and, more generally, outside of the European Union – will account for an increasing portion of total revenues. The Group is subject to risks inherent to operating globally, including those related to:

- exposure to local economic and political conditions;
- import and/or export restrictions;
- multiple tax regimes, including regulations relating to transfer pricing and withholding and other taxes on remittances and other payments to or from subsidiaries;
- foreign investment and/or trade restrictions or requirements, foreign exchange controls and restrictions on repatriation of funds; and/or
- the introduction of more stringent laws and regulations.

Unfavorable developments in any one of these areas (which may vary from country to country in which the Group operates) could have a material adverse effect on the Group's business prospects, earnings and/or financial position.

Fiat Industrial Group - Risks associated with environmental and other government regulation

The Group's products and activities are subject to numerous environmental laws and regulations (local, national and international) which are becoming increasingly stringent in many countries in which it operates (particularly in the European Union). Such regulations govern, among other things, products – with requirements for emissions of polluting gases, reduced fuel consumption and safety becoming increasingly stricter – and industrial plants – with requirements for emissions, treatment of waste and water and prohibitions on soil contamination becoming increasingly stricter. To comply with such regulations, the Group employs considerable resources and expects it will continue to incur substantial costs in the future.

In addition, government initiatives to stimulate consumer demand for products sold by the Group, such as changes in tax treatment or purchase incentives for new vehicles, can substantially influence the timing and level of revenues. The size and duration of such government measures is unpredictable and outside of the Group's control. Any adverse change in government policy relating to those measures could have a material adverse effect on the Group's business prospects, operating results and/or financial position.

Fiat Industrial Group - Risks associated with the ability to offer innovative products

The success of the Group's businesses depends on their ability to maintain or increase share in existing markets and/or to expand into new markets through the development of innovative, high-quality products that provide adequate profitability. In particular, the failure to develop and offer innovative products that compare favorably to those of the Group’s principal competitors in terms of price, quality, functionality and features, or delays in bringing strategic new products to market, could result in reduced market share, having a material adverse effect on the Group's business prospects, earnings and/or financial position.

Fiat Industrial Group - Risks associated with operating in emerging markets

The Group operates in a number of emerging markets, both directly (e.g., Brazil, Argentina and India) and through joint ventures and other cooperation agreements (e.g., Turkey, China and Russia). The Group’s exposure to these countries has increased in recent years, as has the number and importance of such joint ventures and cooperation agreements. Economic and political developments in these markets, including economic crises or political instability, have had and could in future have a material adverse effect on the Group's business prospects, earnings and/or financial position.

Fiat Industrial Group - Risks associated with the capital goods market

More than other sectors, producers in the capital goods sector, such as CNH and Iveco are subject to:

- the condition of financial markets, in particular, the ability to access the securitization market and prevailing interest rates in that market. In North America, in particular, CNH makes considerable use of asset-backed securitization to fund financing offered to dealers and end customers. Negative conditions in the financial markets, and the asset-backed securitization market in particular, could have a significant impact on the Group's business prospects, earnings and/or financial position;
- cyclicality, which can cause sudden declines in demand, with negative effects on inventory levels and product pricing, both new and used. In general, demand in the capital goods sector is highly correlated to the economic cycle and can be subject to even greater levels of volatility.

Fiat Industrial Group - Risks associated with the agricultural and construction equipment markets

Performance of the agricultural equipment market is influenced, in particular, by factors such as:

- the price of agricultural commodities and the relative level of inventories;
- the profitability of agricultural enterprises;
- the demand for food products;
- agricultural policies, including aid and subsidies to agricultural enterprises, provided by major governments and/or supranational organizations.

In addition, unfavorable climactic conditions, especially during the spring, a particularly important period for generating sales orders, could have a negative impact on the decision to buy agricultural equipment and, consequently, on the Group’s revenues.

Performance of the construction equipment market is influenced, in particular, by factors such as:

- public infrastructure spending;
- new residential/non-residential construction.

The above factors can significantly influence the demand for agricultural and construction equipment and, consequently, the Group's financial results.

FIAT GROUP

Following is a brief description of main risks and uncertainties that could potentially have a significant impact on the activities of Fiat S.p.A and its subsidiaries, that since June 2011 include Chrysler. Other risks and uncertainties, which are currently unforeseeable or considered to be unlikely, could also have a significant influence on the operating performance, financial position and future prospects of Fiat Group

Fiat Group - Risks associated with global financial markets and general economic conditions

The Group’s earnings and financial position may be influenced by various macroeconomic factors – including increases or decreases in gross domestic product, the level of consumer and business confidence, changes in interest rates on consumer and business credit, energy prices, the cost of commodities or other raw materials and the rate of unemployment – within the various countries in which it operates.

For example, the global economic recession in 2008 and the first half of 2009 had a negative impact on the Group's earnings. Weak economic conditions resulted in a significant decline in demand for most of the Group's products. The current economic weakness in the eurozone, including Italy, casts serious uncertainty on the possible evolution of the economic activity in this region in the foreseeable future. In Europe, despite the measures taken by several governments, international and supranational organizations and monetary authorities to provide financial assistance to euro area member states of the European Union in economic difficulty and to face the possibility of default by certain European countries on their sovereign debt obligations, concerns persist regarding the debt burden of certain eurozone countries and their ability to meet future financial obligations, the overall stability of the euro and the suitability of the euro as a single currency (or, in more extreme circumstances, the possible dissolution of the euro entirely), given the diverse economic and political circumstances in individual member states of the eurozone. These potential developments could adversely affect the businesses and operations of the Group.

Following the acquisition of control of Chrysler in 2011, nearly 45% of Group's on-going revenues are generated in the NAFTA region. Substantially all of Chrysler's vehicles sales occur in North America (U.S. and Canada). Although Chrysler is seeking to increase the proportion of its vehicle sales outside of North America (directly or through Fiat), it anticipates that its results of operations will continue to depend substantially on vehicle sales in the principal North American markets, particularly the U.S. Any significant deterioration in the economic conditions in the U.S. and/or Canada may consequently adversely affect Fiat Group's result of operations, financial position and cash flows.

In general, the sector in which the Group operates has historically been subject to highly cyclical demand and tends to reflect the overall performance of the economy, in certain cases even amplifying the effects of economic trends. Given the difficulty in predicting the magnitude and duration of economic cycles, there can be no assurances as to future trends in the demand for or supply of products sold by the Group in any of the markets in which it operates.

Additionally, even in the absence of slow growth or recession, other economic circumstances – such as increases in energy prices, fluctuations in prices of raw materials or contractions in infrastructure spending – could have negative consequences for the industry in which the Group operates and, together with the other factors referred to previously, could have a material adverse effect on the Group's business prospects, earnings and/or financial position.

Fiat Group - Risks associated with the high level of competition and cyclicality of the automobile industry

Substantially all of the Group's revenues are generated in the automobile industry, which is highly competitive and encompasses the production and distribution of passenger cars, light commercial vehicles and the related components and production systems. The Group faces competition from other international passenger car and light commercial vehicle manufacturers and distributors and components suppliers in Europe, North and Latin America. These markets are highly competitive in terms of product quality, innovation, pricing, fuel economy, reliability, safety, customer service and financial services offered.

Competition, particularly in pricing, has increased significantly in the Group's industry sector in recent years. In addition, partly as a result of the contraction in demand for automobiles, global production capacity for the car industry significantly exceeds current demand. This overcapacity, combined with high levels of competition and weakness of major economies, could intensify pricing pressures.

Fiat has a relatively high proportion of fixed costs and may have significant limitations on the ability to reduce fixed costs by closing facilities and/or reducing labor expenses. Fiat's competitors may respond to these conditions by attempting to make their vehicles more attractive or less expensive to customers by adding vehicle enhancements, providing subsidized financing or leasing programs, offering option package discounts, price rebates or other sales incentives, or by reducing vehicle prices in certain markets. In addition, manufacturers in countries which have lower production costs have announced that they intend to export lower-cost automobiles to established markets. These actions have had, and could continue to have, a negative impact on Fiat's vehicle pricing, market share, and operating results. Offering desirable vehicles that appeal to customers can mitigate the risks of stiffer price competition, while offer of vehicles that are perceived to be less desirable (whether in terms of price, quality, styling, safety, or other attributes) can exacerbate these risks.

In the Automobiles business, sales to end customers are cyclical and subject to changes in the general condition of the economy, the readiness of end customers to buy and their ability to obtain financing and the possible introduction of measures by governments to stimulate demand. The sector is also subject to constant renewal of the product offering through frequent launches of new models. A negative trend in the automobiles business could have a material adverse impact on the business prospects, earnings and/or financial position of the Fiat Group.
Should the Group be unable to adapt effectively to external market conditions, this could have a material adverse effect on its business prospects, earnings and/or financial position.

Fiat Group - Risks associated with the ability to offer innovative products

The success of the Group's businesses depends, among other things, on their ability to maintain or increase their share in existing markets and/or to expand into new markets through the development of innovative, high-quality products that provide adequate profitability. In particular, a failure to develop and offer innovative products that compare favorably to those of the Group’s principal competitors in terms of price, quality, functionality and features, or delays in bringing strategic new models to market, could result in reduced market share, having material adverse effects on the Group's business prospects, earnings and/or financial position.

Fiat Group - Risks associated with the policy of targeted industrial alliances
