MOTION FOR THE APPROVAL OF THE SEPARATE FINANCIAL STATEMENTS AND THE APPROPRIATION OF THE PROFIT FOR THE YEAR

To our stockholders,

We invite you to approve the separate financial statements for the year ended December 31, 2007 and, in view of the fact that the legal reserve is equal to one-fifth of capital stock, we propose the appropriation of the profit for the year of € 123,397,998 as follows:

To the ordinary shares, dividends of € 0.1, for a maximum	€ 103,861,271.70	
To the savings shares, dividends of € 0.1207, for a maximum	€ 4,512,130.52	
Proposed dividends are payable to the shares that will be outstanding, thus excluding the shares held directly by IFIL S.p.A. at the ex dividend date, for a total maximum		€ 108,373,402.22
To the extraordinary reserve, the remaining amount, for a minimum		€ 15,024,595.78
Profit for the year 2007		**€ 123,397,998.00**

Turin, March 28, 2008

For the Board of Directors
The Chairman
Gianluigi Gabetti

DIRECTORS' REPORT ON OPERATIONS

IFI GROUP – CONSOLIDATED FINANCIAL STATEMENTS AT DECEMBER 31, 2003

IFI S.p.A. – STATUTORY FINANCIAL STATEMENTS AT DECEMBER 31, 2003

This is an English translation of the Italian original document "Relazioni e Bilanci 2003" approved by the IFI Board of Directors on March 30, 2004, which has been prepared solely for the convenience of the reader.

The version in Italian takes precedence and for complete information about IFI S.p.A. and the Group, reference should be made to the full original report in Italian "Relazioni e Bilanci 2003" containing the Directors' Report on operations and the Consolidated and Statutory financial statements also available on the corporate website: http://www.gruppoifi.com.

Istituto Finanziario Industriale

The Chairman of the Company, Mr. Umberto Agnelli, deceased on May 27, 2004. We wish to recall his extraordinary human and professional gifts as well as the great enthusiasm that distinguished him and his sense of responsibility shown in the Relaunch process of the Group. His death has left a void in all the persons who have known and highly esteemed him.

Board of Directors

Chairman	Gianluigi Gabetti
Deputy Chairman	Pio Teodorani-Fabbri
Directors	Annibale Avogadro di Collobiano
	John Philip Elkann
	Luca Ferrero Ventimiglia (co-opted on June 11, 2004)
	Gabriele Galateri di Genola
Secretary to the Board	Franzo Grande Stevens
	Andrea Nasi
	Lupo Rattazzi

General Manager	Virgilio Marrone

Board of Statutory Auditors

Chairman	Cesare Ferrero
Standing Auditors	Giorgio Giorgi
	Lionello Jona Celesia
Alternate Auditors	Giorgio Ferrino
	Paolo Piccatti

Independent Auditors	Deloitte & Touche S.p.A.

Expiry of term of office

The three-year terms of office of the Board of Directors and the Board of Statutory Auditors, elected by the Stockholders' Meeting on May 29, 2003, expire concurrently with the Stockholders' Meeting for the approval of the financial statements for the year ending December 31, 2005.

The Independent Auditors are appointed for the three-year period 2003-2005.

Corporate Governance

The Chairman, according to the by-laws (art. 21), may represent the Company, also before a court of law, and has signature powers.

Specific operating powers have been conferred to the Deputy Chairman and the General Manager.

IFI GROUP PROFILE

THE INVESTMENT PORTFOLIO

IFI – Istituto Finanziario Industriale S.p.A. – is the controlling financial holding company of the Group led by Giovanni Agnelli e C. S.a.p.az. The Company's assets are represented by investments in IFIL - Finanziaria di Partecipazioni S.p.A. (62.03% of ordinary capital stock) and in Exor Group (29.3% of capital stock).

IFIL is the operating holding company of the Group commanding two distinctive areas of operations: the active management of the controlling investment in Fiat and the dynamic management of the other holdings.

Fiat, controlled with a holding of more than 30% of ordinary and preferred capital stock, operates in the national and international automotive market as a manufacturer and distributor of automobiles (Fiat Auto, Ferrari and Maserati), commercial vehicles (Iveco), agricultural and construction equipment (CNH Global), automotive components for these vehicles (Magneti Marelli) and the supply of related services, as well as publishing and communications (Itedi) and services for corporations (Business Solutions).

The other holdings which comprise the dynamically managed diversified portfolio are listed below.

Worms & Cie (53.07% holding in capital stock) is a French-listed holding company with a portfolio comprising the following major investments:

- ArjoWiggins (100% holding), the world leader in the manufacture of high value-added paper products and, in Europe, leader in the manufacture of carbonless paper (Carbonless Europe was absorbed by ArjoWiggins as from January 1, 2004);
- Antalis (100% holding), the leading group in Europe in the distribution of paper products for printing and writing;
- Permal Group (100% holding), one of the leaders in the management of investment funds;
- SGS (23.8% holding in capital stock), a company listed on the Swiss stock exchange and leader in the verification, inspection and certification of product and service quality.

La Rinascente (jointly controlled with the Auchan Group, through Eurofind, which holds more than 99% of the ordinary capital stock) is one of the largest Italian retailers operating throughout Italy with roughly 1,850 points of sale (direct, affiliates and associates) and over 31,000 employees.

SANPAOLO IMI (4.86% holding in ordinary capital stock) is a leading national banking group with over 3,000 branches throughout Italy.

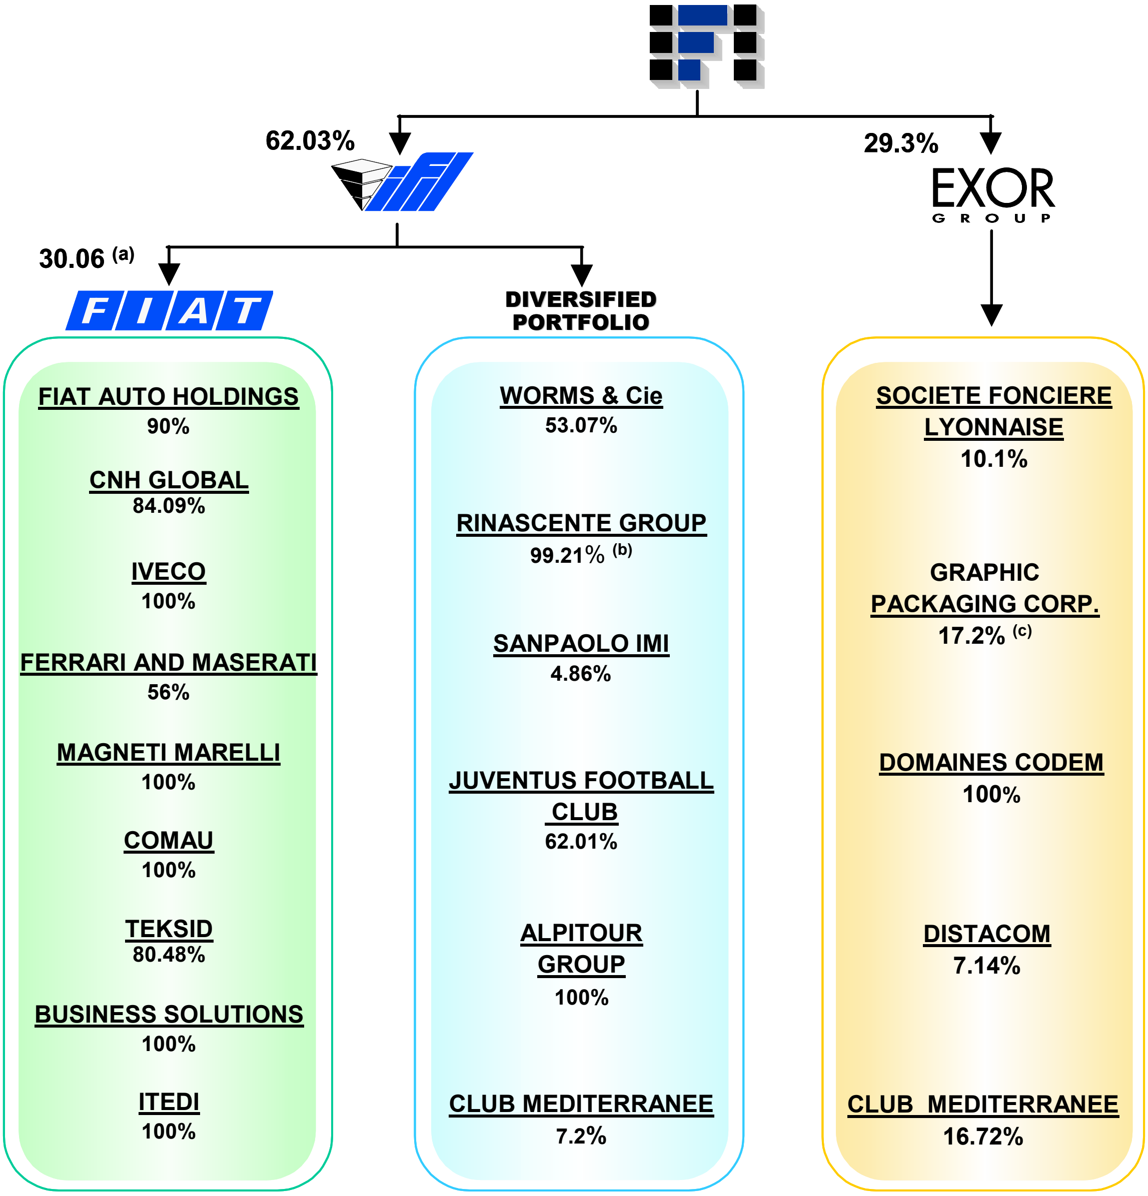
Alpitour (100% holding through NHT New Holding for Tourism) is a leading company in Italian tourism.

Club Méditerranée (7.2% holding in capital stock) is a company in which the Agnelli Group also holds an equity interest through Exor Group (16.72% holding in capital stock).

Juventus Football Club (62.01% holding in capital stock) is a company with more than one hundred years of history and an enviable record gained at various national and international sports events.

Exor Group is a Luxembourg holding company; its principal investments are the 16.7% stake in Club Méditerranée, the 17.2% interest in Graphic Packaging Corporation (a U.S.A. company in the packaging sector that emerged in 2003 from the merger of Riverwood and Graphic Packaging, listed on the New York stock exchange), the 10.1% holding in Société Foncière Lyonnaise (one of the most important real estate companies listed on the Paris stock exchange), the 100% holding in Domaines Codem (a French wine company) and the 7.1% stake in Distacom (a company headquartered in Hong Kong operating in the telecommunications sector).

The following chart is updated to the end of February 2004 and presents the simplified structure of the investment portfolio. Percentage holdings refer to ordinary capital stock.



(a) IFIL also holds 30.09% of preferred capital stock.
(b) Control is exercised jointly by the Auchan Group through Eurofind (50% by FIL and 50% by Auchan).
(c) Company emerging from the merger of Riverwood and Graphic Packaging.

STOCKHOLDERS AND THE STOCK MARKET

Capital stock

At December 31, 2003, IFI's capital stock, fully subscribed to and paid-in, amounted to € 163,251,460 and was composed of 86,450,000 ordinary shares and 76,801,460 preferred shares all with a par value of € 1 each.
The directors have the right, for a period of five years from the resolution passed on April 22, 2003, to increase, at one or more times, also in divisible form, the capital stock up to a maximum of € 561,750,000.

The ordinary shares are 100% held by the parent company Giovanni Agnelli e C. S.a.p.az. The preferred shares are listed on the Mercato Telematico Azionario (Electronic Trading Market) of Borsa Italiana S.p.A.
In accordance with art. 10 of the by-laws, preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code.
Pursuant to art. 26 of the by-laws, preferred shares have the right to a preference dividend, which is not cumulative from one year to the next, equal to 5.17% of par value (€ 1).

Treasury stock

At the end of February 2004, IFI holds 5,360,300 preferred treasury stock (6.98% of the class of stock).
On March 30, 2004 the Board of Directors voted to present a motion to the Ordinary Stockholders' Meeting for renewal of the resolution for the authorization of the buyback of treasury stock for a maximum of 16 million IFI ordinary shares and/or preferred shares, setting aside a total of € 120 million.

Information and charts depicting IFI preferred share performance are presented in the following tables.

	2004 (January/February)	**2003**	2002	2001

CHAIRMAN'S LETTER

To our Stockholders,

In 2003, after a lengthy period of stagnation, the world economy showed signs of recovery, though with a different intensity in various parts of the world. In fact, starting in the spring, industrial production in the United States and Asia picked up decisively, whereas in the euro zone, and in Italy, in particular, signs of development and growth were much weaker, also due to the strong euro. In 2004, the favourable direction of the economic cycle should begin to gather speed, although the differences among the various areas will remain evident.

The United States has continued to be the driving force behind development. The increase in consumption and investments has been sustained by extremely expansive monetary and fiscal policies: in particular, interest rates remained at record lows. However, two serious dangers are threatening the future of the American economy, which risk jeopardising the soundness of the recovery: the distinct worsening of public debt and the enormous foreign trade deficit. Balancing public debt, combined with a probable inversion in the monetary policy trend could slow down domestic demand.

The other protagonist of world recovery is the Asiatic area: Japan is finally showing concrete signs of improvement, while the rest of the area has resumed a very fast pace of growth following the slowdown caused by SARS.

Notwithstanding the favourable impetus stemming from outside, the euro zone is finding it difficult to jump onto the recovery stage of the economic cycle. Domestic demand has remained weak while the strong appreciation of the euro has penalized exports. In 2003, inflation in the euro zone remained under control, although it was slightly higher than the benchmark ceiling fixed by the European Central Bank. The sluggish recovery, while the euro is strong and prices are restrained, could induce the European Monetary Authority to reduce interest rates, which have remained stationary since June 2003
The performance of the European economy mainly reflected the recession in Germany and the weakness of France. According to the latest data released by ISTAT (National Statistical Institute), the growth of economic activity in Italy was also quite weak during 2003 (+0.3%). Consumption made a positive contribution to growth, while investments and net exports slowed development: in particular, the foreign channel reduced GDP growth by almost one percentage point. Historical structural problems still frustrated the Italian economy, which was manifested by the negative trend of productivity and an extreme vulnerability to competition from emerging countries in the sectors Italy is traditionally skilled in. The disappointing performance of productivity keeps inflation in Italy above the European average, causing a further loss in competitiveness for Italian companies on the international markets.

***

In 2003, two important and extraordinary operations were carried out with the aim of strengthening the equity position of the companies Group:

- the IFI/IFIL Reorganization, which took place in Q2 2003, involved the contribution to IFIL, against a reserved capital increase, of the investments held in Fiat, Juventus, SANPAOLO IMI and Soiem, in order to rationalize the Group's structure and concentrate the dynamic management of the investment portfolio in the operating holding company;
- the fully-subscribed capital increase of € 457.4 million, which made it possible to reduce net indebtedness to € 295.4 million and, through subsequent capital increases by IFIL and Fiat, to supply the latter with the financial resources needed to the sustain the relaunch plan.

***

2003 marked the return to a profit position for IFI, with a net income of € 14.7 million, after a 2002 that had posted a loss of € 226.9 million, due to the write-down of the principal listed investments.
At a consolidated level, the still unfavourable economic climate, and the difficulties of the Fiat Group, affected the consolidated result, with a loss of € 130 million, of which € 110.8 million related to IFI's share of the first-quarter loss of the Fiat Group.
In view of these results, the IFI Board of Directors decided not to propose a motion to the Stockholders' Meeting for the distribution of dividends.

As regards IFI's investment holdings, in 2003, the IFIL activities were directed at the active management of its investment portfolio, besides its support of Fiat's relaunch plan (of which it has recently been possible to appreciate positive signs such as an improvement in the operating result and the increase in the market share of the Auto sector). This was marked by the divisionalization process at the Rinascente Group, the reorganization of the Alpitour Group, the distribution of extraordinary dividends by Rinascente and Worms & Cie and, lastly, the sale of the stake held in Sifalberghi.
Although the consolidated net result of the IFIL Group is still a loss, amounting to € 45 million, IFIL S.p.A. closed 2003 with a net income of € 72.7 million, laying the foundations for a resumption of the distribution of dividends. Another positive sign was the reduction in net financial indebtedness, halved to € 234.7 million.
For 2004, IFIL anticipates further opportunities of optimising and developing its holdings, including also a new cycle of investments. This situation is supported by the setting up of an operating branch office in the United States, which will enable IFIL to take advantage of investment opportunities on the major world market

In 2003, Exor Group's consolidated financial statements closed with a net income of € 17.1 million, an increase versus that of € 15.4 million reported in 2002.
2003 also saw the sale of the investments in Château Margaux and the Espirito Santo Financial Group, as well as a part of the shares held in Société Foncière Lyonnaise, with a corresponding increase in net cash. Part of these resources were utilised to buy back treasury stock, subsequently cancelled by resolution of the Stockholders' Meeting, so that IFI and the parent company Giovanni Agnelli e C. currently hold almost the total capital stock of Exor Group.

***

Finally, together with the Board of Directors, I would like to thank the Stockholders for the trust accorded, the Statutory Auditors and the Independent Auditors for the care in the execution of their task, the Executives and Staff of the Company and its subsidiaries for the productive work carried out in an extremely difficult economic framework.

Umberto Agnelli

MAJOR EVENTS IN 2003

The Reorganization of the Group

Following the resolution passed by IFIL's Extraordinary Stockholders' Meeting held on April 23, 2003, IFI and IFIL gave effect to the Group Reorganization Plan proposed by the respective Boards of Directors on March 3, 2003.

IFI thus contributed the following investments and warrants to the subsidiary IFIL:

			Contribution value			
		% of class	Accounting value		Economic value	
	Number	of stock	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)
Fiat ordinary shares	77,944,334	17.99%	7.197	561.0	8.869	691.3
Fiat preferred shares	19,582,500	18.96%	5.165	101.1	5.165	101.1
Warrants 2007 on Fiat ordinary shares	11,216,334	-	0.319	3.6	0.319	3.6
SANPAOLO IMI ordinary shares	16,300,000	1.13%	6.605	107.7	6.605	107.7
Juventus Football Club	74,992,103	62.01%	0.156	11.7	1.823	136.7
Soiem	18,286,500	50.10%	0.516	9.4	0.633	11.6
TOTAL				**794.5**		**1,052.0**

The economic value of the contribution was calculated (with the exception of Soiem, which is unlisted and valued at net asset value) on the basis of the average official market prices in the period between September 2, 2002 and February 28, 2003 and resulted in a total of € 1,052 million.
The contribution, however, was recorded for € 794.5 million in that, in accordance with the provisions of art. 3 of Legislative Decree No. 358 of October 8, 1997, the Fiat ordinary shares, the Juventus Football Club shares and the Soiem shares (representing investments in subsidiaries or affiliates) were contributed with a view to the continuity of the accounting values recorded in the financial statements of IFI S.p.A. for the year ended December 31, 2002, whereas the SANPAOLO IMI ordinary shares, the Fiat preferred shares and the Fiat 2007 warrants on ordinary shares were contributed at economic value, with a gain of € 22.6 million.

In exchange for this contribution, based upon the economic value of IFIL determined for purposes of the transaction, IFIL issued to IFI 167,450,949 ordinary shares at the accounting per share price of approximately € 3.122 and 119,635,991 savings shares at the accounting per share price of approximately € 2.272. The par value of the IFIL shares issued amounted to € 287,086,940, plus € 507,460,128 of additional paid-in capital, for a total of € 794,547,068.

In April and May 2003, IFI also purchased on the market 1,807,150 IFIL ordinary shares and 114,009 IFIL savings shares for a total investment of € 4.4 million.

In May 2003, IFI then exercised the right to voluntarily convert all the 119,750,000 IFIL savings shares held for 101,787,500 IFIL ordinary shares, without payment of any cash differential.

IFI S.p.A. capital stock increase against payment

On June 27, 2003, by the power vested in it pursuant to art. 2443 of the Italian Civil Code by the Extraordinary Stockholders' Meeting held on April 22, 2003, the Board of Directors of IFI S.p.A. voted to increase the capital stock against payment, and in divisible form, for a maximum amount of par value € 101,501,460, through the issue of:

- 55,575,000 IFI ordinary shares of par value € 1 each, with normal dividend rights, with option rights offered to Giovanni Agnelli e C. S.a.p.az., the sole stockholder of IFI ordinary shares, at the price of € 4.5 each, in a ratio of 9 new ordinary shares for every 5 ordinary shares held;
- maximum 45,926,460 IFI preferred shares of par value € 1 each, with normal dividend rights, with option rights offered to the preferred stockholders at the price of € 4.5 each, in a ratio of 9 new preferred shares for every 5 preferred shares held.

At the end of the rights offering period, 45,412,722 new preferred shares were subscribed to equal to 98.88% of the preferred shares offered. Moreover, Giovanni Agnelli e C. S.a.p.az., the sole stockholder of IFI ordinary shares, subscribed to the 55,575,000 IFI ordinary shares in the rights offering, with an investment of € 250 million.

Following the subsequent offering of the 285,410 unexercised rights on the market (which generated proceeds of € 0.7 million for IFI, recorded as an increase to stockholders' equity), the remaining new 513,738 IFI preferred shares were subscribed to in August.

The capital stock increase was therefore concluded with the subscription of the entire issue of 55,575,000 ordinary shares and the 45,926,460 preferred shares offered for total proceeds of € 457.4 million (of which € 0.7 million deriving from the sale of unexercised rights).

At December 31, 2003, the capital stock of IFI S.p.A., fully subscribed to and paid-in, amounted to € 163,251,460 and was composed of 86,450,000 ordinary shares and 76,801,460 preferred shares, all with a par value of € 1 each.

Subscription to IFIL S.p.A. capital stock increase against payment

On June 27, 2003, by the power vested in it pursuant to art. 2443 of the Italian Civil Code by the Extraordinary Stockholders' Meeting held on May 14, 2003, the Board of Directors of IFIL S.p.A. voted to increase the capital stock against payment, and in divisible form, for a maximum amount of par value € 386,321,490, through the issue of a maximum of 386,321,490 IFIL ordinary shares of par value € 1 each, with normal dividend rights, with the option rights offered to the stockholders at a price of € 1.30 at a ratio of 57 shares for every 100 IFIL ordinary and/or savings shares held.

The capital stock increase was concluded in August, without the intervention of the Underwriting Syndicate, with the subscription of all 386,321,490 ordinary shares in the rights offering for total proceeds of € 504 million for IFIL S.p.A.

After purchasing 810,126 rights, IFI subscribed to 233,861,025 IFIL ordinary shares in the rights offering with a total investment of € 304.2 million.

In August 2003, IFI also purchased on the market 450,000 IFIL ordinary shares for € 0.9 million.

At December 31, 2003, IFI held 643,783,399 IFIL ordinary shares, equal to 62.03% of IFIL ordinary capital stock (62.8% of ordinary capital stock outstanding).

ANALYSIS OF IFI GROUP CONDENSED CONSOLIDATED RESULTS

In order to assist in the analysis of the financial position and results of operations of the IFI Group, a **condensed consolidated Balance Sheet** and a **condensed consolidated Statement of Operations** have been prepared wherein the investments in IFIL (60.55% of capital stock outstanding) and in Exor Group (29.3% of capital stock outstanding) have been accounted for using the equity method.

As regards the principles used in preparing the condensed consolidated financial statements, the following should be noted:

- subsequent to the Reorganization of the Group (please refer to the previous section "Major events in 2003"), the investment in Soiem was deconsolidated by IFI beginning April 1, 2003 and, from the same date, was consolidated line-by-line by IFIL. Effective the same date, the investments in Fiat and in Juventus Football Club were accounted for by IFIL using the equity method;

- accordingly, the condensed consolidated statement of operations of the IFI Group for the year 2003 shows, for the above holdings, only the share of the earnings (losses) for the first quarter of 2003; for the other three quarters of 2003, the results of these holdings, instead, were indirectly recorded through IFI's share of the consolidated result of the IFIL Group;

- the economic impact of the contribution of the investments in Fiat, Juventus Football Club, SANPAOLO IMI and Soiem (gains and losses compared to the carrying value of these holdings at March 31, 2003) have been completely eliminated, being a transaction with a subsidiary.

Consolidated net loss for the year and condensed consolidated statement of operations
The first half of 2003 shows a consolidated net loss for the IFI Group of € 130 million (consolidated net loss of € 803 million in 2002) due substantially to the share of the first-quarter 2003 loss of the Fiat Group of € 110.8 million.

The **condensed consolidated statement of operations** can be summarized as below.

€ in millions	**2003**	2002	Change
Group's share of earnings (losses) of companies accounted for using the equity method	**(117.7)**	(755.2)	637.5
Dividends from other holdings and tax credits	**0.2**	14.7	(14.5)
Losses, net	**0.0**	(60.3)	60.3

(a) Results in the first quarter of 2003.

Comments on the operating performance of the IFIL Group and Exor Group are presented later in the report.

Dividends from other holdings and tax credits

These amounted to € 0.2 million and relate to dividends received from Emittenti Titoli in 2003. The amount in 2002 (€ 14.7 million) had included the dividends received from SANPAOLO IMI (€ 9.3 million) and the related tax credit (€ 5.2 million).

General expenses, net

These amounted to € 6.1 million, a decrease of 9.2 million compared to the year 2002 due to the headcount reduction in employees and the deconsolidation of the subsidiary Soiem.

Other income (expenses), net

These amounted to € 1 million of other income, net, and included the credit to the statement of operations for the release of excess income taxes recorded in the prior year (+€ 4.1 million), expenses for the Reorganization of the Group (- € 1.5 million), expenses for the “Solidarity Fund for the support of earnings” (- € 0.9 million), nonrecurring financial expenses (- € 0.2 million) and other nonrecurring expenses (- € 0.5 million).

Consolidated net financial position (line-by-line consolidation)

The consolidated net financial position of the IFI Group at December 31, 2003 showed a net indebtedness position of € 4,525 million (€ 5,783 million at December 31, 2002).

At December 31, 2003, the consolidated net financial position (line-by-line consolidation) was composed as follows:

€ in millions	**12/31/2003**	12/31/2002	Change
Cash	**3,461**	3,733	(272)
Marketable securities and other short-term investments	**4,269**	1,828	2,441
Financial receivables, finance lease contracts receivable and other financial fixed assets	**12,959**	21,801	(8,842)
Financial accrued income and prepaid expenses	**387**	662	(275)
Total financial assets	**21,076**	28,024	(6,948)
Financial payables due within one year	**(8,355)**	(10,480)	2,125
Financial payables due beyond one year	**(16,284)**	(21,398)	5,114
Financial accrued expenses and deferred income	**(962)**	(1,929)	967
Total financial payables	**(25,601)**	(33,807)	8,206
Consolidated net financial position (line-by-line consolidation)	**(4,525)**	(5,783)	1,258

The contribution by the consolidated companies to the consolidated net financial position (line-by-line consolidation) was the following:

€ in millions	**2003**	2002	Change
IFI S.p.A.	**(295)**	(421) (a)	126
IFIL "Holdings System"	**(235)**	(484)	249
Adjustment to eliminate the net financial position of the holdings consolidated proportionally (b)	**(6)**	(52)	46
Fiat Group	**(3,028)**	(3,780)	752
Worms & Cie Group	**(887)**	(999)	112
NHT Group	**(74)**	(47)	(27)
Consolidated net financial position (line-by-line consolidation)	**(4,525)**	(5,783)	1,258

(a) This figure included the line-by-line consolidation of Soiem.

(b) Balances not included in the consolidated financial statements (line-by-line consolidation) of the IFIL Group since they refer to companies accounted for using the equity method (consolidated, instead proportionally, in the “Holdings System”).

Research and development costs

In 2003, research and development costs expensed directly to income during the year totalled € 1,763 million, including € 1,747 million relative to the Fiat Group (€ 1,748 million in 2002) and € 16 million relative to the Worms & Cie Group (€ 14 million in 2002).

ANALYSIS OF IFI S.p.A. STATUTORY RESULTS

Net income for the year and summarized statement of operations of IFI S.p.A.
The net income of IFI S.p.A. for 2003 was € 14.7 million, compared to the net loss of € 226.9 million reported in 2002 due to the writedowns of the accounting carrying values of Fiat preferred shares, IFIL ordinary shares and IFI preferred treasury stock.

The summarized statement of operations of IFI S.p.A. is presented below:

€ in millions	**2003**	2002	Change
Dividends	**4.5**	79.9	(75.4)
Dividend and related tax credits	**0.1**	36.2	(36.1)
Writedowns	**0.0**	(304.8)	304.8
Gains	**22.6**	1.0	21.6
Income/(expenses), net, from investments and other financial fixed assets	**27.2**	(187.7)	214.9
Financial expenses, net	**(15.0)**	(17.6)	2.6
General expenses, net	**(6.1)**	(9.4)	3.3
Other expenses, net	**1.0**	(4.5)	5.5
Income (loss) before taxes	**7.1**	(219.2)	226.3
Income taxes	**7.6**	(7.7)	15.3
Net income (loss)	**14.7**	(226.9)	241.6

Dividends
Dividends in 2003 were received from Exor Group (€ 4.4 million) and Emittenti Titoli (€ 0.1 million); Fiat and IFIL did not pay out dividends whereas the SANPAOLO IMI shares were contributed to IFIL before payment of dividends.
The figure for the year 2002 (€ 79.9 million) had included the dividends received from Fiat for € 30.3 million, from IFIL for € 24.9 million, from Exor Group for € 14.4 million, from SANPAOLO IMI for € 9.3 million, from Juventus Football Club for € 0.9 million and from Emittenti Titoli for € 0.1 million.

Gains totalling € 22.6 million were realized on the contribution of the SANPAOLO IMI ordinary shares (€ 19 million) and warrants 2007 on Fiat ordinary shares (€ 3.6 million) to IFIL.

General expenses, net, amounted to € 6.1 million and decreased by € 3.3 million compared to the year 2002 (€ 9.4 million) mainly due to a headcount reduction and consequent lower related costs.

Other income (expenses), net, amounted to € 1 million of other income, net, and included the credit to the statement of operations for the release of excess income taxes recorded in the prior year (+€ 4.1 million), expenses for the Reorganization of the Group (- € 1.5 million), expenses for the “Solidarity Fund for the support of earnings” (- € 0.9 million), nonrecurring financial expenses (- € 0.2 million) and other nonrecurring expenses (- € 0.5 million).

No income taxes were charged in 2003 as the taxable base for the year was a loss (taking into account the writedowns of financial fixed assets made at the end of 2002 which became deductible). Since there is no reasonable certainty of future recovery, no deferred tax assets have been booked on the fiscal 2003 tax losses and on the portions of investment writedowns posted in 2002 that, as allowed by existing tax legislation, will be deductible in future years.

Summarized balance sheet of IFI S.p.A.

(a) Net of writedowns of € 73.5 million made in 2002.
(b) Net of writedowns of € 58.9 million made in 2002.

The net increase in financial fixed assets of € 332.1 million compared to the end of 2002 (€ 1,524.7 million) was the result of the following movements:

€ in millions	
Financial fixed assets at December 31, 2002	**1,524.7**
Contribution to IFIL S.p.A.:	
- Fiat, 77,944,334 ordinary shares (17.99% of the class of stock) and 11,216,334 warrants 2007 on ordinary shares	(561.0)
- Fiat, 19,582,500 preferred shares (18.96% of the class of stock)	(101.1)
- SANPAOLO IMI, 16,300,000 ordinary shares (1.13% of the class of stock)	(88.6)
- Juventus Football Club, 74,992,103 shares (62.01% of capital stock)	(11.7)
- Soiem, 18,286,500 shares (50.1% of capital stock)	(9.5)
	(771.9)
IFIL capital stock increase reserved for IFI in exchange for contribution:	
- 167,450,949 ordinary shares (€ 3.122 per share)	522.7
- 119,635,991 savings shares (€ 2.272 per share) (a)	271.8
	794.5
Subscription to IFIL S.p.A. capital stock increase against payment (233,861,025 ordinary shares at € 1.3 per share)	**304.2** (b)
Other investments:	
- IFIL, 2,257,150 ordinary shares (€ 2.255 per share)	5.1
- IFIL, 114,009 savings shares (€ 1.773 per share) (a)	0.2
	5.3
Net change during the year	**332.1**
Financial fixed assets at December 31, 2003	**1,856.8**

(a) Converted in May 2003 to 101,787,500 IFIL ordinary shares (in a ratio of 17 ordinary shares for every 20 savings shares) without payment of any cash differential.
(b) Including the purchase of 810,126 rights for € 0.2 million.

Comparison of carrying values and market prices of listed financial fixed assets

		% holding			Average market prices			
	Number of	of class	Carrying value		II Half 2003		December 2003	
	shares	of stock	Unit (€)	Total (€ ml)	Unit (€)	Total (€ ml)	Unit (€)	Total (€ ml)
IFIL ordinary shares	643,783,399	62.03	2.604	1,676.2	2.325	1,496.8	2.603	1,675.8
IFI preferred treasury stock	5,360,300	6.98	13.148	70.5	6.414	34.4	6.723	36.0
Total				**1,746.7**		**1,531.2**		**1,711.8**

The carrying value of IFI preferred treasury stock held is lower than the per share value of the consolidated stockholders' equity of the IFI Group at December 31, 2003, equal to € 13.61 per share.

Stockholders’ equity of IFI S.p.A.

Stockholders’ equity at December 31, 2003 amounted to € 1,567 million (€ 1,094.9 million at December 31, 2002). The positive change of € 472.1 million was due to the following changes:

€ in millions		
Stockholders' equity at December 31, 2002	**1,094.9**	
IFI capital stock increase against payment	457.4	(a)
Net income for 2003	14.7	
Net change during the year	**472.1**	
Stockholders' equity at December 31, 2003	**1,567.0**	

(a) Including the sale of unexercised rights for € 0.7 million.

Net financial position of IFI S.p.A.

The net financial position of IFI S.p.A. at December 31, 2003 showed a net indebtedness position of € 295.4 million (€ 426.5 million at the end of 2002), which is composed as follows:

€ in millions	**12/31/2003**	12/31/2002	Change
Borrowings from banks	**(279.0)**	(381.7)	102.7
Payables to parent company	**(15.2)**	(39.3)	24.1
Payables to subsidiaries	**0.0**	(4.1)	4.1
Financial accrued expenses	**(1.3)**	(1.6)	0.3
Cash	**0.1**	0.2	(0.1)
Net financial position of IFI S.p.A.	**(295.4)**	(426.5)	131.1

The negative change of € 131.1 million in 2003 resulted from the following cash flows:

€ in millions		
Net financial position at December 31, 2002	**(426.5)**	
IFI capital stock increase against payment	457.4	(a)
Subscription to IFIL capital stock increase against payment	(304.2)	(b)
Purchase of 2,257,150 ordinary shares and 114,009 savings shares of IFIL	(5.3)	
Financial expenses, net	(15.0)	
General expenses, net	(6.1)	
Dividends received from Exor Group (€ 4.4 million) and Emittenti Titoli (€ 0.1 million)	4.5	
Sale of receivables from the tax authorities to Group companies (+€ 2.6 million) and other net changes (-€ 2.8 million)	(0.2)	
Net change during the year	**131.1**	
Net financial position at December 31, 2003	**(295.4)**	

(a) Including the proceeds on the sale of unexercised rights for € 0.7 million.
(b) Including the purchase of rights for € 0.2 million.

OTHER INFORMATION

Transition to International Financial Reporting Standards

Following the coming into force of the European Union Regulation No. 1606, dated July 19, 2002, beginning from 2005 those EU companies whose securities are traded on an EU regulated market must prepare their consolidated financial statements in accordance with International Financial Reporting Standards (IFRS/IAS).

In order to prepare for a proper transition, a working group was created to identify the differences between the national and Group accounting principles currently in place and the IFRS/IAS, to ascertain the adequacy of the accounting systems and procedures compared to the new requirements.
IFI has taken note of the transition processes in progress at the IFIL Group, agreeing the timetables to obtain the 2003 and 2004 data, in compliance with IFRS, which will be necessary for the preparation of the opening consolidated balance sheet as at January 1, 2004, as well as the 2004 interim quarterly and semi-annual consolidated financial statements of the IFI Group, prepared in accordance with IFRS (to be shown for comparative purposes with the equivalent data for 2005).

With regard to IFI S.p.A., the first indications from the work performed to date are that the adoption of the new IFRS will principally impact the following items:

Financial fixed assets:	the LIFO method (last in-first out) can no longer be used.
Treasury stock:	the carrying value of treasury stock should be recorded as a reduction of stockholders' equity; any gains/losses deriving from disposals should be recorded in stockholders' equity.
Employee severance indemnities and employee benefits:	should be recalculated for each employee in accordance with the provisions of IAS19; to that end, the Company will use an independent actuary.

Transactions among Group companies and with related parties

Transactions among IFI S.p.A., the parent company, the subsidiaries and the companies in which a significant influence is exercised are entered into in conformity with the provisions of existing laws, based upon an evaluation of reciprocal economic gain.

In addition to the comments in respect of the Reorganization of the Group, the most important transactions can be summarized as follows:

- suretyships granted in the past in favor of Federazione Italiana Giuoco Calcio – Lega Nazionale Professionisti (F.I.G.C. - L.N.P.) on behalf of Juventus Football Club for a residual amount of € 32 million, expiring in 2004 and 2005, remunerated at market conditions;

- sale of receivables from the tax authorities to Group companies (€ 2.6 million);

- loans secured at floating monthly market rates from the parent company Giovanni Agnelli e C. and from the subsidiaries Juventus Football Club and Soiem;

- services rendered to and costs recovered from subsidiaries and associated companies.

The effects on the balance sheet and statement of operations of the transactions among IFI S.p.A., the Group companies and the other related parties can be summarized as follows:

	12/31/2003			Year 2003	
€ in thousands	Accounts receivable	Accounts payable	Suretyships and Commitments	Income	Expenses
La Rinascente S.p.A.		2			2

The IFI Group, through the companies which make up the Group, has maintained and maintains relations with "related" parties as defined by Consob, which, even when considered from the standpoint of potential conflicts of interest, are nonetheless governed by market terms. In this sense, particular mention should be made of:

- option rights on IFIL ordinary shares granted to Directors and Managers of IFIL, IFI, and the subsidiary Soiem;
- option rights on Alpitour shares granted by Alpitour to the Directors of IFIL under a stock option plan for the Directors, Managers and Cadres of Alpitour and its direct and indirect subsidiaries;
- professional services rendered by the Director Franzo Grande Stevens to companies in the Fiat Group for consideration of € 875 thousand.

In February 2003, all the Directors and Managers of the Group, who had the right, sold their Atlanet shares to Ifil Investissements (from which they had previously bought the Atlanet shares) at prices slightly lower than the investments made.

With a view to optimizing the management of the Group's financial resources, loan transactions were entered into among companies of the Group during the year.

Additional information and details (including commitments for purchases and sales of investments, dividends received, purchases and sales of investments, as well as subscriptions to capital stock increases) are disclosed in the section "Major events in 2003" and in the "Notes to the statutory financial statements of IFI S.p.A." and to the consolidated financial statements.

On the basis of information received from the companies of the Group, there are no exceptional or unusual transactions to report.

Equity investments held by Directors, Statutory Auditors and General Manager

(Art. 79 of Consob resolution No. 11971 dated May 14, 1999 and subsequent amendments)

(h) Converted into 59,500 IFIL ordinary shares.

SIGNIFICANT SUBSEQUENT EVENTS

Investment in Tlcom I
In February, IFI invested € 1.5 million in TLcom I Capital Partners Limited, a venture capital fund geared to companies operating in the telecommunications and information technology sector in Europe and in other markets.

Net financial position of IFI S.p.A.
At the end of February 2004, the net indebtedness position amounted to € 299.8 million. The negative change (€ 4.4 million) was due to financial and operating expenses (€ 2.4 million), to the investment in TLcom I (€ 1.5 million) and other net changes (€ 0.5 million).

Programming document on security
The Company has prepared the programming document on security (Dps) for the year 2003 according to the laws then in force and is currently proceeding to update this document pursuant to the provisions of Legislative Decree No. 196 dated June 30, 2003, Attachment B – technical specifications regarding minimum safety measures.

BUSINESS OUTLOOK

Taking into account the motions for the distribution of dividends from the 2003 profits formulated by the Boards of Directors of IFIL and Exor Group, it is believed that the result for 2004 of IFI S.p.A. will be a profit.

The consolidated result of the IFI Group for 2004 will be closely linked to the performance of IFIL S.p.A. and its main holdings. The forecasts formulated by the holdings themselves are indicated in the following paragraphs.

Fiat Group
The forecast for 2004 calls for the global economy to grow, driven by expansion in the United States and Southeast Asia. However, the growth rates projected for Italy and the rest of Europe are significantly lower. Consequently, the Fiat Group will be faced with market demand that will expand slightly in the United States but hold relatively steady in most other countries, and with aggressive competition from other carmakers.

In this environment, all of the Group's Sectors will strive to achieve significant gains in profitability. They will pursue this goal by following the guidelines set out in the Relaunch Plan, by restructuring and by streamlining their manufacturing operations. At the same time, they will be making major investments in renewing their product range and improving their distribution networks.

In 2004, the Fiat Group will continue to strengthen its management organization by pursuing a strategy of bringing in top professionals from the outside and leveraging the competencies available inside.

While taking into account the current business outlook, management's goal will continue to be to achieve the objectives of the Relaunch Plan: an operating breakeven for the Group, a further reduction of Fiat Auto's losses and better operating results than in 2003 from all other Sectors.

Worms & Cie Group
In 2003, although operating in a difficult economic context, the companies of the Worms & Cie Group raised or maintained their market share and took structural actions that will make it possible to consolidate or improve their operating results in 2004.

The first two months of 2004 confirm this forecast with a strong level of activities for the subsidiaries SGS and Permal Group and make it possible to anticipate a gradual turnaround in the paper sector where manufacturing costs are being subjected to a rigorous control policy.

Rinascente Group
In the first two months of 2004, the Rinascente Group reported sales of € 1,023.9 million, with an increase of 7.9% compared to the corresponding period of the prior year.

In an economic context with growth forecasts uncertain, the Rinascente Group will support every commercial initiative necessary to pursue the objectives of efficiency and process effectiveness in order to preserve and, if possible, improve the operating result.

NHT Group
In view of the actions undertaken to reduce operating costs and the performance during the first few months, the NHT Group is forecasting a further improvement in its results for the year 2003/2004. However, the impacts deriving from a worsening of international political tension, partly as a result of recent terrorist attacks in Spain, could make reaching the anticipated results more difficult.

Juventus Football Club
Juventus, in light of the economic and balance sheet performance for the first six months of the year and information available to date, should register a negative net result for the year that will end on June 30, 2004. Such result could nevertheless be significantly affected by any extraordinary transactions regarding its assets.

SANPAOLO IMI
SANPAOLO IMI recently announced the distribution of dividends per share of € 0.39 which will bring IFIL receipts of € 27.4 million.

OPERATING PERFORMANCE OF IFIL AND EXOR GROUP HOLDINGS

IFIL

(62.03% of ordinary capital stock)

The following consolidated data of the IFIL Group at December 31, 2003 has been taken from the condensed consolidated balance sheet and condensed consolidated statement of operations. Such data has been prepared by consolidating the financial holding companies and Soiem (which make up the so-called “Holdings System”) line-by-line and proportionally and accounting for the subsidiaries and associated companies, including the operating holding companies, using the equity method.

€ in millions	**12/31/2003**	12/31/2002	Change
Consolidated net loss - Group	**(45.0)**	(367.0)	322.0
Consolidated stockholders' equity - Group	**3,953.9**	2,708.1	1,245.8
Consolidated net financial position of the "Holdings System"	**(234.7)**	(484.4)	249.7
Financial fixed assets	**4,223.1**	3,207.2	1,015.9

The year 2003 ended with a consolidated loss of € 45 million for the IFIL Group. Presented below are the condensed consolidated statement of operations and comments on the main captions.

€ in millions	**Year 2003**	Year 2002	Change
Group's share of earnings (losses) of companies accounted for using the equity method	**(49.7)**	(301.6)	251.9
Dividends from other holdings	**21.2**	30.6	(9.4)
Dividend tax credits	**11.9**	8.2	3.7
Gains (losses), net	**25.0**	(51.8)	76.8
Amortization of differences on consolidation	**(13.7)**	(6.8)	(6.9)
Investment expenses, net	**(5.3)**	(321.4)	316.1
Financial expenses, net	**(23.6)**	(20.6)	(3.0)
General expenses, net	**(13.0)**	(13.4)	0.4
Other expenses, net	**(6.1)**	(12.2)	6.1
Loss before taxes	**(48.0)**	(367.6)	319.6
Current income taxes, net	**0.1**	4.6	(4.5)
Deferred taxes	**2.9**	(4.0)	6.9
Net loss - Group	**(45.0)**	(367.0)	322.0

Group's share of earnings (losses) of companies accounted for using the equity method amounted to losses of € 49.7 million (losses of € 301.6 million in 2002). The positive change of € 251.9 million was due to the share of lower losses reported by the Fiat Group (+€ 229.3 million) and the NHT Group (+€ 8.8 million), the share of higher earnings by the Rinascente Group (+€ 65.2 million), the share of lower earnings by the Worms & Cie Group (€ 45.8 million) and the losses reported by Juventus (-€ 5.5 million), and other net changes (-€ 0.1 million).
The abovementioned changes include consolidation adjustments.

Dividends from other holdings amounted to € 21.2 million, of which € 21.1 million was received from SANPAOLO IMI.
At December 31, 2002, dividends received by SANPAOLO IMI had totaled € 30.6 million.

Gains (losses), net were due to the sale of 25% of Sifalberghi capital stock (€ 25.1 million) and losses, net, stemming from various transactions (- € 0.1 million). In 2002, the losses, net (-€ 51.8 million) had also included writedowns of the investment in Club Méditerranée (-€ 33.7 million) and IFIL treasury stock (-€ 15.4 million).

Amortization of differences on consolidation amounted to € 13.7 million (€ 6.8 million in 2002).
The increase of € 6.9 million compared to December 31, 2002 was due to the increases in the investments in Juventus Football Club and in La Rinascente.

Financial expenses, net, totaled € 23.6 million (€ 20.6 million in 2002) and increased by € 3 million due to higher average net indebtedness during the year.

Other expenses, net, amounted to € 6.1 million (€ 12.2 million in 2002) and included the amortization of the expenses related to the IFIL S.p.A. capital stock increase (€ 2.2 million), nondeductible VAT associated with such costs (€ 1 million), legal consulting fees regarding pending litigation (€ 1.5 million), provisions for extraordinary expenses (to be paid over several years) in connection with recourse to the "Solidarity Fund for the support of earnings" in reference to some employees of IFIL and Soiem (€ 0.8 million) and lastly, other expenses, net, (€ 0.6 million).

Stockholders' equity - Group amounted to € 3,953.9 million at December 31, 2003. The increase of 1,245.8 million compared to December 31, 2002 (€ 2,708.1 million) originated from the contribution of investments by IFI (+€ 1,052 million), the IFIL S.p.A. capital stock increase against payment (+€ 504 million), the share of the translation adjustments (-€ 272.9 million) and other net changes (+€ 7.7 million) shown by companies accounted for using the equity method and, lastly, the consolidated loss of the Group (-€ 45 million).

The consolidated net financial position of the "Holdings System" showed a net indebtedness position at December 31, 2003 of € 234.7 million; the positive change of € 249.7 million (more than 51%) compared to the balance at December 31, 2002 (- € 484.4 million) was due to the following flows:

€ in millions		
Consolidated net financial position of the "Holdings System" at December 31, 2002		**(484.4)**

(a) Including proceeds on the sale of unexercised rights for € 1,8 million.
(b) Cash of the subsidiary Soiem, consolidated line-by-line beginning 2003.

As from the end of June 2003, Standard & Poor's Rating Services has assigned an "A-" rating to IFIL's long-term debt and an "A2" rating to its short-term debt, with a negative outlook.

The parent company, IFIL S.p.A., closed 2003 with a net income of € 72.7 million. In 2002, IFIL S.p.A. had reported a net loss of € 516.4 million due to writedowns of the accounting carrying values in the investments held, directly and indirectly, in Fiat, Club Méditerranée and Soiem, and also in IFIL treasury stock.

In addition to the comments in respect of the Reorganization of the Group and the capital increase effected in July 2003, the following paragraphs describe the major events of the IFIL Group in 2003 and in the early months of 2004.

Transactions regarding La Rinascente and Eurofind

In January 2003, Eurofind, the subsidiary jointly controlled by Ifil Investissements and the Auchan Group, launched a tender offer for the residual ordinary and preferred shares of La Rinascente and a voluntary tender offer for the purchase of La Rinascente savings shares for the purpose of obtaining all La Rinascente shares not yet held by Eurofind.

By the end of the offer period (February 28, 2003), the total shares tendered comprised 10,768,383 ordinary shares, equal to 3.6% of ordinary capital stock, 491,006 preferred shares, equal to 15.61% of preferred capital stock, and 2,596,139 savings shares, equal to 2.52% of savings capital stock.

The transaction involved a total payment of € 60.9 million (€ 4.45 per ordinary and preferred share and € 4.15 per savings share) and the delisting of all classes of La Rinascente stock.

In the following months, Eurofind purchased off-market 7,380,130 ordinary shares (2.47% of ordinary stock), 45,215 preferred shares (1.44% of preferred stock) and 308,225 savings shares (0.30% of savings capital stock) for a total amount of € 34.4 million.

At the end of December 2003, Eurofind holds 401,223,236 La Rinascente shares (equal to 99.09% of capital stock) and, in particular, 296,556,269 ordinary shares (99.21% of ordinary capital stock), 2,797,086 preferred shares (88.92% of preferred capital stock) and 101,869,881 savings shares (99.06% of savings capital stock).

Again in December 2003, La Rinascente paid extraordinary dividends for € 600 million which gave rise to receipts of € 240.6 million for the IFIL Group (€ 594,5 million for Eurofind).

IFIL bonds

In February 2003, the IFIL bonds issued in December 2002 were increased from € 145 million to € 200 million. These are three-year bonds placed with primary institutional investors.
In December 2003, IFIL floated a second bond issue for € 100 million. These are also three-year bonds subscribed to by primary institutional investors.

Both bonds are listed on the Luxembourg stock exchange.

Transactions relating to Worms & Cie

Ifil Investissements purchased 1,438,059 Worms & Cie shares (equal to 1.37% of capital stock) for a total equivalent amount of € 23.7 million.
After this transaction, Ifil Investissements holds 55,922,623 Worms & Cie shares, equal to 53.07% of capital stock.

In May 2003, Worms & Cie paid dividends of € 1.5 per share (including extraordinary dividends for € 0.9) which gave rise to receipts of € 83.9 million for Ifil Investissements.

Sale of 25% of Sifalberghi capital stock

In August 2003, IFIL sold 25% of the capital stock of Sifalberghi to the Accor Group for the price of € 32 million, realizing a gain of € 25.1 million on consolidation, with a 12.5% IRR.

Purchase of 9.53% of Eurofind capital stock

As stated earlier, in January 2004, Ifil Investissements purchased 3,029,651 Eurofind shares (equal to 9.53% of capital stock) from Mediobanca for an investment of € 116.1 million.
Eurofind's capital stock is currently held equally by the IFIL Group (50%) and the Auchan Group (50%).

Purchase of 10% of NHT New Holding for Tourism capital stock

In January 2004, Ifil Investissements purchased 3,298 NHT New Holding for Tourism shares (equal to 10% of capital stock) from the TUI Group for an outlay of € 46.3 million. As part of this transaction, NHT also purchased the remaining 50% of the capital stock of Neos S.p.A. from the TUI Group for an investment of € 2.7 million.
IFIL currently holds, through the subsidiaries Ifil Investissements and Ifil Finance, complete control of NHT.

IFIL's new organization in the United States of America

For the purpose of contributing to the search for new investment opportunities, IFIL set up an organization in the United States with offices in New York. Thanks to its positioning in one of the most interesting international financial centers and with its highly-qualified professional management staff, the organization – which will operate in close coordination with IFIL's offices in Turin – could significantly boost the opportunities of creating economic value for the Company.

Possible Fiat S.p.A. capital increase in execution of the Convertible Mandatory Facility agreements dated July 26, 2002

In 2003, the major rating agencies downgraded Fiat's debt to below investment grade level and, accordingly, should this condition exist at July 2004, the lending Banks could bring forward the conversion of the debt to capital stock for an amount up to € 2 billion.

In this eventuality, should IFIL decide not to exercise, in whole or in part, the option rights to which it is entitled or should it not be in a condition to exercise, in whole or in part, such rights, the investment held by IFIL in Fiat could be diluted to below 30% of the capital stock with voting rights.

EXOR GROUP

(29.3% of ordinary capital stock)

Exor Group reported a consolidated net income in 2003 of € 17.1 million (€ 15.4 million in 2002) after booking a provision of € 40 million to the Reserve for investment fluctuations to take into account the market price reductions in listed investments and, with reference to the United States companies, the appreciation of the euro against the U.S. dollar.

In 2003, Exor Group sold the investments in Châteaux Margaux and Espirito Santo Financial Group, and a 7.6% stake in SFL – Société Foncière Lyonnaise. These transactions gave rise to a total net gain of € 52.3 million, after income taxes.
Exor Group still has an investment in SFL totaling 10.1% of capital stock.

Dividends totalled € 9.1 million, whereas general expenses and other operating expenses, net, decreased by 31.7%, from € 12 million in 2002 to € 8.2 million in 2003.

The stockholders' equity of the Group amounted to € 611.5 million at December 31, 2003. The reduction from the balance last year (€ 720.3 million) was mainly due to the buy-back of treasury stock and subsequent cancellation during the year by resolution of the Extraordinary Stockholders' Meeting for a total amount of € 110 million. After this transaction, following the sale of the investment in Château Margaux to the Mentzelopoulos Group, IFI and the parent company Giovanni Agnelli e C. hold almost all the capital stock of Exor Group.

The net cash of Exor Group amounts to approximately € 250 million at December 31, 2003.

As far as the main investment holdings are concerned, Club Méditerranée closed the year 2003 with a net loss of € 94 million (net loss of € 62 million in the prior year), with revenues down by 7.7% to € 1.6 billion and a net operating loss of € 6 million (€ 3 million in 2002). The Group's results were still impacted by the difficulties in the tourism sector (and that of the airplane carrier sector) as a result of the war in Iraq, the persisting threat of world terrorism and the SARS syndrome. The relaunch plan begun in prior years continued through actions aimed at reducing structure costs and bringing the hotel capacity into line with the changed conditions of the market. The divestiture of non-profitable businesses generated net financial flows of € 42 million. For the current year, the company expects a gradual improvement in the economic climate, which, for the last three years, has negatively affected its results.

In August 2003, the merger was concluded between the United States associated company Riverwood (in which Exor Group held a 29.7% stake) and Graphic Packaging, a company engaged in the packaging of consumer products. Exor Group currently holds 17.2% of the company that emerged from the merger, which took the name of Graphic Packaging Corporation and which is listed on the New York stock exchange.
The company ended 2003 with total revenues of US$ 2.3 billion, with the aim of becoming the leader in its sector in the United States market.
Important synergies and cost reductions as a result of the merger are anticipated for the current year.

In 2003, Société Foncière Lyonnaise showed a sharp increase in net income, equal to € 54.9 million (+59.6% compared to 2002) and cash flows, totaling € 79.3 million (+26.3%). Rental income has also registered a slight increase, reaching € 146.4 million (+2%).

MOTION FOR APPROVAL OF THE FINANCIAL STATEMENTS, INCREASE OF THE LEGAL RESERVE TO ONE-FIFTH OF CAPITAL STOCK AND APPROPRIATION OF NET INCOME FOR THE YEAR

To our Stockholders,

We ask you to approve the financial statements for the year ended December 31, 2003 and increase the legal reserve to one-fifth of capital stock, equal to € 163,251,460, by drawing € 17,861,380 from the extraordinary reserve. Furthermore, since the Board of Directors waived the right to its portion of profits under art. 26 of the by-laws by passing a specific resolution, we propose to appropriate the net income of € 14,666,264 to the extraordinary reserve.

The extraordinary reserve therefore amounts to € 732,885,985.

Turin, March 30, 2004

For the Board of Directors
The Chairman
Umberto Agnelli

Group

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

STRUCTURE AND CONTENT OF THE CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements for the year ended December 31, 2003 have been prepared in accordance with the provisions contained in Italian Legislative Decree No. 127 dated April 9, 1991. The Notes to the consolidated financial statements have been prepared in conformity with the same Legislative Decree, art. 38.
The consolidated financial statements are expressed in millions of euros.

Significant subsequent events are disclosed in the Directors' Report on Operations to which reference can be made.

THE REORGANIZATION OF IFI GROUP

Following the resolution passed by IFIL's Extraordinary Stockholders' Meeting held on April 23, 2003, IFI contributed the following investments and warrants to the subsidiary IFIL:

			Contribution value			
			In the statutory financial statements		In the consolidated financial statements	
	Number	% of class of stock	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)
Fiat ordinary shares	77,944,334	17.99%	7.197	561.0	8.869	691.3
Fiat preferred shares	19,582,500	18.96%	5.165	101.1	5.165	101.1
Warrants 2007 on Fiat ordinary shares	11,216,334	-	0.319	3.6	0.319	3.6
SANPAOLO IMI ordinary shares	16,300,000	1.13%	6.605	107.7	6.605	107.7
Juventus Football Club	74,992,103	62.01%	0.156	11.7	1.823	136.7
Soiem	18,286,500	50.10%	0.516	9.4	0.633	11.6
TOTAL				**794.5**		**1,052.0**

The economic value of the contribution was calculated (with the exception of Soiem, which is unlisted and valued at net asset value) on the basis of the average official market prices in the period between September 2, 2002 and February 28, 2003 and resulted in a total of € 1,052 million.
The contribution, however, was recorded for € 794.5 million in that, in accordance with the provisions of art. 3 of Legislative Decree No. 358 of October 8, 1997, the Fiat ordinary shares, the Juventus Football Club shares and the Soiem shares (representing investments in subsidiaries or affiliates) were contributed with a view to the continuity of the accounting values recorded in the financial statements of IFI S.p.A. for the year ended December 31, 2002, whereas the SANPAOLO IMI ordinary shares, the Fiat preferred shares and the Fiat 2007 warrants on ordinary shares were contributed at economic value, with a gain of € 22.6 million.

In exchange for this contribution, based upon the economic value of IFIL determined for purposes of the transaction, IFIL issued to IFI 167,450,949 ordinary shares at the accounting per share price of approximately € 3.122 and 119,635,991 savings shares at the accounting per share price of approximately € 2.272. The par value of the IFIL shares issued amounted to € 287,086,940, plus € 507,460,128 of additional paid-in capital, for a total of € 794,547,068.

In April and May 2003, IFI also purchased on the market 1,807,150 IFIL ordinary shares and 114,009 IFIL savings shares for a total investment of € 4.4 million.

In May 2003, IFI then exercised the right to voluntarily convert all the 119,750,000 IFIL savings shares held for 101,787,500 IFIL ordinary shares, without payment of any cash differential.

Lastly, there follows a description of the principles applied in accounting for the transactions regarding the Reorganization of the Group in the consolidated financial statements:

- the economic impact of the contribution of the investments in Fiat, Juventus Football Club, SANPAOLO IMI and Soiem (gains and losses compared to the carrying value of these holdings at March 31, 2003) have been completely eliminated, being a transaction with a subsidiary;
- until March 31, 2003, the results of the investments in Fiat, Juventus Football Club and Soiem were accounted for by IFI on the basis of the share of the equity interest which it had held prior to the contribution; starting

April 1, 2003, the results of these companies are accounted for on the basis of the new equity interests, through IFIL.

In its consolidated financial statements at December 31, 2003, IFIL has consolidated the investments in Fiat and Soiem line-by-line and accounted for the interest in Juventus Football Club using the equity method, consistently with the methods adopted by IFI in the past. In IFI's consolidated financial statements at December 31, 2003, therefore, there is no change in the scope of consolidation as a result of the Reorganization of the Group.

SCOPE OF CONSOLIDATION

Criteria used in determining the scope of consolidation

Directly and indirectly controlled subsidiaries (in which IFI holds directly or indirectly more than 50% of the capital stock or has de facto control) have been consolidated line-by-line using the financial statements at December 31, 2003 or the annual accounting data at the same date (where the year-end does not coincide with that of the consolidated financial statements) except as indicated below.

The NHT Group has been consolidated on a line-by-line basis using the consolidated accounting data at October 31, 2003, owing to the impossibility of obtaining, on timely basis without disproportionate expense, consolidated accounting data as of the date of IFIL's consolidated financial statements. This treatment, allowed by IAS 27, does not affect the assertion that the consolidated financial statements are a true and correct representation of the financial position and results of operations of the Group.

Investments in companies subject to joint control and associated companies in which the Group exercises a significant influence have been accounted for using the equity method.

Certain non-relevant companies which do not have a significant impact on the total consolidated revenues and for which it is not practicable to obtain the necessary information on a timely basis without disproportionate expense have been excluded from consolidation and valued at cost. This exclusion does not affect the assertion that the consolidated financial statements are a true and correct representation of the financial position and results of operations of the Group or the clarity of the financial statements.

Furthermore, the subsidiaries BUC – Banca Unione di Credito and Juventus Football Club have been accounted for using the equity method inasmuch as they have non-homogeneous operations.

Changes in the scope of consolidation

Changes in the scope of consolidation are described below.

Fiat Group

The major transactions which impacted the scope of consolidation of the Fiat Group are summarized in the following paragraphs.

In the first quarter of 2003, Iveco sold the activities of Fraikin, a company specializing in long-term vehicle leasing, to Eurazeo. The activities sold were deconsolidated as from the beginning of the year. The sales price was € 307 million, realizing a net loss of € 24 million.

Also in the first quarter of 2003, Business Solutions sold approximately 56% of IPI S.p.A. to the Zunino Group. IPI, which was deconsolidated as from the beginning of the year, operates in the field of large property improvements, management and sales.

At the end of March 2003, the Automobile Sector sold Fiat Auto Holdings' retail financing activities in Brazil to the Itaù banking group and the activities were deconsolidated from that date. The sales price was € 247 million, with a net gain of € 103 million.

On May 2, 2003, the agreement to sell the Toro Assicurazioni Group to the DeAgostini Group was signed. The relevant insurance operations were deconsolidated from that date. The sales price was € 2,378 million, with a net gain of € 390 million.

On May 27, 2003, under the agreement signed by Fiat and Capitalia, Banca Intesa, SANPAOLO IMI, Unicredito on March 11, 2003, and following approval by the competent authorities, the first part of the transaction for the sale of the majority interest (51%) in Fidis Retail Italia was concluded. Fidis Retail Italia is the company that controls the European operations of Fiat Auto Holdings in the field of retail consumer financing for automobile purchases.
The sale was finalized in October 2003 when the equity investments in the other financial companies covered by the agreement were transferred to Fidis Retail Italia, with the sole exception of the company operating in the United Kingdom.

In execution of the contract dated July 1, 2003 and after having met the conditions precedent, the sale of the aerospace activities of FiatAvio S.p.A. to Avio Holding S.p.A., a company 70% owned by The Carlyle Group and 30% by Finmeccanica S.p.A., was finalized. Such activities were deconsolidated from the date of the agreement. The sales price was € 1,509 million, with a net gain of € 1,258 million.

Moreover, Iveco has accounted for Naveco, the 50-50 joint venture with the Yueijin Group, using the equity method since the beginning of the year. This investment was previously consolidated using the proportional method.

NHT Group

Through NHT - New Holding for Tourism (90%-owned), the wholly owned investments in Alpitour Group and Welcome Travel Group were consolidated line-by-line. The investment in Neos (50%-owned) was accounted for using the equity method.

In the year ended October 31, 2003, Altamarea V & H Compagnia Alberghiera, in which a 60%-investment was acquired in 2003, was consolidated line-by-line.

The investment in Viaggidea was consolidated line-by-line beginning in 2003 (in 2002, the investment was accounted for using the equity method).

The acquisition of a further 30%-investment in Promoviaggi (now 60%-owned) was finalized at the end of the year. This investment is accounted for using the equity method; the share of earnings was recorded on the basis of the 30% interest held during the course of the year.

PRINCIPLES OF CONSOLIDATION AND SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared from the statutory financial statements or consolidated financial statements of the Group's single companies approved by the Boards of Directors and adjusted, where necessary, by the directors of the companies to conform with Group accounting principles and to eliminate tax-driven adjustments. The Group's accounting principles respect the requirements set forth by Legislative Decree No. 127 of April 9, 1991, interpreted and supplemented by the Italian accounting principles issued by the National Boards of Dottori Commercialisti and of Ragionieri, and, where there are none and not at variance, by those laid down by the International Accounting Standards Board (I.A.S.B.), to the extent that they are compatible with the laws in force. As regards the transition to International Accounting Standards "International Financial Reporting Standards IFRS", reference should be made to the specific section in the Directors' Report on Operations.

In order to obtain a true and fair representation of the financial position and results of operations of the Fiat Group, taking into account their functional integration, the financial companies that provide service to the industrial Sectors of the Fiat Group and the insurance companies have also been consolidated on a line-by-line basis. As a result, adjustments to the balance sheet and statement of operations format have been made in applying Article 32 of Legislative Decree No. 127/91, which provides for changes to be made to obtain a more clear, true and correct representation of the financial position and results of operations.

Assets and liabilities, and revenues and expenses, of subsidiaries consolidated on a line-by-line basis are included in the consolidated financial statements of the Group, regardless of the percentage of ownership. Furthermore, carrying values of investments are eliminated against the subsidiaries' related stockholders' equity. The portion of stockholders' equity and results of operations attributed to minority interests are disclosed separately. When losses pertaining to minority interest exceed the value of their share of the relevant capital stock, the excess, or deficit, is charged to the Group, unless the minority stockholders are expressly committed to reimbursing the losses, in which case the excess is recorded as an asset in the consolidated financial statements. If no such commitment is in place, should income be realized in the future, the minority interests' share of that income will be attributed to the Group, up to the amount necessary to recover the losses previously attributed to the Group.

Differences arising from the elimination of investments against the related stockholders' equity of the investment at the date of acquisition are allocated to the assets and liabilities of the companies being consolidated, up to the limit of their current value. The residual value, if negative, is recorded as a component of stockholders' equity, "Consolidation reserve", or as a liability, "Consolidation reserve for risks and futures expenses", when due to a forecast of unfavorable economic results. The residual value, if positive, is capitalized as an asset, "Differences on consolidation", and amortized over a period considered consistent with the practices of the sector of business or, alternatively, is deducted from the consolidation reserve up to the amount of the same. The positive difference is set off against the pre-existing consolidation reserve as allowed by Legislative Decree No. 127/91, art. 33, paragraph 3. This is considered a prudent approach since recovery of part of the cost through amortization is not deferred until future years but can immediately be compensated against the pre-existing consolidation reserve or the reserve set up during the year.

The effects of subscribing to capital stock increases at different issue prices for the various classes of stock are recorded as changes in stockholders' equity.

Intercompany profits and losses, not yet realized with third parties, are eliminated net of related tax effects, together with all intercompany receivables, payables, revenues and expenses arising on transactions among the companies consolidated on a line-by-line basis. Exceptions are the gross margins on intercompany sales of plant and equipment produced and sold at prices in line with market conditions, in which case such eliminations would be effectively irrelevant and not cost-beneficial.

Also subject to elimination are guarantees, commitments and risks relating to companies included in the scope of consolidation.

The balance sheets of foreign subsidiaries are translated into euros by applying the exchange rates in effect at year-end. The statements of operations of foreign subsidiaries are translated using the average exchange rates for the year. In the financial statements of subsidiaries operating in high-inflation countries (cumulative inflation in excess of 100% in three years), accounting principles for hyperinflationary economies are used.

Exchange differences resulting from the translation of opening stockholders' equity at current exchange rates and at the exchange rates used at the end of the previous year, as well as differences between net income expressed at average exchange rates and that expressed at current exchange rates, are reflected in the stockholders' equity caption "Cumulative translation adjustments". The exchange rates used are summarized in Note 24.

ACCOUNTING PRINCIPLES

Intangible fixed assets

Intangible assets and deferred charges expected to benefit future periods are recorded at cost, adjusted by amortization calculated on a straight-line basis at rates that reflect the estimated useful life of the assets over the period to be benefited. In particular, goodwill and differences on consolidation are amortized over a period of no more than 20 years, taking into account their expected period of recovery. In general, the Group's companies periodically review that the carrying value of such assets is not higher than the estimated recovery value, in relation to their use or realization, as determined by reference to the most recent corporate plans. In cases in which there is a permanent impairment in the estimated recovery value that is lower than the carrying value, appropriate writedowns are recorded.

The costs of researching and developing new products and/or processes are mainly included in the results of operations in the period in which such costs are incurred in line with the principle of prudence.

Goodwill is recorded as an asset when acquired for consideration.

Property, plant and equipment
Property, plant and equipment are recorded at purchase or construction cost. These values are adjusted where specific laws of the country in which the assets are located allow or require revaluation, in order to reflect, even if only partially, changes in the purchasing power of the currency. Cost also includes financing expenses incurred during the construction period of specific loans, where significant.

Depreciation is provided on a straight-line basis at rates that reflect the estimated useful life of the related assets.

When, at the balance sheet date, property, plant and equipment show a permanent impairment in value to below their carrying value, such assets are written down to the lower value, according to the method indicated above for intangible fixed assets.

Ordinary repairs and maintenance expenses related to property, plant and equipment are directly charged to the statement of operations in the year in which they are incurred, while maintenance expenses which increase the value of property, plant and equipment are capitalized and depreciated over the estimated useful lives of the assets.

Capital investment grants related to investments in property, plant and equipment are recorded as deferred income when collection becomes certain and credited to income over the useful life of the related asset.

Properties held by insurance companies to cover policy liabilities and accruals are stated at acquisition cost and adjusted by the compulsory law on revaluations imposed on Italian companies; however, the carrying amounts do not exceed market value. Depreciation is determined based on the useful life and expected recovery value.

The revaluation of assets allowed by Law No. 342/2000, having been effected by only a very few Italian companies of the Group, was reversed in the consolidated financial statements, for purposes of giving preference to the uniformity and comparability of the accounting principles over time.

Financial fixed assets
Financial fixed assets include investments in unconsolidated subsidiaries, associated companies and other companies, financial receivables held for investment purposes, other securities and treasury stock.

Investments in unconsolidated subsidiaries, in companies in which the Group exercises joint control with other partners and in associated companies (those in which the Group exercises, directly or indirectly, a significant influence) are normally accounted for using the equity method. This method is not used in cases in which the investor no longer exercises significant influence over the investee, in which case the cost is considered to be the value of the investment taken from the prior year's financial statements.

Investments in other companies are valued at cost of acquisition or contribution value (including accessory charges which increase the investment value). If, at the balance sheet date, the investment value is determined to have suffered a permanent impairment in value to below the cost of acquisition or the contribution value, as defined above, it is written down to the lower value.
Should the reasons for the writedown no longer apply, the value of the investment will be reinstated up to the limit of the cost of acquisition.

Financial receivables are recorded at estimated realizable value.

Securities are recorded at cost of acquisition, including additional direct charges. In the event of permanent impairment, a valuation allowance is provided as a direct reduction of the securities.

Treasury stock held as fixed assets is recorded at purchase cost, including any writedowns resulting from a permanent impairment in its value. A specific reserve for treasury stock is also recorded under stockholders' equity of the Group for the same amount.

Financial fixed assets also include receivables for vehicles sold under finance lease contracts, accounted for at cost.
The related depreciation is calculated, according to the financial method, based on the life of the lease and the related risk in managing such contracts.

Current assets - Inventories
Inventories of raw materials, semifinished products, finished goods and contract work in progress completed within the fiscal year are valued at the lower of cost and market value, cost being determined on a First-In First-Out (FIFO) basis or at weighted average cost (for the Worms & Cie Group). The valuation of inventories includes the direct costs of materials and labor and variable and fixed indirect costs. Provision is made for obsolete and slow-moving raw materials, finished goods, spare parts and other supplies based on their expected future use and realizable value.

Work in progress on long-term contract is valued based on the stage of completion and is recorded gross of advance payments received from customers. Eventual losses on such contracts are fully recorded when they become known.

Receivables
Receivables are recorded at estimated realizable value. Any unearned interest included in the nominal value of financial receivables has been deferred to future periods. Receivables sold to third parties with recourse or without recourse (including those sold as part of securitization transactions) are eliminated from receivables and disclosed in the memorandum accounts. Receivables denominated in foreign currency are translated at the exchange rate in effect at year-end. Resulting exchange gains and losses are included in the statement of operations.

Other receivables also include deposits to guarantee the securitization transactions of trade receivables (securitization refers to particular programs of discounting trade receivables without recourse, with a collateral deposit as a guarantee).

Investments, treasury stock and securities recorded in current assets
These are stated at the lower of the cost of acquisition, including accessory charges, determined using the “Last-In First-Out” (LIFO) method and realizable value. If realizable value can be determined from the market trend, it is defined on the basis of the market prices at the end of the year.

Reserves for risks and charges
The reserves for risks and charges include provisions to cover losses or liabilities likely to be incurred but uncertain as to amount or as to the date on which they will arise.

Restructuring reserves include the costs to carry out corporate reorganization and restructuring plans and are provided in the year the company formally decides to commence such plans and the relative costs can be reasonably estimated.

The policy liabilities and accruals of insurance companies are determined according to the procedures and rules issued by the regulatory agencies in each country in which the individual subsidiaries operate. In particular, unearned property and liability premiums are recognized on the pro-rata basis over the period of the policy. The reserve for unpaid property and liability losses and unpaid adjustment expenses has been calculated on the basis of reasonable estimates of the “latest cost” of the claims, analytically and for groups of particular risks, following adequate statistical and actuarial methods. The policy liabilities and accruals for unpaid losses on life insurance claims are calculated on an actuarial basis, accompanied by an opinion by a qualified actuary on the congruity of the amount.

Reserve for employee severance indemnities
The reserve for employee severance indemnities comprises liability for severance indemnities that Italian companies accrue each year for employees, as determined in accordance with labor legislation and contracts in force. The liability is calculated in reference to the years of service and the employee’s salary and is indexed for inflation, in accordance with art. 2120 of the Italian Civil Code.

Reserves for pensions and similar obligations
As regards the Fiat Group, the reserve for pensions and similar obligations includes provisions for long-service or other bonuses (including pension funds required by some countries in which the Group operates), payable to employees and former employees under contractual agreements or by law, determined on an actuarial basis, where applicable.

As regards the Worms & Cie Group, the reserves include termination pay accrued on behalf of employees, and calculated on the basis of the period of service.

The estimated cost of pensions, calculated periodically by independent experts, is charged to the statement of operations over the average residual service life of the interested employees.
Contributions paid in to the pension funds in excess of the actuarial cost are recorded in other receivables in the assets.
The actuarial valuation of the assets managed by the funds is compared to the benefits provided to employees in service and retired employees. The excess is amortized over the average residual service life of the employees.

Payables
Payables are recorded at face value; the portion of interest included in the nominal amount is deferred until future periods in which it is earned. Accounts payable denominated in foreign currency are translated at the exchange rate in effect at year-end. Resulting exchange gains and losses are included in the statement of operations.

Taxes payable includes the tax charge for the current year recorded in the statement of operations.

Accruals and deferrals
Accruals and deferrals, common to two or more years, are determined using the accrual method based on the income and expense to which they relate.

Securitization of financial receivables
The Fiat Group has programs for discounting financial receivables originated by the financial services companies using securitization transactions. This discounting of financial receivables calls for the sale without recourse of a portfolio of financial receivables to a non-Group securitization vehicle. This company finances the purchase of the portfolio by issuing securities which it backs (Asset Backed Securities). The securities issued are divided into two types having different characteristics: the first is placed on the market, occasionally subdivided by various classes of ratings, and subscribed to by investors; the second, the reimbursement of which is subordinated to the first, is subscribed to by the seller. The risk for the seller is limited to the portion of the securities which it has subscribed. At the end of each accounting period, therefore, such securities are evaluated in relation to the performance of the receivables sold and may be written down on the basis of this evaluation. These securities are recorded in Financial receivables.

Lastly, these sales without recourse require the immediate recognition of the present value of the future margin implicit in the receivables sold, net of discounting costs. This net value is included in the Value of production since it relates to revenues arising out of the normal operations of the financial services companies (to this end, the financial income of such companies is included in revenues from sales and services, as described in the relevant note).

Derivative financial instruments
Financial instruments used to hedge exchange and interest rate fluctuations and, in general, changes in the assets and liabilities, are presented in Note 13. Derivative financial instruments are recorded at inception in the memorandum accounts at their notional contract amount.

Beginning 2001 the Fiat Group adopted – to the extent that it is consistent and not in contrast with general principles set forth in the Italian law governing financial statements – the international accounting standard IAS 39 “Financial Instruments: Recognition and Measurement”, applicable beginning January 1, 2001. Such principle covers the accounting treatment of all financial assets and liabilities in and off-balance sheet and, in particular, states that derivative financial instruments should be valued at fair value. Taking into account the restrictions under Italian law (Legislative Decree No. 6/2003), the Group maintains, consistently with Consob rulings, that IAS 39 is immediately applicable only in part and only in reference to the designation of derivative financial instruments as “hedging” or “non-hedging instruments” and with respect to the symmetrical accounting of the result of the valuation of the derivative hedging instrument and the result attributable to the hedged item (“hedge accounting). The transactions which, according to the Group’s policy for risk management, are able to meet the conditions stated by the accounting principle for hedge accounting treatment are designated as hedging transactions; the others although set up for the purpose of managing risk (inasmuch as the Group’s policy does not permit speculative transactions), have been designated as “trading”.

Details of the accounting treatment adopted are as follows.

For foreign exchange instruments designated as hedges, the premium (or discount, representing the difference between the spot exchange rate at the inception of the contract and the forward exchange rate) is recorded in the statement of operations, in Financial income and expenses, in accordance with the accrual method. As regards these instruments, differences between the value of such instruments using the exchange rates at inception and those at year-end are also included in the statement of operations to offset the exchange effects of the items being hedged. In particular, for contracts entered into to hedge the exchange risk of future transactions that are considered highly probable, the effects of the alignment with the year-end exchange rate are deferred until the year in which the underlying transactions are recorded.

For interest rate instruments designated as hedges, the interest rate differential is included in the statement of operations, in Financial income and expenses, in accordance with the accrual method, offsetting the effects of the hedged transaction.

Derivative financial instruments hedging interest rate fluctuations that are designated as trading instruments are valued at market value and the differential, if negative compared to the contractual value, is recorded in the statement of operations as Financial income and expenses, in accordance with the concept of prudence.

The same prudent principle is followed in recording derivative financial instruments to manage trading risks (for example equity swaps) that do not meet the conditions for hedge accounting treatment.

Revenue recognition

Revenues from sales and services are recognized on the accrual basis net of returns, discounts, allowances and rebates.

Revenues from sales of products are recognized at the moment title passes to the customer, which is generally at the time of shipment. Under contracts for vehicle sale and buy-back at a specified price, a specific reserve for future risks and charges is set aside based on the difference between the guaranteed residual value and the estimated realizable value of the used asset, taking into account the probability that such option will be exercised; this reserve is set up at the time of the initial sale and adjusted periodically over the period of the contract.

Revenues from services are recorded when they are performed. Revenues from long-term contracts are recognized using the percentage of completion method.

Revenues from sales and services include income from the normal business of the financial services companies. Revenues also include amounts received from financing leases, net of depreciation, and income from company assets on operating leases.

With regard to the Insurance Sector, insurance premiums are recognized on the accrual basis.

Costs

Costs are recognized on an accrual basis.

Research and development costs are principally charged to the statement of operations in the period in which they are incurred. Research-related revenue grants provided by the Government or the EU are credited to the statement of operations when collection becomes certain.

Advertising and promotion expenses are charged to the statement of operations in the year incurred.

Estimated product warranty costs are charged to the statement of operations at the time the sale is recorded.

The costs of production include the interest and expenses in the normal course of business of the financial services companies, as well as insurance claims and other technical costs of the insurance companies.

Investment income

Dividends distributed by companies valued at cost are recorded in the year in which they are declared. The related tax credit is recorded at the time the dividends are received.
On consolidation, tax credits on dividends received by companies consolidated line-by-line or accounted for using the equity method are shown as a reduction of current income taxes.

Financial income and expenses

Financial income and expenses are recorded on the accrual basis. Income and expenses resulting from derivative financial instruments, as well as relevant year-end exchange differences, are included in the statement of operations in accordance with the abovementioned policies disclosed under memorandum accounts.

Costs relating to the factoring of receivables and notes of any type (with recourse, without recourse, securitization) and nature (trade, financial, other) are charged to the statement of operations on an accrual basis.

Income taxes

Income taxes currently payable are provided for in accordance with the existing legislation of the countries in which the Group operates.

Deferred tax liabilities or deferred tax assets are determined on all the temporary differences between the consolidated assets and liabilities and the corresponding amounts for purposes of taxation, including those deriving from the most significant consolidation adjustments. As allowed by the applicable Accounting Principles, deferred tax assets are also recorded to account for the tax benefit of tax loss carryforwards whenever the specific conditions for future recoverability are met.

In particular, deferred tax assets have only been recorded if there is a reasonable certainty of their future recovery. Deferred tax liabilities are not recorded if it is unlikely that a future liability will arise.

Deferred tax assets and liabilities are offset if they refer to the same company and to taxes which can be compensated. The balance from offsetting the amounts is recorded in other receivables in current assets, if a deferred tax asset, and in the deferred tax reserve, if a deferred tax liability.

Major changes, by Group, are described below.

Fiat Group

Intangible fixed assets are shown net of writedowns of € 614 million (€ 559 million at December 31, 2002), of which € 579 million (€ 545 million at December 31, 2002) relate to goodwill and differences on consolidation. Writedowns made in 2003 amount to € 55 million (€ 559 million in 2002) and are included in the Disposals and other changes column.

Start-up and expansion costs at December 31, 2003 consist of deferred plant start-up costs and corporate formation costs of € 60 million (€ 53 million at December 31, 2002) and capital increase costs of € 84 million (€ 24 million at December 31, 2002). Additions during the year include € 88 million for the capital increase costs of Fiat S.p.A. for

€ 57 million, Fiat Auto Holdings B.V. for € 17 million, CNH Global N.V. for € 12 million and other minor companies for € 2 million.

Differences on consolidation amount to € 2,251 million at December 31, 2003 and include the net goodwill (net of amortization and writedowns, as described below) on the acquisition of the Case Group and other CNH Group companies for € 2,013 million, the Irisbus Group for € 46 million, Meridian Technologies Inc. for € 25 million, certain Automotive Components Sector companies for € 20 million, certain Production Systems Sector companies for € 46 million, Magneti Marelli Holding S.p.A. for € 18 million and other minor companies for € 32 million, as well as goodwill from the CNH Global N.V. capital increase effected in 2000 for € 51 million.

As regards the amounts recorded in goodwill and differences on consolidation, amortization is charged over periods ranging from five to twenty years, on the basis of the expected recoverability of these amounts. At the end of the year, however, specific reviews were conducted to verify whether such amounts are recoverable by considering the existing prospects of earnings. From the analyses performed, taking into consideration the changed market conditions, the restructuring plans initiated by certain Sectors of the Group and the consequent impact on the business plans of various Sectors, permanent impairments in value were identified at December 31, 2003 that gave rise to writedowns totaling € 38 million (€ 533 million at December 31, 2002).

Worms & Cie Group

The balance of intangible fixed assets of € 913 million at December 31, 2003 mainly includes the residual difference on consolidation on the purchase of the ex-AWA Group (€ 862 million) which is being amortized over 20 years.

NHT Group

The differences on consolidation regarding the subsidiaries of the NHT Group are amortized over five years; differences on consolidation relating to the companies owning the resorts in the Maldives are amortized on the straight-line basis over the life of the concession rights (from six to 16 years) received from the government for the use of the islands for tourism purposes. It should be pointed out that such concession rights were renewed up to 2015 with an outlay of approximately US$ 3 million.

The change in the scope of consolidation, equal to € 9 million, is mainly due to the acquisition of the 60% investment in Altamarea V&H Compagnia Alberghiera S.r.l. (€ 2 million) and the line-by-line consolidation of Viaggidea S.p.A. (€ 7 million), after full control was acquired on October 31, 2003.

2) Property, plant and equipment

Major changes, by Group, are described below.

Fiat Group

Property, plant and equipment include revaluations required or allowed by national laws, which, net of related accumulated depreciation, amount to € 231 million at December 31, 2003 (€ 288 million at December 31, 2002).

No interest expenses were capitalized in 2003 or in 2002.

The change in the scope of consolidation shows a negative amount of € 1,417 million owing to the sale of the Toro Assicurazioni Group (-€ 582 million), Fraikin (-€ 514 million) and FiatAvio S.p.A. (-€ 326 million), as well as a positive balance due to the inclusion and exclusion of other minor companies in consolidation (€ 5 million).

Reclassifications refer to a reduction in construction in progress and advances on purchases of property, plant and equipment existing at the end of the prior year which were reclassified at the time they were effectively acquired and put into operation.

Disposals and other changes, which have a negative balance of € 898 million, include, in the land and buildings category, € 160 million relating in part to the sale of non-strategic properties. Furthermore, this item includes the writedowns recorded during the year. In fact, as with intangible fixed assets, the estimated recoverable amounts of property, plant and equipment were analyzed, in terms of the value in use or realizable value, based upon the most recently updated company plans, which take into consideration the changed market conditions and the restructuring plans initiated by certain Sectors of the Group. As a result of those analyses, property, plant and equipment were written down by € 351 million (€ 227 million in 2002), divided by Sector as follows: Automobiles € 312 million, Commercial Vehicles € 6 million, Metallurgical Products € 16 million, Automotive Components € 7 million, and other minor companies € 10 million. This item also comprises disposals relating to assets on operating leases of € 289 million.

Other assets include vehicles on operating leases for € 914 million at December 31, 2003 (€ 1,585 million at December 31, 2002), mainly relating to long-term leases. The reduction of € 671 million includes € 466 million due to the sale of Fraikin.

Worms & Cie Group

Property, plant and equipment include assets under finance leases for € 125 million (€ 135 million at December 31, 2002).

The depreciation of property, plant and equipment includes € 11 million of extraordinary depreciation.

NHT Group

The change in the scope of consolidation is principally the result of the first-time line-by-line consolidation of Altamarea V&H Compagnia Alberghiera (€ 4 million), the sale of the subsidiary Blumarin S.p.A., owner of the hotel complex Hotel "Abi D'Oru" in Sardinia (€ 18 million), and the sale of the buildings located in Turin, Milan and Trieste owned by Alpitour (€ 6 million).

The Group has ensured the use of the "Abi d'Oru" complex by signing a 15-year lease contract with the buyer company.

Investments mainly include the costs for the construction work on a new tourist resort in Sicily, in Arenella (province of Siracusa) for € 24 million, as well as the financial charges related specifically to the financing secured for the building work (€ 0.2 million).

Mortgages are carried by financial institutions on certain buildings held by the NHT Group (mainly tourism resorts) for € 6 million.

The residual net book value of monetary revaluations effected in prior years on buildings held by the NHT Group, as allowed by specific laws, amount to € 0.6 million.

The depreciation rates used for property, plant and equipment are within the following ranges:

	Minimum	Maximum
Land and buildings	1%	10%
Industrial and commercial equipment	5%	28%
Plant and machinery	8%	21%
Other assets	4%	33%

3) Financial fixed assets

Major changes in investments, by Group, can be summarized as follows.

IFI and IFIL Holdings System
Other changes in associated companies (-€ 292 million) mainly refer to the distribution of reserves and dividends by Eurofind (-€ 264 million) and the sale of the 25% equity interest in Sifalberghi S.r.l. (-€ 7 million).

Fiat Group
The Change in the scope of consolidation can be analyzed as follows:

- investments in unconsolidated subsidiaries: the decrease is due to the line-by-line consolidation of the companies B.D.C. & Co. Société en Commandite Simple (-€ 8 million), New City Car S.A. (-€ 2 million) and other minor companies (-€ 4 million);
- investments in associated companies: the caption includes the effects consequent to the exclusion from the scope of consolidation of the companies now accounted for using the equity method and the investments held by companies that were sold during the year; the change particularly refers to: Fidis Retail Italia S.p.A. (€ 376 million), Naveco Ltd. (€ 122 million), IPI S.p.A. (€ 16 million), Toro Targa Assicurazioni S.p.A. (€ 15 million), Transolver Finance Establecimiento Financiero de Credito S.A. (€ 12 million), Fidis Bank G.m.b.H. (€ 3 million), IN ACTION S.r.l. (€ 2 million), the company Atla S.r.l. owned by FiatAvio S.p.A. (-€ 4 million), investments held by IPI S.p.A. (-€ 5 million) and other minor companies (-€ 1 million);
- investments in other companies: the decrease is mainly due to the exclusion from the scope of consolidation of Capitalia S.p.A. (-€ 481 million), Toro Assicurazioni Group holding and other minor companies (-€ 10 million).

Acquisitions and capitalizations refer principally to the following:

- investments in unconsolidated subsidiaries: capitalization of the company Cofap Companhia Fabricadora de Pecas LTDA (€ 5 million) and other minor companies (€ 2 million);
- investments in associated companies: capitalizations of the companies CNH Capital Europe S.A.S. (€ 10 million), Toro Targa Assicurazioni S.p.A. (€ 9 million), Mako Elektrik Sanay Ve Ticaret A.S. (€ 4 million), and other minor companies (€ 6 million);
- investments in other companies: acquisitions of the companies Gas Turbine Technologies S.p.A. (€ 6 million), IPSE 2000 S.p.A. (€ 3 million) and other minor companies (€ 2 million).

Disposals and Other Changes refer mainly to:

- investments in unconsolidated subsidiaries: line-by-line consolidation of Atlanet S.p.A. (€ 56 million) and other minor companies (-€ 10 million);
- investments in associated companies: sale of E.D.M. S.r.l. (-€ 8 million), Johnson Matthey Argentina S.A. (-€ 3 million) and other companies (-€ 44 million);
- investments in other companies : the increase, net of minor variations for -€ 6 million, is due to the subscription of the Edison S.p.A. capital increase, equal to € 65 million, through the conversion of the rights subscribed to in 2002.

Worms & Cie Group

Acquisitions refer to the purchase of SGS Société Générale de Surveillance shares for € 53 million, which brings the Worms & Cie Group's holding to 24.27% of the outstanding capital stock of SGS.

Disposals and Other Changes refer mainly to the sale of 1.3% of Groupe Danone shares (-€ 88 million).

Investments in unconsolidated subsidiaries

(a) The carrying value at December 31, 2003 includes the goodwill paid on the acquisition of the 30% stake in the company Promoviaggi for € 2 million.

Unconsolidated subsidiaries of the Fiat Group

As allowed by law, the above companies have not been consolidated either because their operations are so dissimilar (BUC – Banca Unione di Credito) or because it would not have been possible to obtain the necessary information for their consolidation on a timely basis without disproportionate expense or because their operations are not significant. Such companies show a negative net financial position of € 297 million (€ 164 million at December 31, 2002).

As regards the investment in Leasys S.p.A., this company is subject to joint control with the other partner, even though the Fiat Group holds 51% of capital stock; like the other principal jointly controlled companies (which, instead are included in the associated companies), this investment is accounted for using the equity method.

(a) Sold to the Accor Group in August 2003.
(b) Consolidated on a line-by-line basis in 2002.
(c) Consolidated proportionally in 2002.

Associated companies of the IFIL Holdings System

At December 31, 2003, the carrying value of the investment in the Eurofind Group, controlled jointly by the IFIL Group and the Auchan Group, includes the residual difference on consolidation of € 156 million generated by purchases of La Rinascente shares, which is being amortized over 20 years. The reduction in the carrying value of the investment in Eurofind is mainly due to its distribution of profits and reserves at the end of 2003.

The aggregate net indebtedness of Eurofind and the Rinascente Group at December 31, 2003 amounts to € 467 million.

Associated companies of the Fiat Group

The Fiat Group also holds certain companies under joint control, the most important of which are Fiat-GM Powertrain B.V., Sevel S.p.A., Société Européenne de Véhicules Légers du Nord-Sevelnord Société Anonyme and Naveco Ltd. Such companies show a negative net financial position of € 1,093 million (€ 2,480 million at December 31, 2002).

Fiat-GM Powertrain

Fiat-GM Powertrain B.V. is an industrial joint venture for the manufacture of engines and gears for cars that was set up in the second half of 2001 between Fiat and General Motors Corporation (General Motors) under the well-known strategic alliance. The key figures taken from the financial statements of Fiat-GM Powertrain, drawn up in accordance with the accounting principles of the Group for the valuation of the investment using the equity method at December 31, 2003 and 2002 are as follows.

€ in millions	**12/31/2003**	12/31/2002
Balance sheet data		
Fixed assets	**3,250**	3,416
Total assets	**6,611**	6,681
Financial payables	**(1,452)**	(1,695)
Stockholders' equity	**2,344**	2,377

€ in millions	**2003**	2002
Statement of operations data		
Net sales	**6,598**	6,624
Operating income	**296**	280
Net income	**180**	131

In view of the strictly industrial nature of the joint venture and in order to achieve a reading of its industrial performance that is consistent with the past, since 2001 and during the period in which the industrial convergence and the relative synergies are being implemented (estimated at less than three years), the Group's share of the results of the company is included in the consolidated statement of operations as a split between the operating/industrial component and the other non-operating components. In particular, the Group's share of the operating result of the company (€ 147 million in 2003, € 143 million in 2002 and € 47 million in the second half of 2001), determined by the transfer pricing policy adopted, is included in the consolidated statement of operations as an adjustment to the cost of the products purchased from the joint venture, whereas the share of the result in the other non-operating components is allocated to the respective principal captions, without effect on the total net result recorded by the Group. As far as Fiat-GM Powertrain's balance sheet is concerned, with regard to the debt position, there are no commitments or guarantees provided by Fiat.

Italenergia Bis

With reference to the investment in Italenergia Bis S.p.A., during the second half of 2002, the Fiat Group sold a 14% holding to certain other stockholders of the company (Banca Intesa, IMI Investimenti and Capitalia, hereinafter the "Banks") for € 548 million, realizing a gain of € 189 million. The related sales contracts and the contemporaneous agreements with another stockholder of Italenergia Bis (Electricité de France, hereinafter "EDF") provide, among other things, that:

- by virtue of an option acquired in respect of EDF (the so-called EDF Put), Fiat may elect, between March and April 2005, to sell the shares it still holds in Italenergia Bis (223,151,568 shares, equal to 24.6%,) to EDF, at a price corresponding to the value of the investment, as estimated on the basis of the valuations performed by three experts appointed for that purpose. That price, less a premium of € 127 million, payable only in the event the option is exercised, may not be less than a minimum (floor) of € 1,147 million, or € 5.141698 per share;
- in connection with the EDF Put, the Banks (in addition to the put agreements negotiated independently with EDF for their respective initial holdings in Italenergia Bis) obtained a so-called "tag along/drag along" agreement from Fiat, and Fiat arranged a symmetrical Put/Call contract with EDF (conditional upon the prior exercise of the EDF Put by Fiat) that gives rise to two scenarios:
  a) Fiat independently exercises the EDF Put on its own 24.6% holding and in this case:
    · the Banks exercise the "tag along" under which the Banks each sell their own 4.66% holding to Fiat under the same price conditions as the EDF Put (valuation at fair market value, minimum floor of € 5.141698 per share). Fiat, in turn, sells the acquired shares to EDF, making use of the put clauses in the Put/Call arranged with EDF;
    · the corresponding "drag along" allows Fiat to reacquire the Banks' shares in any case and to surrender them to EDF which in turn has, by means of the call clauses in the Put/Call, the right to ask Fiat to acquire and surrender the shares. In substance, by means of the call, EDF may (providing that Fiat exercised the EDF Put, which is a condition for the Put/Call) acquire the entire original Fiat investment;

b) Fiat does not independently exercise the EDF Put on its own 24.6% holding and in this case:

- the individual Banks, separately, have the right to request Fiat to exercise its Put on EDF which allows the Banks to exercise the "tag along", as described above, and to realize a gain;
- Fiat may elect not to exercise the EDF Put, as instead requested, and the Banks have the right to ask that Fiat purchase from the same Banks their respective 4.66% holdings at the lower of the price determined pursuant to the EDF Put, in accordance with the same criteria and procedures agreed with EDF, and € 6.5 per share;
- Fiat does not have a call right on the Banks' holdings which were sold to the Banks definitively.

In conclusion, the 14% holding in Italenergia Bis sold by Fiat is subject to Put options exercisable in 2005 by each of the Banks. Nevertheless, the effects of the sale were considered final and the resulting gain realized in the previous year, in that Fiat had contemporaneously stipulated a put option with EDF that will give it the right, in the event that the Banks ask to purchase said shares, to sell them in turn to EDF at the same price conditions as the EDF Put.

Fidis Retail Italia ("FRI")

With reference to the associated company Fidis Retail Italia S.p.A. ("FRI"), this company was set up to take over the European activities of the Automobile Sector in the area of consumer financing for retail automobile purchases. To this end, those activities, performed by the various companies operating in the different countries in Europe, were gradually sold to FRI, after obtaining the necessary authorizations from the local regulatory agencies. As envisaged by the Framework Agreement signed on May 27, 2002 by Fiat and the "Money Lending Banks" (Capitalia, Banca Intesa, SANPAOLO IMI and later Unicredito Italiano), on May 27, 2003, the Fiat Group sold 51% of FRI's shares and, as a result, the relative control, to Synesis Finanziaria S.p.A., an Italian company held equally by the four Banks, at the price of € 370 million. This transaction led to a loss of € 15 million that had already been set aside in a specific reserve for risks in the consolidated financial statements at December 31, 2002, based upon the binding agreements signed by the parties at that time. The sale contract calls for Put and Call options that can be summarized as follows:

- call option by Fiat to purchase 51% of Fidis Retail Italia, held by Synesis Finanziaria, exercisable twice a year (in January and July) up to January 31, 2006 at a price increased *prorata temporis* over the sales price plus additional payments less any distributions;
- Synesis Finanziaria's right to ask Fiat to exercise the above purchase option on 51% of Fidis Retail Italia in the event of which, by January 31, 2006, there is a change in control of Fiat or Fiat Auto (also through the sale of a substantial part of the companies owned by Fiat Auto or one of its brands Fiat, Alfa and Lancia) as set forth in the relative stockholders agreement between Fiat, Synesis Finanziaria and the four money lending banks;
- so-called "tag along" option on behalf of Synesis Finanziaria if the same events referred to in the preceding point occur after January 31, 2006;
- so-called "drag along" option on behalf of Fiat Auto in the event of the sale of the investment after January 31, 2006.

As a result of the transaction, FRI was deconsolidated and has repaid all the loans it previously obtained from the centralized treasury department of the Fiat Group.

Lastly, it should be mentioned that previous to the negotiations with the four Money Lending Banks, the control of FRI had been offered to General Motors, which, as established by the Master Agreement, had the "Right of First Refusal".

Associated companies of the Worms & Cie Group

The carrying value of the investment in SGS Société Générale de Surveillance S.A. includes the difference on consolidation of € 393 million which is being amortized over 20 years (€ 376 million at December 31, 2002). The increase is due to the share purchases made during 2003.

Financial receivables by the Fiat Group held as fixed assets are shown in the financial statements net of the allowances for doubtful accounts of € 5 million (€ 4 million at December 31, 2002), with a provision of € 1 million during the year 2003; Financial receivables recorded in the financial statements at December 31, 2003 approximate their fair values which have been calculated using the present value method, based on a discount rate which reflects market conditions, the duration and the risk of insolvency.

Financial receivables by the Worms & Cie Group include the loan made by ArjoWiggins to the buyers of Appleton Papers Inc. for the remaining period of six years, repayable at the expiry date. The nominal value of the receivable totals US$ 321 million. The amount recorded (€ 124 million) represents the present value of the loan calculated at an implicit rate of interest of 12%.

Financial receivables by the NHT Group total € 21 million and include loans granted to companies operating hotels and suppliers providing tourist services, earning interest at floating rates based on the Euribor and Libor (€ 11 million), security deposits (€ 8 million) to guarantee exclusive marketing contracts for the tourist resorts in the Maldives and in Tunisia, earning interest on floating rates based on the Euribor and Libor (of which € 3 million is due beyond five years), as well as other receivables (€ 2 million).

Financial fixed assets – Other securities

Worms & Cie Group - Government securities and bonds	**23**	14	9
IFIL Holdings System - Ocean Club Méditerranée bonds	**5**	4	1
Total other securities	**84**	2,463	(2,379)

Other securities of the Fiat Group are shown in the financial statements net of the allowance for writedowns of € 32 million (€ 2 million at December 31, 2002). The writedown refers to the adjustment of the securities to estimated realizable value.

The Ocean Club Méditerranée bonds mature on November 1, 2008 and earn annual interest of 3% and give the right, at maturity, to subscribe to the same number of Club Méditerranée shares at a unit price of € 58 or to receive a total reimbursement of € 5.2 million.

Financial fixed assets – Treasury stock

There were no transactions in treasury stock during the year; the balance at December 31, 2003 is as follows:

		Carrying value	
	Number of shares	Per share (€)	Total (€ in millions)
IFI preferred shares	**5,360,300**	**13.15**	**70** (a)

(a) Net of writedowns of € 58.9 million made in 2002.

IFI preferred treasury stock in portfolio at December 31, 2003 has a par value of € 5,360 thousand and represents, after the capital stock increase, 3.28% of capital stock and 6.98% of the class of stock.

On the basis of the average market prices for the second half of 2003 (€ 6.41), there is an unrealized loss on IFI preferred shares of € 36 million, which decreases (€ 31 million) when considering the average market prices for the period March 1 to March 17, 2004 (€ 7.439).

Such unrealized loss is not considered representative of a permanent decline in value taking into account that the per share carrying value of IFI preferred shares held is in any case lower than the per share value of the consolidated stockholders' equity of the IFI Group at December 31, 2003 (€ 13.61).

Financial fixed assets – Finance lease contracts receivable

Balance at 12/31/2002	Additions	Financial amortization	Foreign exchange effects	Change in the scope of consolidation	Disposal and other changes	**Balance at 12/31/2003**	**Accumulated amort. and writed. 12/31/2003**
2,947	1,112	(528)	(31)	(1,485)	(218)	**1,797**	**1,036**

Finance lease contracts receivable refer to vehicles sold by the Automotive Sectors of the Fiat Group under finance leases. The reduction of € 1,150 million compared to December 31, 2002 is principally due to the Change in the scope of consolidation following the sale of the majority interest in Fidis Retail Italia S.p.A.

Finance lease contracts receivable do not include vehicles on operating leases, which are included under Property, plant and equipment.

Other financial fixed assets

These total € 315 million (€ 359 million at December 31, 2002) and refer to the Worms & Cie Group. They comprise:

- the deposit of € 110 million lodged with a leading banking institution which partially earns interest. The deposit was made by the Worms & Cie Group within the framework of the loans given to the buyers of Appleton Papers Inc. in order to guarantee the disbursing banks against the risk of an eventual acceleration of the indemnities connected with the dispute over the environmental risks to the Fox River;
- the deposit of € 92 million, made for the fine levied on Arjo Wiggins Appleton by the European Commission for alleged violations of fair trade practices;
- the deposit of € 111 million made by Arjo Wiggins Appleton to guarantee the commitments under financial lease transactions;
- other receivables of € 2 million.

Additional information is provided in the section "Pending litigation".

4) Current assets - Inventories

	12/31/2003			12/31/2002		
€ in millions	**Gross**	**Allowance**	**Net**	Gross	Allowance	Net
Raw materials and supplies	**1,480**	**(221)**	**1,259**	1,548	(149)	1,399
Work in progress and semifinished products	**1,006**	**(23)**	**983**	1,144	(22)	1,122
Contract work in progress	**4,077**	**0**	**4,077**	5,293	0	5,293
Finished goods and merchandise	**4,897**	**(466)**	**4,431**	4,730	(488)	4,242
Advances to suppliers	**5,188**	**0**	**5,188**	3,824	0	3,824
Total inventories	**16,648**	**(710)**	**15,938**	16,539	(659)	15,880
Advance payments on contract work in progress	**(8,448)**	**-**	**(8,448)**	(8,227)	-	(8,227)
Net inventories	**8,200**	**(710)**	**7,490**	8,312	(659)	7,653

Inventories mainly refer to the Fiat Group (a net amount of € 15,360 million at December 31, 2003).
Advance payments received by the Fiat Group from customers against contract work in progress amount to € 8,448 million (€ 8,227 million at December 31, 2002) and are recorded in Payables (Note 11). Inventories, net of such advance payments received from customers, amount to € 6,912 million (€ 7,050 million at December 31, 2002). Advances to suppliers principally regard the amounts paid by Fiat S.p.A. to the consortiums involved in the T.A.V. project. Contract work in progress decreased mainly as a result of the Change in the scope of consolidation.

5) Current assets - Receivables

An analysis of receivables by type and due date is as follows:

	12/31/2003			12/31/2002

Receivables from tax authorities	14	0	14	10	0	10
Receivables from employees	1	0	1	0	0	0
Receivables from others	50	1	51	24	10	34
Total	154	1	155	115	10	125
IFI, IFIL Holdings System and intragroup eliminations						
Trade receivables	0	0	0	1	0	1
Receivables from unconsolidated subsidiaries	1	0	1	0	0	0
Receivables from associated companies	0	0	0	0	1	1
Receivables from tax authorities	81	0	81	67	0	67
Receivables from employees	0	0	0	1	0	1
Receivables from others	0	0	0	11	0	11
	82	0	82	80	1	81
Total receivables	9,097	1,678	10,775	10,966	3,055	14,021

Receivables from tax authorities principally refer to VAT and income taxes receivable from the Italian tax authorities and include the tax credit relating to the advance payments of income tax on employee severance indemnities paid by Italian companies. The portion of interest accrued on that receivable relating to the current year is recorded in Financial income and expenses.

Other receivables from others include the net debit balance of deferred tax assets, equal to € 1,907 million (€ 3,560 million at December 31, 2002) of which € 1,879 million refers to the Fiat Group, € 23 million to the Worms & Cie Group and € 5 million to the NHT Group. Additional information on these assets is provided in Note 9, reserves for risks and charges, which comments on the income tax reserves.

Receivables due beyond five years, which refer entirely to the Fiat Group, amount to € 12 million (unchanged compared to 2002).

Receivables are presented net of the allowance for doubtful accounts (in reference to trade receivables) for € 567 million. Movements in these allowance accounts in 2003 are as follows:

Balance at 12/31/2002	Provisions	Use and Other changes	Change in scope of consolidation	**Balance at 12/31/2003**
629	114	(123)	(53)	**567**

6) Financial assets not held as fixed assets

Investments

Investments in other companies, entirely held by the Fiat Group, amount to € 32 million (€ 810 million at December 31, 2002) and show a decrease of € 778 million mainly due to the sale of the Toro Assicurazioni Group.

Other securities

Total other securities	**4,359**	7,112	(2,753)

The analysis, by Group, is as follows:

IFIL Holdings System

At December 31, 2003, other securities mainly comprise investments of liquidity in the money market, in time deposits, in short-term Italian government securities and in other short-term financial instruments held by the foreign subsidiaries.

Fiat Group

At December 31, 2003, other securities include short-term bonds and commercial paper (€ 1,480 million) and highly rated liquidity funds of leading international banks (€ 2,365 million), in which mainly the treasury management companies of the Fiat Group have made temporary and highly liquid investments of available cash resources that arose mainly as a result of the significant divestitures by the Group. Additional liquidity (€ 3,211 million) in the form of bank accounts and cash is included in cash.

At December 31, 2002, other securities comprised securities with a broad market issued by debtors with a high credit rating and mainly held by the insurance companies to cover, for the most part, policy liabilities and accruals.

The securities portfolio of € 3,845 million at December 31, 2003 (€ 6,769 million at December 31, 2002) approximates fair value.

Fiat Group

Financial receivables amounting to € 10,750 million (€ 18,411 million at December 31, 2002), net of allowances for doubtful accounts of € 316 million (€ 523 million at December 31, 2002), decreased by € 7,661 million compared to the end of the prior year. Such reduction is mainly due to the change in the scope of consolidation (€ 6,183 million) particularly as a result of the sale of the retail financing activities of the Automobile Sector.

Movements during the year in the allowance accounts for financial receivables are as follows:

Balance at 12/31/2002	Provisions	Use and Other changes	Change in scope of consolidation	**Balance at 12/31/2003**
523	188	(115)	(280)	**316**

The fair value of financial receivables would be approximately € 10,800 million at December 31, 2003 (€ 18,454 million at December 31, 2002); the fair value of financial receivables was determined in accordance with the method indicated in Note 3 - Financial fixed assets – Receivables.

Financial receivables from associated companies of € 644 million at December 31, 2003 (€ 1,313 million at December 31, 2002) decreased by € 669 million due to loan repayments.

Financial receivables from others amount to € 9,585 million at December 31, 2003 (€ 16,587 million at December 31, 2002) of which € 7,914 million at December 31, 2003 (€ 15,615 million at December 31, 2002) consist of financing granted to retail customers as well as dealer networks and suppliers.

Financial receivables from others also include the net value of subordinated securities of € 214 million (€ 602 million at December 31, 2002), subscribed to as part of the securitization of financial receivables; the reduction of € 388 million is chiefly due to the change in the scope of consolidation following the sale of Fidis Retail Italia.

NHT Group

Financial receivables from others amount to € 11 million and include the receivables on the sale of the buildings in Turin and Milan, finalized in October. These receivables are secured by bank sureties issued by leading credit institutions.

7) Accrued income and prepaid expenses

€ in millions	**12/31/2003**	12/31/2002	Change
Commercial accrued income:			
- Interest and commissions	**5**	30	(25)
- Other	**37**	68	(31)
Total commercial accrued income	**42**	98	(56)
Commercial prepaid expenses:			
- Interest	**39**	9	30
- Other	**356**	502	(146)
Total commercial prepaid expenses	**395**	511	(116)
Total commercial accrued income and prepaid expenses	**437**	609	(172)
Financial accrued income	**327**	553	(226)
Financial prepaid expenses	**85**	118	(33)
Total accrued income and prepaid expenses	**849**	1,280	(431)

Financial accrued income mainly includes day-to-day interest earned on securities and derivative financial instruments.

8) Stockholders' equity

Statement of changes in the stockholders' equity of the Group

€ in millions	Capital stock	Additional paid-in capital	Revaluation reserves	Legal reserve	Treasury stock valuation reserve	Retained earnings and other reserves	Cumulative translation adjustments	Net loss for the year	Stockholders' equity

(a) Includes the sale of unexercised rights for € 0.7 million.
(b) Includes the consolidation reserve for € 152 million.

Capital stock

At December 31, 2003, IFI's capital stock, fully subscribed to and paid-in, amounts to € 163,251,460 and is composed of 86,450,000 ordinary shares and 76,801,460 preferred shares all with a par value of € 1 each.
In accordance with art. 10 of the by-laws, preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code.
Pursuant to art. 26 of the by-laws, preferred shares have the right to a preference dividend, which is not cumulative from one year to the next, equal to 5.17% of par value (€ 1).

Capital stock may be increased for a period of five years, at one or more times, also in divisible form, up to a maximum of € 561,750,000, by the authority delegated to the Board of Directors in the Extraordinary Stockholders' Meeting on April 22, 2003, under the provisions of art. 2443 of the Italian Civil Code.

Changes in capital stock during the year are detailed as follows:

	Number of shares		
	Ordinary	Preferred	Total
At December 31, 2002	30,875,000	30,875,000	61,750,000
Capital stock increase against payment	55,575,000	45,926,460	101,501,460
At December 31, 2003	**86,450,000**	**76,801,460**	**163,251,460**

On June 27, 2003, by the power vested in it pursuant to art. 2443 of the Italian Civil Code by the Extraordinary Stockholders' Meeting held on April 22, 2003, the Board of Directors of IFI S.p.A. voted to increase the capital stock against payment, and in divisible form, for a maximum amount of par value € 101,501,460, through the issue of:

- 55,575,000 IFI ordinary shares of par value € 1 each, with normal dividend rights, with option rights offered to Giovanni Agnelli e C. S.a.p.az., the sole stockholder of IFI ordinary shares, at the price of € 4.5 each, in a ratio of 9 new ordinary shares for every 5 ordinary shares held;
- maximum 45,926,460 IFI preferred shares of par value € 1 each, with normal dividend rights, with option rights offered to the preferred stockholders at the price of € 4.5 each, in a ratio of 9 new preferred shares for every 5 preferred shares held.

At the end of the rights offering period, 45,412,722 new preferred shares were subscribed to equal to 98.88% of the preferred shares offered. Moreover, Giovanni Agnelli e C. S.a.p.az., the sole stockholder of IFI ordinary shares, subscribed to the 55,575,000 IFI ordinary shares in the rights offering, with an investment of € 250 million.
Following the subsequent offering of the 285,410 unexercised rights on the market (which generated proceeds of € 684 thousand for IFI, recorded as an increase to stockholders' equity), the remaining new 513,738 IFI preferred shares were subscribed to in August.

The capital stock increase was therefore concluded with the subscription of the entire issue of 55,575,000 ordinary shares and the 45,926,460 preferred shares offered for total proceeds of € 457 million (of which € 0.7 million deriving from the sale of unexercised rights).

In execution of the resolution passed by the Stockholders' Meeting of June 3, 1985, a part of the monetary revaluation reserve Law No. 576 of December 2, 1975 was transferred to capital stock (€ 1,325 thousand) which, in the event of distribution, will form part of the taxable income of the Company.

At December 31, 2003, a total of € 83.7 million was booked to reserves in suspension of taxes, of which € 81.4 million was posted to the monetary revaluation reserves, € 2 million to the legal reserve and € 0.3 million to other reserves. In the event of distribution, such amounts will form part of the taxable income of the Company.
Deferred taxes have not been provided on these reserves since it is unlikely that they will be distributed.

Reconciliation to the stockholders' equity and the net loss of the parent company IFI S.p.A.

	12/31/2003		12/31/2002

Stockholders' equity – Minority interest

The minority interest in stockholders' equity of € 8,071 million at December 31, 2003 refers to the following holdings in directly owned companies:

	12/31/2003				12/31/2002
€ in millions	%	Capital and reserves	Net income (loss)	Total	
IFIL Group	**39**	**9,588**	**(1,517)**	**8,071**	2,996
Fiat Group					6,235
Total		**9,588**	**(1,517)**	**8,071**	9,231

9) Reserves for risks and charges

€ in millions	12/31/2003	12/31/2002	Change
Reserve for pensions and similar obligations	**1,571**	1,527	44
Income tax reserve:			
current income tax reserve	**118**	220	(102)
deferred income tax reserve	**311**	1,367	(1,056)
Total income tax reserve	**429**	1,587	(1,158)
Other reserves:			
Warranty reserve	**791**	842	(51)
Restructuring reserves	**482**	743	(261)
Various liabilities and risk reserves	**2,711**	2,948	(237)
Total other reserves	**3,984**	4,533	(549)
Insurance policy liabilities and accruals	**89**	9,605	(9,516)
Other insurance policy liabilities and accruals	**0**	7,000	(7,000)
Total reserves for risks and charges	**6,073**	24,252	(18,179)

Reserve for pensions and similar obligations

The reserve for pensions and similar obligations amounted to € 1,571 million (€ 1,527 million at December 31, 2002), includes payable to employees and former employees according to contractual agreements or by law and is determined on an actuarial basis, where applicable.

Income tax reserves

The deferred income tax reserve at December 31, 2003 includes deferred tax liabilities, net of deferred tax assets, which have been offset where possible by the individual consolidated companies. The net debit balance between the deferred income tax reserve and deferred tax assets is recorded in Other receivables from others and is composed as follows:

€ in millions	12/31/2003	12/31/2002	Change
Deferred income tax reserve	**311**	1,367	(1,056)
Deferred tax assets	**(1,907)**	(3,569)	1,662
Total	**(1,596)**	(2,202)	606

The net change of € 606 million compared to December 31, 2002, derives mainly from the reversal, by the Fiat Group, of deferred tax assets for which the recovery was mainly connected to the realization of gains on the sales of investments that took place during 2003.

Overall, the deferred income tax reserve, net of deferred tax assets recorded under Other receivables from others, can be analyzed as follows:

€ in millions	**12/31/2003**	12/31/2002	Change
Deferred tax liabilities from:			
- Accelerated depreciation	**585**	841	(256)
- Deferred tax on gains	**502**	404	98
- Capital investment grants	**18**	13	5
- Other	**682**	849	(167)
Total deferred tax liabilities	**1,787**	2,107	(320)
Deferred tax assets for:			
- Taxed reserves for risks and charges	**(1,022)**	(1,310)	288
- Inventories	**(129)**	(162)	33
- Taxed allowances for doubtful accounts	**(89)**	(190)	101
- Pension funds	**(293)**	(225)	(68)
- Other	**(2,863)**	(1,999)	(864)
Total deferred tax assets	**(4,396)**	(3,886)	(510)
Theoretical tax benefit connected to tax loss carryforwards	**(4,431)**	(3,662)	(769)
Adjustments for assets whose recoverability is not certain (mainly tax loss carryforwards)	**5,444**	3,239	2,205
Total deferred income tax reserve, net of deferred tax assets	**(1,596)**	(2,202)	606

As disclosed in the accounting policies, in recording deferred tax assets, each company in the Group critically evaluated whether the conditions existed for the future recoverability of such assets on the basis of updated strategic plans, accompanied by the related tax plans. For this reason, the total theoretical future tax benefits deriving from positive temporary differences (€ 4,396 million), and tax loss carryforwards (€ 4,431 million), have prudently been reduced for a total of € 5,444 million.

In particular, the deferred income tax reserve net of deferred tax assets includes € 1,322 million of tax benefits connected to tax loss carryforwards. However, a further tax benefit connected to tax loss carryforwards of € 3,109 million has not been recorded in the financial statements.

Deferred taxes of € 72 million (€ 127 million at December 31, 2002)) have not been provided by the Fiat Group on temporary differences relating to reserves and provisions in suspension of taxes, since they are not expected to be used in a manner which would warrant their taxation.

Since there is no reasonable certainty of future recovery, IFIL S.p.A. did not book any deferred tax assets on the fiscal 2001, 2002 and 2003 tax losses (approximate total of € 178 million) and on the portions of investment writedowns that, as allowed by existing tax legislation, will be deductible in future years (approximate total of € 266 million).

Since there is no reasonable certainty of future recovery, IFI S.p.A. did not book any deferred tax assets on the fiscal 2003 tax losses (€ 131 million) and on the portions of investment writedowns that, as allowed by existing tax legislation, will be deductible in future years (€ 63 million).

Other reserves

Restructuring reserves

Restructuring reserves amount to € 482 million at December 31, 2003 (€ 743 million at December 31, 2002) and are related to the corporate restructuring programs of the following Sectors:

€ in millions	**12/31/2003**	12/31/2002	Change
Automobiles	**160**	320	(160)
Agricultural and construction equipment	**83**	218	(135)
Commercial vehicles	**75**	83	(8)
Metallurgical products	**24**	2	22
Components	**64**	59	5
Production systems	**54**	2	52
Services	**8**	19	(11)
Other sectors	**3**	27	(24)
Paper sector	**11**	13	(2)
Total restructuring reserves	**482**	743	(261)

Various liabilities and risk reserves

The various liabilities and risk reserves amount to € 2,711 million at December 31, 2003 (€ 2,948 million at December 31, 2002) and represent the provisions made by the individual companies mainly for contractual, commercial and litigation risks. The reduction of € 237 million from December 31, 2002 represents the balance between ordinary and extraordinary provisions of € 1,344 million, decreases due to the currency exchange effect of € 99 million and decrease due to uses and other changes of € 1,482 million.

The various liabilities and risk reserves include:

- provisions made by the Worms & Cie Group in 2001 for the litigation pending in relation to the environmental risk concerning the Fox River (€ 82 million) and the fine levied by the European Commission for alleged violations of fair trade practices (€ 184 million);
- provisions made by the Worms & Cie Group for guarantees that certain British banks could ask the Worms & Cie Group to provide on behalf of the ex-AWA Group in relation to four leasing contracts signed by the same AWA Group between 1994 and 1997. The guarantees would serve in the case of an eventual dispute with the British tax authorities over the tax deductibility of accelerated depreciation regarding these same leasing contracts.

Additional information is provided in the section “Pending litigation”.

Insurance policy liabilities and accruals

The reduction in all the Insurance policy liabilities and accruals of € 16,516 million is due to the sale of the Toro Assicurazioni Group

10) Reserve for employee severance indemnities

This reserve refers to the liability of the Italian consolidated companies for employees' severance indemnities, calculated in accordance with art. 2120 of the Italian Civil Code.

Movements in the reserve account, in millions of euros, are as follows:

Balance at 12/31/2002	Provisions	Use and Other changes	**Balance at 12/31/2003**
1,627	248	(543)	**1,332**

The Use and Other changes column comprise the change in the scope of consolidation (€ 160 million) due to the deconsolidation of the Toro Assicurazioni Group, FiatAvio S.p.A. and Fidis Retail Italia S.p.A.

11) Payables

Payables may be analyzed by due date as follows:

	12/31/2003				12/31/2002			
€ in millions	**Due within one year**	**Due beyond one year**	**Total**	**Of which due beyond 5 years**	Due within one year	Due beyond one year	Total	Of which due beyond 5 years

Total payables	**13,420**	**24,639**	**11,948**	**50,007**	14,134	31,878	13,315	59,327

Payables comprise advances of € 9,166 million at December 31, 2003 (€ 9,326 million at December 31, 2002), including € 8,448 million of advance payments received on contract work in progress (€ 8,227 million at December 31, 2002) against the stage of the completion of work by companies managing long-term contracts.

Payables secured by collateral amount to € 1,245 million (€ 1,631 million in 2002) and include € 1,234 million relating to the Fiat Group, € 6 million relating to the NHT Group and € 5 million to the Worms & Cie Group.

Additional details are provided in the note "Guarantees granted, commitments and other memorandum accounts".

The interest rates and the nominal currencies of medium and long-term financial payables, including the current portion of € 2,767 million at December 31, 2003 (€ 4,807 million at December 31, 2002) are as follows:

€ in millions	less than 5%	from 5% to 7.5%	from 7.5% to 10%	from 10% to 12.5%	greater than 12.5%	**Total**
Euro and euro-zone currencies	8,432	6,507	78	4	5	15,026

Total payables	12,588	22,034	11,618	46,240	13,267	28,923	12,998	55,188

As regards the Fiat Group, the decrease in payables (€ 8,948 million) compared to December 31, 2002 is mainly due to the following:

- a decrease in trade payables of € 679 million, including € 685 million for the change in the scope of consolidation;
- a decrease in financial payables of € 6,889 million due to the change in the scope of consolidation (€ 3,836 million mainly as a result of the sale of Fidis Retail Italia) and the effect of foreign exchange rates;
- a decrease in other payables of € 1,380 million mainly due to the change in the scope of consolidation of € 1,076 million.

Financial payables total € 22,034 million at December 31, 2003 (€ 28,923 million at December 31, 2002). Financial payables due within one year amount to € 6,616 million at December 31, 2003 (€ 8,310 million at December 31, 2002) and their carrying values approximate fair value as a consequence of the short-term maturity.
The portion of medium and long-term financial payables due beyond one year amounts to € 15,418 million at December 31, 2003 (€ 20,613 million at December 31, 2002). The scheduled maturities are:

€ in millions	2005	2006	2007	2008	Thereafter	**Total**
Medium and long-term financial payables due beyond one year	7,443	2,955	643	424	3,953	**15,418**

The fair value of medium and long-term financial payables due beyond one year would be approximately € 397 million lower than the carrying value at December 31, 2003 (at December 31, 2002, fair value would have been € 2,169 million lower). The fair values of such financial payables take into account the current market cost of funding with similar maturities, and, for bonds, their market prices.

Medium and long-term financial payables of the Fiat Group include financing of approximately € 1,150 million secured from Citigroup and a small group of banks that is guaranteed by the EDF put option (refer to the EDF Put described in Note 3) held by the Fiat Group on its remaining investment (24.6%) in Italenergia Bis and the shares in the same Italenergia Bis pledged by Fiat.

At December 31, 2003, the Group has an unused "committed" line of credit available mainly denominated in U.S. dollars for an equivalent amount of approximately € 2,000 million (approximately € 3,700 million at December 31, 2002). The decrease can principally be ascribed to the maturity of a syndicated credit line of US$ 1 billion, in addition to the effects of the translation of the credit lines in their original currencies to euros.

Fiat Group's bonds, including convertible bonds, amount to € 11,375 million (€ 12,998 million at December 31, 2002) and can be analyzed by year of maturity as follows:

€ in millions	2004	2005	2006	2007	2008	Thereafter	**Total**
EMTN	98	1,426	2,351	181	228	2,769	**7,053**
Convertible bonds	1,765	-	-	-	-	-	**1,765**
Other bonds	936	489	-	100	-	1,032	**2,557**
Total bonds	**2,799**	**1,915**	**2,351**	**281**	**228**	**3,801**	**11,375**

The bonds issued by the Fiat Group are governed by different terms and conditions according to the following types of bonds:

- Euro Medium Term Notes (EMTN Program): these notes have been issued under a program that is utilized for approximately € 7 billion and guaranteed by Fiat S.p.A. Issuers taking part in the program are Fiat Finance & Trade Ltd. S.A. (for an amount outstanding of € 6,824 million), Fiat Finance North America Inc. (for an amount outstanding of € 148 million) and Fiat Finance Canada Ltd. (for an amount outstanding of € 81 million).
- Convertible bonds: this is a single bond convertible into 32,053,322 General Motors Corp. common stock ("Exchangeable GM") at a conversion price of US$ 69.54 per share with coupon interest at 3.25% and maturing on January 9, 2007 for a face value of US$ 2,229 million, equivalent to € 1,765 million; the subscribers to the Exchangeable GM bond will have the right to ask for early redemption of the bond in cash at its face value with payment on July 9, 2004. The investors may exercise this right during the period which starts 30 business days prior to July 9, 2004 and ends 15 business days prior to July 9, 2004. With reference to the risk, implicit in the bond, of an increase in the General Motors share price above US$ 69.54, a Total Return Equity Swap agreement was put into place as described in Note 13.
- Other bonds refer to the following issues:
  - bonds issued by Fiat Finance & Trade Ltd. S.A. with coupon interest at 3.75% and maturing March 31, 2004 for an amount of € 1,000 million and an amount outstanding of € 936 million;
  - bonds issued by Fiat Finance & Trade Ltd. S.A. with coupon interest at 1.5% and maturing June 27, 2005 for an amount of Japanese yen 40 billion, equivalent to € 296 million;
  - bonds issued by Case New Holland Inc. ("CNH Inc.") with coupon interest at 9.25% and maturing August 1, 2011 for an amount of US$ 1,050 million, equivalent to € 831 million; the bond indenture contains a series of financial covenants that are common in the American high yield bond market;
  - bonds issued by Case LLC. and Case Credit Corp. for a total amount outstanding of US$ 624 million, equivalent to € 494 million.

The aforementioned principal bond issues are listed on the Italian stock exchange and the Luxembourg stock exchange. The offering circulars and prospectuses relating to the listings on the stock exchanges are available on the Group's website at www.fiatgroup.com under "Shareholders and Investors – Financial Publications".

The majority of the bonds issued by the Fiat Group contain commitments ("covenant") by the issuer and in some cases by Fiat, as the guarantor, that, in international practice, are common for bond issues of this type when the issuers are in the same industrial segment in which the Group operates, such as, in particular: (i) the so-called negative pledge clause which requires that the benefit of any real present or future guarantees given as collateral on the assets of the issuer and/or Fiat, on other bonds and other credit instruments should be extended to these bonds, to the same degree, (ii) the so-called pari passu clause, on the basis of which obligations cannot be undertaken which are senior to the bonds issued, (iii) the obligation of providing periodical disclosure, (iv) for some of the bond issues, the so-called cross-default clauses whereby the bonds become immediately due and payable when certain defaults arise in respect of other financial instruments issued by the Group and (v) other clauses generally present in issues of this type.

The bonds issued by Case New Holland Inc. ("CNH Inc.") with coupon interest at 9.25% and maturing on August 1, 2011 for an amount of US$ 1,050 million, equivalent to € 831 million, contain, moreover, financial covenants common to the high yield American bond market which place restrictions, among other things, on the possibility of the issuer and certain companies of the CNH group to secure new debt, pay dividends or buy-back treasury stock, realize certain investments, conclude transactions with associated companies, give collateral on its assets, conclude sale and leaseback transactions, sell certain fixed assets or merge with other companies and financial covenants which impose a maximum limit on further indebtedness by the CNH group companies which can not exceed a specific ratio of cash flows to dividend payments and financial expenses. Such covenants are subject to various exceptions and limitations and, in particular, some of these would no longer be binding should the bonds be assigned an investment grade rating by Standard & Poor's Rating Services and/or Moody's Investors Service.

Fiat Group's major bond issues outstanding at December 31, 2003 are the following:

(a) Bonds listed on the Mercato Obbligazionario Telematico of the Italian stock exchange (EuroMot). Furthermore, the majority of the bonds issued by the Fiat Group are also listed on the Luxembourg stock exchange.

(b) "Fiat Step-Up Amortizing 2001-2011" bonds repayable at face value in five equal annual installments each for 20% of the total issued" (€ 617 million) due beginning from the sixth year (November 7, 2007) by reducing the face value of each bond outstanding by one-fifth. The last installment will be repaid on November 7, 2011. The bonds pay coupon interest equal to: 4.40% in the first year (Nov. 7, 2002), 4.60% in the second year (Nov. 7, 2003), 4.80% in the third year (Nov. 7, 2004), 5.00% in the fourth year (Nov. 7, 2005), 5.20% in the fifth year (Nov. 7, 2006), 5.40% in the sixth year (Nov. 7, 2007), 5.90% in the seventh year (Nov. 7, 2008), 6.40% in the eighth year (Nov. 7, 2009), 6.90% in the ninth year (Nov. 7, 2010), 7.40% in the tenth year (Nov. 7, 2011).

(c) Bonds with amounts outstanding equal to or less than the equivalent of € 50 million.

(d) Bonds convertible into General Motors Corp. common stock.

The Fiat Group intends to repay the issued bonds in cash at maturity by utilizing available liquid resources. To this end, available liquidity at the end of 2003 totals € 7 billion. The Fiat Group also has available unused committed credit lines for more than € 2 billion.

Moreover, the companies in the Fiat Group may from time to time buy back bonds on the market that were issued by the Fiat Group also for purposes of their cancellation. Such buy-backs, if made, will depend upon market conditions, the financial situation of the Group and other factors which could affect such decisions.

Medium and long-term financial payables of the Fiat Group also include the € 3 billion Mandatory Convertible facility stipulated in execution of the Framework Agreement, dated May 27, 2002, with Capitalia, BancaIntesa, SANPAOLO IMI and Unicredito Italiano (Money Lending Banks) for the purpose of providing the Fiat Group with the financial support it needs to implement its strategic and industrial plans. The facility was secured on September 24, 2002 from a syndicate of banks, including the Money Lending Banks, in which BNL, Monte dei Paschi di Siena, ABN Amro, BNP Paribas, Banco di Sicilia and Banca Toscana (hereinafter "the Banks") also participated. The main features of the Mandatory Convertible facility are listed in the following paragraphs.

The facility has a term of three years and expires on September 16, 2005 and is repayable with a new issue of Fiat S.p.A. ordinary shares. Moreover, Fiat may elect to repay the facility in cash at an earlier date, even partially, every six months, provided that, even after repayment, its rating is at least equal to investment grade level. Any residual liability for principal will be repaid with Fiat S.p.A. ordinary shares, which the Banks have agreed to underwrite and offer pre-emptively to all Fiat stockholders. The issue price per share will be the average of € 14.4409 (the adjusted value compared to the original value of € 15.50 in accordance with the rules established by the AIAF – Italian Association of Financial Analysts – following the Fiat S.p.A. capital increase) and the average stock market price in the last three or six months, depending on the case, preceding the repayment date. The same formula will also be applied in the event of an earlier repayment date.
The capital stock increase should be approved at the expiration of the three-year term of the facility, for an amount equal to the outstanding balance of the facility.

Conditions giving rise to an earlier expiration date of the facility include the occurrence of an event that creates a serious crisis for the company, such as the request for a court-appointed administrator or other proceedings of composition with creditors, a bankruptcy filing, or one of the causes of business dissolution set forth in the previous Article 2448 now Article 2484 of the Italian Civil Code. In addition, the Banks in the facility arrangement have the right to demand early repayment of the entire amount of the facility and proceed with the conversion of the debt into capital in the following cases:

- Fiat Group companies have not fulfilled their duty to repay liquid and current financial obligations of an aggregate amount of more than € 1 billion;
- the independent auditors have issued a negative opinion on the consolidated financial statements, unless new auditors, who must have accepted the assignment within 30 days, issue a favorable opinion no later than 60 days thereafter;
- Fiat becomes the target of a take-over bid in accordance with Articles 106 and 107 of the Consolidated Law on Financial Intermediation by third parties.

Lastly, the Banks also have the right but not the obligation to demand early repayment of a portion of the amount of the facility, up to a maximum of € 2 billion, after 24 months have elapsed from the signing of the agreement (and, therefore, beginning from July 26, 2004), in the event that the Group's debt is not rated "investment grade" by at least one of the leading international rating agencies and, after 18 months have elapsed from the signing of the agreement (January 26, 2004), in the event that the level of net and/or gross financial indebtedness (respectively in the definitions of "Net financial position" and "Total financial liabilities" used by the Group and detailed in the Report on Operations) is more than 20% higher than the corresponding level established by the Financial Objectives stipulated in the facility agreement.

The aforementioned financial objectives refer, in particular, to the reduction of net indebtedness in the Net Financial Position to less than € 3 billion by the date the Board of Directors of Fiat approves the 2002 annual financial statements and the maintenance of that level until the expiration of the facility. Pursuant to the agreement, the proceeds are considered which are generated by the transactions related to the sale of the investment in Italenergia Bis S.p.A., including those connected with the Citigroup facility of € 1,150 million, described previously, and the financial effects arising from binding contracts for the sale of assets (investments, companies, plant and equipment, etc.), comprising those not yet executed. The agreement also states that gross indebtedness must be reduced by € 12 billion, compared to March 31, 2002, by the date the Board of Directors approves the 2002 annual financial statements and must be maintained at less than € 23.6 billion until the expiration of the facility.

The Fiat Group confirms its observance of the financial objectives established with the Money Lending Banks in the Mandatory Convertible facility agreement in terms of reducing the net indebtedness position to € 3 billion, and reducing gross indebtedness to € 23.6 billion.

At December 31, 2003, the ratings assigned to the Fiat Group by the major rating agencies are the following:

	Short-term	**Medium-term**
Moody's Investors Service (a)	Not Prime	Ba3
Standard & Poor's Rating Services (a)	B	BB-
Fitch Ratings	B	BB

(a) For purposes of the Mandatory Convertible facility, the most important rating agencies are Standard & Poor's and Moody's.

The ratings of the Fiat Group represented in the table refer to the non-investment grade category.

Should this condition persist, beginning from July 26, 2004, the Banks will have the right but not the obligation to demand early repayment of the facility and proceed with the conversion of the debt into capital for an amount of up to € 2 billion.

Worms & Cie issued treasury bills for approximately € 1.2 billion which carry an A-2 rating from Standard & Poor's. The bills allow the Group to finance itself on the market with 1 to 3-month issues at competitive rates.

The risk of liquidity connected with this type of financing is covered by 1 to 5-year committed credit lines from leading banking institutions for more than 100% of the issued amounts.

Financial payables of the NHT Group include short-term credit lines for € 108 million at annual average interest rates ranging between 3.04% and 5%, medium and long-term loans for a total of € 62 million received from highly rated credit institutions at floating rates based on the Euribor and Libor and bank overdrafts for € 11 million at market rates.

Financial payables also include loans received from the financial companies Andrei S.a.r.l. and Teckneme S.r.l. for a total of € 29 million (of which € 12 million is due on September 30, 2004, € 4 million in October 2005 and € 13 million in September 2006, at floating rates based on the Euribor).

IFIL S.p.A. financial payables include:

- bonds 2002/2005, issued for € 200 million (of which € 55 million issued in February 2003), subscribed to by primary institutional investors, bear interest at floating rates payable quarterly and are indexed against the Euribor. The bonds are repayable by a one-time payment at maturity on December 20, 2005. For purposes of fixing the interest rate on part of the bonds, interest rate swaps and zero cost collars for € 145 million were put into place;
- bonds 2003/2006 issued for € 100 million following the resolution passed by the Board of Directors' Meeting on December 2, 2003, subscribed to by primary institutional investors; the bonds bear interest at floating rates payable quarterly and are indexed against the Euribor. The bonds are repayable by a one-time payment at maturity on December 19, 2006;
- loans due at the end of October 2005 for € 150 million. Interest rate swaps guarantee a fixed rate for the entire period of the loans. These loans are classified as payables due beyond one year on account of the residual loan period and the period of the hedging contracts. Such payables are not due beyond five years;
- other short-term payables for € 217 million. The company has irrevocable lines of credit available against these borrowings totaling € 710 million, of which € 410 million is due beyond one year.

IFI S.p.A. financial payables include:

- Borrowings from banks due within one year amounted to € 66 million (€ 212 million at December 31, 2002). Against these borrowings, the company has irrevocable lines of credit available totaling € 515 million, all due beyond one year.
- Borrowings from banks due beyond one year of € 213 million relate to loans bearing interest at floating rates payable semiannually and are indexed against the Euribor plus a spread commensurate with the best market conditions.
- Interest rate swaps and zero cost collars are used to ensure fixed interest rates over the period of the loans on an amount of € 170 million at December 31, 2003.
- Loans are classified as due beyond one year on the basis of the residual period of the loan and the period of the hedging contracts.
- The loan granted by the parent company Giovanni Agnelli e C S.a.p.az. bearing interest at a monthly floating market rate totals € 15 million (€ 39 million at December 31, 2002).

12) Accrued expenses and deferred income

Details are as follows:

€ in millions	**12/31/2003**	12/31/2002	Change
Commercial accrued expenses:			
- interest and commissions	**71**	54	17
- other	**528**	552	(24)
Totale commercial accrued expenses	**599**	606	(7)
Commercial deferred income:			
- interest	**64**	76	(12)
- other	**711**	873	(162)
Total commercial deferred income	**775**	949	(174)
Total commercial accrued expenses and deferred income	**1,374**	1,555	(181)
Financial accrued expenses	**598**	794	(196)
Financial deferred income	**364**	1,137	(773)
Total accrued expenses and deferred income	**2,336**	3,486	(1,150)

Financial accrued expenses include interest expense on financial payables for the portion relating to the current year.

Financial deferred income includes deferred interest income on the portfolio of the financial services companies. The change from December 31, 2002 is principally due to the change in the scope of consolidation for € 751 million.

13) Guarantees granted, commitments and other memorandum accounts

Guarantees granted

€ in millions	**12/31/2003**	12/31/2002	Change
Fiat Group	**6,430**	5,642	788
Worms & Cie Group	**86**	203	(117)
NHT Group	**73**	72	1
IFI S.p.A.	**32**	98	(66)
Total guarantees granted	**6,621**	6,015	606

Fiat Group

Guarantees granted are detailed as follows:

- suretyships total € 3,060 million (€ 1,638 million at December 31, 2002). The increase of € 1,422 million refers to guarantees that are still being provided to third parties which had previously been granted for the debt of companies in the Fiat Group that are now controlled by Fidis Retail Italia, which was deconsolidated;
- Other unsecured guarantees of € 3,075 million (€ 3,373 million at December 31, 2002) include commitments for receivables and bills discounted with recourse in the amount of € 2,203 million (€ 2,518 million at December 31, 2002). The receivables and bills discounted with recourse refer to trade receivables and other receivables for € 2,144 million (€ 2,505 million at December 31, 2002) and financial receivables for € 59 million (€ 13 million at December 31, 2002). The volume of receivables discounted with recourse in 2003 was € 15,341 million (€ 20,743 million in 2002);
- Other secured guarantees for € 35 million.

Although not included in the memorandum accounts, receivables and bills discounted by the Group without recourse having due dates beyond December 31, 2003 amount to € 9,852 million (€ 13,794 million in 2002 with due dates beyond December 31, 2002). Receivables and bills discounted without recourse refer to trade receivables and other receivables for € 4,638 million (€ 4,537 million at December 31, 2002) and financial receivables for € 5,214 million (€ 9,257 million at December 31, 2002). The discounting of financial receivables principally refers to securitization transactions involving accounts receivables from the final (retail) customers of the financial services companies. The accounting treatment for securitization transactions is disclosed in the Accounting Principles. The volume of receivables and bills discounted without recourse in 2003 was € 33,298 million (€ 30,502 million in 2002).

In summary, the discounted receivables and bills at December 31, 2003 are as follows:

	12/31/2003			12/31/2002		
€ in millions	**Trade receivables and other receivables**	**Financial receivables**	**Total**	Trade receivables and other receivables	Financial receivables	Total
With recourse	**2,144**	**59**	**2,203**	2,505	13	2,518
Without recourse	**4,638**	**5,214**	**9,852**	4,537	9,257	13,794

The reduction from 2002 is due to the change in the scope of consolidation.

Worms & Cie Group

Guarantees granted by the Worms & Cie Group amount to € 86 million (€ 203 million at December 31, 2002) and mainly include sureties issued to third parties.

NHT Group

Guarantees granted by the NHT Group amount to € 73 million (€ 72 million at December 31, 2002). These include guarantees provided in favor of Gecas Ltd (€ 33 million) for lease obligations by Neos relating to three B737–800 aircraft with a residual value of around US$ 28.6 million.

For purposes of information, the total value of the three aircraft is equal to approximately US$ 138 million.

NHT Group also issued sureties on behalf of tourist bodies, financial offices and public entities for € 34 million and mortgages are carried on the buildings of the Group to secure loans recorded in the financial statements for € 6 million.

IFI S.p.A.

At December 31, 2003, guarantees granted amount to € 32 million (€ 98 million at December 31, 2002) and refer to suretyships granted in the past by IFI in favor of Federazione Italiana Giuoco Calcio – Lega Nazionale Professionisti (F.I.G.C. - L.N.P.) on behalf of Juventus Football Club.

The reduction of € 66 million from December 31, 2002 is due to sureties that expired (€ 44 million) or were reduced (€ 22 million) during the year.

The sureties, remunerated at market rates, have varying annual expiry dates between 2004 and 2005.

Commitments

Commitments total € 33,527 million (€ 50,641 million at December 31, 2002) and include commitments related to derivative financial instruments of € 22,507 million (€ 39,926 million at December 31, 2002), other commitments of € 10,690 million (€ 10,216 million at December 31, 2002) and commitments to purchase property, plant and equipment for € 330 million (€ 499 million at December 31, 2002).

Commitments related to derivative financial instruments

€ in millions	Fiat Group	Worms & Cie Group	NHT Group	IFI and IFIL	Total

Contracts to hedge interest rate exposure	14,142	550		465	15,157
Contracts for combined hedging of foreign exchange and interest rate risks	848	669			1,517
Equity swaps relating to the General Motors transaction	978				978
Total 2003	**20,798**	**1,219**	**25**	**465**	**22,507**
Total 2002	38,535	650	81	660	39,926

Fiat Group

The decrease in the nominal amounts of the above derivative financial contracts compared to December 31, 2002 is largely due to extraordinary transactions during the period which led to the deconsolidation of outstanding positions and the early closing of certain loans and the relative hedges.

The Fiat Group maintains that such values, reflecting the notional principal amounts of the contracts, are not subject to risks that may derive from the non-fulfillment by the counterparties insofar as the contracts are entered into with several primary national and international financial institutions. Approximately 48% of the contracts outstanding at December 31, 2003 will expire during 2004 and the remainder in the period 2005-2022, of which 13% will expire after 2008. The consolidated statement of operations includes the effects both of the contracts that expired in 2003 and the provisions for the contracts expiring after December 31, 2003, as stated in the Accounting Policies.

The Group's financial policy attaches particular importance to the management and control of financial risks in that they can significantly impact profits. The Fiat Group has adopted a series of guidelines regarding the management of exchange rate and interest rate exposure.

The policy allows derivative financial instruments to be used only for managing exchange and interest rate risks connected to balance sheet flows and assets and liabilities, and not for speculative purposes.

In 2003, foreign exchange risk management followed the aforementioned policy and maintained the character of selective risk management. The reduction in exchange exposure, substantially originating from the positive balance between exports and imports, was based on the expected trend in exchange rates and the need to hedge the exchange levels of reference without completely foregoing the benefits deriving from a favorable trend in the rates. Again this year, the management of exchange risks was based principally on a combination of currency options.

In 2003, the management of interest rate exposure also followed the aforementioned guidelines which state that derivative financial instruments should be used to reach a fixed exposure level and minimize financing costs, and to ensure a correct matching of financing and investments by the financial services companies.

The derivative financial instruments principally relate to foreign exchange forward contracts, currency swaps and currency options or, as regards interest rate risks, interest rate swaps, forward rate agreements and options on interest rates, as well as interest rate and currency swaps for the combined management of currency and interest rate risks.

A comparison of the carrying values and the fair values of derivative financial instruments by contract type is set forth below:

€ in millions	**12/31/2003** **Carrying value**	**Fair value**	**Difference**	12/31/2002 Carrying value	Fair value	Difference
Foreign exchange risk management instruments	**(3)**	**59**	**62**	75	118	43
Interest rate risk management instruments	**138**	**319**	**181**	107	343	236
Foreign exchange risk and interest rate risk management instruments	**174**	**176**	**2**	99	84	(15)
Equity swaps	**(1)**	**439**	**440**	-	23	23
Total	**308**	**993**	**685**	281	568	287

The fair value of these derivative financial instruments was estimated based on year-end market prices for instruments with similar characteristics and maturities.

The changes in the financial statement amounts for foreign exchange transactions and for combined foreign exchange and interest rate transactions can mainly be ascribed to a different mix of the outstanding transactions at the end of the year compared to the prior year, in addition to the trend of the euro/U.S. dollar exchange rate. The fair value of the equity swaps is the result of the positive trend in the General Motors share price.

The difference between the “Carrying value” and “Fair Value” is mainly due to the accounting principles adopted for the valuation of the financial instruments designated as hedges. As disclosed in the Accounting Policies, it is not possible to completely adopt IAS 39 under current Italian law since all derivative financial instruments would have to be recorded at fair value in the financial statements, including those designated as hedges. The latter, instead, have been valued symmetrically with the underlying hedged item. Therefore, where the hedged item has not been adjusted to fair value in the financial statements, the hedging financial instruments have also not been adjusted. Similarly, where the hedged item has not yet been recorded in the financial statements (hedging of future flows), the valuation of the hedging instrument at fair value is deferred.

At December 31, 2003, the integral adoption of IAS 39 would have had an effect on the balance sheet, on one hand, for the adjustment of derivative financial instruments to arrive at fair value with a positive effect of € 685 million (positive effect of € 287 million at December 31, 2002), and, on the other hand, for the adjustment of the hedged balance sheet items (mainly payables) with a net negative effect (due to the trend in interest rates) of € 262 million (€ 405 million at December 31, 2002) and, for the part relating to the hedging of future flows, a lower accumulated value of reserves in stockholders’ equity of € 22 million (€ 188 million at December 31, 2002), net of the amount set aside for deferred income taxes. The integral adoption of IAS 39 would have led to positive effects on the net result for the year of approximately € 272 million, net of tax charges

With particular regard to the previously mentioned equity swap agreements, the amount at December 31, 2003 of € 978 million includes, for € 916 million, the notional amount of the equity swaps stipulated at the same time as the sale of the General Motors shares and which was put into place to hedge the risk, implicit in the Exchangeable bonds described previously, of an increase in the General Motors share price above the conversion price (Note 11). It also comprises the equity swaps stipulated to hedge the risk of an increase in the Fiat share price above the exercise price of the stock options assigned to Mr Giuseppe Morchio as described in the following paragraphs.

With regard to the equity swaps on General Motors shares, in fact, the Exchangeable bonds issued at the start of 2002 are convertible into the same number of General Motors shares as once held by the Fiat Group (32,053,422 shares). The option exercise price implicit in the bonds coincides with the pre-sale unit carrying value, in U.S. dollars, of the General Motors shares in the consolidated financial statements of Fiat, prior to the sale made in 2002, of US$ 69.54 per share. Accordingly, at the time the bonds were issued the risk of an increase in the General Motors share price above US$ 69.54 per share was covered by the shares held by Fiat. At the time of the sale of the General Motors shares by Fiat in December 2002, in order to hedge the above-mentioned risk implicit in the Exchangeable bonds, Fiat contemporaneously stipulated with the bank acquiring the shares a “Total Return Equity Swap” derivative contract (hereinafter “Equity Swaps”) relating to the same number of

General Motors shares and having the following main characteristics.

- in line with the expiry of the Exchangeable bonds, at maturity, Fiat will settle with the counterparty bank the price variances between the initial General Motors share price (US$ 36.11 per share) and the final share price, cashing in on a positive share price performance or paying for a negative performance;
- throughout the duration of the bonds, Fiat will pay the counterparty variable interest applied on the notional value of the contract (equal to the sale price of US$ 1,157 million);
- any dividends distributed by General Motors on the sold shares will be repaid to Fiat by the counterparty;
- as a guarantee for the payment of the above-mentioned variance, if negative, Fiat deposited a remunerated amount in an account with the bank. Such collateral will be adjusted in relation to the relative exposure of the two parties and at December 31, 2003 amounts to € 183 million (€ 221 million at December 31, 2002);
- at the closing of the Equity Swaps, Fiat will not possess any rights to repurchase the sold shares;
- the Equity Swaps can be settled at an earlier date, in whole or in part, at any time.

In accordance with accounting principles, the aforementioned Equity Swaps, despite being entered into for hedging purposes, cannot be treated in hedge accounting and accordingly is defined as a trading derivative financial instrument. It follows that, in accordance with the principle of prudence, if during the period of the contract General Motors shares perform positively, the positive fair value of the instrument is not recorded in the statement of operations; if, instead, the performance is negative, the negative fair value of the instrument is recorded immediately as a cost within financial expenses. At December 31, 2003, the Equity Swaps have a positive fair value of € 439 million (€ 23 million at December 31, 2002) that has not been recorded in the financial statements.

As regards the Equity Swaps on Fiat shares, the Board of Directors resolved in 2003 to assign options to Mr Giuseppe Morchio, as the only variable component of his compensation for the post of CEO, for the purchase of 13,338,076 Fiat ordinary shares at a price of € 5.623 per share, which can be exercised from March 27, 2004 to March 27, 2010. The right to purchase a maximum amount of 20% of the total matures in each of the first five years. Two-thirds of the options that will mature from March 27, 2005 to 2008 can be exercised only upon reaching preestablished profit objectives during the period of reference. The risk of a significant increase in the Fiat share price above the exercise price of these options is covered, with reference to 3,338,076 shares, by treasury stock in portfolio, whereas with reference to the remaining 10,000,000 shares, the aforementioned "Total Return Equity Swap" agreement was put into place with a reference price of € 6.173 per share and expiring on August 31, 2004. In accordance with accounting principles, the aforementioned Equity Swaps, despite being entered into for hedging purposes, cannot be treated in hedge accounting and accordingly is defined as a trading derivative financial instrument. It follows that, in accordance with the principle of prudence, if during the period of the contract the Fiat shares perform positively, the positive fair value of the instrument is not recorded in the statement of operations; if instead, the performance is negative, the negative fair value of the instrument is recorded immediately as a cost within financial expenses. At December 31, 2003, the Equity Swaps have a negative fair value of € 1 million that has therefore been recorded in the financial statements.

Worms & Cie Group

Commitments regarding derivative financial instruments of the Worms & Cie Group mainly include agreements to hedge exchange and interest rate risks expiring between 2004 and 2006.

NHT Group

Commitments regarding derivative financial instruments of the NHT Group include contracts stipulated by Alpitour to hedge exchange rate risks on future purchases of services in U.S. dollars.

IFI and IFIL S.p.A.

Commitments by IFIL (€ 295 million) include interest rate swaps stipulated on loans of € 150 million maturing October 2005. The instruments guarantee the Company a fixed interest rate for the entire period of the loan contracts. For purposes of fixing the interest rate on part of IFIL bonds 2002-2005, interest rate swaps and zero cost collars for € 145 million were put into place.

Commitments by IFI (€ 170 million) refer to transactions hedging interest rate risk on bank debt maturing in 2005 and 2007 put into place with leading banking institutions.

The transactions in derivative financial instruments by IFI and IFIL are exclusively used to hedge the risk of interest rate fluctuations and thus are not valued separately.

Other commitments

€ in millions	**12/31/2003**	12/31/2002	Change
Fiat Group	**10,350**	9,884	466
Worms & Cie Group	**134**	94	40

IFI and IFIL Holdings System	**169**	207	(38)
Total other commitments	**10,690**	10,216	474

Fiat Group

Other commitments amounted to € 10,350 million at December 31, 2003 (€ 9,884 million at December 31, 2002) and include commitments for the execution of works in the amount of € 8,011 million (€ 7,718 million at December 31, 2002) under the contracts between Fiat S.p.A., as General Contractor, and Treno Alta Velocità T.A.V. S.p.A. for the design and construction of a high-speed railway lines between Bologna - Florence and Turin - Milan. The increase of € 293 million compared to December 31, 2002 relates to the agreements reached during 2003 regarding the Florence-Bologna section, concerning alterations to the network (€ 28 million), urgent improvement work (€ 26 million) and monetary adjustments (€ 46 million) and agreements relating to the Turin-Novara sub-line, concerning alterations (€ 129 million) and monetary adjustments (€ 64 million). Fiat S.p.A. in turn assigned the design and construction of these works to the CAV.E.T. and CAV.TO.MI consortiums. In order to guarantee the contractual advances and the proper execution of the works, Fiat S.p.A. granted bank suretyships to T.A.V. S.p.A. totaling € 1,566 million. Similarly, as called for by the contract, the CAV.E.T. and CAV.TO.MI consortiums granted bank suretyships to Fiat S.p.A. for € 617 million and € 889 million respectively. Consequently, the guarantees granted are substantially covered by the guarantees received.

Other commitments and important contractual rights

Relations with General Motors

Although they are not included in the memorandum accounts, the following comments are intended to summarize the options held by the Fiat Group deriving from the relationships with General Motors. On the basis of the Agreement ("Master Agreement") signed on March 13, 2000, by which 20% of the Automobile Sector was sold to General Motors, the Fiat Group had reserved itself a Put option at fair market value with General Motors on its remaining investment in Fiat Auto Holdings B.V. (80% in 2000, now 90% following the capital increase later described), exercisable during the period between January 24, 2004 and July 24, 2009. General Motors has claimed that the sale of certain financial activities by Fiat Auto and the recapitalization of Fiat Auto Holdings, put into place by Fiat, violate the Master Agreement and, as a result, the Put option. Fiat maintains that the two transactions are entirely legitimate and do not violate the Master Agreement nor other rights held by General Motors. Fiat considers the Put binding and exercisable according to the clauses of the Master Agreement. On October 26, 2003, Fiat and General Motors announced agreements regarding the strategic alliance in progress. A first agreement ("Amendment") pushes back the period in which the Put option can be exercised by one year. The new period in which the Put option can be exercised goes from January 24, 2005 to July 24, 2010. The second agreement ("Standstill Agreement") precludes the parties from bringing legal action regarding the Master Agreement until December 15, 2004, preserving their respective rights. As for the aforementioned recapitalization of Fiat Auto Holdings, the Stockholders' Meeting of this company held on April 23, 2003 resolved a recapitalization plan for € 5 billion offering its stockholders the possibility of paying for their share of the capital increase over a period of 18 months. Fiat, during the year, subscribed to the recapitalization for € 3 billion, whereas General Motors has not yet subscribed to its share of the capital increase and stated that at this time it does not plan to participate. Consequently, the current percentage ownership of Fiat in Fiat Auto Holdings rose to 90%. For purposes of completing the disclosure, it should be pointed out that the Master Agreement (Section 8.07) calls for certain residual options in favor of General Motors in the event of a change in the control of Fiat following the purchase of more than 50% of Fiat's voting rights by another party or several parties in concert among each other. In this very remote eventuality, General Motors would have the right to demand that Fiat exercise the Put option on Fiat's investment in Fiat Auto Holdings, if the change in control was hostile, or, even if it was not hostile, to sell its investment in Fiat Auto Holdings to Fiat at a price equal to fair market value or, up to July 24, 2004, at US$ 2.4 billion, if higher. Such eventuality is considered extremely unlikely partly in view of the onerous obligations that would be placed upon the acquirer of control on the basis of the laws on takeover bids.

Lastly, it should be pointed out that Fiat and General Motors have stated that discussions are underway to redefine the structure of the strategic alliance so that the parties might continue their industrial cooperation in constructive terms and settle unresolved issues. At the present time, it is not possible to determine what if any effects the discussions could have on the assets and liabilities reflected in the consolidated financial statements.

Ferrari and Maserati

A summary is presented below of the rights arising in 2002 from the purchase of 34% of the capital stock of Ferrari for € 775 million by Mediobanca S.p.A., within the framework of a consortium set up for the acquisition and placement of the Ferrari shares. Fiat realized a gain of € 671 million on this sale, net of selling expenses. The sales contract sets out the following principal elements:

- Mediobanca assumed the responsibility of sole Global Coordinator in charge of coordinating and leading the consortium;
- Mediobanca cannot sell its Ferrari shares to another group in the automobile industry as long as the Fiat Group maintains a 51% controlling interest in Ferrari. Barring certain specific assumptions, the Fiat Group can not reduce its investment in Ferrari below 51% until the end, depending on the case, of the third or fourth year subsequent to signing the contract;
- Fiat holds a call option that allows it to repurchase the Ferrari shares at any time before June 30, 2006 (the original date of June 30, 2005 was extended by one year during the course of 2003, by virtue of the payment of a premium of € 16 million), except during the five months subsequent to the presentation of an IPO application to the competent authorities. The option exercise price is equal to the original price at which the shares were sold plus interest during the period based on the BOT yield plus 4%;
- Mediobanca, moreover, does not hold any put option to resell the purchased Ferrari shares to Fiat, even in the event that the IPO does not occur or is not completed;
- Fiat may share, in declining percentages, in any gain realized by Mediobanca and the other members of the consortium in the event of an IPO.

Ixfin

At the end of 2003 the Fiat Group signed an agreement with the Ixfin group which had previously purchased Magneti Marelli Sistemi Elettronici from the Mekfin group, to which Fiat had sold that business in 2002. Ixfin Magneti Marelli Sistemi Elettronici is considered as a strategic supplier of both Fiat Auto and other automotive groups that were formerly customers of Magneti Marelli. In order that Ixfin Magneti Marelli Sistemi Elettronici could regularly meet the commitments undertaken with its customers and pursue development strategies for its business, a decision was taken to sign the aforementioned agreement, in the context of which, besides obtaining a series of guarantees:

- Magneti Marelli Holding S.p.A. signed a contract for the beneficial interest in the shares of Ixfin Magneti Marelli Sistemi Elettronici, valid until December 31, 2004, by which it is entitled to the voting rights and all the other administrative rights;
- Fiat Netherland Holding (at one time a Magneti Marelli Sistemi Elettronici stockholder and therefore a creditor company for the balance of the sale price) acquired a Call option (transferable) from the Ixfin group that is exercisable at any time up to December 31, 2004 for the purchase of Ixfin Automotive, the direct parent company of Ixfin Magneti Marelli Sistemi Elettronici, or, alternatively, Ixfin Magneti Marelli Sistemi Elettronici itself. The purchase price of the opted shares is € 45 million; furthermore, in the event the Call option is exercised, Fiat Netherland Holding will assume the debt that the group of sellers has with Ixfin Magneti Marelli Sistemi Elettronici and with the other companies that would be acquired for a total of € 53 million. The price that would eventually be paid in total if the Call option is exercised would thus be equal to € 98 million.

The consolidated financial statements of the Fiat Group at December 31, 2003 show € 25 million in Other receivables for the amount paid in December as an advance on the possible exercise of the Call option. Moreover, other receivables due from the parent companies of Ixfin Magneti Marelli Sistemi Elettronici have been written down in the consolidated financial statements of the Fiat Group at December 31, 2003. Expenses were incurred for such writedowns in the amount of € 24 million.

Teksid

Teksid S.p.A. is the object of a Put and Call contract with the partner Norsk Hydro concerning the subsidiary Meridian Technologies Inc. (held 51% by the Teksid Group and 49% by the Norsk Hydro Group). In particular, should there be a strategic deadlock in the management of the company (namely in all those cases in which a unanimous vote in favor is not reached by the directors on the board as regards certain strategic decisions disciplined by the contract between the stockholders), the following rights would arise:

- Put Option of Norsk Hydro with Teksid on the 49% holding: the sale price would be commensurate with the initial investment made in 1998, revalued pro rata temporis, net of dividends paid.

- Call Option of Teksid with Norsk Hydro on the 49% holding (exercisable whenever Norsk Hydro renounces its right to exercise the Put Option described above): the sale price would be the highest value between the initial investment made by Norsk Hydro in 1998, calculated according to the criteria expressed previously, and 140% of the Fair Market Value (in this regard, an increase of 2% per year is established in the event the option is exercised from the start of 2008 until 2013, thus up to 150% of the relative value).

It should be pointed out that so far the conditions that would give rise to the strategic deadlock are considered to be quite remote.

Fiat S.p.A. is subject to a put contract with Renault (in reference to the original investment of 33.5% in Teksid, now 19.52%). In particular, Renault would acquire the right to exercise a sale option on the treasury stock to Fiat, in the following cases:

- in the event of nonfulfilment in the application of the protocol of the agreement and admission to receivership or any other redressment procedure;
- in the event Renault's investment in Teksid falls below 15% or Teksid decides to invest in a structural manner outside the foundry sector;
- should Fiat be the object of the acquisition of control by another car manufacturer.

The exercise price of the option is established as follows:

- for 6.5% of the share capital of Teksid, the initial investment price increased pro rata temporis;
- for the remaining amount of share capital of Teksid, the share of the accounting net equity.

End-of-life vehicles

In September 2000, the European Union issued Directive 2000/53/CE relative to end-of-life vehicles. This Directive, among other things, provides that, in the future, vehicle manufacturers will have to bear all, or a significant part of, the costs arising from the collection, treatment and recovery of end-of-life vehicles. The above Directive is currently being introduced into the national legislation of the individual member states and will be applicable for all vehicles placed on the market starting from July 2002; beginning January 2007 all vehicles on the market will be covered, even those placed before July 2002. The Directive was introduced in Italy in June 2003 and in the major markets (Germany, the Netherlands, Belgium, France, Spain, Slovenia, Portugal, Austria and Norway). Fiat Auto is pursuing a strategy aimed at zero service cost for the manufacturer by promoting networks for the disposal of the vehicles or taking part in networks set up by other competitors, which, in the majority of cases, is made possible by the creation of a process that is economically self-sustained by the recovery value of the spare parts. Consequently, no liabilities are recognized for the Group.

Worms & Cie Group

Commitments of the Worms & Cie Group principally refer to lease obligations for € 134 million.

NHT Group

These include sales commitments for travel bookings made by the tour operators of the Group for € 37 million.

On December 15, 2000, the Extraordinary Stockholders' Meeting of Alpitour S.p.A. voted to vest the Board of Directors with the power to increase capital stock by a maximum amount of € 767,500 to service a stock option plan on behalf of the directors, managers and cadres of Alpitour and the companies of the Group.

The regulations of the stock option plan, approved by resolution of the Board of Directors on December 15, 2000, state that the aforementioned capital increase of € 767,500 will occur by issue of a maximum 1,535,000 new ordinary shares of par value € 0.50 each. The options under the plan, which carries a period of 68 months, will accrue in annual lots expiring October 31, of each year and will be offered at a price equal to € 6.73 per share. The options granted can be exercised within six months of the approval of the financial statements ended October 31, 2005.

The shares purchased in execution of the above plan can be sold to Alpitour at a price, established by the Board of Directors, calculated on the basis of the economic performance of the company.

The first tranche of options granted during 2002/2003, referring to the financial statements for the year ended October 31, 2002, was not exercised by the beneficiaries of the stock option plans.

IFI and IFIL Holdings System

These refer to the commitments by Ifil Investissements with Mediobanca for the purchase of 9.53% of the capital stock of Eurofind, carried out in January 2004 with an investment of € 116 million and with TUI for the purchase of 10% of capital stock of NHT New Holding for Tourism, carried out in January 2004 with an investment of € 46 million.

Ifil Investissements, which already holds 14.3% of the capital stock of Euromedia Luxembourg One, has a commitment to purchase additional shares for a total equivalent amount of US$ 3.75 million, corresponding to approx. € 3 million.

IFI S.p.A., as part of the stock option plans for the managers of the IFI Group, has commitments to sell 47,500 IFIL ordinary shares (€ 0.4 million).

Other commitments of IFI S.p.A. include the residual commitment for the subscription of Emittenti Titoli's capital stock increase (€ 0.1 million) and the remaining payments (€ 3 million) under the commitment with Tlcom Capital Partners.

Pending litigation

IFIL S.p.A.

By notification on May 8, 2003, inferring illegal acts due to a conflict of interest and the unlawful valuation of the contributions in kind, the stockholder K Capital contested the resolution to increase IFIL's capital stock reserved for Istituto Finanziario Industriale S.p.A. passed by the Extraordinary Stockholders' Meeting of IFIL held on April 23, 2003 and sought compensation from IFIL for (alleged) damages (not quantified) suffered as a result of the unlawful conduct (allegedly) by IFI.

At the next hearing, scheduled for April 7, 2004, the judge will rule on the preliminary inquiries that might be presented by the litigants.

Both of the above complaints (request to declare the stockholders' resolution null and void and to seek an unspecified sum of compensation for damages) appear to be inadmissible and groundless and therefore at this time the Company does not believe that any contingent liabilities or losses will arise as a consequence.

Earlier, the appeal filed under ex article 2378, paragraph 4, of the Italian Civil Code by which the stockholder K Capital had sought the suspension of the execution of the resolution was denied by the Turin Court, by decree filed on June 9, 2003.

Fiat Group

Fiat S.p.A. and certain of its subsidiaries are involved in various legal actions and disputes. However, the settlement of such actions and disputes should not give rise to significant losses or liabilities which have not already been set aside in specific risk reserves.

Worms & Cie Group

Fox River

The United States Fish and Wildlife department, in 1997, brought suit against Appleton Papers Inc., NCR Corporation and five other paper manufacturers for the alleged contamination of the Fox River.

This event took place during the 1970s when the company was owned by the NCR Corporation. At the time of the acquisition of Appleton Papers Inc. by Arjo Wiggins Appleton, in 1978, an agreement was signed with NCR Corporation for purposes of sharing the costs of the indemnities that could be charged to Appleton Papers Inc.

Since 1997, studies are being conducted to establish the feasibility of decontaminating the Fox River and to determine the share of responsibility. During the first half of 2001, Appleton Papers Inc. and NCR Corporation reached an agreement with the pertinent American authorities concerning the contamination of the Fox River. This agreement consists of the commitment to pay a sum of US$ 40 million over four years to finance the research project for its decontamination. This payment will be charged against the indemnities that are due.

In 2003, the "Department of Natural Resources" of Wisconsin (the state in which the pollution occurred) and the federal government published a long-term action plan for the complete reclamation of the river at an estimated total cost of US$ 400 million to be borne by the industries.

In July 2003, a ruling by a Supreme Court of Justice of the State of Wisconsin gave the industries which had signed insurance contracts covering environmental risks prior to 1986 the possibility of claiming the guarantees provided in these same contracts.

Appleton Papers Inc., which had signed such a contract, has an interest in that decision because it would require some of the insurance companies to assume a portion of the costs to decontaminate the Fox River. Reviews are currently underway to establish the portions of the costs that will be taken up by the insurance companies.

In view of the way the dispute was evolving, the Worms & Cie Group, based on an evaluation by experts, had set aside a sum of US$ 125 million in 2001. Such provision had been calculated on the basis of the best estimate for decontamination expenses to be borne by the Group.

The events described above have not caused any significant change in the evaluation of the risk. Accordingly, at December 31, 2003, the reserve is equal to US$ 104 million, net of research costs paid.

European Commission

The inquiry by the Commission ended with notification of a fine in July 2000, on which Arjo Wiggins Appleton submitted its comments on the subject. On December 20, 2001, the Commission levied a fine of € 184 million on Arjo Wiggins Appleton which, in keeping with the principle of prudence, the company entirely accrued in the 2001 financial statements.

During the first half of 2002, the Company decided to oppose this ruling, which it maintains is out of proportion to the facts of the case. Since the appeal does not suspend the obligation to pay the fine, the Company, in compliance with existing regulations, has decided to fulfill this obligation partly through a deposit of € 92 million and partly by providing a bank guarantee of the same amount.

The proceedings before the Court of the European Community in the first instance are still pending". Accordingly, at December 31, 2003, the provision has been calculated on the basis of the maximum potential risk.

Juventus Football Club

On October 27, 2003, F.I.F.A., following proceedings initiated by Juventus Football Club S.p.A. in September 2003, ordered the Fulham Football Club Ltd. to pay, within 30 days of notification, the balance of the sum of € 3.3 million (secured by a guarantee issued by an individual) due since August on the purchase of the player Edwin Van der Sar. The English Club filed an appeal and the F.I.F.A. appeal body ruled in favor of Juventus Football Club S.p.A. on February 29, 2004. Fulham Football Club Ltd opposed the decision and appealed to the Court of Arbitration for Sport of Lausanne. Since first and second rulings were handed down in its favor and in view of the fact that Juventus Football Club S.p.A. is in any case backed by the aforementioned guarantee issued by an individual, the receivable is considered collectible and has not been written down.

As regards the investigation by the judiciary against the Chief Executive Officer and company physician concerning the alleged improper use of medicines by Juventus Football Club S.p.A. players, a number of investigative hearings were held in the period July - December 2003 and these will continue in the coming months.

In the framework of judicial investigations begun by the Procura della Repubblica of Rome into the football sector, on February 26, 2004, the Guardia di Finanza confiscated documents at the offices of F.I.G.C. – Federazione Italiana Giuoco Calcio, LNP – Lega Nazionale Professionisti and all clubs registered in the Serie A and Serie B Championships in the seasons from 1999/2000 to 2003/2004 regarding matters that could be considered useful for the enquiries underway on how accounts were drafted and how clubs registered for the championships in the same years.

Group assets held by third parties

Group assets held by third parties, basically in reference to the Fiat Group, amount to € 4,706 million (€ 20,846 million at December 31, 2002)), a decrease of € 16,140 million compared to December 31, 2002.

Fiat Group assets held by third parties include securities deposited with banks and other financial institutions totaling € 1,042 million (€ 17,558 million at December 31, 2002). Such securities in 2002 were primarily held by the Toro Assicurazioni Group.

This item also includes tangible fixed assets, products and goods of some Automotive Sectors held by outside suppliers for processing totaling € 3,454 million (€ 3,199 million at December 31, 2002).

IFIL S.p.A. assets held by third parties include the value of 10,400,000 SANPAOLO IMI shares equal to € 113.6 million under a stock-lending contract signed by IFIL. The transaction made it possible to improve the return on the investment.

IFI S.p.A. assets held by third parties (€ 34 million) include the value of 3,418,242 Exor Group ordinary shares and 3,010 Deutsche Morgan Grenfell shares deposited with banks.

NOTES TO THE CONSOLIDATED STATEMENT OF OPERATIONS

14) Value of production – Revenues from sales and services and change in contract work in progress

In 2003, revenues from sales and services and change in contract work in progress amount to € 52,434 million, compared to € 61,015 million in 2002, a decrease of 14%. They include revenues from sales and services of € 53,509 million (€ 60,793 million in 2002) and the negative change in contract work in progress of € 1,075 million (positive change of € 222 million in 2002).

The distribution of revenues from sales and services and the change in contract work in progress by business sector (net or intragroup transactions) is as follows:

€ in millions	**2003**	2002	Change amount	Change %
Net revenues by operating sector				
Fiat Group

Total other income and revenues	**1,737**	2,190	(453)

Fiat Group

Capital gains from the sale of fixed assets of € 187 million mainly relate to disposals of Fiat Group non-strategic activities as a consequence of the policy to reduce invested capital. The gains realized on the sale of non-strategic buildings total € 157 million (€ 159 million in 2002).

15) Costs of production

€ in millions	**2003**	2002	Change
Fiat Group	**50,858**	58,854	(7,996)
Worms & Cie Group	**4,125**	4,292	(167)
NHT Group	**937**	932	5
IFI and IFIL Holdings System	**28**	45	(17)
Total costs of production	**55,948**	64,123	(8,175)

As regards the Fiat Group:

- the costs of production show a decrease of 13.6% compared to 2002. On a comparable consolidation basis, the decrease would be 5.3%;
- raw materials, supplies and merchandise amount to € 28,392 million in 2003 and, as a percentage of revenues, on a comparable consolidation basis, would be 63% (62.5% in 2002);
- services amount to € 8,505 million in 2003, with a decrease of 14% compared to 2002 and, as a percentage of revenues, represent 18%, compared to 17.8% in 2002. On a comparable consolidation basis, services as a percentage of revenues would be 18.4% (18.7% in 2002). Services include advertising costs, external information technology and telecommunication service costs, external maintenance costs and transportation costs.

Personnel

Personnel costs consist of the following:

€ in millions	**2003**	2002	Change
Salaries and wages	**5,341**	6,039	(698)
Social security contributions	**1,409**	1,520	(111)
Employee severance indemnities	**248**	259	(11)
Employee pensions and similar obligations	**188**	105	83
Other costs	**340**	398	(58)
Total personnel costs	**7,526**	8,321	(795)

Details of personnel costs, by Group, are as follows:

€ in millions	2003	2002	Change
Fiat Group			
Salaries and wages	**4,707**	5,457	(750)
Social security contributions	**1,249**	1,365	(116)
Employee severance indemnities	**244**	256	(12)
Employee pensions and similar obligations	**185**	100	85
Other costs	**303**	376	(73)
Total Fiat Group	**6,688**	7,554	(866)

NHT Group			
Salaries and wages	**50**	46	4
Social security contributions	**13**	12	1
Employee severance indemnities	**3**	3	0
Other costs	**1**	1	0
Total NHT Group	**67**	62	5
IFI and IFIL Holdings System			
Salaries and wages	**7**	7	0
Social security contributions	**1**	2	(1)
Employee severance indemnities	**2**	1	1
Other costs	**0**	1	(1)
Total IFI and IFIL Holdings System	**10**	11	(1)
Total personnel costs	**7,526**	8,321	(795)

Personnel costs of the Fiat Group amount to € 6,688 million in 2003, a decrease of 11.5% compared to 2002, mostly due to the effects of the change in the scope of consolidation. On a comparable consolidation basis, the decrease would be 5%. Personnel costs are equal to 14.1% of revenues (13.6% in 2002). Personnel costs as a percentage of revenues, on a comparable consolidation basis, would be 14.5% (14.3% in 2002).

An analysis of the average number of employees by category is provided as follows:

	2003	2002
- Managers and white-collar	**72,106**	79,654 (a)
- Blue-collar	**120,444**	129,487 (b)
Total	**192,550**	209,141

(a) Including 116 persons in companies consolidated proportionally by the Fiat Group in 2002.
(b) Including 320 persons in companies consolidated proportionally by the Fiat Group in 2002.

An analysis of the average number of employees, by Group, is provided as follows:

	2003	2002
Fiat Group	**174,242**	190,405
Worms & Cie Group	**14,961**	15,711
NHT Group	**3,268**	2,930
IFI and IFIL Holdings System	**79**	95
Total	**192,550**	209,141

Fiat Group

The average number of employees in 2003 is equal to 174,242, a decrease of 16,163 employees compared to 2002. That reduction is partly due to employees who left the Group, also in connection with employee reduction plans, and partly to the change in the scope of consolidation mainly as a result of the sale of FiatAvio S.p.A., the Toro Assicurazioni Group, the Fraikin activities and the retail financing activities of the Automobile Sector.

Provisions for risks

Provisions for risks of € 1,164 million (€ 1,138 million in 2002) mainly refer to the Fiat Group and relate to adjustments made to the vehicle warranty reserve for € 490 million in 2003 and € 435 million in 2002, mainly in the Automotive Sectors, and to other reserves connected with industrial risks for € 673 million (€ 703 million in 2002).

Other operating costs

An analysis of other operating costs, by Group, is as follows:

€ in millions	**2003**	2002	Change
Fiat Group			
Losses on sale of fixed assets	**47**	86	(39)
Prior period expenses	**226**	297	(71)
Indirect and other taxes	**147**	229	(82)
Sundry expenses	**608**	692	(84)
Total Fiat Group	**1,028**	1,304	(276)
Worms & Cie Group			
Indirect and other taxes	**40**	43	(3)
Sundry expenses	**38**	49	(11)
Total Worms & Cie Group	**78**	92	(14)

Prior period expenses	**1**	1	0
Indirect and other taxes	**3**	3	0
Sundry expenses	**0**	1	(1)
Total NHT Group	**4**	5	(1)
IFI and IFIL Holdings System			
Indirect and other taxes	**3**	3	0
Sundry expenses	**1**	0	1
Total IFI and IFIL Holdings System	**4**	3	1
Total other operating costs	**1,114**	1,404	(290)

Insurance claims and other insurance costs

Insurance claims and other insurance costs amount to € 1,367 million (€ 4,045 million in 2002) and refer to insurance companies in the Fiat Group. The decrease from 2002 is due to the sale of the Toro Assicurazioni Group.

16) Financial income and expenses

Investment income

Details of investment income, by Group, are as follows:

€ in millions	2003	2002	Change
Fiat Group			
Dividends	**12**	103	(91)
Tax credit on dividends	**5**	22	(17)
Gains on sale of investments held in current assets	**5**	31	(26)
Total Fiat Group	**22**	156	(134)
Worms & Cie Group			
Dividends	**5**	8	(3)
Total Worms & Cie Group	**5**	8	(3)
IFI and IFIL Holdings System			
SANPAOLO IMI Dividends	**21**	40	(19)
Tax credit on dividends	**12**	14	(2)
Total IFI and IFIL Holdings System	**33**	54	(21)
Total investment income	**60**	218	(158)

In 2002, dividends received by the Fiat Group included dividends received on General Motors shares (€ 68 million).

The Gains on sale of investments held in current assets by the Fiat Group decreased mainly on account of the change in the scope of consolidation due to the sale of the Toro Assicurazioni Group.

Tax credits are shown net of those relating to dividends from companies consolidated line-by-line or accounted for using the equity method, which are reclassified as a reduction of current income taxes.

Other financial income

Details are as follows:

of which:			
Interest and other financial expenses, excluding financial services companies	**2,489**	3,046	(557)

Other financial income of € 2,856 million in 2003 (€ 4,369 million in 2002) when shown net of Interest and other financial expenses of € 3,157 million (€ 4,161 million in 2002) results in a net negative balance of € 301 million (a net positive balance of € 208 million in 2002). The decrease in the net balance of € 509 million derives almost entirely from the deconsolidation of the Toro Assicurazioni Group, FiatAvio S.p.A. and the retail activities of Fiat Auto and Fraikin.

Foreign exchange gains, net, of € 47 million (foreign exchange losses, net, of € 111 million in 2002) represent the balance between foreign exchange gains of € 2,519 million in 2003 (€ 2,446 million in 2002) and foreign exchange losses of € 2,472 million in 2003 (€ 2,557 million in 2002).

The Losses on sale of securities amounts to € 8 million and include losses of € 6 million in 2003 on the sale of investments not held as fixed assets.

Discounts and other expenses include receivables discounting and securitization expenses of € 280 million in 2003 (€ 261 million in 2002).

Total extraordinary expenses	**(1,670)**	(3,719)	2,049
Total extraordinary income and expenses	**347**	(2,484)	2,831

(a) Net of extraordinary expenses of € 19 million eliminated on consolidation (line-by-line) by IFI.

Gains on disposals of investments and other fixed assets amount to € 1,826 million and relate to the gains on the following: sale of the Toro Assicurazioni Group € 427 million (€ 390 million net of the expenses and provisions connected with the transaction, classified as other extraordinary expenses), sale of the Automobile Sector's Retail financing activities in Brazil € 103 million, sale of the 55.95% investment in IPI S.p.A. € 15 million, sale of the 50.1% investment in IN ACTION S.r.l. € 8 million, sale of Fiat Avio € 1,266 million (€ 1,258 million net of the expenses connected with the transaction) and other € 7 million.

Gains on disposals of investments and other fixed assets amounted to € 1,081 million in 2002. They included the gains on the following: sale of 34% di Ferrari S.p.A. € 714 million (€ 671 million net of the expenses associated with the transaction, classified as extraordinary expenses), sale of the After Market business of Magneti Marelli € 26 million, sale of 14% of Italenergia Bis S.p.A. € 189 million, sale of the investment in Europ Assistance Holding S.A. € 83 million, sale of 50% of Targasys S.r.l. a S.U. € 36 million, sale of the residual stock of Sinport Sinergie Portuali S.p.A. € 14 million and sales of other minor investments € 19 million.

Other extraordinary income of € 159 million (€ 146 million in 2002) refers to nonrecurring income of the individual companies of the Fiat Group mainly for the release of extraordinary reserves that proved in excess of requirements.

Losses on disposals of investments and other fixed assets amount to € 50 million in 2003 (€ 1,239 million in 2002). In 2002 the item included losses on the following: sale of General Motors shares € 1,049 million, sale of the Aluminum Business Unit of Teksid € 24 million (€ 100 million including the net provisions and expenses associated with the sale, classified as other extraordinary expenses), sale of the Electronic Systems Business Unit of Magneti Marelli € 150 million (of which € 36 million arose at the time of sale and € 114 million afterwards from post-sales price adjustments and later settlement agreements), sale of Viasat S.p.A. € 3 million and other investments € 13 million.

Other extraordinary expenses amounting to € 1,594 million in 2003 include principally expenses and provisions for risks in relation to corporate restructuring transactions of the Fiat Group of € 658 million, other extraordinary writedowns of assets on the basis of changes in market prospects and the consequent new business plans of € 215 million, provisions for the remaining commitments connected with the IPSE initiative of € 47 million, expenses and provisions recorded in reference to relations existing with the IXFIN Group of € 53 million, incidental costs and other provisions connected with the sale of the Toro Assicurazioni Group of € 37 million, incidental costs and other provisions connected with other sales which took place in 2003 and in prior years of € 102 million, damages caused by flooding at the Termoli factory of € 71 million and, lastly, commissions paid to Mediobanca for the extension of the commitments undertaken by Mediobanca itself under the "Ferrari" contract of € 16 million. Other extraordinary expenses also include prior years' expenses of the Fiat Group of € 40 million.

Other extraordinary expenses of € 2,420 million in 2002 included principally expenses and provisions for risks in relation to corporate restructuring transactions of € 1,026 million, other extraordinary writedowns of assets on the basis of changes in the market prospects and the consequent new business plans of € 216 million and on the basis of the estimated realizable value indicated in the subsequently signed agreement for the sale of the Fraikin business of € 210 million. They also included additional extraordinary expenses and provisions for future risks and charges totaling € 968 million, of which the most significant are: expenses and provisions recorded for permanent impairments in value on investments in the telecommunications sector (€ 95 million), those recorded in respect of the sales contract for the Aluminum Business Unit of Teksid (€ 76 million) and those related to the incidental charges associated with the sale of Ferrari S.p.A. (€ 43 million).

Other expenses under extraordinary expenses, by Sector, are as follows:

The gains relate to the sale of the 25% interest in Sifalberghi (€ 25 million), the portion of gains deferred in prior years by the subsidiary Toro Assicurazioni (€ 93 million) and the dilution generated by the disposal of Fiat treasury stock held by Toro Assicurazioni, sold by the same Fiat (€ 12 million).

19) Income taxes

Income taxes recorded in the consolidated statement of operations are as follows:

€ in millions	**2003**	2002	Change
Current taxes, net of tax credits	**206**	331	(125)
Deferred taxes	**500**	(746)	1,246
Total income taxes	**706**	(415)	1,121

Due to the loss before taxes for the year 2003, the comparison between the effective tax rate of the Group and the theoretical rate has no significance.

It should be noted that income taxes include the IRAP tax which has a different taxable base than income before taxes.

The reconciliation between the tax charge recorded in the consolidated financial statements and the theoretical tax charge, calculated on the basis of the theoretical tax rates in effect in Italy, is the following:

€ in millions	**2003**	2002
Theoretical income taxes	**(395)**	(1,852)
Utilization of tax loss carryforwards	**(57)**	(70)
Tax effect of permanent differences	**78**	(327)
Tax effect of difference between foreign tax rates and theoretical Italian tax rates	**(48)**	9
Deferred tax assets not provided	**955**	1,588
Other differences	**45**	93
Income taxes recorded in financial statements excluding IRAP (current and deferred income taxes)	**578**	(559)
IRAP	**128**	144
Income taxes recorded in financial statements (current and deferred income taxes)	**706**	(415)

In order to render the reconciliation between income taxes recorded in the financial statements and theoretical income taxes more meaningful, the IRAP tax is not taken into consideration. Since the IRAP tax has a taxable basis that is different from income before taxes, it generates distortions between one year and another. Accordingly, the theoretical income taxes were determined applying only the tax rate in effect in Italy (IRPEG equal to 34% in 2003) to the income before taxes.

In 2003, as a result of the loss reported by the Group, the effective tax rate is not significant.

(a) Intersegment net revenues include revenues between Group companies consolidated line-by-line and reporting to different Sectors. Intersegment sales are accounted for at transfer prices that are substantially in line with market conditions.

(b) The Aviation Sector's revenues are included up to July 1, 2003.

(c) The Insurance Sector's revenues are included up to May 2, 2003

(d) Operating losses of other companies amount to € 137 million in 2003 and € 105 million in 2002.

21) Other information

Research and development expenses

Fiat Group

Each year, significant expenditures are borne by the Group for research and development programs that generally cover a period of several years and which are charged to income in the year incurred.

In 2003, research and development costs expensed directly to income during the year totaled € 1,747 million (€ 1,748 million in 2002).

For the most important projects, the Fiat Group has applied for financing to the Italian government and the European Community under related legislation.

At the end of 2003, there were multiyear research and innovation projects that are being examined or for which incentives are being paid, by the above authorities, which show estimated expenditures in the relative applications amounting to approximately € 898 million (an amount which also comprises projects on which the balance of the incentives was received in the same year). The Group filed/received low-rate loans for € 142 million and grants for € 394 million in respect of these projects which could also give rise to receipts for incentives in future years. The amounts received during 2003, referring to the aforementioned expenditures, totaled € 27 million in low-rate loans and € 54 million in grants, for a cumulative total at December 31, 2003 of € 45 million in low-rate loans and € 132 million in grants.

The average interest rate on financing received for research and innovation at December 31, 2003 for the Fiat Group was 2.27% (2.49% for outstanding financing at December 31, 2002).

Worms & Cie Group

In 2003, research and development costs expensed directly to income during the year totaled € 16 million (€ 14 million in 2002).

Maintenance costs

Maintenance costs charged to income in 2003 and 2002 amounted to € 510 million and € 637 million respectively, Details, by Group, are as follows:

€ in millions	**2003**	2002	Change
Fiat Group	**435**	556	(121)
Worms & Cie Group	**71**	77	(6)
NHT Group	**4**	4	0
Total	**510**	637	(127)

Advertising costs

Advertising costs charged to income amounted to € 982 million and to € 1,170 million, respectively in 2003 and 2002, Details, by Group, are as follows:

€ in millions	**2003**	2002	Change
Fiat Group	**921**	1,106	(185)
Worms & Cie Group	**43**	44	(1)
NHT Group	**18**	20	(2)
Total	**982**	1,170	(188)

22) Emoluments to directors and statutory auditors

In accordance with art. 38 of Legislative Decree 127/91, the amount of emoluments to which the Directors and Statutory Auditors of IFI S.p.A. are entitled for carrying out these functions also in other companies included in the scope of consolidation are as follows:

€ in thousands	IFI S.p.A.	Subsidiaries	Total
Directors	977	4,258	5,235
Statutory auditors	146	147	293
Total	**1,123**	**4,405**	**5,528**

In 2002, the emoluments amounted to € 11,199 thousand, of which € 3,170 thousand were paid by IFI and € 8,029 thousand by subsidiaries.

23) Statement of cash flows for the year ended at December 31, 2003

NOTES TO THE STATUTORY FINANCIAL STATEMENTS

STRUCTURE AND CONTENT OF THE STATUTORY FINANCIAL STATEMENTS

The statutory financial statements for the year ended December 31, 2003 are expressed in euros and have been prepared in accordance with the provisions of the Italian Civil Code in force prior to the changes introduced by Legislative Decree No. 6 dated January 17, 2003 (reform of the law on corporations and cooperatives), as stated therein.

The balance sheet and statement of operations show the changes in the individual captions on the face of the statements. In the Notes, prepared in accordance with the provisions of art. 2427 of the Italian Civil Code, the comments are limited to the principal changes. Unless otherwise indicated, all amounts in the notes are expressed in thousands of euros. In the “Annexes”, which are an integral part of these notes, information is shown which is either required by current laws or presented as additional disclosure for purposes of clarity and completeness of the financial statements, including the information requested by Recommendation No. 94001437 dated February 23, 1994 issued by the National Commission for Corporations and the stock exchange (Consob).

As stated in point 5 of art. 2428 of the Italian Civil Code, subsequent events after the end of the year are commented in the Report on Operations.

SIGNIFICANT ACCOUNTING POLICIES

Pursuant to article 2423 bis of the Italian Civil Code, the financial statements have been prepared on the basis of the general principle of prudence, using the accrual basis of accounting and according to the going-concern concept. The accounting policies have been applied on a basis consistent with the prior year and such principles are in compliance with those laid down in article 2426 of the Italian Civil Code.

Furthermore, there were no departures from paragraph 4 of article 2423 of the Italian Civil Code in preparing these financial statements.

Property, plant and equipment

These are stated at cost of acquisition, including accessory charges, net of accumulated depreciation. Depreciation is calculated on a straight-line basis each year over the estimated useful lives of the assets.

In view of the nature of the property, plant and equipment, depreciation is calculated at the ordinary depreciation rates plus the rates for allowable accelerated depreciation. For property, plant and equipment purchased during the year, these rates are reduced by half. Purchases of assets of below € 516 are entirely depreciated in the year of purchase.

Financial fixed assets

Financial fixed assets are valued at cost of acquisition, including accessory charges, determined using the LIFO method.

The cost of acquisition of the investments in IFIL and in Exor Group has been revalued in previous years as allowed by monetary revaluation laws. If, at the balance sheet date, the investment value is determined to have suffered a permanent impairment in value to below the cost of acquisition as defined above, it is written down to the lower value.

Should the reasons for the writedowns no longer apply, the value of the financial fixed assets will be reinstated up to the limit of the cost of acquisition; for financial fixed assets prior to the enactment of Legislative Decree 127/91, this limit is represented by the amounts recorded in the financial statements at March 31, 1993.

Receivables

Receivables are stated at estimated realizable value and include, where applicable, accrued interest earned and collectible at the end of the year.

Accrued income and prepaid expenses

These are income and expenses, common to two or more years, calculated on the accrual principle with the matching of costs and revenues of the year.

Employee severance indemnities

Employee severance indemnities, revalued on the basis of indexes, and determined in accordance with labor legislation and contracts, reflects the liability in respect of all employees. This liability is calculated in reference to the years of service and the employee's annual salary, in accordance with art. 2120 of the Italian Civil Code.

The reserve also includes the liability pursuant to the company agreements dated December 23, 1999.

Payables

Payables are recorded at nominal value and include, where applicable, accrued interest payable at the end of the year.

Guarantees, commitments and other memorandum accounts

Derivative financial instruments used to hedge exchange and interest rate risks and, in general, the fluctuations in the value of assets and liabilities, are recorded under "Commitments". Such contracts form part of the results for the year on the basis of the accrual principle.

Commitments relating to the performance of contracts are recorded under memorandum accounts on the basis of the nominal value to which they refer.

Securities held in deposit by third parties are shown at their nominal value.

Dividends

Dividends are recorded in the year in which they are declared. The related tax credit is recorded at the time the dividends are received.

Financial income and expenses

Financial income and expenses are recorded in the financial statements based on the accrual concept. As for financial instruments used to hedge interest rate risk, the interest differentials are recognized in the statement of operations based on the accrual concept.

Extraordinary income and expenses

Extraordinary income and expenses are generated by events unrelated to ordinary activities or by income and expenses relating to prior years.

Income taxes

L'Irpeg and Irap taxes for the current year are calculated on the basis of existing tax legislation prior to the amendments to Legislative Decree No. 344 of December 12, 2003.

Deferred taxes are calculated on temporary differences between the results for book and tax purposes and deferred tax liabilities are recorded in a specific reserve in liabilities; any deferred tax assets are recorded in "Other receivables" only if there is reasonable certainty of their future recovery. Deferred tax assets and liabilities are offset where allowed by law.

Transactions denominated in foreign currency

Transactions in currencies other than the euro are recorded at the exchange rates agreed with the counterparts or, in their absence, at the exchange rate as of the date of transaction.

Receivables and payables in currencies other than the euro are adjusted to the year-end exchange rate with a contra-entry in the statement of operations.

ANALYSIS OF THE INDIVIDUAL ITEMS OF THE BALANCE SHEET

Property, plant and equipment
The analysis of the changes in 2003 is summarized as follows:

(a) Net of writedowns of € 73.5 million made in 2002.

The changes during the year, more fully described in the Report on Operations under “Major events in 2003” and “Analysis of IFI S.p.A. statutory results”, are presented below.

IFI contributed the following investments and warrants to the subsidiary IFIL:

			Contribution value			
			Accounting value		Economic value	
	Number	% of class of stock	Per share (€)	Total (€ thd)	Per share (€)	Total (€ thd)
Fiat ordinary shares	77,944,334	17.99%	7.197	560,995	8.869	691,288
Fiat preferred shares	19,582,500	18.96%	5.165	101,144	5.165	101,144
Warrants 2007 on Fiat ordinary shares	11,216,334	-	0.319	3,578	0.319	3,578
SANPAOLO IMI ordinary shares	16,300,000	1.13%	6.605	107,661	6.605	107,661
Juventus Football Club	74,992,103	62.01%	0.156	11,725	1.823	136,711
Soiem	18,286,500	50.10%	0.516	9,444	0.633	11,572
TOTAL				**794,547**		**1,051,954**

The economic value of the contribution was calculated (with the exception of Soiem, which is unlisted and valued at net asset value) on the basis of the average official market prices in the period between September 2, 2002 and February 28, 2003 and resulted in a total of € 1,051,954 thousand.
In accordance with the provisions of art. 3 of Legislative Decree No. 358 of October 8, 1997, the Fiat ordinary shares, the Juventus Football Club shares and the Soiem shares (representing investments in subsidiaries or affiliates) were contributed with a view to the continuity of the accounting values recorded in the financial statements of IFI S.p.A. for the year ended December 31, 2002, whereas the SANPAOLO IMI ordinary shares, the Fiat preferred shares and the Fiat 2007 warrants on ordinary shares were contributed at economic value, with a total gain € 22,623 thousand.

In exchange for this contribution, based upon the economic value of IFIL determined for purposes of the transaction, IFIL issued to IFI 167,450,949 ordinary shares at the accounting per share price of approximately € 3.122 and 119,635,991 savings shares at the accounting per share price of approximately € 2.272. The par value of the IFIL shares issued amounted to € 287,086,940, plus € 507,460,128 of additional paid-in capital, for a total of € 794,547,068.

In May 2003, IFI then exercised the right to voluntarily convert all the 119,750,000 IFIL savings shares held for 101,787,500 IFIL ordinary shares, without payment of any cash differential.

The additions derive from the following transactions:

- in April and May 2003, IFI purchased 1,807,150 IFIL ordinary shares and 114,009 IFIL savings shares on the market for a total investment of € 4,388 thousand;
- in July 2003, after having purchased 810,126 rights, IFI subscribed to 233,861,025 IFIL ordinary shares under the rights offering for a total investment of € 304,205 thousand;
- in August 2003, IFI also purchased 450,000 IFIL ordinary shares on the market for an outlay of € 904 thousand.

Further details on the variations in investments are provided in Annex 1. The list of investments, which presents additional data and information required by article 2427 of the Italian Civil Code, is provided in Annex 2.

Based upon the average stock market prices for the second half of 2003 (€ 2.325), IFIL ordinary shares show an unrealized loss of € 179 million. Such unrealized loss is not considered representative of a permanent decline in value in that it refers to a controlling institutional investment, which, furthermore, based upon the average market prices for the period March 1 – 17, 2004 (€ 2.836) shows an unrealized gain of about € 150 million.
The per share carrying value of IFIL ordinary shares (€ 2.604), moreover, is lower than the per share value of the consolidated stockholders' equity of the IFIL Group at December 31, 2003 (€ 3.68).

Additional details are provided in Annex 3.

Financial fixed assets – Receivables from others
The receivable from TLcom I at December 31, 2003 amounts to € 6,678 thousand (unchanged compared to the prior year).

Financial fixed assets – Treasury stock
No transactions in treasury stock were entered into during the year. The balance at December 31, 2003 includes the following:

		Carrying value		
	Number of shares	Per share (€)	Total (€ in thousands)	
IFI preferred shares	**5,360,300**	**13.15**	**70,477**	(a)

(a) Net of writedowns of € 58.9 million made in 2002.

IFI preferred shares in portfolio at December 31, 2003 have a par value of € 5,360 thousand and represent, after the capital increase, 3.28% of capital stock and 6.98% of the class of stock.

Based upon the average stock market prices for the second half of 2003 (€ 6.41), IFI preferred shares show an unrealized loss of € 36 million, which would be reduced to € 31 million based upon the average market prices for the period March 1 – 17, 2004 (€ 7.439).
Such unrealized loss is not considered representative of a permanent decline in value taking also into account that the per share carrying value of IFI preferred shares is in any case lower than the per share value of the consolidated stockholders' equity of the IFI Group at December 31, 2003 (€ 13.61).

Additional details are provided in Annex 3.

Current assets – Receivables from subsidiaries

Balance at December 31, 2003	**17,313**

Capital stock

At December 31, 2003, the capital stock of IFI S.p.A., fully subscribed to and paid-in, amounts to € 163,251,460 and is composed of 86,450,000 ordinary shares and 76,801,460 preferred shares of par value € 1 each.
In accordance with art. 10 of the by-laws, preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code.
Pursuant to art. 26 of the by-laws, preferred shares have the right to a preference dividend, which is not cumulative from one year to the next, equal to 5.17% of par value (€ 1).

Capital stock may be increased for a period of five years, at one or more times, also in divisible form, up to a maximum of € 561,750,000, by the authority delegated to the Board of Directors in the Extraordinary Stockholders' Meeting on April 22, 2003 pursuant to art. 2443 of the Italian Civil Code.

Changes in capital stock in 2003 are summarized below:

	Number of shares		
	Ordinary shares	Preferred shares	Total
At December 31, 2002	30,875,000	30,875,000	61,750,000
Capital stock increase against payment	55,575,000	45,926,460	101,501,460
At December 31, 2003	**86,450,000**	**76,801,460**	**163,251,460**

On June 27, 2003, by the power vested in it pursuant to art. 2443 of the Italian Civil Code by the Extraordinary Stockholders' Meeting held on April 22, 2003, the Board of Directors of IFI S.p.A. voted to increase the capital stock against payment, and in divisible form, for a maximum amount of par value € 101,501,460, through the issue of:

- 55,575,000 IFI ordinary shares of par value € 1 each, with normal dividend rights, with option rights offered to Giovanni Agnelli e C. S.a.p.az., the sole stockholder of IFI ordinary shares, at the price of € 4.5 each, in a ratio of 9 new ordinary shares for every 5 ordinary shares held;
- maximum 45,926,460 IFI preferred shares of par value € 1 each, with normal dividend rights, with option rights offered to the preferred stockholders at the price of € 4.5 each, in a ratio of 9 new preferred shares for every 5 preferred shares held.

At the end of the rights offering period, 45,412,722 new preferred shares were subscribed to, equal to 98.88% of the preferred shares offered. Moreover, Giovanni Agnelli e C. S.a.p.az., the sole stockholder of IFI ordinary shares, subscribed to the 55,575,000 IFI ordinary shares in the rights offering, with an investment of € 250,087 thousand.

Following the subsequent offering of the 285,410 unexercised rights on the market (which generated proceeds of € 684 thousand recorded as an increase to stockholders' equity), the remaining 513,738 new IFI preferred shares were subscribed to in August.

The capital stock increase was therefore concluded with the subscription of the entire issue of 55,575,000 ordinary shares and the 45,926,460 preferred shares offered for total proceeds of € 457,440 thousand (of which € 684 thousand deriving from the sale of unexercised rights).

In execution of the resolution passed by the Stockholders' Meeting of June 3, 1985, a part of the monetary revaluation reserve Law No. 576 of December 2, 1975 was transferred to capital stock (€ 1,325 thousand) which, in the event of distribution, will form part of the taxable income of the Company.

Reserves

The statement of changes in stockholders' equity is presented in Annex 4.
At December 31, 2003, untaxed reserves are recorded for a total amount of € 83,716 thousand, of which € 81,362 thousand are in the monetary revaluation reserves, € 2,032 thousand in the legal reserve and € 322 thousand in other reserves. In the event of distribution, these reserves would form part of the taxable income of the Company.
In a view of the unlikelihood of their distribution, no deferred taxes have been set aside in respect of such reserves.

Reserves for risks and charges

These amounted to € 8,272 thousand, of which € 5,572 thousand for taxes and € 2,700 thousand for the risk of writedowns and financial receivables.

Reserve for employee severance indemnities

This reserve refers to the liability for employee severance indemnities, calculated in accordance with art. 2120 of the Italian Civil Code, as well as the liability in respect of employees arising from the December 23, 1999 agreement.

Details of the changes are as follows:

€ in thousands	Employee Sever. Indem.	Agreement 12/23/1999	Total
Balance at December 31, 2002	2,012	299	2,311
Provisions	156	78	234
Payments	(772)	(86)	(858)
Transfers to and from other Group companies	(330)	(56)	(386)
Balance at December 31, 2003	**1,066**	**235**	**1,301**

Borrowings from banks

€ in thousands	**12/31/2003**	12/31/2002	Change
due within one year	**66,262**	211,675	(145,413)
due beyond one year	**212,700**	170,000	42,700
Total borrowings from banks	**278,962**	381,675	(102,713)

Borrowings from banks due within one year amounted to € 66,262 thousand (€ 211,675 thousand at December 31, 2002). Against these borrowings, the company has irrevocable lines of credit available totaling € 515 million, all due beyond one year.

Borrowings from banks due beyond one year of € 212,700 thousand relate to loans bearing interest at variable rates payable semi-annually and are indexed against the Euribor plus a spread commensurate with the best market conditions.

Interest rate swaps and zero cost collars are used to ensure fixed interest rates over the period of the loans on an amount of € 170 million at December 31, 2003.

Loans are classified as due beyond one year on the basis of the residual period of the loan and the period of the hedging contracts.

Borrowings from banks due beyond one year are payable within five years.

Payables to subsidiaries

€ in thousands	**12/31/2003**	12/31/2002	Change
For loans received:			
- Soiem S.p.A.	**0**	3,559	(3,559)
- Juventus Football Club S.p.A.	**0**	589	(589)
	0	4,148	(4,148)
For services received:			
- Soiem S.p.A.	**313**	408	(95)
- IFIL S.p.A.	**0**	88	(88)
- Fiat Auto S.p.A.	**11**	45	(34)
- Sundry	**49**	49	0
	373	590	(217)
Total payables to subsidiaries	**373**	4,738	(4,365)

Payables to parent company

Payables to parent company amount to € 15,176 thousand (€ 39,274 thousand at December 31, 2002) and refer to the loan granted by the parent company Giovanni Agnelli e C S.a.p.az. which bears interest at the monthly variable market rate.

Taxes payable

Taxes payable amount to € 179 thousand (€ 279 thousand in 2002) and relate to withholding taxes payable on self-employment, employment and other income.

The Company has agreed its tax years up to December 31, 1998.
The Company took advantage of the tax amnesty (Law 289/2002 as amended) opting to apply art. 8 (simple supplement) relating to the years 1997-2001. The company also used the amnesty to close pending and potential tax litigation relating to prior years (art. 15 and 16 of Law 289/2002). The total cost incurred amounted to € 94 thousand.

Social security payable

€ in thousands	**12/31/2003**		12/31/2002	Change
INPS solidarity fund (MD No. 158 dated 4/28/2000)	**679**	(a)	0	679
INPS social security contributions on salaries and unused vacation and holidays	**109**		180	(71)
Total social security payable	**788**		180	608

(a) Of which € 453 thousand beyond one year.

Ministerial Decree No. 158 dated April 28, 2000, established, at INPS, the "Solidarity Fund for the support of earnings, employment and professional reconversion and requalification of credit personnel". Financial and asset management of the Fund is administered autonomously. The Fund provides, in exceptional circumstances, for the issue of checks to support earnings at the request of the employer and up until the right accrues for the years-of-service or old age pension by employees who accrue the requisites within a maximum period of 60 months from the date of termination of the working relationship. The above liabilities (€ 679 thousand in total) represent the extraordinary contribution that IFI must pay to cover the exceptional checks that are due to former employees, including related social security contributions.

Other payables

€ in thousands	**12/31/2003**		12/31/2002	Change
Extraordinary compensation for the former Managing Director	**500**	(a)	1,000	(500)
IFI Board of Statutory Auditors fees	**178**		168	10
Extraordinary compensation for the Deputy Chairman	**150**	(a)	0	150
Stockholders for dividends not yet collected	**107**		131	(24)
Sundry	**67**		92	(25)
Total other payables	**1,002**		1,391	(389)

(a) To be paid in 2004.

Accrued expenses and deferred income

Accrued expenses and deferred income amount to € 1,279 thousand (€ 1,620 thousand at December 31, 2002) and include interest expenses on borrowings from banks (€ 727 thousand) and expenses on interest rate swaps and zero cost collars (€ 552 thousand) accrued to December 31, 2003.

GUARANTEES, COMMITMENTS AND OTHER MEMORANDUM ACCOUNTS

Guarantees granted – Sureties issued on behalf of subsidiaries
At December 31, 2003, sureties granted by IFI amounted to € 32,003 thousand and refer to F.I.G.C., Federazione Italiana Giuoco Calcio – Lega Nazionale Professionisti, on behalf of the Juventus Football Club.
The reduction of € 65,679 thousand from December 31, 2002 is due to the sureties that expired (€ 44,186 thousand) or were reduced (€ 21,493 thousand) during the year.
The sureties, remunerated at market rates, have varying annual expiry dates between 2004 and 2005.

Guarantees received - from third parties
These total € 726 thousand and represent sureties received from Banca Intesa issued to the Tax Administration (VAT office) on behalf of IFI, expiring December 31, 2003.

Commitments

€ in thousands	**12/31/2003**	12/31/2002	Change
Commitments with leading banking institutions relating to transactions to hedge interest rate fluctuations on bank debt due in 2005 and 2007 (a)	**170,000**	200,000	(30,000)
Residual commitment to invest in TLcom I	**3,000**	3,000	0
Commitment to sell 47,500 IFIL ordinary shares	**424**	424	0
Residual commitment to subscribe to Emittenti Titoli's capital increase	**93**	93	0
Residual commitment to invest in Deutsche Morgan Grenfell	**0**	12	(12)
Total commitments	**173,517**	203,529	(30,012)

(a) The transactions in derivative financial instruments are used exclusively to hedge the risk of interest rate fluctuations and thus are not valued separately.

Other memorandum accounts – Securities held in deposit by third parties
The amount of € 34,190 thousand refers to 3,418,242 Exor Group ordinary shares and 3,010 Deutsche Morgan Grenfell shares deposited at banks.

ANALYSIS OF THE INDIVIDUAL ITEMS OF THE STATEMENT OF OPERATIONS

Value of production – Revenues from sales and services

€ in thousands	2003	2002	Change
For services rendered to subsidiaries and associated companies:			
- Fiat Sava S.p.A.	**620**	620	0
- Juventus Football Club S.p.A.	**223**	277	(54)
- Exor Group S.A.	**92**	274	(182)
For services rendered to third parties	**125**	560	(435)
Total revenues from sales and services	**1,060**	1,731	(671)

The services rendered to Fiat Sava consist of the custody of receivables (€ 1,332.3 million) which guarantee the circulation of interest-bearing Sava Fiat bonds (the 2003 bond issue amounts to € 589.7 million).

Value of production – Other income and revenues

€ in thousands	2003	2002	Change
For cost recoveries incurred on behalf of subsidiaries:			
- IFIL S.p.A.	**201**	222	(21)
- Soiem S.p.A.	**10**	10	0
- Juventus Football Club S.p.A.	**0**	83	(83)

	1,123	3,169	(2,046)
Office management and security	**384**	363	21
Bank charges	**208**	268	(60)
Maintenance, transport and car insurance	**183**	171	12
Travel expenses	**136**	507	(371)
Mailing, telephone and similar expenses	**131**	153	(22)
Other expenses	**45**	41	4
Audit fees	**42**	38	4
Employee expenses	**32**	58	(26)
Total services	**4,478**	9,389	(4,911)

Costs of production – Leases and rentals

These amount to € 803 thousand (€ 889 thousand in 2002) and include the rent on the Turin headquarters (€ 537 thousand to the subsidiary company Soiem S.p.A.), leases and expenses of the Rome headquarters (€ 68 thousand), leases for office machines, for cars for service use and other rentals (€ 198 thousand).

Costs of production – Personnel

These total € 2,714 thousand (€ 4,167 thousand in 2002) and show a net decrease of € 1,453 thousand due to a reduction in number of employees.

Other personnel costs include the contribution (€ 95 thousand) to the Corporate Employee Benefits Fund – Pension Fund, administered separately from the balance sheet, in which IFI S.p.A. and other companies in the Group participate. The purpose of this Fund, which is non-profit, is to pay benefits that are a supplement to the obligatory public system, either directly or by taking out insurance policies, in conformity with the provisions of the collective labor contracts, agreements or company regulations. The technical equilibrium between benefits and contributions is ensured by the company partners in the Fund.

At year-end 2003, employees numbered 11 (28 in 2002).
The average number of employees in 2003 was 18, summarized by category as follows:

	2003	2002	Change
Managers/management staff	**6**	10	(4)
Clerks	**10**	16	(6)
Messengers	**2**	5	(3)
Average number of employees	**18**	31	(13)

Costs of production – Other operating costs
Other operating costs total € 1,611 thousand (€ 1,497 in 2002) and show an increase of € 114 thousand compared to 2002. Details are as follows:

€ in thousands	**2003**		2002	Change
Indirect taxes and duties	**831**	(a)	508	323
Donations to non-profit and cultural organizations	**357**		699	(342)
Notary and corporate charges	**152**		81	71
Publication of annual, first-half and quarterly financial statements	**86**		72	14
Ads	**81**		13	68
Association dues	**46**		67	(21)
Books, newspapers and magazines	**40**		42	(2)
Sundry	**18**		15	3
Total other operating costs	**1,611**		1,497	114

(a) Including nonrecurring expenses relating to nondeductible VAT for € 282 thousand.

Donations to non-profit and cultural organizations in 2003 were paid from the portion of 2001 profits to which the Board of Directors is entitled, according to the by-laws, and which is waived.

- 11,216,334 warrants 2007 on Fiat ordinary shares	**3,578**	(a)	0	3,578
- 1,257,102 Juventus Football Club S.p.A. shares	**0**		1,048	(1,048)
Other companies:				
- 16,300,000 SANPAOLO IMI S.p.A. shares	**19,045**	(a)	0	19,045
Total gains on sales of investments in subsidiaries and other companies	**22,623**		1,048	21,575

(a) Generated by the contribution of investments to IFIL.

Other financial income – Income other than the above

These total € 11 thousand (€ 10 thousand at December 31, 2002) and refer to interest income on receivables from banks.

Interest and other financial expenses

Details are as follows:

€ in thousands	2003	2002	Change
Interest expense on loans from subsidiaries			
- Soiem S.p.A.	**48**	80	(32)
- Juventus Football Club S.p.A.	**18**	707	(689)
	66	787	(721)
Interest expense on loans from parent company			
- Giovanni Agnelli e C. S.a.p.az	**656**	814	(158)
Other			
- interest expenses on borrowings from banks	**10,008**	13,353	(3,345)
- expenses relating to hedges of interest rate fluctuations	**3,647**	1,835	1,812
- sundry bank charges	**641**	814	(173)
- accrual for sundry financial risks	**200**	500	(300)
Total interest and other financial expenses	**15,218**	18,103	(2,885)

Extraordinary income and expenses

Details are as follows:

€ in thousands	**2003**	2002	Change
Income			
Release of excess income taxes set aside in the prior year	**4,065**	0	4,065
Sundry	**19**	20	(1)
Total extraordinary income	**4,084**	20	4,064
Expenses			
Solidarity fund for the support of earnings (MD 158 of 4/28/2000) (a)	**(772)**	0	(772)
Employee reduction incentives	**(89)**	0	(89)
Sundry	**(20)**	(37)	17
Total extraordinary expenses	**(881)**	(37)	(844)

(a) Payment will terminate in 2008.

Income taxes

Details are as follows:

€ in thousands	**2003**	2002	Change
Deferred income taxes - Release of deferred taxes provided in prior years and adjustments to conform to the change in tax rates	**7,569**	1,381	6,188
Current Irpeg taxes	**0**	(8,917)	8,917
Equalization tax - Irpeg (19%)	**0**	(224)	224
Total income taxes	**7,569**	(7,760)	15,329

The taxable base for the year 2003 was a negative figure on account of the writedowns on financial fixed assets recorded at the end of 2002 which became deductible.

Since there is no reasonable certainty of future recovery, no deferred tax assets have been booked on the fiscal 2003 tax losses (€ 131 million) and on the portions of investment writedowns that, as allowed by existing tax legislation, will be deductible in future years (€ 63 million).

Other information – Compensation to Directors, Statutory Auditors and General Managers

(Art. 78 of Consob resolution No. 11971 dated May 14, 1999 and subsequent amendments)

All amounts in the following table are expressed in thousands of euros:

(a) The term of office expires in concurrence with the Stockholders' Meeting that will approve the financial statements for the year ended December 31, 2005.
(b) The amounts indicated refer to special compensation correlated to the post and functions carried out.
(c) Deputy Chairman and Managing Director until March 2, 2003.
(d) Compensation for the posts held in subsidiaries.
(e) Extraordinary compensation.
(f) Employment income.
(g) Managing Director until April 13, 2003.
(h) Compensation as the person in charge of IFI headquarters in Rome.

IFI – Other information – Stock options

The Company uses stock option plans to strengthen relations between management and the Group and to boost motivation to create value for the Company.

At December 31, 2003, the Board of Directors of the subsidiary IFIL has three stock option plans.
The first, destined to managers and directors of IFIL and IFI, was voted by the IFIL Board of Directors on April 1998. The plan involves a maximum number of 500,000 IFIL ordinary shares of par value € 1, which can be granted for subscription at a price of € 8.93 each.
The plan allows the granting of a maximum number of shares for a variable amount of between one and two times the annual gross salary of each beneficiary as of the date of April 1998.
The options, accrue in equal amounts each year between 1998 and 2003, can be exercised by the beneficiaries in the first four months of 2003 and 2004.
In total, the options granted, net of those expired in the meantime, relate to 220,700 shares, equal to 0.02% of the actual outstanding capital stock.

In May 2000, the IFIL Board of Directors voted a second stock option plan destined for the managers and directors of IFIL and IFI, for a maximum number of 2,700,000 IFIL ordinary shares, of par value € 1 each. The options can be granted in annual amounts each year between 2000 and 2004 and can be exercised by the beneficiaries beginning from 2002 up to 2006.
There were 2,691,500 options equal to 0.25% of actual capital stock granted under this plan in the period 2000 to 2003 (net of those expired in the meantime) (of which in 2000, 522,000 options exercisable at an average price of € 7.088 each; in 2001, 525,450 options at € 6.88 each; in 2002, 844,050 options at € 5.09 each; in 2003, 800,000 options exercisable at a price of € 1.85 each).

In September 2003, the IFIL Board of Directors voted a third stock option plan destined solely for the managers and directors of IFIL and IFI, for a maximum number of 700,000 IFIL ordinary shares, of par value € 1 each. There were 532,000 options equal to 0.05% of actual capital stock granted under this plan, of par value € 2.28 each.

In the event of termination of employment with Group companies (excluding retirement) the options not yet accrued or exercisable are forfeited.
During 2003, no options were exercised.

With regard to these plans, there were no transactions entered into to favor either the purchase or subscription of shares pursuant to ex art. 2358 of the Italian Civil Code.

Thus far, the Board of Fiat S.p.A. has approved stock option plans offered to about 900 managers of the Group's Italian and foreign companies who are qualified as "Direttore" or have been included in the Management Development Program for high-potential managers. Plan regulations share these common features:

- options are granted to individual managers on the basis of objective parameters that take into account the level of responsibility assigned to each person and his or her performance.
- if employment is terminated or an employee's relationship with the Group is otherwise severed, options that are not exercisable become null and void. However, vested options may be exercised within 30 days from the date of termination, with certain exceptions.
- the option exercise price, which is determined based on the average stock market price for the month preceding the option grant, can vary as a result of transactions affecting the Company's capital stock. It must be paid in cash upon the purchase of the underlying shares.
- the options are normally exercisable starting one year after they are granted and for the following eight years, but during the first four years, exercise is limited to annual tranches, which may be accumulated, of no more than 25% of the total granted.

A total of 1,045,943 options were granted in 2003, and expire in 2010. For the first three years their exercise is subject to limits, which include the achievement of predetermined objectives. In consideration of the options previously granted under the aforesaid plans and that have since expired upon termination of employment, a total of 12,697,743 shares represent treasury stock to be assigned to the holders of options pursuant to the conditions envisaged in the specific Regulations.

On December 15, 2000, the Extraordinary Stockholders' Meeting of Alpitour S.p.A. voted to vest the Board of Directors with the power to increase capital stock by a maximum amount of € 767,500 to service a stock option plan on behalf of the directors, managers and cadres of Alpitour and the companies of the Group.

The regulations of the stock option plan, approved by resolution of the Board of Directors on December 15, 2000, state that the aforementioned capital increase of € 767,500 will occur by issue of a maximum 1,535,000 new ordinary shares of par value € 0.50 each. The options under the plan, which carries a period of 68 months, will accrue in annual lots expiring October 31, of each year and will be offered at a price equal to € 6.73 per share. The options granted can be fully exercised within six months of the approval of the financial statements ended October 31, 2005.

The shares purchased in execution of the above plan can be sold to Alpitour at a price, established by the Board of Directors, calculated on the basis of the economic performance of the company.

The first tranche of options granted during 2002/2003, referring to the financial statements for the year ended October 31, 2002, was not exercised by the beneficiaries of the stock option plans.

Stock options granted to Directors and General Managers

REPORT OF THE BOARD OF STATUTORY AUDITORS ACCORDING TO ART. 153 OF LEGISLATIVE DECREE NO. 58/1998 AND ART. 2429, PARAGRAPH 3 OF THE ITALIAN CIVIL CODE

To our Stockholders,

Under Art. 153 of Legislative Decree No. 58 of February 24, 1998, the Board of Statutory Auditors has the obligation to report to the Stockholders' Meeting on matters concerning the audit work carried out and any omissions and censurable matters that may have come to its attention. The Board of Statutory Auditors may also formulate proposals to the Stockholders' Meeting in relation to the financial statements, to its approval and to matters of its competence.

With this report, we have complied with the law.

In 2003, the Board of Statutory Auditors has complied with the obligations required by art. 149, Legislative Decree No. 58, dated February 24, 1998, which allows us to specifically comment on the matters which follow.

We have attended the meetings of the Board of Directors during the course of which the Directors informed us of the activities carried out and the significant economic, financial and equity transactions entered into or in progress by the company and/or its subsidiaries. In this regard, we have ascertained that the transactions approved and carried out were in conformity with the law and the corporate by-laws, were not in disagreement with the resolutions approved by the Stockholders' Meeting, nor in potential conflict of interest and were based upon the principles of good administration.

The organizational structure of the company is adequate in relation to the size of the company. The Board of Statutory Auditors, also on the basis of meetings held with company management and with representatives of the Independent Auditors, has gathered information regarding compliance with the principles of diligent and correct administrative management.

Our evaluation of the adequacy of the internal control system is positive, meaning that the system is operating effectively for the purpose of ascertaining that the internal operating and administrative procedures are being followed and which have been adopted in order to guarantee a sound and efficient management, and also to identify, prevent and manage, as far as possible, financial and operating risks and any fraud to the detriment of the company.

Furthermore, we consider that the administrative accounting system, insofar as ascertained and checked by us also in previous years, is in a condition to correctly represent operating events.

The directives imposed on the subsidiaries by IFI S.p.A. as per Art. 114, paragraph 2, of Legislative Decree 58/98 are also considered adequate.

The Board of Directors has sent to us, in accordance with the law, the report relating to the first half of the year, making it public within the time-frame and according to the procedures established by Consob and has also provided, according to the law, reports on quarterly performance.

With reference to Consob Communications dated February 20, 1997, March 2, 1998 and April 6, 2001, as far as our responsibility is concerned, we can attest that:

- the information disclosed by the Directors in the Report on Operations is considered exhaustive and complete;
- the Board of Statutory Auditors, in accordance with the "Testo Unico sulla Finanza" (Legislative Decree No. 58/98), has been kept constantly informed about matters of its competence;
- the periodical tests and controls which the Board of Statutory carried out on the company did not show atypical and/or unusual transactions;
- intercompany transactions are presented and described in the Directors' Report on Operations and the numerous transactions for goods and services entered into with Group companies and/or related parties have been carried out at normal market conditions;
- the Independent Auditors' report did not contain any qualifications or other matters of interest nor related observations or proposals;
- as previously stated, the organizational structure of the company, insofar as we are responsible, appears to be adequate and the administrative accounting system is reliable for purposes of correctly representing operating events;
- the internal control systems appears adequate and effective;
- during 2003, the Board of Directors held eight meetings, which we always attended, and the Board of Statutory Auditors held 14 meetings, four of which were attended by the Independent Auditors;
- neither complaints, as per ex art. 2408 of the Italian Civil Code, were received by the Board of Statutory Auditors, nor has it been informed, at this time, of any petitions presented to IFI S.p.A.;
- opinions have been issued during the year by the Board of Statutory Auditors pursuant to the law;
- IFI S.p.A. has not assigned the audit firm, Deloitte & Touche S.p.A., other work, apart from the audit of the statutory financial statements and the consolidated financial statements and the limited scope audit of the six-month report.

As for the annual statutory financial statements, which show a net income of € 14,666,264, the reasons for which were described in the Report on Operations, we have ascertained compliance with the law as regards its structure and formation by tests carried out by us directly and through information received by us from the Independent Auditors. We therefore maintain that the financial statements are befitting of your approval, together with the proposal to increase the legal reserve to one fifth of capital stock and to appropriate the net income to the extraordinary reserve, as formulated by the Board of Directors.

The Board of Directors also asks for your authorization to buy-back treasury stock in the amount and in the manner and terms described in the specific report. As for our responsibility, we attest that the transaction proposed to you agrees with existing legislation.

In the extraordinary session, we propose that you approve the numerous amendments to the corporate by-laws, both obligatory and non-obligatory, in order to conform the by-laws to the provisions established or allowed by Legislative Decree No. 6/2003 and later amendments or integrations.

These comply with said law and therefore meet with our approval.

Turin, May 20, 2004

The Board of Statutory Auditors

(Cesare Ferrero)

(Giorgio Giorgi)

(Lionello Jona Celesia)

REPORT OF THE BOARD OF STATUTORY AUDITORS ACCORDING TO ART. 41 OF LEGISLATIVE DECREE NO. 127/1991

To our Stockholders,

The consolidated financial statements of the IFI S.p.A. for the year ended December 31, 2003 – consisting of the balance sheet, the statement of operations and the notes to the financial statements – which have been made available to you, show a loss of € 130 million, compared to a loss of € 803 million in the prior year. The consolidated financial statements were submitted to us within the terms of the law, together with Report on Operations, and prepared in accordance with the provisions of Legislative Decree 127 dated April 9, 1991.

The tests carried out by Deloitte & Touche S.p.A., the Independent Auditors charged with the audit of the financial statements, has led to the assertion that the values expressed in the financial statements agree with the accounting recorded of the Parent Company, the statutory and consolidated financial statements of the subsidiaries and the relative information formally communicated by the latter.

Such financial statements, transmitted by the subsidiaries to the Parent Company, for purposes of drawing up the consolidated financial statements, prepared by their relevant corporate bodies, have been examined by the bodies and/or parties in charge of controlling the individual companies, according to the respective regulations, and on the part of the Independent Auditors within the scope of the procedures carried out in the audit of consolidated financial statements. The Board of Statutory Auditors has, therefore, not extended its examination to these financial statements.

The determination of the scope of consolidation, the choice of the principles of consolidation of the investments and the procedures adopted for this purpose are in agreement with the provisions of Legislative Decree No. 127 dated April 9, 1991. The structure of the consolidated financial statements is thus to be considered technically correct and, as a whole, conforms to the specific law.

The Report on Operations adequately describes the results of operations and financial condition, the trend of operations during the course of 2003 and the business outlook of the whole of the companies in the scope of consolidation after the end of the year. The examination to which the Report has been subjected shows its congruity with the consolidated financial statements.

Turin, May 20, 2004

The Board of Statutory Auditors

(Cesare Ferrero)

(Giorgio Giorgi)

(Lionello Jona Celesia)

REPORT OF THE INDEPENDENT AUDITORS ON THE FINANCIAL STATEMENTS PURSUANT TO ART. 156 OF LEGISLATIVE DECREE No. 58/1998

To the Shareholders of
IFI – Istituto Finanziario Industriale S.p.A.

1. We have audited the financial statements of IFI – Istituto Finanziario Industriale S.p.A. as of and for the year ended December 31, 2003. These financial statements are the responsibility of the Directors of IFI – Istituto Finanziario Industriale S.p.A. Our responsibility is to express an opinion on these financial statements based on our audit.

2. We conducted our audit in accordance with generally accepted auditing standards in Italy as recommended by the Italian Regulatory Commission for Companies and the Stock Exchange ("Consob"). Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement and are, as a whole, reliable. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the adequacy and the fairness of the accounting principles used and the reasonableness of the estimates made by the Directors. We believe that our audit provides a reasonable basis for our opinion. The audit of the financial statements of certain subsidiaries and affiliates, which statements reflect total assets representing 11% of consolidated total assets and revenues representing 12% of consolidated revenues, is the responsibility of other auditors.

   For the opinion on the prior year's financial statements, which are presented for comparative purposes as required by law, reference should be made to the auditors' report dated April 3, 2003 issued by Deloitte & Touche Italia S.p.A.

3. In our opinion, the financial statements of IFI – Istituto Finanziario Industriale S.p.A. as of and for the year ended December 31, 2003 comply with the Italian statutory provisions governing the criteria for their preparation; accordingly, they give a true and fair view of the financial position and results of operations of IFI – Istituto Finanziario Industriale S.p.A.

IFI GROUP'S COMPANIES

In accordance with the provisions of Legislative Decree No. 127/91, articles 38 and 39, and Consob resolution No. 11971 of May 14, 1999 (art. 126 of the Regulations and successive amendments), the following list is provided of the companies and significant holdings included in the consolidated financial statements.

The companies in the list are divided by consolidation method and business segment. For each company, the following information is provided: the registered offices, the country location, the capital stock in the original currency. The consolidated percentage of ownership held by the Group is also indicated, as well as the percentage of ownership held by IFI S.p.A. or by other subsidiaries.

A separate column shows the percentage of voting rights in the Ordinary Stockholders' Meeting. An Asterisk (*) indicates ownership with voting suspended.

Independent Auditors

Deloitte & Touche S.p.A.

Expiry of term of office

The three-year terms of office of the Board of Directors and the Board of Statutory Auditors, elected by the Stockholders' Meeting on May 27, 2002, expire concurrently with the Stockholders' Meeting for the approval of the financial statements for the year ending December 31, 2004.

The Independent Auditors are appointed for the three-year period 2003-2005.

Corporate Governance

The Chairman and Managing Director, according to the by-laws (art. 20), may legally represent the Company. The Chairman and Managing Director, without specific authorization by the Board of Directors, may carry out all acts falling under the corporate business purpose, except as restricted by law.

The Board of Directors, under resolution on May 27, 2002, has conferred all powers necessary for the management of the Company to the Executive Committee, except those powers which are expressly entrusted to the Board of Directors by law.

Specific operating powers have been conferred to the General Manager on June 25, 2003.

CHAIRMAN'S LETTER

To our Stockholders,

IFIL S.p.A. closed 2003 with a net income of € 72.7 million, thus laying the foundations for a return to the distribution of dividends. While the Group again reported a loss, amounting to € 45 million, the objective of reducing the debt position was met, which was decreased by more than half from € 484.4 million at year-end 2002, to € 234.7 million at year end 2003.

The Reorganization Plan involving IFI and IFIL, which now holds all the equity interests of the Group, was carried out during the year.

The Reorganization, followed by a restructuring of all the company functions, gave IFIL a more streamlined and efficient structure, which the market lost no time in acknowledging and rewarding, as witnessed by the increase in the ordinary share price (+76% from July 2003 to March 2004), aided by IFIL's entry to the Midex (index of mid-cap companies listed on the Italian stock exchange).

From the corporate standpoint, the most important event during the year was the capital increase which raised € 504 million, allowing IFIL to subscribe to its full share of the FIAT capital increase.

***

The economic climate in which we operated during 2003 – which persists even now – was strongly influenced by the depreciation of the US dollar against the euro, with a beneficial effect on companies abroad, especially for the activities linked to exports. This is a phenomenon that, along with the reduction in tax pressure and buoyed by higher public expenditure, enabled the United States to achieve an annual GDP growth of 3.1%.

The absence of similar policies on this side of the Atlantic translated into a gradual but relentless erosion of the competitive capacity of European countries crushed by American exports as well as aggressive manufacturing and commercial policies of Asian countries, first and foremost China.

All these factors thus compromised the development of the European economy, which altogether recorded a growth rate of less than 1%. The weak pace of growth by the most important euro-zone countries (+0.1% in France and -0.1% in Germany) was basically in line with the poor performance of Italy (+ 0.3%).

***

The aforementioned economic picture could not but have an impact on Group Companies.

As regards Fiat, the capital increase as well as the divestments of non-strategic businesses and the rigorous cost-cutting policy, placed our most important stockholding in a condition to be able to work with complete equanimity and concentration towards its future, under the guidance of a totally new and highly qualified management. Although the 2003 financial statements still highlight the difficulties of the present time, some important positive signs were nevertheless seen, namely the increase in profitability of industrial operations in the last quarter of 2003, the promptness in respecting the deadlines and targets set down in the relaunch plan, and the positive market response to the new models.

***

Our most direct operating commitment was dedicated to the dynamic management of our diversified portfolio. The distribution of extraordinary dividends by Worms & Cie and La Rinascente and the divestment of the minority interest in Sifalberghi made up part of this strategy.

Our support of the reorganization initiatives by Alpitour and La Rinascente was just as important. The Travel Group – which reinforced its top management with new highly qualified professionals, and a new internal organizational structure, set-up per business unit – redefined its industrial and commercial strategy based upon the enhancement and promotion of the Italian touristic cultural heritage and the opening of new accommodation facilities in the Peninsula.

As for La Rinascente, work especially concerned the divisionalization of the distribution Group, which made it possible, among other things, to seize an interesting partnership opportunity for the development of the Gallerie Commerciali.

***

The business outlook for the current year appears closely linked to Europe's capacity to set in motion, after the example of the United States, a cycle of sound and lasting economic recovery. Nevertheless, the signs in Q1 2004 do not as yet appear to justify forecasts of satisfactory growth, thus reinforcing the voice of many who call for a decisive change of direction in the economic policy of the Continent. The revision of the stability pact rules, together with the use of the monetary lever as an incentive factor for the development of economic activities, will take on, more and more, a key role in the coming months in order to avoid the risk that the current persistent weakness of the growth of Europe could transform itself into outright stagnation.

In this framework, Italy is called to respond to a double challenge: to work together with its European partners to enhance and increase our competitiveness on international markets and re-establish full trust in the credit and savings system, hit hard by the financial scandals that have involved important companies in the national economic scenario.

As regards IFIL, we are convinced that, during the year, the new organizational structure and the strategy of dynamic management of the investment portfolio will continue to mark out new interesting opportunities for the development and optimization of the investments, a condition necessary to stimulate a new virtuous cycle of investments. The setting up of an IFIL branch office in the United States represents an important step in this direction: with a sound presence in one of the most interesting centres of the world market, the professionalism of our management will make it possible to increase investment possibilities, selecting the most advantageous opportunities from the viewpoint of the creation of value.

***

Finally, together with the Board of Directors, I would like to thank the Stockholders for the confidence shown, as well as the Statutory Auditors, the Independent Auditors, the Executives and Staff of IFIL and its subsidiaries for the intense work carried out in a particularly demanding year.

Gianluigi Gabetti

IFIL GROUP PROFILE

THE INVESTMENT PORTFOLIO

IFIL – Finanziaria di Partecipazioni S.p.A. is the operating holding company for the investments of the Group and is headed by Giovanni Agnelli e C. S.a.p.az. (through IFI – Istituto Finanziario Industriale S.p.A. which holds 62.03% of its ordinary capital stock). It commands two distinctive areas of operations: the active management of the controlling investment in FIAT and the dynamic management of the other holdings.

Fiat, controlled with a holding of more than 30% of ordinary and preferred capital stock, operates in the national and international automotive market as a manufacturer and distributor of automobiles (Fiat Auto, Ferrari and Maserati), commercial vehicles (Iveco), agricultural and construction equipment (CNH Global), automotive components for these vehicles (Magneti Marelli) and the supply of related services, as well as publishing and communications (Itedi) and services for corporations (Business Solutions).

The other holdings which comprise the dynamically managed diversified portfolio are listed below.

Worms & Cie (53.07% holding in capital stock) is a French-listed holding company with a portfolio comprising the following major investments:

- ArjoWiggins (100% holding), the world leader in the manufacture of high value-added paper products and, in Europe, leader in the manufacture of carbonless paper (Carbonless Europe was absorbed by ArjoWiggins as from January 1, 2004).
- Antalis (100% holding), the leading European group in the distribution of paper products for printing and writing.
- Permal Group (100% holding), one of the leaders in the management of investment funds.
- SGS (23.8% holding in capital stock), a company listed on the Swiss stock exchange and leader in the verification, inspection and certification of product and service quality.

La Rinascente (jointly controlled with the Auchan Group, through Eurofind, which holds more than 99% of the ordinary capital stock) is one of the largest Italian retailers operating throughout Italy with roughly 1,850 points of sale (direct, affiliates and associates) and over 31,000 employees.

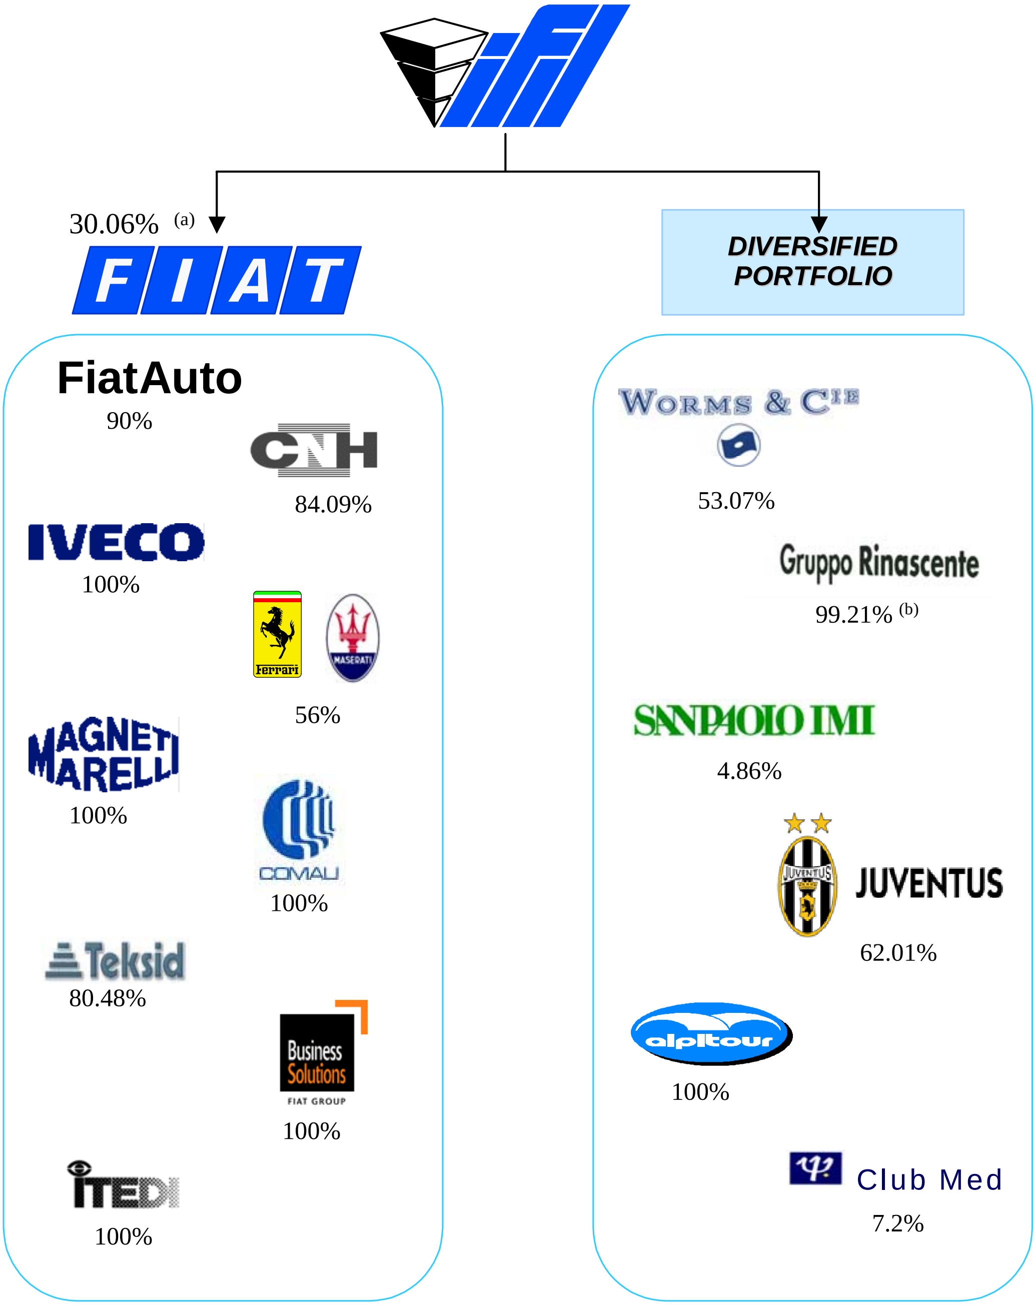
SANPAOLO IMI (4.86% holding in ordinary capital stock) is a leading national banking group with over 3,000 branches throughout Italy.

Alpitour (100% holding through NHT New Holding for Tourism) is a leading company in Italian tourism.

Club Méditerranée (7.2% holding in capital stock) is a company in which the Agnelli Group also holds an equity interest through Exor Group (16.72% holding in capital stock).

Juventus Football Club (62.01% holding in capital stock) is a company with more than one hundred years of history and an enviable record gained at various national and international sports events.

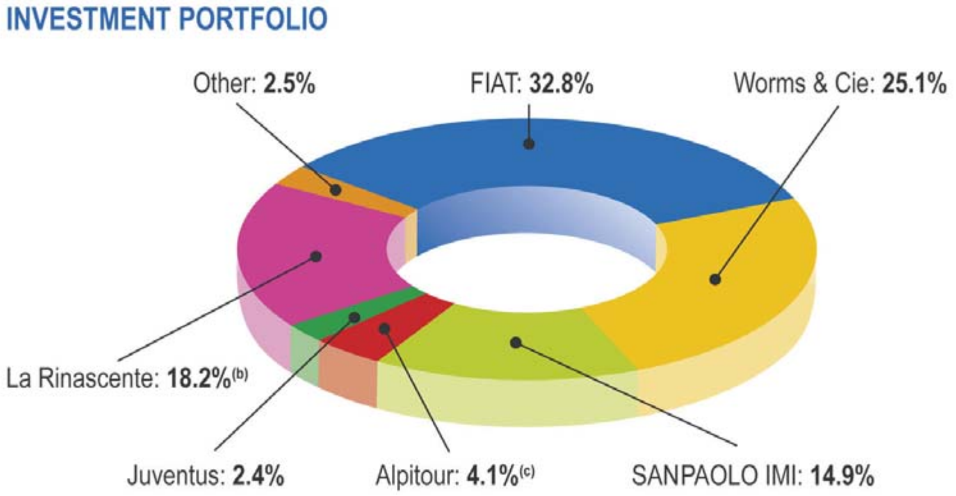
The following chart is updated to the end of February 2004 and presents the simplified structure of the investment portfolio. Percentage holdings refer to ordinary capital stock.



(a) IFIL also holds 30.09% of preferred capital stock.

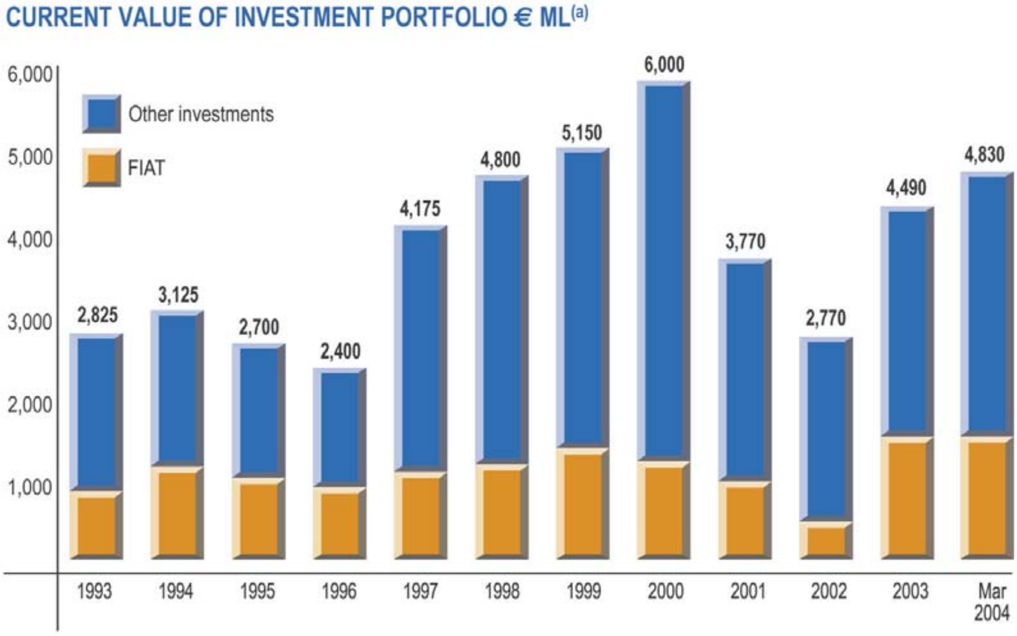
(b) Control is exercised jointly with the Auchan Group through Eurofind (50% by IFIL and 50% by Auchan); Eurofind also holds 99.06% of the savings capital stock and 88.92% of the preferred capital stock of La Rinascente.

The following charts show the composition of the investment portfolio at current values and the change in its value over the last 10 years.



Portfolio Current Value: € 4,830 m (a)

(a) Listed investments valued on the basis of the average official market prices during the period between March 1 and March 17, 2004.
(b) Through Eurofind (50% IFIL).
(c) Through NHT (100% IFIL).



(a) The current value of the portfolio is calculated consistently with the change in the accounting representation. The value of the portfolio recorded at March 2004 was calculated, as in the previous chart, using the average market prices of the listed investments from March 1 to March 17, 2004.

KEY OPERATING AND FINANCIAL DATA

The key results of the Group and IFIL S.p.A. are presented as follows:

IFIL GROUP

Condensed consolidated figures (a) € in millions	2003	2002	2001	2000	1999
Consolidated net income (loss) - Group	(45)	(367)	351	345	285

Per savings share	0.0827 (b)	-	0.2007	0.2007	0.1907

(a) These dividends will be covered in motion to be proposed to the Stockholders' Meeting convened for the approval of the financial statements for the year ended December 31, 2003.

(b) In addition to € 0.0827 for the adjustment of the preference dividends referring to 2002 for a total of € 3 million.

STOCKHOLDERS AND THE STOCK MARKET

Capital stock

At December 31, 2003, IFIL S.p.A.'s capital stock, fully subscribed to and paid-in, amounted to € 1,075,195,737 and was composed of 1,037,812,717 ordinary shares and 37,383,020 savings shares all with a par value of € 1 each.

The savings shares carry no voting rights and can either be registered or bearer shares, as elected by the stockholders. They carry the right to a preference dividend of 8.27% of their par value and to a total dividend higher than that of ordinary shares by 2.07% of the same par value.

The directors have the right, for a period of five years from the resolution passed on May 14, 2003, to increase, at one or more times, also in divisible form, the capital stock up to a maximum of € 1,500 million and to issue, at one or more times, bonds, also convertible bonds, up to the same figure but for amounts which, each time, do not exceed the limits established by law.
The directors also have the right, for a period of five years from the date of the resolution passed on May 25, 2001, to increase, at one or more times, the capital stock, excluding option rights, for a maximum amount of € 4 million, through the issue of a maximum of 4 million ordinary and/or savings shares, with a par value of € 1 each, to be offered for subscription to the employees of the Company or its subsidiaries or the parent companies or the subsidiaries of the same parent companies.

Stockholders

IFIL has approximately 33,600 stockholders.
The controlling stockholder, IFI – Istituto Finanziario Industriale S.p.A., holds 62.03% of ordinary capital stock (62.8% of ordinary capital stock outstanding).

Treasury stock

At the end of February 2004, IFIL holds 12,627,410 ordinary shares of treasury stock (1.22% of the class of stock) including 810,262 shares held through the subsidiary Soiem.
On March 29, 2004, the Board of Directors voted to present a motion to the Ordinary Stockholders' Meeting for renewal of the resolution for the authorization of the buyback of treasury stock for a maximum of 90 million IFIL ordinary shares and/or savings shares, setting aside a total of € 300 million.

Stock performance

During the first half of 2003, the share price of IFIL ordinary shares performed negatively until mid-July. After the successful conclusion of the capital stock increase, the share price began to rise and steadily continued the upward trend which made it possible to close the second half of 2003 with a 51.5% gain compared to 10.3% by the Global Index during the same period. At the beginning of 2004, the ordinary share price continues to show gains.
Even so, the overall share performance of IFIL ordinary shares for the entire year is a negative 16.1% compared to the positive 13.6% performance by the Global Index.

In the first quarter of 2003, IFIL savings shares generally followed the negative performance of the ordinary shares. Afterwards, thanks to the defensive profile which characterizes the shares and the operation for the conversion of savings shares to ordinary shares (which ended in May), the savings shares began to gain and this performance continued into the first months of 2004.
In 2003, savings shares showed a positive 7.36% performance.

During 2003, IFIL's capitalization went from € 1,300 million to € 2,800 million. This change can principally be ascribed to the two capital stock increase transactions which took place in the first half and at the beginning of the second half of 2003: the Reorganization transaction (March – May) and the capital increase (June – July). Since July 2003, IFIL's capitalization began a steady bullish trend which also continues into the first months of 2004.

During 2003, the amount and quantity of shares traded increased considerably. The increment in the volumes of ordinary shares traded (liquidity) is specifically one of the objectives reached with the Reorganization, thanks also to the success of the conversion of savings shares to ordinary shares. The conversion also explains the reduction, in absolute terms, of the volumes of savings shares traded in comparison with 2002. Such volumes, however, are important considering that, after the conversion, there are still about 37.4 million savings shares that remain outstanding.

In September, after IFIL's ordinary stock was listed on the MIDEX for mid-cap companies, the liquidity of IFIL's ordinary stock increased even more.

FINANCIAL COMMUNICATIONS AND INVESTOR RELATIONS

Again in 2003, IFIL devoted special attention to relations with stockholders, analysts, institutional investors and Italian and foreign economic journalists.

By way of information:

- more than 1,200 copies (in Italian and English) of the annual report, the first-half report and the quarterly reports have been distributed. These reports are sent, on request, to stockholders, and are also available on the corporate website at www.ifil.it;
- meetings with institutions (at Milan in July and September) and conference calls (in March) with investors and analysts have been organized;
- intensive contacts have been established through individual meetings with financial analysts and Italian and foreign institutional investors;
- far-reaching, comprehensive information has been circulated through the Italian and foreign economic and financial press.

MAJOR EVENTS IN 2003

The Reorganization of the Group

Following the resolution passed by IFIL's Extraordinary Stockholders' Meeting held on April 23, 2003, IFI and IFIL gave effect to the Group Reorganization Plan proposed by the respective Boards of Directors on March 3, 2003.

IFIL thus received the following investments and warrants as a contribution from the parent company IFI:

			Contribution value			
		% of class	Accounting value		Economic value	
	Number	of stock	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)
Fiat ordinary shares	77,944,334	17.99%	7.197	561.0	8.869	691.3
Fiat preferred shares	19,582,500	18.96%	5.165	101.1	5.165	101.1
Warrants 2007 on Fiat ordinary shares	11,216,334	-	0.319	3.6	0.319	3.6
SANPAOLO IMI ordinary shares	16,300,000	1.13%	6.605	107.7	6.605	107.7
Juventus Football Club	74,992,103	62.01%	0.156	11.7	1.823	136.7
Soiem	18,286,500	50.10%	0.516	9.4	0.633	11.6
TOTAL				794.5		1,052.0

The economic value of the contribution was calculated (with the exception of Soiem, which is unlisted and valued at net asset value) on the basis of the average official market prices on the stock exchange in the period between September 2, 2002 and February 28, 2003 and resulted in a total of € 1,052 million.
The contribution, however, was recorded for € 794.5 million in that, in accordance with the provisions of art. 3 of Legislative Decree No. 358 of October 8, 1997, the Fiat ordinary shares, the Juventus Football Club shares and the Soiem shares (representing investments in subsidiaries or affiliates) were contributed with a view to the continuity of the accounting values recorded in the financial statements of IFI S.p.A. for the year ended December 31, 2002, whereas the SANPAOLO IMI ordinary shares, the Fiat preferred shares and the Fiat 2007 warrants on ordinary shares were contributed at economic values.

In exchange for this contribution, based upon the economic value of IFIL determined for purposes of the transaction, IFIL issued to IFI 167,450,949 ordinary shares at the accounting per share price of approximately € 3.122 and 119,635,991 savings shares at the accounting per share price of approximately € 2.272. The par value of the IFIL shares issued amounted to € 287,086,940, plus € 507,460,128 of additional paid-in capital, for a total of € 794,547,068.

After this transaction, IFIL's capital stock was fully subscribed to and paid-in and amounted to € 728,824,587 and was composed of 425,105,958 ordinary shares and 303,718,629 savings shares, all with a par value of € 1.

On May 12, 2003, the voluntary conversion of IFIL savings shares to IFIL ordinary shares based upon a conversion ratio of 17 IFIL ordinary shares for every 20 IFIL savings shares was closed without payment of any cash differential. There were 266,335,609 IFIL savings shares (equal to 87.69% of savings capital stock) converted to 226,385,269 IFIL ordinary shares, which bear the same features and have the same rights as the shares outstanding. The remaining 39,950,340 IFIL savings shares were cancelled in September 2003, in conformity with the provisions of article 2445 of the Italian Civil Code, with the consequent reduction of the capital stock by € 39,950,340. In order to provide greater protection to the creditors of the company, the par value of the cancelled IFIL savings shares has been posted to an undistributable reserve except, upon authorization of the Extraordinary Stockholders' Meeting, it can be used for allocation to the capital stock account or to cover losses.

By notification on May 8, 2003, inferring illegal acts due to a conflict of interest and the unlawful valuation of the contributions in kind, the stockholder K Capital contested the resolution to increase IFIL's capital stock reserved for Istituto Finanziario Industriale S.p.A. passed by the Extraordinary Stockholders' Meeting of IFIL held on April 23, 2003 and sought compensation from IFIL for (alleged) damages (not quantified) suffered as a result of the unlawful conduct (allegedly) by IFI.
At the next hearing, scheduled for April 7, 2004, the judge will rule on the preliminary inquiries that might be presented by the litigants.
Both of the above complaints (request to declare the stockholders' resolution null and void and to seek an unspecified sum of compensation for damages) appear to be inadmissable and groundless and therefore at this time the Company does not believe that any contingent liabilities or losses will arise as a consequence.

Earlier, the appeal filed under ex article 2378, paragraph 4, of the Italian Civil Code by which the stockholder K Capital had sought the suspension of the execution of the resolution was denied by the Turin Court, by decree filed on June 9, 2003.

IFIL S.p.A. capital stock increase

On June 27, 2003, by the power vested in it pursuant to art. 2443 of the Italian Civil Code by the Extraordinary Stockholders' Meeting held on May 14, 2003, the Board of Directors of IFIL S.p.A. voted to increase the capital stock against payment, and in divisible form, for a maximum amount of par value € 386,321,490, through the issue of a maximum of 386,321,490 IFIL ordinary shares of par value € 1 each, with normal dividend rights, with option rights offered to the stockholders at a price of € 1.30, at a ratio of 57 shares for every 100 IFIL ordinary and/or savings shares held.

At the end of the rights offering period, 383,794,965 new IFIL ordinary shares were subscribed to, equal to 99.35% of the shares offered.

Following the subsequent offering of the 4,432,500 unexercised rights on the market (which generated proceeds of € 1.8 million for IFIL that were allocated as an increase to stockholders' equity), the remaining 2,526,525 new IFIL ordinary shares were subscribed to in August.

The capital stock increase was concluded, without the intervention of the Underwriting Syndicate, with the subscription of all 386,321,490 ordinary shares in the rights offering for proceeds of € 504 million (of which € 1.8 million deriving from the sale of unexercised rights).

At December 31, 2003, IFIL S.p.A. capital stock was fully subscribed to and paid-in and amounted to € 1,075,195,737 and was composed of 1,037,812,717 ordinary shares and 37,383,020 savings shares all with a par value of € 1 each.

Subscription to Fiat capital stock increase

In July 2003, Fiat S.p.A. launched the capital stock increase voted by the Board of Directors on June 26, 2003 upon the occasion of the approval and presentation of the Fiat Group Relaunch Plan.

The capital stock increase was concluded in August, without the intervention of the Underwriting Syndicate, with the subscription of all the 367,197,108 Fiat ordinary shares in the rights offering at the price of € 5 per share, for a total equivalent amount of € 1,836 million.

IFIL, after having purchased 18,791,725 rights for € 5 million, subscribed to 108,921,627 Fiat ordinary shares for an investment of € 544.6 million. On December 31, 2003, IFIL thus held 240,583,447 Fiat ordinary shares (30.06% of ordinary capital stock) and 31,082,500 Fiat preferred shares (30.09% of preferred capital stock).

Transactions regarding La Rinascente and Eurofind

In January 2003, Eurofind, the subsidiary jointly controlled by Ifil Investissements and the Auchan Group, launched a tender offer for the residual ordinary and preferred shares of La Rinascente and a voluntary tender offer for the purchase of La Rinascente savings shares for the purpose of obtaining all La Rinascente shares not yet held by Eurofind.

By the end of the offer period (February 28, 2003), the total shares tendered comprised 10,768,383 ordinary shares, equal to 3.6% of ordinary capital stock, 491,006 preferred shares, equal to 15.61% of preferred capital stock, and 2,596,139 savings shares, equal to 2.52% of savings capital stock.

The transaction involved a total payment of € 60.9 million (€ 4.45 per ordinary and preferred share and € 4.15 per savings share) and the delisting of all classes of La Rinascente stock.

In the following months, Eurofind purchased off-market 7,380,130 ordinary shares (2.47% of ordinary stock), 45,215 preferred shares (1.44% of preferred stock) and 308,225 savings shares (0.30% of savings capital stock) for a total amount of € 34.4 million.

At the end of December 2003, Eurofind holds 401,223,236 La Rinascente shares (equal to 99.09% of capital stock) and, in particular, 296,556,269 ordinary shares (99.21% of ordinary capital stock), 2,797,086 preferred shares (88.92% of preferred capital stock) and 101,869,881 savings shares (99.06% of savings capital stock).

In December 2003, La Rinascente paid extraordinary dividends of € 600 million which gave rise to receipts of € 240.6 million for the IFIL Group (€ 594.5 million for Eurofind).

In accordance with what was previously agreed, in January 2003, the subsidiary Ifil Investissements had sold a further 270,666 Eurofind shares (0.85% of capital stock) to Mediobanca at the price of € 15.2 million; likewise, the Auchan Group had sold the same stake to Société Générale.
After these transactions, Ifil Investissements and the Auchan Group each held a 40.47% interest (50% of voting rights) in Eurofind's capital stock. Mediobanca and Société Générale each owned 9.53% of Eurofind's capital stock (represented by shares without voting rights). Such holdings were covered by sale and purchase options (puts and calls) structured so as not to in any way alter the joint control over Eurofind by Ifil Investissements and the Auchan Group.
Mediobanca had a sales option (put) with IFIL on 9.53% of the Eurofind capital stock held, exercisable from June 2004 to December 2004, except for the accelerating events stated in the agreements, in line with market practice. In January 2004, Ifil Investissements exercised its call option and purchased 9.53% of Eurofind capital stock from Mediobanca for an outlay of € 116.1 million, including accrued interest and net of dividends paid by Eurofind.

Currently, Eurofind is controlled equally by Ifil Investissements and the Auchan Group, with each holding 50% of Eurofind's capital stock.

Increase in IFIL bonds

In February 2003, the IFIL bonds issued in December 2002 were increased from € 145 million to € 200 million. These are three-year bonds placed with primary institutional investors.
In December 2003, IFIL floated a second bond issue for € 100 million. These are also three-year bonds subscribed to by primary institutional investors.

Both bond issues are listed on the Luxembourg stock exchange.

Transactions relating to Worms & Cie

Ifil Investissements purchased 1,438,059 Worms & Cie shares (equal to 1.37% of capital stock) for a total equivalent amount of € 23.7 million.
After this transaction, Ifil Investissements holds 55,922,623 Worms & Cie shares, equal to 53.07% of capital stock.

In May 2003, Worms & Cie paid dividends of € 1.5 per share (including extraordinary dividends for € 0.9) which gave rise to receipts of € 83.9 million for Ifil Investissements.

Purchase of 1.96% of SANPAOLO IMI ordinary capital stock from Ifil Investissements

In May 2003, IFIL purchased 28,419,000 SANPAOLO IMI ordinary shares (equal to 1.96% of ordinary capital stock) from Ifil Investissements at a per share price of € 7.183 (corresponding to the average market price during the period April 9, 2003 – May 9, 2003) for a total of € 204.1 million. The transaction was entered into so that the entire investment in SANPAOLO IMI could be concentrated in IFIL S.p.A.

Sale of Juventus Football Club shares

In May 2003, the subsidiary Soiem sold on the market 394,000 Juventus Football Club shares (0.33% of capital stock), for a total of € 0.9 million, realizing a gain of € 0.1 million.
At December 31, 2003, IFIL held 74,992,103 Juventus Football Club ordinary shares (equal to 62.01% of capital stock).

Atlanet investment

In May 2003, the Extraordinary Stockholders' Meeting of Atlanet voted to absorb the losses in excess of stockholders' equity by reducing capital stock to zero and consequently canceling the shares outstanding. Ifil Investissements decided not to subscribe to its share (3.1%) of the recapitalization of Atlanet's capital stock and is therefore no longer a stockholder of the company.

Sale of 25% of Sifalberghi capital stock

In August 2003, IFIL sold 25% of the capital stock of Sifalberghi to the Accor Group for the price of € 32 million, realizing a gain of € 25.1 million on consolidation, with a 12.5% IRR.

Buyback of IFIL treasury stock

In September 2003, IFIL purchased 700,000 of its ordinary shares on the market, equal to 0.07% of the class of stock, for € 1.7 million; these shares were recorded in current assets since they will be used to service stock option plans.

At December 31, 2003, IFIL and the subsidiary Soiem also held 11,927,410 IFIL ordinary shares (respectively, 11,117,148 and 810,262) recorded in fixed assets, equal to 1.15% of ordinary capital stock and 1.11% of capital stock.

ANALYSIS OF IFIL GROUP CONDENSED CONSOLIDATED RESULTS

IFIL holds important investments through Dutch and Luxembourg holding companies. This control structure is the result of the Group's strategy to globalize investments and secure strategic agreements with leading foreign partners in the sectors of investment. Moreover, IFIL controls two companies incorporated under Irish law operating with the aim of optimizing the management of the financial resources of the Group, and Soiem, a services company.
The aggregate of these companies constitutes the so-called "Holdings System".

In order to assist in the analysis of the financial position and results of operations of the IFIL Group, a **condensed consolidated Balance Sheet** and a **condensed consolidated Statement of operations** have been prepared wherein the financial holding companies have been consolidated line-by-line or proportionally while the investments in the operating holding companies and in the other subsidiaries and associated companies have been accounted for using the equity method.

In detail, the scope of consolidation is as follows:

		% holding in capital stock outstanding	
		12/31/2003	12/31/2002
HOLDINGS SYSTEM	Consolidated line-by-line		
	- IFIL S.p.A.	-	-
	- Ifil Investment Holding N.V. (Netherlands)	100	100
	- Ifil Investissements S.A. (Luxembourg)	100	100
	- Ifil Capital B.V. (Netherlands)	100	100
	- Ifil Finance B.V. (Netherlands)	100	100
	- Ifilgroup Finance Ltd (Ireland)	100	100
	- Ifil International Finance Ltd (Ireland)	100	100
	- Soiem S.p.A. (a)	100	-
	- New Business Quindici S.r.l. (b)	100	-
	Consolidated proportionally		
	- Eurofind S.A. (Luxembourg)	40.47	41.32
	- Eufin Investments Unlimited (United Kingdom)	40.47	41.32
OPERATING COMPANIES	Accounted for using the equity method		
	- Fiat Group	27.62	10.88
	- Worms & Cie Group	53.07	51.71
	- Rinascente Group (c)	40.10	38.74
	- NHT Group (d)	90.00	90.00
	- Juventus Football Club S.p.A.	62.01	-
	- Sifalberghi S.r.l. (e)	-	25.00
	- Soiem S.p.A. (a)	-	49.90

(a) Control was assumed in the second quarter of 2003 following the Reorganization of the Group. The 49.9% stake in Soiem was previously accounted for using the equity method.
(b) Non-operating company purchased in December 2003.
(c) At December 31, 2003, Eurofind holds 99.09% of La Rinascente's capital stock outstanding (93.76% at December 31, 2002).
(d) New Holding for Tourism BV is the operating holding company for the tourism sector and holds the 100% stakes in Alpitour, Welcome Travel Group and Neos.
(e) Sold to the Accor Group in August 2003.

Lastly, there follows a description of the criteria applied in accounting for the transactions regarding the Reorganization of the Group (for additional details, please refer to "Major events in 2003"):

- the total accounting value of the investments contributed by the parent company, IFI S.p.A., recorded in the statutory financial statements of IFIL S.p.A., in exchange for the capital stock increase (including additional paid-in capital) reserved for IFI, amounted to € 794.5 million. In the consolidated financial statements, in order to eliminate tax interference, this value has been adjusted to the economic value attributed to the investments contributed, equal to € 1,052 million, with a contra-entry to the reserves in the consolidated stockholders' equity of the IFIL Group for € 257.5 million;

- the investment in Soiem has been consolidated line-by-line starting April 1, 2003 (previously, the investment was accounted for using the equity method);

- the investments in Fiat and in Juventus Football Club have been accounted for using the equity method starting April 1, 2003;

- the difference of € 277.1 million between the economic value of the contribution of the Fiat investment (€ 792.4 million) and the underlying share of the consolidated stockholders' equity of the Fiat Group at March 31, 2003 (€ 1,069.5 million) has been recorded in the caption "Consolidation reserve for risks and future expenses". This reserve has been partly utilized (€ 207.5 million to cover the share of the loss of the Fiat Group for the period April 1 – December 31, 2003, on the shares acquired in the contribution;

- a difference on consolidation of € 83.2 million arose from the comparison between the economic value of the contribution of the investment in Juventus Football Club (€ 136.7 million) and the underlying share of the stockholders' equity of the company at March 31, 2003 (€ 53.5 million), a portion of which, equal to € 42.8 million, has been deducted from the consolidation reserve, set up during 2003, up to the amount of the same; the remaining difference on consolidation (€ 40.4 million) is being amortized pro rata over a period of 10 years;

- the difference of € 1.9 million emerging from the comparison between the economic value of the contribution of the investment in Soiem (€ 11.6 million) and the underlying share of the stockholders' equity of the company at March 31, 2003 (€ 9.7 million) has been allocated as an increase to the value of the building owned by Soiem, within the limits of its appraisal value.

Consolidated net loss for the year and condensed consolidated statement of operations

The year 2003 closed with a consolidated net loss of € 45 million for the IFIL Group compared to a consolidated net loss of € 367 million in 2002.

The main captions of the condensed consolidated statement of operations for the year 2003 are examined in the following paragraphs.

The **Group's share of earnings (losses) of companies** accounted for using the equity method amounted to losses of € 49.7 million (losses of € 301.6 million in the year 2002). The positive change of € 251.9 million was due to the share of lower losses reported by the Fiat Group (+€ 229.3 million) and the NHT Group (+€ 8.8 million), the share of higher earnings by the Rinascente Group (+€ 65.2 million), the share of lower earnings by the Worms & Cie Group (-€ 45.8 million) and the losses reported by Juventus (-€ 5.5 million) and, finally, other changes (-€ 0.1 million).
The abovementioned changes include consolidation adjustments.

Dividends from other holdings amounted to € 21.2 million (of which € 21.1 million was received from SANPAOLO IMI).
At December 31, 2002, the dividends received from SANPAOLO IMI had totaled € 30.6 million.

Gains (losses), net, were due to the sale of 25% of Sifalberghi capital stock (€ 25.1 million) and losses, net, stemming from various transactions (- € 0.1 million). In 2002, the losses, net (-€ 51.8 million) had also included the writedowns of the investment in Club Méditerranée (-€ 33.7 million) and IFIL treasury stock (-€ 15.4 million).

Amortization of differences on consolidation amounted to € 13.7 million (€ 6.8 million in 2002).
The increase of € 6.9 million compared to December 31, 2002 was due to the increases in the investments in Juventus Football Club and in La Rinascente.

Financial expenses, net, totaled € 23.6 million (€ 20.6 million in 2002) and increased by € 3 million due to higher average net indebtedness position during the year (the reduction in gross indebtedness was more than compensated by the reduction in cash).

General expenses, net, amounted to € 13 million and decreased by € 0.4 million compared to the year 2002 (€ 13.4 million).

Other expenses, net, amounted to € 6.1 million (€ 12.2 million in 2002) and included the amortization of the expenses related to the IFIL S.p.A. capital stock increase (€ 2.2 million), nondeductible VAT associated with such costs (€ 1 million), legal consulting fees regarding pending litigation (€ 1.5 million), provisions for extraordinary expenses (to be paid over several years) in connection with recourse to the "Solidarity Fund for the support of earnings" in reference to some employees of IFIL and Soiem (€ 0.8 million) and lastly, other expenses, net, (€ 0.6 million).

Deferred taxes amounted to € 2.9 million and included deferred taxes accrued on the 2003 earnings of the foreign holdings (-€ 2.3 million) and the credit to the statement of operations for the release of excess deferred taxes set aside by IFIL in prior years (+€ 5.2 million).
Since there is no reasonable certainty of future recovery, the parent company IFIL did not book any deferred tax assets on the fiscal 2001, 2002 and 2003 tax losses and on the portions of investment writedowns posted in 2002 that, as allowed by existing tax legislation, will be deductible in future years.

The **condensed consolidated Statement of Operations** and details of the main captions are presented below.

Group's share of earnings (losses) of companies accounted for using the equity method			(49.7)	(301.6)	251.9

(a) For the NHT Group, the year coincides with the period November 1 - October 31.
(b) Result for the last three quarters of 2003; the loss of € 7.2 million for the first quarter of 2003 is not included.

At December 31, 2003, consolidation adjustments amounted to € 236.5 million (€ 33.3 million in 2002). They referred to:

- the use of the "Consolidation reserve for risks and future expenses" (+€ 207.5 million) to cover IFIL's share of Fiat Group's loss (April 1, 2003 – December 31, 2003) on the investment acquired in Fiat by IFIL in 2003 (17.039%);
- IFIL's share of the Fiat Group's result (+€ 11.8 million, equal to the gain from the dilution generated by the disposal of Fiat treasury stock held by Toro Assicurazioni, which was sold by the same Fiat);
- Worms & Cie Group's result (+€ 9.5 million, for higher gains on the sale of Groupe Danone shares and reversal of the amortization on the difference on consolidation relating to Permal Group);
- reversal of amortization taken by NHT on the difference on consolidation relating to Alpitour (+€ 7.8 million);
- allocation of Soiem's net income for the first-half of 2003 (-€ 0.1 million) to IFI.

Comments on the operating performance of the investment holdings are presented later in the report.

Total				707.9			738.9		845.4

(a) Net of writedowns of € 86.4 million made in previous years.
(b) Including 810,262 IFIL ordinary shares held by the subsidiary Soiem.
(c) Net of writedowns of € 19.3 million made in previous years.

The per share carrying value of IFIL ordinary shares (€ 3.73) is basically in line with the per share value of the consolidated stockholders' equity of the IFIL Group at December 31, 2003 (€ 3.68).

IFIL ordinary treasury stock recorded in current assets

These refer to 700,000 IFIL ordinary treasury stock (0.07% of class of stock), used to service stock option plans, recorded at the purchase price of € 1.7 million, which is below estimated realizable value.

Stockholders' equity - Group

At December 31, 2003, the stockholders' equity - Group, amounted to € 3,953.9 million (€ 2,708.1 million at the end of 2002). The positive change of € 1,245.8 million is due to the following changes:

€ in millions	
Stockholders' equity - Group at December 31, 2002	2,708.1
IFIL S.p.A. capital stock increase reserved for IFI S.p.A.	794.5 (a)
Difference between the economic value (€ 1,052 million) and accounting value (€ 794.5 million) of the investments contributed by IFI S.p.A.	257.5
IFIL S.p.A. capital stock increase against payment (b)	504.0
Posting of the consolidation reserve arising from the increases in the investments in Fiat and Worms & Cie	42.8
Use of consolidation reserve for the amortization of the difference on consolidation on Juventus Football Club	(42.8)
Translation adjustments (-€ 272.9 million) in the stockholders' equity of companies accounted for using the equity method and other changes, net (+€ 7.7 million)	(265.2)
Consolidated net loss - Group	(45.0)
Net change during the year	1,245.8
Stockholders' equity - Group at December 31, 2003	3,953.9

(a) Accounting value of IFIL shares issued.

(b) Includes the gain on sale of unexercised rights for € 1.8 million.

Consolidated net financial position of the "Holdings System"

The consolidated net financial position of the "Holdings System" refers to companies consolidated line-by-line and proportionally and showed a net indebtedness position at December 31, 2003 of € 234.7 million (€ 484.4 million at the end of 2002). The composition of the consolidated net financial position is detailed as follows:

	12/31/2003			12/31/2002		
€ in millions	Short-term	Medium/ long-term	Total	Short-term	Medium/ long-term	Total
Cash and short-term investments	434.6	0.0	434.6	244.5	0.0	244.5
Other assets (financial accrued income and prepaid expenses)	0.2	0.0	0.2	0.3	0.0	0.3
Total financial assets	434.8	0.0	434.8	244.8	0.0	244.8
Borrowings from banks	(216.9)	(150.0)	(366.9)	(428.5)	(150.0)	(578.5)

(a) Including the gain on sale of unexercised rights for € 1,8 million.
(b) Cash of the subsidiary Soiem, consolidated line-by-line beginning 2003.

Since the end of June 2003, Standard & Poor's Rating Services has assigned an "A-" rating to IFIL's long-term debt and an "A2" rating to its short-term debt, with a negative outlook.

ANALYSIS OF IFIL GROUP CONSOLIDATED RESULTS

The summarized consolidated **Statement of Operations** and the summarized consolidated **Balance Sheet** drawn up in accordance with Legislative Decree 127/91 (line-by-line consolidation), as well as the composition and the change in the line-by-line consolidated net financial position are shown below.

Summarized consolidated statement of operations (line-by-line consolidation)

€ in millions	2003	2002
Value of production	55,554	5,390
Costs of production	(55,941)	(5,246)
Difference between value and costs of production	(387)	144
Financial expenses, net	(982)	(14) (a)
Adjustments to financial assets	(83)	(459) (a)

Financial payables	24,345	2,533
Other liabilities	27,697	1,248
Total liabilities and stockholders' equity	69,871	8,139

The line-by-line consolidation of the Fiat Group and the subsidiary Soiem beginning from April 1, 2003 does not make it possible to homogeneously compare the 2003 data with the data previously published in 2002, wherein the investments then held in the Fiat Group and in Soiem had been valued using the equity method. Accordingly, to facilitate the comparative analysis, the consolidated data of the IFIL Group at December 31, 2002 has been restated to give effect to the line-by-line consolidation of the economic and balance sheet data of the Fiat Group and Soiem (please refer to the statements on the following page), however without modifying the previously published economic results and consolidated stockholders' equity of the IFIL Group.

Consolidated net financial position (line-by-line consolidation)

The consolidated net financial position (line-by-line consolidation) showed a net indebtedness position of € 4,230 million (€ 5,357 million at December 31, 2002).

At December 31, 2003, the consolidated net financial position (line-by-line consolidation) was composed as follows:

€ in millions	12/31/2003	12/31/2002 (restated) (a)	Change
Cash	3,461	3,733	(272)
Marketable securities and other short-term investments	4,269	1,828	2,441
Financial receivables, finance lease contracts receivable and other financial fixed assets	12,959	21,805	(8,846)
Financial accrued income and prepaid expenses	387	662	(275)

Financial payables due beyond one year	(16,071)	(21,228)	5,157
Financial accrued expenses and deferred income	(961)	(1,928)	967
Total financial payables	(25,306)	(33,385)	8,079
Consolidated net financial position (line-by-line consolidation)	(4,230)	(5,357)	1,127

(a) Restated for purposes of comparison to give effect to the line-by-line consolidation of the data of the Fiat Group and Soiem.

Reconciliation between the consolidated net financial position of the "Holdings System" and the net financial position (line-by-line consolidation)

€ in millions	12/31/2003	12/31/2002 restated (a)	Change
Consolidated net financial position of the IFIL "Holdings System"	(235)	(479)	244
Adjustment to eliminate the net financial position of the holdings consolidated proportionally (b)	(6)	(52)	46
Consolidated net financial position:			
- Fiat Group	(3,028)	(3,780)	752
- Worms & Cie Group	(887)	(999)	112
- NHT Group	(74)	(47)	(27)
Consolidated net financial position (line-by-line consolidation)	(4,230)	(5,357)	1,127

(a) Restated for purposes of comparison to give effect to the line-by-line consolidation of the data of the Fiat Group and Soiem; the latter is included in the "Holdings System".

(b) Balances not included in the consolidated financial statements (line-by-line consolidation) of the IFIL Group since they refer to Companies accounted for using the equity method (consolidated, instead, proportionally in the "Holdings System").

Research and development costs

In 2003, research and development costs expensed directly to income during the year totaled € 1,763 million, including € 1,747 million relative to the Fiat Group (€ 1,748 million in 2002) and € 16 million relative to the Worms & Cie Group (€ 14 million in 2002).

ANALYSIS OF IFIL S.p.A. STATUTORY RESULTS

Net income for the year and summarized statement of operations of IFIL S.p.A.

The net income of IFIL S.p.A. for 2003 was € 72.7 million, compared to the net loss of € 516.4 million for 2002 due to writedowns of the carrying values in the investments held, directly and indirectly, in Fiat, Club Méditerranée and Soiem, and also in IFIL treasury stock.

The main captions of the summarized statement of operations are described in the following paragraphs.

Dividends received from holdings amounted to € 76.8 million (€ 54,5 million in 2002). The increase of € 22.3 million is due to higher dividends paid by the subsidiaries Ifil Investissements and Ifil Investment Holding (+€ 36 million) and by SANPAOLO IMI (+€ 6.5 million, following the increase in the investment) and the absence of dividends from Fiat (-€ 20.2 million).

Gains (€ 23 million) derived from the sale of 25% of Sifalberghi capital stock.

Financial expenses, net, amounted to € 28.6 million in 2003 and decreased by € 1.8 million due to lower average indebtedness during the year.

General expenses, net, increased by 1.8% (from € 11.3 million to € 11.5 million) mainly as a result of higher personnel expenses.

Other expenses, net, equal to € 4.4 million, included the amortization of costs connected with capital stock increases (€ 2.2 million), nondeductible VAT associated with such costs (€ 1 million), legal consulting fees regarding pending litigation (€ 1.5 million), extraordinary expenses (to be paid over several years) in connection with recourse to the "Solidarity fund for the support of earnings" (€ 0.3 million) and, lastly, other income, net (€ 0.6 million).

The taxable income calculated in accordance with tax laws did not generate any current income taxes for 2003 and led to the release of excess deferred income taxes payable of € 5.2 million booked in prior years. Since there is no reasonable certainty of future recovery, the parent company IFIL did not book any deferred tax assets on the fiscal 2001, 2002 and 2003 tax losses and on the portions of investment writedowns posted in 2002 that, as allowed by existing tax legislation, will be deductible in future years.

The summarized statement of operations is presented below:

€ in millions	2003	2002	Change
Dividends	76.8	54.5	22.3
Dividend tax credits	12.2	16.2	(4.0)
Gains	23.0	1.8	21.2
Writedowns	0.0	(537.7)	537.7
Income/(expenses), net, from investments and other financial fixed assets	112.0	(465.2)	577.2

	41.7	41.7	0.0
Total financial fixed assets	3,808.3	2,520.8	1,287.5

(a) Associated companies up to December 31, 2002.
(b) Carried at € 9,668.

The net increase in financial fixed assets of € 1,287.5 million was the result of the following movements:

€ in millions		
Financial fixed assets at December 31, 2002	2,520.8	
Contribution by IFI S.p.A.:		
- Fiat, 77,944,334 ordinary shares (17.99% of the class of stock)	561.0	
- Fiat, 11,216,334 warrants 2007 on ordinary shares	3.6	
- Fiat, 19,582,500 preferred shares (18.96% of the class of stock)	101.1	
- SANPAOLO IMI, 16,300,000 ordinary shares (1.13% of the class of stock)	107.7	
- Juventus Football Club, 74,992,103 shares (62.01% of capital stock)	11.7	
- Soiem, 18,286,500 shares (50.1% of capital stock)	9.4	
	794.5	
Other increases (decreases)		
- Fiat, subscription to 108,921,627 ordinary shares (capital stock increase)	549.6	(a)
- SANPAOLO IMI, purchase of 28,419,000 ordinary shares (1.96% of the class of stock) by Ifil Investissements	204.1	
- Soiem, payment against future capital increase	2.7	
- Ifil Investissements, partial reimbursement of additional paid-in capital	(254.4)	
- Sifalberghi, sale of 25% capital stock	(9.0)	
	493.0	
Net change during the year	1,287.5	
Financial fixed assets at December 31, 2003	3,808.3	

(a) Including purchase of rights for € 5 million.

A comparison of carrying values and market prices of listed financial fixed assets shows the following unrealized gains (losses):

€ in millions	Fiat ord. shares	Warrants 2007 Fiat ord. shares	Fiat pref. shares	SANPAOLO IMI	Juventus	IFIL ord. shares	Total
Market price at December 30, 2003	(123.0)	0.3	(31.8)	269.6	114.0	(12.6)	216.5
Average market price in the second half of 2003	(76.6)	1.6	(28.2)	193.9	133.5	(15.8)	208.4
Average market price March 1-17, 2004, update	(133.8)	0.2	(31.4)	256.8	105.4	(10.2)	187.0

The carrying values of Fiat ordinary and preferred shares (respectively, € 6.65 and € 4.73) are lower than the per share value of the consolidated stockholders' equity of the Fiat Group at December 31, 2003 (€ 6.91).

The per share carrying value of IFIL ordinary shares (€ 3.75) is substantially in line with the per share value of the consolidated stockholders' equity of the IFIL Group at December 31, 2003 (€ 3.68).

Stockholders' equity

Stockholders' equity at December 31, 2003 amounted to € 3,194.4 million (€ 1,823.2 million at December 31, 2002). The positive change of € 1,371.2 million was due to the following changes:

€ in millions		
Stockholders' equity at December 31, 2002	1,823.2	
Capital stock increase reserved for IFI S.p.A.	794.5	(a)
Capital stock increase against payment	504.0	(b)
Net income for 2003	72.7	
Net change during the year	1,371.2	
Stockholders' equity at December 31, 2003	3,194.4	

(a) Accounting value of the IFIL shares issued.
(b) Including the sale of unexercised rights for € 1.8 million.

Net financial position

The net financial position of IFIL S.p.A. at December 31, 2003 showed a net indebtedness position of € 677.8 million (€ 729.2 million a the end of 2002) which is composed as follows:

€ in millions	12/31/2003	12/31/2002	Change
Short-term financial receivables	0.2	0.0	0.2
Bonds	(300.0)	(145.0)	(155.0)
Financial payables:			
- short term	(216.9)	(428.5)	211.6
- medium-term	(150.0)	(150.0)	0.0
Financial payables to subsidiaries	(8.6)	0.0	(8.6)
Financial accrued expenses	(2.5)	(5.7)	3.2
Net financial position	(677.8)	(729.2)	51.4

The positive change, equal to € 51.4 million in 2003, resulted from the following cash flows:

€ in millions		
Net financial position at December 31, 2002		(729.2)
Dividends received from holdings		76.8
Financial expenses, net		(28.6)
General expenses, net		(11.5)
Investments:		
- Fiat, subscription to 108,921,627 ordinary shares	(549.6) (a)	
- SANPAOLO IMI, purchase of 28,419,000 ordinary shares (1.96% of the class of stock) from Ifil Investissements	(204.1)	
- Soiem, payment against future capital increase	(2.7)	
- IFIL, purchase of 700,000 ordinary shares (0.07% of the class of stock)	(1.7)	
Investments		(758.1)
Sale of 25% of Sifalberghi capital stock		32.0
Partial reimbursement of additional paid-in capital by Ifil Investissements		254.4
Other changes:		
- IFIL S.p.A. capital stock increase against payment	504.0 (b)	
- Capital stock increase expenses	(11.2)	
- Other, net	(6.4)	
Other changes		486.4
Net change during the year		51.4
Net financial position at December 31, 2003		(677.8)

(a) Including the purchase of rights for € 5 million.
(b) Including the proceeds on the sale of unexercised rights for € 1.8 million.

OTHER INFORMATION

Corporate structure of the Group

IFIL holds important investments through Dutch and Luxembourg holding companies. This control structure is the result of the Group's strategy to globalize investments and secure strategic agreements with leading foreign partners in the sectors of investment.

Moreover, IFIL controls two companies incorporated under Irish law which operate with the aim of optimizing the management of the financial resources of the Group, Soiem and the services companies.

Possible Fiat S.p.A. capital increase in execution of the Convertible Mandatory Facility agreements dated July 26, 2002

In 2003, the major rating agencies downgraded Fiat's debt to below investment grade level and, accordingly, should this condition exist at July 2004, the lending Banks could bring forward the conversion of the debt to capital stock for an amount up to € 2 billion.

In this eventuality, should IFIL decide not to exercise, in whole or in part, the option rights to which it is entitled or should it not be in a condition to exercise, in whole or in part, such rights, the investment held by IFIL in Fiat could be diluted to below 30% of the capital stock with voting rights.

Transition to International Financial Reporting Standards

Following the coming into force of the European Union Regulation No. 1606, dated July 19, 2002, beginning from 2005 those EU companies whose securities are traded on an EU regulated market must prepare their consolidated financial statements in accordance with International Financial Reporting Standards (IFRS/IAS).

IFIL is operating on three levels to ensure a proper transition.

At its operating subsidiaries and associated companies (Fiat, Worms & Cie, Juventus F.C., New Holding for Tourism and La Rinascente), IFIL has taken note of the transition processes in progress, agreeing the timetables to obtain the 2003 and 2004 data, in compliance with IFRS, which will be necessary for the preparation of the opening consolidated balance sheet as at January 1, 2004, as well as the 2004 interim quarterly and semi-annual consolidated financial statements of the IFIL Group, prepared in accordance with IFRS (to be shown for comparative purposes with the equivalent data for 2005).

With regard to IFIL and the Italian and foreign subsidiaries that are part of the "Holdings System", a working group was created to identify the differences between the national and Group accounting principles currently in place and the IFRS/IAS, to ascertain the adequacy of the accounting systems and procedures compared to the new requirements and to ensure that each company prepares, on a timely basis, the necessary accounting statements (equivalent to those examined with regard to the operating subsidiaries and associated companies).

Finally, a working group was established at IFIL, which includes a representative of each operating subsidiary and associated company, to verify the observance of deadlines, gather information on the progress of the transition processes at Group companies, contribute to the timely distribution of updates of the standards and, where necessary, manage the consistency of interpretation of the new standards within the companies of the Group.

With regard to IFIL S.p.A., the first indications from the work performed to date are that the adoption of the new IFRS will principally impact the following items:

Financial fixed assets:	the LIFO method (last in-first out) can no longer be used.
Treasury stock:	the carrying value of treasury stock should be recorded as a reduction of stockholders' equity; any gains/losses deriving from disposals should be recorded in stockholders' equity.
Employee severance indemnities and employee benefits:	should be recalculated for each employee in accordance with the provisions of IAS19; to that end, the Company will use an independent actuary.
Intangible fixed assets:	the residual balance of some costs that benefit more than one year that have been capitalized and amortized in accordance with the regulations in force should be eliminated from assets and recorded as a reduction of stockholders' equity.

Transactions among Group companies and with related parties

Transactions among IFIL, the parent companies, the subsidiaries and the companies in which a significant influence is exercised are entered into in conformity with the provisions of existing laws, based upon an evaluation of reciprocal economic gain.

In addition to the comments in respect of the Reorganization of the Group, the most important transactions can be summarized as follows:

- services rendered to subsidiaries and associated companies and recoveries of costs;
- services rendered by the parent company, IFI, and by the subsidiary Soiem;
- purchase of 28,419,000 SANPAOLO IMI ordinary shares (1.96% of the class of stock) from Ifil Investissements for € 204.1 million;
- partial reimbursement of additional paid-in capital by Ifil Investissements for € 318.7 million, of which € 254.3 million to IFIL and € 64.3 million to Ifil Investment Holding;
- use of loans from the subsidiary Soiem for € 8.5 million and from the parent company, Giovanni Agnelli e C., for € 51.7 million (repaid in May) bearing interest at monthly floating market rates;
- sale of receivables from the tax authorities to the subsidiary Francorosso Incentive (€ 250 thousand);
- payment of € 2.7 million to the subsidiary Soiem to be used to set up the undistributable reserve, pursuant to art. 2359 bis, paragraph 4, of the Italian Civil Code, in respect of the carrying value of IFIL ordinary shares owned by Soiem.

The effects on the balance sheet and statement of operations of the transactions among IFIL S.p.A., the Group companies and the other related parties can be summarized as follows:

The IFIL Group, through the Companies which make up the Group, has maintained and maintains relations with "related" parties as defined by Consob, which, even when considered from the standpoint of potential conflicts of interest, are nonetheless governed by market terms. In this sense, particular mention should be made of:

- option rights on IFIL ordinary shares granted to Directors and Managers of IFIL, the parent company, IFI, and the subsidiary Soiem;
- option rights on Alpitour shares granted by Alpitour to the Directors of IFIL under a stock option plan for the Directors, Managers and Cadres of Alpitour and its direct and indirect subsidiaries.

In February 2003, all the Directors and Managers of the Group, who had the right, sold their Atlanet shares to Ifil Investissements (from which they had previously bought the Atlanet shares) at prices slightly lower than the investments made.

With a view to optimizing the management of the Group's financial resources, loan transactions were entered into among foreign companies of the Group during the year.

Additionally, certain transactions between Group companies and related parties are described in the following paragraphs:

- partial reimbursement of additional paid-in capital:
  - by Eurofind to Ifil Investissements for € 240.7 million;
  - by Ifil International Finance to Ifil Investissements for € 120 million;
  - by Eufin Investments to Eurofind for € 111.5 million;
- payments against future capital increases by Ifil Investissements to Ifil International Finance for € 255 million.

In March 2003, Alpitour purchased 60% of the capital stock of Altamarea, headed by three current directors of the same company, for € 2.2 million.

In October 2003, Francorosso Incentive purchased 30% of the capital stock of Promoviaggi, headed by two current directors of the same company, for € 1.1 million.

In January 2003, the NHT Group repaid a US$ 4.4 million loan secured from companies headed by two directors of Maldivian subsidiaries.

During the course of the year, the Director Franzo Grande Stevens rendered professional services to the Fiat Group for consideration of € 875 thousand.

Additional information and details (including commitments for purchases and sales of investments, dividends received and purchases and sales of investments) are disclosed in the section "Major events in 2003" of the Directors' report on operations, in the "Notes to the statutory financial statements of IFIL S.p.A." and in the consolidated financial statements.

On the basis of information received from the companies of the Group, there are no exceptional or unusual transactions to report.

Equity investments held by Directors, Statutory Auditors and General Manager
(Art. 79 of Consob resolution No. 11971 dated May 14, 1999 and subsequent amendments)

SIGNIFICANT SUBSEQUENT EVENTS

Purchase of 9.53% of Eurofind capital stock

As stated earlier, in January 2004, Ifil Investissements purchased 3,029,651 Eurofind shares (equal to 9.53% of capital stock) from Mediobanca for an investment of € 116.1 million.
Eurofind's capital stock is currently held equally by the IFIL Group (50%) and the Auchan Group (50%).

Purchase of 10% of NHT New Holding for Tourism capital stock

In January 2004, Ifil Investissements purchased 3,298 NHT New Holding for Tourism shares (equal to 10% of capital stock) from the TUI Group for an outlay of € 46.3 million. As part of this transaction, NHT also purchased the remaining 50% of the capital stock of Neos S.p.A. from the TUI Group for an investment of € 2.7 million.
IFIL currently holds, through the subsidiaries Ifil Investissements and Ifil Finance, complete control of NHT.

IFIL's new organization in the United States of America

For the purpose of contributing to the search for new investment opportunities, IFIL set up an organization in the United States with offices in New York. Thanks to its positioning in one of the most interesting international financial centers and with its highly-qualified professional management staff, the organization – which will operate in close coordination with IFIL's offices in Turin – could significantly boost the opportunities of creating economic value for the Company.

Change in the consolidated net financial position of the "Holdings System"

At the end of February 2004, the net financial position of the "Holdings System" showed an indebtedness position of € 393 million. The net negative change during the period (€ 158.3 million) was determined by the following flows:

€ in millions	
Consolidated net financial position of the "Holdings System" at December 31, 2003	(234.7)
Purchase of 9.53% of Eurofind capital stock (from Mediobanca)	(116.1)
Purchase of 10% of capital stock of NHT New Holding for Tourism (from the TUI Group)	(46.3)
Financial expenses, net	(4.9)
Receivables collected from the tax authorities	8.8
Other changes, net	0.2
Net change during the period	(158.3)
Consolidated net financial position of the "Holdings System" at the end of February 2004	(393.0)

Programming document on security

The Company has prepared the programming document on security (Dps) for the year 2003 according to the laws then in force and is currently proceeding to update this document pursuant to the provisions of Legislative Decree No. 196 dated June 30, 2003, Attachment B – technical specifications regarding minimum safety measures.

BUSINESS OUTLOOK

For 2004, the parent company, IFIL S.p.A., based on the data available to date, is expected to report a profit.

The consolidated result of the IFIL Group for 2004 will be closely linked to the performance of its main holdings. The forecasts formulated by the holdings themselves are as follows:

Fiat Group

The forecast for 2004 calls for the global economy to grow, driven by expansion in the United States and Southeast Asia. However, the growth rates projected for Italy and the rest of Europe are significantly lower. Consequently, the Fiat Group will be faced with market demand that will expand slightly in the United States but hold relatively steady in most other countries, and with aggressive competition from other carmakers.

In this environment, all of the Group's Sectors will strive to achieve significant gains in profitability. They will pursue this goal by following the guidelines set out in the Relaunch Plan, by restructuring and by streamlining their manufacturing operations. At the same time, they will be making major investments in renewing their product range and improving their distribution networks.

The Group will continue to strengthen its management organization by pursuing a strategy of bringing in top professionals from the outside and leveraging the competencies available inside.

While taking into account the current business outlook, management's goal will continue to be to achieve the objectives of the Relaunch Plan: an operating breakeven for the Group, a further reduction of Fiat Auto's losses and better operating results than in 2003 from all other Sectors.

Worms & Cie Group

In 2003, although operating in a difficult economic context, the companies of the Worms & Cie Group raised or maintained their market share and took structural actions that will make it possible to consolidate or improve their operating results in 2004.

The first two months of 2004 confirm this forecast with a strong level of activities for the subsidiaries SGS and Permal Group and make it possible to anticipate a gradual turnaround in the paper sector where manufacturing costs are being subjected to a rigorous controlling policy.

Rinascente Group

In the first two months of 2004, the Rinascente Group reported sales of € 1,023.9 million, with an increase of 7.9% compared to the corresponding period of the prior year.

In an economic context with growth forecasts uncertain, the Rinascente Group will support every commercial initiative necessary to pursue the objectives of efficiency and process effectiveness in order to preserve and, if possible, improve the operating result.

NHT Group

In view of the actions undertaken to reduce operating costs and the performance during the first few months, the NHT Group is forecasting a further improvement in its results for the year 2003/2004. However, the impacts deriving from a worsening of international political tension, partly as a result of recent terrorist attacks in Spain, could make reaching the anticipated results more difficult.

Juventus Football Club

Juventus, in light of the economic and balance sheet performance for the first six months of the year and information available to date, should register a negative net result for the year that will end on June 30, 2004. Such result could nevertheless be significantly affected by any extraordinary transactions regarding its assets.

SANPAOLO IMI

SANPAOLO IMI recently announced the distribution of dividends per share of € 0.39 which will bring IFIL receipts of € 27.4 million.

PERFORMANCE OF THE MAJOR GROUP COMPANIES

FIAT

(30.06% of ordinary capital stock and 30.09% of preferred capital stock)

For the Fiat Group, 2003 was a difficult and challenging year of transition.
The Company operated in a global economy characterized by stagnant or contracting markets, while contending with the strengthening of the euro versus the U.S. dollar and other major currencies as well as the impact of highly destabilizing international political events. At the same time, in 2003 Fiat launched one of the most profound transformations in its history: a new management team was put in charge in late February. June saw the launch of a four-year industrial and financial plan; and the Group drastically altered the scope of its operations, focusing on its core automotive businesses and divesting a number of companies: Toro Assicurazioni, FiatAvio, FiatAuto's European and Brazilian retail financing operations, Fraikin, and a controlling interest in IPI.
The results for the full year 2003 show that the Group's continuing operations made significant progress. Most importantly, Fiat Auto is already beginning to benefit from cost reductions and the industrial synergies developed with General Motors, even though profit margin improvements were not fully realized, as new models launched at the end of 2003 could not produce their full positive impact on the year's result. There are still challenges ahead as the Group continues on its long and difficult course, but Fiat can take satisfaction in having met its goals for 2003 and brought its main operating and financial metrics in line with the objectives of its Relaunch Plan.

As regards the main activity sectors, in 2003, **Fiat Auto** worked hard to launch new products, upgrade its existing models and improve the performance of its industrial operations. This effort gained fresh momentum during the second half of the year with the start of specific programs implemented under the Relaunch Plan. Special focus was placed on increasing the competitiveness of Fiat Auto's cost structure, revitalizing its technological innovation capabilities and requalifying its distribution networks. Most importantly, Fiat Auto significantly stepped up the renewal of its product line, launching four new models (Lancia Ypsilon, Fiat Panda, Fiat Idea, Alfa GT) and overhauling three existing models (Fiat Punto, Alfa 156 and Alfa 166). These new products were immediately welcomed by the motoring public and received prestigious international rewards. Most notably, the Fiat Panda was named 2004 Car of the Year.
Fiat Auto reported revenues of € 20,010 million for 2003, 9.6% less than the € 22,147 million reported in 2002, due to the contraction in sales volumes and disposal of retail financing activities (decrease of approximately 8% on a comparable basis). Fiat Auto sold a total of approximately 1,700,000 automobiles and light commercial vehicles, down to 8.8% less from 2002. In Western Europe, 1,179,000 units were sold and the decrease was 9.4% with respect to the previous year. The main causes for this downturn were persistent softness on its principal markets, growing competitive pressures, and anticipation leading up to the introduction of new products. The new models came onto the market only at the end of 2003 and, thus the benefits deriving from their sale were only marginal. FiatAuto reduced its operating loss, equal to € 979 million in 2003, compared with a loss of € 1,343 million in 2002. On a comparable basis – excluding from both years the results of the financial companies that were sold – the reduction in losses totaled € 468 million. This improvement is the result of savings on product costs and overhead deriving from the cost reduction plan and industrial synergies generated by the alliance with General Motors; on the other hand, the Sector suffered from the negative effects of lower volumes and higher research and development costs.

In 2003, **CNH** posted revenues of € 9,418 million, -10,4% compared with the € 10,513 million reported in the previous year, in consequence of the negative foreign exchange effect caused by the weakening of the dollar against the euro. On a comparable basis, revenues would have been largely unchanged from the previous year, insofar as the higher revenues from agricultural equipment sales were offset by the reduction in revenues from construction equipment.
CNH posted operating income of € 229 million in 2003, up from the € 163 million reported in 2002, notwithstanding the negative foreign exchange effect stemming from appreciation of the euro. The Sector result improved markedly thanks to improved margins on new products, higher sales prices, and cost savings realized through the integration plans with Case and the Relaunch Plan. These factors more than compensated for the negative impact of volumes and product mix, the costs associated with the introduction of new products, and higher social security and medical costs for its employees.

Iveco had revenues of € 8,440 million in 2003, down by 7.6% from the € 9,136 million reported in 2002, caused by the disposal of activities and deconsolidation of Naveco. On a comparable basis, revenues would have been virtually the same as in 2002.
Iveco closed fiscal year 2003 with operating income of € 81 million, against income of € 102 million in the previous year, which included the positive result of sold activities.
On a comparable basis, it would have posted a slight decrease: the Sector was negatively impacted by a contraction in volumes and intense price pressures, connected with the difficult market situation, and an unfavorable foreign exchange effect. Iveco responded to these negative factors by significantly reducing manufacturing costs and overhead.
In 2003, Iveco continued to work tirelessly on product innovation. The most recent fruits of these efforts include the Stralis equipped with the innovative Active Day and Active Time cabs, which was honored with the 2003 Truck of the Year award, and the recent launch of the New Eurocargo, which represents a further enhancement of the Sector's line of intermediate vehicles.

The consolidated results of the Fiat Group in 2003 can be summarized as follows:

			Change	
€ in millions	2003	2002	Amount	%
Net revenues	47,271	55,649	-8,378	-15.1%
Operating result	(510)	(762)	+252	-33.1%
Result before taxes	(1,298)	(4,817)	+3,519	-73.1%
Group's interest in net result	(1,900)	(3,948)	+2,048	-51.9%
Investments in property, plant and equipment and R&D	3,758	4,519	-761	-16.8%
Cash flows provided by operations	321	(1,649)	+1,970	-119.5%
Net financial position	(3,028)	(3,780)	+752	-19.9%
Number of employees	162,237	186,492	-24,255	-13.0%

Fiat Group's **net revenues** totaled € 47,271 million in 2003, reflecting a 15.1% decrease from the previous year, largely due to the disposal of activities. If continuing operations are considered – excluding the revenues of businesses sold in 2003 from the values for both fiscal years – the reduction would have been 7.3%. The negative foreign exchange effect caused by appreciation of the euro against other currencies and contraction in the volumes of Fiat Auto were the principal causes of the change.

The 2003 **operating result** reflected a reduction in losses, which decreased from € 762 million in 2002 to € 510 million in 2003. This improvement of € 252 million is even more evident if the performance of Continuing Operations alone is considered, which reported a € 634 million decrease in operating loss (from a loss of € 1,348 million in 2002 to a loss of € 714 million in 2003). The recovery accelerated over the course of the year, reflecting the efficiency gains realized through implementation of the Relaunch Plan.

The **Group's consolidated interest in net result** reported a loss of € 1,900 million, compared with a loss of € 3,948 million in fiscal year 2002. This improvement, which reflects the decrease in the operating loss, was also made possible by:

- better results from the equity investments, equal to - € 156 million compared to a negative balance of € 690 million for the previous year, which included the losses incurred by marking equity securities portfolios held by the insurance companies, which were sold in May 2003;
- a reduction in non-operating charges, which decreased mainly due to lower provisions, restructuring charges and extraordinary asset writedowns;
- higher gains earned on asset disposals compared with 2002. These gains included € 1,258 million, net of transaction costs, on the sale of FiatAvio; € 390 million, net of transaction costs, on the disposal of Toro Assicurazioni; € 103 million on the disposal of Fiat Auto's Brazilian retail financing operations; and € 15 million on the sale of IPI. Non-operating income earned in 2002 included, among other items, the gains generated by the disposals of a 34% interest in Ferrari and a 14% interest in Italenergia Bis.

  Net income taxes for the year totaled € 650 million, compared with a credit of € 554 million in 2002. In particular, the income taxes due for fiscal year 2003 include the use of the tax assets that had been previously recorded against expected gains on disposal of the Toro Assicurazioni Group and FiatAvio S.p.A., which were subsequently realized.

As for the equity and financial aspects:

- **Consolidated stockholders' equity - Group** at December 31, 2003 was € 6,793 million, compared to € 7,641 million at December 31, 2002;

- The **net financial position**, i.e. net indebtedness (financial payables and related accruals and deferrals, net of cash and securities) minus financial receivables, totaled - € 3,028 million at December 31, 2003, reflecting an improvement of € 752 million compared with the negative net financial position of € 3,780 million at December 31, 2002. During the fiscal year, the net resources generated by disposals and the capital increase concluded in August more than offset the financial and operating requirements (loss for the fiscal year and increase in working capital).

€ in millions	31/12/2003	31/12/2002	Change
Financial payables, net of intersegment	(22,034)	(28,923)	6,889
Accrued financial expenses	(593)	(785)	192
Prepaid financial expenses	85	118	(33)
Cash	3,211	3,489	(278)
Securities	3,789	1,507	2,282
Net indebtedness	(15,542)	(24,594)	9,052
Financial receivables and lease contracts receivable	12,576	21,406	(8,830)
Accrued financial income	301	543	(242)
Deferred financial income	(363)	(1,135)	772
Net financial position	(3,028)	(3,780)	752

At December 31, 2003, the financial payables included:

- bonds for € 9,610 million;
- the five year bond issued at the beginning of 2002 and exchangeable for 32,053,422 General Motors shares (US$ 2,229 million – equal to € 1,765 million). It should be noted, however, that each bondholder has the right to request early reimbursement, with payment on July 9, 2004, of all or part of his bonds pursuant to the terms and conditions envisaged in the issue prospectus;
- borrowings from banks for a total of € 9,384 million. This amount includes, among others, the mandatory convertible facility (€ 3 billion) and the loan by Citigroup (lead manager of a restricted pool of banks), secured by the agreements with EDF as part of the Italenergia Bis transaction (approximately € 1,150 million).

Financial receivables and finance lease contracts receivable at December 31, 2003, include financial receivables from the dealer network totaling € 2,020 million (€ 1,904 million at December 31, 2002). Receivables from the dealer network are a typical component of the portfolio of the financial services companies. The receivables from the dealer network illustrated in the preceding table are net of allowances for doubtful accounts totaling € 313 million at December 31, 2003 (€ 333 million at December 31, 2002), computed on the basis of historical statistical analyses and updated according to evolutions in market trends. At December 31, 2003, the Group held guarantees totaling over € 2 billion as security for these receivables.

The Group met the targets agreed to with the lending banks under the mandatory convertible facility agreement by reducing its net financial position to € 3 billion and reducing gross indebtedness to € 23.6 billion. At December 31, 2003, gross indebtedness totaled € 22.5 billion, while net financial position was substantially in line with the agreed target without using the previously mentioned Citigroup loan (approximately € 1,150 million) to reduce net financial position (approximately € 3,028 million), as determined by the agreements with the lending banks.

At December 31, 2003, the rating assigned to the Fiat Group by the leading rating agencies was “non investment grade”. Therefore, if this situation persists, in July 2004, the banks could convert up to € 2 billion of the principal loaned into equity.

As regards the significant events occurring since the end of the fiscal year, the most relevant transactions completed by the Fiat Group during early months of 2004 are reviewed below:

- in February 2004, 100% of the interest held in Fiat Engineering S.p.A. was sold to Maire Investimenti S.p.A. At the same time, Fiat Partecipazioni S.p.A. subscribed to a capital increase in Maire Investimenti S.p.A. and now owns 30% of its capital. On said 30% interest, both parties hold call and put options that are exercisable within three years at a predetermined price;
- Fiat signed an agreement to sell 65 million ordinary shares of Edison S.p.A., representing Fiat's direct stake in Edison. Fiat retains its 24.6% interest in Italenergia Bis, the controlling entity of Edison. The transaction does not change any of the future strategic options of the Fiat Group;
- with regard to the new products introduced during the first quarter of 2004, Fiat Auto chose the 74th International Geneva Motor Show for the worldwide introduction of several Fiat-brand models, including the on-road and off -road versions of the gasoline and diesel-powered Panda 4X4, the new Fiat Multipla with updated styling, and the Trepiùno, a small car that serves as a styling and technological laboratory for the development of future microcars.
  Alfa Romeo staged the worldwide launch of the Alfa Crosswagon, a sporty and elegant all-wheel-drive car capable of handling off-road driving conditions.
  Lancia presented to buyers worldwide its Musa, a new compact MPV for motorists who want to enjoy good taste but are unwilling to give up convenience.

Worms & Cie

(53.07% of capital stock through Ifil Investissements)

Worms & Cie is one of the major investment holding companies in France listed on the “Premier Marché” of the Paris stock exchange.
The Group’s portfolio is essentially made up of industry holdings (ArjoWiggins and Carbonless Europe) and services holdings (Antalis, Permal Group and SGS SA).

The condensed consolidated results, with the operating companies accounted for using the equity method, are summarized below:

			Change	
(€ in millions)	2003	2002	Amount	%
Share of earnings (losses) of consolidated subsidiaries accounted for using the equity method				
- ArjoWiggins	73	114	(41)	-36
- Carbonless Europe	(7)	5	(12)	n.s.
- Antalis	6	(5)	11	n.s.
- SGS	36	22	14	64
- Permal Group	25	15	10	67
- Other	15	9	6	67
Share of earnings and dividends	148	160	(12)	-7.5
Financial income/(expenses), net	12	18	(6)	-33
General expenses, net	(12)	(15)	3	-20
Income taxes	11	32	(21)	-67
Current net profit	159	195	(36)	-18
Extraordinary items	31	74	(43)	-58
Amortization of differences on consolidation	(78)	(79)	1	-1
Total net income - Group	112	190	(78)	-41
Stockholders' equity - Group	1,998	2,157	(159)	-
Net financial position	(612)	(698)	86	-

The consolidated net income - Group was € 112 million compared to € 190 million in 2002.

The change from the prior year can be explained as follows:

- the current net profit decreased (-18%) mainly due to a worsening in the results of the industrial companies (ArjoWiggins and Carbonless Europe) which was not compensated by the improvement in the results of the service companies (Antalis, Permal Group and SGS SA), besides a lower net income tax benefit;
- financial income/(expenses), net, showed an income balance in 2003 of € 12 million in that certain financial assets, not included in net debt for accounting purposes, generated considerable interest income (the Appleton crédit vendeur, in particular);
- general expenses in 2003 were € 12 million, a reduction of € 3 million from 2002;
- a reduction in extraordinary items from € 74 million to € 31 million, was recorded principally due to lower gains, net of taxes, realized in 2003 compared to 2002.

Stockholders’ equity of the Group amounted to € 1,998 million at the end of December 2003, compared to € 2,157 million at the end of December 2002.

Net financial position of the Group was € 612 million at the end of December 2003, a decrease of € 86 million compared to € 698 million at the end of December 2002.

Worms & Cie Group's stockholders at December 31, 2003 were:

	% of capital stock	% of voting rights
IFIL Group	53.07	53.11
Family Group	22.85	22.86
A.G.F.	14.83	14.84
Public	9.18	9.19
Treasury stock	0.07	-

The operating performance of the main holdings of the Worms & Cie Group in 2003 is described below.

ARJOWIGGINS

(100% of capital stock through Worms & Cie)

ArjoWiggins is the world leader in the manufacture of high value-added paper products for industry and the world of merchanting and graphic arts, with operations principally in Europe, in North America, in South America and Asia. Its ranges of products are marketed throughout the world and can count on a highly visible corporate image thanks to its brands (Canson, Conqueror, etc.…) and its excellent reputation for product and service quality.

Numerous negative factors affected the business climate in 2003 (wars, SARS and economic slowdown) which together with the strengthening of the euro had a strong impact on the markets and prices of paper products. Additionally, the reduction in advertising investments and communication budgets begun in 2002 continued for all of 2003. Despite the unfavorable setting, however, sales by ArjoWiggins kept pace thanks to its strategic positioning at the high end of the niche market in the paper segment and the introduction of new products. Volumes, in fact, grew by 2% from last year. In contrast, sales registered a 7% decline due to price reductions and the negative foreign exchange effect. Meanwhile, stable pulp prices led to a contraction of margins.
Even though intense efforts were again made in 2003 to reduce fixed costs, the operating result was € 122 million, a decline of 33% compared to the prior year, and with a reduction in the operating margin from 9.8% to 7.1% of sales.

Beginning January 1, 2004, ArjoWiggins incorporated Carbonless Europe's activities relating to the manufacture of carbonless paper. The purpose is to exploit every possible synergy between the two companies in order to be better able to confront the tendential contraction of the carbonless paper segment by offering, in the meantime, competitive capacity for the development projects in the coated paper and printing paper segments.
The tardy arrival of the proclaimed economic recovery in the paper sector and market weakness and lower competitiveness caused by a strong euro continue to weigh heavily on sales prices. In this climate of uncertainty, an increment in the result will mostly come about from the implementation of efficiency programs and the introduction of new products on the market.

The key consolidated highlights are presented in the following table:

			Change	
€ in millions	2003	2002	Amount	%
Net revenues	1,727	1,863	(136)	-7
Operating income	122	183	(61)	-33
Operating margin	7.1%	9.8%		

CARBONLESS EUROPE

(100% of capital stock through Worms & Cie)

Carbonless Europe is the European leader in the manufacture of carbonless paper. With operations in every country of Europe, in South America, in Asia and East Europe, its products are marketed under the Idem brand.
The company has a strong commercial position, especially in Europe where it has about a 35% market share.

The demand for carbonless paper on the world market in 2003, as anticipated, declined significantly, depending on the geographic area, and featured strong tension over prices and margins.
Given this situation, Carbonless ended the year with an operating result that was close to breakeven, thanks to:

- the diversification strategy which translated into a growth in uncoated paper sales;
- the continuation of the restructuring plan.

After three years of significant restructuring, efforts to reduce fixed costs will also continue into 2004. However, the priorities for the year will mainly be directed towards the diversification of products with a higher margin and the exploitation of new commercial opportunities resulting from the incorporation in ArjoWiggins.

The main results reported for 2003 are summarized as follows:

			Change	
€ in millions	2003	2002	Amount	%
Net revenues	304	334	(30)	-9
Operating income (loss)	(2)	6	(8)	n.s.
Operating margin	-0.7%	1.8%		

(100% of capital stock through Worms & Cie)

Antalis is the leading European group in the merchanting of printing and writing paper for printing firms and corporate businesses. It is present in almost all the nations of Europe, in South America, Asia and in the south of Africa. In each of these markets, Antalis ranks as the leader or co-leader.

In 2003, the lack of confidence in the economic panorama had an impact on communication and advertising expenses with immediate repercussions on corporate investments. The European merchanting market thus registered, for the third consecutive year, a decline in volumes of 3% together with a notable reduction in prices.

Surrounded by this weak economic climate, Antalis showed a great capacity for resistance, continuing to significantly improve its operating performance.

Pursuing a strategy founded upon customer satisfaction, Antalis concentrated its efforts on responding to the needs of the market. The effectiveness of the commercial policy translates into a consolidation of market share and a jump in margins. Operational rigor and the continuation of cost-cutting programs have enabled the company to effectively face the negative impact of the contraction in volumes connected with the deterioration of the markets.

Despite the decline in sales, Antalis doubled its operating margin, now at 1.6% of sales, and increased operating income to € 37 million from € 19 million last year.

Economic prospects for 2004 are still uncertain, irrespective of the recovery in demand during the last two months of the year. Having a solid basis, Antalis could capitalize on its strong points to grow even in the absence of market expansion.

The key consolidated results of the Group can be summarized as follows:

			Change	
€ in millions	2003	2002	Amount	%
Net revenues	2,324	2,458	(134)	-5
Operating income	37	19	18	95
Operating margin	1.6%	0.8%		

SGS

(23.8% of capital stock through Worms & Cie)

Founded in 1878, SGS SA is today the world leader in the sector of verification, inspection and certification of product and service quality. Present in 140 countries, the Group operates with more than 1,200 offices and laboratories. SGS is listed on the Zurich stock exchange.

In an uneven international trading environment, whose development was hampered by a wide range of factors, from geopolitical events to unusual climatic conditions, revenues for the Group were CHF 2,454 million, an increase of CHF 163 million compared to the prior year in local currency terms.

The key consolidated results can be summarized as follows:

			Change	
CHF in millions	2003	2002	Amount	%
Net revenues	2,454	2,392	62	3
Operating income (before extraordinary items)	300	216	84	39
Operating margin	12.2%	9.0%		
Net income - Group	227	109	118	108

Strong revenue growth was achieved in Consumer Testing, Oil Gas & Chemicals and Systems and Services Certification with all these businesses delivering more than 10% growth.

Operating income, before extraordinary items, was CHF 300 million, with an increase of 39% compared to 2002. Operating margins improved in all the businesses compared to the previous year with the most significant upward shifts being achieved by Consumer Testing, Systems and Services Certification, Life Sciences and Trade Assurances Services. The operating margin of the Group passed from 9% in 2002 to 12.2% in 2003.

Consolidated net income before extraordinary items for the year improved from CHF 159 million to CHF 224 million (+41%). Consolidated net income - Group reached CHF 227 million, compared to CHF 109 million in 2002.

SGS expects to continue to significantly improve operating performance in 2004, determined to achieve the 2005 target of CHF 45 earnings per share. This is notwithstanding the recent weakness in the U.S. dollar and the currencies which trend highly depends on it.

At December 31, 2003, SGS Group’s significant stockholders were composed as follows: Worms & Cie which held a 23.8% stake and Mr August Von Finck and his family who held a 23.7% stake.

PERMAL
GROUP

(100% of capital stock through Worms & Cie)

Active in the management of funds since 1974, Permal Group is an international group offering highly specialized financial services.

After three challenging years for the market and despite the financial scandals, the war in Iraq and the soaring American deficit, the financial market ended 2003 with important gains (S&P 500 +28.7%, MSCI World Index +33.8% and Nikkei 225 +24.5%).
In this context, Permal Group continued to demonstrate throughout the entire year the validity of the management model developed.
Attention is specifically drawn to the following distinguishing characteristics:

- assets managed totaled US$ 12,945 million, with an increase of US$ 5.630 million;
- net subscriptions during the year stood at US$ 4,100 million, 61% of which was through new distribution channels attesting to the effectiveness of the diversification policy of the sales network;
- an AA rating was assigned by Standard & Poor's to five of the principal funds managed by Permal;
- registration with the SEC was obtained by Permal Asset Management Inc, a wholly-owned subsidiary of Worms & Co Inc.

Permal Group intends to uphold its performance thanks to the continuation of the development of the distribution network and the opening of new markets.

The key results for the year 2003 were as follows:

			Change	
U.S. dollars in millions	2003	2002	Amount	%
Net revenues	178	99	79	80
Operating income	43	19	24	126
Operating margin	24.2%	19.2%		
Assets managed	12,945	7,315	5,630	77

Gruppo Rinascente

(99.21% of ordinary capital stock and 99.06% of savings capital stock through Eurofind)

Economic stagnation and lower consumption in its reference markets were the backdrop for the Rinascente Group in 2003.
The Group's store formulas have confronted the new wave of weakness in demand with actions aimed at improving the quality of its product offering, the competitiveness of its prices, the level of service rendered to the customer and reception at the points of sale.

- *Auchan* hypermarkets have affirmed the desire to continue along the strategic lines that were decided in 2002 to be the low-price and commercial attraction leader in its class. The projects now underway are geared to enhancing all operating levers, particularly the competitiveness of purchase and sale prices, promotions, customer loyalty, the preservation of basic services, merchandise assortment and operating efficiency. The sales network was expanded in the South by the stores opened at Mesagne (BR) and Melilli (SR).
- *SMA* supermarkets have operated along the same lines as the hypermarkets to achieve the objectives of food safety, private label development, competitive market repositioning and intensification of promotional pressure. They are also involved in developing a multi-formula organization which comprises Cityper, Sma and Punto Sma in order to take advantage of the possible synergies of a company of national importance but strongly rooted in the single territories in which it is present. The direct network increased with the opening of five new supermarkets.
- The *Upim* division is transforming the Variety Store formula to the new Multi-Specialty Store format based upon five merchandise modules that identify the world of apparel for men, for women, for children and cosmetics and the home. Consequently, the offering structure, the marketing policy, the service model, the operating processes and the organization were revised. Seven new units were opened, 16 were renovated and, with a view towards relaunching the sales network based upon a standard model that guarantees the uniformity of the image of the stores, 10 points of sale were closed.
- *La Rinascente* department stores are going forward with the implementation of the restructuring program for all the branches and the design of new marketing formats, in parallel with projects to improve the offering and leverage the label name, the service and the operational methods. Two new branches came into operation in 2003: the Bergamo branch and the new *JAM* sign in the Rome-Galleria Colonna mall targeting the youth market.
- The company *SIB*, the Italian leader in the bricolage sector, directed its efforts to improving the operations of the stores and developing the network by adding three new units and moving a *Bricocenter* to bigger premises. A significant step was taken with the inauguration at Bologna of the largest bricolage store in Italy under the *Leroy Merlin* store name.

The Rinascente Group took important steps along the road to renovation and development in 2003 which can be summed up as follows:

- the programs continue for the transfer of operational and managerial tools to the divisions and, in the meantime, the creation of a Services Center, with the aim of offering itself as a recognized professional entity capable of providing its services to the users with increasing levels of quality, efficiency and competitiveness as compared to market values. In order to best achieve these objectives, Rinascente identified Accenture, a world leader in the consulting and management and technological sector, as the partner best able to provide the know-how necessary to create a center that over time would guarantee the supply of services characterized by the highest qualitative standards. The activities, the persons and the infrastructures of the Services Center of the Rinascente Group, effective August 5, 2003, were contributed to Arthis S.p.A., a company in which Accenture has an 80% stake and Rinascente a 20% stake. Arthis supplies the divisions of the Rinascente Group with administrative and accounting services in addition to personnel administration, general services and information systems services which provide support to these areas;

- a joint venture was set up with Simon Property Group Inc., the leading American shopping center operator, for the management and development of malls in Italy. In December 2003, the relative shopping center activities were contributed to Gallerie Commerciali Italia S.p.A. and as of December 22, 2003 the company is 49%-owned by the Simon Property Group and 51%-owned by Rinascente.
  The partnership is consistent with the Rinascente Group's plan to focus on the trades and the businesses and is directed towards consolidating and increasing the leadership position reached in Italy in this sector.

The consolidated results of the Rinascente Group in 2003 can be summarized as follows:

			Change	
€ in millions	2003	2002	Amount	%
Gross sales	6,652.1	6,145.6	506.5	8.2
Gross operating profit	377.9	348.9	29.0	8.3
Operating income	175.3	152.1	23.2	15.3
Current profit	178.9	149.0	29.9	20.1
Net income - Group	200.4	50.8	149.6	294.5
Stockholders' equity - Group	762.5	1,208.5	(446.0)	-36.9
Consolidated net financial position	(481.2)	18.5	(499.7)	n.s.

Specifically:

- **gross sales** of the Group, including VAT incorporated in the retail sales price, were € 6,652.1 million, with a growth of 8.2%;
- **gross operating profit** (gross cash flow) amounts to € 377.9 million, compared to € 348.9 million, with an increase of 8.3%;
- **operating income** was € 175.3 million, with a growth of € 23.2 million;
- **current profit** amounted to € 178.9 million compared to € 149 million, with an increase of 20.1%. Financial management generated net financial income of € 3.5 million (compared to net financial expenses of € 3.1 million in 2002);
- net **extraordinary items** generated an income balance of € 148.7 million (compared to € 19.3 million in 2002) thanks to the gain of € 172.3 million realized on the sale of the 49% equity interest in Gallerie Commerciali Italia S.p.A.;
- **net income - Group** amounted to € 200.4 million, compared to € 50.8 million in 2002; the decrease in consolidated stockholders' equity – Group was due to the payment of extraordinary dividends of € 600 million, voted last December.
- **net cash flows** provided by operations (net income + amortization and depreciation) totaled € 437.6 million compared to € 281.1 million in 2002.

An analysis of performance by store formula is presented in the following paragraphs.

Food formulas accounted for a higher percentage of total sales (from 83.3% to 83.6%). An analysis is presented below:

- *Auchan* hypermarkets generated sales of € 2,899.6 million (+7.0%), of which € 1,722.5 million (+5.2%) referred to food products and € 1,177.1 million to non-food products (+9.8%).
  The *Auchan* hypermarkets demonstrated a clear and precise desire to increase competitiveness and productivity and every operating lever was used to reach this objective:
  - commerce (strengthening of the pricing positioning compared to the competition, more promotions, greater assortment in the low-price product range and in private labels);
  - human resource management (generalization of the progress bonus and responsibilization of the teams);
  - costs (optimization of logistics);
- *SMA* supermarkets reported sales of € 2,581.4 million, with an increase of 11.4%.
  The supermarkets work in harmony and synergy with the hypermarkets to achieve the objectives of food safety, development of the private label and competitive repositioning. The significant increase in private label products and the importance of the lowest priced product lines allowed SMA to respond satisfactorily to the demands for savings voiced by the clientele.
  Promotional pressure was increased and contributed to raising the level of public awareness for traditional campaigns (sales and below cost promotions). Sales by franchising activities totaled € 563.4 million (+35.7%).

Traditional non-food formulas now account for a lower percentage of total sales, from 16.8% to 16.4%. An analysis is presented below:

- *Upim* posted sales of € 573 million, including franchising activities, with an increase of 3.1%. Sales by franchising activities totaled € 60 million (+8.5%).
- *Department stores* reported sales of € 310.1 million, with an increase of +0.8%. Sales performance was affected by the negative economic picture which continues to limit the flow of foreign customers, and the adverse weather conditions in 2003, which had an effect on the entire textile area.
- *Bricolage* - the sector managed by *S.I.B.* S.p.A., which contributes 50% of its results to the Rinascente Group - reported sales of € 206.1 million, including franchising business, with an increase of 19.7%.

SANPAOLO IMI

(4.86% of ordinary capital stock)

Banca FIDEURAM

BANCA OPI SPA
BANCA PER LA FINANZA ALLE OPERE PUBBLICHE E ALLE INFRASTRUTTURE

BANCA IMI

SANPAOLO WM
WEALTH MANAGEMENT

In the first half of 2003, initiatives continued with the aim of implementing the development and rationalization plan for the SANPAOLO IMI Group's distribution networks. The plan is directed towards gradually introducing the model already successfully adopted by the Sanpaolo Network, which is based upon the specialization of the operating points, to all the Group's networks. The model found immediate application in the territorial reorganization of the Sanpaolo and Banco di Napoli distribution networks following the merger of SANPAOLO IMI and the Neapolitan bank on December 31, 2002.
All of the activities necessary to integrate the SanPaolo and Banco di Napoli branches from the commercial, credit, organizational and information system standpoints were put into place. The company SANPAOLO BANCO DI NAPOLI was also set up; all the Sanpaolo and Banco di Napoli branches in the four Mezzogiorno continental regions of Campania, Apulia, Calabria and Basilicata were spun-off to this new bank of the Group. SANPAOLO BANCO DI NAPOLI can count on 745 operating points and serves more than one million customers and approximately 20,000 companies.

On November 25, 2003, the Stockholders' Meeting approved the merger by incorporation of Cardine Finanziaria into the Parent Bank, becoming legally effective from December 31, 2003 and effective for accounting and tax purposes from January 1, 2003. The aim of this integration is:

- realization of scale and scope economies with the gradual centralization in the Partner Bank of the operating support (MOI and Logistics);
- best exploitation of local brands, deeply rooted in the regional reference markets;
- maximizing distributive effectiveness through a common commercial policy.

The merger has led, as already envisaged in the 2003-2005 Plan, to the creation of the North East Territorial Direction, in support of the bank networks operating in the Triveneto (comprising the regions Veneto, Friuli Venezia Giulia and Trentino Alto Adige) and Emilia areas. The Direction, based in Padua, controls the commercial and credit activities of the Group branches operating in this area.
In the same month of November 2003, the merger between Cassa di Risparmio di Udine e Pordenone and Cassa di Risparmio di Gorizia was effected, with the establishment of a regional bank named Friulcassa S.p.A. Cassa di Risparmio Regionale.

On November 18, 2003, SANPAOLO IMI acquired 7% of the capital of Banca delle Marche, in accordance with the agreement signed in July with Banca delle Marche, Fondazione CR Jesi, Fondazione CR Provincia di Macerata and Fondazione CR Pesaro; in particular, a 4.8% share was purchased directly from Banca delle Marche and 2.2% from the Fondazioni. The purchase price of € 1.77 per share, involved a total outlay of € 92 million. SANPAOLO IMI also granted the Fondazioni a put option on a further 8% of the bank's capital, exercisable before 12/31/2006.
The agreement also provides for a collaboration agreement aimed at developing commercial and operating synergies in wealth management, in investment banking, corporate and international banking and in the financing of public works.
Banca delle Marche, leader in one of Italy's most dynamic regions, operates for retail customers and small-and-medium-sized companies through a network of 262 branches in Central Italy, of which 230 situated in the Marche.

On March 3, 2003, SANPAOLO IMI and Santander Central Hispano, which jointly participate in the capital of Finconsumo Banca, reached an agreement which provides for the sale of the stockholding of Finconsumo Banca held by SANPAOLO IMI to Santander Central Hispano. The transaction determined, on consolidation, a total gross capital gain of € 100 million. The agreement provided for the sale of an initial share of 20% in September 2003 at a total price of € 60 million, with a gross capital gain on consolidation of € 44 million, while on the remaining 30%, SANPAOLO IMI exercized a put option on January 20, 2004 at a total price of € 80 million, giving rise to a gross capital gain on consolidation € 55 million.

In December 2003, the disposal of 60% of the French subsidiary Banque Sanpaolo to Caisse Nationale des Caisses d'Epargne (CNCE) was completed by SANPAOLO IMI. The initiative, which is part of the context of the strategic agreements defined in 2001 between SANPAOLO IMI and Eulia, a French holding company created by the Caisse des Dépôts et Consignations Group and by the Caisse d'Epargne Group, generated a gross capital gain of € 240 million for the Group and implemented the first part of the agreement signed on July 31, 2003. This agreement, for the remaining 40%, provides for a put and call option system exercisable after four years, liable to extension by two, in exchange for cash or shares in one of the companies of the CNCE Group.

In December 2003, full control was acquired in Noricum Vita, an insurance company which sells its own products through the branches of Cassa di Risparmio in Bologna and Banca Popolare dell'Adriatico, with the acquisition (by Sanpaolo Vita) of the 51% share belonging to Unipol Assicurazioni and of the 5% share belonging to Reale Mutua (directly by the Parent Bank), which join the 44% already held by SANPAOLO IMI. The transaction, which involved a total outlay of € 44 million, allows consolidation of the Group's already relevant presence in the insurance sector.
Noricum Vita is the corporate vehicle identified for the realization of the plan to concentrate the Group's insurance activities. This plan provides for the concentration of all the life insurance companies and those in the property and casualty branch into a single pole, and is aimed at expanding and strengthening the range and innovative capacity of products in sectors such as pensions, personal protection and property insurance.

The lively trend in operating revenues and the cost containment actions, together with the writebacks and profits made on the investment portfolio, enabled extensive compensation for adjustments to loans and extraordinary expenses (€ 475 million) linked with the staff leaving incentives. The net income of € 972 million for the year, showed a growth of 7.9% compared with 2002.

The key results of the SANPAOLO IMI Group can be summarized as follows:

€ in millions	2003	2002 pro-forma (a)	Change Amount	Change %
Net interest income	3,716	3,653	63	1.7
Net interest, commissions and other banking income	7,482	7,066	416	5.9
Operating income	2,717	2,334	383	16.4
Income before extraordinary items	1,700	704	996	141.5
Net income - Group	972	901	71	7.9
Total assets	202,580	199,645	2,935	1.5
Stockholders' equity - Group	10,995	10,702	293	2.7
Numbers of employees	43,465	45,217	(1,752)	-3.9

(a) The pro-forma figures for 2002, which are unaudited, were prepared to enable consistent comparison with the figures for 2003. The pro-forma schedules reflect the line-by-line consolidation of the Inter-Europa Bank and Eptaconsors and the proportional consolidation of Cariforlì commencing from January 1, 2002, as well as the exclusion of Banque Sanpaolo and IW Bank from the line-by-line consolidation area and of Finconsumo Banca from the proportional consolidation area as of the same date and, with exclusive regard to the first quarter of 2002, the line-by-line consolidation of the former Cardine Group, taking place for the first time as of June 30, 2002, with accounting effect as of January 1, 2002.

Net interest income for 2003 was € 3,716 million; the 1.7% increase compared with the prior year was the result of the positive contribution of volumes, joined by a greater spread in transactions with customers.

Net interest income, commissions and other banking income totaled € 7,482 million, an increase of 5,9% compared to the corresponding period of the prior year. This change is not only due to the favorable increase in interest income but also to the positive trend in commission income (+8,6%), the gains from financial transactions and dividends from holdings (+47 %).

Operating income in 2003, equal to € 2,717 million, increased by 16.4%.

With regard to the balance sheet components at the end of December 2003, the following can be said:

- **total consolidated assets** amounted to € 202,580 million;
- **net loans to customers**, excluding non-performing loans and loans to SGA, amounted to € 122,415 million; the percentage of net non-performing loans to total net loans to customers was 0.9%;
- **total customer financial assets** amounted to € 368,042 million, including assets managed of € 143,711 million;
- **stockholders' equity - Group** was € 10,995 million, compared to € 10,702 million at the end of December 2002.

JUVENTUS

(62.01% of capital stock)

Juventus won its twenty-seventh Italian Championship title triumphing in the 2002/2003 season and took second place of the 2003/2004 U.E.F.A. Champions League.

In August 2003, Juventus also captured the fourth Italian Supercup, the 50th title in its list of victories.

The fiscal year July 1, 2002 – June 30, 2003 ended with a net income of € 2.2 million (compared to € 6.3 million in the prior year); the decrease was mainly due to the lower contribution from player management.

The increase in operating revenues from € 175.3 million to € 215.4 million (+22.9%) reflects all the components of the value of production, which benefited from the brilliant sports results achieved during the season.

Operating costs rose but to a lower extent than revenues so that a gross operating profit was reported (€ 16.3 million) compared to the operating loss for the prior year of € 12.8 million.

As far as player management is concerned, the net income from the management of players' registration rights amounted to € 13 million, with a considerable reduction compared to € 116.2 million in 2001/2002. Investments totaled € 39 million while the transfer campaign as a whole showed a negative net financial balance of € 9.4 million. The amortization of the investments in players amounted to € 61.6 million (€ 68.2 million in the prior year). In this regard, Juventus chose not to take advantage of the benefits allowed under Law No. 27 dated February 21, 2003 and thus continued to amortize players' registration rights using the normal process.

Moreover, on June 30, 2003, Juventus sold 27.2% of the subsidiary Campi di Vinovo to Costruzioni Generali Gilardi, a contractor in Turin, realizing an extraordinary gain of € 32.5 million.

Stockholders' equity at June 30, 2003 amounted to € 99.6 million, substantially unchanged compared to June 30, 2002. The net financial position, however, showed a cash position of € 69.2 million (compared to a net cash position of € 95 million at the end of the prior year).

For purposes of the preparation of the consolidated financial statements of the IFIL Group, Juventus prepared financial statements for the period January 1 – December 31, 2003, which can be summarized as follows:

Year				Change	
2002/2003 (a)	€ in millions	2003 (b)	2002 (b)	Amount	%
215.4	Total revenues	212.9	189.0	23.9	12.6
16.3	Gross operating loss (c)	(51.1)	(70.1)	19.0	-27.1
2.2	Net loss	(16.1)	(35.3)	19.2	-54.4
99.6	Stockholders' equity (d)	77.0	93.6	(16.6)	-17.7
69.2	Net financial position (d)	13.1	34.8	(21.7)	-62.4

(a) Corresponding to the period July 1, 2002 – June 30, 2003.
(b) Periods corresponding to the financial year.
(c) Before amortization of players' registration rights.
(d) Data referring to the end of the year.

The result for the year 2003 was a loss of € 16.1 million, an improvement of € 19.2 million compared to 2002 due particularly to the increase in revenues, which also had a positive effect on the operating income.

The economic effect of the 2003 transfer campaign, originating from the sale of players' registration rights and the termination of player copartnerships, produced income of € 2.3 million and was impacted by the overall contraction of the market.

The reduction in stockholders' equity from € 93.6 million at December 31, 2002 to € 77 million at December 31, 2003 is basically due to the loss for the period. The net financial position shows a net cash position of € 13.1 million.

Among the major events in 2003, in addition to the above, is the signing, in June, of the notarized deed for the ninety -nine year lease on the Stadio delle Alpi and adjacent areas, renewable at the end of the lease period. The consideration is equal to € 25 million, of which € 1 million was paid when the contract was signed, € 6 million when the building permit was received (application filed in December) and € 18 million is payable over nine years.

In February, as part of a judicial inquiry on the soccer sector by the Public Prosecutor's Office in Rome, the Revenue Guard Corp took documentation from the headquarters of F.I.G.C. – Federazione Italiana Giuoco Calcio, L.N.P. - Lega Nazionale Professionisti and all the teams registered in the Serie A and Serie B Championships for the soccer seasons 1999/2000 to 2003/2004 with respect to the manner of the preparation of the financial statements and the registrations for the Championships during that period.

As far as the current soccer season is concerned, the First Team was eliminated in the qualifying round of the U.E.F.A. Champions League but reached the finals in Coppa Italia TIM Cup 2003/2004.
The Primavera under-21 team won the 56th edition of the Viareggio International Coppa Carnevale, duplicating last season's victory.

Gruppo NHT New Holding for Tourism

(100% of capital stock through Ifil Investissements and Ifil Finance)

NHT New Holding for Tourism unites the IFIL Group's investments in the tourism sector. Such holdings specifically refer to the Alpitour Group, which is active in the tour operating, incoming and hotel management segments, Welcome Travel Group, which offers tourist packages through owned agencies and affiliates and via the Internet, and Neos, which is an airplane charter operator with three B737-800 airplanes.

The key consolidated results of the NHT Group for the year 2002/2003 can be summarized as follows:

€ in millions	2002/2003	2001/2002	Change Amount	%
Net revenues	945.9	937.7	8.2	0.9
Operating income	26.7	23.4	3.3	14.1
Net loss - Group	(11.2)	(21.0)	9.8	-46.8
Stockholders' equity - Group	227.2	253.0	(25.8)	-10.2
Net financial position	(74.2)	(46.9)	(27.3)	58.1

After a 2002 marked by a weak economic performance and for the most part affected by the September 11 crisis, the first quarter of 2002/2003 confirmed some signs of an upturn in demand that first became evident in the summer season of last year. This helped to increase sales and raise volumes and margins. The second quarter, which was impacted by the international political events culminating with conflict in Iraq and the SARS health emergency which hit the Asian areas, again registered symptoms of weakness in demand. The third quarter, thanks to the re-emergence of a quieter international political scene, slowly returned to a substantially normal market situation which was then consolidated during the course of the summer season.

The above overall scenario obviously influenced the economic performance of all the tourism sectors in which the Group operates, namely the tour operating, incoming, hotel management, distribution and airline carrier segments, although the area that was most directly affected by the general situation was obviously tour operating which is headed by the Alpitour Group and which represents the core business of the Group.

The consolidated results of the holdings in the NHT Group are described in the following paragraphs:

€ in millions	2002/2003	2001/2002	Change Amount	%
Tour operating	806.6	821.8	(15.2)	-1.8
Incoming	193.4	197.4	(4.0)	-2.0
Hotel management	77.4	55.7	21.7	39.0
Distribution	14.8	9.7	5.1	52.6
Total	1,092.2	1,084.6	7.6	0.7
Eliminations of intersegment relations	(146.3)	(146.9)	0.6	-0.4
Total	945.9	937.7	8.2	0.9

As far as tour operating is concerned, despite the first line-by-line consolidation of Viaggidea, the year ended with a decrease in sales of approximately € 15 million (€ 807 million in 2002/2003 compared to € 822 million in 2001/2002), equal to a reduction of roughly 2 percentage points. This decrease is principally due to weaker demand in certain periods of the year in conjunction with international turbulence (the war in Iraq and SARS), as well as the fall in sales in the "incentive" sector.

With regard to volumes, in 2002/2003, there were 950,000 passengers compared to 1,015,000 recorded in the previous year, with a reduction of some 6.4%.

The sales mix in 2002/2003 recorded a good recovery in long-haul destinations, centered mainly in the Carribean area (Mexico, Cuba, Santo Domingo and Jamaica), with an average increase of about 4%. An appreciable gain of 13% in volumes was also registered in destinations to the Indian Ocean, whereas travel to all destinations in the Far East took a sharp plunge on account of SARS. A considerable downturn was also reported in Tanzania and Zanzibar, destinations that were penalized by local political tensions which led to the closing, in the middle of the high season, of the resorts (Bravo Club and Sea Club) owned by the Group.

In Mediterranean Africa, on the other hand, the year just ended produced a slight increase in volumes to destinations in Egypt and a decline to Morocco and Tunisia.

Short-haul destinations generally displayed a decline in volumes, especially in the area of Spain and destinations in the east Mediterranean (Turkey, in particular). Volumes were positive, instead, to Cape Verde where the local Bravo Club received more than 13,000 holiday seekers.

Lastly, destinations in Italy had an excellent showing, with growth of roughly 9% in volumes, thanks to the opening of the new Bravo Clubs in Sardinia, Calabria and Basilicata.

In October 2003, a further 30% stake was acquired in Promoviaggi S.p.A., the second-largest Italian operator in the incentive tourism market. This brought the Group's equity interest in the company to 60% and strengthened its position as leader in that market.

The incoming sector, headed by the Jumboturismo Group, reported consolidated sales of approximately € 193.4 million in 2002/2003 (€197.4 million in 2001/2002), including € 110.9 million in sales to the Alpitour Group. The reduction in sales of about 2% is mostly attributable to the contraction of volumes from third-party, mainly British, Irish and Dutch tour operators. The traffic produced by these operators totaled 601,000 passengers compared to 682,000 in 2001/2002, following a decline in demand to destinations in the Canary Islands and Balearic Islands on all major European markets.

Volumes contributed by the tour operators of the Group, instead, totaled 396,000 passengers for an increase of over 18% compared to 2001/2002, thanks mainly to incoming which came into full operation in Tunisia and the build up of Cape Verde.

The hotel sector, which reports to the Horizon Holidays Group and the new subsidiary Altamarea (a 60% holding purchased in March 2003), posted consolidated sales of approximately € 77.4 million, compared to a corresponding amount of € 55.7 million in 2001/2002. This increase of roughly 39% was achieved thanks to the first-time consolidation of Altamarea, as well as the increase in volumes of sales to registered third-party operators for the hotels in Tunisia, Mexico and Cape Verde. The hotel complexes owned by the Group, which are principally marketed under the "Bravo Club" brand by Alpitour and "Sea Club" brand by Francorosso, reported a daily presence in 2002/2003 of more than 980,000, corresponding to about 110,000 guests.

The distribution sector generated sales of approximately € 14.8 million (€ 9.7 million in the prior year), operating mainly through the travel agency network of the Welcome Travel Group, which developed a network of 200 affiliated agencies (under franchising arrangements) and 38 owned agencies.

Notwithstanding higher sales, mainly achieved by an increment in the sales of the Group's products, the Welcome Group's results were still negative, although much better than last year. Economic performance, in fact, is still affected by the structure costs and the start-up costs of the new activities which had a negative impact on the operating margin.

The Welcome Group, however, continued to pursue its development plans by opening new agencies in important Italian cities such as Rome, Bergamo and Brescia. Thanks to the good trend of network activities, the number of franchises is constantly growing.

The Welcome Group also operates through the Welcome On Line brand, which is a virtual travel agency and tourism portal.

Regardless of the persisting unfavorable economic situation and an unstable international political climate which undoubtedly penalized the entire tourism sector, the year just ended nevertheless produced a considerable improvement in the economic result of the Group which, besides benefiting from extraordinary transactions, is the result of numerous actions undertaken mainly on the front of cutting operating costs.

Club Med

(7.2% of capital stock through Ifil Capital)

Club Med

Club Méditerranée

Jet tours
spécialiste en vacances réussies.

Club Méditerranée's business in 2002/2003 was still impacted by the difficulties of the sector (and that of the airplane carrier sector) as a result of the war in Iraq, the persisting threat of world terrorism and the SARS syndrome.

At October 31, 2003, the consolidated financial statements of the Group showed revenues of € 1.6 billion, with a reduction of 7.7% compared to the prior year, resulting in a net loss of € 94 million (net loss of € 62 million in 2001/2002). At the operating level, the Group substantially reported breakevens at both the economic operating level (an operating loss of € 6 million) and the financial operating level (balanced operating cash flows).

The relaunch plan begun in prior years continued through actions aimed at reducing structure costs and bringing the hotel capacity into line with the changed conditions of the market. The divestiture of non-profitable businesses generated net financial flows of € 42 million compared to a negative free cash flow of € 12 million in 2001/2002.
The consolidated stockholders' equity of the Group at October 31, 2003 amounted to € 474 million.

In 2003/2004, the Group expects a gradual improvement in the economic climate, which, for the last three years, has negatively affected its results.

Ifil Investissements (Luxembourg)

(100% of capital stock directly and through Ifil Investment Holding)

The key highlights for the year ended December 31, 2003 can be summarized as follows:

€ in millions	2003	2002	Change
Net income (loss)	(154.2)	112.1	(266.3)
Stockholders' equity	1,947.3	2,483.0	(535.7)
Financial fixed assets	1,917.6	2,497.1	(579.5)
Net financial position	34.1	(1.1)	35.2

The most important transactions which took place in 2003 are described in the section "Major events in 2003".

The loss for the year of € 154.2 million was basically the result of the loss (€ 161.3 million) on the sale of 1.96% of SANPAOLO IMI ordinary capital stock to the parent company, IFIL, at market price, and the adjustment (€ 106.8 million) of the accounting carrying value of the investment in NHT to the value of the share of its consolidated net equity at October 31, 2003.
These negative components were partly compensated by dividends received from Worms & Cie (€ 83.9 million) and Eurofind (€ 22.6 million) and other net positive components of € 7.4 million.

Stockholders' equity decreased by € 535.7 million following the partial reimbursement of additional paid-in-capital to the parent companies IFIL (€ 254.4 million) and Ifil Investment Holding (€ 64.3 million), dividends paid to these same companies (€ 62.8 million in total) and the loss for the year (€ 154.2 million).

Financial fixed assets comprised the following investments and bonds at December 31, 2003:

		12/31/2003			
€ in millions	Number of shares	% of capital stock	Carrying value	12/31/2002	Change
Worms & Cie S.A.	55,922,623	53.07	775.5	751.7	23.8
Eurofind S.A.	12,863,063	40.47	431.9	687.8	(255.9)
Ifil International Finance Ltd	4,000,000	100.00	544.0	409.0	135.0
SANPAOLO IMI S.p.A.	-	-	0.0	365.4	(365.4)
NHT - New Holding for Tourism BV	19,682	59.68	135.6	242.4	(106.8)
Ifil Finance BV	10,000	100.00	18.5	18.5	0.0

Ocean Club Méditerranée convertible bonds	76,614	-	4.7	4.5	0.2
Total financial fixed assets			1,917.6	2,497.1	(579.5)

A comparison of carrying values and market prices of listed financial fixed assets shows the following unrealized gains/(losses):

€ in millions	Worms & Cie	Ocean Club Med bonds	Total
Market price at December 30, 2003	261.9	0.2	262.1
Average market price in the second half of 2003	229.2	0.2	229.4
Average market price March 1-17, 2004, update	437.0	0.2	437.2

Eurofind (Luxembourg)

(50% of capital stock through Ifil Investissements)

The key highlights for the year ended December 31, 2003 can be summarized as follows:

€ in millions	2003	2002	Change
Net income	640.4	55.8	584.6
Stockholders' equity	1,734.8	1,745.1	(10.3)
Financial fixed assets	1,721.8	1,737.9	(16.1)
Net financial position	13.7	13.7	0.0

Eurofind's activities in 2003 were marked by the voluntary takeover bid for La Rinascente shares which ended in February 2003 and the subsequent tender offer for residual shares (referred to in the section "Major events in 2003").

Net income amounted to € 640.4 million and mainly derives from the receipt of extraordinary dividends from La Rinascente totaling € 594.5 million.

Financial fixed assets comprised the following investments at December 31, 2003:

	12/31/2003				
€ in millions	Number of shares	% of capital stock	Carrying value	12/31/2002	Change
La Rinascente (Italy)					
- ordinary shares	296,556,269	73.24	1,325.5	1,244.5	81.0
- savings shares	101,869,881	25.16	383.4	371.5	11.9
- preferred shares	2,797,086	0.69	12.6	10.2	2.4
		99.09	1,721.5	1,626.2	95.3
Eufin Investments	243,100	100.00	0.3	111.7	(111.4) (a)
Financial fixed assets			1,721.8	1,737.9	(16.1)

(a) The reduction of € 111.4 million relates to the reimbursement of reserves by Eufin Investments in January 2003.

Ifil International Finance Ltd (Ireland)

(100% of capital stock through Ifil Investissements)

The company ended its year of operations on December 31, 2003 with a net income of € 0.3 million (€ 0.6 million in 2002), stockholders' equity of € 544.8 million (€ 409.6 million at the end of 2002) and a net cash position of € 544.9 million (€ 409.7 million at December 31, 2002).

The liquidity is mainly invested in two medium/long-term loans granted to Ifil Investissements and due in December 2006 and January 2007 (€ 540 million at year-end).

Ifil Finance BV (Netherlands)

(100% of capital stock through Ifil Investissements)

The company closed the year ended December 31, 2003 with a loss of € 15 thousand (€ 12 thousand in 2002) and stockholders' equity of € 18.4 million, unchanged compared to the prior year.

The company holds 30.32% of the capital stock of NHT New Holding for Tourism carried at € 18.4 million.

The net financial position at December 31, 2003 is in equilibrium.

Ifil Investment Holding (Netherlands)

(100% of capital stock)

The key highlights for the year ended December 31, 2003 can be summarized as follows:

€ in millions	2003	2002	Change
Net income (loss)	7.8	(43.4)	51.2
Stockholders' equity	165.6	162.8	2.8
Financial fixed assets	320.3	384.6	(64.3)
Net financial position	(155.0)	(222.4)	67.4

Financial fixed assets comprised the following investments at December 31, 2003:

	12/31/2003				
€ in millions	Number of shares	% of capital stock	Carrying value	12/31/2002	Change
Ifil Investissements S.A.	224,194	20.18	285.2	349.5	(64.3) (a)
Ifil Capital B.V.	11,000	100.00	35.1	35.1	0.0
Financial fixed assets			320.3	384.6	(64.3)

(a) The reduction is due to the partial reimbursement of additional paid-in capital by Ifil Investissements for the same amount.

Ifil Capital BV (Netherlands)

(100% of capital stock through Ifil Investment Holding)

The key highlights for the year ended December 31, 2003 can be summarized as follows:

€ in millions	2003	2002	Change
Net loss	- (a)	(33.8)	33.8
Stockholders' equity	35.1	35.1	0.0
Investment in Club Méditerranée (b)	35.2	35.2	0.0
Net financial position	(0.1)	(0.1)	0.0

(a) Loss equal to € 31 thousand.
(b) 7.2% of capital stock.

A comparison of the carrying value of the investment in Club Méditerranée with the market price shows the following unrealized gains:

€ in millions	Club Med
Market price at December 30, 2003	6.6
Average market price in the second half of 2003	9.1
Average market price March 1-17, 2004, update	13.8

In view of the loss of € 94 million reported by Club Méditerranée for the year ended October 31, 2003, the company prudently did not record the partial increase in the market share price of the investment which was written down in prior years for € 61.4 million.

MOTION FOR APPROVAL OF THE FINANCIAL STATEMENTS, INCREASE OF THE LEGAL RESERVE AND APPROPRIATION OF NET INCOME FOR THE YEAR

To our Stockholders,

We ask you to approve the financial statements for the year ended December 31, 2003 which show a net income of € 72,671,094, which we propose to appropriate, after adjusting the legal reserve to one-fifth of capital stock, equal to € 1,075,195,737, by drawing € 69,274,230 from the extraordinary reserve (which, after this withdrawal, will amount to € 128,821,989), as follows:

To the savings shares:		
- preference dividend due for the year 2002, corresponding to 8.27% of the par value of the shares, not paid out in 2003 (art. 24 of the by-laws): € 0.0827 equal to a maximum	€	3,091,575.75
- dividends due for the year 2003: € 0.0827 equal to a maximum	€	3,091,575.75
To the ordinary shares, dividends for the year 2003: € 0.062 equal to a maximum	€	64,344,388.45
The proposed dividends are due on shares that will be outstanding, thus excluding shares held by the company at the ex dividend date, for a total maximum	€	70,527,539.95
To the extraordinary reserve, the remaining amount, equal to a minimum	€	2,143,554.05
Net income for the year 2003	€	72,671,094.00

On the maximum amount of the proposed dividends (€ 70,527,539.95) to the receipients who could still be entitled to dividends with an ordinary tax credit (equal to 51.51%), the tax credit would be on a maximum of € 54,924,684.53; on the remaining € 15,602,855.42, there would be a limited tax credit (equal to 51.51%).

Expiry of term of office

The three-year terms of office of the Board of Directors and the Board of Statutory Auditors, elected by the Stockholders' Meeting on May 29, 2003, expire concurrently with the Stockholders' Meeting for the approval of the financial statements for the year ending December 31, 2005.

The Independent Auditors are appointed for the three-year period 2003-2005.

Corporate Governance

The Chairman, according to the bylaws (art. 21), may represent the Company, also before a court of law, and has signature powers. Specific operating powers have been conferred to the Deputy Chairman and the General Manager.

CHAIRMAN'S LETTER

To our Shareholders

In 2004, overall, the global economy reported steady growth. According to the International Monetary Fund, GDP growth worldwide increased by more than 5% and international trade rose by approximately 10% in terms of quantity. In the United States, GDP, which by itself represents one fifth of the world's wealth, increased by 4.4%.
The recovery was largely focused in South-East Asia and North America, whereas, in Europe, the economy continued to mark time. Sharp increases in the prices of energy-related raw materials did not lead to a marked acceleration in consumer prices in industrialized countries, thus allowing monetary policies to continue their expansive trend.

***

According to most economic forecasts, in 2005, once again, Asia and the United States should provide the main impetus for world growth, confirming current trends. However, there are also those who disagree, who question the effective state of health of the world economy and who detect worrying signs in the structural weaknesses of the traditional "locomotive" of the planet: namely, the United States. In the opinion of many observers, unless suitable corrective measures are implemented, the problems highlighted by the United States could lead to a serious imbalance in world trade and finance, which would seriously jeopardize the future growth of many countries.
During 2004, the "twin deficit", which constitutes the main problem of the American economy, deteriorated: the national debt and the balance of trade deficit reached 4.3% and 6.3% of GDP, respectively. Although this is certainly a serious phenomenon, it is not new, and can usually be explained by a series of well-known causes: the war in Iraq, the price of crude oil, a policy of tax incentives, on the one side; the increase in global competitiveness and the aggressive nature of the Asian economy, particularly the Chinese economy, on the other.
But, in fact, it is not the phenomenon in itself which is causing alarm, rather the apparent ineffectiveness of the counter-measures that have been implemented so far. American exports have continued to stagnate, whereas imports – especially from China – have increased considerably.
Until now, the continuous shift of wealth towards Asia has so far found compensation in the refinancing of the American national debt by the central banks of the countries concerned, but this "virtuous circle" - which only benefits the U.S.A. – cannot continue indefinitely. The decision of the Federal Reserve to raise interest rates can thus be interpreted as having two aims: to contain the risks of inflation in the North American economy and, at the same time, to increase the profitability of investment in Treasury bills, to avoid any possibility that such a mass of debt should remain uncovered. A hypothesis which could have disastrous consequences for all the industrialized countries.

***

Although economists are divided in their assessment of what the future holds for the U.S. economy, the diagnosis of the situation in Europe seems, unfortunately, to be unanimous. Also in 2004, the optimistic expectations of growth for Europe were not fulfilled. On average, growth in the eurozone was 1.8%. In the last quarter of 2004, there was a slowdown of the overall GDP, caused mainly by a contraction of the German and Italian economies. The weakness of internal demand was a contributory factor in the slow growth of these two countries. The gradual gain in value of the euro against the U.S. dollar and currencies linked to the dollar (China, the Far East) severely penalized the other potential growth factor: exports. The European institutions were slow to define a monetary policy and initiatives to combat the growth of the super-euro against the dollar and the Asian currencies. Fortunately they responded to pleas from the leading European economies to make changes to the Stability Pact. The revised plan should ensure greater flexibility and make it possible to take account of the adverse economic situation so that stability, seen as a target that will take several years to achieve, can be combined with structural reforms and significant investments in the public sector.

***

In Italy, the weakness of net exports was accompanied by a standstill in productivity, which affected potential growth of the country. Loss of competitiveness was manifested in foreign trade, which, for the first time since 1992, reported a deficit, partly as a result of the increase in the price of crude oil. The persisting difficulties in the manufacturing sector were another sign that all was not well.

Apart from lower production, there were numerous factors which resulted in a loss of competitiveness: the nature of the Italian market (the fact that the work force represents a small percentage of the overall population, the inflexibility of the labor unions, high pension and health costs which make the Clup (the cost of labor per unit of product) higher *than that of our competitors; the fact that our companies tend to be of a modest size, which prevents them from achieving significant economies of scale; the prevalence of traditional industry and a low level of technology, now a "typical" characteristic of our country, together with the persisting phenomenon of the underground economy; the lack and obsolescence of our infrastructures (especially in transportation and logistics); the limited efficiency or high cost of services; less possibility of resorting to the bond market following several corporate scandals; and, finally, the difficulty of financing new industrial initiatives by subtracting resources from "safe" (but unproductive) investments and thus refueling the virtuous circle of capital and business.*

***

Today, we have become more aware of these problems: unfortunately, although the measures that have been recently adopted or which will be adopted shortly are a step in the right direction, they are not enough to solve the problems due to the fact that the funds that have been made available for the purpose are not sufficient, since the objectives are many and highly diversified.

The aims of the decree law and the bill on competitiveness are all valid, but, in order to combat the decline or malaise of our industrial system we should give priority to and set aside more resources for measures that will have a greater impact on businesses: IRAP tax reductions, grants for innovation and research, expansion of infrastructures, simplification of bureaucratic and administrative procedures, augmenting social "shock absorbers", partly with a view to implementing more far-reaching, urgent measures that will allow industrial restructuring to take place.

***

IFI closed 2004 on a positive note, reporting a profit of € 38 million in the statutory financial statements and € 117 million in the consolidated financial statements. The improvement compared to the prior year, which ended with a profit of € 15 million for the company and € 130 million for the Group, was made possible by the positive results announced by both the IFIL Group and Exor Group, of € 119 million and € 93 million, respectively.

Having implemented the restructuring process in 2003, in its capacity as operating holding company of the Group, IFIL implemented the strategies that would lead to the reorganization and appreciation of the investment portfolio which the difficult international context and the situation of some of the investment holdings demanded.

In particular, we would like to mention the measures adopted at Fiat, where the severe nature of the problems involved demanded the utmost attention and commitment: changes in top management, the definition of a clear industrial perimeter and a more streamlined structure and responsibilization of management so that it can act and intervene more rapidly. When the Fiat Group reached operational breakeven in 2004, it was an important step within the broader plan to relaunch the company, which involves all sectors. The decision to end the alliance with General Motors, which took place in the first months of the current year, made it possible to generate significant financial inflows and to regain the strategic freedom needed for its future development.

The monetization of the investment in Rinascente represents one of the most important transactions in the history of IFIL. The food activities were sold to Auchan and the textile sector was later sold by auction, which attracted the major Italian and foreign industrial and financial operators. The enormous financial resources thus acquired by the company will, first of all, allow the company to reduce its existing debt but, foremost, will constitute the necessary presuppositions for development in terms of new investments.

IFIL's strategic objective remains an equilibrated and constant return for its stockholders commensurate with the economic performance of the sectors and the countries in which the subsidiaries operate. With this in mind, faced with the persisting weakness of the economies in the European area, IFIL opened new offices in New York and Hong Kong to seize the opportunities that could be offered by the greater growth of the American and Asian areas.

As for its part, Exor Group continued in the strategy to monetize its investments, selling the residual stake in Société Foncière Lyonnaise and – together with the IFIL Group, the respective interests held – in that of Club Méditerranée. The aim of the company is now directed to the growth of the remaining investments (Graphic Packaging, in particular) and the management of the cash resources that came from the divestitures concluded during the last few years.

Finally, along with the Board of Directors, I would like to thank the Stockholders for their loyalty, the Statutory Auditors and the Independent Auditors for the care employed throughout their mandate, and the Executives as well as Employees of the company and the subsidiaries for their excellent contribution.

Gianluigi Gabetti

IFI GROUP PROFILE

THE INVESTMENT PORTFOLIO

IFI – Istituto Finanziario Industriale S.p.A., is the controlling financial holding company of the Group led by Giovanni Agnelli e C. S.a.p.az. The Company's assets are represented by investments in IFIL Investments S.p.A. (the new name of IFIL – Finanziaria di Partecipazioni S.p.A.), equal to approximately 63% of ordinary capital stock, and in Exor Group, equal to 29.3% of capital stock.

IFIL Investments is the investment company of the Group commanding two distinctive areas of operations: the active management of the controlling investment in Fiat and the dynamic management of the other holdings.

Fiat, controlled with a holding of more than 30% of ordinary and preferred capital stock, operates in the national and international automotive market as a manufacturer and distributor of automobiles (Fiat Auto, Ferrari and Maserati), agricultural and construction equipment (CNH Global), commercial vehicles (Iveco), automotive components for these vehicles and the supply of related services (Magneti Marelli, Comau and Teksid), as well as publishing and communications (Itedi) and services for corporations (Business Solutions).

The other holdings which comprise the dynamically managed diversified portfolio are listed below.

Worms & Cie (52.96% holding in capital stock) is a French-listed holding company with a portfolio comprising the following major investments:

- ArjoWiggins (100% holding), the world leader in the manufacture of high value-added paper products and, in Europe, leader in the manufacture of carbonless paper (Carbonless Europe was absorbed by ArjoWiggins as from January 1, 2004);
- Antalis (100% holding), the leading European group in the distribution of paper products for printing and writing;
- Permal Group (77% holding), one of the leaders in the management of investment funds;
- SGS (23.8% holding), a company listed on the Swiss stock exchange and leader in the verification, inspection and certification of product and service quality;

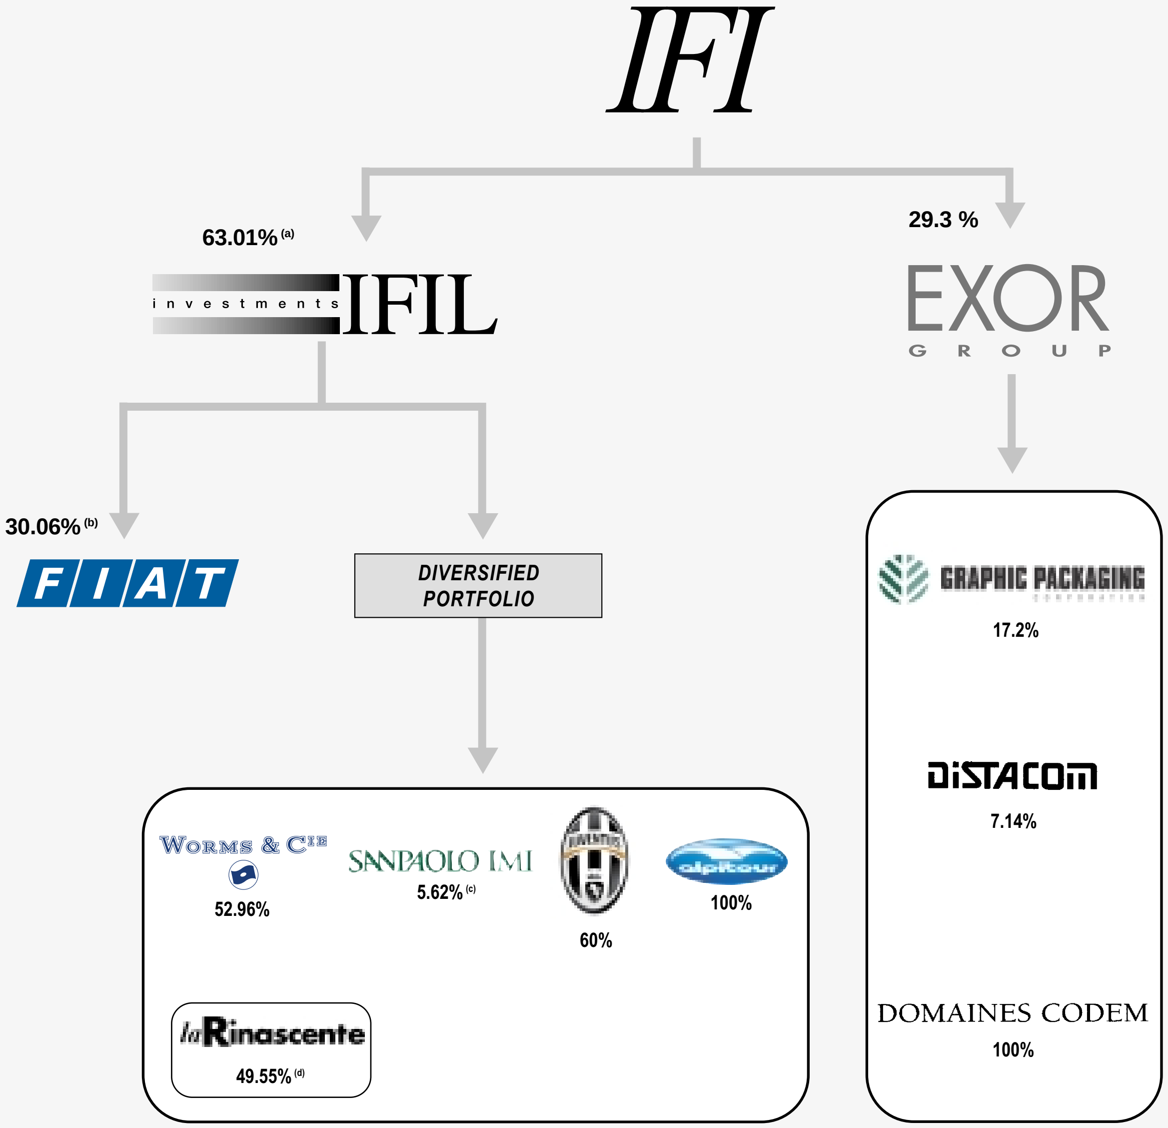
SANPAOLO IMI (5.62% holding by IFIL of ordinary capital stock) is a leading national banking group with over 3,000 branches throughout Italy;

Alpitour (100% holding) is the leading group in Italian tourism;

Juventus Football Club (60% holding by IFIL) is a company with more than one hundred years of history and an enviable record gained at various national and international sports events.

Exor Group is a Luxembourg holding company; its principal investments are the 17.2% stake in Graphic Packaging Corporation (a listed U.S.A. company in the packaging sector), the 100% holding in Domaines Codem (a French wine company) and the 7.14% stake in Distacom (a company headquartered in Hong Kong operating in the telecommunications sector).

The following chart is updated to the end of March 2005 and presents the simplified structure of the investment portfolio. Percentage holdings refer to ordinary capital stock.



(a) IFI also holds 2% of savings capital stock.
(b) IFIL also holds 30.09% of preferred capital stock.
(c) Equal to 4.45% of capital stock.
(d) Subject of the contract of sale to Tamerice S.r.l. dated March 13, 2005. The percentage is calculated on capital stock.

FINANCIAL COMMUNICATIONS AND INVESTOR RELATIONS

IFI has its own website (http://www.gruppoifi.com) which has recently been revised to respond to the information needs of investors, analysts and journalists. The site presents a descriptive profile of the Group, outlines the activities and strategies of the Company and also contains accounting and financial information as well as press releases and other corporate reports.

During 2004, about 900 copies (in Italian and English) of the annual report, the first-half report and the quarterly reports have been distributed. These reports are also available on request.

Intensive contacts have been established with financial analysts and institutional investors and also the Italian and foreign economic and financial press.

The corporate service functions in charge of communications and external relations are the following:

MAJOR EVENTS IN 2004

In 2004, the management of the company continued with activities of ordinary administration.
It should be pointed out that, in accordance with pre-existing agreements, in February, IFI invested € 1.5 million in TLcom I Capital Partners Limited, a venture capital fund geared to companies operating in the telecommunications and information technology sector in Europe and in other markets. IFI's total investment in that fund, to date, amounts to € 8.2 million.

ANALYSIS OF THE IFI GROUP CONDENSED CONSOLIDATED RESULTS

In order to assist in the analysis of the financial position and results of operations of the IFI Group, a **condensed consolidated balance sheet** and a **condensed consolidated statement of operations** have been prepared wherein the investments in IFIL (60.55% of capital stock outstanding) and in Exor Group (29.3% of capital stock outstanding) have been accounted for using the equity method.

Condensed consolidated result and condensed consolidated statement of operations

The year 2004 shows a return to a profit position by the IFI Group with a consolidated net income of € 117 million, after closing two years with a loss (€ 130 million in 2003 and € 803 million in 2002).

The condensed consolidated statement of operations and the condensed consolidated balance sheet are presented below as well as an analysis of the most important captions.

Condensed consolidated statement of operations

€ in millions	**2004**	2003	Change
Group's share of earnings (losses) of companies accounted for using the equity method	**130.1**	(117.7)	247.8
Dividends from other holdings	**0.1**	0.2	(0.1)
Financial expenses, net	**(11.5)**	(15.0)	3.5
General expenses, net	**(4.0)**	(6.1)	2.1
Other income (expenses), net	**(1.4)**	1.0	(2.4)
Income (loss) before taxes	**113.3**	(137.6)	250.9
Current and deferred taxes	**3.7**	7.6	(3.9)
Net income (loss) - Group	**117.0**	(130.0)	247.0

Group's share of earnings (losses) of companies accounted for using the equity method

	Earnings (losses)		IFI's share			
€ in millions	**2004**	2003	**2004**	2003		Change
IFIL Group	**119.0**	(45.0)	**72.1**	(27.2)		99.3
Exor Group	**92.6**	17.1	**27.1**	5.0		22.1
Fiat Group	**-**	-	-	(110.8)	(a)	110.8
Juventus Football Club	**-**	-	-	(4.5)	(a)	4.5
			99.2	(137.5)		236.7
Consolidation adjustments			**30.9**	19.8		11.1
Group's share of earnings (losses) of companies accounted for using the equity method			**130.1**	(117.7)		247.8

(a) Results for the first quarter of 2003, pre-contribution to IFIL.

At December 31, 2004, consolidation adjustments amount to € 30.9 million (€ 19.8 million in 2003). They refer to the result of the IFIL Group for the following:

€ in millions	**12/31/2004**	12/31/2003
- Reversal of the amortization of the difference on consolidation referring to Juventus	**22.1**	2.5
- Release of the 2004 portion of the gain deferred in prior years on the sale of the investment in La Rinascente	**8.3**	0.0
- Other adjustments	**0.5**	(2.8)
- Release of the gain deferred in prior years on the sale of the investment in Toro Assicurazioni	**0.0**	20.1
Total	**30.9**	19.8

Comments on the operating performance of the IFIL Group and Exor Group are presented later in the report.

Dividends from other holdings

Dividends from other holdings amount to € 0.1 million and relate to dividends received from Emittenti Titoli during 2004 (€ 0.2 million in 2003, including the tax credit).

Financial expenses, net

Financial expenses, net, amount to € 11.5 million (€ 15 million in 2003). The reduction of € 3.5 million is due to lower average indebtedness in the two years under comparison.

General expenses, net

General expenses, net, equal to € 4 million, decreased by € 2.1 million compared to 2003 (€ 6.1 million). The reduction is principally due to the significant decrease in the structure costs of the company partly as a result of the change in the average number of staff (from 18 to 16).

Condensed consolidated balance sheet

€ in millions	**12/31/2004**	12/31/2003	Change
Financial fixed assets:			
- investments	**2,446.3**	2,436.0	10.3
- preferred treasury stock	**70.5**	70.5	0.0
- other receivables	**8.2**	6.7	1.5
	2,525.0	2,513.2	11.8

Total assets	**2,544.2**	2,531.9	12.3
Stockholders' equity - Group	**2,269.4**	2,221.3	48.1
Financial payables:			
- borrowings from banks, short-term	**208.5**	66.3	142.2
- borrowings from banks, medium-term	**30.0**	212.7	(182.7)
- Giovanni Agnelli e C., short-term	**24.2**	15.2	9.0
	262.7	294.2	(31.5)
Other liabilities and reserves	**12.1**	16.4	(4.3)
Total liabilities and stockholders' equity	**2,544.2**	2,531.9	12.3

Financial fixed assets – Investments

	Number of	% holding of		Carrying value	
€ in millions	shares held	class of stock	capital stock	unit (€)	total
Investments accounted for using the equity method					
IFIL - ordinary shares	643,783,399	62.03	59.88	3.495	**2,249.8**
Exor Group SA	3,418,242	29.29	29.28	57.289	**195.8**
Investments valued at cost					
Deutsche Morgan Grenfell Capital Italy SA					
- ordinary shares	886	0.93	0.30	513.898	**0.4**
- preferred shares	2,000	1.28	0.68	2.582	**-**
Emittenti Titoli S.p.A.	527,000	6.43	6.43	0.516	**0.3**
Total investments					**2,446.3**

The increase in the carrying value of investments (+€ 10.3 million), compared to the balance at the end of 2003, is due to the Group's share of the earnings (losses) of companies accounted for using the equity method (+€ 130.1 million), the share of translation adjustments shown by the same companies (-€ 33.2 million) and, lastly, other net changes (-€ 86.6 million).

Financial fixed assets – Preferred treasury stock

Treasury stock includes 5,360,300 IFI preferred shares, equal to 6.98% of the class of stock and 3.28% of capital stock, carried for a total of € 70.5 million (€ 13.15 per share).

Compared to the average stock market prices in the second half of 2004 (€ 8.85) and the month of December (€ 10.13), IFI preferred shares show an unrealized loss of approximately € 23 million and € 16 million. Compared to the average stock market prices for the period March 1-15, 2005 (€ 11.35), the unrealized loss decreases further to approximately € 10 million.

The per share carrying value of IFI preferred shares (€ 13.15) is lower than the per share value of the consolidated stockholders' equity of the IFI Group at December 31, 2004 (€ 13.9).

Stockholders' equity of the Group

€ in millions	
Stockholders' equity - Group at December 31, 2003	**2,221.3**
Share of the translation adjustments shown by the investment holdings IFIL and Exor Group (-€ 33.2 million) and other net changes (-€ 35.7 million)	(68.9)
Consolidated net income - Group	117.0
Net change during the year	**48.1**
Stockholders' equity - Group at December 31, 2004	**2,269.4**

Financial payables

Borrowings from banks total € 238.5 million (€ 279 million at December 31, 2003). The company has irrevocable lines of credit for € 495 million, of which € 350 million is due beyond one year.

Consolidated net financial position (line-by-line consolidation)	**(5,368)**	(4,525)	(843)

The contribution by the consolidated companies to the consolidated net financial position (line-by-line consolidation) is the following:

€ in millions	**2004**	2003	Change
IFI S.p.A.	**(264)**	(295)	31
IFIL "Holdings System"	**683**	(235)	918
Adjustment to eliminate the net financial position of the holdings consolidated proportionally (a) and other	**0**	(6)	6
Fiat Group	**(4,961)**	(3,028)	(1,933)
Worms & Cie Group	**(718)**	(887)	169
Alpitour Group	**(108)**	(74)	(34)
Consolidated net financial position (line-by-line consolidation)	**(5,368)**	(4,525)	(843)

(a) Balances not included in the consolidated financial statements (line-by-line consolidation) of the IFIL Group since they refer to companies accounted for using the equity method (consolidated, instead proportionally, in the "Holdings System").

Research and development costs

In 2004, research and development costs expensed directly to income during the year total € 1,827 million, including € 1,810 million relative to the Fiat Group (€ 1,747 million in 2003) and € 17 million relative to the Worms & Cie Group (€ 16 million in 2003).

ANALYSIS OF THE RESULTS OF THE IFI S.p.A. STATUTORY FINANCIAL STATEMENTS

Net income for the year and condensed statement of operations
The net income of IFI S.p.A. in 2004 is € 37.7 million (€ 14.7 million in 2003).

The condensed statement of operations is presented below:

€ in millions	**2004**	2003	Change
Dividends	**50.6**	4.6	46.0
Gains	**0.0**	22.6	(22.6)
Financial expenses, net	**(11.5)**	(15.0)	3.5
General expenses, net	**(4.0)**	(6.1)	2.1
Other income (expenses), net	**(1.4)**	1.0	(2.4)
Income before taxes	**33.7**	7.1	26.6
Current and deferred taxes	**4.0**	7.6	(3.6)
Net income	**37.7**	14.7	23.0

Dividends
Dividends in 2004 were received from IFIL (€ 39.9 million), Exor Group (€ 10.6 million) and Emittenti Titoli (€ 0.1 million). Dividends in 2003 (€ 4.6 million) had included those from Exor Group (€ 4.4 million) and Emittenti Titoli (€ 0.2 million, comprising the relative tax credit).

Financial expenses, net
Financial expenses, net, amount to € 11.5 million and show a decrease of € 3.5 million compared to 2003 which is due to lower average indebtedness during the two years under comparison.

General expenses, net
General expenses, net, equal to € 4 million, decreased by € 2.1 million compared to 2003 (€ 6.1 million). The reduction is principally due to the significant decrease in the structure costs of the company partly as a result of the change in the average number of staff (from 18 to 16).

Current and deferred taxes
The taxable income calculated in accordance with existing tax laws does not generate current income taxes for the year 2004 and results in the release of € 4 million of deferred taxes in excess of requirements set aside in prior years.

Balance sheet of IFI S.p.A. - condensed

€ in millions	**12/31/2004**	12/31/2003	Change

Total				**1,746.7**		**1,860.9**		**2,021.1**

Compared to the average stock market prices above, IFI preferred shares show an unrealized loss of approximately € 23 million and € 16 million. Compared to the average stock market prices for the period March 1-15, 2005 (€ 11.35), the unrealized loss decreases further to approximately € 10 million.
The per share carrying value of IFI preferred shares (€ 13.15) is lower than the per share value of the consolidated stockholders' equity of the IFI Group at December 31, 2004 (€ 13.9).

Stockholders' equity of IFI S.p.A.
Stockholders' equity at December 31, 2004 amounts to € 1,604.7 million (€ 1,567 million at December 31, 2003). The increase of € 37.7 million coincides with the net income for the year 2004.

Net financial position of IFI S.p.A.
The net financial position of IFI S.p.A. at December 31, 2004 shows a net indebtedness position of € 263.8 million (a net indebtedness position of € 295.4 million at December 31, 2003) which is composed as follows:

€ in millions	**12/31/2004**			12/31/2003		
	Short-term	**Medium/ long-term**	**Total**	Short-term	Medium/ long-term	Total
Cash	**0.1**		**0.1**	0.1		0.1
Borrowings from banks	**(208.5)**	**(30.0)**	**(238.5)**	(66.3)	(212.7)	(279.0)

Other changes, net	(1.7)
Net change during the year	**31.6**
Net financial position of IFI S.p.A. at December 31, 2004	**(263.8)**

(a) Capital payment to TLcom I (-€ 1.5 million), net of the reimbursement from Deutsche Morgan Grenfell (€ 0.1 million) and the sale of 193,000 Emittenti Titoli shares (€ 0.1 million).

OTHER INFORMATION

Information on the status of the implementation of the systems and the procedures for the application of international accounting principles (Consob communication No. DME/5015175 dated March 10, 2005)
As provided by Regulation No. 1606 dated July 19, 2002 of the European Union, starting in 2005 the IFI Group will draw up its consolidated financial statements in compliance with international accounting standards (IFRS/IAS) approved by the European Community.
In particular, the IFI Group will adopt international accounting standards beginning from the consolidated first quarter data at March 31, 2005.
The following paragraphs provide information on the activities that have been carried out in order to ensure a proper transition for the application of international accounting standards.
The adequacy of the accounting systems and procedures with regard to the new requirements has been checked.
Moreover, IFI has taken note of the transition process in progress at the IFIL Group, agreeing the timetables to obtain the data which will be necessary for the preparation, in compliance with international accounting standards, of the opening consolidated balance sheet at January 1, 2004, the interim consolidated financial data at March 31, 2004, June 30, 2004 and September 30, 2004, as well as the consolidated financial statements at December 31, 2004 of the IFI Group. Such consolidated accounting data will be presented for comparative purposes with the corresponding consolidated accounting statements which will be prepared during 2005 on the basis of international accounting standards.

The audit firm of Deloitte & Touche S.p.A. has been assigned the following additional audit work with regard to the accounting statements that have been prepared in accordance with international accounting standards:

- audit of the opening consolidated balance sheet at January 1, 2004;
- limited review of the interim consolidated financial data at June 30, 2004;
- limited review with agreed testing procedures of the interim consolidated financial data at March 31, 2004 and September 30, 2004;
- audit of the consolidated financial statements at December 31, 2004.

The following table presents the reconciliations of the stockholders' equity of IFI S.p.A. and the consolidated stockholders' equity of the IFI Group taken from the financial statements for the years ended December 31, 2003 (prepared in accordance with Italian principles) with the corresponding data drawn up in accordance with international accounting standards at January 1, 2004. Such data has been reviewed by the audit firms.

€ in millions	IFI S.p.A.	Consolidated IFI Group	
Stockholders' equity at December 31, 2003 (taken from financial statements prepared according to Italian regulations)	**1,567.0**	**2,221.3**	
Reclassification of the carrying value of preferred treasury stock	(70.5)	(70.5)	
IAS/IFRS adjustments			
- IAS 39 - Valuation of instruments hedging rate risks	(5.1)	(5.1)	
- IAS 19 - Lower liability relating to employee benefits	n.s.	n.s.	
	(5.1)	(5.1)	
IFI's share of IAS/IFRS adjustments by:			
- IFIL Group	-	(80.9)	(a)
- Exor Group	-	n.s.	
	-	(80.9)	
Stockholders' equity at January 1, 2004 (IAS/IFRS)	**1,491.4**	**2,064.8**	

(a) Net of consolidation adjustments by IFI.

The consolidated financial statements at December 31, 2004 of the IFI Group show consolidated net income of the Group of € 117 million and stockholders' equity of the Group of € 2,269.4 million (which is reduced to € 2,198.9 million after deducting the carrying value of preferred treasury stock held by IFI of € 70.5 million).

The corresponding data prepared by IFI and the subsidiaries IFIL and Exor Group on the basis of international accounting standards, which should nevertheless be considered provisional in that the audit firms have not yet concluded their examinations, shows a consolidated net income of the IFI Group that is substantially unchanged and a consolidated stockholders' equity of the IFI Group of approximately € 2,170.4 million. The negative difference of this last figure, equal to € 28.5 million, is due to negative adjustments by IFI (-€ 2 million) and IFI's share of the adjustments made by the IFIL Group (-€ 26.5 million).

Programming document on security
The Company has prepared the programming document on security (Dps) on December 20, 2004 for the year 2004 according to the laws then in force and is currently proceeding to update this document pursuant to the provisions of Legislative Decree No. 196 dated June 30, 2003, Attachment B – technical specifications regarding minimum safety measures. The document has been drawn up by the person responsible for the treatment of the data.

Transactions among Group companies and with related parties
The delegated bodies shall provide the directors and statutory auditors with adequate disclosure concerning atypical transactions or transactions with related parties, eventually carried out during the year in exercising their delegated powers.
The Board of Directors has adopted principles of conduct for carrying out significant transactions from an economic, equity and financial standpoint as well as for carrying out transactions with related parties (available on the corporate website of the Company http://www.gruppoifi.it).

With respect to related party transactions, the above principles of conduct provide that the Board of Directors must approve the following transactions:

- atypical and/or unusual intragroup transactions, meaning transactions which, because of their significance/relevance, nature of the counterparties, subject of the transaction (also in relation to transactions of ordinary administration), manner of determining the transfer price and timing of the event (close to the end of the year) could give rise to reservations about: the correctness/completeness of the information in the financial statements, conflicts of interest, safeguarding of the company's assets and protection of minority stockholders;
- transactions with subsidiaries for amounts of more than 1% of IFI's portfolio value as shown in the most recent approved accounting documents (quarterly reports, first-half report and the annual financial statements) as of the date of the transaction;
- transactions with other related parties for amounts of more than € 3 million.

The bodies with delegated powers shall supply the Board with information concerning such transactions especially with regard to the nature of the relationship, the manner of execution, the economic terms and timing, the valuation criteria adopted and any risks to the Company.

Whenever a Director has an interest in the transaction (even a potential interest), the Board of Directors must be informed on a timely basis about the nature, terms, origin and the extent of this interest. After having exhaustively informed the Board of Directors, the interested Director must absent himself from the meeting so that the Board can pass the appropriate resolutions.

In the event the nature, the amount and the manner of execution of the transaction with a related party require it, the Board of Directors can avail itself of the assistance of one or more independent experts, chosen from among individuals with recognized professional characteristics and expertise on the matter in question so that an opinion can be obtained on the economic terms of the transaction and its legitimacy, as well as the technical means and manner of execution of the transaction.
The Board of Directors and the Board of Statutory Auditors must in any case be informed of any transactions with other related parties different from those mentioned above.

With reference to those transactions, comprehensive information shall be provided to the Directors, the Statutory Auditors, the General Manager, the procurators of the Company and to subsidiaries concerning the regulations in force and, in particular, the definition of related parties as reported in Consob Communication No. 2064231 dated September 30, 2002 as well as the definition of atypical and/or unusual transactions.

With regard to 2004, transactions among IFI, the parent company, the subsidiaries and the companies in which a significant influence is exercised are entered into in conformity with the provisions of existing laws, based upon an evaluation of reciprocal economic gain.
The most important transactions entered into during the year 2004 can be summarized as follows:

- suretyships granted in the past in favor of Federazione Italiana Giuoco Calcio – Lega Nazionale Professionisti (F.I.G.C. - L.N.P.) on behalf of Juventus Football Club for a residual amount of € 4.1 million, expiring in 2005, remunerated at market conditions;
- purchase of receivables from the tax authorities from IFIL (€ 0.5 million);
- a loan secured at floating monthly market rates from the parent company Giovanni Agnelli e C.;
- services rendered to and costs recovered from subsidiaries and associated companies;
- services rendered to the parent company Giovanni Agnelli e C.

The effects on the balance sheet and statement of operations of the transactions among IFI S.p.A., the Group companies and the other related parties can be summarized as follows:

	12/31/2004			2004	
€ in thousands	Accounts receivable	Accounts payable	Suretyships	Income	Expenses
Giovanni Agnelli e C. S.a.p.az.	10	24,186		33	619
Exor Group S.A.	100			207	
Juventus Football Club S.p.A.	35		4,128	54	
IFIL Investments S.p.A.	9	23		27	72
SANPAOLO IMI S.p.A.	5	900		129	7
Soiem S.p.A.		128			410
Fiat Group companies	235	42		228	295
Alpitour Group companies	10			10	45
Total	**404**	**25,279**	**4,128**	**688**	**1,448**

The IFI Group, through the companies which make up the Group, has maintained and maintains relations with "related" parties as defined by Consob, which, even when considered from the standpoint of potential conflicts of interest, are nonetheless governed by market terms. In this sense, particular mention should be made of:

- option rights on IFIL ordinary shares granted to directors and managers of IFIL and IFI;

- option rights on Alpitour shares granted by Alpitour to the directors of IFIL (who, today, are no longer in office) and IFI under a stock option plan for the directors, managers and cadres of Alpitour and its direct and indirect subsidiaries.

With a view to optimizing the management of the Group's financial resources, loan transactions were entered into during the year among companies of the Group.

During the course of year, the director Franzo Grande Stevens rendered professional services to Fiat Group companies for total fees of € 3,591 thousand.

Additional information and details are disclosed in the section "Major events in 2004" of the Directors' report on operations, in the "Notes to the statutory financial statements of IFI S.p.A." and in "Notes to the consolidated financial statements".

On the basis of information received from the companies of the Group, there are no atypical or unusual transactions to report.

Management and coordination
IFI S.p.A. is not subject to management and coordination by companies or entities.

Equity investments held by Directors, Statutory Auditors and General Manager

Stock Option Plans

The Group uses stock option plans to strengthen ties with its managers and to raise motivation for the creation of economic value for the company.

At December 31, 2004, IFIL has two stock option plans.

In May 2000, the Board of Directors of the subsidiary IFIL voted a stock option plan for the directors and managers of IFIL and IFI, for a maximum number of 2,700,000 IFIL ordinary shares, of par value € 1 each. The options can be granted in annual amounts each year from 2000 to 2004 and can be exercised by the grantees starting from 2002 up to 2006.

There were 2,691,500 options granted under this plan in the period 2000 to 2004, equal to 0.25% of current capital stock (including 522,000 options in 2000, exercisable at the average price of € 6.997 each; 525,450 options in 2001 at € 6.109 each; 844,050 options in 2002 at € 4,520 each; 800,000 options in 2003 exercisable at € 1.85 each). The exercise prices indicated were adjusted, for the options granted from 2000 to 2002, to take into account the cash capital stock increase in July 2003.

In September 2003, the IFIL Board of Directors voted a second stock option plan solely for the directors, for a maximum number of 700,000 IFIL ordinary shares, of par value € 1 each. There were 532,000 options granted under this plan in 2003 for the same number of ordinary shares, equal to 0.05% of current capital stock, at € 2.28 each.

The options were granted according to the level of responsibility held by the grantee in the corporate organization.

220,700 options granted under the IFIL 1998 stock option plan and which had to be exercised by April 30, 2004 became forfeit during 2004.

With regard to these plans, there were no transactions entered into to favor either the purchase or subscription of shares pursuant to ex art. 2358 of the Italian Civil Code.

On December 15, 2000, the Extraordinary Stockholders' Meeting of Alpitour S.p.A. voted to vest the Board of Directors with the power to increase capital stock by a maximum amount of € 767,500 to service a stock option plan on behalf of the directors, managers and cadres of Alpitour and the companies of the Group.

The regulations of the stock option plan, approved by resolution of the Board of Directors on December 15, 2000, state that the aforementioned capital stock increase of € 767,500 will occur by issue of a maximum 1,535,000 new ordinary shares of par value € 0.50 each. The options under the plan, which carries a period of 68 months, will accrue in annual lots expiring October 31, of each year and will be offered at a price equal to € 6.73 per share. The options offered can be fully exercised within six months of the approval of the financial statements ended October 31, 2005.

The shares purchased in execution of the above plan can be sold to Alpitour at a price, established by the Board of Directors, calculated on the basis of the economic performance of the company.

The first tranche of options offered during 2002/2003, referring to the financial statements for the year ended October 31, 2002, was not exercised by the beneficiaries of the stock option plan.

SIGNIFICANT SUBSEQUENT EVENTS

Investments in IFIL
In the first quarter of 2005, IFI purchased 10,122,097 IFIL ordinary shares (0.98% of the class of stock) on the market for € 34.2 million, as well as 750,000 IFIL savings shares (approximately 2% of the class of stock) for € 2.6 million.

At the end of March 2005, IFI holds 653,905,496 IFIL ordinary shares, equal to 63.01% of current ordinary capital stock, as well as 750,000 IFIL savings shares for approximately 2% of savings capital stock. The investment represents approximately 60.89% of current capital stock.

Net financial position of IFI S.p.A.
At the end of March 2005, the net financial position of IFI S.p.A. shows an indebtedness position of € 303.7 million. The negative change during the period (-€ 39.9 million) is due to the investment in IFIL (-€ 36.8 million) and financial expenses and general expenses, net (-€ 3.1 million).

BUSINESS OUTLOOK

Taking into account the motions for the distribution of dividends from 2004 profits formulated by the Boards of Directors of IFIL and Exor Group, it is believed that the result for 2005 of IFI S.p.A. will show a profit.

Moreover, considering the forecasts formulated by the same holdings, it is believed that the consolidated result of the IFI Group for 2005 will also show a profit.

OPERATING PERFORMANCE OF THE IFIL AND EXOR GROUP HOLDINGS

investments IFIL

(63.01% of ordinary capital stock)

The following consolidated data of the IFIL Group at December 31, 2004 has been taken from the condensed consolidated balance sheet and condensed consolidated statement of operations. Such data has been prepared by consolidating the financial holding companies and Soiem (which make up the so-called "Holdings System") line-by-line and proportionally and accounting for the other subsidiaries and associated companies, using the equity method.

€ in millions	**2004**	2003	Change
Consolidated net income (loss) - Group	**119.0**	(45.0)	164.0
Consolidated stockholders' equity - Group	**3,916.8**	3,953.9	(37.1)
Net financial position of the "Holdings System"	**683.2**	(234.7)	917.9
Financial fixed assets	**3,178.2**	4,223.1	(1,044.9)

The year 2004 shows a return to a profit position by the IFIL Group with a consolidated net income of € 119 million, after closing two years with a loss (€ 45 million in 2003 and € 367 million in 2002).
The main captions of the condensed consolidated statement of operations are commented in the following paragraphs.

€ in millions	**2004**	2003	Change
Group's share of earnings (losses) of companies accounted for using the equity method	**(402.0)**	(49.7)	(352.3)
Dividends from other holdings	**27.4**	21.2	6.2
Dividend tax credits	**0.0**	11.9	(11.9)
Gains, net	**611.3**	25.0	586.3
Amortization of differences on consolidation	**(81.4)**	(13.7)	(67.7)
Investment income (expenses), net	**155.3**	(5.3)	160.6
Financial expenses, net	**(20.9)**	(23.6)	2.7
General expenses, net	**(18.7)**	(13.0)	(5.7)
Other expenses, net	**(7.0)**	(6.1)	(0.9)
Income (loss) before taxes	**108.7**	(48.0)	156.7
Current taxes	**(2.1)**	0.1	(2.2)
Deferred taxes	**12.4**	2.9	9.5
Net income (loss) - Group	**119.0**	(45.0)	164.0

The **Group's share of earnings (losses) of companies** accounted for using the equity method amounts to losses of € 402 million (losses of € 49.7 million in 2003). The negative change of € 352.3 million is essentially due to the Fiat Group (-€ 177.3 million, mainly as a result of lower positive consolidation adjustments that are not compensated by the reduction in the consolidated loss of the Fiat Group), the Worms & Cie Group (-€ 100.9 million) and the companies which make up the Rinascente Group (-€ 82.7 million). The results of the other holdings show a net positive variation of € 8.6 million.

Dividends from other holdings amount to € 27.4 million (€ 21.2 million in 2003), entirely in reference to dividends received from SANPAOLO IMI.

Gains, net, total € 611.3 million and refer to the sales of 50% of the capital stock of Eurofind Food (+€ 586.3 million) and 7.2% of the capital stock of Club Méditerranée (+€ 26.4 million), as well as other minor transactions and writedowns (-€ 1.4 million, net). In 2003, the gains of € 25 million had basically referred to the sale of 25% of the capital stock of Sifalberghi.

Amortization of differences on consolidation amount to € 81.4 million (€ 13.7 million in 2003) and include extraordinary amortization charges to eliminate the residual balances referring to the Alpitour Group (€ 36.5 million) and the investment in Juventus (€ 33.5 million).

Financial expenses, net, total € 20.9 million (€ 23.6 million in 2003) and decreased by € 2.7 million mainly as a result of the trend in indebtedness during the year.

General expenses, net, amount to € 18.7 million. The increase of € 5.7 million compared to the year 2003 (€ 13 million) is principally due to higher personnel costs of the parent company (due both to an increase in the average number of staff and provisions for estimated monetary incentives relating to 2004), as well as the line-by-line consolidation of the companies Sadco, Ifil USA and Ifil Asia.

Other expenses, net, amount to € 7 million (€ 6.1 million in 2003) and include the release of reserves in excess of requirements set aside in prior years (+€ 3 million), the amortization of the expenses relating to the IFIL capital stock increases in 2003 (-€ 2.2 million), compensation voted on behalf of the directors of Eurofind (-€ 1.5 million), legal consulting fees regarding extraordinary transactions and pending litigation (-€ 3.3 million), as well as sundry other expenses, net (-€ 3 million).

Consolidated stockholders' equity of the IFIL Group at December 31, 2004 amounts to € 3,916.8 million. The net decrease of € 37.1 million from the balance at the end of 2003 (€ 3,953.9 million) is due to the consolidated net income of the Group (+€ 119 million), dividends paid out by IFIL S.p.A. (-€ 69.7 million), the share of the translation differences shown by the companies accounted for using the equity method (-€ 54.9 million) and other net changes (-€ 31.5 million).

The **consolidated net financial position of the "Holdings System"** shows a net liquidity position at December 31, 2004 of € 683.2 million (a net indebtedness position of € 234.7 million at the end of 2003). The positive change of € 917.9 million is due to the following flows:

(a) Net of intragroup dividends of € 0.1 million.

Since the end of June 2003, Standard & Poor's Rating Services has assigned an "A-" rating to IFIL's long-term debt and an "A2" rating to its short-term debt, with a negative outlook.

The parent company, IFIL S.p.A., ended the year 2004 with a net income of € 80.2 million. This is an increase of € 7.5 million (+10.3%) compared to the net income of € 72.7 million in 2003.

The Board of Directors' Meeting of March 30, 2005 put forward a motion for the distribution of dividends per share of € 0.0683 for the ordinary shares and € 0.089 for the savings shares for a maximum total of € 74.3 million.

Possible Fiat S.p.A. capital increase in execution of the Convertible Mandatory Facility Agreement dated July 26, 2002

In the eventuality that IFIL decides not to exercise, in whole or in part, the option rights to which it is entitled or should it not be in a condition to exercise, in whole or in part, such rights, the investment held by IFIL in Fiat could be diluted to below 30% of the capital stock with voting rights.

The most important transactions by the IFIL Group in 2004 and the early months of 2005 are described below.

Purchase of 9.53% of Eurofind capital stock

In January, the subsidiary Ifil Investissements purchased 9.53% of Eurofind capital stock from Mediobanca for an investment of € 116.1 million.

After this transaction, Eurofind's capital stock was held equally by the IFIL Group (through Ifil Investissements) and the Auchan Group.

Sale of La Rinascente S.p.A.

In October, La Rinascente finalized the partial proportional spin-off of the textile sector (Department Stores and Upim) to a new beneficiary company which took the name of La Rinascente.

The other activity sectors, including the Auchan hypermarkets, the SMA supermarkets, the 50% interest in SIB S.p.A. (do-it-yourself), the 51% interest in Gallerie Commerciali Italia S.p.A. and the 50% interest in Fiordaliso S.p.A. remained under the control of the company which had effected the spin-off and which took the name of Società Italiana Distribuzione Moderna (SIDM).

In December, after the proportional total spin-off of Eurofind, two new Luxembourg-registered companies were set up named Eurofind Food and Eurofind Textile, both jointly controlled by Ifil Investissements and the Auchan Group. As a result of this transaction, Eurofind Food and Eurofind Textile came to hold, respectively, 99.09% of the capital stock of SIDM and 99.09% of the capital stock of La Rinascente (companies that, in their turn, came from the above-described spin-off of La Rinascente).

In the second half of December, after obtaining authorization from the competent antitrust authority, Ifil Investissements sold 50% of the capital stock of Eurofind Food to the Auchan Group for € 1,062.9 million (including € 810.5 million of cash proceeds and € 252.4 million deferred until mid-2005) with a gain on consolidation of € 586.3 million.

On March 13, 2005, a contract was signed for the sale of 99.09% of the capital stock of La Rinascente S.p.A. held by Eurofind Textile S.A. – the Luxembourg company controlled by Auchan and IFIL – to Tamerice S.r.l., a company leading a group composed of Investitori Associati SGR S.p.A., DB Real Estate Global Opportunities IB L.P., Pirelli RE S.p.A. and the Borletti family, at a price of € 888 million.

Closing of the deal, which is subject to approval by the competent antitrust authorities, is expected to take place by June 2005. The price will be completely paid in cash at closing. The buyer has provided the usual bank guarantee.

Eurofind Textile has provided the buyer with statements and guarantees regarding the Rinascente Group, the subject of the transaction, and its activities, with the usual limitations and exclusions. Such conventional statements and guarantees regard, among other things, full ownership and title, free and clear of detrimental encumbrances and registrations, of the shares of the companies of the Rinascente Group and real estate properties, the lease relationships, the true and correct representation of the financial statements and tax, social security and legal/labor matters. The limitations and exclusions agreed within the framework of the sale process regard specific events considered by the buyer during the course of the due diligence. Such limitations and exclusions provide for the obligation of compensation in excess of a threshold of significance per individual indemnifiable event (de minimis) and as a whole (with an exempted amount) as well as, for certain matters, a maximum limit of responsibility for the seller.

IFIL will guarantee the commitments undertaken by Eurofind Textile with the buyer until their maturity.

After closing the sale of La Rinascente, Ifil Investissements will purchase the remaining 50% of Eurofind Textile's capital stock from the Auchan Group. Following these transactions, the IFIL Group will receive net proceeds for a total of approximately € 530 million and realize a gain of over € 450 million, without significant tax effects for the Group.

Sale of the investment in Club Méditerranée

In October, after having obtained approval from the competent antitrust authorities, the subsidiary Mediterranean Capital (ex-Ifil Capital) and Exor Group sold the investments in Club Méditerranée capital stock to the Accor Group. Specifically, Mediterranean Capital sold 1,233,691 Club Méditerranée shares (6.37% of capital stock) to Accor at the price of € 55.5 million (€ 45 per share) with a gain on consolidation of € 24.4 million.

The Accor Group is contractually obliged to pay a possible price adjustment, over the next two years, up to a maximum of € 12.3 million (€ 10 per share), in relation to Club Méditerranée's future economic and financial performance.

In conjunction with this deal, in June, the subsidiary Mediterranean Capital had sold 0.82% of Club Méditerranée capital stock to Exor Group for € 6.1 million with a gain on consolidation of € 2 million.

Transactions relating to NHT

In January, Ifil Investissements purchased the remaining 10% of NHT New Holding for Tourism capital stock from the TUI Group for an outlay of € 46.3 million. As part of this transaction, NHT also acquired the remaining 50% of the capital stock of Neos from the TUI Group for an investment of € 2.7 million.

In June, NHT subscribed to the capital stock increase by Alpitour (100%-controlled) for a total of € 17.8 million, of which € 6.5 million was in cash and € 11.3 million by contribution of the total investments held in Welcome Travel Group and in Neos. Following this transaction, Alpitour took over the role of holding company of the tourism sector in that, in addition to directly carrying out its tour operator business, it holds control of all the other sectors connected with the tourism business (hotel management, distribution, aviation and incoming).

Agreement relating to Sviluppo Italia Turismo

In December, Banca Intesa S.p.A., the IFIL Group and Marcegaglia S.p.A. sealed an agreement for the purchase of 49% of Sviluppo Italia Turismo (SIT) capital stock from Sviluppo Italia S.p.A..

The entry of the three private stockholders in the shareholder base of SIT will take place through the company Turismo&Immobiliare (in which the three own equal stakes) which will purchase shares and subscribe to a SIT capital stock increase for a total outlay of € 76.4 million; IFIL's share will be equal to approximately € 25.5 million. It is also anticipated that the three stockholders may possibly acquire control of SIT's stock by 2009.

Once approval is obtained from the antitrust authority in March, the agreement will be finalized in April.

The alliance will allow SIT to improve and build up its structures so that it can expand its packages on the market and increase its tourist flows; the first concrete step will be the start of an investment program in Apulia, Calabria and Sicily.

IFIL's new organizations in the United States of America and in Asia

For the purpose of contributing to the search for new investment opportunities, during the first half IFIL set up new organizations in the United States and Asia, with offices, respectively, in New York and Hong Kong. Thanks to its positioning in two of the most interesting international financial centers and with its highly-qualified professional management staff, the two organizations – which will operate in close coordination with IFIL's offices in Turin – could significantly boost the opportunities of creating economic value for the company.

With similar objectives in mind, at the end of June, Ifil Investissements purchased 100% of the capital stock of Sadco, with head offices in Switzerland, from Exor Group, for an investment of € 1.4 million, corresponding to its net equity value.

Treasury stock

At the end of March 2005, the IFIL Group holds 14,596,040 IFIL ordinary shares of treasury stock, of which 12,557,716 shares are booked in financial fixed assets and 2,038,324 in current assets.

Treasury stock represents a total of 1.41% of the class of stock and 1.36% of the current capital stock and has a carrying value of € 52.1 million.

Increase in the investment in SANPAOLO IMI

In March 2005, IFIL purchased 12,547,230 SANPAOLO IMI ordinary shares (0.851% of the class of stock) for an investment of € 142.3 million. Following this purchase, at the date of the Board meeting (March 30, 2005), IFIL held 82,918,230 SANPAOLO IMI ordinary shares, equal to 5.62% of ordinary capital stock (4.45% of capital stock).

Business outlook

For 2005, IFIL S.p.A. is expected to report a profit.

Moreover, considering the forecasts formulated by the major holdings and other estimates currently available, including the gain on the sale of La Rinascente, the 2005 consolidated financial statements of the IFIL Group are also expected to show a profit.

EXOR
GROUP

Exor Group reported a consolidated net income in 2004 of € 92.6 million (€ 17.1 million in 2003, after booking a provision of € 40 million to the Reserve for investment fluctuations).

Revenues for the year include gains on the divestiture of investments or releases of provisions on such investments for € 80.4 million. These divestitures refer to the sale of the stakes held in Société Foncière Lyonnaise and Club Méditerranée, respectively, to Immobiliaria Colonial and to the Accor Group.
Other income comprises dividends of € 8.2 million (including € 6.5 million received from Société Foncière Lyonnaise) and financial income of € 13 million from short-term investments of available cash resources in low-risk financial instruments.
General expenses are equal to € 8.1 million.

At the end of the year, the consolidated stockholders' equity of Exor Group amounts, net of treasury stock, to € 668.6 million (€ 611.5 million at December 31, 2003).
At the same date, net cash totals € 531 million.

After the above divestitures, the main equity investment held by Exor Group is represented by the 17.2% interest in Graphic Packaging Corporation, a company providing packaging solutions of consumer products, listed on the New York stock exchange.
The synergies that followed after the merger with Riverwood in August 2003 allowed Graphic Packaging Corporation to post, in 2004, a 3.5% increase in the operating margin compared to the prior year. This was achieved in a market where the productive factors (materials and energy) met with strong inflationary pressures.

MOTION FOR APPROVAL OF THE FINANCIAL STATEMENTS AND APPROPRIATION OF NET INCOME FOR THE YEAR

Dear Shareholders,

We ask you to approve the financial statements for the year ended December 31, 2004.
In view of the fact that the Board of Directors has waived, by specific resolution, its share of the profits as provided by art. 27 of the bylaws and that the legal reserve amounts to one-fifth of capital stock, we propose a motion to appropriate the net income of € 37,707,363 to the extraordinary reserve.

The extraordinary reserve will therefore amount to € 720,611,378.

Turin, March 30, 2005

For the Board of Directors
The Chairman
Gianluigi Gabetti

IFI Group

STRUCTURE AND CONTENT OF THE CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements for the year ended December 31, 2004 have been prepared in accordance with the provisions contained in Legislative Decree No. 127 dated April 9, 1991. The Notes to the consolidated financial statements have been prepared in conformity with the same Legislative Decree, art. 38.
The consolidated financial statements are expressed in millions of euros.

SCOPE OF CONSOLIDATION

Criteria used in determining the scope of consolidation

Directly and indirectly controlled subsidiaries (in which IFI holds directly or indirectly more than 50% of the capital stock or has de facto control) have been consolidated line-by-line using the financial statements at December 31, 2004 or the annual accounting data at the same date (where the year-end does not coincide with that of the consolidated financial statements) except as indicated below.

The Alpitour Group has been consolidated on a line-by-line basis using the consolidated accounting data at October 31, 2004, owing to the impossibility of obtaining, on timely basis without disproportionate expense, consolidated accounting data as of the date of the consolidated financial statements. This treatment, allowed by IAS 27, does not affect the assertion that the consolidated financial statements are a true and correct representation of the financial position and results of operations of the Group or the clarity of the financial statements.

Investments in companies subject to joint control and associated companies in which the Group exercises a significant influence have been accounted for using the equity method.

Certain non-relevant companies which do not have a significant impact on the total consolidated revenues and for which it is not practicable to obtain the necessary information on a timely basis without disproportionate expense have been excluded from consolidation and valued at cost. This exclusion does not affect the assertion that the consolidated financial statements are a true and correct representation of the financial position and results of operations of the Group or the clarity of the financial statements.

Furthermore, the subsidiaries BUC – Banca Unione di Credito and Juventus Football Club have been accounted for using the equity method inasmuch as they have non-homogeneous operations (Legislative Decree No. 127/91, art. 28).

Changes in the scope of consolidation

Changes in the scope of consolidation are described below.

IFIL Holdings System

For the purpose of contributing to new investment opportunities, during the first half IFIL set up new organizations in the United States (in February) and Asia (in June), with offices, respectively, in New York and Hong Kong.
With similar objectives in mind, at the end of June, Ifil Investissements purchased 100% of the capital stock of Sadco, with head offices in Switzerland, from Exor Group.
These holdings have been consolidated line-by-line in 2004.

Fiat Group

In February 2004, 100% of the interest held in Fiat Engineering S.p.A. was sold to Maire Investimenti S.p.A. and the company was therefore deconsolidated as of the beginning of the year. At the same time, the Fiat Group subscribed to a capital increase of Maire Investimenti S.p.A. (now Maire Engineering S.p.A.) and currently owns 30% of the capital of this company. On said 30% interest, both parties hold put (Fiat Group) and call (Maire Engineering S.p.A.) options that are exercisable within three years at a predetermined price.

Effective January 1, 2004, the Group consolidated Magneti Marelli Sistemi Elettronici on a line-by-line basis following gradual acquisition of actual control over this strategic supplier of Fiat Auto and other automotive groups. In 2002, this business had been sold to the Mekfin Group, which in turn sold it to the Ixfin Group. So that the company would punctually respect the commitments it had made to its customers and continue pursuing its growth strategies, an agreement was signed at the end of 2003 between the Ixfin Group and the Fiat Group, on the basis of which Magneti Marelli, pursuant to an agreement providing for the beneficial interest in the shares, with voting rights, started to take an increasingly active role in the management of Electronic Systems in 2004. On July 28, 2004 the Fiat Group decided to acquire full ownership thereof by exercising a call option.

In September 2004, Magneti Marelli sold the 100% interest in the Midas business (automotive repair and maintenance services) in Europe and Latin America to the Norauto Group and deconsolidated the related activities from September 30, 2004.

For a better understanding of the variations in the statement of operations, it should be noted that major changes in the composition of the Group took place during 2003, the most important of which that had an impact on 2004 are indicated below:

- at the end of March 2003, the retail financing activities of Fiat Auto Holdings in Brazil were sold to the Itaù banking group and deconsolidated from that date;
- on May 2, 2003, the agreement for the sale of the Toro Assicurazioni Group to the DeAgostini Group was executed and the Toro Group was deconsolidated as of that date;
- on May 27, 2003, Fiat and a pool of banks completed the sale of 51% of Fidis Retail Italia (FRI), a company which at that time controlled part of the European consumer credit business of Fiat Auto Holdings for retail automobile purchases; another part of this business was sold to FRI in October 2003, while the sale of the company operating in the United Kingdom was concluded in 2004;
- in execution of the contract signed on July 1, 2003, the sale was finalized for the aerospace activities of FiatAvio S.p.A. to Avio Holding S.p.A., 70% owned by The Carlyle Group and 30% by Finmeccanica S.p.A..

Worms & Cie Group

The most important changes in the scope of consolidation refer to the purchase, by the Antalis Group, on July 1, 2004, of the Brangs & Heinrich Group, which was consolidated line-by-line starting from the second half of 2004, and the sale of the Roumain RTC Group, on December 21, 2004, and therefore consolidated line-by-line for the entire year 2004.

Alpitour Group

The following companies were consolidated line-by-line during the year ended October 31, 2004: Neos (previously accounted for using the equity method) now 100%-controlled, Altamarea International S.p.A. (a newly-formed company in which a 100% stake was acquired), operating in the sector for the marketing of tourist-hotel facilities, Blumarin Hotel Sicilia (in which a further stake was purchased and is now 90%-owned) and Jumboturismo (in which the remaining 24.16% stake was purchased, bringing the interest to the current 100%).
The investments in Jumbo Renta S.A. (consolidated line-by-line in 2003) and Promoviaggi (accounted for using the equity method in 2003) were sold.

Moreover, the investments in Minerva Viaggi, Saugo Viaggi, Viaggi Galleria 57 and in Welcome We Travel are stated at cost, in view of the impossibility of obtaining their data on a timely basis.

PRINCIPLES OF CONSOLIDATION AND SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared from the statutory financial statements or consolidated financial statements of the Group's single companies approved by the Boards of Directors and adjusted, where necessary, by the directors of the companies to conform with Group accounting principles and to eliminate tax-driven adjustments. The Group's accounting principles respect the requirements set forth by Legislative Decree No. 127 of April 9, 1991, interpreted and supplemented by the Italian accounting principles issued by the National Boards of Dottori Commercialisti and of Ragionieri and, where there are none and not at variance, by those laid down by the International Accounting Standards Board (I.A.S.B.). As regards the transition to International Accounting Standards "International Financial Reporting Standards IFRS" issued by the I.A.S.B., reference should be made to the specific section in the Directors' Report on Operations.

In order to obtain a true and fair representation of the financial position and results of operations of the Group, taking into account their functional integration, the financial companies that provide services to the Industrial Sectors of the Fiat Group and the insurance companies have been consolidated on a line-by-line basis. As a result, adjustments to the balance sheet and statement of operations format have been made in applying art. 32 of Legislative Decree No. 127/91, which provides for changes to be made to obtain a more clear, true and correct representation of the financial position and results of operations.

Again in reference to the financial statement formats, integrations have been made to comply with Legislative Decree No. 6 of 2003 "Reform of Corporate Law". Accordingly, the corresponding figures for the previous year have been reclassified.

Assets and liabilities, and revenues and expenses, of subsidiaries consolidated on a line-by-line basis are included in the consolidated financial statements of the Group, regardless of the percentage of ownership. Furthermore, carrying values of investments are eliminated against the subsidiaries' related stockholders' equity. The portion of stockholders' equity and results of operations attributed to minority interests are disclosed separately. When losses pertaining to minority interests exceed the value of their share of the relevant capital stock, the excess, or deficit, is charged to the Group, unless the minority stockholders are expressly committed to reimbursing the losses, in which case the excess is recorded as an asset in the consolidated financial statements. If no such commitment is in place, should income be realized in the future, the minority interests' share of that income will be attributed to the Group, up to the amount necessary to recover the losses previously attributed to the Group.

Differences arising from the elimination of investments against the related stockholders' equity of the investment at the date of acquisition (since 1994) are allocated to the assets and liabilities of the companies being consolidated, up to the limit of their current value. The residual value, if negative, is recorded as a component of stockholders' equity, "Consolidation reserve", "Consolidation reserve for risks and futures expenses", when due to a forecast of unfavorable economic results. The residual value, if positive, is capitalized as an asset, "Differences on consolidation", and amortized using the straight-line method on the basis of the estimated period of recoverability or, alternatively, is deducted from the consolidation reserve up to the amount of the same. The positive difference is set off against the consolidation reserve as allowed by Legislative Decree No. 127/91, art. 33, paragraph 3. This is considered a prudent approach since recovery of part of the cost through amortization is not deferred until future years but can immediately be compensated against the pre-existing consolidation reserve or the reserve set up during the year.

The effects of subscribing to capital stock increases at different issue prices for the various classes of stock are recorded as changes in stockholders' equity.

Intercompany profits and losses, not yet realized with third parties, are eliminated net of related tax effects, together with all intercompany receivables, payables, revenues and expenses arising on transactions among the companies consolidated on a line-by-line basis. Exceptions are the gross margins on intercompany sales of plant and equipment produced and sold at prices in line with market conditions, in which case such eliminations would be effectively irrelevant and not cost-beneficial.

Also subject to elimination are guarantees, commitments and risks relating to companies included in the scope of consolidation.

The balance sheets of foreign subsidiaries are translated into euros by applying the exchange rates in effect at year-end. The statements of operations of foreign subsidiaries are translated using the average exchange rates for the year. In the financial statements of subsidiaries operating in high-inflation countries (cumulative inflation in excess of 100% in three years), accounting principles for hyperinflationary economies are used.

Exchange differences resulting from the translation of opening stockholders' equity at current exchange rates and at the exchange rates used at the end of the previous year, as well as differences between net income expressed at average exchange rates and that expressed at current exchange rates, are reflected in the stockholders' equity caption "Cumulative translation adjustments". The exchange rates used are summarized in Note 24.

ACCOUNTING PRINCIPLES

Intangible fixed assets

Intangible fixed assets and deferred charges expected to benefit future periods are recorded at cost, adjusted by amortization calculated on a straight-line basis at rates that reflect the estimated useful life of the assets over the period to be benefited. In particular, goodwill and differences on consolidation are amortized over a period of no more than 20 years, taking into account their expected period of recovery. In general, the Group's companies periodically review that the carrying value of such assets is not higher than the estimated recovery value, in relation to their use or realization, as determined by reference to the most recent corporate plans according to the method indicated in the Italian Accounting Principle No. 24 "Intangible assets". In cases in which there is a permanent impairment in the estimated recovery value that is lower than carrying value, appropriate writedowns are recorded.

In keeping with the principle of prudence and international practice in the Automotive Sector, the costs of researching and developing new products and/or processes are mainly included in the results of operations in the period in which such costs are incurred.

Goodwill is recorded as an asset when acquired for consideration.

Property, plant and equipment

Property, plant and equipment are recorded at purchase or construction cost. These values are adjusted where specific laws of the country in which the assets are located allow or require revaluation, in order to reflect, even if only partially, changes in the purchasing power of the currency. Cost also includes financing expenses incurred during the construction period of specific loans, where significant.

Depreciation is provided on a straight-line basis at rates that reflect the estimated useful life of the related assets.

When, at the balance sheet date, property, plant and equipment show a permanent impairment in value below their carrying value, such assets are written down to the lower value, according to the method indicated in the Italian Accounting Principle No. 16, "Tangible assets".

Ordinary repairs and maintenance expenses related to property, plant and equipment are charged to the statement of operations in the year in which they are incurred, while maintenance expenses which increase the value of property, plant and equipment are capitalized and depreciated over the useful life of the assets.

Capital investment grants related to investments in property, plant and equipment are recorded as deferred income when collection becomes certain and credited to income over the useful life of the related asset.

The revaluation of assets allowed by Law No. 342/2000, having been effected by only a very few Italian companies of the Group, was reversed in the consolidated financial statements, for purposes of giving preference to the uniformity and comparability of the accounting principles over time.

Financial fixed assets

Financial fixed assets include investments in unconsolidated subsidiaries, associated companies and other companies, financial receivables, other securities and treasury stock.

Investments in unconsolidated subsidiaries, in companies in which the Group exercises joint control with other partners and in associated companies (those in which the Group exercises, directly or indirectly, a significant influence) are normally accounted for using the equity method. This method is not used in cases in which the investor no longer exercises significant influence over the investee, in which case the cost is considered to be the value of the investment taken from the prior year's financial statements.

Investments in other companies are valued at cost of acquisition or contribution value (including accessory charges which increase the investment value). If, at the balance sheet date, the investment value is determined to have suffered a permanent impairment in value to below the cost of acquisition or the contribution value, as defined above, it is written down to the lower value.
Should the reasons for the writedown no longer apply, the value of the investment will be reinstated up to the limit of the cost of acquisition.

Financial receivables are recorded at estimated realizable value.

Securities are recorded at cost of acquisition, including additional direct charges. In the event of permanent impairment, a valuation allowance is provided as a direct reduction of the securities.

Treasury stock held as fixed assets is recorded at purchase cost, including any writedowns resulting from a permanent impairment in its value. A specific reserve for treasury stock is also recorded under stockholders' equity of the Group for the same amount.

Financial fixed assets also include receivables for vehicles sold under finance lease contracts, accounted for at cost. The related depreciation is calculated, according to the financial method, based on the life of the lease and the related risk in managing such contracts.

Inventories

Inventories of raw materials, semifinished products, finished goods and contract work in progress completed within the fiscal year are valued at the lower of cost and market value, cost being principally determined on a First-In First-Out (FIFO) basis or at weighted average cost (for the Worms & Cie Group). The valuation of inventories includes the direct costs of materials and labor and variable and fixed indirect costs. Provision is made for obsolete and slow-moving raw materials, finished goods, spare parts and other supplies based on their expected future use and realizable value.

Work in progress on long-term contracts is valued based on the stage of completion and is recorded gross of advance payments received from customers. Eventual losses on such contracts are fully recorded when they become known.

Receivables

Receivables are recorded at estimated realizable value. Any unearned interest included in the nominal value of financial receivables has been deferred to future periods. Receivables sold to third parties with recourse or without recourse (including those sold as part of securitization transactions) are eliminated from receivables and disclosed in the memorandum accounts. Receivables denominated in foreign currency are translated at the exchange rate in effect at year-end. Resulting exchange gains and losses are included in the statement of operations.

Other receivables also include deposits to guarantee the securitization transactions of trade receivables (securitization refers to particular programs of discounting trade receivables without recourse, with a collateral deposit as a guarantee).

Investments, treasury stock and securities recorded in current assets

These are stated at the lower of the cost of acquisition, including accessory charges, determined using the "Last In-First-Out" (LIFO) method and realizable value. If realizable value can be determined from the market trend, it is defined on the basis of the market prices at the end of the year.

Reserves for risks and charges
The reserves for risks and charges include provisions to cover losses or liabilities likely to be incurred but uncertain as to amount or as to the date on which they will arise.

Restructuring reserves include the costs to carry out corporate reorganization and restructuring plans and are provided in the year the company formally decides to commence such plans and the relative costs can be reasonably estimated.

Reserve for employee severance indemnities
The reserve for employee severance indemnities comprises the liability for severance indemnities that Italian companies accrue each year for employees, as determined in accordance with labor legislation and contracts in force. The liability is calculated in reference to the years of service and the employee's salary and is indexed for inflation, in accordance with art. 2120 of the Italian Civil Code.

Reserve for pensions and similar obligations
As regards the Fiat Group, the reserve for pensions and similar obligations includes provisions for long-service or other bonuses (including pension funds required by some countries in which the Group operates), payable to employees and former employees under contractual agreements or by law, determined on an actuarial basis, where applicable. In particular, where reference is made to IAS 19 "Employee Benefits" for the accounting of certain contractual features in the absence of specific Italian regulations, the Group has adopted the "corridor " method.

As regards the Worms & Cie Group, the early adoption by the Group of IAS 19, as provided by French regulations, gave rise to effects that have been booked to consolidated stockholders' equity. Such effect gave rise to a reduction in consolidated stockholders' equity of the Worms & Cie Group of € 57 million (net of taxes).

Payables
Payables are recorded at face value; the portion of interest included in the nominal amount is deferred until future periods in which it is earned. Accounts payable denominated in foreign currency are translated at the exchange rate in effect at year-end. Resulting exchange gains and losses are included in the statement of operations.

Taxes payable includes the tax charge for the current year recorded in the statement of operations.

Accruals and deferrals
Accruals and deferrals, common to two or more years, are determined using the accrual method based on the income and expense to which they relate.

Securitization of financial receivables
The Fiat Group has programs for discounting financial receivables originated by the financial services companies using securitization transactions. This discounting of financial receivables calls for the sale without recourse of a portfolio of financial receivables to a non-Group securitization vehicle. This company finances the purchase of the portfolio by issuing securities which it backs (Asset Backed Securities). The securities issued are divided into two types having different characteristics: the first is placed on the market, occasionally subdivided by various classes of ratings, and subscribed to by investors; the second, the reimbursement of which is subordinated to the first, is subscribed to by the seller. The risk for the seller is limited to the portion of the securities which it has subscribed. At the end of each accounting period, therefore, such securities are evaluated in relation to the performance of the receivables sold and may be written down on the basis of this evaluation. These securities are recorded in financial receivables.

Lastly, these sales without recourse require the immediate recognition of the present value of the future margin implicit in the receivables sold, net of discounting costs. This net value is included in the value of production since it relates to revenues arising out of the normal operations of the financial services companies (to this end, the financial income of such companies is included in revenues from sales and services, as described in the relevant note).

Derivative financial instruments

Financial instruments used to hedge exchange and interest rate fluctuations and, in general, changes in the assets and liabilities, are presented in Note 13. Derivative financial instruments are recorded at inception in the memorandum accounts at their notional contract amount.

Beginning in 2001, the Fiat Group adopted – to the extent that it is consistent and not in contrast with general principles set forth in the Italian law governing financial statements – the international accounting standard IAS 39 "Financial Instruments: Recognition and Measurement", applicable beginning January 1, 2001. Such principle covers the accounting treatment of all financial assets and liabilities in and off-balance sheet and, in particular, states that derivative financial instruments should be valued at fair value. Taking into account the restrictions under Italian law and the evolution of the law now underway, the Group maintains, consistently with Consob rulings, that IAS 39 is applicable only in part and only in reference to the designation of derivative financial instruments as "hedging" or "non-hedging instruments" and with respect to the symmetrical accounting of the result of the valuation of the derivative hedging instrument and the result attributable to the hedged item ("hedge accounting"). The transactions which, according to the Group's policy for risk management, are able to meet the conditions stated by the accounting principle for hedge accounting treatment are designated as hedging transactions; the others although set up for the purpose of managing risk (inasmuch as the Group's policy does not permit speculative transactions), have been designated as "trading".

Details of the accounting treatment adopted are as follows.

For foreign exchange instruments designated as hedges, the premium or discount, representing the difference between the spot exchange rate at the inception of the contract and the forward exchange rate, is recorded in the statement of operations, in financial income and expenses, in accordance with the accrual method. Differences between the value of such instruments using the exchange rates at inception and those at year-end are also included in the statement of operations to offset the exchange effects of the items being hedged. In particular, for contracts entered into to hedge the exchange risk of future transactions that are considered highly probable, the effects of the alignment with the year-end exchange rate are deferred until the year in which the underlying transactions are recorded.

For interest rate instruments designated as hedges, the interest rate differential is included in the statement of operations, in financial income and expenses, in accordance with the accrual method, offsetting the effects of the hedged transaction.

Derivative financial instruments hedging interest rate fluctuations that are designated as trading instruments are valued at market value and the differential, if negative compared to the contractual value, is recorded in the statement of operations as financial income and expenses, in accordance with the concept of prudence.

The same prudent principle is followed in recording derivative financial instruments to manage trading risks (for example equity swaps) that do not meet the conditions for hedge accounting treatment.

Revenue recognition

Revenues from sales and services are recognized on the accrual basis net of returns, discounts, allowances and rebates.

Revenues from sales of products are recognized at the moment title passes to the customer, which is generally at the time of shipment. Under contracts for vehicle sale and buy-back at a specified price, a specific reserve for future risks and charges is set aside based on the difference between the guaranteed residual value and the estimated realizable value of the used asset, taking into account the probability that such option will be exercised; this reserve is set up at the time of the initial sale and adjusted periodically over the period of the contract.

Revenues from services are recorded when they are performed. Revenues from long-term contracts are recognized using the percentage of completion method.

Revenues from sales and services include income from the normal business of the financial services companies. Revenues also include amounts received from financing leases, net of depreciation, and income from company assets on operating leases.

With regard to the Insurance Sector, premiums collected by the insurance companies are recognized on an accrual basis.

Costs

Costs are recognized on an accrual basis.

Research and development costs are principally charged to the statement of operations in the period in which they are incurred. Research-related revenue grants provided by the Government or the EU are credited to the statement of operations when collection becomes certain.

Advertising and promotion expenses are charged to the statement of operations in the year incurred.

Estimated product warranty costs are charged to the statement of operations at the time the sale is recorded.

The costs of production include the interest and expenses in the normal course of business of the financial services companies, as well as insurance claims and other technical costs of the insurance companies.

Investment income

Dividends distributed by companies valued at cost are recorded in the year in which they are declared.

Financial income and expenses

Financial income and expenses are recorded on the accrual basis. Income and expenses resulting from derivative financial instruments, as well as relevant year-end exchange differences, are included in the statement of operations in accordance with the abovementioned policies disclosed under memorandum accounts.

Costs relating to the discounting of receivables and notes of any type (with recourse, without recourse, securitization) and nature (trade, financial, other) are charged to the statement of operations on the accrual basis.

Income taxes

Income taxes currently payable are provided for in accordance with the existing legislation of the countries in which the Group's companies operate.

Deferred tax liabilities or deferred tax assets are determined on all the temporary differences between the consolidated assets and liabilities and the corresponding amounts for purposes of taxation, including those deriving from the most significant consolidation adjustments. As allowed by the applicable accounting principles, deferred tax assets are also recorded to account for the tax benefit of tax loss carryforwards whenever the specific conditions for future recoverability are met.

In particular, deferred tax assets have only been recorded if there is a reasonable certainty of their future recovery. Deferred tax liabilities are not recorded if it is unlikely that a future liability will arise.

Deferred tax assets and liabilities are offset if they refer to the same company and to taxes which can be compensated. The balance from offsetting the amounts is recorded in deferred tax assets in current assets, if a deferred tax asset, and in the deferred tax reserve, if a deferred tax liability.

COMMENTS ON THE PRINCIPAL COMPONENTS OF THE CONSOLIDATED BALANCE SHEET

1) Intangible fixed assets

Total intangible fixed assets	4,711	342	(688)	48	0	(163)	(57)	**4,193**

Major changes, by Group, are described below.

Fiat Group

Intangible fixed assets are shown net of accumulated writedowns of € 662 million (€ 614 million at December 31, 2003) of which € 604 million (€ 579 million at December 31, 2003) relates to goodwill and differences on consolidation. Writedowns recorded in 2004 amount to € 48 million (€ 55 million in 2003) and are included in the disposals and other changes column.

Start-up and expansion costs at December 31, 2004 consist of deferred plant start-up costs and corporate formation costs of € 57 million (€ 60 million at December 31, 2003) and capital increase costs of € 58 million (€ 84 million at December 31, 2003).

Differences on consolidation total € 1,989 million at December 31, 2004 (€ 2,251 million at December 31, 2003) and include the net residual amounts (net of amortization and writedowns, as described below) on the acquisition of the Case Group and other CNH Group companies for € 1,756 million, the Irisbus Group for € 43 million, Meridian Technologies Inc. for € 23 million, certain Components Sector companies for € 39 million (including € 20 million as a result of the purchase of Magneti Marelli Sistemi Elettronici in 2004), certain Production Systems Sector companies for € 39 million and other minor companies for € 26 million. Differences on consolidation also include that deriving from the Tender Offer issued in 2000 for the shares of Magneti Marelli S.p.A. for € 15 million, as well as that from the CNH Global N.V. capital increase effected in 2000 for € 48 million.

As regards the amounts recorded in goodwill and differences on consolidation, amortization is charged over periods ranging from five to twenty years, on the basis of the expected recoverability of these amounts. At the end of the year, however, specific reviews were conducted to verify whether such amounts are recoverable by considering the existing prospects of earnings. From the analyses performed, taking into consideration the changed market conditions, the restructuring plans initiated by certain Sectors of the Group and the consequent impact on the business plans of various Sectors, permanent impairments in value were identified at December 31, 2004 that gave rise to writedowns totaling € 25 million (€ 38 million at December 31, 2003).

Worms & Cie Group

The balance of € 803 million at December 31, 2004 mainly includes the residual difference on consolidation on the purchase of the ex-AWA Group (€ 746 million), which is being amortized over 20 years. The change in the scope of consolidation during 2004 is principally due to the acquisition of the Brangs & Heinrich Group (€ 22 million).

Alpitour Group

The differences on consolidation regarding the subsidiaries of the Alpitour Group are amortized over five years; differences on consolidation relating to the companies owning the resorts in the Maldives are amortized on the straight-line basis over the life of the concession rights (from six to 16 years) received from the government for the use of the islands for tourism purposes. It should be pointed out that such concession rights were renewed up to 2015.

Part of the increase, € 7 million, refers to the goodwill paid on the purchase of the additional 24.16% stake in the company Jumboturismo S.A.

IFIL Holdings System

The difference on consolidation which originated in 2004 on the purchase of NHT capital stock (€ 37 million) was amortized at the end of the first quarter of 2004 for € 24 million since it could not be allocated. At the end of 2004, taking into account that on consolidation the IFIL Group had in the past deducted the difference on consolidation on 90% of the investment in the Alpitour Group from the consolidation reserve, a charge was then made to completely amortize the remaining amount of € 13 million.

Major changes, by Group, are described below.

Fiat Group

Property, plant and equipment include revaluations required or allowed by national laws, which, net of related accumulated depreciation, amount to € 197 million at December 31, 2004 (€ 231 million at December 31, 2003).

No interest expenses were capitalized in 2004 or in 2003.

The change in the scope of consolidation shows a positive balance of € 60 million as a result of the entry of companies for € 125 million and the sale of companies for € 65 million.

Reclassifications refer to a reduction in construction in progress and advances on purchases of property, plant and equipment existing at the end of the prior year which were reclassified at the time they were effectively acquired and put into operation.

Disposals and other changes, with a negative balance of € 654 million, also include the writedowns recorded during the year for € 84 million (€ 351 million in 2003), detailed by Sector as follows: Automobiles € 75 million, Metallurgical Products € 4 million, Components € 1 million, and other minor companies € 4 million. This item also comprises disposals relating to assets on operating leases of € 303 million.

Other assets include vehicles on operating leases for € 828 million at December 31, 2004 (€ 914 million at December 31, 2003), mainly relating to long-term leases.

Worms & Cie Group

Property, plant and equipment include assets under finance leases for € 7 million (€ 125 million at December 31, 2003). The reduction from December 31, 2003 is due to the end of the leases of AWA Ltd.
The depreciation of property, plant and equipment includes € 54 million of extraordinary depreciation.

Alpitour Group

The change in the scope of consolidation is principally the result of the first-time line-by-line consolidation of Neos, the airline company of the Group (+€ 2 million) and the deconsolidation of the subsidiary Jumbo Renta, a company owning commercial properties in Spain (-€ 3 million) that was sold in April 2004.
Additions mainly include the costs for the construction work on a new tourist resort in Sicily, in Arenella (province of Siracusa) for € 17 million, as well as the financial charges related specifically to the financing received (€ 1 million).
Mortgages are carried by financial institutions on certain buildings held by the Alpitour Group (mainly tourist resorts) for € 2 million.

The residual net book value of monetary revaluations effected in prior years on buildings held by the Alpitour Group, as allowed by specific laws, amounts to € 0.3 million.

The depreciation rates used for property, plant and equipment are within the following ranges:

	Minimum	Maximum
Land and buildings	1%	10%
Industrial and commercial equipment	5%	28%
Plant and machinery	8%	21%
Other assets	4%	33%

3) Financial fixed assets

Total investments	5,879	203	(151)	(16)	215	14	(894)	**5,250**

Major changes in investments, by Group, can be summarized as follows.

IFI and IFIL Holdings System
Increases of € 116 million refer to the purchase of 9.53% of Eurofind capital stock from Mediobanca in January 2004 from the subsidiary Ifil Investissements.

The disposals and other changes column includes the sale of 50% of the capital stock of Eurofind Food (€ 481 million) and 7.2% of the capital stock of Club Méditerranée (-€ 35 million).

Fiat Group

The change in the scope of consolidation, with reference to investments in unconsolidated subsidiaries, is due to the line-by-line consolidation of some minor subsidiaries.

The amounts included in the increases column are mainly related to the following acquisitions and capitalizations:

- investments in unconsolidated subsidiaries: capitalization of the company Fiat Auto S.A. de Ahorro para Fines Determinados (€ 6 million), acquisition of the company BMI S.p.A. (€ 4 million) and other minor companies (€ 6 million);
- investments in associated companies: acquisitions of the companies Maire Engineering S.p.A (€ 35 million) and Immobiliare Novoli S.p.A. (€ 21 million); capitalization of the companies CNH Capital Europe S.A.S. (€ 8 million), CNH de Mexico SA de CV (€ 5 million) and other minor companies (€ 5 million);
- investments in other companies: acquisition of the company Lingotto S.p.A. (€ 3 million) and other minor companies (€ 4 million).

Disposals and other changes refer principally to:

- investments in unconsolidated subsidiaries: the change refers to the dividends distributed by BUC - Banca Unione di Credito;
- investments in associated companies: sale of the company Toro Targa Assicurazioni S.p.A. (-€ 13 million) and other minor companies (€ 4 million);
- investments in other companies: sale of the investments in Edison S.p.A. (€ 65 million) and Gas Turbine Technologies S.p.A. (€ 6 million), liquidation of Kish Receivables Company (€ 21 million) and sales of other minor companies (€ 3 million).

Worms & Cie Group

Disposals and other changes include the sale of the investment in Accor (€ 23 million), reimbursements and distributions of reserves by Pechel Industries and SGS (€ 29 million) and other minor changes (€ 8 million).

Investments in unconsolidated subsidiaries

€ in millions	%	12/31/2004	%	12/31/2003	Change

Alpitour Group - sundry companies		**1**		3	(2)
Total investments in unconsolidated subsidiaries		**283**		488	(205)

Unconsolidated subsidiaries of the Fiat Group

The above companies have not been consolidated either because their operations are so dissimilar (BUC - Banca Unione di Credito) or because it would not have been possible to obtain the necessary information for their consolidation on a timely basis without disproportionate expense or because their operations are not significant. Such companies show a negative net financial position of € 443 million (€ 297 million at December 31, 2003).

As regards the investment in Leasys S.p.A., this company is subject to joint control with the other partner, even though the Fiat Group holds 51% of capital stock; like the other principal jointly controlled companies (which, instead are included in the associated companies), this investment is accounted for using the equity method.

Associated companies of the IFIL Holdings System

The change in these investments is due to the following transactions:

- proportional spin-off of Eurofind, in December, through two newly-formed Luxembourg-registered companies named Eurofind Food and Eurofind Textile;
- sale to Auchan Group, in the second half of December, of 50% of Eurofind Food capital stock.

The carrying value of the investment in the Eurofind Textile Group includes a residual difference on consolidation of € 22 million.

Associated companies of the Fiat Group

The Fiat Group holds certain companies under joint control, the most important of which are Fiat-GM Powertrain B.V., Sevel S.p.A., Société Européenne de Véhicules Légers du Nord-Sevelnord Société Anonyme and Naveco Ltd. Such companies carry a negative net financial position of € 1,203 million (€ 1,093 million at December 31, 2003).

Fiat-GM Powertrain

Fiat-GM Powertrain B.V. is an industrial joint venture for the manufacture of engines and gears for cars that was set up in the second half of 2001 between Fiat and General Motors Corporation (General Motors) under the well-known strategic alliance. The key figures taken from the financial statements of Fiat-GM Powertrain B.V., drawn up in accordance with the accounting principles of the Fiat Group for the valuation of the investment using the equity method at December 31, 2004 and 2003 are as follows:

€ in millions	**12/31/2004**	12/31/2003
Balance sheet data		
Fixed assets	**3,149**	3,250
Total assets	**6,581**	6,611
Net indebtedness	**(1,273)**	(1,238)
Stockholders' equity	**2,516**	2,344

€ in millions	**2004**	2003
Statement of operations data		
Net sales	**6,530**	6,598
Operating income	**255**	296
Net financial expenses	**31**	38
Net income	**139**	180

In view of the strictly industrial nature of the joint venture and in order to achieve a reading of its industrial performance that is consistent with the past, commencing in 2001 and during the period in which the industrial convergence is being implemented (estimated in approximately three years), the Group's share of the results of the company has been included in the consolidated statement of operations as a split between the operating/industrial component and the other non-operating components. In particular, the Group's share of the operating result of the company (€ 127 million in 2004, € 147 million in 2003, € 143 million in 2002 and € 47 million in the second half of 2001), determined by the transfer pricing policy adopted, is included in the consolidated statement of operations as an adjustment to the cost of the products purchased from the joint venture, whereas the share of the result in the other non-operating components is allocated to the respective principal captions, without effect on the total net result recorded by the Group.

Lastly, as a consequence of the "Termination Agreement" signed between Fiat and General Motors on February 13, 2005, the joint venture will be dissolved during the first half of 2005 in the manner described previously in the Report on Operations – Significant events occurring since the end of the fiscal year and business outlook. Based upon the rules established in the agreement for the allocation of the assets between the two partners, it is deemed that the carrying value of Fiat-GM Powertrain recorded in the financial statements is fully recoverable.

Italenergia Bis

With reference to the investment in Italenergia Bis S.p.A., during the second half of 2002, the Fiat Group had sold a 14% holding to certain other stockholders of the company (Banca Intesa, IMI Investimenti and Capitalia, hereinafter the "Banks") for € 548 million, realizing a gain of € 189 million. The related sales contracts and the contemporaneous agreements with another stockholder of Italenergia Bis (Electricité de France, hereinafter "EDF") provide, among other things, that:

- by virtue of an option acquired in respect of EDF (the so-called EDF Put), Fiat may elect, between March and April 2005, to sell the shares it still holds in Italenergia Bis (223,151,568 shares, equal to 24.6%,) to EDF, at a price corresponding to the value of the investment, as estimated on the basis of the valuations performed by three experts appointed for that purpose. That price, less a premium of € 127 million, payable only in the event the option is exercised, may not be less than a minimum (floor) of € 1,147 million, or € 5.141698 per share;
- in connection with the EDF Put, the Banks (in addition to the put agreements negotiated independently with EDF for their respective initial holdings in Italenergia Bis) obtained a so-called "tag along/drag along" agreement from Fiat, and Fiat arranged a symmetrical Put/Call contract with EDF (conditional upon the prior exercise of the EDF Put by Fiat) that gives rise to two scenarios:
    a) Fiat independently exercises the EDF Put on its own 24.6% holding and in this case:
        - the Banks exercise the "tag along" under which the Banks ask Fiat to exercise for each of them the put clause of the put/call agreed with EDF at the same price conditions as the EDF Put (valuation at fair market value, minimum floor of € 5.141698 per share);
        - the corresponding "drag along" allows Fiat to reacquire the Banks' shares in any case and to surrender them to EDF which in turn has, by means of the call clauses in the Put/Call, the right to ask Fiat to acquire and surrender the shares. In substance, by means of the call, EDF may (providing that Fiat exercised the EDF Put, which is a condition for the Put/Call) acquire the entire original Fiat investment.

b) Fiat does not independently exercise the EDF Put on its own 24.6% holding and in this case:

- the individual Banks, separately, have the right to request Fiat to exercise its Put on EDF which allows the Banks to exercise the "tag along", as described above, and to realize a gain;
- Fiat may elect not to exercise the EDF Put, as instead requested, and the Banks have the right to ask that Fiat purchase from the same Banks their respective 4.66% holdings at the lower of the price determined pursuant to the EDF Put, in accordance with the same criteria and procedures agreed with EDF, and € 6.5 per share;
- Fiat does not have a call right on the Banks' holdings which were sold to the Banks definitively.

In conclusion, the 14% holding in Italenergia Bis sold by Fiat is subject to Put options exercisable in 2005 by each of the Banks. Nevertheless, the effects of the sale were considered final and the resulting gain realized in 2002, in that Fiat had contemporaneously stipulated a put option with EDF that will give it the right, in the event that the Banks ask to purchase said shares, to sell them to EDF at the same price conditions as the EDF Put.

In order to complete disclosure, it should be pointed out that in December 2004 Fiat received a letter in which EDF advised that it intends to invoke the arbitration rights available under the Put Option Agreement signed in September 2002 with Fiat. EDF claims that certain recent changes to Italian legislation have raised uncertainty regarding the nature and extent of the rights and interests that it would acquire under the Put Option Agreement. Fiat has reviewed its legal position on the issues raised by EDF and it believes that its rights under the Put Option Agreement are unaffected by the position communicated by EDF. At the end of December 2004, EDF asked the organization which administers arbitration proceedings – the London Court of International Arbitration – to commence arbitration for the above reasons. Fiat has presented its defense case before the Court. It is probable that the arbitration will end by the end of the year.

Again in December, EDF initiated arbitration proceedings against Fiat with regard to the Put on the 14% holding sold to the three Banks in 2002 and functionally at the service of the tag-along/drag-along right granted to the same Banks in the event of exercising the Put Option relative to the 24.6% holding. In this request, too, EDF claims that certain recent changes to Italian legislation have raised uncertainty regarding the nature and extent of the rights and interests that it would acquire under the Put Option Agreement. Also in this case, Fiat has reviewed its legal position on the issues raised by EDF and it believes that its rights under the Put Option Agreement are well-founded. The arbitration is under the administration of the International Chamber of Commerce and in its initial stages.

The legal steps taken by EDF are to be associated with similar actions undertaken by EDF with regard to the other stockholders of Italenergia Bis and with the well-known initiatives, according to press reports, advanced in relation to other operators in the sector and financial operators aimed at identifying an industrial or financial partner in Italenergia Bis. Press sources have also revealed that negotiations are underway between the Italian and French governments concerning the reciprocal opening of the electricity market.

On March 21, 2005 Fiat exercised the Put option relating to 24.6% of the shares as well as the Put on the 14% holding sold to the three banks in 2002.

Fidis Retail Italia ("FRI")

With reference to the associated company Fidis Retail Italia S.p.A. ("FRI"), this company was set up to take over the European activities of the Automobile Sector in the area of consumer financing for retail automobile purchases. To this end, those activities, performed by various companies operating in different countries in Europe, were gradually sold to FRI, after obtaining the necessary authorizations from the local regulatory agencies. As envisaged by the Framework Agreement signed on May 27, 2002 by Fiat and the "Money Lending Banks" (Capitalia, Banca Intesa, SANPAOLO IMI and later Unicredito Italiano), on May 27, 2003, the Fiat Group sold 51% of FRI's shares and, as a result, the relative control, to Synesis Finanziaria S.p.A. an Italian company held equally by the four Banks, at the price of € 370 million. This transaction led to a loss of € 15 million that had already been set aside in a specific reserve for risks in the consolidated financial statements at December 31, 2002, based upon the binding agreements signed by the parties at that time. The sale contract calls for Put and Call options that can be summarized as follows:

- Call option by Fiat Auto to purchase 51% of Fidis Retail Italia, held by Synesis Finanziaria, exercisable quarterly up to January 31, 2008 (initially up to January 31, 2006, before the extension agreed on February 4, 2005) at a price increased *prorata temporis* over the sale price plus additional payments less any distributions;
- Synesis Finanziaria's right to ask Fiat Auto to exercise the above purchase option on 51% of Fidis Retail Italia in the event of which, by January 31, 2008 (January 31, 2006, before the above mentioned extension) there is a change in control of Fiat or Fiat Auto (also through the sale of a substantial part of the companies owned by

Fiat Auto or one of its brands Fiat, Alfa and Lancia) as set forth in the relative stockholders agreement between Fiat Auto, Synesis Finanziaria and the four money lending banks;

- so-called “tag along” option on behalf of Synesis Finanziaria if the same events referred to in the preceding point occur after January 31, 2008 (originally January 31, 2006);
- so-called “drag along” option on behalf of Fiat Auto in the event of the sale of the investment after January 31, 2008 (January 31, 2006, before the above mentioned extension).

As a result of the transaction, FRI was deconsolidated and has repaid all the loans it previously obtained from the centralized treasury department of the Group.

Associated companies of the Worms & Cie Group

The carrying value of the investment in SGS S.A. includes a difference on consolidation of € 373 million which is being amortized over 20 years (€ 393 million at December 31, 2003).

Associated companies of the Alpitour Group

The change in the scope of consolidation (-€ 2 million) is due to the first-time line-by-line consolidation of Neos S.p.A., in which a 50% stake had already been held in 2003.

Financial receivables by the Fiat Group are shown in the financial statements net of the allowances for doubtful accounts of € 3 million (€ 5 million at December 31, 2003), with a provision of € 3 million during the year 2004; they approximate fair value which has been calculated using the present value method, based on a discount rate which reflects market conditions, the duration and the risk of insolvency.

Financial receivables by the Worms & Cie Group show a reduction of € 126 million. Of that amount, € 124 million is due to the early repayment of the loan granted by ArjoWiggins to the buyers of Appleton Papers Inc. in 2001 (nominal value of US$ 321 million).

Financial receivables by the Alpitour Group, equal to € 16 million, include loans granted to companies operating hotels and suppliers providing tourist services, earning interest at floating rates based on the Euribor and Libor (€ 7 million). They also include security deposits (€ 8 million) to guarantee exclusive marketing contracts for the tourist resorts in the Maldives and in Tunisia, earning interest at floating rates based on the Euribor and Libor (of which € 3 million is due beyond five years), as well as other receivables from associated companies for € 1 million.

Financial fixed assets – Other securities

€ in millions	**12/31/2004**	12/31/2003	Change
Fiat Group	**55**	56	(1)
Worms & Cie Group	**34**	23	11
IFIL Holdings System	**5**	5	0
Total other securities	**94**	84	10

Other securities of the Fiat Group are shown in the financial statements net of allowances for writedowns of € 24 million (€ 32 million at December 31, 2003). The writedown refers to the adjustment of the securities to estimated realizable value. At December 31, 2004, the carrying values are substantially in line with fair value.

Other securities of the Fiat Group are shown in the financial statements net of allowances for writedowns of € 24 million (€ 32 million at December 31, 2003). The writedown refers to the adjustment of the securities to estimated realizable value. At December 31, 2004, the carrying values are substantially in line with fair value.
Other securities of the Worms & Cie Group are basically composed of investments in Permal funds.
Other securities of the IFIL Holdings System refer to Ocean Club Méditerranée bonds, maturing on November 1, 2008. Such bonds earn annual interest of 3% and give the right, at maturity, to subscribe to the same number of Club Méditerranée shares at a unit price of € 58 or to receive a total reimbursement of € 5.2 million.

Financial fixed assets – Treasury stock

There were no transactions in preferred treasury stock during the year; the balance at December 31, 2004 is as follows:

		Carrying value	
	Number of shares	Unit (€)	Total (€ in millions)
IFI preferred shares	**5,360,300**	**13.15**	**70** (a)

(a) Net of writedowns of € 58.9 million made in 2002.

IFI preferred treasury stock in portfolio at December 31, 2004 has a par value of € 5,360 thousand and represents 3.28% of capital stock (6.98% of the class of stock).

Based upon the average stock market prices for the second half of 2004 (€ 8.85), IFI preferred shares show an unrealized loss of € 23 million, which would be reduced to € 10 million based upon the average market prices for the period March 1 – 15, 2005 (€ 11.35).
Such unrealized loss is not considered representative of a permanent decline in value taking into account that the per share carrying value of IFI preferred shares held is in any case lower than the per share value of the consolidated stockholders' equity of the IFI Group at December 31, 2004 (€ 13.9).

Financial fixed assets – Finance lease contracts receivable

Net amount 12/31/2003	Additions	Financial amortization	Foreign exchange effects	Change in the scope of consolidation	Disposal and other changes	**Net amount 12/31/2004**	**Accumulated amort. and writed. 12/31/2004**
1,797	793	(557)	(5)	4	(305)	**1,727**	**1,192**

Finance lease contracts receivable refer to vehicles sold by the Automotive Sectors of the Fiat Group under finance leases.

Finance lease contracts receivable do not include vehicles on operating leases, which are included under property, plant and equipment.

Other financial fixed assets

Other financial fixed assets total € 192 million (€ 315 million at December 31, 2003) and refer to the Worms & Cie Group. They comprise:

- the deposit of € 98 million lodged with a leading banking institution which partially earns interest. The deposit was made by the Worms & Cie Group within the framework of the loans given to the buyers of Appleton Papers Inc. in order to guarantee the disbursing banks against the risk of an eventual acceleration of the indemnities connected with the dispute over the environmental risks to the Fox River;
- the deposit of € 92 million, made for the fine levied on Arjo Wiggins Appleton by the European Commission for alleged violations of fair trade practices;
- other receivables of € 2 million.

Additional information is provided in the section "Pending litigation".

The reduction of € 123 million basically refers to the release of the deposit made by Arjo Wiggins Appleton to guarantee the commitments undertaken in connection with finance leases (-€ 111 million).

4) Current assets - Inventories

	12/31/2004			12/31/2003		
€ in millions	**Gross**	**Allowance**	**Net**	Gross	Allowance	Net
Raw materials and supplies	**1,505**	**(198)**	**1,307**	1,480	(221)	1,259
Work in progress and semifinished products	**860**	**(27)**	**833**	1,006	(23)	983
Contract work in progress	**2,886**	**0**	**2,886**	4,077	0	4,077
Finished goods and merchandise	**4,503**	**(407)**	**4,096**	4,897	(466)	4,431
Advances to suppliers	**7,076**	**0**	**7,076**	5,188	0	5,188
Total inventories	**16,830**	**(632)**	**16,198**	16,648	(710)	15,938
Advance payments on contract work in progress (a)	**(9,645)**	**0**	**(9,645)**	(8,876)	0	(8,876)
Net inventories	**7,185**	**(632)**	**6,553**	7,772	(710)	7,062

(a) With reference to the Fiat Group, for the sake of clarity, certain items involving customer advances on contract work posted in the past under "Other payables" (Note 11) were included in the item advance payments on contract work in progress at December 31, 2004. Consistently with this change, the value of advance payments on contract work in progress at December 31, 2003 was adjusted by € 428 million.

Inventories mainly refer to the Fiat Group (€ 15,617 million at December 31, 2004). Advance payments received from customers on contract work in progress (mainly connected with work to complete the T.A.V. project) amount to € 9,645 million (€ 8,876 million at December 31, 2003) and are recorded in payables (Note 11). Inventories, net of such advance payments received from customers, amount to € 5,972 million (€ 6,484 million at December 31, 2003). Advances to suppliers principally relate to the amounts paid by Fiat S.p.A. to the consortiums involved in the T.A.V. project. Contract work in progress decreased mainly as a result of the change in the scope of consolidation.

5) Current assets - Receivables

An analysis of receivables by type and due date is as follows:

	12/31/2004			12/31/2003

Receivables from the tax authorities	**64**	**0**	**64**	81	0	81
Total receivables	**9,506**	**1,749**	**11,255**	**9,097**	1,678	10,775

Receivables from the tax authorities principally refer to VAT and income taxes receivable from the Italian tax authorities and include the tax credit relating to the advance payments of income tax on employee severance indemnities paid by Italian companies. The portion of interest accrued on that receivable relating to the current year is recorded in financial income and expenses.

Receivables due beyond five years, which refer entirely to the Fiat Group, amount to € 60 million (€ 12 million at December 31, 2003).

The increase in deferred tax assets of the Alpitour Group, for € 13 million, is due to the future tax benefit connected with the tax losses carried forward without an expiry date, recorded in the current year with a contra-entry to deferred tax benefits in the statement of operations. These tax losses arose upon the presentation of the tax return for the year ended October 31, 2002 by Neos in which it took advantage of the benefits provided under Law 383/2001 ("Tremonti bis") for aircraft under leasing contracts. The tax benefit in question was recorded when the October 31, 2004 financial statements were closed in view of the fact that it is deemed that the company has by now achieved a consolidated position of earnings, also in light of the results reported in recent years. In computing the effective tax benefit, account was taken of forecasts of future taxable income, reflected in the long-term plan

approved by the Board of Directors, which will come from a consolidation of short- and medium-haul operations and the start of the long-haul business; both these activities will be developed for the most part with the parent company Alpitour S.p.A..
It is therefore reasonably certain that in future years there will be taxable income sufficient to absorb the tax losses carried forward to the extent recorded in the financial statements. The recoverability of this item will be monitored in successive years and adjustments will be made as necessary.

Receivables are presented net of the allowance for doubtful accounts (in reference to trade receivables) for € 790 million. Movements in these allowance accounts in 2004 are as follows:

€ in millions	Balance at 12/31/2003	Provisions	Use and other changes	Change in the scope of consolidation	**Balance at 12/31/2004**
Allowance for doubtful accounts	567	138	90	(5)	**790**

6) Current assets - Financial assets not held as fixed assets

Investments

Investments in other companies, entirely held by the Fiat Group, amount to € 33 million (€ 32 million at December 31, 2003) and consist of investments held by the insurance companies.

Other securities

€ in millions	**12/31/2004**	12/31/2003	Change

	1,052	429	623
Total other securities	**3,297**	4,359	(1,062)

The analysis, by Group, is as follows.

Fiat Group

Treasury stock held by Fiat S.p.A. is destined to cover the commitments for the stock options granted to directors and employees. In particular, 2,667,615 shares are for coverage of the stock options accruing to Mr. Morchio and exercisable up to May 30, 2005 at the price of € 5.623; 670,000 shares are for the partial coverage of the stock options granted to Mr. Marchionne, as described in greater detail in Note 13, in the paragraph commenting the commitments for derivative financial instruments.

Italian government securities also include securities issued by other public entities and guaranteed by the Italian government.

At December 31, 2004, other securities include short-term bonds and commercial paper for € 703 million (€ 1,480 million at December 31, 2003) and highly rated liquidity funds of leading international banks for € 1,481 million (€ 2,365 million at December 31, 2003) in which mainly the treasury management companies of the Group had made temporary and highly liquid investments of available cash resources. Additional liquidity in the form of unrestricted bank accounts and cash is included in the caption cash for € 3,164 million (€ 3,211 million at December 31, 2003).

The value of Italian government securities and other securities approximates fair value.

IFIL Holdings System

At December 31, 2004, other securities mainly comprise investments of liquidity in the money market, in time deposits, in short-term Italian government securities and in other short-term financial instruments held by the foreign subsidiaries.

Fiat Group

Financial receivables are shown net of allowances for doubtful accounts of € 440 million and show a reduction of € 3,599 million compared to the end of the prior year.

This reduction reflects lower loans made to dealer networks of the Automobile Sector, as well as the decline in the loans made to suppliers. Also contributing to the decrease in financial receivables are the sale of the financial activities of the Automobile Sector in the United Kingdom (deconsolidation of financial receivables for about € 690 million) and the collection of receivables and deposits held at December 31, 2003 by industrial companies and treasury management companies of the Group.

Movements in the allowances for doubtful financial accounts receivable during the year are as follows:

Balance at 12/31/2003	Provisions	Use and other changes	Change in the scope of consolidation	**Balance at 12/31/2004**
316	239	(96)	(19)	**440**

The fair value of financial receivables would be approximately € 7,143 million at December 31, 2004 (€ 10,800 million at December 31, 2003). The fair value of financial receivables was determined in accordance with the method indicated in Note 3 - Financial fixed assets – Receivables.

Receivables from associated companies of € 406 million at December 31, 2004 (€ 644 million at December 31, 2003) decreased by € 238 million mainly due to loan repayments.

Financial receivables from others include € 5,302 million (€ 7,914 million at December 31, 2003) of financing granted to retail customers as well as dealer networks and suppliers. As regards the receivables from the dealer networks, reference can be made to the information provided in the Fiat Group Report on operations – Analysis of the Financial Position and Operating Results of the Fiat Group and Fiat S.p.A., with regard to the note on the Net Financial Position. Financial receivables from others also include the net value of subordinated securities of € 319 million (€ 214 million at December 31, 2003) subscribed as part of the securitization of financial receivables.

Alpitour Group

Financial receivables from others recorded in the financial statements at December 31, 2003 and relating to the sale of the properties in Turin, Cuneo and Milan were entirely collected in the year 2004.

IFIL Holdings System

Financial receivables of the IFIL Holdings System refer to the receivable of the subsidiary Ifil Investissements due from the Auchan Group for the sale of 50% of the capital stock of Eurofind Food, which will be collected by mid-2005.

7) Accrued income and prepaid expenses

€ in millions	**12/31/2004**	12/31/2003	Change
Commercial accrued income:			
- Interest and commissions	**2**	5	(3)
- Other	**47**	37	10
Total commercial accrued income	**49**	42	7
Commercial prepaid expenses:			
- Interest	**8**	39	(31)
- Other	**382**	356	26
Total commercial prepaid expenses	**390**	395	(5)
Total commercial accrued income and prepaid expenses	**439**	437	2
Financial accrued income	**237**	327	(90)
Financial prepaid expenses	**93**	85	8
Total accrued income and prepaid expenses	**769**	849	(80)

Financial accrued income mainly includes day-to-day interest earned on securities and derivative financial instruments.

8) Stockholders’ equity

Statement of changes in the consolidated stockholders’ equity of the Group

(a) Includes the consolidation reserve for € 152 million.

Capital stock

At December 31, 2004, the capital stock of IFI S.p.A., fully subscribed to and paid-in, amounts to € 163,251,460 and is composed of 86,450,000 ordinary shares and 76,801,460 preferred shares all with a par value of € 1 each.
In accordance with art. 10 of the bylaws, preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code.
Pursuant to art. 27 of the bylaws, preferred shares have the right to a preference dividend, which is not cumulative from one year to the next, equal to 5.17% of par value (€ 1).

Capital stock may be increased for a period of five years, at one or more times, also in divisible form, up to a maximum of € 561,750,000, by the authority delegated to the Board of Directors in the Extraordinary Stockholders’ Meeting on April 22, 2003, under the provisions of art. 2443 of the Italian Civil Code.

Reserves

For the information required by art. 2427, number 7 bis of the Italian Civil Code regarding available and distributable reserves of the parent company, reference can be made to the notes to the statutory financial statements of IFI S.p.A..

Reconciliation to the stockholders' equity and net income (loss) for 2004 of the parent company IFI S.p.A.

Stockholders' equity – Minority interest

The minority interest in stockholders' equity of € 6,679 million at December 31, 2004 refers to the following interest ownership in the directly owned subsidiary IFIL:

€ in millions	12/31/2004 %	12/31/2004 Capital and reserves	12/31/2004 Net loss	12/31/2004 Total	12/31/2003
IFIL Group	**39.5**	**7,825**	**(1,146)**	**6,679**	8,071

9) Reserves for risks and charges

€ in millions	**12/31/2004**	12/31/2003	Change
Reserve for pensions and similar obligations	**1,579**	1,571	8
Income tax reserves			
current income tax reserve	**96**	118	(22)
deferred income tax reserve	**256**	311	(55)
Total income tax reserve	**352**	429	(77)
Other reserves			
Warranty reserve	**901**	791	110
Restructuring reserves	**431**	482	(51)
Various liabilities and risk reserves	**2,701**	2,711	(10)
Total other reserves	**4,033**	3,984	49
Insurance policy liabilities and accruals	**91**	89	2
Total reserves for risks and charges	**6,055**	6,073	(18)

Reserve for pensions and similar obligations

The reserve for pensions and similar obligations amounts to € 1,579 million (€ 1,571 million at December 31, 2003) and includes amounts payable to employees and former employees according to contractual agreements or by law, determined on an actuarial basis, where applicable.

Income tax reserves

The deferred income tax reserve at December 31, 2004 includes deferred tax liabilities, net of deferred tax assets, which have been offset where possible by the individual consolidated companies. The net debit balance between the deferred income tax reserve and deferred tax assets is recorded in "Receivables" and is composed as follows:

€ in millions	**12/31/2004**	12/31/2003	Change
Deferred income tax reserve	**256**	311	(55)
Deferred tax assets	**(2,206)**	(1,907)	(299)
Total	**(1,950)**	(1,596)	(354)

The net change of € 354 million compared to December 31, 2003, is mainly due to the recording of deferred tax assets by the Fiat Group (written down in previous years as the conditions for recording them were not met), the recoverability of which became highly probable in view of the change in the prospects of future earnings. In particular, due to the settlement paid to Fiat by General Motors in February 2005, deferred tax assets of € 277 million relating to the benefit of tax loss carryforwards and temporary differences relating to Fiat S.p.A. became reasonably certain of recovery.

Overall, the deferred income tax reserve, net of deferred tax assets recorded in receivables, can be analyzed as follows:

€ in millions	**12/31/2004**	12/31/2003
Deferred tax liabilities from:		
- Accelerated depreciation	535	585
- Deferred tax on gains	171	502
- Capital investment grants	17	18
- Other	620	682
Total deferred tax liabilities	**1,343**	**1,787**
Deferred tax assets for:		
- Taxed reserves for risks and charges	(1,080)	(1,022)
- Inventories	(132)	(129)
- Taxed allowances for doubtful accounts	(140)	(89)
- Pension funds	(364)	(293)
- Other	(2,612)	(2,863)
Total deferred tax assets	**(4,328)**	**(4,396)**
Theoretical tax benefit connected to tax loss carryforwards	(4,781)	(4,431)
Adjustments for assets whose recoverability is not certain (mainly tax loss carryforwards)	5,816	5,444
Total deferred income tax reserve, net of deferred tax assets	**(1,950)**	**(1,596)**

As disclosed in the Accounting principles, in recording deferred tax assets, each company in the Group critically evaluated whether the conditions existed for the future recoverability of such assets on the basis of updated strategic plans, accompanied by the related tax plans. For this reason, the total theoretical future tax benefits deriving from positive temporary differences (€ 4,328 million at December 31, 2004 and € 4,396 million at December 31, 2003), and tax loss carryforwards (€ 4,781 million at December 31, 2004 and € 4,431 million at December 31, 2003), have prudently been reduced for a total of € 5,816 million (€ 5,444 million at December 31, 2003).

In particular, the deferred income tax reserve net of deferred tax assets includes € 1,226 million (€ 1,322 million at December 31, 2003) of tax benefits connected to tax loss carryforwards. However, a further tax benefit connected to tax loss carryforwards of € 3,555 million (€ 3,109 million at December 31, 2003) has not been recorded in the financial statements.

Deferred taxes have not been provided by the Fiat Group on the undistributed earnings of subsidiaries since no transactions are expected to be entered into that would warrant their taxation.

In addition, deferred taxes of € 59 million (€ 72 million at December 31, 2003) have not been provided by the Fiat Group on temporary differences relating to reserves and provisions in suspension of taxes, since they are not expected to be used in a manner which would warrant their taxation.

Since reasonable certainty of future recovery is not assured, no deferred tax assets have been booked by IFIL S.p.A. on the tax losses for the years 2001 to 2004 (€ 315 million, in total) and on the portions of investment writedowns that, as allowed by existing tax legislation, will be deductible in future years (€ 229 million, in total).

Since reasonable certainty of future recovery is not assured, no deferred tax assets have been booked by IFI S.p.A. on the tax losses for the years 2003 and 2004 (€ 167 million, in total) and on the portions of investment writedowns that, as allowed by existing tax legislation, will be deductible in future years (€ 53 million, in total).

Other reserves

Restructuring reserves

Restructuring reserves amount to € 431 million at December 31, 2004 (€ 482 million at December 31, 2003) and are related to the corporate restructuring programs of the following Sectors:

€ in millions	**12/31/2004**	12/31/2003	Change
Automobiles	**216**	160	56
Agricultural and construction equipment	**36**	83	(47)
Commercial vehicles	**56**	75	(19)
Metallurgical products	**8**	24	(16)
Components	**59**	64	(5)
Production systems	**17**	54	(37)
Services	**6**	8	(2)
Other sectors	**10**	3	7
Paper sector	**23**	11	12
Total restructuring reserves	**431**	482	(51)

Various liabilities and risk reserves

The various liabilities and risk reserves amount to € 2,701 million at December 31, 2004 (€ 2,711 million at December 31, 2003) and represent the provisions made by the individual companies mainly for contractual and commercial risks and litigation. The reduction of € 10 million from December 31, 2003 is the result of a combination of the balance between ordinary and extraordinary provisions of € 1,073 million, decreases for the effect of foreign exchange differences of € 21 million, decreases for utilizations of € 1,492 million and decreases for reversals and other minor changes of € 430 million. It also includes the release (€ 10 million) of the remaining reserve set aside by the Worms & Cie Group, which became in excess of requirements as a result of the settlement with some banks and with the British tax authorities to close a potential tax dispute over leasing contracts signed in the past by AWA Ltd.

The various liabilities and risk reserves represent provisions for contractual and commercial risks and litigation, as well as provisions made by the Worms & Cie Group in 2001 for the litigation pending in relation to the environmental risks concerning the Fox River (€ 66 million) and the fine levied by the European Commission for alleged violations of fair trade practices (€ 184 million, including interest).

Additional information is provided in the section “Pending litigation”.

10) Reserve for employee severance indemnities

This reserve refers to the liability of the Italian consolidated companies for employee severance indemnities, calculated in accordance with art. 2120 of the Italian Civil Code.

Movements in the reserve account are as follows:

€ in millions	Balance at 12/31/2003	Provisions	Use and other changes	**Balance at 12/31/2004**
Reserve for employee severance indemnities	1,332	191	(215)	**1,308**

11) Payables

Payables may be analyzed by due date as follows:

€ in millions	12/31/2004 Due within one year	 Due beyond one year	 Total	 Of which due beyond 5 years	12/31/2003 Due within one year	 Due beyond one year	 Total	 Of which due beyond 5 years

Total payables	**11,955**	**18,743**	**12,210**	**42,908**	12,588	22,034	11,618	46,240

As regards the Fiat Group, the reduction in payables (€ 3,332 million) compared to December 31, 2003 is principally due to the following:

- trade payables decreased by € 633 million; the reduction is principally attributable to Fiat Auto, which, during the last quarter of 2003, as a result of the launch of new car models, had increased production levels that during 2004 returned to normal levels;
- financial payables decreased by € 3,291 million mainly due to the repayment of bonds, including the bond for about € 1 billion issued by Fiat Finance and Trade, repaid at the end of March 2004, and the bond convertible into General Motors common stock for US$ 2.2 billion, equivalent to approximately € 1.8 billion;
- other payables increased by € 592 million primarily due to the effect of the advances received from customers (mainly connected with work to complete the T.A.V. project) (see Note 4).

Financial payables total € 18,743 million at December 31, 2004 (€ 22,034 million at December 31, 2003). Financial payables due within one year amount to € 9,810 million at December 31, 2004 (€ 6,616 million at December 31, 2003) and their carrying values approximate fair value as a consequence of the short-term maturity. These payables include the loan of approximately € 1,150 million guaranteed by the EDF put option and the Mandatory Convertible Facility of € 3 billion, described later.

The portion of medium and long-term financial payables due beyond one year amounts to € 8,933 million at December 31, 2004 (€ 15,418 million at December 31, 2003). The scheduled maturities are:

€ in millions	2006	2007	2008	2009	Thereafter	**Total**
Medium and long-term financial payables due beyond one year	3,311	692	369	527	4,034	**8,933**

The fair value of medium and long-term financial payables due beyond one year would be € 125 million higher than the carrying value at December 31, 2004 (at December 31, 2003, fair value would have been € 397 million lower than the carrying value). The fair values of such financial payables take into account the current market cost of funding with similar maturities, and, for bonds, their market prices.

Medium and long-term financial payables include the loan of approximately € 1,150 million secured from Citigroup and a small group of banks that is guaranteed by the EDF put option (refer to the EDF Put described in Note 3) held by the Fiat Group on its remaining investment (24.6%) in Italenergia Bis and the shares in the same Italenergia Bis pledged by Fiat. The loan is due in September 2005.

Financial payables secured by real guarantees of mortgages and other liens on property, plant and equipment amount to € 1,272 million at December 31, 2004 (€ 1,234 million at December 31, 2003).

At December 31, 2004, the Group has an unused “committed” line of credit available mainly denominated in US$ for an equivalent amount of more than € 1,700 million (approximately € 2,000 million at December 31, 2003). The decrease can principally be ascribed to the effects of the translation of the credit lines in their original currencies to euros.

Bonds of the Fiat Group, including convertible bonds, amount to € 8,825 million (€ 11,375 million at December 31, 2003) and can be analyzed by year of maturity as follows:

€ in millions	2005	2006	2007	2008	2009	Thereafter	**Total**
EMTN	1,421	2,350	181	227	168	2,600	**6,947**
Convertible bonds	-	-	13	-	-	-	**13**
Other bonds	447	-	93	-	367	958	**1,865**
Total bonds	**1,868**	**2,350**	**287**	**227**	**535**	**3,558**	**8,825**

The bonds issued by the Fiat Group are governed by different terms and conditions according to the following types of bonds:

- *Euro Medium Term Note (EMTN Program)*: these notes have been issued under a program that is utilized for approximately € 7 billion and guaranteed by Fiat S.p.A. Issuers taking part in the program are Fiat Finance & Trade Ltd. S.A. (for an amount outstanding of € 6,802 million), Fiat Finance North America Inc. (for an amount outstanding of € 65 million) and Fiat Finance Canada Ltd. (for an amount outstanding of € 80 million).
- *Convertible bonds*: this represents the residual debt, after repayment, in July 2004, of the 5-year bond originally convertible into General Motors Corp. common stock ("Exchangeable"), at a conversion price of US$ 69.54 per share with 3.25% interest and maturing on January 9, 2007. With reference to this bond, during the first quarter of 2004 Fiat repurchased, for cancellation, US$ 540 million in bonds out of total of US$ 2,229 million. In June 2004, by virtue of the contractually envisaged right of each bondholder to request early repayment of all or part of its bonds, repayment for a total of US$ 1,672 million (equivalent to approximately € 1.4 billion) in bonds was requested by the deadline provided by the contract. A residual debt of US$ 17 million (equivalent to € 13 million) remains at this date. With reference to the risk, implicit in the bond, of an increase in the General Motors share price above US$ 69.54, a Total Return Equity Swap agreement was put into place, terminated in 2004 and replaced by the purchase of a call option on General Motors stock, as described in Note 13.
- *Other bonds*:
  - bonds issued by Fiat Finance & Trade Ltd. S.A. with coupon interest at 1.5% and maturing June 27, 2005 for an amount of Japanese yen 40 billion, equivalent to € 287 million;
  - bonds issued by Case New Holland Inc. ("CNH Inc.") in 2004 (with coupon interest at 9.25% and maturing August 1, 2011 for an amount of US$ 1,050 million, equivalent to € 771 million) and in 2005 (with coupon interest at 6.00% and maturing June 1, 2009 for an amount of US$ 500 million, equivalent to € 367 million); the bond indenture contains a series of financial covenants that are common to the high yield American bond market;
  - bonds issued by CNH America LLC and CNH Capital America for a total amount outstanding of US$ 599 million, equivalent to € 440 million.

The prospectuses, the offering circulars or their abstracts relating to the aforementioned principal bond issues are available on the Group's website at www.fiatgroup.com under "Shareholders and Investors – Financial Publications".

The majority of the bonds issued by the Group contain commitments ("covenants") by the issuer and in some cases by Fiat, as the guarantor, that, in international practice, are common for bond issues of this type when the issuers are in the same industrial segment in which the Group operates, such as, in particular: (i) the so-called negative pledge clause which requires that the benefit of any real present or future guarantees given as collateral on the assets of the issuer and/or Fiat, on other bonds and other credit instruments should be extended to these bonds, to the same degree, (ii) the so-called *pari passu* clause, on the basis of which obligations cannot be undertaken which are senior to the bonds issued, (iii) the obligation of providing periodical disclosure, (iv) for some of the bond issues, the so-called cross-default clauses whereby the bonds become immediately due and payable when certain defaults arise in respect of other financial instruments issued by the Group and (v) other clauses generally present in issues of this type.

The bonds issued by Case New Holland Inc. ("CNH Inc.") with coupon interest at 9.25% and maturing on August 1, 2011 (for an amount of US$ 1,050 million, equivalent to € 771 million) and with coupon interest at 6.00% and maturing on June 1, 2009 (for an amount of US$ 500 million, equivalent to € 367 million), contain, moreover, financial covenants common to the high yield American bond market which place restrictions, among other things, on the possibility of the issuer and certain companies of the CNH group to secure new debt, pay dividends or buyback treasury stock, realize certain investments, conclude transactions with associated companies, give collateral on its assets, conclude sale and leaseback transactions, sell certain fixed assets or merge with other companies and financial covenants which impose a maximum limit on further indebtedness by the CNH group companies which can not exceed a specific ratio of cash flows to dividend payments and financial expenses. Such covenants are subject to various exceptions and limitations and, in particular, some of these would no longer be binding should the bonds be assigned an investment grade rating by Standard & Poor's Rating Services and/or Moody's Investors Service.

The major bond issues of the Fiat Group outstanding at December 31, 2004 are the following:

	Currency	Face value of outstanding bonds (in millions)	Coupon	Maturity	Outstanding amount in millions of euros

(a) Bonds listed on the Mercato Obbligazionario Telematico of the Italian stock exchange (EuroMot). Furthermore, the majority of the bonds issued by the Fiat Group are also listed on the Luxembourg stock exchange.

(b) "Fiat Step-Up Amortizing 2001-2011" bonds repayable at face value in five equal annual installments each for 20% of the total issued" (€ 617 million) due beginning from the sixth year (November 7, 2007) by reducing the face value of each bond outstanding by one-fifth. The last installment will be repaid on November 7, 2011. The bonds pay coupon interest equal to: 4.40% in the first year (Nov. 7, 2002), 4.60% in the second year (Nov. 7, 2003), 4.80% in the third year (Nov. 7, 2004), 5.00% in the fourth year (Nov. 7, 2005), 5.20% in the fifth year (Nov. 7, 2006), 5.40% in the sixth year (Nov. 7, 2007), 5.90% in the seventh year (Nov. 7, 2008), 6.40% in the eighth year (Nov. 7, 2009), 6.90% in the ninth year (Nov. 7, 2010), 7.40% in the tenth year (Nov. 7, 2011).

(c) Bonds with amounts outstanding equal to or less than the equivalent of € 50 million.

(d) Bonds convertible into General Motors Corp. common stock.

The Fiat Group intends to repay the issued bonds in cash at maturity by utilizing available liquid resources. To this end, available liquidity at the end of 2004 totals approximately € 5.3 billion. The Fiat Group also has available unused committed credit lines for more than € 1.7 billion.

Moreover, the companies in the Fiat Group may from time to time buy back bonds on the market that were issued by the Group also for purposes of their cancellation. Such buybacks, if made, will depend upon market conditions, the financial situation of the Group and other factors which could affect such decisions.

Mandatory Convertible facility

Medium and long-term financial payables also include the € 3 billion Mandatory Convertible facility stipulated in execution of the Framework Agreement, dated May 27, 2002, with Capitalia, Banca Intesa, SANPAOLO IMI and Unicredito Italiano (Money Lending Banks) for the purpose of providing the Fiat Group with the financial support it needs to implement its industrial plans. The facility was secured on September 24, 2002 from a syndicate of banks, including the Money Lending Banks, in which BNL, Monte dei Paschi di Siena, ABN Amro, BNP Paribas, Banco di Sicilia and Banca Toscana (hereinafter “the Banks”) also participated. The main features of the Mandatory Convertible facility are listed in the following paragraphs.

The Mandatory Convertible facility expires on September 20, 2005 and is repayable with a new issue of Fiat S.p.A. ordinary shares, which the Banks have agreed to underwrite and offer pre-emptively to all Fiat stockholders. The issue price per share will be the average of € 14.4409 (the adjusted value compared to the original value of € 15.50 in accordance with the rules established by the AIAF – Italian Association of Financial Analysts – following the Fiat S.p.A. capital increase of July 2003) and the average stock market price in the last three or six months, depending on the case, preceding the repayment date. The same formula will also be applied in the event of an earlier repayment date.

The capital stock increase should be approved at the expiration of the three-year term of the facility, for an amount equal to the outstanding balance of the facility. Fiat may elect to repay the facility in cash at an earlier date, even partially, every six months, provided that, even after repayment, its rating is at least equal to investment grade level.

Conditions giving rise to an earlier expiration date of the facility include the occurrence of an event that creates a serious crisis for the company, such as the request for a court-appointed administrator or other proceedings of composition with creditors, a bankruptcy filing, or one of the causes of business dissolution set forth in the previous art. 2448 now art. 2484 of the Italian Civil Code. In addition, the Banks in the facility arrangement have the right to demand early repayment of the entire amount of the facility and proceed with the conversion of the debt into capital in the following cases:

- Fiat Group companies have not fulfilled their duty to repay liquid and current financial obligations of an aggregate amount of more than € 1 billion;
- the independent auditors have issued a negative opinion on the consolidated financial statements, unless new auditors, who must have accepted the assignment within 30 days, issue a favorable opinion no later than 60 days thereafter;
- Fiat becomes the target of a takeover bid in accordance with Articles 106 and 107 of the Consolidated Law on Financial Intermediation.

Lastly, the Banks also have the right but not the obligation to demand early repayment of a portion of the amount of the facility, up to a maximum of € 2 billion, after 24 months have elapsed from the signing of the agreement (and, therefore, beginning from July 26, 2004), in the event that the Group’s debt is not rated “investment grade” by at least one of the leading international rating agencies and, after 18 months have elapsed from the signing of the agreement (January 26, 2004), in the event that the level of net and/or gross financial indebtedness (respectively in the definitions of “Net financial position” and “Total financial payables” used by the Group and detailed in the Fiat Group Report on Operations) is more than 20% higher than the corresponding level established by the Financial Objectives stipulated in the facility agreement.

The aforementioned Financial Objectives refer, in particular, to the reduction of net indebtedness in the Net Financial Position to less than € 3 billion by the date the Board of Directors approves the 2002 annual financial statements and the maintenance of that level at March 31, June 30, September 30 and December 31 of each year until the expiration of the facility. Pursuant to the agreement, the proceeds are considered which are generated by the transactions related to the sale of the investment in Italenergia Bis S.p.A., including those connected with the Citigroup loan of approximately € 1,150 million, described previously, and the financial effects arising from binding contracts for the sale of assets (investments, companies, plant and equipment, etc.), comprising those not yet executed. The agreement also states that Gross Financial Indebtedness must be reduced by € 12 billion, compared to March 31, 2002, by the date the Board of Directors approves the 2002 annual financial statements and must be maintained at less than € 23.6 billion at March 31, June 30, September 30 and December 31 of each year until the expiration of the facility.

At December 31, 2004, gross indebtedness totals € 19.2 billion and continues to be within the targets agreed upon with the Lending Banks under the Mandatory Convertible Facility Agreement (€ 23.6 billion), while the proforma net financial position (calculated, as envisaged in the facility agreement, by subtracting from the net financial position the Citigroup loan of approximately € 1,150 million but not the receipt of € 1,550 million as a result of the agreements reached with General Motors on February 13, 2005) exceeds the limit of € 3.6 billion contractually agreed for this parameter. The Lending Banks therefore have the right, in accordance with the contractual terms and conditions, to proceed with the conversion of the facility into capital for an amount up to € 2 billion.

At December 31, 2004, the ratings assigned to the Fiat Group by the major rating agencies are the following:

	Short-term	**Medium-term**
Moody's Investors Service (a)	Not Prime	Ba3
Standard & Poor's Rating Services (a)	B	BB-
Fitch Ratings	B	BB-

(a) For purposes of the Mandatory Convertible facility, the most important rating agencies are Standard & Poor's and Moody's.

The ratings of the Group represented in the table refer to the "non-investment grade" category. The Banks did not exercise their consequent right to demand early repayment of the facility and to proceed with the conversion of the debt into capital for an amount up to € 2 billion.

Worms & Cie has a program for the issue of treasury bills for approximately € 1.2 billion which carry an A-2 rating from Standard & Poor's. The bills allow the Group to finance itself on the market with 1- to 3-month issues at competitive rates. The bills maturing at the end of the year total approximately € 540 million.

The risk of liquidity connected with this type of financing is covered by 1- to 5-year committed credit lines from leading banking institutions for more than 100% of the issued amounts.

IFIL S.p.A. financial payables include:

- bonds 2002/2005, issued for € 200 million following the resolution passed by the Board of Directors' Meeting on November 14, 2002, subscribed to by primary institutional investors; the bonds bear interest at floating rates payable quarterly and are indexed against the Euribor. The bonds are repayable by a one-time payment at maturity on December 20, 2005. Interest rate swaps and zero cost collars were put into place for € 145 million to fix the interest rate on part of the bonds;
- bonds 2003/2006 issued for € 100 million following the resolution passed by the Board of Directors' Meeting on December 2, 2003, subscribed to by primary institutional investors; the bonds bear interest at floating rates payable quarterly and are indexed against the Euribor. The bonds are repayable by a one-time payment at maturity on December 19, 2006. Interest rate swaps were put into place to fix the interest rate on the full amount of the bonds.
- loans due at the end of October 2005 for € 150 million. Interest rate swaps guarantee a fixed rate for the entire period of the loans;
- other short-term payables for € 169 million.

At December 31, 2004, IFIL has irrevocable credit facilities for € 830 million, including € 370 million due beyond one year.

IFI S.p.A. financial payables include:

- borrowings from banks due within one year amounting to € 208 million (€ 66 million at December 31, 2003), including loans of € 140 million due in the first half of 2005 on which interest rate swaps and zero cost collars were put into place to fix the interest rate;
- borrowings from banks due beyond one year of € 30 million, including loans of € 20 million on which interest rate swaps were put into place to fix the interest rate; such payables are classified as due beyond one year since the residual period of the loan and the hedging contract extend beyond one year;
- the loan granted by the parent company Giovanni Agnelli e C. S.a.p.az. of € 24 million (€ 15 million at December 31, 2003), bearing interest at a monthly floating market rate.

At December 31, 2004, IFI has irrevocable credit facilities for € 495 million, including € 350 million due beyond one year.

12) Accrued expenses and deferred income

Details are as follows:

€ in millions	**12/31/2004**	12/31/2003	Change
Commercial accrued expenses:			
- interest and commissions	**63**	71	(8)
- other	**473**	528	(55)
Total commercial accrued expenses	**536**	599	(63)
Commercial deferred income:			
- interest	**77**	64	13
- other	**602**	711	(109)
Total commercial deferred income	**679**	775	(96)
Total commercial accrued expenses and deferred income	**1,215**	1,374	(159)
Financial accrued expenses	**530**	598	(68)
Financial deferred income	**221**	364	(143)
Total accrued expenses and deferred income	**1,966**	2,336	(370)

Financial accrued expenses include interest expense on financial payables for the portion relating to the current year.

Financial deferred income includes deferred interest income on the portfolio of the financial services companies.

13) Guarantees granted, commitments and other memorandum accounts

Guarantees granted

€ in millions	**12/31/2004**	12/31/2003	Change
Fiat Group	**5,520**	6,430	(910)
Worms & Cie Group	**248**	86	162
Alpitour Group	**74**	73	1
IFI S.p.A.	**4**	32	(28)
Total guarantees granted	**5,846**	6,621	(775)

Fiat Group

Guarantees granted are detailed as follows:

- suretyships total € 2,719 million (€ 3,060 million at December 31, 2003). The reduction of € 341 million is principally due to the deconsolidation of Fiat Engineering and lower guarantees granted on behalf of Sava S.p.A. for the bonds it has issued and are now falling due;
- other unsecured guarantees of € 2,534 million (€ 3,075 million at December 31, 2003) include risks for receivables and bills discounted with recourse in the amount of € 1,696 million (€ 2,203 million at December 31, 2003). The receivables and bills discounted with recourse refer to trade receivables and other receivables for € 1,613 million (€ 2,144 million at December 31, 2003) and financial receivables for € 83 million (€ 59 million at December 31, 2003). The volume of receivables discounted with recourse in 2004 was € 13,178 million (€ 15,341 million in 2003);
- guarantees of notes for € 217 million (€ 259 million at December 31, 2003) and other secured guarantees for € 50 million (€ 36 million at December 31, 2003).

Although not included in the memorandum accounts, receivables and bills discounted by the Group without recourse having due dates beyond December 31, 2004 amount to € 9,809 million (in 2003, € 9,852 million with due dates beyond December 31, 2003). Receivables and bills discounted without recourse refer to trade receivables and other receivables for € 4,689 million (€ 4,638 million at December 31, 2003) and financial receivables for € 5,120 million (€ 5,214 million at December 31, 2003). The discounting of financial receivables principally refers to securitization transactions involving accounts receivables from the final (retail) customers of the financial services companies. The accounting treatment for securitization transactions is disclosed in the Accounting principles. The volume of receivables and bills discounted without recourse in 2004 was € 27,540 million (€ 33,298 million in 2003).

In summary, the discounted receivables and bills at December 31, 2004 are as follows:

	12/31/2004			12/31/2003		
€ in millions	**Trade receivables and other receivables**	**Financial receivables**	**Total**	Trade receivables and other receivables	Financial receivables	Total
With recourse	**1,613**	**83**	**1,696**	2,144	59	2,203
Without recourse	**4,689**	**5,120**	**9,809**	4,638	5,214	9,852

Worms & Cie Group

Guarantees granted by the Worms & Cie Group amount to € 248 million (€ 86 million at December 31, 2003) and mainly include sureties issued to third parties.

Alpitour Group

Guarantees granted by the Alpitour Group amount to € 74 million (€ 73 million at December 31, 2003). These include guarantees provided in favor of leading credit institutions for long-term loans received during the year for € 34 million, sureties on behalf of tourist bodies, financial offices and public entities for € 38 million and mortgages carried on the buildings of the Group to secure loans recorded in the financial statements for € 2 million.

IFI S.p.A.

Guarantees granted at December 31, 2004, amount to € 4 million (€ 32 million at December 31, 2003) and refer to suretyships granted in the past by IFI in favor of F.I.G.C. – L.N.P., Federazione Italiana Giuoco Calcio – Lega Nazionale Professionisti, on behalf of Juventus Football Club.
The reduction of € 28 million from December 31, 2003 is due to sureties that expired (€ 24 million) or were reduced (€ 4 million) during the year.
The sureties, remunerated at market rates, expire in 2005.

Commitments

Commitments total € 36,759 million (€ 33,527 million at December 31, 2003) and include commitments related to derivative financial instruments of € 23,246 million (€ 22,507 million at December 31, 2003), other commitments of € 13,098 million (€ 10,690 million at December 31, 2003), and commitments to purchase property, plant and equipment for € 415 million (€ 330 million at December 31, 2003).

Commitments related to derivative financial instruments

€ in millions	Fiat Group	Worms & Cie Group	Alpitour Group	IFI and IFIL	Total
Contracts to hedge foreign exchange risks	5,350		52		5,402
Contracts to hedge interest rate exposure	13,880	857		555	15,292
Contracts for combined hedging of foreign exchange and interest rate risks	783	463			1,246
Call options on General Motors common stock	1,240				1,240
Equity swaps	66				66
Total 2004	**21,319**	**1,320**	**52**	**555**	**23,246**
Total 2003	20,798	1,219	25	465	22,507

Fiat Group

The Fiat Group maintains that these transactions are not subject to risks that may derive from the non-fulfillment by the counterparties insofar as the contracts are entered into with several primary national and international financial institutions. Approximately 52% of the contracts outstanding at December 31, 2004 will expire during 2005 and the remainder in the period 2006-2022, of which 14% will expire after 2009. The consolidated statement of operations includes the effects both of the contracts that expired in 2004 and the provisions for the contracts outstanding at year-end, as stated in the Accounting principles.

Hedging activities using derivative financial instruments have not undergone significant changes during the year, either in types of instruments or amounts outstanding.

The Group's financial policy attaches particular importance to the management and control of financial risks that can significantly impact profits. The Group has adopted a series of guidelines regarding the management of exchange rate and interest rate exposure.
The policy allows derivative financial instruments to be used only for managing exchange and interest rate risks connected to balance sheet flows and assets and liabilities, and not for speculative purposes.

In 2004, foreign exchange risk management followed the aforementioned policy and maintained the character of selective risk management. The reduction in exchange exposure, substantially originating from the positive balance between exports and imports, was based on the expected trend in exchange rates and the need to hedge the exchange levels of reference without completely foregoing the benefits deriving from a favorable trend in the rates. Again this year, the management of exchange risks was based principally on a combination of currency options.

In 2004, the management of interest rate exposure also followed the aforementioned guidelines which state that derivative financial instruments should be used to reach a fixed exposure level and minimize financing costs, and to ensure a correct matching of financing and investments by the financial services companies.

The derivative financial instruments principally relate to foreign exchange forward contracts, currency swaps and currency options or, as regards interest rate risks, interest rate swaps, forward rate agreements and options on interest rates, as well as interest rate and currency swaps for the combined management of currency and interest rate risks.

A comparison of the carrying values and the fair values of derivative financial instruments by contract type is set forth below:

	12/31/2004			12/31/2003		
€ in millions	**Carrying value**	**Fair value**	**Difference**	Carrying value	Fair value	Difference
Foreign exchange risk management instruments	**20**	**97**	**77**	(3)	59	62
Interest rate risk management instruments	**132**	**441**	**309**	138	319	181
Foreign exchange risk and interest rate risk management instruments	**187**	**192**	**5**	174	176	2
Equity swaps and equity options	**(4)**	**(4)**	**0**	(1)	439	440
Total	**335**	**726**	**391**	308	993	685

The fair value of these derivative financial instruments was estimated based on year-end market prices for instruments with similar characteristics and maturities.

The increase in the fair value of the transactions for the management of interest rate risk is essentially related to the reduction in euro interest rates for medium term maturities.

The difference between the "Carrying value" and "Fair Value" is mainly due to the accounting principles adopted for the valuation of the financial instruments designated as hedges. As disclosed in the Accounting principles, it is not possible to completely adopt IAS 39 under current Italian law since all derivative financial instruments would have to be recorded at fair value in the financial statements, including those designated as hedges. The latter, instead, have been valued symmetrically with the underlying hedged item. Therefore, where the hedged item has not been adjusted to fair value in the financial statements, the hedging financial instruments have also not been adjusted. Similarly, where the hedged item has not yet been recorded in the financial statements (hedging of future flows), the valuation of the hedging instrument at fair value is deferred.

At December 31, 2004, the integral adoption of IAS 39, with reference to the aforementioned derivative financial instruments, would have had an effect on the balance sheet, on the one hand, for the adjustment of derivative financial instruments to arrive at fair value with a positive effect of € 391 million (a positive effect of € 685 million at December 31, 2003), and, on the other hand, for the adjustment of the hedged balance sheet items (mainly payables) with a net negative effect (due to the trend in interest rates) of € 329 million (€ 262 million at December 31, 2003) and, for the part relating to the hedging of future flows, a higher accumulated value of reserves in stockholders' equity of € 41 million (a lower accumulated value of € 22 million at December 31, 2003), net of the amount set aside for deferred income taxes. The integral adoption of IAS 39, always with reference to the aforementioned derivative financial instruments, would have led to negative effects on the net result for the year of approximately € 286 million, net of tax charges (positive effects of € 272 million at December 31, 2003). This economic impact would basically have been the result of the provision, at December 31, 2003, of the positive fair value of the equity swap on General Motors shares.

With particular regard to the previously mentioned equity swap arrangements, the amount at December 31, 2004 of € 66 million represents the notional amount of the equity swap stipulated to hedge the risk of an increase in the Fiat share price above the exercise price of 10,000,000 stock options granted to Mr. Marchionne. In particular, the Board of Directors resolved to grant Mr. Marchionne, as variable portion of his compensation as Chief Executive Officer, options for the purchase of 10,670,000 Fiat ordinary shares at the price of € 6.583 per share, exercisable from June 1, 2008 to January 1, 2011. In each of the first three years, he accrues the right to purchase, from June 1, 2008, a maximum of 2,370,000 shares per year and on June 1, 2008 he accrues the right to purchase, effective that date, the residual portion amounting to 3,560,000 shares. The right to exercise the options related to this last portion of shares is subject to certain predetermined profitability targets that should be reached during the reference period. The risk of a significant increase in the Fiat share price above the exercise price of these options has been covered, with reference to 670,000 shares, by treasury stock in portfolio (see Note 6), whereas with reference to the remaining 10,000,000 shares, the aforementioned "Total Return Equity Swap" agreement was put into place with a reference price of € 6.583 per share and expiring on July 29, 2005. In accordance with accounting principles, the aforementioned equity swap, despite being entered into for hedging purposes, cannot be treated in hedge accounting and accordingly is defined as a trading derivative financial instrument. It follows that, in accordance with the principle of prudence, if during the period of the contract the Fiat shares perform positively, the positive fair value of the instrument is not recorded in the statement of operations; if, instead, the performance is negative, the negative fair value of the instrument is recorded as a cost under financial expenses. At December 31, 2004, the equity swap has a negative fair value of € 7 million that has therefore been recorded in the financial statements.

At December 31, 2003, the equity swaps caption included:

- for € 62 million, the notional amount of the equity swap stipulated to hedge the risk of an increase in the Fiat share price above the exercise price of 10,000,000 stock options granted to Mr. Morchio. Near the contract expiration date (August 2004), the equity swap was replaced by the aforementioned contract in respect of the stock options granted to Mr. Marchionne. The replacement gave rise to income of € 5 million. Moreover, during 2004, the aforementioned stock options expired upon the resignation of Mr. Morchio;
- for € 916 million, the notional amount of the equity swap stipulated in 2002 at the same time as the sale of the General Motors shares and which was put into place to hedge the risk, implicit in the Exchangeable bonds described previously, of an increase in the General Motors share price above the conversion price (Note 11). During the first half of 2004, this equity swap was terminated in advance and replaced, in order to hedge the risk implicit in the Exchangeable bonds, by the purchase of call options on General Motors common stock. The transaction gave rise to net financial income of approximately of € 300 million. Following the repayment of almost all the bonds (see Note 11), these options, although purchased for hedging purposes, are classified as trading transactions and valued at the lower of cost and market (€ 3 million at December 31, 2004).

Worms & Cie Group

Commitments related to derivative financial instruments of the Worms & Cie Group mainly include agreements to hedge exchange and interest rate risks maturing between 2005 and 2007.

Alpitour Group

Commitments related to derivative financial instruments of the Alpitour Group include contracts stipulated by Alpitour to hedge interest rate risks on medium/long-term loan contracts.

IFI and IFIL S.p.A.

Commitments related to derivative financial instruments by IFI (€ 160 million) refer to transactions hedging interest rate risk on bank debt maturing in 2005 and 2007 put into place with leading banking institutions.

Commitments related to derivative financial instruments by IFIL (€ 395 million) include interest rate swaps stipulated on loans of € 150 million maturing October 2005, zero cost collars and interest rate swaps on a part of the IFIL bonds 2002-2005 for € 145 million and interest rate swaps on the full amount of the IFIL bonds 2003/2006 for € 100 million.

Derivative financial instruments are used by IFI and IFIL exclusively to hedge the risk of interest rate fluctuations.

Other commitments

€ in millions	**12/31/2004**	12/31/2003	Change
Fiat Group	**12,813**	10,350	2,463
Worms & Cie Group	**180**	134	46
Alpitour Group	**76**	37	39
IFI and IFIL Holdings System	**29**	169	(140)
Total other commitments	**13,098**	10,690	2,408

Fiat Group

Other commitments include commitments for the execution of works in the amount of € 10,261 million (€ 8,011 million at December 31, 2003) under the contracts between Fiat S.p.A., as General Contractor, and Treno Alta Velocità T.A.V. S.p.A. for the design and construction of high-speed railway lines between Bologna - Florence and Turin - Milan. The increase of € 2,250 million compared to December 31, 2003 relates to the agreements reached during 2004 regarding the Florence-Bologna section for € 187 million; agreements for the subsection Turin-Novara for € 83 million; agreements for the section Novara-Milan for € 1,976 million and monetary adjustments for € 4 million. Fiat S.p.A. in turn assigned the design and construction of these works to the CAV.E.T. and CAV.TO.MI consortiums. In order to guarantee the contractual advances and the proper execution of the works, Fiat S.p.A. granted bank suretyships to T.A.V. S.p.A. totaling € 1,972 million. Similarly, as called for by the contract, the CAV.E.T. and CAV.TO.MI consortiums granted bank suretyships to Fiat S.p.A. for € 617 million and € 1,279 million, respectively. Consequently, the guarantees granted are substantially covered by the guarantees received.

Other commitments and important contractual rights

Relations with General Motors

On February 13, 2005, Fiat and General Motors signed a “Termination Agreement” to dissolve the Master Agreement and the joint ventures between the two groups. The agreement calls for the payment by General Motors to Fiat of € 1.55 billion (of which € 1 billion was already paid on February 14, 2005) to dissolve the Master Agreement, including the cancellation of the put option and the unwinding of the joint ventures. This sum will allow Fiat to recover the value of Fiat’s investments in the Fiat-GM Powertrain and GM-Fiat Purchasing joint ventures recorded in the financial statements, the value of 50% of the Bielsko Biala (Poland) plant, which it will continue to manage, and the value of the JTD engine technology, which will be co-owned with General Motors. The sum will also entail recognition by Fiat of more than € 1 billion of compensation to dissolve the alliance and cancel the Put on Fiat Auto shares.

Ferrari

A summary is presented below of the rights arising from the purchase in 2002 of 34% of the capital stock of Ferrari S.p.A. for € 775 million by Mediobanca S.p.A., within the framework of a consortium set up for the acquisition and placement of the Ferrari shares. Fiat had realized a gain of € 671 million on this sale, net of selling expenses.

The sale contract sets out the following principal elements:

- Mediobanca assumed the responsibility of sole Global Coordinator in charge of coordinating and leading the consortium.
- Mediobanca cannot sell its Ferrari shares to another group in the automotive industry as long as the Fiat Group maintains a 51% controlling interest in Ferrari. Barring certain specific assumptions, the Fiat Group cannot reduce its investment in Ferrari below 51% until the end, depending on the case, of the third or fourth year subsequent to signing the contract.
- Fiat holds a call option that allows it to repurchase the Ferrari shares at any time before June 30, 2006 (the original date of June 30, 2005 was extended by one year during the course of 2003, by virtue of the payment of a premium of € 16 million), except during the five months subsequent to the presentation of an IPO application to the competent authorities. The option exercise price is equal to the original price at which the shares were sold plus interest during the period based on the BOT yield plus 4%.
- Mediobanca, moreover, does not hold any put option to resell the purchased Ferrari shares to Fiat, even in the event that the IPO does not occur or is not completed.
- Fiat may share, in variable percentage brackets, in any gain realized by Mediobanca and the other members of the consortium in the event of an IPO.

Teksid

Teksid S.p.A. is the object of a Put and Call contract with the partner Norsk Hydro concerning the subsidiary Meridian Technologies Inc. (held 51% by the Teksid Group and 49% by the Norsk Hydro Group). In particular, should there be a strategic deadlock in the management of the company (namely in all those cases in which a unanimous vote in favor is not reached by the directors on the board as regards certain strategic decisions disciplined by the contract between the stockholders), the following rights would arise:

- Put option of Norsk Hydro with Teksid on the 49% holding: the sale price would be commensurate with the initial investment made in 1998, revalued *pro rata temporis*, net of dividends paid.
- Call Option of Teksid with Norsk Hydro on the 49% holding (exercisable whenever Norsk Hydro renounces its right to exercise the Put Option described above): the sale price would be the highest value between the initial investment made by Norsk Hydro in 1998, calculated according to the criteria expressed previously, and 140% of the Fair Market Value (in this regard, an increase of 2% per year is established in the event the option is exercised from 2008 until 2013, thus up to 150% of the relative value).

It should be pointed out that so far the conditions that would give rise to the strategic deadlock are considered to be quite remote.

Fiat S.p.A. is subject to a put contract with Renault (in reference to the original investment of 33.5% in Teksid, now 19.52%).
In particular, Renault would acquire the right to exercise a sale option on the treasury stock to Fiat, in the following cases:

- in the event of nonfulfilment in the application of the protocol of the agreement and admission to receivership or any other redressment procedure;
- in the event Renault's investment in Teksid falls below 15% or Teksid decides to invest in a structural manner outside the foundry sector;
- should Fiat be the object of the acquisition of control by another car manufacturer.

The exercise price of the option is established as follows:

- for 6.5% of the capital stock of Teksid, the initial investment price increased *pro rata temporis*;
- for the remaining amount of capital stock of Teksid, the share of the accounting net equity at the exercise date.

End-of-life vehicles

In September 2000, the European Union issued Directive 2000/53/CE relative to end-of-life vehicles. This Directive, among other things, provides that, in the future, vehicle manufacturers will have to bear all, or a significant part of, the costs arising from the collection, treatment and recovery of end-of-life vehicles. The above Directive is currently being introduced into the national legislation of the individual member states and will be applicable for all vehicles placed on the market starting from July 2002; beginning January 2007 all vehicles on the market will be covered, even those placed before July 2002. The Directive was introduced in Italy in June 2003 and in the major markets (Germany, the Netherlands, Belgium, France, Spain, Slovenia, Portugal, Austria and Norway). Fiat Auto is pursuing a strategy aimed at zero service cost for the manufacturer by promoting networks for the disposal of the vehicles or taking part in networks set up by other competitors, which, in the majority of cases, is made possible by the creation of a process that is economically self-sustained by the recovery value of the spare parts. Consequently, no liabilities are recognized for the Group.

Worms & Cie Group

Other commitments amount to € 180 million (€ 134 million at December 31, 2003) and principally include lease obligations for € 162 million and commitments for the purchase of financial fixed assets for € 18 million.

Alpitour Group

Other commitments amount to € 76 million (€ 37 million at December 31, 2003) and include financial lease obligations for the aircraft of the subsidiary Neos (€ 28 million) and sales commitments for travel bookings made by the tour operators of the Group for € 48 million (€ 37 million in 2003).

On December 15, 2000, the Extraordinary Stockholders' Meeting of Alpitour S.p.A. voted to vest the Board of Directors with the power to increase capital stock by a maximum amount of € 767,500 to service a stock option plan on behalf of the directors, managers and cadres of Alpitour and the companies of the Group.
The regulations of the stock option plan, approved by resolution of the Board of Directors on December 15, 2000, state that the aforementioned capital increase of € 767,500 will occur by issue of a maximum 1,535,000 new ordinary shares of par value € 0.50 each. The options under the plan, which carries a period of 68 months, will accrue in annual lots expiring October 31, of each year and will be offered at a price equal to € 6.73 per share. The options offered can be fully exercised within six months of the approval of the financial statements ended October 31, 2005.
The shares purchased in execution of the above plan can be sold to Alpitour at a price, established by the Board of Directors, calculated on the basis of the economic performance of the company.
The first tranche of options offered during 2002/2003, referring to the financial statements for the year ended October 31, 2002, was not exercised by the beneficiaries of the stock option plan.

IFI and IFIL Holdings System

Other commitments of IFI S.p.A. include the remaining payments (€ 2 million) under the commitment with Tlcom Capital Partners and the residual commitment for the subscription of Emittenti Titoli's capital stock increase (€ 0.1 million).

Other commitments of IFIL S.p.A. amount to € 27 million (€ 165 million at December 31, 2003) and refer to the commitment with Sviluppo Italia S.p.A. (SIT) for the purchase of 49% of the capital stock of Sviluppo Italia Turismo under the agreement signed in December between Banca Intesa S.p.A., the IFIL Group and Marcegaglia S.p.A.. The entry of the three private stockholders in the shareholder base of SIT will take place through the company Turismo&Immobiliare (in which the three own equal stakes) which will purchase shares and subscribe to a SIT capital stock increase for a total outlay of € 76.4 million; Ifil Investissements' share will be equal to a maximum of about € 26 million.

Ifil Investissements, which already holds 14.3% of the capital stock of Euromedia Luxembourg One, has a commitment to purchase additional shares for a total equivalent amount of US$ 2.66 million, corresponding to approximately € 2 million.

The reduction in the commitments of the IFIL Holdings System compared to December 31, 2003 is due to the purchase of 9.53% of Eurofind capital stock from Mediobanca for € 116 million and the purchase of 10% of NHT - New Holding for Tourism capital stock from TUI for € 46 million. Both transactions were effected in January 2004.

Pending litigation

IFIL S.p.A.

By notification on May 8, 2003, inferring illegal acts due to a conflict of interest and the unlawful valuation of the contributions in kind, the stockholder K Capital contested the resolution to increase IFIL's capital stock reserved for Istituto Finanziario Industriale S.p.A. passed by the Extraordinary Stockholders' Meeting of IFIL held on April 23, 2003 and sought compensation from IFIL for (alleged) damages (economic and non-economic) suffered as a result of the unlawful conduct (allegedly) by IFI. During the case and with reference only to (alleged) economic damages, K Capital stated its request for compensation (which originally had not been quantified) in approximately € 17 million.

The case is currently in the preliminary investigation stage. At the last hearing held on December 14, 2004, IFIL was questioned. The Judge then stayed the hearing until April 13, 2005 for further investigation measures (particularly in reference to a possible technical consultant appointed by the court), giving the parties time for briefs until March 31, 2005.

Both of the above requests by K Capital (request to declare the stockholders' resolution null and void and the request to seek a sum of compensation for damages) appear to be inadmissible and groundless and therefore at this time the Company does not believe that any contingent liabilities or losses will arise as a consequence.

Earlier, the appeal filed under ex article 2378, paragraph 4, of the Italian Civil Code by which the stockholder K Capital had sought the suspension of the execution of the resolution was denied by the Turin Court, by decree filed on June 9, 2003.

Fiat Group

Fiat S.p.A. and certain of its subsidiaries are involved in various lawsuits and controversies. Nevertheless, it is believed that the resolution of these controversies will not cause significant liabilities for which specific risk reserves have not already been set aside.

Worms & Cie Group

Fox River

The Environmental Protection Agency (EPA), in 1997, brought suit against Appleton Papers Inc., NCR Corporation and five other paper manufacturers for the alleged contamination of the Fox River.

This event took place during the 1950s - 1970s when the company was owned by the NCR Corporation. At the time of the acquisition of Appleton Papers Inc. by Arjo Wiggins Appleton, in 1978, an agreement was signed with NCR Corporation for purposes of sharing the costs of the indemnities that could be charged to Appleton Papers Inc.

Since 1997, studies are being conducted to establish the feasibility of decontaminating the Fox River and to determine the share of responsibility. During the first half of 2001, Appleton Papers Inc. and NCR Corporation reached an agreement with the pertinent American authorities which consists of the commitment to pay a sum of US$ 40 million over four years to finance the research project for its decontamination. This payment will be charged against the indemnities to be paid.

In 2003, the "Department of Natural Resources" of Wisconsin (the state in which the pollution occurred) and the federal government published a long-term action plan for the complete reclamation of the river at an estimated total cost of US$ 400 million, to be borne by the industries involved. In 2004, the aforementioned authorities finalized the technical solutions for the decontamination of the Fox River by capping with sand and dredging of the river itself.

In July 2003, a ruling by a Supreme Court of Justice of the State of Wisconsin gave the industries which had signed insurance contracts covering environmental risks the possibility of claiming the guarantees provided in these same contracts.

AWA Ltd retained the benefit of these insurance contracts, even after the sale of Appleton Papers Inc., in 2001.

Reviews are currently being conducted with the insurance companies to establish the portion of the costs that will be taken up by them, both for the research and the defense costs already incurred and the decontamination costs of the Fox River to be sustained in the future.

Negotiations with the insurance companies continue: no accruals have been made in the 2004 financial statements for the compensation to be received, despite the fact that one of the insurance companies has made a first payment of US$ 2 million in December 2004.

In view of the way the dispute was evolving, the Worms & Cie Group, based on an evaluation by experts, had set aside a sum of US$ 125 million in 2001. Such provision had been calculated on the basis of the best estimate for decontamination expenses to be borne by the Group.

The evolution of the events described above have not caused any significant change in the evaluation of the risk. On the other hand, the possibility of being able to lay claim against the insurance companies for the reimbursement of the indemnities, will make it possible to offset the eventuality of a variation in the costs as compared to the initial assumptions. Consequently, the amount of the provision has not been adjusted at December 31, 2004. The reserve is equal to US$ 89 million (about € 65 million), net of the research and defense costs already spent.

European Commission

The inquiry by the Commission ended in July 2000 with notification of a fine, on which Arjo Wiggins Appleton had submitted its comments on the subject. On December 20, 2001, the Commission levied a fine of € 184 million on Arjo Wiggins Appleton which, in keeping with the principle of prudence, the company entirely accrued in the 2001 financial statements.

During the first half of 2002, the company filed an appeal to rescind the sentence which it maintains is out of proportion to the facts of the case. Since the appeal does not suspend the obligation to pay the fine, the company, in compliance with existing regulations, has decided to fulfill this obligation partly through a deposit of € 92 million and partly by providing a bank guarantee of the same amount.

The proceedings before the Court of the European Community in the first instance are still pending. Accordingly, at December 31, 2004, the provision has been calculated on the basis of the maximum potential risk.

Juventus Football Club

As regards the investigation by the judiciary against the Chief Executive Officer and the company physician concerning the alleged improper use of medicines by Juventus Football Club S.p.A. players, on November 26, 2004 the Court acquitted the Chief Executive Officer Antonio Giraudo of all charges and sentenced company physician Riccardo Agricola to one year and ten months' imprisonment, with the right to early release on the dual grounds provided by law.

The motivations for the sentence were filed on February 24, 2005. An appeal is currently being prepared on behalf of Riccardo Agricola and will be presented by the deadline date of April 11, 2005 and once filed will set in motion the second degree stage of the court process.

Group assets held by third parties

Group assets held by third parties, basically in reference to the Fiat Group, amount to € 3,313 million (€ 4,706 million at December 31, 2003), a decrease of € 1,393 million compared to December 31, 2003.

Fiat Group assets held by third parties at December 31, 2004 include securities deposited with banks and other financial institutions totaling € 156 million (€ 1,042 million at December 31, 2003). The reduction of € 886 million of the amount of securities deposited with banks is mainly due to their redemption at maturity by the issuers. This item also includes tangible fixed assets, products and goods of some Automotive Sectors held by outside suppliers for processing totaling € 3,062 million (€ 3,454 million at December 31, 2003).

COMMENTS ON THE PRINCIPAL COMPONENTS OF THE CONSOLIDATED STATEMENT OF OPERATIONS

14) Value of production – Revenues from sales and services and change in contract work in progress

In 2004, revenues from sales and services and change in contract work in progress amount to € 52,093 million, compared to € 52,434 million in 2003, with a decrease of 0.7%. They include revenues from sales and services of € 51,878 million (€ 53,509 million in 2003) and the positive change in contract work in progress of € 215 million (negative change of € 1,075 million in 2003).

The distribution of revenues from sales and services and the change in contract work in progress by business sector (net or intragroup transactions) is as follows:

			Change	
€ in millions	**2004**	2003	amount	%
Net revenues by operating sector				
Fiat Group				
- Automobiles	**20,356**	19,839	517	2.6
- Agricultural and construction equipment	**9,791**	9,410	381	4.0
- Commercial vehicles	**8,960**	8,206	754	9.2
- Ferrari and Maserati	**1,502**	1,250	252	20.2
- Components	**2,586**	2,087	499	23.9
- Production systems	**1,285**	1,756	(471)	(26.8)
- Metallurgical products	**798**	735	63	8.6

15) Costs of production

€ in millions	**2004**	2003	Change
Fiat Group	**48,804**	50,858	(2,054)
Worms & Cie Group	**4,306**	4,125	181
Alpitour Group	**1,102**	937	165
IFI and IFIL Holdings System	**66**	28	38
Total costs of production	**54,278**	55,948	(1,670)

As regards the Fiat Group:

- costs of production show a decrease of 4% compared to 2003. On a comparable consolidation basis, there would be an increase of 1.1%;
- raw materials, supplies and merchandise amount to € 28,951 million in 2004, an increase of 2% compared to 2003 . Raw materials, supplies and merchandise as a percentage of revenues, on a comparable consolidation basis, would be 62% (63% in 2003);
- services amount to € 7,984 million in 2004, a decrease of 6.1% compared to 2003. This amount is equal to 17.1% of revenues (18% in 2003). On a comparable consolidation basis, the percentage of services expenses to revenues would be 17.1% (18.4% in 2003). Services include advertising costs, external information technology and telecommunication service costs, external maintenance costs and transportation costs.

The costs of production of the IFIL Holdings Systems include the extraordinary amortization of the residual difference on consolidation relating to the Alpitour Group (€ 37 million).
The difference on consolidation which originated in 2004 on the purchase of 10% of the capital stock of NHT (parent company of the Alpitour Group) was amortized at the end of the first quarter of 2004 for € 24 million since it could not be allocated. At the end of 2004, taking into account that on consolidation IFIL Group had in the past deducted the difference on consolidation on 90% of the investment in the Alpitour Group from the consolidation reserve, a charge was then made to completely amortize the remaining amount of € 13 million.

Personnel

Personnel costs consist of the following:

€ in millions	**2004**	2003	Change
Salaries and wages	**5,111**	5,341	(230)
Social security contributions	**1,337**	1,409	(72)
Employee severance indemnities	**191**	249	(58)
Employee pensions and similar obligations	**191**	189	2
Other costs	**387**	338	49
Total personnel costs	**7,217**	7,526	(309)

Details of personnel costs, by Group, are as follows:

€ in millions	**2004**	2003	Change
Fiat Group			
Salaries and wages	**4,462**	4,707	(245)
Social security contributions	**1,168**	1,249	(81)
Employee severance indemnities	**187**	244	(57)
Employee pensions and similar obligations	**178**	185	(7)
Other costs	**374**	303	71
Total Fiat Group	**6,369**	6,688	(319)
Worms & Cie Group			
Salaries and wages	**576**	577	(1)
Social security contributions	**149**	146	3
Employee pensions and similar obligations	**13**	4	9
Other costs	**11**	34	(23)
Total Worms & Cie Group	**749**	761	(12)
Alpitour Group			
Salaries and wages	**65**	50	15
Social security contributions	**17**	13	4
Employee severance indemnities	**4**	3	1
Other costs	**1**	1	0
Total Alpitour Group	**87**	67	20
IFI and IFIL Holdings System			
Salaries and wages	**8**	7	1
Social security contributions	**3**	1	2
Employee severance indemnities	**0**	2	(2)
Other costs	**1**	0	1
Total IFI and IFIL Holdings System	**12**	10	2
Total personnel costs	**7,217**	7,526	(309)

Personnel costs of the Fiat Group in 2004 amount to € 6,369 million in 2004, a decrease of 4.8% compared to 2003, mostly due to the effects of the change in the scope of consolidation. On a comparable consolidation basis, the decrease would be 2.4%. Personnel costs are equal to 13.6% of revenues (14.1% in 2003). Personnel costs as a percentage of revenues, on a comparable consolidation basis, would be 13.6% (14.5% in 2003).

An analysis of the average number of employees by category is provided as follows:

	2004	2003	Change
- Managers, management staff and clerks	**64,904**	72,106	(7,202)
- Blue-collar	**114,886**	120,444	(5,558)
Total	**179,790**	192,550	(12,760)

An analysis of the average number of employees, by Group, is provided as follows:

	2004	2003	Change
Fiat Group	**161,494**	174,242	(12,748)
Worms & Cie Group	**14,551**	14,961	(410)
Alpitour Group	**3,664**	3,268	396
IFI and IFIL Holdings System	**81**	79	2
Total	**179,790**	192,550	(12,760)

The average number of employees of the Fiat Group in 2004 totals 161,494, a decrease of 12,748 employees compared to 2003. This decrease is partly due to employees who left the Group, also in connection with employee reduction plans, and partly to the change in the scope of consolidation principally in relation to the sale of FiatAvio S.p.A., the Toro Assicurazioni Group and the retail financing activities of the Automobile Sector. In 2004 and 2003, there are no companies accounted for using the proportional method.

Provisions for risks

Provisions for risks of € 1,395 million in 2004 (€ 1,164 million in 2003) mainly refer to the Fiat Group and relate to the vehicle warranty reserve of € 636 million (€ 490 million in 2003), mainly in the Automotive Sectors, and to other reserves connected with industrial risks for € 758 million (€ 673 million in 2003).

Other operating costs

An analysis of other operating costs, by Group, is as follows:

€ in millions	**2004**	2003	Change
Fiat Group			
Losses on sale of fixed assets	**83**	47	36
Prior period expenses	**208**	226	(18)

Total foreign exchange gains and losses	**25**	47	(22)
of which			
Foreign exchange gains and losses, excluding financial services companies	**25**	47	(22)

Other financial income of € 2,246 million in 2004 (€ 2,809 million in 2003), when shown net of interest and other financial expenses of € 2,320 million (€ 3,157 million in 2003) and the net balance of foreign exchange gains of € 25 million (€ 47 million in 2003) result in a net negative balance of € 49 million (a net negative balance of € 301 million in 2003). However, the result for fiscal 2003 had benefited from financial income, net of the relative financial expenses, on the businesses sold (mainly the retail activities of Fiat Auto and the Toro Assicurazioni Group) for approximately € 170 million. On a comparable consolidation basis, the improvement is about € 420 million and is the consequence of both nonrecurring transactions (mainly the net amount of income of approximately € 300 million from the termination of the equity swap on General Motors stock) and lower average indebtedness during the year and generally more favorable market interest rates.

Discounts and other expenses include receivables discounting and securitization expenses of € 195 million in 2004 (€ 280 million in 2003).

- financial receivables	**(71)**	(5)	(66)
Total writedowns	**(222)**	(277)	55
Total adjustments to financial assets	**(97)**	(172)	75

Revaluations of equity investments include the results of the following companies: BUC – Banca Unione Credito for € 9 million (€ 11 million in 2003), various companies of CNH Global N.V. for € 28 million (€ 24 million in 2003), companies of the Automobile Sector for € 56 million (€ 20 million in 2003) and other companies for € 32 million (€ 36 million in 2003).

Writedowns of equity investments include the results of the companies valued using the equity method and the permanent impairments in value of the companies valued at cost, for the following: various companies of CNH Global N.V. for € 4 million (€ 9 million in 2003), companies of the Automobile Sector for € 51 million (€ 112 million in 2003), companies of the Commercial Vehicles Sector for € 28 million (€ 3 million in 2003), companies of the Service Sector for € 26 million (€ 7 million in 2003) and other companies for € 17 million (€ 4 million in 2003). In 2003, the amount included writedowns in the following companies: Italenergia Bis S.p.A. for € 24 million, Atlanet S.p.A. for € 56 million, and the first four months of the Toro Assicurazioni Group for € 48 million.

Writedowns of financial receivables of € 71 million (€ 5 million in 2003) include provisions to the allowance for doubtful financial accounts receivable to adjust certain items to realizable value after settlement for the partial collection of a receivable which became known during the early months of 2005.

Total other expenses	**(1,135)**	(1,594)	459
Total extraordinary expenses	**(1,179)**	(1,670)	491
Total extraordinary income and expenses	**(863)**	347	(1,210)

Gains on disposals of investments and other fixed assets amount to € 162 million in 2004 (€ 1,826 million in 2003). They include the gains on the following sales: the Midas Group for € 32 million (€ 28 million net of the provisions connected with the transaction, classified in extraordinary provisions to reserves), Fiat Engineering S.p.A. for € 60 million (€ 58 million net of the collateral costs classified as extraordinary expenses), Edison S.p.A. shares for € 32 million, Edison warrants for € 30 million and other minor investments for € 8 million.

Gains on disposals of investments and other fixed assets amounted to € 1,826 million in 2003 and included the gains on the following sales: the Toro Assicurazioni Group for € 427 million (€ 390 million net of the expenses and provisions connected with the transaction, classified as other extraordinary expenses), the Automobile Sector's Retail financing activities in Brazil for € 103 million, the 55.95% investment in IPI S.p.A. for € 15 million, the 50.1% investment in IN ACTION S.r.l. for € 8 million, FiatAvio S.p.A. for € 1,266 million (€ 1,258 million net of the expenses connected with the transaction) and other minor investments for € 7 million.

The other extraordinary income of € 135 million (€ 159 million in 2003) refers to nonrecurring income of the individual companies of the Group mainly for the release of extraordinary reserves that proved in excess of requirements.

Losses on disposals of investments and other fixed assets amount to € 5 million in 2004 (€ 50 million in 2003).

Taxes relating to prior years amount to € 39 million in 2004 (€ 26 million in 2003).

Other extraordinary expenses amounting to € 1,135 million in 2004, include principally expenses and provisions for risks in relation to corporate restructuring transactions of the Fiat Group of € 508 million, other extraordinary writedowns of assets on the basis of changes in market prospects and the consequent new business plans of € 35 million. They also include additional extraordinary expenses and provisions to reserves for future risks and charges for a total of € 592 million, the most significant of which refer to expenses for the rationalization and restructuring of relationships with suppliers of the Fiat Group of € 246 million. Other extraordinary expenses also include those of the Fiat Group of € 18 million for prior period expenses.

Other extraordinary expenses amounting to € 1,594 million in 2003, included principally expenses and provisions for risks in relation to corporate restructuring transactions of € 658 million, other extraordinary writedowns of assets on the basis of changes in market prospects and the consequent new business plans of € 215 million, provisions for the remaining commitments connected with the IPSE initiative of € 47 million, expenses and provisions recorded in reference to relations existing with the Ixfin Group of € 53 million, incidental costs and other provisions connected with the sale of the Toro Assicurazioni Group of € 37 million, incidental costs and other provisions connected with other sales which took place in 2003 and in prior years of € 102 million, damages caused by flooding at the Termoli factory of € 71 million and, lastly, commissions paid to Mediobanca for the extension of the commitments undertaken by Mediobanca itself under the "Ferrari" contract of € 16 million. Other extraordinary expenses also included prior years' expenses of € 40 million.

Other expenses under extraordinary expenses, by Sector, are as follows:

Total extraordinary income and expenses	**623**	131	492

Gains on disposals realized by the IFIL Holdings System refer to the sale of the 50% interest in the capital stock of Eurofind Food (+€ 586 million) and the 7.2% stake in the capital stock of Club Méditerranée (+€ 27 million), as well as the portion of the gain deferred in prior years at IFI level regarding the subsidiary La Rinascente (€ 8 million).

In 2003, the gains referred to the sale of the 25% interest in Sifalberghi (€ 25 million), the portion of gains deferred in prior years regarding the subsidiary Toro Assicurazioni (€ 93 million) and the dilution generated by the disposal of Fiat treasury stock held by Toro Assicurazioni, sold by the same Fiat (€ 12 million).

19) Income taxes, current and deferred

Income taxes recorded in the consolidated statement of operations are the following:

€ in millions	**2004**	2003	Change
Current taxes, net of tax credits	**(351)**	(206)	(145)
Deferred taxes	**379**	(500)	879
Total	**28**	(706)	734

The reconciliation between the tax charge recorded in the consolidated financial statements and the theoretical tax charge, calculated on the basis of the theoretical tax rates in effect in Italy, is the following:

€ in millions	**2004**	2003
Theoretical income taxes	**357**	395
Utilization of tax loss carryforwards	**121**	57
Tax effect of permanent differences	**205**	(78)
Tax effect of difference between foreign tax rates and theoretical Italian tax rates	**7**	48
Deferred tax assets not provided	**(511)**	(955)
Other differences	**(19)**	(45)
Total	**160**	(578)
IRAP	**(132)**	(128)
Income taxes recorded in financial statements (current and deferred income taxes)	**28**	(706)

In order to render the reconciliation between income taxes recorded in the financial statements and theoretical income taxes more meaningful, the IRAP tax is not taken into consideration. Since the IRAP tax has a taxable basis that is different from income before taxes, it generates distortions between one year and another. Accordingly, the theoretical income taxes were determined applying only the tax rate in effect in Italy (IRES equal to 33% in 2004) to the income before taxes.

20) Net sales and revenues, operating income (loss), depreciation and amortization, capital expenditures by segment

(a) Intersegment net revenues include revenues between Group companies consolidated line-by-line and reporting to different Sectors. Intersegment sales are accounted for at transfer prices that are substantially in line with market conditions.

(b) The Aviation Sector's revenues are included up to July 1, 2003.

(c) The Insurance Sector's revenues are included up to May 2, 2003.

(d) Operating losses of other companies amount to € 120 million in 2004 and € 137 million in 2003.

21) Other information

Research and development expenses

Fiat Group

Each year significant expenditures are borne by the Fiat Group for research and development programs that generally cover a period of several years and which are charged to income in the year incurred.

In 2004 and 2003 direct research and development expenses were € 1,810 million and € 1,747 million, respectively. For the most important projects, the Fiat Group has applied for financing to the Italian government and the European Community under related legislation.

At the end of 2004, there were multiyear research and innovation projects that are being examined or for which incentives are being paid, by the above authorities, which show estimated expenditures in the relative applications amounting to approximately € 997 million (an amount which also comprises projects on which the balance of the incentives was received in the same year). The Group filed/received low-rate loans for € 226 million and grants for € 436 million in respect of these projects which could also give rise to receipts for incentives in future years. The amounts received during 2004, referring to the aforementioned expenditures, totaled € 22 million in low-rate loans and € 52 million in grants, for a cumulative total at December 31, 2004 of € 42 million in low-rate loans and € 157 million in grants.

The average interest rate on financing received for research and innovation at December 31, 2004 was 2.08% (2.27% for outstanding financing at December 31, 2003).

Worms & Cie Group

In 2004, research and development costs expensed directly to income during the year total € 17 million (€ 16 million in 2003).

Maintenance costs

Maintenance costs charged to income in 2004 and 2003 amounted to € 443 million and € 510 million, respectively. Details, by Group, are as follows:

€ in millions	**2004**	2003	Change
Fiat Group	**370**	435	(65)
Worms & Cie Group	**67**	71	(4)
Alpitour Group	**6**	4	2
Total	**443**	510	(67)

Advertising costs

Advertising costs charged to income amounted to € 959 million and to € 982 million, respectively, in 2004 and 2003. Details, by Group, are as follows:

€ in millions	**2004**	2003	Change
Fiat Group	**898**	921	(23)
Worms & Cie Group	**44**	43	1
Alpitour Group	**17**	18	(1)
Total	**959**	982	(23)

22) Compensation to directors and statutory auditors

In accordance with art. 38 of Legislative Decree 127/91, the amount of emoluments to which the Directors and Statutory Auditors of IFI S.p.A. are entitled for carrying out such functions in the parent company and also in other companies included in the scope of consolidation are as follows:

€ in thousands	IFI S.p.A.	Subsidiaries	Total
Directors	451	3,187	3,638
Statutory Auditors	146	158	304
Total	**597**	**3,345**	**3,942**

In 2003, compensation amounted to € 5,528 thousand, of which € 1,123 thousand was paid by IFI and € 4,405 thousand by subsidiaries.

23) Statement of cash flows for the year ended at December 31, 2004

STRUCTURE AND CONTENT OF THE STATUTORY FINANCIAL STATEMENTS

The statutory financial statements for the year ended December 31, 2003 are expressed in euros and have been prepared in accordance with the provisions of the Italian Civil Code. For the first time, information is provided in accordance with Legislative Decree No. 6 dated January 17, 2003 (Reform of the law on corporations and cooperatives). Accordingly, the 2003 financial statements have been reclassified to reflect the requirements of the new legislation.

Not being applicable, the financial statements do not reflect the elimination of previous tax interference.

The balance sheet and statement of operations show the changes in the individual captions on the face of the statements. In the Notes, prepared in accordance with the provisions of art. 2427 of the Italian Civil Code, the comments are limited to the principal changes. Unless otherwise indicated, all amounts in the notes are expressed in thousands of euros. In the "Annexes", which are an integral part of these notes, information is shown which is either required by current laws or presented as additional disclosure for purposes of clarity and completeness of the financial statements, including the information requested by Recommendation No. 94001437 dated February 23, 1994 issued by the National Commission for Corporations and the Stock Exchange (Consob).

As provided in point 5 of art. 2428 of the Italian Civil Code, significant events subsequent to the end of the year are commented in the Report on Operations, to which reference should be made.

SIGNIFICANT ACCOUNTING POLICIES

Pursuant to art. 2423-bis of the Italian Civil Code, the financial statements have been prepared on the basis of the general principle of prudence, using the accrual basis of accounting and according to the going-concern concept. The accounting policies discussed below have been applied on a basis consistent with the prior year, where not amended by the new provisions of the Italian Civil Code, and comply with the provisions of art. 2426 of the Italian Civil Code, as well as take into account the economic function of the assets and liabilities under consideration. Furthermore, there were no departures from paragraph 4 of art. 2423 of the Italian Civil Code in preparing these financial statements.

Intangible fixed assets
Intangible fixed assets are recorded at cost of acquisition and amortized on a straight-line basis over a period of not more than five years. Unamortized intangible fixed assets are covered by available reserves.

Property, plant and equipment
These are stated at cost of acquisition, including accessory charges, net of accumulated depreciation. Depreciation is calculated on a straight-line basis each year over the estimated useful lives of the assets.
In view of the nature of the property, plant and equipment, depreciation is calculated at the ordinary depreciation rates plus the rates for allowable accelerated depreciation. For property, plant and equipment purchased during the year, these rates are reduced by half. Purchases of assets of below € 516 are entirely expensed in the year of purchase.

Financial fixed assets
Financial fixed assets are valued at cost of acquisition, including accessory charges, determined using the LIFO method with annual adjustments.
The cost of acquisition of the investments in IFIL and in Exor Group has been revalued in previous years as allowed by monetary revaluation laws. If, at the balance sheet date, the investment value is determined to have suffered a permanent impairment in value to below the cost of acquisition as defined above, it is written down to the lower value.
Should the reasons for the writedowns no longer apply, the value of the financial fixed assets will be reinstated up to the limit of the cost of acquisition; for financial fixed assets prior to the enactment of Legislative Decree 127/91, this limit is represented by the amounts recorded in the financial statements at March 31, 1993.

Receivables
Receivables are stated at estimated realizable value and include, where applicable, accrued interest earned and collectible at the end of the year.

Accruals and deferrals

These are income and expenses, common to two or more years, calculated on the accrual principle with the matching of costs and revenues of the year.

Employee severance indemnities

Employee severance indemnities, revalued on the basis of indexes, and determined in accordance with labor legislation and contracts, reflect the liability in respect of all employees. This liability is calculated in reference to the years of service and the employee's annual salary, in accordance with art. 2120 of the Italian Civil Code.

The reserve also includes the liability pursuant to the company agreements dated December 23, 1999.

Payables

Payables are recorded at nominal value and include, where applicable, accrued interest payable at the end of the year.

Guarantees, commitments and other memorandum accounts

Financial instruments used to hedge exchange and interest rate risks and, in general, the fluctuations in the value of assets and liabilities, are recorded under "Commitments".

Such contracts form part of the results for the year on the basis of the accrual principle.

Commitments relating to the performance of contracts are recorded under memorandum accounts on the basis of the nominal value to which they refer.

Securities held in deposit by third parties are shown at their nominal value.

Dividends

Dividends are recorded in the year in which they are declared.

Financial income and expenses

Financial income and expenses are recorded in the financial statements based on the accrual concept. As for financial instruments used to hedge interest rate risk, the interest differentials are recognized in the statement of operations based on the accrual concept.

Extraordinary income and expenses

Extraordinary income and expenses are generated by events unrelated to ordinary activities or by income and expenses and nonexistent assets and liabilities relating to prior years.

Income taxes

Ires and Irap taxes for the current year are calculated on the basis of the tax legislation in force.

Deferred taxes are calculated on temporary differences between the asset and liability items and the corresponding tax items and the deferred tax liability is recorded in a specific reserve in liabilities; any deferred tax assets are recorded in "Receivables – deferred tax assets" only if there is reasonable certainty of their future recovery. Deferred tax assets and liabilities are offset where allowed by law.

Transactions denominated in foreign currency

Transactions in currencies other than the euro are recorded at the exchange rates agreed with the counterparts or, in their absence, at the exchange rate as of the date of transaction.

Assets and liabilities in currencies other than the euro, except for property, plant and equipment, intangible fixed assets and financial fixed assets (if made up of investments valued at cost) are adjusted to the year-end exchange rate, in the absence of a hedging contract for exchange rate risks.

Any net positive difference is booked, for the part not absorbed by a possible loss for the year, in a reserve under stockholders' equity which cannot be distributed until such time as the gains have effectively been realized. This reserve, however, may be used, from the year it is booked, to absorb the losses of prior years.

Property, plant and equipment, intangible fixed assets and financial fixed assets (if made up of investments valued at cost) in currencies other than the euro are booked at the exchange rate in effect at their date of purchase or at the rate at the end of the year if this results in a lower value and constitutes an impairment considered as permanent.

ANALYSIS OF THE INDIVIDUAL ITEMS OF THE BALANCE SHEET

Intangible fixed assets
Intangible fixed assets amount to € 6 thousand and relate to costs to update the corporate website (€ 9 thousand), net of the amortization charge for the year (€ 3 thousand). Such costs are amortized over a period of three years.

Financial fixed assets – Investments
Details of investments and the percentage holdings of the classes of capital stock are summarized in the following table:

	12/31/2004			12/31/2003	
€ in thousands	**%**	**Carrying value**		%	Carrying value
Subsidiaries					
IFIL S.p.A. (ordinary shares)	**62.03**	**1,676,162**	(a)	62.03	1,676,162
Associated companies - Exor Group S.A. (ordinary shares)	**29.29**	**102,559**		29.29	102,559
Other companies					
Deutsche Morgan Grenfell Capital Italy S.A.					
- ordinary shares	**0.93**	**455**		1.11	544
- preferred shares	**1.28**	**5**		1.28	5
Emittenti Titoli S.p.A.	**6.43**	**272**		8.78	371
Sundry consortiums	**-**	**3**		-	3
		735			923
Total investments		**1,779,456**			1,779,644

(a) Net of writedowns of € 73,473 thousand made in 2002.

During the year, there were no movements in the investments in subsidiaries and associated companies while 193,000 Emittenti Titoli shares (2.35% of capital stock) were sold and 172 Deutsche Morgan Grenfell Capital Italy shares were reimbursed (0.18% of the class of stock).

Financial fixed assets – Receivables from others
The receivable from TLcom I at December 31, 2004 amounts to € 8,178 thousand. This is an increase of € 1,500 thousand compared to the prior year.

Financial fixed assets – Treasury stock
There were no transactions in preferred treasury stock carried under financial fixed assets during the year. The balance at December 31, 2004 refers to the following:

		Carrying value		
	Number of shares	Unit (€)	Total (€ in thousands)	
IFI preferred shares	**5,360,300**	**13.15**	**70,477**	(a)

(a) Net of writedowns of € 58,934 thousand made in 2002.

IFI preferred shares in portfolio at December 31, 2004 have a par value of € 5,360 thousand and represent 3.28% of capital stock (6.98% of the class of stock).

Based upon the average stock market prices for the second half of 2004 (€ 8.85), IFI preferred shares show an unrealized loss of € 23 million, which would be reduced to € 10 million based upon the average market prices for the period March 1 – 15, 2005 (€ 11.35).
Such unrealized loss is not considered representative of a permanent impairment in value taking also into account that the per share carrying value of IFI preferred shares is in any case lower than the per share value of the consolidated stockholders' equity of the IFI Group at December 31, 2004 (€ 13.9).

Additional details are provided in Annex 3.

Current assets – Receivables from subsidiaries

€ in thousands	**12/31/2004**	12/31/2003	Change
Fiat S.p.A.	**228**	0	228

Excess tax on companies	**22**	22	0
Total other receivables	**17,807**	17,335	472

There are no receivables due beyond five years.

The changes in receivables from the tax authorities for the year 2004 are as follows:

€ in thousands	
Balance at December 31, 2003	17,335
Purchase of receivables from the tax authorities from the subsidiary IFIL	516
VAT, prorata change in nondeductibility (from 100% to 19%)	235
Used to compensate withholdings payable	(516)
Interest earned during the year	237
Balance at December 31, 2004	**17,807**

Current assets – Other receivables

Other receivables amount to € 840 thousand (€ 815 thousand at December 31, 2003) and include € 620 thousand for services rendered to Fiat Sava for the custody of receivables which guarantee the circulation of interest-bearing Sava Fiat bonds and € 220 thousand for sundry revenues and cost recoveries.

Capital stock

At December 31, 2004, the capital stock of IFI S.p.A., fully subscribed to and paid-in, amounts to € 163,251,460 and is composed of 86,450,000 ordinary shares and 76,801,460 preferred shares of par value € 1 each.
In accordance with art. 10 of the bylaws, preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code.
Pursuant to art. 27 of the bylaws, preferred shares have the right to a preference dividend, which is not cumulative from one year to the next, equal to 5.17% of par value (€ 1).

Capital stock may be increased for a period of five years, at one or more times, also in divisible form, up to a maximum of € 561,750,000, by the authority delegated, pursuant to art. 2443 of the Italian Civil Code, to the Board of Directors by the Extraordinary Stockholders' Meeting held April 22, 2003.

Reserves

The statement of changes in stockholders' equity is presented in Annex 4.
The information required by art. 2427, number 7 bis of the Italian Civil Code (available and distributable reserves) is presented as follows:

Balance sheet caption € in thousands	**Balance at 12/31/2004**	Possibility of use	Portion available	Used to cover losses in the years 2002 2003 and 2004
Capital stock	**163,251**			
Capital stock reserves:				
Additional paid-in capital (a)	**386,347**	A, B, C	386,347	35,206
Revaluation reserve Law 74, 2/11/1952 (b)	**157**	A, B, C	157	
Revaluation reserve Law 576, 12/2/1975 (b)	**16,940**	A, B, C	16,940	
Revaluation reserve Law 72, 3/19/1983 (b)	**64,265**	A, B, C	64,265	
Legal reserve	**2,032**	B	0	
Treasury stock valuation reserve	**458**		0	
Reserve under DPR No. 597, art. 55, 9/29/1973	**0**		0	91
Merger surplus reserve	**0**		0	191,628
Retained earnings	**0**		0	11
Earnings reserves:				
Legal reserve	**30,618**	B		
Treasury stock valuation reserve	**70,019**			
Extraordinary reserve	**712,905**	A, B, C	712,905	
Reserve for purchase of treasury stock	**120,000**		0	
Total	**1,566,992**		**1,180,614**	**226,936**
Portion not distributable (c)			(6)	
Residual portion distributable			**1,180,608**	

A: For capital increases; B: For coverage of losses; C: For distribution to stockholders;

(a) Since the legal reserve is equal to one-fifth of capital stock (art. 2431 of the Italian Civil Code), the reserve can be distributed.

(b) The revaluation reserves can be used for bonus increases of capital stock. If used to cover losses, they must be subsequently replenished. If not, then no dividends can be distributed. They cannot be used to set up the reserve for the purchase of treasury stock. The monetary revaluation reserves can be reduced only by resolution of the Stockholders' Meeting and in compliance with the prescriptions of art. 2445, paragraphs 2 and 3 of the Italian Civil Code.

(c) Pursuant to art. 2426 of the Italian Civil Code, paragraph 5, when there are start-up and expansion costs that must still be amortized, dividends can only be distributed if there are available reserves sufficient to cover the unamortized portion of these costs. Art. 2426 of the Italian Civil Code, paragraph 8 bis requires that unrealized net exchange gains, in that they derive from the valuation of the balances in foreign currency at year-end exchange rates, should be recorded, for the part not absorbed by any loss for the year, in a non-distributable reserve until the gain is realized.

At December 31, 2004, tax-deferred reserves are recorded for a total amount of € 83,394 thousand, of which € 81,362 thousand relates to the monetary revaluation reserve and € 2,032 thousand to the legal reserve. In the event of distribution, such amounts would form part of the taxable income of the Company. In view of the unlikelihood of their distribution, no deferred taxes have been set aside in respect of such reserves.

Reserves for risks and charges

These amount to € 5,704 thousand, of which € 1,504 thousand refers to taxes and € 4,200 thousand to the risk of writedowns of financial receivables.

Reserve for employee severance indemnities
This reserve refers to the liability for employee severance indemnities, calculated in accordance with art. 2120 of the Italian Civil Code, as well as the liability in respect of employees arising from the December 23, 1999 agreement.

Details of the changes are as follows:

€ in thousands	Employee Sever. Indem.	Agreement 12/23/1999	Total
Balance at December 31, 2003	1,066	235	1,301
Provisions	155	66	221
Payments	(120)	(31)	(151)
Decrease for transfers to other Group companies	(156)	(26)	(182)
Increase for transfers from other Group companies	249	58	307
Balance at December 31, 2004	**1,194**	**302**	**1,496**

Borrowings from banks

€ in thousands	**12/31/2004**	12/31/2003	Change
Due within one year	**208,456**	66,262	142,194
Due beyond one year	**30,000**	212,700	(182,700)
Total borrowings from banks	**238,456**	278,962	(40,506)

Borrowings from banks due within one year amount to € 208.5 million (€ 66.3 million at December 31, 2003) and include loans of € 140 million due in the first half of 2005, on which interest rate swaps and zero cost collars have been put into place to guarantee a fixed interest rate.

Borrowings from banks due beyond one year of € 30 million include loans of € 20 million on which interest rate swaps have been put into place to guarantee a fixed interest rate.
Loans are classified as due beyond one year on the basis of the residual period of the loan and the period of the hedging contracts.
Borrowings from banks due beyond one year are payable within five years.

The company has irrevocable lines of credit available totaling € 495 million, of which € 350 million is due beyond one year.

Payables to subsidiaries
Payables to subsidiaries amount to € 192 thousand and refer entirely to trade payables.

€ in thousands	**12/31/2004**	12/31/2003	Change
Soiem S.p.A.	**128**	313	(185)
IFIL S.p.A.	**23**	0	23
Fiat Auto S.p.A.	**5**	11	(6)
Other Fiat Group companies	**36**	49	(13)
Total payables to subsidiaries	**192**	373	(181)

Payables to parent company

Payables to parent company amount to € 24,189 thousand (€ 15,176 thousand at December 31, 2003) and include € 24,186 thousand for the loan granted by the parent company Giovanni Agnelli e C. S.a.p.az., which bears interest at the monthly floating market rate, and € 3 thousand of cost recoveries.

Taxes payable

Taxes payable amount to € 133 thousand (€ 179 thousand in 2003) and relate to Irpef withholding taxes and VAT payable.

The Company has agreed its tax years up to December 31, 1999.
The Company took advantage of the tax amnesty (Law 289/2002 and subsequent amendments) opting to apply art. 8 (simple supplement) relating to the year 2002, with a charge of € 300.

Social security payable

€ in thousands	**12/31/2004**		12/31/2003	Change
INPS solidarity fund (MD No. 158 dated 4/28/2000)	**442**	(a)	679	(237)
INPS social security contributions on salaries and unused vacation and holidays	**135**		109	26
Total social security payable	**577**		788	(211)

(a) Of which € 254 thousand is beyond one year.

Ministerial Decree No. 158 dated April 28, 2000, established, at INPS, the "Solidarity Fund for the support of earnings, employment and professional reconversion and requalification of credit personnel". Financial and asset management of the Fund is administered autonomously. The Fund provides, in exceptional circumstances, for the issue of checks to support earnings at the request of the employer and up until the right accrues for the years-of-service or old age pension by employees who accrue the requisites within a maximum period of 60 months from the date of termination of the working relationship. The above liabilities (€ 442 thousand in total) represent the extraordinary contribution that IFI must pay to cover the exceptional checks that are due to former employees, including related social security contributions.

Other payables

€ in thousands	**12/31/2004**	12/31/2003	Change
Employees for salaries, holidays and vacation	**258**	65	193
Board of Statutory Auditors compensation	**154**	178	(24)
Stockholders for dividends not yet collected	**89**	107	(18)
Extraordinary compensation for the former Managing Director	**0**	500	(500)
Extraordinary compensation for the former Deputy Chairman	**0**	150	(150)
Sundry	**4**	2	2
Total other payables	**505**	1,002	(497)

Accrued expenses

Accrued expenses amount to € 1,184 thousand (€ 1,279 thousand at December 31, 2003) and include interest expenses on borrowings from banks (€ 632 thousand) and expenses on interest rate swaps and zero cost collars (€ 552 thousand) accrued to December 31, 2004.

GUARANTEES, COMMITMENTS AND OTHER MEMORANDUM ACCOUNTS

Guarantees granted – Sureties issued on behalf of subsidiaries

At December 31, 2004, sureties granted in the past by IFI amount to € 4,128 thousand and refer to F.I.G.C., Federazione Italiana Giuoco Calcio – Lega Nazionale Professionisti, on behalf of the Juventus Football Club.
The decrease of € 27,875 thousand compared to December 31, 2003 is due to the sureties that expired (€ 24,256 thousand) or were reduced (€ 3,619 thousand) during the year.
The sureties, remunerated at market rates, will expire in 2005.

Commitments

€ in thousands	**12/31/2004**	12/31/2003	Change
Commitments with leading banking institutions relating to transactions to hedge interest rate fluctuations on bank debt due in 2005 and 2007 (a)	**160,000**	170,000	(10,000)
Residual commitment to invest in TLcom I	**1,500**	3,000	(1,500)
Residual commitment to subscribe to Emittenti Titoli's capital increase	**93**	93	0
Commitment to sell 47,500 IFIL ordinary shares	**0**	424	(424)
Total commitments	**161,593**	173,517	(11,924)

(a) The transactions in derivative financial instruments are used exclusively to hedge the risk of interest rate fluctuations and are therefore not valued separately.

Other memorandum accounts – Securities held in deposit by third parties

These amount to € 34,190 thousand and refer to 3,418,242 Exor Group S.A. ordinary shares and 2,886 Deutsche Morgan Grenfell shares deposited at banks.

Other memorandum accounts – Third-party assets held by the company

These amount to € 86,450 thousand and refer to 86,450,000 IFI ordinary shares owned by the parent company Giovanni Agnelli e C. S.a.p.az..

ANALYSIS OF THE INDIVIDUAL ITEMS OF THE STATEMENT OF OPERATIONS

Value of production – Revenues from sales and services

€ in thousands	**2004**	2003	Change
Services rendered to subsidiaries, associated companies and parent company:			
- Exor Group S.A.	**207**	92	115
- Juventus Football Club S.p.A.	**54**	223	(169)
- Giovanni Agnelli e C. S.a.p.az. (parent company)	**33**	0	33
- IFIL S.p.A.	**25**	0	25
Services rendered to Fiat Sava S.p.A.	**620**	620	0
Services rendered to third parties	**70**	125	(55)
Total revenues from sales and services	**1,009**	1,060	(51)

The services rendered to Fiat Sava consist of the custody of receivables (€ 1,223.5 million) which guarantee the circulation of interest-bearing Sava Fiat bonds (the 2004 bond issue amounts to € 526 million).

Value of production – Other income and revenues

	600	1,123	(523)
Office management and security	**190**	384	(194)
Vehicle maintenance, office equipment and insurance	**115**	183	(68)
Mailing and similar expenses	**12**	14	(2)
Travel and entertainment	**58**	136	(78)
Bank charges and fees	**43**	208	(165)
Audit fees	**42**	42	0
Employee expenses	**28**	32	(4)
Other expenses	**30**	44	(14)
Total services	**1,994**	4,478	(2,484)

Costs of production – Leases and rentals
These amount to € 382 thousand (€ 803 thousand in 2003) and include the rent on the Turin headquarters (€ 148 thousand to the subsidiary company Soiem S.p.A.), leases and expenses of the Rome headquarters (€ 67 thousand), leases for office machines, for cars in the company fleet and other rentals (€ 167 thousand).

Costs of production – Personnel
These total € 2,516 thousand (€ 2,714 thousand in 2003) and show a decrease of € 198 thousand due to the reduction in the average number of staff (from 18 to 16 employees).

Other costs include the contribution (€ 82 thousand) to the Corporate Employee Benefits Fund – Pension Fund, administered separately from the balance sheet, in which IFI S.p.A. and other companies in the Group participate. The purpose of this Fund, which is non-profit, is to pay benefits that are a supplement to the obligatory public system, either directly or by taking out insurance policies, in conformity with the provisions of the collective labor contracts, agreements or company regulations. The technical equilibrium between benefits and contributions is ensured by the company partners in the Fund.

At year-end 2004, employees number 15 (11 at the end of 2003).
The average number of employees in 2004 was 16, summarized by category as follows:

	2004	2003	Change
Managers	**2**	3	(1)
Management staff	**4**	5	(1)
Clerks	**7**	8	(1)
Messengers	**3**	2	1
Average number of employees	**16**	18	(2)

Costs of production – Other operating costs

Other operating costs total € 591 thousand (€ 1,611 thousand in 2003) and show a decrease of € 1,020 thousand compared to 2003. Details are as follows:

€ in thousands	**2004**	2003	Change
Donations to non-profit and cultural organizations	**219**	357	(138)
Notary and corporate charges	**105**	152	(47)
Indirect taxes and duties	**73**	831 (a)	(758)
Publication of annual, first-half and quarterly financial statements	**57**	86	(29)
Association dues	**53**	46	7
Books, newspapers and magazines	**24**	40	(16)
Ads	**13**	81	(68)
Sundry	**47**	18	29
Total other operating costs	**591**	1,611	(1,020)

(a) Including nonrecurring expenses relating to nondeductible VAT for € 282 thousand.

Donations to non-profit and cultural organizations in 2004 were paid from the portion of prior years' profits to which the Board of Directors is entitled, according to the bylaws, and which it waived.

Dividends

Details are as follows:

€ in thousands	**2004**	2003	Change
Subsidiaries			
IFIL S.p.A. (ordinary shares)	**39,915**	0	39,915
Associated companies			
Exor Group S.A. (ordinary shares)	**10,596**	4,444	6,152
Other companies			
Emittenti Titoli S.p.A.	**88**	202 (a)	(114)
Total	**50,599**	4,646	45,953

(a) Including € 72 thousand relating to tax credits.

Gains on sale of investments in other companies

These total € 19 thousand and come from the sale of 193,000 Emittenti Titoli shares. In 2003, this caption had included the gain on the contribution of the investment in SANPAOLO IMI to IFIL (€ 19,045 thousand).

Other financial income – Other income

These total € 237 thousand (€ 11 thousand in 2003) and refer to interest income on receivables from the tax authorities (€ 236 thousand) and bank interest income.

Interest and other financial expenses

Details are as follows:

€ in thousands	**2004**	2003	Change
Interest expense on loan from parent company			
- Giovanni Agnelli e C. S.a.p.az.	**619**	656	(37)
Others			
- interest expenses on borrowings from banks	**6,327**	10,008	(3,681)
- expenses relating to hedges of interest rate fluctuations	**4,045**	3,647	398
- sundry bank fees	**744**	641	103
- accrual for sundry financial risks	**1,500**	200	1,300
Interest expense on loans from subsidiaries	**0**	66	(66)
Total interest and other financial expenses	**13,235**	15,218	(1,983)

Extraordinary income and expenses

Extraordinary income amounts to € 146 thousand and € 113 thousand of that amount relates to the release of the current income tax reserve in excess of requirements and € 33 thousand to prior period income.

Extraordinary expenses of € 32 thousand refer entirely to prior period expenses.

Income taxes, current and deferred

The taxable base according to tax laws did not generate any current income tax expenses for the year 2004 and resulted in the release of € 3,955 thousand of excess deferred taxes provided in previous years. Since reasonable certainty of future recovery is not assured, no deferred tax assets have been booked on the tax losses for the years 2003 and 2004 (€ 167 million, in total) and on the portions of investment writedowns that, as allowed by existing tax legislation, will be deductible in future years (€ 53 million, in total). Details are as follows:

	2004		2003	
€ in millions	**Temporary differences**	**Tax effect (33% rate)**	Temporary differences	Tax effect (34% rate)
Deferred tax benefit		**-**		-
Deferred tax expense				
Gains realized in the years 1999 (€ 49 million), 2000 (€ 39 million) and in 2001 (€ 21 million) subject to taxes over 5 years	**12**	**4**	22	7
Rate adjustment (from 34% to 33%)			16	
Total deferred income taxes		**4**		7
Net deferred income taxes		**4**		7
Temporary differences excluded from the calculation of deferred income taxes				
Tax losses carried forward:				
- year 2003	**147**		147	
- year 2004	**20**			
Total tax losses carried forward	**167**		147	
Writedown of financial fixed assets deductible in future years	**53**		79	

The reconciliation between pre-tax income and taxable income is presented in the following table:

€ in millions	**2004**	2003
IRES taxes		
Pre-tax income	**34**	7
Increases:		
- permanent differences	**9**	1
- gains on investments deferred in prior years	**12**	22
Total increases	**21**	23
Decreases:		
- 95% of dividends collected	**(48)**	(4)
- portion of writedown of investments deductible over 5 years	**(26)**	(27)
- other differences	**(1)**	(146)
Total decreases	**(75)**	(177)
Taxable loss	**(20)**	**(147)**

Taxable income for the computation of IRAP taxes is negative.

Other information – Compensation to Directors, Statutory Auditors and General Managers

(Art. 78 of Consob resolution No. 11971 dated May 14, 1999 and subsequent amendments)

All amounts in the following table are expressed in thousands of euros.

Name	Post held	Term of office	Expiration of term of office (a)	Compensation for post held (b)	Non-monetary benefits	Bonuses and other incentives	Other compensation
Directors in office

REPORT OF THE BOARD OF STATUTORY AUDITORS ACCORDING TO ART. 153 OF LEGISLATIVE DECREE NO. 58/1998 AND ART. 2429, PARAGRAPH 3 OF THE ITALIAN CIVIL CODE

Dear Stockholders,
Under art. 153 of Legislative Decree No. 58 of February 24, 1998, the Board of Statutory Auditors has the obligation to report to the Stockholders' Meeting on matters concerning the audit work carried out and any omissions and censurable matters that may have come to its attention. The Board of Statutory Auditors may also formulate proposals to the Stockholders' Meeting in relation to the financial statements, to its approval and to matters of its competence.
With this report, we have complied with the law.
In 2004, the Board of Statutory Auditors has complied with the obligations required by art. 149 of Legislative Decree No. 58 dated February 24, 1998, which allows us to specifically comment on the matters which follow.

We have attended the meetings of the Board of Directors during the course of which the Directors informed us of the activities carried out and the significant economic, financial and equity transactions entered into or in progress by the company and/or its subsidiaries. In this regard, we have ascertained that the transactions approved and carried out were in conformity with the law and the corporate bylaws, were not in disagreement with the resolutions approved by the Stockholders' Meeting, nor in potential conflict of interest and were based upon the principles of good administration.

The current organizational structure of the Company, insofar as we are responsible, appears to be adequate for the specific type of business and size of the Company. The Board of Statutory Auditors, also on the basis of meetings held with company management and with representatives of the Independent Auditors, has gathered extensive information regarding compliance with the principles of diligent and correct administrative management.

Our evaluation of the adequacy of the internal control system is positive, meaning that the system is operating effectively for the purpose of ascertaining that the internal operating and administrative procedures, which have been adopted in order to guarantee a sound and efficient management, are being followed, and, also for identifying, preventing and managing, as far as possible, financial and operating risks and any fraud to the detriment of the company.

Furthermore, we consider that the administrative accounting system, insofar as ascertained and checked by us also in previous years, is in a condition to correctly represent operating events.

As regards "Corporate Governance", the Directors refer to this subject in a specific report, as required by the Code of Self-discipline of listed companies.

The directives imposed on the subsidiaries by IFI S.p.A. as per art. 114, paragraph 2, of Legislative Decree No. 58/98 are also considered adequate.
The Board of Directors has sent to us, in accordance with the law, the report relating to the first half of the year, making it public within the time-frame and according to the procedures established by Consob and has also provided, according to the law, reports on quarterly performance.

With reference to Consob Communications dated February 20, 1997, March 2, 1998 and April 6, 2001, as far as our responsibility is concerned, we can attest that:

- the information provided by the Directors in the Report on Operations are considered exhaustive and complete, also with respect to the status of the implementation of the systems and procedures for the application of the international accounting principles (Consob Communication DME/5015175 of March 10, 2005);
- the Board of Statutory Auditors, in accordance with the "Testo Unico sulla Finanza" (Legislative Decree No. 58/98), has been kept constantly informed about matters of its competence;
- the periodical tests and controls which the Board of Statutory Auditors carried out on the company did not show atypical or unusual transactions;
- as for intercompany transactions, the Directors in their Report on Operations present and describe the numerous transactions for goods and services entered into with Group companies and/or related parties which have been carried out on the basis of reciprocal economic gain or at normal market conditions;
- the Independent Auditors' report did not contain any qualifications or other matters of interest nor related observations or proposals;

- as previously stated, the organizational structure of the company, insofar as we are responsible, appears to be adequate and the administrative accounting system is reliable for purposes of correctly representing operating events;
- the internal control system appears adequate and effective;
- during 2004, the Board of Directors held seven meetings, which we attended, and the Board of Statutory Auditors held 15 meetings, five of which were attended by the Independent Auditors;
- neither complaints, as per ex art. 2408 of the Italian Civil Code, were received by the Board of Statutory Auditors, nor has it been informed, at this time, of any petitions presented to IFI S.p.A.;
- opinions have been issued during the year by the Board of Statutory Auditors pursuant to the law;
- IFI S.p.A. has assigned the audit firm, Deloitte & Touche S.p.A., other work, apart from the audit of the statutory financial statements and the consolidated financial statements and the limited scope audit of the six-month report, for assistance activities in establishing the impact of the adoption of International Financial Reporting Standards, and the plan for the relative process of conversion to these Standards, for a fee of € 20 thousand.

As for the annual statutory financial statements, which show a net income of € 37,707,363, the reasons for which were described in the Report on Operations, we have ascertained compliance with the law as regards its structure and formation by tests carried out by us directly and through information received by us from the Independent Auditors. We therefore maintain that the financial statements are befitting of your approval, together with the motion to appropriate the net income to the extraordinary reserve, as formulated by the Board of Directors.

The Board of Directors also asks for your authorization to buy-back treasury stock in the amount and in the manner and terms described in the specific report, and proposes amendments to the Regulations for Stockholders' Meetings. As for our responsibility, we attest that both motions proposed to you agree with existing legislation.

THE BOARD OF STATUTORY AUDITORS

(Cesare Ferrero)

(Giorgio Giorgi)

(Lionello Jona Celesia)

REPORT OF THE BOARD OF STATUTORY AUDITORS ACCORDING TO ART. 41 OF LEGISLATIVE DECREE NO. 127/1991

Dear Stockholders,
The consolidated financial statements of IFI S.p.A. for the year ended December 31, 2004 – consisting of the balance sheet, the statement of operations and the notes to the financial statements – which have been made available to you, show a net income of € 117 million, compared to a loss of € 130 million in the prior year. The consolidated financial statements were submitted to us within the terms of the law, together with the Report on Operations, and prepared in accordance with the provisions of Legislative Decree No. 127 dated April 9, 1991.

The tests carried out by Deloitte & Touche S.p.A., the Independent Auditors charged with the audit of the financial statements, has led to the assertion that the values expressed in the financial statements agree with the accounting records of the Parent Company, the statutory and consolidated financial statements of the subsidiaries and the relative information formally communicated by the latter.
Such financial statements, transmitted by the subsidiaries to the Parent Company, for purposes of drawing up the consolidated financial statements, prepared by their relevant corporate bodies, have been examined by the bodies and/or parties in charge of controlling the individual companies, according to the respective regulations, and on the part of the Independent Auditors within the scope of the procedures carried out for the audit of the consolidated financial statements. The Board of Statutory Auditors has, therefore, not extended its examination to these financial statements.

The determination of the scope of consolidation, the choice of the principles of consolidation of the investments and the procedures adopted for this purpose are in agreement with the provisions of Legislative Decree No. 127 of April 9, 1991. The structure of the consolidated financial statements is thus to be considered technically correct and, as a whole, conforms to the specific law.

The Report on Operations adequately describes the results of operations and financial condition, the trend of operations during the course of 2004 and the business outlook of the whole of the companies in the scope of consolidation after the end of the year. The examination to which the Report has been subjected shows its congruity with the consolidated financial statements.

REPORT OF THE INDEPENDENT AUDITORS ON THE FINANCIAL STATEMENTS PURSUANT TO ART. 156 OF LEGISLATIVE DECREE NO. 58 OF FEBRUARY 24, 1998

(Translation from the Original Issued in Italian)

To the Stockholders of
IFI – ISTITUTO FINANZIARIO INDUSTRIALE S.p.A.

1. We have audited the financial statements of IFI – Istituto Finanziario Industriale S.p.A. as of and for the year ended December 31, 2004. These financial statements are the responsibility of the Directors of IFI – Istituto Finanziario Industriale S.p.A. Our responsibility is to express an opinion on these financial statements based on our audit.

2. We conducted our audit in accordance with generally accepted auditing standards in Italy as recommended by the Italian Regulatory Commission for Companies and the Stock Exchange (CONSOB). Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement and are, as a whole, reliable. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the adequacy and the fairness of the accounting principles used and the reasonableness of the estimates made by the Directors. We believe that our audit provides a reasonable basis for our opinion. The audit of the financial statements of certain subsidiaries and affiliates, which statements reflect total assets representing 10% of consolidated total assets and revenues representing 13% of consolidated revenues, is the responsibility of other auditors.

   For the opinion on the prior year's financial statements, which are presented for comparative purposes as required by law, reference should be made to our auditors' report dated May 14, 2004.

3. In our opinion, the financial statements of IFI – Istituto Finanziario Industriale S.p.A. as of and for the year ended December 31, 2004 comply with the Italian statutory provisions governing the criteria for their preparation; accordingly, they give a true and fair view of the Company's financial position and results of operations.

REPORT OF THE INDEPENDENT AUDITORS ON THE CONSOLIDATED FINANCIAL STATEMENTS PURSUANT TO ART. 156 OF LEGISLATIVE DECREE No. 58 OF FEBRUARY 24, 1998

(Translation from the Original Issued in Italian)

To the Stockholders of
IFI – ISTITUTO FINANZIARIO INDUSTRIALE S.p.A.

1. We have audited the consolidated financial statements of IFI – Istituto Finanziario Industriale S.p.A. and subsidiaries (the IFI Group) as of and for the year ended December 31, 2004. These consolidated financial statements are the responsibility of the Directors of IFI – Istituto Finanziario Industriale S.p.A. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

2. We conducted our audit in accordance with generally accepted auditing standards in Italy as recommended by the Italian Regulatory Commission for Companies and the Stock Exchange ("CONSOB"). Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement and are, as a whole, reliable. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the adequacy and the fairness of the accounting principles used and the reasonableness of the estimates made by the Directors. We believe that our audit provides a reasonable basis for our opinion. The audit of the financial statements of certain subsidiaries and affiliates, which statements reflect total assets representing 10% of consolidated total assets and revenues representing 13% of consolidated revenues, is the responsibility of other auditors.

   For the opinion on the prior year's consolidated financial statements, which are presented for comparative purposes as required by law, reference should be made to our auditors' report dated May 14, 2004.

3. In our opinion, the consolidated financial statements of the IFI Group as of and for the year ended December 31, 2004 comply with the Italian statutory provisions governing the criteria for their preparation; accordingly, they give a true and fair view of the Group's financial position and results of operations.

Expiry of term of office

The three-year terms of office of the Board of Directors and the Board of Statutory Auditors, elected by the Stockholders' Meeting on May 27, 2002, expire concurrently with the Stockholders' Meeting for the approval of the financial statements for the year ending December 31, 2004.

The Independent Auditors are appointed for the three-year period 2003-2005.

Corporate Governance

The Chairman and President may legally represent the Company (art. 20 of the bylaws). The Chairman and President, without specific authorization by the Board of Directors, may carry out all acts falling under the corporate business purpose, except as restricted by law.

The Board of Directors has conferred all powers necessary for the management of the Company to the Executive Committee, except those powers which are expressly entrusted to the Board of Directors by law.

The Managing Director and General Manager may legally represent the Company (art. 20 of the bylaws) up to the amounts established by resolution of the Board of Directors on June 11, 2004.

CHAIRMAN'S LETTER

To our shareholders,

The financial statements for 2004 summarize a positive year for IFIL, which has reported a consolidated profit of € 119 million (compared to a loss of € 45 million in 2003) and a profit of € 80 million in the statutory financial statements (compared to € 73 million in 2003). The aim of reducing the level of indebtedness has been achieved and surpassed: at the beginning of the current year, in fact, the consolidated net financial position of the "Holdings System" showed a cash position of more than € 680 million. Furthermore, with the payment of dividends, the promise to remunerate the stockholders was maintained.

To complete the picture, the considerable appreciation in the value of IFIL shares (+35%) since March 2003 – when the new management organization was announced – is indicative of strong growth.

***

The results appear even more significant if we consider the macro-economic scenario in which they were achieved. For the fourth consecutive year, GDP growth in Italy remained low (just over 1%). Unfortunately, alarm over the inadequacy of the Italian manufacturing segment – reported by almost all the observers and also confirmed by the heads of leading national institutions – found regretful confirmation in our balance of trade deficit, something which had not occurred since 1993.

Many well-known factors contributed to the poor performance of the Italian economy: the prevalence of traditional industry with a low level of technology; an industrial fabric with a large number of companies which are too small to expand onto international markets; the inadequacy of our infrastructures; the fact that the percentage of the working population is a small proportion of the whole; the propensity for "safe" but unproductive forms of saving, which subtract resources from the cycle of productive investments. In other words, a series of diverse causes, all of which have the same effect, namely, the relentless erosion of Italy's capacity to compete.

The statement that the problems currently being encountered in Italy are shared by the whole area of the euro is of no comfort. On the contrary, it merely aggravates the serious situation just described. In fact, the gain in value of the Single Currency – both against the U.S. dollar and the Asian currencies – and the weakness of internal demand have limited growth in continental Europe to 1.7%.

In order to find higher rates of growth, we must look elsewhere, starting in the United States, where, in 2004, GDP rose by 4.4%. A factor which highlights the evident capacity of the United States to implement policies oriented towards promoting growth, but which does not dispel the doubts nurtured by many economists, who are concerned by the presence of certain warning signs. These include the twin deficit (the national debt and balance of trade deficit) – which has now assumed alarming proportions – and the persisting weakness of the dollar, which, however, has not succeeded in relaunching floundering American exports.

***

In 2004, the most significant events for our Group were undoubtedly the reorganization of Fiat and the monetization of the investment in Rinascente.

The changes in top management at Fiat led to a far-reaching, incisive wave of corporate restructuring, which involved the whole Group at every level, especially in the Auto sector, where the serious nature of the problems necessitated the utmost attention and commitment. Now, we seem closer to achieving permanent financial and managerial equilibrium. The holding company has defined a clear industrial perimeter based on a more streamlined organization, which will simplify management processes and facilitate interaction among the various sectors.

Fiat Auto has been given a more efficient structure, favoring the responsibilization of management and the ability to make decisions, act and intervene more quickly, while the end of the alliance with General Motors made it possible to generate significant financial inflows and to regain the strategic freedom needed to plan and seize every opportunity in terms of the future growth of the company. Now, not only will the commercial success of the new models be crucial, but, as far as the non-auto sectors are concerned, also the consolidation and strengthening of their respective positions on the market.

The objectives of the relaunch plan – which have already been achieved in part this year, as the positive operating income of the Group shows – will certainly demand a high level of commitment, but the determination and the enthusiasm of the people who work at Fiat today are the best possible prerequisites for overcoming the many problems which still remain.

With the monetization of the investment in Rinascente, an extremely important deal was brought to a successful conclusion. The sale of the food activities to Auchan, followed by the sale of the textile business by auction, which attracted the most important Italian as well as foreign industrial and financial operators, comes at the end of a deep-seated restructuring which involved the entire retail Group and made it possible to exploit the progress achieved by each individual division in the best possible manner. While this deal gives each of the Rinascente Group's businesses the best prospects for development, the particularly significant cash proceeds from the deal will also allow IFIL to cancel its debts and free considerable resources for new investments.

With regard to the Group's business in the field of tourism, there again the changes were many. The monetization of the stake in Club Méditerranée was accompanied by two separate operations, which promise to generate interesting prospects in years to come. The first was the radical strategic reorganization of Alpitour, with the aim of recovering margins of operational efficiency and developing a range of packages focused on the Italian tourist product. The second involved IFIL's participation in the plan to privatize Sviluppo Italia Turismo. The initiative, which also involves Banca Intesa and the Marcegaglia group, will make it possible to improve and expand a series of tourist holiday facilities located in some of the most important vacation resorts in the south of Italy.

Finally, the changeover at the head of Worms coincided with the implementation of a new strategy, the first steps of which were the start of the process to appreciate Permal and the restructuring of industrial operations in the paper sector. Although the latter negatively influenced the end-of-year result, the French holding company reported a considerable gain in the value of its shares, which are listed on the Paris stock exchange.

***

The positive results achieved by IFIL in 2004 should find confirmation in the current year, thus enabling us to assure our stockholders of a balanced, constant return, despite the difficult macro-economic situation forecast for 2005.

The studies published by the most highly-respected economic institutes in the eurozone – where most of our subsidiaries operate – do not leave much room for optimism. The recent review of the European Stability Pact constitutes an important step towards the primary objective of growth, even though the performance produced by economic models that are successful today, as in China and the United States, remains a target that will be difficult to achieve.

However, the efforts made by the managements of our subsidiaries and the expansion strategy initiated by IFIL a year ago enable us to face the immediate future with reasonable optimism.

***

In the name of the Board of Directors I would like to thank our Stockholders for the trust they have placed in us, the Statutory Auditors and Independent Auditors for their profound commitment, and the Executive and all the Group's Employees for their continued efforts in a year fraught with difficulties.

Gianluigi Gabetti

THE INVESTMENT PORTFOLIO

IFIL Investments S.p.A. is the investment company of the Group headed by Giovanni Agnelli e C. S.a.p.az. (through IFI – Istituto Finanziario Industriale S.p.A. which holds approximately 63% of its ordinary capital stock). It commands two distinctive areas of operations: the active management of the controlling investment in Fiat and the dynamic management of the other holdings.

Fiat, controlled with a holding of more than 30% of ordinary and preferred capital stock, operates in the national and international automotive market as a manufacturer and distributor of automobiles (Fiat Auto, Ferrari and Maserati), agricultural and construction equipment (CNH Global), commercial vehicles (Iveco), automotive components for these vehicles and the supply of related services (Magneti Marelli, Comau and Teksid), as well as publishing and communications (Itedi) and services for corporations (Business Solutions).

The other holdings which comprise the dynamically managed diversified portfolio are listed below.

Worms & Cie (52.96% holding) is a French-listed holding company with a portfolio comprising the following major investments:

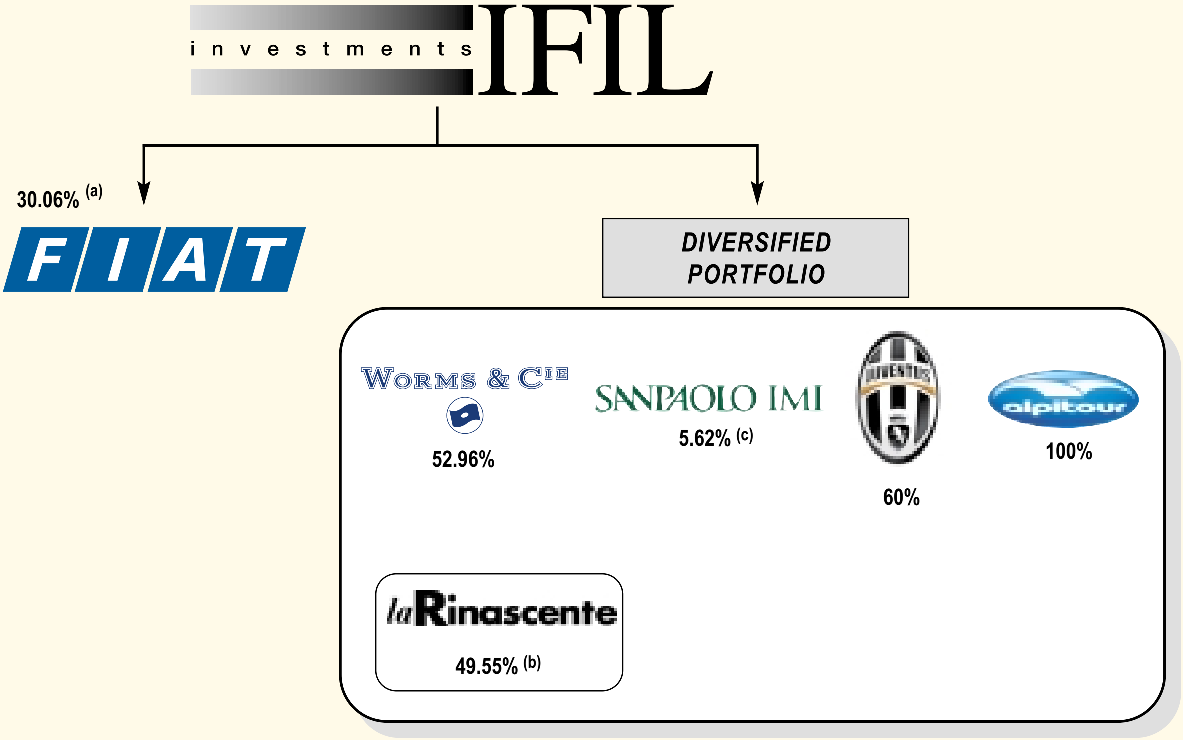
- ArjoWiggins (100% holding), the world leader in the manufacture of high value-added paper products and, in Europe, leader in the manufacture of carbonless paper (ArjoWiggins absorbed Carbonless Europe as from January 1, 2004);
- Antalis (100% holding), the leading European group in the distribution of paper products for printing and writing;
- Permal Group (77% holding), one of the leaders in the management of investment funds;
- SGS (23.8% holding), a company listed on the Swiss stock exchange and leader in the verification, inspection and certification of product and service quality;

SANPAOLO IMI (5.62% holding by IFIL of ordinary capital stock) is a leading national banking group with over 3,000 branches throughout Italy;

Alpitour (100% holding) is the leading group in Italian tourism;

Juventus Football Club (60% holding by IFIL) is a company with more than one hundred years of history and an enviable record gained at various national and international sports events.

The following chart is updated to the end of March 2005 and presents the simplified structure of the investment portfolio. Percentage holdings refer to ordinary capital stock:



(a) IFIL also holds 30.09% of preferred capital stock.
(b) Subject of the contract of sale to Tamerice S.r.l. dated March 13, 2005. The percentage is calculated on capital stock.
(c) Equal to 4.45% of capital stock.

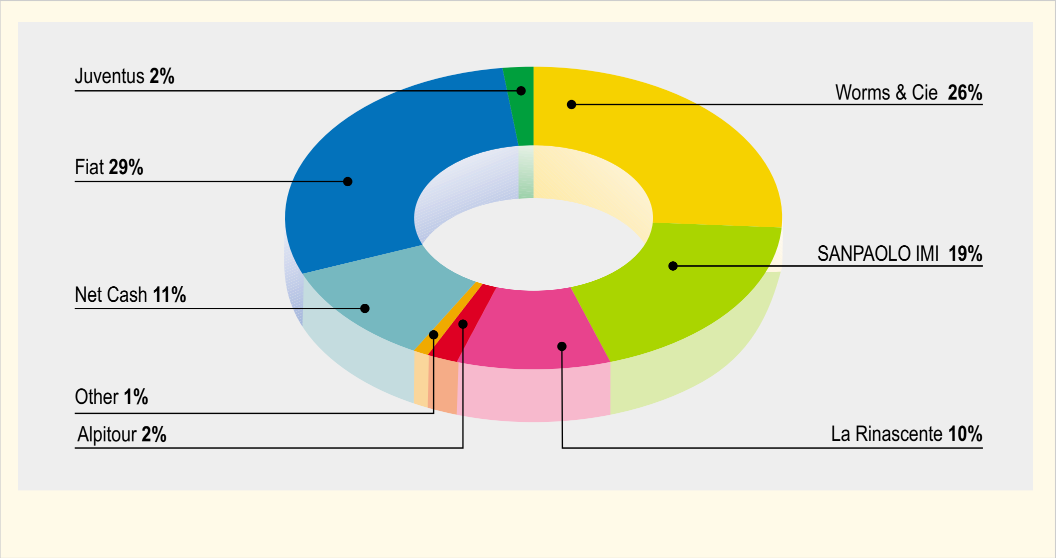
The following charts show the composition of the investment portfolio at current values and the change in its value over the last 10 years.

NET ASSET VALUE

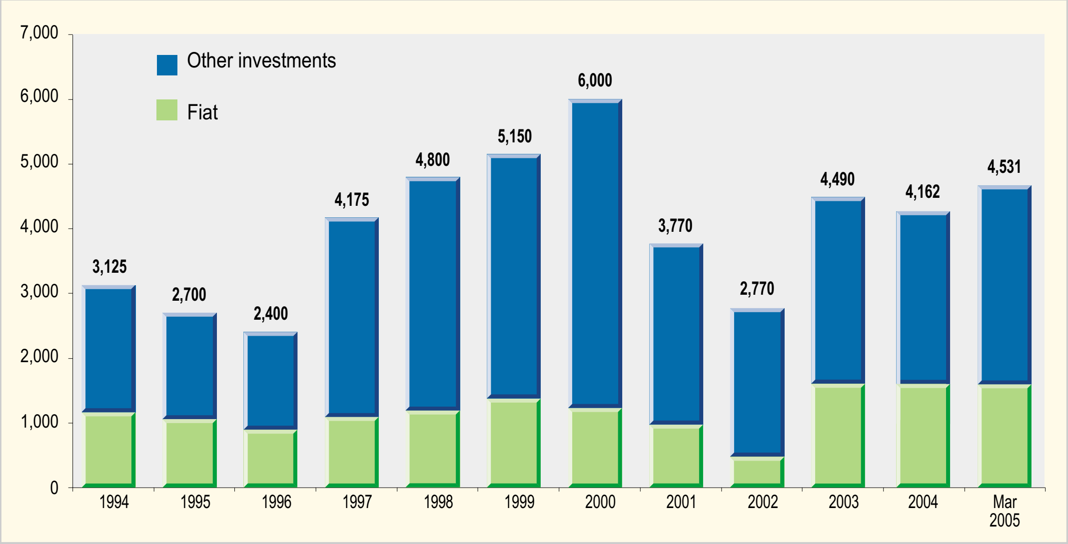
At the end of March 2005, the Net Asset Value is equal to € 5,067 million and is composed as follows:

€ in millions	
Investment portfolio	4,531
Net cash	536
Net asset value	**5,067**

As regards the investment portfolio, the listed equity holdings held at the end of March 2005 are valued at the closing stock market prices on March 29, 2005 and the investment in La Rinascente is valued on the basis of the contract of sale to Tamerice S.r.l. dated March 13, 2005.



PORTFOLIO CURRENT VALUE - € 4,531 MILLION (a)



(a) The current value of the portfolio is calculated consistently with the change in the accounting representation.

KEY OPERATING AND FINANCIAL DATA

The key results of the Group and IFIL S.p.A. are presented as follows.

IFIL GROUP

(a) Maximum dividend payment to be put forward in a motion to the Stockholders' Meeting convened for the approval of the financial statements for the year ended December 31, 2004.

(b) € 3 million (€ 0.0827 per savings share) has also been paid out for the balance of the preference dividends referring to 2002.

STOCKHOLDERS AND THE STOCK MARKET

Capital stock

At December 31, 2004, IFIL S.p.A.'s capital stock, fully subscribed to and paid-in, amounts to € 1,075,195,737 and is composed of 1,037,812,717 ordinary shares and 37,383,020 savings shares all with a par value of € 1 each.

The savings shares carry no voting rights and can either be registered or bearer shares, as elected by the stockholders. They carry the right to a preference dividend of 8.27% of their par value and to a total dividend higher than that of ordinary shares by 2.07% of the same par value.

The directors have the right, for a period of five years from the resolution passed on May 14, 2003, to increase, at one or more times, also in divisible form, the capital stock up to a maximum of € 1,500 million and to issue, at one or more times, convertible bonds, up to the same figure but for amounts which, each time, do not exceed the limits established by law.

The directors also have the right, for a period of five years from the resolution passed on May 25, 2001, to increase, at one or more times, the capital stock, excluding option rights, for a maximum amount of € 4 million, through the issue of a maximum of 4 million ordinary and/or savings shares, with a par value of € 1 each, to be offered for subscription to the employees of the Company or its subsidiaries or the parent companies or the subsidiaries of the same parent companies.
By the power vested in it above, on February 7, 2005, the Board of Directors voted to increase capital stock to service a stock option plan for the managers of the Company and its parent company.
The transaction will involve the issue of 800,000 IFIL ordinary shares (0.07% of capital stock) of par value € 1, which will be subscribed in cash by the end of April 2005 at the unit price of € 1.85 for a total of € 1,480,000. Following this increase, IFIL's capital stock will amount to € 1,075,995,737 and will consist of 1,038,612,717 ordinary shares and 37,383,020 savings shares, all with a par value of € 1.

Stockholders

IFIL has approximately 30,000 stockholders at December 31, 2004.
The controlling stockholder, IFI – Istituto Finanziario Industriale S.p.A., held 62.03% of ordinary capital stock; at the end of March 2005, this holding increased to approximately 63%.

At December 31, 2004, other major stockholders, indicated below, represent 18.84% of ordinary capital stock:

Major stockholders at December 31, 2004		
Stockholders	**%**	**Ordinary shares**
Morgan Stanley & Co. Int. - London	3.50	36,337,878
Morgan Stanley & Co. Ic. Equities - New York	2.40	24,918,469
The Public Institution for Social Security	2.56	26,576,104
Egerton Capital Ltd	2.17	22,474,427
Dresdner Kleinwort Wasserstein Sec. Ltd	1.70	17,620,000
HSBC Investment Bank PLC	1.45	15,003,925
Findim Group SA	1.29	13,353,531
Deutsche Bank A.G.	1.83	18,990,701
Banca d'Italia	1.01	10,446,584
Generali Group	0.93	9,635,720
	18.84	***195,357,339***

Treasury stock

At the end of March 2005, IFIL holds 14,596,040 ordinary shares of treasury stock (1.41% of the class of stock) including 810,262 shares held through the subsidiary Soiem.

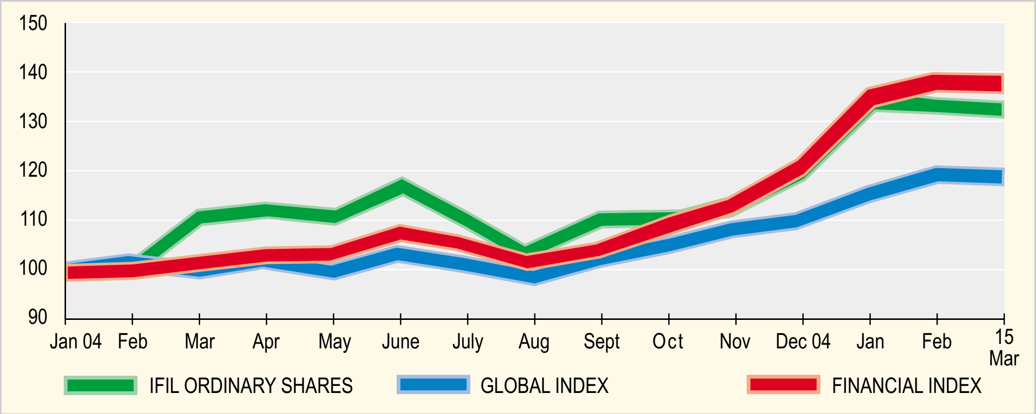
On March 30, 2005, the Board of Directors voted to put forward a motion to the Ordinary Stockholders' Meeting to renew the resolution for the authorization of the buyback of treasury stock for a maximum of 90 million IFIL ordinary shares and/or savings shares, setting aside a total of € 300 million.

Stock performance

Stock performance by IFIL ordinary shares during 2004 was positive and consistently higher than the Global Index. This was due to the overall appreciation of the value of the Company's investment holdings and a significant consolidated net cash financial position reached by the "Holdings System" (mainly as a result of the divestiture of La Rinascente's food business). The bullish trend continued also into the first part of 2005.

IFIL ordinary stock thus gained 24.6% for the entire year (including the distribution of dividends) against a positive 19.9% performance by the Global Index.

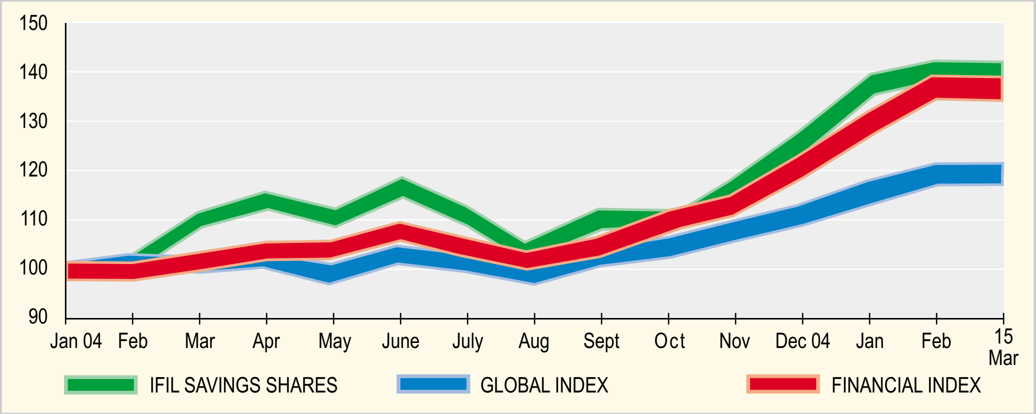
PERFORMANCE BY IFIL ORDINARY SHARES COMPARED TO COMIT MARKET INDEXES (a)



In 2004, IFIL savings shares performed better on average than IFIL ordinary shares and the Global Index. In fact, savings shares benefited from the prospects of the payment of the preference dividend relating to 2002 and 2003, in addition to the generalized inclination of the market toward defensive stocks with high dividends.

During 2004, savings shares showed a positive 38.5% performance.

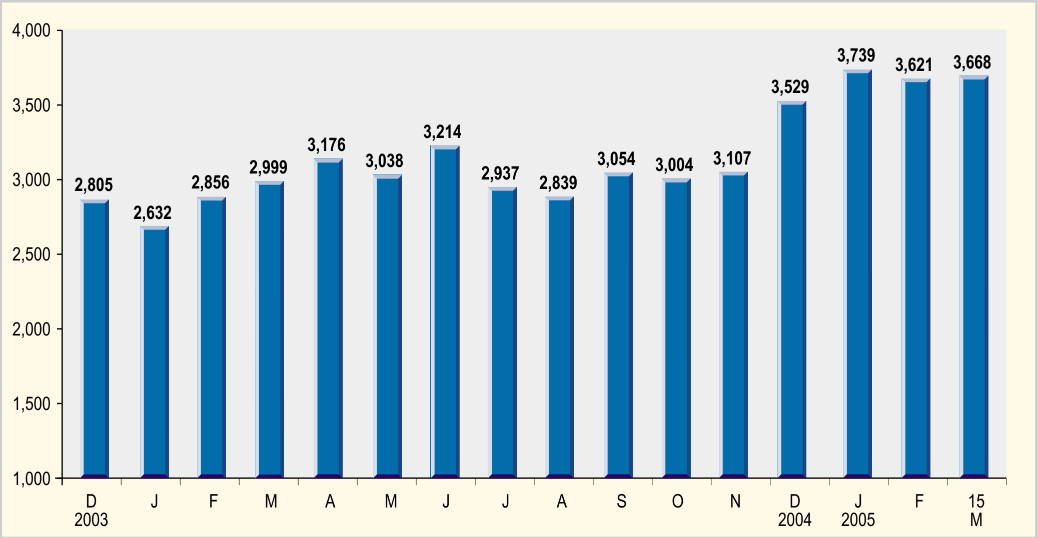
PERFORMANCE BY IFIL SAVINGS SHARES COMPARED TO COMIT MARKET INDEXES (a)



(a) The charts are based on average monthly stock market data.

During 2004, IFIL's capitalization rose from € 2,805 million to € 3,529 million. The increase of € 724 million, as commented earlier, can principally be traced to the increase in the value of the Company's investment holdings and the excellent outcome of the divestitures that took place, and confirms the solid base of the economic and capital structure of the IFIL Group.

CAPITALIZATION DECEMBER 2003 / MARCH 2005 – IFIL ordinary shares – IFIL savings shares (% in millions)



During 2004, the value and volumes of IFIL ordinary shares traded grew still further. The increment in the volumes of ordinary shares traded (liquidity) is a confirmation of having reached one of the objectives of the 2003 Reorganization Plan.

The reduction of the volumes and value of savings shares traded in comparison with 2003 is due to the conversion of savings shares to ordinary shares carried out in 2003.

IFIL's ordinary stock is listed on the MIDEX for mid-cap companies.

MARKET INFORMATION	**2005 (1/1-3/15)**	**2004**	2003	2002

The market prices of 2003 and prior years have been adjusted on the basis of the capital stock increase in July 2003.

FINANCIAL COMMUNICATIONS AND INVESTOR RELATIONS

Again in 2004, IFIL devoted special attention to relations with stockholders, institutional investors, financial analysts and Italian and foreign economic journalists.

In particular:

- more than 1,000 copies (in Italian and English) of the annual report, the first-half report and the quarterly reports have been distributed. These reports are sent, on request, to stockholders, and are also available on the corporate website at www.ifil.it;
- intensive contacts have been established through individual meetings with Italian and foreign institutional investors and financial analysts;
- a new version of the corporate website has been designed to better meet the information needs of investors, analysts and journalists;
- far-reaching, comprehensive information has been circulated through the Italian and foreign economic and financial press.

The corporate service functions in charge of communications and external relations are the following:

MAJOR EVENTS IN 2004

Purchase of 9.53% of Eurofind capital stock
In January, the subsidiary Ifil Investissements purchased 9.53% of Eurofind capital stock from Mediobanca for an investment of € 116.1 million.
After this transaction, Eurofind's capital stock was held equally by the IFIL Group (through Ifil Investissements) and the Auchan Group.

Process for the monetization of the investment in the Rinascente Group
In October, La Rinascente finalized the partial proportional spin-off of the textile sector (Department Stores and Upim) to a new beneficiary company which took the name of La Rinascente.
The other activity sectors, including the Auchan hypermarkets, the SMA supermarkets, the 50% interest in SIB S.p.A. (do-it-yourself), the 51% interest in Gallerie Commerciali Italia S.p.A. and the 50% interest in Fiordaliso S.p.A. remained under the control of the company which had effected the spin-off and which took the name of Società Italiana Distribuzione Moderna (SIDM).

In December, after the proportional total spin-off of Eurofind, two new Luxembourg-registered companies were set up named Eurofind Food and Eurofind Textile, both jointly controlled by Ifil Investissements and the Auchan Group. As a result of this transaction, Eurofind Food and Eurofind Textile came to hold, respectively, 99.09% of the capital stock of SIDM and 99.09% of the capital stock of La Rinascente (companies that, in their turn, came from the above-described spin-off of La Rinascente).

In the second half of December, after obtaining authorization from the competent antitrust authority, Ifil Investissements sold 50% of the capital stock of Eurofind Food to the Auchan Group for € 1,062.9 million (including € 810.5 million of cash proceeds and € 252.4 million deferred until mid-2005) with a gain on consolidation of € 586.3 million.

Sale of the investment in Club Méditerranée
In October, after having obtained approval from the competent antitrust authorities, the subsidiary Mediterranean Capital (ex-Ifil Capital) and Exor Group sold the investments in Club Méditerranée capital stock to the Accor Group. Specifically, Mediterranean Capital sold 1,233,691 Club Méditerranée shares (6.37% of capital stock) to Accor at the price of € 55.5 million (€ 45 per share) with a gain on consolidation of € 24.4 million.

The Accor Group is contractually obliged to pay a possible price adjustment, over the next two years, up to a maximum of € 12.3 million (€ 10 per share), in relation to Club Méditerranée's future economic and financial performance.

In conjunction with this deal, in June, the subsidiary Mediterranean Capital had sold 0.82% of Club Méditerranée capital stock to Exor Group for € 6.1 million with a gain on consolidation of € 2 million.

Transactions regarding NHT
In January, Ifil Investissements purchased the remaining 10% of NHT New Holding for Tourism capital stock from the TUI Group for an outlay of € 46.3 million. As part of this transaction, NHT also acquired the remaining 50% of the capital stock of Neos from the TUI Group for an investment of € 2.7 million.

In June, NHT subscribed to the capital stock increase by Alpitour (100%-controlled) for a total of € 17.8 million, of which € 6.5 million was in cash and € 11.3 million by contribution of the investments held in Welcome Travel Group and in Neos. Following this transaction, Alpitour took over the role of holding company of the tourism sector in that, in addition to directly carrying out its tour operator business, it holds control of all the other sectors connected with the tourism business (hotel management, distribution, aviation and incoming).

Having fulfilled its function, NHT (100%-owned by Ifil Investissements and Ifil Finance) will be put into a wind-up.

Agreement relating to Sviluppo Italia Turismo
In December, Banca Intesa S.p.A., the IFIL Group and Marcegaglia S.p.A. sealed an agreement for the purchase of 49% of Sviluppo Italia Turismo (SIT) capital stock from Sviluppo Italia S.p.A..

The entry of the three private stockholders in the shareholder base of SIT will take place through the company Turismo&Immobiliare (in which the three own equal stakes) which will purchase shares and subscribe to a SIT capital stock increase for a total outlay of € 76.4 million; IFIL's share will be equal to approximately € 25.5 million. It is also anticipated that the three stockholders may possibly acquire control of SIT's stock by 2009.

Once approval is obtained from the antitrust authority in March, the agreement will be finalized in April.

The alliance will allow SIT to improve and build up its structures so that it can expand its packages on the market and increase its tourist flows; the first concrete step will be the start of an investment program in Apulia, Calabria and Sicily.

IFIL's new organizations in the United States of America and in Asia
For the purpose of contributing to the search for new investment opportunities, during the first half IFIL set up new organizations in the United States (in February) and Asia (in June), with offices, respectively, in New York and Hong Kong. Thanks to its positioning in two of the most interesting international financial centers and with its highly-qualified professional management staff, the two organizations – which will operate in close coordination with IFIL's offices in Turin – could significantly boost the opportunities of creating economic value for the company.
With similar objectives in mind, at the end of June, Ifil Investissements purchased 100% of the capital stock of Sadco, with head offices in Switzerland, from Exor Group, for an investment of € 1.4 million, corresponding to its net equity value.

Transactions involving treasury stock recorded in current assets
The following transactions involving IFIL treasury stock recorded in current assets took place during 2004:

		Carrying value	
	Number of shares	Per share (€)	Total (€ mn)
Balance at December 31, 2003	700,000	2.42	1.7
Purchases	3,188,324	2.91	9.3
Sales	1,850,000	2.91	(5.4)
Adjustments	-	-	(0.1)
Balance at December 31, 2004	**2,038,324**	**2.70**	**5.5**

The sales of treasury stock did not generate significant gains (approximately € 15,000).

532,000 shares were destined to service stock option plans for directors and, for that reason, their carrying value has been adjusted by € 0.1 million to the grant price (equal to € 2.28 per share).

At December 31, 2004, the company holds a total of 13,155,472 IFIL ordinary shares of which 11,117,148 shares are recorded in financial fixed assets and 2,038,324 in current assets. Treasury stock represents a total of 1.27% of the class of stock and 1.22% of capital stock. The carrying value of treasury stock is € 47.2 million, averaging € 3.59 per share.

At December 31, 2004, the subsidiary Soiem holds 810,262 IFIL ordinary shares recorded in financial fixed assets for € 2.8 million (€ 3.41 per share). Such shares represent 0.08% of the class of stock and 0.078% of the capital stock of IFIL.

ANALYSIS OF THE IFIL GROUP CONDENSED CONSOLIDATED RESULTS

IFIL holds some important investments through Dutch and Luxembourg holding companies. This structure is an outgrowth of the Group's strategy to globalize investments and secure strategic agreements with leading foreign partners in the sectors of investment. Moreover, IFIL controls two companies incorporated under Irish law operating with the aim of optimizing the management of the financial resources of the Group, and Soiem, a services company. Furthermore, in 2004, organizations were set up in New York (Ifil Investments USA) and Hong Kong (Ifil Asia) and the company Sadco was purchased (with headquarters in Switzerland). Such structures will contribute to investment activities.

The aggregate of these companies constitutes the so-called "Holdings System".

In order to facilitate the analysis of the financial position and results of operations of the IFIL Group, a **condensed consolidated balance sheet** and a **condensed consolidated statement of operations** have been prepared wherein the financial holding companies and Soiem have been consolidated line-by-line or proportionally while the investments in the other subsidiaries and associated companies have been accounted for using the equity method.

In detail, the scope of consolidation is as follows:

		% holding in capital stock outstanding	
		12/31/2004	12/31/2003
HOLDINGS SYSTEM	**Consolidated line-by-line**		
	- IFIL Investments S.p.A.	**-**	-
	- Ifil Investment Holding N.V. (Netherlands)	**100**	100
	- Ifil Investissements S.A. (Luxembourg)	**100**	100
	- Mediterranean Capital B.V., ex-Ifil Capital B.V., (Netherlands) (a)	**100**	100
	- Ifil Finance B.V. (Netherlands) (a)	**100**	100

	- IFIL New Business S.r.l. (Italy) (b)	**100**	100
	- IFIL Investments USA (c)	**100**	-
	- IFIL Asia (Hong Kong)	**100**	-
	- Sadco S.A. (Switzerland)	**100**	-
	- NHT New Holding for Tourism S.A. (Luxembourg) (a)	**100**	-
	Consolidated proportionally		
	- Eurofind S.A. (Luxembourg) (d)	**-**	40.47
	- Eurofind Textile S.A. (Luxembourg) (d)	**50**	-
	- Eufin Investments Unlimited (United Kingdom)	**50**	40.47
OPERATING COMPANIES	**Accounted for using the equity method**		
	- Fiat Group	**27.62**	27.62
	- Worms & Cie Group	**52.96**	53.07
	- Rinascente Group	**-**	40.10
	- La Rinascente (d)	**49.55**	-
	- Alpitour Group (NHT Group in 2003)	**100**	90
	- Juventus Football Club S.p.A.	**61.69**	62.01

(a) Companies put or to be put into a wind-up.
(b) Dormant company.
(c) This line groups the companies set up in March 2004 (Ifil USA Inc., Ifil Capital Partners L.P., Ifil America L.P. and Ifil Investments LLC).
(d) Following the proportional total spin-off of Eurofind, the IFIL Group now holds 50% of the capital stock of Eurofind Textile (which holds 99.09% of the outstanding capital stock of La Rinascente, the beneficiary company of the spin-off of the Rinascente Group textile businesses, Department Stores and Upim), as well as 50% of the capital stock of Eurofind Food (sold to the Auchan Group in December 2004).

At the end of 2004, following the contribution of the controlling interests (100%) in Welcome Travel Group and in Neos to Alpitour, NHT New Holding for Tourism only holds 100% of the capital stock of Alpitour. Having fulfilled its function as the operating holding company of the tourism sector, in 2004, the financial statements of NHT have been consolidated line-by-line in the "Holdings System". In 2003, NHT had been accounted for using the equity method applied to its consolidated financial statements.

Condensed consolidated result and condensed consolidated statement of operations

The year 2004 shows a return to a profit position by the IFIL Group with a consolidated net income of € 119 million, after closing two years with a loss (€ 45 million in 2003 and € 367 million in 2002).

The main captions of the condensed consolidated statement of operations are examined in the following paragraphs.

The **Group's share of earnings (losses) of companies** accounted for using the equity method amounts to losses of € 402 million (losses of € 49.7 million in 2003). The negative change of € 352.3 million is essentially due to the Fiat Group (-€ 177.3 million, mainly as a result of lower positive consolidation adjustments that are not compensated by the reduction in the consolidated loss of the Fiat Group), the Worms & Cie Group (-€ 100.9 million) and the companies which make up the Rinascente Group (-€ 82.7 million). The results of the other holdings show a net positive variation of € 8.6 million. The abovementioned changes include consolidation adjustments.

Dividends from other holdings amount to € 27.4 million, entirely in reference to dividends received from SANPAOLO IMI.
In 2003, the dividends received from the same bank had totaled € 21.2 million.

Gains, net, total € 611.3 million and refer to the sales of 50% of the capital stock of Eurofind Food (+€ 586.3 million) and 7.2% of the capital stock of Club Méditerranée (+€ 26.4 million), as well as other minor transactions and writedowns (-€ 1.4 million, net). In 2003, the gains of € 25 million had basically referred to the sale of 25% of the capital stock of Sifalberghi.

Amortization of differences on consolidation amount to € 81.4 million (€ 13.7 million in 2003) and include extraordinary amortization charges to eliminate the residual balances referring to the Alpitour Group (€ 36.5 million) and the investment in Juventus (€ 33.5 million).

Financial expenses, net, total € 20.9 million (€ 23.6 million in 2003) and decreased by € 2.7 million mainly as a result of the trend in indebtedness during the year.

General expenses, net, amount to € 18.7 million. The increase of € 5.7 million compared to the year 2003 (€ 13 million) is due to higher personnel costs of the parent company for € 1.9 million (due both to an increase in the average number of staff and provisions for estimated monetary incentives relating to 2004), as well as the line-by-line consolidation of the companies Sadco, Ifil USA and Ifil Asia.

Other expenses, net, amount to € 7 million (€ 6.1 million in 2003) and include the release of reserves in excess of requirements set aside in prior years (+€ 3 million), the amortization of the expenses relating to the IFIL capital stock increases in 2003 (-€ 2.2 million), compensation voted on behalf of the directors of Eurofind (-€ 1.5 million), legal consulting fees regarding extraordinary transactions and pending litigation (-€ 3.3 million), as well as sundry other expenses, net (-€ 3 million).

Deferred taxes amount to € 12.4 million and principally include the release of excess deferred income taxes of € 12.3 million set aside in prior years.

The **condensed consolidated statement of operations** and an analysis of the most important captions are presented below.

(a) Figure did not include the share of the loss for the first quarter of 2003, equal to € 110.8 million, referring to the stock subsequently conferred by IFI.
(b) Consolidated result for the period 1/1-9/30/2004, prior to the sale.
(c) Consolidated result for 2004 of the beneficiary company of the La Rinascente spin-off of the textile activities (Department Stores and Upim).
(d) Year coincides with the period November 1 – October 31.
(e) Result included the net income of the Alpitour Group (+€ 0.7 million), the amortization of differences on consolidation by NHT in respect of Alpitour and Welcome Travel Group (-€ 8.8 million), the results of Welcome Travel Group (-€ 2 million) and Neos (+€ 0.5 million) and the consolidation adjustments (-€ 1.6 million).
(f) Result for the accounting period 1/1-12/31/2004 .
(g) Figure did not include the share of the loss for the first calendar quarter of 2003, equal to € 4.5 million, recorded by IFI since it was prior to the contribution to IFIL.

At December 31, 2004, consolidation adjustments amount to € 72.1 million (€ 236.5 million in 2003). They refer to:

€ in millions	**12/31/2004**	12/31/2003	Change
- the use of the remaining "Consolidation reserve for risks and future expenses" for IFIL's share of Fiat Group's loss for the year 2004 referring to the investment in Fiat conferred by IFI in 2003 (17.039%)	**69.6**	207.5	(137.9)
- Worms & Cie Group's result for:			
- reversal of the amortization of the difference on consolidation referring to Permal Group, already completely amortized at IFIL level	**1.6**	1.5	0.1
- gains of the sale of shares of Accor (in 2004) and Groupe Danone (in 2003)	**(0.1)**	8.0	(8.1)
- Alpitour Group's result for gains realized in 2004 on the property, plant and equipment sold to third parties	**1.0**	-	1.0
- Fiat Group's result for the gain from the dilution generated by the discharge of Fiat treasury stock held by Toro Assicurazioni, sold by Fiat	**-**	11.8	(11.8)
- NHT Group's result for the reversal of 90% of the amortization of the difference on consolidation referring to Alpitour, already recorded in the past at IFIL level, as a reduction of the consolidation reserve booked in consolidated stockholders' equity	**-**	7.8	(7.8)
- other adjustments	**-**	(0.1)	0.1
Total	**72.1**	236.5	(164.4)

Comments on the operating performance of the investment holdings are presented later in the report.

Amortization of differences on consolidation

	Balance at	Change in the year 2004				**Balance at**
€ in millions	12/31/2003	Increase	Decrease	Ord. amort.	Accel. amort.	**12/31/2004**
Rinascente Group (a)	155.9	25.9 (b)	(151.4) (c)	(8.5)		**21.9**
Juventus Football Club	36.4			(2.9)	(33.5)	**0.0**
NHT/Alpitour	0.0	36.5			(36.5)	**0.0**
Total	192.3	62.4	(151.4)	(11.4)	(70.0)	**21.9**

(a) Amortized over 20 years.
(b) Originating from the purchase of 9.53% of Eurofind capital stock.
(c) Originating from the sale of 50% of Eurofind Food.

In 2003, the contribution of the investment in Juventus Football Club by the parent company IFI was booked at the economic value attributed to the investment of € 136.7 million. A comparison of this value and the underlying share of stockholders' equity at March 31, 2003 (€ 53.5 million) produced a difference on consolidation for originally € 83.2 million. Subsequently, a part of that difference, equal to € 42.8 million, was deducted from the consolidation reserve which arose during the same year, as allowed by law. At the end of 2004, the remaining difference on consolidation relating to Juventus Football Club (as a result of ordinary amortization and the reduction due to subsequent sales of shares) had decreased to € 33.5 million. When the financial statements were closed, a charge was made to completely amortize this residual balance in order to correctly represent this item, also in consideration of the negative performance of ordinary operations in 2003/2004 and forecasts for a loss in the current year.

The difference on consolidation which originated in 2004 upon the purchase of the capital stock of NHT was amortized at the end of the first quarter of 2004 for € 23.6 million since it could not be allocated. At the end of 2004, taking into account that on consolidation the IFIL Group had in the past deducted the difference on consolidation on 90% of the investment in the Alpitour Group from the consolidation reserve, a charge was then made to completely amortize the remaining amount of € 12.9 million.

Total				**671.8**		**724.0**		**768.6**

(a) Net of the writedown of € 1.1 million made in 2004.
(b) Including 810,262 IFIL ordinary shares held by the subsidiary Soiem.
(c) Net of the writedowns of € 19.3 million made in previous years.

Compared to the average stock market prices for the period March 1-15, 2005 (€ 3.39), IFIL ordinary shares show an unrealized loss of € 4.1 million.

The per share carrying value of IFIL ordinary shares (€ 3.73) is basically in line with the per share value of the consolidated stockholders' equity of the IFIL Group at December 31, 2004 (€ 3.64).

IFIL ordinary treasury stock held in current assets

These refer to 2,038,324 IFIL ordinary treasury stock (of which 532,000 shares are used to service stock option plans) carried at € 5.5 million (€ 2.7 per share).

Compared to the average stock market prices for the period March 1-15, 2005 (€ 3.39), the shares that are not destined for stock option plans show an unrealized gain of € 0.8 million.

Stockholders' equity - Group

At December 31, 2004, the stockholders' equity - Group, amounts to € 3,916.8 million (€ 3,953.9 million at the end of 2003). The negative change of € 37.1 million is due to the following:

€ in millions		
Stockholders' equity - Group at December 31, 2003	**3,953.9**	
Dividends paid out by IFIL S.p.A.	(69.7)	(a)
Share of translation adjustments in the stockholders' equity of companies accounted for using the equity method (-€ 54.9 million) and other changes, net (-€ 31.5 million)	(86.4)	
Consolidated net income - Group	119.0	
Net change during the year	**(37.1)**	
Stockholders' equity - Group at December 31, 2004	**3,916.8**	

(a) Net of intragroup dividends of € 0.1 million.

Reserve for employee severance indemnities and reserves for risks and charges

These amount to € 12.1 million and decreased by € 87.5 million compared to the balance at the end of 2003 (€ 99.6 million). The reduction is due to the utilization of the residual consolidation reserve for risks and future expenses (-€ 69.6 million), the release of reserves for deferred taxes in excess of requirements set aside in prior years (-€ 17.2 million) and sundry risks (-€ 3 million) and, lastly, provisions made during the year (+€ 2.3 million).

Consolidated net financial position of the "Holdings System"

The consolidated net financial position of the "Holdings System" refers to companies consolidated line-by-line and proportionally and shows a net liquidity position at December 31, 2004 of € 683.2 million (a net indebtedness position of € 234.7 million at the end of 2003). The composition is detailed as follows:

	12/31/2004			12/31/2003		
€ in millions	**Short-term**	**Medium/ long-term**	**Total**	Short-term	Medium/ long-term	Total
Cash and short-term investments	**1,051.1**	**0.0**	**1,051.1**	434.6	0.0	434.6
Receivable from Auchan Group	**252.4**	**0.0**	**252.4**	0.0	0.0	0.0

Consolidated net financial position (line-by-line consolidation)	**(5,104)**	(4,230)	(874)

(a) Balances not included in the IFIL Group consolidated financial statements (line-by-line consolidation) since they refer to Companies accounted for using the equity method (consolidated, instead, proportionally in the "Holdings System").

Research and development costs

In 2004, research and development costs expensed directly to income during the year total € 1,827 million, including € 1,810 million relative to the Fiat Group (€ 1,747 million in 2003) and € 17 million relative to the Worms & Cie Group (€ 16 million in 2003).

ANALYSIS OF THE RESULTS OF THE IFIL S.p.A. STATUTORY FINANCIAL STATEMENTS

Net income for the year and condensed statement of operations
The net income of IFIL S.p.A. in 2004 is € 80.2 million, with an increase of € 7.5 million (+10.3%) compared to € 72.7 million in 2003.

The main captions of the statement of operations are described in the following paragraphs.

Dividends received from holdings amount to € 301.4 million (€ 76.8 million in 2003). The increase of € 224.6 million is due to higher dividends from the subsidiary Ifil Investissements (+€ 223.9 million) and from SANPAOLO IMI (+€ 6.3 million) and the absence of dividends from Ifil Investment Holding (-€ 5 million) and Sifalberghi, sold in August 2003 (-€ 0.6 million).
In December 2004, the subsidiary Ifil Investissements voted dividends for IFIL amounting to € 253.6 million, received entirely in 2005.

Gains (€ 0.5 million) derive from the sale of 386,855 Juventus Football Club shares (0.32% of capital stock).

Writedowns (€ 185.6 million) refer to the adjustment of the carrying value of Fiat shares and warrants (€ 160.5 million for ordinary shares, € 23.9 million for preferred shares and € 1.1 million for warrants) on the basis of the average stock market prices in the second half of 2004, as well as the adjustment of the carrying value of IFIL ordinary shares designated for stock option plans, to the grant price (€ 0.1 million).

Financial expenses, net, amount to € 26.1 million in 2004 and decreased by € 2.5 million mainly in connection with the trend of indebtedness during the year.

General expenses, net, rose from € 11.5 million to € 13.4 million principally as a result of higher personnel costs due to an increase in the average number of staff (from 38 to 42) and the provision booked for estimated monetary incentives based on the 2004 results.

Other expenses, net, equal to € 1.5 million, include the amortization of the expenses related to the capital stock increases effected in 2003 (€ 2.2 million), the expenses connected with extraordinary consulting charges and pending litigation (€ 0.7 million), extraordinary expenses (to be paid over several years) in connection with recourse to the “Solidarity fund for the support of earnings” (€ 0.4 million), net of costs incurred for the tender offer of La Rinascente recharged to the subsidiary Ifil Investissements (€ 1.1 million) and the release of taxes in excess of requirements set aside in prior years (€ 0.7 million).

With regard to **taxes,** the taxable income calculated in accordance with existing tax laws does not generate current income taxes for the year 2004 and results in the release of € 4.9 million of deferred taxes in excess of requirements set aside in prior years.

Statement of operations – condensed

Total liabilities and stockholders' equity	**3,832.2**	**100.0**	3,884.4	100.0	(52.2)

The principal equity and financial captions are analyzed in the following tables.

Financial fixed assets

€ in millions	**12/31/2004**	12/31/2003	Change
Subsidiaries			
Fiat S.p.A. (ordinary shares)	**1,440.2**	1,600.7	(160.5)
Fiat S.p.A. (ordinary share warrants 2007)	**2.5**	3.6	(1.1)
Fiat S.p.A. (preferred shares)	**123.0**	146.9	(23.9)
	1,565.7	1,751.2	(185.5)
Ifil Investissements S.A.	**1,260.3**	1,356.0	(95.7)
Ifil Investment Holding N.V.	**162.8**	162.8	0.0
Juventus Football Club S.p.A.	**11.6**	11.7	(0.1)
Soiem S.p.A.	**12.7**	21.7	(9.0)
Ifil New Business S.r.l.	**-**	-	0.0
	3,013.1	3,303.4	(290.3)
Other companies - SANPAOLO IMI S.p.A. (ordinary shares)	**463.2**	463.2	0.0
Total investments	**3,476.3**	3,766.6	(290.3)
Treasury stock - IFIL ordinary shares	**41.7**	41.7	0.0
Total financial fixed assets	**3,518.0**	3,808.3	(290.3)

The net decrease in financial fixed assets of € 290.3 million is the result of the following movements:

€ in millions	
Financial fixed assets at December 31, 2003	**3,808.3**
Partial reimbursement of additional paid-in capital by Ifil Investissements	(95.7)
Reimbursement from Soiem following reduction in share capital	(9.1)
Absorption of Soiem loss	0.1
Sale of 0.32% Juventus Football Club capital stock	(0.1)
Writedown of Fiat shares and warrants:	
- ordinary shares	(160.5)
- preferred shares	(23.9)
- warrants	(1.1)
Net change during the year	**(290.3)**
Financial fixed assets at December 31, 2004	**3,518.0**

A comparison of carrying values and market prices of listed financial fixed assets shows the following unrealized gains (losses):

€ in millions	Fiat ord. shares	Fiat ord. share warrants 2007	Fiat pref. shares	SANPAOLO IMI shares	Juventus shares	IFIL ord. shares	Total
Market price at December 30, 2004	(21.4)	-	0.6	281.7	97.3	(5.2)	353.0
Average market price in the second half of 2004	-	-	-	219.8	102.6	(10.4)	312.0
Average market price March 1-15, 2005, update	(48.9)	1.8	12.0	333.4	90.3	(4.0)	384.6

The per share carrying value of IFIL ordinary shares (€ 3.75) is substantially in line with the per share value of the consolidated stockholders' equity of the IFIL Group at December 31, 2004 (€ 3.64).

Stockholders’ equity

Stockholders’ equity at December 31, 2004 amounts to € 3,204.9 million (€ 3,194.4 million at December 31, 2003). The positive change of € 10.5 million is due to the following changes:

€ in millions	
Stockholders' equity at December 31, 2003	**3,194.4**
Dividends paid out	(69.8)
Dividends unclaimed	0.1
Net income for the year 2004	80.2
Net change during the year	**10.5**
Stockholders' equity at December 31, 2004	**3,204.9**

Net financial position

The net financial position of IFIL S.p.A. at December 31, 2004 shows a net indebtedness position of € 367.5 million (a net indebtedness position of € 677.8 million at the end of 2003). Details are as follows:

€ in millions	**12/31/2004**	12/31/2003	Change
Receivables for dividends to be received	**253.6**	0.0	253.6
Cash	**0.1**	0.2	(0.1)
Bonds	**(300.0)**	(300.0)	0.0
Borrowings from banks:			
- short term	**(318.6)**	(216.9)	(101.7)
- medium-term	**0.0**	(150.0)	150.0

Sale of receivables from the tax authorities to Group companies	3.7
Sale of Juventus Football Club shares (0.32% of capital stock)	0.6
Purchase of IFIL ordinary shares (0.31% of the class of stock)	(9.3)
Sale of IFIL ordinary shares (0.18% of the class of stock)	5.4
Dividends paid out	(69.8)
Financial expenses, net	(26.1)
General expenses, net	(13.4)
Other, net	(0.7)
Net change during the year	**310.3**
Net financial position at December 31, 2004	**(367.5)**

Possible Fiat S.p.A. capital increase in execution of the Convertible Mandatory Facility Agreement dated July 26, 2002
In the eventuality that IFIL decides not to exercise, in whole or in part, the option rights to which it is entitled or should it not be in a condition to exercise, in whole or in part, such rights, the investment held by IFIL in Fiat could be diluted to below 30% of the capital stock with voting rights.

Information on the status of the implementation of the systems and the procedures for the application of international accounting principles (Consob communication No. DME/5015175 dated March 10, 2005)
As provided by Regulation No. 1606 dated July 19, 2002 of the European Union, starting in 2005 the IFIL Group will draw up its consolidated financial statements in compliance with international accounting standards (IFRS/IAS) approved by the European Community. In particular, the IFIL Group will adopt international accounting standards beginning from the consolidated first quarter data at March 31, 2005.

The following paragraphs provide information on the activities that have been carried out in order to ensure a proper transition for the application of international accounting standards.

At its operating subsidiaries and associated companies (Fiat, Worms & Cie, Juventus F.C. and Alpitour) IFIL has taken note of the transition processes in progress, agreeing the timetables to obtain the data which will be necessary for the preparation, in compliance with international accounting standards, of the opening consolidated balance sheet at January 1, 2004, the interim consolidated financial data at March 31, 2004, June 30, 2004 and September 30, 2004, as well as the consolidated financial statements at December 31, 2004 of the IFIL Group. Such consolidated accounting data will be presented for comparative purposes with the corresponding consolidated accounting statements which will be prepared during 2005 on the basis of international accounting standards.

With regard to IFIL and the Italian and foreign subsidiaries that are part of the “Holdings System”, the differences between the national and Group accounting principles applied previously and IFRS/IAS have been identified and the adequacy of the accounting systems and procedures have been ascertained compared to the new requirements. Furthermore, planning has been set up to ensure that each company prepares, on a timely basis, the necessary accounting statements (equivalent to those examined with regard to the operating subsidiaries and associated companies).

The audit firm of Deloitte & Touche S.p.A. has been assigned the following additional audit work with regard to the accounting statements that have been prepared in accordance with international accounting standards:

- audit of the opening consolidated balance sheet at January 1, 2004;
- limited review of the interim consolidated financial data at June 30, 2004;
- limited review with agreed testing procedures of the interim consolidated financial data at March 31, 2004 and September 30, 2004;
- audit of the consolidated financial statements at December 31, 2004.

The following table presents the reconciliations of the stockholders' equity of IFIL S.p.A. and the consolidated stockholders' equity of the IFIL Group taken from the financial statements for the years ended December 31, 2003 (prepared in accordance with Italian principles) with the corresponding data drawn up in accordance with international accounting standards at January 1, 2004. Such data has been reviewed by the audit firms.

€ in millions	IFIL S.p.A.	Consolidated IFIL Group
Stockholders' equity at December 31, 2003 (taken from financial statements prepared according to Italian principles)	**3,194.4**	**3,953.9**
Reclassification of the carrying value of treasury stock	**(43.4)**	**(46.2)**
IAS/IFRS adjustments		
- IAS 39 - Higher value of the investment in SANPAOLO IMI	269.6	112.8
- IAS 39 - Higher value of Fiat ordinary share warrants	0.3	0.3
- IAS 39 - Valuation of instruments hedging rate risks	(8.8)	(8.8)
- IAS 38 - Derecognition of intangible fixed assets	(8.9)	(8.9)
- IAS 19 - Higher liability relating to employee benefits	(0.1)	(0.1)
	252.1	**95.3**
IFIL's share of IAS/IFRS adjustments presented by subsidiaries and associated companies		
- Fiat Group	-	(234.2)
- Worms & Cie Group	-	(18.9)
- Alpitour Group	-	(3.9)
- Juventus Football Club	-	(3.8)
- IFIL "Holdings System" companies	-	7.8
- Other consolidation adjustments	-	0.7
	-	**(252.3)**
Stockholders' equity at January 1, 2004 (IAS/IFRS)	**3,403.1**	**3,750.7**

The consolidated financial statements at December 31, 2004 of the IFIL Group show consolidated net income of the Group of € 119 million and stockholders' equity of the Group of € 3,867 million (after deducting the carrying value of the ordinary treasury stock held by IFIL of € 50 million).

The corresponding data prepared by IFIL and the subsidiaries on the basis of international accounting standards, which should nevertheless be considered provisional in that the audit firms have not yet concluded their examinations, shows a consolidated net income of the IFIL Group of approximately € 120 million, substantially unchanged, and a consolidated stockholders' equity of the IFIL Group of approximately € 3,800 million. The negative difference of € 67 million is due to the higher value of the investment in SANPAOLO IMI (+€ 125 million), other positive adjustments indicated by IFIL and the companies in the "Holdings System" (+€ 3 million) and, lastly, IFIL's share of the adjustments shown by the subsidiaries Fiat, Worms & Cie, Alpitour and Juventus Football Club (-€ 195 million, net).

Programming document on security

The Company has prepared the programming document on security (Dps) on December 20, 2004 for the year 2004 according to the laws then in force and is currently proceeding to update this document pursuant to the provisions of Legislative Decree No. 196 dated June 30, 2003, Attachment B – technical specifications regarding minimum safety measures. The document has been drawn up by the person responsible for the treatment of the data.

Transactions among Group companies and with related parties

The Board of Directors has adopted principles of conduct for carrying out transactions with related parties (available on the corporate website of the Company http://www.ifil.it).

The above principles of conduct provide that the Board of Directors must approve the following transactions:

- atypical and/or unusual intragroup transactions, meaning transactions which, because of their significance/relevance, nature of the counterparties, subject of the transaction (also in relation to transactions of ordinary administration), manner of determining the transfer price and timing of the event (close to the end of the year) could give rise to reservations about: the correctness/completeness of the information in the financial statements, conflicts of interest, safeguarding of the company's assets and protection of minority stockholders;
- transactions with subsidiaries for amounts of more than 1% of IFIL's portfolio value as shown in the most recent approved accounting documents (quarterly reports, first-half report and the annual financial statements) as of the date of the transaction, with the exception of transactions with subsidiaries in the "Holdings System";
- transactions with other related parties for amounts of more than € 3 million.

The bodies with delegated powers shall supply the Board with information concerning such transactions especially with regard to the nature of the relationship, the manner of execution, the economic terms and timing, the valuation criteria adopted and any risks to the Company.

Whenever a Director has an interest in the transaction (even a potential interest), the Board of Directors must be informed on a timely basis about the nature, terms, origin and the extent of this interest. After having exhaustively informed the Board of Directors, the interested Director must absent himself from the meeting so that the Board can pass the appropriate resolutions.

In the event the nature, the amount and the manner of execution of the transaction with a related party require it, the Board of Directors can avail itself of the assistance of one or more independent experts, chosen from among individuals with recognized professional characteristics and expertise on the matter in question so that an opinion can be obtained on the economic terms of the transaction and its legitimacy, as well as the technical means and manner of execution of the transaction.
The Board of Directors and the Board of Statutory Auditors must in any case be informed of any transactions with other related parties different from those mentioned above.

With reference to those transactions, comprehensive information shall be provided to the Directors, the Statutory Auditors, the General Manager, the procurators of the Company and to subsidiaries concerning the regulations in force and, in particular, the definition of related parties as reported in Consob Communication No. 2064231 dated September 30, 2002, as well as the definition of atypical and/or unusual transactions.

With regard to 2004, transactions among IFIL, the parent companies, the subsidiaries and the companies in which a significant influence is exercised and the companies controlled by the same parent companies are entered into in conformity with the provisions of existing laws, based upon an evaluation of reciprocal economic gain.

The most important transactions can be summarized as follows:

4# services rendered to the parent company, IFI, and to subsidiaries and cost recoveries;
4# services rendered by the parent company, IFI, and by the subsidiary Soiem;
4# partial reimbursement of additional paid-in capital by Ifil Investissements for € 119.9 million, of which € 95.7 million to IFIL and € 24.2 million to Ifil Investment Holding;
4# reimbursement of € 9.1 million by Soiem following the reduction in its capital stock;
4# use of the loan from the subsidiary Soiem for € 8.5 million (repaid in September) bearing interest at monthly floating market rates;
4# sale of receivables from the tax authorities to the parent company, IFI, for € 516 thousand;
4# sale of receivables from the tax authorities to Italian subsidiaries of Worms & Cie and Alpitour (€ 3,220 thousand);
4# purchase, by the subsidiary Ifil Investissements, of 100% of Sadco capital stock from Exor Group for € 1.4 million;
4# sale, by the subsidiary Mediterranean Capital (ex-Ifil Capital) of 0.82% of Club Méditerranée capital stock to the subsidiary of Exor Group for € 6.1 million;
4# services rendered to Ifil USA by Exor USA and Fiat USA.

The effects on the balance sheet and statement of operations of the transactions among IFIL S.p.A., the Group companies and the other related parties can be summarized as follows:

€ in thousands	12/31/2004 Accounts receivable		12/31/2004 Accounts payable	2004 Income	2004 Expenses

(a) Of which € 253,553 thousand refers to dividends received in 2005.

The IFIL Group, through the companies which make up the Group, has maintained and maintains relations with “related” parties as defined by Consob, which, even when considered from the standpoint of potential conflicts of interest, are nonetheless governed by market terms. In this sense, particular mention should be made of:

- option rights on IFIL ordinary shares granted to directors and managers of IFIL and the parent company, IFI;
- option rights on Alpitour shares granted by Alpitour to the directors of IFIL (who, today, are no longer in office) under a stock option plan for the directors, managers and cadres of Alpitour and its direct and indirect subsidiaries.

With a view to optimizing the management of the Group’s financial resources, loan transactions were entered into during the year among foreign companies of the Group.

During the course of year, the director Franzo Grande Stevens rendered professional services to Fiat Group companies for total fees of € 3,591 thousand.

Additional information and details are disclosed in the section “Major events in 2004” of the Directors’ report on operations, in the “Notes to the statutory financial statements of IFIL S.p.A.” and in “Notes to the consolidated financial statements”.

On the basis of information received from the companies of the Group, there are no atypical or unusual transactions to report.

Management and coordination

IFIL Investments S.p.A. is not subject to management and coordination by companies or entities.
In accordance with art. 2497 bis of the Italian Civil Code, the subsidiaries Soiem S.p.A. and Ifil New Business S.r.l. have identified IFIL Investments S.p.A. as the company which exercises management and coordination.

Pending litigation

By notification on May 8, 2003, inferring illegal acts due to a conflict of interest and the unlawful valuation of the contributions in kind, the stockholder K Capital contested the resolution to increase IFIL’s capital stock reserved for Istituto Finanziario Industriale S.p.A. passed by the Extraordinary Stockholders’ Meeting of IFIL held on April 23, 2003 and sought compensation from IFIL for (alleged) damages (economic and non-economic) suffered as a result of the unlawful conduct (allegedly) by IFI. During the case and with reference only to (alleged) economic damages, K Capital stated its request for compensation (which originally had not been quantified) in approximately € 17 million.
The case is currently in the preliminary investigation stage. At the last hearing held on December 14, 2004, IFIL was questioned. The Judge then stayed the hearing until April 13, 2005 for further investigation measures (particularly in reference to a possible technical consultant appointed by the court), giving the parties time for briefs until March 31, 2005.

Both of the above requests by K Capital (request to declare the stockholders' resolution null and void and the request to seek a sum of compensation for damages) appear to be inadmissible and groundless and therefore at this time the Company does not believe that any contingent liabilities or losses will arise as a consequence.
Earlier, the appeal filed under ex article 2378, paragraph 4, of the Italian Civil Code by which the stockholder K Capital had sought the suspension of the execution of the resolution was denied by the Turin Court, by decree filed on June 9, 2003.

Equity investments held by Directors, Statutory Auditors and General Manager

(Art. 79 of Consob resolution No. 11971 dated May 14, 1999 and subsequent amendments)

(d) Of which 59,500 shares come from the conversion of 70,000 IFIL savings shares.

Stock Option Plans

The Company uses stock option plans to strengthen ties with its managers, as well as the managers of certain companies of the Group.

At December 31, 2004, IFIL has two stock option plans.

In May 2000, the Board of Directors voted a stock option plan for the directors and managers of IFIL and IFI, for a maximum number of 2,700,000 IFIL ordinary shares, of par value € 1 each. The options can be granted in annual amounts each year from 2000 to 2004 and can be exercised by the grantees starting from 2002 up to 2006.
There were 2,691,500 options granted under this plan in the period 2000 to 2004, equal to 0.25% of current capital stock.

In September 2003, the Board of Directors voted a second stock option plan solely for the directors, for a maximum number of 700,000 IFIL ordinary shares, of par value € 1 each. There were 532,000 options granted under this plan in 2003 for the same number of ordinary shares, equal to 0.05% of current capital stock, at € 2.28 each.

The options were granted according to the level of responsibility held by the grantee in the corporate organization.

220,700 options granted under the IFIL 1998 stock option plan and which had to be exercised by April 30, 2004 became forfeit during 2004.

With regard to these plans, there were no transactions entered into to favor either the purchase or subscription of shares pursuant to ex art. 2358 of the Italian Civil Code.

A summary of the options granted for IFIL shares outstanding at December 31, 2004 are presented below:

	Number	Exercise price		Market
	of shares	actual (a)	average	price (b)
IFIL 2000 Plan (expiring December 2006)				
Options granted (net of options forfeit)				
. year 2000	522,000	6.997		
. year 2001	525,450	6.109		
. year 2002	844,050	4.520		
. year 2003	800,000	1.850		
	2,691,500		**4.517**	**3.39**
IFIL 2003 Plan (expiring December 2006)				
Options granted	**532,000**	**2.28**	**2.28**	**3.39**
Options exercisable at December 31, 2004	**3,223,500**		**4.148**	**3.39**

(a) Exercise price adjusted to take into account the cash capital stock increase in July 2003.
(b) Corresponding to the average stock market prices during the period March 1 -15, 2005.

On December 15, 2000, the Extraordinary Stockholders' Meeting of Alpitour S.p.A. voted to vest the Board of Directors with the power to increase capital stock by a maximum amount of € 767,500 to service a stock option plan on behalf of the directors, managers and cadres of Alpitour and the companies of the Group.

The regulations of the stock option plan, approved by resolution of the Board of Directors on December 15, 2000, state that the aforementioned capital stock increase of € 767,500 will occur by issue of a maximum 1,535,000 new ordinary shares of par value € 0.50 each. The options under the plan, which carries a period of 68 months, will accrue in annual lots expiring October 31, of each year and will be offered at a price equal to € 6.73 per share. The options offered can be fully exercised within six months of the approval of the financial statements ended October 31, 2005.

The shares purchased in execution of the above plan can be sold to Alpitour at a price, established by the Board of Directors, calculated on the basis of the economic performance of the company.

The first tranche of options offered during 2002/2003, referring to the financial statements for the year ended October 31, 2002, was not exercised by the beneficiaries of the stock option plan.

SIGNIFICANT SUBSEQUENT EVENTS

Increase in the investment in SANPAOLO IMI

In March 2005, IFIL purchased 12,547,230 SANPAOLO IMI ordinary shares (0.851% of the class of stock) for an investment of € 142.3 million. Following this purchase, at the date of the Board meeting (March 30, 2005), IFIL held 82,918,230 SANPAOLO IMI ordinary shares, equal to 5.62% of ordinary capital stock (4.45% of capital stock).

Purchase of ordinary treasury stock

During the first quarter of 2005, the following transactions were carried out involving IFIL ordinary treasury stock:

	Number of shares	% of class of stock	% of capital stock	Carrying value	
				Unit (€)	Total (€ mn)
Balance at December 31, 2004:					
- classified in financial fixed assets	11,117,148	1.07	1.03	3.75	41.7
- classified in current assets	2,038,324	0.20	0.19	2.70	5.5
- held by the subsidiary Soiem	810,262	0.08	0.08	3.41	2.8
Total at December 31, 2004	13,965,734	1.35	1.30	3.58	50.0
Purchased by IFIL S.p.A. during period	630,306	0.06	0.06	3.38	2.1
Balance at end of March 2005	**14,596,040**	**1.41**	**1.36**	**3.57**	**52.1**

Change in the consolidated net financial position of the “Holdings System”

At the end of March 2005, the consolidated net financial position of the “Holdings System” shows a net liquidity position of € 536.3 million. The negative change during the period (€ 146.9 million) resulted from the following flows:

€ in millions	
Consolidated net financial position of the "Holdings System" at December 31, 2004	**683.2**
Purchase of 0.851% of SANPAOLO IMI ordinary capital stock	(142.3)
Purchase of 0.06% of IFIL ordinary capital stock	(2.1)
Sale of 1.69% of Juventus capital stock	2.8
Net financial expenses and net general expenses	(5.6)
Sales of receivables from the tax authorities to Group companies	2.1
Other net changes	(1.8)
Net change during the period	**(146.9)**
Consolidated net financial position of the "Holdings System" at end of March 2005	**536.3**

Capital stock increase by IFIL

By the power vested in it by the Stockholders’ Meeting on May 25, 2001, the Board of Directors, on February 7, 2005, voted to increase capital stock to service a stock option plan for the managers of the Company and its parent company.

The transaction will involve the issue of 800,000 IFIL ordinary shares (0.07% of capital stock) of par value € 1, which will be subscribed in cash by the end of April 2005 at the unit price of € 1.85 for a total of € 1,480,000. Following this increase, IFIL’s capital stock will amount to € 1,075,995,737 and will consist of 1,038,612,717 ordinary shares and 37,383,020 savings shares, all with a par value of € 1.

Sale of La Rinascente S.p.A.
On March 13, 2005, a contract was signed for the sale of 99.09% of the capital stock of Rinascente S.p.A. held by Eurofind Textile S.A. – the Luxembourg company controlled by Auchan and IFIL – to Tamerice S.r.l., a company leading a group composed of Investitori Associati SGR S.p.A., DB Real Estate Global Opportunities IB L.P., Pirelli RE S.p.A. and the Borletti family, at a price of € 888 million.

Closing of the deal, which is subject to approval by the competent antitrust authorities, is expected to take place by June 2005. The price will be completely paid in cash at closing. The buyer has provided the usual bank guarantee.

Eurofind Textile has provided the buyer with statements and guarantees regarding the Rinascente Group, the subject of the transaction, and its activities, with the usual limitations and exclusions. Such conventional statements and guarantees regard, among other things, full ownership and title, free and clear of detrimental encumbrances and registrations, of the shares of the companies of the Rinascente Group and real estate properties, the lease relationships, the true and correct representation of the financial statements and tax, social security and legal/labor matters. The limitations and exclusions agreed within the framework of the sale process regard specific events considered by the buyer during the course of the due diligence. Such limitations and exclusions provide for the obligation of compensation in excess of a threshold of significance per individual indemnifiable event (de minimis) and as a whole (with an exempted amount) as well as, for certain matters, a maximum limit of responsibility for the seller.
IFIL will guarantee the commitments undertaken by Eurofind Textile with the buyer until their maturity.

After closing the sale of La Rinascente, Ifil Investissements will purchase the remaining 50% of Eurofind Textile capital stock from the Auchan Group. Following these transactions, the IFIL Group will receive net proceeds for a total of approximately € 530 million and realize a gain of over € 450 million, without significant tax effects for the Group.

BUSINESS OUTLOOK

For 2005, IFIL S.p.A. is expected to report a profit.

Moreover, considering the forecasts formulated by the major holdings (discussed later in the report) and other estimates currently available, including the gain on the sale of La Rinascente, the 2005 consolidated financial statements of the IFIL Group are also expected to show a profit.

Fiat Group

For the Fiat Group, 2005 will be another year devoted to restoring the company's strength, with the expectation of reporting a further improvement in operating income and positive earnings after nonrecurring items. Consequently, in 2005, the Fiat Group expects to return to positive consolidated earnings.

Worms & Cie Group

The Worms & Cie Group anticipates that Antalis will confirm the improvement in its results following three years of reorganization and that ArjoWiggins will show a positive reaction to the restructuring process as early as 2005 and, to a greater extent, in 2006.

It is upon these factors, combined with the excellent prospects of growth of SGS and Permal Group, that the Worms & Cie Group reckons to lay the groundwork for the start of a new phase of development.

Alpitour Group

Notwithstanding the difficulties caused by the tsunami which affected important tourist spots in the East and the consequences of the terrorist attacks which have penalized Egypt as a destination, the Alpitour Group deems that the positive result reported in the previous year can be consolidated during fiscal 2004/2005.

Juventus Football Club

Juventus, in light of the economic and balance sheet performance for the first six months of the year and information available to date, should register a negative net result for the year that will end on June 30, 2005. Such result could nevertheless be significantly affected by any extraordinary transactions regarding its assets.

SANPAOLO IMI

SANPAOLO IMI recently announced the distribution of dividends per share of € 0.47 which will bring IFIL receipts of approximately € 39 million.

PERFORMANCE OF THE MAJOR GROUP COMPANIES

FIAT

(30.06% of ordinary capital stock and 30.09% of preferred capital stock)

The consolidated results of the Fiat Group in 2004 can be summarized as follows:

			Change	
€ in millions	**2004**	2003	Amount	%
Net revenues	**46,703**	47,271	-568	-1.2%
Operating result	**22**	(510)	+532	-104.3%
Result before taxes	**(1,577)**	(1,298)	-279	+21.5%
Group's interest in net result	**(1,586)**	(1,900)	+314	-16.5%
Investments in property, plant and equipment and R&D	**3,922**	3,758	+164	+4.4%
Cash flows provided by operations	**620**	321	+299	+93.1%
Net financial position	**(4,961)**	(3,028)	-1,933	+63.8%
Number of employees	**160,549**	162,237	-1,688	-1.0%

Fiat Group's **Net revenues** total € 46,703 million, reflecting a 1.2% decrease from the previous year, largely due to the disposal of activities. If only Continuing Operations in 2003 are considered – excluding the revenues of sold businesses – there was an increase of 5% in consequence of higher volumes of activity at most Sectors.

In 2004, the Group achieved its target of operating balance by posting a positive **Operating result** of € 22 million, in contrast with a loss of € 510 million in fiscal 2003. This improvement was even more marked when compared with Continuing Operations alone in 2003, which reported an operating loss of € 714 million. Fiat Auto reduced its operating loss, whereas many Sectors showed higher operating income.

The Group's interest in net result is a loss of € 1,586 million (compared to a loss of € 1,900 million in fiscal 2003). While the operating result was a breakeven, the net result was principally affected by the following:

- restructuring expenses of € 508 million, due to plans for personnel laid off with long-term unemployment benefits, severance incentives, and writedowns of property;
- a total of € 435 million in other extraordinary expenses, net, with an approximate € 246 million of this total being attributable to the process of reorganization and the streamlining of relationships with the Group's suppliers;
- net gains of € 154 million resulting from the sales of Fiat Engineering, Midas and Edison shares and warrants. In 2003, the balance of net gains/losses resulting from the disposal of Toro Assicurazioni and Fiat Avio had totaled € 1,747 million;
- financial expenses, net, total € 744 million in 2004, including the net positive effect of approximately € 300 million in nonrecurring gains from the unwinding of the equity swap on General Motors shares. The comparison with Continuing Operations alone shows an improvement of € 323 million, largely attributable to the lower average level of indebtedness in 2004 and lower interest rates.

As for the equity and financial aspects:

- **Consolidated stockholders' equity - Group** at December 31, 2004 is € 5,099 million, compared to € 6,793 million at December 31, 2003;
- The **consolidated net financial position** totals a negative € 4,961 million at December 31, 2004, reflecting an increase of € 1,933 million from the negative € 3,028 million recorded at December 31, 2003. The change stems principally from the operating requirements of the period, the increase in working capital and lower sales of trade receivables. Net financial position at December 31, 2003 and at December 31, 2004 can be summarized as follows:

€ in millions	**12/31/2004**	12/31/2003	Change
Financial payables	**(18,743)**	(22,034)	3,291
Accrued financial expenses	**(523)**	(593)	70
	(19,266)	(22,627)	3,361
Prepaid financial expenses	**93**	85	8
Cash	**3,164**	3,211	(47)
Securities	**2,126**	3,789	(1,663)
Net indebtedness	**(13,883)**	(15,542)	1,659
Financial receivables and lease contracts receivable	**8,897**	12,576	(3,679)
Accrued financial income	**234**	301	(67)
Deferred financial income	**(209)**	(363)	154
Consolidated net financial position	**(4,961)**	(3,028)	(1,933)

Gross indebtedness decreased by € 3.4 billion, principally in consequence of the reimbursement of bonds, including the bond exchangeable for General Motors shares for U.S.$ 2.2 billion, equal to approximately € 1.8 billion.
At December 31, 2004, the balance includes, among other things, the Mandatory Convertible Facility for € 3 billion and the loan by Citigroup of approximately € 1.15 billion, secured by the agreements with EDF as part of the Italenergia Bis transaction.

Financial receivables and lease contracts receivable at December 31, 2004 include financial receivables from the dealer network totaling € 1,220 million (€ 2,020 million at December 31, 2003). Receivables from the dealer network are typically generated by sales of vehicles and are generally managed under dealer network financing programs as a typical component of the portfolio of the financial services companies. On the consolidated financial statements, the interest-bearing portion of the receivables is classified as a financial receivable, whereas the non-interest-bearing portion of the receivables is classified as a trade receivable. The abovementioned receivables from the dealer network are net of allowances for doubtful accounts totaling € 408 million at December 31, 2004 (€ 313 million at December 31, 2003), computed on the basis of historical statistical analyses and updated according to evolutions in market trends. At December 31, 2004, the Group held guarantees for these receivables totaling more than € 2 billion.

At December 31, 2004, gross indebtedness continued to be within the targets agreed upon with the Lending Banks under the Mandatory Convertible Facility Agreement (€ 23.6 billion), while the proforma net financial position, computed by subtracting from the net financial position the aforementioned Citigroup loan of approximately € 1.15 billion (as envisaged in the facility agreement with the Lending Banks) but not the receipt of the € 1,550 million as a result of the agreement reached with General Motors on February 13, 2005, exceeds the limit of € 3.6 billion contractually agreed for this parameter. The Lending Banks therefore have the right, according to contractual modalities and terms, to proceed with the conversion of the facility into capital for an amount up to € 2 billion.

As regards the significant events occurring since the end of the fiscal year, the most relevant transactions completed by the Fiat Group during early 2005 are reviewed below:

- on February 13, 2005, the Boards of Directors of Fiat and General Motors approved a contract to terminate the Master Agreement and related Joint Ventures between the two companies. The agreement envisages that General Motors pay to Fiat € 1.55 billion to terminate the Master Agreement (of which € 1 billion has already been paid), including the cancellation of the put option and the unwinding of all joint ventures.
  In greater detail, the agreement provides that General Motors return its 10% stake in Fiat Auto Holdings B.V. to Fiat and get a 50% interest in the Polish plant, which manufactures diesel engines as well as 50% of the involved technologies and that Fiat continue to sell engineering support for the development of diesel technology to General Motors, which will co-own JTD engine technology. However, General Motors will not manufacture JTD Diesel engines outside Europe that are to be exported to Europe, while continuing to take most of its European requirements from the Fiat plant in Pratola Serra.
  Both Fiat and General Motors will continue to support the joint development of existing platforms;
- also in February 2005, Fiat announced that the ownership of Maserati will be transferred from Ferrari to Fiat as soon as practicable. Alfa Romeo and Maserati will co-operate closely technically and commercially (particularly in important international markets) continuing its co-operation with Ferrari;
- early in March 2005, Magneti Marelli signed an agreement with the Turkish Group Koç for the acquisition of control of the automotive supplier company Mako Electric Sanayi Ve Ticaret A.S., moving from a 43% to a 95% interest. Mako is actually market leader in Turkey in automotive lighting systems. Magneti Marelli will commit Mako's business management to its subsidiary company Automotive Lighting S.p.A.;
- on March 21, 2005, Fiat exercised the Put option on EDF relating to the interest held in Italenergia Bis and equivalent to 24.6% of the shares, as well as the Put on the 14% holding sold to Banca Intesa, IMI Investimenti and Capitalia in 2002;
- on March 24, 2005, Fiat announced the creation of Fiat Powertrain Technologies, a new industrial unit that will integrate all the Group's innovation capabilities and expertise in engines and transmissions. The new company will operate in 12 countries with 26 plants and 16 research and development centers and will combine the resources, employees and activities of Fiat Auto Powertrain, Iveco Powertrain, Magneti Marelli Powertrain including Motor Sport, Iveco Motoren Forschung and the Powertrain research activities of the Fiat Research Center and Elasis.

The operating performance of the major sectors of activity in 2004 is the following.

Fiat Auto continued to work on redefining its presence in markets outside the EU, focusing on those that are strategically most significant: Latin America and Turkey. With reference to product innovation, it is to be noted that:

- during the last quarter of 2004, the Lancia Musa was presented to customers in Italy, with its commercial launch in other European markets scheduled for early 2005;
- the Fiat Panda family of cars was expanded with the introduction of Multijet and a gasoline-fueled 4x4 model versions (a multijet version of the 4x4 model will follow in 2005);
- the New Fiat Multipla, the Alfa Crosswagon Q4 and the restyled Alfa 147 were launched on the market;
- in the light commercial vehicle segment, the sector introduced the New Scudo and rounded out the Ducato line;
- Fiat Auto and Adam Opel AG signed a contract whereby Fiat will use General Motors architecture for the production of the New Fiat Croma, unveiled at the 2005 Geneva International Motor Show, which marks Fiat Auto's return to the D Segment;
- a contract was signed by Fiat Auto and Suzuki whereby Fiat enters the SUV segment with the manufacture of a jointly developed, Fiat-branded vehicle.

At the 2005 Geneva International Motor Show, the Sector introduced two new Alfa Romeo models: the 159 and the Brera. The new Punto will also be launched in the current year, in a segment which is just as important for the profitability of the brand.

The salient data of the Sector's operating performance in 2004 includes a 2.6% gain in net revenues, which increased to € 20.5 billion (+5.5% on a comparable scope of consolidation basis), and a reduction in the operating loss by € 139 million (by € 254 million on a comparable scope of consolidation basis), which shrank from € 979 million in 2003 to € 840 million in 2004. This improvement was made possible by higher unit sales and by an improvement in the sales mix, thanks to the newer models (Panda, Idea, Alfa GT). Cutbacks in production costs were especially important.

The net loss for the year totals € 2,019 million (compared to a net loss of € 2,058 million in 2003).
Research and development outlays increased to € 990 million, or 5.4% more than in 2003.

Ferrari

MASERATI

Ferrari - Maserati attained important objectives both in terms of sales and sports results. The Sector reported revenues of more than € 1.5 billion (the highest in its history), almost 20% higher than in the previous year. Ferrari won the World Constructors Championship for the sixth consecutive year.

Important models went on sale: the new F430, named by several highly regarded international publications the best car in its class and the Maserati Quattroporte, which became the best-selling Maserati model in the same year it was introduced.

In 2004, **CNH** reported revenues of € 9.8 billion, or a 4% increase compared to the previous year. If the currency translation effect is eliminated by comparing figures stated in constant U.S. dollars, without taking into account the negative impact of the appreciation of the euro versus the U.S. dollar, revenues show a gain of 9%, This improvement reflects higher sales both in agricultural machines and, to an even more pronounced degree, in construction equipment on a worldwide basis and in particular in the Americas, and increased sales prices.

Operating income rose to € 407 million in 2004, nearly double the operating income posted in 2003 (€ 229 million). In order to offset a rise in raw material costs, CNH implemented programs to streamline the manufacturing organization, which generated savings. In particular, cumulative synergies (post-Case/New Holland merger) reached U.S.$ 1 billion at the end of 2004.

Amortization of goodwill connected with the acquisition of Case was € 127 million in 2004.

CNH reported a net income of € 133 million in 2004, an important increase compared to the net loss of € 192 million in 2003, as well as a positive cash flow of € 526 million, compared to € 258 million in 2003.

Iveco's net revenues grew to approximately € 9.3 billion, or 10.1% more than in 2003, driven by the improvement in unit sales on the markets, especially in Western Europe.

Operating income totals € 357 million (compared to € 81 million in the previous fiscal year) also thanks to the product range repositioning and significant inroads made in lowering product costs.

Iveco posted a net income of € 109 million in 2004, compared to a loss of € 258 million in 2003, due to the operating performance, the decrease in restructuring and financial charges as well as a better tax management.

WORMS & CIE

(52.96% of capital stock through Ifil Investissements)

In 2004, Worms & Cie continued to pursue its strategy for the rationalization and development of its holdings which had commenced in 2001. In particular:

- a legal and operating plan was put into effect between ArjoWiggins and Carbonless in order to achieve synergies and optimize the management of the industrial plants. Cost-cutting programs were carried out concomitantly;
- the Accor shares still held were sold, resulting in a capital gain of € 21 million, net of tax;
- a restructuring plan was implemented for Permal Group.

The condensed consolidated results for fiscal year 2004, with the operating companies accounted for using the equity method, can be summarized as follows:

			Change	
€ in millions	**2004**	2003	Amount	%
Share in net profit before exceptional items of companies accounted for using the equity method				
- ArjoWiggins (including Carbonless)	**60**	66	(6)	-9
- Antalis	**22**	6	16	n.s.
- SGS	**44**	36	8	22
- Permal Group	**45**	25	20	80
- Other	**4**	15	(11)	-73
Share of earnings and dividends	**175**	148	27	18
Net profit of companies consolidated line-by-line before exceptional items	**9**	11	(2)	-18
Net profit before exceptionals items - Group	**184**	159	25	16
Exceptional items, net of tax including amortization of differences on consolidation	**(248)**	(47)	(201)	n.s.
Net profit (loss) - Group	**(64)**	112	(176)	n.s.
Stockholders' equity - Group	**1,776**	1,998	(222)	-
Consolidated net financial position	**(235)**	(612)	377	-

Worms reported a 16% increase in consolidated net profit before exceptional items, compared to 2003. With the exception of ArjoWiggins, the Group operating subsidiaries all delivered substantial growth. The economic effects of the provisions for restructuring costs at ArjoWiggins and the impairment adjustment to differences on consolidation referring to Antalis, respectively, of € 109 million and € 87 million, had a significant negative impact on exceptional items, which amount to a net exceptional expense balance of € 248 million (compared to a net exceptional expense balance of € 47 million in the previous year).
The effect of the abovementioned exceptional items led to a consolidated net loss – Group of € 64 million (compared to a net profit – Group of € 112 million in 2003).

In 2004, from a financial standpoint, Worms & Cie reached its objective of substantially reducing its net indebtedness position, from € 612 million at December 31, 2003 to € 235 million at December 31, 2004. The consolidated net indebtedness position (line-by-line consolidation) also shows a decisive improvement to € 918 million at December 31, 2004 from € 1,223 million at December 31, 2003.

Stockholders' equity - Group amounts to € 1,776 million at the end of December 2004 (€ 1,998 million at December 31, 2003).

The operating performance of the main holdings of the Worms & Cie Group in 2004 is described in the following paragraphs.

ARJOWIGGINS

(100% of capital stock through Worms & Cie)

The intonation of the markets of reference remains weak. While demand is satisfactory for some production units, fierce competition contributes to the decline in prices. The sector has resorted to production halts to keep inventory levels from rising.

After a first half marked by an appreciable economic recovery of the Asian and American markets, the second half displayed a contraction of international trade, particularly in Asia. In the United States, however, there was a strong growth in imports (regardless of the unfavorable exchange rate, which caused implementation of cost-cutting programs) and sales prices, which made it possible to offset the increase in the costs of certain production factors.
In Europe, the contraction of the price of paper pulp in euro to end-of-2003 levels allowed margins to gain some leverage, but this was achieved in a context of severe production overcapacity.

Demand for paper remains weak and production halts abound in the sector.

In this scenario, ArjoWiggins reported an operating income in 2004 of € 106.4 million, with a reduction of 9% compared to 2003.
Sales volumes were slightly higher than the prior year while sales prices declined on average by 2.8%. The combination of these two factors caused a contraction of business volumes of 2.5% to € 1,977 million.

As far as costs are concerned, the favorable change in the price of raw materials allowed the percentage of direct per unit costs to improve whereas the overall reduction in running costs is mainly due to the trend in exchange rates.

The impact of extraordinary expenses was € 113.6 million for the restructuring measures that were necessary to take account of the future consequences of the current excess production capacity in Europe.

The situation of the markets for the current year should not differ from that of 2004: the persisting weakness of the U.S. dollar will still weigh on the accounts of the company while the uncertainties of the paper pulp market will not allow significant increases in the sales prices.
In this scenario, an improvement in results must come from investments made to improve the product mix and to reduce fixed overheads now taking place.

The key consolidated highlights (ArjoWiggins + Carbonless Europe) are presented in the following table:

€ in millions	**2004**	2003	Change Amount	%
Net revenues	**1,977**	2,022	(45)	-2
Operating income	**106**	120	(14)	-12
Net income (loss)	**(45)**	24	(69)	n.s.

(100% of capital stock through Worms & Cie)

As far as the markets of reference are concerned, distribution registered a slight gain for the first time in three years in Europe, driven by the recovery of world growth which stimulated an escalation of investments in media and communications materials by businesses. Notwithstanding this impulse, the market reported a 2% contraction in value as a result of the significant decline in prices for the fourth straight year.
In spite of this, Antalis improved its operating performance, significantly increasing its economic results in 2004. The company raised its market share in almost all the countries in which it is present, improving its sales margin and keeping operating costs in check. The operating margin reached 23% of business volumes and sales are slightly higher than the prior year.
Operating income is equal to € 50.2 million (+35% over 2003) and the company has returned to a profit position (for the first time since 2000) with a net income of € 8 million.

The growth of the company was followed by the purchase of Brangs + Heinrich, an important German company operating in the market for the distribution of packaging materials. This sector is still quite fragmented, although it shows a total value of approximately € 4 billion and growth rates that are considerably higher than the economy as a whole. In parallel, Antalis continued its geographic expansion into strong-growth areas (Turkey, South-East Asia, South America and East Europe).

For the current year, Antalis intends to fight the difficulties in the sector and increase its profitability, appealing to the strategic alliances with its suppliers, stepping up internal efficiency and improving relations with customers, while continuing to pursue its development in segments with the highest potential such as the packaging sector.

The key consolidated results of the Group can be summarized as follows:

			Change	
€ in millions	**2004**	2003	Amount	%
Net revenues	**2,346**	2,324	22	1
Operating income	**50**	37	13	35
Net income (loss)	**8**	(6)	14	n.s.

SGS

(23.77% of capital stock through Worms & Cie)

Thanks in part to the improvement of market conditions in 2004, SGS registered an increase in business volumes of CHF 467 million compared to the prior year, arriving at a total value of CHF 2,885 million. This growth embraced all activity sectors.

Operating income stood at CHF 391 million at constant exchange rates, with an increase of CHF 91 million compared to the prior year.
Net income before extraordinary items, a positive balance of CHF 3 million, reached CHF 276 million (CHF 224 million in 2003).
Cash flows provided by operations were CHF 425 million (CHF 325 million in 2003) reflecting both the improvement in the result and the reduction in working capital.
Such flows were earmarked for new acquisitions and investments and also the payment of dividends.

During the year, the company pursued its strategy to consolidate its activities through acquisitions, and in so doing built one of the most important networks for vehicle inspections in France.

As far as the outlook for the current year is concerned, SGS has confirmed its previously announced objective of reporting earnings per share of CHF 45 in 2005.

The key consolidated results can be summarized as follows:

			Change	
CHF in millions	**2004**	2003	Amount	%
Net revenues	**2,885**	2,454	431	18
Operating income	**391**	300	91	30
Net income	**279**	227	52	23

PERMAL GROUP

(77% of capital stock post-reorganization, through Worms & Cie)

The world recovery that began in 2003 became stronger in 2004, allowing international financial markets to post positive performance, although lower than that of last year.

The Permal Group management model had continued to prove its validity, regardless of market conditions, having constantly pursued the development of new products and distribution channels.

Assets managed rose by U.S.$ 6.2 billion (of which approximately U.S.$ 1 billion is due to performance during the period) reaching U.S.$ 19.2 billion at year-end.

Partly with a view to sustaining the future growth of the company, Worms & Cie has reached an agreement in principle with Permal's management on the reorganization of the Group's structure and on the participation of the managers themselves, in keeping with the guidelines generally recognized in similar organizations in the asset management sector.
The reorganization should be completed by the end of the first half of the current year and will involve the entry of the managers as minority stockholders in Permal Group's capital with a total interest of 23%.

The key results for the year 2004 are as follows:

			Change	
US$ in millions	**2004**	2003	Amount	%
Net revenues	**348**	178	170	96
Operating income	**83**	43	40	93
Net income	**59**	30	29	97

SANPAOLO IMI

(5.62% of ordinary capital stock)

Banca FIDEURAM BANCA OPI SANPAOLO BANCA IMI SANPAOLO AM ASSET MANAGEMENT

During the year 2004, the distribution model adopted by the SANPAOLO network was extended to other banking networks of the Group and initiatives were taken to rationalize and develop the Group, in Italy and abroad, aimed at strengthening its presence in certain market sectors and geographical areas with a marked growth potential.

Having completed the integration of the branches of the former Banco di Napoli, in 2004 the process was also finalized for the banks in the Triveneto and Emilia areas and for Banca Popolare dell'Adriatico.
The integration process involved the gradual adoption of the SANPAOLO'S network and commercial model and the migration of the IT systems to those of the Parent Bank.
The reorganization process also envisages that branches within a reference territory of a specific historical brand should belong to the bank holding such brand, with the aim of taking advantage of the potential generated locally by the brand.

On January 20, 2004, SANPAOLO IMI exercised a put option for the remaining share of Finconsumo Banca still held (30%), implementing the agreements subscribed with Santander Central Hispano (SCH) for the sale to the latter of the whole share held in the bank. The transaction, completed at a price of € 80 million, determining a gross capital gain of € 55 million, is part of the rationalization of activities in consumer credit in which the Group operates with Finemiro Banca.

During the year, Asset Management underwent major reorganization in line with the Group business model characterized by specialization of the commercial units and product companies. On one hand, an insurance pole was created through the spin-off of bancassurance activities and, on the other hand, through the total split of the SANPAOLO IMI Wealth Management holding company in favor of SANPAOLO IMI Asset Management, for the activities of asset management, and to the Parent Bank for the remaining activities. The transaction, approved on November 29, 2004, came into effect for legal purposes on December 29, 2004. The reorganization maintains Asset Management as a direct extension of the Parent Bank and also rationalizes the investment structure and streamlines the staff organization, with consequent cost synergies.

On June 30, 2004, the Meeting of the Stockholders of Banca Fideuram approved the spin off of the stake held by banca Fideuram in Fideuram Vita in favor of SANPAOLO IMI, which was completed on November 19, 2004 with effect from November 30, 2004. The beneficiary assigned the minority stockholders in Banca Fideuram shares at a ratio of 0.07470 SANPAOLO IMI ordinary shares for each Banca Fideuram share.
The transaction was instrumental in the reorganization of the insurance activities of SANPAOLO IMI and strengthened Banca Fideuram's role in financial consultancy services, asset management and private banking. In particular, a strategic objective of the segment was identified in the growth of initiatives in the various areas of the reference customers, confirming the maintenance of the bank's profitability at the current levels of excellence.

The reorganization plan of SANPAOLO IMI's insurance activities provided for the concentration of all the life insurance Group companies and those in the property and casualty branch into a single pole. The company vehicle identified for this purpose is Assicurazioni Internazionali di Previdenza S.p.A. (previously called Noricum Vita).
The reorganization project, the guidelines of which were approved by the Board of Directors on February 13, 2004, aims to:

- rationalize the presence in the market, achieving a critical volume capable of encouraging increased efficiency through cost synergies and economies of scale;
- increase the focus on the insurance business, encouraging product innovation in sectors such as welfare and personal insurance;
- exploit the complementary nature of insurance and financial needs.

The plan was completed with the merger by incorporation of SANPAOLO Vita and Fideuram Vita into A.I.P., which began operating from December 1, 2004.

The reorganization project also intends to create conditions for further possibilities of growth, also by way of subsequent aggregations.

On November 18, 2004, a project was completed for the valorization of the non-performing property portfolio of SANPAOLO IMI through the transfer to the Carlyle group of 100% of CSP Investimenti - the subsidiary to which SANPAOLO IMI assigned the business area, including 105 properties, as of December 31, 2003 – and a further 126 properties belonging to various companies of the Group. The transaction was aimed at rationalizing the management of the property assets on the basis of organizational requirements and income opportunities. It was defined on the basis of a sale price of some € 320 million, allowing a gross capital gain of almost € 100 million. About one third of the capital gain was recorded in the assets of the proprietary banking networks as of December 2003 for revaluation according to Law 350/2003, and the remaining part was recorded in the financial statements for 2004.

The results of the SANPAOLO IMI Group for 2004 showed an improvement over 2003 in all principal indicators for profitability, efficiency and quality of assets. Net income reached € 1,393 million, a rise of 43.3% compared to 2003; RoE is 12.2%, 3 percentage points higher than the previous year. The Group also improved the cost to income ratio, which fell to 63.5% from 65.3% of 2003. The net non-performing loans/net loans ratio remained at an excellent level (1%).

This performance was made possible by the favorable trend in revenues, thanks to commissions and income from the companies carried at equity, the constant monitoring of expenses leading to a reduction in operating costs, as well as the increase in net extraordinary income, thanks to charges to be accounted for in 2003 mainly attributable to staff leaving incentive plans.

The net result for the year was above the budget objective, continuing the growth begun in 2003.

The key results of the SANPAOLO IMI Group can be summarized as follows:

			Change	
€ in millions	**2004**	2003	Amount	%
Net interest income	**3,569**	3,716	(147)	-4.0
Net interest and other banking income	**7,592**	7,469	123	1.6
Operating income	**2,890**	2,704	186	6.9
Income before extraordinary items	**1,953**	1,687	266	15.8
Net income - Group	**1,393**	972	421	43.3
Total assets	**211,157**	202,580	8,577	4.2
Stockholders' equity - Group	**11,804**	10,995	809	7.4
Numbers of employees	**42,738**	43,465	(727)	-1.7

Net interest income for 2004 is € 3,569 million, a decrease of 4% compared with the previous year. This trend is attributable to the deterioration of the total spread and the redirecting of volumes towards less remunerative, medium/long-term activities which was not sufficiently compensated by the positive effect of trading volumes.

Net interest and other banking income was € 7,592 million in 2004, up 1.6% compared with the previous year. The reductions in net interest income and in gains and losses from financial transactions (-3.4%) were more than compensated by the growth of commission income (+6.7%), earnings of companies accounted for using the equity method and dividends from holdings (+30%).

Operating income in 2004, equal to € 2,890 million, shows an increase of 6.9% over 2003.

With regard to the balance sheet components at the end of December 2004, the following can be said:

- **total consolidated assets** amount to € 211,157 million;
- **net loans to customers**, excluding non-performing loans and loans to SGA, amount to € 119,932 million; the percentage of net non-performing loans to total net loans to customers is 1%;
- **total customer financial assets** amount to € 377,444 million, including assets under management of € 144,485 million;
- **stockholders' equity - Group** is € 11,804 million, compared to € 10,995 million at the end of December 2003.

(60% of capital stock)

In the 2003/2004 sports season, Juventus won the fourth Italian Super Cup, its 50th title, and captured third place in the Italian Championship, gaining the right to contend the preliminary round, won in August, and qualifying for the UEFA Champions League 2004/2005.

The fiscal year July 1, 2003 – June 30, 2004 ended with a loss of € 18.5 million, compared to a net income of € 2.2 million reported in the prior year.
Operating revenues show a reduction of 2.9%, from € 214.4 million in 2002/2003 to € 208.2 million. The decrease is due to the effect of poorer sport results compared to the preceding season, which generated a smaller flow of income from the games and the UEFA Champions League. Revenues for the year include € 20 million, which come from the agreement signed with the Mediaset Group for the sale of the pay TV broadcasting rights for next seasons' games.
In parallel, operating costs fell from € 199.1 million in 2002/2003 to € 171.1 million in 2003/2004, due both to the absence of sports bonuses paid to technical staff and lower expenses for the purchase of temporary players' rights.

The net amount of income from the management of players' registration rights totals € 3.6 million, a reduction from the € 13 million reported in the previous season. Amortization of investments in players amounts to € 63.9 million (€ 61.6 million in 2002/2003).
Net extraordinary income is € 7.6 million, compared to € 39.8 million in the prior year.

Stockholders' equity at June 30, 2004 amounts to € 80.9 million, before the loss for the year, while the net financial position shows a liquidity position of € 53.1 million (€ 69.2 million at June 30, 2003).

For purposes of the preparation of the IFIL Group 2004 consolidated financial statements, Juventus prepared financial statements for the period January 1 – December 31, 2004, which can be summarized as follows:

Year				Change	
2003/2004 (a)	€ in millions	**2004** (b)	2003 (b)	Amount	%
216.0	Total operating revenues	**220.0**	212.9	7.1	3.3
47.2	EBITDA (c)	**45.9**	17.0	28.9	170.0
(18.5)	Net loss	**(5.8)**	(16.1)	10.3	-64.0
80.9	Stockholders' equity (d)	**71.2**	77.0	(5.8)	-7.5
53.1	Net financial position (d)	**(20.5)**	13.1	(33.6)	-256.5

(a) Corresponding to the period July 1, 2003 – June 30, 2004.
(b) Periods corresponding to the calendar year.
(c) Before amortization of players' registration rights.
(d) Data referring to the end of the period.

The result for the year 2004 is a loss of € 5.8 million, an improvement of € 10.3 million compared to 2003 due both to the increase in operating revenues (also as a result of the agreement signed with the Mediaset Group in 2004) and the reduction in costs described above.

Moreover, the economic effect of the summer phase of the 2004/2005 transfer campaign is a positive figure of € 18.6 million, compared to € 3.6 million in the summer 2003 campaign.

The reduction in stockholders' equity from € 77 million at December 31, 2003 to € 71.2 million at December 31, 2004 is due to the loss for the period. The net financial position shows a net indebtedness position of € 20.5 million at December 31, 2004, compared to a net liquidity position of € 13.1 million at the end of the prior year.

Among the major events which occurred in 2004, apart from those commented above, mention should be made of the new agreements signed in April with Sky Italia mainly for the sale of the television broadcasting rights for the home games of the Italian Championship for the 2005/2006 and 2006/2007 sports seasons.

As regards the investigation by the judiciary against the Chief Executive Officer and the company physician concerning the alleged improper use of medicines by Juventus Football Club S.p.A. players, on November 26, 2004 the Court acquitted the Chief Executive Officer Antonio Giraudo of all charges and sentenced company physician Riccardo Agricola to one year and ten months' imprisonment, with the right to early release on the dual grounds provided by law. The motivations for the sentence were filed on February 24, 2005.
An appeal is being prepared and once filed will set in motion the second degree stage of the court process.

As far as the current soccer season is concerned, the Primavera team won the Viareggio Tournament for the third consecutive year (a record in the cup's history), while the First Team qualified for the quarter finals of the UEFA Champions League by beating Real Madrid.

At the end of March 2005, Juventus announced that it had signed an official sponsorship agreement for all games and for a five-year period starting July 1, 2005, with Oilinvest B.V., the Dutch company which owns the Tamoil trademark. The overall agreement is worth an equivalent amount of € 110 million, including the right to extend the sponsorship agreement for five more years for a total equivalent amount, in that period, fixed at € 130 million.

(100% of capital stock through Ifil Investissements and Ifil Finance)

In June 2004, the Extraordinary Stockholders' Meeting of Alpitour voted to increase capital stock for a total of € 17.8 million, of which € 6.5 million was in cash and € 11.3 million by contribution of the investments held in Welcome Travel Group S.p.A. and in Neos S.p.A. by the parent company NHT New Holding for Tourism B.V.. After this transaction, Alpitour took over the role of holding company of the tourism sector, operating directly as a tour operator and holding control of all the other sectors connected with the tourism business (incoming, hotel management, distribution and aviation).

After a 2003 marked by weak economic performance and disturbed by unfavorable external factors (the political crisis in Iraq, the Sars health emergency in the East and terrorism fears), demand in the tourism sector grew in 2003/2004, a fact that first became evident in the 2003 summer season.
In this scenario, the Alpitour Group consolidated its presence and increased overall market share through its various brands.
The tourism sector remains at a high level of competitiveness, confirmed by very aggressive sales policies on the part of operators in terms of prices and discounts offered on some of the most popular destinations. The propensity of customers to delay vacation reservations until just a few days before departure to take advantage of last minute offers also remains high.
To meet this situation and keep sales at discount prices at a normal level, the Group's operators launched early booking campaigns where final customers were offered lower prices for reservations made a great deal in advance. By using this promotional tool, the Alpitour Group achieved a significant improvement in programming, especially for the summer, and an optimization in the costs and the risks associated both with land-based services and seat availability on flights.

The key consolidated results of the Alpitour Group for the year 2003/2004 can be summarized as follows:

			Change	
€ in millions	**2003/2004**	2002/2003	Amount	%
Net revenues	**1,108.5**	932.9	175.6	18.8
Operating income	**29.6**	29.8	(0.2)	-0.7
Net income - Group	**3.4**	0.7	2.7	n.s.
Stockholders' equity - Group	**79.6**	63.5	16.1	25.4
Consolidated net financial position	**(108.2)**	(78.2)	(30.0)	38.4

Net revenues of € 1,108.5 million were reported in 2003/2004, with an increase of approximately 19% compared to 2002/2003. Such increase includes the effects of the first-time line-by-line consolidation of Neos and the Welcome Travel Group. Net of these effects, consolidated net revenues of the Group show a significant increase all the same, equal to 15%.

The consolidated revenues of the Alpitour Group by sector are presented below:

			Change	
€ in millions	**2003/2004**	2002/2003	Amount	%
Tour operating	**927.7**	811.1	116.6	14.4
Incoming	**217.4**	193.4	24.0	12.4
Hotel management	**92.7**	77.4	15.3	19.8
Aviation	**73.6**	0.0	73.6	n.s.
Distribution	**23.5**	0.0	23.5	n.s.
Total	**1,334.9**	1,081.9	253.0	23.4
Elimination of infragroup transactions	**(226.4)**	(149.1)	(77.3)	51.8
Total	**1,108.5**	932.8	175.7	18.8

As far as tour operating is concerned, 2003/2004 recorded a 14.4% increase in sales. This increase is principally due to a recovery in demand, especially during the summer season, combined with the performance registered by the Group's brands, as well as the increase in the sales of the "incentive" sector.

With regard to volumes, in 2003/2004 there were 1,078 thousand travelers compared to 950 thousand recorded in the prior year, with an increase of more than 13%.

Travel, in 2003/2004, to Egypt (Red Sea and classic Egypt) picked up considerably and significant increases were recorded in medium-haul destinations in the eastern Mediterranean (Tunisia, Greece and Turkey) and the major African destinations (Tanzania, Cape Verde and Kenya). As for destinations in the area of Spain, although the Canary Islands and continental Spain recorded a decline, whereas the Balearic Islands registered a positive trend.

Similar to what has transpired in the Italian tourism sector in general, travel to Italian destinations is below expectations and less than the previous year.

In reference to long-haul destinations, the Caribbean area consolidated its position and significant increases were recorded in destinations to Mexico (+20%).

The incoming sector, headed by the Jumboturismo Group, reported consolidated sales of approximately € 217.4 million in 2003/2004, including € 117.7 million in sales to the Alpitour Group.

The increase in sales compared to 2002/2003, equal to 12.4%, is due to both the growth of volumes from third-party operators (+9%) and those contributed by the operators of the Group (+9%).

As regards third-party operators, the traffic brought by these operators (mainly British, Irish and Dutch) totaled 655 thousand travelers compared to 601 thousand in 2002/2003, whereas the volumes contributed by the tour operators of the Group totaled 432 thousand compared to 396 thousand in the prior year.

The hotel management sector recorded a significant increase in consolidated sales, from € 77.4 million in the prior year to € 92.7 million. The total includes € 43 million in sales to the tour operators of the Group. The increase can principally be ascribed to the higher volumes contributed by the tour operators of the Group and the growth of Altamarea's activities on the Italian market.

The hotel resorts owned by the group, which are marketed under the brands of "Bravo Club" by Alpitour and "Sea Club" by Francorosso, recorded a presence of approximately 1,100 thousand in 2003/2004.

The Italian hotel facilities operated by Altamarea, instead, recorded a presence of approximately 593 thousand.

The “aviation” division which is headed by the Neos airline company, posted total revenues of approximately € 73.6 million, including € 55.5 million in revenues from the Group’s operators. Neos currently has a fleet of four B 737-800 airplanes, located at the airports of Milan Malpensa, Verona and Bologna and operates on the major short/medium-haul routes in the Mediterranean area and Egypt.
Neos carried more than 618 thousand passengers during the year.
The beginning of the new year signaled the start of long-haul trips by Neos that initially are being made with one rented B 767-300 plane, which, when the business is fully operational, will be followed by another two rented B 767-300. The growth of this business will allow the Group to provide a product with a high qualitative standard also on long-haul routes.

The distribution sector, which reported sales of € 23.5 million (including € 3.7 million of sales to the Group), principally operates through the Welcome Group travel agency network, which at present encompasses 337 affiliate agencies and 35 owned agencies.
Investments made during the last two years, combined with more effective action to coordinate the activities of the owned points of sale and a higher growth in the travel organization activities as compared solely to the simple brokering business, allowed the distribution division to report a significant increase in sales and margins compared to 2002/2003.

The growth of sales volumes and the change in the scope of consolidation led to a significant increase in the gross operating profit which rose from € 108.6 million in 2002/2003 to a corresponding figure of € 153.9 million in 2003/2004. This amount was considerably impacted by the consolidation of Neos and Altamarea.
Operating income is € 29.6 million and basically in line with that of the prior year. The reduction at the level of operating margin compared to the gross margin can mainly be ascribed to structure costs, particularly personnel costs (€ 86.7 million) and costs for leases and rentals (€ 33.9 million).
Leases and rentals chiefly comprise the rent of hotel facilities (€ 12.2 million) and airplane rentals and leases (€ 12.8 million). These show an increase of € 19.9 million compared to the prior year mainly because of the first-time line-by-line consolidation of Neos and Welcome Travel Group, as well as the inroads made in the hotel business on the Italian market by Altamarea. The increment in personnel costs (+39%) is also primarily on account of the line-by-line consolidation of Neos and Welcome Travel Group and the growth of the hotel management sector in Italy.

Notwithstanding the uncertainty of the economy and the reality of an unstable international geo-political situation, which have put tourism operators in an undoubtedly challenging operating position, 2003/2004 nevertheless brought the Alpitour Group an overall positive result which was influenced by the significant growth in terms of volumes and an increasingly better and more efficient integration among the various sectors of its tourism business.

The new “Alpitour World” brand was presented in January 2005 and will gradually take its place alongside the various other brands of the business. Besides focusing on the completeness of the Group’s tourism offering, the brand will constitute an easily recognizable “name” that will be able to guarantee the quality of Alpitour’s products and services.

laRinascente

(99.21% of ordinary capital stock and 99.06% of savings capital stock (class B), through Eurofind Textile)

2004 represents the first year of the La Rinascente S.p.A. Group, which came into being as a result of the spin-off of so-called textile area, consisting of the La Rinascente department stores and UPIM, to the new beneficiary La Rinascente S.p.A. by the ex-La Rinascente S.p.A..
The spin-off had effect for legal and tax purposes on October 27, 2004 and effect retroactively for accounting purposes at January 1, 2004.

From a corporate standpoint, the La Rinascente S.p.A. Group is composed of the newly-formed group holding company, La Rinascente S.p.A., the operating subsidiaries Rinascente/Upim S.p.A., to which ex-La Rinascente S.p.A. contributed, effective January 1, 2004, the business segments relating to the La Rinascente department stores and UPIM and Duomo Ristorazione S.r.l., three wholly-owned non-operating real estate companies and the 50%-owned company Immobiliare Colonna 92 S.r.l..
In February 2005, an agreement was sealed for the sale of the investment in Immobiliare Colonna 92 S.r.l. to the Lamaro Group, which holds the remaining 50%, for € 7 million.

In 2004, the general economic scenario was not able to rely on internal and international conditions to bring about a recovery after the already negative situation of previous years.
The climate of confidence by households remained at record lows causing particularly cautious behavior in consumption choices. The prudent attitude demonstrated by the consumer became even more resolute when faced with purchases made on retail sales channels.

The two banners of the company tackled the difficult situation of demand by instituting actions aimed at best satisfying the new requirements expressed by the clientele, by improving price competitiveness, the merchandise assortment, the level of service and the welcome at the point of sale. In particular:

- Upim, concentrated its energies on improving its new business model, pursuing the transformation of the Variety Store formula to the new Multispecialty Store format based on five interactive merchandise modules which identify the world of apparel (women, men and children), cosmetics and the home.
  The intricate operation affected all organizational and operational aspects, from the store layout, to the supply chain, to information technology and to internal and external communication.
  As these five worlds were being developed, each of which offers an extensive merchandise assortment, new opportunities also came along for franchising.
  Moreover, three new stores were added in the malls of Shopping Centers.
- The La Rinascente departments stores have substantially completed the restructuring program of their network. This has led to the refurbishment of all the branches, in many cases with the added enhancement of new supplementary services such as food and refreshments and hair styling.
  Special care was paid to the product, focusing attention on the correct mix, private labels and prestigious brand names and on competitive price positioning.
  With a view to the planning of new commercial formulas, after the first experience in Rome-Galleria Colonna, the Jam Store, targeting a typically young/youth market, opened at the La Rinascente department store in Milan-Duomo.

The consolidated results of the Group in 2004 can be summarized as follows:

€ in millions	**2004**	2003 (a)	Change Amount	 %
Gross sales	**925.4**	883.1	42.3	4.8
Gross operating profit	**67.7**	62.5	5.2	8.3
Operating income	**21.6**	18.3	3.3	18.0
Net income - Group	**8.8**	n.d.	n.d.	n.d.
Stockholders' equity - Group	**96.8**	88.0	8.8	10.0
Consolidated net financial position	**(45.3)**	(88.7)	43.4	n.s.

(a) Proforma 2003 data restated for purposes of comparison.

In 2004, the La Rinascente S.p.A. Group registered **gross sales** of € 925.4 million, with an increase of 4.8% compared to the sales reported by Upim and the La Rinascente department stores in 2003.

Gross operating profit (gross cash flow) amounts to € 67.7 million, with an increase of 8.3%.

Operating income is € 21.6 million, with a growth of 18%.
Financial income and expenses show a net expense balance of € 2.4 million. Extraordinary items, net, generated an income balance of € 5.8 million, mainly as a result of booking a portion of the deferred gain on the sale of the Cagliari, Milan-Certosa and Padua branch properties to ISIM; the gross gain amounts to € 29.3 million and, in accordance with the contractual agreements, is being deferred over five years, as required by Legislative Decree No. 310 dated December 26, 2004, article 16, published in the Gazzetta Ufficiale of December 30, 2004.
The amortization charge for goodwill is € 0.7 million.

Net income - Group amounts to € 8.8 million, after income taxes of € 15.6 million (of which € 7.1 million refers to IRAP taxes).

Net cash flows provided by operations (net income + amortization and depreciation) total € 55.6 million. Investments, net of disposals, in financial fixed assets, property, plant and equipment and intangible fixed assets amount to € 48.3 million.

Ifil Investissements (Luxembourg)

(100% of capital stock directly and through Ifil Investment Holding)

The key highlights for the year ended December 31, 2004 can be summarized as follows:

€ in millions	**2004**	2003	Change
Net income (loss)	**509.0**	(154.2)	663.2
Stockholders' equity	**1,993.1**	1,947.3	45.8
Financial fixed assets	**2,005.2**	1,917.6	87.6
Net financial position	**(7.0)**	34.1	(41.1)

The most important transactions which took place in 2004 are described in the section “Major events in 2004”.

Stockholders’ equity increased by € 45.8 million following the partial reimbursement of additional paid-in-capital to the parent companies IFIL (-€ 95.7 million) and Ifil Investment Holding (-€ 24.2 million), dividends paid or declared to these same companies (-€ 343.3 million in total) and the net income for the year (+€ 509 million).

Financial fixed assets comprise the following investments and bonds at December 31, 2004:

		12/31/2004			
€ in millions	Number of shares	% of capital stock	Carrying value	12/31/2003	Change

Financial fixed assets			**297.3**

Ifil International Finance Ltd (Ireland)

(100% of capital stock through Ifil Investissements)

The Company ended the year December 31, 2004 basically with a breakeven (a net income of € 0.3 million in 2003). Stockholders' equity amounts to € 1,054.8 million (€ 544.8 million at the end of 2003) and the net financial position is a liquidity position of € 1,054.9 million (a liquidity position of € 544.9 million at December 31, 2003).

The liquidity is mainly invested in three medium/long-term loans granted to Ifil Investissements and due in December 2006 (€ 550 million), January 2007 (€ 70 million) and January 2010 (€ 430 million) for a total of € 1,050 million.

Ifil Finance BV (Netherlands)

(100% of capital stock through Ifil Investissements)

Similarly to 2003, the Company ended the year 2004 basically with a breakeven and with a stockholders' equity of € 18.4 million, unchanged compared to the prior year.

The Company, put into a wind-up in 2004, holds 30.32% of the capital stock of NHT New Holding for Tourism, recorded with a carrying value of € 18.4 million. The net financial position at December 31, 2004 is in equilibrium.

Ifil Investment Holding (Netherlands)

(100% of capital stock)

The key highlights for the year ended December 31, 2004 can be summarized as follows:

€ in millions	**2004**	2003	Change
Net income	**92.3**	7.8	84.5
Stockholders' equity	**257.9**	165.6	92.3
Financial fixed assets	**261.0**	320.3	(59.3)
Net financial position	**(2.7)**	(155.0)	152.3

Financial fixed assets comprise the following investments:

		12/31/2004				
€ in millions	Number of shares	% of capital stock	Carrying value	12/31/2003	Change	
Ifil Investissements S.A.	224,194	20.18	**261.0**	285.2	(24.2)	(a)
Mediterranean Capital (ex-Ifil Capital B.V. - put into a wind-up)	11,000	100.00	**-**	35.1	(35.1)	(b)
Financial fixed assets			**261.0**	320.3	(59.3)	

(a) The reduction is due to the partial reimbursement of additional paid-in capital by Ifil Investissements for the same amount.
(b) The reduction is due to the payment of interim dividends and the reimbursement of reserves.

Mediterranean Capital BV (ex-Ifil Capital BV) (Netherlands)

(100% of capital stock through Ifil Investment Holding)

The key highlights for the year ended December 31, 2004 can be summarized as follows:

€ in millions	**2004**	2003	Change
Net income	**26.4**	- (a)	26.4
Stockholders' equity	**-**	35.1	(35.1)
Investment in Club Méditerranée	**-**	35.2	(35.2)
Net financial position	**-**	(0.1)	0.1

(a) Loss equal to € 31 thousand.

After the sale of 7.2% of the capital stock of Club Méditerranée mentioned earlier, which generated a gain of € 26.4 million (coinciding with the net income for the year), the Company repaid almost the entire stockholders' equity in the form of interim dividends and a reimbursement of reserves and was then put into a wind-up.

MOTION FOR APPROVAL OF THE FINANCIAL STATEMENTS AND APPROPRIATION OF NET INCOME FOR THE YEAR

To our Shareholders,

We ask you to approve the financial statements for the year ended December 31, 2004 and we propose the appropriation of net income of € 80,150,854 as follows:

		(in €)
To the legal reserve		160,000.00
To the ordinary shares, dividends of € 0.0683, for a maximum	70,937,248.57	
To the savings shares, dividends of € 0.089, for a maximum	3,327,088.78	
Shares outstanding are entitled to the proposed dividends, thus excluding the shares held by the company at the ex dividend date, for a total maximum		74,264,337.35
To the extraordinary reserve, the remaining amount, for a minimum		5,726,516.65
Net income for the year 2004		**80,150,854.00**

Board of Directors

Chairman	Gianluigi Gabetti
Vice Chairman	Pio Teodorani-Fabbri
Directors	Annibale Avogadro di Collobiano John Elkann Luca Ferrero Ventimiglia Gabriele Galateri di Genola Franzo Grande Stevens Andrea Nasi Lupo Rattazzi
Secretary to the Board of Directors	Pierluigi Bernasconi

General Manager	Virgilio Marrone

Board of Statutory Auditors

Chairman	Cesare Ferrero
Standing auditors	Giorgio Giorgi Lionello Jona Celesia
Alternate auditors	Giorgio Ferrino Paolo Piccatti

Independent Auditors	Deloitte & Touche S.p.A.

Expiry of term of office

The three-year term of office of the Board of Directors and the Board of Statutory Auditors, elected by the Stockholders' Meeting held on May 29, 2003, will expire concurrently with the Stockholders' Meeting called for the approval of the financial statements for the year ending December 31, 2005, as will the appointment of the independent auditors.

Corporate Governance

The Chairman, according to the bylaws (art. 21), may represent the Company, also before a court of law, and has signature powers.

Specific operating powers have been conferred to the Vice Chairman and the General Manager.

CHAIRMAN'S LETTER

To our Stockholders,

In 2005, the expansion phase of the global economy moved forward, driven, in particular, by growth in the United States and China. According to the International Monetary Fund (IMF), this year, the world economy grew by approximately 4.3%, still quite a high pace, but lower than that achieved in 2004 (+5.1%). The persisting, fairly favorable financial conditions limited the negative repercussions originating from the rise in the cost of oil. However, there were again very different trends of growth in the various main industrial areas: in the face of considerable expansion in the United States, activity in the Eurozone was weak, and there was a net deceleration in the United Kingdom; only in Japan was the recovery more rapid than expected, while China maintained its high growth rates.

Compared to 2004, GDP in the United States was 3.5%, less than the prior year (+4.2%) but, in any case, much higher than the figures reported in many countries in the Eurozone. The expansion of employment and the growth of consumption were the driving force behind the American economy until the end of summer 2005, only to contract suddenly due to the natural disasters, which affected part of the country. But it is precisely the reconstruction work in the areas hit by the disaster, partly financed by the national debt, which should provide the boost that will accelerate growth in 2006. However, the increase in the prices of energy led to a significant rise in consumer prices. High inflation (+4.3% in October 2005) drove the Federal Reserve to intervene, increasing the cost of money (4.5%). The current deficit in the balance of payments in 2005 exceeded 6% of domestic product, largely due to the high price of oil and the increase of imports from China.
It is precisely the trade deficit and its "twin problem" – the national deficit – which continue to constitute a serious source of concern for the American economy: the dual deficit, already referred to in the Letter to IFI Stockholders of last year, has for a long time been creating a serious imbalance which, although easily financed by the American economic system, is causing alarm for the international scenario in relation to the potential effects on American interest rates and on the U.S. dollar. In recent months, the U.S. dollar has increased in value against other strong currencies (the euro and the yen) partly as a result of higher interest rates, which generated a considerable flow of private capital from abroad.

In Europe, year-to-year growth was 1.3%, higher than in 2004. Countries which reported considerable growth include France (+1.4%), Spain (+3.4%) and the United Kingdom (+1.8%), while Germany (+0.9%) and Italy (+0.0%) showed only modest or zero growth. One source of concern for the ECB is the increase in consumer prices, forced up by the price of energy; in fact, in 2005, inflation settled at an average of 2.3%. The new estimated forecast for 2006 is an inflation rate for the Eurozone of between 1.5% and 2.1% and for 2007 between 1.6% and 2.8%. For this reason, the ECB has not ruled out that it might have to intervene again with a new increase in the cost of money (already raised from 2.25% to 2.50% in the last few months) in order to avoid an increase in prices that might slow down the much awaited economic recovery.

As far as Italy is concerned, recent figures published by ISTAT show that, in 2005, the value of GDP at market prices was equal to € 1,417,241 million, with an increase of 2% compared to 2004. The growth of GDP, valued at constant prices, on the other hand, was equal to zero, marking a net deceleration compared to the dynamics of the prior year (+1.1%). The balance of trade (the balance between exports and imports of goods and services) at current values shows a negative figure in 2005, for the first time since 2000, due largely to the rise in prices of energy products.
Despite this, growth prospects for our country over the next few years appear to be in line with the economic scenario in the Eurozone. According to estimates by the IMF, Italy should report a growth in GDP in the order of 1.5% both in 2006 and 2007. In this context, the first indications from ISTAT with regard to industrial production seem positive (+4.1% on an annual basis in January 2006), driven, in particular, by the strong growth of automotive production (+19.7% on an annual basis).
During 2005, the situation of the national debt deteriorated further. The net debt of the Public Administrations as a ratio of GDP was 4.1% compared to 3.4% in 2004. It increased in absolute value by € 10,265 million, rising to € 57,917 million. The deterioration in the dynamics of public expenditures requires immediate action to restore balance, so as not to jeopardize the prospects of higher growth forecast for 2006. With regard to the dynamics of consumer prices, the price index in Italy was impacted less by the increase in the price of energy than other countries in the Eurozone. According to figures from ISTAT, inflation in Italy in 2005 settled at an average of 2.2%.

Overall, despite some positive signs, the performance of the Italian economy in 2005 was stagnant.
For some time it has been obvious that what is limiting Italy's growth potential are not only cyclical factors, but a series of serious structural problems, which it becomes ever more urgent to solve, rapidly and with determination.
Competitiveness must become the priority objective for our country's policies: only by creating the broadest and most effective conditions for competition, understood as a stimulus capable of driving companies towards a more efficient use of resources, will it be possible to augment the competitiveness of our economic and production system on global markets.
To this end, it is necessary to pursue the objectives already laid down in last year's Letter: to create the conditions that will make it possible to significantly reduce the cost of energy, which, today, weighs more heavily on the companies of our country than in other European nations through investments geared to diversifying the sources and raising competition in accessing the networks; to sustain training, innovation and research, which is a strategic driver for the country's growth, with the introduction of tax credits on research expenditures; to support innovative start-ups and to relaunch public investments in this sector; to open up regulated markets, the professions and local public services more to competition, by reducing the weight of public influence; to promote greater efficiency in the Public Administration by introducing a greater simplification of procedures, strictness with regard to public expenditures and balance in taxation. Finally, the last and maybe the most important point, we must reduce tax and social security expenses which augment the cost of labor, by also completing the reform of the market, with the aim of increasing the flexibility of companies, creating growth and thus favoring an increase in the rate of employment.

*****

If we turn our attention to our Group, the year 2005 closed with very positive results. The consolidated profit increased to € 676 million from € 120 million in 2004, benefiting from the best result ever reported by the IFIL Group (a profit of € 1,090 million, compared to € 124 million in the prior year). In the statutory financial statements, the result was a profit of € 38.5 million, slightly higher than the € 37.7 million reported in 2004.

2005 was an extremely important year for IFIL. The most significant event was certainly the fact that it succeeded in maintaining its traditional role as the stockholder of reference in the Fiat Group, through the purchase of shares completed in September.
Defending the value of its stake, the opportunity of participating fully in the plan to turn around the company, and protecting the conditions of stability, which are vital prerequisites for the job undertaken by management were the decisive factors behind the purchase.
Another important investment was made by IFIL, namely the investment in Sanpaolo IMI, increasing the Group's stake in the Turin bank to almost 5% of the capital stock.
In addition, the monetization of the investment in La Rinascente, which began in 2004 with the sale of food operations, was completed. Sequana Capital moved in a similar direction, selling Permal Group to the American company Legg Mason.
The arrival of the new Chief Executive Officer and General Manager, Carlo Barel di Sant'Albano, and the new governance framework, with the appointment of Tiberto Brandolini D'Adda and John Elkann as Vice Chairmen, have laid the foundations for achieving new aims and creating value for the stockholders. In the pursuit of this objective, IFIL will also be able to rely on the undisputed professional skills of the management of Banca Leonardo with which our Group has recently developed ties of investment and collaboration.

At the end of March 2006, recognizing the opportunity of reducing IFI's net debt (which had grown to approximately € 305 million, also as a result of further investments in IFIL) in a context of growing market rates, the company's Board of Directors approved the sale of its stake in Exor Group to that same company, which has abundant liquidity and indicated that it was interested in the acquisition. The Exor Group will subsequently cancel those shares, thus reducing its capital stock. IFI is expected to receive proceeds of more than € 200 million.

*****

In the name of the Board of Directors I would like to thank our stockholders for the trust they have placed in us, the statutory auditors and independent auditors for their profound commitment, and the managers and all the employees of the company and its subsidiaries for their continued efforts and the results achieved.

Gianluigi Gabetti

IFI GROUP PROFILE

THE INVESTMENT PORTFOLIO

IFI – Istituto Finanziario Industriale S.p.A., is the controlling financial holding company of the Group headed by Giovanni Agnelli e C. S.a.p.az. The Company's assets are represented by the investments in IFIL Investments S.p.A., equal to approximately 64% of ordinary capital stock, and in Exor Group, equal to 29.3% of ordinary capital stock.

IFIL Investments S.p.A. (IFIL) is the investment company of the Group commanding two distinctive areas of operations: the active management of the investment in Fiat and the dynamic management of the other holdings.

Fiat, in which IFIL has a holding of more than 30% of ordinary and preferred capital stock, operates in the national and international automotive market as a manufacturer and distributor of automobiles (Fiat, Lancia, Alfa Romeo, Ferrari and Maserati), agricultural and construction equipment (CNH Global), commercial vehicles (Iveco), automotive components for these vehicles and the supply of related services (Magneti Marelli, Comau and Teksid), as well as publishing and communications (Itedi) and services for corporations (Business Solutions).

The other holdings which comprise the dynamically managed diversified portfolio are listed below.

Sequana Capital - ex-Worms & Cie - (52.78% holding) is a French-listed holding company with a portfolio comprising the following major investments:

- ArjoWiggins (100% holding), the world leader in the manufacture of high value-added paper products and, in Europe, leader in the manufacture of carbonless paper;
- Antalis (100% holding), the leading European group in the distribution of paper products for printing and writing;
- SGS (23.8% holding), a company listed on the Swiss stock exchange and leader in the verification, inspection and certification of product and service quality;

Sanpaolo IMI (5.86% holding of ordinary capital stock by IFIL) is a leading national banking group with over 3,000 branches throughout Italy;

Alpitour (100% holding) is the leading group in the tourist sector in Italy;

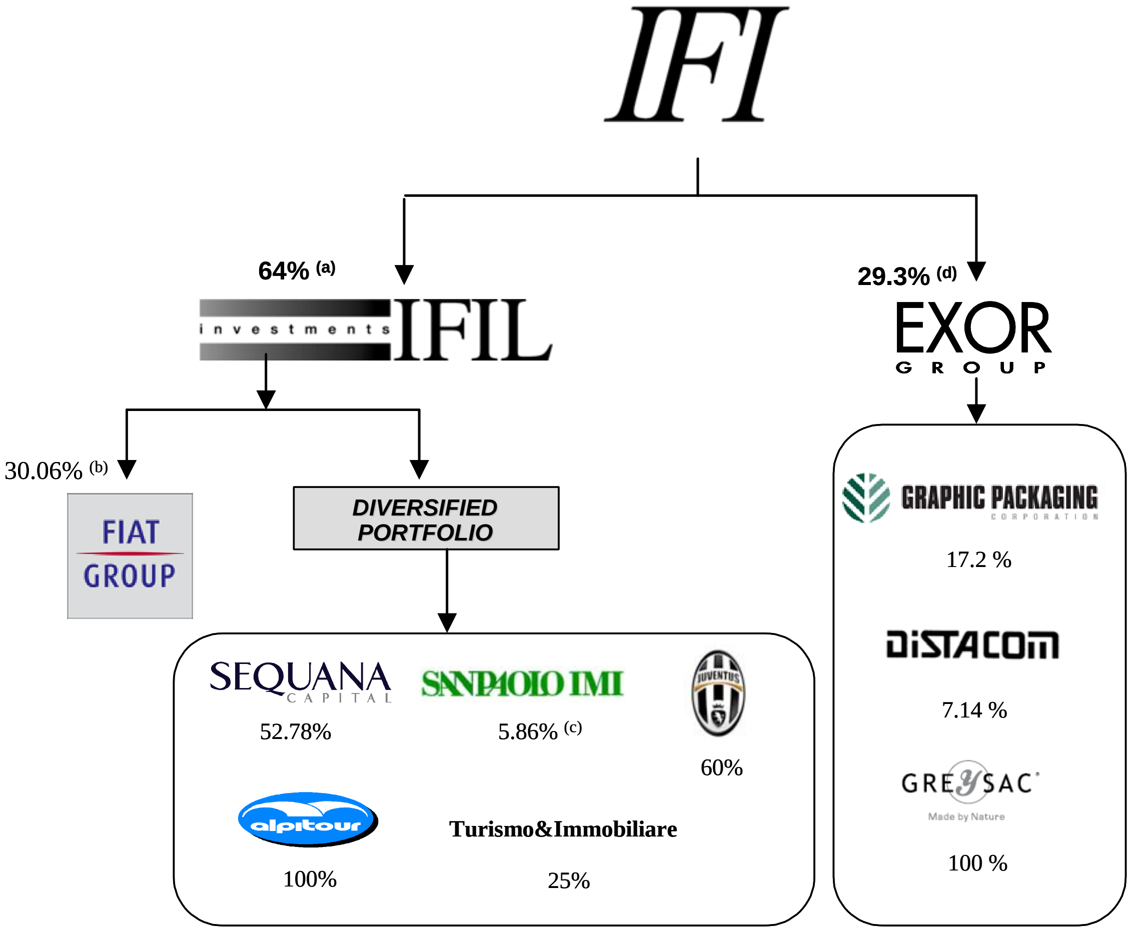
Juventus Football Club (60% holding by IFIL) is a company with more than one hundred years of history and an enviable record gained at various national and international sports events;

Turismo&Immobiliare (25% holding) is a company with a 49% stake in Italia Turismo (ex-Sviluppo Italia Turismo), the largest Italian real estate company for tourist and hotel properties with important investments in Apulia, Calabria, Basilicata, Sicily and Sardinia.

Exor Group is a Luxembourg holding company; its principal investments are the 17.2% stake in Graphic Packaging Corporation (a U.S.A. listed company in the packaging sector), the 100% holding in the French wine company Greysac (ex-Domaine Codem) and the 7.14% stake in Distacom (a company headquartered in Hong Kong operating in the telecommunications sector).

The IFI S.p.A. Board of Directors Meeting held on March 31, 2006 voted to sell the entire investment in Exor Group in order to reduce the debt of the company.

The following chart is updated to the end of March 2006 and presents the simplified structure of the investment portfolio. Percentage holdings refer to ordinary capital stock.



(a) IFI also holds 4.99% of savings capital stock.
(b) IFIL also holds 30.09% of preferred capital stock.
(c) Equal to 4.97% of capital stock.
(d) In the process of being sold.

KEY OPERATING AND FINANCIAL DATA

The key data of the IFI Group and IFI S.p.A. is presented below.

STOCKHOLDERS AND THE STOCK MARKET

Capital stock

IFI S.p.A.'s capital stock, fully subscribed to and paid-in, amounts to € 163,251,460 and consists of 86,450,000 ordinary shares and 76,801,460 preferred shares of par value € 1 each.

The directors have the right, for a period of five years from the resolution passed on April 22, 2003, to increase, at one or more times, also in divisible form, the capital stock up to a maximum of € 561,750,000.

The ordinary shares are held 100% by the parent, Giovanni Agnelli e C. S.a.p.az.

The preferred shares are listed on the Mercato Telematico Azionario (Electronic Trading Market) organized and operated by Borsa Italiana S.p.A.

The preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code (articles 10 and 13 of the bylaws). The preferred shares have the right to a preference dividend, which is not cumulative from one year to the next, equal to 5.17% of par value € 1 (article 27 of the bylaws).

IFI has approximately 13,000 preferred stockholders.
At the end of March 2006, the major preferred stockholders, indicated below, represent 69.27% of the class of stock.

Stockholders	%	Shares
K Capital Partners LLC Group	15.73	12,081,391

FINANCIAL COMMUNICATIONS AND INVESTOR RELATIONS

Activities surrounding relations with the financial community, the stockholders, the investors and the financial Press have continued during the course of the year also, where requested, through individual meetings.
The new corporate website www.gruppoifi.com which came online at the beginning of 2005 has made a contribution to the improvement of the presentation of the Group, rendering the information about the company more usable and timely.

In total, about 850 copies (in Italian and English) of the annual report, the first-half report and the quarterly reports have been distributed, and are also available on request.

MAJOR EVENTS IN 2005

Increase in the investment in IFIL

During March and April 2005, IFI purchased on the market 16,708,441 IFIL ordinary shares (1.61% of the class of stock) for an investment of € 55.5 million and 1,866,420 IFIL savings shares (4.99% of the class of stock) for an investment of € 6.4 million.
At December 31, 2005, IFI holds 660,491,840 IFIL ordinary shares, equal to 63.59% of the class of stock, and 1,866,420 IFIL savings shares, equal to 4.99% of the class of stock. The investment represents 61.56% of capital stock.

In the comments on the performance of the subsidiary IFIL (to which reference should be made), a description is provided about the transaction which, in September 2005, allowed the company to maintain its investment holding in Fiat S.p.A. unchanged.

IFI GROUP – REVIEW OF THE CONDENSED CONSOLIDATED RESULTS

In order to facilitate the analysis of the financial position and results of operations of the Group, it is IFI's practice to present "condensed" financial statements (balance sheet and income statement) for the period prepared by applying the "condensed" consolidation criteria. Such condensed consolidated financial statements are presented along with the annual consolidated financial statements and in the first-half report of each year. The quarterly consolidated data is also presented in the condensed format in the quarterly reports at March 31 and September 30 of each year.

In the preparation of the condensed consolidated balance sheet and income statement, the investments in IFIL and in Exor Group are accounted for by the equity method in the financial statements or accounting data drawn up by IFI S.p.A. in accordance with IFRS.

The 2004 data presented for purposes of comparison has been restated in accordance with IFRS.

Consolidated profit - IFI Group for the year 2005 is € 675.6 million (€ 120 million in 2004). The positive change of € 555.6 million is due to the considerable increase in the result of the IFIL Group which, in turn, benefited from the very positive results achieved by the Fiat Group and the Sequana Capital Group, partly due to nonrecurring transactions.

The **Group's share of the earnings (losses) of companies accounted for by the equity method** is an earnings figure of € 693 million (€ 133.1 million in 2004). The positive change of € 559.9 million is due to a higher contribution by the IFIL Group (+€ 604.9 million), which partly offsets the lower earnings by Exor Group (-€ 16.5 million) and lower consolidation adjustments (-€ 28.5 million).

The **net financial position of IFI S.p.A.** at December 31, 2005 is a net debt position of € 277.7 million, which is € 12 million higher than that at the end of 2004 (-€ 265.7 million).

Consolidated equity – Group at December 31, 2005 amounts to € 3,084 million (€ 2,123.3 million at the end of 2004). The increase of € 960.7 million is due to the consolidated profit of the Group for the year of € 675.6 million and to net positive changes in the equity of the holdings for the remaining amount of € 285.1 million, including translation differences of € 175.5 million and other net changes of € 109.6 million.

The carrying amount of **investments** at December 31, 2005 is € 3,352.9 million. The increase of € 980.5 million compared to investments at year-end 2004 (€ 2,372.4 million) is due to purchases of IFIL stock in 2005 (+€ 61.9 million) and IFI's share (+€ 918.6 million) of the positive changes in the equity of the holdings IFIL and Exor Group.

The condensed consolidated income statement and balance sheet and comments thereon are presented on the following pages.

IFI Group - Condensed consolidated income statement

IFI S.p.A. – REVIEW OF THE RESULTS OF THE STATUTORY FINANCIAL STATEMENTS

The statutory financial statements of IFI S.p.A. for the year ended December 31, 2005 have been prepared in accordance with the provisions of the Italian Civil Code.

The company has the obligation of adopting International Financial Reporting Standards (IFRS) starting from the year ending December 31, 2006. Additional information is provided under "Transition to International Financial Reporting Standards (IFRS) by IFI S.p.A.".

The net income of IFI S.p.A. for the year 2005 is € 38.5 million, a slight increase (approximately +2%) compared to € 37.7 million in 2004.

The condensed income statement and balance sheet and comments on the most important items are presented below.

IFI S.p.A. - Income statement - condensed

€ in millions	Note	2005	2004	Change
Dividends	1	55.9	50.6	5.3
Financial expenses, net	2	(9.1)	(11.5)	2.4
General expenses, net	3	(4.1)	(4.0)	(0.1)
Other expenses, net	4	(5.6)	(1.4)	(4.2)

		278.7	14.4	262.7	14.0	16.0
Other liabilities and reserves		9.3	0.5	9.9	0.5	(0.6)
Total liabilities and stockholders' equity		1,931.2	100.0	1,877.3	100.0	53.9

1. **Dividends**
   Dividends amount to € 55.9 million (€ 50.6 million in 2004). The increase of € 5.3 million is due to higher dividends received from IFIL (from € 39.9 million to € 45.2 million). The dividends received from Exor Group (€ 10.6 million) and from Emittenti Titoli (€ 0.1 million) are unchanged from the prior year.

2. **Financial expenses, net**
   Financial expenses, net, totaling € 9.1 million show a reduction of € 2.4 million compared to 2004 (€ 11.5 million) due mainly to new debt with lower costs compared to the debt which fell due during the year.

3. **General expenses, net**
   General expenses, net, of € 4.1 million are basically unchanged compared to the year 2004 (€ 4.0 million).

4. **Other expenses, net**
   Other expenses, net, totaling € 5.6 million, include extraordinary compensation of € 5 million approved for the Chairman of the Board of Directors on November 11, 2005 and € 0.6 million for nonrecurring consulting fees.

5. **Deferred income taxes**
   The taxable income calculated in accordance with tax laws did not generate current income taxes for the year 2005 but excess deferred income taxes set aside in prior years were released to income for € 1.4 million.

6. **Financial fixed assets**

€ in millions	12/31/2005	12/31/2004	Change
Investments			
IFIL S.p.A. (subsidiary)			
- ordinary shares	1,731.7	1,676.2	55.5
- savings shares	6.4	0.0	6.4
	1,738.1	1,676.2	61.9
Exor Group S.A. (associated company)	102.5	102.5	0.0
Other companies:			
- Deutsche Morgan Grenfell Capital Italy S.A.	0.4	0.4	0.0
- Emittenti Titoli S.p.A.	0.3	0.3	0.0
	1,841.3	1,779.4	61.9
Treasury stock - IFI S.p.A. preferred shares	70.5	70.5	0.0
Receivables - TLcom	-	8.2	(8.2)
Total financial fixed assets	1,911.8	1,858.1	53.7

The total increase of € 61.9 million in the investment in IFIL originates from the purchase on the market of 16,708,441 ordinary shares (1.61% of the class of stock) for € 55.5 million and 1,866,420 savings shares (4.99% of the class of stock) for € 6.4 million.

IFI holds 5,360,300 IFI preferred shares, equal to 6.98% of the class of stock and 3.28% of capital stock, carried for a total of € 70.5 million (€ 13.15 per share).

The investment in TLcom (€ 8.2 million) was sold to the United States fund Access Capital Technology for € 4.6 million. Considering the provision for risks of € 4 million set aside in prior years, a gain of € 422 thousand was realized on the sale.

A comparison between the carrying amounts and the market prices of listed financial fixed assets shows the following unrealized gains:

€ in millions	IFIL ordinary shares	IFIL savings shares	IFI preferred shares	Total
Market price at December 30, 2005	649.3	0.7	3.9	653.9
Average market price in second half 2005	638.8	0.3	-	639.1
Market price at March 24, 2006, update	1,363.3	2.4	20.1	1,385.8

7. Other assets

Other assets of € 19.4 million include taxes receivable of € 18.2 million and other current assets of € 1.2 million.

8. Stockholders' equity

Stockholders' equity amounts to € 1,643.2 million at December 31, 2005 (€ 1,604.7 million at December 31, 2004). The increase of € 38.5 million coincides with the net income for the year 2005.

9. Net financial position

The data presented below is prepared in accordance with Italian GAAP and is therefore different from the data presented in the review of the condensed consolidated data which is prepared in accordance with IFRS.

The net financial position of IFI S.p.A. at December 31, 2005 shows a debt position of € 279.5 million (a debt position of € 263.8 million at December 31, 2004). Details are as follows:

	12/31/2005			12/31/2004		
€ in millions	Current	Non-current	Total	Current	Non-current	Total
Cash	0.1		0.1	0.1		0.1
Borrowings from banks	(104.8)	(160.0)	(264.8)	(208.5)	(30.0)	(238.5)
Payable to Giovanni Agnelli e C.	(13.9)		(13.9)	(24.2)		(24.2)
Accrued financial expenses	(0.9)		(0.9)	(1.2)		(1.2)
Total financial liabilities	(119.6)	(160.0)	(279.6)	(233.9)	(30.0)	(263.9)
Net financial position of IFI S.p.A.	(119.5)	(160.0)	(279.5)	(233.8)	(30.0)	(263.8)

The negative change in the net financial position of € 15.7 million is due to the following flows:

€ in millions	
Net financial position of IFI S.p.A. at December 31, 2004	(263.8)
Dividends received from IFIL (€ 45.2 million), Exor Group (€ 10.6 million) and Emittenti Titoli (€ 0.1 million)	55.9
Purchase of IFIL ordinary shares (1.61% of the class of stock)	(55.5)
Purchase of IFIL savings shares (4.99% of the class of stock)	(6.4)
Financial expenses, net	(9.1)
Sale of Tlcom receivable	4.6
General expenses, net	(4.1)
Purchase of tax receivables from IFIL S.p.A.	(0.4)
Other changes, net	(0.7)
Net change during the year	(15.7)
Net financial position of IFI S.p.A. at December 31, 2005	(279.5)

TRANSITION TO INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) BY IFI S.p.A.

As a result of the implementation of European Regulation No. 1606 of July 19, 2002, the IFI Group has adopted International Financial Reporting Standards (IFRS) for the preparation of its consolidated financial statements with effect from 2005. On the basis of Italian law implementing this regulation, the statutory financial statements of the parent, IFI S.p.A., will be prepared in accordance with these standards starting from 2006.
As a consequence, IFI S.p.A. is currently making the transition to IFRS for its statutory financial statements and will report its 2006 first-half results and con la comparazione del primo semestre 2005 (2005 comparative figures) in accordance with IFRS.

The following commentary describes the policies that IFI S.p.A. will adopt in preparing its IFRS opening balance sheet at January 1, 2005, as well as the main differences in relation to Italian GAAP used to prepare its statutory financial statements up until December 31, 2005.

The opening balance sheet of IFI S.p.A. at January 1, 2005 will be prepared in accordance with IFRS 1 – First-time Adoption of International Financial Reporting Standards, on the basis of the IFRS applicable from January 1, 2006, as published at December 31, 2005. In particular, the amendments to IAS 39 and IFRS 4 issued in 2005 and effective from January 1, 2006 will be applied, with regard to the measurement and recognition of financial guarantee contracts in the financial statements of the guarantor and the limitation in the use of the “fair value option” to financial instruments satisfying specific conditions.

As allowed by the amendment to IAS 19 – Employee benefits, issued by the IASB in December 2004, the company elected to recognize actuarial gains and losses immediately in the period in which they occur, outside the income statement, in a specific item of equity.

FIRST-TIME ADOPTION OF IFRS

IFI S.p.A. will apply the accounting standards in force at the reporting date for its first IFRS financial statements retrospectively to all periods presented and to the opening balance sheet, except for one permitted exemption adopted, as allowed by IFRS 1, and described in the following paragraph.

The opening IFRS balance sheet at January 1, 2005 will therefore reflect the following differences with the statutory balance sheet prepared at December 31, 2004 in accordance with Italian GAAP:

- all assets and liabilities qualifying for recognition under IFRS, including assets and liabilities that were not recognized under Italian GAAP, will be recognized and measured in accordance with IFRS;
- all assets and liabilities recognized under Italian GAAP that do not qualify for recognition under IFRS will be eliminated;
- certain balance sheet items will be reclassified in accordance with IFRS.

The impact of these adjustments will be recognized directly in opening equity at January 1, 2005, the date of transition to IFRS.

In summary, the assets and liabilities to be included in the statutory financial statements of IFI S.p.A. prepared in accordance with IFRS will be recognized and measured in the same manner as that used to prepare the financial statements drafted for inclusion in the Group’s consolidated financial statements, in accordance with IFRS 1, with the exception of consolidation entries.

OPTIONAL EXEMPTION ADOPTED BY IFI S.p.A.

Employee benefits: IFI S.p.A. has elected to recognize all cumulative actuarial gains and losses that existed at January 1, 2005 with a contra-entry to equity reserves.

DESCRIPTION OF THE MAIN DIFFERENCES BETWEEN ITALIAN GAAP AND IFRS

The following paragraphs provide a description of the main differences between Italian GAAP and IFRS that will have effect on the statutory financial statements of IFI S.p.A.

Write-off of deferred costs

Under Italian GAAP, IFI S.p.A. defers and amortizes certain costs (mainly start-up and expansion costs). IFRS require these to be expensed when incurred.

In particular, costs incurred in connection with capital stock increases which are deferred and amortized under Italian GAAP are deducted directly from the proceeds of the increase and debited to equity under IFRS.

Valuation of investments not held as current assets

In the financial statements of IFI S.p.A. prepared in accordance with Italian GAAP, investments in subsidiaries and in associates included under financial fixed assets are stated at historical cost inclusive of incidental charges determined using the Last-In First-Out method of annual lots, which is written down in the event of an impairment loss; the impairment loss is reversed if in subsequent years the reasons for the writedown no longer apply.

IAS 27 requires that such investments be either recorded at cost, using the “average cost” method or at their fair value. If there are reasons to believe that all or part of the cost cannot be recovered, the carrying amount must be reduced to the recoverable amount of the investment in accordance with IAS 36. If this loss is subsequently reduced or is entirely recovered, the carrying amount is increased back up to the newly estimated recoverable amount, which may not exceed the amount that would have been determined if no impairment loss had been recorded. Any restoration of the carrying amount is recorded immediately in the income statement.
The analysis of the effects of the adoption of these methods is currently being examined.

Treasury stock

In accordance with Italian GAAP, IFI S.p.A. accounts for treasury stock as an asset and records any related value adjustments and gains or losses on disposal in the income statement.

Under IFRS, treasury stock is deducted from equity and all movements in treasury stock are recorded in equity rather than in the income statement.

Sale of receivables

IFI S.p.A. could sell a part of its trade and tax receivables through factoring transactions which may be with or without recourse to the seller; certain factoring agreements without recourse include deferred purchase price clauses (i.e. the payment of a minority portion of the purchase price is conditional upon the full collection of the receivables), and require a first loss guarantee of the seller up to a limited amount or imply a continuing significant exposure to the cash flows from receivables sold.

Under Italian GAAP, all receivables sold through factoring transactions (both with and without recourse) can be derecognized.

IAS 39 permits the derecognition from assets of a financial asset when, and only when, the risks and rewards of the ownership of the assets are substantially transferred: consequently, all receivables sold with recourse, and part of those sold without recourse, would be reinstated in the IFRS balance sheet.

Employee benefits

Employee severance indemnities (TFR), under Italian GAAP, are accounted for pursuant to specific statutory rules. As set forth in IAS 19 – Employee Benefits, employee severance indemnities are considered defined benefit obligations, and, as a result, are recalculated using the “Projected Unit Credit Method”.

IFI S.p.A. also grants employees and former employees various forms of benefits (retirement incentives, compensation, bonuses) under past or current supplemental company or individual agreements that are qualified as defined benefit pension plans, just like other long-term benefits. Although these benefits are accrued in the statutory financial statements in a manner that is consistent with Italian GAAP, under IFRS they will need to be accounted for in accordance with IAS 19.

IFI S.p.A. has elected to recognize all accumulated actuarial gains and losses at January 1, 2005 as movements in equity.

Stock options

No expenses are recognized for share-based payment transactions under Italian GAAP.

In accordance with IFRS 2 – Share-based payment, the full fair value amount of stock options at the grant date is reflected in the income statement on a straight-line basis over the period from the grant date to the vesting date, with the contra-entry recognized directly in equity. Changes in fair value after the grant date have no impact on the initial measurement.

At December 31, 2005, IFI S.p.A. has not approved any stock option plans.

Recognition and measurement of financial receivables and financial payables

Financial receivables can be immediately converted into cash and are subject to an insignificant risk of change in value. The transition to IFRS will not impact their amount.

Financial payables at January 1, 2005 are principally related to bank debt. In the statutory financial statements of IFI S.p.A., under Italian GAAP, the gross amount received is recognized. The various fees owed to the lending banks (for the organization of the facility, for the share subscription commitment, etc.) at different dates (at the beginning, over the years, and upon maturity) are charged against income over the term of the facility (on a pro-rated basis).

Under IFRS, financial payables are recognized at the amounts received stated net of transaction costs and are subsequently measured at their amortized cost using the effective interest method. Adoption of IFRS will thus entail recomputation of the expenses charged to income for the various years affected, with a net effect on equity at January 1, 2005.

Recognition and measurement of derivatives

Those transactions which, according to IFI S.p.A.'s policy for risk management, are able to satisfy the conditions stated by the accounting principle for hedge accounting treatment, are designated as hedging transactions; other transactions which do not satisfy such conditions, although set up for the purpose of managing risk exposure (inasmuch as speculative transactions are not permitted as a rule), are designated as trading transactions.

The transactions put into place by IFI S.p.A. up to December 31, 2005 fall under the financial instruments designated as hedging instruments.

Under Italian GAAP, the instrument is valued symmetrically with the underlying hedged item. Therefore, where the hedged item has not been adjusted to fair value in the financial statements, the hedging instrument has also not been adjusted. Similarly, where the hedged item has not yet been recorded in the financial statements (hedging of future flows), the valuation of the hedging instrument at fair value is deferred.

Under IFRS, in the case of a cash flow hedge (hedging of future flows), the portion of gain or loss on the hedging instrument that is determined to be an effective hedge is recognized directly in equity; the ineffective portion of the gain or loss is recognized in the income statement. Consequently, with reference to the effective portion, only a difference in equity will arise between Italian GAAP and IFRS.

RELATED PARTY DISCLOSURES

The Board of Directors has adopted principles of conduct for carrying out transactions with related parties (available on the corporate website of the company: http://www.gruppoifi.com).

These principles of conduct state that the Board of Directors must approve the following transactions:
- atypical and/or unusual intragroup transactions, meaning transactions which, because of their significance and/or relevance, nature of the counterparties, subject of the transaction (also in relation to transactions of ordinary administration), manner of determining the transfer price and timing of the event (close to the end of the year) may give rise to reservations about: the correctness and/or completeness of the information in the financial statements, conflicts of interest, safeguarding of the company's assets and protection of minority stockholders;
- transactions with subsidiaries for amounts of more than 1% of IFI's portfolio value as shown in the most recent approved accounting documents (quarterly reports, first-half report and annual financial statements) as of the date of the transaction;
- transactions with other related parties for amounts of more than € 3 million.

The bodies with delegated powers shall supply the Board with information concerning such transactions especially with regard to the nature of the relationship, the manner of execution, the economic terms and timing, the valuation criteria adopted and any risks to the company.

Whenever a director has an interest in the transaction (even a potential interest), the nature, terms, origin and import scope of such interest must be duly communicated to the Board of Directors.

In the event the nature, the amount and the manner of execution of the transaction with a related party require it, the Board of Directors can avail itself of the assistance of one or more independent experts, chosen from among individuals with recognized professional characteristics and expertise on the matter in question so that an opinion can be obtained on the economic terms of the transaction and its legitimacy, as well as the technical means and manner of execution of the transaction.
The Board of Directors and the Board of Statutory Auditors must in any case be informed of any transactions with other related parties different from those mentioned above.

The identification of relationships and transactions with related parties is made in accordance with IAS 24.

With regard to 2005, transactions among IFI and the identified related parties have been entered into in conformity with the provisions of existing laws, based upon an evaluation of reciprocal economic gain.

The most important transactions can be summarized as follows:

- sureties granted in the past in favor of Federazione Italiana Giuoco Calcio – Lega Nazionale Professionisti (F.I.G.C. - L.N.P.) on behalf of Juventus Football Club for a residual amount of € 4.1 million at the beginning of 2005, released in May 2005, remunerated at market conditions;
- purchase of tax receivables from IFIL (€ 0.4 million);
- a loan secured at floating monthly market rates from the parent, Giovanni Agnelli e C.;
- services rendered to and costs recovered from subsidiaries and associated companies;
- services rendered to the parent, Giovanni Agnelli e C. and its subsidiary GA Servizi.

The effects on the balance sheet and the income statement of transactions among IFI S.p.A., Group companies and other related parties can be summarized as follows:

	12/31/2005		2005	
€ in thousands	Receivables	Payables	Income	Expenses
Giovanni Agnelli e C. S.a.p.az.	10	13,868	33	662
Exor Group S.A.	90		180	
Juventus Football Club S.p.A.	1		6	
IFIL Investments S.p.A.	13	23	33	65
Soiem S.p.A.		120		400
Fiat Group companies	2	29	41	237
Alpitour Group companies				5
Total	116	14,040	293	1,369

During the course of the year, the director Franzo Grande Stevens rendered professional services to IFI for € 141 thousand, to IFIL for € 141 thousand and to Fiat S.p.A. for € 940 thousand (activities performed in his capacity as Secretary to the Board of Directors).

Additional information and details are disclosed in the “Notes to the statutory financial statements of IFI S.p.A.” and in the “Notes to the consolidated financial statements”.

On the basis of information received from the companies of the Group, there are no atypical or unusual transactions to report.

STOCK OPTION PLANS

The Board of Directors of IFI S.p.A. has not approved any stock option plans.

However, the following should be mentioned:

1) under the stock option plans approved in May 2000 by the Board of Directors of the subsidiary IFIL S.p.A., options rights were granted between 2000 and 2003 to Gabriele Galateri di Genola, Director, to Virgilio Marrone, General Manager and to two managers of IFI S.p.A. exercisable up to December 31, 2006 for the subscription of new IFIL ordinary shares.

   A summary of these option rights is presented as follows:

	Beneficiaries				Exercise Price		
	Gabriele Galateri di Genola	Virgilio Marrone	Other managers	Total	exact		average
Options granted							
year 2000	154,000	39,000	56,500	249,500	6.997	(a)	
year 2001	211,500	54,400	21,050	286,950	6.109	(a)	
year 2002	311,100	85,800	37,850	434,750	4.520	(a)	
year 2003	-	60,000	60,000	120,000	1.850		
Total at December 31, 2004	676,600	239,200	175,400	1,091,200			5.21
Options exercised in 2005		(60,000)	(60,000)	(120,000)	1.850		
Total at December 31, 2005	676,600	179,200	115,400	971,200			5.63

   (a) Exercise price adjusted to take into account the IFIL S.p.A. cash capital stock increase in July 2003.

2) Under the stock option plan approved in September 2003 by the Board of Directors of IFIL S.p.A., 532,000 options were granted to Gianluigi Gabetti for the same number of ordinary shares held by IFIL S.p.A. at the price of € 2.28 each, exercisable up to December 31, 2006;

3) on December 15, 2000, under the stock option plan approved by the subsidiary Alpitour S.p.A., 153,500 options were granted to Gabriele Galateri di Genola for the subscription of the same number of new Alpitour shares at the price of € 6.73 per share. Such options are exercisable up to the end of August 2006. The Alpitour shares that come from the plan can be sold to Alpitour; however, the price established by the Board of Directors of the company is a negative figure due to the results reported by the Alpitour Group in 2005.

The Notes to the consolidated financial statements at December 31, 2005 of the IFI Group describe the stock option plans approved by the subsidiaries consolidated line-by-line.

OTHER INFORMATION

Management and coordination

IFI S.p.A. is not subject to management and coordination on the part of companies or entities.

Programming document on security

The company has prepared the programming document on security on December 14, 2005 for the year 2005 according to the provisions of Legislative Decree No. 196 dated June 30, 2003, Attachment B – technical specifications regarding minimum safety measures. The document has been drawn up by the person responsible for the treatment of the data.

SIGNIFICANT EVENTS SUBSEQUENT TO THE END OF THE YEAR

Increase in the investment in IFIL

In February and March 2006, IFI purchased on the market 4,368,876 IFIL ordinary shares (0.42% of the class of stock) for an investment of € 18.4 million.

IFI currently holds 664,860,716 IFIL ordinary shares, equal to approximately 64% of the class of stock, and 1,886,420 IFIL savings shares, equal to 4.99% of the class of stock. The entire holding represents 61.96% of capital stock.

After this investment, IFI's net debt increased by approximately € 305 million (including financial expenses and operating expenses in the first few months of 2006).

Sale of the investment in Exor Group

In its meeting of March 31, 2006, the IFI S.p.A. Board of Directors voted to sell the entire investment in Exor Group (3,418,242 shares, equal to 29.3% of capital stock) to the same Exor Group in order to reduce the company's debt. Given that the transaction was between related parties, Citigroup Global Markets was appointed an advisor and checked the fairness of the sales price, equal to € 207 million (€ 60.5 per share).
The transaction will allow IFI S.p.A. to reduce its debt considerably (from € 305 million to about € 100 million) and realize a gain of € 104 million in the statutory financial statements.

After concluding the sale, which should take place in April, Exor Group will proceed to cancel the treasury stock that was purchased and will consequently reduce its capital stock.

Additional information

On February 21, 2006, Virgilio Marrone (General Manager of IFI S.p.A.), as an individual with power of attorney in Giovanni Agnelli e C. S.a.p.az., was notified by Consob of its objections under art. 187-septies of Legislative Decree No. 58/1998 in relation to the content of the press release issued by Giovanni Agnelli e C. on August 24, 2005.

BUSINESS OUTLOOK

Taking into account the motion for the distribution of dividends from 2005 profits formulated by the IFIL Board of Directors and the operating and financial effects of the sale of the investment in Exor Group, 2006 forecasts for IFI S.p.A. are for a considerably higher profit than in 2005 and a significant reduction in net debt.

On the basis of the indications formulated by the IFIL Group, the IFI Group is expected to show a profit for 2006, although lower than that of 2005.

investments IFIL

(64.01% of ordinary capital stock)

The consolidated data of the IFIL Group at December 31, 2005 commented on below is taken from the condensed consolidated balance sheet and income statement.

This data has been prepared by consolidating the holdings and services companies which constitute the “Holdings System” on a line-by-line basis and accounting for the other subsidiaries and associates (Fiat Group, Sequana Capital Group, Alpitour Group, Juventus F.C. and Turismo & Immobiliare) by the equity method.

€ in millions	12/31/2005	12/31/2004	Change
Profit - Group	1,090.0	124.0	966.0
Consolidated equity - Group	5,186.0	3,722.2	1,463.8
Consolidated net financial position of the "Holdings System"	348.3	680.0	(331.7)
Investments	4,806.5	2,917.9	1,888.6

Consolidated profit - IFIL Group for the year 2005 is € 1,090 million (€ 124 million in 2004). The positive change of € 966 million is mainly due to a decisive improvement in the results of the Fiat Group and the Sequana Capital Group, partly due to nonrecurring transactions.

The condensed consolidated income statement and balance sheet and comments on the most important items are presented below.

IFIL Group - Condensed consolidated balance sheet

€ in millions	2005	2004	Change
Group's share of the earnings (losses) of operating subsidiaries and associates accounted for by the equity method	622.0	(397.8)	1,019.8
Dividends from other holdings	43.7	27.4	16.3
Net gains	460.9	603.3	(142.4)
Profit (loss) from discontinued operations	0.5	(2.3)	2.8
Impairment (losses)/reversals of investments and securities	3.4	(74.4)	77.8
Net financial income (expenses)	2.0	(20.9)	22.9
Net general expenses	(41.1)	(22.2)	(18.9)
(Accruals to)/releases of provisions	(1.3)	0.3	(1.6)
Income taxes	(0.1)	10.6	(10.7)
Profit - Group	1,090.0	124.0	966.0

The **Group’s share of the earnings (losses) of operating subsidiaries and associates accounted for by the equity method** is an earnings figure of € 622 million (losses of € 397.8 million in 2004). The positive change of € 1,019.8 million is due to better results posted by the Fiat Group (+€ 817.3 million) and by the Sequana Capital Group (+€ 224.4 million), as well as lower results reported by Alpitour Group (-€ 17.1 million), Juventus Football Club (-€ 4.4 million) and a loss reported by Turismo&Immobiliare (-€ 0.4 million).

Dividends from other holdings, entirely paid out by Sanpaolo IMI, amount to € 43.7 million and increased by € 16.3 million compared to 2004 (€ 27.4 million) partly as a result of the increase in the investment in the bank during 2005.

Net gains realized in 2005 amount to € 460.9 million and refer to the sale of 99.09% of La Rinascente S.p.A. capital stock to Tamerice S.r.l. (€ 459.1 million) and the sale on the market of a marginal interest (1.69% of capital stock) in Juventus Football Club (€ 1.8 million). Net gains in 2004 totaling € 603.3 million originated from the sale of 50% of Eurofind Food capital stock (€ 577 million), 7.2% of Club Mediterranée capital stock (€ 26 million) and 0.32% of Juventus Football Club capital stock (€ 0.3 million).

In 2005, **impairment (losses)/reversals of investments and securities** include the positive fair value adjustment of current securities for € 3.4 million. In 2004, this item amounted to € 74.4 million and included the impairment loss of goodwill on Alpitour (-€ 36.5 million) and Juventus Football Club (-€ 36.4 million) as well as that of securities (-€ 1.5 million).

In 2005, **net financial income** amounts to € 2 million. In 2004, net financial expenses totaled € 20.9 million owing to the fact that the consolidated net debt position of the "Holdings System" returned to a liquidity position only towards the end of the year.

Net general expenses amount to € 41.1 million for the year 2005 and include the extraordinary compensation approved for the Chairman and President (€ 15 million) and the former Chief Executive Officer (€ 3.8 million). The remaining amount of € 22.3 million is basically in line with that in 2004 (€ 22.2 million).

Consolidated equity – Group at December 31, 2005 amounts to € 5,186 million (€ 3,722.2 million at the end of 2004). The increase of € 1,463.8 million is due to the fair value adjustment of the investment in Sanpaolo IMI (+€ 220.3 million), the consolidated profit of the Group for the year (+€ 1,090 million), positive translation differences (+€ 281 million), dividends paid by IFIL S.p.A. (-€ 73.2 million) and other net changes (-€ 54.3 million).

The **consolidated net financial position of the "Holdings System"** at December 31, 2005 shows a net liquidity position of € 348.3 million. The decrease of € 331.7 million compared to the balance at year-end 2004 (€ 680 million) comes from the net proceeds generated by the sale of the investment in La Rinascente (+€ 529.1 million), the receipt of dividends from holdings (+€ 66.6 million), the investments made in Fiat (-€ 580.2 million) and Sanpaolo IMI (-€ 263.5 million), the dividends paid by IFIL (-€ 73.2 million) and other net changes (-€ 10.5 million).
On October 26, 2005, following the investment in Fiat and less diversification of the portfolio as a result, Standard & Poor's downgraded its rating of IFIL's long-term debt from "A-" to "BBB+" and confirmed its rating of short-term debt in "A-2", with a stable outlook.

The carrying amount of **investments** at December 31, 2005 is € 4,806.5 million. The increase of € 1,888.6 million compared to investments at year-end 2004 (€ 2,917.9 million) is due to the fair value adjustment of the investment in Sanpaolo IMI (+€ 220.3 million), the investments made in that bank (+€ 263.5 million) and in Fiat (+€ 580.2 million), IFIL's share of the changes in the equity of the operating subsidiaries and associates (+€ 823.6 million), and, lastly, other net changes (+€ 1 million).

The net income of the parent IFIL S.p.A. for the year 2005 is € 98.8 million, with an increase of € 18.6 million (+23.2%) compared to € 80.2 million in 2004.
The Board of Directors' Meeting held on March 30, 2006 put forward a motion for the distribution of dividends of € 0.08 per ordinary share and € 0.1007 per savings share for a maximum total of € 86.9 million.
IFI's share of the dividends will amount to € 53.4 million.

The major events in 2005 and in the first few months of 2006 are presented in the following paragraphs.

Increase in the investment in Sanpaolo IMI

During March and April 2005, IFIL purchased on the market 22,700,000 Sanpaolo IMI ordinary shares (1.43% of the current ordinary capital stock) for an investment of € 263.5 million.
IFIL currently holds 93,071,000 Sanpaolo IMI ordinary shares, equal to 5.86% of ordinary capital stock and 4.97% of capital stock.

Investment in Italia Turismo (ex-Sviluppo Italia Turismo)

In April 2005, the agreement was executed between IFIL, Banca Intesa, the Marcegaglia Group and Sviluppo Italia for the partial privatization of Italia Turismo. Turismo&Immobiliare (the company in which the three private stockholders each own equal stakes) subscribed to Italia Turismo's capital stock increase of € 60 million and purchased stock of the company from Sviluppo Italia for € 16 million thus acquiring a 49% stake for a total investment of € 76 million.
At the beginning of November, Pirelli RE became a stockholder of Turismo&Immobiliare, purchasing about an 8.3% stake in the capital of this company from each of the three founding stockholders for € 1.1 million and assuming the same commitments.
Turismo&Immobiliare, the capital of which is today owned by the aforementioned four private stockholders, each with a 25% holding, has a 49% interest in Italia Turismo (the remaining 51% stake is held by Sviluppo Italia), which is the largest real estate operator in the tourism-hotel sector in Italy with important investments in Apulia, Calabria, Basilicata, Sicily and Sardinia.
Finally, the agreements with Sviluppo Italia provide for the possibility that Turismo&Immobiliare will reach a controlling interest (approximately 65%) in Italia Turismo by 2009.
The additional commitment by the IFIL Group will amount to € 19 million.

Sale of La Rinascente S.p.A.

On May 6, 2005, Eurofind Textile S.A. (the Luxembourg company controlled by Auchan and Ifil Investissements) sold 99.09% of Rinascente S.p.A. capital stock to Tamerice S.r.l., a company heading a group composed of Investitori Associati SGR S.p.A., DB Real Estate Global Opportunities IB L.P., Pirelli RE S.p.A. and the Borletti family, for a price of € 888 million.

On May 17, 2005, the subsidiary Ifil Investissements purchased the remaining 50% of Eurofind Textile capital stock from the Auchan Group for € 349.5 million and then merged it on June 28, 2005. As a result of these transactions, the IFIL Group received net proceeds for a total of € 529.1 million and realized a gain of € 459.1 million (both amounts are net of selling costs), with no significant tax effects.

Ifil Investissements, as the merging company of Eurofind Textile, has provided the buyer with statements and guarantees regarding the Rinascente Group, the subject of the transaction, and its activities, with the usual limitations and exclusions (part of such guarantees are borne by the Auchan Group). Such conventional statements and guarantees regard, among other things, full ownership and title, free and clear of detrimental encumbrances and registrations, of the shares of the companies of the Rinascente Group and real estate properties, the lease relationships, the true and correct representation of the financial statements and tax, social security and legal/labor matters. The limitations and exclusions agreed within the framework of the sale process regard specific events considered by the buyer during the course of the due diligence. Such limitations and exclusions provide for the obligation of compensation when thresholds of significance are exceeded per individual indemnifiable event (de minimis) and as a whole (with an exempted amount) and, for certain matters, a maximum limit of responsibility for the seller.

IFIL S.p.A. has guaranteed the commitments undertaken by Ifil Investissements with the buyer until their maturity, estimated, depending on the matter at hand, at December 31, 2006 or at December 31, 2008 or when barred by the statute of limitations.

Maintaining a 30.06% stake in the ordinary capital stock of Fiat S.p.A.

On September 20, 2005, IFIL purchased 82,250,000 Fiat ordinary shares from Exor Group (controlled by Giovanni Agnelli e C. S.a.p.az.). These shares came from an equity swap agreement between Exor Group and Merrill Lynch International last April. This purchase was approved on September 15, 2005 by the Board of Directors, which used the services of an advisor, Mr. Gerardo Braggiotti of G.B. Partners.

The purchase price was € 6.5 per share for a total of € 534.6 million. Fiat stock was officially traded at € 7.76 per share on September 15, 2005 compared to the weighted average official prices over the last three months of € 6.91 per share and the weighted average official prices over the last six months of € 6.16 per share. The stock was transferred from Merrill Lynch to Exor Group at the same time the Fiat capital increase was executed, on September 20, 2005. The sale by Exor Group to IFIL immediately followed on the same date. In the identical context, IFIL, on the same date, sold Merrill Lynch all the option rights to which it was entitled on the Fiat capital increase.

Prior to the purchase of the above stock, after the purchase of 5,500,000 ordinary shares on the market by IFIL on September 7, 8 and 9 for € 41.1 million, the investment held by IFIL in Fiat totaled 246,083,447 ordinary shares and 31,082,500 preferred shares.

The aforementioned transactions allowed IFIL to maintain its investment in Fiat ordinary capital stock unchanged (30.06%) after the capital increase by Fiat, which took place on September 20, 2005.

A total of 87,750,000 Fiat ordinary shares was purchased for a global investment of € 580.2 million, including incidental charges of € 4.5 million.

At December 31, 2005, IFIL holds 328,333,447 Fiat ordinary shares and 31,082,500 Fiat preferred shares.

Investment in Banca Leonardo

At the end of November 2005, the IFIL Group displayed its interest in the project for the acquisition and recapitalization of Banca Leonardo S.p.A., assuming a commitment for an investment of € 46.6 million to purchase 10% of the capital of the bank.

On March 3, 2006, Ifil Investissements filed a petition with Banca d'Italia to obtain authorization for the investment which it is believed can be executed by the end of the month of April 2006.

Investigations by Consob and the Judicial Authorities

On February 21, 2006, Consob notified IFIL S.p.A. of its objections under art. 187-septies of Legislative Decree No. 58/1998 in relation to the content of the press release dated August 24, 2005.

Analogous objections were also notified to Giovanni Agnelli e C. S.a.p.az. regarding the content of its press release on the same date.

Furthermore, Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone received notification of the objection regarding the violation of art. 187-ter of Legislative Decree No. 58/1998, with Consob assuming that each of those individuals participated in the decisional process relating to the above press releases.

Exor Group S.A. and its legal representatives, instead, received notification of the violation of the obligations of communication as regards significant investments under art. 120 of Legislative Decree No. 58/1998 beginning with Consob's notice from August 30, 2005.

It is the intention of the parties, which received the notifications from Consob to lodge their objections in accordance with the law and take advantage of every other opportunity of defense.

On March 9, 2006, the company's offices were searched under the orders of the Turin district attorney's office with regard to the same facts raised in the objections by Consob. At the same time, IFIL was notified of the inquiry into its administrative responsibility under Legislative Decree No. 231/2001.

Business outlook

For the year 2006, IFIL S.p.A. is expected to report a profit.

On a consolidated level, considering the forecasts formulated by the major holdings, the IFIL Group expects to show a profit in 2006, although lower than the profit reported in 2005, which was the highest in the Group's history.

EXOR
GROUP

(29.3% of ordinary capital stock)

Exor Group reported a consolidated profit of € 36.2 million for the year 2005, compared to a profit of € 92.6 million in 2004.
Net revenues for the year total € 43.2 million, including € 27 million of financial gains (net of accruals to the provision for investment writedowns), € 15.7 million of net financial income (interest and exchange differences) and € 0.5 million of dividends.

Taking into account the fair value of the investment in Graphic Packaging Corp. at the end of the year, the provision for investment writedowns was adjusted by € 47.9 million.

In 2005, Exor Group's cash was mainly invested in short-term assets on which gross income was realized for € 15.8 million.

General expenses decreased from € 8.1 million in 2004 to € 6.9 million.

At December 31, 2005, the consolidated equity of Exor Group amounts to € 680.1 million (€ 668.3 million at December 31, 2004). Changes in equity during the year include the distribution of dividends for € 36.2 million and the recognition, in accordance with IFRS, of a reserve for fair value adjustments in respect of certain investments for € 11.4 million.

At December 31, 2005, the assets of Exor Group include investments for € 99.1 million, principally represented by the investment held in Graphic Packaging Corp., and cash for € 583.7 million. Exor Group shows no financial liabilities in its financial statements.

As described earlier, on February 21, 2006, Exor Group S.A. and its legal representatives were notified by Consob of the violation of the obligations of communication as regards significant investments pursuant to art. 120 of Legislative Decree No. 58/1998 beginning with Consob's notice, in relation to Fiat ordinary shares, from August 30, 2005.

MOTION FOR THE APPROVAL OF THE FINANCIAL STATEMENTS AND THE APPROPRIATION OF NET INCOME FOR THE YEAR

We invite you to approve the statutory financial statements for the year ended December 31, 2005.
In view of the fact that the Board of Directors has waived, by specific resolution, the share of the profits to which it is entitled pursuant to art. 27 of the bylaws and that the legal reserve amounts to one-fifth of capital stock, we propose the appropriation of the net income of € 38,534,823 as follows:

in €	
- to the reserve for unrealized net foreign exchange gains (art. 2426, para. 8-bis, of the Italian Civil Code)	202.39
- to the extraordinary reserve	38,534,620.61
Net income for the year 2005	38,534,823.00

Turin, March 31, 2006

For the Board of Directors
The Chairman
Gianluigi Gabetti

IFI S.p.A.

STRUCTURE AND CONTENT OF THE STATUTORY FINANCIAL STATEMENTS

The statutory financial statements of IFI S.p.A. for the year ended December 31, 2005 are expressed in euros and have been prepared in accordance with the provisions of the Italian Civil Code.

The balance sheet and income statement show the changes in the individual captions on the face of the statements. In the Notes, prepared in accordance with the provisions of art. 2427 of the Italian Civil Code, the comments are limited to the principal changes. Unless otherwise indicated, all amounts in the notes are expressed in thousands of euros. In the "Annexes", which are an integral part of these notes, information is shown which is either required by current laws or presented as additional disclosure for purposes of clarity and completeness of the financial statements, including the information requested by Recommendation No. 94001437 dated February 23, 1994 issued by the National Commission for Corporations and the Stock Exchange (Consob).

SIGNIFICANT ACCOUNTING POLICIES

Pursuant to art. 2423-bis of the Italian Civil Code, the financial statements have been prepared on the basis of the general principle of prudence, using the accrual basis of accounting and according to the going-concern concept. The accounting policies discussed below have been applied on a basis consistent with the prior years and conform with the provisions of art. 2426 of the Italian Civil Code, as well as take into account the economic function of the assets and liabilities under consideration.
Furthermore, there were no departures from paragraph 4 of art. 2423 of the Italian Civil Code in preparing these financial statements.

Intangible fixed assets

Intangible fixed assets are recorded at cost of acquisition and amortized on a straight-line basis over a period of not more than five years. Unamortized intangible fixed assets are covered by available reserves.

Property, plant and equipment

These are stated at cost of acquisition, including accessory charges, net of accumulated depreciation. Depreciation is calculated on a straight-line basis each year over the estimated useful lives of the assets.
In view of the nature of the property, plant and equipment, depreciation is calculated at the ordinary depreciation rates plus the rates for allowable accelerated depreciation. For property, plant and equipment purchased during the year, these rates are reduced by half. Purchases of assets of below € 516 are entirely expensed in the year of purchase.

Financial fixed assets

Financial fixed assets are valued at cost of acquisition, including accessory charges, determined using the LIFO method with annual adjustments.
The cost of acquisition of the investments in IFIL and in Exor Group has been revalued in previous years as allowed by monetary revaluation laws. If, at the balance sheet date, the investment value is determined to have suffered a permanent impairment in value to below the cost of acquisition as defined above, it is written down to the lower value.
Should the reasons for the writedowns no longer apply, the value of the financial fixed assets will be reinstated up to the limit of the cost of acquisition; for financial fixed assets prior to the enactment of Legislative Decree No. 127/91, this limit is represented by the amounts recorded in the financial statements at March 31, 1993.

Receivables

Receivables are stated at estimated realizable value and include, where applicable, accrued interest earned and collectible at the end of the year.

Accruals and deferrals

These are income and expenses, common to two or more years, calculated on the accrual principle with the matching of costs and revenues of the year.

Employee severance indemnities

Employee severance indemnities, revalued on the basis of indexes, and determined in accordance with existing labor legislation and contracts, reflect the liability in respect of all employees. This liability is calculated in reference to the years of service and the employee's annual salary, in accordance with art. 2120 of the Italian Civil Code.
The reserve also includes the liability pursuant to the company agreements dated December 23, 1999.

Payables

Payables are recorded at nominal value and include, where applicable, accrued interest payable at the end of the year.

Guarantees, commitments and other memorandum accounts

Financial instruments used to hedge interest rate risks and, in general, the fluctuations in the value of assets and liabilities, are recorded under "Commitments".
Such contracts form part of the results for the year on the basis of the accrual principle.
Commitments relating to the performance of contracts are recorded under memorandum accounts on the basis of the nominal value to which they refer.
Securities held in deposit by third parties are shown at their nominal value.

Dividends

Dividends are recorded in the year in which they are declared.

Financial income and expenses

Financial income and expenses are recorded in the financial statements based on the accrual concept. As for financial instruments used to hedge interest rate risk, the interest differentials are recognized in the income statement based on the accrual concept.

Extraordinary income and expenses

Extraordinary income and expenses are generated by events unrelated to ordinary activities or by income and expenses and nonexistent assets and liabilities relating to prior years.

Income taxes

Ires and Irap taxes for the current year are calculated on the basis of the tax legislation in force.
Deferred taxes are calculated on temporary differences between the asset and liability items and the corresponding tax items and the deferred tax liability is recorded in a specific reserve in liabilities; any deferred tax assets are recorded in "Receivables – deferred tax assets" only if there is a reasonable certainty of their future recovery. Deferred tax assets and liabilities are offset where allowed by law.

Transactions denominated in foreign currency

Transactions in currencies other than the euro are recorded at the exchange rates agreed with the counterparts or, in their absence, at the exchange rate as of the date of transaction.

Assets and liabilities in currencies other than the euro, except for property, plant and equipment, intangible fixed assets and financial fixed assets (if made up of investments valued at cost) are adjusted to the year-end exchange rate, in the absence of a hedging contract for exchange rate risks.
Any net positive difference is booked, for the part not absorbed by a possible loss for the year, in a reserve under stockholders' equity which cannot be distributed until such time as the gains have effectively been realized. This reserve, however, may be used, from the year it is booked, to absorb the losses of prior years.
Property, plant and equipment, intangible fixed assets and financial fixed assets (if made up of investments valued at cost) in currencies other than the euro are booked at the exchange rate in effect at their date of purchase or at the rate at the end of the year if this results in a lower value and constitutes an impairment considered as permanent.

COMMENTS ON THE PRINCIPAL ITEMS IN THE BALANCE SHEET

1. Intangible fixed assets – Intellectual property rights

Intangible fixed assets amount to € 3 thousand and relate to costs to update the corporate website (€ 9 thousand), net of the amortization charge for the year (€ 6 thousand). Such costs are amortized over a period of three years.

2. Property, plant and equipment – Office furniture and equipment and motor vehicles

The analysis of the changes in 2005 is summarized as follows:

€ in thousands	Depreciation rate %	Original cost	Accumulated depreciation	Net book value
Balance at December 31, 2004		235	(235)	0
Increases (Depreciation)	20/25	17	(4)	13
(Decreases) Utilizations		(105)	105	0
Balance at December 31, 2005		147	(134)	13

3. Financial fixed assets – Investments

Details of investments and the percentage holdings of the classes of capital stock are summarized in the following table.

	12/31/2005			12/31/2004	
€ in thousands	%	Balance		%	Balance
Subsidiaries					
IFIL S.p.A.					
- ordinary shares	63.59	1,731,726	(a)	62.03	1,676,162
- savings shares	4.99	6,383		-	0
		1,738,109			1,676,162
Associated companies - Exor Group S.A. (ordinary shares)	29.29	102,559	(b)	29.29	102,559
Other companies					
Deutsche Morgan Grenfell Capital Italy S.A.					
- ordinary shares	0.79	389		0.93	455
- preferred shares	1.28	5		1.28	5
Emittenti Titoli S.p.A.	6.43	272		6.43	272
Sundry consortiums	-	-		-	3
		666			735
Total investments		1,841,334			1,779,456

(a) In prior years, the investment in IFIL was revalued pursuant to Law No. 576 dated December 2, 1975 for € 608 thousand and Law No. 72 dated March 19, 1983 for € 4,246 thousand and was written down in 2002 for € 73,473 thousand.

(b) This amount includes revaluations made in the past pursuant to Law No. 576 dated December 2, 1975 for € 5,920 thousand and Law No. 72 dated March 19, 1983 for € 37,519 thousand.

The increase in the investment in IFIL amounting to € 61,947 thousand originates from purchases on the market of 16,708,441 IFIL ordinary shares (1.61% of the class of stock) for € 55,564 thousand and 1,866,420 IFIL savings shares (4.99% of the class of stock) for € 6,383 thousand. In addition, 130 Deutsche Morgan Grenfell Capital Italy shares were reimbursed (0.14% of the class of stock).

4. Financial fixed assets – Receivables from others

The investment in TLcom, equal to € 8,178 thousand at December 31, 2004, was sold in 2005 to the United States fund Access Capital Technology for € 4,600 thousand. Taking into account the utilization of the reserve for risks of € 4,000 thousand set aside in prior years, the sale gave rise to a gain of € 422 thousand.

5. Financial fixed assets – Treasury stock

There were no transactions during the year in preferred treasury stock carried under financial fixed assets. The balance at December 31, 2005 refers to the following:

		Carrying value		
	Number of shares	Unit (€)	Total (€ in thousands)	
IFI preferred shares	5,360,300	13.15	70,477	(a)

(a) Net of writedowns of € 58,934 thousand made in 2002.

IFI preferred stock in portfolio at December 31, 2005 has a par value of € 5,360 thousand and represents 3.28% of capital stock (6.98% of the class of stock).

A comparison between the carrying value of the treasury stock and the market price at December 30, 2005 (€ 13.87) shows an unrealized gain of € 3.9 million; compared to the market price at March 24, 2006 (€ 16.90), the unrealized gain is € 20.1 million.

Additional details are provided in Annex 3.

6. Current assets – Receivables from subsidiaries, associated companies and parent company

The following receivables originate from the performance of services and cost recoveries.

€ in thousands	12/31/2005	12/31/2004	Change
Subsidiaries:			
IFIL S.p.A.	13	9	4
Juventus Football Club S.p.A.	1	35	(34)
Fiat S.p.A.	0	228	(228)
Neos S.p.A.	0	9	(9)
Welcome Travel Group S.p.A.	0	1	(1)
Other Fiat Group companies	0	7	(7)
Total receivables from subsidiaries	14	289	(275)
Associated companies - Exor Group S.A.	90	100	(10)
Parent company - Giovanni Agnelli e C. S.a.p.az.	10	10	0

7. Current assets – Taxes receivable

These refer to receivables from the tax authorities for:

€ in thousands	12/31/2005	12/31/2004	Change
Receivables from the tax authorities for prior years' taxes, refunds requested	17,909	17,437	472
VAT receivable	290	235	55
Receivables from the tax authorities for current and prior years' taxes, carried forward	1	113	(112)
Excess tax on companies	0	22	(22)
Total taxes receivable	18,200	17,807	393

There are no receivables due beyond five years.

The changes in receivables from the tax authorities for the year 2005 are as follows.

€ in thousands	
Balance at December 31, 2004	17,807
Purchase of receivables from the tax authorities from the subsidiary IFIL S.p.A.	400
Higher VAT receivable resulting from the annual return	54
Used to compensate withholdings payable, net of withholdings receivable during the year	(512)
Interest earned during the year	473
Refund of excess tax on companies	(22)
Balance at December 31, 2005	18,200

8. Current assets – Other receivables

Other receivables amount to € 144 thousand (€ 840 thousand at December 31, 2004) and include sundry revenues and cost recoveries.

9. Prepaid expenses

Prepaid expenses total € 268 thousand (€ 58 thousand at December 31, 2004) and relate to portions of costs referring to future years. In particular, € 220 thousand relates to fees for opening new credit lines, charged to the income statement on the accrual basis.

10. Stockholders’ equity

Capital stock

At December 31, 2005, the capital stock of IFI S.p.A., fully subscribed to and paid-in, amounts to € 163,251,460 and consists of 86,450,000 ordinary shares and 76,801,460 preferred shares of par value € 1 each.
Pursuant to art. 10 of the bylaws, preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code and the second paragraph of art. 13 of the bylaws.
Pursuant to art. 27 of the bylaws, the net income of each year is appropriated as follows:

- 10% to the legal reserve until it reaches one-fifth of capital stock;
- of the remaining amount, 1% is at the board of directors’ disposition for distribution among its members;
- the remaining net income is appropriated as follows:
  - to preferred shares, a preference dividend of 5.17% of their par value, which is not cumulative from one year to the next;
  - after any appropriations to reserves, the residual amount is attributed equally to the ordinary and preferred shares.

Capital stock may be increased for a period of five years, at one or more times, also in divisible form, up to a maximum of € 561,750,000, by the authority delegated, pursuant to art. 2443 of the Italian Civil Code, to the board of directors by the extraordinary stockholders’ meeting held April 22, 2003.

Reserves

The statement of changes in stockholders' equity is presented in Annex 4.

The information required by art. 2427, number 7 bis of the Italian Civil Code (available and distributable reserves) is presented as follows.

Balance sheet caption € in thousands	Balance at 12/31/2005	Possibility of use	Portion available	Used to cover losses in the years 2003, 2004 and 2005
Capital stock	163,251			
Capital stock reserves:				
Additional paid-in capital (a)	386,347	A, B, C	386,347	35,206
Revaluation reserve Law 74, 2/11/1952 (b)	157	A, B, C	157	
Revaluation reserve Law 576, 12/2/1975 (b)	16,940	A, B, C	16,940	
Revaluation reserve Law 72, 3/19/1983 (b)	64,265	A, B, C	64,265	
Legal reserve	2,032	B	0	
Treasury stock valuation reserve	458		0	
Reserve under DPR No. 597, art. 55, 9/29/1973	0		0	91
Merger surplus reserve	0		0	191,628
Retained earnings	0		0	11
Earnings reserves:				
Legal reserve	30,618	B	0	
Treasury stock valuation reserve	70,019		0	
Extraordinary reserve	720,648	A, B, C	720,648	
Reserve for purchase of treasury stock	150,000		0	
Total	1,604,735		1,188,357	226,936
Portion not distributable (c)			(3)	
Residual portion distributable			1,188,354	

A: For capital increases; B: For coverage of losses; C: For distribution to stockholders.

(a) Since the legal reserve is equal to one-fifth of capital stock (art. 2431 of the Italian Civil Code), the reserve can be distributed.

(b) The revaluation reserves can be used for bonus increases of capital stock. If used to cover losses, they must be subsequently replenished. If not, then no dividends can be distributed. They cannot be used to set up the reserve for the purchase of treasury stock. The monetary revaluation reserves can be reduced only by resolution of the stockholders' meeting and in compliance with the prescriptions of art. 2445, paragraphs 2 and 3 of the Italian Civil Code.

(c) Pursuant to art. 2426 of the Italian Civil Code, paragraph 5, when there are start-up and expansion costs that must still be amortized, dividends can only be distributed if there are available reserves sufficient to cover the unamortized portion of these costs. Art. 2426 of the Italian Civil Code, paragraph 8 bis requires that unrealized net exchange gains, insofar as they derive from the valuation of the balances in foreign currency at year-end exchange rates, should be recorded, for the part not absorbed by any loss for the year, in a non-distributable reserve until the gain is realized.

At December 31, 2005, tax-deferred reserves are recorded for a total amount of € 83,394 thousand, of which € 81,362 thousand relates to the monetary revaluation reserve and € 2,032 thousand to the legal reserve. In the event of distribution, such amounts would form part of the taxable income of the Company.

In view of the unlikelihood of their distribution, no deferred taxes have been set aside in respect of such reserves.

11. Reserves for risks and charges

These amount to € 300 thousand, of which € 100 thousand refers to taxes and € 200 thousand to the risk of writedowns of financial fixed assets.

The decrease in the reserve for deferred taxes of € 1,404 thousand is due to the deferred taxes released to income which, in 2005, became in excess of requirements. The decrease in the reserve for the risk of writedowns of financial fixed assets of € 4,000 thousand under other reserves is due to the utilization as a result of the sale of the financial receivable from TLcom.

12. Reserve for employee severance indemnities

This reserve refers to the liability for employee severance indemnities, calculated in accordance with art. 2120 of the Italian Civil Code, as well as the liability in respect of employees arising from the December 23, 1999 agreement.

Details of the changes are as follows:

€ in thousands	Employee Sever. Indem.	Agreement 12/23/1999	Total
Balance at December 31, 2004	1,194	302	1,496
Provisions	132	63	195
Payments	(24)	0	(24)
Decrease for transfers to other Group companies	(42)	(11)	(53)
Increase for transfers from other Group companies	73	25	98
Balance at December 31, 2005	1,333	379	1,712

13. Borrowings from banks

€ in thousands	12/31/2005	12/31/2004	Change
Due within one year	104,817	208,456	(103,639)
Due beyond one year	160,000	30,000	130,000
Total borrowings from banks	264,817	238,456	26,361

Borrowings from banks due within one year include loans of € 10 million due in the first half of 2006, on which interest rate swaps have been put into place to guarantee a fixed interest rate.

On borrowings from banks due beyond one year (€ 160 million) interest rate swaps have been put into place to guarantee a fixed interest rate on the full amount.
Loans are classified as due beyond one year on the basis of the residual period of the loan and the period of the hedging contracts.
Borrowings from banks due beyond one year are payable within five years.

The company has irrevocable lines of credit available from banks totaling € 595 million, of which € 265 million is due beyond one year.

14. Payables to subsidiaries

Payables to subsidiaries amount to € 172 thousand and refer entirely to trade payables.

€ in thousands	12/31/2005	12/31/2004	Change
Soiem S.p.A.	120	128	(8)
IFIL S.p.A.	23	23	0
Fiat Auto S.p.A.	2	5	(3)
Other Fiat Group companies	27	36	(9)
Total payables to subsidiaries	172	192	(20)

15. Payables to parent company

Payables to parent company amount to € 13,868 thousand (€ 24,189 thousand at December 31, 2004) and include the loan granted by the parent company Giovanni Agnelli e C. S.a.p.az., including interest accrued at December 31, 2005.

16. Taxes payable

Taxes payable amounts to € 160 thousand (€ 133 thousand in 2004) and relates to Irpef withholding taxes.

The Company has agreed its tax years up to December 31, 2000.

17. Social security payable

€ in thousands	12/31/2005		12/31/2004	Change
INPS solidarity fund (MD No. 158 dated 4/28/2000)	250	(a)	442	(192)
INPS social security contributions on salaries and unused vacation and holidays	151		135	16
Total social security payable	401		577	(176)

(a) Including € 117 thousand due beyond one year.

Ministerial Decree No. 158 dated April 28, 2000, established, at INPS, the "Solidarity Fund for the support of earnings, employment and professional reconversion and requalification of credit personnel". Financial and asset management of the Fund is administered autonomously. The Fund provides, in exceptional circumstances, for the issue of allowances to support earnings at the request of the employer and up until the right accrues for the years-of-service or old age pension by employees who accrue the requisites within a maximum period of 60 months from the date of termination of the working relationship. The above liabilities (€ 250 thousand in total) represent the extraordinary contribution that IFI must pay to cover the exceptional allowances that are due to former employees, including related social security contributions.

18. Other payables

These refer to payables to:

€ in thousands	12/31/2005	12/31/2004	Change
Chairman for extraordinary compensation	5,000	0	5,000
Employees for salaries, holidays and vacation	244	258	(14)
Statutory auditors for compensation	151	154	(3)
Stockholders for dividends	52	89	(37)
Sundry	8	4	4
Total other payables	5,455	505	4,950

19. Accrued expenses

Accrued expenses amount to € 880 thousand (€ 1,184 thousand at December 31, 2004) and include interest expenses on borrowings from banks (€ 690 thousand), expenses on interest rate swaps (€ 78 thousand) accrued to December 31, 2005 and bank fees for credit lines not drawn down (€ 112 thousand).

GUARANTEES, COMMITMENTS AND OTHER MEMORANDUM ACCOUNTS

20. Commitments

€ in thousands	12/31/2005	12/31/2004	Change
Commitments with leading banking institutions relating to transactions to hedge interest rate fluctuations on bank debt due in 2007 and 2008 (a)	170,000	160,000	10,000
Residual commitment to subscribe to Emittenti Titoli's capital increase	93	93	0
Residual commitment to invest in Tlcom	0	1,500	(1,500)
Total commitments	170,093	161,593	8,500

(a) The transactions in derivative financial instruments are used exclusively to hedge the risk of interest rate fluctuations and are therefore not valued separately.
At December 31, 2005, the fair value was equal to € 1,531 thousand.

21. Other memorandum accounts – Securities held in deposit by third parties

These amount to € 34,190 thousand and refer to 3,418,242 Exor Group S.A. ordinary shares and 2,756 Deutsche Morgan Grenfell shares deposited at banks.

22. Other memorandum accounts – Third-party assets held by the company

These amount to € 86,450 thousand and refer to 86,450,000 IFI ordinary shares owned by the parent company Giovanni Agnelli e C. S.a.p.az.

COMMENTS ON THE PRINCIPAL ITEMS IN THE INCOME STATEMENT

23. Value of production – Revenues from sales and services

€ in thousands	2005	2004	Change
Services rendered to subsidiaries, associated companies and parent company:			
- Exor Group S.A.	180	207	(27)
- Juventus Football Club S.p.A.	2	54	(52)
- Giovanni Agnelli e C. S.a. p.az. (parent company)	0	33	(33)
- IFIL S.p.A.	0	25	(25)
Services rendered to Fiat Sava S.p.A.	465	620	(155)
Services rendered to third parties	0	70	(70)
Total revenues from sales and services	647	1,009	(362)

The services rendered to Fiat Sava consist of the custody of receivables (€ 515.5 million) which guarantee the circulation of interest-bearing Sava Fiat bonds (outstanding bonds at December 31, 2005 amount to € 401 million).

24. Value of production – Other income and revenues

€ in thousands	2005	2004	Change
Cost recoveries from subsidiaries:			
- Fiat S.p.A.	0	229	(229)

- IFIL S.p.A.	30	0	30
Sundry	119	120	(1)
Total other income and revenues	389	506	(117)

25. Costs of production – Raw materials, supplies and merchandise

These costs total € 36 thousand (€ 43 thousand in 2004) and refer to the purchase of stationery supplies, printed forms and gifts.

26. Costs of production – Services

Services total € 7,317 thousand (€ 1,994 thousand in 2004).

Details of the main service expenses are as follows:

€ in thousands	2005		2004	Change
Consulting and services rendered by:				
- Third parties	1,051	(a)	544	507
- Soiem S.p.A. (subsidiary)	255		262	(7)
- IFIL S.p.A. (subsidiary)	65		70	(5)
	1,371		876	495
Compensation to corporate boards:				
- Extraordinary compensation to the Chairman	5,000		0	5,000
- Board of Directors	350		451	(101)
- Board of Statutory Auditors	146		146	0
- Supervisory Panel	9		6	3
- Common representatives of preferred stockholders	3		3	0
	5,508		606	4,902
Office management and security	157		189	(32)
Vehicle maintenance, office equipment and insurance	86		115	(29)
Bank charges and fees	49		43	6
Audit fees	47		42	5
Travel and entertainment	41		58	(17)
Other expenses	22		25	(3)
Employee expenses	28		28	0
Mailing and similar expenses	8		12	(4)
Total services	7,317		1,994	5,323

(a) Including € 628 thousand for extraordinary consulting fees.

27. Costs of production – Leases and rentals

These amount to € 347 thousand (€ 382 thousand in 2004) and include the rent on the furnished headquarters in Turin (€ 145 thousand to the subsidiary company Soiem S.p.A.), leases and expenses of the Rome headquarters (€ 70 thousand), leases for office machines, for cars for service use and other rentals (€ 132 thousand).

28. Costs of production – Personnel

These total € 2,513 thousand (€ 2,516 thousand in 2004).

Other costs for personnel include the contribution (€ 147 thousand) to a separately administered Corporate Employee Benefits Fund – Pension Fund in which IFI S.p.A. and other companies in the Group participate. The purpose of this Fund, which is non-profit, is to pay benefits to supplement the obligatory public system, either directly or by taking out insurance policies, in conformity with the provisions of the collective labor contracts, agreements or company regulations. The technical equilibrium between benefits and contributions is ensured by the company partners in the Fund.

At year-end 2005, employees number 16 (15 at the end of 2004).
The average number of employees in 2005 was 16, summarized by category as follows:

	2005	2004	Change
Managers	2	2	0
Management staff	2	4	(2)
Clerks	9	7	2
Messengers	3	3	0
Average number of employees	16	16	0

29. Costs of production – Other operating costs

Other operating costs total € 597 thousand (€ 591 thousand in 2004). Details are as follows:

€ in thousands	2005	2004	Change
Donations to charities and cultural organizations	324	219	105
Notary and corporate charges	98	105	(7)
Publication of annual, first-half and quarterly financial statements	81	87	(6)
Association dues	56	53	3
Books, newspapers and magazines	19	24	(5)
Ads	11	13	(2)
Indirect taxes and duties	8	73	(65)
Sundry	0	17	(17)
Total other operating costs	597	591	6

Donations to charities and cultural organizations in 2005 were paid from the portion of prior years' profits to which the board of directors is entitled according to the bylaws and which it waived.

30. Dividends

Details are as follows:

€ in thousands	2005	2004	Change
Subsidiaries			
IFIL S.p.A. (ordinary shares)	45,112	39,915	5,197
IFIL S.p.A. (savings shares)	166	0	166
	45,278	39,915	5,363
Associated companies			
Exor Group S.A. (ordinary shares)	10,596	10,596	0
Other companies			
Emittenti Titoli S.p.A.	63	88	(25)
Total dividends	55,937	50,599	5,338

31. Other financial income – From receivables held in financial fixed assets

This totals € 422 thousand and originates from the sale of the receivable due from TLcom for a nominal value of € 8,178 thousand to the United States fund Access Capital Technology for € 4,600 thousand and the utilization of the reserve for risks of € 4,000 thousand set aside in prior years.

32. Other financial income – Other income

This totals € 482 thousand (€ 237 thousand at December 31, 2004) and refers to interest income on receivables from the tax authorities (€ 473 thousand), bank interest income (€ 3 thousand) and income from interest rate swap transactions (€ 6 thousand).

33. Interest and other financial expenses

These include:

€ in thousands	2005	2004	Change
Interest expenses on the loan from the parent company			
Giovanni Agnelli e C. S.a.p.az.	662	619	43
Other financial expenses			
- interest expenses on borrowings from banks	6,606	6,327	279
- expenses relating to the hedge of interest rate fluctuations	1,773	4,045	(2,272)
- sundry bank fees	951	744	207
- accrual for sundry financial risks	0	1,500	(1,500)
Total interest and other financial expenses	9,992	13,235	(3,243)

34. Extraordinary income and expenses

Extraordinary income amounts to € 101 thousand and relates to prior period income.
Extraordinary expenses of € 41 thousand refer entirely to prior period expenses.

35. Income taxes, current and deferred

The taxable base calculated in accordance with tax laws did not generate any current income tax expenses for the year 2005 and resulted in the release of € 1,404 thousand of excess deferred taxes provided in previous years. Since reasonable certainty of future recovery is not assured, no deferred tax assets have been booked on the tax losses for the years 2003, 2004 and 2005 (€ 200 million, in total) and on the portions of investment writedowns that, pursuant to existing tax legislation, will be deductible in future years (€ 26 million, in total). Details are as follows:

	2005		2004	
€ in millions	Temporary differences	Tax effect (33% rate)	Temporary differences	Tax effect (33% rate)
Deferred tax benefit	0	-	0	-
Deferred tax expenses on gains realized in the years 2000 (€ 39 million) and in 2001 (€ 21 million) subject to taxes over 5 years	4	1	12	4
Temporary differences excluded from the calculation of deferred income taxes				
Tax losses carried forward:				
- year 2003	147		147	
- year 2004	20		20	
- year 2005	33			
Total tax losses carried forward	200	66	167	55
Writedown of financial fixed assets deductible in future years	26	9	53	17

The reconciliation between pre-tax income and the taxable base is presented in the following table:

€ in millions	2005	2004
IRES taxes		
Pre-tax income	37	34
Increases:		
- temporary differences	5	0
- permanent differences	4	9
- gains on investments deferred in prior years	4	12
Total increases	13	21
Decreases:		
- 95% of dividends collected	(53)	(48)
- portion of writedowns of investments and treasury stock deductible over 5 years	(26)	(26)
- other permanent differences	(4)	(1)
Total decreases	(83)	(75)
Taxable loss	(33)	(20)

Taxable income for the computation of IRAP taxes is negative.

36. Compensation to directors, statutory auditors and general manager

(Art. 78 of Consob resolution No. 11971 dated May 14, 1999 and subsequent amendments)

All amounts in the following table are expressed in thousands of euros.

Name	Post held	Term of office	Expiration of term of office (a)	Compensation for post held	Non-monetary benefits	Bonuses and other incentives	Other compensation
Gabetti Gianluigi	Chairman	1/1 - 12/31	2006	250		5,000	16,864 (b)
Teodorani-Fabbri Pio	Vice Chairman	1/1 - 12/31	2006	100 (c)			9 (b)
Avogadro di Collobiano Annibale	Director	1/1 - 12/31	2006				
Elkann John	Director	1/1 - 12/31	2006				588 (b)
Ferrero Ventimiglia Luca	Director	1/1 - 12/31	2006				
Galateri di Genola Gabriele	Director	1/1 - 12/31	2006				
Nasi Andrea	Director	1/1 - 12/31	2006				
Rattazzi Lupo	Director	1/1 - 12/31	2006				40 (b)
Grande Stevens Franzo	Director	1/1 - 12/31	2006				14 (b)
Total Board of Directors				350		5,000	17,515
Board of Statutory Auditors							
Ferrero Cesare	Chairman	1/1 - 12/31	2006	62			135 (b)
Giorgi Giorgio	Statutory Auditor	1/1 - 12/31	2006	42			20 (b)
Jona Celesia Lionello	Statutory Auditor	1/1 - 12/31	2006	42			
Total Board of Statutory Auditors				146			155
Marrone Virgilio	General Manager	1/1 - 12/31	-		96	200 (d)	489 (d)

(a) The term of office expires in concurrence with the stockholders' meeting that will approve the financial statements for the year ended December 31, 2005.
(b) Compensation for the posts held in subsidiaries.
(c) Compensation as the person in charge of IFI headquarters in Rome.
(d) Employment income.

37. Stock options granted to directors and general manager

(Art. 78 of Consob resolution No. 11971 dated May 14, 1999 and subsequent amendments)

The board of directors of IFI S.p.A. to date has not approved any stock option plans.
However, under the stock option plans approved in May 2000 and September 2003 by the board of directors of the subsidiary IFIL S.p.A., options were assigned between 2000 and 2003 for the subscription of IFIL ordinary shares to the chairman, a director, the general manager and managers of IFI S.p.A.
The relative information is presented under "Stock option plans" in the Directors' Report on Operations.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS AT DECEMBER 31, 2005

1. GENERAL INFORMATION ON THE ACTIVITIES OF THE GROUP

IFI – Istituto Finanziario Industriale S.p.A. (abbreviated in IFI S.p.A.) is a corporation organized under the laws of the Republic of Italy with its registered office in Turin, Italy, listed on the Italian stock exchange. It is the controlling financial holding company headed by Giovanni Agnelli e C. S.a.p.az. The assets of the company are represented by the investments in IFIL Investments S.p.A. and in Exor Group.

IFIL Investments S.p.A. (IFIL), a corporation organized under the laws of the Republic of Italy with its registered office in Turin, Italy. It is the investment company of the Group and is listed on Italian stock exchange. The principal subsidiaries and associates of IFIL operate in various business segments and are described below.

Fiat S.p.A., in which IFIL holds approximately 30% of the ordinary capital stock and preferred stock, is a corporation organized under the laws of the Republic of Italy, listed on the Italian stock exchange. The Fiat Group operates in 190 countries and is principally engaged in the manufacture and distribution of automobiles, agricultural machinery and construction equipment and commercial vehicles. It also manufactures other products and systems, primarily automotive components, metallurgical products and production systems. It is also active in other business segments including publishing and communications and service activities, which represent a marginal part of the Group's business. The headquarters of the Group is in Turin, Italy.

Sequana Capital S.A., in which IFIL holds approximately 53% of capital, is a corporation organized under the laws of the Republic of France, with headquarters in Paris, France, listed on the French stock exchange. It operates through its subsidiaries and associates principally in the following business segments:

- the manufacture of creative, business communications, printing/graphics and security paper products, in addition to carbonless paper, through ArjoWiggins, a wholly-owned subsidiary;
- distribution of professional paper products for communications, through Antalis, a wholly-owned subsidiary;
- verification, inspection and certification, through SGS, a 24.33%-owned associate;
- marketing of Burgundy wines, through Antonin Rodet, a wholly-owned subsidiary.

Sequana Capital was also engaged in the management of multi-investment funds through Permal Group, a 76.86%-owned company, until its sale to Legg Mason on November 3, 2005.

Alpitour S.p.A., a wholly-owned subsidiary of IFIL, is a corporation organized under the laws of the Republic of Italy, with headquarters in Cuneo, Italy. The Alpitour Group operates in the tourism sector providing a vast range of integrated services through various subsidiaries.
"Tour operating", "Hotel", "Aviation", "Distribution", "Incoming", "Incentive and Grandi Eventi" are the main segments in which the Group operates under various and well-known brands.

Juventus Football Club S.p.A., in which IFIL owns 60% of capital, is one of the most important professional soccer companies internationally, with about 21 million fans in Europe and about 10 million in Italy. The company is a corporation organized under the laws of the Republic of Italy and has its headquarters in Turin, Italy. The company is listed on the Italian stock exchange.

Exor Group is a Luxembourg holding company; its principal investments are the 17.2% stake in Graphic Packaging Corporation (a U.S.A. listed company in the packaging sector), the 100% holding in the French wine company Greysac (ex-Domaine Codem) and the 7.14% stake in Distacom (a company headquartered in Hong Kong operating in the telecommunications sector).

The euro is the functional currency and presentation currency of the Group.

2. BASIS OF PREPARATION

The consolidated financial statements at December 31, 2005 of the IFI Group have been prepared in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and endorsed by the European Commission. The designation "IFRS" also includes all valid International Accounting Standards (IAS), as well as all interpretations of the International Financial Reporting Interpretations Committee (IFRIC), formerly the Standing Interpretations Committee (SIC).

The IFI Group adopted IFRS on January 1, 2005 on the coming into effect of European Union Regulation No. 1606 of July 19, 2002.

The accounting policies applied in these financial statements are consistent with those adopted in preparing the IFRS opening consolidated balance sheet at January 1, 2004, as well the consolidated financial statements at December 31, 2004, as restated in accordance with IFRS and presented in the Appendix attached to these notes to which reference should be made. The optional exemptions adopted by the Group at time of application of IFRS, the reconciliations between profit or loss and equity under previous GAAP (Italian GAAP) to profit or loss and equity under IFRS for the periods shown as comparatives, as required by IFRS 1 – First-time Adoption of IFRS, together with related explanatory notes, are included in this Appendix.

3. FORMAT OF THE CONSOLIDATED FINANCIAL STATEMENTS

The income statement is presented using a classification based on the nature of expenses.

For the consolidated balance sheet, a format has been selected to present current and non-current assets and liabilities.

The statement of changes in consolidated equity shows comprehensive income and expenses in a specific section for income and expenses recognized directly in the reserves.

For the consolidated statement of cash flows, the indirect method has been selected.

These formats are believed to best represent the operating companies consolidated line-by-line as compared to the alternative presentations provided by IFRS.

4. BASIS OF CONSOLIDATION

Criteria used in determining the scope of consolidation

The companies in which the IFI Group has the power to exercise control, directly or indirectly, by determining the financial and operating policies of an enterprise so as to gain benefits from its activities are consolidated line-by-line, with the minority stockholders being attributed their interests in the equity and profit.

Therefore, according to the currently prevailing interpretation of IAS 27 "Consolidated and Separate Financial Statements", companies in which the IFI Group holds sufficient voting power to exercise a de facto significant influence in the ordinary stockholders' meeting (de facto subsidiaries, under art. 2359, paragraph 1, number 2, of the Italian Civil Code) are excluded from the scope of consolidation. As a result of applying this standard, the investment in the Fiat Group, in which de facto control is held by IFIL which owns 30.06% of Fiat S.p.A. ordinary capital stock, is excluded from the scope of consolidation.

Subsidiaries either dormant or generating an insignificant effect on the total of the Group's assets, liabilities, financial position and earnings are also excluded from the scope of consolidation.

Subsidiaries excluded from consolidation, subsidiaries jointly controlled with other stockholders, associates and investments in other companies are accounted for as described under "Other non-current financial assets".

Consolidation procedures

The financial statements of subsidiaries as defined above are included in the consolidated financial statements from the date that control commences until the date that control ceases.

The results of discontinued operations which meet the specific requirements of IFRS 5 are shown separately and correspond to the results achieved up to the time of disposal, after taxes and other direct attributable costs.

Assets and liabilities, and revenues and expenses, of subsidiaries consolidated on a line-by-line basis are included in full in the consolidated financial statements of the Group; the carrying amounts of investments are eliminated against the subsidiaries' related equity, attributing to the identifiable assets and liabilities the fair value at the date of the acquisition of control. Any residual difference, if positive, is recognized in assets in "goodwill" or, if negative, in the income statement.

The share of the equity and the results of operations attributable to minority interests are disclosed separately. The minority interest in equity is determined on the basis of the amounts attributed to the assets and liabilities at the date of the acquisition of control, excluding any goodwill referring to them.

When losses in a consolidated subsidiary pertaining to the minority stockholders exceed the minority interest in the subsidiary's capital stock, the excess, or deficit, is charged to the Group, unless the minority stockholders are expressly committed to reimbursing the losses, in which case the excess is recorded as an asset in the consolidated financial statements. If no such commitment is in place, should profits be realized in the future, the minority interests' share of those profits will be attributed to the Group, up to the amount necessary to recover the losses previously absorbed by the Group.

The effects of subscribing to capital stock increases when there are different issue prices for the various classes of stock are recognized as changes in equity.

Date of reference

Investments are generally consolidated using the financial statements at December 31 or accounting data prepared as of the same date (when the closing date differs from that of the parent), adjusted, where necessary, to conform with the accounting principles of the Group. The Alpitour Group, whose fiscal year ends on October 31 of each year, is consolidated line-by-line using the consolidated financial statements at October 31, since it is impossible to obtain the consolidated accounting data at December 31 on a timely basis without disproportionate expense. Between November 1, and December 31, 2004 and 2005, there were no significant transactions or events which would have required adjustments to the consolidated financial statements of the Alpitour Group. This treatment is allowed by IAS 27 – Consolidated and Separate Financial Statements.

Intragroup transactions

Intragroup balances and significant transactions and any unrealized gains and losses between companies consolidated line-by-line are eliminated. Unrealized gains and losses arising from transactions with companies accounted for by the equity method are eliminated to the extent of the Group's interest in those companies.

Intragroup losses are not eliminated if they are considered representative of an effective lower value of the asset sold.

Consolidation of foreign entities

All assets and liabilities of foreign companies that are consolidated are translated using the exchange rates in effect at the balance sheet date (the current method). Income and expenses in the income statement and cash flows in the statement of cash flows are translated at the average exchange rate for the year. Translation differences resulting from the application of this method are classified as equity until the disposal of the investment.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are recorded in the relevant foreign currency and are translated using the period-end exchange rate.

In the context of IFRS First-time Adoption, the cumulative translation difference arising from the consolidation of foreign companies was set at nil, as permitted by IFRS 1; gains or losses on subsequent disposal of any foreign operation only include accumulated translation differences arising after January 1, 2004.

Hyperinflationary economies

Hyperinflationary economies are defined as countries whose cumulative inflation for three years is higher than 100%. For the companies operating in those countries, the financial statements are translated into the functional currency as follows:

- non-monetary items of the balance sheet and their counterpart in the income statement or in the flows of the statement of cash flows are translated at the historical rate;
- monetary items of the balance sheet are translated at the period-end exchange rate;
- other items of the income statement or flows in the statement of cash flows are translated at the average exchange rate for the year.

5. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Intangible assets

Goodwill. In the case of acquisitions of businesses, the acquired identifiable assets, liabilities and contingent liabilities are recorded at fair value at the date of acquisition.
Any excess of the cost of the business combination over the Group's interest in the fair value of those assets and liabilities is classified as goodwill and recorded in the financial statements as an intangible asset. If this difference is negative, it is recognized in the income statement at the time of acquisition.
Goodwill is not amortized, but is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, in accordance with IAS 36 – Impairment of Assets. Goodwill is allocated to cash generating units or groups of cash-generating units representing the operating level at which the Group controls the rate of return of the investments.
After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Reversal of any impairment loss for goodwill is not permitted.
On disposal of a part or the whole of a business which was previously acquired and which gave rise to the recognition of goodwill, the residual amount of the related goodwill is included in the determination of the gain or loss on disposal.
In the context of IFRS First-time Adoption, the Group elected not to apply IFRS 3 – Business Combinations retrospectively to the business combinations that occurred before January 1, 2004; as a consequence, goodwill arising on acquisitions before the date of transition to IFRS has been retained at the previous Italian GAAP amounts, subject to being tested for impairment at that date.

Other intangible assets: purchased or internally-generated are recognized as assets in accordance with IAS 38 – Intangible Assets (where they are controlled by the enterprise), where it is probable that the use of the asset will generate future economic benefits and where the costs of the asset can be determined reliably.
Revaluations are not permitted even if allowed by specific laws.
Such assets are measured at purchase or manufacturing cost and amortized systematically on a straight-line basis over their estimated useful lives, if these assets have finite useful lives, taking into account estimated realizable value. Intangible assets with indefinite useful lives and those not yet in production are not amortized, but tested for impairment annually or more frequently, whenever there is an indication that the asset may be impaired. When, subsequently, there is an indication that an impairment loss may no longer exist or may have decreased, the carrying amount of the asset is increased up to new estimated recoverable amount which cannot exceed the amount which would have been determined had no impairment loss been recognized. The reversal of an impairment loss is recognized immediately in the income statement.

Other intangible assets acquired as part of an acquisition of a business are capitalized separately from goodwill if their fair value can be measured reliably.

The majority of research and development costs incurred by the Sequana Capital Group does not meet the conditions for capitalization under IAS 38 and are therefore charged to the income statement in the year incurred.

Other intangible assets of the Sequana Capital Group represent mainly software and patents which are amortized as follows:

Software	from 3 to 8 years
Patents	maximum 5 years

Amortization plans and any realizable value are reviewed at least annually.

Greenhouse gas emission rights: in the absence IFRS standards and IFRIC interpretations, the Sequana Capital Group has applied, on a temporary basis, the accounting treatment suggested by the French accounting board which provides for:

- initial accounting: the rights (allowances) attributed, measured at the market price at the date of issue, are accounted for as “other intangible assets” with a contra-entry to deferred income classified under “other payables”;
- afterwards: the deferred income is credited to the income statement on a straight-line basis over the period of reference. Moreover, a liability is recognized corresponding to the quantity of allowances to be delivered with a contra-entry to a cost representing the gas emissions. This liability is measured at the initial amount of the allowances issued or purchased and, depending on the case, at the market value of the allowances to be delivered which exceed those held at the balance sheet date;
- delivery of the allowances relating to the emissions during the period: at the effective date of delivery, the intangible assets and the related liability are eliminated from the balance sheet;
- sales of allowances: the gains or losses arising from the sales of allowances are recognized in the income statement under “other non-recurring income and expenses”.

The excess allowances recognized in the assets are tested for impairment annually, or more frequently, if there are indications that they may be impaired.

Players’ registration rights: are held by Juventus Football Club and are recognized at present value, including any incidental charges. They are amortized on a straight-line basis over the period of the contracts signed with the individual professional players.
The original amortization plan may be extended as a result of the early renewal of a contract, starting from the season in which the renewal takes place.
The players’ registration rights are recorded on the date on which the contracts are ratified by the Lega Nazionale Professionisti for national transfers and on the transfer date indicated by the Federazione Italiana Giuoco Calcio for international transfers.
For soccer players registered as “giovani di serie” (youth players), costs are amortized over five years using the straight-line method.
In the case of the sale of the registration rights of a player and simultaneous buyback of 50% of the rights previously sold (“sale sharing”), only 50% of any gain are considered to be realized (100% if it is a loss).
In the case of the purchase of the registration rights of a player and the simultaneous resale of 50% of the rights previously purchased (“purchase sharing”), the effective costs incurred (50% of the cost of the registration rights of the player) are recorded in “players’ registration rights” and amortized over the period of the contract signed with the player.

Property, plant and equipment

Property, plant and equipment are stated at purchase or production cost less accumulated depreciation and impairment losses, if any. Revaluations are not permitted, even if allowed by specific laws.
Purchase cost includes all directly attributable costs necessary to make the asset ready for use. When there are obligations for decommissioning, the carrying amount includes the estimated costs (discounted to present value) to be incurred when the structure is decommissioned which is recognized with a contra-entry to a specific provision account.
Any capital investment grants are recorded in the balance sheet in liabilities and subsequently allocated systematically to the income statement over the number of years necessary to match the costs to be compensated.
Financial expenses associated with investments are generally charged on the accrual basis to the income statement.
Assets acquired under finance leases are recognized in property, plant and equipment with a contra-entry to financial payables to lessors and depreciated on the basis indicated below. Whenever there is a reasonable

certainty that the asset will not be purchased at the end of lease, depreciation is taken over the period of the lease, if it is shorter than the useful life of the asset.

If an asset has significant components with different useful lives, these components are recorded separately.

The costs incurred subsequent to purchase are capitalized only if they increase the future economic benefits inherent to the assets to which such costs refer. All other costs are recognized in the income statement when incurred.

Assets are depreciated systematically using the straight-line method over their estimated useful lives and taking into account estimated realizable value. The carrying amounts are periodically tested for impairment. When, subsequently, there is an indication that an impairment loss may no longer exist or may have decreased, the carrying amount of the asset is increased up to new estimated recoverable amount which cannot exceed the amount which would have been determined had no impairment loss been recognized. The reversal of an impairment loss is immediately recognized in the income statement.

Depreciation is calculated when the assets are ready for use on a straight-line basis over the estimated useful lives of the assets as follows:

Buildings	from 10 to 40 years
Plant and machinery	from 5 to 20 years
Industrial equipment	from 5 to 20 years
Other assets	from 3 to 25 years

The depreciation plan and the estimate of realizable value are reviewed annually.

The cost of land is recorded separately and is not depreciated since it has an indefinite life.

Other non-current financial assets

Investments in unconsolidated subsidiaries and investments in associates, generally those in which the Group exercises a significant influence, are accounted for by the equity method. Significant influence is assumed if the Group holds more than 20% of the voting rights or in relation to the decisional power exercised.

Other investments available-for-sale are measured at fair value which coincides, for listed investments, at the market price on last day of the period. Unrealized gains and losses are recognized directly in equity. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity is reversed and recognized in the income statement. Such impairment losses may not later be reversed through the income statement.

Securities available-for-sale represented by debt securities, are recognized at cost, less any impairment losses, and subsequently measured at fair value. The difference is recognized in equity. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity is reversed and recognized in the income statement. Such impairment losses, when the reasons which gave rise to them no longer exist, are reversed in the income statement but only up to the initial amount.

Securities, security deposits and other financial assets held to maturity are recognized and measured at amortized cost.

The amortized cost of a financial asset or liability is the amount at which the financial asset or liability is measured initially net of the repayment of principal, adjusted up or down on the basis of the total amortization of any difference between the initial amount and the maturity amount using the effective interest method, less any writedown (made directly or through the use of an accrual) for impairment or uncollectibility.

The effective interest rate is the rate that exactly discounts future payments or collections over the expected life of the financial instrument or, if appropriate, over a shorter period at the net carrying amount of the financial asset or liability.

Other current financial assets

Financial assets held for trading, being acquired for resale in the short term, are measured at fair value through profit and loss.

This category includes short-term credit instruments and other forms of investment of liquidity, some unconsolidated investments, as well as premiums, adjustments and derivatives.

Inventories

Inventories are stated at the lower of purchase or manufacturing cost and estimated realizable value. Cost is determined by the weighted average cost method or FIFO (First-in, First-out).

Inventories of finished and semifinished goods include the direct costs of materials and labor and indirect costs (variable and fixed), excluding general administration expenses. The market value of the inventories takes into account provisions for obsolete inventories.

Assets held for sale

Assets, or a group of assets and liabilities (that must not be offset), which are highly probable of being sold within the next year, are classified as held for sale on a specific line in the balance sheet and, if they represent significant sectors of activities, the relative results are shown separately in the income statement.

The disclosure relating to the results of such assets, for prior periods presented in the financial statements, is shown separately.

Such assets are stated at the lower of the carrying amount and fair value less costs to sell. Any impairment loss that arises should be recorded in the income statement. The impairment loss should eventually be reversed if the reasons for the impairment no longer apply, but only up to the initial amount. From the time the asset is recognized as an asset held for sale, amortization and depreciation cease. Financial expenses and expenses attributable to the liabilities of a disposal group classified as held for sale should continue to be recognized.

When the conditions which led to the recognition of an asset as held for sale no longer apply, it should be reclassified to non-current assets and stated at the lower of the carrying amount before being designated as held for sale and its recoverable amount at the date of the subsequent decision not to sell the asset; the difference is recognized in profit and loss.

Non-financial receivables and payables

Receivables are initially recognized at fair value, represented by the present value of the amount that will be collected.

A provision for impairment of trade receivables is established when there is objective evidence of an impairment loss or a risk that the Group will not be able to collect the contractual amount (principal and interest) at the contractually agreed dates. The amount of the provision is the difference between the asset's carrying amount and the present value of recoverable estimated future cash flows, discounted at the effective interest rate.

Payables are measured at their nominal amount, increased by the interest expense due, if any.

Debt

Debt bearing interest is recognized at cost which corresponds to the fair value of the amount received net of directly attributable costs. Debt is subsequently measured at amortized cost. The difference between amortized cost and the amount to be repaid is recognized in the income statement on the basis of the effective interest rate over the period of the loan.

Debt is classified in current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months from the reporting date.

Derivative financial instruments

All derivative financial instruments are measured at fair value at the end of the period.

Financial instruments qualify for hedge accounting only when there is formal designation and documentation of the hedging relationship and the hedge, verified periodically, is highly effective.

When financial instruments qualify for hedge accounting, the following accounting treatment applies:

- Fair value hedge: where a derivative financial instrument is designated as a hedge of the exposure to changes in fair value of a recognized asset or liability that is attributable to a particular risk and could affect profit or loss, the gain or loss from remeasuring the hedging instrument at fair value is recognized in the income statement.

- Cash flow hedge: where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows of a recognized asset or liability or a highly probable forecasted transaction and could affect profit or loss, the effective portion of any gain or loss on the derivative financial instrument is recognized directly in equity. The cumulative gain or loss is removed from equity and recognized in the profit and loss account at the same time in which the hedged transaction affects profit or loss. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in equity and is recognized in the income statement at the same time the related transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in equity is recognized in the income statement immediately.

If the conditions of IAS 39 are not met, the transactions, even if they have been set up for the purpose of managing risk exposure are classified and measured as trading transactions. In that case, the difference with fair value is recognized in the income statement.

Employee benefits – Pension plans

The companies of the Group offer their employees various forms of pension plans with specific characteristics that vary according to the law, the regulations and the practices in the countries in which they operate.

The pension plans are currently either defined contribution or defined benefit plans.

Under defined contribution plans the Group pays contributions to outside, legally separate entities with administrative autonomy, which frees the employer from any subsequent obligation as the outside entity assumes the commitment to pay what is due to the employee.
Consequently, the Group companies record the contribution paid as an expense and do not recognize any liability.

Defined benefit plans include post-employment benefits, other than those under defined contribution plans. Under defined benefit plans, the Group companies have the obligation to set aside the costs relating to the benefits guaranteed to its employees in service and to retired employees. The actuarial risk and the investment risk are thus substantially borne by the companies of the Group.

Defined benefit plans, which include employee severance indemnities established by Italian laws, are measured by actuarial techniques using the Projected Unit Credit Method.
As provided by the amendment to IAS 19 – Employee Benefits, issued by the IASB in December 2004, the Group elected to recognize actuarial gains and losses immediately in the period in which they arise, outside the income statement, in a statement of recognized income and expense.
All cumulative actuarial gains and losses that existed at January 1, 2004 have been recognized in equity.
For defined benefit plans without plan assets, the expenses relating to the increase in the present value of the obligation, due to the fact that the payment date of the benefits is nearing, are recognized in financial expenses.
Payments relative to defined contribution plans are recognized as an expense in the income statement as incurred.

The liability is calculated on an individual basis and takes into account life expectancy, personnel turnover, salary changes, revaluation of the yields, inflation and the present value of the amounts to be paid. The specific assumptions of each plan take into account the local economic conditions.

Defined benefit plans are in some cases covered by financial assets managed outside the Group companies. In those cases, the amount recognized in the financial statements for such liabilities corresponds to the difference between present value of future services (actuarial liability) and the market value of the assets invested that are intended to cover the liability, increased by losses or decreased by unrecognized (or not yet recorded) gains and, in any case, taking into account the surplus cap limit for assets established by paragraph 58 of IAS 19. When the result of this calculation shows a net obligation it is recognized in a provision under liabilities; in the reverse case, an asset is recognized.

To determine the cost of pension plans for the period, the Group has retroactively adopted starting from 2005, the immediate recognition of actuarial gains and losses directly in equity (presented in the consolidated statement of recognized income and expense in 2005 and 2004), in accordance with the amendment to IAS 19 dated December 16, 2004. For other long-term benefits, actuarial gains and losses are recognized immediately in profit and loss.

Employee benefits – Stock option plans

In accordance with IFRS 2 – Share-based Payment, the full amount of the fair value of stock options on the grant date is expensed in personnel costs on a straight-line basis over the period from the grant date to the vesting date, with a contra-entry recognized directly in equity. Changes in fair value after the grant date have no effect on the initial measurement.

The cost is recalculated each year in relation to the number of options not yet exercised.

In accordance with IFRS 2, the Group has applied this standard to stock options granted after November 7, 2002 and not yet vested at the effective date of IFRS 2 (January 1, 2005).

Provisions for other liabilities and charges

Provisions for other liabilities and charges refer to costs and expenses of a determinate nature which are certain or likely to be incurred but, at the balance sheet date, are uncertain as to the amount or as to the date on which they will arise. Accruals are recorded when there is an obligation, legal or constructive, resulting from a past event, when it is probable that the use of resources will be required to satisfy the obligation and when a reliable estimate of the amount of the obligation can be made.

Changes in estimates are recorded in the income statement in the period in which the change is made.

The accruals mainly refer to environmental or legal risks and accruals for restructuring operations.

Accruals for environmental or legal risks

In general, environmental and legal risks are evaluated case by case. The accrual, if any, is booked on the basis of the best information available, on condition that this information makes it possible to determine a probable loss that is estimated in a sufficiently reliable manner.

Accruals for restructuring operations

An accrual for restructuring operations is booked on condition that a detailed and formal restructuring plan has been approved and that the restructuring has begun or that the details of the restructuring plan have been made public.

Treasury stock

The cost of any treasury stock purchased and/or held as a result of specific stockholder resolutions and the proceeds from any subsequent sale are recognized as movements in equity.

Income taxes

Current income taxes are calculated according to the tax laws in force in the countries in which the companies of the Group operate.

Taxes on income are recognized in the income statement except to the extent that they relate to items directly charged or credited to equity, in which case the related income tax effect is recognized in equity.

Temporary differences between the amounts of assets and liabilities in the financial statements and the corresponding amounts for tax purposes give rise to temporarily deferred tax liabilities recorded in a specific provision under liabilities or eventually to deferred tax assets recorded in deferred tax assets only if there is reasonable certainty of future recovery. Deferred tax assets are also recognized for the tax benefit connected with tax loss carryforwards whenever specific requisites for recoverability are met. Deferred tax assets and liabilities are offset when they refer to the same company and there is a legally enforceable right of offset.

Deferred tax assets and liabilities are shown separately from other receivables and taxes payable in a specific caption under non-current assets or liabilities.

Transactions in foreign currencies

Transactions in foreign currencies are recorded at the foreign exchange rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the foreign exchange rate prevailing at that date. Exchange differences arising on the settlement of monetary items or on reporting monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements, are recognized in the income statement.

Sales and purchases of receivables

Receivables sold with recourse remain in the balance sheet of the assignor which records a payable to the buyer against collection and financial expenses to be borne. Receivables sold without recourse are only derecognized if it can be demonstrated that the risks and rewards relating to the asset have been substantially transferred to the assignee.

Consequently, all receivables sold which do not meet IAS 39 derecognition requirements are recognized as such in the Group financial statements even though they have been legally sold; a corresponding financial liability is recorded in the consolidated balance sheet as “Debt for advances on the sales of receivables”. Gains and losses relating to the sale of such assets are not recognized until the assets are removed from the Group balance sheet.

Revenues

Revenues are stated net of discounts, allowances and rebates and are formed by sales of merchandise, goods and services as part of the Group’s principal activities. Revenues from sales of goods and merchandise are recognized when the risks and rewards of ownership of the goods are transferred to the customer.

Revenues from services are recognized by reference to the stage of completion of the transaction at the balance sheet date and measured on the basis of the services rendered.

Financial income is recognized according to the accrual principle on the basis of the effective rate of return.

Dividends are recorded in the year in which they are approved for distribution by the disbursing company.

Other non-recurring income (expenses)

Other non-recurring income (expenses) includes the gains and/or the losses on the disposal of non-current assets other than discontinued operations or assets held for sale (the results of the latter are included in “Profit (loss) from discontinued operations or assets held for sale”). They also include impairment losses of assets, restructuring costs, accruals and utilization of non-current provisions for liabilities.

Earnings per share

Basic earnings per share is calculated by dividing the profit of the Group by the weighted average number of shares outstanding during the period, excluding treasury stock. Diluted earnings per share is calculated by adjusting the weighted average number of shares outstanding to assume conversion of all dilutive potential shares. The profit of the Group is also adjusted to take into account the effects, net of taxes, of the conversion.

Use of estimates

The preparation of the financial statements and related disclosures that conform to IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates. Estimates are particularly used for impairment tests of goodwill, depreciation and impairments of property, plant and equipment, accruals for employee benefits and accruals for environmental and other disputes. Estimates and assumptions are reviewed periodically and the effects of any changes are reflected in the income statement.

Segment information

Given the nature of the activities of IFI and the subsidiary IFIL, IFI presents segment information which coincides with the consolidated data of each subsidiary and associate holding company, each of which represents an investment in a primary reporting segment.

6. NEW ACCOUNTING STANDARDS ISSUED BY THE IASB

The IFI Group is evaluating the impact, if any, of the new accounting standards and interpretations issued during 2005, which are described below.

In April 2005, the IASB issued an amendment to IAS 39 – Financial Instruments: Recognition and Measurement to permit the foreign currency risk of a highly probable intragroup forecast transaction to qualify as the hedged item in a cash flow hedge in consolidated financial statements – provided that the transaction is denominated in a currency other than the functional currency of the entity entering into that transaction and the foreign currency risk will affect the consolidated financial statements. The amendment also specifies that if the hedge of a forecast intragroup transaction qualifies for hedge accounting, any gain or loss that is recognized directly in equity in accordance with the hedge accounting rules in IAS 39 must be reclassified into the income statement in the same period or periods during which the foreign currency risk of the hedged transaction affects consolidated income statement.

In June 2005, the IASB issued the final amendment to IAS 39 – Financial Instruments: Recognition and Measurement to restrict the use of the option to designate any financial asset or any financial liability to be measured at fair value through profit and loss (the 'fair value option'). The revisions limit the use of the option to those financial instruments that meet certain conditions. Those conditions are that:

- the fair value option designation eliminates or significantly reduces an accounting mismatch;
- a group of financial assets, financial liabilities, or both are managed and their performance is evaluated on a fair value basis in accordance with a documented risk management or investment strategy;
- an instrument contains an embedded derivative that meets particular conditions.

These amendments to IAS 39 are effective for annual periods beginning on or after January 1, 2006.

In August 2005, the IASB issued IFRS 7 – Financial Instruments: Disclosures and a complementary amendment to IAS 1 – Presentation of Financial Statements – Capital Disclosures. IFRS 7 requires disclosures about the significance of financial instruments for an entity's financial position and performance. These disclosures incorporate many of the requirements previously in IAS 32 – Financial Instruments: Disclosure and Presentation. IFRS 7 also requires information about the extent to which the entity is exposed to risks arising from financial instruments, and a description of management's objectives, policies and processes for managing those risks. The amendment to IAS 1 introduces requirements for disclosures about an entity's capital.

IFRS 7 and the amendment to IAS 1 are effective for annual periods beginning on or after January 1, 2007.

In August 2005, the IASB issued an amendment to IAS 39 on the accounting treatment of financial guarantee contracts issued. The amendment requires that issuers of financial guarantee contracts include the resulting liabilities in their financial statement, measured as follows:

- initially at fair value;
- subsequently at the higher of the best estimate of the expenditure required to settle the present obligation at the balance sheet date in accordance with IAS 37 - Provisions, Contingent Liabilities and Contingent Assets and the amount initially recognized less, where appropriate, cumulative amortization recognized in accordance with IAS 18 – Revenue.

These amendments are effective for annual periods beginning on or after January 1, 2006.

During 2005, IFRIC interpretation No. 4 was issued – Determining whether an arrangement contains a lease.

Lastly, the IFI Group believes that the additional interpretations (IFRS 6, IFRIC 5 and IFRIC 6) issued during 2005 have no impact on the Group.

7. RISK MANAGEMENT

IFI S.p.A.

In view of its business as an investment company, IFI is not subject to specific credit risks. Moreover, it is not subject to direct currency risks since it does not hold significant equity investments denominated in currencies other than the euro.

The consolidated net financial position is currently a borrowings position. The liquidity risk could increase as a result of investment decisions that are not preceded by sufficient liquidation of assets or raising of sufficient funds that can be readily used. To this end, IFI has credit lines of € 1,106 million of which € 595 million is irrevocable, due beyond one year.

IFI assesses and manages its exposure to changes in interest rate risks consistently with its management policy and utilizes derivative financial instruments to fix some of the financing obtained with a predetermined interest rate. Derivative financial instruments are not used for speculative purposes.

In particular, during 2005, the only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps and collars on some existing loans.

IFIL Holdings System

In view of its business as an investment company, IFIL is not subject to specific credit risks. Moreover, it is not subject to direct currency risks since it does not hold significant equity investments denominated in currencies other than the euro.

The consolidated net financial position of the “Holdings System” is currently a net cash position and, therefore, this also renders the liquidity risk insignificant. In any case, the financing requirements and the cash flows of the companies in the “Holdings System” are coordinated so that the financial resources are managed effectively and efficiently. Outgoing flows of current operations are substantially financed by incoming flows from normal business and cash availability.
Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or raising of sufficient funds that can be readily used. To this end, IFIL current has credit lines of € 1,458 million, of which € 570 million is irrevocable, due beyond one year.

IFIL assesses and manages its exposure to changes in interest rate risks consistently with its management policy and utilizes derivative financial instruments to fix some of the financing obtained with a predetermined interest rate. Derivative financial instruments are not used for speculative purposes.

In particular, during 2005, the only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps and collars on some existing loans and on a part of the bonds issued.

Sequana Capital Group
The sales of net options are prohibited. The Sequana Capital Group's policies do not allow it to operate on financial markets for speculative purposes and provide for the use of derivative financial instruments only in the event of exposure to certain or highly probable risks.
The Sequana Capital Group uses derivative financial instruments to hedge exposure to interest rate fluctuations as its loans, for the most part, are obtained at 1-, 2- and 3-month floating rates.
The operating companies of the group use derivative instruments on interest rates under the coordination of the general management of the group for a part or the whole of its net debt.

In the past, the parent, Sequana Capital, hedged interest rate exposure on its net debt by putting into place interest rate options and CAPs against the 1- to 3-month Euribor or used zero cost collars. After the reduction in its net debt, in 2005, the hedges that terminated were not renewed.

The Sequana Capital Group uses certain derivative instruments to hedge exchange rate risk.
Sequana Capital put into place currency options to guarantee the exchange rate of the Legg Mason shares listed in U.S. dollars on the New York stock exchange.
On cash resources in euros held by the British holding companies, a reverse position was taken by selling euros against the British pound for an amount that varies in relation to changes in the positions for purposes of canceling the economic effect of the change in the euro/British pound exchange rate.
As for the operating companies, derivative instruments were put into place for future flows in currencies other than the euro.

Alpitour Group
The Alpitour Group's policy excludes the possibility of using derivative financial instruments for speculative purposes.
The Group uses derivatives to hedge currency risk (mainly forward purchases in U.S. dollars to hedge payments of tourism services) and interest rate risk with Interest Rate Swaps.

8. CHANGE IN THE SCOPE OF CONSOLIDATION

Changes in the scope of consolidation during 2005 at the various levels of consolidation are described below.

IFIL Holdings System
Some wholly-owned subsidiaries, after the distribution of almost all their earnings and capital reserves, were wound up (Mediterranean Capital B.V. and Ifil Finance B.V.) or put into a wind-up (NHT New Holding for Tourism S.A.) and at December 31, 2005 they are therefore accounted for by the equity method (they were previously consolidated line-by-line). Sadco S.A. was put into a wind-up at the end of 2005 and is therefore consolidated line-by-line until December 31, 2005.
In 2005, the wind-ups were closed for Mediterranean Capital B.V., Ifil Finance B.V., Ifil Capital Partners LP, Ifil America LP and Ifil Investments LLC.

Sequana Capital Group
On June 23, 2005, Sequana Capital, Legg Mason and the management of Permal Group Ltd reached an agreement for the sale of Permal Group Ltd for varying interest holdings at different times to Legg Mason.

In accordance with this agreement, after the legal reorganization which had brought the Sequana Capital Group and management of Permal Group Ltd to hold, respectively, 76.86% and 23.14% of Permal Group Ltd capital stock, on November 3, 2005, Sequana Capital sold 70.5% of Permal Group Ltd's capital stock to Legg Mason for U.S. $ 718 million. This amount was paid in cash for U.S.$ 542 million (equal to € 447 million, of which € 436 million was received in November 2005 and € 11 million was received in January 2006). The remaining amount of U.S.$ 176 million (equal to € 146 million) was paid with 1,664,963 Legg Mason shares for a par value of U.S.$ 105.90 per share.
At December 31, 2005, such shares were classified as "available-for-sale" and were measured at fair value on the basis of the stock market price at December 30, 2005 of U.S.$ 119.69, with a gain of € 15 million, net of taxes, accounted for as an increase of consolidated equity.

A hedging transaction was put into place on the amount received in cash and made it possible to reduce the debt of the Sequana Capital Group in euros.

Taking into account the reciprocal purchase and sale transactions provided by the June 23, 2005 agreement on the remaining 6.36% stake in Permal Group Ltd held by Sequana Capital, Permal Group Ltd was fully deconsolidated on the basis of the data at October 31, 2005 with a consolidated gain of € 455 million, net of selling costs and income taxes. This gain at the level of IFIL amounts to € 504 million, in that IFIL had entirely amortized the goodwill on that investment in prior years. The remaining stake was classified as “long-term receivables” in non-current financial assets.
The due dates of this receivable are:

- November 2007 for U.S.$ 53.6 million (for a 5.36% stake)
- November 2009 for U.S.$ 10 million (for a 1% stake)

The amounts were discounted to present value at a 5.15% rate (the rate listed for U.S.$ bonds by issuers with a BBB rating in the United States financial sector) by due date; at December 31, 2005, the present value of the amount is U.S.$ 57 million (€ 48 million).

Finally, depending on the results of Permal Group Ltd in 2007 and in 2009, Sequana Capital may receive an additional amount over and above the price of each of the tranches of shares sold for a maximum amount, respectively, of U.S.$ 146 million and U.S.$ 30 million. These additional amounts, in view of their uncertain nature, have not been accounted for in 2005.

The following tables present the effects of the deconsolidation of Permal Group and Pechel Industries on the consolidated income statement for the year 2004 (IFRS 2004 financial statements) restated and adjusted in accordance with IFRS.

The reconciliation between the latter and the published consolidated income statement for the year 2004 prepared in accordance with Italian GAAP is presented in the Appendix.

€ in millions	Financial Statements 12/31/2004	Deconsolidation of Permal and Pechel held for sale	Financial Statements 12/31/2004
Revenues	5,565	(277)	5,288
Other revenues from current operations	92	0	92
Purchases of raw materials and changes in inventories	(3,316)	0	(3,316)
Personnel costs	(985)	69	(916)
Costs for external services	(851)	141	(710)
Taxes and duties	(47)	0	(47)
Amortization and depreciation	(195)	1	(194)
Accruals to provisions and other expenses from current operations	(96)	1	(95)
Profit from current operations	167	(65)	102
Other non-recurring income (expenses)	(275)	0	(275)
Operating loss	(108)	(65)	(173)
Cost of net financial debt	(74)	(2)	(76)
Other financial income (expenses)	34	4	38
Financial income (expenses)	(40)	2	(38)
Income taxes	12	22	34
Profit (loss) of companies consolidated line-by-line	(136)	(41)	(177)
Share of earnings (losses) of companies accounted for by the equity method	(302)	(7)	(309)
Loss from continuing operations	(438)	(48)	(486)
Profit (loss) from discontinued operations or assets held for sale	606	48	654
Profit before minority interest	168	0	168
Profit - minority interest	(48)	0	(48)
Profit - Group	120	0	120

Various minor transactions took place in the Antalis Group, such as the purchase of the companies First Graphics (South Africa) and Antaréa (Italy), as well as the purchase of the minority stakes in Simge Turquie and Shriro Pacific Paper Singapore.

During 2004, the only change in the scope of consolidation referred to the purchase of the 100% stake in the Brangs & Heinrich Group by Antalis.

The data relating to the most important acquisitions is as follows:

€ in millions	First Graphic	Antaréa	Brangs & Heinrich
Date of acquisition	July 1, 2005	August 2, 2005	July 1, 2004
Percentage of acquisition	100%	100%	100%
Country	South Africa	Italy	Germany
Closing date of financial statements	February 28	December 31	December 31
Amounts expressed in local currency (thousands)	ZAR	EUR	EUR

Provisions for other liabilities and charges			(5)
Other net liabilities			(3)
Net assets purchased (b)	6	5	11
Net goodwill (a-b)	6	1	22

Alpitour Group

Alpitour subscribed to 50% of the capital stock of two newly-established companies: Vacanzeinitalia S.p.A. which operates in the hotel sector and Alpitour Group Egypt For Tourism S.A.E. which operates in the incoming sector. Both companies are stated at cost as they are not operational. The consolidation of these companies line-by-line would not have had a significant impact on the result or on the consolidated net equity of the Group since their balance sheet values are negligible.

Alpitour has also sold the entire investment (70% of capital stock) held in Jumbo Tours Sicilia S.r.l. and in Elshah For Floating Hotels in which a 99.67% stake was held by the subsidiary I.E.T.I.C., previously consolidated line-by-line.

9. OTHER INFORMATION

Significant subsequent events and related party transactions are presented in the Directors' Report on Operations.

COMMENTS ON THE PRINCIPAL ITEMS IN THE CONSOLIDATED BALANCE SHEET

10. GOODWILL

The composition of goodwill by business segment is as follows:

€ in millions	12/31/2005	12/31/2004	Change
Portion of goodwill on the 2000 takeover bid allocated to ArjoWiggins	497	497	0
Other companies	3	3	0
ArjoWiggins Group	500	500	0
Portion of goodwill on the 2000 takeover bid allocated to Antalis	155	155	0
Inversiones GMS	35	28	7
Promotional Products	23	23	0
Antalis Gmbh	23	23	0
Brangs & Heinrich	22	22	0
Other companies	29	16	13
Antalis Group	287	267	20
Permal Group	0	4	(4)
Jumboturismo S.A.	11	11	0
Altamarea V & H Compagnia alberghiera S.p.A.	8	2	6
Viaggidea S.p.A	6	6	0
Other Alpitour Group companies	2	2	0
Alpitour Group	27	21	6
Net goodwill	814	792	22

The analysis of the changes in goodwill is as follows:

€ in millions	12/31/2005	12/31/2004
GROSS AMOUNT		
Opening balance	1,040	1,078
Changes during the year		
Changes due to business combinations	(35)	73
Decreases	(19)	
Exchange differences	9	(4)
Reclassifications		(3)
Other changes	14	13
Accounting elimination of goodwill completely written off		(117)
Changes in gross amount	(31)	(38)
Closing balance	1,009	1,040
ACCUMULATED IMPAIRMENT LOSSES		
Opening balance	(248)	(181)
Changes during the year		
Changes due to business combinations		(23)
Exchange differences	(1)	
Impairment losses recognized in the income statement (a)		(164)
Use of accumulated impairment losses due to disposal (income statement) (a)	68	
Reclassifications		3
Other changes	(14)	
Accounting elimination of goodwill completely written off		117
Changes in accumulated impairment losses	53	(67)
Closing balance	(195)	(248)
NET AMOUNT		
Opening balance	792	897
Changes during the year		
Changes due to business combinations	(35)	50
Decreases	(19)	
Exchange differences	8	(4)
Impairment losses recognized in the income statement (a)		(164)
Use of accumulated impairment losses due to disposal (income statement) (a)	68	
Other changes		13
Changes in net amount	22	(105)
Closing balance	814	792

(a) Recorded under “Other non-recurring income (expenses)” in the income statement.

During 2005, the changes due to business combinations principally originate from the disposal of Permal Group (-€ 53 million), from the line-by-line consolidation of some companies in the Antalis Group (mainly First Graphic, Antalis Malaysia and Antaréa S.p.A.) for +€ 11 million and the goodwill paid on the acquisition of an additional 40% stake in Altamarea V&H Compagnia Alberghiera S.p.A. for € 5 million. In 2004, € 22 million of the increase was attributable to the addition of the Brangs & Heinrich Group in the scope of consolidation.

The use of accumulated impairment losses due to disposal refers to Permal Group for € 49 million and the Alpitour Group for € 19 million.

In 2004, impairment losses largely referred to the impairment test on the goodwill of Antalis and Alpitour.

Impairment test on the goodwill of the Sequana Capital Group

The value of a company is the only method used for the valuation of the equity investments of the Group and is calculated using a multi-criteria approach which includes multiples of the current operating earnings, future net cash flows and comparable transactions. This calculation, moreover, is confirmed by an external assessment. This value, from which the net financial debt is deducted, constitutes the revalued net asset.

The annual impairment test on the investments of the Sequana Capital Group is based on the comparison between the consolidated net accounting amount of its equity investments and the revalued net asset. Only the losses are accounted for in the income statement.

The principal assumptions used in the calculation of the impairment test are as follows:

		ArjoWiggins	Antalis
DCF infinite growth rate	2005	0.21%	0.38%
	2004	(0,15%)	0.86%
Pretax discount rate	2005	8.00%	8.70%
	2004	8.60%	9.30%

11. OTHER INTANGIBLE ASSETS

The changes in other intangible assets are as follows:

€ in millions	Concessions, licenses and trademarks	Players' registration rights	Other intangible assets	Intangible assets in progress	Total

The IFI Group has commitments for the purchase of intangible assets of € 1 million (€ 9 million at December 31, 2004).

Research and development costs charged to the income statement in 2005 amount to € 17 million (€ 17 million in 2004).

Intangible assets completely amortized but still in use amount to € 29 million and refer to the concessions, licenses and trademarks of the Alpitour Group of € 16 million, players' registration rights of € 9 million and other intangible assets of € 4 million.

In 2005, additions refer to internally-generated assets of € 9 million (€ 13 million in 2004).

12. PROPERTY, PLANT AND EQUIPMENT

The changes in property, plant and equipment are as follows:

The item ”transfer to assets held for sale” includes the value of the non-current assets of the companies of the Alpitour Group (Blumarin Hotel S.A. de C.V. and Blumarin Services S.A. de C.V.) of € 22 million, transferred to assets held for sale.

In 2005 and 2004, no borrowing costs were capitalized.

Commitments for the acquisition of property, plant and equipment amount to € 11 million at December 31, 2005 (none in 2004).

The amount of expenses included in the carrying amount of assets under construction in progress, recorded in 2005, amounts to € 1 million (none in 2004).

In 2005, restrictions on the ownership of property, plant and equipment as a result of real guarantees amount to € 5 million and relate to the Sequana Capital Group. In 2004, there were no restrictions as a result of real guarantees provided on property, plant and equipment.

Temporarily inactive tangible assets amount to € 22 million at December 31, 2005 and refer entirely to Juventus Football Club; they include costs for the design project of the new stadium and the Campi di Vinovo sports center.

At December 31, 2005, property, plant and equipment completely depreciated but still in use amounts to € 7 million.

Impairment test on the property, plant and equipment of the Sequana Capital Group

In 2005, the measurement of property, plant and equipment led to an impairment loss of € 145 million for ArjoWiggins, determined by a comparison of the recoverable amount of the assets of ArjoWiggins, equal to € 258 million, and the net carrying amount of € 403 million.

Such measurements were carried out on the basis of the impairment tests performed at the level of cash-generating units which represent the level at which the operating subsidiaries of the group manage their production system. The recoverable amount of the cash-generating units is determined on the basis of the value in use, that is, by projecting the discounted cash flows taken from the budgets approved by management for five years. Beyond that period, the cash flows are extrapolated starting from the growth rates by activity.
The discount rates used in 2005 are between 7.4% and 8.4% for European Union countries and 11% for North America.

Finance lease contracts on property, plant and equipment

The carrying amount of property, plant and equipment includes € 11 million (€ 14 million at December 31, 2004) relating to assets acquired under finance leases, mainly referring to the Sequana Capital Group and Alpitour.
In particular, there are some finance lease contracts which refer to three buildings located in Cuneo, Milan and Padua held by Welcome Travel Group, a subsidiary of the Alpitour Group.

The changes compared to 2004 are the following:

Sundry Alpitour Group subsidiaries	-	0	-	1	(1)
Ifabanque		0	25.0	7	(7)
		3,165		1,927	1,238

The amount of the investment in SGS includes, at December 31, 2005, goodwill of € 395 million (€ 399 million at December 31, 2004). The Sequana Capital Group measures the fair value of the investment in SGS using the average stock market price of the last 45 days with a 5% discount. At December 31, 2005, the fair value of the investment in SGS was equal to € 1,212 million (€ 886 million at the end of 2004).

The analysis of the changes is as follows:

€ in millions	2005	2004	Change
Opening balance	1,927	2,888	(961)

Total changes during the year	1,238	(961)	2,199
Closing balance	3,165	1,927	1,238

On September 20, 2005, IFIL purchased 82,250,000 Fiat ordinary shares from Exor Group (controlled by Giovanni Agnelli e C. S.a.p.az.). These shares came from an equity swap agreement between Exor Group and Merrill Lynch International last April. This purchase was approved on September 15, 2005 by the board of directors, which used the services of an advisor, Mr. Gerardo Braggiotti of G.B. Partners.

The purchase price was € 6.5 per share for a total of € 534.6 million. Fiat stock was officially traded at € 7.76 per share on September 15, 2005 compared to the weighted average official prices over the last three months of € 6.91 per share and the weighted average official prices over the last six months of € 6.16 per share. The stock was transferred from Merrill Lynch to Exor Group at the same time the Fiat capital increase was executed, on September 20, 2005. The sale by Exor Group to IFIL immediately followed on the same date. In the identical context, IFIL, on the same date, sold Merrill Lynch all the option rights to which it was entitled on the Fiat capital increase.

On September 7, 8 and 9, IFIL purchased 5,500,000 Fiat ordinary shares on the market for € 41.1 million.

The aforementioned transactions allowed IFIL to maintain its investment in Fiat ordinary capital stock unchanged (30.06%) after the capital increase by Fiat, which took place on September 20, 2005.

A total of 87,750,000 Fiat ordinary shares was purchased for a global investment of € 580.2 million, including incidental charges of € 4.5 million.

The investments in 2004 referred to the purchase of 9.53% of Eurofind capital stock from Mediobanca in January 2004 by the subsidiary Ifil Investissements.

In 2005, the item "Reclassification to assets held for sale" refers entirely to the subsidiaries of Permal Group. In 2004, the item referred to the investment in Pechel Industries for € 17 million, sold in March 2005, and the investment in Eurofind Textile for € 70 million.

The disposals in 2004 referred solely to 50% of Eurofind Food capital stock.

Highlights of the principal associates accounted for by the equity method are as follows:

	Fiat Group		SGS Group		Exor Group	
€ millions	2005	2004	2005	2004 (a)	2005	2004
Currency	Euro	Euro	CHF	CHF	Euro	Euro
Closing date	12/31/2005	12/31/2004	12/31/2005	12/31/2004	12/31/2005	12/31/2004
Total assets	62,454	62,522	2,765	2,252	709	677
Current and non-current liabilities	53,041	57,594	1,290	1,063	29	8
Revenues	46,544	45,637	3,308	2,885		
Profit - Group and minority interest	1,420	(1,579)	388	293	36	93
Official market price at closing date:						
Fair value of investment held by the Group	2,592	1,542	1,212	886	207	215

(a) Adjusted data following the early adoption of IAS 19 revised.

With regard to the consolidated profit of the Fiat Group, it should be pointed out that in the absence of the positive effects of non-recurring transactions, the result would have essentially been a breakeven.

14. FINANCIAL ASSETS

The composition of financial assets is as follows:

€ in millions	12/31/2005	12/31/2004	Change
Non-current financial assets	1,524	1,015	509
Current financial assets	1,170	1,361	(191)
Total financial assets	2,694	2,376	318

Details are as follows:

	Non-current financial assets		Current financial assets	
€ in millions	12/31/2005	12/31/2004	12/31/2005	12/31/2004
Investments held to maturity

DG IV deposit (see Note 24)	92	92		
Other deposits and security deposits	10	10		1
Other minor investments	6	5		
Ocean Club Méditerranée bonds	5	4		
Fiat ordinary share warrants 2007	3	3		
	213	195	3	13
Investments available-for-sale				
Sanpaolo IMI	1,229	745		
Other investments	18	15		
Legg Mason (see Note 8)			169	
	1,247	760	169	0
Financial assets at fair value through profit and loss				
Permal investment funds		37		
Receivable from Legg Mason (see Note 8)	48			
Other investments	10	10		
Credit instruments			978	1,083
Other financial assets			7	12
	58	47	985	1,095
Financial receivables	6	13	13	253
Total	1,524	1,015	1,170	1,361

The Ocean Club Méditerranée bonds mature on November 1, 2008 and bear annual interest at 3% per annum and give the right, at maturity, to subscribe to the same number of Club Méditerranée shares at € 58 per share or to receive a total reimbursement of € 5.2 million.

The investment in Sanpaolo IMI is measured at fair value on the basis of the market price at December 30, 2005 equal to € 13.2 per share (€ 10.58 per share in 2004) with the unrealized gain or loss recognized in equity.

Credit instruments included in current financial assets include temporary investments of cash resources made with leading credit institutions on the money market, in time deposits, in securities issued by the Italian government and in other short-term financial instruments held by the foreign subsidiaries of the IFIL Holdings System and Sequana Capital, which do not meet the conditions for classification as “Cash and cash equivalents”.

In 2004, financial receivables totaled € 253 million and referred to the residual receivable (received in 2005) from the Auchan Group, on the disposal of the investment in Eurofind Food.

The analysis of changes during 2005 is as follows:

	Non-current financial assets		Current financial assets	
€ in millions	12/31/2005	12/31/2004	12/31/2005	12/31/2004
Opening balance	1,015	1,060	1,361	775
Increases	332	48	316	861
Decreases	(27)	(102)	(516)	(251)
Fair value recognized in equity	221	12	23	
Fair value recognized through profit and loss		3		
Reversal of (accrual for) impairments	5	(3)		
Exchange differences	17	1	1	(2)
Change in the scope of consolidation	(43)	(8)	(14)	2
Other changes	4	4	(1)	(24)
Changes during the year	509	(45)	(191)	586
Closing balance	1,524	1,015	1,170	1,361

The fair value of current securities is calculated using the market prices at the balance sheet date, where available, or discounting future cash flows.

In 2005, the item "increases" includes IFIL's purchase on the market of 22,700,000 Sanpaolo IMI ordinary shares (1.43% of current ordinary capital stock) for € 264 million, and various transactions by the Sequana Capital Group carried out with regard to the disposal of Permal, detailed as follows:

- increase in Legg Mason stock of € 146 million, which is part of the consideration on the sale of Permal;
- increase in credit instruments for € 163 million;
- measurement of the U.S.$ 63.6 million financial receivables (for the remaining 6.36% stake of Permal not yet sold) due in 2007 and in 2009, at fair value by discounting to present value at the rate of 5.15% equal to € 48 million.

In 2004, the item "decreases" mainly referred to the Sequana Capital Group in respect of the following significant transactions:

- early repayment on June 14, 2004 of the loan made by ArjoWiggins to the buyers of Appleton Papers Inc. (€ 137 million, equal to U.S.$ 167 million);
- discharge on February 27, 2004 of the guarantee deposit made by ArjoWiggins for finance lease transactions (€ 117 million);
- disposal, at market value, of Accor stock (€ 44 million).

In 2005, the item "fair value recognized in equity" includes the fair value adjustment of the investment in Sanpaolo IMI (+€ 220 million) and Fiat ordinary share warrants (+€ 1 million), recorded in financial assets, and the fair value adjustment of Legg Mason stock, recorded in short-term financial assets (+€ 23 million).

The item "change in the scope of consolidation", in 2004, referred to the consolidation of Permal branches and, in 2005, the reclassification of Permal Group to "Assets held for sale" for € 67 million.

15. INVENTORIES

Details are as follows:

€ in millions	12/31/2005	12/31/2004	Change

17. CASH AND CASH EQUIVALENTS

Cash and cash equivalents include:

€ in millions	12/31/2005	12/31/2004	Change
Cash and cash equivalents	595	534	61

At December 31, 2005, cash of € 20 million of the Sequana Capital Group guarantees the credit lines used by Antalis: this cash comes from collections of receivables that are provided as collateral and are released once a week against the addition of an equivalent amount of new trade receivables.
The reconciliation of the amounts shown in the statement of cash flows with the equivalent item in the balance sheet is as follows:

€ in millions	12/31/2005	12/31/2004	Change
Cash and cash equivalents	595	534	61
Bank overdrafts and bank borrowings	(123)	(191)	68
Cash and cash equivalents	472	343	129

18. PROFIT (LOSS) FROM DISCONTINUED OPERATIONS OR ASSETS HELD FOR SALE

The item includes the gains on disposals and the results of the investments sold as follows:

€ in millions	2005	2004
Gains on disposals of investments in:		
- La Rinascente	460	0
- Permal Group and Ifabanque	504	0
- Eurofind Food	0	585
- Club Méditerranée	0	26
Share of earnings (losses) in:		
- Permal Group	43	46
- Eurofind Food	0	(6)
Other investment holdings	0	3
Total	1,007	654

On May 6, 2005, Eurofind Textile S.A. (a Luxembourg company controlled by Auchan and Ifil Investissements) sold 99.09% of Rinascente S.p.A. capital stock to Tamerice S.r.l., a company headed by a group of companies formed by Investitori Associati SGR S.p.A., DB Real Estate Global Opportunities IB L.P., Pirelli RE S.p.A. and the Borletti family, for a price of € 888 million.

On May 17, 2005, the subsidiary Ifil Investissements purchased the remaining 50% of Eurofind Textile capital stock from the Auchan Group for € 349.5 million and then merged it on June 28, 2005. As a result of these transactions, the IFIL Group received net proceeds for a total of € 529 million and realized a gain, at the IFI consolidation level, of € 460 million (both amounts are net of selling costs), with no significant tax effects.

As described in Note 8, on November 3, 2005, Sequana Capital sold 70.5% of Permal Group capital stock to Legg Mason. The sale gave rise to a net gain of € 504 million (after income taxes of € 7 million).

In 2004, the IFIL Group sold 50% of Eurofind Food capital stock for € 1,063 million and 7.2% of Club Méditerranée capital stock for € 62 million, realizing, respectively, net gains of € 577 million (€ 585 million at the IFI consolidation level) and € 26 million.

The analysis of the results of discontinued operations is as follows:

€ in millions	2005	2004
Permal Group Limited and Ifabanque		
Revenues	235	277
Operating expenses	(172)	(212)
Net financial income	2	3
Profit before income taxes	65	68
Income taxes	(22)	(22)
Profit	43	46

In the statement of cash flows, the item "change in the scope of consolidation" includes the net movement of the changes associated with the assets or groups of assets held for sale, which are analyzed as follows:

€ in millions	12/31/2005	12/31/2004
Consolidated cash flows of assets held for sale		
Net cash flows from operating activities	140	22
Net cash flows from investing activities	(27)	(11)
Net cash flows from financing activities	(121)	3
Total cash flows	(8)	14 (a)

(a) The amount refers to Permal Group (€ 12 million) and Pechel Industries (€ 2 million).

The items in the financial statements connected with assets or groups of assets held for sale are as follows:

€ in millions	12/31/2005	12/31/2004
Assets held for sale		
Groups of assets held for sale		
Investments accounted for by the equity method:		
- Pechel Industries		17
- Eurofind Textile		70
Non-current assets held for sale		
Property, plant and equipment	25	3
Total	25	90

The item "property, plant and equipment" included under non-current assets held for sale mainly refers to the hotel resort complex "Club El Mandarin" located in Cancun and owned by the Alpitour Group.
The transaction was effected by the sale of the entire capital stock of the subsidiaries Bluemarin Hotel S.A. de C.V. (the company which owns the hotel complex) and Bluemarin Services S.A. de C.V. (a services company) for a total amount of U.S.$ 45.5 million.

19. EQUITY - GROUP

Capital stock

At December 31, 2005, IFI S.p.A.'s capital stock, fully subscribed to and paid-in, amounts to € 163,251,460 and consists of 86,450,000 ordinary shares and 76,801,460 preferred shares with a par value of € 1 each.
Pursuant to art. 10 of the bylaws, preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code and the second paragraph of art. 13 of the bylaws.
Pursuant to art. 27 of the bylaws, the net income of each year is appropriated as follows:

- 10% to the legal reserve until it reaches one-fifth of capital stock;
- of the remaining amount, 1% is at the board of directors' disposition for distribution among its members;

- the remaining net income is appropriated as follows:
- to preferred shares, a preference dividend of 5.17% of their par value, which is not cumulative from one year to the next;
- after any appropriations to reserves, the residual amount is attributed equally to the ordinary and preferred shares.

Capital stock may be increased for a period of five years, at one or more times, also in divisible form, up to a maximum of € 561,750,000, by the authority delegated, pursuant to art. 2443 of the Italian Civil Code, to the board of directors by the extraordinary stockholders' meeting held April 22, 2003.

IFI stock option plans
The board of directors of IFI S.p.A. to date has not approved any stock option plans.

IFIL S.p.A. stock option plans with underlying IFIL stock
In May 2000, the IFIL board of directors approved a stock option plan for the directors and managers of IFIL and the parent, IFI, for a maximum of 2,700,000 new IFIL ordinary shares.
A total of 2,691,500 options were granted under this plan between 2000 and 2003, according to the level of responsibility held by the beneficiaries in the corporate organization. Such options are exercisable up to December 31, 2006.
Under the power conferred by the stockholders' meeting held on May 25, 2001, the board of directors, on February 7, 2005, voted to increase capital stock as a result of the exercise of 800,000 options granted in 2003 to seven beneficiaries. The stock increase took place in April with the issue of 800,000 IFIL ordinary shares (0.07% of capital stock) of par value € 1, which were subscribed in cash at a per unit price of € 1.85 for a total of € 1,480,000.
In 2005, moreover, 53,250 options became null and void.
The options granted in 2003 gave rise to the recognition of expenses relating solely to 2004 (€ 0.2 million).

In September 2003, the IFIL board of directors approved a second stock option plan solely for the directors, for a maximum of 700,000 IFIL ordinary shares, already issued and purchased by IFIL pursuant to article 2357 and subsequent articles of the Italian Civil Code. A total of 532,000 options were granted under this plan in 2003 to the chairman Gianluigi Gabetti for the same number of ordinary shares exercisable by December 31, 2006 at the price of € 2.28 each.

With regard to these plans, there were no transactions entered into to favor either the purchase or subscription of shares pursuant to art. 2358, paragraph 3, of the Italian Civil Code.

A summary of the stock option plans on IFIL shares outstanding at December 31, 2005 is presented below.

	Number of options	Number of beneficiaries	Exercise price actual (b)	Exercise price average	Market price (c)
IFIL 2000 Plan (expiring December 2006)					
Options granted (a)					
- year 2000	522,000	15	6.997		
- year 2001	506,000	13	6.109		
- year 2002	810,250	13	4.520		
	1,838,250 (d)			5.66	4.686
IFIL 2003 Plan (expiring December 2006)					
Options granted	532,000 (e)	1	2.280	2.28	4.686
Options exercisable at December 31, 2005	2,370,250			4.90	4.686

(a) Net of 800,000 options exercised and 53,250 that became null and void in 2005.
(b) Exercise price adjusted to take into account the cash capital stock increase in July 2003.
(c) Market price at March 24, 2006.
(d) Equal to 0.18% of current ordinary capital stock.
(e) Equal to 0.05% of current ordinary capital stock.

IFIL S.p.A. stock option plans with underlying Alpitour stock

On December 15, 2005, in execution of the resolution passed by the meeting of the board of directors held on November 11, 2005, the Executive Committee of IFIL S.p.A. approved a stock option plan for two managers of the Alpitour Group designed to promote their loyalty to the IFIL Group and provide an incentive to develop and appreciate the investments of the IFIL Group in the tourism sector.

The plan calls for purchase options on Alpitour shares to be granted to the chairman and chief executive officer, D.J. Winteler, and the general manager, F. Prete, respectively, equal to 6% (now 2,127,000 shares) and 5% (now 1,772,500 shares) of Alpitour's capital, held by the subsidiary Ifil Investissements.

After approval on the part of IFIL, the Alpitour board of directors may in the future grant purchase options on Alpitour shares equal to 4% (now 1,418,000 shares) of Alpitour's capital, to other managers who hold important operating positions.

The purchase options may be exercised, at one or more times, during the period between the dates of the approval of the 2006/2007 and 2008/2009 Alpitour financial statements at the price of € 2.238 per share, corresponding to the valuation of the Alpitour Group, equal to € 79.4 million, performed in December 2005 by a specially appointed expert.

IFIL and the managers of Alpitour, finally, exchanged reciprocal purchase and sale options, exercisable during the same above period, on Alpitour shares that will have been purchased by the same managers; the exercise price will be established on the basis of the appraisal which will be performed using the same valuation principles applied in December 2005 valuation.

This plan will be accounted for starting from the 2006 statutory and consolidated financial statements of IFIL S.p.A. in relation to the economic performance of the Alpitour Group during the next years.

Sequana Capital S.A. stock option plans

Sequana Capital granted options to subscribe to the stock of the company to some employees and directors of the company. The plans were approved by the stockholders' meetings held on May 19, 1998, May 21, 2003 and May 3, 2005. The exercise price of these options is fixed, without reductions, on the basis of period market prices. According to the plans in force, the stock may not be subscribed or sold prior to the four-year fiscal unavailability period and the options may not be exercised after eight years from the date they were granted.
The stock option plans in force are the following:

Approval date by Administrative Board		5/4/2000	4/5/2001	4/6/2001	4/11/2002	10/31/2002	5/15/2003	6/18/2004	5/3/2005	Total

New plan and adjustments								55,000		55,000
Options exercised		(218,390)								(218,390)
Options null and void					(25,670)					(25,670)
Number of shares at December 31, 2004		33,715	123,402	123,405	614,514	310,064	420,000	55,000	0	1,680,100
New plan and adjustments		591	1,180	1,545	10,419	5,335	7,054	930	515,000	542,054
Options exercised		(12,937)	(124,582)	(121,596)	(32,105)	(69,858)	(13,000)			(374,078)
Options null and void					(7,337)					(7,337)
Number of shares at December 31, 2005		21,369	0	3,354	585,491	245,541	414,054	55,930	515,000	1,840,739

(a) For the plan issued on May 3, 2005, the rights to the options are gradually acquired by the beneficiaries for subsequent tranches over three years, one-third of the options granted per year of presence.

In accordance with IFRS, plans introduced after November 7, 2002 are measured in the financial statements of Sequana Capital Group starting from January 1, 2005 according to the binomial model using the following assumptions: volatility: 30%; expected dividend yield rate: 3%; risk-free interest rate: between 3.25% and 4.25%, depending on the plans.
Accordingly, personnel costs were recorded for € 1.1 million in 2005 (€ 1.1 million in 2004).

Options outstanding and options exercisable at the end of the years 2005 and 2004 are as follows, together with an indication of the relative weighted average prices for the year.

	December 31, 2005		December 31, 2004	
	Number of shares	Weighted average exercise price (€)	Number of shares	Weighted average exercise price (€)
Options outstanding at the beginning of the year	1,680,100	18.11	1,869,160	17.64
Options outstanding at the end of the year (a)	1,840,739	19.40	1,680,100	18.11
Options exercisable at the end of the year	1,269,809	17.71	1,205,100	18.43

(a) Taking into account the options granted, forfeit or exercised during the year and, with regard to the year 2005, the adjustment which followed as a result of the distribution of dividends from reserves.

Alpitour S.p.A. stock option plan

On December 15, 2000, the extraordinary stockholders' meeting of Alpitour S.p.A. voted to vest the board of directors with the power to increase capital stock by a maximum amount of € 767,500 to service a stock option plan on behalf of the directors, managers and middle management of Alpitour and the companies of the Group.

The regulations of the stock option plan approved by the board of directors on December 15, 2000 state that the aforementioned capital increase of € 767,500 will occur by the issue of a maximum 1,535,000 new ordinary shares of par value € 0.50 each. The options granted under the plan, which carries a period of 68 months, vest in annual lots (at October 31, of each year) and are fully exercisable at a price equal to € 6.73 per share within six months of the approval of the financial statements ended October 31, 2005 (end of August 2006).

The shares purchased in execution of the above plan may be sold to Alpitour; however, the price established by the board of directors of the company is a negative figure due to the results reported by the Alpitour Group in 2005.

At the current date, no options have been exercised by the beneficiaries.

Treasury stock

There were no transactions in preferred treasury stock carried during the year. The balance at December 31, 2005 refers to the following:

		Carrying amount	
	Number of shares	Per share (€)	Total (€ in thousands)
IFI preferred shares	5,360,300	13.15	70,477 (a)

(a) Net of writedowns of € 58,934 thousand made in 2002.

IFI preferred stock in portfolio at December 31, 2005 has a par value of € 5,360 thousand and represents 3.28% of capital stock (6.98% of the class of stock).

A comparison between the carrying value of the treasury stock and the market price at December 30, 2005 (€ 13.87) shows an unrealized gain of € 3.9 million; compared to the market price at March 24, 2006 (€ 16.90), the unrealized gain is € 20.1 million.

An analysis of employee benefits by Group is as follows:

IFI S.p.A. and IFIL S.p.A.
Besides employee severance indemnities, established by art. 2120 of the Italian Civil Code, IFI and IFIL guarantee other forms of benefits (termination benefits, loyalty bonuses, health care plans, defined benefit and defined contribution pension plans) under company or individual supplementary agreements.

Details are as follows:

Employee severance indemnities
Employee severance indemnities reflect the indemnity payable to Italian employees which accrues over the service life and which is paid upon termination of employment. The indemnity may be paid in advance during the employee's service life if certain conditions are met.
In accordance with IAS 19 – Employee Benefits, IFI and IFIL include employee severance indemnities under defined benefit plans and measures it with actuarial techniques, using the Project Unit Credit Method.

Termination benefits
This is a fixed amount in addition to employee severance indemnities which will be paid at the time and in relation to the termination of the employment relationship, at the currently-expected retirement age, on the basis of existing legislation, at the age of 65 for men and at the age of 60 for women. Any raising of the retirement age for whatsoever reasons will have no effect on the payment of these benefits. In the eventuality of the termination of employment prior to the legal retirement age indicated above, the benefits shall be paid for the amount accrued up to the date of termination of employment, compared with and in proportion to the years of service since January 1, 2000 up to the date of the termination of employment. No interest or revaluations of any sort accrue on the amount.

Health care plans
Health care plans are offered to management staff and require the payment of defined contributions to outside funds and entities which offer and pay for health care benefits.

Pension plans

The company's pension plans are for employees categorized as managers and are covered by company agreements and regulations.

They can be "defined benefit" or "defined contribution" plans and provide for the payment of contributions to outside funds that are legally separate and have autonomous assets.

The plans provide for a contribution by the employer and a contribution by the employee plan participant by conferring a part of his/her employee severance indemnity.

The liabilities for contributions accrued but not paid are included in the item "Other payables". The contribution cost is recognized when the employee has rendered his/her service and this cost is recognized in the item "Personnel costs".

Other benefits

Other benefits include loyalty bonuses payable to all employees.

Loyalty bonuses accrue and are paid after a certain number of years of service (25, 30, 35 and 40 years).

In the case of defined contribution plans, the company pays contributions to publicly or privately administered insurance plans on a mandatory, contractual or voluntary basis. Once the contributions have been paid, the company has no further payment obligations.

Defined benefit plans may be unfunded or they may be wholly or partly funded by contributions paid by the employer and the employee plan participants to an entity, or fund, that is legally separate from the employer and from which the employee benefits are paid. For defined benefit plans, the liability for the company is calculated on the basis of the following actuarial assumptions:

	12/31/2005	12/31/2004
Discount rate	4.00%	4.00%
Expected remuneration increase	2-3.50%	2-3.50%
Cost-of-living increase	2.00%	2.00%

In addition to the above financial indexes, all the demographic assumptions have also been taken into account relating to the probability of events such as death, disability, dismissal and retirement of the employees.

The amounts shown in the balance sheet, those recognized in the income statement and the movements in the present value of the obligations, for post-employment benefits, at December 31, 2005 and 2004, are not significant for IFI and IFIL.

The plan assets do not include IFI and IFIL treasury stock.

The assets consist of debt instruments issued by third parties (78%) and other investments (22%).

Description of obligations under defined benefit plans

Under these pension plans contributions are made for pensions, pension supplements and indemnities.

The principal pension plan obligations are in the United Kingdom, in the United States, in France and in Switzerland and represent 91% of the total obligations of the Sequana Capital Group.

In the United Kingdom, the main obligations regard two pension plans as follows:

- the WTPS defined benefit plan for employees of ArjoWiggins and some of the employees of Antalis;
- the ArjoWiggins plan for certain employees of Antalis UK (based on their location). This plan was closed to employees in 2005 and was replaced by a defined benefit plan.

In the United States, the two main pension obligations of the subsidiary Appleton Coated LLC refer to the following:

- the defined benefit pension plan;
- the health care for retired employees.

In France, the two main defined benefit plans are:

- the RCR plan, for certain categories of management employees of ArjoWiggins. This plan was closed to new employees, starting from 1981;
- the severance indemnity plan of ArjoWiggins.

In Switzerland, a defined benefit plan is in place for employees of Antalis.

Return on plan assets

The return on plan assets is determined on the basis of the allocation of the assets, projections of the expected return and historical experience.

UK pension funds

The British subsidiaries of the Sequana Capital Group use defined benefit pension plans.

In 2004, the trustee administrator of the pensions funds unilaterally asked the Sequana Capital Group for an additional contribution to fund the plans which it manages. The calculation of this contribution, the amount of which was British pounds 49.5 million, had to be paid on a linear basis from 2004 to 2008 and originates from the actuarial calculation prepared by the trustee's British actuary.

At December 31, 2005, the remaining balance of this additional contribution amounts to British pounds 29.7 million. Sequana Capital Group's entire obligation for the U.K. pension plans was accrued in accordance with IFRS on the basis of the above actuarial assumptions. From an accounting standpoint, the payments made to pay off the balance of this additional contribution are reflected, when paid, in the calculations of the liability performed each year.

23. PROVISIONS FOR OTHER LIABILITIES AND CHARGES

The composition of the provisions is as follows:

	Current portion		Non-current portion	
€ in millions	12/31/2005	12/31/2004	12/31/2005	12/31/2004

Other non-recurring income and expenses		44	(30)	(5)		
Other financial income and expenses		11				
Share of earnings (losses) of companies accounted for by the equity method			(70)			

The restructuring provisions relate to the corporate restructuring programs of the Sequana Capital Group.

The Fox River and DG IV disputes refer to accruals made by the Sequana Capital Group for the Fox River environmental risks and the fine levied by the European Commission for the alleged violation of fair trade practices. Additional information is provided in Note 24 “Pending Litigation”.

The other risks provisions include accruals set aside by the individual companies mainly in respect of contractual, commercial and litigation risks.

24. PENDING LITIGATION

IFIL S.p.A. and subsidiaries in the “Holdings System”

By notification on May 8, 2003, inferring illegal acts due to a conflict of interest and the unlawful valuation of the contributions in kind, the stockholder K Capital contested the resolution to increase IFIL’s capital stock reserved for Institute Finanziario Industriale S.p.A. passed by the extraordinary stockholders’ meeting of IFIL held on April 23, 2003 and sought compensation from IFIL for (alleged) damages (economic and non-economic) suffered as a result of the unlawful conduct (allegedly) by IFI. During the case and with reference only to (alleged) economic damages, K Capital stated its request for compensation (which originally had not been quantified) in approximately € 17 million.

The preliminary investigation stage is, currently, concluded. The judge chose not to call for an assessment of the case (CTU), requested by K Capital, which nevertheless could be decided by the Board of Judges during the decision stage. On October 26, 2005, the hearing was held for stating the conclusions. After the exchange of the concluding statements (completed in January 2006) and after the oral discussion in court (held on March 10, 2006), a decision in the case will now be reached.

Both of the above requests by K Capital (request to declare the stockholders’ resolution null and void and the request to seek a sum of compensation for damages) appear to be inadmissible and without grounds and therefore at this time the company does not believe that any contingent liabilities will arise as a consequence.

Earlier, the appeal filed under ex article 2378, paragraph 4, of the Italian Civil Code by which the stockholder K Capital had sought the suspension of the execution of the resolution was denied by the Turin Court, by decree filed on June 9, 2003.

Following the communication dated June 17, 2005, the buyer of the investment in La Rinascente, on February 14, 2006, filed for arbitration against Ifil Investissements seeking compensation for an amount of approximately € 32.5 million (in addition to interest, monetary revaluation, court expenses and legal fees) for extraordinary expenses relating to certain points of sale.

In the opinion of Ifil Investissements, the requests are not valid and unacceptable and, in any case, completely unfounded. Moreover, the question that is raised regards aspects that have either been excluded or are not covered by guarantees in the contract.

Furthermore, in the second half of 2005 and during the first few months of 2006, the same party brought actions seeking additional compensation from Ifil Investissements for a total amount of approximately € 16 million principally in connection with accounting treatments in the financial statements at December 31, 2004.
Some minor requests have already been agreed between the parties, whereas the others have been rejected inasmuch as they are not valid and/or unfounded. In any case, in the opinion of Ifil Investissements, such requests are nevertheless covered by exclusions and limitations in the contract with regard to the obligations of compensation.

As described in detail under "Review of the operating performance of the holding IFIL" in the Directors' Report on Operations, on February 21, 2006, Consob notified IFIL S.p.A. of its objections under art. 187-septies of Legislative Decree No. 58/1998 in relation to the content of the press release dated August 24, 2005.

Furthermore, on March 9, 2006, the company's offices were searched under the orders of the Turin District Attorney's office with regard to the same facts raised in the objections by Consob. At the same time, IFIL was notified of the inquiry into its administrative responsibility under Legislative Decree No. 231/2001.

Sequana Capital Group – Fox River and European Commission disputes (DG IV)
Fox River
In 1998, the American authorities, in particular, the Environmental Protection Agency (EPA), brought suit against Appleton Papers Inc., (API was then a subsidiary of Arjo Wiggins Appleton), NCR Corporation and five other American paper manufacturers for the alleged contamination of the Fox River in the State of Wisconsin.
This event took place at the beginning of the 1950s when NCR Corporation had perfected a process for the manufacture of carbonless paper using polychlorinated biphenyl emulsions which, at that time, it had licensed, until 1971, to a certain number of paper manufacturers, the most important of which was API, a division of NCR.
This process had already been abandoned three years before the use of polychlorinated biphenyl had been banned in the United States, beginning from 1974.

Appleton Papers Inc. was later purchased by British American Tobacco (BATUS) in 1978 and then by Arjo Wiggins Appleton (AWA) in 1990. On this occasion, AWA continued to benefit from the guarantees over liabilities agreed by British Tobacco which allowed them to share certain costs with NCR borne by Appleton Papers Inc.
The Fox River event in 1997 naturally came under this category.

In 2001, Appleton Papers Inc. was sold by AWA and a guarantee was given to the buyers regarding all the liabilities resulting from the Fox River dispute. This guarantee consisted of a deposit made with the insurance company AIG, equal to U.S.$ 163 million, deducted from the price received at the time of the sale. The deposit partially earns interest at 2.02%.
At December 31, 2005, the deposit amounts to € 100 million, equal to U.S.$ 118 million, including capitalized interest less research and defense costs .

In 2001, the Group had also accrued an amount of U.S.$ 125 million, which corresponded to the best estimate, at that time, of its share of the expenses discounted to present value to reclaim the Fox River.

In 2003, the "Department of Natural Resources" of Wisconsin, and the federal government published a first long-term action plan for the work to be carried out by 2045. This was based on surveys of the river bed and different technical solutions that could be adopted to decontaminate the Fox River, at an estimated total cost of U.S.$ 400 million, to be borne by the industries involved.
This first official estimate had no effect on the accrual already booked by the Sequana Capital Group since it confirmed the estimate which had already led to the quantification of the accrual in 2001.

In 2005, events arose which led to a significant increase in the estimate of the reclamation costs:

- identification of new polluted areas;
- adoption of new technical solutions for decontamination;
- probable increase in the volumes of the sediments to be decontaminated.

Moreover, since the 2001 agreements for the sharing of the costs between Appleton Papers Inc. and NCR expired, the two companies had agreed to a new sharing plan by virtue of an arbitration ruling decided in November 2005. This arbitration ruling, without any possibility of appeal, has established a 10% increase in portion of the costs to be paid by API.

This led the Sequana Capital Group to revise its 2001 estimates and set aside a further amount of U.S.$ 87.7 million (€ 70 million) which has been determined on the basis of the new estimated reclamation costs to be completed by 2045 and the new portion of the expenses to be borne by Appleton Papers Inc. discounted to present value at 4.65%, which corresponds to the rate on 30-year bonds issued by the American government.

After charging the research and defense costs already incurred by Appleton Papers Inc. since 2001 (about U.S.$ 48 million at December 31, 2005), the Fox River provision amounts to U.S.$ 165 million (€ 140 million at December 31, 2005), compared to U.S.$ 89 million (€ 65 million) at December 31, 2004.

However, in July 2003, a ruling by a Supreme Court of Justice of the State of Wisconsin gave the industries which had signed insurance contracts covering environmental risks the possibility of claiming the guarantees provided in those same contracts. AWA Ltd retained the benefit of these insurance contracts, even after the sale of Appleton Papers Inc. in 2001.

Negotiations are currently underway with the insurance companies to obtain, on one hand, the reimbursement of the research and defense costs already incurred and, on the other, for them to take up the decontamination costs to be sustained in the future.

Negotiations with the insurance companies continue; considering their uncertain nature, no accruals have been made concerning the compensation to be received, albeit AWA in 2005 has already received compensation from the insurance companies totaling U.S.$ 13.4 million for the reimbursement of defense costs. In February 2006, the company received a further payment of U.S.$ 15 million for the same purpose.

European Commission (DG IV)

The inquiry by the Commission for the alleged violation of fair trade practices had ended in July 2000 with notification of a fine, against which Arjo Wiggins Appleton had submitted its comments on the subject. On December 20, 2001, the Commission levied a fine of € 184 million on Arjo Wiggins Appleton which the company had accrued in full in the 2001 financial statements.

During the first half of 2002, the company filed an appeal to rescind the sentence, which it maintains is out of proportion to the facts of the case. Since the appeal does not suspend the obligation to pay the fine, the company, in compliance with existing regulations, had decided to fulfill this obligation partly through a deposit of € 92 million and partly by providing a bank guarantee of the same amount.

The proceedings before the Court of the European Community in the first instance are still pending. After a first hearing held on June 16, 2005, a sentence should be handed down during the first half of 2006. At December 31, 2005, the accrual has been calculated on the basis of the maximum potential risk.

Alpitour Group

A lawsuit was brought before the competent authorities in Tanzania against the Royal Insurance company to establish the compensation for the damages caused by the fire to the Bravo Club tourist resort complex in Zanzibar in January 2001. Royal Insurance was sentenced, in the judgment of first instance, to pay the damages requested in addition to interest and legal fees. The insurance company appealed this decision and the case is now being judged in the second instance. Based on available information, it is believed that there is reasonable certainty that the judgment of the first instance will be upheld.

Juventus Football Club

As for the investigation by the Judicial Authorities against the Chief Executive Officer and the Juventus Football Club S.p.A. physician concerning the alleged improper use of medicines by Juventus F.C. players, on December 14, 2005, the Court of Appeals of Turin, Penal Section III, fully acquitted both parties.

With regard to the investigation by the Judicial Authorities of Como against the General Manager, Luciano Moggi, for alleged irregularities as part of the inquiry into the bankruptcy of Società Como Calcio, On October 19, 2005, the District Attorney asked the judge to dismiss the case.

25. CONSOLIDATED NET DEBT

The composition of the gross and net debt of the consolidated companies is as follows:

€ in millions	Gross debt	Financial assets	(Net debt) cash
IFI S.p.A.	(278)	0	(278)

The 2003/2006 bonds of face value € 100 million issued following the resolution of the board of directors' meeting held on December 2, 2003, subscribed to by primary institutional investors, pay quarterly floating-rate interest indexed against the Euribor. The bonds are repayable in a one-off payment at maturity on December 19, 2006. In order to fix the interest rate for the entire amount of the bonds, an interest rate swap was put into place. The bonds are carried at amortized cost.

The 2002/2005 bonds of face value € 200 million were repaid on December 20, 2005.

At December 31, 2005, the IFI Group has unused credit lines for € 2,796 million (€ 3,325 million at December 31, 2004).

The Sequana Capital Group loan is secured in part by credit lines with maturities of less than one year. The refinancing agreements do not allow this loan to be classified as medium-term.

The Alpitour Group’s credit lines total € 283 million, of which € 94 million is used for short-term loans and € 76 million for medium-term loans (of which € 32 million is repayable within the year).

Interest rate risk

The effect of the fair value of transactions to hedge the exposure of interest rate risk put into place by the consolidated companies is as follows:

€ in thousands	12/31/2005	12/31/2004
Sequana Capital Group	1,329	(462)
Alpitour Group	(1,229)	(2,212)
IFIL and the "Holdings System"	241	(4,713)
IFI S.p.A.	1,531	(1,978)
Total	1,872	(9,365)

The summary of transactions to hedge interest rates put into place by the Sequana Capital Group at December 31, 2005 and the effect of the relative fair value are as follows:

	Notional (€ ml)	Fixed rate (received)	Floating rate (paid)	Maturity	Fair value effect (€ in thousands)
SWAPS	100	2.20%	3-month Euribor	5/31/2006	179
	100	2.36%	3-month Euribor	5/31/2007	683

	Notional (€ ml)	Cap	Floor	Maturity	Fair value effect (€ in thousands)
COLLARS	100	4.50%	2.5%	1/17/2007	376

	Notional (€ ml)	Cap	Floor	Maturity	Fair value effect (€ in thousands)
CAPS	100	4.50%		1/17/2006	102
	100	4.0%		5/21/2006	(11)

General total	1,329

Alpitour S.p.A. has four interest rate swap contracts for a notional amount of a total of € 44.9 million put into place to hedge fluctuations in interest rates on bank loans. The fair value of the IRSs at October 31, 2005 is estimated at a negative amount of € 1,229 thousand (a negative amount of € 2,212 thousand at October 31, 2004). These transactions qualify for hedge accounting and the fair value adjustments, equal to a positive € 983 thousand, are recognized in a reserve in equity.

At December 31, 2005, IFIL S.p.A. has an interest rate swap contract in place for a total notional amount of € 100 million to hedge fluctuations in interest rates on the IFIL 2003-2006 bonds with a positive fair value equal to € 241 thousand.
At December 31, 2004, IFIL had interest rate swap contracts for a total notional amount of € 395 million to hedge fluctuations in interest rates on IFIL 2003-2006 bonds, IFIL 2002-2005 bonds and bank loans with a negative fair value of € 4,713 thousand. During 2005, bank loans and the IFIL 2002-2005 bonds were repaid for a total of € 295 million.

The transactions qualify for hedge accounting and the fair value adjustments, equal to a positive balance of € 4,954 thousand, were recognized in a reserve in equity.

At December 31, 2005, IFI S.p.A. has interest rate swap contracts in place for a total notional amount of € 170 million to hedge fluctuations in interest rates on bank loans with a positive fair value of € 1,531 thousand.
At December 31, 2004, IFI S.p.A. had interest rate swap contracts for a total notional amount of € 160 million to hedge fluctuations in interest rates on bank loans with a negative fair value of € 1,978 thousand.

The transactions qualify for hedge accounting and the fair value adjustments, equal to a positive balance of € 3,850 thousand, were recognized in a reserve in equity.

Exchange rate risk

The summary of principal transactions to hedge exchange rates put into place by the Sequana Capital Group at December 31, 2005 and the effect of the relative fair value are as follows:

Company	Exchange rates	Notional
Sequana Capital	EUR/USD	$ 191.7 ml
AWA Ltd	EUR/GBP	€ 137.3 ml
ArjoWiggins	NDF/CNY	CNY 100 ml
ArjoWiggins	EUR/GBP	£ 55 ml
ArjoWiggins	EUR/USD	$ 10 ml
Antalis	EUR/PLN	€ 9 ml
Antalis	EUR/ZAR	€ 3.1 ml
Antalis	USD/ZAR	$ 5 ml
Antalis	JPY/ZAR	JPY 20.9 ml
Antalis	EUR/USD	$ 7.1 ml
Antalis	EUR/CHF	CHF 9.5 ml
Antalis	EUR/HKD	HKD 10.1 ml

Fair value effect	2004	2005
	-	(2,705) €/000

At October 31, 2005, the Alpitour Group has transactions in place for the forward purchase of currency for U.S.$ 8 million maturing in the months of November and December 2005 and January 2006. These transactions were put into place for purchases of tourist services expressed in foreign currency. At October 31, 2005, the fair value of the transactions in foreign currency show a positive balance of € 192 thousand. These amounts were determined on the basis of the fair value of the equivalent financial instruments at the balance sheet date. The fair value adjustments of the derivative financial instruments on currencies, which qualify as cash flow hedge derivatives, amount to € 192 thousand and are recognized in a reserve in equity. At October 31, 2004, there were no forward purchase currency transactions in place.

27. DEFERRED INCOME TAXES

The change in deferred tax assets is as follows:

€ in millions	Employee benefits	Tax losses	Other	Total
Balance at January 1, 2004	29	37	(5)	61
Income taxes accrued (reversed) to profit and loss	5	33	(38)	0
Exchange differences		(3)	2	(1)
Net other movements	(5)		29	24
Balance at December 31, 2004	29	67	(12)	84
Income taxes accrued (reversed) to profit and loss	(7)	(14)	(9)	(30)
Income taxes relating to items directly credited to equity	8			8
Exchange differences	2	5	(4)	3
Net other movements	7	(1)	(3)	3
Balance at December 31, 2005	39	57	(28)	68

The change in deferred tax liabilities is as follows:

€ in millions	Property, plant and equipment	Depreciation and tax accruals	Other	Total
Balance at January 1, 2004	(110)	(30)	19	(121)
Income taxes accrued (reversed) to profit and loss	2	(7)	57	52
Income taxes relating to items directly debited to equity			(2)	(2)
Exchange differences	3		(2)	1
Net other movements	1	(2)	(28)	(29)
Balance at December 31, 2004	(104)	(39)	44	(99)
Income taxes accrued (reversed) to profit and loss	16	5	(4)	17
Income taxes relating to items directly debited to equity			(7)	(7)
Exchange differences	(6)	(1)	7	0
Net other movements	2		(8)	(6)
Balance at December 31, 2005	(92)	(35)	32	(95)

Details of income taxes collectible/payable or deferred relating to items directly credited or debited to equity are as follows:

€ in millions	Employee benefits	Fair value of financial instruments	Other	Total
Balance at December 31, 2005	8	(7)		1
Balance at December 31, 2004	(2)			(2)

The analysis of unused tax loss carryforwards and unused tax credits on which deferred taxes have not been calculated is as follows:

€ in millions	Taxable base Within 1 year	Between 2 and 4 years	Beyond 4 years	Total	Estimated tax benefit
At December 31, 2005					
Current tax losses	98	524	756	1,378	452
Other tax credits					NONE
Total at December 31, 2005	98	524	756	1,378	452
At December 31, 2004					
Current tax losses	11	416	754	1,181	378
Other tax credits					NONE
Total at December 31, 2004	11	416	754	1,181	378

The recognition of deferred tax assets on tax losses is limited to those whose recoverability is highly probable during the following year or in the medium term, taking into account the prospects for recoverability established by medium term operating plans.

28. OTHER LIABILITIES

Details of other liabilities are as follows:

€ in millions	12/31/2005	12/31/2004	Change
Other non-current liabilities			
Payables for direct income taxes		5	(5)
Other liabilities	57	44	13
Total other non-current liabilities	57	49	8
Other current liabilities			
Trade payables	982	1,011	(29)
Other payables			
Payables for direct income taxes	42	26	16
Payables for indirect income taxes	43	35	8
Payables to employees and similar	118	141	(23)
Payables on disposal of property, plant and equipment	61	35	26
Other payables	217	167	50
Total other payables	481	404	77
Total other current liabilities	1,463	1,415	48
Total other non-current and current liabilities	1,520	1,464	56

Other non-current and current liabilities by maturity are as follows:

€ in millions	Within 1 year	Between 2 and 5 years	Beyond 5 years	Total
Other non-current liabilities		54	3	57
Trade payables	982			982
Other payables	481			481
Balances at December 31, 2005	1,463	54	3	1,520
Other non-current liabilities		46	3	49
Trade payables	1,011			1,011
Other payables	404			404
Balances at December 31, 2004	1,415	46	3	1,464

COMMENTS ON THE PRINCIPAL ITEMS IN THE CONSOLIDATED INCOME STATEMENT

29. OTHER REVENUES FROM CURRENT OPERATIONS

Details of other revenues from current operations are as follows:

€ in millions	2005	2004	Change
Inventories	(13)	11	(24)
Operating grants	1	3	(2)
Income from concessions and patents	4	3	1
Other income	46	75	(29)
Total other revenues from current operations	38	92	(54)

30. PERSONNEL COSTS

Details of the composition of personnel costs are as follows:

€ in millions	2005	2004	Change
Salaries and wages	(703)	(700)	(3)
Social security contributions	(169)	(167)	(2)
Employee stock options	(1)	(1)	0
Employee severance indemnities expense	(5)	(5)	0
Temp work costs	(22)	(23)	1
Other employee costs	(27)	(20)	(7)
Total personnel costs	(927)	(916)	(11)

31. OTHER NON-RECURRING INCOME (EXPENSES)

Details are as follows:

€ in millions	2005	2004	Change
Gains (losses) on disposals of property, plant and equipment and intangible assets	16	7	9
Impairment loss of goodwill	0	(164)	164
Impairment (loss) reversal on property, plant and equipment and intangible assets	(144)	(55)	(89)
Net restructuring expenses of the Arjo Wiggins Group	(31)	(31)	0
(Accruals) release of provisions for environmental disputes	(80)	(16)	(64)
(Accruals) release of provisions for other litigation	(3)	(5)	2
Insurance compensation received for Fox River dispute	11	2	9
Net other income (expenses)	48	(13)	61
Total other non-recurring income (expenses)	(183)	(275)	92

In 2004, the item “impairment loss of goodwill” essentially included the effect of the test for the impairment on goodwill booked in relation to the AWA 2000 takeover bid (€ 124 million) and the Alpitour Group (€ 38 million).

The accruals for environmental disputes include the additional accrual regarding the Fox River dispute set aside during 2005 for € 70 million (U.S. $ 87.7 million).

Net other income (expenses) include:

- the excess, equal to € 55 million, of the increments in IFIL’s share of the consolidated equity of the Fiat Group originating from the increase in Fiat capital stock subscribed to by minority stockholders

(+€ 606 million) and the increase in the percentage of consolidation, equal to 0.54% (+€ 29 million), compared to the cost incurred for the purchase of 87,750,000 Fiat shares (-€ 580 million);

- the excess, equal to € 1 million, of the increment in IFI's share of the consolidated equity of the IFIL Group compared to the cost of the IFIL shares purchased during the year;
- other minor net negative items amounting to € 8 million (a negative amount of € 13 million in 2004).

32. FINANCIAL INCOME (EXPENSES)

Details of the composition of net financial income (expenses) are as follows:

€ in millions	2005	2004	Change
Cost of net financial debt			
Income on disposals of cash and cash equivalents	26	6	20
Exchange differences	(1)	5	(6)
Net income from interest rate and foreign exchange hedges	(8)	(11)	3
Interest expenses on loan transactions	(81)	(74)	(7)
Commissions for unused credit lines	(3)	(2)	(1)
Cost of net financial debt	(67)	(76)	9
Gains (losses) on disposals of investments	4	0	4
Other financial income (expenses)			
Dividends	44	29	15
Interest income on other financial assets	19	15	4
Changes in the fair value of financial assets and liabilities	2	2	0
Accruals (release) of provisions for financial risks	4	(8)	12
Total other financial income (expenses)	69	38	31
NET FINANCIAL INCOME (EXPENSES)	6	(38)	44

33. EXCHANGE DIFFERENCES

Details of the exchange differences recorded in the income statement are as follows:

€ in millions	2005	2004	Change
Exchange differences:			
- on revenues from sales and other income		(2)	2
- on purchases and other operating expenses	1	(5)	6
- on the cost of net financial debt	(1)	5	(6)
	0	(2)	2

The principal exchange rates used for the translation to euro of the 2005 and 2004 foreign currency financial statements are as follows:

	2005	2004
Final exchange rates		
British pound	0.6853	0.7050
U.S. dollar	1.1797	1.3621
Swiss franc	1.5551	1.5429
Average exchange rates		
British pound	0.6839	0.6786
U.S. dollar	1.2445	1.2430
Swiss franc	1.5483	1.5441

34. INCOME TAXES

Details of income taxes recognized in the income statement are as follows:

€ in millions	2005	2004
Current income taxes	(36)	(14)
Deferred income taxes	(10)	48
Total income taxes	(46)	34

National income taxes are calculated at 33%, in 2005 and 2004, on the estimated taxable income for the year. The income taxes for other jurisdictions are calculated at the enacted tax rates in those countries.

The reconciliation between the tax charge recorded in the consolidated financial statements and the theoretical tax charge, calculated on the basis of the theoretical tax rate in effect in Italy, is the following:

€ in millions	2005	2004
Operating loss	(142)	(173)
Financial income (expenses)	6	(38)
Loss before income taxes	(136)	(211)
Current tax rate in Italy	33%	33%
Theoretical income taxes	45	70
Effective income taxes	(46)	34
Difference	(91)	(36)
The difference can be analyzed as follows:		
Tax effect of difference between foreign tax rates and the theoretical Italian tax rate	(14)	16
Tax effect of impairment losses on goodwill	0	(46)
Tax effect of other permanent differences	62	36
Deferred tax assets not recognized	(63)	(28)
Use of tax losses	(52)	(40)
Use of excess tax liabilities	(21)	7
Other differences	(3)	19
Difference	(91)	(36)

Other differences include the Exit tax, an extraordinary 2.5% tax introduced in France in 2004, for an amount of € 10 million. This tax is recorded in payables with a contra-entry to equity in the statutory financial statements of the subsidiary Sequana Capital, whereas, on consolidation, it is recognized in the income statement.

In 2005, deferred income taxes were not recognized on the writedown of property, plant and equipment made by ArjoWiggins as there are no prospects of recoverability.

In addition to the taxes recorded in the income statement, deferred tax liabilities of € 7 million (€ 2 million in 2004) and deferred tax assets of € 8 million (none in 2004) were recognized directly in equity.

35. SHARE OF THE EARNINGS (LOSSES) OF COMPANIES ACCOUNTED FOR BY THE EQUITY METHOD

Details are as follows:

€ in millions	2005	2004	Change
Fiat Group	379	(384)	763
SGS Group	58	48	10
Exor Group	11	27	(16)
Total	448	(309)	757

36. SEGMENT INFORMATION

Information by business segment and by geographical area, presented as set forth in IAS 14 – Segment Information, is prepared according to the same accounting policies adopted in the preparation and presentation of the consolidated financial statements of the Group.

The primary reporting format consists of the business segments whereas the geographical areas make up the secondary reporting format. This distinction is based upon the nature of the risks and rewards inherent in the Group's activities and reflects the organizational structure.

The segment information presented by the IFI Group agrees with the consolidated data of every subsidiary and associate holding company of the IFIL Group, each of which represents an investment in a major business segment: Sequana Capital Group, Alpitour Group, Juventus Football Club, Fiat Group and IFI/IFIL Holdings System.

The segment information relating to continuing operations is presented in the following tables; the segment information relating to discontinued operations or assets held for sale is presented in Note 18.

The analysis of the income statement by business segment is as follows:

€ in millions	Sequana Capital Group	Alpitour Group	Juventus Football Club	Fiat Group	IFI and IFIL Holdings System and eliminations	Total
2005						
Revenues	4,067	1,147	214		1	5,429
Operating profit (loss)	(132)	1	(15)		4	(142)
Net financial income (expenses)						6
Income taxes						(46)
Profit (loss) of companies consolidated line-by-line						(182)
Share of earnings (losses) of companies accounted for by the equity method	58			379	11	448
Profit (loss) from discontinued operations or assets held for sale	547				460	1,007
Profit - minority interest						(597)
Profit - Group						676

€ in millions	Sequana Capital Group	Alpitour Group	Juventus Football Club	Fiat Group	IFI and IFIL Holdings System and eliminations	Total
2004						
Revenues	3,989	1,108	189		2	5,288
Operating profit (loss)	(112)	7	(8)		(60)	(173)
Net financial income (expenses)						(38)
Income taxes						34
Profit (loss) of companies consolidated line-by-line						(177)
Share of earnings (losses) of companies accounted for by the equity method	48			(384)	27	(309)
Profit (loss) from discontinued operations or assets held for sale	49				605	654
Profit - minority interest						(48)
Profit - Group						120

37. TRANSACTIONS WITH RELATED PARTIES

The IFI Group is directly controlled by Giovanni Agnelli e C. S.a.p.az., an Italian-registered company which holds the entire ordinary capital stock of IFI.

The transactions between the companies and its subsidiaries, which are related parties of the same company, are eliminated in the consolidated financial statements of IFI and are therefore not shown in this note. Such information is nevertheless presented in a specific section of the Directors' Report on Operations to which reference can be made for additional information.

As for the transaction for the purchase of Fiat shares from Exor Group (controlled by Giovanni Agnelli e C. S.a.p.az.), please refer to Note 13.

Compensation to directors and statutory auditors

In 2005, the compensation to the directors and statutory auditors of IFI S.p.A., to perform their duties in IFI S.p.A. and also in other companies included in consolidation, is as follows:

€ in thousands	IFI S.p.A.	Subsidiaries	Total
Directors	5,350	17,515	22,865
Statutory auditors	146	155	301
Total	5,496	17,670	23,166

In 2004, compensation amounted to € 3,942 thousand, of which € 597 thousand was paid by IFI and € 3,345 thousand by the subsidiaries.

The company also signed a third-party liability insurance policy for the directors with a group of insurance companies for a maximum claim per incident and per year of € 50 million for coverage in the event of requests for reparation of non-fraudulent acts.

The meeting of the board of directors of IFIL S.p.A. held on June 9, 2005 voted to grant the chairman, Mr. Gianluigi Gabetti, the use of a secretarial service and a car with a driver also after his current term of office expires.

Additional information on compensation, as requested by the national law (Consob regulation No. 11971 dated May 14, 1999 and later amendments and integrations), is provided in the notes and in the Directors' Report on Operations of IFI to which reference can be made.

38. COMMITMENTS

Details are as follows:

€ in millions	12/31/2005	12/31/2004
Credit lines		
Credit lines used	1,646	1,415
Credit lines unused	2,795	3,325
Total credit lines	4,441	4,740
Commitments undertaken		
Bills discounted and not yet due	1	1
Guarantees	394	238
Sureties, guarantees of notes and other guarantees	144	134
Commitments for the purchase of intangible assets	1	9
Commitments for the purchase of property, plant and equipment	11	
Commitments for the purchase of investments and financial assets	23	47
Options for the purchase of players' rights	3	
Goods on deposit with third parties	97	95
Forward purchase of goods and raw materials (a)	199	148
Other commitments	50	57
Total commitments undertaken	923	729
Commitments received		
Sureties, guarantees, guarantees of notes and other guarantees	19	36
Real guarantees	35	35
Options on soccer players	7	12
Commitments for the sale of property, plant and equipment	2	
Commitments for the sale of investments and financial assets	2	
Forward sale of goods and raw materials (a)	190	136
Other commitments	61	51
Total commitments received	316	270

(a) These are basically forward purchases and sales of paper pulp.

The commitments for the purchase of investments include a commitment undertaken for the purchase and recapitalization of Banca Leonardo S.p.A. in which IFIL will hold a 10% stake.
On March 3, 2006, Ifil Investissements filed a petition with Banca d'Italia to obtain authorization for the investment which it is believed can be executed by the end of the month of April 2006.

Credit lines and commitments by due date are as follows:

€ in millions	Within 1 year	Between 2 and 5 years	Beyond 5 years	Total
At December 31, 2005				
Credit lines unused	1,691	961	143	2,795
Commitments undertaken	511	191	221	923
Commitments received	197	112	7	316
At December 31, 2004				
Credit lines unused	503	2,757	65	3,325
Commitments undertaken	424	164	141	729
Commitments received	165	98	7	270

The amount of minimum future lease payments relating to operating leases is as follows:

€ in millions	Within 1 year	Between 2 and 5 years	Beyond 5 years	Total
At December 31, 2005	68	70	50	188
At December 31, 2004	29	73	30	132

In 2005, fixed-rate lease contracts amount to € 134 million while floating-rate lease contracts amount to € 34 million (respectively, € 105 million and € 3 million in 2004).

Lease expenses recognized in 2005 amount to € 63 million (€ 59 million in 2004). They include € 20 million for irrevocable leases (€ 19 million in 2004), € 14 million for other operating leases (€ 12 million in 2004) and € 29 million for simple lease contracts (€ 28 million in 2004).

Other commitments and contingent liabilities

Description	Signing date	Amount in currency (ml)	Amount in € ml	Expiration date
Disposal of Appleton Papers Inc (USA) (a)	2004	USD 97.5 max	82.6 max	Unlimited
Disposal of Permal - guarantee provided to Legg Mason (b)	6/23/2005	USD 479	406	Between 5/3/2007 and 6/23/2011 at the most
Disposal of Ifabanque - guarantee provided to BSI AG (Switzerland)	12/21/2005	-	4.5	12/21/2010 renewable for one year each year
Disposal of La Rinascente - guarantee provided by Eurofind Textile to Tamerice (c)	5/6/2005	-	71	Sundry

(a) Guarantees for environmental risks provided to the buyers of Appleton Papers Inc.

In 2004, the early repayment of the loan made by ArjoWiggins to the buyers of Appleton Papers Inc. led to the renegotiation of all the guarantees provided by AWA Ltd to the same buyers of Appleton Papers Inc.

At the present time there is only one guarantee regarding environmental risks (excluding Fox River). Details are as follows:

- up to U.S.$ 5 million, the costs are divided 50-50 between Appleton Papers Ltd and AWA Ltd;
- over U.S.$ 5 million, AWA Ltd assumes the entire amount of the costs up to a maximum of U.S.$ 100 million.

The aforementioned guarantee is unlimited. To date, there has been no request to meet the terms of guarantee.

(b) Guarantees provided to Legg Mason on the sale of Permal

Sequana Capital has guaranteed the commitments undertaken by Sequana UK Limited and Permal Group S.a.s. (the sellers) under the contract for the sale of the stock.

Such commitments regard obligations to compensate Legg Mason in case of falsehood or breach of statements and guarantees provided by the sellers.

In particular: these refer to the legal foundation and existence of the parties, the authorizations received to undertake the commitments negotiated in the sales contract and their validity as well as the absence of tax risks in Permal Group Ltd.

Some commitments expire after 18 months from the date of sale, on May 3, 2007, and, others, in particular regarding legal and tax matters, when they become statute-barred which could reasonably be considered as a maximum of six years.

The guarantee is given without joint and several obligations among the seller parties.

(c) Guarantees provided by Ifil Investissements relating to the sale of La Rinascente

Ifil Investissements, as the merging company of Eurofind Textile, has provided the buyer with statements and guarantees regarding the Rinascente Group, the subject of the transaction, and its activities, with the usual limitations and exclusions (a part of these guarantees are undertaken by Auchan Group). Such conventional statements and guarantees regard, among other things, full ownership and title, free and clear of detrimental encumbrances and registrations, of the shares of the companies of the Rinascente

Group and real estate properties, the lease relationships, the true and correct representation of the financial statements and tax, social security and legal/labor matters. The limitations and exclusions agreed within the framework of the sale process regard specific events considered by the buyer during the course of the due diligence. Such limitations and exclusions provide for the obligation of compensation in excess of a threshold of significance per individual indemnifiable event (de minimis) and as a whole (with an exempted amount) as well as, for certain matters, a maximum limit of responsibility for the seller. IFIL S.p.A. has guaranteed the commitments undertaken by Ifil Investissements with the buyer until their maturity, anticipated, according to the matter at hand, at December 31, 2006 or at December 31, 2008 or when they become statute-barred.

On February 14, 2006, the buyer of the investment in La Rinascente filed for arbitration against Ifil Investissements seeking compensation for an amount of approximately € 32.5 million (in addition to interest, monetary revaluation, court expenses and legal fees) for extraordinary expenses relating to certain points of sale. In the opinion of Ifil Investissements, the requests are not valid and unacceptable and, in any case, completely unfounded. Moreover, the question raised regards aspects that have either been excluded or are not covered by guarantees in the contract.

Furthermore, in the second half of 2005 and during the first few months of 2006, the same party brought actions seeking additional compensation from Ifil Investissements for a total amount of approximately € 16 million principally in connection with accounting treatments in the financial statements at December 31, 2004.

Some minor requests have already been agreed between the parties, whereas the others have been rejected inasmuch as they are not valid and/or unfounded. In any case, in the opinion of Ifil Investissements, such requests are nevertheless covered by exclusions and limitations in the contract with regard to the obligations of compensation.

Procedures for the identification and control of commitments

The information regarding commitments are transmitted to the parent through the consolidation process under the responsibility of the Legal Representatives of the companies which sign a representation letter addressed to the parent. On the basis of information known to the company, no significant commitments have been omitted by the companies of the Group.

39. EMPLOYEES

The breakdown of the average number of employees is provided as follows:

Average number of employees	12/31/2005	12/31/2004

Blue-collar	9,231	8,873
	18,458	18,414

40. APPROVAL OF THE FINANCIAL STATEMENTS AND AUTHORIZATION FOR PUBLICATION

The financial statements at December 31, 2005 were approved by board of directors on March 31, 2006 which authorized the publication on the same date.

Turin, March 31, 2006

For the Board of Directors
The Chairman
Gianluigi Gabetti

APPENDIX 1 – TRANSITION TO INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS)

RECONCILIATIONS REQUIRED BY IFRS 1

The 2004 restated IFRS consolidated balance sheet and income statement have been prepared in accordance with IFRS 1 – First-time Adoption of IFRS. In particular, the IFRS applicable from January 1, 2005, as published as of December 31, 2004, have been adopted, including the following:

- IAS 39 – Financial Instruments: Recognition and Measurement in its entirety. In particular, the Group adopted derecognition requirements retrospectively from the date on which financial assets and financial liabilities had been derecognized under Italian GAAP.
- IFRS 2 – Share-based Payment, which was published by the IASB on February 19, 2004 and adopted by the European Commission on February 7, 2005.
- IAS 19 – Employee Benefits, issued by the IASB in December 2004. The Group elected to recognize actuarial gains and losses immediately in the period in which they occur, outside the income statement, in a specific statement of recognized income and expense.

FIRST-TIME ADOPTION OF IFRS

General principle

The Group applied the accounting standards in force at December 31, 2004 retrospectively to all periods presented in the first IFRS financial statements and to the opening balance sheet, except for certain exemptions adopted by the Group in accordance with IFRS 1, as described in the following paragraph.

The 2004 consolidated figures presented in the financial statements at December 31, 2004 constitute the comparative figures published in the consolidated financial statements at December 31, 2005.

The opening consolidated IFRS balance sheet at January 1, 2004 reflects the following differences as compared to the consolidated balance sheet at December 31, 2003 prepared in accordance with Italian GAAP:

- the investment in Fiat is accounted for by the equity method (it was previously consolidated line-by-line);
- the subsidiary Juventus Football Club is consolidated line-by-line (it was previously accounted for by the equity method in view of the dissimilarity of its activities);
- all assets and liabilities qualifying for recognition under IFRS, including assets and liabilities that were not recognized under Italian GAAP, have been recognized and measured in accordance with IFRS;
- all assets and liabilities recognized under Italian GAAP that do not qualify for recognition under IFRS have been eliminated;
- certain financial statement items have been reclassified in accordance with IFRS.

The impact of these adjustments is recognized directly in opening equity at the date of transition to IFRS (January 1, 2004).

Optional exemptions adopted by the Group

Business combinations: the Group elected not to apply IFRS 3 - Business Combinations retrospectively to the business combinations that occurred before the date of transition to IFRS.

Employee benefits: the Group elected to recognize all cumulative actuarial gains and losses that existed at January 1, 2004 with a contra-entry to equity reserves.

Cumulative translation differences: The cumulative translation differences arising from the consolidation of foreign operations have been set at nil as at January 1, 2004. Gains or losses on subsequent disposal of any foreign operation will only include accumulated translation differences after January 1, 2004.

At December 31, 2005, certain reclassifications and adjustments have been made to the data published in the Appendix to the First-half Report at June 30, 2005. Such changes gave rise to a negative effect on consolidated equity of approximately € 9 million on the data relative to January 1, 2004, a negative effect on profit of approximately € 2 million and a positive effect on consolidated equity of approximately € 78 million on the data relative to December 31, 2004.
The most significant impact is due to the early adoption of IAS 19 revised.

	January 1, 2004			December 31, 2004		
(€ in millions)	Group	Minority interest	Total	Group	Minority interest	Total

AUDIT OF THE RECONCILIATIONS REQUIRED BY IFRS 1

The IFRS reconciliations of the consolidated balance sheets at January 1, 2004 and December 31, 2004 and of the consolidated income statement for the year ended December 31, 2004, together with the related explanatory notes included in the First-half Report, were audited.

IFI's share of the effects of the adoption of IFRS on the adjusted consolidated equity of the Fiat Group (accounted for by the equity method)	(143)	(93)	(236)	o
Consolidated equity of the IFI Group at January 1, 2004 (IFRS)	2,060	2,397	4,457	

Explanatory notes relating to the main IFRS adjustments are presented on the following page.

a. The reclassification is made to reduce equity by the carrying amount of IFI preferred treasury stock (€ 70 million) previously recorded in fixed assets.

b. The positive adjustment of € 132 million is due to the alignment of the original purchase cost (€ 8.54 per share for a total of € 601 million) of the investment in Sanpaolo IMI to the market price at December 31, 2003 (€ 10.41 per share for a total of € 733 million).

c. The positive adjustment of € 7 million is due to the alignment of the carrying amount (€ 25.2 per share) of the investment in Club Méditerranée to the market price at December 31, 2003 (€ 29.9 per share). This investment is reclassified to "Assets held for sale".

d.e.f. The positive adjustments are due to the alignment of the carrying amount of the investments to the market price at December 31, 2003.

g. The negative adjustment of € 23 million represents the measurement of the derivative instruments used to hedge interest rate risk (swaps) on bonds and bank debt for € 18 million; the remaining € 5 million refers to the separation of the financial portion included in receivables from/payables to the soccer companies and in the cost of players' registration rights.

h. The negative amount of € 4 million mainly includes the derecognition of the remaining balance of deferred charges which are not capitalizable under IFRS.

i. The negative adjustment of € 61 million is due to the adoption of IAS 19 by the Sequana Capital Group.

l. € 4 million of the adjustment of refers to the gains realized on the sale of players under sharing contracts since, under the adoption of IFRS, the amounts have been classified in "Players' sharing rights". The sale is only for half the rights; accordingly the gain realized is lower.

m. The positive adjustment of € 2 million refers to the derecognition of accumulated depreciation on the amount of the land separated from the carrying amount of the building owned by the subsidiary Soiem.

n. The negative adjustment of € 11 million is made to take into account the different criteria used to measure deferred taxes relating to the Sequana Capital Group.

o. The effects of the first-time application of IFRS on the consolidated equity of the Fiat Group (-€ 236 million) are mainly due to the adoption of IAS 38 – Intangible Assets (in relation to development costs), IAS 19 – Employee Benefits, IAS 18 – Revenue, IAS 39 – Financial Instruments: Recognition and Measurement, and other effects described in the specific document presented by Fiat S.p.A. with the Annual Report 2005, previously made public.

Consolidated equity of the IFI Group at December 31, 2004 (IFRS)	2,123	2,317	4,440	

Explanatory notes relating to the main IFRS adjustments are presented on the following page.

a. The reclassification is made to reduce equity by the carrying amount of IFI preferred treasury stock (€ 70 million) previously recorded in fixed assets.

b. The positive adjustment of € 144 million is due to the alignment of the original purchase cost (€ 8.54 per share for a total of € 601 million) of the investment in Sanpaolo IMI to the market price at December 31, 2004 (€ 10.58 per share for a total of € 745 million).

c.d. The positive adjustments are due to the alignment of the carrying amount of the investments and other assets to the market price at December 31, 2004.

e. The negative adjustment of € 9 million represents the measurement of the derivative instruments used to hedge interest rate risk (swaps) on bonds and bank debt.

f. The negative adjustment of € 5 million is made to separate the financial portion included in receivables from/payables to the soccer companies and in the cost of players' registration rights.

g. The amount of € 8 million includes the derecognition of amortization on deferred costs and players' registration rights (the historical costs of which have been remeasured with a consequent adjustment of the relative amortization).

h. The positive adjustment of € 50 million is mainly due to the derecognition of the amortization on the goodwill referring to the investment in Antalis, and the relative impairment test performed on this investment.

i. The negative adjustment of € 12 million refers to the derecognition of 50% of the gains realized on the sale of players under sharing contracts since the sale is only for half the rights.

l. The positive adjustment of € 2 million refers to the derecognition of accumulated depreciation on the amount of the land separated from the carrying amount of the building owned by the subsidiary Soiem.

m. The effects of the first-time application of IFRS on the consolidated equity of the Fiat Group (-€ 214 million) are mainly due to the adoption of IAS 38 – Intangible Assets (in relation to development costs), IAS 19 – Employee Benefits, IAS 18 – Revenue, IAS 39 – Financial Instruments: Recognition and Measurement, IAS 37 – Provisions, Contingent Liabilities and Contingent Assets and other effects described in the specific document presented by Fiat S.p.A. with the Annual Report 2005, previously made public.
A negative adjustment of € 60 million was made to the IFIL Group's share of the consolidated equity of the Fiat Group to account for the actuarial losses reducing equity as a result of the early application of IAS 19 revised by the IFI Group.

Consolidated profit (loss) of the IFI Group for the year ended December 31, 2004 (IFRS)	120	48	168	

Explanatory notes relating to the main IFRS adjustments are presented on the following page.

a. The negative adjustment of € 21 million is due to the reversal of the fair value of the investment in Accor after its sale in 2004.

b. The positive adjustment of € 9 million is principally due to the reversal of the amortization of deferred charges eliminated from assets.

c. The positive adjustment of € 47 million is mainly due to the reversal of the amortization of the difference on consolidation on the investment in Antalis.

d. The negative adjustment of € 10 million refers entirely to Juventus F.C. and includes the reversal of 50% of the gains realized on the sale of players under sharing contracts since the sale is only for half of the players' rights.

e. The positive adjustment of € 15 million is principally due to the elimination of a time lag between Italian GAAP and IFRS.

f. The effects of the application of IFRS on the consolidated result of the Fiat Group (-€ 15 million) are mainly due to the adoption of IAS 38 – Intangible Assets (in relation to development costs), IAS 37 – Provisions, Contingent Liabilities and Contingent Assets, IAS 19 – Employee Benefits, IAS 18 – Revenue, IAS 39 – Financial Instruments: Recognition and Measurement, and other effects described in the specific document presented by Fiat S.p.A. with the Annual Report 2005, previously made public.

REPORT OF THE BOARD OF STATUTORY AUDITORS PURSUANT TO ART. 153 OF LEGISLATIVE DECREE NO. 58 DATED FEBRUARY 24, 1998 AND ART. 2429, PARAGRAPH 2 OF THE ITALIAN CIVIL CODE

Dear Stockholders,

Under art. 153 of Legislative Decree No. 58 dated February 24, 1998, the board of statutory auditors has the obligation to report to the stockholders' meeting on matters concerning the supervisory work carried out and any omissions and censurable matters that may have come to its attention. The board of statutory auditors may also formulate proposals to the stockholders' meeting in relation to the financial statements, to its approval and to matters of its competence.

In keeping with the above law, we have written this report.

In this past year, we have complied with the board's obligations under art. 149 of Legislative Decree No. 58 dated February 24, 1998, which allow us to convey to you information, in particular on the following matters.

We have participated in the meetings of the board of directors during which the directors informed us about the activities carried out and about the significant economic, financial and equity transactions entered into or in the process of being entered into by the company and/or its subsidiaries. In this regard we have ascertained and we have ensured that the transactions approved and carried out were in conformity with the law and the corporate bylaws, were not in disagreement with the resolutions approved by the stockholders' meeting or in conflict of interest and were based upon the principles of good administration.

The organizational structure of the company, insofar as we are responsible, appears to be adequate for the specific type of business and size of the company. As a result, the Board of Statutory Auditors, also on the basis of meetings held with company management and with representatives of the audit firm, has gathered extensive information regarding compliance with the principles of diligent and proper administrative management.

Our evaluation regarding the adequacy of the internal control system is positive in the sense that the system has the task of verifying that the internal operating and administrative procedures are being followed, with such procedures having been adopted for the purpose of ensuring a correct and efficient management, as well as identifying, preventing and managing, where possible, risks of a financial and operating nature and any fraud to the detriment of the company.

Furthermore, we consider that the administrative accounting system, insofar as ascertained and checked by us, also in prior years, is in a position to record and correctly represent operating events.

As for Corporate Governance, the directors have prepared the specific report required by the Code of Self-discipline of listed companies. As for our responsibilities, in conformity with the provision of art. 149 No. 1 letter c) bis of Legislative Decree No. 58 dated February 24, 1998, we take note that the directors, in their report on corporate governance, specified the following: "IFI, in view of its particular capital structure, which, for ordinary capital stock is represented by unlisted shares held entirely by Giovanni Agnelli e C. S.a.p.az., has not adopted the Code of Self-discipline of listed companies.

Therefore, the corporate governance system adopted by the company is adapted to the capital structure and guarantees transparency according to market practices."

The rules and procedures specifically adopted, as we have ascertained, are nevertheless adequate and complete for purposes of achieving transparency as proposed by the directors.

In the same manner, the directives given by IFI S.p.A. to the subsidiaries as per art. 114, paragraph 2, of Legislative Decree No. 58 dated February 24, 1998 seem adequate.

The board of directors has sent us, in accordance with the law, the report relating to the first half of the year, making it public within the time-frame and according to the regulations established by Consob and has produced, according to law, the quarterly reports on performance.

With reference to Consob Communications, with regard to our competence, we can attest to the following:

- The information provided by the directors in the report on operations is considered to be extensive and complete, also with regard to the status of the implementation of the systems and procedures for the application of international financial reporting standards (Consob Communication DEM/5015175 of March 10, 2005) which became mandatory for the year in progress.
- The board of statutory auditors, pursuant to the Consolidated Law on Financial Intermediation (Legislative Decree No. 58 dated February 24, 1998) was constantly informed with regard to matters of its competence.
- The periodical verifications and tests on the company did not bring to light any atypical and/or unusual transactions.

- With regard to intragroup transactions, the directors, in their report on operations, present and illustrate the numerous exchange transactions of goods and services between your company, the companies of the group and/or related parties, specifying that such transactions have been carried out on the basis of the evaluation of reciprocal economic benefit.
- The audit report does not indicate any qualifications or other matters of interest or proposals.
- During the financial year 2005, the board of directors held five meetings, which we attended, and the board of statutory auditors held 12 meetings, five of which were attended by representatives of the audit firm.
- A complaint was received by the board of statutory auditors under ex art. 2408 of the Italian Civil Code, discussed in the following point, and, at this time, the board does not have information about any other complaint which could involve the board.
- During the year, we issued the opinions requested of the board of statutory auditors as set forth by law.

We have been informed by Deloitte & Touche S.p.A. that IFI S.p.A., besides the appointment for the audit of the statutory financial statements and the consolidated financial statements and the limited-scope audit of the first-half report (for total fees of € 40,000), conferred the assignment for the audit of the reconciliations to International Financial Reporting Standards ("IFRS") of the company and its subsidiaries, consisting of: the statements of the effects of the transition to IFRS on consolidated stockholders' equity, the reconciliations of consolidated stockholders equity at January 1, 2004 and at December 31, 2004, the statement of the effects of the transition to IFRS on the consolidated income statement and the reconciliation of consolidated net income for the year ended December 31, 2004 and the relative explanatory notes, for a total fee of € 5,000.
During the same year, there were no appointments conferred to entities connected with Deloitte & Touche S.p.A.

Complaint under ex art. 2408 of the Italian Civil Code.
The stockholder Marco Bava, holder of 3 preferred shares, filed a complaint on September 27, 2005, consisting of two typewritten pages addressed to the Board of Statutory Auditors of IFI S.p.A. in the name of its chairman, with a copy to the audit firm of Deloitte & Touche S.p.A., in which, among other things, a statement is expressed and reported word for word as follows:
"I, the undersigned, Marco Bava, a stockholder of IFI S.p.A. (parent of IFIL S.p.A.) believe the management of IFIL to be censurable with regard to the investment of € 535 million in Fiat shares purchased from Exor, a related party, which reported a gain of € 74 million.
This investment, which reduces liquidity from approximately € 800 million to approximately € 300 million, may jeopardize the company as a going concern, therefore, under art. 2408 of the Italian Civil Code, a complaint is presented to the board of statutory auditors, bringing to its attention its obligations under art. 2403 of the Italian Civil Code, in that without further urgent capital increases Fiat S.p.A. should be put into a wind-up."
The complaint continues by indicating specific aspects of the operations of Fiat S.p.A. and its subsidiary Fiat Auto S.p.A., however, without identifying any censurable event under ex art. 2408 of the Italian Civil Code, but expressing criticism about the operations and future of these companies.
Bearing in mind these remarks which maintain as censurable a transaction that is not subjectively referable to the company, but to its subsidiary, it could be said that no further analysis would be necessary and that the subsidiary must take care of this matter, which is what took place.
However, the board of statutory auditors, for purposes of the utmost clarity, believes that certain observations are necessary.
The fact of having invested € 534.6 million in Fiat shares, a transaction that was described in detail in the report on operations, is the result of a motivated operational decision, falling within the business purpose of the company, its discretionary powers and the powers of the administrative body, aimed at maintaining the stability of the investment of the principal subsidiary on the part of IFIL S.p.A. and thus not constituting a censurable event under art. 2408 of the Italian Civil Code.
It is confirmed that "Exor", a related party, had a gain of € 74 million. In this sense, the board of statutory auditors of IFI S.p.A., also taking advantage of the provisions of art. 151, No. 1 of Legislative Decree No. 58 dated February 24, 1998, requested information from the IFIL S.p.A. board of statutory auditors which, also as part of the controls that are normally carried out with regard to related party transactions, examined the transaction for the purchase of 82,250,000 Fiat S.p.A. shares from Exor S.A., in terms of the contractual documentation and from an accounting standpoint, ascertaining:

- compliance with art. 2391 of the Italian Civil Code by the interested parties;
- compliance with art. 2391 bis of the Italian Civil Code and Consob recommendations with regard to the observance of the rules of substance and of procedure for transactions with related parties;

- the suitability of the price for IFIL S.p.A. (€ 6.50 per Fiat S.p.A. share) certified by the fairness opinion issued by the advisor Gerardo Braggiotti of G.B. Partners S.r.l., and, also as additional support, the market prices.
- the proper recording of the transaction in the accounting entries.

The above led to exclude that the transaction examined constitutes a censurable event under ex art. 2408 of the Italian Civil Code.
Additional aspects and developments regarding the assessments and investigations by Consob and the Judiciary are described in detail in a specific heading in the report on operations.

With regard to the statutory financial statements, which show a profit of € 38,534,823, the formation of which is described in the report on operations, we have ascertained that the laws have been observed with regard to its format and structure through tests carried out directly by us and on the basis of information supplied to us by the audit firm. This being said, we invite you to approve the financial statements together with the motion by the Board of Directors for the appropriation of the profit for the year.

The Board of Directors, lastly, invites you to authorize the purchase of treasury stock for the amount and according to the manner and terms indicated in the specific report. As to our responsibilities in this case, we can attest that the proposal conforms to existing laws. At this point, we would like to inform you that our term of office has expired.

Turin, April 27, 2006

THE STATUTORY AUDITORS

(Cesare Ferrero)

(Giorgio Giorgi)

(Lionello Jona Celesia)

REPORT OF THE BOARD OF STATUTORY AUDITORS ACCORDING TO ART. 41 OF LEGISLATIVE DECREE NO. 127/1991

Dear Stockholders,

The consolidated financial statements of IFI S.p.A. for the year ended December 31, 2005, submitted to you, show a profit for the group of € 676 million, compared to a profit of € 120 million in the prior year. The consolidated financial statements were submitted to us, together with the report on operations, and are prepared in accordance with International Financial Reporting Standards (IFRS) endorsed by the European Union.

The tests carried out by Deloitte & Touche S.p.A., the audit firm charged with the audit of the financial statements, has led to the assertion that the values expressed in the financial statements agree with the accounting records of the parent, the statutory and consolidated financial statements of the subsidiaries, adjusted, where necessary, to conform with IFRS, and the relative information formally communicated by the latter.

Such financial statements, transmitted by the subsidiaries to the parent for purposes of drawing up the consolidated financial statements, prepared by their relevant corporate bodies, have been examined by the bodies and/or parties in charge of controlling the individual subsidiaries, according to the respective regulations, and on the part of the audit firm within the scope of the procedures carried out for the audit of the consolidated financial statements. The board of statutory auditors has, therefore, not extended its examination to these financial statements.

The determination of the scope of consolidation, the choice of the principles of consolidation of the investments and the procedures adopted for this purpose are in agreement with IFRS. The structure of the consolidated financial statements is thus to be considered technically correct and, as a whole, conforms to the specific law, containing in a specific appendix, the illustration of the transition to international accounting principles.

The report on operations adequately describes the results of operations and financial condition, the performance of operations during the course of 2005 and the business outlook of the whole of the companies in the scope of consolidation after the end of the year. The examination to which the report has been subjected shows its congruity with the consolidated financial statements.

REPORT OF THE INDEPENDENT AUDITORS ON THE FINANCIAL STATEMENTS PURSUANT TO ART. 156 OF LEGISLATIVE DECREE NO. 58 OF FEBRUARY 24, 1998

To the Stockholders of
IFI – ISTITUTO FINANZIARIO INDUSTRIALE S.p.A.

1. We have audited the financial statements of IFI – Istituto Finanziario Industriale S.p.A. as of and for the year ended December 31, 2005. These financial statements are the responsibility of the Directors of IFI - Istituto Finanziario Industriale S.p.A. Our responsibility is to express an opinion on these financial statements based on our audit.

2. We conducted our audit in accordance with generally accepted auditing standards in Italy as recommended by the Italian Regulatory Commission for Companies and the Stock Exchange (CONSOB). Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement and are, as a whole, reliable. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the adequacy and the fairness of the accounting principles used and the reasonableness of the estimates made by the Directors. We believe that our audit provides a reasonable basis for our opinion. The audit of the financial statements of certain investments in subsidiaries and affiliates, which represent approximately 23% of the Group's consolidated net equity and approximately 17% of the Group's consolidated net result for the year, is the responsibility of other auditors.

   For the opinion on the prior year's financial statements, which are presented for comparative purposes as required by law, reference should be made to our auditors' report dated April 8, 2005.

3. In our opinion, the financial statements of IFI - Istituto Finanziario Industriale S.p.A. as of and for the year ended December 31, 2005 comply with the Italian statutory provisions governing the criteria for their preparation; accordingly, they give a true and fair view of the Company's financial position and results of operations.

REPORT OF THE INDEPENDENT AUDITORS ON THE CONSOLIDATED FINANCIAL STATEMENTS PURSUANT TO ART. 156 OF LEGISLATIVE DECREE No. 58 OF FEBRUARY 24, 1998

To the Stockholders of
IFI – ISTITUTO FINANZIARIO INDUSTRIALE S.p.A.

1. We have audited the consolidated financial statements of IFI – Istituto Finanziario Industriale S.p.A. and its subsidiaries (the "IFI Group") as of and for the year ended December 31, 2005, constituted by the consolidated balance sheet, the consolidated statements of income, cash flows and changes in stockholders' equity and the related explanatory notes. These consolidated financial statements are the responsibility of the Directors of IFI – Istituto Finanziario Industriale S.p.A.. Our responsibility is to express an opinion on these consolidated financial statements based on our audit. These consolidated financial statements represent IFI – Istituto Finanziario Industriale S.p.A.'s first annual consolidated financial statements prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union.

2. We conducted our audit in accordance with generally accepted auditing standards in Italy as recommended by the Italian Regulatory Commission for Companies and the Stock Exchange ("Consob"). Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement and are, as a whole, reliable. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the adequacy and the fairness of the accounting principles used and the reasonableness of the estimates made by the Directors. We believe that our audit provides a reasonable basis for our opinion. The audit of the financial statements of certain investments in subsidiaries and affiliates, which represent approximately 23% of the Group's consolidated net equity and approximately 17% of the Group's consolidated net result for the year, is the responsibility of other auditors.

   The consolidated financial statements present for comparative purposes the corresponding data for the year 2004 prepared in accordance with IFRS. In addition, the Appendix to the consolidated financial statements, entitled "Transition to International Financial Reporting Standards (IFRS)", explains the effects of the transition to IFRS as adopted by the European Union. As explained in this Appendix, the Directors changed the information on the effects of the transition to IFRS previously approved by the Board of Directors and published in the appendix to the First-Half Report at June 30, 2005 in the IFRS Reconciliation Statements, which we have audited and on which we issued a special purpose auditors' report dated September 29, 2005. These changes have been made to render the prior year data comparable with the first IFRS consolidated financial statements, in which, as provided by the amendment to IAS 19 – Employee Benefits, issued by the IASB in December 2004, the Group elected to recognize actuarial gains and losses immediately in the period in which they arise, outside the income statement, in a statement of recognized income and expense. We examined the information included in the Appendix for the purposes of expressing our opinion on the consolidated financial statements as of and for the year ended December 31, 2005.

3. In our opinion, the consolidated financial statements referred to above present fairly the consolidated financial position of the IFI Group as of December 31, 2005 and the results of its operations and its cash flows for the year then ended in accordance with IFRS as adopted by the European Union.

4. For a better understanding of the consolidated financial statements, attention is drawn to the following matters:

   (a) On September 20, 2005, following the resolutions passed by the Board of Directors on September 15, 2005, the subsidiary IFIL Investments S.p.A. purchased from Exor Group (a subsidiary of Giovanni Agnelli e C. S.a.p.az.) n. 82,250,000 Fiat S.p.A. ordinary shares at a purchase price of € 6.5 per share. This purchase was made at the same time as the Fiat capital increase executed in settlement of the Mandatory Convertible Financing and, together with other transactions that occurred in the same month, allowed IFIL Investments S.p.A. to maintain its investment in Fiat ordinary capital stock unchanged (30.06%) after the capital increase made by Fiat. For further information on these transactions reference should be made to the information provided in the report on operations and in the notes to the consolidated financial statements.

   (b) The indirect investment in Fiat S.p.A., in which the subsidiary IFIL Investments S.p.A. owns 30.06% of ordinary capital stock, has been accounted for under the equity method in accordance with the interpretation of IAS 27 "Consolidated and separate financial statements" under which entities which are identified as "de facto" controlled entities under Italian law (art. 2359, paragraph 1, n° 2 of the Italian Civil Code) are excluded from the scope of line-by-line consolidation in the consolidated financial statements prepared in accordance with IFRS.

LIST OF IFI GROUP COMPANIES AND SIGNIFICANT INVESTMENTS AT DECEMBER 31, 2005

As required by Consob Resolution No. 11971 of May 14, 1999, as amended (art. 126 of the Regulations), a complete list of the companies and significant equity investments of the IFI Group is provided on the following pages.

The companies on this list have been classified according to percentage of ownership, method of consolidation and type of business. The information provided for each company includes: name, registered office, country and capital stock stated in the original currency. The percentage of Group consolidation and the percentage held by IFI S.p.A. or by other subsidiaries are also shown.

A separate column shows the percentage held of the voting rights at the ordinary stockholders' meeting when this figure differs from the percentage interest held in the company. An asterisk denotes the percentage with suspended voting rights.

IFIL GROUP IN 2005
DIRECTORS' REPORT ON OPERATIONS

TABLE OF CONTENTS

This is an English translation of the Italian original document "Relazione sulla gestione" approved by the IFIL Board of Directors on March 30, 2006, which has been prepared solely for the convenience of the reader.

The version in Italian takes precedence: for complete information about IFIL S.p.A. and the Group, reference should be made to the full original report in Italian "Il Gruppo IFIL nel 2005" containing the Directors' Report on Operations and the Statutory Financial Statements and Consolidated Financial Statements also available on the corporate website: http://www.ifil.it.

Board of Directors

Chairman: Gianluigi Gabetti

Vice Chairmen: Tiberto Brandolini d'Adda and John Elkann

Chief Executive Officer and General Manager: Carlo Barel di Sant'Albano [a]

Directors: Edoardo Ferrero Ventimiglia, Franzo Grande Stevens, Giancarlo Lombardi, Antonio Maria Marocco, Giuseppe Recchi, Claudio Saracco, Pio Teodorani-Fabbri, Daniel John Winteler

(a) Co-opted by the Board of Directors on February 7, 2006

Secretary to the Board: Fernando Massara

Executive Committee

Gianluigi Gabetti (*Chairman*), Tiberto Brandolini D'Adda, John Elkann, Carlo Barel di Sant'Albano

Audit Committee

Antonio Maria Marocco (*Chairman*), Giancarlo Lombardi, Claudio Saracco

Compensation and Nominating Committee

John Elkann (*Chairman*), Gianluigi Gabetti, Giuseppe Recchi

Board of Statutory Auditors

Chairman: Cesare Ferrero

Standing Auditors: Giorgio Giorgi, Paolo Piccatti

Alternate Auditors: Lionello Jona Celesia, Ruggero Tabone

Independent Auditors

Deloitte & Touche S.p.A.

Expiry of the terms of office

The terms of office of the Board of Directors and the Board of Statutory Auditors, elected by the Stockholders' Meeting held on June 27, 2005, will expire concurrently with the Stockholders' Meeting that will held for the approval of the statutory financial statements for the year ending December 31, 2007.

The appointment of the Independent Auditors will expire concurrently with the Stockholders' Meeting that will approve the financial statements for the year ending December 31, 2005.

Corporate Governance

The Chairman and Vice Chairmen may legally represent the company (art. 20 of the bylaws). Without specific authorization by resolution of the Board of Directors, they may carry out all acts falling under the corporate business purpose, except as restricted by law.

The Board of Directors has conferred all powers necessary for the management of the company to the Executive Committee, except those powers, which are expressly entrusted to the Board of Directors by law.

The Chief Executive Officer and General Manager may legally represent the company (art. 20 of the bylaws).

The Board of Directors' Meeting held on February 7, 2006, moreover, took note that the Chief Executive Officer, with regard to the scope of that provision of the bylaws, has limited his powers of company representation to the amount of € 150 million for each single transaction.

CHAIRMAN'S LETTER

To our shareholders,

With its consolidated profit of € 1,090 million, IFIL closed 2005 having achieved its best ever result. The profit reported in the statutory financial statements (€ 99 million) also showed strong growth compared to past performance. In addition to these results, the net financial position was also positive for € 350 million and the constant gains in the value of IFIL shares on the stock market meant an increase of 43%, bringing IFIL's capitalization to more than € 5 billion.

***

The most important event of the year was undoubtedly the purchase of Fiat shares in September, which enabled IFIL to keep its stake in the company unchanged, confirming its traditional role as the stockholder of reference in the Turin motor vehicle Group.
As a result of this purchase, the company seized a unique opportunity to participate fully in the progress taking place within Fiat, and, at the same time, defend the value of its longstanding stake in the company. By doing so, it was also ensuring the fundamental prerequisites that would enable Fiat management to complete the ambitious plan, begun two years ago and still in progress, to turn around the company, serenely and in a way that would assure maximum concentration of its efforts.
This decision to show confidence in Italy's leading industrial Group, taken in full awareness of the importance of Fiat for Italy's economy, and sustained by the extraordinary determination of the people who work for it, has been rewarded by the facts, so that the future prospects now are very different to those in the past.
There is no doubt that much remains to be done: from consolidating the share of Fiat brands in the European automotive market and creating specific alliances with international partners, in parallel with an equal commitment in other sectors, especially in the activities of commercial vehicles, agriculture machinery and earth-moving equipment.
The credibility that management has earned in the international economic and financial community and its proven capacity to achieve the announced results confirm the wisdom of the decisions taken hitherto and reinforce our confidence that the work undertaken with regard to our main investment may continue successfully.

The purchase of Fiat stock was preceded by another important investment, namely the investment in Sanpaolo IMI, which increased the Group's stake in the Turin bank to close to 5% of the capital stock.

Equally important was the growth of the activities of our French subsidiary which, during the year, abandoned the name of Worms & Cie in favor of Sequana Capital. Special mention should be made of the sale of Permal Group to the American company, Legg Mason, enabling Sequana Capital to realize considerable gains and a large inflow of cash. Further progress is expected in the paper sector, the profitability of which is still unsatisfactory and has been the object of much work on the part of Sequana management.

The sale of the Group's textile operations marked the completion of the monetization of the investment in La Rinascente, which began in 2004 with the sale of the food operations.

Considerable effort was invested - and will continue to be invested during the current year - in the reorganization of activities in the tourism sector headed by Alpitour. The exceptionally negative coincidence of climatic, geo-political and commercial factors during 2005 made it impossible to achieve a positive net result. However, guided by new management from the parent, IFIL, the company is engaged in an exacting review of its many activities, and it is hoped that it will be possible to achieve a decisive turnaround in the trend in the medium term, favored by an expected improvement in market conditions.

Finally, special praise goes to the Juventus team for its ability to achieve high-profile results regularly. This year the team again succeeded in placing at the top in the Italian soccer championship, and, what's more, succeeded in reaching the final stages of the Champions League. Now that the 2006 Turin Winter Olympics are over, with their brilliant results, the black and white team has proved that it is able to keep high the name of our city and the name of our Group, in the world's sporting scenario and beyond.

***

Having closed 2005 with excellent results, today, your company is committed to achieving new targets which are in the process of review by the Executive Committee consisting of myself, the two Vice Chairmen, Tiberto Brandolini d'Adda and John Elkann, and the new Chief Executive Officer and General Manager, Carlo Barel di Sant'Albano, who joined us last February.
Thanks also to the fact that IFIL's management has been strengthened, the Group is now in a position to give a new slant to its strategies, with the aim of seizing interesting new investment opportunities, and creating value, to the advantage of all its stockholders. The investment in Banca Leonardo should be viewed with this in mind. For this new development project in investment banking, we shall be able to rely on the undisputed professional skills of Gerardo Braggiotti, with whom our Group has been cooperating to great advantage for a long time.

In order to achieve its objectives, the company will have to take into due account the macro-economic context in which it operates, either directly or through its subsidiaries. Sadly, the analysis of the prospects for the current year have not produced reassuring signs, especially in the light of the disappointing results reported in the last year.

The annual growth rates of the Italian economy are lower than the average of the Eurozone. In particular, a comparison between the growth rates of the Italian economy (unchanged compared to 2004) and that of our European partners – such as France (+1.4%), Spain (+3.4%), the United Kingdom (+1.8%) and Germany (+0.9%) – suggests that, in Italy, structural problems are now tending to outweigh cyclical factors, thus preventing the consolidation of a long-lasting phase of recovery.
The balance of trade is particularly worrying: in 2005, there was a trade deficit of € 10.4 billion, the worst result recorded since the 1980s. Trade with the European Union alone generated a negative figure of € 2 billion.
In other words, if we are to succeed in launching a new cycle of growth in Italy, it is clear that we must make it a priority to loosen the structural knots which are strangling the competitiveness of our companies: namely, excessive energy costs, the insufficient resources spent on research and innovation, the expenses which weigh heavily on the cost of labor, and the disadvantages of a national debt which is unsustainable.

***

In the name of the Board of Directors I would like to thank our stockholders for the trust they have placed in us, the statutory auditors, the independent auditors, the managers and all the employees of IFIL and its subsidiaries and associates for their continued efforts in a particularly demanding year.

Gianluigi Gabetti

THE INVESTMENT PORTFOLIO

IFIL Investments S.p.A. is the investment company of the Group headed by Giovanni Agnelli e C. S.a.p.az. (through IFI – Istituto Finanziario Industriale S.p.A. which holds approximately 64% of its ordinary capital stock). It commands two distinctive areas of operations: the active management of the investment in Fiat and the dynamic management of the other holdings.

Fiat, in which IFIL has a holding of more than 30% of ordinary and preferred capital stock, operates in the national and international automotive market as a manufacturer and distributor of automobiles (Fiat, Lancia, Alfa Romeo, Ferrari and Maserati), agricultural and construction equipment (CNH Global), commercial vehicles (Iveco), automotive components for these vehicles and the supply of related services (Magneti Marelli, Comau and Teksid), as well as publishing and communications (Itedi) and services for corporations (Business Solutions).

The other holdings which comprise the dynamically managed diversified portfolio are listed below.

Sequana Capital - ex-Worms & Cie - (52.78% holding) is a French-listed holding company with a portfolio comprising the following major investments:

- ArjoWiggins (100% holding), the world leader in the manufacture of high value-added paper products and, in Europe, leader in the manufacture of carbonless paper;
- Antalis (100% holding), the leading European group in the distribution of paper products for printing and writing;
- SGS (23.8% holding), a company listed on the Swiss stock exchange and leader in the verification, inspection and certification of product and service quality;

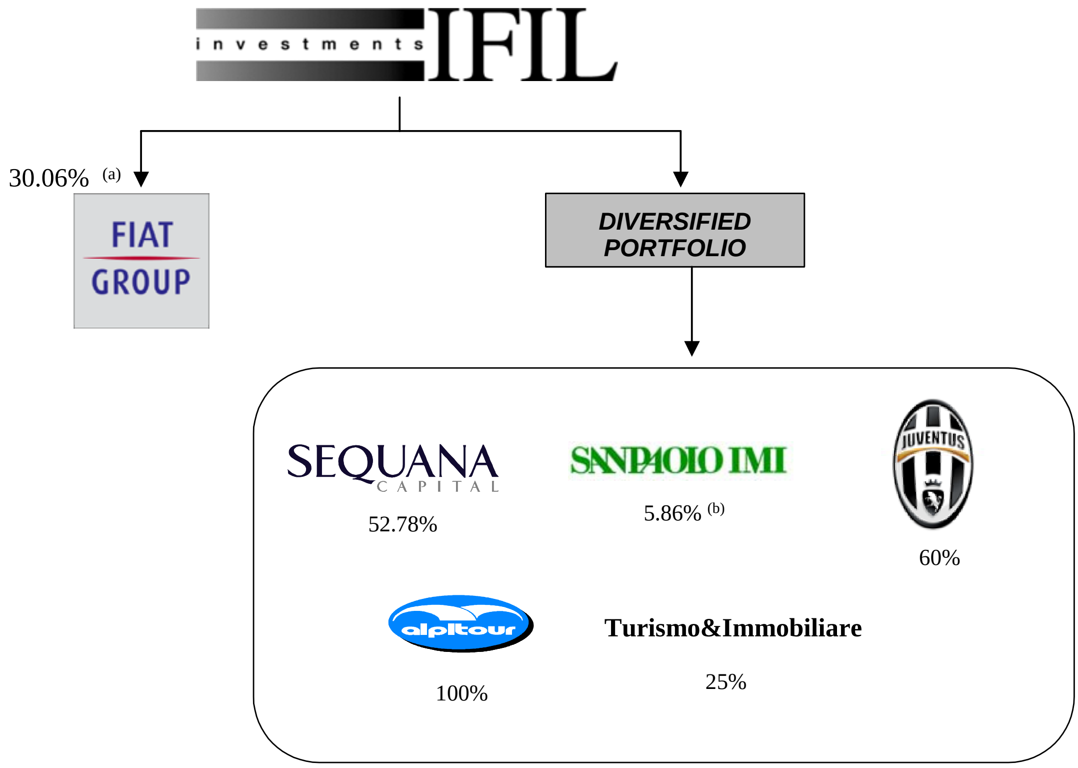
Sanpaolo IMI (5.86% holding of ordinary capital stock by IFIL) is a leading national banking group with over 3,000 branches throughout Italy;

Alpitour (100% holding) is the leading group in the tourist sector in Italy;

Juventus Football Club (60% holding by IFIL) is a company with more than one hundred years of history and an enviable record gained at various national and international sports events;

Turismo&Immobiliare (25% holding) is a company with a 49% stake in Italia Turismo (ex-Sviluppo Italia Turismo), the largest Italian real estate company for tourist and hotel properties with important investments in Apulia, Calabria, Basilicata, Sicily and Sardinia.

The following chart is updated to the end of March 2006 and presents the simplified structure of the investment portfolio. Percentage holdings refer to ordinary capital stock.



(a) IFIL also holds 30.09% of preferred capital stock.
(b) Equal to 4.97% of capital stock.

The following charts show the composition of the Net Asset Value (NAV) at current values and the change in the value of the investment portfolio over the last 10 years.

NET ASSET VALUE

At the end of March 2006, the Net Asset Value is equal to € 6,938 million and is composed as follows:

€ in millions	
Current value of the investment portfolio	6,602
Net cash	336
Total	6,938

The listed equity holdings in the investment portfolio are valued at the closing stock market prices as of March 24, 2006.

Total dividends paid out	86.9 (a)	73.3	66.7 (b)	-	81.2
Dividends paid out per share (€)					
Per ordinary share	0.0800	0.0683	0.0620	-	0.1800
Per savings share	0.1007	0.0890	0.0827 (b)	-	0.2007

(a) Maximum payment for dividends to be put forward in a motion to the Stockholders' Meeting convened for the approval of the financial statements for the year ended December 31, 2005.

(b) An amount of € 3 million (€ 0.0827 per savings share) has also been paid out for the balance of the preference dividends referring to 2002.

STOCKHOLDERS AND THE STOCK MARKET

Capital stock

IFIL S.p.A.'s capital stock, fully subscribed to and paid-in, amounts to € 1,075,995,737 and consists of 1,038,612,717 ordinary shares and 37,383,020 savings shares with a par value of € 1 each.

Pursuant to art. 25 of the bylaws, the savings shares carry no voting rights and can either be registered or bearer shares, as elected by the stockholders. They carry the right to a preference dividend, cumulative according to law, of 8.27% of their par value and to a total dividend higher than that of ordinary shares by 2.07% of the same par value.

When, in any one year, the dividends assigned to the savings shares are below the percentages indicated above, the difference will be added to the preference dividend of the next two years.
In the event of the exclusion of the ordinary shares and/or savings shares from trading, the preference dividend and the dividend higher than that of the ordinary shares to which the savings shares are entitled, will be automatically increased to extent that they are equal, respectively, to 8.52% and 2.32%.

The directors have the right, for a period of five years from the resolution passed on May 14, 2003 by the Extraordinary Stockholders' Meeting, to increase, at one or more times, the capital stock, also in divisible form, for a maximum of € 1,500 million and to issue, at one or more times, convertible bonds up to the same figure but for amounts which, each time, shall not exceed those established by law.

The directors also have the right, for a period of five years from the resolution passed on May 25, 2001 by the Extraordinary Stockholders' Meeting, to increase, at one or more times, the capital stock, excluding option rights, for a maximum amount of € 4 million, through the issue of a maximum of 4 million ordinary and/or savings shares, with a par value of € 1 each, to be offered for subscription to the employees of the company or its subsidiaries or the parents or the subsidiaries of the same parents.

Stockholders

IFIL has approximately 30,000 stockholders.
At the end of March 2006, the controlling stockholder, IFI – Istituto Finanziario Industriale S.p.A., holds approximately 64% of ordinary capital stock.

Other major stockholders, indicated below, represent 19.43% of ordinary capital stock.

Stockholders	%	Ordinary shares
Morgan Stanley Group	3.63	37,719,831
UBS AG	2.48	25,787,501
Peter Cundill & Associates (Bermuda) Ltd	2.02	21,007,569

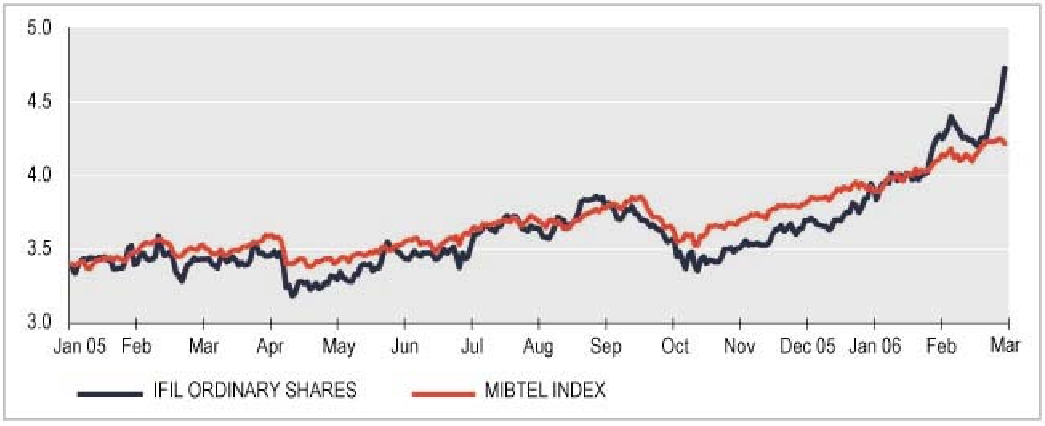
Treasury stock

IFIL currently holds 14,596,040 ordinary shares of treasury stock (1.41% of the class of stock) including the 810,262 shares held by Soiem (100% IFIL).
On March 30, 2006, the Board of Directors voted to put forward a motion to the Ordinary Stockholders' Meeting to renew the authorization for the purchase of treasury stock for a maximum of 90 million IFIL ordinary and/or savings shares for a global amount of € 450 million.

Stock performance

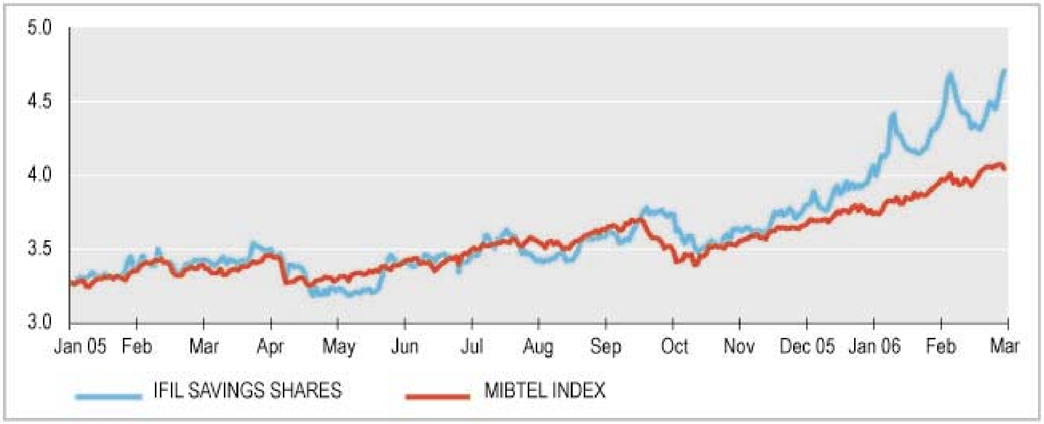
Performance by IFIL ordinary shares, which are listed on the MIDEX Index of mid-cap companies, was positive in 2005, although below the performance of the Mibtel Index. The stock's performance principally originates from the positive operating and financial effects of the sale of La Rinascente S.p.A. and the market price gains by the stocks of Sanpaolo IMI and Fiat, companies in which IFIL had increased its investments during the course of the year.
IFIL ordinary stock thus gained 9.9% for the entire year 2005 (including the distribution of dividends) against a positive 18.3% performance by the Mibtel Index.
The growth pattern continued into the first part of 2006 with price gains that caused the stock to outperform the Mibtel Index.

PERFORMANCE BY IFIL ORDINARY SHARES COMPARED TO THE MIBTEL INDEX (a)



During 2005, IFIL savings shares gained 19.7% and performed better than both IFIL ordinary shares and the Mibtel Index.
During the first part of 2006, IFIL savings stock recorded a further gain, widening the performance gap against the Mibtel Index.

PERFORMANCE BY IFIL SAVINGS SHARES COMPARED TO THE MIBTEL INDEX (a)



(a) The charts are based on stock market data. Mibtel base 100 on IFIL stock.

The above performance positively influenced IFIL's capitalization which, in 2005, grew from € 3,529 million to € 3,885 million. During the first few months of 2006, there was a further increase to € 5,042 million.

CAPITALIZATION DECEMBER 2004 / MARCH 2006 – IFIL ordinary shares – IFIL savings shares (€ in millions)

During 2005, the value and volumes of IFIL ordinary shares traded grew still further. The increment in the volumes of both ordinary shares and savings shares traded (liquidity) particularly confirms the increasingly higher market interest in IFIL's stocks.

MARKET INFORMATION	2006 (a)	2005	2004	2003

(a) From January 1 to March 24, 2006.

The 2003 market prices have been adjusted as a result of the capital stock increase in July 2003.

FINANCIAL COMMUNICATIONS AND INVESTOR RELATIONS

In 2005, IFIL devoted special attention to stockholders, financial analysts and institutional investors and particularly focused on the financial Press.

In particular:

- more than 1,000 copies (in Italian and English) of the annual report, the first-half report and the quarterly reports have been distributed. These reports are sent, on request, to stockholders, and are also available on the corporate website at www.ifil.it;
- a telephone conference was organized in September and numerous individual meetings were arranged with institutional investors and financial analysts;
- far-reaching, comprehensive information has been circulated through the Italian and foreign economic and financial Press and also on the corporate website.

MAJOR EVENTS IN 2005

Increase in the investment in Sanpaolo IMI

During March and April 2005, IFIL purchased on the market 22,700,000 Sanpaolo IMI ordinary shares (1.43% of the current ordinary capital stock) for an investment of € 263.5 million.
IFIL currently holds 93,071,000 Sanpaolo IMI ordinary shares, equal to 5.86% of ordinary capital stock and 4.97% of capital stock.

Investment in Italia Turismo (ex-Sviluppo Italia Turismo)

In April 2005, the agreement was executed between IFIL, Banca Intesa, the Marcegaglia Group and Sviluppo Italia for the partial privatization of Italia Turismo. Turismo&Immobiliare (the company in which the three private stockholders each own equal stakes) subscribed to Italia Turismo's capital stock increase of € 60 million and purchased stock of the company from Sviluppo Italia for € 16 million thus acquiring a 49% stake for a total investment of € 76 million.
At the beginning of November, Pirelli RE became a stockholder of Turismo&Immobiliare, purchasing about an 8.3% stake in the capital of this company from each of the three founding stockholders for € 1.1 million and assuming the same commitments.
Turismo&Immobiliare, the capital of which is today owned by the aforementioned four private stockholders, each with a 25% holding, has a 49% interest in Italia Turismo (the remaining 51% stake is held by Sviluppo Italia), which is the largest real estate operator in the tourism-hotel sector in Italy with important investments in Apulia, Calabria, Basilicata, Sicily and Sardinia.
Finally, the agreements with Sviluppo Italia provide for the possibility that Turismo&Immobiliare will reach a controlling interest (approximately 65%) in Italia Turismo by 2009.
The additional commitment by the IFIL Group will amount to € 19 million.

Sale of La Rinascente S.p.A.

On May 6, 2005, Eurofind Textile S.A. (the Luxembourg company controlled by Auchan and Ifil Investissements) sold 99.09% of Rinascente S.p.A. capital stock to Tamerice S.r.l., a company heading a group composed of Investitori Associati SGR S.p.A., DB Real Estate Global Opportunities IB L.P., Pirelli RE S.p.A. and the Borletti family, for a price of € 888 million.

On May 17, 2005, the subsidiary Ifil Investissements purchased the remaining 50% of Eurofind Textile capital stock from the Auchan Group for € 349.5 million and then merged it on June 28, 2005. As a result of these transactions, the IFIL Group received net proceeds for a total of € 529.1 million and realized a gain of € 459.1 million (both amounts are net of selling costs), with no significant tax effects.

Ifil Investissements, as the merging company of Eurofind Textile, has provided the buyer with statements and guarantees regarding the Rinascente Group, the subject of the transaction, and its activities, with the usual limitations and exclusions (part of such guarantees are borne by the Auchan Group). Such conventional statements and guarantees regard, among other things, full ownership and title, free and clear of detrimental encumbrances and registrations, of the shares of the companies of the Rinascente Group and real estate properties, the lease relationships, the true and correct representation of the financial statements and tax, social security and legal/labor matters. The limitations and exclusions agreed within the framework of the sale process regard specific events considered by the buyer during the course of the due diligence. Such limitations and exclusions provide for the obligation of compensation when thresholds of significance are exceeded per individual indemnifiable event (de minimis) and as a whole (with an exempted amount) and, for certain matters, a maximum limit of responsibility for the seller.

IFIL S.p.A. has guaranteed the commitments undertaken by Ifil Investissements with the buyer until their maturity, estimated, depending on the matter at hand, at December 31, 2006 or at December 31, 2008 or when barred by the statute of limitations.

Maintaining a 30.06% stake in the ordinary capital stock of Fiat S.p.A.

On September 20, 2005, IFIL purchased 82,250,000 Fiat ordinary shares from Exor Group (controlled by Giovanni Agnelli e C. S.a.p.az.). These shares came from an equity swap agreement between Exor Group and Merrill Lynch International last April. This purchase was approved on September 15, 2005 by the Board of Directors, which used the services of an advisor, Mr. Gerardo Braggiotti of G.B. Partners.

The purchase price was € 6.5 per share for a total of € 534.6 million. Fiat stock was officially traded at € 7.76 per share on September 15, 2005 compared to the weighted average official prices over the last three months of € 6.91 per share and the weighted average official prices over the last six months of € 6.16 per share. The stock was transferred from Merrill Lynch to Exor Group at the same time the Fiat capital increase was executed, on September 20, 2005. The sale by Exor Group to IFIL immediately followed on the same date. In the identical context, IFIL, on the same date, sold Merrill Lynch all the option rights to which it was entitled on the Fiat capital increase.

Prior to the purchase of the above stock, after the purchase of 5,500,000 ordinary shares on the market by IFIL on September 7, 8 and 9 for € 41.1 million, the investment held by IFIL in Fiat totaled 246,083,447 ordinary shares and 31,082,500 preferred shares.

The aforementioned transactions allowed IFIL to maintain its investment in Fiat ordinary capital stock unchanged (30.06%) after the capital increase by Fiat, which took place on September 20, 2005.

A total of 87,750,000 Fiat ordinary shares was purchased for a global investment of € 580.2 million, including incidental charges of € 4.5 million.

At December 31, 2005, IFIL holds 328,333,447 Fiat ordinary shares and 31,082,500 Fiat preferred shares.

Investment in Banca Leonardo

At the end of November 2005, the IFIL Group displayed its interest in the project for the acquisition and recapitalization of Banca Leonardo S.p.A., assuming a commitment for an investment of € 46.6 million to purchase 10% of the capital of the bank.

On March 3, 2006, Ifil Investissements filed a petition with Banca d'Italia to obtain authorization for the investment which it is believed can be executed by the end of the month of April 2006.

IFIL GROUP - REVIEW OF THE CONDENSED CONSOLIDATED RESULTS

IFIL holds some important investments through Dutch and Luxembourg subsidiaries and controls two companies incorporated under Irish law (operating with the aim of optimizing the management of the financial resources of the Group), Soiem (a services company), as well as certain companies contributing to investment activities (Ifil USA and Ifil Asia). The aggregate of these companies constitutes the so-called "Holdings System".

In order to facilitate the analysis of the financial position and results of operations of the Group, it is IFIL's practice to present "condensed" financial statements (balance sheet and income statement) for the period prepared by applying the "condensed" consolidation criteria. Such condensed consolidated financial statements are presented along with the annual consolidated financial statements and in the first-half report of each year. The quarterly consolidated data is also presented in the condensed format in the quarterly reports at March 31 and September 30 of each year.

In the preparation of the condensed consolidated balance sheet and income statement, the financial statements or accounting data drawn up in accordance with IFRS by the parent and by the subsidiaries in the "Holdings System" are consolidated line-by-line; the investments in the operating subsidiaries and associates (Fiat, Sequana Capital, Alpitour, Juventus Football Club and Turismo&Immobiliare) are accounted for by the equity method, always on the basis of their financial statements or accounting data prepared in accordance with IFRS.

The 2004 data presented for purposes of comparison has been restated in accordance with IFRS.

The following table shows the consolidation and valuation methods used for the investments in subsidiaries and associates.

		% holding in capital stock outstanding	
		12/31/2005	12/31/2004
HOLDINGS SYSTEM	Consolidated line-by-line (a)		
	- IFIL Investments S.p.A.	-	-
	- Ifil Investment Holding N.V. (Netherlands)	100	100
	- Ifil Investissements S.A. (Luxembourg)	100	100
	- Ifilgroup Finance Ltd (Ireland)	100	100
	- Ifil International Finance Ltd (Ireland)	100	100
	- Soiem S.p.A. (Italy)	100	100
	- IFIL USA Inc (b)	100	100
	- IFIL Asia Ltd (Hong Kong)	100	100
	- IFIL New Business S.r.l. (Italy) (c)	100	100
	- Eufin Investments Unlimited (United Kingdom) (d)	100	50
	Consolidated proportionally		
	- Eurofind Textile S.A. (Luxembourg) (e)	-	50
OPERATING COMPANIES	Accounted for by the equity method		
	- Fiat Group	28.28	27.74
	- Sequana Capital Group (ex-Worms & Cie)	52.78	52.96
	- Alpitour Group	100	100
	- Juventus Football Club S.p.A.	60.00	61.69
	- Turismo&Immobiliare S.p.A.	25.00	-

(a) Certain wholly-owned subsidiaries, after the distribution of almost all their income and capital reserves, were wound up (Mediterranean Capital B.V. and Ifil Finance B.V.) or put into a wind-up (NHT New Holding for Tourism S.A.) and, therefore, at December 31, 2005, were accounted for by the equity method (they had previously been consolidated line-by-line). Sadco S.A. was put into a wind-up at the end of 2005 and has therefore been consolidated line-by-line up to December 31, 2005.

(b) Ifil Capital Partners L.P., Ifil America L.P. and Ifil Investments LLC (previously grouped with Ifil USA Inc.) were wound up in December 2005.

(c) Dormant company.

(d) The investment, equal to 50% of capital stock, was consolidated proportionally up to December 31, 2004.

(e) Following the proportional total spin-off of Eurofind (December 2004), the IFIL Group came to hold 50% of the capital stock of Eurofind Food (sold to the Auchan Group in December 2004) as well as 50% of the capital stock of Eurofind Textile which controlled 99.09% of the outstanding capital stock of La Rinascente (the beneficiary company of the spin-off of the textile businesses, Department Stores and Upim, of the Rinascente Group) sold on May 6, 2005 to Tamerice S.r.l. On May 17, 2005, Ifil Investissements purchased the remaining 50% interest in Eurofind Textile from the Auchan Group and merged it on June 28, 2005.

Consolidated profit - IFIL Group for the year 2005 is € 1,090 million (€ 124 million in 2004). The positive change of € 966 million is mainly due to a decisive improvement in the results of the Fiat Group and the Sequana Capital Group, partly as a result of nonrecurring transactions.

The **Group's share of the earnings (losses) of operating subsidiaries and associates accounted for by the equity method** is an earnings figure of € 622 million (losses of € 397.8 million in 2004). The positive change of € 1,019.8 million is due to better results posted by the Fiat Group (+€ 817.3 million) and by the Sequana Capital Group (+€ 224.4 million), as well as lower results reported by Alpitour Group (-€ 17.1 million), Juventus Football Club (-€ 4.4 million) and a loss reported by Turismo&Immobiliare (-€ 0.4 million). The above changes include consolidation adjustments.

The **consolidated net financial position of the "Holdings System"** at December 31, 2005 shows a net liquidity position of € 348.3 million. The decrease of € 331.7 million compared to the balance at year-end 2004 (€ 680 million) comes from the net proceeds generated by the sale of the investment in La Rinascente (+€ 529.1 million), the receipt of dividends from holdings (+€ 66.6 million), the investments made in Fiat (-€ 580.2 million) and Sanpaolo IMI (-€ 263.5 million), the dividends paid by IFIL (-€ 73.2 million) and other net changes (-€ 10.5 million).

Consolidated equity – Group at December 31, 2005 amounts to € 5,186 million (€ 3,722.2 million at the end of 2004). The increase of € 1,463.8 million is due to the fair value adjustment of the investment in Sanpaolo IMI (+€ 220.3 million), the consolidated profit of the Group for the year (+€ 1,090 million), positive translation differences (+€ 281 million), dividends paid by IFIL S.p.A. (-€ 73.2 million) and other net changes (-€ 54.3 million).

The carrying amount of **investments** at December 31, 2005 is € 4,806.5 million. The increase of € 1,888.6 million compared to investments at year-end 2004 (€ 2,917.9 million) is due to the fair value adjustment of the investment in Sanpaolo IMI (+€ 220.3 million), the investments made in that bank (+€ 263.5 million) and in Fiat (+€ 580.2 million), IFIL's share of the changes in the equity of the operating subsidiaries and associates (+€ 823.6 million), and, lastly, other net changes (+€ 1 million).

The condensed consolidated income statement and balance sheet and comments thereon are presented on the following pages.

IFIL Group - Condensed consolidated income statement

Turismo&Immobiliare	(1.6)	-	(0.4)	0.0	(0.4)
			536.4	(468.1)	1,004.5
Consolidation adjustments			85.6	70.3	15.3
Total			622.0	(397.8)	1,019.8

(a) The year coincides with the period November 1 to October 31.

(b) Accounting results for the period January 1 to December 31 prepared in accordance with IFRS for purposes of consolidation in IFIL.

The consolidation adjustments regard the results of the following groups:

€ in millions	2005	2004	Change
Fiat	59.8 (a)	69.6 (b)	(9.8)
Sequana Capital	25.8 (c)	0.0	25.8
Alpitour	0.0	0.7	(0.7)
Total consolidation adjustments	85.6	70.3	15.3

(a) Details are as follows:
- € 54.8 million for the excess of the increases of IFIL’s share of the consolidated equity of the Fiat Group originating from the Fiat capital stock increase subscribed to by minority stockholders (+€ 605.4 million) and the increase in the percentage of consolidation, equal to 0.54% (+€ 29.2 million), compared to the cost incurred for the purchase of 87,750,000 Fiat shares (-€ 580.2 million), net of the sale of the rights on ordinary and preferred shares (+€ 0.4 million);
- € 5 million for the reversal of the portion of actuarial losses charged to the income statement (early adoption of revised IAS 19 by the IFIL Group).

(b) Use of the remaining "Consolidation reserve for risks and future expenses" for IFIL's share of the Fiat Group's loss referring to the investment in Fiat conferred by IFI in 2003.

(c) Adjustment of the gain on the sale of the investment in Permal Group, due to a different carrying amount by IFIL.

Comments on the operating performance of the main subsidiaries and associates are presented later in the report.

2. Net gains

Net gains realized in 2005 amount to € 460.9 million and refer to the sale of 99.09% of La Rinascente S.p.A. capital stock to Tamerice S.r.l. (€ 459.1 million) and the sale on the market of a marginal interest (1.69% of capital stock) in Juventus Football Club (€ 1.8 million). Net gains in 2004 totaling € 603.3 million originated from the sale of 50% of Eurofind Food capital stock (€ 577 million), 7.2% of Club Mediterranée capital stock (€ 26 million) and 0.32% of Juventus Football Club capital stock (€ 0.3 million).

3. Profit (loss) from discontinued operations

At December 31, 2005, the profit (loss) from discontinued operations includes dividends received from La Rinascente S.p.A. (+€ 0.5 million). In 2004, this item included IFIL’s share of the earnings (losses) of SIDM (-€ 6.6 million) and La Rinascente (+€ 4.3 million).

4. Impairment (losses)/reversals of investments and securities

At December 31, 2005, impairment (losses)/reversals include the positive fair value adjustment of current securities for € 3.4 million.

In 2004, this caption amounted to € 74.4 million and included the impairment loss of goodwill on Alpitour (-€ 36.5 million) and Juventus Football Club (-€ 36.4 million) as well as that of securities (-€ 1.5 million).

5. Net financial income (expenses)

In 2005, net financial income amounts to € 2 million. In 2004, net financial expenses totaled € 20.9 million owing to the fact that the consolidated net debt position of the "Holdings System" returned to a liquidity position only towards the end of the year.

6. Net general expenses

Net general expenses amount to € 41.1 million for the year 2005 and include the extraordinary compensation approved for the Chairman and President (€ 15 million) and the former Chief Executive Officer (€ 3.8 million) at the Board of Directors' Meetings held, respectively, on June 9, 2005 and November 11, 2005. The remaining amount of € 22.3 million is basically in line with that in 2004 (€ 22.2 million).

7. Investments

Details are as follows:

	Carrying amount at		
€ in millions	12/31/2005	12/31/2004	Change
Investments in operating subsidiaries and associates accounted for by the equity method			
Fiat Group	2,335.7	1,134.1	1,201.6
Sequana Capital Group	1,140.9	922.0	218.9

			2,335.7		2,592.2		3,532.2
Sequana Capital Group	55,922,623	20.40	1,140.9	24.00	1,342.1	25.60	1,431.6
Juventus Football Club S.p.A.	72,560,500	0.37	26.6	1.36	98.7	1.56	113.3
Sanpaolo IMI S.p.A.	93,071,000	13.20	1,228.6	13.20	1,228.6	15.25	1,419.2
Total			4,731.8		5,261.6		6,496.3

8. Other financial assets

Other financial assets include 76,614 Ocean Club Méditerranée bonds, maturing November 1, 2008 (€ 4.8 million), and 18,914,511 Fiat ordinary share warrants 2007 (€ 3.5 million).

9. Assets held for sale

In 2004, assets held for sale referred to the carrying amount of the investment in La Rinascente (€ 70.2 million) and the carrying amount (€ 2.2 million) of a building owned by the subsidiary Sadco. Both sales were executed during 2005.

10. Current financial assets

These amount to € 792.7 million (€ 1,047.9 million at the end of 2004) and mainly include investments made on the money market in time deposits, short-term Italian government securities and other short-term financial instruments.

11. Receivables and other current and non-current assets

The amount of € 43.7 million includes tax receivables of € 42.9 million and other assets of € 0.8 million.

12. Treasury stock

Treasury stock includes IFIL ordinary shares held by IFIL and its subsidiary Soiem; the change compared to the end of 2004 is presented below.

	Number of ordinary shares held	% of class of stock	% of capital stock	Amount	
				Per share (€)	Total (€ in mn)
Balance at December 31, 2004:					
- held by IFIL S.p.A.	13,155,472 (a)	1.27	1.22	3.59	47.2
- held by the subsidiary Soiem S.p.A.	810,262	0.08	0.08	3.41	2.8
Total at December 31, 2004	13,965,734	1.35	1.30	3.58	50.0
Purchases during period by IFIL S.p.A.	630,306	0.06	0.06	3.38	2.1
Balance at December 31, 2005	**14,596,040**	**1.41**	**1.36**	**3.57**	**52.1**

(a) Of which 532,000 shares are to be used to service stock option plans at the price of € 2.28 per share.

13. Equity - Group

The changes during the year are analyzed as follows:

€ in millions		
Equity - Group at December 31, 2004	**3,722.2**	
Fair value adjustments of the investment in Sanpaolo IMI (+€ 220.3 million) and Fiat ordinary share warrants 2007 (+€ 1 million)	221.3	
Net change in the measurement of hedging instruments	4.9	
Share of translation differences (+€ 281 million) in the equity of subsidiaries and associates and other net changes (-€ 59.5 million)	221.5	
Cost of IFIL ordinary shares purchased in 2005	(2.1)	
IFIL S.p.A. capital stock increase as a result of the exercise of stock options	1.4	
Dividends distributed by IFIL S.p.A.	(73.2)	(a)
Profit - Group	1,090.0	
Net change during the year	**1,463.8**	
Equity - Group at December 31, 2005	**5,186.0**	

(a) Net of intragroup dividends of € 0.1 million.

14. Bonds

Bonds include the IFIL 2003/2006 bonds for a nominal amount of € 100 million. Such bonds, repayable with a one-time repayment maturing December 19, 2006 are recorded at amortized cost for € 100.2 million (€ 99.9 million at December 31, 2004).

In 2004, bonds also included the IFIL 2002/2005 bonds (€ 200.7 million) for a nominal amount of € 200 million, repaid on December 20, 2005.

15. Consolidated net financial position of the "Holdings System"

The consolidated net financial position of the "Holdings System" is composed as follows:

	12/31/2005			12/31/2004		
€ in millions	Current	Non-current	Total	Current	Non-current	Total
Securities	792.7	0.0	792.7	1,047.9	0.0	1,047.9
Receivables and other assets	0.0	0.0	0.0	252.4	0.0	252.4
Cash and cash equivalents	4.2	0.0	4.2	4.2	0.0	4.2
Total financial assets	796.9	0.0	796.9	1,304.5	0.0	1,304.5
IFIL 2002/2005 bonds	0.0	0.0	0.0	(200.7)	0.0	(200.7)
IFIL 2003/2006 bonds	(99.7)	0.0	(99.7)	0.0	(99.9)	(99.9)
Bank debt and other financial payables	(348.9)	0.0	(348.9)	(323.9)	0.0	(323.9)
Total financial liabilities	(448.6)	0.0	(448.6)	(524.6)	(99.9)	(624.5)
Consolidated net financial position of the "Holdings System"	348.3	0.0	348.3	779.9	(99.9)	680.0

At December 31, 2005, IFIL S.p.A. has irrevocable credit lines for € 570 million due after December 31, 2006.

The negative change of € 331.7 million compared to the balance at the end of 2004 is due to the following flows:

€ in millions		
Consolidated net financial position of the "Holdings System" at December 31, 2004		680.0
Investments		
- Purchase of Fiat ordinary shares (8.03% of the class of stock)	(580.2)	
- Purchase of Sanpaolo IMI ordinary shares (1.43% of the current ordinary capital stock)	(263.5)	
- Net investment in Turismo&Immobiliare (25% of capital stock)	(4.1)	
Investments		(847.8)
Sales		
- Net proceeds on the sale of the investment in La Rinascente	529.1	
- Sale of Juventus Football Club shares (1.69% of capital stock)	2.8	
Sales		531.9
Dividends received from:		
- Sanpaolo IMI	43.7	
- Sequana Capital	22.4	
- La Rinascente	0.5	
Dividends received		66.6
Net financial income		2.0
Net general expenses		(32.1) (a)
Other changes:		
- Dividends paid by IFIL S.p.A.	(73.2) (b)	
- Purchase of IFIL ordinary shares (0.06% of the class of stock)	(2.1)	
- Sale of receivables from the tax authorities to subsidiaries and the parent	3.6	
- IFIL S.p.A. capital stock increase as a result of the exercise of stock options	1.4	
- Other, net	18.0	
Other changes		(52.3)
Net change during the year		(331.7)
Consolidated net financial position of the "Holdings System" at December 31, 2005		348.3

(a) Excluding the extraordinary compensation not yet paid to the Chairman for € 9 million.
(b) Net of intragroup dividends of € 0.1 million.

On October 26, 2005, following the investment in Fiat and less diversification of the portfolio as a result, Standard & Poor's downgraded its rating of IFIL's long-term debt from "A-" to "BBB+" and confirmed its rating of short-term debt in "A-2", with a stable outlook.

The following table presents a reconciliation of the condensed consolidated data and the IFIL Group consolidated financial statements prepared in accordance with IFRS.

The first column ("Condensed consolidation") presents the data that has been commented on in the preceding pages reclassified according to the consolidated financial statement format.

The second column ("Eliminations - operating subsidiaries") shows the adjustments necessary to reverse the carrying amount of the investments in the operating subsidiaries (accounted for in the condensed financial statements by the equity method) and the share of the results of these companies in order to arrive at the line-by-line consolidation of the respective financial statements, adjusted, if necessary, to conform with Group principles, which are shown in the next columns.

IFIL S.p.A. - REVIEW OF THE RESULTS OF THE STATUTORY FINANCIAL STATEMENTS

The statutory financial statements of IFIL S.p.A. for the year ended December 31, 2005 have been prepared in accordance with the provisions of the Italian Civil Code.

The company has the obligation of adopting International Financial Reporting Standards (IFRS) starting from the year ending December 31, 2006. Additional information is provided under "Transition to International Financial Reporting Standards (IFRS) by IFIL S.p.A.".

The net income of IFIL S.p.A. for the year 2005 is € 98.8 million, with an increase of € 18.6 million (+23.2%) compared to € 80.2 million in 2004.

The condensed income statement and balance sheet and comments on the most important items are presented below.

IFIL S.p.A. – Income statement – condensed

€ in millions	Note	2005	2004	Change

Total liabilities and stockholders' equity		3,704.0	100.0	3,832.2	100.0	(128.2)

1. Dividends

Dividends amount to € 154.4 million (€ 301.4 million in 2004). The reduction of € 147 million is due to lower dividends received in total from the subsidiaries Ifil Investissements and Ifil Investment Holding (-€ 163.3 million) and higher dividends relating to the investment in Sanpaolo IMI (+€ 16.3 million).

2. Gains

Gains (€ 2.6 million) arose from the sale of 2,044,748 Juventus Football Club shares (1.69% of capital stock).

3. Financial expenses, net

Financial expenses, net, totaling € 21.5 million, show a reduction of € 4.6 million compared to 2004 (€ 26.1 million) due mainly to lower debt during the course of the first nine months of the year.

4. General expenses, net

General expenses, net, show an increase from € 13.4 million to € 15.6 million. The increase is principally due to higher personnel costs (+€ 1.2 million as a result of the payment of nonrecurring bonuses to some employees for their work in connection with extraordinary transactions), consulting (+€ 0.5 million) and other expenses (+€ 0.5 million).

5. Other expenses, net

Other expenses, net, totaling € 21.1 million, include extraordinary compensation approved for the Chairman and President (€ 15 million) and the former Chief Executive Officer (€ 3.8 million) at the Board of Directors' Meetings held, respectively, on June 9, 2005 and on November 11, 2005), amortization of the expenses relating to the capital increases in 2003 (€ 2.2 million) and expenses connected with pending litigation (€ 0.1 million).

6. Income taxes

As regards income taxes, the taxable income calculated in accordance with tax laws did not generate current income taxes for the year 2005.

7. Financial fixed assets

€ in millions	12/31/2005	12/31/2004	Change
Subsidiaries			
Fiat S.p.A. (ordinary shares)	2,020.0	1,440.2	579.8
Fiat S.p.A. (ordinary share warrants 2007)	2.5	2.5	0.0
Fiat S.p.A. (preferred shares)	123.0	123.0	0.0
	2,145.5	1,565.7	579.8
Ifil Investissements S.A.	641.5	1,260.3	(618.8)
Ifil Investment Holding N.V.	68.3	162.8	(94.5)
Juventus Football Club S.p.A.	11.3	11.6	(0.3)
Soiem S.p.A.	12.7	12.7	0.0
Ifil New Business S.r.l.	-	-	0.0
	2,879.3	3,013.1	(133.8)
Other companies - Sanpaolo IMI S.p.A. (ordinary shares)	726.7	463.2	263.5
Total investments	3,606.0	3,476.3	129.7
Treasury stock - IFIL ordinary shares	43.8	41.7	2.1
Total financial fixed assets	3,649.8	3,518.0	131.8

The net increase of € 131.8 million in financial fixed assets is due to the following movements:

€ in millions	
Financial fixed assets at December 31, 2004	**3,518.0**
Purchase of 87,750,000 Fiat ordinary shares (8.03% of the class of stock)	580.2
Purchase of 22,700,000 Sanpaolo IMI ordinary shares (1.43% of current ordinary capital stock)	263.5
Purchase of 630,306 IFIL ordinary shares (0.06% of the class of stock)	2.1
Partial reimbursement of additional paid-in capital by Ifil Investissements (-€ 618.8 million) and Ifil Investment Holding (-€ 94.5 million)	(713.3)
Sale of the rights on the Fiat S.p.A. capital increase	(0.4)
Sale of 1.69% of Juventus Football Club capital stock	(0.3)
Net change during the year	**131.8**
Financial fixed assets at December 31, 2005	**3,649.8**

A comparison between the carrying amounts and the market prices of listed financial fixed assets shows the following unrealized gains (losses):

€ in millions	Fiat ord. shares	Fiat ord. share warrants 2007	Fiat pref. shares	Sanpaolo IMI shares	Juventus shares	IFIL ord. shares	Total
Market price at December 30, 2005	387.7	1.0	61.6	502.0	87.3	(1.5)	1,038.1
Average market price in the second half 2005	311.2	1.4	67.6	423.6	89.2	(1.7)	891.3
Average market price March 24, 2006, update	1,265.7	(0.5)	123.7	692.6	102.0	11.2	2,194.7

8. Stockholders' equity

At December 31, 2005, stockholders' equity is € 3,231.8 million (€ 3,204.9 million at December 31, 2004). The positive change of € 26.9 million is due to the following movements:

€ in millions	
Stockholders' equity at December 31, 2004	**3,204.9**
Dividends paid out	(73.3)
Increase in capital stock as a result of stock options	1.4
Net income for the year 2005	98.8
Net change during the year	**26.9**
Stockholders' equity at December 31, 2005	**3,231.8**

9. Net financial position

The net financial position of IFIL S.p.A. at December 31, 2005 shows a net debt position of € 449.5 million (a net debt position of € 367.5 million at the end of 2004). Details are as follows:

€ in millions	12/31/2005	12/31/2004	Change
Receivables for dividends to be received	0.0	253.6	(253.6)
Cash	0.2	0.1	0.1
Bonds	(100.0)	(300.0)	200.0

Financial accrued expenses	(1.1)	(2.6)	1.5
Net financial position	**(449.5)**	**(367.5)**	**(82.0)**

At December 31, 2005, IFIL S.p.A. has irrevocable credit lines for € 570 million due after December 31, 2006.

The negative change of € 82 million in 2005 is due to the following cash flows:

€ in millions	
Net financial position at December 31, 2004	(367.5)
Purchase of Fiat ordinary shares (8.03% of the class of stock)	(580.2)
Purchase of Sanpaolo IMI ordinary shares (1.43% of current ordinary capital stock)	(263.5)
Purchase of IFIL ordinary shares (0.06% of the class of stock)	(2.1)
Partial reimbursements of additional paid-in capital by Ifil Investissements (+€ 618.8 million) and Ifil Investment Holding (+€ 94.5 million)	713.3
Sale of Juventus Football Club shares (1.69% of capital stock)	2.8
Dividends from holdings	154.4
Dividends paid out	(73.3)
Financial expenses, net	(21.5)
General expenses, net	(15.6)
Increase in capital stock as a result of the exercise of stock options	1.4
Sale of receivables from the tax authorities to subsidiaries and the parent, IFI	3.6
Other changes, net	(1.3)
Net change during the year	(82.0)
Net financial position at December 31, 2005	(449.5)

TRANSITION TO INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) BY IFIL S.p.A.

As a result of the implementation of European Regulation No. 1606 of July 19, 2002, the IFIL Group has adopted International Financial Reporting Standards (IFRS) for the preparation of its consolidated financial statements with effect from 2005. On the basis of Italian law implementing this regulation, the statutory financial statements of the parent, IFIL S.p.A., will be prepared in accordance with these standards starting from 2006.
As a consequence, IFIL S.p.A. is currently making the transition to IFRS for its statutory financial statements and will report its 2006 first-half results and 2005 comparative figures in accordance with IFRS.

The following commentary describes the policies that IFIL S.p.A. has adopted in preparing its IFRS opening balance sheet at January 1, 2005, as well as the main differences in relation to Italian GAAP used to prepare its statutory financial statements up until December 31, 2005.

As part of this transition program, the opening balance sheet of IFIL S.p.A. at January 1, 2005 will be prepared in accordance with IFRS 1 – First-time Adoption of International Financial Reporting Standards, on the basis of the IFRS applicable from January 1, 2006, as published at December 31, 2005. In particular, the amendments to IAS 39 and IFRS 4 issued in 2005 and effective from January 1, 2006 will be applied, with regard to the measurement and recognition of financial guarantee contracts in the financial statements of the guarantor and the limitation in the use of the “fair value option” to financial instruments satisfying specific conditions.

As allowed by the amendment to IAS 19 – Employee benefits, issued by the IASB in December 2004, the company elected to recognize actuarial gains and losses immediately in the period in which they occur, outside the income statement, in a specific item of equity.

FIRST-TIME ADOPTION OF IFRS

In accordance with IFRS 1, IFIL S.p.A. is required to apply the accounting standards in force at the reporting date for its first IFRS financial statements retrospectively to all periods presented and to the opening balance sheet, except for one permitted exemption adopted, as allowed by IFRS 1, and described in the following paragraph.

The opening IFRS balance sheet at January 1, 2005 will therefore reflect the following differences with the statutory balance sheet prepared at December 31, 2004 in accordance with Italian GAAP:

- all assets and liabilities qualifying for recognition under IFRS, including assets and liabilities that were not recognized under Italian GAAP, will be recognized and measured in accordance with IFRS;
- all assets and liabilities recognized under Italian GAAP that do not qualify for recognition under IFRS will be eliminated;
- certain balance sheet items will be reclassified in accordance with IFRS.

The impact of these adjustments will be recognized directly in opening equity at January 1, 2005, the date of transition to IFRS.

In summary, the assets and liabilities to be included in the statutory financial statements of IFIL S.p.A. prepared in accordance with IFRS will be recognized and measured in the same manner as that used to prepare the financial statements drafted for inclusion in the Group’s consolidated financial statements, in accordance with IFRS 1, with the exception of consolidation entries.

OPTIONAL EXEMPTION ADOPTED BY IFIL S.p.A.

Employee benefits: IFIL S.p.A. has elected to recognize all cumulative actuarial gains and losses that existed at January 1, 2005 with a contra-entry to equity reserves.

DESCRIPTION OF THE MAIN DIFFERENCES BETWEEN ITALIAN GAAP AND IFRS

The following paragraphs provide a description of the main differences between Italian GAAP and IFRS that will have effect on the statutory financial statements of IFIL S.p.A.

Write-off of deferred costs

Under Italian GAAP, IFIL S.p.A. defers and amortizes certain costs (mainly start-up and expansion costs). IFRS require these to be expensed when incurred.

In particular, costs incurred in connection with capital stock increases which are deferred and amortized under Italian GAAP are deducted directly from the proceeds of the increase and debited to equity under IFRS.

Valuation of investments not held as current assets

In the financial statements of IFIL S.p.A. prepared in accordance with Italian GAAP, equity investments included under financial fixed assets (investments in subsidiaries and in other companies) are stated at historical cost inclusive of incidental charges determined using the Last-In First-Out method of annual lots, which is written down in the event of an impairment loss; the impairment loss is reversed if in subsequent years the reasons for the writedown no longer apply.

IAS 27 requires that investments in subsidiaries be either recorded at cost, using the “average cost” method or at their fair value. If there are reasons to believe that all or part of the cost cannot be recovered, the carrying amount must be reduced to the recoverable amount of the investment in accordance with IAS 36. If this loss is subsequently reduced or is entirely recovered, the carrying amount is increased back up to the newly estimated recoverable amount, which may not exceed the amount that would have been determined if no impairment loss had been recorded. Any restoration of the carrying amount is recorded immediately in the income statement.
The analysis of the effects of the adoption of these methods is currently being examined.

In accordance with IAS 39, investments in other companies represented by available-for-sale financial assets, are measured at their fair value, if this can be determined, and the gains and losses resulting from changes in the fair value are recognized directly in equity until the financial assets are disposed of or determined to be impaired. At that time, all gains and losses previously recognized in equity are included in the income statement for the period.
The investment held by IFIL S.p.A. in Sanpaolo IMI S.p.A. satisfies these requirements, with its fair value being determined as its stock market price at the date of the financial statements. The adoption of IFRS on January 1, 2005 will therefore lead to the recognition of the excess of the stock market price of the investment over its carrying amount at that date, with a net positive impact on equity.

Treasury stock

In accordance with Italian GAAP, IFIL S.p.A. accounts for treasury stock as an asset and records any related value adjustments and gains or losses on disposal in the income statement.

Under IFRS, treasury stock is deducted from equity and all movements in treasury stock are recorded in equity rather than in the income statement.

Sale of receivables

IFIL S.p.A. could sell a part of its trade and tax receivables through factoring transactions which may be with or without recourse to the seller; certain factoring agreements without recourse include deferred purchase price clauses (i.e. the payment of a minority portion of the purchase price is conditional upon the full collection of the receivables), and require a first loss guarantee of the seller up to a limited amount or imply a continuing significant exposure to the cash flows from receivables sold.

Under Italian GAAP, all receivables sold through factoring transactions (both with and without recourse) can be derecognized.

IAS 39 permits the derecognition from assets of a financial asset when, and only when, the risks and rewards of the ownership of the assets are substantially transferred: consequently, all receivables sold with recourse, and part of those sold without recourse, would be reinstated in the IFRS balance sheet.

Employee benefits

Employee severance indemnities (TFR), under Italian GAAP, are accounted for pursuant to specific statutory rules. As set forth in IAS 19 – Employee Benefits, employee severance indemnities are considered defined benefit obligations, and, as a result, are recalculated using the "Projected Unit Credit Method".

IFIL S.p.A. also grants employees various forms of benefits (retirement incentives, compensation and defined benefit and defined contribution pension plans) under supplemental company or individual agreements. Although these benefits are accrued in the statutory financial statements in a manner that is consistent with Italian GAAP, under IFRS they will need to be accounted for in accordance with IAS 19.

IFIL S.p.A. has elected to recognize all accumulated actuarial gains and losses at January 1, 2005 as movements in equity.

Stock options

No expenses are recognized for share-based payment transactions under Italian GAAP.

In accordance with IFRS 2 – Share-based payment, the full fair value amount of stock options at the grant date is reflected in the income statement on a straight-line basis over the period from the grant date to the vesting date, with the contra-entry recognized directly in equity. Changes in fair value after the grant date have no impact on the initial measurement.

IFIL S.p.A. will apply the transitional provisions stated in IFRS 2 and therefore will apply this standard to all stock options granted after November 7, 2002 and not yet vested at January 1, 2005, the effective date of IFRS 2. No compensation expense is required to be recognized for stock options granted prior to November 7, 2002.

Recognition and measurement of financial receivables and financial payables

Financial receivables can be immediately converted into cash and are subject to an insignificant risk of change in value. The transition to IFRS will not impact their amount.

Financial payables at January 1, 2005 are principally related to bonds and bank debt. In the statutory financial statements of IFIL S.p.A., under Italian GAAP, the gross amount received is recognized. The various fees owed to the lending banks (for the organization of the facility, for the share subscription commitment, etc.) at different dates (at the beginning, over the years, and upon maturity) are charged against income over the term of the facility (on a pro-rated basis).

Under IFRS, financial payables are recognized at the amounts received stated net of transaction costs and are subsequently measured at their amortized cost using the effective interest method. Adoption of IFRS will thus entail recomputation of the expenses charged to income for the various years affected, with a net effect on equity at January 1, 2005.

Recognition and measurement of derivatives

Those transactions which, according to IFIL S.p.A.'s policy for risk management, are able to satisfy the conditions stated by the accounting principle for hedge accounting treatment, are designated as hedging transactions; other transactions which do not satisfy such conditions, although set up for the purpose of managing risk exposure (inasmuch as speculative transactions are not permitted as a rule), are designated as trading transactions.

The transactions put into place by IFIL S.p.A. up to December 31, 2005 fall under the financial instruments designated as hedging instruments.

Under Italian GAAP, the instrument is valued symmetrically with the underlying hedged item. Therefore, where the hedged item has not been adjusted to fair value in the financial statements, the hedging instrument has also not been adjusted. Similarly, where the hedged item has not yet been recorded in the financial statements (hedging of future flows), the valuation of the hedging instrument at fair value is deferred.

Under IFRS, in the case of a cash flow hedge (hedging of future flows), the portion of gain or loss on the hedging instrument that is determined to be an effective hedge is recognized directly in equity; the ineffective portion of the gain or loss is recognized in the income statement. Consequently, with reference to the effective portion, only a difference in equity will arise between Italian GAAP and IFRS.

RELATED PARTY DISCLOSURES

The Board of Directors has adopted principles of conduct for carrying out transactions with related parties (available on the corporate website of the company: http://www.ifil.it).

These principles of conduct state that the Board of Directors must approve the following transactions:

- atypical and/or unusual intragroup transactions, meaning transactions which, because of their significance and/or relevance, nature of the counterparties, subject of the transaction (also in relation to transactions of ordinary administration), manner of determining the transfer price and timing of the event (close to the end of the year) may give rise to reservations about: the correctness and/or completeness of the information in the financial statements, conflicts of interest, safeguarding of the company's assets and protection of minority stockholders;
- transactions with subsidiaries for amounts of more than 1% of IFIL's portfolio value as shown in the most recent approved accounting documents (quarterly reports, first-half report and annual financial statements) as of the date of the transaction, with the exception of transactions with subsidiaries in the "Holdings System";
- transactions with other related parties for amounts of more than € 3 million.

The bodies with delegated powers shall supply the Board with information concerning such transactions especially with regard to the nature of the relationship, the manner of execution, the economic terms and timing, the valuation criteria adopted and any risks to the company.

Whenever a director has an interest in the transaction (even a potential interest), pursuant to art. 2391 of the Italian Civil Code, the nature, terms, origin and import scope of such interest must be duly communicated to the Board of Directors and the Board of Statutory Auditors.

In the event the nature, the amount and the manner of execution of the transaction with a related party require it, the Board of Directors can avail itself of the assistance of one or more independent experts, chosen from among individuals with recognized professional characteristics and expertise on the matter in question so that an opinion can be obtained on the economic terms of the transaction and its legitimacy, as well as the technical means and manner of execution of the transaction.
The Board of Directors and the Board of Statutory Auditors must in any case be informed of any transactions with other related parties different from those mentioned above.

The identification of relationships and transactions with related parties is made in accordance with IAS 24.

With regard to 2005, transactions among IFIL and the identified related parties have been entered into in conformity with the provisions of existing laws, based upon an evaluation of reciprocal economic gain.

The most important transactions can be summarized as follows:

- purchase of 82,250,000 Fiat ordinary shares for a total of € 534.6 million (€ 6.5 per share) from Exor Group on September 20, 2005;
- services rendered to the parent, IFI, and to subsidiaries and cost recoveries;
- services rendered by the parent, IFI, and by the subsidiary Soiem;
- partial reimbursement of additional paid-in capital by Ifil Investissements for € 618.8 million and Ifil Investment Holding for € 94.5 million;
- sale of tax receivables to the parent, IFI, for € 0.4 million, to the subsidiary Soiem for € 0.2 million and to Italian subsidiaries of Alpitour for € 3 million;
- purchase of trade receivables with recourse from Juventus Football Club for € 17.6 million, at the end of March 2005, with a nominal amount of € 18 million, due from Sky Italia, received in December 2005;
- services rendered to Ifil USA by Exor USA and Fiat USA.

The effects on the balance sheet and the income statement of transactions among IFIL S.p.A., Group companies and other related parties can be summarized as follows:

	12/31/2005		2005	
€ in thousands	Receivables	Payables	Income	Expenses
IFI S.p.A.	23	13	80	30
Holdings System companies	45	467	49	1,468
Alpitour Group companies	4	3	20	101
Fiat Group companies	-	25	92	350
Juventus Football Club S.p.A. and Campi di Vinovo S.p.A.	10	-	459	38
Sequana Capital S.A.	30	-	47	-
Total	112	508	747	1,987

In an effort to optimize the management of the financial resources of the Group, loans were made among foreign companies in the Holdings System during the year.

During the course of the year, the director Franzo Grande Stevens rendered professional services to IFIL for € 141 thousand and to Fiat S.p.A. for € 940 thousand (activities performed in his capacity as Secretary to the Board of Directors).

Additional information and details are disclosed under "Major events in 2005" in the Directors' Report on Operations, in the "Notes to the statutory financial statements of IFIL S.p.A." and in the "Notes to the consolidated financial statements".

On the basis of information received from the companies of the Group, there are no atypical or unusual transactions to report.

STOCK OPTION PLANS

Stock option plans approved by the Board of Directors of IFIL S.p.A. as well as those approved by the subsidiaries which concern directors of IFIL S.p.A. are described below.
The Notes to the consolidated financial statements at December 31, 2005 also describe the stock option plans approved by the subsidiaries that are consolidated line-by-line.

Stock option plans on IFIL shares

In May 2000, the IFIL Board of Directors approved a stock option plan for the directors and managers of IFIL and the parent, IFI, for a maximum of 2,700,000 new IFIL ordinary shares.
A total of 2,691,500 option rights were granted under this plan between 2000 and 2003, according to the level of responsibility held by the grantees in the corporate organization. Such options are exercisable up to December 31, 2006.
Under the power conferred by the Stockholders' Meeting held on May 25, 2001, the Board of Directors, on February 7, 2005, voted to increase capital stock as a result of the exercise of 800,000 rights granted in 2003 to seven beneficiaries. The stock increase took place in April with the issue of 800,000 IFIL ordinary shares (0.07% of capital stock) of par value € 1, which were subscribed in cash at a per unit price of € 1.85 for a total of € 1,480,000.
In 2005, moreover, 53,250 options became null and void.

In September 2003, the IFIL Board of Directors approved a second stock option plan solely for the directors, for a maximum of 700,000 IFIL ordinary shares, already issued and purchased by IFIL pursuant to article 2357 and subsequent articles of the Italian Civil Code. A total of 532,000 option rights were granted under this plan in 2003 to the Chairman Gianluigi Gabetti for the same number of ordinary shares exercisable by December 31, 2006 at the price of € 2.28 each.

With regard to these plans, there were no transactions entered into to favor either the purchase or subscription of shares pursuant to art. 2358, paragraph 3, of the Italian Civil Code.

A summary of the stock option plans on IFIL shares outstanding at December 31, 2005 is presented below.

	Number of options	Number of grantees	Exercise price actual (b)	Exercise price average	Market price (c)
IFIL 2000 Plan (expiring December 2006)					
Options granted (a)					
- year 2000	522,000	15	6.997		
- year 2001	506,000	13	6.109		
- year 2002	810,250	13	4.520		
	1,838,250 (d)			5.66	4.686
IFIL 2003 Plan (expiring December 2006)					
Options granted	532,000 (e)	1	2.280	2.28	4.686
Options exercisable at December 31, 2005	2,370,250			4.90	4.686

(a) Net of 800,000 options exercised and 53,250 that became null and void in 2005.
(b) Exercise price adjusted to take into account the cash capital stock increase in July 2003.
(c) Market price at March 24, 2006.
(d) Equal to 0.18% of current ordinary capital stock.
(e) Equal to 0.05% of current ordinary capital stock.

Stock option plans on Alpitour shares

On December 15, 2005, in execution of the resolution passed by the Board of Directors' Meeting held on November 11, 2005, the Executive Committee of IFIL S.p.A. approved a stock option plan for two managers of the Alpitour Group designed to promote their loyalty to the IFIL Group and provide an incentive to develop and appreciate the investments of the IFIL Group in the tourism sector.

The plan calls for purchase options on Alpitour shares to be granted to the Chairman and Chief Executive Officer, D.J. Winteler, and the General Manager, F. Prete, respectively, equal to 6% (now 2,127,000 shares) and 5% (now 1,772,500 shares) of Alpitour's capital, held by the subsidiary Ifil Investissements.

After approval on the part of IFIL, the Alpitour Board of Directors may in the future grant purchase options on Alpitour shares equal to 4% (now 1,418,000) of Alpitour's capital, to other managers who hold important operating positions.

The purchase options may be exercised, at one or more times, during the period between the dates of the approval of the 2006/2007 and 2008/2009 Alpitour financial statements at the price of € 2.238 per share, corresponding to the valuation of the Alpitour Group, equal to € 79.4 million, performed in December 2005 by a specially appointed expert.

IFIL and the managers of Alpitour, finally, exchanged reciprocal purchase and sale options, exercisable during the same above period, on Alpitour shares that will have been purchased by the same managers; the exercise price will be established on the basis of the appraisal which will be performed using the same valuation principles applied in December 2005.

Options granted to directors of IFIL S.p.A. on the part of subsidiaries

On May 3, 2005, under the stock option plan approved by the subsidiary Sequana Capital, 250,000 options were granted to Tiberto Brandolini d'Adda. Such options are valid for the subscription or purchase of the same number of Sequana Capital shares at the price per share of € 23.5 during the period May 2009 to May 2013.

On December 15, 2000, under the stock option plan approved by the subsidiary Alpitour S.p.A., 614,000 options were granted to Luigi Arnaudo, a former director of IFIL S.p.A. Such options are valid for the subscription of the same number of Alpitour shares at a price per share of € 6.73. Such options can be exercised up to the end of August 2006. The Alpitour shares that come from the plan may be sold to Alpitour; however, the price established by the Board of Directors of the company is a negative figure due to the results reported by the Alpitour Group in 2005.

EQUITY INVESTMENTS HELD BY DIRECTORS, STATUTORY AUDITORS AND GENERAL MANAGER

(Art. 79 of Consob resolution No. 11971 dated May 14, 1999 and subsequent amendments)

		Number of shares			
Name	Company	Held at 12/31/2004	Increase	Decrease	Held at 12/31/2005
Gabetti Gianluigi	IFIL ordinary shares (a)	120,000			120,000
	Sequana Capital (a)	1	10 (e)		11
Winteler Daniel John	IFIL ordinary shares (a)	0	440,000 (c)	(440,000)	0
Brandolini d'Adda Tiberto	Sequana Capital (a)	88			88
Ferrero Ventimiglia Edoardo	Fiat ordinary shares (a)	0	20,000	(20,000)	0
Lombardi Giancarlo	IFIL ordinary shares (a)	12,650			12,650
Marocco Antonio Maria	IFIL ordinary shares (a)	73,369			73,369
Teodorani-Fabbri Pio	IFIL ordinary shares (a)	200,000		(110,000)	90,000
	IFIL ordinary shares (b)	500,000		(281,000)	219,000
	Fiat ordinary shares (b)	6,583			6,583
	Fiat ord. share warrants 2007 (b)	825			825
	Fiat savings shares (b)	5,720			5,720
	CNH ordinary shares (b)	0	10,000	(10,000)	0
Statutory Auditors in office					
Ferrero Cesare	Fiat ordinary shares (a)	1			1
Giorgi Giorgio	Fiat savings shares (b)	1,500 (d)		(1,500)	0
Piccatti Paolo	Juventus F.C. (a)	540 (d)			540
Statutory Auditors no longer in office at 12/31/2005					
Girolamo Natale Ignazio	IFIL ordinary shares (b)	10,625			10,625

(a) Direct holding.
(b) Indirect holding through spouse.
(c) Share from the exercise of stock options.
(d) Held at the date of appointment (June 27, 2005).
(e) Purchase made by a stock loan contract.

PENDING LITIGATION

An update is provided below on the litigation pending against IFIL S.p.A. and the subsidiaries of the "Holdings System".
Additional information on disputes regarding the companies consolidated line-by-line are presented in the Notes to the consolidated financial statements at December 31, 2005.

By notification on May 8, 2003, inferring illegal acts due to a conflict of interest and the unlawful valuation of the contributions in kind, the stockholder K Capital contested the resolution to increase IFIL's capital stock reserved for Istituto Finanziario Industriale S.p.A. passed by the Extraordinary Stockholders' Meeting of IFIL held on April 23, 2003 and sought compensation from IFIL for (alleged) damages (economic and non-economic) suffered as a result of the unlawful conduct (allegedly) by IFI. During the case and with reference only to (alleged) economic damages, K Capital stated its request for compensation (which originally had not been quantified) in approximately € 17 million.
The preliminary investigation stage is, currently, concluded. The judge chose not to call for an assessment of the case (CTU), requested by K Capital, which nevertheless could be decided by the Board of Judges during the decision stage. On October 26, 2005, the hearing was held for stating the conclusions. After the exchange of the concluding statements (completed in January 2006) and after the oral discussion in court (held on March 10, 2006), a decision in the case will now be reached.
Both of the above requests by K Capital (request to declare the stockholders' resolution null and void and the request to seek a sum of compensation for damages) appear to be inadmissible and without grounds and therefore at this time the company does not believe that any contingent liabilities will arise as a consequence.

Earlier, the appeal filed under ex article 2378, paragraph 4, of the Italian Civil Code by which the stockholder K Capital had sought the suspension of the execution of the resolution was denied by the Turin Court, by decree filed on June 9, 2003.

Following the communication dated June 17, 2005, the buyer of the investment in La Rinascente, on February 14, 2006, filed for arbitration against Ifil Investissements seeking compensation for an amount of approximately € 32.5 million (in addition to interest, monetary revaluation, court expenses and legal fees) for extraordinary expenses relating to certain points of sale.
In the opinion of Ifil Investissements, the requests are not valid and unacceptable and, in any case, completely unfounded. Moreover, the question that is raised regards aspects that have either been excluded or are not covered by guarantees in the contract.
Furthermore, in the second half of 2005 and during the first few months of 2006, the same party brought actions seeking additional compensation from Ifil Investissements for a total amount of approximately € 16 million principally in connection with accounting treatments in the financial statements at December 31, 2004.
Some minor requests have already been agreed between the parties, whereas the others have been rejected inasmuch as they are not valid and/or unfounded. In any case, in the opinion of Ifil Investissements, such requests are nevertheless covered by exclusions and limitations in the contract with regard to the obligations of compensation.

OTHER INFORMATION

Management and coordination

IFIL Investments S.p.A. is not subject to management and coordination on the part of companies or entities.
In accordance with art. 2497 bis of the Italian Civil Code, the subsidiaries Soiem S.p.A. and Ifil New Business S.r.l. have identified IFIL Investments S.p.A. as the company which exercises management and coordination.

Programming document on security

The company has prepared the programming document on security on December 14, 2005 for the year 2005 according to the provisions of Legislative Decree No. 196 dated June 30, 2003, Attachment B – technical specifications regarding minimum safety measures. The document has been drawn up by the person responsible for the treatment of the data.

SIGNIFICANT EVENTS SUBSEQUENT TO THE END OF THE YEAR

Investigations by Consob and the Judicial Authorities

On February 21, 2006, Consob notified IFIL S.p.A. of its objections under art. 187-septies of Legislative Decree No. 58/1998 in relation to the content of the press release dated August 24, 2005.

Analogous objections were also notified to Giovanni Agnelli e C. S.a.p.az. regarding the content of its press release on the same date.

Furthermore, Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone received notification of the objection regarding the violation of art. 187-ter of Legislative Decree No. 58/1998, with Consob assuming that each of those individuals participated in the decisional process relating to the above press releases.

Exor Group S.A. and its legal representatives, instead, received notification of the violation of the obligations of communication as regards significant investments under art. 120 of Legislative Decree No. 58/1998 beginning with Consob's notice from August 30, 2005.

It is the intention of the parties which received the notifications from Consob to lodge their objections in accordance with the law and take advantage of every other opportunity of defense.

On March 9, 2006, the company's offices were searched under the orders of the Turin district attorney's office with regard to the same facts raised in the objections by Consob. At the same time, IFIL was notified of the inquiry into its administrative responsibility under Legislative Decree No. 231/2001.

Other significant events

Having taken note that on December 15, 2005 Daniel John Winteler tendered his resignation as the Chief Executive Officer and General Manager of IFIL to take up the posts of Chairman and Chief Executive Officer of the subsidiary Alpitour, as well as the resignation tendered by the independent director Pietro Ferrero owing to his numerous and mounting professional commitments, in the meeting of February 7, 2006, the IFIL Board of Directors co-opted Carlo Barel di Sant'Albano, also appointing him as the Chief Executive Officer and General Manager of the company. Carlo Barel di Sant'Albano was also appointed a member of the Executive Committee.

At the same time, Gianluigi Gabetti relinquished the post of President of IFIL but kept that of Chairman.

Tiberto Brandolini d'Adda and John Elkann, both members of the Executive Committee, were appointed Vice Chairmen of IFIL with the specific mandate to cooperate with the Chief Executive Officer in identifying and evaluating new investment projects.

The independent director Giuseppe Recchi was appointed a member of the Compensation and Nominating Committee to replace the resigning director Pietro Ferrero.

BUSINESS OUTLOOK

For the year 2006, IFIL S.p.A. is expected to report a profit.

On a consolidated level, considering the forecasts formulated by the major holdings (discussed later in the report), the IFIL Group expects to show a profit in 2006, although lower than the profit reported in 2005, which was the highest in the Group's history.

Fiat Group

The Fiat Group confirms its targets for 2006: a positive operating cash flow, trading profit between € 1.6 billion and € 1.8 billion and net income of about € 700 million.

The Fiat Group also announced that it will continue to implement its targeted alliances in order to reduce capital commitments and share investments and risks.

Sequana Capital Group

During the first two months of 2006, the paper sector continues to be plagued by difficulties which leave no room for signs of a recovery at this time. The first-quarter 2006 results of the two subsidiaries operating in that sector (ArjoWiggins and Antalis) will be influenced by these factors.

For ArjoWiggins, 2006 will be a year of transformation after formulating a new three-year strategic plan which should become operational starting from the second half.

For Antalis, higher profitability is still the target while seeking to seize new opportunities for external growth.

SGS, finally, has announced an ambitious three-year plan both to increase business and results.

Considering the results and the balance sheet structure at the end of 2005, Sequana Capital has the means necessary to capitalize on new potentials for internal and external growth.

Alpitour Group

The Alpitour Group believes that the conditions exist to reverse the trend and report positive results for 2005/2006.

Juventus Football Club

The result for the year could be significantly influenced by the results during the soccer season, in particular, by the results achieved by the First Team in the U.E.F.A. Champions League.

However, considering the operating and balance sheet situation during the first six months of the financial year and the information available to date, the full year 2005/2006 could show a positive net result on condition that the extraordinary transactions referring to assets, currently under review, are finalized.

REVIEW OF THE OPERATING PERFORMANCE BY THE MAJOR GROUP COMPANIES

(30.06% of ordinary capital stock and 30.09% of preferred capital stock)

2005 marks a turning point for the Fiat Group, which reported a consolidated net income of € 1.3 billion and, in the last quarter, Fiat Auto posted a trading profit of € 21 million, after 17 consecutive quarters of losses. Net industrial debt was drastically cut and debt ratings improved, new models were launched across all brands, central activities were reorganized and processes were streamlined and, finally, important targeted industrial alliances were sealed with major international partners.

The key consolidated highlights of the Fiat Group in 2005 are the following:

			Change	
€ in millions	2005	2004 (a)	Amount	%
Net revenues	46,544	45,637	+907	+2.0%
Operating result	2,215	(585)	+2,800	n.s.
Income/(loss) before taxes	2,264	(1,629)	+3,893	n.s.
Group interest in net income/(loss)	1,331	(1,634)	+2,965	n.s.
Investments in tangible and intangible assets and R&D expenses	4,610	4,706	-96	-2.0%
Total assets	62,454	62,522	-68	-0.1%
Net debt	18,523	25,423	-6,900	-27.1%
Group interest in stockholders' equity	8,681	4,304	+4,377	+101.7%
Employees (number)	173,695	161,066	+12,629	+7.8%

(a) The comparative data for 2004 has been restated by the Fiat Group in accordance with the accounting standards IFRS, effective January 1, 2005.

The Fiat Group records **net revenues** of € 46,544 million in 2005, up 2% from 2004. All industrial Sectors (Automobile, Agricultural and Construction Equipment, Commercial Vehicles, Components and Production Systems) posted improvements, apart from a slight decrease (0.8%) at Fiat Auto in the first nine months of 2005, when sales slowed down ahead of new model launches. Other Businesses (Publishing and Communications, and in particular, Services and Holding companies, Other companies and Eliminations) report a decrease in net revenues of approximately € 400 million in 2005 compared to 2004.

The **operating result** of the Fiat Group is an operating income totaling € 2,215 million in 2005, compared to a loss of € 585 million in 2004. The improvement in trading profit reflects a € 541 million reduction in trading losses at Fiat Auto and the positive performance of all other industrial sectors, which met or exceeded their trading margin targets, as well as other unusual income stemming from important extraordinary transactions in 2005 (including, in particular, the termination of the Master Agreement with General Motors and the disposal of the investment in Italenergia bis).
Restructuring costs total € 502 million in 2005, down € 40 million from 2004, and are principally distributed among Fiat Auto (€ 162 million), Iveco (€ 103 million) and CNH (€ 87 million).
The following table illustrates the components of the operating result broken down by Sector:

	Trading Profit		*Gains/Losses on sales of equity investments*		*Restructuring costs*		*Other unusual income (expenses)*		*Operating income*	
(in millions of euros)	*2005*	*2004*	*2005*	*2004*	*2005*	*2004*	*2005*	*2004*	*2005*	*2004*
Fiat Auto	**(281)**	(822)	**-**	3	**162**	355	**(375)**	(238)	**(818)**	(1,412)
Maserati	**(85)**	(168)	**-**	-	**-**	-	**-**	(3)	**(85)**	(171)
Ferrari	**157**	138	**-**	-	**-**	-	**-**	(2)	**157**	136
Fiat Powertrain Technologies	**26**	-	**-**	-	**17**	-	**(5)**	-	**4**	-
Agricultural and Construction Equipment (CNH)	**698**	467	**-**	-	**87**	68	**-**	-	**611**	399
Commercial Vehicles (Iveco)	**415**	371	**(10)**	-	**103**	24	**(13)**	-	**289**	347
Components (Magneti Marelli)	**162**	165	**-**	31	**33**	48	**(2)**	-	**127**	148
Metallurgical Products (Teksid)	**45**	(39)	**5**	-	**14**	3	**(9)**	-	**27**	(42)
Production Systems (Comau)	**42**	40	**(1)**	-	**46**	10	**(3)**	-	**(8)**	30
Services (Business Solutions)	**35**	41	**9**	2	**22**	9	**(15)**	-	**7**	34
Publishing and Communications (Itedi)	**16**	11	**-**	-	**2**	2	**(1)**	-	**13**	9
Holding companies, Other companies and Eliminations	**(230)**	(154)	**902**	114	**16**	23	**1,235**	-	**1,891**	(63)
Total for the Group	**1,000**	50	**905**	150	**502**	542	**812**	(243)	**2,215**	(585)

Fiat **Group interest in net income** amounts to € 1,331 million in 2005, against a loss of € 1,634 million in 2004. Moreover, the Fiat Group booked unusual financial income of € 858 million relating to the capital increase following the conversion of the Mandatory Convertible Facility and lower net financial expenses (€ 843 million against € 1,179 million in the prior year, which included non-recurring items for approximately € 250 million due to the unwinding of the equity swap on General Motors shares) as a result of lower net debt.

The most **significant transactions in 2005** include the following:

- in February, the termination of the Master Agreement with General Motors, including the cancellation of the put option, the unwinding of all joint ventures and the return of GM's 10% equity interest in Fiat Auto Holdings to Fiat. Net gains stemming from the termination of the agreements total € 1,134 million;
- in September, the sale of 24.6% of the capital stock of Italenergia bis to EDF by the Fiat Group at a price of € 1,147 million. Concurrently, the Citigroup financing of the same amount that had been extended in 2002 was reimbursed. A gain of € 878 million was realized on the sale of the aforementioned investment.
- also in September, the capital increase to service the Mandatory Convertible Facility that fell due on September 20, 2005, with the subscription of the new shares, issued at the price of € 10.28 each, by the lending banks through a set-off against the total debt of € 3 billion. Following this transaction, unusual financial income of € 858 million was booked, representing the difference between the subscription price of the shares and their stock market price at the date of subscription.

As for equity and financial aspects:

- Consolidated **Group interest in stockholders' equity** is € 8,681 million at December 31, 2005, compared to € 4,304 million at December 31, 2004. The major changes during the year, apart from net income, refer to the foregoing capital increase to service the Mandatory Convertible Facility of € 3 billion;
- **Consolidated net debt** decreased by € 6.9 billion from € 25,423 million at December 31, 2004 to € 18,523 million at December 31, 2005, including € 15,304 million attributable to Financial services and € 3,219 million to Industrial Activities. More specifically, the net debt of the Fiat Group decreased as a result of the following transactions:
  - the collection of € 1.56 billion from General Motors following the termination of the aforementioned agreements;
  - the reimbursement of € 2 billion in financing that had previously been extended to financial services companies sold by Iveco to Barclays;
  - the conversion of the Mandatory Convertible Facility amounting to € 3 billion;
  - the positive financial effects of the completion of the Italenergia bis transaction for € 1.8 billion.

The net debt at December 31, 2004 and December 31, 2005 can be summarized as follows:

€ in millions	12/31/2005	12/31/2004	Change
Debt	(25,761)	(32,191)	6,430
Other financial liabilities	(189)	(203)	14
	(25,950)	(32,394)	6,444
Other financial assets	454	851	(397)
Current securities	556	353	203
Cash and cash equivalents	6,417	5,767	650
Net debt	(18,523)	(25,423)	6,900

The operating performance in 2005 by major sector of activity in 2005 is the following.

After termination of the Master Agreement with General Motors, **Fiat Auto** regained its strategic independence and was thus able to execute targeted industrial agreements with major carmakers outside Italy (Pars Industrial Development Foundation in Iran, PSA and Tofas in Turkey, Ford in Poland, Zastava in Serbia, Suzuki in Asia and, in 2006, Tata Motors in India and Severstal in Russia) to increase Fiat Auto's competitiveness.

Demand in Western Europe in the automobile market recorded a slight decrease (-0.2%) performing differently in various countries (1.3% decline in Italy) and off sharply in Poland (-26.5%) while the Brazilian market continued on its growth track, with demand rising by 9.1%.

Fiat Auto had a 28% share of the Italian car market in 2005 (the same as last year) but higher at the end of the year and in the early months of 2006. Its share declined to 6.5%. for Western Europe (0.7% points less than in 2004). In Poland, Fiat Auto's sales volume contracted by 44.3% whereas Fiat Auto achieved a 24.4% share of the Brazilian car market increasing sales by 12.9% in 2005 with respect to 2004 and regaining leadership of the market. Market expansion was also positive in Argentina, following the economic recovery of that country, and in Turkey.
In 2005, shipments of light commercial vehicles are 5.1% more than in 2004.

As part of its effort to round out its model line, Fiat launched the Croma in May 2005, a new entry in the medium-high segment while the Grande Punto was launched in September 2005 and generated an immediate and excellent response among customers. As for the Grande Punto, the year ended with registrations of 35,000 units and new orders for 88,000 cars, with customers outside Italy accounting for 45% of the total. The Fiat Panda Cross and Fiat Sedici were also launched in 2005.

Alfa Romeo brought the Alfa 159 and the Brera to market in the last quarter of the year; these models confirm the distinctive styling of the Alfa Romeo brand.
The Fiat and Alfa Romeo lineup of models is less than two years old. The product line was also bolstered by the significant success achieved in terms of safety with the new models honored with several awards in Europe.

Lancia, which will celebrate its 100th birthday in 2006, presented upgrades of some of its models: Ypsilon, Musa and Phedra.

The Fiat Veicoli Commerciali (Fiat light commercial vehicles) brand launched the new Doblò in October, which was honored with the coveted Van of the Year 2006 international award and was able to achieve a high level of market penetration.

Maserati, the ownership of which was transferred from Ferrari S.p.A. to Fiat Partecipazioni S.p.A. in April 2005, achieved major commercial and racing objectives thanks above all to the success of the Quattroporte despite a declining market in the countries it operates.

In 2005, **Ferrari** increased shipments to the sales network by 11%, benefiting from the success of the F430, the 612 Scaglietti and Superamerica. New and developing markets provided a significant contribution (Middle East, Eastern Europe, South America and China).

From an economic standpoint, in 2005, the Automobiles business area recorded net revenues of € 21,729 million, up 2.5% over the prior year. This increase is the result of a slight decrease reported at Fiat Auto (-0.8%, partly due to the strong focus on more profitable sales channels, but with gains in the last quarter), improvements posted by Ferrari (+9.7%) and Maserati (+30.3%), and the consolidation of the Powertrain operations following termination of the Master Agreement with General Motors, as well as the reorganization of the car engine and transmission activities.

Fiat Auto drastically reduced its trading loss from € 822 million in 2004 to € 281 million in 2005. This change is mainly attributable to a better sales mix, greater efficiencies and a considerable reduction in business governance costs, while Ferrari had a trading profit of € 157 million (€ 138 million in 2004). Maserati had a trading loss of € 85 million in 2005, as compared to a loss of € 168 million in 2004.

CNH reported net revenues of € 10,212 million in 2005, a slight 2.3% increase compared to 2004 while the performance varied by sector (positive for construction equipment, also in terms of prices, negative for the agricultural equipment) as well as by geographical area.

In 2005, CNH reported a trading profit of € 698 million, compared to € 467 million in 2004. Improved revenues, higher manufacturing efficiencies and greater profitability in financial services more than offset higher raw material prices. CNH also benefited from a structural reduction in employee healthcare costs in North America.

CNH reorganized its operations in the fourth quarter of 2005 to focus on its four distinct brands: Case IH and New Holland for agricultural equipment, Case and New Holland for construction equipment. CNH has recently renewed the lineup of its products and is now trying to focus on achieving best-in-class product quality and reliability and reduce warranty costs. A number of CNH products were singled out for recognition in 2005.
Strategic objectives also include higher margins, new production efficiencies and a reduction in debt by increasing cash flow.

IVECO

Iveco net revenues total € 9,489 million in 2005. This represents a 4.9% increase, largely reflecting a higher number of units delivered (+6.3%, including vehicles sold with a buy-back commitment). Iveco's share of the Western European market is unchanged from the prior year, as a result of a general growth recorded in all markets with the exception of Italy.
Iveco had a trading profit of € 415 million, € 44 million higher than in 2004, despite higher raw materials prices and a less favorable market mix.
In the first half of 2005, Iveco and Barclays entered into an agreement that established Iveco Finance Holdings Ltd, which provides financing and leasing solutions for commercial vehicles. On June 1, 2005, Iveco sold 51% of Iveco Finance Holdings Ltd to Barclays.

The **Components and Production Systems business area** has revenues of € 6,642 million, for an overall increase of 3.5% due to the positive performance of Magneti Marelli (+6.3%) and Teksid (+13.8%), partly offset by a reduction at Comau (-8.1%).

Magneti Marelli has revenues of € 4,033 million in 2005. The 6.3% increase compared to 2004 partly reflects the consolidation of Mako from January 1, 2005. Excluding changes in the scope of consolidation and exchange rate effects, revenues increased by approximately 2%. The strong performance of Magneti Marelli operations in Brazil and Poland and the positive trend of its onboard electronics activities offset lower sales volumes in Italy, which started recovering in the fourth quarter.

Teksid has revenues of € 1,036 million, up 13.8% from 2004. Higher volumes at the Cast Iron Business Unit (+4.6%), the positive impact of exchange rates and the recovery of higher raw materials costs through higher sales prices contributed to the improved performance, more than offsetting lower volumes in Magnesium Business Unit (-6.8%).

Comau has revenues of € 1,573 million in 2005. The 8.1% reduction from 2004 reflects the transfer of Comau's European activities to Iveco, Magneti Marelli and CNH. When calculated on a comparable scope of consolidation basis, Comau's revenues rose by approximately 6%, due to a strong performance in the Car Bodywork and Maintenance areas.

Other Businesses, which comprise Services (Business Solutions), Publishing and Communications (Itedi) and Holding companies and Other companies, record an overall decrease of 19.2% from 2004 due to the performance of Business Solutions and Holdings and Other companies.

Business Solutions has revenues of € 752 million in 2005, down 23% from 2004. The decrease stems in part from the change in the scope of consolidation (sale of the temporary employment agency WorkNet). On a comparable scope of consolidation basis, the decrease in revenues is approximately 5%, mainly reflecting lower activity in the administration area, following a redefinition of the services the Sector provides to other Group companies.

In 2005, **Itedi** has revenues of € 397 million, down 2.5% from the previous year. The downturn is attributable to lower advertising revenues following termination of a major concession agreement, lower newspaper sales revenues, and a more selective and profitability-oriented approach to brand extension initiatives.

As regards **significant events occurring since the end of the fiscal year**, the Fiat Group has continued to implement its strategy of targeted industrial alliances and concluded important transactions for financial funding which are an indication of the credibility and confidence regained on the capital markets. Those most worthy of note are the following:

- in January 2006, Fiat Auto and Severstal Auto signed an industrial agreement for the assembly in Russia of several models, based on CKDs produced in Turkey by Tofas, the joint venture between Fiat Auto and the Koç Group;
- also in January 2006, the Fiat Group and Tata Motors signed an agreement to co-operate on dealer network sharing, which covers the sale of Fiat branded cars in India;
- in February 2006, Fiat communicated that it had successfully closed its offer to issue 6.625% Senior Notes having a face value of € 1 billion, and maturing February 2013, whose price was set on February 7, 2006 at 100% of the face value. It is to be noted that in January 2006 Fitch Ratings and Moody's changed their outlook on Fiat from negative to stable, as Standard & Poor's Rating Services had already done in August 2005. The notes, which were issued, have been admitted to listing on the Irish stock exchange;
- at the beginning of March 2006, the CNH Group issued senior notes with a face value of US $ 500 million, issued at face value, maturing in 2014 and with a fixed annual interest rate of 7.125% to professional investors;
- in February 2006, the Fiat Group and the Italian Ministry of Productive Activities signed a project agreement committing the Group to implementing an investment plan for a total of € 647 million to support Fiat's manufacturing operations at Pratola Serra and Termoli and the research activities carried out at Pomigliano d'Arco, supplemented by a government grant of approximately € 82 million.

SEQUANA CAPITAL

(52.78% of capital stock through Ifil Investissements)

The 2005 consolidated results of the Sequana Capital Group, prepared in a condensed format with the operating companies accounted for by the equity method, can be summarized as follows:

€ in millions	2005	2004	Change
Share of earnings (losses) of companies accounted for by the equity method:			
- ArjoWiggins	56.5	60.5	(4.0)
- Antalis	30.4	17.2	13.2
- SGS	58.3	47.4	10.9
- Antonin Rodet	(1.0)	(2.9)	1.9
Share of earnings (losses) of operating companies on a comparable consolidation basis	144.2	122.2	22.0
- Permal Group (a)	41.2	46.2	(5.0)
- Pechel Industries	0.0	6.2	(6.2)
Share of earnings (losses) of operating companies sold	41.2	52.4	(11.2)
Trading loss of companies consolidated line-by-line	(17.7)	(2.0)	(15.7)
Trading profit - Group	167.7	172.6	(4.9)
Nonrecurring income (expenses)	180.4	(200.7)	381.1
Profit (loss) - Group	348.1	(28.1)	376.2
Consolidated equity - Group	2,190.0	1,818.0	372.0
Consolidated net financial position (line-by-line consolidation)	181.0	(235.0)	416.0

(a) Deconsolidated as of November 1, 2005.

The total share of the earnings (losses) of all the operating companies shows an increase of 6% due to the positive performance of SGS and Antalis. Instead, the performance of ArjoWiggins was hurt by a market context where the norm is still excess production capacity and by higher energy and raw material costs. Owing to its deconsolidation as of November 1, 2005, the share of the earnings of Permal Group is not comparable with that of the prior year.

The slight decrease in the trading profit of the Sequana Capital Group (-3% compared to 2004) can principally be ascribed to an increase in the tax charges booked by the holdings (-€ 3 million compared to a tax benefit of € 7 million in the prior year), in addition to a reduction in the contribution of financial income and expenses (€ 2 million compared to € 8 million in 2004).

Nonrecurring income (expenses) shown net of directly chargeable expenses and income taxes, principally includes the gain realized on the sale of the 70.5% stake in Permal Group Ltd to Legg Mason (€ 449.4 million), restructuring costs and writedowns of the assets of the Arjo Wiggins Group (-€ 201.4 million) and nonrecurring expenses (-€ 71.8 million) mainly in connection with the provision for the Fox River dispute.

The significant amount of proceeds from the sale of Permal Group was also a contributory factor to the net financial position (line-by-line consolidation) of the Sequana Group which shows a liquidity position of € 181 million at December 31, 2005 (compared to a net debt position of € 235 million at the end of 2004). This figure does not include the equivalent amount of proceeds of € 169 million on the Legg Mason shares sold during the first quarter of 2006.

On March 28, 2006, the Board of Directors voted to put forward a motion to the Stockholders' Meeting, called for May 10, 2006, for the payment of dividends of € 3.3 per share (of which € 0.6 for ordinary dividends and € 2.7 for extraordinary dividends) for a total of € 349.7 million.

The dividends to which IFIL are entitled amount to € 184.5 million.

The performance of the principal sectors in which the Sequana Group operates is reviewed in the following paragraphs.

ARJOWIGGINS

(100% of capital stock through Sequana Capital)

In Europe, the year 2005 featured weak economic growth and higher competition from Asian countries. In view of an excess of pre-existing production capacity, these factors contributed to a rise in pressure over prices. As for volumes, demand rose by only 1%.

Sales of the Arjo Wiggins Group in 2005 are € 2 billion (+1.4% against € 1.98 billion in the prior year).

The generalized increase in energy and raw material costs led to an erosion of margins. The operating profit of the Arjo Wiggins Group thus fell to € 82.6 million in 2005, declining by 22% compared to € 106.4 million reported in 2004.

Fixed overheads decreased by € 18 million owing to the restructuring measures implemented in previous years and still underway.

On the financial front, the Arjo Wiggins Group was nevertheless able to generate high cash flows (€ 124 million, including € 95 million provided in the second half of the year) as a result of a serious effort to reduce working capital and control investments. This enabled the Group to reduce the net debt at the end of the year to € 291 million, from € 404 million at December 31, 2004.

During the second half of 2005, a strategic analysis of the Arjo Wiggins Group was begun with the assistance of outside consultants. The analysis revealed the presence of important strong points (reputation and global presence, leadership position in various niche markets, high level of research, development and know-how and the world record for the purchase of raw materials such as cellulose paste) and also weak points (underdeveloped internal synergies, weak customer-oriented organization and highest concentration of business in mature Western markets).

Partly to adopt the changes required by this strategic review, in 2005, the Arjo Wiggins Group recorded restructuring costs of € 210 million, mainly for the closing of a production facility in Scotland and assets writedown.

Consolidated operating highlights of the Arjo Wiggins Group are the following:

			Change	
€ in millions	2005	2004	Amount	%
Sales	2,004	1,977	27	1
Operating profit	83	106	(23)	-22
Loss	(157)	(45)	(112)	n.s.

antalis

(100% of capital stock through Sequana Capital)

The positive signs seen at the end of 2004 in the reference markets were not confirmed in the year 2005, which recorded basically stable volumes and strong price pressures. As a consequence, the market declined by 2% in value during the year
Notwithstanding, in 2005, the business volumes of Antalis increased slightly over the prior year, from € 2,337 million to € 2,344 million.

Thanks particularly to the progress achieved in relations with customers, which made it possible to consolidate market share, and the decrease in logistics and sales expenses, the company further improved its results. The operating profit thus showed a substantial increase (+26%), reaching € 53 million compared to € 42 million in 2004.

Moreover, improvements at the level of financial income and expenses allowed Antalis to reach a consolidated profit of € 27 million, an increase of € 12 million compared to the prior year.

In 2005, Antalis continued its geographic expansion to areas with strong growth, making investments in Brazil and South Africa and concluding cooperation agreements with leading operators in the sector.

As for the key consolidated results of Antalis in 2005, they can be summarized as follows:

			Change	
€ in millions	2005	2004	Amount	%
Sales	2,344	2,337	7	0
Operating profit	53	42	11	26
Profit	27	15	12	n.s.

SGS

(23.77% of capital stock through Sequana Capital)

The SGS Group was able to capitalize on the favorable conditions displayed in 2005 by the reference markets of various sectors (in particular: agriculture, energy, construction and manufactured products), with demand and prices remaining high. Growth was across all geographic areas, with a record high in Asia which reported a gain of 30%.

Sales of the SGS Group grew 14.7%, reaching CHF 3.3 billion and benefiting from the diversification of the services offered, the geographical expansion (especially in Asia) and the integration of the companies acquired last year.

Operating profit is CHF 502 million or CHF 109 million more than in 2004, with the percentage of operating profit to sales being 15.2% with a high of 20.3% in the Consumer Testing sector. The sectors with the highest growth compared to the preceding year, apart from Consumer Testing, are Oil Gas & Chemical Services and Industrial Services.

With an increase in profit from CHF 278 million in 2004 to CHF 371 in 2005 (+33.5%), the market price of SGS stock reported a 37.5% gain.

The strategic development plan devised by the SGS Group is founded upon the following three basic growth factors:

- constant expansion of the services offered and the range of geographic action;
- development of the sectors with the highest growth rates (Life Science, Consumer Testing and Industrial Services), also by adopting a policy of outside acquisitions;
- tailoring the offering to match customers' needs in strategic markets with prospects of expansion.

In quantitative terms, the plan calls for a target business volume of CHF 5 billion and an operating margin of 17% by the end of 2008.

In short, the key consolidated results of the SGS Group in 2005 are the following:

			Change	
CHF in millions	2005	2004	Amount	%
Sales	3,308	2,885	423	15
Operating profit	502	393	109	28
Profit	371	278	93	n.s.

SANPAOLO IMI

(5.86% of ordinary capital stock)

The Sanpaolo IMI Group closed the year 2005 with a **consolidated net profit** of € 1,983 million, an increase of 57.9% compared to 2004. RoE rose to 17.2% from 11.9% in the prior year while the cost/income ratio fell from 63.4 to 57.

The main income margins show an increase compared to the prior year with a growth in revenues during the last few months of the year.

Net interest income (€ 3,795 million) increased by 3% (a growth of 4.9% with the exclusion of investment banking activities which are characterized by greater volatility); this is an inversion of the downward trend seen in 2004. The main growth factor is attributable to the increase in the volumes dealt (+10.5%, on average, in terms of interest-earning assets) which amply compensated the reduction in the spread (16 basis points in transactions with customers) owing to an excessive supply of loans by the system.

All the main components of the interest-earning assets contributed to the increase in the amounts. In particular, under loans to customers (+10.5%), medium/long-term financing rose by 11.6%, benefiting from the positive performance of mortgage financing directed at the retail sector (+19.9%).

Direct deposits showed an increase of 6.8% on an annual basis reaching € 169.6 billion.

Total operating income, including income from insurance management, is € 8,402 million, a rise of 10.6% compared to the previous year. Growth was sustained by the positive performance of all the components.

Net commissions, totaling € 3,476 million (+6.8%), benefited from the increase in **indirect deposits** (+9.8%, also as a result of the positive performance of the financial markets) and the repositioning of asset management toward areas with a higher added value.

In absolute terms, the most significant increase (+€ 262 million) was recorded in the typical operations of Banca IMI and structured finance which include one-off components.

The good performance in life insurance is reflected in the **income from the insurance business**, in reference to the life and casualty companies headed by Assicurazioni Internazionali di Previdenza, which amounts to € 431 million (+31%) thanks to the favorable trend in financial management.

Net operating income, amounting to € 7,912 million (+13.1%), also benefited from the decrease in the adjustments of loans and other financial assets. Non-performing loans decreased by 5% while problem and restructured loans declined by 13.8%, showing an improvement in the risk profile of the loan portfolio.

Control over operating costs (-0.5%) thus made it possible to reach a **pre-tax operating profit** of € 3,023 million, an increase of 53.4% over 2004.

Shareholders' equity – Group amounts to € 13,483 million at the end of year (€ 12,035 million at December 31, 2004). The change includes, among others, the positive fair value adjustments of financial assets for € 478 million and actuarial losses on defined benefit employee funds and employee termination indemnities charged to equity reserves for € 199 million.

A summary of the highlights of the Sanpaolo IMI Group for the year 2005 is presented below:

€ in millions	2005	2004	Change Amount	%
Net interest income	3,795	3,683	112	3.0
Net operating income	7,912	6,998	914	13.1
Pre-tax operating profit	3,023	1,971	1,052	53.4
Net profit - Group	1,983	1,256	727	57.9
Total assets	268,385	248,418	19,967	8.0
Loans to customers	138,427	125,143	13,284	10.6
Customer financial assets	406,232	376,381	29,851	7.9
Shareholders' equity - Group	13,483	12,035	1,448	12.0
Embedded value of the life insurance business	2,648	2,433	215	8.8
Branches and representative offices (Italy+foreign)	3,308	3,257	51	1.6
Employees (number)	43,666	43,184	482	1.1
Financial planners	4,151	4,317	(166)	-3.8

Following the structural reorganization of the Group, begun in July 2005, the activities of the Sanpaolo IMI Group are currently organized into the following sectors:

- Banking, divided in the “retail & private” and “corporate” business lines. This is the “core” sector of the Group, accounting for about 80% of the consolidated figures;
- Savings and Assurance, which includes Banca Fideuram and Assicurazioni Internazionali di Previdenza, now concentrated in the newly-established company Eurizon Financial Group, to which Sanpaolo IMI Asset Management was transferred in January 2006. The project, which is based upon the distinction between “product factories” and “banking distribution networks”, calls for Eurizon’s listing on the stock market so that the company can access the capital markets directly;
- Central functions (governance, support and control, strategic investments and finance).

2005 also saw the completion of the process to integrate and rationalize the Group banks.
In October, the 2006-2008 Plan was approved; the objectives can be summarized as achieving a RoE of 18% and a cost/income ratio of 52% at the end of 2008.

The plan to rationalize the distribution network will continue in 2006. It involves, firstly, the banks in the North East and along the Adriatic Sea, while the integration of the Group’s distribution networks in Romagna with those of the Cassa di Risparmi di Forlì is scheduled to take place in 2007. In that year, Sanpaolo IMI will confer its branches in the Romagna area and thus acquire control of Cassa di Risparmi di Forlì.

As for performance in the early months of the year, the economic results seem to be above budget forecasts. Loans to customer continue to record over 10% growth while mortgage loans to families (+30%), personal loans (+70%) and industrial loans to small- and medium-sized businesses (+60%) are particularly lively. The number of commercial bank customers has risen, reversing the trend seen in the corresponding period of 2005.
Income margins could benefit from the widening of the customer base, as well as improvement of the spread, favored by the recovery in market rates and the development of the financial services for the clientele.

The Board of Directors’ Meeting of the Bank held on March 23, 2006 voted to put forward a motion to the Shareholders’ Meeting called for April 27 or April 28, 2006 for the distribution of dividends per share of € 0.57.
Dividends for IFIL will amount to € 53 million.

(60% of capital stock)

The 2004/2005 sports season ended with the Club's 28th Italian Championship victory, which allowed Juventus to automatically qualify for the U.E.F.A. Champions League in the current season.

The last financial year closed on June 30, 2005 and recorded a loss of € 3 million, with an improvement over the loss of € 18.5 million reported in the prior year.
Operating revenues totaling € 229.3 million posted a considerable increase (+10%) over 2003/2004. The rise in revenues is due to the bonuses received for the Club's first-place victory in the Italian Championship, the higher number of games played (with the exception of only the Italian Cup) and the contractual increase established in the agreements for television and telephone rights.
In March 2005, income of € 18 million was also recorded as a result of the sale, to Oilinvest B.V., owner of the Tamoil brand, of the option rights relating to the new official sponsorship contract. In the first half of 2004, the operating revenues had included € 20 million received from the Mediaset Group on the sale of the rights to broadcast games in future seasons.

The gross operating margin rose to € 45.7 million (€ 37.1 million in the previous financial year). The benefit from the increase in revenues was partly offset by higher service expenses and personnel costs.

Net income from the management of players' registration rights amounted to € 16.8 million (€ 3.6 million in the previous season). Amortization of the investments in players decreased to € 59.1 million (€ 63.9 million in the year 2003/2004) thanks to the extension of the contract periods for certain players.

The players' transfer campaign for the 2004/2005 season led to net investments of € 69.9 million while the overall financial effect, taking into account the gain realized on disposals and on the termination of co-sharing rights, was a negative € 46.1 million.

The following highlights are taken from accounting data prepared and published by Juventus F.C. in accordance with Italian GAAP.

Year 2004/2005 (a)	Year 2003/2004 (a)	€ in millions	I Half 2005/2006 (b)	I Half 2004/2005 (b)	Change
229.3	208.2	Operating revenues	134.2	95.5	38.7
45.7	37.1	Gross operating margin (c)	37.6	7.0	30.6
(3.0)	(18.5)	Net income (loss)	2.1	(9.8)	11.9
77.9	80.9	Stockholders' equity (d)	80.0	71.2	8.8
(16.4)	53.1	Net financial position (d)	(22.7)	(20.5)	(2.2)

(a) Corresponding, respectively, to the periods July 1, 2004 to June 30, 2005 and July 1, 2003 to June 30, 2004.
(b) Corresponding, respectively, to the periods July 1, 2005 to December 31, 2005 and July 1, 2004 to December 31, 2004.
(c) Before amortization of players' registration rights.
(d) Data refers to the end of the period.

The result for the period July 1, to December 31, 2005, the first half of the current financial year, shows a net income of € 2.1 million. This is an increase of € 11.9 million compared to the loss of € 9.8 million for the same period of the prior year.
The comparison of operating revenues and the gross operating margin during the same periods shows a considerable improvement over 2004. This is due to the positive operating performance and also to significant nonrecurring items. In particular, the 2005 data includes € 30 million received by Juventus F.C. in December from the Mediaset Group for the consideration on an option right sold under a broader broadcasting agreement. This agreement allows the Mediaset Group to broadcast the home games of the Italian Championship for the 2007/2008 and 2008/2009 seasons using any distribution platform, and also covers other events and minor rights.
The right that was sold gives the Mediaset Group the option of extending the same rights that are covered by the principal agreement to the 2009/2010 season.
The consideration for the first two seasons was agreed, respectively, at € 108 million and € 110 million.

The 2005/2206 summer transfer campaign involved net investments of € 37.7 million. The economic effect of the transactions was a positive € 1.4 million whereas the financial effect was a negative € 21.8 million.
During the second stage of the campaign, conducted in January 2006, there were neither significant movements nor effects on the financial position, results of operations or cash flows.

Other important events worthy of note in 2005, besides those already mentioned, include, in December, the signing of a contract for the sale, to the company Virgiliocinque S.p.A. (owner of Juventus F.C.'s headquarters), of an option right for the purchase of the surface rights to the commercial areas outside the Delle Alpi Stadium. The consideration for the right sold was equal to € 0.1 million.

With regard to the investigation by the Judicial Authorities of Rome regarding the alleged falsification of financial statements by soccer clubs in order to obtain registration for the relevant championships, the documentation was sent to the competent territorial jurisdictions. The Procura della Repubblica of Turin collected further documentation from Juventus F.C. offices, with the mandatory inclusion of the name of the Chief Executive Officer in accordance with art. 335 of the Code of Criminal Procedure.

As for the investigation by the Judicial Authorities against the Chief Executive Officer and the Juventus F.C. physician concerning the alleged improper use of medicines by Juventus F.C. players, on December 14, 2005, the Corte d'Appello (Court of Appeals) fully acquitted both parties.

(100% of capital stock, through Ifil Investissements)

The year 2004/2005 was severely penalized by the decline in demand for some of the Group's most important destinations. The decline is a consequence of extraordinary external events such as the attack at Taba (Egypt) in October 2004, the crisis of the Volare group, the devastating tsunami which hit on December 26, 2004, followed by the vicious attack at Sharm El Sheik in July 2005.

With that in mind, despite a difficult start which had hurt the winter season and the persisting climate of political and economic uncertainty, the first months of the summer, up until the date of the attack at Sharm El Sheik, presented a positive picture: sales and margins were up compared to the corresponding period of the prior year and in line with forecasts.

The attack at Sharm El Sheik on July 22 again badly upset the market situation right in the middle of the high season causing numerous cancellations of reservations that had already been purchased. Following this exceptional event, the Group worked especially hard with a great deal of success and was able to suggest new destinations to customers who had originally planned vacations at Sharm El Sheik to a host of alternative destinations such as the Mare Italia, Greece, the Canary Islands, the Balearic Islands and Cape Verde. While this had the effect of limiting the impact on volumes, it did not, however, prevent a contraction in the margins caused by the different mix of destinations and the costs for re-protection.

Moreover, the summer season was dealt another severe blow, with particular reference to the Caribbean, by the effects of Hurricane Emily and Hurricane Wilma which hit the tourist areas along the Mayan Riviera.

As for the market, fierce competition and extremely aggressive sales policies on the part of tour operators persist in terms of prices and discounts offered on some of the most popular destinations. The propensity of customers to delay vacation reservations until just a few days before departure to take advantage of last minute offers also remains high.

To meet this situation and keep discounted sales prices at a normal level, the Group has re-proposed "early booking" campaigns where the final customer is rewarded with lower prices when reservations are made a good deal in advance. By using this promotional tool, the Group achieved significant improvements in programming, especially for the summer season, and an optimization of the costs and the risks associated with both land-based services and seat availability on flights.

The key consolidated financial statement data of the Alpitour Group for the year ended October 31, 2005, prepared in accordance with IFRS, can be summarized as follows:

			Change	
€ in millions	2004/2005	2003/2004	Amount	%
Net revenues	1,146.8	1,108.5	38.3	3.5
Operating profit	7.0	28.9	(21.9)	-75.8
Profit (loss) - Group	(10.7)	5.7	(16.4)	n.s.
Equity - Group	70.2	79.2	(9.0)	-11.3
Consolidated net financial position	(77.4)	(112.0)	34.6	30.9

Consolidated sales by business sector of the Alpitour Group is detailed below:

			Change	
€ in millions	2004/2005	2003/2004	Amount	%
Tour operating	883.0	886.1	(3.1)	-0.3
Incoming	229.3	217.4	11.9	5.5
Hotel	96.1	92.7	3.4	3.7
Aviation	103.7	73.6	30.1	40.8
Distribution	30.2	23.5	6.7	28.7
Incentives and Grandi Eventi	45.6	44.7	0.9	2.1
Total	1,387.9	1,338.0	49.9	3.7
Elimination of intragroup transactions	(241.1)	(229.5)	(11.6)	5.1
Total	1,146.8	1,108.5	38.3	3.5

With regard to the Tour Operating business, sales of € 883 million were reported in 2004/2005 and are basically in line with those of the prior year (€ 886.1 million).

As for volumes, there were 997 thousand travelers in 2004/2005, a reduction of about 5.3% compared to the previous year (1,052 thousand). In terms of the sales mix, a considerable decline (about -30%) was recorded in 2004/2005 in destinations to Egypt and the Indian Ocean (the Maldives, in particular), due to the exceptional events mentioned early.

Instead, the trend of destinations to the Caribbean area, especially Honduras, Cuba and Santo Domingo, as well as to Africa (Tanzania, Kenya and Senegal) was positive.

The major destinations in the Mediterranean area and in Europe, on the other hand, overall, maintained substantially stable performance in line with the prior year.

The Incoming sector, headed by the Jumboturismo Group, reported consolidated sales of € 229.3 million in 2004/2005 (€ 217.4 million in 2003/2004), including € 102 million in sales to the Alpitour Group. An analysis of the increase in sales, equal to approximately 5.5%, shows a growth in the volumes from third-party operators, on one hand, and a slight decline in those contributed by operators of the Group, on the other.
As regards third-party operators, the incoming sector has further consolidated the growth of sales relations with other European markets: traffic brought by third-party operators (mainly English, Irish and Dutch) totaled 736 thousand travelers (655 thousand in 2003/2004), equal to about 64% of total volumes managed by the division. As for volumes from tour operators of the Alpitour Group, 414 thousand travelers were recorded compared to 432 thousand in 2003/2004. For the areas served by the Jumbo Group, a considerable increase in travelers to destinations in Italy, Morocco and the Balearic Islands was reported whereas a slight decline was noted in the Cape Verde and Mexico destinations.
The Jumboturismo Group expanded its operating structure during the year by opening two new offices, one in Tunisia and one in Italy, and is now present in nine countries.

The Hotel sector registered a significant increase in consolidated sales which reached € 96.1 million (€ 92.7 million in the prior year). The total includes € 42.4 million of sales to tour operators of the Group. This increase is due, on one hand, to the growth of the Italian market and, on the other, to a decline (in terms of volumes and prices) in sales involving foreign structures as a result of exceptional events (the tsunami and hurricanes).
The foreign hotel resorts of the Group, which are currently marketed under the brands of "Bravo Club" by Alpitour, "Sea Club" by Francorosso and "Volando Club" by Volando, reported a presence of 966 thousand in 2004/2005 (1,073 thousand in 2003/2004), equivalent to 107 thousand customers. The Italian hotel facilities operated by Altamarea, instead, registered a presence of 954 thousand, up from 593 thousand in 2003/2004. With reference to the Italian market, during 2005, two new four-star hotels were opened in Rome, as well as the Arenella Resort in Siracusa, a product targeting families, which is an addition to the already existing Bravo Club Arenella.

The Aviation sector, with Neos, posted total sales of € 103.7 million, including € 81.4 million in sales to operators of the Group. The increase over last year (approximately +41%) is principally linked to the start of long-haul travel using a B 767 airplane.
Neos has a fleet of four B 737-800 airplanes of modern conception, based at the airports of Milan Malpensa, Verona and Bologna and operates on the major short/medium-haul routes in the Mediterranean area and Egypt. Beginning in December 2004, Neos has wet leased a B767 for long-haul travel to the Maldives, Africa and the Caribbean.
Neos carried more than 633 thousand passangers during the year (618 thousand in the prior year).

The Distribution sector, which reported sales of € 30.2 million (including € 4.1 million of sales to the Group), principally operates through the Welcome Group travel agency network, which at present encompasses 356 affiliate agencies (under franchisings or partnerships) and 39 owned agencies.
The factors which allowed the distribution division to report a significant increase in sales (+28.7%) compared to the year 2003/2004 are the following: the investments made during the last two years, combined with more effective action to coordinate the activities of the owned points of sale, higher growth of the travel organization activities as compared solely to the simple brokering business and a consolidation of franchising arrangements with affiliate agencies.

The Incentive business, in spite of a persisting generalized weak market, recorded an increase in sales volumes thanks to precise marketing actions and a sales policy aimed at acquiring new market share. Sales of Francorosso Incentive in 2004/2005, in fact, reached € 34 million, up approximately 10% compared to sales of € 30.9 million in 2003/2004.
During the year, the number of passengers/travelers managed was more than 25,300 (21,000 in 2003/2004).
Sales of Jumbo Grandi Eventi in 2004/2005, instead, decreased to € 11.6 million (€ 13.7 million in 2003/2004 which, however, had benefited from the numerous events connected with the Italian EU Presidency for six months).
In 2005/2006, the activities conducted as part of the events surrounding the "2006 Turin Winter Olympics" will generate sales of approximately € 120 million.

At the level of consolidated gross operating margin, the increase in the rental costs of hotel facilities and the lease payments for airplanes caused a decline from the prior year of approximately € 20.8 million (€ 22.4 million in 2004/2005 against € 43.2 million in 2003/2004). In percentage terms, gross operating margin was equal to 2%, compared to 4% in 2003/2004. In fact, the anticipated level of profitability from the growth of the various business sectors was not reached owing to the difficult market situation.

Amortization and depreciation charges recorded an increase of € 1.1 million, from € 14.3 million to € 15.4 million, mainly because of the Arenella tourist resort in Sicily which became fully operational during the year.

The first few months of the year 2005/2006 show a trend towards a recovery compared to the prior year. However, the choices made by the final customers are still being influenced, although to a lesser degree, by the exceptional events which severely penalized travel last year, the tsunami, in particular, and the Sharm El Sheik incident.

In spite of an unfavorable macroeconomic picture, the Group is continuing with its development strategies. As regards tour operating, new destinations, in particular, to Brazil and South America have been launched and more emphasis is being placed on the resort product. During the course of the current year, long-haul charter travel will be running regularly and be able to guarantee a high qualitative level of service. The development of the hotel sector will be able to count on the fully operational new hotel structures in Italy and benefit from an increasingly higher integration with the Group's businesses. As for incoming, an upsurge in destinations to Italy is expected while distribution, through the Welcome Group, started a crucial development plan for its distribution network using contacts with full-franchising affiliates.

Starting from November 1, 2005, the corporate reorganization and simplification plans have become operational; they regard the hotel and distribution divisions using mergers by incorporation. Such mergers will lead to a better organizational structure of the Group and higher operating efficiency. Finally, the actual business model is currently under review with the aim of identifying potential new synergies among the Group's businesses and also seizing opportunities in new businesses and markets.

Ifil Investissements (Luxembourg)

(100% of capital stock directly and through Ifil Investment Holding)

The key highlights for the year ended December 31, 2005 can be summarized as follows:

€ in millions	2005	2004	Change
Net income	491.4	509.0	(17.6)
Stockholders' equity	1,657.1	1,993.1	(336.0)
Financial fixed assets	1,604.7	2,005.2	(400.5)
Net financial position	54.9	(7.0)	61.9

The most important transactions which took place in 2005 are described under "Major events in 2005".

Stockholders' equity decreased by € 336 million following the partial reimbursement of additional paid-in capital to the parents IFIL (-€ 618,8 million) and Ifil Investment Holding (-€ 156.5 million), dividends paid or declared to these same companies (-€ 52.2 million) and net income for the year (+€ 491.4 million).

At December 31, 2005, financial fixed assets include the following equity investments and bonds:

		12/31/2005			
€ in millions	Number of shares	% of capital stock	Carrying value	12/31/2004	Change
Sequana Capital S.A.	55,922,623	52.78	775.5	775.5	0.0

Ocean Club Méditerranée convertible bonds	76,614	-	4.9	4.8	0.1
Total financial fixed assets			1,604.7	2,005.2	(400.5)

In January 2006, NHT – New Holding for Tourism (in liquidation) transferred 100% of the capital of Alpitour S.p.A. to Ifil Investissements, at an amount of € 79.4 million, as an advance on the distribution of the assets in liquidation.

A comparison between the carrying amounts and the market prices of listed financial fixed assets shows the following unrealized gains:

€ millions	Sequana Capital	Ocean Club Med bonds	Total
Market price at December 30, 2005	566.6	0.1	566.7
Average market price in the second half 2005	522.0	0.1	522.1
Market price at March 24, 2006, update	656.1	0.2	656.3

Ifil International Finance Ltd (Ireland)

(100% of capital stock through Ifil Investissements)

The company closed the year ended December 31, 2005 basically with a breakeven, like last year. Stockholders' equity amounts to € 734.8 million (€ 1,054.8 million at the end of 2004) and the net financial position is a liquidity position of € 734.8 million (liquidity position of € 1,054.9 million at December 31, 2004).

The liquidity is mainly invested in two medium/long-term loans made to Ifil Investissements (for a total of € 730 million) due in January 2010.

Ifil Investment Holding (Netherlands)

(100% of capital stock)

Key highlights for the year ended December 31, 2005 can be summarized as follows:

€ in millions	2005	2004	Change
Net income	10.4	92.3	(81.9)
Stockholders' equity	104.9	257.9	(153.0)
Financial fixed assets	104.5	261.0	(156.5)
Net financial position	0.4	(2.7)	3.1

Financial fixed assets are comprised of the equity investment in Ifil Investissements S.A. Details are as follows:

	12/31/2005				
€ in millions	Number of shares	% of capital stock	Carrying value	12/31/2004	Change
Ifil Investissements S.A.	224,194	20.18	104.5	261.0	(156.5) (a)

(a) The reduction is due to the partial reimbursement of additional paid-in capital by Ifil Investissements for the same amount.

MOTION FOR THE APPROVAL OF THE FINANCIAL STATEMENTS AND THE APPROPRIATION OF NET INCOME FOR THE YEAR

To our stockholders,

We invite you to approve the financial statements for the year ended December 31, 2005 and, in view of the fact that the legal reserve is equal to one-fifth of capital stock, we propose the appropriation of the net income for year of € 98,760,183 as follows:

To the ordinary shares, dividends of € 0.08, for a maximum	€	83,089,017.36		
To the savings shares, dividends of € 0.1007, for a maximum	€	3,764,470.12

Istituto Finanziario Industriale

Board of Directors

Chairman	John Elkann [a]
Vice Chairman	Pio Teodorani-Fabbri
Chief Executive Officer and General Manager	Virgilio Marrone
Directors	Carlo Acutis [b] Andrea Agnelli Tiberto Brandolini d'Adda Oddone Camerana Luca Ferrero Ventimiglia Gianluigi Gabetti [c] Franzo Grande Stevens Francesco Marini Clarelli Andrea Nasi Lupo Rattazzi
Secretary to the Board	Pierluigi Bernasconi

---

[a] From April 17, 2007.
[b] Independent director.
[c] Chairman until April 17, 2007.

The composition of the board of directors is updated according to the resolutions passed on April 17, 2007. It should be noted that the Turin Court of Appeals has suspended the effectiveness of the additional administrative sanctions imposed by Consob on Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone.

Board of Statutory Auditors

Chairman	Gianluca Ferrero
Standing Auditors	Giorgio Giorgi Lionello Jona Celesia
Alternate Auditors	Giorgio Ferrino Paolo Piccatti

Independent Auditors	Deloitte & Touche S.p.A.

Expiry of the terms of office
The terms of office of the board of directors and the board of statutory auditors, elected by the stockholders' meeting held on June 25, 2006, will expire concurrently with the stockholders' meeting that will be held to approve the statutory financial statements for the year ending December 31, 2008.
The appointment of the independent auditors will expire concurrently with the stockholders' meeting that will be held to approve the financial statements for the year ending December 31, 2011.

LETTER TO THE STOCKHOLDERS

During 2006, the attention of economic operators moved permanently from the Atlantic Ocean to the Pacific Ocean. In fact, prior to that, hopes of a recovery or fears of potential economic crises were always focused on the shores of the Atlantic. Attention focused on the decoupling of the European economy versus the United States economy, on the effects of a rise in interest rates or, conversely, of an easygoing monetary policy decided in Washington, on the trend of industrial growth in Frankfurt or Paris, or on the possibility that Europe might replace the United States as the driver behind world growth.

Other countries played a decidedly secondary role. Despite the fact that Japan had phenomenal production capacity and a presence in the technological sectors with higher added value, in recent years, it has never succeeded in imposing itself as a key player in world growth. Rather it has benefited from phases of growth in other parts of the world and has suffered in times of slowdown. Even today, its political and financial weight is markedly inferior to its economic capacity. In this context, even China was no exception. Of course, the sheer size of the country, its massive population and its military might have always aroused the curiosity of the markets but, for a long time, the role that the country might play in future years was underestimated. There were too many doubts about the ability of the Chinese authorities to undertake the reforms needed to stimulate the local economy in a way that would make it competitive with international markets.

Today, even the most skeptical commentators acknowledge that China plays a fundamental role in the world economy, more than the albeit tumultuous growth of its GDP can justify from the mere standpoint of quantity. The attention of the world has therefore shifted to the Pacific Ocean in an effort to understand the relations existing between the U.S.A. and China, and to what extent the decisions made by one may influence the economy of the other. In this specific case, not only very important commercial relations are involved, but also a complex inter-dependence between one country, China, which has not only succeeded in producing what the largest world market wants cheaply but has also financed the consumption of that country, contributing to a large part of the national debt. This phenomenon has undoubtedly helped to ensure the growth of the world economy in recent years, but it has now reached extremely important and possibly critical levels. Recent estimates suggest that Chinese reserves denominated in the American currency alone vastly exceed $ 1,000 billion.

The enormous wealth accumulated by China has enabled it to become not only a country which attracts investors but, in the space of a few years, an international investor of the first order with enormous resources to allocate to the most advanced sectors.

It is therefore vital that we endeavor to understand China, its internal problems and its contradictions better, since, in the future, decisions made in that country will have a decisive impact on the world equilibrium and on the way economies develop. It is going to be vital to observe the transition to a model of socialist capitalism which combines the demands of a modern economy based on ownership and profit with the principles inherited from its previous experience, which are still deeply rooted in rural areas. The challenge posed by China will probably lead to the development of a true middle class which will make it possible to broaden the consumer base and enable China to be less dependent on the propensity of Americans and Europeans for consumption, acting as a driver of world growth and allowing the macro-economic imbalances which are so obvious today to be gradually reduced.

If we turn our attention to the United States, in the second half of the year, there was a gradual and, from many standpoints, salutary slowdown in economic growth. 2006 ended with an increase in GDP of 3% on an annual basis, but with a trend in the last two quarters which does not exceed 2%. The trend of the economy benefited greatly from household consumption, sustained by the positive state of the labor market and the lower cost of energy. The rate of unemployment never exceeded the level of 5% and, during the last quarter of the year, the price of oil was often lower than the psychological threshold of $ 60 a barrel.

Above all, the gradual slowdown in economic growth is associated with the downward trend of the residential real estate sector (it is estimated that the contribution to GDP of residential real estate investments in the last quarter of 2006 was equal to -1.16%, after the -1.20% of the preceding quarter) and it is highly probable that, in the near future, this slowdown will lead to a reduction in the number of jobs in the sector, sparking off a contraction of domestic consumption.

This is the consequence of the restrictive monetary policy implemented by the Federal Reserve with the aim of cooling economic growth. Ben Bernanke, who took over Alan Greenspan's job at the head of the FED in 2006, is anxious to avoid a situation where an excess of liquidity fueled by a low level in the cost of debt might cause an upturn in inflation and the formation of speculative bubbles in the real estate sector. The financial markets, which, by their very nature, try to anticipate macro-economic movements, seem to confirm expectations of a slowdown of the cycle. In fact, medium-term interest rates are at a lower level than the short-term interest rates imposed by the FED. We are facing a positive phenomenon which has been kindled by a rational economic policy, aimed at gradually reducing the imbalances which, unless they are controlled, might result in painful corrective measures in the long term.

In Europe, in 2006, economic growth was higher than expected, reaching almost 3%. The main economic authorities suggest that the prospects for 2007 are also favorable.

The performance of Germany was particularly significant, with a phase of growth the like of which had not been seen since 1990, and so sustained that it enabled the whole of the Old Continent to start to follow suit. Even the dreaded slowdown in consumption due to an increase in VAT to 19% now seems less worrying. Germany is reaping the fruits of a far-reaching, radical restructuring of its production system which, after an intensive phase of delocation to countries in Eastern Europe, has begun to hire at home. In 2006, the number of unemployed fell by 600,000, bringing the unemployment rate below 10% for the first time since 2002. During a phase in which the American economy is slowing down its rate of growth and competition from Asian countries is ever stronger, and not only in goods with low added value, for Europe, the countries of the former Communist block constitute a resource without precedent. Here again, they do not merely represent an opportunity in terms of the lower cost of labor, but have rapidly become a market outlet for European products. The entry of Romania and Bulgaria to the European Union should be regarded in this context: integration will involve significant efforts both on the part of the new member countries and the countries which already belong to the EU, but many believe that this expansion of the EU constitutes an opportunity for the whole of the Old Continent to develop further.

2006 also ended positively for Italy, which benefited from the favorable international economic context. The Italian GDP rose by 2%, exports increased by 8.8% and imports by 12.3%, while the unemployment rate dropped to around 6.5%.

According to ISTAT, Italian industrial production increased in all segments. The increases were very significant and in some cases even reached double-digit figures: in particular, the transport sector (+17.8%), driven by the recovery of Fiat, and the sector of leather goods and shoes (+11.2%), which reported a positive trend again after years of decline as a result of competition from emerging countries. The high-precision engineering and machine-tool sectors also performed well. Prospects for 2007 are also rosy, with an increase in orders at the end of 2006, confirmed in the data released at the end of February.

During the last few years, Italian industry has experienced a serious crisis in terms of being competitive and has suffered greatly from competition from countries which produce goods with low added value. It is fitting, therefore, to take advantage of the favorable economic situation to promote economic growth, by relaunching the traditional sectors of Italian products and penetrating new markets. Facing the challenge of an ever-more competitive, global market also means paying greater attention to training, research, and, more particularly, the structural reforms which Italy's economy needs.

***

With regard to the performance of IFI in 2006, the consolidated financial statements show a profit of € 221 million. In the separate financial statements, the profit reported by IFI S.p.A. grew to € 218 million.
The consolidated result of the IFI Group derives, to a large extent, from the profit reported by its subsidiary IFIL, which benefited from the excellent result of the Fiat Group and the positive performance of its other holdings.
With regard to the former, the success of internal reorganization measures and the enthusiastic reception of new models by the market enabled Fiat to achieve significant results in terms of an increased market share and higher profitability.
Moreover, with regard to the diversified portfolio of IFIL, some transactions deserve special mention, for example, the Public Exchange Offering with SGS shares promoted by Sequana Capital, the merger between Sanpaolo IMI and Banca Intesa, the acquisition of 9.43% of the current capital of Gruppo Banca Leonardo and the agreement for the acquisition of the control of the American company Cushman & Wakefield, the largest private held company operating in the field of real estate services.

Finally, another important event was the sale of the entire investment in the Exor Group to the same Exor Group, which generated a significant gain and made it possible to reduce the level of debt considerably.

During 2006 and in the first quarter of 2007, the company strengthened its investment in IFIL by acquiring about 27.4 million ordinary shares on the market for approximately € 151 million. Today, the company holds more than 66% of the ordinary capital stock of IFIL.

Before concluding, I would like to thank Gianluigi Gabetti, who was temporarily relieved of his post as chairman as a result of a measure issued by the controlling authority of the markets. Without going into the wisdom of a decision which proved to be crucial for the fate of Fiat, because it made it possible to create the conditions of stability needed for the relaunching process to succeed, on behalf of the companies in the Group, I would like to thank him for everything he has done for our Group throughout his long career, including the delicate situation of 2005. Confident that both the chairman and the CEO of our company have always operated with full respect for the law, we await the outcome of the appeal that has been filed against the above-mentioned measure and soon hope to see them resuming their highly responsible posts.

***

In the name of the board of directors I would like to thank our stockholders for the trust they have placed in us, the statutory auditors and independent auditors for their profound commitment, and the managers and all the employees of the company and the subsidiaries for their work.

John Elkann

IFI GROUP PROFILE

IFI – Istituto Finanziario Industriale S.p.A. (abbreviated in **IFI S.p.A.**) is a corporation organized under the laws of the Republic of Italy. The head office is located in Turin, Italy, Corso Matteotti 26.
The ordinary capital stock of the company is held entirely by **Giovanni Agnelli e C. S.a.p.az.**.
IFI's preferred shares are listed on the Electronic Share Market (MTA) of the Italian stock exchange (Blue Chip segment).
The company's assets are represented by the controlling investment in IFIL Investments S.p.A., equal to 66.23% of ordinary capital stock.

IFIL Investments S.p.A. (abbreviated in **IFIL S.p.A.**), listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment), in which Giovanni Agnelli e C. S.a.p.az. also holds 3% of ordinary capital stock directly, is the investment company of the Group. It commands two distinctive areas of operations: the active management of the investment in Fiat S.p.A. and the dynamic management of the other holdings.

Fiat S.p.A., in which IFIL S.p.A. has a holding of more than 30% of ordinary and preferred capital stock, is listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment). Founded in 1899, for more than a century the Fiat Group has been operating in the automotive field, designing, manufacturing and selling automobiles (Fiat, Lancia, Alfa Romeo, Ferrari, Maserati and Fiat Light Commercial), agricultural and construction equipment (Case and New Holland), trucks and commercial vehicles, buses and special-purpose vehicles (Iveco, Irisbus, Astra and Magirus), components and production systems (Fiat Powertrain Technologies, Magneti Marelli, Teksid and Comau); it is also active in publishing and communications (Itedi). Other sectors also offer financial services to the sales networks and clientele in addition to rental services to customers.

The other holdings which comprise the dynamically managed diversified portfolio are listed below.

Sequana Capital S.A. (48.88% holding by the subsidiary Ifil Investissements S.A.) is a French company listed on the Euronext market which in 2006 decided to focus its operations on the paper sector where it operates through:

- Arjowiggins S.A. (100% holding), the world leader in the manufacture of high value-added paper products and, in Europe, leader in the manufacture of carbonless paper;

- Antalis S.A. (100% holding), the leading European group in the distribution of paper products for printing and writing.

SGS S.A. (13.74% holding by Ifil Investissements S.A.) is a Swiss company listed on the Virt-x market. Founded in 1878, the company is today the global leader in verification, inspection, control and certification activities with 48,000 employees and a network of more than 1,000 offices and laboratories throughout the world.

Intesa Sanpaolo S.p.A. (2.45% holding of ordinary capital stock by IFIL S.p.A.) is listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment). It is one of the most important banking groups in Europe and is the foremost bank in Italy with a market share of 20% on average in all segments of business (retail, corporate and wealth management). With its network of 5,500 branches, the group offers its services to 12 million customers. It also operates in 13 Central-East European countries and in the Mediterranean basin with 1,650 branches and 7.7 million customers in the retail and commercial banking sectors. It also has an international network specialized in corporate customer support covering 35 nations including the United States, Russia, China and India.

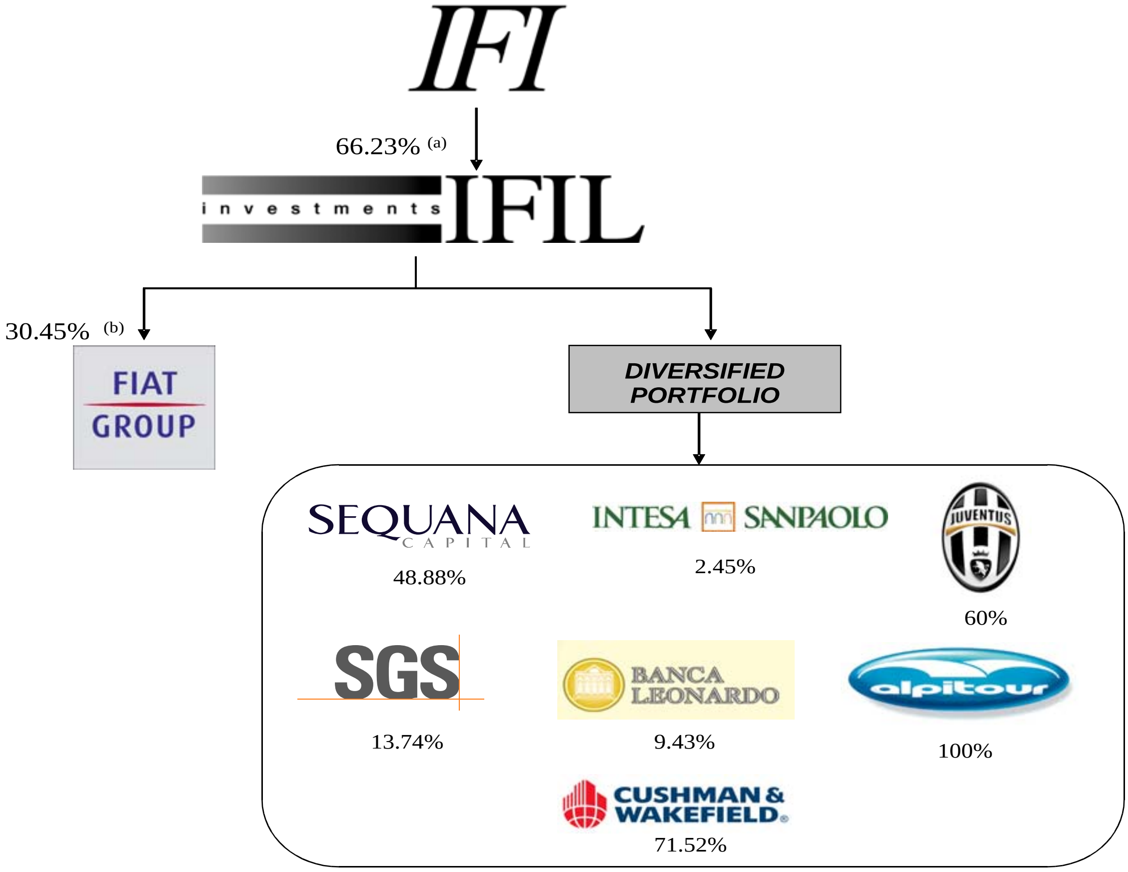
Gruppo Banca Leonardo S.p.A. (9.43% holding by Ifil Investissements S.A.) is an independent investment bank offering corporate finance advisory and asset management services, in addition to private equity services, under a joint venture with a leading European group.

Alpitour S.p.A. (100% holding by IFIL S.p.A.) is the leading group in the tourist sector in Italy. It operates with a vast range of integrated services (tour operating, hotel, aviation, distribution, incoming and Incentive e Grandi Eventi). In 2006, the Alpitour Group managed the accommodations of the Olympic Family at Turin Winter Olympics 2006.

Juventus Football Club S.p.A. (60% holding by IFIL S.p.A.) is listed on the Electronic Share Market of the Italian stock exchange (Star segment). Founded in 1897, it is one of the most important professional soccer teams in the world and boasts the largest number of fans in Italy and the highest number of total sports victories of all the Italian soccer teams, in both national and international competition.

At the end of March 2007, Ifil Investissements purchased control (71.52%) of the **Cushman & Wakefield (C&W) Group** which is the largest private company for real estate services. The C&W Group has its headquarters in New York, where it was founded in 1917, and now has 197 offices and 11,500 employees in 55 countries.

The following chart is updated to the end of March 2007 and presents the simplified structure of the investment portfolio. Percentage holdings refer to ordinary capital stock.



(a) IFI also holds 4.99% of IFIL savings capital stock. Giovanni Agnelli e C. S.a.p.az. also holds 3% of IFIL ordinary capital stock.
(b) IFIL also holds 30.09% of Fiat preferred capital stock.

FINANCIAL COMMUNICATIONS AND INVESTOR RELATIONS

In 2006, IFI has continued activities surrounding relations with the financial community, the stockholders, the financial analysts and the institutional investors during the course of the year, also, where requested, through individual meetings.

Relations with the national and international media were backed by the corporate website www.gruppoifi.com in which information about the company, press releases, annual financial statements and quarterly reports and the first-half report is published on a timely basis.

In total, approximately 800 copies (in Italian and English) of the annual report, the first-half report and the quarterly reports have been distributed, and are also available on request.

MAJOR EVENTS IN 2006 AND IN THE FIRST QUARTER OF 2007

Sale of the investment in Exor Group

On April 7, 2006, following the resolution passed by the board of directors' meeting on March 31, 2006, IFI S.p.A. sold the entire investment in Exor Group (3,418,242 shares representing 29.3% of capital stock) to the same Exor Group. Given that the transaction was between related parties, Citigroup Global Markets Limited was appointed as advisor and checked the fairness of the sales price, equal to € 206.8 million (€ 60.5 per share). The sale resulted in a gain of € 104 million for IFI S.p.A. (a gain of € 7.3 million on consolidation) and a significant reduction in debt.

On May 4, 2006, Exor Group canceled the treasury stock thus purchased, with a consequent reduction in capital stock.

Increase of the investment in IFIL

During 2006, IFI purchased on the market 14,708,160 IFIL ordinary shares, equal to 1.42% of the class of stock for an investment of € 66.9 million. At December 31, 2006, IFI holds 675,200,000 IFIL ordinary shares, equal to 65.01% of the class of stock and 1,866,420 IFIL savings shares, equal to 4.99% of the class of stock. The investment represents 62.92% of capital stock.

In the first quarter of 2007, IFI purchased on the market 12,705,000 IFIL ordinary shares (1.22% of the class of stock) for an investment of € 84.6 million.
IFI currently holds 687,905,000 IFIL ordinary shares, equal to 66.23% of the class of stock and 1,866,420 IFIL savings shares, equal to 4.99% of the class of stock. The investment represents 63.93% of capital stock.

Consob sanctionary measure

On February 13, 2007, the meeting of the board of directors of the company, which was presided over by the vice chairman (vicario) John Elkann, was notified of the Consob sanctionary measure against Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone with regard to the contents of the press releases dated August 24, 2005 released by IFIL Investments S.p.A. and Giovanni Agnelli e C. S.a.p.az..

The board of directors of IFI S.p.A., which did not take part owing to the reference to some of its members, expressed its full support to the above persons.
Additional information is provided in the comments on the operating performance of IFIL Investments S.p.A..

BUSINESS OUTLOOK

For the year 2007, IFI S.p.A. is expected to report a profit.

On the basis of the indications formulated by the IFIL Group for 2007, the IFI Group is expected to show a consolidated profit.

IFI S.p.A. – REVIEW OF THE RESULTS OF THE SEPARATE FINANCIAL STATEMENTS

Introduction

Following the coming into force of European Regulation 1606 dated July 19, 2002 and the national laws implementing that Regulation, pursuant to article 4 of Legislative Decree 38 dated February 28, 2005, starting from January 1, 2006 IFI S.p.A. has adopted International Financial Reporting Standards ("IFRS") in the preparation of its separate financial statements (previously referred to as statutory financial statements).

Consequently, the figures in the separate financial statements for the year ended December 31, 2005, prepared in accordance with Italian accounting principles (Italian GAAP), have been adjusted and reclassified on the basis of IFRS for purposes of comparison with the year 2006.

Additional information on the adoption of IFRS and on the effects of their adoption on the published 2005 statutory financial statements are presented in Note 2 to the separate financial statements at December 31, 2006 and in the specific Appendix – Transition to International Financial Reporting Standards (IFRS) by IFI S.p.A..

The condensed income statement and balance sheet and comments on the most important items are presented below.

(a) Prepared in accordance with IFRS.

The year 2006 shows a profit of € 217.6 million, € 69.6 million of which is the net amount deriving from the impairment reversal on the investment held in IFIL (€ 73.5 million) and the accrual for the related deferred taxes (-€ 3.9 million) and, an additional amount of € 104 million from the gain on the sale of the investment in Exor Group to the same Exor Group.

The result of the prior year, adjusted in accordance with IFRS, amounted to € 38.5 million.

1. Dividends from investments

Dividends from investments in 2006 amount to € 54.3 million and were collected almost entirely from IFIL.
In 2005, the amount of € 55.9 million included the dividends collected from IFIL (€ 45.3 million) and from Exor Group (€ 10.6 million).

2. Gain on sale of investment

The gain on sale of investment amounts to € 104 million and is due to the previously-mentioned sale of 29.3% of the capital of Exor Group to the same Exor Group at the price of € 206.6 million, net of costs to sell of € 0.2 million.

3. Impairment reversals on investments

Impairment reversals on investments refer exclusively to 138,426,775 IFIL ordinary shares which in 2002 had been written down on the basis of their stock market price. The impairment has been totally reversed up to the original cost of the purchase for an amount of € 73.5 million.

Deferred taxes were recorded on this impairment reversal for € 3.9 million (5.28% of the impairments deductible in the year 2002).

4. Net financial expenses

Net financial expenses of € 5.4 million decreased by € 3.6 million compared to 2005 (€ 9 million) due to a significant reduction in debt as a result of the sale of the investment in Exor Group.

5. Other non-current expenses

In 2005, the amount of € 5 million referred to the extraordinary compensation approved for the chairman.

6. Investments

Details are as follows:

€ in millions	**12/31/2006**	12/31/2005	Change
Accounted for at cost			
IFIL S.p.A. (ordinary shares)	**1,872.1**	1,731.7	140.4
IFIL S.p.A. (savings shares)	**6.4**	6.4	0.0
	1,878.5	1,738.1	140.4
Exor Group S.A. (ordinary shares)	**0.0**	102.6	(102.6)
Other investments	**0.4**	0.4	0.0
Total investments	**1,878.9**	1,841.1	37.8

The increase of € 37.8 million in the carrying amount of the investments is due to the following movements:

€ in millions	
Investments at December 31, 2005	**1,841.1**
Purchase of 14,708,160 IFIL ordinary shares (1.42% of the class of stock)	66.9
Impairment reversals on IFIL ordinary shares	73.5
Sale of a 29.3% stake in Exor Group to the same Exor Group	(102.6)
Net change during the year	**37.8**
Investments at December 31, 2006	**1,878.9**

The comparison between carrying amounts and market prices of IFIL S.p.A. shares held at December 31, 2006 is as follows:

	Number of shares held	Carrying amount		Market price December 29, 2006		Market price March 23, 2007	
		Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)
IFIL S.p.A.							
- ordinary shares	675,200,000	2.77	**1,872.1**	6.19	**4,177.5**	7.22	**4,876.3**
- savings shares	1,866,420	3.42	**6.4**	4.92	**9.2**	6.81	**12.7**
Total			**1,878.5**		**4,186.7**		**4,889.0**

7. Equity

At December 31, 2006, equity is equal to € 1,793.7 million (€ 1,574.5 million at December 31, 2005). The positive change of € 219.2 million is due to the profit for the year (+€ 217.6 million) and other net changes (+€ 1.6 million).

8. Net financial position

Details are as follows:

€ in millions	**12/31/2006**	12/31/2005	Change
Cash and cash equivalents	**59.7**	0.1	59.6
Other financial assets, current and non-current	**3.9**	2.1	1.8
Bank debt, current and non-current	**(160.3)**	(264.8)	104.5
Debt with related parties	**0.0**	(13.9)	13.9
Current other financial liabilities	**(0.8)**	(1.2)	0.4
Net financial position	**(97.5)**	(277.7)	180.2

The positive change of € 180.2 million in 2006 is due to the following cash flows:

€ in millions	
Net financial position at December 31, 2005	**(277.7)**
Dividends collected	54.3
Net financial expenses	(5.4)
Net general expenses	(4.9)
Sale of a 29.3% stake in Exor Group to the same Exor Group, net of costs to sell	206.6
Purchase of 14,708,160 IFIL ordinary shares	(66.9)
Other net changes	(3.5)
Net change during the year	**180.2**
Net financial position at December 31, 2006	**(97.5)**

9. Reconciliation between the data of the separate financial statements of IFI S.p.A. and the consolidated financial statements of the Group

The following reconciliation of the profit for the year and the equity in the separate financial statements of IFI S.p.A. for the year ended December 31, 2006 and the corresponding figures in the consolidated financial statements of the IFI Group at the same date are presented as required by Consob Communication 6064293 dated July 28, 2006.

€ in millions	**Profit**	**Equity**
Separate financial statements of IFI S.p.A.	**218**	**1,794**
Difference between the carrying amounts of investments and corresponding equity at the end of the prior year		**1,509**
Net balance between the changes during the year in the equity of consolidated companies and companies accounted for by the equity method (excluding the result)		**494**
Share of the profit (loss) of consolidated companies and companies accounted for by the equity method, net of consolidation adjustments	**222**	**222**
Elimination of dividends collected from consolidated companies and companies accounted for by the equity method	**(54)**	**(54)**
Elimination of impairment losses and reversals on consolidated investments and companies accounted for by the equity method	**(70)**	**(70)**

Other consolidation adjustments	**2**	**2**
Consolidated financial statements of the IFI Group (attributable to the equity holders of the company)	**221**	**3,800**

10. Reconciliation between the net financial position of IFI S.p.A. and the consolidated net financial position

€ in millions	**12/31/2006**	12/31/2005	Change
Net financial position of IFI S.p.A.	**(98)**	(278)	180
Net liquidity of the IFIL Holdings System	**386**	348	38
Net financial position of companies consolidated line-by-line:			
- Sequana Capital Group	**(380)**	(441)	61
- Alpitour Group	**(29)**	(78)	49
- Juventus Football Club S.p.A.	**(75)**	(38)	(37)
Consolidated net financial position	**(196)**	(487)	291

The composition of the consolidated net financial position is presented in Note 27 to the IFI Group consolidated financial statements.

IFI GROUP – REVIEW OF THE CONSOLIDATED RESULTS

In order to facilitate the analysis of the equity and financial position and the results of operations of the Group, it is IFI's practice to present financial statements (balance sheet and income statement) prepared by accounting for the investments in the subsidiaries (IFIL) and associates (Exor Group, until December 31, 2005) by the equity method in the separate financial statements or in the separate accounting situations of IFI S.p.A.. This method consists of presenting a condensed representation of the consolidated results of the IFI Group. Such consolidated financial statements are presented along with the annual consolidated financial statements and the interim consolidated financial statements for the first-half of each year. The quarterly consolidated data is also presented in the same format in the quarterly reports at March 31 and September 30 of each year.

The income statement and balance sheet below are prepared by accounting for the investments in the subsidiaries (IFIL) and associates (Exor Group, until December 31, 2005) by the equity method; these statements are referred to as the "Condensed consolidated income statement" and the "condensed consolidated balance sheet". Comments are only made in respect of items which differ from the separate financial statements of IFI S.p.A..

IFI Group – Condensed consolidated income statement

€ in millions	Note	**2006**	2005	Change
Share of the profit (loss) of companies accounted for by the equity method	2	**222.0**	693.0	(471.0)
Gain on the sale of the investment in Exor Group		**7.3**	0.0	7.3
Dividends from other investments		**0.1**	0.1	0.0
Net financial expenses		**(5.4)**	(9.0)	3.6
Net general expenses		**(4.9)**	(4.8)	(0.1)
Other non-current income (expenses)		**0.0**	(5.0)	5.0
Income taxes		**2.3**	1.3	1.0
Profit attributable to the equity holders of the company		**221.4**	675.6	(454.2)

1. **Consolidated profit attributable to the equity holders of the IFI Group**
The consolidated profit attributable to the equity holders of the IFI Group for 2006 amounts to € 221.4 million and decreased by € 454.2 million compared to 2005 (€ 675.6 million) which, however, had included significant net nonrecurring income recognized by the IFIL Group.

2. **Share of the profit (loss) of companies accounted for by the equity method**
The share of the profit (loss) of companies accounted for by the equity method at December 31, 2006 is € 222 million (€ 693 million in 2005). The negative change of € 471 million is primarily due to a lower contribution by the IFIL Group (€ 460.4 million) which, as mentioned above, in 2005 had included significant net nonrecurring income.

Details are as follows:

€ in millions	Profit (loss) 2006	Profit (loss) 2005	IFI's share 2006	IFI's share 2005	Change
IFIL Group	**341.0**	1,090.0	**217.6**	680.2	(462.6)
Consolidation adjustments			**4.4** (a)	2.2 (b)	2.2
Total IFIL Group			**222.0**	682.4	(460.4)
Exor Group (c)	**-**	36.2	**0.0**	10.6	(10.6)
Total			**222.0**	693.0	(471.0)

(a) Of which € 4.9 million is due to the excess in the increase of IFI's share of the consolidated equity of the IFIL Group compared to the cost of IFIL shares purchased during the year and -€ 0.5 million for other minor adjustments.

(b) Of which € 1.5 million is due to the excess of the increase in IFI's share of the consolidated equity of the IFIL Group compared to the cost of the IFIL shares purchased during the year and € 0.7 million for other minor adjustments.

(c) The investment was sold on April 7, 2006.

Comments on the operating performance of the IFIL Group are presented in the next section.

3. Investments accounted for by the equity method

The carrying amount of investments accounted for by the equity method is € 3,880.8 million at December 31, 2006. The increase of € 528.4 million compared to the end of 2005 (€ 3,352.4 million) is due to purchases of IFIL shares made in 2006 (+€ 66.9 million), IFI's share (+€ 660.8 million) of the changes in the equity of the IFIL Group and the sale of the investment in Exor Group (- € 199.3 million).

Details are as follows:

	Carrying amount				
	12/31/2006		12/31/2005		
€ in millions	**Per share (€)**	**Total**	Per share (€)	Total	Change
IFIL Group					
- ordinary shares	**5.73**	**3,870.1**	4.76	3,144.2	725.9
- savings shares	**5.73**	**10.7**	4.76	8.9	1.8
		3,880.8		3,153.1	727.7
Exor Group (a)		**0.0**	58.3	199.3	(199.3)
Total		**3,880.8**		3,352.4	528.4

(a) The investment was sold on April 7, 2006.

4. Equity attributable to the equity holders of the company

The consolidated equity attributable to the equity holders of the company at December 31, 2006 amounts to € 3,799.8 million (€ 3,084 million at the end of 2005). The increase of € 715.8 million is the result of the consolidated profit attributable to the equity holders of the company for the year (+€ 221.4 million) and other net changes (€ 494.4 million).

The changes during the year are analyzed as follows:

€ in millions	
Equity attributable to the equity holders of the company at December 31, 2005	**3,084.0**
Share of the translation differences (-€ 86.5 million) and other net changes (+€ 579.3 million) shown in the equity of the subsidiary IFIL	492.8
Other net changes	1.6
Profit attributable to the equity holders of the company	221.4
Net change during the year	**715.8**
Equity attributable to the equity holders of the company at December 31, 2006	**3,799.8**

5. Reconciliation between the consolidated financial statements prepared by accounting for the investments in subsidiaries and associates by the equity method and the IFI Group consolidated financial statements prepared in accordance with IFRS

The first column ("Condensed consolidation") presents the data that has been commented on in the preceding pages reclassified according to the consolidated financial statement format.

The column ("Elimination of IFIL" investment) shows the adjustments necessary to eliminate the carrying amount of the investment in IFIL and the share of the results of this investment in order to arrive at the line-by-line consolidation of the consolidated financial statements of IFIL Group, shown in the specific column.

The company has prepared the programming document on security on December 14, 2006 for the year 2006 according to the provisions of Legislative Decree 196 dated June 30, 2003, attachment B – technical specifications regarding minimum safety measures. The document has been drawn up by the person in charge of the treatment of the data.

REVIEW OF THE OPERATING PERFORMANCE OF THE SUBSIDIARY IFIL INVESTMENTS S.p.A.

(66.23% of ordinary capital stock)

The consolidated data of the IFIL Group at December 31, 2006, commented below, is taken from the condensed consolidated balance sheet and income statement.

This data has been prepared by consolidating the holdings and services companies which constitute the "Holdings System" on a line-by-line basis and accounting for the other operating subsidiaries and associates (Fiat Group, Sequana Capital Group, Alpitour Group, Juventus F.C. and Turismo&Immobiliare) by the equity method.

€ in millions	**2006**	2005	Change
Profit attributable to the equity holders of the company	**341.5**	1,090.0	(748.5)
Equity attributable to the equity holders of the company	**6,222.3**	5,186.0	1,036.3
Consolidated net financial position - Holdings System	**386.2**	348.3	37.9
Investments and other non-current financial assets	**5,855.3**	4,815.1	1,040.2

The **IFIL consolidated profit attributable to the equity holders of the company** for the year 2006 is € 341.5 million. This is a reduction of € 748.5 million compared to the profit reported for the year 2005 (€ 1,090 million) which, however, had included significant nonrecurring income realized directly (the gain of € 459.1 million realized on the sale of the investment in La Rinascente) and through the Fiat Group (€ 482.7 million at the IFIL level) and the Sequana Capital Group (€ 266 million at the IFIL level).

The following tables present the condensed consolidated income statement and balance sheet and comments on the most important items.

1. Share of the profit (loss) of companies accounted for by the equity method

The share of the profit (loss) of companies accounted for by the equity method is € 293.2 million (€ 622 million in 2005). The negative change of € 328.8 million is primarily due to lower contributions by the Sequana Capital Group (-€ 199.4 million) and the Fiat Group (-€ 144.4 million) which, as mentioned previously, included significant net nonrecurring income in 2005.

	Profit (loss)		IFIL' share

(a) Mainly for the assignment of preferred dividends for the years 2004, 2005 and 2006 to minority stockholders.

(b) Of which € 54.8 million is due to the excess of the increases of IFIL's share of the consolidated equity of the Fiat Group deriving from the Fiat capital stock increase subscribed to by minority stockholders (+€ 605.4 million) and the increase in the percentage of consolidation, equal to 0.54% (+€ 29.2 million), compared to the costs incurred for the purchase of 87,500,000 Fiat ordinary shares (-€ 580.2 million), net of the sale of the rights on the ordinary and preferred shares (+€ 0.4 million).

(c) For the elimination of the after-tax gain deriving from the Sequana Capital/SGS Exchange and Purchase Offering (-€465.8 million) and for the diluting effect of the reduction in the percentage of ownership (-€ 28.3 million).

(d) Adjustment of the gain on the sale of the investment in Permal Group, due to the different carrying amount in IFIL.

(e) Data for the period November 1 – October 31.

(f) Data for the period January 1 – December 31 prepared for the purposes of consolidation in IFIL.

2. Dividends from investments

Dividends from investments in 2006 amount to € 53 million and were entirely collected from Sanpaolo IMI (€ 43.7 million in 2005).

3. Other non-current income (expenses)

Other non-current income (expenses) include the accrual for the administrative sanction of € 4.5 million levied on the company by Consob in relation to the content of the press release dated August 24, 2005, the cost of € 3.1 million referring to the current year for the stock option plan approved for management of the subsidiary Alpitour, as well as the release of the provision set aside in prior years for the Alpitour stock option plan 2000 which was not exercised by the expiration date of August 31, 2006 (+€ 7.8 million).
In 2005, the amount included extraordinary compensation approved for the chairman (€ 15 million) and former chief executive officer (€ 3.8 million) of IFIL S.p.A. and the expenses for that year (€ 1.7 million) relating to the stock option plans with underlying IFIL stock which expired in 2006.

Total other non-current financial assets	**2,563.5**	1,238.3	1,325.2

(a) Sold in 2006.

The investment in SGS S.A. (13.16% of capital stock) was initially recorded at the carrying amount at which the investment had been recognized in the consolidated financial statements of the Sequana Capital Group before the Public Exchange and Purchase Offer, equal to € 361.6 million, and was classified in "investments available-for-sale". At December 31, 2006, the investment was measured at fair value on the basis of the stock market price at the end of the year and the unrealized gain (€ 508.4 million) was recognized in equity.

The original purchase cost of the investment in Sanpaolo IMI is € 883.4 million. In the years 2005 and 2006, the overall fair value adjustment to the investment totals € 756.9 million.

6. Comparison between carrying amounts and market prices of listed investments and other listed financial assets

Details are as follows:

	Number of shares held	Carrying amount		Market price at December 29, 2006		Market price at March 23, 2007		
		Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)

Total			**5,732.4**		**8,376.1**		**10,109.3**	

(a) This refers to the valuation of 289,916,165 Intesa Sanpaolo S.p.A. shares.

7. Equity attributable to the equity holders of the company

Details are as follows:

€ in millions	**12/31/2006**	12/31/2005	Change
Capital and reserves	**6,270.8**	5,238.1	1,032.7
Treasury stock	**(48.5)**	(52.1)	3.6
Total	**6,222.3**	5,186.0	1,036.3

The changes during the year are analyzed as follows:

€ in millions	
Equity attributable to the equity holders of the company at December 31, 2005	**5,186.0**
Fair value adjustment of the investment in Sanpaolo IMI (+€ 411.7 million, net of -€ 48.2 million of deferred taxes) and the investment in SGS (+€ 508.4 million)	871.9
Share of translation differences (-€ 140.7 million) and other net changes (+€ 49.3 million) shown in the equity of the companies accounted for by the equity method	(91.4)
Dividends paid out by IFIL S.p.A.	(85.7) (a)
Profit attributable to the equity holders of the company	341.5
Net change during the year	**1,036.3**
Equity attributable to the equity holders of the company at December 31, 2006	**6,222.3**

(a) Net of € 0.1 million of intragroup dividends.

At December 31, 2006, IFIL S.p.A. holds, directly and indirectly, the following treasury stock:

	Number of IFIL ordinary shares	% of class of stock	% of capital stock	Amount	
				Per share (€)	Total (€ ml)
Held by IFIL S.p.A.	12,402,998	1.19	1.15	3.68	45.7
Held by the subsidiary Soiem S.p.A.	810,262	0.08	0.08	3.41	2.8
Balance at December 31, 2006	**13,213,260**	**1.27**	**1.23**	**3.67**	**48.5**

As a result of the exercise of the options granted in prior years, in 2006, 1,382,780 IFIL ordinary shares were sold to the grantees of stock option plans for net proceeds of € 5.3 million and a gain of € 1.7 million which was recognized directly as an increase in equity.

8. Consolidated net financial position of the “Holdings System”

The consolidated net financial position of the “Holdings System” at December 31, 2006 is a cash position of € 386.2 million. This is an increase of € 37.9 million compared to the cash position at the end of 2005 (€ 348.3 million).

The consolidated net financial position of the “Holdings System” is composed as follows:

	12/31/2006			12/31/2005		
€ in millions	**Current**	**Non-current**	**Total**	Current	Non-current	Total
Financial assets	**857.1**	**0.2**	**857.3**	793.3	0.3	793.6
Cash and cash equivalents	**5.7**	**0.0**	**5.7**	4.2	0.0	4.2
Total financial assets	**862.8**	**0.2**	**863.0**	797.5	0.3	797.8
Bonds	**0.0**	**(199.2)**	**(199.2)**	(99.8)	0.0	(99.8)
Bank and other debt	**(277.6)**	**0.0**	**(277.6)**	(349.7)	0.0	(349.7)
Total financial liabilities	**(277.6)**	**(199.2)**	**(476.8)**	(449.5)	0.0	(449.5)
Consolidated net financial position of the “Holdings System”	**585.2**	**(199.0)**	**386.2**	348.0	0.3	348.3

Current financial assets amount to € 857.1 million (€ 793.3 million at the end of 2005) and principally include investments in time deposits, in bonds and in other short-term financial instruments.

The positive change of € 37.9 million during the year is due to the following flows:

€ in millions		
Consolidated net financial position of the “Holdings System” at December 31, 2005		**348.3**
Dividends collected from:		
- Sequana Capital	184.5	
- Sanpaolo IMI	53.0	
		237.5
Dividends paid out by IFIL S.p.A.		(85.7) (a)
Investment made in Gruppo Banca Leonardo S.p.A. (9.6% of capital stock)		(47.0) (b)
Investment made in Fiat ordinary shares (0.39% of class of stock)		(62.3)
Other net changes:		
- Other net financial income (expenses)	19.2	
- Net general expenses	(23.2)	
- Other changes	(0.6)	
		(4.6)
Net change during the year		**37.9**
Consolidated net financial position of the “Holdings System” at December 31, 2006		**386.2**

(a) Net of € 0.1 million of intragroup dividends.
(b) Includes transaction costs of € 0.4 million.

At December 31, 2006 IFIL S.p.A. has irrevocable credit lines for € 830 million, of which € 420 million is due by December 31, 2007 and € 410 million at later expiration dates.

The rating assigned by Standard & Poor's to IFIL's long-term debt is “BBB+”, whereas the rating on short-term debt is “A-2”, both with a stable outlook.

9. Reconciliation between the consolidated net financial position of the “Holdings System” and under line-by-line consolidation

€ in millions	**12/31/2006**	12/31/2005	Change
Consolidated net financial position - "Holdings System"	**386**	348	38
Net financial debt of the companies consolidated line-by-line			
- Sequana Capital Group	**(380)**	(441)	61
- Alpitour Group	**(29)**	(78)	49
- Juventus Football Club S.p.A.	**(75)**	(38)	(37)
Consolidated net financial position - line-by-line consolidation	**(98)**	(209)	111

The parent, IFIL S.p.A., closed the year 2006 with a profit of € 625.3 million, € 620.1 million of which is the net amount deriving from the impairment reversal on the investment held in Fiat (€ 645.3 million) and the accrual for the related deferred taxes (-€ 25.2 million)

The board of directors' meeting on March 30, 2007 put forward a motion for distribution of dividends of € 0.1 per ordinary share and € 0.1207 per savings share for a maximum total of € 108.4 million.
IFI S.p.A.'s share of the dividends amounts to € 69 million.

The major events in 2006 and in the first quarter of 2007 are presented below.

Investment in Gruppo Banca Leonardo S.p.A.

On April 24, 2006, after receiving authorization from the competent authority, the subsidiary Ifil Investissements purchased 14,200,000 Gruppo Banca Leonardo S.p.A. Class A shares, equal to 9.6% of the current capital stock of the bank, for an investment of € 47 million, including transaction costs of € 0.4 million.

Non-convertible bond issue

On June 9, 2006, following the resolution passed by the board of directors' meeting on May 12, 2006, IFIL S.p.A. issued non-convertible bonds for a face value of € 200 million maturing June 9, 2011. The issue price was 99.9% of face value and interest is quarterly at the 3-month Euribor plus a spread of 68 basis points. Standard & Poor’s rated the bonds BBB+, which is the also current rating of IFIL S.p.A.'s long-term debt. The bonds were admitted to trading on the Luxembourg stock exchange. The sole Lead Manager was Rasfin SIM S.p.A..

Increase of the investment in Fiat S.p.A.

In November and December 2006, IFIL S.p.A. purchased 4,254,000 Fiat ordinary shares (0.39% of the class of stock) on the market for an investment of € 62.3 million.
IFIL S.p.A. now holds 332,587,447 Fiat ordinary shares equal to 30.45% of the class of stock and 31,082,500 Fiat preferred shares equal to 30.09% of the class of stock. The investment represents 28.513% of current Fiat capital stock.

Public Exchange and Purchase Offer launched by the subsidiary Sequana Capital

On September 6, 2006, the board of directors of the subsidiary Sequana Capital approved the project to place Sequana Capital's focus on the paper sector (in which it operates through the wholly-owned subsidiaries Arjowiggins and Antalis). Consequently, it launched the Public Exchange Offering for a maximum of 57,646,980 Sequana Capital shares (54.31% of capital stock at August 1, 2006) in exchange for a maximum of 1,859,580 SGS shares (23.8% of capital stock) held by Sequana Capital itself, in a ratio of 1 SGS share for every 31 Sequana Capital shares tendered in the Offering. Alternatively, the stockholders could have chosen to tender their shares to the Public Purchase Offering and receive the price of € 21 in cash for each Sequana Capital share sold to the company.

The offering period, approved by the French stock exchange authority and the special stockholders' meeting held on October 30, 2006, ended on November 28, 2006 with 100,548,993 Sequana Capital shares tendered (equal to 94.2% of the shares outstanding), of which 100,330,857 were tendered in the Exchange Offering and 218,136 in the Purchase Offering.
After the allocation, 57,521,414 shares were accepted for the Exchange Offering and 125,566 shares for Purchase Offering.

Finally, on December 14, 2006, the board of directors of Sequana Capital reduced capital stock to € 73,679,608.5 (represented by 49,119,739 shares of par value € 1.5 each) by canceling 57,646,980 shares tendered in the offerings.

Under the offer which was finalized on December 18, 2006, the subsidiary Ifil Investissements tendered 31,913,141 Sequana Capital shares obtaining in exchange 1,029,456 SGS shares (13.16% of capital stock).
The investment in Sequana Capital (represented by 24,009,482 shares) decreased from 52.68% to 48.88%.

Agreement for the acquisition of the controlling interest in the Cushman & Wakefield Group

On December 19, 2006, the subsidiary Ifil Investissements reached an agreement for the purchase of the controlling interest in Cushman & Wakefield (C&W), replacing Rockefeller Group International Inc., an international investment and property development company.

On March 30, 2007, after receiving the authorizations from the competent authorities, Ifil Investissements finalized this agreement by purchasing 71.52% of the capital stock of Cushman & Wakefield for an investment of $ 625 million (€ 474 million), in addition to transaction costs. The remaining 28.48% stake is held by C&W management and employees.

The acquisition was financed by Ifil Investissements' cash resources with no additional leverage assumed by C&W, ensuring that it retains complete financial flexibility with respect to its future growth objectives. For the IFIL Group, the investment represents a unique opportunity to acquire a majority position in what is widely regarded as the commercial real estate sector's foremost brand. C&W is led by one of the sector's most experienced management teams and operates in a growing, fragmented and consolidating services sector that presents excellent prospects for growth, both organically and through acquisitions. This transaction represents an important step in the IFIL Group's plans to continue diversifying its assets across a range of sectors, geographies and currencies.

The investment provides C&W with a new long-term stockholder with a proven track record of supporting the management teams of its portfolio as they define and implement successful growth and development plans. The transaction provides C&W with continuity of both management and strategy.

The C&W board of directors will consist of Carlo Sant'Albano, Alessandro Potestà, Michael Bartolotta and Pierre Martinet from the IFIL Group and Bruce Mosler, John Cushman and John Santora, managers from C&W.

C&W is headquartered in New York, where it was founded in 1917, and is the world's pre-eminent privately held services firm. It is present in 55 countries across the globe with 197 offices and 11,500 employees. In 2006, consolidated revenues totaled $ 1.5 billion, an increase of 23% over the prior year, an EBITDA of $ 119 million and a consolidated profit of $ 40 million.

C&W provides real estate services to 75% of the Fortune 500 and has a diverse customer base. C&W offers a complete range of services for the real estate sector, split into four main areas of activity: Transaction Services – tenant and landlord representation in office, industrial and retail estate; Capital Markets – property sales, investment management of properties, investment banking and valuation services; Client Solutions – real estate strategies and related services to large corporations and property owners and Consulting Services – business and real estate consulting.

In 2006, C&W negotiated more than $ 32 billion in leasing transactions and approximately $ 50 billion in property sales. C&W has valued over $ 500 billion of property in 2006 and is the most important Group in the world. The firm has more than 430 million square feet of property under management, making it one of the largest global property managers. In 2005, C&W launched its “Fast Forward” growth strategy to restructure its business, diversify its services and expand its geographic reach. Its strategy is focused on extending C&W's business in Europe and in the Asia-Pacific region with the aim of generating 50% of its revenues from outside the United States by 2011, and on increasing its presence in the investment services sector.
In the past two years C&W has consolidated its position in Mexico by taking full control of its operation there, acquired its Russian and Canadian market leader affiliates, respectively Stiles & Riabokobylko and Royal LePage, and announced plans to open an office in Finland. The company is also continuing to expand in India, China and throughout Asia.
The United States remains a core market and continues to present opportunities: the top five real estate service providers, including C&W, control only 14% of the $ 23 billion United States commercial property services market affording plenty of scope for growth.

Merger of Sanpaolo IMI S.p.A. in Banca Intesa S.p.A.

On December 28, 2006, the deed of merger of Sanpaolo IMI S.p.A. in Banca Intesa S.p.A. was signed and became effective for legal purposes on January 1, 2007.
At December 31, 2006, IFIL S.p.A. held 93,071,000 Sanpaolo IMI ordinary shares (5.85% of ordinary capital stock and 4.96% of capital stock); IFIL S.p.A. received for those shares a total of 289,916,165 Intesa Sanpaolo S.p.A. ordinary shares (2.45% of ordinary capital stock and 2.27% of capital stock).
Effective January 1, 2007, the capital stock of Intesa Sanpaolo S.p.A. is € 6,646,436,318.6 and is composed of 11,849,117,744 ordinary shares and 932,490,561 non-convertible savings shares, all with a par value of € 0.52.

Consob sanctionary measure
On February 13, 2007, the Consob sanctionary measure (Resolution 15760) was notified with regard to the contents of the press releases issued by IFIL S.p.A. and by Giovanni Agnelli e C. S.a.p.az. on August 24, 2005 and applies the following pecuniary administrative sanctions:

- to Gianluigi Gabetti (chairman of IFIL S.p.A. and chairman of Giovanni Agnelli e C. S.a.p.az.) € 2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL S.p.A. and € 2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C. S.a.p.az;

- to Franzo Grande Stevens (director of IFIL S.p.A.) € 2 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL S.p.A. and € 1 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C. S.a.p.az;

- to Virgilio Marrone (chief executive officer and general manager of IFI S.p.A.) € 500 thousand in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C. S.a.p.az;

- to IFIL S.p.A. € 4.5 million;

- to Giovanni Agnelli e C. S.a.p.az. € 3 million;

and the additional following administrative sanctions: temporary inability to assume positions of administration, direction and control in listed companies or in companies that are part of the same group of listed companies:

- to Gianluigi Gabetti: for six months
- to Franzo Grande Stevens: for four months
- to Virgilio Marrone: for two months

On the same date, the meeting of the board of directors, presided over by the vice chairman (vicario) John Elkann, took note of the sanctionary measure with surprise and disappointment and declared that Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone had its full support.
The individuals and companies mentioned in the sanctionary measure filed an appeal with the Turin Court of Appeals on February 28, 2007 together with a request for the suspension of the measure on serious grounds.

IFIL S.p.A. has accrued the pecuniary sanction of € 4.5 million in the separate and consolidated financial statements for the year ended December 31, 2006.

A preliminary investigation by the Turin District Attorney's office is currently underway concerning the same facts as the Consob sanctionary measure.

Juventus Football Club S.p.A. capital increase
On March 14, 2007, the board of directors of Juventus Football Club S.p.A. examined and unanimously approved the medium term development plan aimed at relaunching the company from the standpoint of sports excellence, developing commercial activities and strengthening the financial and equity positions.

In order to finance the development plan, the board of directors voted to put forward a motion to the stockholders' meeting called for April 20, 2007 to increase the capital stock by approximately € 104.8 million through the issue of 80,621,332 shares (to be offered to the stockholders as option rights in a ratio of 2 new shares for every 3 shares held) at the issue price of € 1.30 per share (of which € 1.20 is the share premium).

IFIL Investment S.p.A., in agreeing with the objectives of the medium term development plan, will subscribe to its share, equal to € 62.9 million.

Gruppo Banca Leonardo S.p.A. capital increase

In February 2007, the subsidiary Ifil Investissements S.A. declared its irrevocable intention to exercise the right to subscribe to its share of the Gruppo Banca Leonardo capital increase, equal to 11,055,537 shares for an investment of € 36.3 million. The new shares will be issued, subscribed to and fully paid-in on April 30, 2007.

Increase in the investment in SGS S.A.

In March 2007, the subsidiary Ifil Investissements S.A. purchased 45,364 SGS shares on the market for an investment of € 39.5 million, increasing its stake from 13.16% to 13.74%.

Sale of the investment in Turismo&Immobiliare

On March 26, 2007, the subsidiary Ifil Investissements reached an agreement for the sale of the investment in Turismo&Immobiliare, the company which holds a 49% stake in Italia Turismo, the largest real estate operator in the tourism-incoming sector in Italy which has significant investments in the south of Italy.

Pursuant to the agreement, Ifil Investissements will sell its 25% holding in Turismo&Immobiliare to the Marcegaglia Group, Pirelli RE and Gabetti Property Solutions for € 5.2 million.

The closing of the transaction, which is subject to approval by the competent authorities, is expected to take place in June 2007.

Business outlook

For the year 2007, IFIL S.p.A is expected to report a profit.

Taking into account the forecasts formulated by the major holdings, a profit is forecast in the IFIL Group consolidated financial statements for 2007.

MOTION FOR THE APPROVAL OF THE SEPARATE FINANCIAL STATEMENTS AND THE APPROPRIATION OF THE PROFIT FOR THE YEAR

We invite you to approve the separate financial statements for the year ended December 31, 2006.
In view of the fact that the board of directors has waived, by specific resolution, the share of the profits to which it is entitled pursuant to art. 27 of the bylaws and that the legal reserve amounts to one-fifth of capital stock, we propose the appropriation of the profit for the year of € 217,624,583 to the extraordinary reserve.

Turin, March 30, 2007
