NOTES TO THE SEPARATE FINANCIAL STATEMENTS

1. General information on the activities of the company

IFI – Istituto Finanziario Industriale S.p.A. (abbreviated in **IFI S.p.A.**) is a corporation organized under the laws of the Republic of Italy.
The head office is located in Turin, Italy, Corso Matteotti 26.
The ordinary capital stock of the company is held entirely by **Giovanni Agnelli e C. S.a.p.az..** IFI S.p.A. preferred stock is listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment).
The assets of the company are represented by its controlling investment in **IFIL Investments S.p.A.**, for 66.23% of ordinary capital stock.

Additional information is presented in the section "IFI Group Profile" of the Directors' Report on Operations.

2. Basis of presentation of the separate financial statements

Following the coming into force of European Regulation 1606 dated July 19, 2002 and the national laws implementing that Regulation, pursuant to article 4 of Legislative Decree 38 dated February 28, 2005, the separate financial statements of IFI S.p.A. at December 31, 2006 have been prepared for the first time using International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board ("IASB") and endorsed by the European Union. The designation "IFRS" also includes all valid International Accounting Standards ("IAS"), as well as all interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), formerly the Standing Interpretations Committee ("SIC").

The accounting policies applied in these financial statements are consistent with those adopted in preparing the IFRS opening separate balance sheet at January 1, 2005, as well as the separate income statement for the year 2005 and the separate balance sheet at December 31, 2005, as restated in accordance with IFRS and presented in the Appendix attached to these notes to which reference should be made. The optional exemptions adopted by IFI S.p.A. at the time of application of IFRS, the reconciliations between profit or loss and equity under Italian accounting principles (Italian GAAP) and profit or loss and equity under IFRS for the prior period shown as comparatives, as required by IFRS 1 – First-time Adoption of IFRS, together with related explanatory notes, are included in this Appendix.

The separate financial statements have also been prepared in accordance with the provisions contained in Consob Resolutions 15519 and 15520 and in Communication 6064293 dated July 28, 2006, in accordance with art. 9, paragraph 3, of Legislative Decree 38 dated February 28, 2005.

3. Format of the separate financial statements and other information

The current/non-current distinction has been adopted for the presentation of assets and liabilities in the separate balance sheet; this required the reclassification of the previous balance sheets presented in accordance with the formats required by Legislative Decree 127 dated April 9, 1991, as amended.

The classification of revenues and costs based on the nature of expenses has remained unchanged for the separate income statement, with preference given to the presentation of investment income (charges) and financial income (expenses), items which are characteristic of IFI S.p.A.'s activities.

The separate statement of changes in equity presents the total income (expenses) recognized directly as an increase or decrease of reserves in a specific section.

The indirect method is used for the presentation of the separate statement of cash flows which reconciles cash and cash equivalents at the beginning and the end of the year.

The year-end closing date is December 31 of each year and covers a period of 12 months.

The financial statements are presented in Euro, the company's functional currency.

Major events in 2006 and in the first quarter of 2007, as well as the business outlook are presented in the Directors' Report on Operations.

4. Transactions with related parties, unusual and/or atypical transactions and nonrecurring events and significant transactions

Transactions with related parties

The balance sheet and income statement balances generated by transactions with related parties are shown separately in the financial statements formats and commented in Note 28.

Impairment reversals of investments

The year 2006 shows a profit of € 217.6 million, € 69.6 million of which is the net amount deriving from the impairment reversal on the investment held in IFIL (€ 73.5 million) and the accrual for the related deferred taxes (-€ 3.9 million) and, another € 104 million, from the gain on the sale of the investment in Exor Group to the same Exor Group.
Additional details are provided in Notes 8 and 28.

Consob sanctionary measure

On February 13, 2007, the meeting of the board of directors of the company, which was presided over by the vice chairman (Vicario) John Elkann, was notified of the Consob sanctionary measure against Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone with regard to the contents of the press releases dated August 24, 2005 released by IFIL Investments S.p.A. and Giovanni Agnelli e C. S.a.p.az..
The board of directors of IFI S.p.A., which did not take part owing to the reference to some of its members, expressed its full support to the above persons.
Additional information is provided in the comments on the operating performance of IFIL Investments S.p.A..

Other than what was indicated, there are no nonrecurring events and significant transactions or unusual and/or atypical transactions to be reported in accordance with Consob Communication 6064293 dated July 28, 2006.

5. Significant accounting principles

General principle

The separate financial statements of IFI S.p.A. are expressed in Euro based on the historical cost convention, except where the use of fair value is required for the measurement of certain financial instruments available-for-sale.

The notes to the separate financial statements are generally expressed in thousands of Euro.

Investments accounted for at cost

Investments in subsidiaries and associates are stated at cost and tested for impairment if, and only if, there is objective evidence of an impairment due to one or more events which occurred after initial recognition which have an impact on the future cash flows of the subsidiaries and associates and on the dividends which they could distribute. For IFI S.p.A., this objective evidence is a significant and prolonged decline in the market prices to below cost of a directly and indirectly owned subsidiary or associate, together with its continuing negative operating performance. In these cases, the impairment is determined as the difference between the carrying amount of the investment and its recoverable amount. The recoverable amount is generally determined, in the case of listed subsidiaries and associates, by their fair value (market prices), and in the case of unlisted subsidiaries, by the fair value of the indirect subsidiaries.

At each balance sheet date, IFI S.p.A. assesses whether there is any objective evidence that an impairment loss of an investment recognized in prior years may no longer exist or may have decreased. A significant or prolonged rise in the market price of the subsidiary or associate, together with its continuing positive operating performance is considered as objective evidence. In these cases, the recoverable amount of the investment is re-measured and, if necessary, the carrying amount is increased up to the cost of the investment.

Investments available-for-sale and other non-current financial assets

These are measured at fair value which coincides, for listed investments, at the market price on the last day of the period. Unrealized gains and losses are recognized directly in equity, net of the relevant tax effect. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity is reversed and recognized in the income statement. Such impairment losses may not later be reversed through the income statement.

Other current financial assets

Financial assets held for trading, being acquired for resale in the short term, are measured at fair value through the income statement.

The category includes short-term credit instruments and other forms of investment of liquidity as well as derivative financial instruments.

Non-financial receivables and payables

Receivables are initially recognized at fair value, represented by the present value of the amount that will be collected. Subsequently, they are measured at amortized costs using the effective interest method.

A provision for impairment of trade receivables is established when there is objective evidence of an impairment loss or a risk that the company will not be able to collect the contractual amount (principal and interest) at the contractually agreed dates. The amount of the provision is the difference between the asset's carrying amount and the present value of recoverable estimated future cash flows, discounted at the effective interest rate.

Payables are measured at their nominal amount, increased by the interest expense due, if any. Payables are subsequently measured at amortized cost.

Treasury stock

The cost of any treasury stock purchased and/or held, also through subsidiaries, as a result of specific stockholder resolutions are recognized as a deduction of equity and, therefore, the reserve as the contra-entry of treasury stock in portfolio is not shown separately. The proceeds from any subsequent sale are recognized as movements in equity.

Employee benefits – Pension plans

The pension plans are currently either defined contribution or defined benefit plans.

Under defined contribution plans the company pays contributions to outside, legally separate entities with administrative autonomy, which frees the employer from any subsequent obligation as the outside entity assumes the commitment to pay what is due to the employee.

Consequently, the company records the contribution paid as an expense and do not recognize any liability.

Defined benefit plans include post-employment benefits, other than those under defined contribution plans. Under defined benefit plans, the company has the obligation to set aside the costs relating to the benefits guaranteed to their employees in service. The actuarial risk and the investment risk are thus substantially borne by the company.

Defined benefit plans, which include employee severance indemnities established by Italian laws, are measured by actuarial techniques using the Project Unit Credit Method.

As provided by the amendment to IAS 19 – Employee Benefits, issued by the IASB in December 2004, IFI S.p.A. elected to recognize actuarial gains and losses immediately in the period in which they arise, outside the income statement, in a statement of recognized income and expense.

All cumulative actuarial gains and losses that existed at January 1, 2005 have been recognized in equity.

For defined benefit plans without plan assets, the expenses relating to the increase in the present value of the obligation, due to the fact that the payment date of the benefits is nearing, are recognized in financial expenses.

Payments relative to defined contribution plans are recognized as an expense in the income statement as incurred.

The liability is calculated on an individual basis and takes into account life expectancy, personnel turnover, salary changes, revaluation of the yields, inflation and the present value of the amounts to be paid.

Defined benefit plans are in some cases covered by financial assets managed outside the company. In those cases, the amount recognized in the financial statements for such liabilities corresponds to the difference between present value of future services (actuarial liability) and the market value of the assets invested that are intended to cover the liability, increased by losses or decreased by unrecognized (or not yet recorded) gains and, in any case, taking into account the surplus cap limit for assets established by paragraph 58 of IAS 19. When the result of this calculation shows a net obligation it is recognized in a provision under liabilities, in the reverse case, an asset is recognized.

Beginning January 1, 2007, the Finance Bill in Italy and the relative decrees implementing it introduced changes regarding employee severance indemnities which include allowing the employee to choose the destination of his/her indemnity that is accruing. In particular, the employee can choose to direct the new flows of the indemnity to pre-chosen pension schemes or to keep them with the company. At the present time, the uncertainty over the interpretation of the recently enacted law, the various possible interpretations of the qualification under IAS 19 of the indemnity being accrued and the resulting changes in the actuarial calculations of the indemnity already accrued, as well as the impossibility of estimating what destinations will be chosen by the employee (the individual employees have until June 30, 2007 to make their decisions) would render it premature to offer any assumptions, by the companies operating in Italy, on the actuarial change in the calculation of the indemnity accrued at December 31, 2006.

Provisions for other liabilities and charges
Provisions for other liabilities and charges refer to costs and expenses of a determinate nature which are certain or likely to be incurred but, at the balance sheet date, are uncertain as to the amount or as to the date on which they will arise. Accruals are recorded when there is an obligation, legal or constructive, resulting from a past event, when it is probable that the use of resources will be required to satisfy the obligation and when a reliable estimate of the amount of the obligation can be made.
Changes in estimates are recorded in the income statement in the period in which the change is made.

Debt
Interest-bearing debt is recognized at cost which corresponds to the fair value of the amount received net of directly attributable costs. Debt is subsequently measured at amortized cost.

Debt is classified in current liabilities unless the company has an unconditional right to defer settlement of the liability for at least 12 months from the reporting date.

The amortized cost of a financial asset or liability is the initial amount at which it was measured net of repayments of principal, adjusted up or down on the basis of the amortization, using the effective interest rate method, of any difference between the initial amount and maturity amount, less any writedown made as a result of impairment or uncollectibility.

The effective interest rate is the rate that exactly discounts the expected future payments and receipts over the expected life of the financial instrument or, over a shorter period, if appropriate, at the net carrying amount of the financial asset or liability.

Derivative financial instruments
All derivative financial instruments are measured at fair value at the end of the period.
Financial instruments qualify for hedge accounting only when there is formal designation and documentation of the hedging relationship and the hedge, verified periodically, is highly effective.

When financial instruments qualify for hedge accounting, the following accounting treatment applies:

- Fair value hedge: where a derivative financial instrument is designated as a hedge of the exposure to changes in fair value of a recognized asset or liability that is attributable to a particular risk and could affect profit and loss, the gain or loss from re-measuring the hedging instrument at fair value is recognized in the income statement.
- Cash flow hedge: where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows of a recognized asset or liability or a highly probable forecast transaction and could affect profit and loss, the effective portion of any gain or loss of the derivative financial instrument is recognized directly in equity. The cumulative gain or loss is removed from equity and recognized in the profit and loss account at the same time in which the hedged transaction affects profit and loss. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in equity and is recognized in the income statement at the same time the related transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in equity is recognized in the income statement immediately.

If the conditions of IAS 39 are not met, the transactions, even if they have been set up for the purpose of managing risk exposure (inasmuch as the company's policy does not permit speculative transactions) are classified and measured as trading transactions. In that case, the difference with fair value is recognized in the income statement.

Financial income and expenses, other revenues and costs

Dividends are recognized in the income statement when they are approved by the stockholders and only from the earnings generated after the acquisition of the investee company. Instead, when the dividends are distributed from reserves generated before acquisition, the dividends are reported as a deduction from the cost of the investment.

Financial income and expenses are recognized according to the accrual principle on the basis of the effective rate of return.

Revenues from services are recognized by reference to the stage of completion of the transaction at the balance sheet date and measured on the basis of the services rendered.

Transactions in foreign currency

Transactions in foreign currencies are recorded at the foreign exchange rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the foreign exchange rate prevailing at that date. Exchange differences arising on the settlement of monetary items or on reporting monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements are recognized in the income statement.

Income taxes

Current income taxes are calculated according to the tax laws in force.

Taxes on income are recognized in the income statement except to the extent that they relate to items directly charged or credited to equity, in which case the related income tax effect is recognized directly in equity.

Temporary differences between the amounts of assets and liabilities in the financial statements and the corresponding amounts for tax purposes give rise to temporarily deferred tax liabilities recorded in liabilities. Deferred tax assets relating to the carryforward of unused tax losses, as well as those arising from temporary differences, are recognized to the extent that it is probable that future profits will be available against which they can be utilized.

Deferred tax assets and liabilities are measured at the tax rates expected to apply to taxable income in the periods in which temporary differences will be reversed. Deferred income tax assets and liabilities are offset where there is a legally enforceable right of offset.

Deferred tax assets and liabilities are shown separately from other tax receivables and payables in a specific caption under non-current assets or liabilities.

Use of estimates

The preparation of financial statements and related disclosures that conforms to IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates. Estimates are particularly used for the measurement of investments (impairment losses and reversals). Estimates and assumptions are reviewed periodically and the effects of any changes are reflected immediately in the income statement.

6. Adoption of new accounting standards and interpretations issued by the IASB

Standards and interpretations in effect from January 1, 2006

In 2006 IFI S.p.A. adopted all the new and revised standards and the interpretations released by the IASB and IFRIC which had an effect on the transactions carried out or relevant to the financial statements for the years beginning on or after January 1, 2006.

In April 2005, the IASB issued an amendment to IAS 39 – Financial instruments: recognition and measurement, to permit the foreign currency risk of a highly probable intragroup forecast transaction to qualify as the hedged item in a cash flow hedge in financial statements – provided that the transaction is denominated in a currency other than the functional currency of the entity entering into that transaction and the foreign currency risk will affect the separate financial statements. The amendment also specifies that if the hedge of a forecast intragroup transaction qualifies for hedge accounting, any gain or loss that is recognized directly in equity in accordance with the hedge accounting rules in IAS 39 must be reclassified into profit or loss in the same period or periods during which the foreign currency risk of the hedged transaction affects separate income statement.

In June 2005, the IASB issued an amendment to IAS 39 – Financial instruments: recognition and measurement, to restrict the use of the option to designate any financial asset or any financial liability to be measured at fair value through profit and loss (the fair value option). The revisions limit the use of the option to those financial instruments that meet certain conditions. Those conditions are that:

- the fair value option designation eliminates or significantly reduces an accounting mismatch;
- a group of financial assets, financial liabilities, or both is managed and their performance is evaluated on a fair value basis in accordance with a documented risk management or investment strategy;
- an instrument contains an embedded derivative that meets particular conditions.

The adoption of these standards and interpretations had no material impact on the separate financial statements for the year ended December 31, 2006.

Standards and interpretations not yet in effect

In August 2005, the IASB issued IFRS 7 – Financial instruments: disclosures and a complementary amendment to IAS 1 – Presentation of Financial Statements – Capital Disclosures, effective beginning January 1, 2007.

IFRS 7 requires disclosures about the significance of financial instruments for an entity's financial position and performance. These disclosures incorporate many of the requirements previously in IAS 32 – Financial Instruments: Disclosure and Presentation. IFRS 7 also requires information about the extent to which the entity is exposed to risks arising from financial instruments, and a description of management's objectives, policies and processes for managing those risks.

The amendment to IAS 1 introduces requirements for disclosures about an entity's capital.

IFI S.p.A. has decided not to elect the early adoption of IFRS 7 and the amendment to IAS 1.

On November 30, 2006, the IASB issued IFRS 8 – Operating Segments that will become effective beginning from January 1, 2009 and which will replace IAS 14 – Segment Reporting. This standard does not have any effect on the separate financial statements of IFI S.p.A..

In 2006, the following interpretations were issued but were not adopted in these financial statements:

- IFRIC 10 – Interim financial Reporting and Impairment (effective from January 1, 2007)
- IFRIC 11 – IFRS 2: Group and Treasury Share Transactions (effective from January 1, 2008)

The company believes that the adoption of these interpretations will not have a material effect on the financial statements.

In 2006, the following interpretations were also issued but are not applicable to IFI S.p.A.:

- IFRIC 7 – Applying the Restatement Approach under IAS 29 Financial Reporting in Hyper-inflationary Economies (effective from January 1, 2007)
- IFRIC 8 – Scope of IFRS 2 (effective from January 1, 2007)
- IFRIC 9 – Reassessment of Embedded Derivatives (effective from January 1, 2007)
- IFRIC 12 – Service Concession Arrangements (effective from January 1, 2008)

7. Risk management

In view of its business as an investment company, IFI S.p.A. is not subject to specific credit risks. Moreover, it is not subject to direct currency risks since it does not hold significant equity investments denominated in currencies other than the Euro.

The financing requirements and the cash flows are coordinated so that the financial resources are managed effectively and efficiently. Outgoing flows of current operations are substantially financed by incoming flows from normal business and cash availability.
Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or raising of sufficient funds that can be readily used. In this sense, IFI S.p.A. operates so as to have irrevocable credit lines available with expiration dates and amounts consistent with its investment plans.
IFI S.p.A. assesses and manages its exposure to changes in interest rate risks consistently with its management policy and utilizes derivative financial instruments to fix some of the financing obtained with a predetermined interest rate. Derivative financial instruments are not used for speculative purposes.

In particular, during 2006, the only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on existing loans.

IFIL S.p.A. (savings shares)	6,384				**6,384**
Exor Group S.A.	102,559			(102,559)	**0**
Emittenti Titoli S.p.A.	272				**272**
Deutsche Morgan Grenfell Capital Italy S.A. – Class A shares	191			(55)	**136**
Deutsche Morgan Grenfell Capital Italy S.A. – Class B shares	3			(1)	**2**
Total investments	1,841,135	66,943	73,473	(102,615)	**1,878,936**

The increases, totaling € 66,943 thousand, are due to the purchase of 14,708,160 IFIL ordinary shares on the market (1.42% of the class of stock).

Impairment reversals amount to € 73,473 thousand and refer to 138,426,775 IFIL ordinary shares which in 2002 had been written down on the basis of their stock market price. The value of the IFIL ordinary shares has been totally adjusted by the impairment reversal up to the amount of the original cost of purchase. Deferred income taxes were recorded for € 3,879 thousand (5.28% of the deductible impairment losses) on the impairment reversals recognized in the income statement.

The decreases amount to € 102,615 thousand and refer to:

- the sale of the entire investment held in Exor Group (3,418,242 shares representing 29.3% of capital stock) to the same Exor Group. The sale was finalized on April 7, 2006 following the resolution passed by the board of directors' meeting on March 31, 2006. Given that the transaction was between related parties, Citigroup Global Markets Limited checked the fairness of the sales price, equal to € 206,804 thousand (€ 60.5 per share). The sale resulted in a gain, net of transaction costs, (€ 219 thousand) of € 104,026 thousand and a significant reduction in debt. On May 4, 2006, Exor Group canceled the treasury stock thus purchased, with a consequent reduction in capital stock.

- the reimbursement of 140 Deutsche Morgan Grenfell Capital Italy Class A shares for proceeds of € 72 thousand and a net gain of € 41 thousand.

Comparison between the carrying amounts and market prices of listed investments at December 31, 2006:

				Market price			
	Number of	Carrying amount		December 29, 2006		March 23, 2007	
	shares held	Per share (€)	Total (€ thds)	Per share (€)	Total (€ thds)	Per share (€)	Total (€ thds)
IFIL S.p.A.							
- ordinary shares	675,200,000	2.77	1,872,142	6.19	**4,177,462**	7.22	**4,876,294**
- savings shares	1,866,420	3.42	6,384	4.93	**9,192**	6.81	**12,707**
Total			1,878,526		**4,186,654**		**4,889,001**

Furthermore:

- there are no investments for which IFI S.p.A. assumed unlimited responsibility for their obligations (art. 2361, paragraph 2 of the Italian Civil Code);
- there are no investments held as collateral for financial liabilities and contingent liabilities.

The following list of investments held by IFI S.p.A. presents the additional disclosures required by the Italian Civil Code (art. 2427, paragraph 5) and Consob (Communication 6064293 dated July 28, 2006):

	Capital stock			IFI investment					Equity	Profit (loss)
	Number of	Par		Number of	% of		Carrying amount			
	shares	value	Amount	shares	Cap. st.	Cl. of st.	Per share €	€/000	€/000	€/000

(a) Data taken from the consolidated financial statements at December 31, 2006.

9. Current assets – Cash and cash equivalents

Details are as follows:

€ in thousands	**12/31/2006**	12/31/2005	Change
Banks and cash	**381**	96	285
Time deposits	**59,300**	-	59,300
Total cash and cash equivalents	**59,681**	96	59,585

Cash and cash equivalents represent bank accounts in euro repayable on demand and temporary excess cash placed in time deposits with leading credit institutions up to January 29, 2007.

Cash and cash equivalents are in line with their fair value at the end of the year.

The related credit risk can be considered limited since the counterparts are primary national banking institutions.

10. Current assets – Other financial assets

Details are as follows:

€ in thousands	**12/31/2006**	12/31/2005	Change
Fair value of cash flow hedge derivatives	**3,304**	1,919	1,385
Commissions for credit lines opened referring to the next year	**196**	93	103
Total current other financial assets	**3,500**	2,012	1,488

11. Current assets – Tax receivables

These refer to receivables from the tax authorities for:

€ in thousands	**12/31/2006**	12/31/2005	Change
Receivables for prior years' taxes, refunds requested	**18,382**	17,909	473
Receivables for current and prior years' taxes, carried forward	**379**	1	378
VAT receivable	**0**	290	(290)
Total tax receivables	**18,761**	18,200	561

The change in receivables from the tax authorities for the year 2006 is summarized as follows:

€ in thousands	Refunds requested	Carried forward	VAT	Total
Balances at December 31, 2005	17,909	1	290	18,200
Used for compensation of withholdings and VAT payable	0	(1)	(290)	(291)
Withholdings on interest earned during the year		379		379
Interest earned during the year	473			473
Balances at December 31, 2006	**18,382**	**379**	**0**	**18,761**

12. Equity – Capital stock

At December 31, 2006, IFI S.p.A.'s capital stock, fully subscribed to and paid-in, amounts to € 163,251,460 and consists of 86,450,000 ordinary shares and 76,801,460 preferred shares with a par value of € 1 each.

The ordinary capital stock of the company is held entirely by **Giovanni Agnelli e C. S.a.p.az.**. IFI's preferred shares are listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment).

Pursuant to art. 10 of the bylaws, preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code and the second paragraph of art. 13 of the bylaws.

Pursuant to art. 27 of the bylaws, the profit of each year is appropriated as follows:

- 10% to the legal reserve until it reaches one-fifth of capital stock;
- of the remaining amount, 1% is at the board of directors' disposition for distribution among its members;
- the remaining profit is appropriated as follows:
  - to preferred shares, a preference dividend of 5.17% of their par value, which is not cumulative from one year to the next;
  - after any appropriations to reserves, the residual amount is attributed equally to the ordinary and preferred shares.

Capital stock may be increased for a period of five years, at one or more times, also in divisible form, up to a maximum of € 561,750,000, by the authority delegated, pursuant to art. 2443 of the Italian Civil Code, to the board of directors by the special stockholders' meeting held April 22, 2003.

13. Equity – Capital reserves

At December 31, 2006, the balance of € 386,347 thousand, unchanged compared to the end of the prior year, relates only to additional paid-in capital.

14. Equity – Retained earnings and other reserves

Details are as follows:

€ in thousands	**12/31/2006**	12/31/2005
Revaluation reserve Law 74, 2/11/1952	**157**	157
Revaluation reserve Law 576, 12/2/1952	**16,940**	16,940
Revaluation reserve Law 72, 3/19/1983	**64,265**	64,265
Legal reserve	**32,650**	32,650
Extraordinary reserve	**829,835**	791,248
Cash flow hedge reserve	**3,091**	1,605
Reserve for purchase of treasury stock	**150,000**	150,000
Total retained earnings and other reserves	**1,096,938**	1,056,865

15. Equity reserves available and distributable

The disclosures required by art. 2427, 7 bis of the Italian Civil Code on the equity reserves available and distributable are as follows:

€ in thousands	**Balance at 12/31/2006**	Possibility of use	Amount available
Capital reserves:			
Additional paid-in capital (a)	**386,347**	A,B,C	386,347
Extraordinary reserve	**458**	A,B,C	458
Earnings reserves:			
Revaluation reserve Law 74, 2/11/1952 (b)	**157**	A,B,C	157
Revaluation reserve Law 576, 12/2/1952 (b)	**16,940**	A,B,C	16,940
Revaluation reserve Law 72, 3/19/1983 (b)	**64,265**	A,B,C	64,265
Cash flow hedge reserve	**3,091**	B	0
Legal reserve	**32,650**	B	0
Extraordinary reserve (c)	**829,377**	A,B,C	758,900
Reserve for purchase of treasury stock	**150,000**		0
Total	**1,483,285**		1,227,067
Residual portion distributable			**1,227,067**

A: For capital increases; B: For coverage of losses; C: For distribution to stockholders.

(a) Since the legal reserve is equal to one-fifth of capital stock (art. 2431 Italian Civil Code), the reserve is distributable.

(b) The revaluation reserves can be used for bonus increases of capital stock. If used to cover losses, they must be later replenished, if not, then no dividends can be distributed. They may not be used to set up the reserve for the purchase of treasury stock. The monetary revaluation reserves can be reduced only by resolution of the stockholders' meeting and in observance of the prescriptions indicated in art. 2445, paragraphs 2 and 3 of the Italian Civil Code.

(c) The reserve is distributable except to the extent of the amount deriving from the reallocation of the reserve as a contra-entry to stock in portfolio.

In the years 2003, 2004 and 2005, reserves were not used to cover losses.

At December 31, 2006, tax-deferred reserves are recorded for a total of € 83,394 thousand, of which € 81,362 thousand relates to the monetary revaluation reserves and € 2,032 thousand to the legal reserve. In the event of distribution, these reserves would form part of the taxable income of the company.
In view of the unlikelihood of their distribution, no deferred taxes have been set aside in respect of such reserves.

16. Equity – Treasury stock

At December 31, 2006, IFI S.p.A. directly holds the following preferred shares of treasury stock:

		Carrying amount		% of
€ in thousands	No. of shares	Per share (€)	Total (€ in thousands)	class
IFI – preferred shares	5,360,300	13.15	70,477	6.98

There were no transactions involving preferred shares of treasury stock during the year.

17. Current and non-current liabilities – Bank debt

Non-current bank debt amounts to € 125,000 thousand (€ 160,000 thousand at December 31, 2005).
Interest rates swaps are in place to guarantee fixed interest rates on the entire amount; at December 31, 2006, the fair value on these contracts is positive for € 2,538 thousand.
Bank debt is classified in non-current in relation to the residual period of the credit line granted and the duration of the relative hedging contracts.

The current portion of bank debt amounts to € 35,350 thousand (€ 104,817 thousand at December 31, 2005) and includes loans for € 35,000 thousand and bank overdrafts for the remaining amount (€ 350 thousand).
Interest rates swaps are also in place to guarantee fixed interest rates for the current portion of bank debt; at December 31, 2006, the fair value on these contracts is positive for € 553 thousand.

At December 31, 2006, the company has credit lines for € 1,013 thousand, of which € 515 thousand is irrevocable.
Credit lines by maturity are as follows:

€ in thousands	Agreed lines	Of which, irrevocable
Within 1 year	528	30
From 2 to 5 years	485	485
Total	**1,013**	**515**

The loan contracts relating to irrevocable lines of credit provide for commitments which are common practice in the sector for this type of debt. In particular, some of the main commitments included in certain contracts refer to the obligation of periodic disclosure, not setting up new real guarantees on the goods of the company without the prior consent of the creditors, the non-subordination of the loan, as well as, in some cases, conformity with financial ratios. Finally, there are clauses that could change the duration in the case of serious non-fulfillment such as, for example, failure to pay interest or when extremely serious events arise such as a request to place the company under administration.

18. Non-current liabilities – Deferred tax liabilities

An analysis is as follows:

€ in thousands	Amount	Taxable (16%)	Rate applied	To equity	To income statement	**Total**
Balance at December 31, 2005						**100**
2006 accruals on reversals of impairments on IFIL ordinary shares	73,473	11,756	33%	0	3,879	**3,879**
Balance at December 31, 2006					**3,879**	**3,979**

19. Non-current liabilities - Provisions for employee benefits

The composition is as follows:

€ in thousands	**12/31/2006**	12/31/2005
Employee severance indemnities	**1,745**	1,593
Other provisions for employees	**65**	48
Total provisions for employee benefits	**1,810**	1,641

Details of the changes during 2006 are as follows:

€ in thousands	Balances at 12/31/2005	Accruals	Transfers to other companies	Used	Actuarial gains (losses)	**Balances at 12/31/2006**
Employee severance indemnities	1,593	272	(10)	(104)	(6)	**1,745**
Other provisions for employees	48			30	(13)	**65**
Total	1,641	272	(10)	(74)	(19)	**1,810**

An analysis of employee benefits is as follows:

Employee severance indemnities

Employee severance indemnities reflect the indemnity payable to employees which accrues over the service life and which is paid upon termination of employment. The indemnity may be paid in advance during the employee's service life if certain conditions are met.

In accordance with IAS 19 – Employee Benefits, IFI S.p.A. includes employee severance indemnities under defined benefit plans and measures them with actuarial techniques, using the Project Unit Credit Method.

Besides employee severance indemnities, established by art. 2120 of the Italian Civil Code, IFI S.p.A. guarantees other forms of benefits (termination benefits, loyalty bonuses, health care plans, defined benefit and defined contribution pension plans) under company or individual supplementary agreements, described below.

Termination benefits

This is a fixed amount in addition to employee severance indemnities which will be paid at the time and in relation to the termination of the employment relationship, at the currently-expected retirement age, on the basis of existing legislation, at the age of 65 for men and at the age of 60 for women. Any raising of the retirement age for whatsoever reasons will have no effect on the payment of these benefits. In the eventuality of the termination of employment for whatsoever reason prior to the legal retirement age indicated above, the benefits shall be paid for the amount accrued up to the date of termination of employment, compared with and in proportion to the years of service since January 1, 2000 up to the date of the termination of employment. No interest or revaluations of any sort accrue on the amount.

Health care plans

Health care plans are offered to management staff and require the payment of defined contributions to outside funds and entities which offer and pay for health care benefits.

Pension plans

The company's pension plans are for employees categorized as managers and are covered by company agreements and regulations.

They can be "defined benefit" or "defined contribution" plans and provide for the payment of contributions to outside funds that are legally separate and have autonomous assets.

The plans provide for a contribution by the employer and a contribution by the employee plan participant by conferring a part of his/her employee severance indemnity.

The liabilities for contributions payable are included in "Other payables". The contribution cost for the period accrues on the basis of the service rendered by the employee and is recognized in "Personnel costs".

Other benefits

Other benefits include loyalty bonuses payable to all employees.

Loyalty bonuses accrue and are paid after a certain number of years of service (25, 30, 35 and 40 years).

Other information

The actuarial calculations required to determine the liability of defined benefit plans are performed by an independent actuary at the end of each year. At December 31, 2006, the liability has been calculated on the basis of the following actuarial assumptions:

	12/31/2006	12/31/2005
Discount rate	**4.25%**	4.00%
Expected remuneration increase	**2-3.50%**	2-3.50%
Cost-of-living increase	**2.00%**	2.00%

In addition to the above financial indexes, all the demographic assumptions have also been taken into account relating to the probability of events such as death, disability, dismissal and retirement of the employees.

Defined benefit plans may be unfunded or they may be wholly or partly funded by contributions paid by the employer and the employee plan participants to an entity, or fund, that is legally separate from the employer and from which the employee benefits are paid.
The plan assets do not include IFI S.p.A. treasury stock.
The plan assets consist of debt instruments issued by third parties and other investments.

COMMENTS ON THE PRINCIPAL ITEMS IN THE SEPARATE INCOME STATEMENT

20. Dividends from investments

Dividends from investments amount to € 54,259 thousand (€ 55,937 thousand in 2005) and include dividends collected from IFIL (€ 54,183 thousand) and Emittenti Titoli (€ 76 thousand). In 2005, dividends included those collected from IFIL (€ 45,278 thousand), Exor Group (€ 10,596 thousand) and Emittenti Titoli (€ 63 thousand).

21. Financial expenses from third parties

These include:

€ in thousands	**2006**	2005	Change
Interest expenses on bank debt	**6,541**	6,603	(62)
Interest rate hedging charges on bank loans	**255**	1,773	(1,518)
Sundry bank commissions	**1,081**	950	131
Charges from discounting to present value	**6**	4	2
Total Financial expenses from third parties	**7,883**	9,330	(1,447)

22. Financial income from third parties

This includes:

€ in thousands	**2006**	2005	Change
Interest income on receivables from:			
- tax authorities	**473**	473	0
- banks (temporary deposit of liquidity)	**1,403**	4	1,399
Interest rate hedging income on bank loans	**761**	5	756
Other income	**14**	0	14
Sale of non-current receivables	**0**	422	(422)
Total financial income from third parties	**2,651**	904	1,747

23. Personnel costs

These amount to € 2,776 thousand (€ 2,652 thousand in 2005) and show a net increase of € 124 thousand.
Details are as follows:

€ in thousands	**2006**	2005	Change
Salaries	**1,762**	1,647	115
Social security contributions	**531**	428	103
Employee severance indemnities, other long-term benefit plans and defined benefit plans	**272**	240	32
Other personnel costs	**211**	337	(126)
Total personnel costs	**2,776**	2,652	124

At the end of 2006, employees number 15 (16 at the end of 2005).
The average number of employees in 2006 was 15, summarized by category as follows:

	2006	2005
Managers	**2**	2
Management staff	**2**	2
Clerks	**8**	9
Messengers	**3**	3
Average number of employees	**15**	16

Compensation policies

The total compensation is composed of a fixed and a variable portion, as well as additional benefits for the management staff.

The fixed compensation is connected to the responsibilities of the person's role, the level of individual expertise and the experience acquired; the variable compensation is tied to objectives and rewards the results of the work performed by that person both individually and as in a team.

Further discretionary bonuses may be paid for exemplary performance in operations which create value for the company.
The additional benefits paid to personnel with management responsibilities include supplementary pension plans, health assistance plans, insurance coverage in the case of death and disability, loyalty bonuses and the use of a rented car.

24. Purchases of goods and services from third parties

These amount to € 809 thousand and show a decrease of € 775 thousand compared to 2005 (€ 1,584 thousand). The main expenses refer to the following:

€ in thousands	**2006**	2005	Change
Consulting	**303**	1,035	(732)
Compensation:			
- Board of Statutory Auditors	**146**	146	0
- Supervisory Board	**6**	6	0
- Common representative of preferred stockholders	**3**	3	0
- Supplementary contribution	**4**	8	(4)
	159	163	(4)
Travel and entertainment	**19**	41	(22)
Bank expenses and fees	**16**	16	0
Insurance	**59**	62	(3)
Audit fees	**34**	47	(13)
Office management and security	**131**	126	5
Rentals of goods from third parties	**19**	21	(2)
Raw materials and supplies	**17**	18	(1)
Maintenance, transport and car insurance	**26**	24	2
Gifts	**7**	17	(10)
Other expenses	**19**	14	5
Total purchases of goods and services from third parties	**809**	1,584	(775)

25. Other current operating expenses

These total € 950 thousand (€ 613 thousand in 2005).
Details are as follows:

€ in thousands	**2006**	2005	Change
Sundry taxes and duties	**312**	(45)	357
Association dues	**60**	56	4
Securities listing fees	**48**	34	14
Publications of annual, first-half and quarterly financial statements	**64**	81	(17)
Notary and corporate charges	**41**	98	(57)
Donations	**358**	324	34
Books, newspapers and magazines	**25**	19	6
Ads	**7**	10	(3)
Dividends statute-barred	**35**	36	(1)
Total other current operating expenses	**950**	613	337

26. Income taxes

The taxable base calculated in accordance with tax laws did not generate any current income tax expenses for the year 2006. Deferred income taxes have been set aside for € 3,879 thousand on the impairment reversal on the investment in IFIL. Additional information is provided in Note 18.

Since reasonable certainty of recovery against future taxable income is not assured, no deferred tax assets have been booked on the tax losses for the years 2003 to 2006 (€ 229 million, in total).

Details are as follows:

	Year 2006		Year 2005	
€ in millions	**Temporary differences**	**Theoretical tax effect (33% rate)**	Temporary differences	Theoretical tax effect (33% rate)
Tax losses carried forward (for a maximum of 5 years)				
- year 2003	**147**		147	
- year 2004	**20**		20	
- year 2005	**33**		33	
- year 2006	**29**		0	
Total tax losses carried forward	**229**	**76**	200	66

The following table presents the reconciliation between the pre-tax profit and the taxable income for the computation of Ires taxes (the taxable income for the computation of Irap taxes is negative):

€ in millions	**2006**	2005
Pre-tax profit	**222**	37
Increases:		
- temporary differences	**0**	5
- permanent differences	**1**	4
- gains on investments deferred in prior years	**0**	4
Total increases	**1**	13
Decreases:		
- 95% of dividends collected	**(52)**	(53)
- reversal of impairment loss on investment in IFIL	**(73)**	0
- portion of impairment losses on investments deductible over 5 years	**(27)**	(26)
- gains on investments	**(95)**	0
- temporary differences	**(5)**	0
- permanent differences	**0**	(4)
Total decreases	**(252)**	(83)
Loss for the year for tax purposes	**(29)**	(33)

The company has agreed the tax years up to December 31, 2001.

27. Compensation to directors and statutory auditors

(Art. 78 of Consob resolution 11971 dated May 14, 1999 and subsequent amendments)

All amounts in the following table are expressed in thousands of Euro.

Name	Post held	Term of office	Expiration of term of office (a)	Compensation for post held	Non-monetary benefits	Bonuses and other incentives	Other compensation
Directors in office							
Gabetti Gianluigi	Chairman	1/1-12/31	2009	250			2,044 (b)

Ferrero Cesare		1/1-5/25		62			151 (b)
Total Statutory Auditors				**146**	**0**	**0**	**257**

(a) The term of office expires in concurrence with the stockholders' meeting that will approve the financial statements for the year ended December 31, 2008.
(b) Compensation for the posts held in companies of the Group.
(c) Employment income paid by IFI S.p.A..
(d) Does not include € 77,000 paid by Fiat not received but collected directly by IFI S.p.A..

There are no key managers with strategic responsibilities in IFI S.p.A..

The company signed a third-party liability insurance policy for the directors with a group of insurance companies for a maximum claim per incident and per year of € 50 million for coverage in the event of requests for reparation of non-fraudulent acts.

The compensation of executive directors is not linked to either the economic results of the company or targets set by the board of directors.
A part of the compensation of the general manager, however, is tied to the economic results of the company and the reaching of specific targets.

Stock options granted to the directors and the general manager

(Art. 78 of Consob Resolution 11971 dated May 14, 1999 and subsequent amendments)

The board of directors of IFI S.p.A. to date has not approved any stock option plans.
However, under the stock option plans approved by the subsidiaries IFIL S.p.A. and Sequana Capital S.A. options were granted on the shares of these companies to the directors and managers of IFI S.p.A..
The relative information is presented in Note 21 to the consolidated financial statements.

28. Transactions with related parties

The board of directors has adopted principles of conduct for carrying out transactions with related parties which are described in the Annual Report on Corporate Governance available also on the website of the company (http://www.gruppoifi.com).

With regard to the year 2006, the transactions between IFI S.p.A. and the related parties identified in accordance with IAS 24 are carried out in accordance with existing laws on the basis of reciprocal economic gain.

Receivables and payables are not guaranteed and are settled in cash. Guarantees have neither been granted nor received.
Costs have not been recognized during the year for non-existent or doubtful liabilities in relation to amounts due from related parties.

A summary of the balances in the balance sheet and in the income statement generated by the transactions carried out during 2006 with related parties is presented below. All amounts are expressed in thousands of Euro.

Counterpart	Trade receivables	Trade payables

Ratio of total transactions with related parties to the total of the lines on the income statement %	**1.54%**	**57.60%**		**51.59%**

The most important transactions are commented below with reference to the notes in this and in the preceding table.

a) On April 7, 2006, following the resolution passed by the board of directors' meeting on March 31, 2006, IFI S.p.A. sold the entire investment held in Exor Group (3,418,242 shares representing 29.3% of capital stock) to the same Exor Group. Given that the transaction was between related parties, Citigroup Global Markets Limited checked the fairness of the sales price, equal to € 206,804 thousand (€ 60.5 per share). The sale resulted in a gain, net of transaction costs, of € 104,026 thousand and a significant reduction in debt.
b) In April 2006, IFI repaid the loan secured from the parent, Giovanni Agnelli e C. S.a.p.az., at market rates. The interest charged to that date amounted to € 123 thousand.
c) Purchases of goods and services from the subsidiary Soiem S.p.A. amounting to € 405 thousand relate to the lease of the offices of the headquarters in Turin, Corso Matteotti 26, and computer, telephone and logistics services.
d) Revenues from Group companies derive from the performance of services and compensation for posts held by IFI S.p.A. staff.
e) Compensation to the corporate boards in 2006 amounts to € 413 thousand. The disclosure required by art. 78 of Consob Resolution 11971, amended by resolution 15520 of July 2006, is provided in the preceding Note 27.

Information regarding dividends collected from related parties (€ 54,183 thousand), described in Note 20, represents 23% of the net amount of income from investments.

Moreover, during 2006, the director, Franzo Grande Stevens, rendered professional services to Fiat S.p.A. for € 1,136 thousand (including activities performed in his capacity as secretary to the board of directors).

29. Net financial position

In accordance with the provisions of Consob Communication 6064293 dated July 28, 2006, the composition of the net financial position of the IFI S.p.A. is provided below:

€ in thousands	**12/31/2006**	12/31/2005	Change

- with third parties	**(97,611)**	(263,824)	166,213

30. Approval of the separate financial statements and authorization for publication

The separate financial statements at December 31, 2006 were approved by the board of directors on March 30, 2007 which authorized their publication on March 31, 2007.

Turin, March 30, 2007

For the Board of Directors
Vice Chairman (Vicario)
John Elkann

APPENDIX - TRANSITION TO INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) BY IFI S.p.A.

1. General Information

Starting from January 1, 2006, pursuant to article 4 of Legislative Decree 38 dated February 28, 2005, IFI S.p.A. adopted International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board (IASB) and endorsed by the European Union for the preparation of its separate financial statements (previously referred to as statutory financial statements). The designation "IFRS" also includes all valid International Accounting Standards ("IAS"), as well as all interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), formerly the Standing Interpretation Committee ("SIC").
IFI S.p.A. therefore presents its financial statements at December 31, 2006 compared to those at December 31, 2005 prepared in accordance with IFRS.

2. Reconciliations required by IFRS 1

As required by IFRS 1 – First-time Adoption of International Financial Reporting Standards, this Appendix describes the policies adopted in the preparation of the IFRS opening balance sheet at January 1, 2005, the main differences with Italian GAAP used in the preparation of the financial statements up to December 31, 2005, as well as the reconciliations between the figures already published, prepared in accordance with Italian GAAP, and the corresponding figures re-measured in accordance with IFRS.

The 2005 balance sheet and income statement have been prepared in accordance with IFRS 1, based on IFRS applicable on December 31, 2005.

3. First-time Adoption of IFRS

General principle

IFI S.p.A., pursuant to IFRS 1, has applied the accounting standards in force at December 31, 2005 retrospectively to the opening balance sheet at January 1, 2005 prepared in accordance with IFRS except for the optional exemptions elected by the company under IFRS 1, described below. Having adopted IFRS for its separate financial statements subsequent to IFRS adoption for the consolidated financial statements (which presented an opening balance sheet at January 1, 2004), IFI S.p.A. recognized the assets and liabilities according to IFRS at the same amounts in both financial statements (separate and consolidated), except for items that were adjusted on consolidation.

The 2005 financial statements presented herein constitute the figures published for comparative purposes in the separate financial statements at December 31, 2006.

The opening balance sheet at January 1, 2005 reflects the following differences as compared to the separate Italian GAAP financial statements at December 31, 2004:

- all assets and liabilities qualifying for recognition under IFRS, including assets and liabilities that were not recognized under Italian GAAP, have been recognized and measured in accordance with IFRS;
- all assets and liabilities recognized under Italian GAAP that do not qualify for recognition under IFRS have been eliminated;
- certain balance sheet items have been reclassified in accordance with IFRS.

The effects of these adjustments have been recognized directly in opening equity at January 1, 2005, the date of the first-time adoption of IFRS.

Optional exemptions elected by IFI S.p.A.
In accordance with the exemption allowed by IFRS 1, IFI S.p.A. has elected to measure the assets and liabilities at the date of transition (January 1, 2005) at the same amounts used in the preparation of the Group's consolidated financial statements at December 31, 2004. In particular:

- *Employee Benefits*: IFI S.p.A. elected to recognize all cumulative actuarial gains and losses at January 1, 2004 on the date of transition to IFRS. To determine pension costs, starting from 2005, IFI S.p.A. adopted, retroactively, the immediate recognition of actuarial gains and losses directly in equity, in accordance with the amendment to IAS 19 of December 16, 2004.

- *Business Combinations*: IFI S.p.A. elected not to apply IFRS 3 – Business Combinations, retrospectively to the business combinations which occurred before the date of transition to IFRS.

IFI S.p.A.

(a) Including € 63 million for the purchase of Fiat ordinary stock, € 67 million for the purchase of IFIL ordinary stock and € 47 million for the purchase of Gruppo Banca Leonardo stock.

The reconciliation between cash and cash equivalents in the statement of cash flows and the corresponding line in the balance sheet is presented in Note 18.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. General information on the activities of the Group

IFI – Istituto Finanziario Industriale S.p.A. (abbreviated in **IFI S.p.A.**) is a corporation organized under the laws of the Republic of Italy.
The head office is located in Turin, Italy, Corso Matteotti 26.
The ordinary capital stock of the company is held entirely by **Giovanni Agnelli e C. S.a.p.az.**. IFI S.p.A. preferred stock is listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment).
The assets of the company are represented by its controlling investment in **IFIL Investments S.p.A.**, for 66.23% of ordinary capital stock.

Additional information is presented in the section "IFI Group Profile" of the Directors' Report on Operations.

The consolidated financial statements are presented in Euro, the Group's functional currency.

2. Basis of presentation of the consolidated financial statements

The consolidated financial statements at December 31, 2006 of the IFI Group have been prepared in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and endorsed by the European Commission. The designation "IFRS" also includes all valid International Accounting Standards (IAS), as well as all interpretations of the International Financial Reporting Interpretations Committee (IFRIC), formerly the Standing Interpretations Committee (SIC).

The consolidated financial statements have also been prepared in accordance with the provisions contained in Consob Resolutions 15519 and 15520 and in Communication 6064293 dated July 28, 2006, in accordance with art. 9, paragraph 3, of Legislative Decree 38 dated February 28, 2005.

The consolidated financial statements of the IFI Group are expressed in millions of Euro.

3. Format of the consolidated financial statements and other information

The IFI Group presents a consolidated income statement using a classification based on the nature of expenses as this is believed to provide information that is more relevant than one based on the function of expenses as presented by the operating companies consolidated line-by-line.

For the consolidated balance sheet, a format has been selected to present current and non-current assets and liabilities.

The consolidated statement of changes in equity shows comprehensive income and expenses in a specific section for income and expenses recognized directly in the reserves.

For the consolidated statement of cash flows, the indirect method has been selected.

Transactions with related parties are not significant in amount and are therefore not presented separately in the financial statement formats. They are, however, disclosed in Note 40 to the financial statements.

4. Unusual and/or atypical transactions and nonrecurring events and significant transactions

In 2006, there are no significant unusual and/or atypical transactions, also on the basis of information received from the companies of the Group, that are required to be disclosed pursuant to Consob Communication 6064293 dated July 28, 2006.

With regard to significant nonrecurring events and transactions, the following is noted.

IFI S.p.A. - Consob sanctionary measure

On February 13, 2007, the meeting of the board of directors of the company, which was presided over by the vice chairman (vicario) John Elkann, was notified of the Consob sanctionary measure against Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone with regard to the contents of the press releases dated August 24, 2005 released by IFIL Investments S.p.A. and Giovanni Agnelli e C. S.a.p.az..
The board of directors of IFI S.p.A., which did not take part owing to the reference to some of its members, expressed its full support to the above persons.
Additional information is provided in the comments on the operating performance of IFIL Investments S.p.A..

Public Exchange and Purchase Offer launched by Sequana Capital

On September 6, 2006, Sequana Capital launched the Public Exchange Offering of a maximum of 57,646,980 Sequana Capital shares in exchange for a maximum of 1,859,580 SGS shares held by Sequana Capital itself, in a ratio of 1 SGS share for every 31 Sequana Capital shares tendered in the Offering.
Alternatively, the stockholders could have chosen to tender their shares to the Public Purchase Offering and receive the price of € 21 in cash for each Sequana Capital share sold to the company.
The offering was concluded with 57,521,414 shares tendered to the Exchange Offering and 125,566 shares to the Purchase Offering. Sequana Capital therefore sold 1,855,529 SGS shares, of which 1,029,456 shares were sold to the parent Ifil Investissements at the price of CHF 1.320 per share at the CHF/Euro exchange rate equal to 1.5882, realizing a gain net of income taxes of € 889 million.
The Sequana Capital shares contributed were canceled with a consequent reduction in capital stock.

In the IFIL consolidated financial statements, the investment in SGS S.A., before the elimination of the net gain of € 493 million realized by Sequana Capital on the sale of 13.16% of SGS capital stock to Ifil Investissements, was aligned with the carrying amount which it had in the consolidated financial statements of the Sequana Capital Group before the Public Exchange and Purchase Offering, equal to € 361.6 million, and was classified in “investments available-for-sale”. At December 31, 2006, the investment was therefore measured at fair value on the basis of the stock market price at the end of the year, recording an unrealized gain (€ 508.4 million) in equity.

The remaining net gain of € 396 million is entirely attributable to the minority interest and is shown separately at the bottom of the income statement.

5. Basis of consolidation

Criteria used in determining the scope of consolidation

The companies in which the IFI Group has the power to exercise control, directly or indirectly, by determining the financial and operating policies of an enterprise so as to gain benefits from its activities are consolidated line-by-line, with the minority stockholders being attributed their interests in the equity and profit.

Pending an opinion by the IASB, which has also recently been requested by the European Commission by letter dated October 26, 2006, that will definitively clarify the

criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, the IFI Group has continued to exclude the Fiat Group, in which the subsidiary IFIL has a 30.45% holding of ordinary capital stock, from line-by-line consolidation consistently with the method followed for the first-time adoption of IFRS and the preparation of the consolidated financial statements at December 31, 2005.
However, in order to provide more meaningful disclosure, Note 44 presents the consolidated proforma data as if the Fiat Group had been consolidated line-by-line.

Subsidiaries either dormant or generating an insignificant effect on the total of the Group's assets, liabilities, financial position and earnings are also excluded from the scope of consolidation.

Subsidiaries excluded from consolidation, subsidiaries jointly controlled with other stockholders, associates and investments in other companies are accounted for as described under "Other non-current financial assets".

Consolidation procedures

The financial statements of subsidiaries as defined above are included in the consolidated financial statements from the date that control commences until the date that control ceases.

The results of discontinued operations or assets held for sale which meet the specific requirements of IFRS 5 are shown separately and correspond to the results achieved up to the time of disposal, after taxes and other direct attributable costs, as well as the gains (losses) on their sale.

Assets and liabilities, and revenues and expenses, of subsidiaries consolidated on a line-by-line basis are included in full in the consolidated financial statements of the Group; the carrying amounts of investments are eliminated against the subsidiaries' related equity, attributing to the identifiable assets and liabilities the fair value at the date of the acquisition of control. Any residual difference, if positive, is recognized in assets in "goodwill" or, if negative, in the income statement.
The share of the equity and the results of operations attributable to the minority interest is disclosed separately. The minority interest in equity is determined on the basis of the amounts attributed to the assets and liabilities at the date of the acquisition of control, excluding any goodwill referring to them.

When losses in a consolidated subsidiary pertaining to the minority stockholders exceed the minority interest in the subsidiary's capital stock, the excess, or deficit, is charged to the Group, unless the minority stockholders are expressly committed to reimbursing the losses, in which case the excess is recorded as an asset in the consolidated financial statements. If no such commitment is in place, should profits be realized in the future, the minority interests' share of those profits will be attributed to the Group, up to the amount necessary to recover the losses previously absorbed by the Group.

The effects of subscribing to capital stock increases when there are different issue prices for the various classes of stock are recognized as changes in equity.

Date of reference

Investments are consolidated using the financial statements at December 31, the closing date of the parent, which covers a 12-month period, or accounting data prepared as of the same date (when the closing date differs from that of the parent), adjusted, where necessary, to conform with the accounting principles of the Group. The Alpitour Group, whose fiscal year ends on October 31, is consolidated line-by-line, since it is impossible to obtain the consolidated accounting data at December 31, on a timely basis without disproportionate expense. Between November 1 and December 31, 2005 and 2006, there were no significant transactions or events which would have required adjustments to the consolidated financial statements of the Alpitour Group. This treatment is allowed by IAS 27 – Consolidated and Separate Financial Statements.

Intragroup transactions

Intragroup balances and significant transactions and any unrealized gains and losses between companies consolidated line-by-line are eliminated. Unrealized gains and losses arising from transactions with companies accounted for by the equity method are eliminated to the extent of the Group's interest in those companies.
Intragroup losses are not eliminated if they are considered representative of an effective lower value of the asset sold.

Consolidation of foreign entities

All assets and liabilities of foreign companies that are consolidated having a functional currency other than the Euro are translated using the exchange rates in effect at the balance sheet date (the current method). Income and expenses in the income statement and cash flows in the statement of cash flows are translated at the average exchange rate for the year. Translation differences resulting from the application of this method are classified as equity until the disposal of the investment.
Goodwill and fair value adjustments arising on the acquisition of a foreign entity are recorded in the relevant foreign currency and are translated using the period-end exchange rate.

6. Significant accounting policies

Intangible assets

Goodwill. In the case of acquisitions of businesses, the acquired identifiable assets, liabilities and contingent liabilities are recorded at fair value at the date of acquisition.
Any excess of the cost of the business combination over the Group's interest in the fair value of those assets and liabilities is classified as goodwill and recorded in the financial statements as an intangible asset. If this difference is negative, it is recognized in the income statement at the time of acquisition.
Goodwill is not amortized, but is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, in accordance with IAS 36 – Impairment of Assets. Goodwill is allocated to cash generating units or groups of cash-generating units representing the operating level at which the Group controls the rate of return of the investments.
After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Reversal of any impairment loss for goodwill is not permitted.

On disposal of a part or the whole of a business which was previously acquired and which gave rise to the recognition of goodwill, the residual amount of the related goodwill is included in the determination of the gain or loss on disposal.
In the context of IFRS First-time Adoption, the Group elected not to apply IFRS 3 – Business Combinations retrospectively to the business combinations that occurred before January 1, 2004; as a consequence, goodwill arising on acquisitions before the date of transition to IFRS has been retained at the previous Italian GAAP amounts, subject to being tested for impairment at that date.

Other intangible assets: purchased or internally-generated are recognized as assets in accordance with IAS 38 – Intangible Assets (when they are controlled by the enterprise), where it is probable that the use of the asset will generate future economic benefits and where the costs of the asset can be determined reliably.
Revaluations are not permitted even if allowed by specific laws.
Such assets are measured at purchase or manufacturing cost and amortized systematically on a straight-line basis over their estimated useful lives, if these assets have finite useful lives, taking into account estimated realizable value. Intangible assets with indefinite useful lives and those not yet in production are not amortized, but tested for impairment annually and more frequently, whenever there is an indication that the asset may be impaired. When, subsequently, there is an indication that an impairment loss may no longer exist or may have decreased, the carrying amount of the asset is increased up to the new estimated recoverable amount which cannot exceed the amount which would have been determined had no impairment loss been recognized. The reversal of an impairment loss is recognized immediately in the income statement.

Other intangible assets acquired as part of a business are capitalized separately from goodwill if their fair value can be measured reliably.

Amortization plans and any realizable value are reviewed at least annually.

Greenhouse gas emission rights: in the absence of specific IFRS standards and IFRIC interpretations, the Sequana Capital Group has applied, on a temporary basis, the following accounting treatment which provides for:

- initial accounting: the rights (allowances) attributed, measured at the market price at the date of issue, are accounted for as “other intangible assets” with a contra-entry to deferred income classified under “other payables”;
- afterwards: the deferred income is credited to the income statement on a straight-line basis over the period of reference. Moreover, a liability is recognized corresponding to the quantity of allowances to be delivered with a contra-entry to a cost representing the gas emissions. This liability is measured at the initial amount of the allowances issued or purchased and, depending on the case, at the market value of the allowances to be delivered which exceeds those held at the balance sheet date;
- delivery of the allowances relating to the emissions during the period: at the effective date of delivery, the intangible assets and the related liability are eliminated from the balance sheet;
- sales of allowances: the gains or losses arising from the sales of allowances are recognized in the income statement under “other nonrecurring income and expenses”.

The excess allowances recognized in the assets are tested for impairment annually, or more frequently, if there are indications that they may be impaired.

Players' registration rights: are recognized at time-discounted cost, including any additional costs.
Players' registration rights are amortized on a straight-line basis over the period of the contracts signed with the individual professional players. The original amortization plan may be extended as a result of the early renewal of a contract, starting from the season in which the renewal takes place. For soccer players registered as “*giovani di serie*” (youth players), costs are amortized over five years using the straight-line method.
Players' registration rights are recorded on the date on which the contracts are ratified by the Lega Nazionale Professionisti for national transfers and on the "transfer" date indicated by the Italian Soccer Federation – F.I.G.C. for international transfers.
Player sharing receivables and payables ex. art 102 bis of the N.O.I.F (Internal Organizational Rules issued by the Italian Soccer Federation – F.I.G.C.) are also recorded in players' registration rights.

Player sharing receivables, which represent the value of the simultaneous re-acquisition of 50% of registration rights of the players transferred, are recorded at the adjusted cost and are amortized net of any residual value estimated at the end of its useful life. In the event that the residual value is equal to or higher than the historic value recorded, the amortization is zero. The adjusted cost is the lower of the cost borne according to the legal format agreed between the parties and the actual value of the re-acquisition.

Player sharing liabilities, which represent 50% of the value at which the player sharing rights were sold are recorded at the nominal value, but are deducted from the value of the registration rights of the player for which sharing rights have been disposed of, in order to represent the acquisition actually made. Due to this, the amortization of the registration right disposed of under the player sharing agreement is calculated on the lower cost thus determined.

In the presence of indicators of the loss of value of players' registration rights (impairment indicators), an evaluation is made for purposes of the impairment test that takes into account the following factors:

- direct execution by the company directors who, at their discretion, may be assisted by an external expert to support them in identifying the objective parameters to be used for the valuation of the value of players' registration rights (e.g. role and ages of the player, analysis of the values of players' transfers in the most recent transfer campaigns, call up to the national team etc.);
- identification of the cash-generating units to be taken into account in the individual player's registration rights, without the possibility of making compensations with any re-evaluations that could emerge from the valuation illustrated in the previous point; this is because it is held that the first impairment indicator can occur for each individual registration right;
- execution of a possible additional check of the recoverability of the investment through the analysis of other factors linked to the team as a whole; this makes it possible to also consider the fact that there could be a loss of value even when there are no impairment indicators (or impairment loss) at the level of the individual registration right.

The gains and losses deriving from the disposal of players' registration rights are recorded on the basis of the date of execution approved on the contracts by the Lega Nazionale Professionisti, for national transfers, and on the date of the “transfer” issued by the Italian Soccer Federation – F.I.G.C., for international transfers.

Gains and losses deriving from the disposal of players' registration rights are adjusted for accounting in the income statement of the effect due to the lower amortization of the registration rights recorded at the time-discounted cost compared to what was recorded under Italian GAAP.

The gains deriving from the disposal of players' registration rights, 50% of which was re-acquired at the same time, are adjusted for 50% of their sum so as to reflect in the income statement the revenues matured for the share of the registration right actually transferred through sale. The remaining part of the gain may, instead, be realized only at the time of the termination of the player sharing agreement, when the player leaves the company definitively. In the event that the disposal of registration rights that precedes the stipulation of the player-sharing contract generates a loss, the value of the latter is not, in contrast, subject to any adjustment for IFRS purposes. This stems from the fact that this loss is assimilated to the effect of the impairment test of the registration rights, under the assumption that the moment of disposal of the right is when this loss is incurred.

The income and expenses deriving from the termination of player-sharing agreements ex art. 102 bis of N.O.I.F. are recorded on the basis of the date of execution authorized on contracts by the Lega Nazionale Professionisti. Those deriving from the termination of sharing agreements are adjusted for the accounting in the income statement of the effect due to the lower amortization of the registration rights regarding the disposal of the player-sharing rights compared to what was recorded under Italian GAAP.

Property, plant and equipment

Property, plant and equipment are stated at purchase or production cost less accumulated depreciation and impairment losses. Revaluations are not permitted, even if allowed by specific laws.

Purchase cost includes all directly attributable costs necessary to make the asset ready for use. When there are obligations for decommissioning, the carrying amount includes the estimated costs (discounted to present value) to be incurred when the structure is decommissioned which is recognized with a contra-entry to a specific provision account.

Any capital investment grants are recorded in the balance sheet in liabilities and subsequently allocated systematically to the income statement over the number of years necessary to match the costs to be compensated.

Financial expenses associated with investments are generally charged on the accrual basis to the income statement.

Assets acquired under finance leases are recognized in property, plant and equipment with a contra-entry to financial payables to lessors and depreciated on the basis indicated below. Whenever there is a reasonable certainty that the asset will not be purchased at the end of lease, depreciation is taken over the period of the lease, if it is shorter than the useful life of the asset.

If an asset has significant components with different useful lives, these components are recorded separately.

The costs incurred subsequent to purchase are capitalized only if they increase the future economic benefits inherent to the assets to which such costs refer. All other costs are recognized in the income statement when incurred.

Assets are depreciated systematically using the straight-line method over their estimated useful lives and taking into account estimated realizable value. The carrying amounts are periodically tested for impairment. When, subsequently, there is an indication that an impairment loss may no longer exist or may have decreased, the carrying amount of the asset is increased up to new estimated recoverable amount which cannot exceed the amount which would have been determined had no impairment loss been recognized. The reversal of an impairment loss is immediately recognized in the income statement.

Depreciation is calculated when the assets are ready for use on a straight-line basis over the estimated useful lives of the assets as follows:

Buildings	from 10 to 40 years
Plant and machinery	from 5 to 20 years
Industrial equipment	from 5 to 20 years
Other assets	from 3 to 25 years

The depreciation plan and the estimate of realizable value are reviewed annually.

The cost of land is recorded separately and is not depreciated since it has an indefinite life.

Other non-current financial assets

Investments in which the Group exercises a significant influence are accounted for by the equity method. Significant influence is assumed if the Group holds more than 20% of the voting rights or in relation to the decisional power exercised.

Other investments available-for-sale are measured at fair value which coincides, for listed investments, at the market price on last day of the reporting period. Unrealized gains and losses are recognized directly in equity, net of the relevant tax effect. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity is reversed and recognized in the income statement. Such impairment losses may not later be reversed through the income statement.

Securities available-for-sale represented by debt securities, are recognized at cost and subsequently measured at fair value. The difference is recognized in equity. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity is reversed and recognized in the income statement. Such impairment losses, when the reasons which gave rise to them no longer exist, are reversed in the income statement but only up to the initial amount.

Securities, security deposits and other financial assets held to maturity are recognized and measured at amortized cost.

The amortized cost of a financial asset is the amount at which the financial asset is measured initially net of the repayment of principal, adjusted down on the basis of the total amortization of any difference between the initial amount and the maturity amount using the effective interest method, less any writedown (made directly or through the use of an accrual) for impairment or uncollectibility.

The effective interest rate is the rate that exactly discounts future payments or collections over the expected life of the financial instrument or, if appropriate, over a shorter period at the net carrying amount of the financial asset.

Other current financial assets

Financial assets held for trading, being acquired for resale in the short term, are measured at fair value through the income statement.

This category includes short-term credit instruments and other forms of investment of liquidity, some unconsolidated investments, as well as derivative instruments.

Inventories

Inventories are stated at the lower of purchase or manufacturing cost and estimated realizable value. Cost is determined by the weighted average cost method or FIFO (First-in - First-out).
Inventories of finished and semifinished goods include the direct costs of materials and labor and indirect costs, excluding general administration expenses. The market value of the inventories takes into account provisions for obsolete inventories.

Assets held for sale

Assets, or a group of assets and liabilities (that must not be offset), which are highly probable of being sold within the next year, are classified as held for sale on a specific line in the balance sheet and, if they represent significant sectors of activities, the relative results are shown separately in the income statement.
The disclosure relating to the results of such assets, for prior periods presented in the financial statements, is shown separately.
Such assets are stated at the lower of the carrying amount and fair value less costs to sell. Any impairment loss that arises should be recorded in the income statement. The impairment loss should eventually be reversed if the reasons for the impairment no longer apply, but only up to the initial amount. From the time the asset is recognized as

an asset held for sale, amortization and depreciation cease. Financial expenses and expenses attributable to the liabilities of a disposal group classified as held for sale should continue to be recognized.

When the conditions which led to the recognition of an asset as held for sale no longer apply, it should be reclassified to non-current assets and stated at the lower of the carrying amount before being designated as held for sale and its recoverable amount at the date of the subsequent decision not to sell the asset; the difference is recognized in profit and loss.

Non-financial receivables and payables

Receivables are initially recognized at fair value, represented by the present value of the amount that will be collected. Subsequently, they are measured at amortized costs using the effective interest method.

A provision for impairment of trade receivables is established when there is objective evidence of an impairment loss or a risk that the Group will not be able to collect the contractual amount (principal and interest) at the contractually agreed dates. The amount of the provision is the difference between the asset's carrying amount and the present value of recoverable estimated future cash flows, discounted at the effective interest rate.

Payables are measured at their nominal amount, increased by the interest expense due, if any. Payables are subsequently measured at amortized cost.

Debt

Interest-bearing debt is recognized at cost which corresponds to the fair value of the amount received net of directly attributable costs. Debt is subsequently measured at amortized cost. The difference between amortized cost and the amount to be repaid is recognized in the income statement on the basis of the effective interest rate over the period of the loan.

Debt is classified in current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months from the reporting date.

Derivative financial instruments

Derivative financial instruments are only used for hedging purposes in order to reduce interest rate and/or currency risks and market price risks.

Financial instruments qualify for hedge accounting only when there is formal designation and documentation of the hedging relationship and the hedge, verified periodically, is highly effective.

All derivative financial instruments are measured at fair value at the end of the period.

When financial instruments qualify for hedge accounting, the following accounting treatment applies:

– Fair value hedge: where a derivative financial instrument is designated as a hedge of the exposure to changes in fair value of a recognized asset or liability that is attributable to a particular risk and could affect profit and loss, the gain or loss from re-measuring the hedging instrument at fair value is recognized in the income statement.

– Cash flow hedge: where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows of a recognized asset or liability or a highly probable forecast transaction and could affect profit and loss, the effective portion of any gain or loss of the derivative financial instrument is recognized directly in equity. The cumulative gain or loss is removed from equity and recognized in the profit and loss account at the same time in which the hedged transaction affects profit and loss. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in equity and is recognized in the income statement at the same time the related transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in equity is recognized in the income statement immediately.

If the conditions of IAS 39 are not met, the transactions, even if they have been set up for the purpose of managing risk exposure (inasmuch as the Group's policy does not permit speculative transactions) are classified and measured as trading transactions. In that case, the difference with fair value is recognized in the income statement.

Employee benefits – Pension plans

The companies of the Group offer their employees various forms of pension plans with specific characteristics that vary according to the law, the regulations and the practices in the countries in which they operate.

The pension plans are currently either defined contribution or defined benefit plans.

Under defined contribution plans the Group pays contributions to outside, legally separate entities with administrative autonomy, which frees the employer from any subsequent obligation as the outside entity assumes the commitment to pay what is due to the employee.

Consequently, the Group companies record the contribution paid as an expense and do not recognize any liability.

Defined benefit plans include post-employment benefits, other than those under defined contribution plans. Under defined benefit plans, the Group companies have the obligation to set aside the costs relating to the benefits guaranteed to their employees in service and to retired employees. The actuarial risk and the investment risk are thus substantially borne by the companies of the Group.

Defined benefit plans, which include employee severance indemnities established by Italian laws, are measured by actuarial techniques using the Project Unit Credit Method.

As provided by the amendment to IAS 19 – Employee Benefits, issued by the IASB in December 2004, the Group elected to recognize actuarial gains and losses immediately in the period in which they arise, outside the income statement, in a statement of recognized income and expense.

All cumulative actuarial gains and losses that existed at January 1, 2004 have been recognized in equity.

For defined benefit plans without plan assets, the expenses relating to the increase in the present value of the obligation, due to the fact that the payment date of the benefits is nearing, are recognized in financial expenses.

Payments relative to defined contribution plans are recognized as an expense in the income statement as incurred.

The liability is calculated on an individual basis and takes into account life expectancy, personnel turnover, salary changes, revaluation of the yields, inflation and the present value of the amounts to be paid. The specific assumptions of each plan take into account the local economic conditions.

Defined benefit plans are in some cases covered by financial assets managed outside the Group companies. In those cases, the amount recognized in the financial statements for such liabilities corresponds to the difference between present value of future services (actuarial liability) and the market value of the assets invested that are intended to cover the liability, increased by losses or decreased by unrecognized (or not yet recorded) gains and, in any case, taking into account the surplus cap limit for assets established by paragraph 58 of IAS 19. When the result of this calculation shows a net obligation it is recognized in a provision under liabilities, in the reverse case, an asset is recognized.

Beginning January 1, 2007, the Finance Bill in Italy and the relative decrees implementing it introduced changes regarding employee severance indemnities which include allowing the employee to choose the destination of his/her indemnity that is accruing. In particular, the employee could choose to direct the new flows of the indemnity to pre-chosen pension schemes or to keep them with the company. At the present time, the uncertainty over the interpretation of the recently enacted law, the various possible interpretations of the qualification under IAS 19 of the indemnity being accrued and the resulting changes in the actuarial calculations of the indemnity already accrued, as well as the impossibility of estimating what destinations will be chosen by the employee (the individual employees have until June 30, 2007 to make their decisions) would render it premature to offer any assumptions, by the companies operating in Italy, on the actuarial change in the calculation of the indemnity accrued at December 31, 2006.

Employee benefits – Stock option plans

In accordance with IFRS 2 – Share-based Payment, the full amount of the fair value of stock options on the grant date is expensed in personnel costs on a straight-line basis over the period from the grant date to the vesting date and recognized directly in equity. Changes in fair value after the grant date have no effect on the initial measurement.
The cost is recalculated each year in relation to the number of options not yet exercised.

In accordance with IFRS 2, the Group has applied this standard to stock options granted after November 7, 2002 and not yet vested at the effective date of IFRS 2 (January 1, 2005).

In the event the plans require a monetary payment equal to the increase in the value of the enterprise, the fair value of the liability of the plan is re-measured at each reporting date until its extinction.
The cost is recognized in the income statement in “Other nonrecurring expenses” with a contra-entry to “Other payables to related parties”.

Provisions for other liabilities and charges

Provisions for other liabilities and charges refer to costs and expenses of a determinate nature which are certain or likely to be incurred but, at the balance sheet date, are uncertain as to the amount or as to the date on which they will arise. Accruals are recorded when there is an obligation, legal or constructive, resulting from a past event, when it is probable that the use of resources will be required to satisfy the obligation and when a reliable estimate of the amount of the obligation can be made.
Changes in estimates are recorded in the income statement in the period in which the change is made.
The accruals mainly refer to environmental or legal risks and accruals for restructuring operations.

Accruals for environmental or legal risks

In general, environmental and legal risks are evaluated case by case. The accrual, if any, is booked on the basis of the best information available, on condition that this information makes it possible to determine a probable loss that is estimated in a sufficiently reliable manner.

Accruals for restructuring operations

An accrual for restructuring operations is booked on condition that a detailed and formal restructuring plan has been approved and that the restructuring has begun or the details of the restructuring plan have been made public.

Treasury stock

The cost of any treasury stock purchased and/or held, also through subsidiaries, as a result of specific stockholder resolutions are recognized as a deduction of equity and, therefore, the reserve as the contra-entry of treasury stock in portfolio is not shown separately. The proceeds from any subsequent sale are recognized as movements in equity.

Income taxes

Current income taxes are calculated according to the tax laws in force in the countries in which the companies of the Group operate.

Taxes on income are recognized in the income statement except to the extent that they relate to items directly charged or credited to equity, in which case the related income tax effect is recognized directly in equity.

Temporary differences between the amounts of assets and liabilities in the financial statements and the corresponding amounts for tax purposes give rise to temporarily deferred tax liabilities recorded in liabilities. Deferred tax assets relating to the carryforward of unused tax losses, as well as those arising from temporary differences, are recognized to the extent that it is probable that future profits will be available against which they can be utilized.

Deferred tax assets and liabilities are measured at the tax rates expected to apply to taxable income in the periods in which temporary differences will be reversed. Deferred income tax assets and liabilities are offset where there is a legally enforceable right of offset.

Deferred tax assets and liabilities are shown separately from other receivables and taxes payable in a specific caption under non-current assets or liabilities.

Transactions in foreign currencies

Transactions in foreign currencies are recorded at the foreign exchange rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the foreign exchange rate prevailing at that date. Exchange differences arising on the settlement of monetary items or on reporting monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements are recognized in the income statement.

Sales and purchases of receivables

Receivables sold with recourse remain in the balance sheet of the assignor which records a payable to the buyer against collection and financial expenses to be borne. Receivables sold without recourse are only derecognized if it can be demonstrated that the risks and rewards relating to the asset have been substantially transferred to the assignee.

Consequently, all receivables sold which do not meet IAS 39 derecognition requirements are recognized as such in the Group financial statements even though they have been legally sold. A corresponding financial liability is recorded in the consolidated balance sheet in debt. Gains and losses relating to the sale of such assets are not recognized until the assets are removed from the Group balance sheet.

Revenues

Revenues are stated net of discounts, allowances and rebates and are formed by sales of merchandise, goods and services as part of the Group's principal activities. Revenues from sales of goods and merchandise are recognized when the risks and rewards of ownership of the goods are transferred to the customer.
Revenues from services are recognized by reference to the stage of completion of the transaction at the balance sheet date and measured on the basis of the services rendered.

Financial income is recognized according to the accrual principle on the basis of the effective rate of return.

Dividends from investments accounted for at cost are recognized in the income statement when they are approved by the stockholders and only from the earnings generated after the acquisition of the investee company. Instead, when the dividends are distributed from reserves generated before acquisition, the dividends are reported as a deduction from the cost of the investment.

Other nonrecurring income (expenses)

Other nonrecurring income (expenses) include the gains and/or the losses on the disposal of non-current assets other than discontinued operations or assets held for sale (the results of the latter are included in “Profit (loss) from discontinued operations or assets held for sale”). They also include impairment losses of assets, restructuring costs, accruals and utilizations of non-current provisions for liabilities.

Earnings per share

Basic earnings per share is calculated by dividing the profit attributable to the equity holders of the parent by the weighted average number of shares outstanding during the period, excluding treasury stock. Diluted earnings per share is calculated by adjusting the weighted average number of shares outstanding to assume conversion of all dilutive potential shares. The profit attributable to the equity holders of the company is also adjusted to take into account the effects, net of taxes, of the conversion.

Segment information

Given the nature of the activities of IFI S.p.A. and the subsidiary IFIL S.p.A., IFI presents segment information which coincides with the consolidated data of each subsidiary and associate holding company, each of which represents an investment in a primary reporting segment.

7. Use of estimates

The preparation of financial statements and related disclosures that conforms to IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results could differ from those estimates. Estimates and assumptions are reviewed periodically and the effects of any changes are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the critical judgments and the key assumptions concerning the future that management has made in the process of applying the Group accounting policies and that have the most significant effect on the amounts recognized in the consolidated financial statements or that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Recoverability of non-current assets
Non-current assets include property, plant and equipment, investment property, intangible assets (including goodwill), investments and other financial assets. Management reviews periodically the carrying value of non-current assets held and used and that of assets to be disposed of when events and circumstances warrant such a review. Management performs this review using estimates of future cash flows from the use or disposal of the asset and suitable discount rates in order to calculate present value. If the carrying amount of a non-current asset is considered impaired, the Group records an impairment charge for the amount by which the carrying amount of the asset exceeds its estimated recoverable amount from use or disposal determined by reference to its most recent corporate plans.

Pension and other post-retirement benefits
Group companies sponsor pension and other post retirement benefits in various countries. Management uses several statistical and judgmental factors that attempt to anticipate future events in calculating the expense, the liability and the assets related to these plans. These factors include assumptions about the discount rate, expected return on plan assets, rate of future compensation increases and health care cost trend rates. In addition, the Group's actuarial consultants also use subjective factors such as resignations and mortality rates in making relevant estimates.

Contingent liabilities
The cases and claims against the Group often raise difficult and complex factual and legal issues, which are subject to many uncertainties and complexities, including but not limited to the facts and circumstances of each particular case and claim, the jurisdiction and the differences in applicable law. The Group accrues a liability when it is determined that an adverse outcome is probable and the amount of the loss can be reasonably estimated. In the event an adverse outcome is possible or an estimate is not determinable, the matter is disclosed in the notes.

8. Adoption of new accounting standards and interpretations issued by the IASB

Standards and interpretations in effect since January 1, 2006

In 2006, the IFI Group adopted all the new and revised standards and the interpretations released by the IASB and IFRIC which had an effect on the transactions carried out or relevant to the financial statements for the years beginning on or after January 1, 2006.

In April 2005, the IASB issued an amendment to IAS 39 – Financial Instruments: Recognition and Measurement, to permit the foreign currency risk of a highly probable intragroup forecast transaction to qualify as the hedged item in a cash flow hedge in financial statements – provided that the transaction is denominated in a currency other than the functional currency of the entity entering into that transaction and the foreign currency risk will affect the consolidated financial statements. The amendment also specifies that if the hedge of a forecast intragroup transaction qualifies for hedge accounting, any gain or loss that is recognized directly in equity in accordance with the hedge accounting rules in IAS 39 must be reclassified into profit or loss in the same period or periods during which the foreign currency risk of the hedged transaction affects consolidated income statement.

In June 2005, the IASB issued another amendment to IAS 39 – Financial Instruments: Recognition and Measurement, to restrict the use of the option to designate any financial asset or any financial liability to be measured at fair value through the income statement (the fair value option). The revisions limit the use of the option to those financial instruments that meet certain conditions. Those conditions are that:

- the fair value option designation eliminates or significantly reduces an accounting mismatch;
- a group of financial assets, financial liabilities, or both is managed and their performance is evaluated on a fair value basis in accordance with a documented risk management or investment strategy; and
- an instrument contains an embedded derivative that meets particular conditions.

The adoption of these standards and interpretations had no material impact on the financial statements for the year ended December 31, 2006.

Standards and interpretations not yet in effect
In August 2005, the IASB issued IFRS 7 – Financial Instruments: Disclosures and a complementary amendment to IAS 1 – Presentation of Financial Statements: Capital Disclosures, effective beginning January 1, 2007.
IFRS 7 requires disclosures about the significance of financial instruments for an entity's financial position and performance. These disclosures incorporate many of the requirements previously in IAS 32 – Financial Instruments: Disclosure and Presentation. IFRS 7 also requires information about the extent to which the entity is exposed to risks arising from financial instruments, and a description of management's objectives, policies and processes for managing those risks.
The amendment to IAS 1 introduces requirements for disclosures about an entity's capital.
The IFI Group has decided not to elect the early adoption of IFRS 7 and the amendment to IAS 1.
On November 30, 2006, the IASB issued IFRS 8 – Operating Segments that will become effective beginning from January 1, 2009 and which will replace IAS 14 – Segment Reporting.

In 2006, the following interpretations were also issued:

- IFRIC 9 – Reassessment of Embedded Derivatives (effective from January 1, 2007)
- IFRIC 10 – Interim Financial Reporting and Impairment (effective from January 1, 2007)
- IFRIC 11 – IFRS 2: Group and Treasury Share Transactions (effective from January 1, 2008)

The Group believes that the adoption of these interpretations will not have a material effect on the financial statements.

The following interpretations were issued in 2006 but are not applicable to the IFI Group:

- IFRIC 8 – Scope of IFRS 2 (effective from January 1, 2007)
- IFRIC 7 – Applying the Restatement Approach under IAS 29 Financial Reporting in Hyper-inflationary Economies (effective from January 1, 2007)
- IFRIC 12 – Service Concession Arrangements (effective from January 1, 2008).

9. Risk management

IFI S.p.A.
In view of its business as an investment company, IFI S.p.A. is not subject to specific credit risks. Moreover, it is not subject to direct currency risks since it does not hold significant equity investments denominated in currencies other than the Euro.

Financing requirements and cash flows are coordinated so that the financial resources are managed effectively and efficiently. Outgoing flows of current operations are substantially financed by incoming flows from normal business and cash availability.

Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or raising of sufficient funds that can be readily used. In this sense, IFI S.p.A. operates so as to have irrevocable credit lines available with expiration dates and amounts consistent with its investment plans.
IFI S.p.A. assesses and manages its exposure to changes in interest rate risks consistently with its management policy and utilizes derivative financial instruments to fix some of the financing obtained with a predetermined interest rate. Derivative financial instruments are not used for speculative purposes.

In particular, during 2006, the only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on existing loans.

IFIL Holdings System
In view of its business as an investment company, IFIL S.p.A. is not subject to specific credit risks. Moreover, it is not subject to direct currency risks since it does not hold significant equity investments denominated in currencies other than the Euro.

The consolidated net financial position of the “Holdings System” (see also “IFIL Group – Review of the condensed consolidated results” in the Directors' Report on Operations) is currently a net cash position and, therefore this also renders the liquidity risk insignificant. In any case, the financing requirements and the cash flows of the companies in the “Holdings System” are coordinated so that the financial resources are managed effectively and efficiently. Outgoing flows of current operations are substantially financed by incoming flows from normal business and cash availability.
Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or raising of sufficient funds that can be readily used. In this sense, IFIL S.p.A. operates so as to have irrevocable credit lines available with expiration dates and amounts consistent with its investment plans.

IFIL S.p.A. assesses and manages its exposure to changes in interest rate risks consistently with its management policy and utilizes derivative financial instruments to fix some of the financing obtained with a predetermined interest rate. Derivative financial instruments are not used for speculative purposes.

In particular, during 2006, the only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on some existing loans and on bonds issued.

Sequana Capital Group
The sales of net options are prohibited. The Sequana Capital Group's policies do not allow it to operate on financial markets for speculative purposes and provide for the use of derivative financial instruments only in the event of exposure to certain or highly probable risks.
The Sequana Capital Group uses derivative financial instruments to hedge exposure to interest rate fluctuations as its loans, for the most part, are obtained at 1-, 2- or 3-month floating rates.
The operating companies of the group use derivative instruments to hedge interest rates under the coordination of the general management of the group for a part or the whole of its net debt.

At December 31, 2006, Arjowiggins has a portfolio of swap contracts for € 100 million and collar contracts for € 70 million. These derivatives are recognized at fair value through the income statement.
At December 31, 2006, Antalis has a portfolio of swaps for fixed rates against the 1-month Euribor for € 225 million. These derivatives are classified as hedging derivatives and their fair value is recognized in equity.

The Sequana Capital Group uses certain derivative instruments to hedge exchange rate risk.
Sequana Capital put into place currency options to guarantee the exchange rate of the Legg Mason shares listed in U.S. dollars on the New York stock exchange.
On cash resources in Euros held by the British holding companies, a reverse position was taken by selling Euros against the British pound for an amount that varies in relation to the changes in the positions for purposes of canceling the economic effect of the change in the Euro/British pound exchange rate.
As for the operating companies, derivative instruments were put into place for future flows in currencies other than the Euro.

Arjowiggins has hedging contracts in place for energy prices which are recognized at fair through the income statement.

Alpitour Group

The Alpitour Group's policies exclude the possibility of using derivative financial instruments for speculative purposes.
The Group uses derivatives to hedge currency risk (mainly with forward purchases in U.S. dollars to hedge payments of tourism services) and interest rate risk (with interest rate swaps).

Moreover, the aviation division is subject to the risk of fluctuations in fuel prices that are largely associated with the international political equilibrium and other exogenous factors. Since fuel is a primary factor in air transport, price fluctuations could have a significant impact on the Group's margin and, consequently, the risk exposure is hedged by commodity swaps and zero cost collars.

10. Change in the scope of consolidation

Changes in the scope of consolidation during 2006 at the various levels of consolidation are described below.

IFIL Holdings System

In 2006, the subsidiary Sadco S.A. was accounted for by the equity method since it was put into a wind-up at the end of 2005.

Sequana Capital Group

In August 2006, Antalis purchased the company Dekker Packaging BV and in December 2006 Antonin Rodet purchased the company Dufouleur Père et Fils.
Information on the acquisition of Dekker Packaging is presented below.

€ in millions	Dekker Packaging
Acquisition date	8/11/2006
Acquisition percentage	100%
Country	The Netherlands
Closing date of financial statements	December 31
Amounts expressed in local currency	Euro
Acquisition information (referring to a 12-month period):	
Sales	24
Total assets	8
Acquisition analysis:	
Acquisition price (a)	11
Nature of acquisition price	Cash
Non-current assets	1
Working capital requirements	2
Net other liabilities	(1)
Net assets acquired (b)	2
Net goodwill (a-b)	**9**

Alpitour Group

Alpitour, through its subsidiary Alpitour World Hotels & Resorts S.p.A., purchased a 100% stake in the capital of Netrade S.p.A., a company with headquarters in Rome which operates in the hotel management sector.

Alpitour also sold the entire holding in Jumbo Grandi Eventi S.r.l. (70% of capital stock), in Renthotel Tunisie S.A. (100% of capital stock), previously consolidated line-by-line, and in Blumarin Hotels S.A. de C.V., owner of the "El Mandarin" hotel resort in Mexico.

The effects of these transactions are described below.

€ in millions	Netrade S.p.A.
Acquisition date	9/26/2006
Acquisition percentage	100%
Country	Italy
Closing date of financial statements	October 31
Acquisition information (a):	
Sales	-
Profit	-
Total assets	3

(a) Recorded under “Other nonrecurring income (expenses)” in the income statement.

In August 2006, the Sequana Capital Group purchased the company Dekker Packaging NV and recognized goodwill of € 9 million on the acquisition; at the end of 2006, the company Dufouleur Père et Fils was purchased and goodwill of € 2 million was recognized on the acquisition. The financial statements used for the acquisitions are in the process of being valued so the final amount of goodwill will be decided in 2007.

At the end of 2006, the impairment tests of the Antalis Group indicated an impairment loss of € 28 million which was recognized in the income statement. Following the classification of the activities of Canson Grand Public to “Assets held for sale”, an amount of € 30 million of the goodwill on Arjowiggins allocated to those activities was reclassified to the same line of the balance sheet.

Impairment test on the goodwill of the Sequana Capital Group

The value of the company is the reference used for the valuation of the goodwill of the Group. It is calculated using a multi-criteria approach which includes multiples of the current operating earnings, future net cash flows and comparable transactions. This calculation, moreover, is confirmed by an external assessment.

The value of the company as determined above less net financial debt constitutes the fair value to be used to compare the carrying amount of the cash-generating units (CGU) to which the goodwill is allocated. When this comparison produces an impairment loss, it is recognized as a deduction from goodwill.

The principal assumptions used in the calculation of the impairment test are as follows:

		Arjowiggins	**Antalis**
Growth rate after the explicit period of cash flows	2006	1.49%	0.12%
	2005	0.21%	0.38%
Pretax discount rate	2006	8.30%	7.70%
	2005	8.00%	8.70%

In 2006, the impairment tests indicated an impairment of certain assets for € 28 million, recognized in the income statement and attributable to:

€ in millions	
Promotional Products Gmbh	12
Antalis Gmbh	8
Singe Turquie	6
Other minor companies	2
Total	**28**

With the exception of the goodwill relating to Promotional Products Gmbh, which was completely written off, the sensibility of the impairment tests at a +/- 0.5% variation is equal to +/- € 1 million.

12. Other intangible assets

Commitments for the purchase of intangible assets by the IFI Group amount to € 1 million (€ 1 million at December 31, 2005).

Research and development expenditures charged to income in 2006 amount € 17 million (€ 17 million in 2005).

Intangible assets completely amortized but still in use amount to € 33 million and refer to concessions, licenses and trademarks of the Alpitour Group for € 16 million, players' registration rights for € 10 million and other intangible assets for € 7 million.

In 2006, the line “Increases” includes internally-developed assets for € 6 million (€ 9 million in 2005).

(a) Recorded under “Other nonrecurring income (expenses)” in the income statement.

The line “Reclassification to Assets held for sale” includes non-current assets of the Sequana Capital Group for € 17 million transferred to assets held for sale.

In 2006 and 2005, no borrowing costs were capitalized.

Commitments for the acquisition of property, plant and equipment amount to € 5 million at December 31, 2006 (€ 11 million at December 31, 2005).

At December 31, 2006, the gross carrying amount of property, plant and equipment completely depreciated but still in use amounts to € 7 million.

Impairment test on the property, plant and equipment of the Sequana Capital Group

In 2006, the measurement of property, plant and equipment resulted in an impairment loss of € 24 million for Arjowiggins as a result of the comparison of the recoverable amount of the assets of Arjowiggins and the net carrying amount.

Such measurements were carried out on the basis of the impairment tests performed at the level of cash-generating units which represent the level at which the operating subsidiaries of the group manage their production systems. The recoverable amount of the cash-generating units is determined on the basis of the value in use, that is, by projecting the discounted cash flows, for five years, taken from the budgets approved by management. Beyond that period, the cash flows are extrapolated starting from the growth rates by activity.
The discount rates used in 2006 are 7.8% for European Union countries and 9.3% for North America.

Finance lease contracts on property, plant and equipment

The carrying amount of property, plant and equipment includes € 41 million (€ 11 million at December 31, 2005) relating to assets acquired under finance leases, mainly referring to the Sequana Capital Group, Juventus Football Club and the Alpitour Group.

These particularly refer to:

- the Juventus Football Club training center at Vinovo, for a total amount of € 22 million;
- some finance lease contracts referring to two buildings located in Milan and Padua carried by Welcome Travel Group, a subsidiary of the Alpitour Group.

Leasing information is as follows:

€ in millions	Land and buildings	Plant and machinery	**Total**

Turismo&Immobiliare	**25.00**	**4**	25.00	4	0
Sundry Antalis Group associates		**3**	-	3	0
Sundry Alpitour Group associates		**1**			1
		2,619		3,165	(546)

On April 7, 2006, IFI sold the entire stake held in Exor Group (3,418,242 shares representing 29.3% of capital stock) to the same Exor Group for a sales price of € 206 million (€ 60.5 per share) realizing a gain of € 7 million.

On December 18, 2006, as part of the Public Purchase and Exchange Offering launched by Sequana Capital, the 24.33% capital investment in SGS was partly sold to Ifil Investissements (a stake equal to 13.16%) and partly to the other stockholders of Sequana Capital.

The balance sheet and income statement effects of the intragroup transaction were eliminated at the IFIL consolidation level. However, since the conditions for accounting for the investment by the equity method are no longer valid (the stake held is now less than 20%), the remaining investment in SGS has been reclassified to other financial assets and measured at fair value.

The analysis of the changes during the year is as follows:

€ in millions	**2006**
Opening balance	**3,165**
Investments in Fiat stock	**63**
Sale of the stake of the investment in SGS to third parties	**(276)**
Sale of the investments in Exor Group	**(199)**

Total other financial assets	**104**		263		**1,106**	1,004
Total	**2,673**		1,524		**1,109**	1,173

The investment in Sanpaolo IMI is measured at fair value on the basis of the market price at December 29, 2006, equal to € 17.62 per share (€ 13.2 per share in 2005), with the unrealized gain recognized in equity.

The investment in SGS obtained through the exchange of Sequana Capital shares (see Note 4), recorded in non-current financial assets, is measured at fair value on the basis of the market price at December 29, 2006, equal to CHF 1.358 per share, (at the CHF/Euro exchange rate of 1.6069), with the unrealized gain recognized in equity.

The deposit in connection with the DG IV dispute was reclassified to current financial assets in that the Sequana Capital Group, with regard to this dispute, is waiting for the communication of the ruling handed down in the second half of 2006.

The SGS shares classified in current financial assets refer to the 4,051 shares sold by Sequana Capital to BNP Paribas as part of the equity swap contract. These shares were definitively sold by Sequana Capital on February 15, 2007.

Credit instruments included in current financial assets include temporary investments of cash resources made with leading credit institutions on the money market, in time deposits, in securities issued by the Italian government and in other short-term financial instruments held by the foreign subsidiaries of the IFIL Holdings System and Sequana Capital, which do not meet the conditions for classification as "Cash and cash equivalents".
They also include securities subscribed to by Alpitour for € 46 million as part of the transaction for the securitization of trade receivables carried out in 2006 (Note 17).

The analysis of changes during 2006 is as follows:

	Non-current financial assets		**Current financial assets**	
€ in millions	**12/31/2006**	12/31/2005	**12/31/2006**	12/31/2005

Reclassification to "Assets held for sale"	**(19)**			
Exchange differences	**(8)**	17		1
Change in the scope of consolidation	**(3)**	(43)		(14)
Other changes and reclassifications	**(123)**	3	**131**	(1)
Changes during the year	**1,149**	513	**(64)**	(188)
Closing balance	**2,673**	1,524	**1,109**	1,173

The fair value of current securities is calculated using the market prices at the balance sheet date, where available, or discounting future cash flows.

At December 31, 2006, the line "Fair value recognized in equity" includes the fair value adjustment of the investment in Sanpaolo IMI (€ 412 million) and in SGS S.A. (€ 508 million) recorded in non-current financial assets and, for current assets, the release to the income statement of the fair value recognized in prior years on the Legg Mason securities, sold during 2006.

In 2006, the line "Decreases" in current financial assets mainly refers to the sale of Legg Mason stock (1,664,963 shares received as payment on the sale of the 70.5% investment in Permal Group Ltd in November 2005) for € 146 million and the reduction of the credit instruments portfolio of Sequana Capital for € 128 million.

The line “Reclassifications to assets held for sale” refers to the investment in Campi di Vinovo S.p.A. held by Juventus Football Club.

The line “Change in the scope of consolidation”, in 2005, included the reclassification of the Permal Group to “Assets held for sale” for € 67 million.

Non-current other financial assets, excluding investments, by maturity are as follows:

€ in millions	**12/31/2006**	12/31/2005
From 1 to 5 years	**81**	205
Beyond 5 years	**23**	58
	104	263

16. Inventories

Details are as follows:

€ in millions	**12/31/2006**	12/31/2005	Change
Raw materials and other supplies	**111**	120	(9)
Work in progress	**45**	40	5
Semifinished and finished goods	**122**	106	16
Merchandise	**262**	288	(26)
Total inventories	**540**	554	(14)

At December 31, 2006, the inventories of the Sequana Capital Group are held as collateral for € 8 million (€ 5 million at December 31, 2005).

17. Other assets

Details are as follows:

€ in millions	**12/31/2006**	12/31/2005	Change
Other non-current assets			
Receivables for direct taxes	**1**	3	(2)
Receivables for disposals of intangible assets and property, plant and equipment	**24**	7	17

Total other receivables	**281**	317	(36)
Total other current assets	**1,219**	1,346	(127)
Total other non-current and current assets	**1,274**	1,379	(105)

During the course of 2006, the Alpitour Group started a monthly securitization program of its trade receivables, the amount of which totals € 55 million at October 31, 2006. The securitization operation formalized by Alpitour S.p.A. with Banca Calyon in Milan provides for a revolving credit line which can be used on a monthly basis up to a net amount of € 55 million against the sale of the trade receivables. Furthermore, in accordance with the contract terms, in exchange for the monthly sale of receivables and the amount of utilization requested (monthly program), Alpitour is obliged to subscribe to short-term securities (30-day maturities) issued by a French-registered associate of the Calyon Group, the amount of which is determined on the basis of the quality of the receivables sold and the relative degree of concentration. At October 31, 2006, short-term securities were subscribed to for an amount of € 46 million against a monthly program of € 55 million; the net use of the securitization line at the year-end closing date is therefore equal to € 9 million against a credit line made available by Calyon for € 55 million.

The breakdown of other assets by maturity is as follows:

€ in millions	Within 1 year	Between 2 and 5 years	Beyond 5 years	**Total**
Other non-current assets		32	23	**55**
Trade receivables	938			**938**
Other receivables	218		63	**281**
Balances at December 31, 2006	**1,156**	**32**	**86**	**1,274**
Other non-current assets		28	5	**33**
Trade receivables	1,029			**1,029**
Other receivables	254	2	61	**317**
Balances at December 31, 2005	1,283	30	66	**1,379**

18. Cash and cash equivalents

The reconciliation of cash and cash equivalents in the statement of cash flows and the the corresponding line in the balance sheet is as follows:

€ in millions	**12/31/2006**	12/31/2005	Change
Cash and cash equivalents	**362**	595	(233)
Bank overdrafts and bank borrowings	**(107)**	(123)	16
Cash and cash equivalents	**255**	472	(217)

19. Assets held for sale

The lines on the balance sheet relating to assets or groups of assets held for sale are detailed as follows:

€ in millions	**12/31/2006**	12/31/2005
Assets held for sale		
Non-current assets held for sale		
Property, plant and equipment	**10**	25
Investments	**19**	
Groups of assets held for sale		
Goodwill	**30**	
Other intangible assets	**1**	
Property, plant and equipment	**11**	
Other non-current assets	**1**	
Inventories	**12**	
Trade receivables	**25**	
Other current assets	**19**	
Total	**128**	25
Liabilities relating to assets held for sale		
Provisions for other liabilities and charges	**1**	
Bonds and other debt	**5**	
Trade payables	**23**	
Othe current liabilities	**3**	
Total	**32**	0

The groups of assets held for sale and the other property, plant and equipment relate to the Canson Grand Public activity of Arjowiggins, classified in “Assets held for sale” by Sequana Capital since it is expected to be sold, at the beginning of 2007, to the Hamelin Group, and some buildings and land owned by the Antalis Group, classified in “Assets held for sale” as part of the disposal program of a portfolio of properties in France, Spain, Italy, Germany, Switzerland and Finland.

The line “Investments” refers to Campi di Vinovo S.p.A., a company held by Juventus Football Club S.p.A. and classified here as a result of an agreement with Costruzioni Generali Gilardi S.p.A. which provided for the sale of the call option on the Campi di Vinovo shares to the same company.

Property, plant and equipment classified here in 2005 mainly consisted of the assets held by the “El Mandarin” hotel resort which was sold in 2006.

20. Equity attributable to the equity holders of the company

Capital stock

At December 31, 2006, IFI S.p.A.'s capital stock, fully subscribed to and paid-in, amounts to € 163,251,460 and consists of 86,450,000 ordinary shares and 76,801,460 preferred shares with a par value of € 1 each.

The ordinary capital stock of the company is entirely held by Giovanni Agnelli e C. S.a.p.az.. IFI preferred shares are listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment).

Pursuant to art. 10 of the bylaws, preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code and the second paragraph of art. 13 of the bylaws.

Pursuant to art. 27 of the bylaws, the profit of each year is appropriated as follows:

- 10% to the legal reserve until it reaches one-fifth of capital stock;
- of the remaining amount, 1% is at the board of directors' disposition for distribution among its members;
- the remaining profit is appropriated as follows:
  - to preferred shares, a preference dividend of 5.17% of their par value, which is not cumulative from one year to the next;
  - after any appropriations to reserves, the residual amount is attributed equally to the ordinary and preferred shares.

Capital stock may be increased for a period of five years, at one or more times, also in divisible form, up to a maximum of € 561,750,000, by the authority delegated, pursuant to art. 2443 of the Italian Civil Code, to the board of directors by the special stockholders' meeting held April 22, 2003.

Treasury stock

At December 31, 2006, IFI S.p.A. directly holds the following preferred shares of treasury stock:

€ in thousands	No. of shares	Carrying amount Per share (€)	 Total (€ in thousands)	% of class
IFI – preferred shares	5,360,300	13.15	70,477	6.98

During the year, there were no transactions involving preferred shares of treasury stock.

Dividends paid out

There were no dividends paid out from profits for the year ended December 31, 2005.

The board of directors' meeting put forward a motion to the ordinary stockholders' meeting called for the approval of the separate financial statements for the year ended December 31, 2006 to appropriate the entire profit to reserves.

21. Stock option plans

Stock option plans with underlying IFIL stock

At December 31, 2006, the stock option plans with underlying IFIL stock approved in the past by the board of directors of IFIL S.p.A. came to an end. Such plans can be described as follows:

- in May 2000, the IFIL S.p.A. board of directors approved a stock option plan for the directors and managers of IFIL S.p.A. and the parent, IFI S.p.A., for a maximum of 2,700,000 IFIL S.p.A. ordinary shares. A total of 2,691,500 options had been granted under this plan between 2000 and 2003, according to the level of responsibility held by the grantees in the corporate organization. Such options were exercisable up to December 31, 2006. The CEO and general manager, Virgilio Marrone, in 2006, subscribed to 85,800 shares at a price of € 4.52 per share and 54,400 shares at a price of € 6.109 per share under this plan; at the end of 2006, the remaining 39,000 option rights also expired;
- in September 2003, a stock option plan was approved solely for the directors, for a maximum of 700,000 IFIL S.p.A. ordinary shares. A total of 532,000 options had been granted under this plan in 2003 to the chairman Gianluigi Gabetti for the same number of ordinary shares exercisable by December 31, 2006 at the price of € 2.28 each.

The movements during the year were as follows:

	Number of grantees	Number of options Exercisable at start of 2006	 Expired in 2006	 Exercised in 2006	Exercise price (a)
IFIL 2000 Plan grants					
- 2000	15	522,000	522,000	-	6.997
- 2001	13	506,000	323,420	182,580	6.109
- 2002	13	810,250	142,050	668,200	4.52
		1,838,250	987,470	850,780	
IFIL 2003 Plan grants	1	532,000	-	532,000	2.28
		2,370,250	**987,470**	**1,382,780** (b)	

(a) Exercise price adjusted to take into account the cash capital stock increase in July 2003.

(b) Equal to 0.133% of current ordinary capital stock.

The market price of IFIL S.p.A. ordinary stock at December 29, 2006 was € 6.187.
With regard to these plans, there were no transactions entered into to favor the purchase of shares pursuant to art. 2358, paragraph 3, of the Italian Civil Code.

Stock option plan with underlying Alpitour stock
On December 15, 2005, in execution of the resolution passed by the board of directors' meeting held on November 11, 2005, the Executive Committee of IFIL S.p.A. approved a stock option plan for two managers of the Alpitour Group designed to promote their loyalty to the IFIL Group and provide an incentive to develop and appreciate the investments of the IFIL Group in the tourism sector.

The plan calls for purchase options on Alpitour shares to be granted to the chairman and chief executive officer, D.J. Winteler, and the general manager, F. Prete, respectively, equal to 6% (2,127,000 shares) and 5% (1,772,500 shares) of Alpitour's capital stock.
After approval on the part of IFIL S.p.A., the Alpitour S.p.A. board of directors may in the future grant purchase options on Alpitour shares equal to 4% (now 1,418,000 shares) of Alpitour's capital, to other managers who hold important operating positions.

The purchase options may be exercised, at one or more times, during the period between the dates of the approval of the 2006/2007 and 2008/2009 Alpitour financial statements at the price of € 2.24 per share, corresponding to the valuation of the Alpitour Group, equal to € 79.4 million, performed in December 2005 by a specially appointed expert.
IFIL S.p.A. and the managers of Alpitour S.p.A., finally, exchanged reciprocal purchase and sale options, exercisable during the same above period, on Alpitour S.p.A. shares that will have been purchased by the same managers; the exercise price will be established on the basis of the appraisal which will be performed using the same valuation principles applied in December 2005 valuation.

From an accounting standpoint, the plan is a "cash-settled stock-based payment transaction" subject to paragraph 30 and subsequent paragraphs of IFRS 2, which requires the liability of the plan to be measured at fair value and, therefore, the options of the plan, at every closing date up to its expiration.

At December 31, 2006, the fair value of each option right of the plan was estimated at € 1.6 for a total of € 6,239,200, of which € 3,119,600 was recognized in 2006 in the income statement in "Other nonrecurring income (expenses)". The liability was recorded in "Other non-current liabilities".

The estimate was performed by an independent expert who applied a binomial model of valuation to the options based on the following parameters:

1. The exercise price of the options was assumed as the par value of one Alpitour S.p.A. ordinary share at the grant date, quantified on the basis of an estimate performed by an independent expert and equal to € 2.24, rounded off.
2. The fair value of the underlying share (Alpitour S.p.A. ordinary share) at the date of reference of December 31, 2006, was quantified on the basis of an estimate by an independent expert and equal to € 3.38, rounded off, for each ordinary share.
3. The expiration date of the option was established as the date of the approval of the Alpitour S.p.A. financial statements for the year 2008/2009, fixed, conventionally, as January 31, 2010. At the date of reference of December 31, 2006, the option thus has a remaining life of 37 months (3 years and 1 month). The options will vest at the end of the vesting period (January 31, 2008) and can be exercised from that date until the expiration date (January 31, 2010).
4. The expected volatility has also been determined by referring to the historical volatility, measured over a period consistent with the remaining life of the shares in the plan, of a sample of listed companies operating in the same sector as Alpitour S.p.A..
5. The absence of the payment of dividends is assumed for the application of the valuation model.

6. The risk-free interest rate is assumed to be equal to the return on government securities having a residual life consistent with the expiration of the options in the plan.
7. An assumption was also included in the "binomial" model for the early exercise of the option rights during the period between the end of the vesting period and contractual expiration date of the options.

Sequana Capital S.A. stock option plans

Sequana Capital granted options to subscribe to the stock of the company to some employees and directors of the company. The plans were approved by the stockholders' meetings held on May 19, 1998, May 21, 2003 and May 3, 2005. The exercise price of these options is fixed, without reductions, on the basis of period market prices. According to the plans in force, the stock may not be subscribed or sold prior to the end of the four-year fiscal unavailability period and the options may not be exercised after eight years from the date they were granted.

The stock option plans in effect are the following:

		Plan 1	Plan 2	Plan 3	Plan 4	Plan 5	Plan 6	Plan 7	Plan 8	Plan 9	**Total**
Date of the directoire or board of directors' meeting		**5/4/00**	**4/5/01**	**4/6/01**	**4/11/02**	**10/31/02**	**5/15/03**	**6/18/04**	**5/3/06**	**5/10/06**

Options exercised		(17,642)			(507,924)	(282,129)	(12,928)				(820,623)
Options expired					(11,787)						(11,787)
Total number of shares at December 31, 2006		**7,311**	**0**	**4,081**	**137,648**	**0**	**488,022**	**68,028**	**626,556** (b)	**109,476**	**1,441,122**

(a) For the plans issued on May 3, 2005 and May 10, 2006, the rights to the options are gradually acquired by the grantees in successive tranches over three years, one-third of the options granted per year of presence

(b) Including 304,153 options granted to Tiberto Brandolini D'Adda who is also a director of IFI S.p.A..

In accordance with IFRS, plans introduced after November 7, 2002 are measured in the financial statements of the Sequana Capital Group starting from January 1, 2005 according to the binomial model using the following assumptions: volatility: 30%; expected dividend yield rate: 3%; risk-free interest rate: between 3.25% and 4.25%, depending on the plans.

Accordingly, personnel costs were recorded for € 1 million in 2006 (€ 1.1 million in 2005).

Options outstanding and options exercisable at the end of the years 2006 and 2005 are as follows, together with an indication of the relative weighted average prices for the year.

	December 31, 2006		December 31, 2005	
	Number of shares	**Weighted average exercise price (€)**	Number of shares	Weighted average exercise price (€)
Options outstanding at the beginning of the year	**1,840,739**	**19.40**	1,680,100	18.11
Options outstanding at the end of the year (a)	**1,441,122**	**18.03**	1,840,739	19.40
Options exercisable at the end of the year	**705,090**	**15.23**	1,269,809	17.71

(a) Taking into account the options granted, lapsed or exercised during the year and, with regard to the years 2005 and 2006, the adjustments which followed as a result of the dividends drawn from reserves and, for the year 2006, the adjustments made following the buyback or the possibility of all the stockholders buying back the Sequana Capital shares at a lower price than the stock market price (November 2006 Purchase and Exchange Offering).

Stock bonus plans

In 2006, Sequana Capital, Arjowiggins and Antalis granted options for the subscription of shares at no charge.

Sequana Capital

The board of directors' meeting held on March 28, 2006 decided to grant stock of the company at no charge to three directors of the company at the following terms:

	Shares assigned								
Grant date	Number of grantees	Number of shares	Adjusted number of shares (a)	Definitive vesting starting from	Possible sale starting from	Shares acquired in 2006	Shares lapsed	**Balance of shares at 12/31/2006**	Per share measurement IFRS 2 (€)
3/28/2006	3	28,100	29,765 (b)	3/29/2008	3/30/2010	0	0	**29,765**	22.87

(a) Adjustment, envisaged by law and by the plan, carried out in December 2006 following the buyback of treasury stock by Sequana Capital.

(b) Including 12,340 options granted to Tiberto Brandolini D'Adda who is also director of IFI S.p.A..

Arjowiggins and Antalis

In order to promote the loyalty of the key managers of the two subsidiaries which constitute the main business sectors of the Group and to directly involve them in the management and in the results of their companies, a decision was taken to introduce a stock bonus plan linked to an initial investment by the interested parties in their companies.

The number of shares granted to each grantee is not fixed at the start but depends on the performance of their companies (the growth in value within the Sequana Capital Group between December 31, 2005 and December 31, 2008) and the number of shares of the company which the manager will have purchased in advance from Sequana Capital.

A summary of the plans follows:

	Shares assigned								
Grant date	Number of grantees	Number of shares (a)	Adjusted number of shares	Definitive vesting starting from	Possible sale starting from	Shares acquired in 2006	Shares lapsed	**Balance of shares at 12/31/2006**	Per share measurement IFRS 2 (€)
Arjowiggins									
12/1/06	13	36,754	-	5/1/2009	5/2/2011	0	0	**36,754**	70.15
Antalis									
12/8/06	8	135,254	-	5/1/2009	5/2/2011	0	0	**135,254**	25.26

(a) On the basis of the number of shares previously purchased from the grantees and assuming a rate of growth in value of 5%.

Put and call options were exchanged between Sequana Capital and the grantees of the stock plans which guarantee that Sequana Capital will repurchase the shares purchased at the start and the stock granted at no charge at a price which corresponds to the value attributed to the interested company within the Sequana Capital Group in the year prior to the one in which the options can be exercised.

Alpitour S.p.A. stock option plan

The stock option plan approved on December 15, 2000 on behalf of the directors, managers and middle management of Alpitour expired on August 31, 2006 and there were no requests to exercise the options received from the grantees of the plan.

22. Earnings per share

		Year 2006	Year 2005
Average number of ordinary shares issued (a)	number	**86,450,000**	86,450,000

An analysis of employee benefits by Group is as follows:

IFI, IFIL "Holdings System", Alpitour Group and Juventus Football Club S.p.A.

Employee severance indemnities

Employee severance indemnities reflect the indemnity payable to employees which accrues over the service life and which is paid upon termination of employment. The indemnity may be paid in advance during the employee's service life if certain conditions are met.

In accordance with IAS 19 – Employee Benefits, the Italian companies of the Group have included employee severance indemnities under defined benefit plans and measures them with actuarial techniques using the Project Unit Credit Method.

Besides employee severance indemnities, established by art. 2120 of the Italian Civil Code, IFI S.p.A. and IFIL S.p.A. guarantee other forms of benefits (termination benefits, loyalty bonuses, health care plans, defined benefit and defined contribution pension plans) under company or individual supplementary agreements. These are described in Note 19 of the separate financial statements.

Other information

The actuarial calculations required to determine the liability of defined benefit plans are performed by an independent actuary at the end of each year. At December 31, 2006, the liability has been calculated on the basis of the following actuarial assumptions:

	12/31/2006	12/31/2005
Discount rate	**4.25%**	4.00%
Expected remuneration increase	**2-3.50%**	2-3.50%
Cost-of-living increase	**2.00%**	2.00%

In addition to the above financial indexes, all the demographic assumptions have also been taken into account relating to the probability of events such as death, disability, dismissal and retirement of the employees.

Defined benefit plans may be unfunded or they may be wholly or partly funded by contributions paid by the employer and the employee plan participants to an entity, or fund, that is legally separate from the employer and from which the employee benefits are paid.

The plan assets do not include IFI S.p.A. treasury stock.

The plan assets consist of debt instruments issued by third parties and other investments.

The amount to be paid for 2007 by the Sequana Capital Group for pension obligations is estimated in € 30 million.

Description of obligations under defined benefit plans
Under these pension plans, contributions are made for pensions, pension supplements and indemnities.
The principal pension plan obligations are in the United Kingdom, in the United States, in France and in Switzerland and represent 92% of the total obligations of the Sequana Capital Group.

In the United Kingdom, the main obligations regard two pension plans as follows:

- the WTPS defined benefit plan for employees of ArjoWiggins and some of the employees of Antalis;
- the ArjoWiggins plan for certain employees of Antalis UK (based on their location). This plan was closed to employees in 2005 and was replaced by a defined benefit plan.

The mortality table was updated for the WTPS plan in 2006 and generated an increase in the pension obligations of approximately GBP 25 million, recognized in equity.
In the United States, the two main pension obligations of the subsidiary Appleton Coated LLC refer to the following:

- the defined benefit pension plan;
- the health care for retired employees.

In France, the two main defined benefit plans are:

- the RCR plan, for certain categories of management employees of Arjowiggins. This plan was closed to new employees, starting from 1981;
- the severance indemnity plan of Arjowiggins.

In Switzerland, a defined benefit plan is in place for employees of Antalis.

Return on plan assets
The return on plan assets is determined on the basis of the allocation of the assets, projections of the expected return and historical experience.

UK pension funds
The British subsidiaries of the Sequana Capital Group use defined benefit pension plans.
In 2004, the trustee administrator of the pensions funds, on the basis of the actuarial calculation performed by its actuary, unilaterally decided to ask Sequana Capital Group for an additional contribution of GBP 49.5 million to be paid on a straight-line basis from 2004 to 2008 to fund the plans which it manages.
At December 31, 2006, the remaining balance of this additional contribution amounts to British pounds 19.8 million. The obligation was accrued in accordance with IFRS on the basis of the above actuarial assumptions. The payments made to pay off the balance of this additional contribution are reflected, when paid, in the calculations of the liability performed each year.
In 2006, the Trustee, on the basis of the actuarial calculation performed by its actuary at December 31, 2005, again decided, unilaterally, that the funding requirements for the pension fund for the next five years will be GBP 105 million. The Sequana Capital Group disputed this amount, which it believes to be completely unfounded legally, and brought the dispute before the pension regulator (the British administrative regulatory authority for pension funds) in September 2006. Despite this, the Trustee sent a request for deficiency contributions on December 19, 2006, asking the Group to pay GBP 1.75 million a month for five years starting from January 19, 2007. The Sequana Capital Group has refused to

pay this new additional contribution while awaiting the outcome of the mediation in progress with the pension regulator.

25. Provisions for other liabilities and charges

The composition of the provisions is as follows:

	Current portion		Non-current portion	
€ in millions	**12/31/2006**	12/31/2005	**12/31/2006**	12/31/2005

Operating profit (loss) from current operations		14	(22)			
Other nonrecurring income (expenses)		95	(15)	(9)		
Other financial income (expenses)		6		(6)		

The restructuring provisions relate to the corporate restructuring programs of the Sequana Capital Group.

The Fox River and DG IV disputes provisions refer to accruals made by the Sequana Capital Group for the Fox River environmental risks and the fine levied by the European Commission for the alleged violation of fair trade practices. Additional information is provided in Note 26 “Pending litigation”.

The other risks provisions include accruals set aside by the individual companies mainly in respect of contractual, commercial and litigation risks.

26. Pending litigation

IFIL S.p.A. and subsidiaries in the “Holdings System”

On February 13, 2007, the measure was notified by Consob with regard to the content of the press release dated August 24, 2005. The measure provides, among other things, for pecuniary and additional administrative sanctions to be borne by the directors of IFIL S.p.A. and the company itself.
The pecuniary administrative sanction levied on IFIL S.p.A., equal to € 4.5 million, was recorded in the financial statements for the year ended December 31, 2006.
Additional information is provided in the Directors' Report on Operations.

On May 9, 2006, The Turin Court rejected the request to cancel the resolution to increase IFIL capital stock reserved for IFI S.p.A. passed by the special stockholders' meeting of IFIL S.p.A. held on June 23, 2003, as well as the request for compensation of damages filed by K Capital.

On February 14, 2006, the buyer of the investment in La Rinascente filed for arbitration against Ifil Investissements S.A. seeking compensation for an amount of approximately € 37.6 million (in addition to interest, monetary revaluation, court expenses and legal fees) for extraordinary expenses relating to certain points of sale.
Ifil Investissements submitted to the arbitration proceedings and is taking exception to the claims which it believes are invalid and unacceptable and, in any case, completely unfounded. Moreover, the question that is raised regards aspects that have either been excluded or are not covered by the guarantees in the contract.
Furthermore, on September 5, 2006, the buyer filed another arbitration claim against Ifil Investissements seeking a total of approximately € 14.8 million in compensation principally in connection with the accounting treatments used in the financial statements at December 31, 2004.
In the opinion of Ifil Investissements, such claims are invalid and/or groundless. In any case, according to Ifil Investissements, such requests remain covered by exclusions or limitations regarding the obligations for compensation as stated in the contract.

Sequana Capital – Fox River and European Commission (DG IV) disputes

Fox River

In 1998, the American authorities, the Environmental Protection Agency (EPA), brought suit against Appleton Papers Inc. (API was then a subsidiary of Arjo Wiggins Appleton), NCR Corporation and five other American paper manufacturers for the alleged contamination of the Fox River in the State of Wisconsin.
This event took place at the beginning of the 1950s when NCR Corporation had perfected a process for the manufacture of carbonless paper using polychlorinated biphenyl emulsions which, at that time, it had licensed until 1971, to a certain number of paper manufacturers, the most important of which was API, a division of NCR.
This process had already been abandoned three years before the use of polychlorinated biphenyl had been banned in the United States, beginning from 1974.

Appleton Papers Inc. was later purchased by British American Tobacco (BATUS) in 1978 and then by Arjo Wiggins Appleton (AWA) in 1990. On this occasion, AWA continued to benefit from the guarantees over liabilities agreed by British Tobacco which allowed them to share certain costs with NCR borne by Appleton Papers Inc.
The Fox River event in 1997 naturally came under this category.

In 2001, Appleton Papers Inc. was sold by AWA and a guarantee was given to the buyers regarding all the liabilities resulting from the Fox River dispute. This guarantee consisted of a deposit made with the insurance company AIG, equal to $ 163 million, deducted from the price received at the time of the sale. The deposit partially earns interest at 2.02%.
At December 31, 2006, the deposit amounts to € 85 million (see Note 15), equal to $ 112 million, including capitalized interest less research and defense costs.

In 2001, the Group had also accrued an amount of $ 125 million, which corresponded to the best estimate at that time, of its share of the expenses discounted to present value to reclaim the Fox River.

In 2003, the “Department of Natural Resources” of Wisconsin, and the federal government published a first long-term action plan for the work to be carried out by 2045. This was based on surveys of the river bed and different technical solutions that could be adopted to decontaminate the Fox River, at an estimated total cost of $ 400 million, to be borne by the industries involved.
This first official estimate had no effect on the accrual already booked by the Sequana Capital Group since it confirmed the estimate which had already led to the quantification of the accrual in 2001.

In 2005, events arose which led to a significant increase in the estimate of the reclamation costs:

- identification of new polluted areas;
- adoption of new technical solutions for decontamination;
- probable increase in the volumes of the sediments to be decontaminated.

Moreover, since the 2001 agreements for the sharing of the costs between Appleton Papers Inc and NCR expired, the two companies had agreed to a new sharing plan by virtue of an arbitration ruling decided in November 2005. This arbitration ruling, without any possibility of appeal, has established a 10% increase in the portion of the costs to be paid by API.
This led the Sequana Capital Group to revise its 2001 estimates and set aside a further amount of $ 87.7 million (€ 70 million) which has been determined on the basis of the new estimated reclamation costs to be completed by 2045 and the new portion of the expenses to be borne by Appleton Papers Inc. discounted to present value at 4.95%, which corresponds to the rate on 30-year bonds issued by the American government.
After charging the research and defense costs already incurred by Appleton Papers Inc. since 2001 (approximately $ 57 million at December 31, 2006), the Fox River provision amounts to $ 160 million (€ 121 million at December 31, 2006, see Note 25), compared to $ 165 million (€ 140 million) December 31, 2005.

However, in July 2003, a ruling by the Supreme Court of Justice of the State of Wisconsin gave the industries which had signed insurance contracts covering environmental risks the possibility of claiming the guarantees provided in those same contracts. AWA Ltd retained the benefit of these insurance contracts, even after the sale of Appleton Papers Inc. in 2001.
Negotiations are currently underway with the insurance companies to obtain, on one hand, the reimbursement of the research and defense costs already incurred and, on the other, for them to take up the decontamination costs to be sustained in the future.
Negotiations with the insurance companies continue; considering their uncertain nature, no accruals have been made concerning the compensation to be received, albeit AWA in

2005 and 2006 has already received compensation from the insurance companies totaling $ 45 million for the reimbursement of defense costs.

European Commission (DG IV)

The inquiry by the Commission for the alleged violation of fair trade practices had ended in July 2000 with notification of a fine, against which Arjo Wiggins Appleton had submitted its comments on the subject. On December 20, 2001, the Commission levied a fine of € 184 million on Arjo Wiggins Appleton which the company had accrued in full in the 2001 financial statements.

During the first half of 2002, the company filed an appeal to revoke the sentence, which it maintains is out of proportion to the facts of the case. Since the appeal does not suspend the obligation to pay the fine, the company, in compliance with existing regulations, had decided to fulfill this obligation partly through a deposit of € 92 million and partly by providing a bank guarantee of the same amount.

The proceedings before the Court of the European Community in the first instance are still pending. After a first hearing held on June 16, 2005, a sentence was handed down during the first half of 2006 which will be communicated to the company by the end of April 2007. At December 31, 2006, the accrual has been calculated on the basis of the maximum potential risk.

Alpitour Group – Bravo Club Zanzibar

In reference to the damages to the "Bravo Club" resort in Zanzibar caused by the fire in January 2001, a case is pending before the competent authorities in Tanzania to establish the compensation for damages due from Royal Insurance. During 2005, Royal Insurance was sentenced, in the judgment of first instance, to pay the damages requested in addition to interest and legal fees. The insurance company appealed this decision and the case is now being judged in the second instance. Based on available information, it is believed that there is reasonable certainty that the judgment of the first instance will be upheld. Therefore, a receivable of € 1.5 million due from Royal Insurance has been kept in the financial statements and is recorded in "Other receivables".

Juventus Football Club

Sports proceedings against the company

On July 14, 2006, the Federal Appeals Commission (CAF) issued its ruling in the sports proceedings against the company, begun with the disciplinary referral of June 22, 2006, specifying the penalties for Juventus Football Club as follows: "relegation of the team to last place in the 2005/2006 championship, a 30-point penalty in the 2006/2007 season's rankings, revocation of the title of champion of Italy 2004/2005, non-recognition of the title of champion of Italy 2005/2006 and a fine of € 80,000".

The company filed an appeal with the Federal Court.

On October 27, 2006, the sports proceedings were concluded and the CONI Sports Conciliation and Arbitration Board confirmed the team's relegation to Serie B, the fine of € 120,000 and reduced the point-penalty deduction for the team in the current Serie B Championship from -17 to -9 points. The same Arbitration Board levied another fine, in lieu of disqualifying the home playing field (a sanction suspended by a precautionary measure on September 6, 2006), for an amount equal to the receipts of the first three home games, a total of € 194,450.

Other investigations and proceedings pending against the former directors of Juventus Football Club

The penal proceedings regarding Antonio Giraudo and Luciano Moggi assigned to the Assistant District Attorney Bruno Tinti, is pending before the Turin District Attorney's Office for the following offenses: 2621-2622, paragraph 3 of the Italian Civil Code (accounting fraud) and articles 2 and 8 Law 74/2000 (issue of invoices or other documents for non-existent transactions and fraudulent declarations based on the use of these documents). The proceedings are still currently in the preliminary investigation stage.

As regards the position concerning only the former CEO Antonio Giraudo, the appeal is pending in the Supreme Court of Cassation by the District Attorney General against the acquittal ruled by the Turin Court of Appeals regarding the above defendant charged with the offense of sports fraud in the case known as the "doping trial".

Pending before the Rome District Attorney's Office is the criminal proceeding for the offense of conspiracy to engage in unlawful competition (art. 513 bis of the Italian Penal Code) in reference to the management of players through the company GEA World in which the defendants include, among others, the former director and general manager Luciano Moggi. In February, the Public Prosecutor asked that he be committed to trial.

Investigations currently underway following the tragedy at the Vinovo Training Center

Following the accident that occurred on December 15, 2006 at the Vinovo Training Center, the Turin District Attorney's office opened an inquiry to ascertain the state of the places, the facts surrounding the accident, the characteristics and observance of regulations, also in relation to the use of the sports facilities. Those under investigation are Maurizio Schincaglia and Lorenzo Frison, respectively the trainer and goalkeeper coach, and Renato Opezzi CEO of the company Semana S.r.l. and Jean Claude Blanc and Alessandro Sorbone, respectively the CEO and employee manager of Juventus Football Club S.p.A.. The proceedings are currently in the inquiry stage while awaiting the technical opinions requested by the Public Prosecutors heading the inquiry.

Como Calcio bankruptcy

The bankruptcy of Como Calcio, in June 2006, led to a suit being brought against Juventus for the payment of the sum of € 1,580,000 allegedly still due to Como Calcio for the definitive sale of the registration rights of the players Piccolo and Pederzoli.

Juventus Football Club appeared before the courts and asked for the rejection of the bankruptcy filing since the sum had already been paid and also for Mr. Preziosi to appear in court so that Juventus would be relieved of responsibility and not be held accountable for damage compensation in the event of a judgment against Juventus. The case was adjourned to the first hearing set for May 30, 2007 in order to allow for the appearance of Mr. Preziosi.

Claim for damages by Brescia Calcio S.p.A.

Under the appeal received by the company on November 27, 2006, Brescia Calcio S.p.A. asked the CONI Sports Conciliation and Arbitration Board to order Juventus Football Club and F.I.G.C to pay damages of € 30 million on the grounds that "Brescia did not play in Serie A" in the 2005/2006 soccer season owing to sports offenses committed by the managers of Juventus Football Club as confirmed by the sports proceedings of the summer.

In a brief filed on December 7, 2006, the company appeared before the Board and pleaded for the rejection of the claims made by Brescia Calcio on the grounds that they are completely unfounded in fact and law and pleaded, on a preliminary basis, that the CONI Sports Conciliation and Arbitration Board has no jurisdiction to hear the proceeding.

On December 12, 2006, F.I.G.C. appeared before the Board and also pleaded for the rejection of the claims made by Brescia Calcio on the grounds that they are completely unfounded in fact and law and pleaded, on a preliminary basis, that the CONI Sports Conciliation and Arbitration Board has no jurisdiction to hear the proceeding.
At the March 13, 2007 hearings, the Arbitration Board fixed a discussion hearing for April 17, 2007, giving the parties time to file their defenses and briefs.

27. Consolidated net financial position

The composition of the gross and net financial position of the consolidated companies is as follows:

€ in millions	Gross financial position (borrowings)/ cash	Financial assets	Net financial position (borrowings)/cash
IFI S.p.A.	(161)	63	(98)
IFIL S.p.A. and the "Holdings System"	(477)	863	386
Sequana Capital Group	(686)	306	(380)
Alpitour Group	(123)	94	(29)
Juventus Football Club S.p.A.	(77)	2	(75)
Total	**(1,524)**	**1,328**	**(196)**

In accordance with the provisions of Consob Communication 6064293 dated July 28, 2006, the composition of the net financial position of the IFI Group is provided below:

€ in millions	**12/31/2006**	12/31/2005	Change
Non-current financial liabilities			
IFIL 2006/2011 bonds	**(199)**	0	(199)
Debt	**(578)**	(909)	331
Other financial liabilities	**0**	(11)	11
Total non-current financial liabilities	**(777)**	(920)	143
Non-current financial assets – Financial receivables	**4**	5	(1)
Non-current net financial position (A)	**(773)**	(915)	142
Current financial liabilities			
IFIL 2003/2006 bonds	**0**	(100)	100
Current portion of medium/long-term debt	**(24)**	(40)	16
Debt	**(723)**	(1,000)	277
Debt with Giovanni Agnelli e C. S.a.p.az.	**0**	(14)	14
Other loans and debt	**0**	(1)	1
Total current financial liabilities	**(747)**	(1,155)	408
Current financial assets			
Financial receivables	**2**	4	(2)
Credit instruments	**954**	978	(24)
Other financial assets	**6**	6	0
Total current financial assets	**962**	988	(26)
Cash and cash equivalents	**362**	595	(233)
Current net financial position (B)	**577**	428	149
Consolidated net financial position (A+B)	**(196)**	(487)	291

There are no financial receivables or payables balances with related parties.

28. Bonds and other debt

The composition is as follows:

	Non-current portion		Current portion	
€ in millions	**12/31/2006**	12/31/2005	**12/31/2006**	12/31/2005
IFIL 2006/2011 bonds	**(199)**	0		
IFIL 2003/2006 bonds				(100)
Debt	**(578)**	(909)	**(723)**	(1,000)
Debt with Giovanni Agnelli e C. S.a.p.az.			**0**	(14)
Current portion of medium/long-term debt			**(24)**	(40)
Other financial liabilities	**0**	(11)		(1)
Total bonds and other debt	**(777)**	(920)	**(747)**	(1,155)

The IFIL 2006/2011 bonds issued on June 9, 2006 for a face value of € 200 million, maturing June 9, 2001, pay interest at the 3-month Euribor plus a spread of 68 basis points.
Standard & Poor's rated the bonds BBB+, which is the also the current rating of IFIL S.p.A.'s long-term debt. In order to guarantee a fixed rate for the entire period of the bonds, interest rate swap contracts were put into place on the full amount. At December 31, 2006, the fair value is a positive € 1,864 thousand.

The IFIL 2006/2011 bonds contain covenants that are common in international practice for bond issues of this type, such as, in particular, negative pledge clauses (the obligation to extend any real present or future guarantees given as collateral on the assets of the issuer on other bonds and other credit instruments to these bonds to the same degree), respecting a maximum limit of indebtedness in relation to the amount of the portfolio, disallowing a change of control, the maintaining of a rating by one of the major rating agencies and the obligation of providing periodic disclosure. Non-compliance with the covenants involves the immediate redemption of the bonds by the bondholders. Finally, standard events of default are envisaged in the case of serious non-fulfillment such as, for example, failure to pay interest.

The 2003/2006 bonds of face value € 100 million were repaid on December 19, 2006.

As for IFI S.p.A., the loan contracts relating to irrevocable lines of credit provide for commitments which are common practice in the sector for this type of debt. In particular, some of the main commitments included in certain contracts refer to the obligation of periodic disclosure, not setting up new real guarantees on the goods of the company without the prior consent of the creditors, the non-subordination of the loan, as well as, in some cases, conformity with financial ratios. Finally, there are clauses that could change the duration in the case of serious non-fulfillment such as, for example, failure to pay interest or when extremely serious events arise such as a request to place the company under administration.

The analysis of debt by maturity is as follows:

€ in millions	Within 1 year	Between 2 and 5 years	Beyond 5 years	**Total**
At December 31, 2006				
IFIL 2006/2011 bonds		(199)		**(199)**

At December 31, 2006, the IFI Group has unused credit lines for € 3,188 million (€ 2,795 million at December 31, 2005).

The Sequana Capital Group loan is secured in part by credit lines with maturities of less than one year. The refinancing agreements allow this loan to be classified as medium-term (€ 380 million in 2006).

The Alpitour Group's credit lines total € 336 million, of which € 97 million is used for short-term loans and € 25 million for medium-term loans.
The medium and long-term loan contracts signed by the Alpitour Group (equal to € 43.7 million) state that the Group must abide by the covenants calculated on consolidated equity, economic and financial data (mainly net debt/equity and Ebitda/net

debt). In view of the seasonal nature of the business, these ratios, as established by the relevant contracts, are calculated on an annual basis at the year-end closing date.
At October 31, 2006, these ratios are fully within the limits established by the covenants.
Furthermore, the EIB loan of € 20 million disbursed by Sanpaolo IMI and Banca Intesa to the Alpitour Group for the purpose of building a hotel resort is collateralized by the shares (€ 38 million) of the subsidiary Blumarin Hotels Sicilia S.p.A., the company which owns that property.

29. Derivative financial instruments

Interest rate risk

The fair value effect of the transactions to hedge the exposure of interest rate risk put into place by the consolidated companies is as follows:

€ in thousands	**12/31/2006**	12/31/2005	Change
Sequana Capital Group	**3,824**	1,329	2,495
Alpitour Group	**(341)**	(1,229)	888
IFIL S.p.A. and the “Holdings System”	**1,864**	241	1,623
IFI S.p.A.	**3,091**	1,531	1,560
Total	**8,438**	1,872	6,566

The summary of transactions to hedge interest rates put into place by the Sequana Capital Group at December 31, 2006 and the relative fair value effect are as follows:

					Effect of fair value		
	Notional (€ ml)	Fixed rate (received)	Floating rate (paid)	Maturity	Income statement (€ in thds)	Balance sheet (€ in thds)	**Total (€ in thds)**
SWAPS	150	3.1305%	1-month Euribor	2/22/2009	1,538	1,065	2,603
	75	3.6140%	1-month Euribor	9/27/2008		472	472
	100	2.3600%	3-month Euribor	5/31/2007	691		691
					2,229	**1,537**	**3,766**
	Notional (€ ml)	Cap	Floor	Maturity			
COLLARS	50	4.53%	3.00%	5/31/2009	16		16
	20	4.49%	3.00%	5/31/2009	42		42
					58	**0**	**58**

Alpitour S.p.A. has interest rate swap contracts for a notional amount of a total of € 22.5 million put into place to hedge fluctuations in interest rates on bank loans. The fair value of the IRSs at October 31, 2006 is estimated at a negative amount of € 341 thousand (a negative amount of € 1,229 thousand at October 31, 2005). These transactions qualify for hedge accounting and the fair value adjustments, equal to a positive € 888 thousand, are recognized in a reserve in equity.

At December 31, 2006, IFI S.p.A. has interest rate swap contracts in place for a notional amount of a total of € 160 million (of which € 125 million is on non-current bank debt) to hedge fluctuations in interest rates on bank loans with a positive fair value of € 3,091 thousand.

At December 31, 2005, the outstanding interest rate swap contracts had a notional amount of € 170 million and a positive fair value of € 1,531 thousand.
At December 31, 2006, IFIL Investments S.p.A. has an interest rate swap contract in place for a notional amount of a total of € 200 million to hedge fluctuations in interest rates on the IFIL 2006-2011 bonds with a positive fair value equal to € 1,864 thousand.

Exchange rate risk
The summary of the principal contracts to hedge exchange rates put into place by the Sequana Capital Group at December 31, 2006 and the relative fair value effect are as follows:

Company	Exchange rates	Notional	
Sequana Capital	EUR/GBP	385.8	€ ml
Arjowiggins	EUR/GBP	53	£ ml
Antalis	EUR/PLN	4	€ ml
Antalis	EUR/ZAR	3.3	€ ml
Antalis	EUR/ZAR	0.7	Zar ml
Antalis	USD/ZAR	7.5	$ ml
Antalis	JPY/ZAR	12.6	JPY ml
Antalis	EUR/CZK	0.6	€ ml
Antalis	EUR/USD	7	$ ml
Antalis	EUR/CHF	0.5	CHF ml
Antalis	USD/THB	0.5	$ ml
Antalis	USD/MYR	1.7	$ ml
Antalis	USD/SGD	0.5	$ ml
Antalis	EUR/GBP	0.6	£ ml
Fair value effect recognized in the income statement	2005	**2006**	
	(2,705)	**(33)**	€/000

Other risks
At October 31, 2006, the Alpitour Group has contracts in place for the forward purchase of 36,000 tons of fuel for a notional amount of € 15,461 thousand to hedge the risk of fluctuations in the price of fuel.
At October 31, 2006, the fair value of these contracts, which qualify for hedge accounting, equal to a negative amount of € 631 thousand, were recognized in a reserve in equity.

At December 31, 2006, Arjowiggins has contracts in place to hedge gas purchases which are recognized at fair value through the income statement.

30. Deferred income taxes

The change in deferred tax assets is as follows:

€ in millions	Employee benefits	Tax losses	Other	**Total**
Balance at December 31, 2005	39	57	(28)	**68**
Income taxes accrued (reversed) to the income statement	(9)	(3)	(26)	**(38)**
Income taxes relating to items directly credited to equity	(2)	3	3	**4**
Exchange differences	(1)	(4)	4	**(1)**
Net other movements	1	(2)	17	**16**
Balance at December 31, 2006	**28**	**51**	**(30)**	49

The change in deferred tax liabilities is as follows:

€ in millions	Property, plant and equipment	Depreciation and tax accruals	Other	**Total**
Balance at December 31, 2005	(92)	(35)	32	**(95)**
Income taxes accrued (reversed) to the income statement	7	3	39	**49**
Income taxes relating to items directly debited to equity			(55) (a)	**(55)**
Exchange differences	4		(4)	**0**
Net other movements		2	(3)	**(1)**
Balance at December 31, 2006	**(81)**	**(30)**	**9**	**(102)**

(a) Including € 48 million relating to the Sanpaolo IMI S.p.A. investment.

The analysis of unused tax loss carryforwards and unused tax credits on which deferred tax assets have not been calculated is as follows:

	Taxable base				
€ in millions	Within 1 year	Between 2 and 4 years	Beyond 4 years	Total	Estimated tax benefit
At December 31, 2006					
Current tax losses	114	579	773	1,466	470
Other tax credits					NONE
Total at December 31, 2006	**114**	**579**	**773**	**1,466**	**470**
At December 31, 2005					
Current tax losses	98	524	756	1,378	452
Other tax credits					NONE
Total at December 31, 2005	**98**	**524**	**756**	**1,378**	**452**

The recognition of deferred tax assets on tax losses is limited to those whose recoverability is highly probable during the following year or in the medium term, taking into account the estimated taxable income established by medium-term operating plans.

31. Other liabilities

Details of other liabilities are as follows:

€ in millions	**12/31/2006**	12/31/2005	Change

Other employee costs	**(38)**	(27)	(11)
Total personnel costs	**(925)**	(927)	2

34. Other nonrecurring income (expenses)

Details are as follows:

€ in millions	**2006**	2005	Change
Gains (losses) on disposals of property, plant and equipment and intangible assets	**29**	16	13
Impairment (losses) reversals on property, plant and equipment and intangible assets	**(66)**	(144)	78
Restructuring expenses	**(82)**	(31)	(51)
(Accruals) release of environmental disputes provisions	**8**	(80)	88
(Accruals) release of provisions for other disputes	**21**	(3)	24
Insurance compensation received for Fox River dispute	**24**	11	13
Net other income (expenses)	**4**	29	(25)
Total other nonrecurring income (expenses)	**(62)**	(202)	140

Gains (losses) on disposals of property, plant and equipment include € 32 million realized by the Sequana Capital Group on the sale of land and buildings.

Restructuring expenses include € 48 million relating to Arjowiggins, € 15 million for the reorganization of the "Envelopes" sector by Antalis and and € 19 million for the reorganization of the logistics and sales activities of Antalis (France, Great Britain, Italy and South Africa).

In 2005, the accruals for environmental disputes included the additional accrual for € 70 million ($ 87.7 million) regarding the Fox River dispute.

In 2006, net other income (expenses) include the accrual for the administrative sanction of € 4.5 million levied on the company by Consob in reference to the content of the press release dated August 24, 2005, the excess, equal to € 5 million, of the increment in IFI's share of the consolidated equity of the IFIL Group compared to the cost of the IFIL shares purchased during the year, the cost for the year of € 3.1 million relating to the stock option plan approved for the management of the subsidiary Alpitour, as well as the release of the provision set aside in prior years for the Alpitour stock option plan 2000 which was not exercised by the expiration date of August 31, 2006 (+€ 7.8 million) and other sundry expenses of € 1 million.

In 2005, net other income (expenses) included:

- the excess, equal to € 55 million, of the increments in IFIL's share of the consolidated equity of the Fiat Group subscribed to by minority stockholders (+€ 606 million) and the increase in the percentage of consolidation, equal to 0.54% (+€ 29 million), compared to the cost incurred for the purchase of 87,750,000 Fiat shares (-€ 580 million);
- the excess, equal to € 1 million, of the increment in IFI's share of the consolidated equity of the IFIL Group compared to the cost of the IFIL shares purchased during the year;
- other minor net negative items amounting to € 8 million;
- extraordinary compensation approved for the chairman (€ 15 million) and for the former CEO (€ 4 million) of IFIL S.p.A..

35. Financial income (expenses)

Details of the composition of net financial income (expenses) are as follows:

€ in millions	**2006**		2005	Change
Gains (losses) on disposals of investments

Other financial income (expenses)	**72**		52	20
Net financial income (expenses)	**94**		2	92

(a) Corresponding to the sale of the investment in Exor Group (equal to 29.3% of capital stock) to the same Exor Group.
(b) Including € 53 million collected from Sanpaolo IMI S.p.A..

36. Income taxes

Details of income taxes recorded in the income statement are as follows:

€ in millions	**2006**	2005	Change
Current income taxes	**(63)**	(36)	(27)
Deferred income taxes	**11**	(10)	21
Total income taxes	**(52)**	(46)	(6)

National income taxes are calculated at 33%, in 2006 and 2005, on the estimated taxable income for the year. The income taxes for other jurisdictions are calculated at the enacted tax rates in those countries.

The reconciliation between the tax charge recorded in the consolidated financial statements and the theoretical tax charge, calculated on the basis of the theoretical tax rate in effect in Italy, is the following:

€ in millions	**2006**	2005
Operating profit (loss)	**6**	(138)
Financial income (expenses)	**94**	2
Profit (loss) before income taxes	**100**	(136)
Current tax rate in Italy	**33%**	33%
Theoretical income taxes	**(33)**	45
Effective income taxes	**(52)**	(46)
Difference	**19**	91
The difference can be analyzed as follows:		
Tax effect of difference between foreign tax rates and the theoretical Italian tax rate	**3**	(14)
Tax effect of other permanent differences	**72**	62
Deferred tax assets not recognized	**(21)**	(63)
Tax losses used	**(50)**	(52)
Use of excess tax liabilities	**(16)**	(21)
Other differences	**(7)**	(3)
Difference	**(19)**	(91)

The impairment loss on the goodwill of Antalis, which is not deductible for tax purposes, generated a permanent difference of € 10 million.

In addition to the income taxes recorded in the income statement, deferred tax charges of € 55 million (€ 7 million in 2005) and deferred tax benefits of € 4 million (€ 8 million in 2005) were recognized directly in equity.

Other differences include the Exit Tax, an extraordinary 2.5% tax introduced in France in 2004, for an amount of € 21 million. This tax is recorded in payables with a contra-entry to equity in the separate financial statements of the subsidiary Sequana Capital; on consolidation the Exit Tax is recognized in the income statement.

In 2005, deferred income taxes were not recognized on the writedown of property, plant and equipment made by Arjowiggins as there were no prospects of recoverability.

37. Share of the profit (loss) of companies accounted for by the equity method

Details are as follows:

€ in millions	2006		2005	Change
FIAT Group	**289**	(a)	379	(90)
SGS Group	**62**	(b)	58	4
Exor Group S.A.	**0**	(c)	11	(11)
Sundry Sequana Capital Group companies	**1**			1
Total	**352**		448	(96)

(a) Including consolidation adjustments of € 15 million.
(b) This is the pro rata share of the profit of the SGS Group prior to the Public Purchase and Exchange Offer launched by Sequana Capital, after which, the remaining investment in SGS was classified as available-for-sale and measured at fair value.
(c) The investment was sold on April 7, 2006.

38. Profit from discontinued operations or assets held for sale

This line included the gains on disposals and the share of the profit (loss) of discontinued operations as follows:

€ in millions	2006	2005
Gains on disposals of investments in:		
- La Rinascente S.p.A.	**0**	460
- Permal Group and Ifabanque	**0**	504
Share of profit:		
- Permal Group S.A.	**0**	43
Total	**0**	1,007

The analysis of the share of the profit from discontinued operations is as follows:

€ in millions	2006	2005
Permal Group Limited and Ifabanque		
Revenues	**0**	235
Operating expenses	**0**	(172)
Financial income (expenses)	**0**	2
Profit before taxes	**0**	65
Income taxes	**0**	(22)
Profit	**0**	43

In the statement of cash flows, the line “Change in the scope of consolidation” includes the net movement of the changes associated with the assets or groups of assets held for sale, an analysis of which is provided as follows:

€ in millions	2006	2005
Consolidated cash flows of assets held for sale		
Cash flows from operating activities:		
Permal Group	**0**	140
Cash flows used in investing activities:		
Permal Group	**0**	(27)
Cash flows used in financing activities:		
Permal Group	**0**	(121)
Total cash flows	**0**	(8)

39. Segment information

Information by business segment and by geographical area, presented as set forth in IAS 14 – Segment Reporting, is prepared according to the same accounting policies adopted in the preparation and presentation of the consolidated financial statements of the Group.

The primary reporting format consists of the business segments whereas the geographical areas make up the secondary reporting format. This distinction is based upon the nature of the risks and rewards inherent in the Group's activities and reflects the organizational structure.

The segment information presented by the IFI Group agrees with the consolidated data of every subsidiary and associate holding company of the IFI Group, each of which represents an investment in a major business segment: Sequana Capital Group, Alpitour Group, Juventus Football Club, Fiat Group and IFI/IFIL Holdings System.

The segment information relating to continuing operations is presented in the following tables; the segment information relating to discontinued operations or assets held for sale is presented in Notes 19 and 38.

The analysis of the income statement by business segment is as follows:

€ in millions	Sequana Capital	Alpitour	Juventus Football Club	Fiat	IFI and IFIL Holdings System and eliminations	Total
2006						
Revenues	4,045	1,332	156		1	**5,534**

40. Intragroup and related party transactions

The IFI Group is directly controlled by Giovanni Agnelli e C. S.a.p.az., a company registered in Italy which holds its entire ordinary capital stock.

The transactions between the company and its consolidated subsidiaries, which are related parties of the same company, are eliminated in the consolidated financial statements of IFI and are therefore not presented in this note.

Related party transactions are carried out in accordance with existing laws on the basis of reciprocal economic gain.

Receivable and payables are not guaranteed and are settled in cash. Guarantees have neither been granted nor received.

Costs have not been recognized during the year for non-existent or doubtful liabilities in relation to amounts due from related parties.

A summary of the balances in the balance sheet and in the income statement generated by the transactions carried out during 2006 with related parties, identified in accordance with IAS 24 and communicated by the companies of the Group, are summarized in the following tables. Transactions are indicated only if close to Euro one million, which is the unit of measure for the presentation of the consolidated figures of the IFI Group.

€ in millions	Trade receivables	Trade payables	Other assets	Financial assets	Other liabilities	Costs	Revenues
Directors for compensation not yet collected		(8)				(7)	
Grantees of Alpitour stock option plans 2005					(3)	(3)	
Sundry companies of Antonin Rodet				3		(3)	1
Jumboturismo S.A. Unipersonal			1				
Alpitour Group Egypt for Tourism S.A.E. (a)		(6)				(25)	
Viajes Medymar S.L.	1						
Semana S.r.l.		(1)				(5)	
Fiat Auto S.p.A.	1						2
TOTAL IFI GROUP	**2**	**(15)**	**1**	**3**	**(3)**	**(43)**	**3**

(a) The company Alpitour Group Egypt for Tourism S.A.E. is the local correspondent for incoming activities for the major destinations in Egypt.

41. Compensation to directors and statutory auditors

In 2006, the compensation to the directors and statutory auditors of IFI S.p.A., to perform their duties in IFI S.p.A. and also in other companies included in consolidation, is as follows:

€ in thousands	IFI S.p.A.	Subsidiaries (a)	Total
Directors	946	5,580	6,526
Statutory auditors	146	155	301
Total	**1,092**	**5,735**	**6,827**

(a) This does not include the compensation paid by Fiat and its subsidiaries since the Fiat Group is not included in the scope of consolidation.

In 2005, compensation amounted to € 23,195 thousand, of which € 6,185 thousand was paid by IFI and € 17,010 thousand by the subsidiaries.

The company also signed a third-party liability insurance policy for the directors with a group of insurance companies for a maximum claim per incident and per year of € 50 million for coverage in the event of requests for reparation of non-fraudulent acts.

The compensation of executive directors is not linked to either the economic results of the company or targets set by the board of directors.
A part of the compensation of the general manager, however, is tied to the economic results of the company and the reaching of specific targets.

Additional information on compensation, as requested by national law (Consob Regulation 11971 dated May 14, 1999 and later amendments and integrations), is provided in the notes to the separate financial statements of IFI S.p.A..

42. Commitments

Details are as follows:

€ in millions	**12/31/2006**		12/31/2005
Credit lines			
Credit lines used	**1,222**		1,646

Commitments for the sale of investments and financial assets	**0**		2
Forward sale of goods and raw materials (b)	**156**		190
Other commitments	**57**		61
Total commitments received	**411**		316

(a) These include the commitment for the purchase of a 67.5% stake in Cushman & Wakefield.
(b) These are basically forward purchases and sales of paper pulp.

Credit lines and commitments by due date are as follows:

€ in millions	Within 1 year	Between 2 and 5 years	Beyond 5 years	**Total**
At December 31, 2006				
Credit lines unused	2,268	870	50	**3,188**
Commitments undertaken	1,128	191	169	**1,488**
Commitments received	192	216	3	**411**
At December 31, 2005				
Credit lines unused	1,691	961	143	**2,795**
Commitments undertaken	512	191	220	**923**
Commitments received	197	112	7	**316**

The amount of future minimum lease payments relating to operating leases is as follows:

€ in millions	Within 1 year	Between 2 and 5 years	Beyond 5 years	**Total**
At December 31, 2006	**51**	**125**	**128**	**304**
At December 31, 2005	68	70	50	188

In 2006, fixed-rate lease contracts amount to € 209 million while floating-rate lease contracts total € 95 million (respectively € 134 million and € 54 million in 2005).
Lease expenses recognized in the 2006 income statement amount to € 75 million (€ 63 million in 2005). They include € 31 million for irrevocable leases (€ 20 million in 2005), € 23 million for other operating leases (€ 14 million in 2005) and € 21 million for simple lease contracts (€ 29 million in 2005).

Juventus Football Club

On March 31, 2006, Costruzioni Generali Gilardi S.p.A. acquired options to purchase, in two installments, 69.8% of the capital stock of Campi di Vinovo S.p.A. currently held by Juventus Football Club S.p.A..

The first option will allow Costruzioni Generali Gilardi S.p.A. to purchase 64.8% of the capital stock of Campi di Vinovo S.p.A.. This right must be exercised within two years of signing the option contract or, alternatively, within three months of the date of the issue of all the administrative authorizations for the “Mondo Juve – Commercial Park”.

The second option will allow Costruzioni Generali Gilardi S.p.A. to purchase the remaining 5% of capital stock of Campi di Vinovo S.p.A.. This right must be exercised by March 31, 2008 and can be exercised at the same time the first option is exercised.

The exercise price of the two purchase options is a total of € 37,698,141, of which € 35,000,000 refers to the first option and € 2,698,141 to the second option.

The payment of the exercise price for the first option, if exercised, will be made according to the following due dates: € 1 million at the exercise date of the first option, € 12 million at the date of the start of construction work on the Commercial Park, but no later than December 31, 2008, € 12 million at the end of the first year following its opening to the public, but no later than December 31, 2012, € 10 million at the end of the second year after its opening to the public, but no later than December 31, 2013.

The payment of the exercise price for the second option, if exercised, will be made according to the following due dates: € 100,000 at the exercise date of the second option, € 500,000 at the date of the start of construction on the Commercial Park, but no later than December 31, 2008, € 500,000 at the end of the first year following its opening to the public but no later than December 31, 2012, € 1,598,141 at the end of the second year after its opening to the public, but no later than December 31, 2013.

As consideration for the acquisition of these rights, Costruzioni Generali Gilardi S.p.A. paid a total lump-sum amount of € 10,000, plus VAT to Juventus Football Club.

Guarantees – Third party guarantees on behalf of third parties
These relate to:

- guarantee of € 3 million issued by Banca Cassa di Risparmio di Savigliano S.p.A. to soccer clubs for the purchase of players' registration rights for payment to be made in the 2007/2008 season (renewable annually for the following installments due up to September 30, 2008);
- guarantee of € 5 million issued by Banca Sella S.p.A. to soccer clubs for the purchase of players' registration rights for payment to be made in the 2007/2008 season;
- guarantee of € 3 million issued by Banca Popolare Italiana Società Cooperativa to soccer clubs for the purchase of players' registration rights for payment to be made in the 2007/2008 and 2008/2009 seasons;
- guarantees of € 0.9 million issued by Banca Sella S.p.A. to the Municipality of Vinovo for € 0.6 million and to the City of Turin for € 0.3 million for the construction work and urbanization costs of the Sports Training Center and the Stadio delle Alpi;
- guarantee of € 1 million issued by Banca Sella S.p.A. to Virgiliocinque S.p.A. for the rental of of the building used as the company's headquarters;
- guarantee of € 6 million issued by Banca Popolare Italiana Società Cooperativa to the City of Turin for the payment of the second installment of the sum for the acquisition of the surface rights of the Stadio degli Alpi and adjacent areas;
- guarantee of € 2 million issued by Banca Popolare Italiana Società Cooperativa to the City of Turin for the payment of the annual installment of the sum for the acquisition of the surface rights of the Stadio degli Alpi and adjacent areas (renewable annually for all installments due up to July 15, 2012).

Guarantees – Third party guarantees on our behalf
These amount to € 165 million and relate to:

- guarantee of € 78 million issued by Intesa Sanpaolo S.p.A. in favor of Sky Italia S.r.l. for the sales contract of the television broadcasting rights to the championship games for the 2007/2008 season;
- guarantee of € 52 million issued by Intesa Sanpaolo S.p.A. in favor of Reti Televisive Italiane S.p.A. for the sales contract of the television broadcasting rights to the championship games for the 2007/2008 season;
- guarantee of € 15 million issued by Caja de Ahorros de Baleares in favor of Real Madrid CF for the installments due on the contract for the sale of the definitive title to the registration rights of the players Fabio Cannavaro and Ferreira Da Rosa Emerson;
- guarantee of € 14 million issued by La Caixa in favor of F.C. Barcelona for the installments due on the contract for the sale of the definitive title to the registration rights of the players Liliam Thuram and Gianluca Zambrotta;
- guarantee of € 5 million issued by Intesa Sanpaolo S.p.A. in favor of Fenerbanche Spor Kulubu for the installments due on the contract for the sale of the definitive title to the registration rights of the player Stephen Appiah;
- other guarantees for a total of € 1 million for the payment relating to commercial contracts.

Other commitments and contingent liabilities

Description	Signing date	Amount in currency (ml)	Amount in € ml	Expiration date
Disposal of Appleton Papers Inc (USA) (a)	2004	USD 97.5 max	74 max	Unlimited
Disposal of Permal - guarantee provided to Legg Mason (b)	6/23/2005	USD 479	364	Between 5/3/2007 and 6/23/2011 at the most
Disposal of Ifabanque - guarantee provided to BSI AG (Switzerland)	12/21/2005	-	4.5	12/21/2010 renewable for one year each year
Disposal of La Rinascente - guarantee provided by Eurofind Textile to Tamerice (c)	5/6/2005	-	71	Sundry

Sequana Capital Group

(a) Guarantees for environmental risks provided to the buyers of Appleton Papers Inc

In 2004, the early repayment of the loan made by Arjo Wiggins to the buyers of Appleton Papers Inc. led to the renegotiation of all the guarantees provided by AWA Ltd to the same buyers of Appleton Papers Inc.

At the present time there is only one guarantee regarding environmental risks (excluding Fox River). Details are as follows:

- up to $ 5 million, the costs are divided 50-50 between Appleton Papers Ltd and AWA Ltd;
- over $ 5 million, AWA Ltd assumes the entire amount of the costs up to a maximum of $ 100 million.

The aforementioned guarantee is unlimited. To date, there has been no request to meet the terms of the guarantee.

(b) Guarantees provided to Legg Mason on the sale of Permal

Sequana Capital has guaranteed the commitments undertaken by Sequana UK Limited and Permal Group S.a.s. (the sellers) under the contract for the sale of the stock.

Such commitments regard obligations to compensate Legg Mason in case of falsehood or breach of statements and guarantees provided by the sellers, in particular: the legal foundation and existence of the parties, the authorizations received to undertake the commitments negotiated in the sales contract and their validity as well as the absence of tax risks in Permal Group Ltd.

Some commitments expire after 18 months from the date of sale, on May 3, 2007, and, others, in particular regarding legal and tax matters, when they become statute-barred which could reasonably be considered as a maximum of six years.

The guarantee is given without joint and several obligation among the seller parties.

(c) Guarantees provided by Ifil Investissements relating to the sale of La Rinascente

Ifil Investissements, as the merging company of Eurofind Textile, has provided the buyer with statements and guarantees regarding the Rinascente Group, the subject of the transaction, and its activities, with the usual limitations and exclusions (a part of these guarantees are undertaken by Auchan Group). Such conventional statements and guarantees regard, among other things, full ownership and title, free and clear of detrimental encumbrances and registrations, of the shares of the companies of the Rinascente Group and real estate properties, the lease relationships, the true and correct representation of the financial statements and tax, social security and legal/labor matters. The limitations and exclusions agreed within the framework of the sale process regard specific events considered by the buyer during the course of the due diligence. Such limitations and exclusions provide for the obligation of compensation in excess of a threshold of significance per individual indemnifiable event (de minimis) and as a whole (with an exempted amount) as well as, for certain matters, a maximum limit of responsibility for the seller.

IFIL S.p.A. has guaranteed the commitments undertaken by Ifil Investissements with the buyer until their expiration, anticipated, depending on the matter at hand, at December 31, 2006 or at December 31, 2008 or when they become statute-barred.

Litigation in progress relating to the sale of La Rinascente is disclosed in Note 26 "Pending litigation".

Procedures for the identification and control of commitments

The information regarding commitments is transmitted to the parent through the consolidation process under the responsibility of the Legal Representatives of the companies which sign a representation letter addressed to the parent.
On the basis of information known to the company, no significant commitments have been omitted by the companies of the Group.

43. Employees

The breakdown of the average number of employees is provided as follows:

Average number of employees	**12/31/2006**	12/31/2005
Breakdown by business segment

44. Proforma consolidated data prepared by consolidating the Fiat Group line-by-line

Pending an opinion by the IASB, which the European Commission has also recently requested by letter dated October 26, 2006, that will definitively clarify the criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, the IFI Group has continued to exclude the Fiat Group, in which the subsidiary IFIL has a 30.45% holding of ordinary capital stock, from line-by-line consolidation consistently with the method followed for the first-time adoption of IFRS and the preparation of the consolidated financial statements at December 31, 2005.

However, presented below are the proforma consolidated balance sheet, the proforma consolidated income statement and the composition of the proforma consolidated net financial position prepared by consolidating the Fiat Group line-by-line.

IFI Group – Proforma consolidated balance sheet prepared by consolidating the Fiat Group line-by-line.

46. Approval of the consolidated financial statements and authorization for publication

The consolidated financial statements at December 31, 2006 were approved by the board of directors of March 30, 2007 which authorized the publication on March 31, 2007.

Turin, March 30, 2007

For the Board of Directors
Vice Chairman (Vicario)
John Elkann

REPORT OF THE BOARD OF STATUTORY AUDITORS ON THE SEPARATE FINANCIAL STATEMENTS

Dear Stockholders,

Under art. 153 of Legislative Decree 58 dated February 24, 1998 (Consolidated Law on Financial Intermediation), the board of statutory auditors has the obligation to report to the stockholders' meeting on matters concerning the supervisory work carried out and any omissions and censurable matters that may have come to its attention. The board of statutory auditors may also formulate proposals to the stockholders' meeting in relation to the financial statements, to its approval and to matters of its competence.

In keeping with the above law, we have written this report.

During the year, we have carried out the control activities envisaged by the law according to the principles of conduct issued by the National Boards of Dottori Commercialisti and Ragionieri taking into account, for the part regarding the board's competence, the instructions by Consob in its communications and in particular, in Communication 1025564 dated April 6, 2001 and subsequent updates.

We have participated in the meetings of the board of directors during which the directors informed us about the activities carried out and about the significant economic, financial and equity transactions entered into or in the process of being entered into by the company and/or its subsidiaries. In this regard we have ascertained and we have ensured that the transactions approved and carried out were in conformity with the law and the corporate bylaws, were not in disagreement with the resolutions approved by the stockholders' meeting or in conflict of interest and were based upon the principles of good administration.

The organizational structure and the internal control systems of the company, insofar as we are responsible, appear to be adequate for the specific type of business and size of the company.

As a result, the board of statutory auditors, also on the basis of meetings held with company management and with representatives of the audit firm, has gathered extensive information regarding compliance with the principles of diligent and proper administrative management.

Furthermore, we consider that the administrative accounting system, insofar as ascertained and checked by us, also in prior years, is in a position to record and correctly represent operating events.

As for corporate governance, the directors have prepared the specific report required by the Code of Self-discipline of listed companies. As for our responsibilities, in conformity with the provision of art. 149 No. 1 letter c) bis of Legislative Decree 58 dated February 24, 1998, we take note that the directors, in their report on corporate governance, specified the following: "IFI, in view of its particular capital structure, which, for ordinary capital stock is represented by unlisted shares held entirely by Giovanni Agnelli e C. S.a.p.az., has not adopted the Code of Self-discipline of listed companies.

Therefore, the corporate governance system adopted by the company is adapted to the capital structure and guarantees transparency according to market practices."

The rules and procedures specifically adopted, as we have ascertained, are nevertheless adequate and complete for purposes of achieving transparency as proposed by the directors.

In the same manner, the directives given by IFI S.p.A. to the subsidiaries as per art. 114, paragraph 2, of Legislative Decree 58 dated February 24, 1998 seem adequate.

The board of directors has sent us, in accordance with the law, the report relating to the first half of the year, making it public within the time-frame and according to the regulations established by Consob and has produced, according to law, the first and third quarterly reports on performance for 2006.

Specifically in reference to other instructions by Consob in its Communication 1025564 dated April 6, 2001 and later updates, with regard to our competence, we can attest to the following:

- the board of statutory auditors, pursuant to Legislative Decree 58 dated February 24, 1998 was constantly informed with regard to matters of its competence;
- the periodical verifications and tests on the company did not bring to light any atypical and/or unusual transactions with third parties, related parties or intragroup that would give rise to

reservations about the correctness or completeness of the information in the financial statements, conflicts of interest and the safeguarding of the company's assets;

- with regard to transactions with related parties, the directors, in the Notes to the separate financial statements, present and illustrate the transactions for the exchange of goods and services between your company and the companies of the Group and/or related parties, specifying that these transactions have been carried out on the basis of an evaluation of reciprocal economic gain. The most important transactions are indicated and commented in Note 28. In particular, on April 7, 2006, the company sold its entire 29.3% investment in Exor Group S.A. (controlled by Giovanni Agnelli e C. S.a.p.az.) to the same Exor Group S.A., realizing a gain of about € 104 million and a consequent significant reduction in debt. The fairness of the sales prices of € 206,804 thousand was checked by a leading financial advisor;
- the audit report of Deloitte & Touche issued on April 5, 2007 on the separate financial statements does not contain any qualifications or other matters of interest;
- during the year 2006, the board of directors held seven meetings, which we attended, and the board of statutory auditors held 10 meetings, four of which were attended by representatives of the audit firm;
- no significant aspects emerged during the course of the meetings held with the audit firm pursuant to art. 150 Legislative Decree 58 dated February 24, 1998;
- there have been no complaints received under ex art. 2408 of the Italian Civil Code;
- there have been no petitions received;
- during the year, the board of statutory auditors issued opinions on the compensation to be paid to the directors who are charged with special mandates approved by the board of directors pursuant to art. 2389 of the Italian Civil Code;
- during the year, besides the appointment for the audit of the separate and consolidated financial statements and the limited-scope audit for the first-half report, the company engaged Deloitte & Touche for the audit of the separate opening balance sheet at January 1, 2005 of the company, prepared in accordance with IFRS, as well as the separate financial statements at December 31, 2005, prepared for purposes of comparison, for a fee of € 2,000.

With regard to the separate financial statements which show a profit of € 217,624,583, the formation of which is described in the report on operations, we have ascertained that the laws have been observed with regard to its format and structure through tests carried out directly by us and on the basis of information supplied to us by the audit firm; the information supplied by directors in the report on operations should be considered extensive and complete.

This being said, we invite you to approve the financial statements together with the motion by the board of directors for the appropriation of the profit for the year.

The board of directors, lastly, invites you to authorize the purchase of treasury stock for the amount and according to the manner and terms indicated in the specific report. As to our responsibilities in this case, we can attest that the proposal conforms to existing laws.

Turin, April 11, 2007

THE BOARD OF STATUTORY AUDITORS

(Gianluca Ferrero)

(Giorgio Giorgi)

(Lionello Jona Celesia)

REPORT OF THE BOARD OF STATUTORY AUDITORS ON THE CONSOLIDATED FINANCIAL STATEMENTS

Dear Stockholders,

The consolidated financial statements of the IFI Group for the year ended December 31, 2006, which we submit for your consideration, show a profit attributable to the equity holders of the company of € 221 million (€ 676 million in the prior year). The consolidated financial statements were submitted to us within the terms of the law, together with the report on operations, and are prepared in accordance with International Financial Reporting Standards (IFRS) endorsed by the European Union.

The tests carried out by Deloitte & Touche S.p.A. have led to the assertion that the values expressed in the financial statements agree with the accounting records of the parent, the consolidated financial statements of the sole subsidiary IFIL S.p.A. and the relative information formally communicated by the latter.

Such consolidated financial statements, transmitted by the subsidiary to the parent for purposes of drawing up the consolidated financial statements, prepared by its relevant corporate bodies, have been examined by the bodies and/or parties in charge of controlling the individual subsidiary and on the part of the audit firm within the scope of the procedures carried out for the audit of the consolidated financial statements. The board of statutory auditors has, therefore, not extended its examination to these financial statements.

The determination of the scope of consolidation, the choice of the principles of consolidation of the investments and the procedures adopted for this purpose are in agreement with IFRS. The structure of the consolidated financial statements is thus to be considered technically correct and, as a whole, conforms to the specific law.

The audit firm has issued its report on the consolidated financial statements with an unqualified opinion, noting, for purposes of full disclosure, that the Fiat Group has been excluded from the scope of line-by-line consolidation.

The report on operations adequately describes the results of operations and financial condition, the performance of operations during the course of 2006 and the business outlook of the whole of the companies in the scope of consolidation after the end of the year. The examination to which the report has been subjected shows its congruity with the consolidated financial statements.

Turin, April 11, 2007 THE BOARD OF STATUTORY AUDITORS

(Gianluca Ferrero)

Data updated to April 17, 2007.

Expiry of the terms of office

The terms of office of the board of directors and the board of statutory auditors, elected by the stockholders' meeting held on June 27, 2005, will expire concurrently with the stockholders' meeting that will be held to approve the separate financial statements for the year ending December 31, 2007.
The appointment of the independent auditors will expire concurrently with the stockholders' meeting that will be held to approve the financial statements for the year ending December 31, 2011.

LETTER TO THE STOCKHOLDERS

To our Stockholders,

The reading of IFIL's 2006 financial statements offers numerous reasons for satisfaction, since, as well as reflecting the positive results achieved during the year, it suggests that there are also good prospects for the future performance of the company.
The financial statements show a profit of € 341 million in the consolidated financial statements and a profit of € 625 million in the separate financial statements. Between the month of January 2006 and today, the NAV of the corporate portfolio grew by 82% and is now at more than € 10 billion. This progress has also been confirmed by the stock market where, during the same period, IFIL's stock doubled in value. Your company has now reached a capitalization of € 7.5 billion, one of the highest in its sector in Europe.

***

Much of the increase in the value of the company can be attributed to the extraordinary performance of its main holding, the Fiat Group, which, in 2006, successfully completed the intensive phase of restructuring started in the prior months, achieving remarkable progress in all sectors of activity.
In the Auto segment, internal restructuring and an innovative policy of creating alliances with other leading world carmakers led to a radical transformation in terms of operations, which soon produced results. The launch of new Fiat models generated an enthusiastic response from the market, rewarding Fiat with significant gains in market share: the percentage of new car registrations, taking all the brands of the Group into account, in 2006, rose to 30.8% in Italy and 7.6% in Europe.
Other sectors – particularly trucks and commercial vehicles, agricultural and construction equipment – also benefited both from internal restructuring measures and from the numerous industrial and commercial agreements on a global scale, which rapidly translated into substantial growth in terms of sales and a noticeable increase in profitability margins.
Thanks to the exceptional ability of top management and the constant commitment of all its employees, Fiat was able to effect a turnaround of historical importance, so that it has become one of the strongest symbols of the comeback of Italian industry. Its success has reopened excellent prospects for a new phase of growth and repays, in the best possible way, the loyalty of the people who have always believed in its potential by sustaining its relaunching program and ensuring the stability it needs to succeed.
Confident that the way in which IFIL succeeded in maintaining its role as Fiat's main stockholder in 2005 will be definitively judged to be entirely proper, the fact that Italy's leading industrial group has bounced back to health is for us an indisputable source of great satisfaction and pride.

***

2006 was also an important year for IFIL's activities in France. The Public Exchange Offering for SGS shares promoted by Sequana Capital received the full consensus of the market and made it possible to achieve many positive results. If, on the one hand, the operation led to a company that concentrates its business in the paper sector, paving the way for more effective industrial management of its assets, on the other, it eliminated the investment that had weighed heavily on Sequana's portfolio, allowing its true value to emerge and delivering to its stockholders a direct investment in SGS, the largest company in the world in the field of verification, certification and control services. Thanks to the success of the Public Exchange Offering, the value of IFIL's portfolio increased as a result of the acquisition of a significant stake in the capital of SGS, more than 13%, making the IFIL its second-largest stockholder. SGS, which is quoted on the Zurich stock exchange, currently employs 48,000 people and has a worldwide network of analysis laboratories.

***

In the area of financial services, the most important event of the year was the merger between Sanpaolo IMI and Banca Intesa, resulting in the creation of Italy's largest banking group with interesting development potential at the national and European level. The merger constitutes a further step in the ten-year long process of appreciating the value of the investment in Sanpaolo, which now has a current value of approximately € 1.7 billion.

Furthermore, the acquisition of a stake equal to 9.43% of the capital of Gruppo Banca Leonardo was particularly important. This acquisition, which strengthens the collaboration with Gerardo Braggiotti in investment banking activities, will help to accelerate IFIL's development programs, especially with reference to new investments.

***

The acquisition of the control of Cushman & Wakefield, the largest private company operating in real estate services, founded in New York in 1917 and now represented in 55 countries with 197 offices and 11,500 employees, fits precisely into this area of new investments. The investment marks IFIL's entry into a growing market, through a renowned company, with a well-known trademark and excellent development prospects throughout the world and especially in Asia. Through this transaction, which was financed primarily with available resources, IFIL has also at last seized an opportunity to start a new phase of investment diversification, in terms of business sectors, currencies and geographical areas.

***

Special attention was also dedicated to the two companies in the sector of leisure time: Juventus and Alpitour.

Following the disciplinary measures with which we are all familiar, the football club incurred heavy sanctions, including relegation to a lower league and the revocation of its last two last championship titles. On the initiative of IFIL, Juventus reacted by completely renewing its board of directors and compiling a Code of Ethics which, together with a strict system of internal control, has brought the company in line with the best international standards. In the months to come, the cardinal points which will guide Juventus towards its first target of promotion to Serie A will include a firm upholding of sporting values, the wish to encourage the participation of families and children in sports events, and making the team stronger by promoting young talented players.

With regard to Alpitour, the internal reorganization process which began with new management from IFIL focused on containing structural costs and reformulating its commercial offering. The current development program – which has already produced results in terms of higher profitability – also involves a large increase in investments in hotel facilities and making better use of Italian tourist destinations both among the Italian and foreign clienteles.

***

Having filed away the positive results of 2006, today, IFIL is focusing on new targets. The commitment of its management to seek out new investment opportunities will continue in months to come, with the aim of ensuring that the company has steady, solid growth.

Before concluding, I would like to devote a few words to Gianluigi Gabetti, who usually signs this letter every year. While we confidently await the outcome of the appeal against the measure which has temporarily prevented him from occupying the highest position in the company, on behalf of the board of directors and all the company's employees, I would like to thank him for all his hard work, and especially for the decision he made in 2005. To Dr. Gabetti goes the credit for having refused a destiny which many thought was already settled, working with patience and in full respect of the law to create the conditions of stability needed for the plan to relaunch Fiat. A decision which, as the months go by, appears increasingly to have been the right one. He deserves our applause, and the honor – as soon as this becomes possible – of returning to guide our company as its Chairman.

***

Finally, in the name of the board of directors I would like to thank our stockholders for the trust they have placed in us, the statutory auditors and independent auditors, and the managers and all the Group's employees for what they have achieved so far and for their continuous commitment during the current year.

Turin, March 30, 2007

John Elkann

An update

Following the ruling handed down by the Turin Court of Appeals, which has suspended the effectiveness of the additional administrative sanctions imposed by Consob, I have resumed my duties in the Company.
I would like to voluntarily take this occasion to express my full agreement with this Letter to the Stockholders, as well as the Directors' Report on Operations and the financial statements for the year 2006, placing my signature on these documents.

Turin, April 17, 2007

Gianluigi Gabetti

IFIL GROUP PROFILE

IFIL Investments S.p.A. (abbreviated in **IFIL S.p.A.**) is a corporation organized under the laws of the Republic of Italy. The head office is located in Turin, Italy, Corso Matteotti 26.
IFIL S.p.A. is the investment company of the Group headed by **Giovanni Agnelli e C. S.a.p.az.** which holds 3% of its ordinary capital stock directly and 66.23% of its ordinary capital stock through **IFI – Istituto Finanziario Industriale S.p.A.**.
IFIL's shares (ordinary and non-convertible savings shares) are listed on the Electronic Share Market (MTA) of the Italian stock exchange (Blue Chip segment).
The company commands two distinctive areas of operations: the active management of the investment in Fiat S.p.A. and the dynamic management of its other holdings.

Fiat S.p.A., in which IFIL S.p.A. has a holding of more than 30% of ordinary and preferred capital stock, is listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment). Founded in 1899, for more than a century the Fiat Group has been operating in the automotive field, designing, manufacturing and selling automobiles (Fiat, Lancia, Alfa Romeo, Ferrari, Maserati and Fiat Light Commercial), agricultural and construction equipment (Case and New Holland), trucks and commercial vehicles, buses and special-purpose vehicles (Iveco, Irisbus, Astra and Magirus), components and production systems (Fiat Powertrain Technologies, Magneti Marelli, Teksid and Comau); it is also active in publishing and communications (Itedi). Other sectors also offer financial services to the sales networks and clientele in addition to rental services to customers.

The other holdings which comprise the dynamically managed diversified portfolio are listed below.

Sequana Capital S.A. (48.88% holding by the subsidiary Ifil Investissements S.A.) is a French company listed on the Euronext market which in 2006 decided to focus its operations on the paper sector where it operates through:

- Arjowiggins S.A. (100% holding), the world leader in the manufacture of high value-added paper products and, in Europe, leader in the manufacture of carbonless paper;

- Antalis S.A. (100% holding), the leading European group in the distribution of paper products for printing and writing.

SGS S.A. (13.74% holding by Ifil Investissements S.A.) is a Swiss company listed on the Virt-x market. Founded in 1878, the company is today the global leader in verification, inspection, control and certification activities with 48,000 employees and a network of more than 1,000 offices and laboratories throughout the world.

Intesa Sanpaolo S.p.A. (2.45% holding of ordinary capital stock by IFIL S.p.A.) is listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment). It is one of the most important banking groups in Europe and is the foremost bank in Italy with a market share of 20% on average in all segments of business (retail, corporate and wealth management). With its network of 5,500 branches, the group offers its services to 12 million customers. It also operates in 13 Central-East European countries and in the Mediterranean basin with 1,650 branches and 7.7 million customers in the retail and commercial banking sectors. It also has an international network specialized in corporate customer support covering 35 nations including the United States, Russia, China and India.

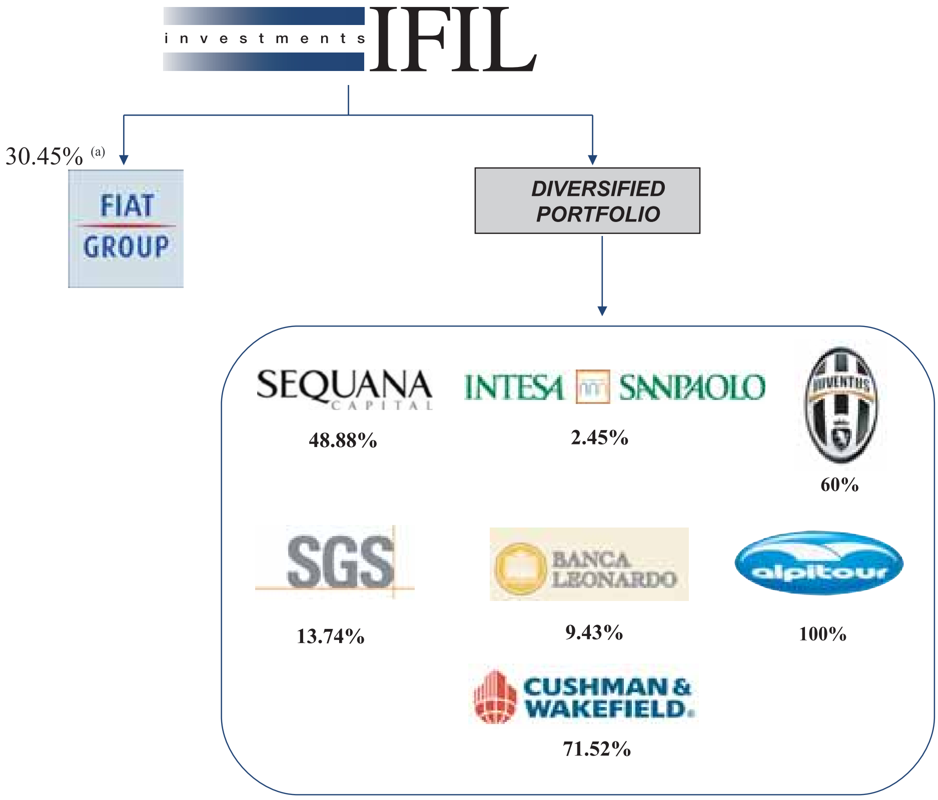
Gruppo Banca Leonardo S.p.A. (9.43% holding by Ifil Investissements S.A.) is an independent investment bank offering corporate finance advisory and asset management services, in addition to private equity services, under a joint venture with a leading European group.

Alpitour S.p.A. (100% holding by IFIL S.p.A.) is the leading group in the tourist sector in Italy. It operates with a vast range of integrated services (tour operating, hotel, aviation, distribution, incoming and Incentive e Grandi Eventi). In 2006, the Alpitour Group managed the accommodations of the Olympic Family at Turin Winter Olympics 2006.

Juventus Football Club S.p.A. (60% holding by IFIL S.p.A.) is listed on the Electronic Share Market of the Italian stock exchange (Star segment). Founded in 1897, it is one of the most important professional soccer teams in the world and boasts the largest number of fans in Italy and the highest number of total sports victories of all the Italian soccer teams, in both national and international competition.

At the end of March 2007, Ifil Investissements purchased control (71.52%) of the **Cushman & Wakefield (C&W) Group** which is the largest private company for real estate services. The C&W Group has its headquarters in New York, where it was founded in 1917, and now has 197 offices and 11,500 employees in 55 countries.

The following chart is updated to the end of March 2007 and presents the simplified structure of the investment portfolio. Percentage holdings refer to ordinary capital stock.



(a) IFIL also holds 30.09% of Fiat preferred capital stock.

The following charts show the composition of the Net Asset Value (NAV) at current values and the change in the current value of the investment portfolio over the last 10 years.

Net Asset Value

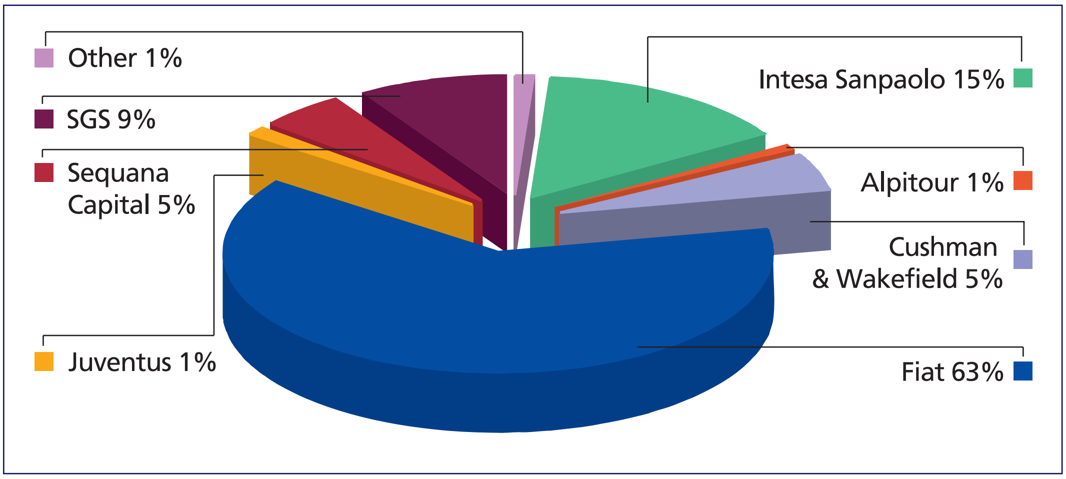
At the end of March 2007 the Net Asset Value is equal to € 10,663 million and is composed as follows:

€ in millions	
Current value of the investment portfolio	10,786
Consolidated net financial position – Holdings System	(123)
Total	**10,663**

The listed equity holdings in the investment portfolio are valued at the closing stock market prices as of March 23, 2007.

NAV is formulated with the aim of aiding analysts and investors who in any case put together their own valuations.

Investment portfolio at current values



Change in the investment portfolio at current values (a)

A motion for dividends relating to the year 2006 will be proposed to the stockholders' meeting called for the approval of the separate financial statements for the year ended December 31, 2006. The total amounts are calculated on the basis of the shares outstanding as of March 30, 2007.

STOCKHOLDERS AND THE STOCK MARKET

Capital stock

IFIL S.p.A.'s capital stock, fully subscribed to and paid-in, amounts to € 1,075,995,737 and consists of 1,038,612,717 ordinary shares and 37,383,020 non-convertible savings shares with a par value of € 1 each.

Pursuant to art. 25 of the bylaws, the savings shares carry the right to a preference dividend, cumulative according to law, of 8.27% of their par value and to a total dividend higher than that of ordinary shares by 2.07% of the same par value. When, in any one year, the dividends assigned to the savings shares are below the percentages indicated above, the difference will be added to the preference dividend of the next two years.
The savings shares carry no voting rights and can either be registered or bearer shares, as elected by the stockholders.

In the event of exclusion of the ordinary shares and/or savings shares from trading, the preference dividend and the dividend higher than that of the ordinary shares to which the savings shares are entitled, will be automatically increased to the extent that they are equal, respectively, to 8.52% and 2.32%.

In accordance with art. 6 of the bylaws, the directors have been vested with the power, for a period of five years from the resolution passed by the special stockholders' meeting held on May 14, 2003, to increase, at one or more times, also in divisible form, the capital stock up to an amount of € 1,500 million and to issue convertible bonds, at one or more times, up to the same figure but for amounts which, each time, shall not exceed those established by law.

Stockholders

IFIL S.p.A. has approximately 30,000 stockholders.
At the end of March 2007, IFI – Istituto Finanziario Industriale S.p.A. and Giovanni Agnelli e C. S.a.p.az. hold respectively 66.23% and 3% of ordinary capital stock.

The other ten major stockholders, indicated below, represent 13.25% of ordinary capital stock.

Stockholders	**%**	**Ordinary shares**
Mackenzie Cundill Group	4.99	51,802,186
Deutsche Bank AG	1.12	11,682,717

Treasury stock

IFIL S.p.A. currently holds 13,213,260 ordinary shares of treasury stock (1.27% of the class of stock), including the 810,262 shares held through the subsidiary Soiem S.p.A..
On May 24, 2006, the ordinary stockholders' meeting renewed, for 18 months, the authorization for the purchase of treasury stock for a maximum of 90 million IFIL ordinary and/or savings shares for a total amount of € 450 million.

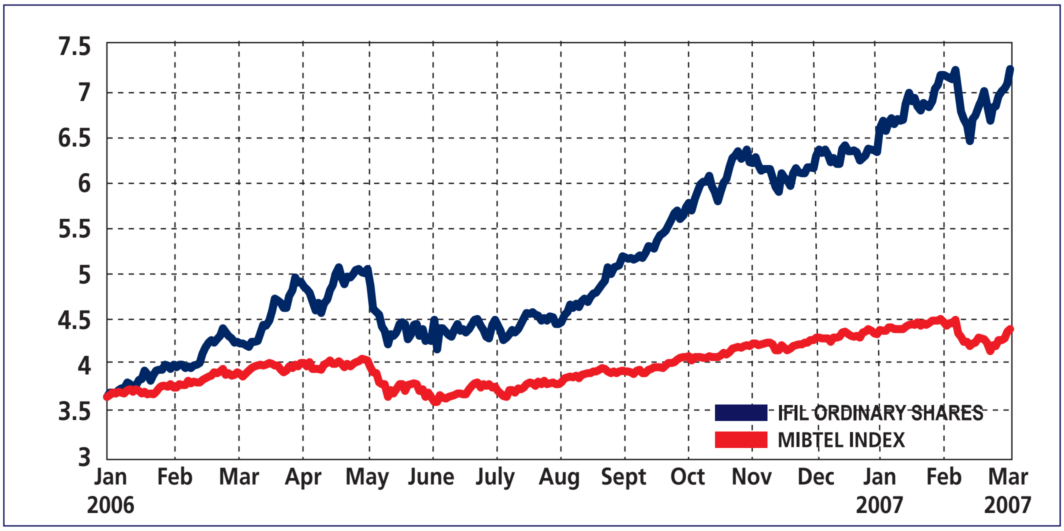
Stock market performance

Performance by IFIL ordinary stock, which is listed on the MIDEX Index of mid-cap companies and was recently included in the MIB30, was positive in 2006 and decisively better than the performance of the Mibtel Index. The stock's performance is primarily due to the price gains by Fiat and Intesa Sanpaolo stocks and the revised investment strategy.

In 2006, IFIL ordinary stock gained 75% (including dividends paid out) against a positive 23.6% performance by the Mibtel Index.

The growth pattern continued into the first part of 2007 with price gains that again caused the stock to outperform the Mibtel Index.

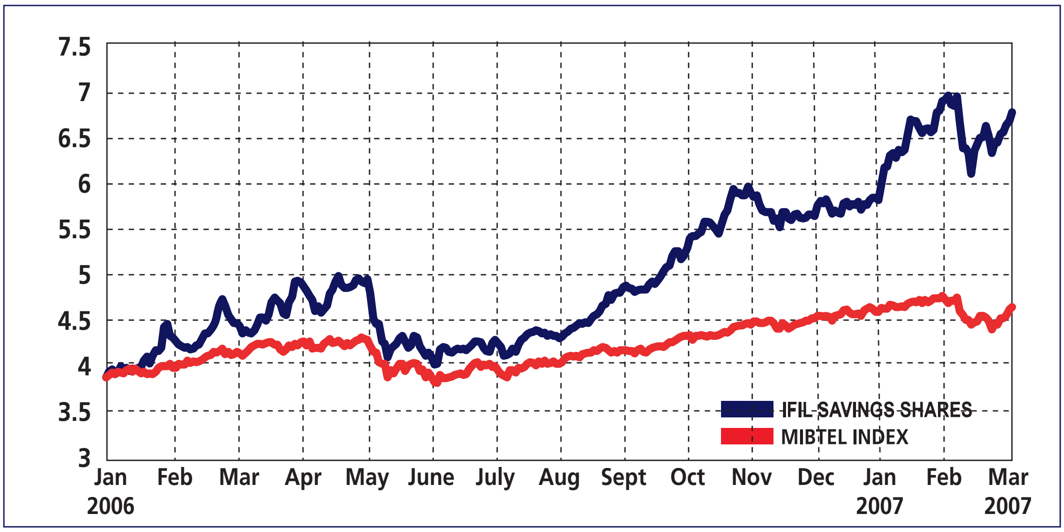
Performance by IFIL ordinary stock against the Mibtel index (a)



During 2006, IFIL savings stock gained 52.7% and performed on average below IFIL ordinary stock but better than the Mibtel Index.

During the first part of 2007, IFIL savings stock recorded a further gain, widening the performance gap against the Mibtel Index.

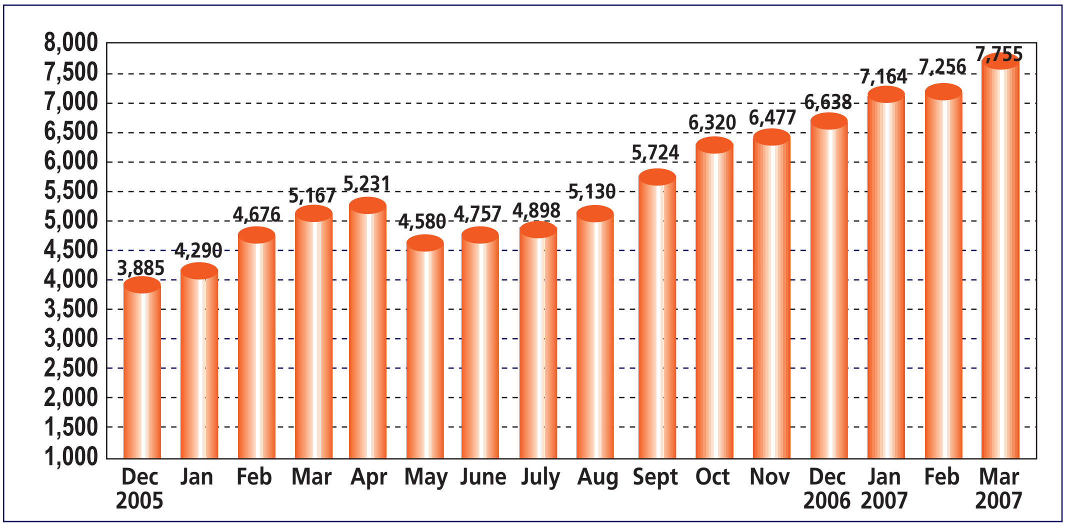
Performance by IFIL savings stock against the Mibtel index (a)



(a) The charts are based on stock market data. Mibtel base 100 on IFIL stock.

The above performance positively influenced IFIL's capitalization which, in 2006, grew from € 3,885 million to € 6,638 million. During the first few months of 2007, there was a further increase to € 7,755 million.

IFIL Capitalization (€ in millions)



During 2006, the value and volumes of IFIL stock traded grew still further. The increment in the volumes of both ordinary and savings stocks traded (liquidity) particularly confirms the market's increasingly greater interest in IFIL stocks.

FINANCIAL COMMUNICATIONS AND INVESTOR RELATIONS

In 2006, IFIL devoted special attention to relations with stockholders, financial analysts and institutional investors and the national and international financial Press.

In particular:

- approximately 1,000 copies (in Italian and English) of the annual report, the first-half report and the quarterly reports have been distributed. These reports are sent, on request, to stockholders, and are also available on the corporate website at www.ifil.it;
- besides numerous individual meetings arranged with institutional investors and financial analysts, a telephone conference call was organized in December 2006 to announce the agreement for the purchase of the controlling interest in the Cushman & Wakefield Group;
- continuous information was circulated through the Italian and foreign economic and financial Press, and also on the corporate website, in addition to the organization of press meetings concerning specific events.

The corporate functions in charge of communications, external relations and investor relations are:

MAJOR EVENTS IN 2006 AND IN THE FIRST QUARTER OF 2007

Investment in Gruppo Banca Leonardo S.p.A.

On April 24, 2006, after receiving authorization from the competent authority, the subsidiary Ifil Investissements purchased 14,200,000 Gruppo Banca Leonardo S.p.A. Class A shares, equal to 9.43% of the current capital stock of the bank, for an investment of € 47 million, including transaction costs of € 0.4 million.

Non-convertible bond issue

On June 9, 2006, following the resolution passed by the board of directors' meeting on May 12, 2006, IFIL S.p.A. issued non-convertible bonds for a face value of € 200 million maturing June 9, 2011. The issue price was 99.9% of face value and interest is quarterly at the 3-month Euribor plus a spread of 68 basis points. Standard & Poor's rated the bonds BBB+, which is also the current rating of IFIL S.p.A.'s long-term debt. The bonds were admitted to trading on the Luxembourg stock exchange. The sole Lead Manager was Rasfin SIM S.p.A..

Increase of the investment in Fiat S.p.A.

In November and December 2006, IFIL S.p.A. purchased 4,254,000 Fiat ordinary shares (0.39% of the class of stock) on the market for an investment of € 62.3 million.
IFIL S.p.A. now holds 332,587,447 Fiat ordinary shares equal to 30.45% of the class of stock and 31,082,500 Fiat preferred shares equal to 30.09% of the class of stock. The investment represents 28.513% of current Fiat capital stock.

Public Exchange and Purchase Offer launched by the subsidiary Sequana Capital

On September 6, 2006, the board of directors of the subsidiary Sequana Capital approved the project to place Sequana Capital's focus on the paper sector (in which it operates through the wholly-owned subsidiaries Arjowiggins and Antalis). Consequently, it launched the Public Exchange Offering for a maximum of 57,646,980 Sequana Capital shares (54.31% of capital stock at August 1, 2006) in exchange for a maximum of 1,859,580 SGS shares (23.8% of capital stock) held by Sequana Capital itself, in a ratio of 1 SGS share for every 31 Sequana Capital shares tendered in the Offering. Alternatively, the stockholders could have chosen to tender their shares to the Public Purchase Offering and receive the price of € 21 in cash for each Sequana Capital share sold to the company.

The offering period, approved by the French stock exchange authority and the special stockholders' meeting held on October 30, 2006, ended on November 28, 2006 with 100,548,993 Sequana Capital shares tendered (equal to 94.2% of the shares outstanding), of which 100,330,857 were tendered in the Exchange Offering and 218,136 in the Purchase Offering.
After the allocation, 57,521,414 shares were accepted for the Exchange Offering and 125,566 shares for Purchase Offering.

Finally, on December 14, 2006, the board of directors of Sequana Capital reduced capital stock to € 73,679,608.5 (represented by 49,119,739 shares of par value € 1.5 each) by canceling 57,646,980 shares tendered in the offerings.

Under the offer which was finalized on December 18, 2006, the subsidiary Ifil Investissements tendered 31,913,141 Sequana Capital shares obtaining in exchange 1,029,456 SGS shares (13.16% of capital stock).
The investment in Sequana Capital (represented by 24,009,482 shares) decreased from 52.68% to 48.88%.

Agreement for the acquisition of the controlling interest in the Cushman & Wakefield Group

On December 19, 2006, the subsidiary Ifil Investissements reached an agreement for the purchase of the controlling interest in Cushman & Wakefield (C&W), replacing Rockefeller Group International Inc., an international investment and property development company.

On March 30, 2007, after receiving the authorizations from the competent authorities, Ifil Investissements finalized this agreement by purchasing 71.52% of the capital stock of Cushman & Wakefield for an investment of $ 625 million (€ 474 million), in addition to transaction costs. The remaining 28.48% stake is held by C&W management and employees.

The acquisition was financed by Ifil Investissements' cash resources with no additional leverage assumed by C&W, ensuring that it retains complete financial flexibility with respect to its future growth objectives. For the IFIL Group, the investment represents a unique opportunity to acquire a majority position in what is widely regarded as the commercial real estate sector's foremost brand. C&W is led by one of the sector's most experienced management teams and operates in a growing, fragmented and consolidating services sector that presents excellent prospects for growth, both organically and through acquisitions. This transaction represents an important step in the IFIL Group's plans to continue diversifying its assets across a range of sectors, geographies and currencies.

The investment provides C&W with a new long-term stockholder with a proven track record of supporting the management teams of its portfolio as they define and implement successful growth and development plans. The transaction provides C&W with continuity of both management and strategy.

The C&W board of directors will consist of Carlo Sant'Albano, Alessandro Potestà, Michael Bartolotta and Pierre Martinet from the IFIL Group and Bruce Mosler, John Cushman and John Santora, managers from C&W.

C&W is headquartered in New York, where it was founded in 1917, and is the world's pre-eminent privately held services firm. It is present in 55 countries across the globe with 197 offices and 11,500 employees. In 2006, consolidated revenues totaled $ 1.5 billion, an increase of 23% over the prior year, an EBITDA of $ 119 million and a consolidated profit of $ 40 million.

C&W provides real estate services to 75% of the Fortune 500 and has a diverse customer base. C&W offers a complete range of services for the real estate sector, split into four main areas of activity: Transaction Services – tenant and landlord representation in office, industrial and retail estate; Capital Markets – property sales, investment management of properties, investment banking and valuation services; Client Solutions – real estate strategies and related services to large corporations and property owners and Consulting Services – business and real estate consulting.

In 2006, C&W negotiated more than $ 32 billion in leasing transactions and approximately $ 50 billion in property sales. C&W has valued over $ 500 billion of property in 2006 and is the most important Group in the world. The firm has more than 430 million square feet of property under management, making it one of the largest global property managers. In 2005, C&W launched its “Fast Forward” growth strategy to restructure its business, diversify its services and expand its geographic reach. Its strategy is focused on extending C&W's business in Europe and in the Asia-Pacific region with the aim of generating 50% of its revenues from outside the United States by 2011, and on increasing its presence in the investment services sector.
In the past two years C&W has consolidated its position in Mexico by taking full control of its operation there, acquired its Russian and Canadian market leader affiliates, respectively Stiles & Riabokobylko and Royal LePage, and announced plans to open an office in Finland. The company is also continuing to expand in India, China and throughout Asia.

The United States remains a core market and continues to present opportunities: the top five real estate service providers, including C&W, control only 14% of the $ 23 billion United States commercial property services market affording plenty of scope for growth.

The United States remains a core market and continues to present opportunities: the top five real estate service providers, including C&W, control only 14% of the $ 23 billion United States commercial property services market affording plenty of scope for growth.

Merger of Sanpaolo IMI S.p.A. in Banca Intesa S.p.A.

On December 28, 2006, the deed of merger of Sanpaolo IMI S.p.A. in Banca Intesa S.p.A. was signed and became effective for legal purposes on January 1, 2007.
At December 31, 2006, IFIL S.p.A. held 93,071,000 Sanpaolo IMI ordinary shares (5.85% of ordinary capital stock and 4.96% of capital stock); IFIL S.p.A. received for those shares a total of 289,916,165 Intesa Sanpaolo S.p.A. ordinary shares (2.45% of ordinary capital stock and 2.27% of capital stock).
Effective January 1, 2007, the capital stock of Intesa Sanpaolo S.p.A. is € 6,646,436,318.6 and is composed of 11,849,117,744 ordinary shares and 932,490,561 non-convertible savings shares, all with a par value of € 0.52.

Consob sanctionary measure

On February 13, 2007, the Consob sanctionary measure (Resolution 15760) was notified with regard to the contents of the press releases issued by IFIL S.p.A. and by Giovanni Agnelli e C. S.a.p.az. on August 24, 2005 and applies the following pecuniary administrative sanctions:

- to Gianluigi Gabetti (chairman of IFIL S.p.A. and chairman of Giovanni Agnelli e C. S.a.p.az.) € 2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL S.p.A. and € 2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C. S.a.p.az;

- to Franzo Grande Stevens (director of IFIL S.p.A.) € 2 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL S.p.A. and € 1 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C. S.a.p.az;

- to Virgilio Marrone (chief executive officer and general manager of IFI S.p.A.) € 500 thousand in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C. S.a.p.az;

- to IFIL S.p.A. € 4.5 million;

- to Giovanni Agnelli e C. S.a.p.az. € 3 million;

and the additional following administrative sanctions: temporary inability to assume positions of administration, direction and control in listed companies or in companies that are part of the same group of listed companies:

- to Gianluigi Gabetti: for six months
- to Franzo Grande Stevens: for four months
- to Virgilio Marrone: for two months

On the same date, the board of directors, presided over by the vice chairman (“Vicario”) John Elkann, took note of the sanctionary measure with surprise and disappointment and declared that Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone had its full support.
The individuals and companies mentioned in the sanctionary measure filed an appeal with the Turin Court of Appeals on February 28, 2007 together with a request for the suspension of the measure on serious grounds.

IFIL S.p.A. has accrued the pecuniary sanction of € 4.5 million in the separate and consolidated financial statements for the year ended December 31, 2006.

A preliminary investigation by the Turin District Attorney's office is currently underway concerning the same facts as the Consob sanctionary measure.

Juventus Football Club S.p.A. capital increase

On March 14, 2007, the board of directors of Juventus Football Club S.p.A. examined and unanimously approved the medium term development plan aimed at relaunching the company from the standpoint of sports excellence, developing commercial activities and strengthening the financial and equity positions.

In order to finance the development plan, the board of directors voted to put forward a motion to the stockholders' meeting called for April 20, 2007 to increase the capital stock by approximately € 104.8 million through the issue of 80,621,332 shares (to be offered to the stockholders as option rights in a ratio of 2 new shares for every 3 shares held) at the issue price of € 1.30 per share (of which € 1.20 is the share premium).

IFIL Investment S.p.A., in agreeing with the objectives of the medium term development plan, will subscribe to its share, equal to € 62.9 million.

Gruppo Banca Leonardo S.p.A. capital increase

In February 2007, the subsidiary Ifil Investissements S.A. declared its irrevocable intention to exercise the right to subscribe to its share of the Gruppo Banca Leonardo capital increase, equal to 11,055,537 shares for an investment of € 36.3 million. The new shares will be issued, subscribed to and fully paid-in on April 30, 2007.

Increase in the investment in SGS S.A.

In March 2007, the subsidiary Ifil Investissements S.A. purchased 45,364 SGS shares on the market for an investment of € 39.5 million, increasing its stake from 13.16% to 13.74%.

Sale of the investment in Turismo&Immobiliare

On March 26, 2007, the subsidiary Ifil Investissements reached an agreement for the sale of the investment in Turismo&Immobiliare, the company which holds a 49% stake in Italia Turismo, the largest real estate operator in the tourism-incoming sector in Italy which has significant investments in the south of Italy.

Pursuant to the agreement, Ifil Investissements will sell its 25% holding in Turismo&Immobiliare to the Marcegaglia Group, Pirelli RE and Gabetti Property Solutions for € 5.2 million.

The closing of the transaction, which is subject to approval by the competent authorities, is expected to take place in June 2007.

BUSINESS OUTLOOK

For the year 2007, IFIL S.p.A. is expected to report a profit.

Taking into account the forecasts formulated by the major holdings (discussed later in the report), a profit is forecast in the IFIL Group consolidated financial statements for 2007.

Fiat Group
In 2007, the Fiat Group confirmed its target of realizing a net income of between € 1.6 billion and € 1.8 billion.

Sequana Capital Group
Compared to the first half of 2006, Arjowiggins expects the results for the first half of 2007 to be higher for the Communications, Safety and Technology divisions and lower for the Graphic Arts division.
As regards Antalis, the first half of 2007 should show an improvement owing to a more favorable market for office products and the gain in market share in some geographical areas.

Alpitour Group
The first months of the year 2006/2007 have confirmed the signs of a recovery in demand that were seen during the previous year.
The year 2006/2007 should show a further improvement in the operating result over the prior year, even though investments and development initiatives will be significant.

Juventus Football Club
The year 2006/2007 is influenced by the team's relegation to Serie B in the Italian championship and its absence from playing in the UEFA Champions League games which significantly reduced revenues.
The company has therefore implemented a strong cost reduction plan aimed particularly at salaries and the amortization of players' rights which led to the sale of important players with the aim of closing the year 2006/2007 with a breakeven.

IFIL S.p.A. – REVIEW OF THE RESULTS OF THE SEPARATE FINANCIAL STATEMENTS

Introduction

Following the coming into force of European Regulation 1606 dated July 19, 2002 and the national laws implementing that Regulation, pursuant to article 4 of Legislative Decree 38 dated February 28, 2005, starting from January 1, 2006 IFIL S.p.A. has adopted International Financial Reporting Standards (IFRS) in the preparation of its separate financial statements (previously referred to as statutory financial statements).

Consequently, the figures in the separate financial statements for the year ended December 31, 2005, prepared in accordance with Italian accounting principles (Italian GAAP), have been adjusted and reclassified on the basis of IFRS for purposes of comparison with the year 2006.

Additional information on the adoption of IFRS and on the effects of their adoption on the published 2005 statutory financial statements are presented in Note 2 to the separate financial statements at December 31, 2006 and in the specific Appendix – Transition to International Financial Reporting Standards (IFRS) by IFIL S.p.A..

The condensed income statement and balance sheet and comments on the most important items are presented below.

IFIL S.p.A. - Condensed income statement

(a) Prepared in accordance with IFRS.

The year 2006 shows a profit of € 625.3 million, € 620.1 million of which is the net amount deriving from the impairment reversal on the investment held in Fiat (€ 645.3 million) and the accrual for the related deferred taxes (-€ 25.2 million).

The result of the prior year, adjusted in accordance with IFRS, amounted to € 100.9 million.

1. Dividends from investments

Dividends from investments in 2006 amount to € 53 million and are entirely collected from Sanpaolo IMI. In 2005, the amount of € 154.4 million included dividends collected from Sanpaolo IMI (€ 43.7 million) and from the subsidiaries Ifil Investment Holding and Ifil Investissements (€ 110.7 million in total).

2. Impairment reversals on investments

Impairment reversals on investments refer exclusively to 240,583,447 Fiat ordinary shares and 31,082,500 Fiat preferred shares which in 2001, 2002 and 2004 had been written down to their market price. The impairment loss on the value of Fiat ordinary shares was totally reversed up to the original purchase cost, for € 537.1 million. The carrying amount of Fiat preferred shares was partially adjusted by the impairment reversal of € 108.2 million (out of a total impairment loss of € 135.7 million), up to the stock market price on December 29, 2006, which was still below (€ 27.5 million) the original purchase cost.

Deferred taxes were recorded on these impairment reversals for € 25.2 million (5.28% of the impairments deductible in the year 2002).

3. Net financial expenses

Net financial expenses of € 19.4 million decreased by € 2.1 million compared to 2005 (€ 21.5 million) due to a different composition of debt and the consequent reduction in the cost of debt.

4. Net general expenses

Net general expenses amount to € 20.1 million and show an increase of € 4.3 million compared to € 15.8 million in 2005. The increase is due to higher legal fees (+€ 2.1 million), personnel costs (+€ 0.4 million), special compensation to the chief executive officer (+€ 1.1 million), non-deductible VAT (+€ 0.9 million) and travel expenses (+€ 0.2 million), partially compensated by higher revenues and cost recoveries (-€ 0.4 million).

5. Other non-current expenses

Other non-current expenses in 2006 amount to € 7.6 million and include the accrual for pecuniary administrative sanctions of € 4.5 million levied on the company by Consob in relation to the content of the press release dated August 24, 2005, as well as the accrual for the cost of € 3.1 million referring to the current year for the stock option plan approved for management of the subsidiary Alpitour.

In 2005, the amount of € 18.8 million included the extraordinary compensation approved for the chairman (€ 15 million) and the former chief executive officer (€ 3.8 million).

6. Investments

Details are as follows:

€ in millions	**12/31/2006**	12/31/2005	Change
Accounted for by the equity method			
Fiat S.p.A. (ordinary shares)	**2,619.4**	2,020.0	599.4
Fiat S.p.A. (preferred shares)	**231.1**	122.9	108.2
	2,850.5	2,142.9	707.6
Ifil Investissements S.A.	**641.5**	641.5	0.0
Alpitour S.p.A.	**100.0**	0.0	100.0
Ifil Investment Holding N.V.	**68.3**	68.3	0.0
Juventus Football Club S.p.A.	**11.3**	11.3	0.0
Soiem S.p.A.	**10.0**	10.0	0.0
Ifil New Business S.r.l.	**-**	-	-
	3,681.6	2,874.0	807.6
Investments available-for-sale			
Sanpaolo IMI S.p.A. (ordinary shares) (a)	**1,640.3**	1,228.6	411.7
Total investments	**5,321.9**	4,102.6	1,219.3

(a) Measured at fair value on the basis of the market price at the end of the year, with recognition of the unrealized gains or losses in equity.

The increase of € 1,219.3 million in the carrying amount of the investments is due to the following movements:

€ in millions	
Investments at December 31, 2005	**4,102.6**
Purchase of 4,254,000 Fiat ordinary shares (0.39% of the class of stock)	62.3
Purchase of 100% of the capital stock of Alpitour (from Ifil Investissements)	100.0
Impairment reversals on:	
- Fiat ordinary shares	537.1
- Fiat preferred shares	108.2
Fair value adjustment to the investment in Sanpaolo IMI	411.7
Change during the year	**1,219.3**
Investments at December 31, 2006	**5,321.9**

The comparison between carrying amounts and market prices of listed investments is as follows:

	Number of shares held	Carrying amount		Market price at			
				December 29, 2006		March 23, 2007	
		Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)
Fiat S.p.A. (ordinary shares)	332,587,447	7.88	**2,619.4**	14.42	**4,797.6**	19.00	**6,320.8**
Fiat S.p.A. (preferred shares)	31,082,500	7.44	**231.1**	12.06	**374.8**	16.44	**510.9**
			2,850.5		**5,172.4**		**6,831.7**
Sanpaolo IMI S.p.A. (ord. sh.)	93,071,000	17.62	**1,640.3**	17.62	**1,640.3**	5.72	**1,656.9** (a)
Juventus Football Club S.p.A.	72,560,500	0.16	**11.3**	1.76	**128.0**	1.89	**137.1**
Total			**4,502.1**		**6,940.7**		**8,625.7**

(a) This refers to the valuation of 289,916,165 Intesa Sanpaolo S.p.A. shares.

7. Equity

At December 31, 2006, equity is equal to € 4,587.5 million (€ 3,678.5 million at December 31, 2005). The positive change of € 909 million is due to the following movements:

€ in millions	
Equity at December 31, 2005	**3,678.5**
Dividends paid out	(85.8)
Change in fair value of investments and securities	362.5
Sale of treasury stock for stock options exercised	5.3
Other net changes	1.7
Profit for the year 2006	625.3
Net change during the year	**909.0**
Equity at December 31, 2006	**4,587.5**

8. Net financial position

Details are as follows:

€ in millions	**12/31/2006**	12/31/2005	Change
Cash and cash equivalents	**0.3**	0.2	0.1
Other financial assets, current and non-current	**2.3**	0.9	1.4
Non-convertible bonds	**(199.2)**	(99.8)	(99.4)
Bank debt	**(274.7)**	(348.6)	73.9
Debt with related parties	**(208.9)**	0.0	(208.9)
Current other financial liabilities	**(1.4)**	(1.2)	(0.2)
Net financial position	**(681.6)**	(448.5)	(233.1)

The negative change of € 233.1 million in 2006 is due to the following cash flows:

€ in millions	
Net financial position at December 31, 2005	**(448.5)**
Dividends collected from Sanpaolo IMI	53.0
Dividends paid out	(85.8)
Net financial expenses	(19.4)
Net general expenses	(20.1)
Sale of 1,382,780 ordinary shares of treasury stock for stock options exercised	5.3
Sale of 18,914,511 Fiat ordinary share warrants	1.8
Purchase of 100% of capital stock of Alpitour (from Ifil Investissements)	(100.0)
Purchase of 4,254,000 Fiat ordinary shares	(62.3)
Other net changes	(5.6)
Net change during the year	**(233.1)**
Net financial position at December 31, 2006	**(681.6)**

9. Reconciliation between the data of the separate financial statements of IFIL S.p.A. and the consolidated financial statements of the Group

The following reconciliation of the profit for the year and the equity in the separate financial statements of IFIL S.p.A. for the year ended December 31, 2006 and the corresponding figures in the consolidated financial statements of the IFIL Group at the same date are presented as required by Consob Communication 6064293 dated July 28, 2006.

€ in millions	**Profit**	**Equity**
Separate financial statements of IFIL S.p.A.	**625**	**4.587**
Difference between the carrying amounts of investments and corresponding equity at the end of the prior year		**1.508**
Net balance between the changes during the year in the equity of consolidated companies and companies accounted for by the equity method (excluding the result)		**411**
Share of the profit (loss) of consolidated companies and companies accounted for by the equity method, net of consolidation adjustments (a)	**514**	**514**
Elimination of dividends collected from consolidated companies and companies accounted for by the equity method	**(185)**	**(185)**
Elimination of impairment losses and reversals on consolidated investments and companies accounted for by the equity method	**(620)**	**(620)**
Other consolidation adjustments	**7**	**7**
Consolidated financial statements of the IFIL Group (attributable to the equity holders of the company)	**341**	**6.222**

(a) Consolidation adjustments amount to € 514 million and refer to the elimination of gains generated by intragroup transactions on investments and the diluting effect of the reduction in the stake held in Sequana Capital.

IFIL GROUP – REVIEW OF THE CONDENSED CONSOLIDATED RESULTS

IFIL holds some important investments through Dutch and Luxembourg subsidiaries and controls two companies incorporated under Irish law (operating with the aim of optimizing the management of the financial resources of the Group), Soiem (a service company), as well as two companies contributing to investment activities (Ifil USA and Ifil Asia). The aggregate of these companies constitutes the so-called “Holdings System”.

In order to facilitate the analysis of the equity and financial position and the results of operations of the Group, it is IFIL's practice to present condensed financial statements (balance sheet and income statement) for the period prepared by applying the “condensed” consolidation criteria. Such condensed consolidated financial statements are presented along with the annual consolidated financial statements and the interim consolidated financial statements for the first-half of each year. The quarterly consolidated data is also presented in the condensed format in the quarterly reports at March 31 and September 30 of each year.

In the preparation of the condensed consolidated balance sheet and income statement, the financial statements or accounting data drawn up in accordance with IFRS by the parent and by the subsidiaries in the “Holdings System” are consolidated line-by-line; the investments in the operating subsidiaries and associates (Fiat, Sequana Capital, Alpitour, Juventus Football Club and Turismo&Immobiliare) are accounted for by the equity method, always on the basis of their financial statements or accounting data prepared in accordance with IFRS.

The following table shows the consolidation and valuation methods used for investments.

	% holding in capital stock outstanding	
	12/31/2006	12/31/2005
Subsidiaries of the “ Holdings System” consolidated line-by-line

(a) Dormant company.
(b) Based on the market price at the end of the year with the unrealized gain or loss recognized in equity.

The following tables present the condensed consolidated income statement and balance sheet and comments on the most important items.

IFIL GROUP – Condensed consolidated income statement

The consolidated profit attributable to the equity holders of the company for the year 2006 is € 341.5 million. This is a reduction of € 748.5 million compared to the profit reported for the year 2005 (€ 1,090 million) which, however, had included significant nonrecurring income realized directly (the gain of € 459.1 million realized on the sale of the investment in La Rinascente) and through the Fiat Group (€ 482.7 million at the IFIL level) and the Sequana Capital Group (€ 266 million at the IFIL level).

1. Share of the profit (loss) of companies accounted for by the equity method

The share of the profit (loss) of companies accounted for by the equity method is € 293.2 million (€ 622 million in 2005). The negative change of € 328.8 million is primarily due to lower contributions by the Sequana Capital Group (-€ 199.4 million) and the Fiat Group (-€ 144.4 million) which, as mentioned previously, included significant net nonrecurring income in 2005.

	Profit (loss)		IFIL' share		
€ in millions	**2006**	2005	**2006**	2005	Change
Fiat Group	**1,065.0**	1,331.0	**304.6**	373.8	(69.2)
Consolidation adjustments			**(15.4)** (a)	59.8 (b)	(75.2)

Sequana Capital Group	**958.0**	348.1	**504.2**	183.7	320.5
Consolidation adjustments			**(494.1)** (c)	25.8 (d)	(519.9)
Total Sequana Capital Group			**10.1**	209.5	(199.4)
Alpitour Group	**3.0** (e)	(10.7) (e)	**3.0**	(10.7)	13.7
Juventus Football Club S.p.A.	**(14.7)** (f)	(16.7) (f)	**(8.8)**	(10.0)	1.2
Other			**(0.3)**	(0.4)	0.1
Total			**293.2**	622.0	(328.8)

(a) Mainly for the assignment of preferred dividends for the years 2004, 2005 and 2006 to minority stockholders.
(b) Of which € 54.8 million is due to the excess of the increases of IFIL's share of the consolidated equity of the Fiat Group deriving from the Fiat capital stock increase subscribed to by minority stockholders (+€ 605.4 million) and the increase in the percentage of consolidation, equal to 0.54% (+€ 29.2 million), compared to the costs incurred for the purchase of 87,500,000 Fiat ordinary shares (-€ 580.2 million), net of the sale of the rights on the ordinary and preferred shares (+€ 0.4 million).
(c) For the elimination of the after-tax gain deriving from the Sequana Capital/SGS Exchange and Purchase Offering (-€ 465.8 million) and for the diluting effect of the reduction in the percentage of ownership (-€ 28.3 million).
(d) Adjustment of the gain on the sale of the investment in Permal Group, due to the different carrying amount in IFIL.
(e) Data for the period November 1 – October 31.
(f) Data for the period January 1 – December 31 prepared for the purposes of consolidation in IFIL.

For a review of the performance of the major holdings reference should be made to the specific section of this report.

2. Dividends from investments

Dividends from investments in 2006 amount to € 53 million and were entirely collected from Sanpaolo IMI (€ 43.7 million in 2005).

3. Other non-current income (expenses)

Other non-current income (expenses) include the accrual for the administrative sanction of € 4.5 million levied on the company by Consob in relation to the content of the press release dated August 24, 2005, the cost of € 3.1 million referring to the current year for the stock option plan approved for management of the subsidiary Alpitour, as well as the release of the provision set aside in prior years for the Alpitour stock option plan 2000 which was not exercised by the expiration date of August 31, 2006 (+€ 7.8 million).

In 2005, the amount included extraordinary compensation approved for the chairman (€ 15 million) and former chief executive officer (€ 3.8 million) of IFIL S.p.A. and the expenses for that year (€ 1.7 million) relating to the stock option plans with underlying IFIL stock which expired in 2006.

4. Investments accounted for by the equity method

Details are as follows:

€ in millions	Carrying amount at **12/31/2006**	 12/31/2005	Change
Fiat Group	**2,610.6**	2,335.7	274.9
Sequana Capital Group	**588.8**	1,140.9	(552.1)
Alpitour Group	**70.4**	69.9	0.5
Juventus Football Club S.p.A.	**17.7**	26.6	(8.9)
Turismo&Immobiliare S.p.A.	**4.3**	3.7	0.6
Total	**3,291.8**	3,576.8	(285.0)

The decrease in the investment in the Sequana Capital Group can be ascribed to the Public Exchange and Purchase Offer and the consequent reduction in capital stock carried out in 2006.

5. Other non-current financial assets

Details are as follows:

€ in millions	Carrying amount at **12/31/2006**	 12/31/2005	Change
Other investments			
Sanpaolo IMI S.p.A.	**1,640.3**	1,228.6	411.7
SGS S.A.	**870.0**	0.0	870.0
Gruppo Banca Leonardo S.p.A.	**47.0**	0.0	47.0
Subsidiaries of the "Holdings System" in liquidation and others	**1.0**	1.1	(0.1)
Securities			
Ocean Club Méditerranée bonds	**5.0**	4.8	0.2
Fiat ordinary share warrants 2007 (a)	**0.0**	3.5	(3.5)
Sundry	**0.2**	0.3	(0.1)
Total other non-current financial assets	**2,563.5**	1,238.3	1,325.2

(a) Sold in 2006.

The investment in SGS S.A. (13.16% of capital stock) was initially recorded at the carrying amount at which the investment had been recognized in the consolidated financial statements of the Sequana Capital Group before the Public Exchange and Purchase Offer, equal to € 361.6 million, and was classified in "investments available-for-sale". At December 31, 2006, the investment was measured at fair value on the basis of the stock market price at the end of the year and the unrealized gain (€ 508.4 million) was recognized in equity.

The original purchase cost of the investment in Sanpaolo IMI is € 883.4 million. In the years 2005 and 2006, the overall fair value adjustment to the investment totals € 756.9 million.

6. Comparison between carrying amounts and market prices of listed investments and other listed financial assets

Details are as follows:

				Market price at			
	Number of	Carrying amount		December 29, 2006		March 23, 2007

7. Equity attributable to the equity holders of the company

Details are as follows:

€ in millions	12/31/2006	12/31/2005	Change
Capital and reserves	**6,270.8**	5,238.1	1,032.7
Treasury stock	**(48.5)**	(52.1)	3.6
Total	**6,222.3**	5,186.0	1,036.3

The changes during the year are analyzed as follows:

€ in millions	
Equity attributable to the equity holders of the company at December 31, 2005	**5,186.0**
Fair value adjustment of the investment in Sanpaolo IMI (+€ 411.7 million, net of -€ 48.2 million of deferred taxes) and the investment in SGS (+€ 508.4 million)	871.9
Share of translation differences (-€ 140.7 million) and other net changes (+€ 49.3 million) shown in the equity of the companies accounted for by the equity method	(91.4)
Dividends paid out by IFIL S.p.A.	(85.7) (a)
Profit attributable to the equity holders of the company	341.5
Net change during the year	**1,036.3**
Equity attributable to the equity holders of the company at December 31, 2006	**6,222.3**

(a) Net of € 0.1 million of intragroup dividends.

At December 31, 2006, IFIL S.p.A. holds, directly and indirectly, the following treasury stock:

	Number of IFIL	% of class	% of capital	Amount	
	ordinary shares	of stock	stock	Per share (€)	Total (€ ml)
Held by IFIL S.p.A.	12,402,998	1.19	1.15	3.68	45.7
Held by the subsidiary Soiem S.p.A.	810,262	0.08	0.08	3.41	2.8
Balance at December 31, 2006	**13,213,260**	**1.27**	**1.23**	**3.67**	**48.5**

As a result of the exercise of the options granted in prior years, in 2006, 1,382,780 IFIL ordinary shares were sold to the grantees of stock option plans for net proceeds of

€ 5.3 million and a gain of € 1.7 million which was recognized directly as an increase in equity.
Additional information is provided in Note 16 to the separate financial statements.

8. Consolidated net financial position of the "Holdings System"

The consolidated net financial position of the "Holdings System" at December 31, 2006 is a cash position of € 386.2 million. This is an increase of € 37.9 million compared to the cash position at the end of 2005 (€ 348.3 million).
The consolidated net financial position of the "Holdings System" is composed as follows:

	12/31/2006			12/31/2005		
€ in millions	**Current**	**Non-current**	**Total**	Current	Non-current	Total
Financial assets	**857.1**	**0.2**	**857.3**	793.3	0.3	793.6
Cash and cash equivalents	**5.7**	**0.0**	**5.7**	4.2	0.0	4.2
Total financial assets	**862.8**	**0.2**	**863.0**	797.5	0.3	797.8
Bonds	**0.0**	**(199.2)**	**(199.2)**	(99.8)	0.0	(99.8)
Bank and other debt	**(277.6)**	**0.0**	**(277.6)**	(349.7)	0.0	(349.7)
Total financial liabilities	**(277.6)**	**(199.2)**	**(476.8)**	(449.5)	0.0	(449.5)
Consolidated net financial position of the "Holdings System"	**585.2**	**(199.0)**	**386.2**	348.0	0.3	348.3

Current financial assets amount to € 857.1 million (€ 793.3 million at the end of 2005) and principally include investments in time deposits, in bonds and in other short-term financial instruments.

The positive change of € 37.9 million during the year is due to the following flows:

€ in millions		
Consolidated net financial position of the "Holdings System" at December 31, 2005		**348.3**
Dividends collected from:		
- Sequana Capital	184.5	
- Sanpaolo IMI	53.0	
		237.5
Dividends paid out by IFIL S.p.A.		(85.7) (a)
Investment made in Gruppo Banca Leonardo S.p.A. (9.6% of capital stock)		(47.0) (b)
Investment made in Fiat ordinary shares (0.39% of class of stock)		(62.3)
Other net changes:		
- Other net financial income (expenses)	19.2	
- Net general expenses	(23.2)	
- Other changes	(0.6)	
		(4.6)
Net change during the year		**37.9**
Consolidated net financial position of the "Holdings System" at December 31, 2006		**386.2**

(a) Net of € 0.1 million of intragroup dividends.
(b) Includes transaction costs of € 0.4 million.

At December 31, 2006 IFIL S.p.A. has irrevocable credit lines for € 830 million, of which € 420 million is due by December 31, 2007 and € 410 million at later expiration dates.

The rating assigned by Standard & Poor's to IFIL's long-term debt is “BBB+”, whereas the rating on short-term debt is “A-2”, both with a stable outlook.

9. Reconciliation between the consolidated net financial position of the “Holdings System” and under line-by-line consolidation

€ in millions	**12/31/2006**	12/31/2005	Change
Consolidated net financial position - Holdings System	**386**	348	38
Net financial debt of the companies consolidated line-by-line:			
- Sequana Capital Group	**(380)**	(441)	61
- Alpitour Group	**(29)**	(78)	49
- Juventus Football Club S.p.A.	**(75)**	(38)	(37)
Consolidated net financial position - line-by-line consolidation	**(98)**	(209)	111

The composition of the consolidated net financial position – line-by-line consolidation is presented in Note 27 to the consolidated financial statements of the IFIL Group.

10. Reconciliation between the condensed consolidated financial statements and the IFIL Group consolidated financial statements prepared in accordance with IFRS

The following table presents a reconciliation between the condensed consolidated financial statements and the IFIL Group consolidated financial statements prepared in accordance with IFRS.

The first column (“Condensed consolidation”) presents the data that has been commented on in the preceding pages reclassified according to the consolidated financial statement format.

The second column (“Eliminations”) shows the adjustments necessary to reverse the carrying amount of the investments accounted for in the condensed financial statements by the equity method and the share of the results of these investments in order to arrive at the line-by-line consolidation of the respective financial statements, adjusted, if necessary, to conform with Group principles, which are shown in the next columns.

There are no key managers with strategic responsibilities in IFIL S.p.A.

Management and coordination

IFIL Investments S.p.A. is not subject to management and coordination on the part of companies or entities.

In accordance with art. 2497 bis of the Italian Civil Code, the subsidiaries Soiem S.p.A. and Ifil New Business S.r.l. have identified IFIL Investments S.p.A. as the company which exercises management and coordination.

Programming document on security

The company has prepared the programming document on security on December 14, 2006 for the year 2006 according to the provisions of Legislative Decree 196 dated June 30, 2003, attachment B – technical specifications regarding minimum safety measures. The document has been drawn up by the person in charge of the treatment of the data.

REVIEW OF THE OPERATING PERFORMANCE OF THE MAJOR HOLDINGS

FIAT GROUP

(30.45% of ordinary capital stock and 30.09% of preferred capital stock)

The consolidated results of the Fiat Group in 2006 can be summarized as follows:

€ in millions	**2006**	2005	Change Amount	Change %
Net revenues	**51,832**	46,544	5,288	11.4
Trading profit	**1,951**	1,000	951	95.1
Operating result	**2,061**	2,215	(154)	-7.0
Net result	**1,151**	1,420	(269)	-18.9
Net result attributable to the equity holders of the parent	**1,065**	1,331	(266)	-20.0

€ in millions	**12/31/2006**	12/31/2005	Change
Total Assets	**58,303**	62,454	(4,151)
Net debt	**(11,836)**	(18,523)	6,687
Consolidated net financial position	**(231)**	(2,550)	2,319
Group interest in stockholders' equity	**9,362**	8,681	681
Employees at year-end (number)	**172,012**	173,695	(1,683)

The Fiat Group records **Net revenues** of € 51,832 million in 2006, up 11.4% from 2005 (€ 46,544 million). The improvement is largely attributable to Fiat Auto and Iveco. Revenues also rose at CNH and at the Components & Production Systems business area. The following table illustrates the components of net revenues broken down by Sector:

€ in millions	**2006**	2005	Change %
Automobiles (Fiat Auto, Maserati, Ferrari)	**25,577**	21,275	20.2
Agricultural and Construction Equipment (CNH)	**10,527**	10,212	3.1
Trucks and Commercial Vehicles (Iveco)	**9,136**	8,483	7.7
Components and Production Systems (FPT, Magneti Marelli, Teksid, Comau)	**12,366**	10,727	n.s.
Other businesses (Services, Publishing and Communications, Holding Companies and other Companies)	**1,581**	1,618	-2.3
Eliminations	**(7,355)**	(5,771)	n.s.
Net revenues	**51,832**	46,544	11.4

In 2006, the **Trading profit** amounts to € 1,951 million nearly doubling the € 1,000 million level recorded in 2005, (3.8% of revenues in 2006 compared to 2.1% in 2005). Significant improvements were achieved in the Automobiles business area (+€ 650 million, of which € 572 million at Fiat Auto) and by Iveco (+€ 214 million). Only the Components & Production Systems business area reports slightly lower trading profit, reflecting a sharp drop at Comau. The following table illustrates the components of trading profit broken down by Sector:

€ in millions	2006	2005	Change Amount
Automobiles (Fiat Auto, Maserati, Ferrari)	**441**	(209)	650
Agricultural and Construction Equipment (CNH)	**737**	698	39
Trucks and Commercial Vehicles (Iveco)	**546**	332	214
Components and Production Systems (FPT, Magneti Marelli, Teksid, Comau)	**348**	358	(10)
Other businesses (Services, Publishing and Communications, Holding Companies and other Companies)	**(121)**	(179)	58
Trading profit	**1,951**	1,000	951

In 2006, the **Operating result** is positive by € 2,061 million compared with an operating income of € 2,215 million in 2005. The € 154 million decrease reflects lower net unusual income (gains on disposals of investments, restructuring charges and other unusual income and expenses) of € 1,105 million (€ 110 million in 2006 and € 1,215 million in 2005) versus an improvement in trading profit of € 951 million.

In 2006, gains on disposal of investments totaled € 607 million and were in part offset by restructuring charges of € 450 million and the unusual expenses of € 47 million.

In 2005, unusual items included the gain on disposal of investments of € 905 million, restructuring charges of € 502 million and unusual income of € 812 million.

The following table illustrates the components of operating result broken down by Sector:

	Trading profit		Gains/Losses on the disposal of investments		Restructuring costs		Other unusual income (expenses)		Operating result	
€ in millions	**2006**	2005	**2006**	2005	**2006**	2005	**2006**	2005	**2006**	2005
Fiat Auto	**291**	(281)	**461**		**9**	162	**(16)**	(375)	**727**	(818)
Maserati	**(33)**	(85)	**-**	-	**-**	-	**-**	-	**(33)**	(85)
Ferrari	**183**	157	**-**	-	**-**	-	**-**	-	**183**	157
Agricultural and Construction Equipment (CNH)	**737**	698	**-**	-	**145**	87	**-**	-	**592**	611
Trucks and Commercial Vehicles (Iveco)	**546**	332	**25**	(10)	**6**	99	**-**	(11)	**565**	212

Components (Magneti Marelli)	**190**	162	**-**	-	**16**	33	**1**	(2)	**175**	127
Metallurgial Products (Teksid)	**56**	45	**(29)**	5	**4**	14	**3**	(9)	**26**	27
Production Systems (Comau)	**(66)**	42	**(1)**	(1)	**179**	46	**(26)**	(3)	**(272)**	(8)
Services (Business Solutions)	**37**	35	**3**	9	**12**	22	**-**	(15)	**28**	7
Publishing and Communications (Itedi)	**11**	16	**1**	-	**-**	2	**-**	(1)	**12**	13
Holding companies, Other companies and Eliminations	**(169)**	(230)	**147**	902	**19**	17	**(3)**	1,236	**(44)**	1,891
Total for the Group	**1,951**	1,000	**607**	905	**450**	502	**(47)**	812	**2,061**	2,215

In 2006, Net gains on the disposal of investments, equal to € 607 million, include among others the gain of € 463 million resulting from the sale, within the framework of the agreement with Crédit Agricole, of 50% of Fiat Auto Financial Services, the joint venture that handles Fiat Auto's main financing activities in Europe, as well as the gain on the sale of Banca Unione di Credito – B.U.C. (€ 80 million). The gain of € 905 million recorded in 2005 included the gain (€ 878 million) from the sale of the investment in Italenergia Bis to Electricité de France and the gain realized upon the sale of Palazzo Grassi S.p.A. (€ 23 million).

In 2006, Other unusual income (expenses) is negative by € 47 million, of which € 26 million attributable to the impairment of the goodwill of certain European companies of Comau and € 17 million due to the reorganization and rationalization of relationships with Group suppliers.
In 2005, this item was positive by € 812 million and included, among others, the gain from the termination of the Master Agreement with General Motors for € 1,134 million (net of accessory costs).

The **Net Result** is € 1,151 million in 2006, versus € 1,420 million in 2005. Excluding the impact of net unusual items (including unusual financial income of € 858 million resulting from the capital increase of September 20, 2005 with the simultaneous conversion of the Mandatory Convertible Facility with the income representing the difference between the subscription price of the shares and their stock market price at the date of subscription), the Group would have posted a net loss of € 376 million in 2005 and a net income of € 1,041 million in 2006. Therefore, on a comparable basis, net income improved by € 1,417 million.

In 2006, the portion of the **Net result attributable to the equity holders of the parent** is positive by € 1,065 million, against € 1,331 million in 2005.

As for equity and financial aspects:

The **Group interest in stockholders' equity** at December 31, 2006, amounts to € 9,362 million (€ 8,681 million at the end of 2005). The net increase of € 681 million is formed by the consolidated net income attributable to the equity holders of the parent (+€ 1,065 million), the net change in the income and expenses recognized in equity (-€ 385 million) and other net changes (+€ 1 million).

At December 31, 2006, consolidated **Net debt** amounts to € 11,836 million, € 6,687 million less than the € 18,523 million at December 31, 2005. The composition is as follows:

€ in millions	**12/31/2006**	12/31/2005
Net debt of Industrial Activities	**(1,773)**	(3,219)
Net debt of Financial Services	**(10,063)**	(15,304)
Total Net debt	**(11,836)**	(18,523)

At December 31, 2006, the **consolidated net financial position** is a negative € 231 million (a negative € 2,550 million at December 31, 2005).
The difference between the net debt balance (-€ 11,836 million) and the consolidated net financial position (-€ 231 million) is attributable to the amount of current financial receivables of € 11,605 million.

The most significant transactions completed by the Fiat Group during early 2007 are set out below:

On January 26, 2007, Fitch Ratings announced that it upgraded Fiat's rating to “BB” from “BB-”, reaffirming the short-term rating to “B” and maintaining the outlook “positive”. Standard & Poor's Ratings Services revised its outlook on Fiat rating to “positive” from “stable”, affirming the “BB” long-term and “B” short-term corporate credit ratings. On February 12, 2007, Moody's Investors Service upgraded to Ba2 from Ba3 Fiat rating maintaining the “positive” outlook. The short-term rating remains unchanged.

On February 1, 2007 Fiat Auto changed name to “Fiat Group Automobiles S.p.A.”.
Four new companies were formed at the same time, 100% owned by Fiat Group Automobiles S.p.A.: “Fiat Automobiles S.p.A.”, “Alfa Romeo Automobiles S.p.A.”, “Lancia Automobiles S.p.A.” and “Fiat Light Commercial Vehicles S.p.A.”.
These changes are consistent with the new corporate culture at the Fiat Group. In particular, they reflect two strategic decisions as to how to approach the business. On the one hand, the Group will exist as a unified whole, and on the other hand, each company will be characterized by the specific nature of the respective operating sectors and individual brands.
Over the next few months, all Group activities will highlight this aspect by pairing the “Fiat Group” mark with the sector or brand trademark.

On February 14, 2007, Fiat and Tata Motors signed an agreement which calls for a Tata license to build a pick-up vehicle bearing the Fiat nameplate at Fiat Group Automobiles' plant in Córdoba, Argentina. The first vehicles will roll off the Córdoba assembly lines during 2008. Annual production is slated at around 20,000 units. Total planned investment in the project is around $ 80 million. With the production of the pick-up model, the Fiat complex in Córdoba will retake the integral activity of all its productive units, to a greater extent reinitiated with the manufacture of Fiat engines and gearboxes and the recent agreement to produce gearboxes for PSA Peugeot-Citroën. The pick-up, based on the new generation Tata pick-up truck, will be sold in South and Central America and select European markets through Fiat Automobiles' distribution and importer network. This will permit the Fiat brand to aggressively enter the medium pick-up sector, thanks to Tata Motors' specific know-how.

On February 14, 2007, Iveco and Tata Motors announced the signing of a Memorandum of Understanding (MoU) to analyze the feasibility of cooperation, across markets, in the area of Commercial Vehicles. The MoU encompasses a number of potential developments in engineering, manufacturing, sourcing and distribution of products, aggregates and components. Shortly after the MoU signature, Iveco and Tata Motors will set up a joint Steering Committee to determine the feasibility of cooperation, both in the short and over the long term. When found feasible, the two companies will enter into definitive agreements in the course of the coming months.

A meeting was held on February 19, 2007 at the Italian Prime Minister's office, with the participation of the Prime Minister, the Ministers of Labor and Transport, and the Vice Minister for Economic Development, as well as national labor federation and industry representatives. The Chief Executive Officer Sergio Marchionne illustrated the Group's development plans for 2007-2010, with special attention being devoted to the situation in Italy. The meeting concluded with the signing of a transcript in which the Italian Government affirmed its willingness to support the company's development plans. In particular, this would involve close assessment of initiatives taken in support of investments and research, and recognize the existence of conditions for granting the Fiat Group a quota for “mobilità lunga” (long-term mobility benefit to bridge the period prior to retirement). This amount was defined in the December 18, 2006 labor agreement, which envisages that a maximum of 2,000 Group employees will be laid off. The meeting transcript also envisages setting up a round table with the participation of local institutions to examine the measures necessary to overcome logistical and economic restraints at the Termini Imerese plant in Sicily, so that production of a model can be allocated to it starting from 2009.

SEQUANA CAPITAL

(48.88% of capital stock through Ifil Investissements)

In September 2006, Sequana Capital commenced an in-depth review of its strategy and after concluding the Public Purchase and Exchange Offering on SGS stock, the company became a diversified industrial paper group which operates through two wholly-owned subsidiaries:

- Arjowiggins, the world leader in the manufacture of paper products, present in 82 countries with 7,800 employees, 30 production sites and 3 research centers. Arjowiggins is organized into three divisions: Graphic Arts, Communications and Special Papers.

- Antalis, the most important European group in B to B distribution of paper products for printing and writing, present in 36 countries with 6,000 employees and 73 distribution centers servicing 180,000 customers. Antalis is organized into four divisions: Print & Office, Communications, Industrial Packaging and Promotional Products.

The highlights of the consolidated results of the Sequana Capital Group in 2006 are as follows:

			Change	
€ in millions	**2006**	2005	Amount	%
Net sales	**3,979**	3,998	(19)	-0.5
Gross operating profit	**187**	219	(32)	-14.6
Trading profit	**93**	112	(19)	-17.0
Profit attributable to the equity holders of the company	**958**	348	610	175.3
Equity attributable to the equity holders of the company	**1,233**	2,190	(957)	-43.7
Net indebtedness	**380**	433	(53)	-12.2

With the scenario of the sector still disappointing owing to the persisting excess production capacity, higher energy and raw material costs and continuous pressure on sales prices, Sequana Capital reports sales in 2006 of € 3,979 million, a figure basically in line with that of 2005 (€ 3,998 million). The group was partially able to compensate the market weakness with an increase in the prices of certain products and with better volumes in high-growth regions or sectors.

The gross operating profit in 2006 amounts to € 187 million (compared to € 219 million in the prior year), equal to a 4.7% margin.
The profit attributable to the equity holders of the company in 2006 rose to € 958 million compared to € 348 million in 2005. This increase is principally due to the net gain of € 889 million realized on the distribution of SGS shares to the stockholders following the Public Purchase and Exchange Offer in the last quarter of 2006. The offer involved a significant reduction in capital stock (54%).

The equity attributable to the equity holders of the company went from € 2,190 million to € 1,233 million at December 31, 2006 while net indebtedness decreased from € 433 million to € 380 million. Despite the distribution of dividends of € 350 million in the first half of 2006, net indebtedness decreased due to a more attentive management of the working capital of the group companies and other transactions including the sale of Legg Mason securities deriving from the sale of Permal in 2005.

With regard to the performance of the subsidiaries:

- Antalis records gross operating profit of € 69 million and operating income of € 53 million which is in line with the prior year. Antalis improved its financial structure as a result of a more efficient management of working capital and the sale of one of its deposits for a total of € 103 million, contributing to a € 62 million reduction in its debt. Finally, the company continues to pursue its focused policy of acquisitions in Chile and in the industrial packaging sector.

- Arjowiggins records gross operating profit of € 142 million and operating income of € 64 million (€ 71 million in 2005): the reduction in margins is mainly due to difficulties at the Graphic Arts division. Arjowiggins has nevertheless generated satisfactory operating cash flows (+€ 106 million) partly as a result of a further effort to bring down net working capital. The company commenced a development plan founded on five main goals: expanding in regions with potential growth, focusing R&D activities on customers' needs, reorganizing sales, setting up new procedures aimed at generating cost savings throughout the group and achieving the leadership position in each of its activities.

The board of directors meeting held on March 21, 2007 voted to put forward a motion to the stockholders' meeting called for May 11, 2007 to pay dividends of € 0.6 per share.
Ifil Investissements' share of the dividends will amount to approximately € 14.4 million.

INTESA SANPAOLO

(2.45% of ordinary capital stock)

On December 28, 2006, the deed of merger of Sanpaolo IMI S.p.A. in Banca Intesa S.p.A. was signed and became effective for legal purposes on January 1, 2007.

A summary of the consolidated results of the Sanpaolo IMI Group for 2006 is presented below followed by some of the main indicators of the proforma results for the year 2006 of the Intesa Sanpaolo Group.

The Sanpaolo IMI Group closed the year 2006 with a consolidated net profit of € 2,148 million, up 8.3% compared to 2005.

Total operating income is € 9,098 million, an increase of 10.9% compared to the prior year thanks to the positive trend of all components:

- **net interest income** (€ 4,138 million) rose by 9% compared to € 3,798 million in 2005;
- **net commissions**, equal to € 3,389 million (+3.2%), were mainly driven by the growth in management, dealing and advisory services (+6.1%) and also asset management (+7.5%), which represented nearly 60% of total commissions;
- **dividends and income from other financial assets and liabilities**, up from 2005, total € 889 million due to the gain of € 228 million on the sale of Ixis Asset Management Group and Ixis Corporate & Investment Bank while **profits on equity shareholdings** total € 128 million (+23.1%);
- the good performance of the life insurance branch is reflected on the **income from the insurance business,** referring to the subholding company Eurizon, reaching € 469 million (+8.8%) thanks mainly to the improved results of financial management and the changes in asset allocation and investment strategies.

Net operating income is € 8,585 million (+11.4%), benefiting from the reduction in adjustments to loans and other financial assets.
Doubtful loans decreased on a comparable consolidation basis by 8.5%.

Pre-tax operating profit amounts to € 3,590 million (+21.5%), after the net increase of 5.2% in **operating costs** (€ 4,898 million).
The cost/income ratio is down from 56.8% to 53.8%.

Shareholders' equity of the Group amounts to € 14,338 million at the end of the year (€ 13,483 million at December 31, 2005).

Loans to customers net of adjustments total € 158 billion at December 31, 2006 (+10.2% on a comparable consolidation basis) and **customer financial assets** amount to € 446 billion (+9.2% on a comparable consolidation basis).

A summary of some of the main indicators of the Sanpaolo IMI Group for the year 2006 are as follows.

			Change	
€ in millions	**2006**	2005	Amount	%
Net interest income	**4,138**	3,798	340	9.0
Net operating income	**8,585**	7,708	877	11.4
Pre-tax operating profit	**3,590**	2,954	636	21.5
Net profit – Group	**2,148**	1,983	165	8.3
Shareholders' equity – Group	**14,338**	13,483	855	6.3
Branches and representative offices (Italy and abroad)	**3,682**	3,308	374	11.3
Employees (number)	**49,862**	43,666	6,196	14.2

As regards the main proforma aggregate figures for 2006, the **Intesa Sanpaolo Group** registers **net operating income** of € 18,405 million, mainly due to net interest income of € 9,127 million and net fee and commission income of € 6,574 million.

Operating costs amount to € 9,673 million, of which € 5,630 million refers to personnel expenses, € 3,156 million to administrative expenses and € 887 million to adjustments for amortization and depreciation.

The **operating margin** is € 8,732 million, with a cost/income ratio of 52.6%.

Proforma net income amounts to € 4,056 million (€ 4,618 million excluding the integration charges relating to the merger).

At December 31, 2006, the Intesa Sanpaolo Group presents, in proforma terms, **total assets** of € 576,784 million, **loans to customers** of € 327,410 million and **direct customer deposits** of € 343,899 million.

Proforma **shareholders' equity** amounts to € 55,971 million; proforma capital ratios at December 31, 2006 are: Core Tier 1 ratio at 8%, Tier 1 ratio at 8.8% and total capital ratio at 11.9%.

At December 31, 2006 the **operating structure** of the Intesa Sanpaolo Group, in proforma terms, was made up of 6,989 branches – of which 5,789 in Italy and 1,200 abroad – with about 100,000 employees.

The Management Board and the Supervisory Board of Intesa Sanpaolo on April 14, 2007 will approve the 2007-2009 Business Plan and will formulate the motion for the appropriation of the net income for the year to be submitted for approval to the ordinary shareholders' meeting to be held on April 30, 2007 or, in second call, on May 3, 2007.

(13.74% of capital stock through Ifil Investissements)

The highlights of the consolidated results of the SGS Group in 2006 are as follows:

			Change	
CHF in millions	**2006**	2005	Amount	%
Sales	**3,821**	3,308	513	15.5
Operating profit	**624**	502	122	24.3
Profit – Group	**443**	371	72	19.4
Consolidated net financial position	**216**	430	(214)	49.8

During 2006, the SGS Group developed its lines of business to serve new markets and new customers, expanded in size and in terms of the services it offers and further stepped up its geographical presence. This result was achieved through investments and initiatives to support its organic growth and through targeted strategic acquisitions.
The SGS Group now has over 48,000 employees and manages more than 1,000 laboratories and installations throughout the world.

The sales of the Group increased in 2006 to CHF 3.8 billion, gaining 15.5% over the prior year (+13.9% at the same exchange rate). This growth is the result of a favorable market context in all sectors and countries in which the Group operates. The organic growth for the year is equal to 10.3% (at the same exchange rate).

The operating profit rose to CHF 624 million, up CHF 122 million (+24.3%). The operating profit before exceptional items increased to CHF 605 million (a 15.8% margin) with significant gains in the results of the divisions of Consumer Testing, Oil, Gas and Chemicals, Systems & Services Certification and Industrial Services which absorbed the slowdown in the Trade Assurance division.

The profit for the year of the Group rose to CHF 443 million, with an increase of 19.4% over the prior year.

The consolidated net financial position shows a cash position of CHF 216 million at December 31, 2006 and was impacted by the extraordinary distribution of dividends of CHF 50 per share in the first part of the year (payout ratio higher than 100%; total amount paid out equal to CHF 381 million).

On November 29, 2006, Dan Kerpelman tendered his resignation as CEO of the SGS Group. The board of directors then appointed Chris Kirk, previously the head of the Minerals and Environmental Services divisions, as the new chief executive officer.

As for market performance in 2006, SGS stock gained 28% (including dividends).

The forecasts for 2007 follow the positive trend recorded in 2006 and support the Group's goal of reaching earning per share of CHF 80 in the year 2008.

(60% of capital stock)

The following data and comments are taken from the first-half report on the financial year 2006/2007 prepared using IFRS.
Since Juventus F.C.'s financial year ends on June 30 of every year, and in view of the highly seasonal nature typical of this sector, the data presented should not be construed as representing the basis for a full-year projection.

€ in millions	**I Half 2006**	I Half 2005	Change
Operating revenues (a)	**101.5**	109.0	(7.5)
Operating income (loss)	**20.2**	(17.2)	37.4
Net income (loss)	**15.4**	(15.9)	31.3
Shareholders' equity	**29.6** (b)	14.2 (b)	15.4
Net financial position	**(75.1)** (b)	(12.9) (b)	(62.2)

(a) Including income from the management of players' rights.
(b) Data refers to December 31, 2006.

In the first half of the year 2006/2007, Juventus recorded operating revenues of € 101.5 million, down € 7.5 million (-6.9%) compared to the same period of 2005.
This reduction is mainly due to higher income from the management of players' rights for € 34 million net of lower sundry operating revenues (revenues from games, radio and television rights, media income, income from the Champions League and revenues from sponsorships and publicity) for a total of € 46 million.

In view of the above, Juventus commenced a decisive plan to reduce costs, particularly those relating to salaries and amortization of players' rights, which led to the sale of important players (which took place during the first stage of the Transfer Campaign), who hold starting positions on various National Teams. In the first half of 2006, operating costs therefore amounted to € 71.2 million (expenses for the management of players' rights included), with a reduction of € 27.7 million compared to the corresponding period of the prior year. The amortization charge and the writedown of players' rights, instead, totaled € 10 million, a decrease of € 16.5 million compared to the first half of 2005 due to the above-mentioned transactions effected during the 2006/2007 transfer campaign and the early renewal of the contracts of some players.

In addition to the above changes, the net result for the period was affected by net financial expenses of € 2.6 million (+€ 0.4 million compared to the same period of 2005) and the accrual for income taxes for a total of € 3.5 million, of which € 1.6 million is for deferred taxes.

Shareholders' equity at December 31, 2006 amounted to € 29.6 million.

The net financial position at the end of December 2006 is a borrowings position of € 75.1 million (a borrowings position of € 12.9 million at December 31, 2005) and included € 19.1 million relating to the finance lease to cover the investment in the Vinovo Sports Center which was completed in the second quarter of 2006.

On December 15, 2006, at the Vinovo Sports Center, a tragic accident occurred in which two youths on the Berretti youth team lost their lives, Alessio Ferramosca and Riccardo Neri.

In reference to the sports proceedings against Juventus, the ruling issued by the C.O.N.I. Conciliation and Arbitration Board on October 27, 2006 reduced the penalty points imposed on the company from 17 points to 9 points for the current Serie B championship.
The ruling also upheld the revocation of Juventus' title as champion of Italy 2004/2005, the non-recognition of Juventus' title as champion of Italy 2005/2006 and the fine of € 120,000. It also converted the sanction disqualifying the home stadium into the obligation of donating the proceeds from the first three home games of the current season to FIGC, a total of € 194,450.

During September, the negotiations were concluded for the contracts with Sky Italia S.r.l..
The parties modified the payments indicated in the original contracts to take into account the situation which arose as a result of the team's relegation to Serie B, reducing the total payments for the current year from € 94.5 million to € 80.2 million.

Finally, as regards the principal contracts with sponsoring companies, the following should be noted:

- Juventus and Oilinvest B.V. did not come to an agreement over a new sponsorship contract although they came to an amicable understanding that the team would continue to wear the Tamoil brand on their jerseys until the end of the 2006/2007 season; the impact will be lower revenues of € 8 million for the year.

- Nike confirmed its willingness to continue the long-term technical sponsorship contract with Juventus until the original expiration date at the end of 2014/2015 soccer season, renegotiating some clauses in the contract, including the sums involved. This will result in lower revenues of approximately € 4.5 million for the current financial year and another approximate € 4.5 million to be spread over the following eight years of the contract.

- H3G and Juventus renegotiated some clauses of the existing contract until the end of the current season. The negative economic effect of the renegotiation is approximately € 2 million.

(100% of capital stock)

Signs of a recovery in demand marked the year 2005/2006 as the general economy gained strength. This enabled the charter travel market to grow by approximately 1%.
The market, however, is still negatively influenced by an uncertain geopolitical picture, especially in the countries of the Middle East and throughout the Islamic world, which has affected the trend in the demand for Egypt and Tunisia as destinations. Added to this is the effect of Hurricane Wilma at the end of October 2005 which devastated the Gulf of Mexico, particularly the Mayan Riviera, hurting tourist demand in winter 2006 everywhere in the Caribbean area. Demand has also been penalized by air travel costs as a result of the trend in fuel prices.

Highlights of the consolidated financial statements for the year ended October 31, 2006 of the Alpitour Group can be summarized as follows:

			Change	
€ in millions	**2005/2006**	2004/2005	Amount	%
Sales	**1,332.2**	1,146.8	185.4	16.2
Contribution margin	**206.2**	152.6	53.6	35.1
Profit (loss) from ordinary operations	**21.4**	(0.5)	21.9	n.s.
Profit (loss) attributable to the equity holders of the company	**3.0**	(10.7)	13.7	n.s.
Equity attributable to the equity holders of the company	**71.2**	70.2	1.0	1.4
Consolidated net financial position	**(29.1)**	(77.4)	48.3	62.4

Consolidated sales for the year 2005/2006 amount to € 1,332 million with an increase of approximately 16.2% over the prior year. Details of the individual divisions of the Group are presented in the next section.
The contribution margin shows an improvement of € 53.6 million in terms of amount (increasing from € 152.6 million in 2004/2005 to € 206.2 million in 2005/2006) and represents 15.5% of sales (13.3% in the prior year). This positive performance was considerably impacted by lower costs for services as a result of pursuing policies to rationalize direct costs and render them more flexible (reduction of commitments for guarantees) and putting into place sales policies that favor margins partly at the expense of volumes.
The result from ordinary operations is a profit of € 21.4 million from a loss of € 0.5 million in 2004/2005. The improvement is due to the combined effect of a better contribution margin net of higher labor and lease costs relating to the development of the hotel structures and Neos' fleet of aircraft.
The result is a profit attributable to the equity holders of the company of € 3 million, compared to a loss of € 10.7 million reported in the prior year.

Equity attributable to the equity holders of the company went from € 70.2 million last year to € 71.2 million at the end of the year 2005/2006 as a result of the combined effect of economic performance net of translation differences generated on the basis of the exchange rate in effect at the closing date.
The consolidated net financial position is a net borrowings position of € 29.1 million compared to a net borrowings position of € 77.4 million at October 31, 2005. The improvement of € 48.3 million reflects both cash flows generated by operating activities and better working capital, besides the financial effect of the collection of the proceeds of more than € 38 million on the sale of the “El Mandarin” resort.

Consolidated sales by business activity of the Alpitour Group are as follows:

			Change	
€ in millions	**2005/2006**	2004/2005	Amount	%
Tour operating	**900.9**	883.0	17.9	2.0
Incoming	**260.6**	229.3	31.3	13.7
Hotel	**112.4**	96.1	16.3	17.0
Aviation	**155.8**	103.7	52.1	50.2
Distribution	**31.1**	30.2	0.9	3.0
Incentive e Grandi Eventi	**172.1**	45.4	126.7	n.s.
Total	**1,632.9**	1,387.7	245.2	17.7
Elimination of intragroup transactions	**(300.7)**	(240.9)	(59.8)	24.8
Total	**1,332.2**	1,146.8	185.4	16.2

The Tour Operating business in the year 2005/2006 recorded a considerable increase in sales (approximately +2%) and a contraction in volumes (-4.3%). Revenues in 2005/2006, which also comprise the sales volumes of Alpitour Reinsurance, in fact, total € 901 million (€ 883 million in 2004/2005), while volumes declined from 997 thousand passengers in the prior year to 954 thousand this year. Such performance was sharply impacted by sales policies targeting destinations aimed at favoring margins while seeking to offer customers a service with the right quality-price ratio.

The Incoming sector, headed by the Jumbo Tours Group reported sales of approximately € 260.6 million in 2005/2006 (€ 229.3 million in 2004/2005). The increase in sales, equal to approximately 13.7%, is principally due to the growth of the sales contributed by third-party operators and a slight decline in those by the Group (equal to € 108.7 million).

As regards third-party operators, the Incoming sector has further consolidated the growth of sales relations with other markets in Europe. In fact, the traffic brought by third-party operators during the current year totaled approximately 873 thousand passengers (736 thousand in 2004/2005), equal to about 68% of volumes managed by the division. As for volumes from tour operators of the Group, about 411 thousand passengers were recorded, a figure in line with the prior year.

The Hotel sector posted higher sales which amount to € 112.4 million (€ 96.1 million in the prior year), including € 51.7 million reported by tour operators of the Group. The increase in sales (about +17%) is mainly due to the Italian market expansion of the activities of Alpitour World Hotels & Resorts S.p.A. (the company resulting from the merger of the companies Blumarin Hotels Sardegna S.r.l. and Altamarea International S.p.A. in Altamarea V&H Compagnia Alberghiera S.p.A.), as well as the considerable gain reported by the hotels in The Maldives which, in the previous year, were severely hurt by the December 26, 2004 tsunami.

The foreign hotel resorts owned or operated by the Group reported a presence of 737,700 in 2005/2006 (966 thousand in 2004/2005).

The Italian hotel resorts operated by Alpitour World Hotels & Resorts S.p.A. registered a presence of more than one million, up 5.5% compared to 954 thousand in 2004/2005. This gain can principally be ascribed to the positive performance of three 4-star hotels in Rome, the Hotel Ritz and the Hotel Regent (open since June 2005) and the Hotel Cicerone (open since June 2006).

The Aviation division, headed by the Neos airline company, reported sales of € 155.8 million in 2005/2006 (€ 103.7 million in 2004/2005), including € 122.3 million referring to Group companies. The increase in sales over the prior year (about +50.2%) is mainly due to the addition of a second B767 aircraft to the fleet in December 2005, making it possible to considerably step-up long-haul travel operations.

The Distribution sector operates through the Welcome Travel Group's network which manages 501 agencies: 39 owned, 422 affiliates, 28 partnerships and 12 full franchisings.
During the year 2005/2006, Welcome Travel Group reported sales of approximately € 31.1 million through its direct network, up from € 30.2 million in the prior year.

The Incentive e Grandi Eventi sector's most important event in 2005/2006 was the “Turin Winter Olympics 2006” run by Jumbo Grandi Eventi, which provided accommodation services to the entire Olympic family.
As a result of this event, Jumbo Grandi Eventi reported sales of € 142.6 million (€ 11.4 million in the same period of 2004/2005).
Sales of Francorosso Incentive (now FRI M.I.C.E.) were € 29.5 million and sharply affected by a persisting general weakness in demand. The number of passengers/customers totaled approximately 24,700.

Ifil Investissements (Luxembourg)

(100% of capital stock directly and through Ifil Investment Holding)

The highlights of the separate financial statements at December 31, 2006, prepared on the basis of Luxembourg law, are as follows:

€ in millions	**2006**	2005	Change
Profit	**675.8**	491.4	184.4
Equity	**2,332.9**	1,657.1	675.8
Non-current financial assets	**2,289.6**	1,604.7	684.9
Net financial position	**46.6**	54.9	(8.3)

The most important transactions which took place in 2006 and the first quarter of 2007 are described in a specific section of this report.

At December 31, 2006, non-current financial assets included the following investments and bonds:

€ in millions	Number of shares	**12/31/2006** % of capital stock	Carrying amount	12/31/2005	Change
Sequana Capital S.A.	24,009,482	48.88	**332.9**	775.5	(442.6)
SGS S.A.	1,029,456	13.16	**894.9**	0.0	894.9
Ifil International Finance Ltd	4,000,000	100.00	**999.0**	734.0	265.0
Ifilgroup Finance Ltd	4,000,000	100.00	**4.0**	4.0	0.0
Sadco S.A. (in a wind-up)	300	100.00	**1.0**	1.0	0.0
Ifil USA Inc	100	100.00	**0.5**	0.5	0.0
Turismo & Immobiliare S.p.A.	30,000	25.00	**5.0**	4.1	0.9
Gruppo Banca Leonardo S.p.A.	14,200,000	9.43	**47.0**	0.0	47.0
Other	-	-	**0.3**	1.2	(0.9)
NHT – New Holding for Tourism B.V. (wound up)			**0.0**	79.5	(79.5)
Total investments			**2,284.6**	1,599.8	684.8
Ocean Club Méditerranée convertible bonds	76,614	-	**5.0**	4.9	0.1
Total non-current financial assets			**2,289.6**	1,604.7	684.9

The appointment of the independent auditors will expire concurrently with the stockholders' meeting that will be held to approve the financial statements for the year ending December 31, 2011.

IFI GROUP PROFILE

IFI – Istituto Finanziario Industriale S.p.A. was founded in 1927 by Senator Giovanni Agnelli in Turin, where the headquarters is still located.
IFI controls **IFIL S.p.A.**, one of Europe's leading investment companies, and its capital is divided into two classes of stock: preferred stock – listed on the Italian stock exchange – and ordinary stock, all of which is held by **Giovanni Agnelli e C.**, which draws together the interests of the Agnelli family.

IFIL S.p.A., founded in 1919, is headquartered in Turin and listed on the Electronic Share Market of the Italian stock exchange.
IFIL conducts diversified investments on an international scale with entrepreneurial vision and solid financial backing. At the same time, it cooperates continuously with the management teams of its holdings, while respecting their right to operate autonomously and with a perspective geared to the medium-/long-term.
The major investments of the IFIL Group are indicated below.

Fiat S.p.A., in which IFIL S.p.A. has a holding of more than 30% of ordinary and preferred capital stock, is listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment). Founded in 1899, the Fiat Group operates in the sectors of automobiles (Fiat, Lancia, Alfa Romeo, Abarth, Ferrari, Maserati and Fiat Light Commercial), agricultural and construction equipment (Case and New Holland), trucks and commercial vehicles, buses and special-purpose vehicles (Iveco, Irisbus, Astra and Magirus), components and production systems (Fiat Powertrain Technologies, Magneti Marelli, Teksid and Comau); it is also active in publishing and communications (La Stampa and Publikompass). Other sectors also offer financial services to the sales networks and the clientele in addition to rental services to customers.

The other holdings which comprise the dynamically managed diversified portfolio are listed below.

Cushman & Wakefield (C&W), in which the subsidiary Ifil Investissements S.A. has a 70.18% stake, is the largest privately held company for real estate services. The C&W Group has its headquarters in New York, where it was founded in 1917, and now has 221 offices and 15,000 employees in 58 countries.

Sequana Capital S.A., in which Ifil Investissements S.A. has a 26.65% stake, is a French company listed on the Euronext market which in 2006 has focused its operations on the paper sector where it operates through:

- Arjowiggins S.A. (100% holding), the world leader in the manufacture of high value-added paper products, with 7,800 employees in 82 countries;
- Antalis S.A. (100% holding), the leading European Group in the distribution of paper products for printing and writing, with over 8,400 employees in 44 countries.

Intesa Sanpaolo S.p.A., in which IFIL S.p.A. has a 2.45% stake in ordinary capital stock, is listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment). It is one of the most important banking Groups in Europe and is the foremost bank in Italy with a market share of 20% on average in all segments of business (retail, corporate and wealth management). With its network of 6,100 branches, the Group offers its services to 10.7 million customers. It also operates in 13 Central-East European countries and in the Mediterranean basin with 1,200 branches and 7.2 million customers in the retail and commercial banking sectors. It also has an international network specialized in corporate customer support covering 34 countries including the United States, Russia, China and India.

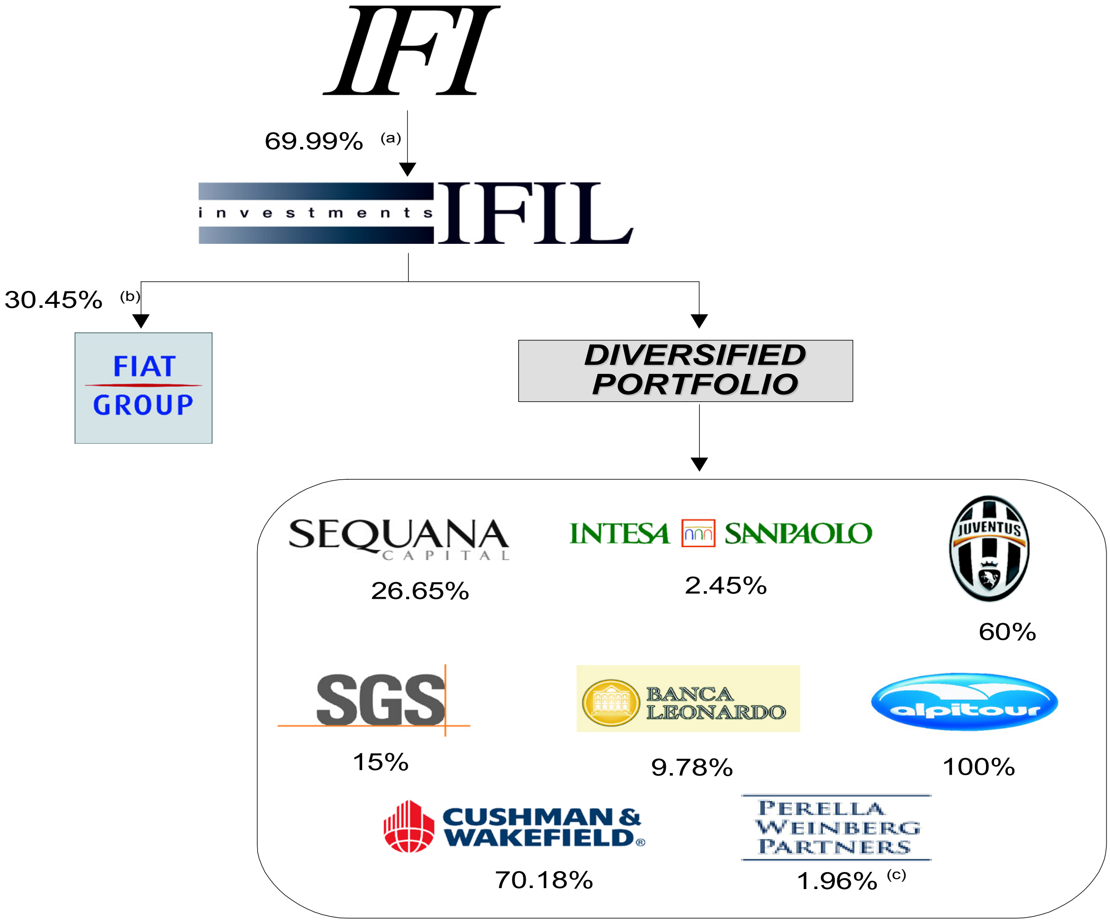
SGS S.A., in which Ifil Investissements S.A. has a 15% stake, is a Swiss company listed on the Virt-x market. Founded in 1878, the company is today the global leader in verification, inspection, control and certification activities with 50,000 employees and a network of more than 1,000 offices and laboratories throughout the world.

Gruppo Banca Leonardo S.p.A., in which Ifil Investissements S.A. has a 9.78% stake, is an independent investment bank offering corporate finance advisory and asset management services; it also provides private equity services under a joint venture with a leading European Group.

Alpitour S.p.A., in which IFIL S.p.A. has a 100% stake, is the largest integrated Group in the tourist sector in Italy. It operates with 4,000 employees and has more than 2.3 million customers across all areas of the tourism business: Tour Operating (Alpitour, Francorosso, Viaggidea, Villaggi Bravo, Volando and Karambola), Hotels (Alpitour World Hotel & Resorts), Incoming (Jumbo Tours), Aviation (Neos), Distribution (Welcome Travel Group) and Incentive & Eventi (A World of Events).

Juventus Football Club S.p.A., in which IFIL S.p.A. has a 60% stake, is listed on the Electronic Share Market of the Italian stock exchange (Star segment). Founded in 1897, it is one of the most prominent professional soccer teams in the world.

The following chart is updated to March 20, 2008, and presents the simplified structure of the investment portfolio. Percentage holdings refer to ordinary capital stock.



(a) IFI also holds 4.99% of IFIL savings capital stock. Giovanni Agnelli e C. S.a.p.az. also holds 3% of IFIL ordinary capital stock.
(b) IFIL also holds 30.09% of Fiat preferred capital stock.
(c) Percentage interest held in the NoCo A LP limited partnership.

Dividends were not distributed from the profit for the year ended December 31, 2006.

The board of directors' meeting held March 28, 2008 put forward a motion to the ordinary stockholders' meeting called to approve the separate financial statements for the year ended December 31, 2007 to appropriate the entire profit to reserves.

Stock market performance

Whereas in the first part of 2007 the markets continued to record positive performance, the second half of the year registered an inversion of the trend. This heightened in the last two months when fears over growth prospects in the United States became stronger, largely fueled by the impact of the subprime mortgage crisis. In this scenario, IFI preferred shares continually outperformed the Mibtel Index.

Overall 2007 performance by IFI preferred stock was positive at 1.8% against a decline of 4.5% in the Mibtel Index.

The negative downturn of the stock during the last part of 2007 then sharply accelerated in the first part of 2008 mirroring the performance of the world's major indexes.

Financial Communications and Investor Relations

In 2007, IFI has again devoted special attention to relations with the financial community, stockholders, financial analysts and the financial Press and, also, where requested, through individual meetings.

Information about the company, press releases, financial statements and the other account statements issued during the year are made available on the corporate website www.gruppoifi.com

In total, approximately 800 copies (in Italian and English) of the annual report, the first-half report and the quarterly reports have been distributed.

INFORMATION ON THE OWNERSHIP STRUCTURE PURSUANT TO EX ART. 123 BIS OF LEGISLATIVE DECREE 58/98

Capital stock
At December 31, 2007, IFI S.p.A.'s capital stock, fully subscribed to and paid-in, amounts to € 163,251,460 and consists of 86,450,000 ordinary shares (52.96% of capital stock) and 76,801,460 preferred shares (47.04% of capital stock) with a par value of € 1 each. The ordinary capital stock of the company is held entirely by Giovanni Agnelli e C. S.a.p.az. IFI preferred stock is listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment).

Pursuant to art. 6 of the bylaws, ordinary shares may not be disposed of, with effect towards the company, to parties other than the consanguine descendants of their holder and other holders of ordinary shares, unless the shares have been offered beforehand in option to the latter mentioned, with the right of accretion among them.

Pursuant to art. 10 of the bylaws, preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code and the second paragraph of art. 13 of the bylaws.

Pursuant to art. 27 of the bylaws, the profit of each year is appropriated as follows:
- 10% to the legal reserve until it reaches one-fifth of capital stock;
- of the remaining amount, 1% is at the board of directors' disposition for distribution among its members;
- the remaining profit is appropriated as follows:
  - to preferred shares, a preference dividend of 5.17% of their par value, which is not cumulative from one year to the next;
  - after any appropriations to reserves, the residual amount is attributed equally to the ordinary and preferred shares.

There are no restrictions on the voting rights or shares which confer special rights of control. There is not any share participation system for employees nor, consequently, any relative mechanism for the exercise of voting rights.

IFI S.p.A. has approximately 13,700 preferred stockholders.
At March 20, 2008, the ten major preferred stockholders, indicated below, represent in total 53.67% of the class of stock.

Stockholders	**%**	**Preferred shares**
Amber Capital LP as Manager of Amber Master Fund	21.45	16,477,468
Deutsche Bank AG	4.24	3,254,137
Credit Suisse Securities (Europe) Limited	4.22	3,240,718

	53.67	**41,226,624**

Source: Stockholders' Book supplemented by Consob communications received up to March 20, 2008.

There are no agreements known to the company regarding its shares pursuant to art. 122 of Legislative Decree 58/1998.
The bylaws of the parent, Giovanni Agnelli e C. S.a.p.az., include an article which requires the advance authorization by all the general partners in office and the ordinary stockholders' meeting, with more than a two-thirds majority vote by the ordinary capital stock, for any act regarding the disposition of ordinary shares of IFI S.p.A. which does not leave full ownership of at least of 51% of IFI ordinary capital stock with Giovanni Agnelli e C. S.a.p.az.

With regard to the subsidiary IFIL, the only agreement known by the company to exist is that signed on March 27, 1990 between IFIL S.p.A. and Citicorp, now Citigroup, with headquarters in New York (USA), on the subject of the right of first refusal on IFIL ordinary shares held granted by Citigroup.

Appointment of the board of directors
The motion for the appointment of the directors is put forward by the majority stockholder which holds 100% of ordinary capital stock.
The directors remain in office for a three-year period and can be re-elected; the board of directors currently has 13 members.

Mandate for capital stock increases
Capital stock may be increased for a period of five years, at one or more times, also in divisible form, up to a maximum of € 561,750,000, by the authority delegated, pursuant to art. 2443 of the Italian Civil Code, to the board of directors by the special stockholders' meeting held April 22, 2003.

The board of directors will put forward a motion to renew this resolution at the next special stockholders' meeting.

Authorization to purchase treasury stock
The ordinary stockholders' meeting held on May 15, 2007 authorized, for a period 18 months, pursuant to art. 2357 of the Italian Civil Code and art. 132 of Legislative Decree 58 dated February 24, 1998, the purchase of a maximum of 16 million IFI shares for a total amount of € 200 million.

The board of directors will put forward a motion to the ordinary stockholders' meeting to renew this resolution.

Effects of a possible change in control on the most important agreements in force
At December 31, 2007, a possible change in control over IFI S.p.A. would give a lending bank the right to ask for the early repayment of two committed credit lines of € 50 million (expiring May 2008) currently utilized for € 25 million.

Agreements between the company and the directors
There are no agreements between the company and the directors which call for indemnities in the case of resignation or dismissal without a just cause or if their working relationship ceases as a result of a takeover bid.

MAJOR EVENTS IN 2007 AND IN THE FIRST QUARTER OF 2008

Increase of the investment in IFIL

During 2007, IFI purchased on the market 48,750,000 IFIL S.p.A. ordinary shares (4.69% of the class of stock) for an investment of € 349.9 million. At December 31, 2007, IFI held 723,950,000 IFIL ordinary shares, equal to 69.7% of the class of stock, and 1,866,420 IFIL savings shares, equal to 4.99% of the class of stock. The investment represents 67.46% of total IFIL capital stock.

During the first quarter of 2008, IFI purchased on the market 2,950,000 IFIL ordinary shares (0.29% of the class of stock) for an investment of € 16.2 million.
IFI currently holds 726,900,000 IFIL ordinary shares, equal to 69.99% of the class of stock and 1,866,420 IFIL savings shares, equal to 4.99% of the class of stock. The investment represents 67.73% of IFIL capital stock.

Dividends approved by IFIL S.p.A. from profit for the year ended December 31, 2007

The IFIL S.p.A. board of directors in its meeting held on March 28, 2008 voted to put forward a motion to the stockholders' meeting called for May 13, 2008 for the payment of dividends of € 0.10 per ordinary share and € 0.1207 per savings share.
IFI S.p.A.'s share of the dividends amounts to € 72.9 million.

Resolutions passed by the IFI S.p.A. board of directors' meeting held on March 28, 2008

In its meeting held on March 28, 2008, the board of directors approved the consolidated financial statements and the draft separate financial statements for the year ended December 31, 2007, authorizing their publication starting from March 29, 2008.
A motion will be put forward to the stockholders' meeting fixed for May 14, 2008 (in first call) and May 15, 2008 (in second call) to appropriate the profit of € 54.5 million to the extraordinary reserve and thus not distribute dividends.

The board has also voted to put forward a motion to the stockholders’ meeting to renew the authorization for the purchase and disposition of treasury stock. This authorization would allow the board to purchase on the market, for a period of 18 months from the resolution passed by the stockholders’ meeting, up to a maximum of 16 million ordinary and/or preferred shares, for a maximum disbursement of € 200 million, at a price of not less than or more than 15% of the price recorded by the stock in the trading session of the day prior to each single purchase transaction. The authorization request to purchase treasury stock is considered opportune, among other things, in order to be able to possibly use the treasury stock for investment purposes for an efficient utilization of the company's liquidity. IFI currently holds 5,360,300 preferred shares of treasury stock, equal to 6.98% of the class of stock.

The board of directors has thus passed a resolution to put forward a motion to the special stockholders’ meeting, pursuant to article 2443 of the Italian Civil Code, to renew the five-year authorization to increase capital stock, at one or more times, up to a maximum of € 561.7 million. The current mandate is expiring and the Company believes that this is an efficient and flexible operating tool to nonetheless have at its disposition.

BUSINESS OUTLOOK

For IFI S.p.A., the forecast is for a profit for the year 2008.

On the basis of the indications formulated by the IFIL Group for 2008, the IFI Group is expected to show a consolidated profit.

IFI S.p.A. – REVIEW OF THE RESULTS OF THE SEPARATE FINANCIAL STATEMENTS

The year 2007 shows a profit of € 54.5 million, which does not include nonrecurring transactions.

In the year 2006, instead, profit was reported for € 217,6 million, of which € 69.6 million is the net amount deriving from the impairment reversal on the investment held in IFIL (€ 73.5 million) and the accrual for the related deferred taxes (-€ 3.9 million) and, an additional amount of € 104 million from the gain on the sale of the investment in Exor Group to the same Exor Group.

The condensed income statement and balance sheet and comments on the most important items are presented below.

IFI S.p.A. - Condensed income statement

Total Equity and liabilities		**2,248.8**	**100.0**	1,961.9	100.0	286.9

1. Dividends from investments

Dividends from investments in 2007 amount to € 67.8 million, an increase compared to € 13.5 million in 2006. In both years, dividends were collected almost entirely from the subsidiary IFIL. Dividends collected on IFIL shares purchased from January 1, 2007 to May 24, 2007 (€ 1.8 million) were recorded as a deduction from the purchase cost of these same shares.

2. Gain on sale of investment

In 2006, the gain on sale of investment amounted to € 104 million and was due to the sale of 29.3% of the capital stock of Exor Group to the same Exor Group at the price of € 206.6 million, net of costs to sell of € 0.2 million.

3. Impairment reversals on investments

In 2006, impairment reversals on investments refer to the carrying amount of 138,426,775 IFIL ordinary shares which in 2002 had been written down on the basis of their market price. The impairment was totally reversed up to the original cost of the purchase for an amount of € 73.5 million.

Deferred taxes were recorded on this impairment reversal for € 3.9 million which, in 2007, were partly released for an amount of € 0.6 million (credited to the income statement in 2007) following the reduction of the IRES tax rate from 33% to 27.5%.

4. Net financial expenses

Net financial expenses of € 8.8 million increased by € 3.4 million compared to 2006 (€ 5.4 million) due to higher debt as a result of the previously mentioned purchases of IFIL ordinary shares.

5. Investments

Details are as follows:

€ in millions	**12/31/2007**	12/31/2006	Change
Accounted for at cost			
IFIL S.p.A. (ordinary shares)	**2,220.2**	1,872.1	348.1
IFIL S.p.A. (savings shares)	**6.4**	6.4	0.0
	2,226.6	1,878.5	348.1
Other investments	**0.3**	0.4	(0.1)
Total investments	**2,226.9**	1,878.9	348.0

In 2007, IFI purchased on the market 48,750,000 IFIL ordinary shares (4.69% of the class of stock) for an investment of € 349.9 million, net of dividends of € 1.8 million collected on 18,511,000 IFIL ordinary shares purchased in the early months of 2007, recorded as a deduction of the carrying amount of these same shares.

The comparison between carrying amounts and market prices of IFIL shares held at December 31, 2007 is as follows:

				Market price			
	Number of	Carrying amount		December 28, 2007		March 20, 2008	
	shares held	Per share (€)	Total (€ thsd)	Per share (€)	Total (€ thsd)	Per share (€)	Total (€ thsd)
IFIL S.p.A.							
- ordinary shares	723,950,000	3.07	2,220.2	6.39	**4,627.5**	4.60	**3,326.6**
- savings shares	1,866,420	3.42	6.4	5.76	**10.7**	4.00	**7.5**
Total			2,226.6		**4,638.2**		**3,334.1**

6. Equity

Equity at December 31, 2007 is equal to € 1,846.8 million (€ 1,793.7 million at December 31, 2006). The positive change of € 53.1 million is due to the profit for the year (+€ 54.5 million) and other net changes (-€ 1.4 million).

7. Net financial position

Details are as follows:

€ in millions	**12/31/2007**	12/31/2006	Change
Cash and cash equivalents	**0.2**	59.7	(59.5)
Other financial assets, current and non-current	**2.5**	3.9	(1.4)
Bank debt, current and non-current	**(394.3)**	(160.3)	(234.0)
Current other financial liabilities	**(1.1)**	(0.8)	(0.3)
Net financial position	**(392.7)**	(97.5)	(295.2)

The negative change of € 295.2 million in 2007 is due to the following cash flows.

€ in millions	
Net financial position at December 31, 2006	**(97.5)**
Purchase of 48,750,000 IFIL ordinary shares (4.69% of the class of stock)	(349.9)
Dividends collected (a)	69.6
Net financial expenses	(8.8)
Net general expenses	(5.2)
Other net changes	(0.9)
Net change during the year	**(295.2)**
Net financial position at December 31, 2007	**(392.7)**

(a) Of which € 1.8 million was recorded as a deduction of purchases of IFIL shares made in 2007.

8. Reconciliation between the separate financial statements of IFI S.p.A. and the consolidated financial statements of the Group

The following reconciliation of the profit for the year and the equity in the separate financial statements of IFI S.p.A. for the years ended December 31, 2007 and December 31, 2006 and the corresponding figures in the consolidated financial statements of the IFI Group at the same dates are presented as required by Consob Communication 6064293 dated July 28, 2006.

IFI GROUP – REVIEW OF THE CONSOLIDATED RESULTS

In order to facilitate the analysis of the equity and financial position and the results of operations of the Group, it is IFI's practice to present financial statements for the period (balance sheet and income statement) prepared by accounting for the investment in the IFIL Group (68.29 % of capital stock outstanding) by the equity method in the separate financial statements or in the separate accounting situations of IFI S.p.A. This method consists of presenting a condensed representation of the consolidated results of the IFI Group. Such consolidated financial statements are presented along with the annual consolidated financial statements and the interim consolidated financial statements for the first-half of each year. The quarterly consolidated data is also presented in the same format in the quarterly reports at March 31 and September 30 of each year.

The condensed income statement and balance sheet and comments on the most important items are presented below.

Income statement prepared by accounting for the investment in the IFIL Group by the equity method

The consolidated profit attributable to the equity holders of the IFI Group for 2007 amounts to € 444.3 million and increased by € 222.9 million compared to € 221.4 million in 2006.

€ in millions	Note	**2007**	2006	Change
Share of the profit of the IFIL Group	1	**458.2**	222.0	236.2
Gain on sale of investment		**0.0**	7.3	(7.3)
Dividends from other investments		**0.1**	0.1	0.0
Net financial expenses		**(8.8)**	(5.4)	(3.4)
Net general expenses		**(5.2)**	(4.9)	(0.3)
Income taxes		**0.0**	2.3	(2.3)
Profit attributable to the equity holders of the company		**444.3**	221.4	222.9

1. Share of the profit of the IFIL Group

	Profit		IFI's share		
€ in millions	**2007**	2006	**2007**	2006	Change
IFIL Group	**671.7**	341.5	**458.7**	217.6	241.1
Consolidation adjustments			**(0.5)**	4.4 (a)	(4.9)
Total IFIL Group			**458.2**	222.0	236.2

(a) Of which € 4.9 million is due to the excess of the increase in IFI's share of the consolidated equity of the IFIL Group compared to the cost of IFIL shares purchased during the year and -€ 0.5 million for other minor adjustments.

Comments on the operating performance of the IFIL Group are presented in the next section.

2. Investment in the IFIL Group

The carrying amount of the investment in the IFIL Group, accounted for by the equity method is € 4,537 million at December 31, 2007. The increase of € 656.2 million compared to the end of 2006 (€ 3,880.8 million) is due to purchases of IFIL shares made in 2007 (+€ 348.1 million) and IFI's share (+€ 308.1 million) of the change in the equity of the IFIL Group.

The carrying amount of IFIL stock per share is € 6.25 (€ 5.73 at December 31, 2006).

3. Equity attributable to the equity holders of the company

The consolidated equity attributable to the equity holders of the company at December 31, 2007 amounts to € 4,160.5 million (€ 3,799.8 million at the end of 2006). The increase of € 360.7 million is the result of the consolidated profit attributable to the equity holders of the company for the year (+€ 444.3 million) and other net changes (-€ 83.6 million).

The analysis of changes during the year is as follows:

€ in millions	
Equity attributable to the equity holders of the company at December 31, 2006	**3,799.8**
Share of translation differences (-€ 72.1 million) and other net changes (-€ 10.2 million) shown in the equity of the subsidiary IFIL	(82.3)

Annual Report on Corporate Governance 2007

Information concerning the corporate governance of IFI S.p.A. is presented in the Annual Report on Corporate Governance 2007 which, in accordance with art. 89 bis of Consob Regulation 11971 dated May 14, 1999 and subsequent amendments, will be published on the corporate website www.gruppoifi.com and made available at the company's head office within the times established by existing law.

Management and coordination

IFI S.p.A. is not subject to management and coordination on the part of companies or entities.

Programming document on security

The company has prepared the programming document on security on December 13, 2007 for the year 2007 according to the provisions of Legislative Decree 196 dated June 30, 2003, attachment B – technical specifications regarding minimum safety measures. The document has been drawn up by the person in charge of the treatment of the data.

The review of the operating performance of the subsidiary IFIL Investments S.p.A. is commented below.

investments IFIL

(69.99% of ordinary capital stock)

The following comments are in respect of the condensed consolidated income statement and balance sheet of the IFIL Group for the year ended December 31, 2007.
This data has been prepared by consolidating the companies which constitute the “Holdings System” on a line-by-line basis and accounting for the other operating subsidiaries and associates (Fiat, Sequana Capital, Cushman & Wakefield, Alpitour and Juventus Football Club) by the equity method.

IFIL GROUP – Condensed consolidated income statement

The **profit attributable to the equity holders of the company** for the year 2007 is € 671.7 million, with an increase of € 330.2 million compared to the profit reported for the year 2006 (€ 341.5 million). The increase is due to the higher contribution to earnings by investment holdings (+€ 317.7 million) and higher net financial income (+€ 30.9 million), partially compensated by other net negative changes (-€ 18.4 million).

1. Share of the profit (loss) of companies accounted for by the equity method

In 2007, the share of the profit (loss) of companies accounted for by the equity method is a profit of € 610.9 million (€ 293.2 million in 2006). The positive change of € 317.7 million reflects the higher profit contribution by the Fiat Group (+€ 276.4 million), the Sequana Capital Group (+€ 2.4 million, also including the loss of € 54.3 million on the sale of the 22% stake in capital stock), the Alpitour Group (+€ 4.5 million), the result for the nine months following the acquisition of the Cushman & Wakefield Group (+€ 34.9 million), a lower profit contribution by Juventus Football Club (-€ 0.8 million) and other changes (+€ 0.3 million).

	Profit (loss)		IFIL's share

(a) Mainly for the assignment of preference dividends to the minority interest.
(b) Of which -€ 54.3 million for losses (including transaction costs of € 0.8 million) realized on the sale of the 22% stake in Sequana Capital and +€ 7.6 million for lower goodwill impairment losses on the AWA Group, since it was partially amortized by IFIL in prior years.
(c) For the elimination of the gain net of taxes on the Sequana Capital/SGS Public Exchange and Purchase Offer (-€ 465.8 million) and for the diluting effect of the reduction in the stake held (-€ 28.3 million).
(d) Data for the period April 1 – December 31, subsequent to acquisition.
(e) Data for the period November 1 – October 31.
(f) Data for the period January 1 – December 31 prepared for purposes of consolidation by IFIL.

2. Dividends from investments

Dividends from investments in 2007 amount to € 111.6 million and include dividends collected from Intesa Sanpaolo S.p.A. for € 110.2 million (€ 53 million in 2006) and Gruppo Banca Leonardo for € 1.4 million.

3. Net other financial income (expenses)

In 2007, net other financial expenses amount to € 10.1 million whereas, in 2006, the balance of net financial income totaled € 19.2 million. The negative change of € 29.3 million is mainly due to the change in the consolidated net financial position of the "Holdings System" (which over the course of the year went from a cash position of € 386.2 million to a borrowings position of € 104.5 million as a result of significant investments), in addition to an increase in IFIL S.p.A. borrowing costs as described previously.

4. Net other nonrecurring income (expenses)

In 2007, net other nonrecurring expenses amount to € 17.2 million and comprise transaction costs and expenses incurred to close the dispute over the sale of La Rinascente (€ 8 million), the current-year cost of € 12.7 million for the stock option plan approved for management of the subsidiary Alpitour, as well as income of € 3.5 million resulting from the reduction decided by the Court of Appeals of Turin in respect of the administrative sanction levied on the company by Consob.

In 2006, net other nonrecurring expenses amounted to € 0.2 million and included the accrual for the administrative sanction of € 4.5 million levied on the company by Consob in relation to the content of the press release dated August 24, 2005, the current-year cost of € 3.1 million for that year for the stock option plan approved for management of the subsidiary Alpitour, as well as the release of the provision set aside in prior years for the Alpitour stock option plan 2000 which was not exercised by the expiration date of August 31, 2006, equal to € 7.8 million.

5. Investments accounted for by the equity method

(a) In the consolidated financial statements at December 31, 2007, the investment in the Sequana Capital Group has been deconsolidated with effect from July 1, 2007 following the sale of the 22% stake in the company.

The major events in 2007 and in the first quarter of 2008 are presented below.

Acquisition of the controlling interest in the Cushman & Wakefield Group

On March 30, 2007, the subsidiary Ifil Investissements S.A. purchased 71.52% of the capital stock of Cushman & Wakefield (C&W) from Rockefeller Group International Inc. (RGI), a subsidiary of the Mitsubishi Group, for an investment of $625 million (€ 473.7 million), in addition to transaction costs of € 9.4 million. The remaining 28.48% stake is held by C&W management and employees.

On March 30, 2007, IFIL S.p.A. also made an interest-earning loan at market rates to C&W for $126.3 million, equal to € 94.9 million, which was repaid in full by June 1, 2007.

Subscription to the Juventus Football Club S.p.A. capital increase

On April 20, 2007, the stockholders' meeting of Juventus Football Club S.p.A. approved the capital stock increase of € 104.8 million proposed by the board of directors in order to finance the company's medium-term development plan. The stock increase was carried out in June 2007 through the issue of 80,621,332 shares (in a ratio of 2 new shares for every 3 shares held) at € 1.30 per share (of which € 1.20 is additional paid-in capital).

On June 14, 2007, IFIL S.p.A. subscribed to its portion of the increase for 48,373,666 shares for an investment of € 62.9 million.

Increase of the investment in SGS S.A.

In 2007, Ifil Investissements S.A. purchased 143,944 SGS shares on the market, equal to 1.84% of capital stock, for an investment of € 121.5 million.
Currently, Ifil Investissements S.A. holds 1,173,400 SGS shares representing 15% of capital stock.

Subscription to the Gruppo Banca Leonardo S.p.A. capital increase

On April 30, 2007, Ifil Investissements S.A. subscribed to 11,055,537 shares issued as part of the capital increase by Gruppo Banca Leonardo for an investment of € 35.4 million.
Ifil Investissements S.A. currently holds 25,255,537 Gruppo Banca Leonardo shares, equal to 9.78% of outstanding capital stock.

Other investments

On May 2, 2007, Ifil Investissements S.A. succeeded Exor Group S.A., a company controlled by Giovanni Agnelli & C. S.a.p.az., in a commitment for a maximum investment of $80 million in the limited partnership NoCo B LP which Groups a series of funds managed by Perella Weinberg Partners L.P. As a result of this commitment, on December 31, 2007, Ifil Investissements S.A. invested $17 million (€ 11.9 million).

On September 30, 2007, Ifil Investissements S.A. purchased a 100% stake in the capital stock of the American company ANCOM USA Inc, from Exor Group S.A., for a total payment of approximately $27 million (€ 19.1 million). ANCOM USA Inc holds 1.96% of the limited partnership NoCo A LP, under which the Perella Weinberg Group conducts all of its activities.

Sale of a stake in Sequana Capital S.A.

On July 6, 2007, Ifil Investissements S.A. reached an agreement for the sale of an approximate 22% stake in Sequana Capital S.A. to DLMD – a company controlled by Pascal Lebard, general manager of Sequana Capital S.A.

After having obtained approval from the competent authorities, on July 27, 2007, Ifil Investissements S.A. sold 10,806,343 Sequana Capital shares at € 21 per share for a total equivalent amount of € 226.9 million.

Ifil Investissements S.A. partially financed the deal for a total equivalent amount of € 27.2 million by subscribing to 2,723 S-Bonds issued by DLMD, maturing July 27, 2010.

After this deal (which led to a loss on consolidation of € 54.3 million, including transaction costs), Ifil Investissements S.A. holds 13,203,139 Sequana Capital S.A. shares, equal to 26.65% of outstanding capital stock.

Ifil Investissements S.A. and DLMD signed a three-year stockholders' agreement aimed at keeping the stockholder base of Sequana Capital S.A. stable.

Sale of the investment in Turismo&Immobiliare S.p.A.

After having obtained authorization from the competent authorities, on September 18, 2007, Ifil Investissements S.A. sold its 25% holding in Turismo&Immobiliare to the Marcegaglia Group, Pirelli RE and Gabetti Property Solutions for € 5.2 million; a gain of € 0.9 million was realized on the sale on consolidation.

Issue of non-convertible bonds

On June 12, 2007, IFIL S.p.A. issued 10-year non-convertible bonds to Italian and foreign investment professional investors for a nominal amount of € 750 million. The purpose of the bond issue was to raise new funds for IFIL S.p.A. in order to refinance its existing debt as part of the strategy to extend its debt maturities. The bonds were admitted for trading on the Luxembourg stock exchange.

Closing of the dispute regarding the sale of La Rinascente

On February 14, 2006 and September 5, 2006, the buyer of the investment in La Rinascente filed two separate arbitration proceedings against Ifil Investissements S.A. seeking compensation for an amount of approximately € 52 million for extraordinary expenses relating to certain points of sale in addition to legal questions in connection principally with the accounting treatments used in the financial statements of La Rinascente.

On June 27, 2007, Ifil Investissements S.A. settled the dispute on the basis of which the buyer of the investment in La Rinascente renounced all claims filed in the above arbitration proceedings against Ifil Investissements S.A. and any other claim and/or demand, also in the future, relating to the sale of the investment in La Rinascente. The settlement involved a total payment of € 8 million (of which € 6.1 million was borne by Ifil Investissements S.A. and € 1.9 million by Auchan Group).

Proceedings relative to the contents of the press releases issued by IFIL S.p.A. and Giovanni Agnelli e C. S.a.p.az. on August 24, 2005

In the opposing judgment against the administrative sanctions imposed by Consob under Resolution 15760 notified on February 13, 2007, the Court of Appeals of Turin, in its decision of December 5, 2007, reduced the administrative sanctions from a total of € 16 million to € 6.3 million. The reduction for IFIL was from € 4.5 million to € 1 million and for Mr Gabetti from € 5 million to € 1.2 million. Furthermore, the additional administrative sanction levied against Mr Gabetti was reduced by two months, from six to four months, the period of which is now over, as are the periods for the administrative sanctions against Mr Grande Stevens, as the legal advisor, and Mr Marrone.

As for the penal proceedings communicated to these individuals, the judge in the preliminary investigations of December 4, 2007 declared the notification pursuant to ex art. 415 bis of the Italian Code of Penal Procedure null and void and sent the case to the public prosecutor's office. The proceedings are therefore again in the preliminary stages.

Subscription of bonds convertible into Vision Investment Management shares

On February 20, 2008, Ifil Investissements S.A. reached an agreement to invest € 61 million ($90 million) in 5-year bonds with a mandatory conversion into shares at maturity and thus become a prominent stockholder of Vision Investment Management Limited (Vision), one of the most important alternative asset managers in Asia.

Vision, which has offices in Hong Kong, was founded in June 2000 by Jerry Wang, one of the pioneers in the sector in Asia. Vision launched its benchmark product, Vision Asia Maximus Fund, in 2002 and since then has become one of the largest local managers of hedge funds specialized in Asian markets.

Ifil Investissements S.A. will use available liquidity for the investment. The bonds will guarantee a fixed annual yield of 5% until conversion at maturity in spring 2013. The finalization of the transaction, subject to the approval of the competent authorities, is expected to take place in spring 2008.

The proceeds from the bonds will mainly be used by Vision management to buy back treasury stock from a Group of the company's founding financial investors – which currently hold 32% of ordinary capital stock issued by Vision – and to ensure future resources to sustain the development plan in the alternative asset management sector in Asia. Vision management and employees remain the largest stockholders of the company with a controlling stake.

Upon conversion of the bonds, Ifil Investissements S.A. will receive shares equal to a 40% stake in Vision.

Buyback program

In its meeting held on February 18, 2008, the IFIL S.p.A. board of directors approved the start of a Treasury Stock Buyback Program aimed at efficiently managing the Company's capital from an investment standpoint.

The Buyback Program falls under the resolution for the purchase of treasury stock approved by the stockholders' meeting held on May 14, 2007 and will be in effect until November 13, 2008.

The Program calls for a maximum disbursement of € 150 million and covers the purchase of IFIL ordinary and savings shares on the market at a price of not less than or more than 15% of the price recorded by the stock in the trading session of the day prior to each single purchase transaction.

The purchases will be made on regulated markets and the maximum number of shares purchased daily may not exceed 25% of the average daily trading volumes, respectively, of IFIL ordinary shares and IFIL savings shares, as provided by EC regulation 2273/2003.

Under this Program, during the period February 26 – March 17, 2008, IFIL S.p.A. purchased 4,465,200 ordinary shares (0.43% of the class of stock) at the average cost per share of € 5.07 for a total of € 22.6 million, and also 275,000 savings shares (0.74% of the class of stock) at the average cost per share of € 4.26 for a total of € 1.2 million. The total investment amounts to € 23.8 million (15.9% of the total disbursement stated in the Program).

After these purchases IFIL currently holds, directly and indirectly, the following treasury stock:

	Number of shares	Amount		% of class
		Per share (€)	Total (€ in thousands)	
Ordinary, held by IFIL S.p.A.	16,868,198	4.05	68,328	1.62
Ordinary, held by subsidiary Soiem S.p.A.	810,262	3.41	2,762	0.08
Total ordinary shares	**17,678,460**	**4.02**	**71,090**	**1.70**
Savings shares, held by IFIL S.p.A.	**275,000**	**4.26**	**1,172**	**0.74**

Dividends approved by the investment holdings from profit for the year ended December 31, 2007

On the basis of the resolutions passed by the boards of directors, the following dividends should be collected:

Holding	Class of stock	Number of shares	Dividends	
			Per share (€)	Total (€/ml)
Fiat S.p.A.	ordinary	332,587,447	0.40	133.0
Fiat S.p.A.	preferred	31,082,500	0.40	12.4
Intesa Sanpaolo S.p.A.	ordinary	289,916,165	0.38	110.2
Sequana Capital S.A.	ordinary	13,203,139	0.70	9.2
SGS S.A.	ordinary	1,173,400	22.3 (a)	26.2
Gruppo Banca Leonardo	ordinary	25,255,537	0.11	2.8
Total				**293.8**

(a) Equal to CHF 35.

Business outlook

For IFIL S.p.A., a profit is expected to be reported for the year 2008.

Taking into account the forecasts formulated by the major holdings, a profit is forecast for the IFIL Group for 2008.

MOTION FOR THE APPROVAL OF THE SEPARATE FINANCIAL STATEMENTS AND THE APPROPRIATION OF THE PROFIT FOR THE YEAR

We invite you to approve the separate financial statements of IFI S.p.A. for the year ended December 31, 2007.
In view of the fact that the board of directors has waived, by specific resolution, the share of the profits to which it is entitled pursuant to art. 27 of the bylaws and that the legal reserve amounts to one-fifth of capital stock, we propose the appropriation of the profit for the year of € 54,472,566 to the extraordinary reserve.

Turin, March 28, 2008

For the Board of Directors
The Chairman
John Elkann

IFI
Istituto Finanziario Industriale

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

1. General information on the activities of the company

IFI – Istituto Finanziario Industriale S.p.A. (abbreviated in IFI S.p.A.) is a corporation organized under the laws of the Republic of Italy.
The head office of the company is located in Turin, Italy, Corso Matteotti 26.
The ordinary capital stock of the company is held entirely by Giovanni Agnelli e C. S.a.p.az. IFI preferred stock is listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment).
The assets of the company are represented by its controlling investment in IFIL Investments S.p.A., for 69.99% of ordinary capital stock.

Additional information is presented in the Directors' Report on Operations in the section "IFI Group Profile".

2. General principles for the basis of presentation of the separate financial statements

Starting from the financial year 2006, the separate financial statements of IFI S.p.A. have been prepared in conformity with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and recognized by the European Community in accordance with Regulation 1606/2002 of the European Parliament and Council dated July 19, 2002. The designation IFRS also includes all valid International Accounting Standards (IAS), as well as all interpretations of the International Financial Reporting Interpretations Committee (IFRIC), formerly the Standing Interpretations Committee (SIC).

The disclosure required by IFRS 1 – First-time Adoption of IFRS, relative to the effects of the transition to IFRS, was presented in a specific Appendix to the separate financial statements at December 31, 2006.

The separate financial statements have also been prepared in accordance with the provisions contained in Consob Resolutions 15519 and 15520 dated July 27, 2006 and in Communication 6064293 dated July 28, 2006, pursuant to art. 9, paragraph 3, of Legislative Decree 38 dated February 28, 2005.

3. Format of the separate financial statements and other information

The separate income statement is presented using a classification based on the nature of the revenues and expenses, with the presentation of investment income (charges) and financial income (expenses) taking preference since these items are characteristic of IFI S.p.A.'s activities.

In the separate balance sheet, the current/non-current distinction has been adopted for the presentation of assets and liabilities.

The separate statement of changes in equity presents the total income and expense recognized directly as an increase or decrease of reserves in a specific section.

The separate statement of cash flows is presented using the indirect method, which reconciles cash and cash equivalents at the beginning and the end of the year.

The year-end closing date is December 31 of each year and covers a period of 12 months.

The Euro is the company's functional currency and presentation currency.

The notes are expressed in thousands of Euro, unless otherwise indicated.

Major events in 2007 and in the first quarter of 2008, as well as the business outlook are presented in the Directors' Report on Operations.

4. Related party transactions, unusual and/or atypical transactions and significant nonrecurring events and transactions

The balance sheet and income statement balances generated by transactions with related parties are shown separately in the financial statement formats and commented in Note 30.

With regard to the year 2007, there are no significant nonrecurring events or unusual and/or atypical transactions that require mention pursuant to Consob Communication 6064293 dated July 28, 2006.

With regard to the year 2006, the reported profit was € 217.6 million which included € 69.6 million for the net amount of the impairment reversal on the investment held in IFIL (€ 73.5 million) and the accrual for the related deferred taxes (-€ 3.9 million) and another € 104 million for the gain on the sale of the investment in Exor Group to the same Exor Group. Additional details are provided in Note 9.

5. Significant accounting policies

General principle

The separate financial statements of IFI S.p.A. are expressed in Euro and are prepared under the historical cost convention, except where the use of fair value is required for the measurement of certain available-for-sale financial instruments and those held for trading.

Investments accounted for at cost

Investments in subsidiaries and associates are stated at cost and tested for impairment if, and only if, there is objective evidence of an impairment due to one or more events which occurred after initial recognition which have an impact on the future cash flows of the subsidiaries and associates and on the dividends which they could distribute. For IFI S.p.A., this objective evidence is a significant and prolonged decline in the market prices to below cost of a directly and indirectly owned subsidiary or associate, together with its continuing negative operating performance. In these cases, the impairment is determined as the difference between the carrying amount of the investment and its recoverable amount. The recoverable amount is generally determined, in the case of listed subsidiaries and associates, by their fair value (market prices), and in the case of unlisted subsidiaries, by their fair value in use, based on the fair value of the indirect subsidiaries.

At each balance sheet date, IFI S.p.A. assesses whether there is any objective evidence that an impairment loss of an investment recognized in prior years may no longer exist or may have decreased. A significant or prolonged rise in the market price of the subsidiary or associate, together with its continuing positive operating performance is considered as objective evidence. In these cases, the recoverable amount of the investment is re-measured and, if necessary, the carrying amount is increased up to the cost of the investment.

Receivables and payables
Receivables are initially recognized at their nominal amount which substantially coincides with fair value.
If there is objective evidence of an impairment loss or a risk that the company will not be able to collect the contractual amount (principal and interest) at the contractually agreed dates, a provision is set aside which corresponds to the difference between the asset's carrying amount and the present value of estimated recoverable future cash flows, discounted at the effective interest rate.
Payables are initially recognized at their nominal amount, reduced by expenses incurred to assume them and increased by interest expense due, if any. Payables are subsequently measured at amortized cost using the effective interest method.

Treasury stock
The cost of any IFI treasury stock purchased and/or held, also through subsidiaries, as a result of specific stockholder resolutions, is recognized as a deduction of equity and, therefore, the reserve offsetting treasury stock in portfolio is not shown separately. The proceeds from any subsequent sale are recognized as movements in equity.

Employee benefits – Pension plans
The pension plans are currently either defined contribution or defined benefit plans.

Under defined contribution plans the company pays contributions to outside, legally separate entities with administrative autonomy, which frees the employer from any subsequent obligation as the outside entity assumes the commitment to pay what is due to the employee. Following the changes in regulations for employee severance indemnities pursuant to Law 296 dated December 27, 2006 (Budget Law 2007) and later decrees and regulations, defined contribution plans include the portions of employee severance indemnity accruing from January 1, 2007. However, since IFI S.p.A. has less than 50 employees, the employee severance indemnities are calculated using the customary actuarial method established in IAS 19 and adopted in prior years, except for the exclusion of the pro rata application of the service rendered for employees who transfer the entire amount accrued to the supplementary pension fund.
Consequently, for those who transfer the entire amount accrued to the supplementary pension fund, the company records the contribution paid as an expense and no additional obligation is recognized.
Defined benefit plans include post-employment benefits, other than those under defined contribution plans. Under defined benefit plans, the company has the obligation to set aside the costs relating to the benefits guaranteed to its employees in service. The actuarial risk and the investment risk are thus substantially borne by the company.
Defined benefit plans, which include employee severance indemnities, taking into account what was described above, are measured by actuarial techniques using the Projected Unit Credit Method.
As provided by the amendment to IAS 19 – Employee Benefits, issued by the IASB in December 2004, IFI S.p.A. has elected to recognize actuarial gains and losses immediately in the period in which they arise, outside the income statement, in a statement of recognized income and expense.
All cumulative actuarial gains and losses that existed at January 1, 2005 have been recognized in equity
For defined benefit plans, the expenses relating to the increase in the present value of the obligation, due to the fact that the payment date of the benefits is nearing, are recognized in financial expenses.
Payments relative to defined contribution plans are recognized as an expense in the income statement as incurred.

The liability for defined benefit plans is calculated on an individual basis and takes into account life expectancy, personnel turnover, salary changes, revaluation of the yields, inflation and the present value of the amounts to be paid.

Provisions for other liabilities and charges
Provisions for other liabilities and charges refer to costs and expenses of a determinate nature which are certain or likely to be incurred but, at the balance sheet date, are uncertain as to the amount or as to the date on which they will arise. Accruals are recorded when there is an obligation, legal or constructive, resulting from a past event, when it is probable that the use of resources will be required to satisfy the obligation and when a reliable estimate of the amount of the obligation can be made. The amount recognized in the financial statements as the provision for other liabilities and charges expresses the best estimate of the monetary resources necessary to extinguish the current obligation at the balance sheet date, taking into account the risks and uncertainties surrounding the obligation. When the accrual is determined by using estimated cash flows to extinguish the obligation, the carrying amount is represented the discounted present value of those cash flows.
Changes in estimates are recorded in the income statement in the period in which the change occurs.

Debt
Interest-bearing debt is recognized at cost which corresponds initially to the fair value of the amount received net of directly attributable costs. Debt is subsequently measured at amortized cost. The difference between amortized cost and the amount to be repaid is recognized in the income statement on the basis of the effective interest rate over the period of the loan.

Debt is classified in current liabilities unless the company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

The amortized cost of a financial liability is the amount at which the financial liability was recognized initially net of principal repayments, increased or decreased by the total amortization on any difference between the initial amount and the maturity amount using the effective interest method.

The effective interest rate is a method for calculating the amortized cost of a financial liability and allocating the interest over the period of reference. The effective interest rate is the rate that exactly discounts future cash flows for estimated payments (including transaction costs paid) over the expected life of the financial instrument or, if appropriate, over a shorter period, to the net carrying amount of the financial liability.

Derivative financial instruments
Derivative financial instruments are recognized initially at fair value at the date the contracts are entered into and are subsequently measured at fair value at year-end. The resulting gains or losses are recognized in the income statement immediately, unless the derivative is designated and is effective as a hedging instrument, in which case the times for recognition in the income statement depend upon the nature of the hedging relationship. IFI S.p.A. designates certain derivatives as fair value hedges of certain assets or liabilities recognized in the financial statements or as cash flow hedges of certain highly probable forecast transactions.

A derivative is classified as a non-current asset or liability if the maturity date of the instrument is beyond 12 months and it is not expected to be realized or settled within 12 months. Other derivatives are classified as current assets or liabilities.

Financial instruments qualify for hedge accounting only when there is formal designation and documentation, including the company's risk management objective and strategy, and the hedge, verified periodically, is highly effective.

When financial instruments qualify for hedge accounting, the following accounting treatment applies:

- Fair value hedge: where a derivative financial instrument is designated as a hedge of the exposure to changes in fair value of a recognized asset or liability that is attributable to a particular risk and could affect the income statement, the gain or loss from re-measuring the hedging instrument at fair value is recognized in the income statement, together with the change in fair value of the hedged item. The gain or loss from the change in fair value of the hedging instrument is recognized on the same line of the income statement as the hedged item.
- Cash flow hedge: where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows of a recognized asset or liability or a highly probable forecast transaction and could affect profit and loss, the effective portion of any gain or loss of the derivative financial instrument is recognized directly in equity. The cumulative gain or loss is removed from equity and recognized in the income statement at the same time in which the hedged transaction affects the income statement. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in equity and is recognized in the income statement at the same time the related transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in equity is recognized in the income statement immediately.

If the conditions of IAS 39 are not met, the transactions, even if they have been set up for the purpose of managing risk exposure, are classified and measured as trading transactions. In that case, the difference from fair value is recognized in the income statement.

Financial income and expenses, other revenues and costs

Dividends are recognized in the income statement when they are approved by the stockholders and only from the earnings generated after the acquisition of the investee company. Instead, when the dividends are distributed from reserves generated before acquisition, the dividends are reported as a deduction from the cost of the investment.

Financial income and expenses are recognized according to the accrual principle on the basis of the effective rate of return.
Revenues from services are recognized by reference to the stage of completion of the service at the balance sheet date.

Transactions in foreign currencies

Transactions in foreign currencies are recorded at the foreign exchange rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the foreign exchange rate prevailing at that date. Exchange differences arising on the settlement of monetary items or on reporting monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements are recognized in the income statement.

Income taxes

Current income taxes are calculated according to the tax laws in force.

Taxes on income are recognized in the income statement except to the extent that they relate to items directly charged or credited to equity, in which case the related income tax effect is recognized directly in equity.

Temporary differences between the amounts of assets and liabilities in the financial statements and the corresponding amounts for tax purposes give rise to temporarily deferred tax liabilities on the taxable temporary differences recorded in a specific provision in liabilities. Deferred tax assets relating to the carryforward of unused tax losses, as well as those arising from temporary differences, are recognized to the extent that it is probable that future profits will be available against which they can be utilized.

Deferred tax assets and liabilities are measured at the tax rates expected to apply to taxable income in the periods in which temporary differences will reverse. Deferred income tax assets and liabilities are offset where there is a legally enforceable right of offset.

Deferred tax assets and liabilities are shown separately from other tax receivables and payables in a specific caption under non-current assets or liabilities.

Use of estimates

The preparation of financial statements and related disclosures that conforms to IFRS requires estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates. Estimates are particularly used for the measurement of investments (impairment losses and reversals). Estimates and assumptions are reviewed periodically and the effects of any changes are reflected immediately in the income statement.

6. Adoption of new accounting standards and interpretations issued by the IASB

<u>Standards and interpretations in effect from January 1, 2007</u>

In August 2005, the IASB issued IFRS 7 – Financial Instruments: Disclosures and a complementary amendment to IAS 1 – Presentation of Financial Statements: Capital Disclosures. The European Commission endorsed IFRS 7 and the complementary amendment to IAS 1 with EC Regulation 108/2006 dated January 11, 2006.

IFRS 7 requires disclosures about the significance of financial instruments for an entity's financial position and performance. These disclosures incorporate many of the requirements previously in IAS 32 – Financial Instruments: Disclosure and Presentation. IFRS 7 also requires information about the extent to which the entity is exposed to risks arising from financial instruments, and a description of management's objectives, policies and processes for managing those risks.

The amendment to IAS 1 introduces requirements for disclosures about an entity's capital and has no effect on the valuation or classification of those items.

On March 3, 2006, IFRIC issued the interpretation IFRIC 9 – Reassessment of Embedded Derivatives. The European Commission endorsed IFRIC 9 with EC Regulation 1329/2006 dated September 8, 2006.

IFRIC 9 requires an entity to assess whether an embedded derivative is required to be separated from the host contract and accounted for as a derivative when the entity first becomes a party to the contract. Subsequent reassessment is prohibited unless there is a change in the terms of the contract that significantly modifies the original cash flows which would otherwise be called for by the contract.

On July 20, 2006, IFRIC issued the interpretation IFRIC 10 – Interim Financial Reporting and Impairment. The European Commission endorsed IFRIC 10 with EC Regulation 610/2007 dated June 1, 2007.

IFRIC 10 states that where an entity has recognized an impairment loss in an interim period on goodwill or on some financial assets, that impairment cannot be reversed in subsequent interim financial statements nor in the annual financial statements.

Standards and interpretations not yet in effect
On November 30, 2006, the IASB issued the standard IFRS 8 – Operating Segments that will come into effect beginning January 1, 2009 and supersedes IAS 14 – Segment Reporting. The European Commission endorsed IFRS 8 with EC Regulation 1358/2007 on November 21, 2007.
On November 2, 2006, IFRIC issued the interpretation IFRIC 11 - IFRS 2 – Group and Treasury Share Transactions, applicable for annual periods beginning on or after March 1, 2007. The European Commission endorsed IFRIC 11 with EC Regulation 611/2007 on June 1, 2007.
IFRIC 11 establishes how to apply IFRS 2 – Share-based Payment to stock-based payment arrangements with an entity's own equity instruments or equity instruments of another entity of the same Group.

On March 29, 2007, the IASB issued a revised version of IAS 23 – Borrowing costs. The standard is in effect from January 1, 2009. The new version removes the option of immediately recognizing as an expense borrowing costs that relate to assets that take a substantial period of time to get ready for use or sale. The standard will be applicable prospectively to borrowing costs relating to qualifying assets capitalized starting from January 1, 2009. At the date of this report, this standard has not yet been endorsed by the European Union.

On July 5, 2007, IFRIC issued the interpretation IFRIC 14 – IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction. The interpretation is in effect from January 1, 2008. The interpretation provides general guidance on how to assess the limit in IAS 19 - Employee Benefits on the amount of the surplus that can be recognized as an asset. It also explains how the defined benefit asset or liability may be affected when there is a statutory or contractual minimum funding requirement. At the date of this report, this interpretation has not yet been endorsed by the European Union.

On September 6, 2007, the IASB issued a revised version of IAS 1 - Presentation of Financial Statements that is in effect from January 1, 2009. The revised standard requires an entity to present changes in its equity resulting from transactions with owners in a statement of changes in equity. All non-owner changes (meaning changes in comprehensive income) are required to be presented either in a single statement of comprehensive income or in two statements (a separate income statement and a statement of comprehensive income). Transactions with non-owners may not be presented in the statement of changes in equity. This standard had not yet been endorsed by the European Union at the balance sheet.

The company believes that the adoption of these standards and interpretations will not have a material effect on the separate financial statements of IFI S.p.A.

Finally, during 2006 and in the first half of 2007, the following interpretations were issued and are not applicable to the separate financial statements of IFI S.p.A.:

- IFRIC 7 – Applying the Restatement Approach under IAS 29 Financial Reporting in Hyperinflationary Economies (in effect from January 1, 2007);
- IFRIC 8 – Scope of IFRS 2 (in effect from January 1, 2007);
- IFRIC 12 – Service Concession Arrangements (in effect from January 1, 2008);
- IFRIC 13 – Customer Loyalty Programmes (in effect from January 1, 2009).

7. Risk management

IFI S.p.A. is not subject to either direct credit risks or currency risks.

Financing needs and cash flows are managed with the aim of optimizing financial resources. In particular, outgoing cash flows from current operations are basically financed by dividends collected. Liquidity risk could thus arise only for investment decisions in excess of cash availability or the revocation of existing credit lines. In this sense, IFI S.p.A. operates so that it has available and partly irrevocable credit lines with expiration dates and amounts consistent with its needs.

IFI S.p.A. assesses and manages its exposure to interest rate risk consistently with its financial management policies and uses derivative financial instruments to fix some of the financing obtained with a pre-set interest rate. There were no derivative financial instruments put into place for speculative purposes. In particular, in 2007, the only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on some of the existing loans.

COMMENTS ON THE PRINCIPAL ITEMS IN THE SEPARATE INCOME STATEMENT

8. Dividends from investments

Dividends amount to € 67,817 thousand (€ 54,259 thousand in 2006) and include dividends collected from IFIL (€ 67,745 thousand) and Emittenti Titoli (€ 72 thousand). In 2006, dividends included those received from IFIL (€ 54,183 thousand) and Emittenti Titoli (€ 76 thousand).

9. Gains on sales of investments

In 2007, gains on sales of investments include the gains from the reimbursement of shares by Deutsche Morgan Grenfell Capital Italy for € 91 thousand (€ 41 thousand in 2006).

In 2006, this line also included the gain of € 104,026 thousand on the sale of the entire investment in Exor Group (3,418,242 shares representing 29.3% of capital stock) to the same Exor Group. Since this was a transaction between related parties, the advisor for the transaction, Citigroup Global Market Limited, had checked the fairness of the sales price, equal to € 206,804 thousand (€ 60.5 per share).

10. Impairment reversals on investments

In 2006, the impairment reversal of € 73,473 thousand referred to 138,426,775 IFIL ordinary shares which in 2002 had been written down on the basis of their market price. The value of IFIL ordinary shares had been completely increased by the reversal up to the original purchase cost. Deferred income taxes had been recorded on the reversal for € 3,879 thousand which, in 2007, were partly released for an amount of € 646 thousand as a result of the reduction in the IRES tax rate from 33% to 27.5%.

11. Financial expenses from third parties

These include:

€ in thousands	**2007**	2006	Change
Interest expenses on bank debt	**10,998**	6,541	4,457
Bank commissions	**1,087**	1,081	6
Interest rate hedging charges on bank loans	**30**	255	(225)
Charges from discounting to present value	**3**	6	(3)
Financial expenses from third parties	**12,118**	7,883	4,235

12. Financial income from third parties

This includes:

€ in thousands	**2007**	2006	Change
Interest income on receivables from:			
- tax authorities	**501**	473	28
- banks	**232**	1,403	(1,171)
Interest rate hedging income on bank loans	**2,544**	761	1,783
Other income	**0**	14	(14)
Total income from third parties	**3,277**	2,651	626

13. Personnel costs

These amount to € 2,666 thousand (€ 2,776 thousand in 2006) and show a total net decrease of € 110 thousand.
Details are as follows:

€ in thousands	**2007**	2006	Change
Salaries	**1,592**	1,762	(170)
Social security contributions	**466**	531	(65)
Employee severance indemnities, other long-term benefit plans and defined benefit plans and payments of plan contributions	**426**	324	102
Other personnel costs	**182**	159	23
Total personnel costs	**2,666**	2,776	(110)

At the end of 2007, employees number 14 (15 at the end of 2006).
The average number of employees in 2007 was 14, summarized by category as follows:

	2007	2006
Managers	**2**	2
Middle management	**2**	2
Clerical staff	**7**	8
Messengers	**3**	3
Average number of employees	**14**	15

Compensation policies

The overall compensation is composed of a fixed and a variable portion, as well as additional benefits.

The fixed compensation is connected to the responsibilities of the person's role, the level of individual expertise and the experience acquired; the variable compensation is tied to objectives and rewards for the results of the work performed by that person both individually and in a team.

Further discretionary bonuses may be paid for exemplary performance in transactions which create value for the company.
The additional benefits, mainly in reference to personnel with management responsibilities, include supplementary pension plans, health care plans, life and disability insurance coverage, loyalty bonuses and, where provided for, the use of a company car.

For additional information on employee benefits, reference should be made to Note 27.

14. Purchases of goods and services from third parties

These amount to € 874 thousand and show an increase of € 65 thousand compared to 2006 (€ 809 thousand). The main expenses refer to the following:

€ in thousands	**2007**	2006	Change
Compensation:			
- Board of Statutory Auditors	**146**	146	0

Dividends statute-barred	**16**	35	(19)
Total other current operating expenses	**1,028**	950	78

16. Income taxes

The taxable base calculated in accordance with tax laws did not generate any current income tax expense for the year 2007.
Since reasonable certainty of recovery against future taxable income currently is not assured, no deferred tax assets have been booked on the tax losses for the years 2003 to 2007 (€ 239 million, in total).

Details are as follows:

	2007		2006	
€ in millions	**Amount**	**Theoretical tax effect (27.5% rate)**	Amount	Theoretical tax effect (33% rate)
Tax losses carried forward (for a maximum of 5 years)				
- year 2003	**147**		147

Deutsche Morgan Grenfell Capital Italy S.A.					
- Class A shares	136		(47)	(36)	**53**
- Class B shares	2		(1)		**1**
Total investments	1,878,936	348,025	(48)	(36)	**2,226,877**

In 2007, IFI purchased 48,750,000 IFIL ordinary shares (4.69% of the class of stock) for € 349,876 thousand, net of dividends of € 1,851 thousand collected on 18,511,000 IFIL ordinary shares purchased in the early months of 2007 and booked as a deduction of the carrying amount of the stock.

The reimbursement of 247 Deutsche Morgan Grenfell Capital Italy Class A shares led to proceeds of € 127 thousand and a net gain of € 91 thousand. The impairment loss of € 48 thousand on Deutsche Morgan Grenfell Capital Italy shares was made on the basis of the equity in the most recent approved financial statements at December 31, 2006.

Comparison between the carrying amounts and market prices of IFIL shares held at December 31, 2007:

				Market price			
	Number of	Carrying amount		December 28, 2007		March 20, 2008	
	shares held	Per share (€)	Total (€ thsd)	Per share (€)	Total (€ thsd)	Per share (€)	Total (€ thsd)
IFIL S.p.A.							
- ordinary shares	723,950,000	3.07	2,220,167	6.39	**4,627,488**	4.60	**3,326,550**
- savings shares	1,866,420	3.42	6,384	5.76	**10,754**	4.00	**7,466**
Total			2,226,551		**4,638,242**		**3,334,016**

Furthermore:

- there are no investments requiring the assumption of unlimited responsibility for their obligations (art. 2361, paragraph 2 of the Italian Civil Code);
- there are no investments held as collateral for financial liabilities and contingent liabilities.

The following details present the additional disclosures required by the Italian Civil Code (art. 2427, paragraph 5) and Consob (Communication 6064293 dated July 28, 2006):

	Capital stock			IFI investment					Equity	Profit

Receivables generated during the year		63	53	116
Balances at December 31, 2007	**18,855**	**63**	**53**	**18,971**

20. Equity – Capital stock

At December 31, 2007, IFI S.p.A.'s capital stock, fully subscribed to and paid-in, amounts to € 163,251,460 and consists of 86,450,000 ordinary shares (52.96% of capital stock) and 76,801,460 preferred shares (47.04% of capital stock) with a par value of € 1 each. The ordinary capital stock of the company is held entirely by Giovanni Agnelli e C. S.a.p.az. IFI's preferred shares are listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment).

Pursuant to art. 6 of the bylaws, ordinary shares may not be disposed of, with effect towards the company, to parties other than the consanguine descendants of their holder and other holders of ordinary shares, unless the shares have been offered beforehand in option to the latter mentioned, with the right of accretion among them.

Pursuant to art. 10 of the bylaws, preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code and the second paragraph of art. 13 of the bylaws.

Pursuant to art. 27 of the bylaws, the profit of each year is appropriated as follows:

- 10% to the legal reserve until it reaches one-fifth of capital stock;
- of the remaining amount, 1% is at the board of directors' disposition for distribution among its members;
- the remaining profit is appropriated as follows:
  - to preferred shares, a preference dividend of 5.17% of their par value, which is not cumulative from one year to the next;
  - after any appropriations to reserves, the residual amount is attributed equally to the ordinary and preferred shares.

Capital stock may be increased for a period of five years, at one or more times, also in divisible form, up to a maximum of € 561,750,000, by the authority delegated, pursuant to art. 2443 of the Italian Civil Code, to the board of directors by the special stockholders' meeting held April 22, 2003.

The board of directors will put forward a motion to the ordinary stockholders' meeting to renew this resolution.

The objectives identified by IFI S.p.A. are the creation of value for all the stockholders, safeguarding the continuity of the company and support for the development of the subsidiary IFIL S.p.A.

IFI thus aims to keep an adequate level of capitalization and guarantee economic accessibility to external sources of financing.
IFI constantly monitors changes in the consolidated debt level based upon the current asset value of its investments and expected dividend flows.

A very prudent approach is nevertheless taken to the use of debt. At December 31, 2007, the negative net financial position (equal to € 392.7 million) represents approximately 8.5% of the asset value (equal to the market value of the investment held in IFIL, € 4,638.2 million).

21. Equity – Capital reserves

At December 31, 2007, the balance of € 386,347 thousand, unchanged compared to the end of the prior year, relates only to Additional paid-in capital.

22. Equity – Retained earnings and other reserves

Details are as follows:

€ in thousands	**12/31/2007**	12/31/2006
Revaluation reserve Law 74, 2/11/1952	**157**	157
Revaluation reserve Law 576, 12/2/1975	**16,940**	16,940
Revaluation reserve Law 72, 3/19/1983	**64,265**	64,265
Legal reserve	**32,650**	32,650
Cash flow hedge reserve	**1,776**	3,091
Reserve for purchase of treasury stock	**200,000**	150,000
Extraordinary reserve	**997,386**	829,835
Total retained earnings and other reserves	**1,313,174**	1,096,938

23. Equity reserves available and distributable

Disclosure required by art. 2427, 7 bis of the Italian Civil Code on the equity reserves available and distributable is as follows:

€ in thousands	**Balance at 12/31/2007**	Possibility of use	Amount available
Capital reserves:			
Additional paid-in capital (a)	**386,347**	A,B,C	386,347
Extraordinary reserve	**458**	A,B,C	458
Earnings reserves:			
Revaluation reserve Law 74, 2/11/1952 (b)	**157**	A,B,C	157
Revaluation reserve Law 576, 12/2/1975 (b)	**16,940**	A,B,C	16,940
Revaluation reserve Law 72, 3/19/1983 (b)	**64,265**	B	64,265
Legal reserve	**32,650**	A,B	0
Cash flow hedge reserve	**1,776**	B	0
Reserve for purchase of IFI treasury stock	**200,000**	B	0
Extraordinary reserve (c)	**996,928**	A,B,C	926,451
Total	**1,699,521**		1,394,618
Residual portion distributable			**1,394,618**

A: For capital increases; B: For coverage of losses; C: For distribution to stockholders.

(a) Since the legal reserve is equal to one-fifth of capital stock (art. 2431 Italian Civil Code), the reserve is distributable.

(b) The revaluation reserves can be used for bonus increases of capital stock. If used to cover losses, they must be later replenished, if not, then no dividends can be distributed. They may not be used to set up the reserve for the purchase of treasury stock. The monetary revaluation reserves can be reduced only by resolution of the stockholders' meeting and in observance of the prescriptions indicated in art. 2445, paragraphs 2 and 3 of the Italian Civil Code.

(c) The reserve is distributable except to the extent of the amount deriving from the reallocation of the reserve offsetting the stock in portfolio.

In the years 2004, 2005 and 2006, reserves were not used to absorb losses.

At December 31, 2007, tax-deferred reserves are recorded for a total of € 83,394 thousand, of which € 81,362 thousand relates to the monetary revaluation reserves and € 2,032 thousand to the legal reserve. In the event of distribution, these reserves would form part of the taxable income of the company.
In view of the unlikelihood of their distribution, no deferred taxes have been set aside in respect of such reserves.

24. Equity – Treasury stock

At December 31, 2007, IFI S.p.A. directly holds the following preferred shares of treasury stock:

€ in thousands	Number of shares	Amount Per share (€)	Amount Total (€ in thsd)	% of class
IFI – preferred shares	5,360,300	13.15	70,477	6.98

In 2007, there were no transactions involving preferred shares of treasury stock.

The ordinary stockholders' meeting held on May 15, 2007 authorized the purchase of treasury stock for 18 months, pursuant to art. 2357 of the Italian Civil Code and art. 132 of Legislative Decree 58 dated February 24, 1998, for a maximum of 16 million shares, for a maximum amount of € 200 million.

The board of directors will put forward a motion to the ordinary stockholders' meeting to renew this resolution.

25. Current and non-current liabilities – Bank debt

Non-current bank debt amounts to € 100,000 thousand (€ 125,000 thousand at December 31, 2006).
Interest rate swaps are in place to guarantee fixed interest rates on the entire amount; at December 31, 2007, the fair value on these contracts is positive for € 254 thousand.
Bank debt is classified in non-current liabilities in relation to the residual period of the credit line granted and the duration of the relative hedging contracts.

The current portion of bank debt amounts to € 294,323 thousand (€ 35,350 thousand at December 31, 2006) and includes loans for € 150,000 thousand due by the end of June 2008, use of short-term funds for € 144,100 thousand and bank overdrafts for the remaining amount (€ 223 thousand).
Interest rate swaps are also in place on the current portion of loans secured in prior years. At December 31, 2007, the fair value on these contracts is positive for € 1,522 thousand.

With regard to the periods in which the outgoing cash flows relating to interest rate swap contracts will reverse, reference should be made to Note 28.

At December 31, 2007, the company has credit lines for € 1,101 thousand, of which € 605 thousand is irrevocable.
Credit lines by maturity are as follows:

€ in thousands	Agreed lines	Of which, irrevocable
To 1 year	731	235
2 to 5 years	370	370
Total	**1,101**	**605**

The loan contracts relating to irrevocable lines of credit provide for commitments which are common practice in the sector for this type of debt. In particular, some of the main commitments included in certain contracts refer to the obligation of periodic disclosure, not setting up new real guarantees on the assets of the company without the prior consent of the creditors, the non-subordination of the loan, as well as, in some cases, compliance with financial ratios. Finally, there are clauses that could change the duration in the case of serious non-fulfillment such as, for example, failure to pay interest or when extremely serious events arise such as a request to place the company under administration.

26. Non-current liabilities – Deferred tax liabilities

An analysis is as follows:

€ in thousands	Amount	Taxable (16%)	Rate reduction	To equity	To income statement	Total
Balance at December 31, 2006						**3,979**
Adjustment due to the change in the IRES tax rate from 33% to 27.5% on the impairment reversal of the carrying amount of IFIL ordinary shares in 2006	73,473	11,756	5.5%	0	(646)	**(646)**
Balance at December 31, 2007				**0**	**(646)**	**3,333**

The deferred income taxes originated from temporary differences between the carrying amount and the fiscally recognized amount for the investment held in IFIL.

27. Non-current liabilities – Provisions for employee benefits

The composition is as follows:

€ in thousands	**12/31/2007**	12/31/2006
Employee severance indemnities	**1,918**	1,746
Other provisions for employees	**227**	64
Total provisions for employee benefits	**2,145**	1,810

Details of the changes during 2007 are as follows:

	2007			2006		
€ in thousands	**Employee severance indemnities**	**Other provisions for employees**	**Total**	Employee severance indemnities	Other provisions for employees	Total
Balance at beginning of year	**1,746**	**64**	**1,810**	1,594	48	1,642
Current service cost	**113**	**35**	**148**	138	39	177
Financial expenses	**65**	**38**	**103**	63	33	96
Contributions paid by employees	**0**	**0**	**0**	0	0	0
Actuarial (gains) losses	**(2)**	**92**	**90**	(6)	(56)	(62)
Benefits paid	**(4)**	**(2)**	**(6)**	(43)	0	(43)
Past service cost	**0**	**0**	**0**	0	0	0
(Gains) losses on curtailments and/or settlements	**0**	**0**	**0**	0	0	0
Plan changes	**0**	**0**	**0**	0	0	0
Balance at end of year	**1,918**	**227**	**2,145**	1,746	64	1,810

An analysis of employee benefits is as follows:

Employee severance indemnities

Employee severance indemnities represent the obligation due to employees by law (recently amended by Law 296/06) that has accrued and which will be paid upon termination of employment. In certain circumstances, a portion of the indemnity may be paid as an advance during the employee's service life. This is an unfunded defined benefit plan, considering the benefits almost entirely accrued, with the sole exception of the revaluation.

After the change made to the regulations for employee severance indemnities by Law 296 dated December 27, 2006 (Budget Law 2007), and subsequent decrees and regulations, the portion of employee severance indemnities accruing from January 1, 2007, for employees who have asked, have been transferred to a complementary pension plan chosen by the employees and these therefore fall under defined contribution plans.

For those employees who did not elect the transfer of the accrued portion of employee severance indemnities, beginning January 1, 2007, the calculation of employee severance indemnities, including the portion accruing, will be made according to the usual actuarial method.

Besides employee severance indemnities, established by art. 2120 of the Italian Civil Code, IFI S.p.A. guarantees other forms of benefits (termination benefits, loyalty bonuses, health care plans, defined benefit and defined contribution pension plans) under company or individual supplementary agreements, described below.

Termination benefits

This is a fixed amount in addition to employee severance indemnities which will be paid at the time and in relation to the termination of the employment relationship, at the currently-expected retirement age, on the basis of existing legislation, at the age of 65 for men and at the age of 60 for women. Any raising of the retirement age for whatsoever reasons will have no effect on the payment of these benefits. In the eventuality of the termination of employment for whatsoever reason prior to the legal retirement age indicated above, the benefits shall be paid for the amount accrued up to the date of termination of employment, compared with and in proportion to the years of service since January 1, 2000 up to the date of the termination of employment. No interest or revaluations of any sort accrue on the amount.

Health care plans

Health care plans, historically offered to management staff, have been extended to all employees since the end of 2007, and require the payment of defined contributions to outside funds and entities which pay the health care benefits.

Pension plans

The company's pension plans are for employees categorized as managers and are covered by company agreements and regulations.
They can be "defined benefit" or "defined contribution" plans and provide for the payment of contributions to outside funds that are legally separate and have autonomous assets.
The plans provide for a contribution by the employer and a contribution by the employee plan participant, also by conferring a part of his/her employee severance indemnity.
The liabilities for contributions payable are included in "Other payables". The contribution cost for the period accrues on the basis of the service rendered by the employee and is recognized in personnel costs.

Other benefits

Other benefits include loyalty bonuses payable to all employees.
Loyalty bonuses accrue and are paid after a certain number of years of service (25, 30, 35 and 40 years).

Other information

The actuarial calculations required to determine the liability of defined benefit plans are performed by an independent actuary at the end of each year. At December 31, 2007 and December 31, 2006, the liability has been calculated on the basis of the following actuarial assumptions:

	12/31/2007	12/31/2006
Discount rate	**4.60%**	4.25%
Expected remuneration increase	**2-3.50%**	2-3.50%
Cost-of-living increase	**2.00%**	2.00%

In addition to the above financial indexes, account has also been taken of all the demographic assumptions relating to the probability of events such as death, disability, dismissal and retirement of the employees.

Defined benefit plans may be unfunded or they may be wholly or partly funded by contributions paid by the employer and the employee plan participants to an entity, or fund, that is legally separate from the employer and from which the employee benefits are paid.

28. Additional information on financial instruments and financial risk management policies

The carrying amounts and the relative income (expenses) originating from each category of asset and liability classified in accordance with IAS 39 is presented as follows:

Fair value of financial assets and liabilities and the criteria for the determination of fair value

For IFI S.p.A., the carrying amount of financial assets and liabilities approximates their fair value.

Credit risk

IFI S.p.A. effectively is not subject to credit risk since the counterparts are mainly represented by high-credit-quality leading banking institutions. At December 31, 2007 and December 31, 2006, there are no financial assets overdue and impaired and provisions for the impairment of receivables.

Liquidity risk

The residual contract maturities for all the financial liabilities which fall under the application of IAS 39 are indicated below.

The table has been prepared by allocating the remaining cash flows from existing contracts, including principal and interest; with regard to floating-rate loans, the most recent coupon rate with the bank counterpart was used for the projection of future maturities.

Flows relating to non-current and current bank debt are hedged by the interest rate swaps referred to in Note 25.

	2007					
€ in thousands	To 6 months or until canceled	6 months to 1 year	1 to 3 years	3 to 5 years	After 5 years	**Total**
Bank debt, non-current	2,422	2,422	109,723			114,567
Bank debt, current	296,756					296,756
Payables to related parties	147					147
Trade payables to third parties	146					146
Total	**299,471**	**2,422**	**109,723**	**0**	**0**	**411,616**

	2006					
€ in thousands	To 6 months or until canceled	6 months to 1 year	1 to 3 years	3 to 5 years	After 5 years	Total
Bank debt, non-current	2,253	2,253	151,708			156,214
Bank debt, current	10,805					10,805
Payables to related parties	216					216
Trade payables to third parties	124					124
Other current payables	15					15
Total	**13,413**	**2,253**	**151,708**	**0**	**0**	**167,374**

Outgoing flows from current operations are substantially financed by incoming flows from ordinary business and cash availability.

Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or difficulties in raising sufficient funds that can be readily used. In this sense, IFI S.p.A. operates so as to have irrevocable credit lines available with expiration dates and amounts consistent with its investment plans.

Market risk
IFI S.p.A. is principally exposed to the following exchange rate, interest rate and price risks.

Exchange rate risk
IFI S.p.A. does not have financial liabilities denominated in currencies other than Euro.
It is therefore not subject to direct currency risks.

Interest rate risk
The analysis of debt by interest rate shows that the rates are between 3.5% and 5.5% for both the current year and 2006.

IFI S.p.A. has some interest rate swap contracts in place at December 31, 2007, for a notional amount of a total of € 250 million, to hedge the risk of fluctuations in interest rates on bank debt with a positive fair value equal to € 1,776 thousand.

A sensitivity analysis at the balance sheet date has been prepared in respect of financial instruments exposed to interest rate risk. In the case of floating-rate liabilities, the analysis was prepared assuming that the exposure at the end of the year remained constant for the entire year. The assumptions used for the model are as follows:

- to debt: a symmetrical change of 50 basis points is applied;
- for interest rate swaps: the change in fair value is recalculated applying a parallel and symmetrical shift of 50 basis points to the current interest rate curve at the balance sheet date.

The effects of an increase or decrease of 50 basis points in interest rates would be the following:

	12/31/2007		12/31/2006	
€ in thousands	**income statement**	**balance sheet**	income statement	balance sheet
+50 bsp				
cash and cash equivalents/financing	**(721)**		296	
hedging instruments		**417**		304
-50 bsp				
cash and cash equivalents/financing	**721**		(296)	
hedging instruments		**(440)**		(319)

Price risk
IFI S.p.A. is only exposed to price risk in respect of its strategic investment in IFIL S.p.A., accounted for at cost.

Sensitivity analysis for price risks
Considering the characteristics of the company's principal investment, a sensitivity analysis for price risk would not be significant.

29. Compensation to directors and statutory auditors

(Art. 78 of Consob Regulation adopted by Resolution 11971 dated May 14, 1999 and subsequent amendments)
All amounts in the following table are expressed in thousands of Euro.

Name	Post held	Term of office	Expiration of term of office (a)	Compensation for post held	Non-monetary benefits	Bonuses and other incentives	Other compensation
Directors in office							
Elkann John	Chairman	4/17-12/31	2009				599 (b)

Total Statutory Auditors				**146**	**0**	**0**	**124**

(a) The term of office expires in concurrence with the stockholders' meeting that will approve the financial statements for the year ended December 31, 2008.
(b) Compensation for the posts held in companies of the Group.
(c) Employment income paid by IFI S.p.A.
(d) Does not include € 56,918 paid by Fiat not received but collected directly by IFI S.p.A.

There are no key managers with strategic responsibilities in IFI S.p.A.

The company also signed a third-party liability insurance policy for the directors with a Group of insurance companies for a maximum claim per incident and per year of € 50 million for coverage in the event of requests for reparation of non-fraudulent acts.

The Chairman, John Elkann, does not receive any compensation for his post. The remuneration of the directors Gianluigi Gabetti and Pio Teodorani-Fabbri is not linked to either the economic results of the company or targets set by the board of directors.
A part of the compensation of the general manager, however, is tied to the economic results of the company and the reaching of specific targets.

Stock options granted to the directors and the general manager

(Art. 78 of Consob Regulation adopted by Resolution 11971 dated May 14, 1999 and subsequent amendments)
The board of directors of IFI S.p.A. to date has not approved any stock option plans.

30. Transactions with related parties

The board of directors has adopted principles of conduct for carrying out transactions with related parties which are described in the Annual Report on Corporate Governance, available also on the website of the company (http://www.gruppoifi.com).

With regard to the year 2007, the transactions between IFI S.p.A. and the related parties identified in accordance with IAS 24 are carried out as set forth in existing laws on the basis of reciprocal economic gain.

Receivables and payables are not guaranteed and are settled in cash. Guarantees have neither been granted nor received.
Costs have not been recognized during the period for non-existent or doubtful liabilities in relation to amounts due from related parties.

A summary of the balance sheet and income statement balances generated by transactions with related parties carried out during 2007 is presented below. All amounts are expressed in thousands of Euro.

Counterpart	Trade receivables	Trade payables
G.A. Servizi S.r.l.		64
IFIL S.p.A.	4	3
Soiem S.p.A.		54
Companies of the Fiat Group		26
Other companies	65	
Total transactions with related parties	**69**	**147**

- Directors, for special mandates	158			
Directors for services rendered				64
Total transactions with related parties	**1,094**		**15**	**187**
Total transactions with third parties	874		3,277	269
Total of the line on income statement	**1,968**		**3,292**	**456**
Ratio of total transactions with related parties to the total of the lines on the income statement %	**55.59%**		**0.46%**	**41.01%**

The most important transactions are commented below with reference to the notes in the preceding tables.

a) The purchases for goods and services from the subsidiary Soiem S.p.A., amounting to € 388 thousand, relate to the lease of the offices of the headquarters in Turin, Corso Matteotti 26, computer, telephone and logistics services.
b) Revenues from Group companies derive from the performance of services and compensation for posts held by IFI S.p.A. staff.
c) The compensation to directors in 2007 amounts to € 381 thousand. The preceding Note 29 presents the information required by art. 78 of Consob Regulation 11971, as amended by Resolution 15520 dated July 2006.

Information regarding dividends collected from related parties (€ 67,817 thousand), described in Note 8, represents almost the entire net amount of income from investments.

At December 31, 2007, Tiberto Brandolini d'Adda holds 304,153 options to subscribe or purchase the same number of Sequana Capital shares between May 2009 and May 2013 at a price per share of € 20.46.

Furthermore, Sequana Capital has assigned Tiberto Brandolini d'Adda, gratuitously, 12,340 shares that will be assigned on March 29, 2008 and available from March 29, 2010.

During 2007, Sequana Capital paid compensation to Tiberto Brandolini d'Adda for a total of € 3,361,973.

Moreover, in 2007, the director, Franzo Grande Stevens, rendered professional services to IFIL S.p.A. for € 1,150 thousand and to Fiat S.p.A. for € 1 million (including acting as the secretary to the board of directors).

31. Fees paid to the Audit Firm (art. 149 – duodecies of Consob Regulation 11971 dated May 14, 1999 and subsequent amendments)

The professional services rendered to IFI S.p.A. by the Audit Firm in 2007 are the following:

€ in thousands	Party which rendered the service	Parent IFI S.p.A.	Consolidated subsidiaries		**Total**
Type of services					
Audit	Deloitte & Touche S.p.A. Rete Deloitte	30	2,175		**2,205**
Total audit		30	2,175		**2,205**
Other services					
. attestation services	Deloitte & Touche S.p.A. Deloitte network		28	(a)	**28**
. other services	Deloitte & Touche S.p.A. Deloitte network		139	(b)	**139**
Total other services		0	167		**167**
Total		**30**	**2,342**		**2,372**

(a) Tests for issuing the comfort letter on the prospectus relating to the IFIL bond issue 2007/2017 and confirmation of the financial ratios.

(b) Agreed procedures carried out with reference to the completeness and the updating of the IFIL Group's IFRS reporting package.

In order to complete the disclosure, it should be noted that the fees paid for professional services to the audit firm of Deloitte & Touche and its network by the Fiat Group (accounted for by the equity method in the consolidated financial statements of the IFI Group) is € 22.2 million.

32. Net financial position

In accordance with the provisions of Consob Communication 6064293 dated July 28, 2006, the composition of the net financial position of IFI S.p.A. is provided below:

€ in thousands	**12/31/2007**	12/31/2006	Change
Cash and cash equivalents	**166**	59,681	(59,515)
Non-current financial receivables:

(a) Of which € 348 million refers to the purchase of IFIL ordinary shares, € 121 million to the purchase of SGS shares, € 35 million to the subscription of Gruppo Banca Leonardo capital stock increase, € 27 million to the subscription of DLMD bonds, € 19 million to Ancom USA purchases, € 11 million to the investment in NoCo B and € 1 million to other minor investments.

(b) For additional information, reference should be made to Note 18.

(c) These mainly refer to forms of investments of liquidity which at the end 2007 are classified in cash and cash equivalents (in 2006, the liquidity was invested in short-term financial assets).

The reconciliation between cash and cash equivalents in the statement of cash flows and the corresponding lines on the balance sheet is presented in Note 27.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. General information on the activities of the Group

IFI – Istituto Finanziario Industriale S.p.A. (abbreviated in IFI S.p.A.) is a corporation organized under the laws of the Republic of Italy.
The head office of the company is located in Turin, Italy, Corso Matteotti 26.
The ordinary capital stock of the company is held entirely by Giovanni Agnelli e C. S.a.p.az. IFI preferred stock is listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment).
The assets of the company are represented by its controlling investment in IFIL Investments S.p.A., for 69.99% of ordinary capital stock.

Additional information is presented in the section "IFI Group Profile" of the Directors' Report on Operations.

2. Basis of presentation of the consolidated financial statements

The consolidated financial statements at December 31, 2007 of the IFI Group have been prepared in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and endorsed by the European Commission. The designation "IFRS" also includes all valid International Accounting Standards (IAS), as well as all interpretations of the International Financial Reporting Interpretations Committee (IFRIC), formerly the Standing Interpretations Committee (SIC).

The consolidated financial statements have also been prepared in accordance with the provisions contained in Consob Resolutions 15519 and 15520 and in Communication 6064293 dated July 28, 2006, in accordance with art. 9, paragraph 3, of Legislative Decree 38 dated February 28, 2005.

The consolidated financial statements of the IFI Group are expressed in millions of Euro.

3. Format of the consolidated financial statements

The consolidated income statement is presented using a classification based on the nature of expenses as this is believed to provide information that is more relevant than one based on the function of expenses as presented by the operating companies consolidated line-by-line.

The consolidated balance sheet makes a distinction between current and non-current assets, in accordance with IAS 1.

The consolidated statement of changes in equity presents the total income and expense recognized directly as an increase and decrease of reserves in a specific section.

The consolidated statement of cash flows is presented using the indirect method. Income and expenses for the year are adjusted by the effects of non-monetary transactions, by past or future deferrals or accruals of operating collections or payments and by financial elements due to investment or financing activities.

The Euro is the functional currency and presentation currency of the Group.

4. Unusual and/or atypical transactions and significant nonrecurring events and transactions and related party transactions

In 2007, there are no significant unusual and/or atypical transactions, also on the basis of information received from the companies of the Group, that are required to be disclosed pursuant to and as defined by Consob Communication 6064293 dated July 28, 2006.

With regard to significant nonrecurring events and transactions, the following is noted:

Consob sanctionary measure

On December 5, 2007, the Court of Appeals of Turin reduced the administrative sanction imposed on IFIL S.p.A. by Consob from € 4.5 million to € 1 million with regard to the contents of the press release issued on August 24, 2005.
The refund requested as a result of the reduction of the sanction is equal to € 3.5 million, including interest earned, and is recorded in nonrecurring income in 2007.
Additional information is disclosed in the Directors' Report on Operations.

Sale of a stake in the investment in Sequana Capital S.A.

On July 6, 2007, the subsidiary Ifil Investissements S.A. reached an agreement for the sale of an approximate 22% stake in Sequana Capital S.A. to DLMD – a company controlled by Pascal Lebard, general manager of Sequana Capital S.A.
After having obtained approval from the competent authorities, on July 27, 2007, Ifil Investissements S.A. sold 10,806,343 Sequana Capital shares at € 21 per share for a total equivalent amount of € 227 million. On consolidation, the disposal generated a loss of € 55 million, including transaction costs, recognized in “Discontinued operations or assets held for sale" (Note 18).
Ifil Investissements S.A. partially financed the deal by subscribing S-Bonds issued by DLMD, maturing on July 27, 2010, for a total equivalent amount of € 27 million.

Note 14 discloses other minor nonrecurring transactions.

The balance sheet and income statement balances generated by transactions with related parties are summarized and commented in Note 41.

5. Significant accounting policies

Consolidation

The companies in which the IFI Group has the power to exercise control, directly or indirectly, by determining the financial and operating policies of an enterprise so as to gain benefits from its activities are consolidated line-by-line, attributing to the minority interest the share of equity and the net result.

The financial statements of subsidiaries as defined above are included in the consolidated financial statements from the date that control by the Group commences until the date that control ceases.

Pending an opinion by the IASB, which has also been requested by the European Commission by letter dated October 26, 2006, that will definitively clarify the criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, the IFI Group has continued to exclude the Fiat Group, in which the subsidiary IFIL S.p.A. has a 30.45% holding of ordinary capital stock, from line-by-line consolidation consistently with the method followed for the first-time adoption of IFRS and the preparation of the consolidated financial statements at December 31, 2005 and December 31, 2006. However, in order to provide more meaningful disclosure, Note 44 presents the consolidated proforma data as if the Fiat Group had been consolidated line-by-line.

The investment in the Fiat Group, subsidiaries excluded from consolidation, joint ventures, associates and other investments accounted for by the equity method are stated according to the criteria indicated in “Investments in unconsolidated companies”.

The results of discontinued operations or assets held for sale which meet the specific requirements of IFRS 5 are shown separately and correspond to the results achieved up to the time of disposal, after taxes and other direct attributable costs, as well as the gains (losses) on their sale.

The share of the equity and the results of operations attributable to the minority interest are disclosed separately. The minority interest in equity is determined on the basis of the fair value attributed to the assets and liabilities at the date of the acquisition of control, excluding any goodwill referring to them.

When losses in a consolidated subsidiary pertaining to the minority interest exceed the minority interest in the subsidiary's capital stock, the excess, or deficit, is charged to the Group, unless the minority interests are expressly committed to reimbursing the losses, in which case the excess is recorded as an asset in the consolidated financial statements. If no such commitment is in place, should profits be realized in the future, the minority interests' share of those profits will be attributed to the Group, up to the amount necessary to recover the losses previously absorbed by the Group.

The effects of subscribing to capital stock increases when there are different issue prices for the various classes of stock are recognized as changes in equity.

Date of reference. Investments are consolidated using the financial statements at December 31, the closing date of the parent, which covers a 12-month period, or accounting data prepared as of the same date (when the closing date differs from that of the parent), adjusted, where necessary, to conform with the accounting principles of the Group. The Alpitour Group, which fiscal year ends on October 31 of each year, is consolidated line-by-line on the basis of the consolidated financial statements ended on that date, since it is impossible to obtain the consolidated accounting data at December 31, on a timely basis without disproportionate expense. Between November 1 and December 31, 2006 and 2007, there were no significant transactions or events which would have required adjustments to the consolidated financial statements of the Alpitour Group. This treatment is allowed by IAS 27 – Consolidated and Separate Financial Statements.

Intragroup transactions. Intragroup balances and significant transactions and any unrealized gains and losses between companies consolidated line-by-line are eliminated. Unrealized gains and losses arising from transactions with companies accounted for by the equity method are eliminated to the extent of the Group's interest in those companies. Intragroup losses are not eliminated if they are considered representative of an effective lower value of the asset sold.

Business combinations

Acquisitions of companies and business segments are recorded using the purchase method of accounting. The cost of an acquisition is measured as the sum of the fair value (at the acquisition date) of the assets given (consideration paid), liabilities incurred or assumed and any equity instruments issued by the Group in exchange for the acquisition of the control of the acquired company, plus each cost directly attributable to the acquisition. The identifiable assets, liabilities and contingent liabilities of the company acquired, which meet the conditions for recognition under IFRS 3, are recognized at their fair value at the acquisition date, except for non-current assets (or Groups of assets held for sale) which are classified as held for sale, in accordance with IFRS 5, and are recognized and measured at fair value net of selling costs.

Goodwill originating on acquisition is recognized in assets and recorded initially at cost, measured as the excess of the cost of acquisition over the Group's interest in the fair value of the recognized identifiable assets, liabilities and contingent liabilities. If this interest exceeds the cost of acquisition, the values are re-examined and if there is still an excess, it is recognized immediately in the income statement.

The share of the minority interest in the company acquired is recognized initially at the fair value of the assets, liabilities and contingent liabilities recognized.

Investments in unconsolidated companies

The investment in the Fiat Group and in associates (principally Sequana Capital) are accounted for by the equity method. Under this method, such investments are stated at cost, increased or decreased by the Group's share of the fair value of the post-acquisition movements in the net assets of the company and any impairment of the investment. When the Group's share of any losses in the unconsolidated companies exceeds its interest, the Group only recognizes the losses if it has assumed legal or constructive obligations or has made payments on behalf of these companies.

Any excess of the cost of acquisition over the Group's interest in the fair value of the assets, liabilities and contingent liabilities of the investees recorded at the date of acquisition is recognized as goodwill. Goodwill is included in the carrying amount of the investment and is tested for impairment in accordance with IAS 36.

Intangible assets

Goodwill. In the case of acquisitions of businesses, the acquired identifiable assets, liabilities and contingent liabilities are recorded at fair value at the date of acquisition.
The excess of the cost of acquisition over the Group's interest in the fair value of those assets and liabilities is classified in the assets in the balance sheet. Goodwill relating to the minority interest of subsidiaries acquired is eliminated. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized in the income statement at the date of acquisition.
Goodwill is not amortized, but is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, in accordance with IAS 36 – Impairment of Assets. Goodwill is allocated to cash-generating units or Groups of cash-generating units representing the operating level at which the Group controls the rate of return of the investments.
After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Impairment losses on goodwill are not reversed.

On disposal of a part or the whole of a business which was previously acquired and which gave rise to the recognition of goodwill, the residual amount of the related goodwill is included in the determination of the gain or loss on disposal.
In the context of IFRS First-time Adoption, the Group elected not to apply IFRS 3 – Business Combinations retrospectively to the acquisitions of businesses that occurred before January 1, 2004; as a consequence, goodwill arising on acquisitions before the date of transition to IFRS has been retained at the previous Italian GAAP amounts, subject to being tested for impairment at that date.

Other intangible assets: purchased or internally-generated are recognized as assets in accordance with IAS 38 – Intangible Assets when they are controlled by the enterprise, where it is probable that the use of the asset will generate future economic benefits and where the costs of the asset can be determined reliably.
Revaluations are not permitted even if allowed by specific laws.
Such assets are measured at purchase or manufacturing cost and amortized systematically on a straight-line basis over their estimated useful lives, if these assets have finite useful lives, taking into account estimated realizable value and writedowns for impairment losses. Intangible assets with indefinite useful lives and those not yet in production are not amortized, but tested for impairment annually and more frequently, whenever there is an indication that the asset may be impaired. When, subsequently, there is an indication that an impairment loss may no longer exist or may have decreased, the carrying amount of the asset is increased up to the new estimated recoverable amount which cannot exceed the amount which would have been determined had no impairment loss been recognized. The reversal of an impairment loss is recognized immediately in the income statement.

Intangible assets with a finite useful life are amortized from the time they are ready for use on a straight-line basis over the estimated useful life.

Other intangible assets recognized following the acquisition of an enterprise are capitalized separately from goodwill if they meet the definition of intangible asset and if their fair value can be measured reliably. The costs of such intangible assets are represented by their fair value at the date of acquisition.

Amortization plans and any realizable value are reviewed at least annually.

Players' registration rights: are recognized at the cost of acquisition, discounted to present value if there is an installment payment plan, including any additional costs. Such rights are recognized initially on the date affixed by the *Lega Nazionale Professionisti* giving execution to the contracts for national transfers and the transfer date indicated by the *Federazione Italiana Giuoco Calcio* for international transfers.
Players' registration rights also include sharing receivables and payables ex. art 102 bis of the N.O.I.F (Internal Organizational Rules issued by the Italian Soccer Federation – F.I.G.C.)". Player sharing receivables represent the value of the simultaneous repurchase of 50% of the registration rights of the players sold. They are recorded at the adjusted cost and amortized net of any residual value estimated at the end of the useful life. If the residual value is equal to or higher than the historical cost of recognition, the amortization is zero. Adjusted cost is the lower of the cost incurred originally under the legal form of agreement between the parties and the actual repurchase value. Player sharing payables represent 50% of the value at which the player sharing rights were sold and are deducted from the registration rights of the players sold to show the actual portion disposed of. As a result, the amortization of players' registration rights (the residual portion of the sharing right that was sold) is calculated on that lower cost.

Players' registration rights are amortized on a straight-line basis over the term of the contract between the subsidiary, Juventus Football Club, and the individual professional players. The original amortization plan can be extended due to the early renewal of the contract, from the season in which the renewal takes place. For youth players registered as "*giovani di serie*", amortization is taken over five years on a straight-line basis.

When there is an indication that the players' registration rights might be impaired they are tested for impairment by considering the following factors:

- identification and direct analysis by management, which, at its discretion, may be assisted by an external expert, of objective parameters to be used in assessing the value of the players' registration rights (e.g. player's role and age, analysis of the values at which the players were transferred in the most recent transfer campaigns, call-up to the national teams, etc.);
- identification of the individual rights as cash-generating units, without the possibility of compensating this with the revaluation of other rights which could have emerged from the assessment in the previous point. An individual analysis is made since it is believed that the first impairment indicator can be identified for each single registration right;
- carrying out another possible test of the recoverability of the overall investment by analyzing other factors linked with the team as a whole; this is to consider whether there could be an impairment loss even when there are no impairment indicators (or impairment losses) at the level of the individual registration right.

Property, plant and equipment

Property, plant and equipment are stated at purchase or production cost less accumulated depreciation and impairment losses. Revaluations are not permitted, even if allowed by specific laws.

Purchase cost includes all directly attributable costs necessary to make the asset ready for use. When there are current obligations for decommissioning, the carrying amount includes the estimated costs (discounted to present value) to be incurred when the structure is decommissioned which is recognized with an offsetting entry to a specific provision account.

Any capital investment grants are recorded in the balance sheet in liabilities and subsequently allocated systematically to the income statement in relation to the relative depreciation of the assets.

Financial expenses associated with investments are generally charged on the accrual basis to the income statement.

Assets acquired under finance leases are recognized in property, plant and equipment with an offsetting entry to financial payables to lessors and depreciated on the basis indicated below. Whenever there is a reasonable certainty that the asset will not be purchased at the end of lease, depreciation is taken over the period of the lease, if shorter than the useful life of the asset.

If an asset has significant components with different useful lives, these components are recorded and depreciated separately.

Subsequent purchase costs are capitalized only if they increase the future economic benefits of the assets to which they refer. All other costs are recognized in the income statement when incurred.

Property, plant and equipment are depreciated systematically using the straight-line method, from the time they are ready for use, over their estimated useful lives and taking into account estimated realizable value. The carrying amounts are periodically tested for impairment. When, subsequently, there is an indication that an impairment loss may no longer exist or may have decreased, the carrying amount of the asset is increased up to the new estimated recoverable amount which cannot exceed the amount which would have been determined had no impairment loss been recognized. The reversal of an impairment loss is immediately recognized in the income statement.

The estimated useful lives for the main categories of property, plant and equipment are as follows:

Buildings	from 10 to 40 years
Plant and machinery	from 5 to 20 years
Industrial equipment	from 5 to 20 years
Other assets	from 3 to 25 years

The depreciation plan and the estimate of realizable value are reviewed annually.

The cost of land is recorded separately and is not depreciated since it has an indefinite life.

Non-current other financial assets
Financial investments are recognized and reversed on the trading date if the purchase or sale of an investment is made through a contract which terms require the delivery according to the terms established by the reference market and are initially measured at fair value, increased by transaction costs.

Such financial investments are classified in the following categories: available-for-sale investments and securities and other financial assets held to maturity.

Available-for-sale investments: are measured at fair value which coincides, for listed investments, with the market price on the last day of the reporting period translated, if necessary, at the year-end exchange rate. Unrealized gains and losses are recognized directly in equity, net of the relevant deferred tax effect. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity should be reversed and recognized in the income statement. The reversal of such impairment losses may not later be made through the income statement. Upon disposal of the asset, the accumulated gains or losses previously recognized in equity are transferred to the income statement.

Dividends on investments held for sale are recognized in the income statement when the Group has the right to receive them.

Available-for-sale securities: represented by debt securities, are initially recognized at cost and subsequently measured at fair value. The difference is recognized in equity. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity is reversed and recognized in the income statement. Such impairment losses, when the reasons which gave rise to them no longer exist, are reversed in the income statement but only up to the initial amount.

Securities, security deposits and other financial assets: held to maturity are recognized and measured at amortized cost.

The amortized cost of a financial asset is the amount at which the financial asset is recognized initially net of the repayment of principal, adjusted down on the basis of the total amortization of any difference between the initial amount and the maturity amount using the effective interest method, less any writedown (made directly or through the use of an accrual) for impairment or uncollectibility.

The effective interest rate is a method for calculating the amortized cost of a financial asset and allocating the interest over the period of reference. The effective interest rate is the rate that exactly discounts future cash flows for estimated collections (including transaction costs paid) over the expected life of the financial instrument or, if appropriate, over a shorter period.

Current financial assets

Current financial assets include equity shares, credit instruments and other forms of investment of liquidity, as well as derivative instruments for trading.

Financial assets purchased originally for resale in the short-term are measured at year end at fair value using, for listed securities, the market price translated, if necessary, at the year-end exchange rate. The fair value adjustment of current financial assets is recorded with an offsetting entry in the income statement.

Cash and cash equivalents

Cash and cash equivalents represent highly liquid short-term financial investments which can be readily converted into cash and are subject to an insignificant risk of a change in their value.

Inventories

Inventories are stated at the lower of purchase or production cost and estimated realizable value determined using the weighted average cost method or FIFO (First In, First Out).

Inventories of finished and semifinished goods included direct costs of materials and labor and indirect variable and fixed overheads, excluding general and administrative expenses. The market price takes into account writedowns for inventory obsolescence.

Assets held for sale

Assets, or a Group of assets and liabilities (that must not be offset), which are highly probable of being sold within the next year and are available for immediate sale in their current condition, are classified on specific lines on the balance sheet. If they represent significant sectors of activities, the relative results are shown separately in the income statement. In order to meet this condition, management must be committed to a plan to sell, which is highly probable of taking place within one year of classification in this category. The disclosure relating to the results of such assets, is shown separately also for the prior period.

Such assets are stated at the lower of the net carrying amount and fair value less costs to sell. Any impairment loss that arises should be recorded in the income statement. The impairment loss should eventually be reversed if the reasons for the impairment no longer apply, but only up to the initial amount. From the time the asset is recognized as an asset held for sale, amortization and depreciation cease. Financial expenses and expenses attributable to the liabilities of a disposal Group classified as held for sale should continue to be recognized.

When the conditions which led to the recognition of an asset as held for sale no longer apply, it should be reclassified to non-current assets and stated at the lower of the carrying amount before being designated as held for sale and its recoverable amount at the date of the subsequent decision not to sell the asset; the difference is recognized in the income statement.

Receivables and payables

Receivables are initially recognized at their nominal amount which substantially coincides with fair value.

If there is objective evidence of an impairment loss or a risk that the Group will not be able to collect the contractual amount (principal and interest) at the contractually agreed dates, a provision is set aside which corresponds to the difference between the asset's carrying amount and the present value of estimated recoverable future cash flows, discounted at the effective interest rate.

Payables are initially recognized at their nominal amount, reduced by expenses incurred to assume them and increased by interest expense due, if any. Payables are subsequently measured at amortized cost using the effective interest method.

Receivables sold with recourse remain in the balance sheet of the assignor which records a payable to the buyer against collection and the financial expense to be incurred. Receivables sold without recourse are only derecognized if it can be

demonstrated that the risks and rewards relating to the asset have been effectively transferred to the assignee.
Consequently, all receivables sold which do not meet IAS 39 derecognition requirements remain in the Group financial statements even though they have been legally sold. A corresponding financial liability is recorded in the consolidated balance sheet in debt. Gains and losses relating to the sale of such assets are not recognized until the assets are removed from the Group balance sheet.

Debt

Interest-bearing debt is recognized at cost which corresponds to the fair value of the amount received net of directly attributable costs. Debt is subsequently measured at amortized cost. The difference between amortized cost and the amount to be repaid is recognized in the income statement on the basis of the effective interest rate over the period of the loan.
Debt is classified in current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

The amortized cost of a financial liability is the amount at which the financial liability was recognized initially net of principal repayments, increased or decreased by the total amortization on any difference between the initial amount and the maturity amount using the effective interest method.

The effective interest rate is a method for calculating the amortized cost of a financial liability and allocating the interest over the period of reference. The effective interest rate is the rate that exactly discounts future cash flows for estimated payments (including transaction costs paid) over the expected life of the financial instrument or, if appropriate, over a shorter period, at the net carrying amount of the financial liability.

Derivative financial instruments and hedging relationships

Derivative financial instruments are recognized initially at fair value at the date the contracts are entered into and are subsequently measured at fair value at year-end. The resulting gains or losses are recognized in the income statement immediately, unless the derivative is designated and is effective as a hedging instrument, in which case the times for recognition in the income statement depend upon the nature of the hedging relationship. The Group designates certain derivatives as fair value hedges of certain assets or liabilities recognized in the financial statements or as cash flow hedges of certain highly probable forecast transactions.

A derivative is classified as a non-current asset or liability if the maturity date of the instrument is beyond 12 months and it is not expected to be realized or settled within 12 months. Other derivatives are classified as current assets or liabilities.

Financial instruments qualify for hedge accounting only when there is formal designation and documentation, including the company's risk management objective and strategy, and the hedge, verified periodically, is highly effective.

When financial instruments qualify for hedge accounting, the following accounting treatment applies:

- Fair value hedge: where a derivative financial instrument is designated as a hedge of the exposure to changes in fair value of a recognized asset or liability that is attributable to a particular risk and could affect the income statement, the gain or loss from re-measuring the hedging instrument at fair value is recognized in the income statement, together with the change in fair value of the hedged item. The gain or loss from the change in fair value of the hedging instrument is recognized on the same line of the income statement as the hedged item.

- Cash flow hedge: where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows of a recognized asset or liability or a highly probable forecast transaction and could affect profit and loss, the effective portion of any gain or loss of the derivative financial instrument is recognized directly in equity. The cumulative gain or loss is removed from equity and recognized in the income statement at the same time in which the hedged transaction affects the income statement. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in equity and is recognized in the income statement at the same time the related transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in equity is recognized in the income statement immediately.

If the conditions of IAS 39 are not met, the transactions, even if they have been set up for the purpose of managing risk exposure, are classified and measured as trading transactions. In that case, the difference from fair value is recognized in the income statement.

Employee benefits – Pension plans

The companies of the Group offer their employees various forms of pension plans with specific characteristics that vary according to the law, the regulations and the practices in the countries in which they operate.

The pension plans are currently either defined contribution or defined benefit plans.

Under defined contribution plans, the Group pays contributions to outside, legally separate entities with administrative autonomy, which frees the employer from any subsequent obligation as the outside entity assumes the commitment to pay what is due to the employee.

Consequently, the Group companies record the contribution paid as an expense and no additional obligation is recognized.

Defined benefit plans include post-employment benefits, other than those under defined contribution plans. Under defined benefit plans, the Group companies have the obligation to set aside the costs relating to the benefits guaranteed to their employees in service and pay retired employees. The actuarial risk and the investment risk are thus substantially borne by the companies of the Group.

Defined benefit plans, which, for the Italian companies, include employee severance indemnities accrued to December 31, 2006, are measured by actuarial techniques using the Project Unit Credit Method.

As provided by the amendment to IAS 19 – Employee Benefits, issued by the IASB in December 2004, the Group elected to recognize actuarial gains and losses immediately in the period in which they arise, outside the income statement, in a statement of recognized income and expense.

All cumulative actuarial gains and losses that existed at January 1, 2004 have been recognized in equity.

For defined benefit plans without plan assets, the expenses relating to the increase in the present value of the obligation, due to the fact that the payment date of the benefits is nearing, are recognized in financial expenses.
Payments relative to defined contribution plans are recognized as an expense in the income statement as incurred.

The liability for defined benefit plans is calculated on an individual basis and takes into account life expectancy, personnel turnover, salary changes, revaluation of the yields, inflation and the present value of the amounts to be paid. The specific assumptions of each plan take into account the local economic conditions.

Defined benefit plans are in some cases covered by financial assets managed outside the Group companies. In those cases, the amount recognized in the financial statements for such liabilities corresponds to the difference between present value of future services (actuarial liability) and the market value of the assets invested that are intended to cover the liability, increased by losses or decreased by unrecognized (or not yet recorded) gains and, in any case, taking into account the surplus cap limit for assets established by paragraph 58 of IAS 19. When the result of this calculation shows a net obligation it is recognized in a provision under liabilities, in the reverse case, an asset is recognized.

Beginning January 1, 2007, the liability for employee severance indemnities only refers to the amount accrued up to December 31, 2006 which continues to be an obligation of the company. Following the coming into effect of the supplementary pension reform (Legislative Decree 252 dated December 5, 2005) resulting from Law 296 dated December 27, 2006 (Budget Law 2007), the liability, since it refers to a benefit that has been completely accrued, has been re-measured without the pro-rata application of the service rendered and without considering future salary increases in the actuarial calculations. The difference resulting from the new calculation compared to the amount recognized in the financial statements (curtailment) was recorded, in accordance with IAS 19, paragraph 109, in the income statement (€ 1.3 million) in “Employee severance indemnity expenses”.

Starting January 1, 2007, the portion of employee severance indemnities accrued and paid to supplementary pension funds is considered a defined contribution fund since the company's obligation to its employees ceases upon payment of the portion accruing to the pension fund. Likewise, the payment of the portion of employee severance indemnities accruing to the INPS Treasury Fund is accounted for as a payment to a defined contribution fund in that the company is not required to make further payments, other than those provided in the Ministerial Decree of January 30, 2007, whenever the fund does not have sufficient assets to ensure payment of the benefit to the employee.

Employee benefits – Stock option plans
Stock-based payments to employees are measured at the fair value of the equity instruments at the grant date. In accordance with IFRS 2 – Share-based Payment, the full amount of the fair value of stock options at the grant date is recognized in the income statement in personnel costs on a straight-line basis over the period from the grant date to the vesting date with an offsetting entry directly in equity, based upon an estimate of the number of options that is expected to become exercisable. Changes in fair value after the grant date have no effect on the initial measurement.

The cost is recalculated each year based upon a revision of the above-indicated estimate.

In accordance with IFRS 2, the Group has applied this standard to stock options granted after November 7, 2002 and not yet vested at the effective date of IFRS 2 (January 1, 2005).

In the event the plans require a monetary payment equal to the increase in the value of the enterprise, the fair value of the liability of the plan is re-measured at each reporting date until its extinction and the cost is recognized in the income statement.

Provisions for other liabilities and charges

Provisions for other liabilities and charges refer to costs and expenses of a determinate nature which are certain or likely to be incurred but, at the balance sheet date, are uncertain as to the amount or as to the date on which they will arise. Accruals are recorded when there is an obligation, legal or constructive, resulting from a past event, when it is probable that the use of resources will be required to satisfy the obligation and when a reliable estimate of the amount of the obligation can be made.

The amount recognized in the financial statements as the provision for other liabilities and charges expresses the best estimate of the monetary resources necessary to extinguish the current obligation at the balance sheet date, taking into account the risks and uncertainties surrounding the obligation. When the accrual is determined by using estimated cash flows to extinguish the obligation, the carrying amount is represented by the discounted present value of those cash flows.

Changes in estimates are recorded in the income statement in the period in which the change occurs.

The accruals mainly refer to environmental or legal risks and accruals for restructuring operations.

Accruals for environmental or legal risks

In general, environmental and legal risks are evaluated case by case. The accrual, if any, is booked on the basis of the best information available, on condition that this information makes it possible to determine a probable loss that is estimated in a sufficiently reliable manner.

Accruals for restructuring operations

An accrual for restructuring operations is booked on condition that a detailed and formal restructuring plan has been approved and that the restructuring has begun or the details of the restructuring plan have been made public and that valid expectations of it have been raised.

Treasury stock

The cost of any IFI treasury stock purchased and/or held, also through subsidiaries, as a result of specific stockholder resolutions are recognized as a deduction of equity and, therefore, the reserve offsetting treasury stock in portfolio is not shown separately. The proceeds from any subsequent sale are recognized as movements in equity.

Income taxes

Current income taxes are calculated according to the tax laws in force in the countries in which the companies of the Group operate on the basis of the taxable income for the year. Taxable income is different from the income expressed in the consolidated financial statements in that it excludes costs and revenues that become taxable or deductible in other years and also excludes items which are never taxable or deductible.

Temporary differences between the amounts of assets and liabilities in the financial statements and the corresponding amounts for tax purposes give rise to temporarily deferred tax liabilities on the taxable temporary differences that are recorded in a specific provision in liabilities. Deferred tax assets relating to the carryforward of unused tax losses, as well as those arising from temporary differences, are recognized to the extent that it is probable that future profits will be available against which they can be utilized.

Deferred tax assets and liabilities are measured at the tax rates expected to apply to taxable income in the periods in which temporary differences will reverse. Deferred income tax assets and liabilities are offset where there is a legally enforceable right of offset.

Deferred tax assets and liabilities are shown separately from other receivables and taxes payable in a specific caption under non-current assets or liabilities.

Current and deferred income taxes are recognized in the income statement except for those relating to items debited or credited directly in equity. With regard to business combinations, the tax effect is taken into consideration in determining the excess of the cost of acquisition over the fair value of the assets, liabilities and contingent liabilities, while no tax effect is attributed to the residual amount represented by goodwill.

Transactions in foreign currency and consolidation of foreign entities

The financial statements of each Group company are presented in the functional currency of the economic environment in which they operate. For purposes of the consolidated financial statements of the Group, the financial data of these companies is translated into Euro which is the currency of the parent and the presentation currency of the consolidated financial statements.

In the preparation of the financial statements of the individual companies of the Group, the transactions expressed in currencies other than the functional currency are recorded at the exchange rate in effect at the transaction date. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the foreign exchange rate prevailing at that date. Non-monetary items are measured at historical cost and are not translated. Exchange differences arising on the settlement of monetary items or on reporting monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements are recognized in the income statement.

For purposes of the presentation of the consolidated financial statements, the assets and liabilities of foreign companies with functional currencies different from the Euro and which are included in the scope of consolidation are translated using the exchange rate in effect at the date of reference (current exchange method). Items in the income statement and cash flows in the statement of cash flows are translated at the average exchange rate for the year. The translation differences resulting from the application of this method are classified in equity until the sale of the investment.

Goodwill and fair value adjustments generated by the acquisition of a foreign entity are recognized in the respective currency and translated at the year-end exchange rates.

Revenue recognition

Revenues are formed mainly by sales of services produced within the major business segments of the Group and are stated net of any adjusting items.

Revenues from services are recognized by reference to the stage of completion of the transaction at the balance sheet date and measured on the basis of the services rendered.

In particular, revenues are recognized in the main business segments as follows:

Cushman & Wakefield Group
The Cushman & Wakefield Group's revenues are categorized into transaction services and non-transaction services. Non-transaction services include primarily capital market services and client solutions (financial advisory, asset management, valuation, corporate real estate services, and research). Fees related to transaction services are recognized as revenue at the time the related services are fully performed and the amount can be measured reliably, unless significant material future contingencies exist; in which case they are recognized when the contingency is resolved.
Asset management fees are recognized as revenue when earned, typically on a monthly basis as services are rendered.
Other revenues for fees related to non-transaction services are recognized when the assignment has been completed. Fees for ongoing professional services are recognized as revenue when earned, which is when services are rendered.
The Cushman & Wakefield Group recognizes certain reimbursements (primarily salaries and related charges) mainly related to the facilities and property management operations as revenue when the underlying reimbursable costs are incurred.

Alpitour Group
Sales of tourist packages, airplane transportation services and brokering revenues are recognized based on the departure date.
Revenues for hotel services and services rendered in connection with the incoming sector are recognized in the income statement at the service performance date.
Premiums connected with reinsurance activities are recognized in the income statement on the client's departure date since the insurance coverage is strictly related to the travel package.

Juventus Football Club
Revenues from games and from radio and television rights and media income are recognized at the actual moment of the event (when the game is played). Revenues from season tickets are recognized when the tickets are paid even if payment is received at the end of the season preceding the season to which the tickets refer and are deferred on the accrual basis using the same principle (when the game is played).
Revenues from the performance of services (including sponsorships) are recognized on the basis of the stage of completion of the service or upon completion of the service.
Revenues are recorded net of returns, discounts and allowances.
Gains and losses from the sale of players' registration rights are recognized according the date affixed by the *Lega Nazionale Professionisti* giving execution to the contracts for national transfers and the transfer date indicated by the *Federazione Italiana Giuoco Calcio* for international transfers.
Gains from the sale of players' registration rights, in which 50% is simultaneously repurchased, are adjusted for 50% of their amount in order to recognize in the income statement the income accrued for the portion of the deferred rights actually transferred through the sale. The remaining amount of the gain, instead, will only be realized upon termination of the player-sharing agreement when the player leaves the company. If there is a loss on the sale of the players' right which precedes the signing of the player-sharing contract, this loss, on the contrary, is not adjusted for IFRS purposes. This is due to the fact that the loss is comparable to the effect of an impairment test of the deferred right, under the assumption that the moment in time in which right is disposed of represents the moment in which the loss arose.

IFI, IFIL and the IFIL Holdings System
Financial income is recognized according to the accrual principle on the basis of the effective rate of return.
Dividends from investments accounted for at cost are recognized in the income statement when they are approved and only from the earnings generated after the purchase of the investment holding. Instead, when the dividends are distributed from

reserves generated before acquisition, the dividends are recognized as a deduction from the cost of the investment holding.
Dividends from available-for-sale investments and investments held for trading are recognized in the income statement upon approval of the appropriation.

Commission expenses
Commissions payable to brokers are recorded at the time the Cushman & Wakefield Group recognizes its brokerage commission revenues and are generally not paid until after the collection of the related commissions receivable.

Other nonrecurring income (expenses)
Other nonrecurring income (expenses) include the gains and/or the losses on the disposal of non-current assets other than discontinued operations or assets held for sale (the results of the latter are included in "Profit (loss) from discontinued operations or assets held for sale"). They may also include impairment losses on assets, restructuring costs, accruals and utilizations of provisions for liabilities.

Earnings per share
Basic earnings per share is calculated by dividing the profit attributable to the equity holders of the company by the weighted average number of shares outstanding during the year, excluding treasury stock. Diluted earnings per share is calculated by adjusting the weighted average number of shares outstanding to assume conversion of all dilutive potential shares. The profit attributable to the equity holders of the company is also adjusted to take into account the effects, net of taxes, of the conversion.
Basic and diluted earnings per share is calculated on the result from continuing operations and the result from discontinued operations or assets held for sale.

Segment information
Given the characteristics of the investments held through the subsidiary IFIL S.p.A., the segment information coincides with the consolidated data of each subsidiary and associate operating holding company, each of which represents an investment in a primary reporting segment.

6. Use of estimates

The preparation of financial statements and related disclosures that conforms to IFRS requires estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. The estimates and assumptions are based on experience and other factors that are considered to be relevant. Actual results could differ from those estimates. Estimates and assumptions are reviewed periodically and the effects of any changes are reflected immediately in the income statement in the period in which the estimate is revised if the revision only affects that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the critical judgments and the key assumptions concerning the future made in the process of applying the accounting policies and that may have the most significant effect on the amounts recognized in the consolidated financial statements or that have a risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Recoverable amount of non-current assets

Non-current assets include property, plant and equipment, intangible assets (including goodwill), investments and other financial assets and deferred tax assets. Each consolidated company periodically reviews the carrying amount of non-current assets held and used and assets that must be disposed of when events and circumstances warrant such a review. This review is performed using estimates of future cash flows from the use or disposal of the asset, as established in company plans, and suitable discount rates in order to calculate present value. If the carrying amount of a non-current asset is considered impaired, the companies of the Group record an impairment loss for the amount by which the carrying amount of the asset exceeds its estimated recoverable amount from use or disposal determined by reference to the Group companies' most recent plans.

Pension plans and other post-employment benefits

Group companies sponsor pension plans and other health care plans in various countries. Management uses several statistical and judgmental factors that attempt to anticipate future events in calculating the expense, the liability and the assets related to these plans. These factors include assumptions about the discount rate, expected return on plan assets, rate of future compensation increases and health care cost trend rates. In addition, the Group companies' actuarial consultants also use subjective factors such as resignations and mortality rates in making relevant estimates.

Contingent liabilities

The cases and claims against the companies of the Group often raise difficult and complex factual and legal issues, which are subject to many uncertainties and complexities, including but not limited to the facts and circumstances of each particular case and claim, the jurisdiction and the differences in applicable law. The companies of the Group accrue a liability when it is determined that an adverse outcome is probable and the amount of the loss can be reasonably estimated. In the event an adverse outcome is possible or an estimate is not determinable, the matter is disclosed in the notes.

7. Adoption of new accounting standards, amendments and interpretations issued by the IASB

Accounting standards, amendments and interpretations adopted by the Group in 2007

In August 2005, the IASB issued IFRS 7 – Financial Instruments: Disclosures and a complementary amendment to IAS 1 – Presentation of Financial Statements: Capital Disclosures. The European Commission endorsed IFRS 7 and the complementary amendment to IAS 1 with EC Regulation 108/2006 dated January 11, 2006.

IFRS 7 requires disclosures about the significance of financial instruments for an entity's financial position and performance. These disclosures incorporate many of the requirements previously in IAS 32 – Financial Instruments: Disclosure and Presentation. IFRS 7 also requires information about the extent to which the entity is exposed to risks arising from financial instruments, and a description of management's objectives, policies and processes for managing those risks.

The amendment to IAS 1 introduces requirements for disclosures about an entity's capital and has no effect on the valuation or classification of those items.

On March 3, 2006, IFRIC issued the interpretation IFRIC 9 – Reassessment of Embedded Derivatives. The European Commission endorsed IFRIC 9 with EC Regulation 1329/2006 dated September 8, 2006.

IFRIC 9 requires an entity to assess whether an embedded derivative is required to be separated from the host contract and accounted for as a derivative when the entity first becomes a party to the contract. Subsequent reassessment is prohibited unless there is a change in the terms of the contract that significantly modifies the original cash flows which would otherwise be called for by the contract.

On July 20, 2006, IFRIC issued the interpretation IFRIC 10 – Interim Financial Reporting and Impairment. The European Commission endorsed IFRIC 10 with EC Regulation 610/2007 dated June 1, 2007.
IFRIC 10 states that where an entity has recognized an impairment loss in an interim period on goodwill or on some financial assets, that impairment cannot be reversed in subsequent interim financial statements nor in the annual financial statements.

Accounting standards, amendments and interpretations not yet in effect and not early adopted by the Group

On November 30, 2006, the IASB issued the standard IFRS 8 – Operating Segments that will come into effect beginning January 1, 2009 and supersedes IAS 14 – Segment Reporting. The European Commission endorsed IFRS 8 with EC Regulation 1358/2007 on November 21, 2007. The new standard requires the information provided in segment reporting to be based upon the components of the entity that management uses to make decisions about operational matters. The standard requires these operating segments to be identified on the basis of internal reports that are regularly reviewed by management in order to allocate resources to the segment and assess its performance. The adoption of this standard will have no effect on the measurement of items in the financial statements.

On November 2, 2006, IFRIC issued the interpretation IFRIC 11 - IFRS 2 – Group and Treasury Share Transactions, applicable for annual periods beginning on or after March 1, 2007. The European Commission endorsed IFRIC 11 with EC Regulation 611/2007 on June 1, 2007.
IFRIC 11 establishes how to apply IFRS 2 – Share-based Payment to share-based payment arrangements with an entity's own equity instruments or equity instruments of another entity of the same Group.

On March 29, 2007, the IASB issued a revised version of IAS 23 – Borrowing costs. The standard is in effect from January 1, 2009. The new version removes the option of immediately recognizing as an expense borrowing costs that relate to assets that take a substantial period of time to get ready for use or sale. The standard will be applicable prospectively to borrowing costs relating to qualifying assets capitalized starting from January 1, 2009. At the date of this report, this standard has not yet been endorsed by the European Union.

On July 5, 2007 IFRIC issued the interpretation IFRIC 14 – IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction. The interpretation is in effect from January 1, 2008. The interpretation provides general guidance on how to assess the limit in IAS 19 - Employee Benefits on the amount of the surplus that can be recognized as an asset. It also explains how the defined benefit asset or liability may be affected when there is a statutory or contractual minimum funding requirement. At the balance sheet date, this interpretation had not yet been endorsed by the European Union.

On September 6, 2007 the IASB issued a revised version of IAS 1 - Presentation of Financial Statements that is in effect from January 1, 2009. The revised standard requires an entity to present changes in its equity resulting from transactions with owners in a statement of changes in equity. All non-owner changes (meaning changes in comprehensive income) are required to be presented either in a single statement of comprehensive income or in two statements (a separate income statement and a statement of comprehensive income). Transactions with non-owners may not be presented in the statement of changes in equity. This standard had not yet been endorsed by the European Union at the balance sheet.

Interpretations in effect but relating to matters not applicable to the Group:

- IFRIC 7 – Applying the Restatement Approach under IAS 29 Financial Reporting in Hyperinflationary Economies (in effect from January 1, 2007);
- IFRIC 8 – Scope of IFRS 2 (in effect from January 1, 2007);
- IFRIC 12 – Service Concession Arrangements (in effect from January 1, 2008);
- IFRIC 13 – Customer Loyalty Programmes (in effect from January 1, 2009).

8. Risk management

IFI S.p.A. is not subject to either direct credit risks or currency risks.

Financing needs and cash flows are managed with the aim of optimizing financial resources. Outgoing cash flows from current operations are basically financed by dividends collected. Liquidity risk could thus arise only for investment decisions in excess of cash availability or the revocation of existing credit lines. In this sense, IFI S.p.A. operates so that it has available and partly irrevocable credit lines with expiration dates and amounts consistent with its needs.

IFI S.p.A. assesses and manages its exposure to interest rate risk consistently with its financial management policies and uses derivative financial instruments to fix some of the financing obtained with a pre-set interest rate. There were no derivative financial instruments put into place for speculative purposes. In particular, in 2007, the only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on some of the existing loans.

IFIL S.p.A. and the companies of the Holdings System

IFIL S.p.A. and the companies which form the Holdings System are not subject to particular credit risks. However, significant investments denominated in currencies other than the Euro, U.S. dollars in particular, are subject to currency risk. In view of the permanent characteristics of such investments, transactions to hedge the risk of exchange rate fluctuations on those currencies were not put into place.

With regard to liquidity risk, financing needs and cash flows are managed with the aim of optimizing financial resources. In particular, outgoing cash flows from current operations are basically financed by incoming cash flows from ordinary activities.

Liquidity risk could thus arise only for investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or raising of sufficient funds that can be readily used. In this sense, IFIL S.p.A. operates so that it has financial resources obtained from the issue of bonds and irrevocable credit lines with expiration dates and amounts consistent with its investment plans.

IFIL S.p.A. assesses and manages its exposure to interest rate risk consistently with its management policies and uses derivative financial instruments to fix some of the financing obtained with a pre-set interest rate. There were no derivative financial instruments put into place for speculative purposes during the year; the only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on one of the bonds issued.

Alpitour Group

The Alpitour Group regularly assesses it exposure to various types of risks and manages these risks using traditional and derivative instruments in accordance with its management and control policy. This policy does not allow the use of derivatives for speculative purposes but they are used for the management of fluctuations in exchange rates, interest rates and fuel prices for hedging purposes.

The Alpitour Group, and particularly the aviation division, is subject to the risk of fluctuations in fuel prices largely in connection with international political stability and other exogenous factors. Since fuel is a primary factor in air transport, price fluctuations could have a significant impact on the Group's margin and, consequently, the fuel price risk exposure is hedged by commodity swaps and zero cost collars.

The exposure to exchange rate risks on commercial transactions in foreign currencies is mainly hedged by forward and zero cost collar contracts.
The exposure to interest rate risks on medium-term loans is mainly hedged by interest rate swaps and zero cost collars.

Cushman & Wakefield Group

Credit risk exposure of the Cushman & Wakefield Group is mainly influenced by the characteristics of each individual client. Other risk factors, including the default risk of the industry and country in which customers operates has less of an influence on credit risk. That depends on the type of services rendered and knowledge of the quality of the clients.
The Cushman & Wakefield Group is exposed to performance risks resulting from errors and omissions where assignments can not be completed or where assignments are completed in a negligent manner leading to punitive damage claims from customers in accordance with the terms of the service agreement.
The Cushman & Wakefield Group is insured against such errors and omissions claims under a domestic program and an international program. Under the domestic program, a primary insurance layer of $2 million is provided by the C&W Group's 100%-owned captive insurance subsidiary, Nottingham Indemnity, Inc., and an excess layer provided through third party insurance carriers. Under the International program, a primary insurance layer of £10 million and an excess layer are provided through third party insurance carriers.

Juventus Football Club

Juventus Football Club S.p.A. does not have significant concentrations of credit risk and has appropriate procedures in place to minimize such risk exposure. Receivables from Italian soccer companies are guaranteed by the compensation mechanism of the *Lega Nazionale Professionisti* while receivables from foreign soccer companies are largely guaranteed by sureties or other guarantees.
A large part of Juventus Football Club S.p.A.'s sales and purchases transactions are in Euro; thus the company is not subject to fluctuations in exchange rates to any relevant degree.
The company manages liquidity risk by keeping the bank loans secured from leading credit institutions at levels that avert financial pressure situations and are sufficient to meet operating and investment needs.

9. Change in the scope of consolidation

The following changes in the scope of consolidation during 2007 are at the level of the IFIL Group and therefore before attributing the equity and profit to the minority interest.

Deconsolidation of the Sequana Capital Group

On July 6, 2007, Ifil Investissements S.A. reached an agreement for the sale of an approximate 22% stake in Sequana Capital S.A. to DLMD – a company controlled by Pascal Lebard, general manager of Sequana Capital S.A.

After having obtained approval from the competent authorities, on July 27, 2007, Ifil Investissements S.A. sold 10,806,343 Sequana Capital shares at € 21 per share for a total equivalent net amount of € 226 million.

Ifil Investissements S.A. and DLMD signed a three-year stockholders' agreement aimed at keeping the stockholder base of Sequana Capital S.A. stable.

After this deal, Ifil Investissements S.A. holds 13,203,139 Sequana Capital S.A. shares, equal to 26.65% of the capital stock of this company at March 20, 2008. Starting from the date of July 1, 2007, this investment has been accounted for by the equity method.

In the financial statements at December 31, 2007, IFIL's share of the profit of Sequana Capital Group (48.805%) for the period January 1 – June 30, 2007 (€ 47 million), is shown in a specific line on the income statement "Discontinued operations or assets held for sale", net of the loss recognized on June 30, 2007 (approximately € 55 million, including transaction costs) on the sale of an approximate 22% stake in the capital stock.

IFIL's residual percentage holding in the profit of Sequana Capital Group (26.711%) for the period July 1 – December 31, 2007 is shown in the income statement in "Share of the profit (loss) of companies accounted for by the equity method".

Furthermore, the published consolidated income statement for the year ended December 31, 2006 of the IFI Group has been restated for comparative purposes by reclassifying the net balance of the income statement items of the Sequana Capital Group to the specific line "Discontinued operations or assets held for sale" which, therefore, shows IFIL's share of the profit of the Sequana Capital Group for the period January 1 – December 31, 2006.

This restatement is detailed in the following table.

€ in millions	2006 (published)	Deconsolidation Sequana Capital Group	**2006 (restated)**
Revenues	5,534	(4,045)	**1,489**

Acquisition of control and consolidation of the Cushman & Wakefield Group

On March 30, 2007, Ifil Investissements S.A. purchased a 71.52% stake in the capital stock of C&W Group, Inc., a company which controls 100% of the capital stock of the Cushman & Wakefield Group. The remaining 28.48% stake in C&W Group Inc. is held by C&W Group management and employees.

This acquisition was made by Ifil Investissements S.A. which provided C&W Group, Inc. with the financing necessary to purchase the 71.52% stake of the Cushman & Wakefield Group from Rockefeller Group International Inc. for a total of $625 million equal to € 474 million). The remaining 28.48% stake of the Cushman & Wakefield Group was conferred to C&W Group, Inc. by Group management and employees for $249 million.

The total cost for the acquisition of 100% of the capital stock of the Cushman & Wakefield Group is therefore equal to $874 million (€ 663 million).

The fair value of the net assets acquired, determined by an independent valuation, amounts to $306 million (€ 233 million) while the goodwill is equal to $568 million (€ 430 million).

In addition to the acquisition cost, transaction costs incurred by Ifil Investissements total € 10 million which bring the total cost of the investment to € 673 million and goodwill to € 440 million, of which € 318 million is attributable to the IFIL Group and € 122 million to the minority interest.

The consolidated financial statements of the Cushman & Wakefield Group, prepared in accordance with IFRS, for the period April 1 – December 31, 2007, were consolidated by IFI through the consolidation of the IFIL Group at December 31, 2007.

With regard to the full-year 2007, revenues amount to more than $2.1 billion (+19% compared to 2006).

The following table gives additional details on the acquisition.

	Carrying amount of assets acquired	Fair value adjustment	Fair value of assets acquired (a)	Fair value of assets acquired (€ in millions converted at the €/$ 1.3177 purchase rate)

(a) Fair value determined definitively at the time of preparing the consolidated financial statements at December 31, 2007.

Change in the scope of consolidation of the Cushman & Wakefield Group

During the period April 1 – December 31, 2007, certain acquisitions were made by the Cushman & Wakefield Group for a total investment of $71 million (€ 48 million).

The total net fair value of property, plant and equipment and intangible assets amounts to $25.4 million (€ 17 million) while the goodwill recognized totals $45.6 million (€ 31 million).

Change in the scope of consolidation of the Alpitour Group

During the year, the Alpitour Group sold the investment in the Tunisian company "Kelibia Beach S.A." in which a 99% stake was held by Horizon Holidays for an equivalent amount of € 18 million, realizing a net gain of € 6 million.

Other changes in the scope of consolidation of the Holdings System

During the last quarter of 2007, the following companies were consolidated: IFIL France S.A. (set up on July 27, 2007 and not yet operational) and ANCOM USA Inc. (an American company which holds 1.96% of NoCo A LP, under which all the activities of the Perella Weinberg Group are conducted).
Both companies were acquired through the direct subsidiary Ifil Investissements S.A.

COMMENTS ON THE PRINCIPAL ITEMS IN THE CONSOLIDATED INCOME STATEMENT

10. Segment information

Information by business segment and by geographical area, presented as set forth in IAS 14 – Segment Reporting, is prepared according to the same accounting policies adopted in the preparation and presentation of the consolidated financial statements of the Group.

The primary reporting format consists of the business segments whereas the geographical areas make up the secondary reporting format. This distinction is based upon the nature of the risks and rewards inherent in the Group's activities and reflects the organizational structure.

The segment information presented by the IFI Group agrees with the consolidated data of each subsidiary and associate holding company, every one of which represents an investment in a major business segment: Cushman & Wakefield Group, Alpitour Group, Juventus Football Club, Fiat Group, Sequana Capital Group, IFI and the IFIL Holdings System.

The segment information relating to continuing operations is presented in the following tables; the segment information relating to discontinued operations or assets held for sale is presented in Notes 18 and 28.

The analysis of the income statement by business segment is as follows:

€ in millions	Cushman & Wakefield Group	Alpitour Group	Juventus	Fiat Group	Sequana Capital Group	IFI and IFIL Holdings System	**Total**
2007							
Revenues	1,255	1,236	165			1	**2,657**

The following table presents an analysis of the revenues of the Group in the various geographical markets, regardless of the origin of the goods and services, and an analysis of the carrying amount of the segment assets and investments in property, plant and equipment and intangible assets on the basis of the geographical location of the assets.

€ in millions	Revenues	Segment assets	Investments in property, plant and equipment and intangible assets
2007			
Italy	1,223	515	76
Europe excluding Italy	458	155	12
United States	783	885	12
Rest of the world	193	145	5
Total at December 31, 2007	**2,657**	**1,700**	**105**

€ in millions	Revenues	Segment assets	Investments in property, plant and equipment and intangible assets
2006			
Italy	1,339	591	66
Europe excluding Italy	128	2,292	87
United States	0	264	6
Rest of the world	22	415	36
Total at December 31, 2006	**1,489**	**3,562**	**195**

11. Revenues

Details of revenues are as follows:

€ in millions	2007	2006	Change
Revenues from rendering tourist services	**1,236**	1,334	(98)
Real estate brokerage commissions	**969**	0	969
Revenues from property management activities (a)	**145**	0	145
Radio and television rights and media revenues	**115**	100	15
Revenues from financial consulting and property management services	**65**	0	65
Corporate real estate business consulting services and research	**60**	0	60
Revenues from sponsorships and advertising	**39**	42	(3)
Revenues from rendering services and consulting	**19**	1	18
Revenues from season tickets and ticket office sales	**9**	12	(3)
Total revenues	**2,657**	1,489	1,168

(a) These are reimbursements for property management activities rendered by the Cushman & Wakefield Group and received from the owners of the properties.

12. Other revenues from current operations

Details of other revenues from current operations are as follows:

€ in millions	2007	2006	Change
Gains on the sale of players' registration rights	**19**	36	(17)
Other income	**14**	31	(17)
Operating grants	**3**	0	3
Total other revenues from current operations	**36**	67	(31)

13. Personnel costs

Details of the composition of personnel costs are as follows:

€ in millions	**2007**	2006	Change
Salaries and wages	**(898)**	(200)	(698)
Employee costs relating to the property management activities of the Cushman & Wakefield Group (a)	**(145)**	0	(145)
Share of results paid to partners of the EMEA division of the Cushman & Wakefield Group	**(48)**	0	(48)
Employee stock options	**(12)**	0	(12)
Social security contributions	**(41)**	(25)	(16)
Health insurance	**(21)**	0	(21)
Other employee costs	**(11)**	(4)	(7)
Temp work costs	**(5)**	(1)	(4)
Employee severance indemnities expense	**(5)**	(5)	0
Total personnel costs	**(1,186)**	(235)	(951)

(a) The corresponding reimbursement by the owners of the properties is recorded in Revenues.

14. Other nonrecurring income (expenses)

Details are as follows:

€ in millions	**2007**	2006	Change
Impairment losses on assets	**(9)**	0	(9)
Net other income (expenses)	**(19)**	4	(23)
Total other nonrecurring income (expenses)	**(28)**	4	(32)

In 2007, impairment losses include the following:

- the impairment loss of € 7 million, relating to the Juventus Football Club video archives, carried out on the basis of the commercial exploitation plan and the estimated cash and economic flows acquired and expected;
- the impairment loss of € 2 million, regarding the design costs of the new Stadio delle Alpi that were capitalized in the past and are no longer recoverable in view of recent developments on the project.

In 2007, net other income (expenses) include:

- transaction costs and expenses incurred to close the dispute over the sale of La Rinascente for € 8 million;
- accrual for the current-year cost of € 13 million for the stock option plan approved for the management of the subsidiary Alpitour;
- income of € 3 million from the reduction ruled by the Court of Appeals of Turin on the pecuniary administrative sanction imposed on IFIL S.p.A. by Consob;
- net loss from the sale of the investment in Campi di Vinovo, a company previously controlled by Juventus Football Club, and the “Mondo Juve” business segment for € 1 million.

Particularly with regard to the transaction for the sale of Campi di Vinovo, on October 2, 2007, Juventus Football Club sold the residual investment (equal to 69.8% of capital stock) to Costruzioni Generali Gilardi S.p.A. and, at the same time, collected the first installment of € 1.1 million. Furthermore, Juventus Football Club sold the business segment that included the contracts and the activities relating to construction of the Mondo Juve commercial park to Campi di Vinovo for € 25 million and agreed to cover a part of the urbanization costs up to a maximum amount of € 19.2 million.
Juventus Football Club still has the obligation to conclude all the administrative procedures, which are in the process of being finalized, including the project variances.

The overall economic effects of this transaction are summarized below:

€ in millions	
Sales value of the business segment (including the commercial permits)	25
Urbanization expenses accrued	(19)
Registration tax and notary fees relating to the sale of the business segment	(1)
Loss on the sale of the investment in Campi di Vinovo S.p.A.	(4)
Final estimated profit on the transaction	**1**
Receivables from Campi di Vinovo S.p.A. discounted to present value	(5)
Receivables from Costruzioni Generali Gilardi S.p.A. discounted to present value	(1)
Urbanization expenses discounted to present value	4
Discounted cash flow effect	**(2)**
Economic effect	**(1)**

In 2006, net other income (expenses) included the accrual for the administrative sanction of € 5 million levied on IFIL S.p.A. by Consob in reference to the content of the press release dated August 24, 2005, the excess, equal to € 5 million, of the increment in IFI's share of the consolidated equity of the IFIL Group compared to the cost of the IFIL shares purchased during the year, the current-year cost for that year of € 3 million relating to the stock option plan approved for the management of the subsidiary Alpitour, as well as the release of the provision set aside in prior years for the Alpitour stock option plan 2000 which was not exercised by the expiration date of August 31, 2006 (+€ 8 million) and other sundry expenses of € 1 million.

15. Financial income (expenses)

Details of the composition of financial income (expenses) are as follows:

€ in millions	**2007**	2006	Change
Gains (losses) on sales of investments:			
Kelibia Beach S.A.	**6**	0	6
Turismo&Immobiliare	**1**	0	1
Blumarine Hotel S.A. De C.V.	**0**	15	(15)
Exor Group S.A.	**0**	7	(7)
Other minor investments	**0**	(1)	1
	7	21	(14)
Gain on the conferral of the Fiorio Management business segment to AW Events S.r.l.	**2**	0	2
Net gains	**9**	21	(12)
Cost of net debt			
Income on current securities, cash and cash equivalents	**33**	23	10
Net income on exchange rate and interest rate hedging transactions	**3**	1	2
Exchange differences	**(1)**	(1)	0
Interest expenses on loan transactions	**(73)**	(28)	(45)
Commissions for unused credit lines	**(3)**	(4)	1
Total cost of net debt	**(41)**	(9)	(32)
Other financial income (expenses)			
Dividends collected	**112** (a)	53	59
Interest income on other financial assets	**12**	2	10
Changes in the fair value of financial assets and liabilities	**(1)**	10	(11)
Total other financial income (expenses)	**123**	65	58
Financial income (expenses)	**91**	77	14

(a) Collected from Intesa Sanpaolo for € 110 million (€ 53 million in 2006) and Gruppo Banca Leonardo for € 2 million.

16. Income taxes

Details of income taxes recorded in the income statement are as follows:

€ in millions	**2007**	2006	Change
Current income taxes	**(37)**	(13)	(24)
Deferred income taxes	**(6)**	3	(9)
Total income taxes	**(43)**	(10)	(33)

National income taxes are calculated at 33%, in 2007 and in 2006, on the estimated taxable income for the year. The income taxes for other jurisdictions are calculated at the enacted tax rates in the various countries.

Deferred income taxes recorded in 2007 include the positive effect of the recalculation of deferred income taxes for € 2.3 million as a result of the application of Law 244 (Budget Law 2008) dated November 24, 2007 which reduced the IRES tax rate for Italian companies from 33% to 27.5% starting in 2008.

In addition to the taxes recorded in the income statement, deferred tax liabilities were recognized directly in equity for € 33 million (€ 55 million in 2006). At December 31, 2007, no deferred tax assets were recognized in equity (€ 4 million in 2006).

The reconciliation between the tax charge recorded in the consolidated financial statements and the theoretical tax charge, calculated on the basis of the tax rate in effect in Italy, is the following:

€ in millions	**2007**	2006
Operating profit (loss)	**38**	(24)
Financial income (expenses)	**91**	77
Pre-tax profit	**129**	53
Current tax rate in Italy	**33%**	33%
Theoretical income taxes	**(42)**	(17)
Effective income taxes	**(43)**	(10)
Difference	**1**	(7)
The difference can be analyzed as follows:		
Tax effect of difference between foreign tax rates and the theoretical Italian tax rate	**2**	2
Effect of tax rate reduction on deferred income taxes	**2**	0
Tax effect of other permanent differences	**27**	73
Deferred tax benefits not recognized	**(25)**	(57)
Use of excess deferred income taxes	**0**	3
Other differences	**(7)**	(14)
Difference	**(1)**	7

Theoretical income taxes are calculated using the IRES tax rate on pre-tax profit.

17. Share of the profit (loss) of companies accounted for by the equity method

Details are as follows:

€ in millions	2007		2006		Change
Fiat Group	**566**	(a)	289	(a)	277
Sequana Capital Group (remaining interest)	**20**	(b)	0		20
Sundry Cushman & Wakefield Group companies	**1**		0		1
Total	**587**		289		298

(a) Includes net negative consolidation adjustments for € 1 million (-€ 15 million in 2006) mainly for the assignment of preferred dividends to the minority interest.
(b) Includes a positive consolidation adjustment for € 8 million for the writedown of goodwill on the AWA Group since it was partially amortized by IFIL in prior years.

For additional information on the companies accounted for by the equity method, reference should be made to Note 23.

18. Profit (loss) from discontinued operations or assets held for sale

The loss from discontinued operations or assets held for sale is € 8 million and includes the share of the result of Sequana Capital for the first half of 2007 (48.805% of capital stock) and the loss on the sale of the 22% stake in the same company.

Details are as follows:

€ in millions	2007 (a)	2006
Sequana Capital Group		
Revenues	**2,075**	4,089
Operating expenses	**(2,024)**	(3,993)
Other nonrecurring income (expenses)	**57**	(66)
Financial income (expenses)	**9**	17
Profit before taxes	**117**	47
Income taxes	**(21)**	(42)
Share of the profit of companies accounted for by the equity method	**0**	63
Profit of the Sequana Capital Group	**96**	68
Share attributable to the minority interest (51.195%)	**(49)**	
Share attributable to the IFIL Group (48.805%)	**47**	
Net loss realized on the sale of the 22% interest in the Sequana Capital Group	**(55)**	0
Profit (loss) from discontinued operations or assets held for sale	**(8)**	68

(a) Data refers to the first half of 2007 since the remaining stake in Sequana Capital has been accounted for by the equity method starting from July 1, 2007.

€ in millions	2007
Net cash flows from the sale of the 22% stake in the Sequana Capital Group	
Net proceeds from the sale	**226**
Cash of the Sequana Capital Group deconsolidated from January 1, 2007	**(207)**

Deconsolidation of the Sequana Capital Group	**200**	0
Other changes	**1**	18
Total changes	**200**	(9)
Closing balance	**(4)**	(204)
NET AMOUNT	**410**	760

(a) Of which € 32 million is due to the goodwill from the acquisition of the Cushman & Wakefield Group.

Goodwill recognized on the acquisition of the Cushman & Wakefield Group is deemed representative of the aggregate of the future economic benefits from the investment and cannot be identified separately.

For additional information of the acquisition of the control of the Cushman & Wakefield Group and on the recognition of goodwill, reference should be made to Note 9.

In 2007, IFI S.p.A. purchased 48,750,000 IFIL ordinary shares for an investment of € 350 million, booking in "Goodwill" the excess (€ 68 million) over the share of the consolidated equity of the IFIL Group (equal to € 282 million).

Impairment test on the goodwill and trademarks of the Cushman & Wakefield Group

The main assumptions used in the calculation of the impairment test are presented below.

For the purpose of impairment testing, the Cushman & Wakefield Group allocates the goodwill and trademarks to the cash-generating units (CGU) which represent the lowest level within Cushman & Wakefield Group at which these assets are monitored.

The carrying amount of goodwill and trademarks are allocated as follows:

€ in millions	Goodwill	Trademarks	Total
United States	200	88	288
Canada	13	16	29
Latin America	10	7	17
EMEA	81	53	134
Asia	11	9	20
	315	173	488

The recoverable amount of a cash-generating unit (CGU) to which goodwill and trademarks are allocated is the greater of its value in use and its fair value less costs to sell. The impairment testing for all CGUs was based on the value in use.

The value in use was determined using the fair market value method of the Group as determined by an independent appraisal and assigned to each CGU.

The fair value method consists of applying multiples to the net operating revenues in the budget, to the net operating revenues of the 12 previous months, as well as the average of the last three years.

The multiples have also been applied to the EBITDA for the same periods. The multiples are based on the multiples of comparable listed companies operating in the same industry and adjusted to take into account specific factors of the Cushman & Wakefield Group such as risk, growth and margins.

Such multiples have then be adapted in relation to the industry's cyclical phases and periods so as to better reflect the current and future value.

The average value of capital has been determined on the basis of such factors in order to reach an estimate of the fair value of each CGU. The market value of each unit has then been compared to the net value of the assets in order to highlight any impairment indicators.

The market capitalization for each CGU exceeded the carrying value of the CGU including allocated goodwill and trademarks.

Management of the Cushman & Wakefield Group believes that the recoverable amount of the CGU would still exceed the units' carrying amount even if key assumptions would unfavorably change as much as 10%.

21. Other intangible assets

The changes in other intangible assets are as follows:

At December 31, 2007	**217**	**84**	**155**	**0**	**456**

The “increases” from the business combination of the Cushman & Wakefield Group mainly relate to the fair value estimation of the trademarks and customer relationships at the time of acquisition.

The trademark of Cushman & Wakefield Group, which is the largest international real estate services operator, is a very recognizable name on the market which the Cushman & Wakefield Group aims to develop and build upon continuously. The trademark is classified as an “intangible asset with an indefinite life” since it will generate future cash flows indefinitely and, as a result, is not amortized, but is tested annually for impairment (Note 20).

At December 31, 2007, there are no commitments for the purchase of intangible assets. At December 31, 2006, commitments amounted to € 1 million and referred to the Sequana Capital Group.

In 2007, there are no research and development expenditures charged to the income statement. In 2006, expenditures amounted to € 17 million and referred entirely to the Sequana Capital Group.

Intangible assets completely amortized but still in use total € 21 million and refer to the concessions, licenses and trademarks of the Alpitour Group for € 16 million and other intangible assets for € 5 million.

In 2007, the increases in assets generated internally amount to € 8 million and refer entirely to the Cushman & Wakefield Group. In 2006 these amounted to € 6 million.

The amortization policy for the main intangible assets is as follows:

- the Cushman & Wakefield Group amortizes customer relationships over 16 years and non-competing agreements over 4 years;
- Juventus Football Club amortizes the players' registration rights on a straight-line basis over the term of the contracts; items and articles of the Juventus Football Club library are assets with an indefinite life and as such are subject to an impairment test;
- the Alpitour Group amortizes the government concession rights over the original periods of the concessions.

22. Property, plant and equipment

The changes in property, plant and equipment are as follows:

In 2007 and 2006, the Alpitour Group has capitalized borrowing costs for € 1 million.

Commitments for the acquisition of property, plant and equipment amount to € 3 million at December 31, 2007 and relate to the Cushman & Wakefield Group. At December 31, 2006, they amounted to 5 million and referred entirely to the Sequana Capital Group.

At December 31, 2007, the gross carrying amount of property, plant and equipment completely depreciated but still in use amounts to € 19 million (€ 7 million at December 31, 2006).

Finance lease contracts on property, plant and equipment
The carrying amount of property, plant and equipment includes € 22 million of assets leased under finance contracts at December 31, 2007 by Juventus Football Club for the Vinovo training center.
At December 31, 2006, the balance of € 41 million included the assets leased under finance contracts by the Sequana Capital Group, Juventus Football Club S.p.A. and the Alpitour Group.

Leasing information is as follows:

Total	**2,675**		2,673		**160**	1,109

(a) Available-for-sale investments.
(b) Investments measured using the cost method.
(c) Percentage refers to the investment in Sanpaolo IMI, merged in Banca Intesa with effect on January 1, 2007.
(d) Includes goodwill of € 5 million originating from the acquisition of 100% of the capital stock of Ancom USA Inc made by the subsidiary Ifil Investissements on September 30, 2007.

The investment in Intesa Sanpaolo is measured at fair value on the basis of the market price at December 28, 2007, equal to € 5.4 per share (€ 17.62 per share, referring to Sanpaolo IMI pre-merger 2006) with the unrealized gain of € 681 million recognized in equity. The original acquisition cost of the investment is € 884 million.

The investment in SGS is measured at fair value on the basis of the market price at December 28, 2007, equal to CHF 1.349 per share, (at the CHF/Euro exchange rate of 1.6547), with the unrealized gain of € 487 million recognized in equity. The original carrying amount of the investment in SGS is € 470 million.

Non-current financial assets include S-Bonds issued by DLMD maturing on July 27, 2010, subscribed to by the subsidiary Ifil Investissements as part of the transaction for the sale of the 22% stake in Sequana Capital to DLMD.

Current financial assets include:

- bonds, and other short-term financial instruments held by the foreign subsidiaries of the IFIL Holdings System, which do not meet the conditions for classification as "Cash and cash equivalents";
- equity shares held for trading by the subsidiary, IFIL. These are listed on the major European and United States markets and are measured at fair value based on market prices converted, where necessary, to year-end exchange rates, with recognition of the change in fair value in the income statement;
- securities subscribed to by Alpitour (residual amount of € 40 million) as part of the securitization of trade receivables (for additional information, reference should be made to Note 40).

The analysis of changes during 2007 is as follows:

	Non-current financial assets		**Current financial assets**	
€ in millions	**12/31/2007**	12/31/2006	**12/31/2007**	12/31/2006
Opening balance	**2,673**	1,524	**1,109**	1,173
Increases	**201**	64	**125**	100
Decreases	**(12)**	(32)	**(909)**	(285)
Increases through business combinations of the Cushman & Wakefield Group	**2**			
Fair value recognized in equity	**(97)**	920		(20)
Fair value recognized through the income statement		(1)		10
Impairment reversals (losses)	**1**	1		
Reclassification of the SGS investment from "Investments accounted for by the equity method"		350		
Reclassification to "Assets held for sale"		(19)		
Deconsolidation of the Sequana Capital Group	**(105)**		**(172)**	
Exchange differences	**(1)**	(8)	**(1)**	
Change in the scope of consolidation	**29**	(3)	**2**	
Other changes and reclassifications	**(16)**	(123)	**6**	131
Total changes	**2**	1,149	**(949)**	(64)
Closing balance	**2,675**	2,673	**160**	1,109

Increases in non-current financial assets (€ 201 million) comprise:

- the purchase on the market of 143,944 SGS shares, equal to 1.84% of capital stock for € 121 million;
- the subscription of 11,055,537 Gruppo Banca Leonardo shares issued as part of a capital stock increase for € 36 million;
- the subscription of 2,723 DLMD S-Bonds for € 27 million;
- the investment in the limited partnership NoCo B LP for € 12 million;
- the increase in other financial assets for € 5 million.

At December 31, 2007, the "fair value recognized in equity" includes the change in fair value of the investments in Intesa Sanpaolo (-€ 76 million) and SGS S.A. (-€ 21 million) recorded in non-current financial assets.

"Decreases" in current financial assets are attributable to the realization of investments in which a part of the liquidity was temporarily invested. The remaining balance of liquidity is included in "Cash and cash equivalents".

The fair value of current securities is calculated using the market price at the balance sheet date, where available, or discounting future cash flows.

Non-current other financial assets, excluding investments, by maturity, are as follows:

€ in millions	**12/31/2007**	12/31/2006
To 1 year	**5**	0
1 to 3 years	**32**	6
3 to 5 years	**2**	3
After 5 years	**13**	2
Nominal value of the non-current financial assets of the Sequana Capital Group	**-**	93
Non-current other financial assets, excluding investments	**52**	104

25. Inventories, net

Details are as follows:

€ in millions	**12/31/2007**	12/31/2006	Change
Raw materials and other supplies	**3**	111	(108)
Work in progress	**0**	45	(45)
Semifinished and finished goods	**0**	122	(122)
Merchandise	**0**	262	(262)
Total inventories, net	**3**	540	(537)

The reduction in inventories is mainly due to the deconsolidation of the Sequana Capital Group.

26. Other assets

Details are as follows:

€ in millions	**12/31/2007**	12/31/2006	Change
Other non-current assets			
Receivables for direct taxes	**0**	1	(1)
Receivables for disposals of property, plant and equipment and intangible assets	**9**	24	(15)
Other assets	**73**	30	43
Total other non-current assets	**82**	55	27
Other current assets			
Trade receivables			
Gross amount of trade receivables	**461**	1,004	(543)
Provision for impairment	**(29)**	(68)	39
Trade receivables from related parties	**2**	2	0
Trade receivables	**434**	938	(504)
Other receivables			
Receivables for direct taxes	**79**	75	4
Receivables for indirect taxes	**5**	45	(40)
Receivables for disposals of property, plant and equipment and intangible assets	**43**	47	(4)
Other receivables	**83**	113	(30)
Other receivables from related parties	**2**	1	1
Total other receivables	**212**	281	(69)
Total other current assets	**646**	1,219	(573)
Total other non-current and current assets	**728**	1,274	(546)

The breakdown of other assets by maturity is as follows:

€ in millions	To1 year	2 to 5 years	After 5 years	**Total**
Other non-current assets		75	7	**82**
Trade receivables	434			**434**
Other receivables	193		19	**212**
Balances at December 31, 2007	**627**	**75**	**26**	**728**
Other non-current assets		32	23	**55**
Trade receivables	938			**938**
Other receivables	218		63	**281**
Balances at December 31, 2006	**1,156**	**32**	**86**	**1,274**

Other assets include receivables from the sale of the remaining investment in Campi di Vinovo S.p.A. and the "Mondo Juve" business segment for € 37 million (€ 26 million presented in non-current assets and € 11 million in current receivables) by the subsidiary Juventus Football Club. These receivables were discounted to present value based on an estimate of collections times (various installments from 2008 to 2013) and are guaranteed.

27. Cash and cash equivalents

The reconciliation of cash and cash equivalents in the statement of cash flows and the the corresponding lines on the balance sheet is as follows:

€ in millions	**12/31/2007**	12/31/2006	Change
Cash and cash equivalents	**919**	362	557
Bank overdrafts and bank borrowings	**0**	(107)	107
Cash and cash equivalents	**919**	255	664

Cash and cash equivalents include short-term financial investments and highly liquid assets readily convertible to cash such as time deposits, commercial paper and current securities. Cash and cash equivalents are subject to an insignificant risk of a change in value.

The carrying amount of cash and cash equivalents approximates their fair value at the balance sheet date.

The related credit risk can be considered limited in that the counterparts are represented by leading banking institutions.

28. Assets held for sale

Assets held for sale amounting to € 3 million include property, plant and equipment of the companies Kiwengwa Ltd (€ 1 million) and Mediterranea Tourist S.A. (€ 2 million) held by the Alpitour Group which will be sold in April 2008 for a total equivalent amount of € 7 million on the basis of a preliminary agreement signed in December. In addition, the investment in Semana S.r.l., held by Juventus Football Club (€ 30 thousand), was sold on March 4, 2008 to ESE S.p.A., a stockholder of the company.

At December 31, 2006, assets held for sale totaling € 128 million included Groups of assets relating to the investment in Canson Grand Public held by Arjowiggins (€ 99 million), land and buildings by the Antalis Group (€ 10 million), classified in assets held for sale under the disposal program for real estate assets concentrated in France, Spain, Italy, Germany, Switzerland and Finland, in addition to the investment in Campi di Vinovo held by Juventus Football Club (€ 19 million).

29. Equity

Equity attributable to the equity holders of the company - Capital stock

At December 31, 2007, IFI S.p.A.'s capital stock, fully subscribed to and paid-in, amounts to € 163,251,460 and consists of 86,450,000 ordinary shares (52.96% of capital stock) and 76,801,460 preferred shares (47.04% of capital stock), all with a par value of € 1 each. The ordinary capital stock of the company is entirely held by Giovanni Agnelli e C. S.a.p.az. IFI preferred shares are listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment).

Pursuant to art. 6 of the bylaws, ordinary shares may not be disposed of, with effect towards the company, to parties other than the consanguine descendants of their holder and other holders of ordinary shares, unless the shares have been offered beforehand in option to the latter mentioned, with the right of accretion among them.

Pursuant to art. 10 of the bylaws, preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code and the second paragraph of art. 13 of the bylaws.

Pursuant to art. 27 of the bylaws, the profit of each year is appropriated as follows:

- 10% to the legal reserve until it reaches one-fifth of capital stock;
- of the remaining amount, 1% is at the board of directors' disposition for distribution among its members;
- the remaining profit is appropriated as follows:

  - to preferred shares, a preference dividend of 5.17% of their par value, which is not cumulative from one year to the next;
  - after any appropriations to reserves, the residual amount is attributed equally to the ordinary and preferred shares.

Capital stock may be increased for a period of five years, at one or more times, also in divisible form, up to a maximum of € 561,750,000, by the authority delegated, pursuant to art. 2443 of the Italian Civil Code, to the board of directors by the special stockholders' meeting held April 22, 2003.

The board of directors will put forward a motion to the ordinary stockholders' meeting to renew this resolution.

The objectives identified by IFI S.p.A. are the creation of value for all the stockholders, safeguarding the continuity of the company and support for the development of the subsidiary IFIL S.p.A.

IFI S.p.A. thus aims to keep an adequate level of capitalization and guarantee economic accessibility to external sources of financing.
IFI constantly monitors changes in the consolidated debt level based upon the current asset value of its investments and expected dividend flows.
A very prudent approach is nevertheless taken to the use of debt. At December 31, 2007, IFI S.p.A.'s negative net financial position (equal to € 392.7 million) represents approximately 8.5% of the asset value (equal to the market value the investment held in IFIL, € 4,638.2 million).

Equity attributable to the equity holders of the company - Retained earnings and other reserves

The composition and changes in “Retained earnings and other reserves” is as follows:

€ in millions	Legal reserve	Reserve for translation differences	Reserve for stock-based compensation	Fair value reserve	Cash flow hedge reserve	Reserve for actuarial gains (losses)	Other reserves and retained earnings	Retained earnings and other reserves
Equity at January 1, 2006	**33**	**149**	**4**	**262**	**(1)**	**(86)**	**1,568**	**1,929**

Total changes	0	(69)	19	(17)	17	75	113	138
Equity at December 31, 2007	**33**	**(6)**	**26**	**809**	**33**	**12**	**2,331**	**3,238**

Equity attributable to the equity holders of the company - Treasury stock

At December 31, 2007, IFI holds, directly and indirectly, the following preferred shares of treasury stock:

	Number of shares	Carrying amount		% of class
		Per share (€)	Total (€ in ml)	
IFI – preferred shares	**5,360,300**	**13.15**	**70.5**	**6.98**

During the year, there were no transactions involving preferred shares of treasury stock.

The ordinary stockholders' meeting held on May 15, 2007 authorized the purchase of treasury stock for 18 months, pursuant to art. 2357 of the Italian Civil Code and art. 132 of Legislative Decree 58 dated February 24, 1998, for a maximum of 16 million shares, for a total maximum amount of € 200 million.

The board of directors will put forward a motion to the ordinary stockholders' meeting to renew this resolution.

30. Stock option plans

Stock option plans with underlying IFI and IFIL stock

At December 31, 2007, there are no stock option plans with underlying IFI S.p.A. and IFIL S.p.A. stock. With regard to IFIL S.p.A., all the plans approved in prior years by the IFIL S.p.A. board of directors (IFIL 2000 plan and the IFIL 2003 plan) expired during 2006 and no new plans were introduced in 2007.

Stock option plan with underlying Alpitour stock

On December 15, 2005, in execution of the resolution passed by the board of directors' meeting held on November 11, 2005, the Executive Committee of IFIL S.p.A. approved a stock option plan for two managers of the Alpitour Group designed to promote their loyalty to the IFIL Group and provide an incentive to develop and appreciate the investments of the IFIL Group in the tourism sector.

The plan calls for purchase options on Alpitour shares to be granted to the chairman and chief executive officer, D.J. Winteler, and the general manager, F. Prete, respectively, equal to 6% (2,127,000 shares) and 5% (1,772,500 shares) of Alpitour's capital stock.
After approval on the part of IFIL S.p.A., the Alpitour S.p.A. board of directors may in the future grant purchase options on Alpitour shares to other managers who hold important operating positions equal to 4% of Alpitour's capital (now 1,418,000 shares).

The purchase options may be exercised, at one or more times, during the period between the dates of the approval of the 2006/2007 and 2008/2009 Alpitour financial statements at the price of € 2.24 per share, corresponding to the valuation of the Alpitour Group, equal to € 79.4 million, performed in December 2005 by a specially appointed expert.
IFIL S.p.A. and the managers of Alpitour S.p.A., finally, exchanged reciprocal purchase and sale options, exercisable during the same above period, on Alpitour shares that will have been purchased by the same managers; the exercise price will be established on the basis of the appraisal which will be performed using the same valuation principles applied in the December 2005 valuation.

From an accounting standpoint, the plan is a cash-settled stock-based payment transaction subject to paragraph 30 and subsequent paragraphs of IFRS 2, which requires the liability of the plan to be measured at fair value and, therefore, the options of the plan, at every closing date until expiration.

At December 31, 2007, the fair value of each option right of the plan was estimated at € 4.07 for a total of € 16 million, of which the current cost of € 13 million was recorded in 2007 (€ 3 million recorded in 2006) in the income statement in "Other nonrecurring expenses from related parties". The relative total liability of € 16 million is recognized in "Other current liabilities to related parties" (Note 41).

The estimate was performed by an independent expert who applied a binomial model of valuation to the options based on the following parameters:

Stock price at grant date (€)	(a)	2.24
Exercise price (€)	(a)	2.24
Underlying stock price at 12/31/2007 (€)	(b)	6.10
Estimated volatility (%)	(c)	32.5720%
Remaining option life (months)	(d)	25
Estimated dividends (%)	(e)	0.00
Risk-free interest rate (%)	(f)	4.5324%

(a) The exercise price of the options was assumed to be equal to the par value of one ordinary Alpitour S.p.A. share at the grant date, quantified on the basis of an estimate performed by an independent expert.

(b) The fair value of the underlying share (Alpitour S.p.A. ordinary share) at the date of reference of December 31, 2007, was quantified on the basis of an internal estimate prepared by applying valuation principles consistent with those used in December 2005 by the independent expert.

(c) The expected volatility has also been determined by referring to the historical volatility, measured over a period consistent with the remaining life of the shares in the plan, of a sample of listed companies operating in the same sector as Alpitour S.p.A..

(d) The expiration date of the options was established as the date of the approval of the Alpitour S.p.A. financial statements for the year 2008/2009, fixed, conventionally, as January 31, 2010. At the date of reference of December 31, 2007, the options thus have a remaining life of 25 months (2 years and 1 month). The options will vest at the end of the vesting period (January 31, 2008) and can be exercised from that date until the expiration date (January 31, 2010).

(e) The absence of the payment of dividends is assumed for the application of the valuation model.

(f) The risk-free interest rate is assumed to be equal to the return on government securities having a residual life consistent with the expiration of the options in the plan.
An assumption was also included in the "binomial" model for the early exercise of the option rights during the period between the end of the vesting period and contractual expiration date of the options.

Cushman & Wakefield Group stock option plans

There are two separate stock option plans which are summarized in the following table: Employee Stock Purchase Plan Options and Management Options:

	Employee Stock Purchase Plan			Management Options		
	Tranche 1	Tranche 2	Total	EBITDA	EBITDA Margin	Total
Date of board of directors' meeting	12/19/2005	12/19/2005		3/30/2007	3/30/2007	
Number of options granted	11,166	7,385	18,551	8,070	5,380	13,450
Grant date	12/14/2005	6/29/2006		4/1/2007	4/1/2007	
Vesting date	1/1/2008	1/1/2009		2008/2012	2008/2012	
Exercise price at grant date	$548	$782		$1,259	$1,259	
Term of options post-vesting	10 years	10 years		10 years	10 years	
Forfeitures prior to April 1, 2007	(938)		(938)			
Options assumed by C&W Group at April 1, 2007	10,228	7,385	17,613	8,070	5,380	13,450
Options forfeited and canceled during the period	(5,266)	(293)	(5,559)	-	-	-
Options outstanding at December 31, 2007	4,962	7,092	12,054	8,070	5,380	13,450

The Employee Plan options outstanding at December 31, 2007 have an exercise price in the range of $548 and $782 and an average remaining contractual life of approximately 7 years.

The Management Options outstanding at December 31, 2007 have an exercise price of $1,259 and an average remaining contractual life of approximately 9 years.

According to the provisions of IFRS 2, the appraisal was based on the Black-Scholes pricing model using the following assumptions:

	Employee Plan		
	Tranche 1	Tranche 2	Management Options
Stock price at grant date ($)	578.68	906.73	1,298.87
Exercise price at grant date ($)	548.02	782.39	1,258.68
Estimated volatility (%)	35%	35%	35%
Remaining option life (years)	6.5	6.5	10.0
Estimated dividends (%)	1.20	1.22	n.a.
Risk-free interest rate (%)	4.22%	5.12%	4.74%

Volatility is based on the historical volatility of comparable public companies.
Because the Cushman & Wakefield Group does not have historical exercise data, it used the midpoint between the vesting date and the contractual term to determine the expected term of the stock options.

During 2007, costs of € 12 million were capitalized for both stock option plans.

31. Equity attributable to the minority interest

	12/31/2007				12/31/2006		
€ in millions	%	**Capital and reserves**	**Profit (loss)**	**Total**	Capital and reserves	Profit (loss)	Total
IFIL Group	31.7	**2,020**	**221**	**2,241**	2,325	575 (a)	2,900

(a) The minority interest's share of the gain on the SGS sale.

32. Provisions for employee benefits

The companies of the Group provide post-employment benefits for their active employees and retirees, either directly or by contributing to independently administered funds. The way these benefits are provided varies according to the legal, fiscal and economic conditions of each country in which the Group operates, the benefits generally being based on the employees' remuneration and years of service. Post-employment benefits are provided under defined contribution and/or defined benefit plans.

In the case of defined contribution plans, the companies of the Group pay contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. Once the contributions have been paid, the Group has no further payment obligations. The contribution cost is recognized when the employee has rendered his/her service and this cost is recorded in the income statement in "Personnel costs".

Defined benefit plans may be unfunded, or they may be wholly or partly funded by contributions by a company, and sometimes by its employees, into a company, or fund, that is legally separate from the employer and from which the employee benefits are paid. Finally, the companies of the Group grant certain other long-term benefits to its employees; these benefits include those generally paid when an employee attains a certain level of seniority or when a specified event occurs. In this case the measurement of the obligation reflects the probability that payment will be required and the length of time for which payment is expected to be made.

Details of provisions for employee benefits recognized in the financial statements at December 31, 2007 and 2006 are the following:

	Non-current part		Current part	
€ in millions	**12/31/2007**	12/31/2006	**12/31/2007**	12/31/2006
Employee severance indemnity	**24**	27	**4**	0
Pension plans	**10**	0	0	0
Total post-employment benefits	***34***	*27*	***4***	0
Other employee benefits	**11**	110	**109**	7
Total provisions for employee benefits	**45**	137	**113**	7

Post-employment benefits

Employee severance indemnities

Employee severance indemnities relating to the companies of the Group operating in Italy represent the obligation due to employees by law (recently amended by Law 296/06) that has accrued and which will be paid upon termination of employment. In certain circumstances, a portion of the indemnity may be paid as an advance during the employee's service life. This is an unfunded defined benefit plan, considering the benefits almost entirely accrued, with the sole exception of the revaluation.

After the change made to the regulations for employee severance indemnities by Law 296 dated December 27, 2006 (Budget Law 2007), and subsequent decrees and regulations, the portion of employee severance indemnities accruing from January 1, 2007, for employees who have asked, have been transferred to a complementary pension plan chosen by the employees and these therefore fall under defined contribution plans.

For those employees who did not elect the transfer of the accrued portion of employee severance indemnities, beginning January 1, 2007, the calculation of employee severance indemnities, including the portion accruing, will be made according to the usual actuarial method.

In accordance with IAS 19 – Employee Benefits, the Italian companies of the Group have included employee severance indemnities in defined benefit plans and measure them with actuarial techniques using the Project Unit Credit Method.

Besides employee severance indemnities, established by art. 2120 of the Italian Civil Code, the parent, IFI S.p.A., guarantees other forms of benefits (termination benefits, loyalty bonuses, health care plans, defined benefit and defined contribution pension plans) under company or individual supplementary agreements. These are described in Note 27 of the separate financial statements.

Pension plans

The Cushman & Wakefield Group funds a certain number of defined contribution plans set up pursuant to the laws in force in the countries in which it operates .

The relative cost incurred for such plans for the period April – December 2007 amounts to $1.5 million (€ 1.1 million).

The European partnership (C&W UK) also provides a form of hybrid pension plan (UK Plan) which has features of both defined contribution and defined benefit plans.

Each year, the participants of the UK Plan have the possibility of purchasing "units of benefits" by making regular contributions based on age; until March 31, 2002, the company made contributions equivalent to twice the member rate.

The contributions are invested to provide benefits that become payable to members upon retirement or similar events.

Prior to retirement, the UK Plan guarantees only a part of the benefit.

Cushman & Wakefield UK ceased its contributions to the plan effective March 31, 2002 and, subject to certain transitional agreements, introduced a defined contribution plan for employees starting from that date.

Changes in the present value of post-employment benefit obligations and the fair value of plan assets servicing the plans during the course of the last two years are as follows:

€ in millions	Balance at 12/31/2006 (a)	Current service cost	Financial expenses	Actuarial gains (losses)	Benefits paid	Cushman & Wakefield Group acquisition	Losses (gains) on reductions and/or curtailments	Exchange differences	Change in scope of consolidation and other changes	**Balance at 12/31/2007**

€ in millions	Balance at 12/31/2005 (a)	Current service cost	Financial expenses	Actuarial gains (losses)	Benefits paid	Cushman & Wakefield Group acquisition	Losses (gains) on reductions and/or curtailments	Exchange differences	Change in scope of consolidation and other changes	**Balance at 12/31/2006 (a)**
Present value of obligation										
Employee severance indemnities	26	5		(3)	(2)				1	**27**
Total post-employment benefits	26	5	-	(3)	(2)		-	-	1	**27**
Balances at December 31	26	5	-	(3)	(2)		-	-	1	**27**
Balances - Sequana Capital Group	158									**117**
Balances in published financial statements	184									**144**
Of which:										
Funded plans (totally or partially)										
Unfunded plans	26									**27**

(a) The balances at December 31, 2006 and 2005 are net of the amounts relating to the Sequana Capital Group which was deconsolidated in 2007.

Post-employment benefits are calculated on the basis of the following actuarial assumptions:

	December 31, 2007		December 31, 2006
	Employee severance indemnities	**Pension plans**	Employee severance indemnities
Discount rate	**4.6-4.7%**	**5.82%**	4.25%
Future salary increase (inflation included)	**2-3.5%**		2-3.5%
Inflation rate	**2.00%**		2.00%
Expected return on plan assets		**7.13%**	

The assumptions used for the calculation of pension funds are as follows:

- the discount rate is the rate of return at the balance sheet date of a credit instrument (AA rating) with maturity approximating the maturities of the Cushman & Wakefield Group bonds and denominated in the same currency in which the benefits will be paid;
- the mortality rate is based on statistical tables;
- the expected return on plan assets servicing the plan is based on the total return of the portfolio and not the sum of the expected returns of the individual assets. This rate approximates the historical annual rate of the plan assets.

The "UK Plan" assets include marketable equity securities in both United Kingdom and the United States companies and fixed-rate debt securities.
The investment policies and strategies for the plan assets are established to achieve a reasonable balance between risk, likely return and administration expense, as well as to maintain funds at a level to meet minimum funding requirements. In order to ensure that an appropriate investment strategy is in place, an analysis of the plan's assets and liabilities is completed periodically.
The estimated expense of defined plan benefits for the year 2008 is £ 1.5 million (€ 2 million).

	Fair value of the assets		Expected return
	December 31, 2007		**2007**
	Objective in %	€ in millions	in %
Equity instruments	87.2%	38	7.13%
Debt instruments	7.5%	5	7.13%
Cash	5.3%	2	7.13%

The total amounts recognized in the income statement for post-employment benefits refer to:

€ in millions	**2007**	2006
Current service cost	**6**	5
Financial expenses	**3**	0
Expected return on plan assets	**(3)**	0
Losses (gains) on reductions and/or curtailments	**(1)**	0
Total (income) expenses for post-employment benefits	**5**	5

Other employee benefits

Other employee benefits, of which € 11 million is current and € 109 million is non-current, mainly include the liabilities of the Cushman & Wakefield Group.

33. Provisions for other liabilities and charges

The composition of the provisions is as follows:

	Current portion		Non-current portion	
€ in millions	**12/31/2007**	12/31/2006	**12/31/007**	12/31/2006
Restructuring provisions	**0**	54	**0**	12
Fox River disputes provisions	**0**	6	**0**	115

Other financial income (expenses)		8		(6)		

34. Pending litigation

IFIL S.p.A. and subsidiaries in the "Holdings System"

Proceedings regarding the IFIL S.p.A. and Giovanni Agnelli e C. S.a.p.az. press releases dated August 24, 2005

In the opposing judgment against the administrative sanctions imposed by Consob under Resolution 15760 notified on February 13, 2007, the Court of Appeals of Turin, in its decision of December 5, 2007, reduced the total administrative sanctions from € 16 million to € 6.3 million. The reduction for IFIL was from € 4.5 million to € 1 million and for Mr Gabetti from € 5 million to € 1.2 million. Furthermore, the additional administrative sanction levied against Mr Gabetti was reduced by two months, from six to four months, the period of which is now over, as are the periods for the administrative sanctions against Mr Grande Stevens, as the legal advisor, and Mr Marrone.

As for the penal proceedings communicated to these individuals, the judge in the preliminary investigations of December 4, 2007 declared the notification pursuant to ex art. 415 bis of the Italian Penal Code null and void and sent the case to the public prosecutor's office. The proceedings are therefore again in the preliminary stages.

Closing of the dispute regarding the sale of La Rinascente

On February 14, 2006 and September 5, 2006, the buyer of the investment in La Rinascente filed two separate arbitration proceedings against Ifil Investissements S.A. seeking compensation for an amount of approximately € 52 million for extraordinary expenses relating to certain points of sale in addition to legal questions in connection principally with the accounting treatments used in the financial statements of La Rinascente.

On June 27, 2007, Ifil Investissements S.A. signed a settlement agreement in which the buyer of the investment in La Rinascente renounced all claims filed in the above arbitration proceedings against Ifil Investissements S.A. and any other claim and/or demand, also in the future, relating to the sale of the investment in La Rinascente. The settlement involved a total payment of € 8 million (of which € 6 million is to be borne by Ifil Investissements S.A. and € 2 million by the Auchan Group). These expenses are included in "nonrecurring income (expenses)" (Note 14).

Alpitour Group

In reference to the damages to the "Bravo Club" resort in Zanzibar caused by the fire in January 2001, a case is pending before the competent authorities in Tanzania to establish the compensation for damages due from Royal Insurance. During 2005, Royal Insurance was sentenced, in the judgment of first instance, to pay the damages requested in addition to interest and legal fees. The insurance company appealed this decision and the case is now being judged in the second instance. Based on available information, it is believed that there is reasonable certainty that the judgment of the first instance will be upheld.

The Alpitour Group also filed two suits against INPS regarding social security in which judgments of the second instance have already been handed down. Considering that one of the judgments is in favor of the company and the other against, it is believed that the Group will have to pay a total of approximately € 800 thousand which has already been provided for in the financial statements.

Cushman & Wakefield Group

The Cushman & Wakefield Group is a party to various matters in litigation. These matters generally relate to disputes and claims involving commission agreements, employment agreements, and other contractual matters.

The Group believes that while some of these matters may be ultimately resolved against it, such claims will not have a material effect on the financial position and results of operations of the C&W Group.

Juventus Football Club

Proceedings regarding the tragedy at the Vinovo Training Center

On January 28, 2008 and March 11, 2008, the preliminary hearings took place during the course of which the four defendants petitioned to request sentencing under ex art. 444 and following articles of the Penal Code after the plaintiffs had stated, before the judge, that they had been fully compensated.

Therefore, the four defendants were sentenced to one year and two months of imprisonment and granted the benefit of the conditional suspension of the sentence. Finally, on March 12, 2008, the judge also issued a decree to close the case against the chief executive officer Jean-Claude Blanc. The matter can thus be considered definitely concluded.

Investigations against former directors

On May 11, 2006, District Attorney's Office of Naples notified the former chief executive officer Antonio Giraudo and the former director and general manager Luciano Moggi of an "invitation to appear" concerning various illegal acts, including association to commit sports fraud. On June 10, 2006, they were notified of the conclusion of the preliminary investigations. The documents from the criminal proceedings became part of the investigation by sports' justice bodies which led to sports proceedings against the company in summer 2006. The judicial authorities then continued their investigations also as a result of the documents transmitted on an investigation into the same matter at one time filed by the District Attorney's Office of Turin. On April 12, 2007, the District Attorney's Office of Naples issued a new notification of the conclusion of the preliminary investigations. The preliminary hearing began on December 15, 2007 and is still underway.

Criminal proceedings are also underway before the District Attorney's Office of Turin regarding the financial statements and communications by the company from June 30, 2001 to June 30, 2006. The suit filed against some former directors, also regards the company pursuant to articles 5, 13 and 25 of Legislative Decree 231/2001, as the legal entity responsible. If the former directors are considered responsible, the dispute against the company could lead to a pecuniary administrative sanction in the range of € 103 thousand to € 1,239 thousand.

Como Calcio bankruptcy

The bankruptcy of Como Calcio, in June 2006, led to action being brought against Juventus Football Club for the payment of the sum of € 1,580,000 allegedly still due to Como Calcio for the definitive sale of the registration rights of the players Piccolo and Pederzoli.

Juventus Football Club appeared before the courts and asked for the rejection of the bankruptcy filing since the sum had already been paid and also for Mr Preziosi to appear in court so that Juventus would be relieved of responsibility and not be held accountable for damage compensation in the event of a judgment against Juventus. The case was adjourned to the first hearing set for March 12, 2008 in order to call Mr Preziosi before the court. Mr Preziosi appeared and asked for the rejection of the claims against him.

35. Consolidated net financial position

The composition of the gross and net financial position of the consolidated companies is as follows:

€ in millions	Gross borrowings position	Financial assets	Net financial position (borrowings)/cash
IFI S.p.A.	(396)	3	(393)
IFIL S.p.A. and the "Holdings System"	(967)	863	(104)
Cushman & Wakefield Group	(73)	76	3
Alpitour Group	(103)	120	17
Juventus Football Club S.p.A.	(18)	25	7
Total	**(1,557)**	**1,087**	**(470)**

In accordance with the provisions of Consob Communication 6064293 dated July 28, 2006, the composition of the net financial position of the IFI Group is provided below:

€ in millions	**12/31/2007**	12/31/2006	Change
Non-current financial liabilities			
IFIL 2007/2017 bonds	**(744)**		(744)
IFIL 2006/2011 bonds	**(200)**	(199)	(1)
Debt	**(214)**	(578)	364
Total non-current financial liabilities	**(1,158)**	(777)	(381)
Non-current other financial assets	**8**	4	4
Non-current net financial position (A)	**(1,150)**	(773)	(377)
Current financial liabilities			
Debt	**(347)**	(723)	376
Current portion of medium/long-term debt	**(52)**	(24)	(28)
Total current financial liabilities	**(399)**	(747)	348
Current financial assets			
Credit instruments and equity shares held for trading	**152**	954	(802)
Derivative financial instruments	**6**	2	4
Receivables and other financial assets	**2**	6	(4)
Total current financial assets	**160**	962	(802)
Cash and cash equivalents	**919**	362	557
Current net financial position (B)	**680**	577	103
Consolidated net financial position (A+B)	**(470)**	(196)	(274)

There are no financial receivables or payables balances with related parties.

36. Bonds and other debt

The composition is as follows:

	Non-current portion		Current portion	
€ in millions	**12/31/2007**	12/31/2006	**12/31/2007**	12/31/2006
IFIL bonds 2007/2017	**(744)**		**(22)**	
IFIL bonds 2006/2011	**(200)**	(199)	**(1)**	
Debt	**(214)**	(578)	**(376)**	(747)
Total bonds and other debt	**(1,158)**	(777)	**(399)**	(747)

With regard to IFI S.p.A., non-current bank debt amounts to € 100 million (€ 125 million at December 31, 2006).
Interest rate swaps are in place to guarantee fixed interest rates on the entire amount; at December 31, 2007, the fair value on these contracts is positive for € 254 thousand.
Bank debt is classified in non-current liabilities in relation to the residual period of the credit line granted and the duration of the relative hedging contracts.

The current portion of bank debt amounts to € 294 million (€ 35 million at December 31, 2006) and includes loans for € 150 million due by the end June 2008, use of short-term funds for € 144 million and bank overdrafts for the remaining amount (€ 223 thousand).
Interest rate swaps are also in place on the current portion of loans secured in prior years. At December 31, 2007, the fair value on these contracts is positive for € 1,522 thousand.

The loan contracts relating to irrevocable lines of credit of IFI S.p.A. provide for commitments which are common practice in the sector for this type of debt. In particular, some of the main commitments included in certain contracts refer to the obligation of periodic disclosure, not setting up new real guarantees on the assets of the company without the prior consent of the creditors, the non-subordination of the loan, as well as, in some cases, compliance with financial ratios. Finally, there are clauses that could change the duration in the case of serious non-fulfillment such as, for example, failure to pay interest or when extremely serious events arise such as a request to place the company under administration.

The bonds issued by IFIL S.p.A. were admitted for trading on the Luxembourg stock exchange.

The bonds contain covenants that are common in international practice for bond issues of this type. In particular they contain negative pledge clauses (the obligation to extend any real present or future guarantees given as collateral on the assets of the issuer on other bonds and other credit instruments to these bonds to the same degree), disallowing a change of control and providing for periodic disclosure. The 2006/2011 bonds also establish other commitments such as respecting a maximum debt limit in relation to the amount of the portfolio and maintaining a rating by one of the major agencies. Non-compliance with these covenants allows the bondholders to ask for the immediate redemption of the bonds. Finally, standard events of default are envisaged in the case of serious non-fulfillment such as, for example, failure to pay interest. These covenants were complied with at December 31, 2007.

The IFIL 2007/2017 bonds were issued at a price equal to 99.554% of their face value with a 5.375% annual coupon which guarantees a return equal to the 10-year swap rate plus a spread of 80 basis points, at the time of issue.

The IFIL 2006/2011 bonds, issued on June 9, 2006 for a nominal amount of € 200 million, maturing June 9, 2011, pay interest at the 3-month Euribor rate plus a spread of 68 basis points.

The Cushman & Wakefield Group principally has the following categories of debt:

- Senior Revolving Credit Facility secured on May 29, 2007 for $350 million. At December 31, 2007, the outstanding balance is $97.2 million (€ 66 million), of which $82 million (€ 56 million) is at an average rate of 6.31%, $7.8 million (€ 5 million) at an average rate of 5.58% and $7.4 million (€ 5 million) at an average rate of 5.13% with the maximum balance during the nine months of the year 2007 of $202.8 million (€ 138 million) in August 2008.

- Seller Note – Le Page for $6.8 million (€ 5 million) at a rate of 7%;
- Seller Note – The Apartment Group for $2.9 million (€ 2 million) at a rate of 6%;
- Seller Note – San Diego for $0.5 million (€ 0.3 million).

The Senior Credit Facility calls for four covenants to be maintained for the entire term of the credit facility including leverage ratios as defined in the contract.
The financial covenants have been complied with from the time the credit facility was secured until December 31, 2007.

They also include:

- debt of the Alpitour Group for € 103 million relating principally to the securitization of trade receivables (€ 48 million) and the residual loan secured originally from Banca Sanpaolo IMI and Banca Intesa using EIB funds (€ 17 million);
- debt of Juventus Football Club for € 18 million.

The medium and long-term loan contracts state that the Alpitour Group must comply with the covenants calculated on consolidated equity, economic and financial data (mainly net debt/equity and Ebitda/net debt). In view of the seasonal nature of the business, these ratios, as established by the relevant contracts, are calculated on an annual basis at the year-end closing date.
At October 31, 2007, these ratios were fully within the limits established by the covenants.

37. Deferred income taxes

The composition and change in deferred tax assets is as follows:

€ in millions	Employee benefits	Tax losses	Deferred compensation plans	Other	**Total**
Balance at December 31, 2006	28	51	0	(30)	**49**
Deconsolidation of the Sequana Capital Group	(27)	(33)		40	**(20)**
Acquisition of the Cushman & Wakefield Group		2	25	20	**47**
Income taxes charged (reversed) to the income statement		(9)	(2)	(1)	**(12)**
Exchange differences		(1)	(2)	(2)	**(5)**
Net other movements		(4)		17	**13**
Balance at December 31, 2007	**1**	**6**	**21**	**44**	**72**

The composition and the change in deferred tax liabilities is as follows:

€ in millions	Property, plant and equipment	Intangible assets	Depreciation and tax accruals	Fair value	Other	**Total**
Balance at December 31, 2006	(81)		(30)	(49)	58	**(102)**
Deconsolidation of the Sequana Capital Group	76		32	1	(48)	**61**
Acquisition of the Cushman & Wakefield Group		(128)			(7)	**(135)**
Income taxes (charged) reversed to the income statement	4	10	(2)		1	**13**
Income taxes relating to items directly debited to equity				37 (a)	(3)	**34**
Exchange differences	1	13				**14**
Net other movements	(2)	(2)			(9)	**(13)**
Balance at December 31, 2007	**(2)**	**(107)**	**0**	**(11)**	**(8)**	**(128)**

(a) Relating to taxes on the fair value of the investment in Intesa Sanpaolo S.p.A.

The analysis of unused tax loss carryforwards on which deferred tax assets have not been calculated is as follows:

€ in millions	Taxable base To 1 year	2 to 4 years	After 4 years	Total	Estimated tax benefit
At December 31, 2007					
Current tax losses	204	463	633	1,300	347
At December 31, 2006					
Current tax losses	114	579	773	1,466	470

Deferred tax assets on tax losses are recognized to the extent that their recoverability is highly probable in the following year or in the medium term, taking into account the taxable income forecast in medium-term operating plans.

38. Other liabilities

Details of other liabilities are as follows:

€ in millions	**12/31/2007**	12/31/2006	Change
Other non-current liabilities			
Other non-current liabilities and other payables	**100**	54	46
Other non-current payables to related parties	**1**	3	(2)
Total other non-current liabilities	**101**	57	44
Other current liabilities			
Trade payables			
Trade payables	**367**	912	(545)

Total trade payables	**377**	927	(550)
Other current liabilities			
Payables for direct taxes	**17**	67	(50)
Payables for indirect taxes	**22**	70	(48)
Payables to employees and similar	**33**	142	(109)
Payables on purchases of property, plant and equipment	**29**	47	(18)
Other payables	**137**	202	(65)
Other payables to related parties	**18**	0	18
Other current liabilities	**256**	528	(272)
Total trade payables and other current liabilities	**633**	1,455	(822)
Total trade payables and other non-current and current liabilities	**734**	1,512	(778)

For additional information on payables to related parties, reference should be made to Note 41.

Other non-current and current liabilities by maturity are as follows:

€ in millions	To 1 year	2 to 5 years	After 5 years	**Total**
Other non-current liabilities		91	10	**101**
Trade payables	377			**377**
Other payables	256			**256**
Balances at December 31, 2007	**633**	**91**	**10**	**734**
Other non-current liabilities		45	12	**57**
Trade payables	927			**927**
Other payables	528			**528**
Balances at December 31, 2006	**1,455**	**45**	**12**	**1,512**

39. Commitments

Details are as follows:

€ in millions	**12/31/2007**	12/31/2006 (a)
Commitments undertaken		
Bills discounted and not yet due	**0**	1
Guarantees	**0**	572
Sureties, guarantees of notes and other guarantees	**137**	78
Commitments for the purchase of intangible assets	**0**	1
Commitments for the purchase of property, plant and equipment	**3**	5
Commitments for the purchase of investments and other financial assets	**71**	585 (b)
Options for the purchase of players' rights	**0**	13
Goods on deposit with third parties	**1**	2
Forward purchase of goods and raw materials	**0**	173
Other commitments	**0**	58
Total commitments undertaken	**212**	1,488
Commitments received		
Sureties, guarantees, guarantees of notes and other guarantees	**187**	170
Options on soccer players	**0**	23
Commitments for the sale of property, plant and equipment	**0**	5
Forward sales of goods and raw materials	**0**	156
Other commitments	**63**	57
Total commitments received	**250**	411

(a) The balances included the commitments of the Sequana Capital Group.
(b) The amounts included the commitment for the purchase of the controlling stake in Cushman & Wakefield.

Commitments by due date are as follows:

€ in millions	Until canceled	To 6 months	6 months to 1 year	1 to 3 years	3 to 5 years	After 5 years	Sequana Capital Group	**Total**
At December 31, 2007								
Commitments undertaken	81	60	29	37	5	0	0	**212**
Commitments received	0	177	41	4	28	0	0	**250**
At December 31, 2006								
Commitments undertaken	6	580	50	13	14	2	823	**1,488**
Commitments received	0	0	88	0	155	0	168	**411**

The amount of future minimum lease payments relating to operating leases is as follows:

€ in millions	0 to 6 months	6 months to 1 year	1 to 3 years	3 to 5 years	After 5 years	Sequana Capital Group	**Total**
At December 31, 2007	**28**	**28**	**81**	**51**	**58**		**246**
At December 31, 2006		18		24		262	304

In 2007, floating-rate lease contracts total € 18 million (€ 95 million in 2006). In 2006, fixed-rate lease contracts amounted to € 209 million and referred entirely to the Sequana Capital Group.

Lease expenses recognized in the 2007 income statement amount to € 45 million and refer entirely to simple lease contracts. Lease expenses recognized in the 2006 income statement amounted to € 97 million (of which € 31 million for irrevocable leases, € 45 million for other operating leases and € 21 million for simple lease contracts).

Commitments undertaken at December 31, 2007 amount to € 212 million and mainly refer to sureties, guarantees of notes and other guarantees for € 137 million, as well as commitments for the purchase of investments and financial assets for € 71 million.

Sureties, guarantees of notes and other guarantees (€ 137 million) mainly include sureties on behalf of suppliers of tourist services, financial offices and public entities provided by the Alpitour Group and other guarantees of the Alpitour Group for € 65 million, in addition to sureties of Juventus Football Club for € 29 million provided by leading credit institutions.

Commitments for the purchase of investments and other financial assets (€ 71 million) refer to commitments undertaken by the subsidiary Ifil Investissements, as follows:

- commitment for a maximum investment of $80 million (€ 56 million) in the limited partnership NoCo B LP which Groups a series of funds managed by Perella Weinberg Partners L.P., undertaken by the subsidiary Ifil Investissements S.A. which, on May 2, 2007, succeeded Exor Group S.A., a company controlled by Giovanni Agnelli e C. S.a.p.az. As a result of this commitment, on December 31, 2007, Ifil Investissements invested $17 million (€ 12 million). The remaining commitment at December 31, 2007 is $67 million (equal to € 46 million);
- commitment to invest € 25 million in a real estate fund managed by Perella Weinberg Partners L.P.

Commitments received amount to € 250 million and refer to sureties, guarantees, guarantees of notes and other guarantees for € 187 million (of which € 141 million is for sureties provided by third parties to Juventus Football Club) and sales commitments of the Alpitour Group for € 63 million for travel bookings.

The main sureties relating to Juventus Football Club are as follows:

- surety of € 78 million provided by leading credit institutions on behalf of Sky Italia S.r.l. to guarantee the contract for the sale of television broadcasting rights to the championship home games for the 2007/2008 season;
- surety of € 52 million issued by leading credit institutions in favor of Reti Televisive Italiane S.p.A. to guarantee the contract for the sale of the television broadcasting rights to the championship home games for the 2007/2008 season;
- other sureties for € 11 million.

Other guarantees received by Juventus Football Club for € 43 million refer to guarantees for the receivable from Campi di Vinovo S.p.A. and notes. For additional information, reference should be made to Note 26.

Procedures for the identification and control of commitments

The information regarding commitments, in addition to all other data and information used for consolidation purposes, is transmitted to IFI S.p.A. through the consolidation process under the responsibility of the legal representatives of the individual companies and the holding companies consolidated by IFIL S.p.A. which sign a representation letter addressed to the parent.

On the basis of information known to IFI S.p.A., no significant commitments have been omitted by the companies of the Group.

40. Additional information on financial instruments and financial risk management policies

The carrying amounts and the relative income (expenses) originating from each category of asset and liability classified in accordance with IAS 39 are presented as follows:

	December 31, 2007		
€ in thousands	Carrying amount	Income	Expenses
Financial assets			
At fair value through the income statement			
- held for trading	154	4	
- designated initially	0		
Derivative instruments designated as hedging derivatives	6		
Investments held to maturity	12	0	
Loans and receivables (a)	1,382	33	0
Available-for-sale assets	2,635	112	
Total	**4,189**	**149**	**0**
Financial liabilities			
At fair value through the income statement			
- held for trading	0		
- designated initially	0		
Derivative instruments designated as hedging derivatives	0		
Debt at amortized cost	970		(32)
Debt at cost	963		(38)
Financial guarantees	0		
Total	**1,933**	**0**	**(70)**

(a) Includes cash and cash equivalents for € 919 million.

	December 31, 2006		
€ in thousands	Carrying amount	Income	Expenses
Financial assets			
At fair value through the income statement			
- held for trading (a)	963	19	
- designated initially	0		
Derivative instruments designated as hedging derivatives	5		
Investments held to maturity	102		
Loans and receivables (a)	1,442	2	
Available-for-sale assets	2,569	53	
Total	**5,081**	**74**	**0**
Financial liabilities			
At fair value through the income statement			
- held for trading	0		
- designated initially	0		
Derivative instruments designated as hedging derivatives	0		
Debt at amortized cost	199		(9)
Debt at cost	2,244		(21)
Financial guarantees	0		
Total	**2,443**	**0**	**(30)**

(a) Includes cash and cash equivalents for € 362 million.

Financial assets and liabilities for which the fair value can not be objectively determined and which are recognized at cost have not been included in the asset and liability categories indicated in IAS 39.

Income and expenses relating to the year 2006 do not include the income statement data of the Sequana Capital Group since the Group was deconsolidated and the data restated to show the IFI Group's share of the result in "Discontinued assets or assets held for sale". For additional information, reference should be made to "Change in the scope of consolidation" in Note 9.

Fair value of financial assets and liabilities and the criteria for the determination of fair value

Financial assets held for trading represented by listed securities are measured using the listed market price at year-end and the change in fair value is recognized in the income statement in financial income (expenses).

Available-for-sale assets represented by listed securities are measured at fair value using the listed market price at year-end and the unrealized gains or losses are recognized in equity. For additional information on the measurement of available-for-sale financial assets, reference should be made to Note 24.

For trade receivables and payables, referring to those due all within one year, the fair value is not significant in that their carrying amount approximates fair value.

Derivative financial instruments are measured at fair value using the discounted cash flow method.

Credit risk

Credit risk exposure is principally represented by trade receivables and the concentration of credit risk, however, is mitigated by a large number of counterparts.

Trade receivables are expressed in the financial statements net of the provision for impairment for the risk that counterparts will be unable to fulfill their contractual obligations, the creditworthiness of the customer and historical data.

Credit risk regarding the other financial assets of the Group, which include cash and cash equivalents, available-for-sale assets, receivables and some derivatives, have a maximum risk equal to the carrying amount of the assets in the case of the insolvency of the counterpart.

The amount of financial assets overdue but not impaired, represented by trade receivables in the category "loans and receivables", is detailed as follows:

	Overdue but not impaired						
€ in millions	30 days	30 to 60 days	60 to 90 days	90 to 180 days	180 to 360 days	more than 360 days	Total
2007							
Trade receivables	**136**	**20**	**21**	**11**	**3**	**3**	**194**

	Overdue but not impaired (a)						
€ in millions	30 days	30 to 60 days	60 to 90 days	90 to 180 days	180 to 360 days	more than 360 days	Total
2006							
Trade receivables	21	13	9	9	5	7	64

(a) The data of the Sequana Capital Group is not included.

Movements in the provision for the impairment of receivables and other financial assets for the years 2007 and 2006 are as follows:

€ in millions	**12/31/2007**	12/31/2006
Beginning balance	**23**	89
Balance of the Sequana Capital Group		(63)
Accruals	8	6
Uses	(6)	(9)
Acquisition of the Cushman & Wakefield Group	7	0
Exchange differences	1	0
Other changes	(3)	0
Ending balance	**30**	23

Information on the credit risk of the IFI Group is presented below.

IFI, IFIL and IFIL Holdings System

IFI S.p.A., IFIL S.p.A. and the companies in the IFIL Holdings System effectively are not subject to credit risk since the counterparts are mainly represented by high-credit-quality leading banking institutions.

IFI, IFIL and the IFIL Holdings System, at either December 31, 2007 or December 31, 2006, do not have financial assets overdue and impaired and provisions for the impairment of receivables.

Alpitour Group

Transactions for the sale of receivables

At October 31, 2007, the balance relating to the monthly securitization program of trade receivables begun by the Alpitour Group in 2006 amounts to € 49 million. The securitization operation formalized by Alpitour S.p.A. with Banca Calyon in Milan provides for a revolving credit line which can be used on a monthly basis up to a net maximum amount of € 55 million against the sale of the trade receivables. Furthermore, in accordance with the contract terms, in exchange for the monthly sale of receivables and the amount of utilization requested (monthly program), Alpitour is obliged to subscribe to short-term securities (30-day maturities) issued by a French-registered associate of the Calyon Group, the amount of which is determined on the basis of the quality of the receivables sold and the relative degree of concentration. At October 31, 2007, short-term securities were subscribed to for an amount of € 40 million against a monthly program of € 49 million; the net use of the securitization line at the year-end closing date is therefore equal to € 9 million against a credit line made available by Calyon for € 55 million.

The Alpitour Group does not have any particular concentrations of credit risk since its credit exposure is distributed over a large number of counterparts and customers.

Trade receivables are expressed net of the provision for receivables impairment which amounts to € 22 million at December 31, 2007.

Cushman & Wakefield Group

The credit risk of the Cushman & Wakefield Group is represented by the carrying amount of financial assets recorded in cash and cash equivalents for $110.2 million (€ 75 million) and the carrying amount of trade receivables for $444 million (€ 302 million).

Trade receivables are expressed net of the provision for receivables impairment which amounts to $8.2 million (€ 6 million) at December 31, 2007.

Juventus Football Club

Juventus Football Club does not have any significant concentrations of credit risk.
Trade receivables are expressed net of the provision for receivables impairment which amounts to € 1 million at December 31, 2007.

Liquidity risk

The companies of the Group control the liquidity risk by planning investments of liquidity, monitoring the maturities of financial investments and financial assets and the expected cash flows from operations.
The residual contract maturities for all the financial liabilities which fall under the application of IAS 39 are indicated below.

The table has been prepared by allocating the remaining cash flows from existing contracts, including principal and interest; with regard to floating-rate loans, the most recent coupon rate with the bank counterpart was used for the projection of future maturities.

	December 31, 2007

Comments in respect of IFI S.p.A., IFIL S.p.A. and the companies of the Holdings System are presented below.

Outgoing flows from current operations are substantially financed by incoming flows from ordinary business and cash availability.
Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or difficulties in raising sufficient funds that can be readily used to support operating and investment activities. In this sense, the IFI Group operates so as to have irrevocable credit lines available with expiration dates and amounts consistent with its investment plans.

At December 31, 2007, the IFI Group has unused credit lines for € 2,680 million (€ 3,188 million at December 31, 2006).

Overall credit lines of the Alpitour Group total € 358 million, of which € 74 million is used for short-term financing and € 27 million for medium-term financing.

As for the liquidity risk of the Cushman & Wakefield Group, its cash position and future outlook are reviewed on a weekly basis. The C&W Group's seasonal cash flow demands peak in the early second quarter. To supplement its internally generated cash flows, the Cushman & Wakefield Group secured a $350 million Senior Credit Facility on May 29, 2007. This facility will be used to support acquisition opportunities and fund seasonal cash flow requirements during the year.
The breakdown of maturities by credit line is as follows:

	December 31, 2007						
	Nominal amount						
€ in millions	Until canceled	To 6 months	6 months to 1 year	1 to 3 years	3 to 5 years	After 5 years	**Total**

Market risk

The IFI Group is principally exposed to exchange rate and interest rate risks, since the Group operates internationally in different currency areas and uses financial instruments which generate interest, in addition to the price risk on equity shares and other listed financial assets.
Financial risks are managed by each subgroup in which the Group's activities are divided. The financial risk management of the subsidiary IFIL S.p.A. and the companies in the IFIL Holdings System refer to the parent, IFI.

Exchange rate risk

An analysis of debt by currency is as follows:

€ in millions	EUR	GBP	USD	Other	**Total**
At December 31, 2007					
IFIL bonds 2007-2017	(744)				**(744)**
IFIL bonds 2006-2011	(200)				**(200)**
Debt	(544)		(58)	(10)	**(612)**
Total debt	**(1,488)**	**0**	**(58)**	**(10)**	**(1,556)**
At December 31, 2006					
IFIL bonds 2006-2011	(199)				**(199)**
Debt	(1,186)	(68)	(51)	(20)	**(1,325)**
Total debt	**(1,385)**	**(68)**	**(51)**	**(20)**	**(1,524)**

The Group is exposed to risks from fluctuations in exchange rates which can affect the results of operations and equity.

The transactions put into place by the companies of the Group to hedge the above currency positions are described below.

IFIL S.p.A. does not have financial liabilities denominated in currencies other than the Euro. Some of the assets held for trading and cash and cash equivalents at December 31, 2007 (respectively, € 19 million and € 3 million) are denominated in currencies other than the Euro. These are securities held for trading and cash and cash equivalents which have both been adjusted to the year-end exchange rate.

The Alpitour Group, since it operates internationally, is subject to market risk from the fluctuations in exchange rates.
Alpitour S.p.A. has put into place forward contracts and zero cost collars for a total nominal amount of € 27 million to manage the risk of fluctuations in currency rates hedging the exposure in foreign currencies for the next year. The fair value of IRS at October 31, 2007 is estimated at a negative € 1,099 thousand.

Exchange rate risk relating to the operations of the Cushman & Wakefield Group is limited since the companies of the C&W Group conduct their operations in their functional currency.
Exposure to currency risk is only from intercompany commercial transactions. The C&W Group mitigated this risk in 2007 by using some foreign exchange forward contracts for the three main currencies in which it operates: the British pound, the Canadian dollar and the Brazilian real. The fair value of these financial instruments at December 31, 2007 amounts to $14,000 thousand (€ 9,510 thousand).
The exchange risk relating to financial liabilities is limited to the foreign currency debt referring to the portion of the Senior Revolving Credit Facility for $14.3 million (€ 5 million).
The C&W Group believes that the companies exposed to this risk will generate sufficient cash flows in the future to repay their debt, therefore, no hedging instruments have been put into place.

At December 31, 2006, the Sequana Capital Group had some foreign currency hedging contracts; the change in fair value of these contracts was recorded in the income statement for a negative amount of € 33 thousand.

Sensitivity analysis for exchange rate risk

A sensitivity analysis at the balance sheet date has been prepared in respect of the financial instruments exposed to the exchange rate risk of the Eur/USD, Eur/GBP and risks referring to other currencies represented principally by trade receivables and payables, financial assets and derivative financial instruments of the Alpitour Group and the Cushman & Wakefield Group.

Alpitour Group
The sensitivity analysis for the exchange risk of the Alpitour Group used the data of the financial statements at October 31, 2007 and is based on the following assumptions:

- the amount shown in the financial statements for financial assets and liabilities has been adjusted by applying a symmetrical percentage change of 10% to the year-end exchange rate;
- for derivative financial instruments, the effects have been calculated assuming that the volatility of the markets is unchanged at year-end.

The Alpitour Group is exposed to exchange rate risk on financial assets for € 6 million and on financial liabilities for € 51 million.
A 10% increase or decrease in the exchange rates of the major foreign currencies against the Euro would have an effect on the result for € 1.2 million and a positive effect on equity for € 1.9 million and a negative effect for € 2.5 million.

Cushman & Wakefield Group
The Cushman & Wakefield Group is exposed to exchange rate risk on financial assets for € 231 million and on financial liabilities for € 106 million.
A 10% increase or decrease in the exchange rates of the major foreign currencies against the Euro would affect equity by € 11 million.

Interest rate risk
The companies of the Group use external financial resources obtained in the form of financing and invest available liquidity in monetary and financial market instruments. Changes in market interest rates can affect the cost and yield of the various forms of financing, causing an impact on the level of the Group's financial expenses.
The interest rate risk is managed by the individual consolidated Groups which establish the appropriate mix between fixed-rate and floating-rate financing using interest rate swaps and zero cost collars.

The fair value effect of the interest rate risk hedging transactions put into place by the consolidated companies is as follows:

€ in thousands	**12/31/2007**	12/31/2006	Change
IFIL S.p.A. and "Holdings System"	**3,938**	1,864	2,074
IFI S.p.A.	**1,776**	3,091	(1,315)
Alpitour Group	**168**	(341)	509
Sequana Capital Group	**-**	3,824	(3,824)
Total	**5,882**	8,438	(2,556)

IFI S.p.A. has some interest rate swap contracts in place at December 31, 2007, for a notional amount of a total of € 250 million, to hedge the risk of fluctuations in interest rates on bank debt with a positive fair value equal to € 1,776 thousand.

IFIL Investments S.p.A. has some interest rate swap contracts in place at December 31, 2007, for a notional amount of a total of € 200 million, to hedge the risk of fluctuations in interest rates on the IFIL bonds 2006-2011 with a positive fair value equal to € 3,938 thousand (€1,864 thousand in 2006).

Alpitour S.p.A. has interest rate swap contracts and zero cost collars, for a notional amount of a total of € 20 million, to hedge the risk of fluctuations in interest rates on the syndicated loan secured on November 30, 2006. The fair value of these contracts at October 31, 2007 is estimated at a positive amount of € 168 thousand (a negative amount of € 341 thousand at October 31, 2006).

Juventus Football Club's debt mainly bears interest at floating rates. The company, however, does not believe it necessary to initiate procedures to limit the risks connected with the volatility of interest rates since any impact related thereto is considered insignificant.

The Cushman & Wakefield Group is exposed to interest rate risks associated with the Revolving Credit Facility of $350 million. At this time, management has not put into place any form of hedging.

At December 31, 2006, the Sequana Capital Group had some interest rate swap contracts for a total notional amount of € 325 million and cap and floor collars for a total notional amount of € 70 million; the positive fair value recorded in the income statement and equity amounted, respectively, to € 2,287 thousand and € 1,537 thousand.

The fair value recorded in the cash flow hedge reserve refers to the hedge of cash flows relating to interest expenses on loans which will arise in the years 2008 to 2011 (approximately € 15 million for the years between 2008 and 2009, € 9 million for the year 2010 and € 5 million for the year 2011).

Analysis of debt by interest rate
The analysis of debt by interest rate at December 31, 2007 shows that the rates are mainly between 4% and 5% for € 595 million and between 5% and 7.5% for € 958 million.
The analysis of debt by interest rate at December 31, 2006 showed that the rates were mainly between 3% and 4% for € 576 million, between 4% and 5% for € 801 million and between 5% and 7.5% for € 135 million.

Sensitivity analysis for interest rate risk

A sensitivity analysis at the balance sheet date has been prepared in respect of financial instruments exposed to interest rate risk. In the case of floating-rate liabilities, the analysis was prepared assuming that the exposure at the end of the year remained constant for the entire year. The assumptions used for the model are as follows:

- to debt: a symmetrical change of 50 basis points is applied;
- for interest rate swaps: the change in fair value is recalculated applying a parallel and symmetrical shift of 50 basis points to the current interest rate curve at the balance sheet date. In determining the above effect, account is taken of the consequent impact on the reversal of the cash flow hedge reserve to the income statement.

If there is an increase or decrease in the interest rates of 50 basis points, all other variables remaining constant, the pre-tax result of the Group for the year 2007 would be higher or lower by € 3.1 million; the cash flow hedge reserve would be higher or lower by € 0.8 million.

Price risk

IFI and the IFIL Holdings System are exposed to price risk originating from investments in the capital stock of other companies held for trading or for strategic purposes, classified in the categories of available-for-sale and assets held for trading and current securities.

The Alpitour Group, particularly the aviation division, is subject to the risk of fluctuations in fuel prices that are largely associated with international political equilibrium and other exogenous factors. Since fuel is a primary factor in air transport, price fluctuations could have a significant impact on the Alpitour Group's margin. The risk exposure is hedged by commodity swaps and zero cost collars with high standing Italian and international financial institutions. At October 31, 2007, there were no contracts outstanding since they were closed during the year.

At October 31, 2006, the Alpitour Group had transactions outstanding for the purchase of 36,000 tons of fuel for a notional amount of € 15,461 thousand to hedge the risk of fuel price fluctuations.
At October 31, 2006, the fair value of these transactions qualified for hedge accounting and had a negative value of € 631 thousand recognized in an equity reserve.

The Cushman & Wakefield Group is exposed to equity price risk arising from available-for-sale equity securities held for the European (EMEA) pension plans. The investment decisions for this plan are made by the Trustees of the plan, based on consultation with the investment and actuarial advisors of the Trustees.

Sensitivity analysis for price risk

Considering price risk exposure at the balance sheet date, if the prices of securities are 5% higher or lower, the fair value reserve on available-for-sale assets recorded in equity would be € 126 million higher or lower and the amount of fair value recognized in the income statement on the securities and investments included in the category of assets held for trading and cash and cash equivalents would be € 8 million higher or lower. Details are as follows:

	+5% change in price		-5% change in price	
Type of asset	Effect on result	Effect on equity	Effect on result	Effect on equity
Intesa Sanpaolo		78		(78)
SGS		48		(48)
Credit instruments and investment funds – non-current	1		(1)	
Credit instruments – current	3		(3)	
Equity shares – current	3		(3)	
Cash and cash equivalents	1		(1)	
	8	**126**	**(8)**	**(126)**

41. Intragroup and related party transactions

The IFI Group is directly controlled by Giovanni Agnelli e C. S.a.p.az., a company registered in Italy which holds the entire ordinary capital stock of IFI S.p.A.

The transactions between the company and its consolidated subsidiaries, which are related parties of the same company, are eliminated in the consolidated financial statements of the IFI Group and are therefore not presented in this note.

Related party transactions are carried out in accordance with existing laws on the basis of reciprocal economic gain.

Receivables and payables are not guaranteed and are settled in cash. Guarantees have neither been granted nor received.

Costs have not been recognized during the period for non-existent or doubtful liabilities in relation to amounts due from related parties.

The balance sheet and income statement balances generated by transactions with related parties carried out during 2007, identified in accordance with IAS 24 and communicated by the companies of the Group, are summarized in the following tables. Transactions are indicated only if close to € 1 million, which is the unit of measure for the presentation of the consolidated figures of the IFI Group.

€ in millions	Trade receivables	Trade payables	Other assets	Financial assets	Other liabilities	Costs	Revenues
Sale of the 22% stake in the Sequana Capital Group to DLMD						(55) (a)	
Subscription to DLMD S-Bonds				28 (a)			
Investment in NoCo B				12 (b)

Fiat Group	1	(1)				(1)	8 (f)
Total IFI Group	**2**	**(10)**	**2**	**59**	**(19)**	**(111)**	**28**

a) For additional information, reference should be made to Note 9.
b) On May 2, 2007, Ifil Investissements S.A. succeeded Exor Group S.A., a company controlled by Giovanni Agnelli e C. S.a.p.az., in a commitment for a maximum investment of $80 million in the limited partnership NoCo B LP which Groups a series of funds managed by Perella Weinberg Partners L.P. As a result of this commitment, on December 31, 2007, Ifil Investissements S.A. invested $17 million (€ 11.9 million).
c) On September 30, 2007, Ifil Investissements S.A. purchased a 100% stake in the capital stock of the American company ANCOM USA Inc, from Exor Group S.A., for a total payment of approximately $27 million (€ 19.1 million). ANCOM USA Inc holds 1.96% of the limited partnership NoCo A LP, under which the Perella Weinberg Group conducts all of its activities.
d) Other liabilities include the payable to the chairman of IFIL S.p.A. for the extraordinary compensation approved in 2005 (for a residual amount of € 2 million) and the payable by Juventus Football Club to its chief executive officer (€ 1 million).
e) The amount refers to the proceeds discounted to present value on the sale of the investment in Campi di Vinovo S.p.A. and the "Mondo Juve" business segment.
f) Effective from July 1, 2007 to June 30, 2010, the Fiat Group became the "Official Sponsor" of the Juventus Football Club for all games.
The agreement gives the Fiat Group the right to exploit the Juventus Football Club image, including the use of its trademarks on all technical clothing for all the teams of the club, for total fixed consideration payable to Juventus Football Club of € 33 million and variable consideration determined in relation to reaching pre-set sports results in national and international games.
According to the agreement, in the 2007/2008 season, the players will display the trademark of New Holland – Fiat Group. New Holland operates in the agricultural and construction equipment sector.

At December 31, 2007, Tiberto Brandolini d'Adda holds 304,153 options to subscribe or purchase the same number of Sequana Capital shares between May 2009 and May 2013 at a price per share of € 20.46.

Furthermore, Sequana Capital has assigned Tiberto Brandolini d'Adda, gratuitously, 12,340 shares that will be assigned on March 29, 2008 and available from March 29, 2010.

During 2007, Sequana Capital paid compensation to Tiberto Brandolini d'Adda for a total of € 3,361,973.

Moreover, in 2007, the director, Franzo Grande Stevens, rendered professional services to IFIL S.p.A. for € 1,150 thousand and to Fiat S.p.A. for € 1 million (including acting as the secretary to the board of directors).

42. Compensation to directors and statutory auditors

In 2007, the compensation to the directors and statutory auditors of IFI S.p.A., to perform their duties in the parent and also in other companies included in consolidation, is as follows:

€ in thousands	IFI S.p.A.	Subsidiaries (a)	Total
Directors	1,004	2,022	3,026
Statutory Auditors	146	118	264
Total	**1,150**	**2,140**	**3,290**

(a) This does not include the compensation paid by Fiat and its subsidiaries since the Fiat Group is not included in the scope of consolidation.

In 2006, compensation amounted to € 6,827 thousand, of which € 1,092 thousand was paid by IFI and € 5,735 thousand by the subsidiaries.

IFI S.p.A. also signed a third-party liability insurance policy for the directors with a Group of insurance companies for a maximum claim per incident and per year of € 50 million for coverage in the event of requests for reparation of non-fraudulent acts.

The Chairman, John Elkann, does not receive any compensation for his post. The remuneration of the directors Gianluigi Gabetti and Pio Teodorani-Fabbri is not linked to either the economic results of the company or targets set by the board of directors
A part of the compensation of the general manager, however, is tied to the economic results of the company and the reaching of specific targets.

Additional information on compensation, as requested by national law (Consob Regulation 11971 dated May 14, 1999 and later amendments and integrations), is provided in the notes to the separate financial statements of IFI S.p.A.

43. Employees

The breakdown of the average number of employees is provided as follows:

Average number of employees	**12/31/2007**	12/31/2006
Breakdown by category		
Managers	**1,526**	68
Middle management and clerical staff	**12,256**	1,618
Pilots and flight attendants	**259**	183
Soccer players	**54**	60
Blue-collar	**3,366**	2,255
	17,461	4,184

44. Proforma consolidated data prepared by consolidating the Fiat Group line-by-line

Pending an opinion by the IASB, which the European Commission has also requested by letter dated October 26, 2006, that will definitively clarify the criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, the IFI Group has continued to exclude the Fiat Group, in which IFIL S.p.A. has a 30.45% holding of ordinary capital stock, from line-by-line consolidation consistently with the method followed for the first-time adoption of IFRS and the preparation of the consolidated financial statements as at December 31, 2005 and December 31, 2006.

However, presented below are the proforma consolidated balance sheet, the proforma consolidated income statement and the composition of the proforma consolidated net financial position prepared by consolidating the Fiat Group line-by-line.

IFI Group – Proforma consolidated income statement prepared by consolidating the Fiat Group line-by-line

Annual Report 2007

Certifications according to art. 154-bis of Legislative Decree 58/98

Certification of the separate financial statements according to art. 81-ter of Consob Regulation 11971 of May 14, 1999 and subsequent amendments and additions

We, the undersigned, Virgilio Marrone, Chief Executive Officer and General Manager, and Pierluigi Bernasconi, Manager responsible for the preparation of the financial reports of IFI S.p.A., attest, taking into account the provisions of art. 154-bis, paragraphs 3 and 4, of Legislative Decree 58 dated February 24, 1998:

- the adequacy in relation to the characteristics of the company and
- the effective application,

of the administrative and accounting procedures used in the preparation of the separate financial statements for the year ended December 31, 2007.

We also certify that the separate financial statements for the year ended December 31, 2007:

- agree with the accounting records and entries;
- have been prepared in accordance with International Financial Reporting Standards (IFRS) endorsed by the European Union, as well as the measures enacted to implement Legislative Decree 38 dated February 28, 2005 and, to our knowledge and belief, are suitable for providing a true and fair view of the financial condition, results of operations and cash flows of the company.

Turin, March 28, 2008

Chief Executive Officer and General Manager	Manager responsible for the preparation of the financial reports
Virgilio Marrone	Pierluigi Bernasconi

Certification of the consolidated financial statements according to art. 81-ter of Consob Regulation 11971 of May 14, 1999 and subsequent amendments and additions

We, the undersigned, Virgilio Marrone, Chief Executive Officer and General Manager, and Pierluigi Bernasconi, Manager responsible for the preparation of the financial reports of IFI S.p.A., attest, taking into account the provisions of art. 154-bis, paragraphs 3 and 4, of Legislative Decree 58 dated February 24, 1998:

- the adequacy in relation to the characteristics of the company and
- the effective application,

of the administrative and accounting procedures used in the preparation of the consolidated financial statements for the year ended December 31, 2007.

To this end, it should be noted - as indicated in the certification of the consolidated financial statements of the subsidiary IFIL S.p.A. - that the Cushman & Wakefield Group, acquired by the IFIL Group at the end of March 2007, began a specific project for the implementation and the formulation of the administrative and accounting procedures for financial reporting, prepared on the basis of IFRS, transmitted to IFIL S.p.A. for purposes of the preparation of the consolidated financial statements at December 31, 2007.
On the basis of the assessment of the adequacy and the effective application of such administrative and accounting procedures, management of the Cushman & Wakefield Group has indicated to IFIL S.p.A. that there are no irregularities or omissions of material fact.

We also certify that the consolidated financial statements for the year ended December 31, 2007:

- agree with the accounting records and entries;
- have been prepared in accordance with International Financial Reporting Standards (IFRS) endorsed by the European Union, as well as the measures enacted to implement Legislative Decree 38 dated February 28, 2005 and, to our knowledge and belief, are suitable for providing a true and fair view of the financial condition, results of operations and cash flows of the company and the aggregate of the companies included in consolidation.

Turin, March 28, 2008

REPORT OF THE INDEPENDENT AUDITORS ON THE FINANCIAL STATEMENTS PURSUANT TO ART. 156 OF LEGISLATIVE DECREE NO. 58 OF FEBRUARY 24, 1998

To the Stockholders of
IFI - ISTITUTO FINANZIARIO INDUSTRIALE S.p.A.

1. We have audited the financial statements of IFI - Istituto Finanziario Industriale S.p.A. as of and for the year ended December 31, 2007, which comprise the balance sheet, the statements of income, changes in stockholders' equity and cash flows and the related explanatory notes. These financial statements are the responsibility of the Directors of IFI - Istituto Finanziario Industriale S.p.A. Our responsibility is to express an opinion on these financial statements based on our audit.

2. We conducted our audit in accordance with the Auditing Standards recommended by CONSOB, the Italian Regulatory Commission for Listed Companies and the Stock Exchange. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the prior year financial statements, the balances of which are presented for comparative purposes, reference should be made to our auditors' report dated April 5, 2007.

3. In our opinion, the financial statements referred to above present fairly the financial position of IFI - Istituto Finanziario Industriale S.p.A. as of December 31, 2007 and the results of its operations and its cash flows for the year then ended in accordance with IFRS as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005.

REPORT OF THE INDEPENDENT AUDITORS ON THE CONSOLIDATED FINANCIAL STATEMENTS PURSUANT TO ART. 156 OF LEGISLATIVE DECREE No. 58 OF FEBRUARY 24, 1998

To the Stockholders of
IFI - ISTITUTO FINANZIARIO INDUSTRIALE S.p.A.

1. We have audited the consolidated financial statements of IFI - Istituto Finanziario Industriale S.p.A. and its subsidiaries ("IFI Group") as of and for the year ended December 31, 2007, which comprise the consolidated balance sheet, the consolidated statements of income, changes in stockholders' equity and cash flows and the related explanatory notes. These consolidated financial statements are the responsibility of the Directors of IFI - Istituto Finanziario Industriale S.p.A. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

2. We conducted our audit in accordance with the Auditing Standards recommended by CONSOB, the Italian Regulatory Commission for Listed Companies and the Stock Exchange. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the prior year consolidated financial statements, the balances of which are presented for comparative purposes, reference should be made to our auditors' report dated April 5, 2007.

3. In our opinion, the consolidated financial statements referred to above present fairly the consolidated financial position of IFI Group as of December 31, 2007 and the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n° 38/2005.

4. For a better understanding of the consolidated financial statements, attention is drawn to the fact that IFI Group, pending an opinion by the IASB, which the European Commission has also requested by letter dated October 26, 2006, that will definitively clarify the criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, has continued to exclude the Fiat Group, in which the subsidiary IFIL INVESTMENTS S.p.A. owns 30.45% of ordinary capital stock, from line-by-line consolidation, consistently with the methodology followed for the first-time adoption of IFRS and for the preparation of the consolidated financial statements as of December 31, 2005 and December 31, 2006. However, in note 44 to the consolidated financial statements are presented the pro-forma consolidated financial data prepared consolidating line-by-line the Fiat Group.

REPORT OF THE BOARD OF STATUTORY AUDITORS ON THE SEPARATE FINANCIAL STATEMENTS

Dear Stockholders,

Under art. 153 of Legislative Decree 58 dated February 24, 1998 (TUF - Consolidated Law on Financial Intermediation), the board of statutory auditors has the obligation to report to the stockholders' meeting on matters concerning the supervisory work carried out and any omissions and censurable matters that may have come to its attention. The board of statutory auditors may also formulate proposals to the stockholders' meeting in relation to the financial statements, to its approval and to matters of its competence.

In keeping with the above law, we have written this report.

During the year, we have carried out the control activities envisaged by the law according to the principles of conduct issued by the National Boards of Dottori Commercialisti and Ragionieri and also taking into account, for the part regarding the board's competence, the instructions by Consob in its communications and in particular, in Communication 1025564 dated April 6, 2001 and subsequent updates.

We have participated in the meetings of the board of directors during which the directors informed us about the activities carried out and about the significant economic, financial and equity transactions entered into or in the process of being entered into by the company and/or its subsidiaries. In this regard, we have ascertained and we have ensured that the transactions approved and carried out were in conformity with the law and the corporate bylaws, were not in disagreement with the resolutions approved by the stockholders' meeting or in conflict of interest and were based upon the principles of good administration.

The organizational structure of the company and the internal control systems, insofar as we are responsible, appear to be adequate for the specific type of business and size of the company.

As a result, the board of statutory auditors, also on the basis of meetings held with those in charge of corporate functions, with the manager responsible for the preparation of financial reporting and with representatives of the audit firm, has gathered extensive information regarding compliance with the principles of diligent and proper administrative management.

Furthermore, we consider that the administrative accounting system, insofar as ascertained and checked by us, also in prior years, is in a position to record and correctly represent operating events.

The board of directors, in order to provide the company with a set of rules which takes into account the contents of art. 154 bis of Legislative Decree 58 dated February 24, 1998, has approved the document "Accounting and Administrative Control Model".

As for corporate governance, the directors have written a specific report. As for our responsibilities, in conformity with the provision of art. 149 number 1, letter c) bis of Legislative Decree 58 dated February 24, 1998, we take note that the directors, in their report on corporate governance (2.1), specified the following: "IFI, in view of its particular capital structure, which, for ordinary capital stock is represented by unlisted shares held entirely by Giovanni Agnelli e C. S.a.p.az., has not adopted the Code of Self-discipline of listed companies".

Therefore, the corporate governance system adopted by the company is adapted to the capital structure and guarantees transparency according to market practices."

The rules and procedures specifically adopted, as we have ascertained, are nevertheless adequate and complete for purposes of achieving transparency as proposed by the directors.

In the same manner, the directives given by IFI S.p.A. to the subsidiaries as per art. 114, paragraph 2, of Legislative Decree 58 dated February 24, 1998 seem adequate.

The board of directors has sent us, in accordance with the law, the report relating to the first half of the year, making it public within the time-frame and according to the regulations established by Consob and has produced, according to law, the quarterly reports on performance for the first and third quarters.

The chief executive officer and manager responsible for the preparation of financial reporting issued the certifications pursuant to art. 154 bis of TUF on March 28, 2008.

Specifically in reference to other instructions by Consob in its Communication 1025564 dated April 6, 2001 and later updates, with regard to our competence, we can attest to the following:

- the board of statutory auditors, pursuant to Legislative Decree 58 dated February 24, 1998 was constantly informed with regard to matters of its competence;

- the periodical verifications and tests on the company did not bring to light any atypical and/or unusual transactions with third parties, related parties or intragroup that would give rise to reservations about the correctness or completeness of the information in the financial statements, conflicts of interest and the safeguarding of the company's assets;
- with regard to transactions with related parties, the directors, in the notes to the separate financial statements, present and illustrate the transactions for the exchange of goods and services between your company and the companies of the Group and/or related parties, specifying that these transactions have been carried out on the basis of an evaluation of reciprocal economic gain. Such transactions are indicated and commented in Note 30;
- the audit report of Deloitte & Touche S.p.A. issued on April 3, 2008 on the separate financial statements does not contain any qualifications or other matters of interest;
- during the year 2007, the board of directors held nine meetings, which we attended, and the board of statutory auditors held nine meetings, four of which were attended by representatives of the audit firm;
- no significant aspects emerged during the course of the meetings held with the audit firm pursuant to art. 150 Legislative Decree 58 dated February 24, 1998;
- there have been no complaints received under ex art. 2408 of the Italian Civil Code;
- there have been no petitions received;
- from relations existing with the corresponding bodies of the parent and the subsidiaries no matters arose which should be reported;
- during the year, the board of statutory auditors issued opinions on the compensation to be paid to the directors who are charged with special mandates approved by the board of directors pursuant to art. 2389 of the Italian Civil Code and that required by art 22 of the bylaws regarding the appointment of the manager in charge of the preparation of financial reporting;
- during the year, besides the appointment for the audit of the separate and consolidated financial statements and the limited-scope audit for the first-half report, which fees are indicated in Note 31, the company did not engage Deloitte & Touche S.p.A. for other assignments. During the same year, no assignments were conferred to entities associated with Deloitte & Touche S.p.A.

With regard to the separate financial statements which show a profit of € 54,472,566, the formation of which is described in the Report on Operations, we have ascertained that the laws have been observed with regard to its format and structure through tests carried out directly by us and on the basis of information supplied to us by the audit firm; the information supplied by directors in the Report on Operations should be considered extensive and complete.

This being said, we invite you to approve the financial statements together with the motion by the board of directors for the appropriation of the profit for the year.

The board of directors, lastly, invites you to authorize the purchase of treasury stock for the amount and according to the manner and terms indicated in the specific report and, in special session, to assign the mandate in accordance with article 2443 of the Italian Civil Code and proposes amendments to articles 11, 14 and 23 of the bylaws, explaining the reasons thereto. As to our responsibilities in this case, we can attest that the proposals, illustrated by specific reports, conform to existing laws.

Turin, April 7, 2008

THE BOARD OF STATUTORY AUDITORS

Gianluca Ferrero

Giorgio Giorgi

Lionello Jona Celesia

REPORT OF THE BOARD OF STATUTORY AUDITORS ON THE CONSOLIDATED FINANCIAL STATEMENTS

Dear Stockholders,

The consolidated financial statements of the IFI Group for the year ended December 31, 2007, which we submit for your consideration, show a profit attributable to the equity holders of the company of € 221 million. The consolidated financial statements were submitted to us within the terms of the law, together with the Report on Operations, and are prepared in accordance with International Financial Reporting Standards (IFRS) endorsed by the European Union.

The tests carried out by Deloitte & Touche S.p.A., charged with the audit, have led to the assertion that the values expressed in the financial statements agree with the accounting records of the parent, the consolidated financial statements of the sole subsidiary IFIL S.p.A. and the relative information formally communicated by the latter.

Such consolidated financial statements, transmitted by the subsidiary to the parent for purposes of drawing up the consolidated financial statements, prepared by its relevant corporate bodies, have been examined by the bodies and/or parties in charge of controlling the individual subsidiary and on the part of the audit firm within the scope of the procedures carried out for the audit of the consolidated financial statements. The board of statutory auditors has, therefore, not extended its examination to these financial statements.

The determination of the scope of consolidation, the choice of the principles of consolidation of the investments and the procedures adopted for this purpose are in agreement with IFRS. The structure of the consolidated financial statements is thus to be considered technically correct and, as a whole, conforms to the specific law.

The audit firm has issued its report on the consolidated financial statements with an unqualified opinion, noting, for purposes of full disclosure, that the Fiat Group has been excluded from the scope of line-by-line consolidation.

The Report on Operations adequately describes the results of operations, the financial condition and cash flows, the performance of operations during the course of 2007 and the business outlook of the aggregate of the companies in the scope of consolidation after the end of the year. The examination to which the report has been subjected shows its congruity with the consolidated financial statements.

IFIL GROUP IN 2007
DIRECTORS' REPORT ON OPERATIONS

TABLE OF CONTENTS

This is an English translation of the Italian original document "Relazione sulla gestione" approved by the IFIL S.p.A. board of directors on March 28, 2008 which has been prepared solely for the convenience of the reader.

The version in Italian takes precedence and for complete information about IFIL S.p.A. and the Group, reference should be made to the full original report in Italian "Il Gruppo IFIL nel 2007" containing the Directors' Report on Operations and the Separate and Consolidated Financial Statements also available on the corporate website: http://www.ifil.it

Board of Directors

Chairman	Gianluigi Gabetti
Vice Chairman (Vicario)	John Elkann
Vice Chairman	Tiberto Brandolini d'Adda
Chief Executive Officer and General Manager	Carlo Barel di Sant'Albano
Non-independent directors	Edoardo Ferrero Ventimiglia, Franzo Grande Stevens, Pio Teodorani-Fabbri, Daniel John Winteler
Independent directors	Giancarlo Lombardi, Antonio Maria Marocco, Giuseppe Recchi, Claudio Saracco

Secretary to the Board Fernando Massara

Executive Committee

Chairman	Gianluigi Gabetti
Members	Tiberto Brandolini d'Adda, John Elkann, Carlo Barel di Sant'Albano

Audit Committee

Chairman	Antonio Maria Marocco
Members	Giancarlo Lombardi, Claudio Saracco

Compensation and Nominating Committee

Chairman	John Elkann
Members	Gianluigi Gabetti, Giuseppe Recchi

Board of Statutory Auditors

Standing Auditors	Cesare Ferrero (*Chairman*), Giorgio Giorgi, Paolo Piccatti
Alternate Auditors	Lionello Jona Celesia, Ruggero Tabone

Independent Auditors Deloitte & Touche S.p.A.

Expiry of the terms of office

The terms of office of the board of directors and the board of statutory auditors, elected by the stockholders' meeting held on June 27, 2005, will expire concurrently with the stockholders' meeting that will be held to approve the separate financial statements for the year ending December 31, 2007.

The appointment of the independent auditors will expire concurrently with the stockholders' meeting that will be held to approve the separate financial statements for the year ending December 31, 2011.

LETTER TO THE STOCKHOLDERS

To our Stockholders,

2007 was an important year, because it enabled us to reap the fruit of the work accomplished in the recent past and, more particularly, because it laid the foundations on which to build the future growth of the company.

Consolidated profit reached € 672 million, confirming the good performance reported by all our holdings, while the value of the portfolio is at approximately € 7.8 billion. Investment activities also took some significant steps forward, in the direction that IFIL has decided to proceed, with particular reference to the international markets.

The doubling of IFIL's consolidated profit can be attributed, first and foremost, to the excellent performance of the Fiat Group which, in 2007, achieved – and in some cases exceeded – all the objectives laid out in the industrial plan presented three years before.
Thanks to the work accomplished on the commercial front and the launch of some very successful models, especially one: the new 500 – a perfect synthesis of tradition, functionality and of high symbolic value – sales from automobile activities increased by more than 13%. Marked progress in sales was also reported in the performance of other industrial operations: agricultural and construction equipment, components and production systems, and especially trucks and industrial vehicles. Thanks to the efforts made by management on the front of operations and organization, these increases were translated into significant improvements in terms of profitability and financial stability. Although the Group's trading profit established an all-time record, exceeding the ceiling of € 3 billion, the fact that industrial activities are now debt-free was no less important. This fact brings to an end the crisis that began in 2002 and now allows Italy's largest industrial group to concentrate its efforts on encouraging growth in the activities of all its divisions.

In the area of financial services, as well as benefiting from the positive trend of the Intesa Sanpaolo holding, IFIL made two investments which, despite their diversity, respond to the same logic. First it subscribed to the capital stock increase of Gruppo Banca Leonardo: a project which, just two years after the bank was formed, has already succeeded in conquering the trust and respect of many European financial operators, putting down solid roots in the main markets of the continent.
Secondly, through its investment in Perella Weinberg, IFIL established a privileged link with one of the most notable and successful companies in the world in the field of investment banking and savings. Quite apart from the considerable economic return that is expected, both operations assume particular value in terms of IFIL's strategic development, because, through long-term partnerships, it hopes to strengthen its capacity to seek and create new investments for the future in a completely international context.

With regard to services to companies, during 2007, IFIL increased its stake in SGS, confirming its appreciation of a company which combines excellent growth prospects with solid managerial ability. For the sixth consecutive year, the Swiss group confirmed its position as a world leader in its field and improved its corporate performance, establishing new records in terms of revenues and profit. In the field of real estate services, Cushman & Wakefield – which entered the IFIL portfolio at the end of March – conducted a thorough internal reorganization program and made a number of acquisitions, thus achieving substantial increases in sales and profitability: significant achievements in a year for operators in the real estate sector that was far from easy.

The intensive activities of Sequana Capital, which, in 2007, made some investments which have great future potential, deserve a special mention. In fact, the acquisitions of the activities of Map by Antalis and of Dalum, Zanders and Greenfield by Arjowiggins will make it possible to strengthen the competitiveness of the French company on international markets, by exploiting savings in production costs deriving from synergies and positioning its brands in the sector of high value-added paper.

In the sector of tourism and leisure time, the Alpitour Group saw the first results of its far-reaching restructuring program, begun in the prior year, increasing both the profitability indicators and those relating to the balance sheet. The elimination of debt and the net profit achieved are obvious signs of the effectiveness of the work undertaken by management, which will now be able to concentrate on consolidating those results and, especially, on developing new areas of activity. For Juventus, too, the result for the year was definitely positive: the capital stock increase enabled it to finance the medium-term plan worked out by the club's management, which was needed to strengthen the team and sustain the company's development plans over the next few years. Under the guidance of the club's new trainer, the 'first team' is showing that it has the right kind of talent and spirit to achieve its objectives, namely to return to international competitions. Achieving this target will represent a fundamental step in terms of implementing the plan and repaying the immense affection with which millions of fans follow Italy's best-loved football club.

The prospects for the current year seem to be conditioned, above all, by the difficult international economic situation. The crisis in the financial markets which began in the United States in the third quarter of 2007 later deteriorated and extended to other parts of the world, creating a situation of instability which, together with the increase in the cost of raw materials, did not take long to have repercussions on the level of the real economy. The substantial falls reported by the world markets suddenly interrupted the phase of expansion that had been in place for years, establishing a general climate of uncertainty but also creating interesting acquisition opportunities. As far as IFIL is concerned – thanks to the 10-year bond issue for € 750 million in May 2007, the company has considerable financial flexibility – a period of exciting challenges lies ahead. The ability of its management and the financial discipline that it has succeeded in developing in the course of time will be precious resources for avoiding the inherent dangers of the period ahead and seizing new investment opportunities wherever they present themselves.

Finally, I would like to thank the members of the board of directors and the statutory auditors and independent auditors, whose mandate is drawing to a close, for their precious contribution over the past three years.
I would also like to thank the auditors, managers and all the group's employees for their hard work.

Turin, March 28, 2008

Gianluigi Gabetti

IFIL GROUP PROFILE

IFIL S.p.A. is one of Europe's leading investment companies, controlled by the Agnelli family. Founded in 1919, it is headquartered in Turin and listed on the Italian stock exchange.
IFIL conducts diversified investments on an international scale with entrepreneurial vision and solid financial backing. At the same time, it cooperates continuously with the management teams of its holdings, while respecting their right to operate autonomously and with a perspective geared to the medium-/long-term.
The major investments of the IFIL Group are indicated below.

Fiat S.p.A., in which IFIL S.p.A. has a holding of more than 30% of ordinary and preferred capital stock, is listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment). Founded in 1899, the Fiat Group operates in the sectors of automobiles (Fiat, Lancia, Alfa Romeo, Abarth, Ferrari, Maserati and Fiat Light Commercial), agricultural and construction equipment (Case and New Holland), trucks and commercial vehicles, buses and special-purpose vehicles (Iveco, Irisbus, Astra and Magirus), components and production systems (Fiat Powertrain Technologies, Magneti Marelli, Teksid and Comau); it is also active in publishing and communications (La Stampa and Publikompass). Other sectors also offer financial services to the sales networks and the clientele in addition to rental services to customers.

The other holdings which comprise the dynamically managed diversified portfolio are listed below.

Cushman & Wakefield (C&W), in which the subsidiary Ifil Investissements S.A. has a 70.18% stake, is the largest privately held company for real estate services. The C&W Group has its headquarters in New York, where it was founded in 1917, and now has 221 offices and 15,000 employees in 58 countries.

Sequana Capital S.A., in which Ifil Investissements S.A. has a 26.65% stake, is a French company listed on the Euronext market which in 2006 has focused its operations on the paper sector where it operates through:

- Arjowiggins S.A. (100% holding), the world leader in the manufacture of high value-added paper products, with 7,800 employees in 82 countries;

- Antalis S.A. (100% holding), the leading European group in the distribution of paper products for printing and writing, with over 8,400 employees in 44 countries.

Intesa Sanpaolo S.p.A., in which IFIL S.p.A. has a 2.45% stake in ordinary capital stock, is listed on the Electronic Share Market of the Italian stock exchange (Blue Chip segment). It is one of the most important banking groups in Europe and is the foremost bank in Italy with a market share of 20% on average in all segments of business (retail, corporate and wealth management). With its network of 6,100 branches, the group offers its services to 10.7 million customers. It also operates in 13 Central-East European countries and in the Mediterranean basin with 1,200 branches and 7.2 million customers in the retail and commercial banking sectors. It also has an international network specialized in corporate customer support covering 34 countries including the United States, Russia, China and India.

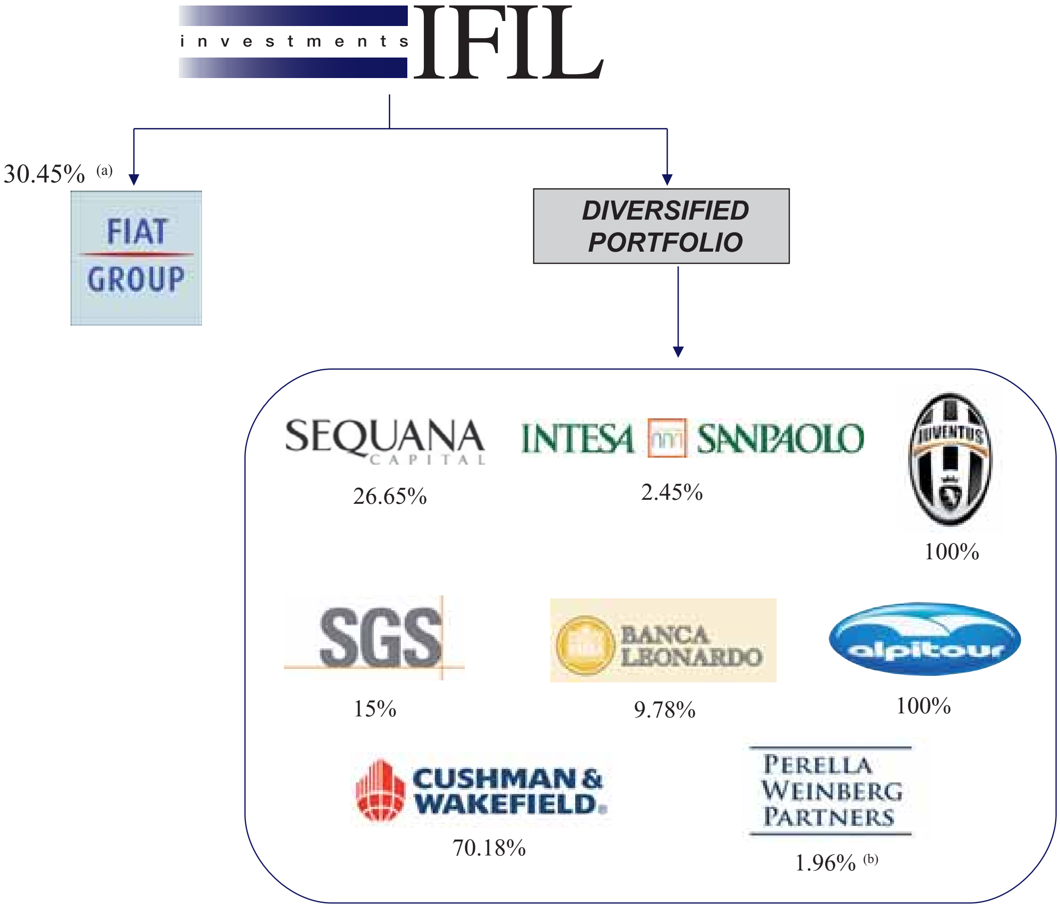
SGS S.A., in which Ifil Investissements S.A. has a 15% stake, is a Swiss company listed on the Virt-x market. Founded in 1878, the company is today the global leader in verification, inspection, control and certification activities with 50,000 employees and a network of more than 1,000 offices and laboratories throughout the world.

Gruppo Banca Leonardo S.p.A., in which Ifil Investissements S.A. has a 9.78% stake, is an independent investment bank offering corporate finance advisory and asset management services; it also provides private equity services under a joint venture with a leading European group.

Alpitour S.p.A., in which IFIL S.p.A. has a 100% stake, is the largest integrated group in the tourist sector in Italy. It operates with 4,000 employees and has more than 2.3 million customers across all areas of the tourism business: Tour Operating (Alpitour, Francorosso, Viaggidea, Villaggi Bravo, Volando and Karambola), Hotels (Alpitour World Hotel & Resorts), Incoming (Jumbo Tours), Aviation (Neos), Distribution (Welcome Travel Group) and Incentive & Eventi (A World of Events).

Juventus Football Club S.p.A., in which IFIL S.p.A. has a 60% stake, is listed on the Electronic Share Market of the Italian stock exchange (Star segment). Founded in 1897, it is one of the most prominent professional soccer teams in the world.

The following chart is updated to March 20, 2008, and presents the simplified structure of the investment portfolio. Percentage holdings refer to ordinary capital stock.



(a) IFIL also holds 30.09% of Fiat preferred capital stock.
(b) Percentage interest held in the NoCo A LP limited partnership.

Net Asset Value

At March 20, 2008 the Net Asset Value is equal to € 7,777 million and is composed as follows:

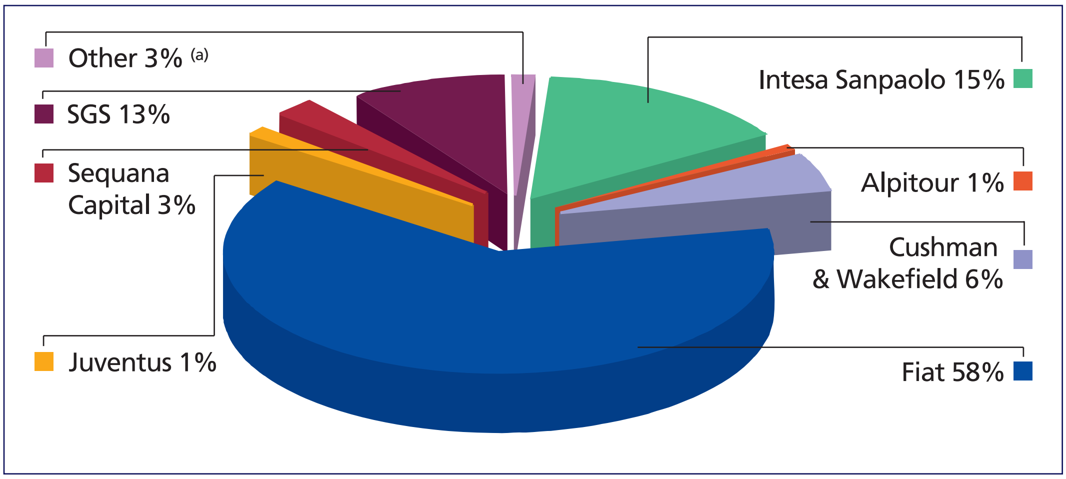
€ in millions		
Current value of the investment portfolio	7,974	(a)
Consolidated net financial position – Holdings System	(197)	(a)
Total	**7,777**	

(a) After subscribing to the bonds convertible into Vision shares.

With regard to the investment portfolio, listed equity holdings are valued at the closing market prices as of March 20, 2008. Unlisted equity holdings and other investments are stated at cost.

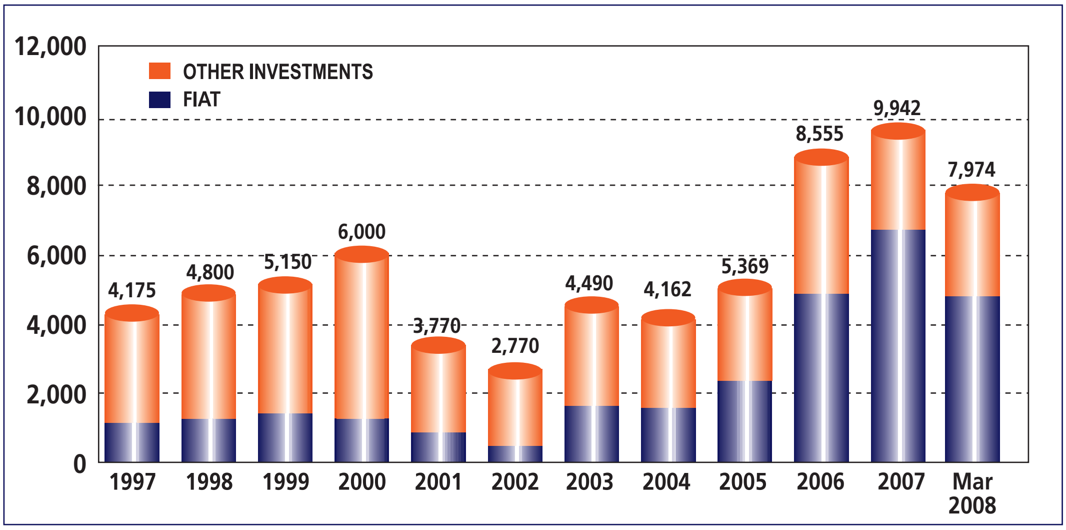
NAV is presented with the aim of aiding Analysts and Investors in forming their own assessments.

Investment portfolio at current values



(a) The portfolio includes DLMD S-Bonds, Ocean Club Méditerranée bonds, investments in NoCo A and NoCo B, the headquarters building and the investment, currently in the process of being finalized, in the bonds convertible into Vision shares.

Change in the investment portfolio at current values [(a)]



(a) The current value of the investment portfolio is calculated consistently with the change in the accounting representation.

Key operating and financial data

IFIL Group – Condensed consolidated figures (a) € in millions	**2007**	2006	Change
Profit attributable to the equity holders of the company	**672**	341	331
Share of earnings (losses) of holdings and dividends	**723**	346	377
Investments and other financial assets	**6,748**	5,855	893
Equity attributable to the equity holders of the company	**6,666**	6,222	444
Consolidated net financial position - Holdings System	**(104)**	386	(490)

Earnings per share (€) (b)	**2007**	2006	Change
Profit attributable to the equity holders of the company			
- ordinary shares	**0.63**	0.32	0.31
- savings shares	**0.65**	0.34	0.31
Equity attributable to the equity holders of the company	**6.27**	5.86	0.41

(a) The basis of preparation is presented in the section "IFIL Group – Review of the condensed consolidated results" of the Report on Operations.

(b) Details of the calculation are presented in Note 19 to the consolidated financial statements.

IFIL S.p.A. - Separate financial statement figures € in millions	**2007**	2006	Change
Profit for the year	**123**	625	(502)
Equity	**4,567**	4,587	(20)
Net financial position	**(749)**	(682)	(67)

	Per share (€)		Total (€ ml)	
Dividends paid out by IFIL S.p.A.	**2007**	2006	**2007**	2006
Ordinary shares	**0.10**	0.10	**102.1**	102.6
Savings shares	**0.1207**	0.1207	**4.5**	4.5
Total			**106.6**	107.1

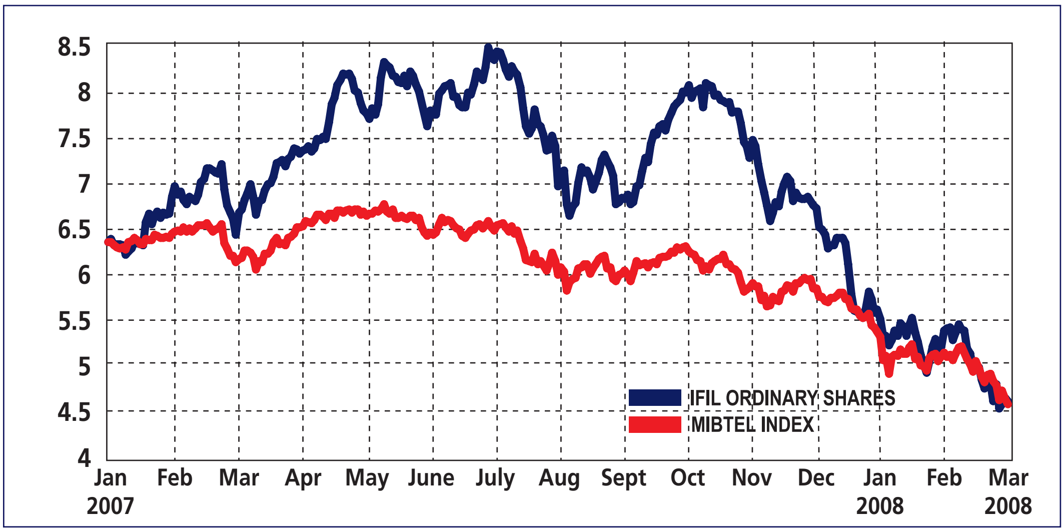
A motion for dividends relating to the year 2007 will be put forward to the stockholders' meeting called for the approval of the separate financial statements for the year ended December 31, 2007. The total amounts are calculated on the basis of the shares outstanding as of March 28, 2008.

Stock market performance

Whereas in the first part of 2007 the markets continued to record positive performance, the second half of the year registered an inversion of the trend. This heightened in the last two months when fears over growth prospects in the United States became stronger, largely fueled by the impact of the subprime mortgage crisis. In this scenario, IFIL ordinary shares, which are listed on the MIDEX Index of mid-cap companies and on the MIB 30 Index, continually out-performed the Mibtel index.

Overall 2007 performance by IFIL ordinary stock was positive at 5.4% (including dividends paid-out) against a decline of 4.5% in the Mibtel Index. The negative downturn of the stock during the last part of 2007 then sharply accelerated in the first part of 2008 mirroring the performance of the world's major indexes.

Performance by IFIL ordinary stock against the Mibtel Index (a)

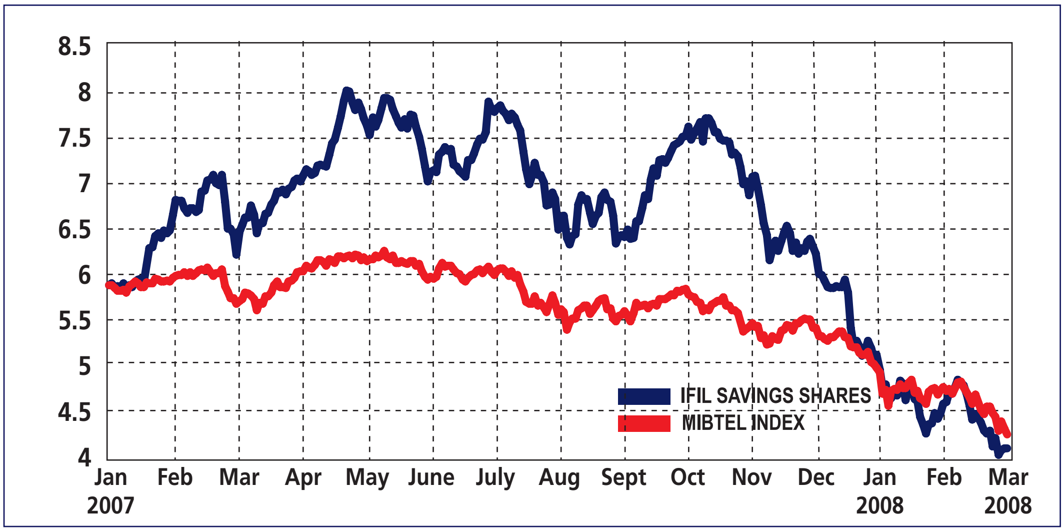


(a) The line graph is based on stock market data. Mibtel base 100 on IFIL stock.

During 2007, IFIL savings stock gained 5.8%, on average in line with IFIL ordinary stock and therefore out-performed the Mibtel Index.

Then in the first part of the 2008, IFIL savings stock basically performed in step with the decline in the Mibtel Index and IFIL ordinary stock.

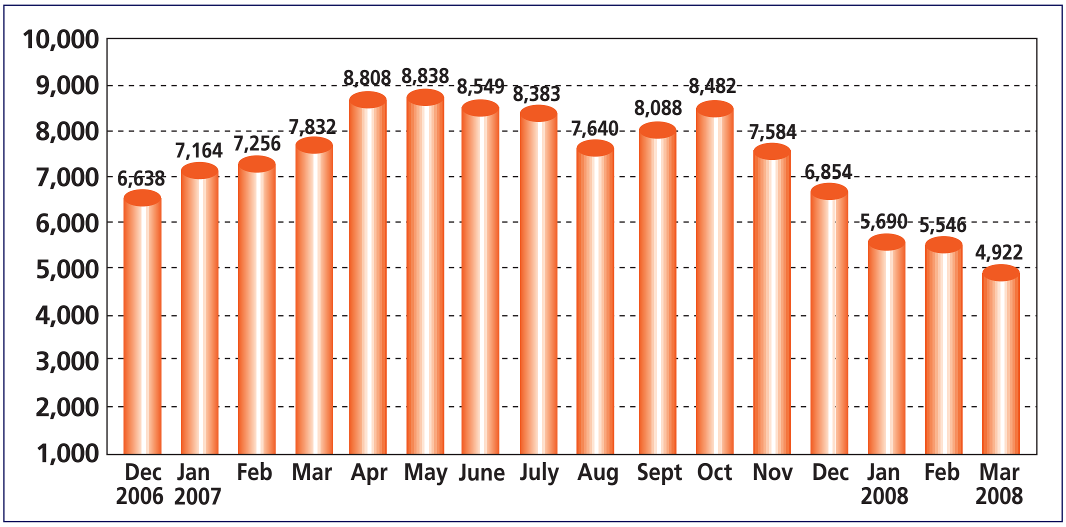
Performance by IFIL savings stock against the Mibtel Index (a)



(a) The line graph is based on stock market data. Mibtel base 100 on IFIL stock.

The above performance impacted IFIL's market capitalization which, in 2007, grew from € 6,638 million to € 6,854 million. During the first few months of 2008, market capitalization decreased to € 4,922 million.

Change in IFIL capitalization (€ in millions)



During 2007, the value of IFIL stock traded increased further while volumes were confirmed at 629 million ordinary shares and 37 million savings shares.

Market information	**2008** (a)	**2007**	2006	2005

FINANCIAL COMMUNICATIONS AND INVESTOR RELATIONS

Again in 2007, IFIL devoted special attention to relations with stockholders, institutional investors and financial analysts, as well as the national and international financial Press.

In particular:

- approximately 1,000 copies (in Italian and English) of the annual report, the first-half report and the quarterly reports have been distributed. These reports are sent, on request, to stockholders, and are also available on the corporate website at www.ifil.it;
- numerous in-depth meetings have been arranged with institutional investors and financial analysts, besides the Road Show presented for the placement of IFIL bonds 2007-2017;
- information has continuously been disseminated through the Italian economic and financial Press.

INFORMATION ON THE OWNERSHIP STRUCTURE PURSUANT TO EX ART. 123 BIS OF LEGISLATIVE DECREE 58/98

Capital stock

IFIL S.p.A.'s capital stock, fully subscribed to and paid-in, amounts to € 1,075,995,737 at December 31, 2007 and consists of 1,038,612,717 ordinary shares (96.53% of capital stock) and 37,383,020 non-convertible savings shares (3.47% of capital stock), all with a par value of € 1 each.

Each share attributes the right to a proportional part of the profit approved for distribution and the equity resulting upon a wind-up, except for the rights established in favor of the savings shares with regard to the appropriation of profit, as described below.

Pursuant to art. 25 of the bylaws, the savings shares carry the right to a preference dividend, cumulative according to law, of 8.27% of their par value and to a total dividend higher than that of ordinary shares by 2.07% of the same par value. When, in any one year, the dividends assigned to the savings shares are below the percentages indicated above, the difference will be added to the preference dividend of the next two years.
The savings shares carry no voting rights and can either be registered or bearer shares, as elected by the stockholders.

In the event of exclusion of the ordinary shares and/or savings shares from trading, the preference dividend and the dividend higher than that of the ordinary shares to which the savings shares are entitled, will be automatically increased to the extent that they are equal, respectively, to 8.52% and 2.32%.

There are no restrictions on the voting rights or shares which confer special rights of control. There is not any share participation system for employees nor, consequently, any relative mechanism for the exercise of voting rights.

IFIL S.p.A. has approximately 26,000 stockholders.
At March 20, 2008, IFI – Istituto Finanziario Industriale S.p.A. and Giovanni Agnelli e C. S.a.p.az. hold respectively 69.99% and 3% of ordinary capital stock.

The other ten major stockholders, indicated below, represent 12.49% of ordinary capital stock.

Stockholders	**%**	**Ordinary stock**
Mackenzie Cundill Group	5.10	52,973,183
Credit Suisse Securities (Europe) Limited	1.71	17,744,408

Meag Group	0.34	3,565,745
Citibank Group	0.32	3,368,779
	12.49	**129,830,692**

Source: Stockholders' Book supplemented by Consob communications received up to March 20, 2008.

Pursuant to art. 122 of Legislative Decree 58/1998, the only agreement known by the company to exist is that signed on March 27, 1990 between IFIL S.p.A. and Citicorp, now Citigroup, with headquarters in New York York (USA), on the subject of the right of first refusal on IFIL ordinary shares held granted by Citigroup.

Appointment of the board of directors

In accordance with art. 12 of the bylaws, the board of directors is appointed by using slates of candidates. If several slates are submitted, one of the members of the board of directors shall be chosen from the slate that has obtained the second highest number of votes. Slates may be submitted only by those stockholders who, individually or together with other own voting shares, represent at least 1% of the capital stock, which shall be indicated in the notice calling the stockholders' meeting. No single stockholder can present, either through a third party or trustee company, more than one slate of candidates, or cast votes in different slates. No stockholders belonging to the same group and stockholders who signed a stockholders' agreement regarding the stock of the company can present, either through a third party or trustee company, more than one slate of candidates, or cast votes in different slates. Each candidate may be included in only one slate, under penalty of ineligibility. The candidates included in the slates must be indicated in numerical order and satisfy the integrity requirements imposed by law. The candidate who is indicated at number one on the slate in numerical order must also satisfy the legal requirements of independence set forth by law. The slates presented must be deposited at the company's offices at least fifteen days prior to the date set for the meeting called for the election of the board of directors. Together with each slate and within the time limit indicated above, declarations in which the stockholders state their right to attend the meeting, an exhaustive disclosure regarding the candidates' personal and professional characteristics as well as declarations in which single candidates accept the candidature and, on their own responsibility, state that they satisfy the envisaged requirements shall be deposited. The candidates who do not comply with these rules are ineligible. Once the stockholders' meeting determines the number of directors to be elected, the following procedure shall be applied:

1. all the directors except one shall be elected from the slate that has obtained the highest number of votes, on the basis of the numerical order in which they appear on the slate;
2. as provided by law, one director shall be elected from the slate that has obtained the second highest number of votes, on the basis of the numerical order in which the candidates appear on the slate.

Mandate for capital stock increases

The board of directors has been vested with the power, for a period of five years from the resolution passed by the special stockholders' meeting held on May 14, 2003, to increase at one or more times, also in divisible form, the capital stock up to an amount of € 1,500 million and to issue convertible bonds, at one or more times, up to the same figure but for amounts which, each time, shall not exceed those established by law.

The board of directors will put forward a motion to renew this resolution at the next special stockholders' meeting.

Authorization to purchase treasury stock

The ordinary stockholders' meeting held on May 14, 2007 authorized, for a period 18 months, pursuant to art. 2357 of the Italian Civil Code and art. 132 of Legislative Decree 58 dated February 24, 1998, the purchase of a maximum of 55 million IFIL ordinary and/or savings shares for a maximum amount of € 450 million.

The board of directors will put forward a motion to the ordinary stockholders' meeting to renew this resolution.

By the power vested in the IFIL S.p.A. board of directors by this authorization, in its meeting held on February 18, 2008, the board approved the start of a Buyback Program for treasury stock aimed at the efficient management of the company's capital and with a view towards investment purposes.

The Buyback Program calls for a maximum disbursement of € 150 million for IFIL ordinary and/or savings stock.

Additional information is provided in the specific paragraph under “Major events in 2007 and in the first quarter of 2008”.

Effects of a possible change in control on the most important agreements in force

At December 31, 2007, a possible change in control over IFIL S.p.A. would give the bondholders the right to ask for the early redemption of the non-convertible bonds 2006-2011 and 2007-2017 for a total of € 950 million and would give the two lending banks the right to ask for the early repayment of the three committed lines of credit of € 250 million, which are currently not drawn down.

Agreements between the company and the directors

The meeting of the board of directors of IFIL S.p.A. held on June 9, 2005 approved the use of a secretarial service and a car with a driver for the chairman, Gianluigi Gabetti, also after his current term of office expires.

In the event of the termination of the employment relationship on the part of the company that is not for a just cause, as a departure from the provisions of art. 27 of the collective national labor agreement, the chief executive officer and general manager, Carlo Barel di Sant'Albano, will be paid an indemnity equal to two times the annual fixed remuneration.

MAJOR EVENTS IN 2007 AND IN THE FIRST QUARTER OF 2008

Acquisition of the controlling interest in the Cushman & Wakefield Group

On March 30, 2007, the subsidiary Ifil Investissements S.A. purchased 71.52% of the capital stock of Cushman & Wakefield (C&W) from Rockefeller Group International Inc. (RGI), a subsidiary of the Mitsubishi Group, for an investment of $625 million (€ 473.7 million), in addition to transaction costs of € 9.4 million. The remaining 28.48% stake is held by C&W management and employees.

On March 30, 2007, IFIL S.p.A. also made an interest-earning loan at market rates to C&W for $126.3 million, equal to € 94.9 million, which was repaid in full by June 1, 2007.

Subscription to the Juventus Football Club S.p.A. capital increase

On April 20, 2007, the stockholders' meeting of Juventus Football Club S.p.A. approved the capital stock increase of € 104.8 million proposed by the board of directors in order to finance the company's medium-term development plan. The stock increase was carried out in June 2007 through the issue of 80,621,332 shares (in a ratio of 2 new shares for every 3 shares held) at € 1.30 per share (of which € 1.20 is additional paid-in capital).

On June 14, 2007, IFIL S.p.A. subscribed to its portion of the increase for 48,373,666 shares for an investment of € 62.9 million.

Increase of the investment in SGS S.A.

In 2007, Ifil Investissements S.A. purchased 143,944 SGS shares on the market, equal to 1.84% of capital stock, for an investment of € 121.5 million.
Currently, Ifil Investissements S.A. holds 1,173,400 SGS shares representing 15% of capital stock.

Subscription to the Gruppo Banca Leonardo S.p.A. capital increase

On April 30, 2007, Ifil Investissements S.A. subscribed to 11,055,537 shares issued as part of the capital increase by Gruppo Banca Leonardo for an investment of € 35.4 million.
Ifil Investissements S.A. currently holds 25,255,537 Gruppo Banca Leonardo shares, equal to 9.78% of outstanding capital stock.

Other investments

On May 2, 2007, Ifil Investissements S.A. succeeded Exor Group S.A., a company controlled by Giovanni Agnelli & C. S.a.p.az., in a commitment for a maximum investment of $80 million in the limited partnership NoCo B LP which groups a series of funds managed by Perella Weinberg Partners L.P. As a result of this commitment, on December 31, 2007, Ifil Investissements S.A. invested $17 million (€ 11.9 million).

On September 30, 2007, Ifil Investissements S.A. purchased a 100% stake in the capital stock of the American company ANCOM USA Inc, from Exor Group S.A., for a total payment of approximately $27 million (€ 19.1 million). ANCOM USA Inc holds 1.96% of the limited partnership NoCo A LP, under which the Perella Weinberg Group conducts all of its activities.

Sale of a stake in Sequana Capital S.A.

On July 6, 2007, Ifil Investissements S.A. reached an agreement for the sale of an approximate 22% stake in Sequana Capital S.A. to DLMD – a company controlled by Pascal Lebard, general manager of Sequana Capital S.A.
After having obtained approval from the competent authorities, on July 27, 2007, Ifil Investissements S.A. sold 10,806,343 Sequana Capital shares at € 21 per share for a total equivalent amount of € 226.9 million.
Ifil Investissements S.A. partially financed the deal for a total equivalent amount of € 27.2 million by subscribing to 2,723 S-Bonds issued by DLMD, maturing July 27, 2010.

After this deal (which led to a loss on consolidation of € 54.3 million, including transaction costs), Ifil Investissements S.A. holds 13,203,139 Sequana Capital S.A. shares, equal to 26.65% of outstanding capital stock.
Ifil Investissements S.A. and DLMD signed a three-year stockholders' agreement aimed at keeping the stockholder base of Sequana Capital S.A. stable.

Sale of the investment in Turismo&Immobiliare S.p.A.

After having obtained authorization from the competent authorities, on September 18, 2007, Ifil Investissements S.A. sold its 25% holding in Turismo&Immobiliare to the Marcegaglia Group, Pirelli RE and Gabetti Property Solutions for € 5.2 million; the IFIL Group realized a gain on the sale of € 0.9 million on consolidation.

Issue of non-convertible bonds

On June 12, 2007, IFIL S.p.A. issued 10-year non-convertible bonds to Italian and foreign investment professional investors for a nominal amount of € 750 million. The purpose of the bond issue was to raise new funds for IFIL S.p.A. in order to refinance its existing debt as part of the strategy to extend its debt maturities. The bonds were admitted for trading on the Luxembourg stock exchange.

Closing of the dispute regarding the sale of La Rinascente

On February 14, 2006 and September 5, 2006, the buyer of the investment in La Rinascente filed two separate arbitration proceedings against Ifil Investissements S.A. seeking compensation for an amount of approximately € 52 million for extraordinary expenses relating to certain points of sale in addition to legal questions in connection principally with the accounting treatments used in the financial statements of La Rinascente.
On June 27, 2007, Ifil Investissements S.A. settled the dispute on the basis of which the buyer of the investment in La Rinascente renounced all claims filed in the above arbitration proceedings against Ifil Investissements S.A. and any other claim and/or demand, also in the future, relating to the sale of the investment in La Rinascente. The settlement involved a total payment of € 8 million (of which € 6.1 million was borne by Ifil Investissements S.A. and € 1.9 million by Auchan Group).

Proceedings relative to the contents of the press releases issued by IFIL S.p.A. and Giovanni Agnelli e C. S.a.p.az. on August 24, 2005

In the opposing judgment against the administrative sanctions imposed by Consob under Resolution 15760 notified on February 13, 2007, the Court of Appeals of Turin, in its decision of December 5, 2007, reduced the administrative sanctions from € 16 million to € 6.3 million. The reduction for IFIL was from € 4.5 million to € 1 million and for Mr Gabetti from € 5 million to € 1.2 million. Furthermore, the additional administrative sanction levied against Mr Gabetti was reduced by two months, from six to four months, the periods of which is now over, as are the periods for the administrative sanctions against Mr Grande Stevens, as the legal advisor, and Mr Marrone.
As for the penal proceedings communicated to these individuals, the judge in the preliminary investigations of December 4, 2007 declared the notification pursuant to ex art. 415 bis of the Italian Penal Code null and void and sent the case to the public prosecutor's office. The proceedings are therefore again in the preliminary stages.

Subscription of bonds convertible into Vision Investment Management shares

On February 20, 2008, Ifil Investissements S.A. reached an agreement to invest € 61 million (US $90 million) in 5-year bonds with a mandatory conversion into shares at maturity and thus become a prominent stockholder of Vision Investment Management Limited (Vision), one of the most important alternative asset managers in Asia.

Vision, which has offices in Hong Kong, was founded in June 2000 by Jerry Wang, one of the pioneers in the sector in Asia. Vision launched its benchmark product, Vision Asia Maximus Fund, in 2002 and since then has become one of the largest local managers of hedge funds specialized in Asian markets.

Ifil Investissements S.A. will use available liquidity for the investment. The bonds will guarantee a fixed annual yield of 5% until conversion at maturity in spring 2013. The finalization of the transaction, subject to the approval of the competent authorities, is expected to take place in spring 2008.

The proceeds from the bonds will mainly be used by Vision management to buy back treasury stock from a group of the company's founding financial investors – which currently hold 32% of ordinary capital stock issued by Vision – and to ensure future resources to sustain the development plan in the alternative asset management sector in Asia. Vision management and employees remain the largest stockholders of the company with a controlling stake.

Upon conversion of the bonds, Ifil Investissements S.A. will receive shares equal to a 40% stake in Vision.

Buyback program

In its meeting held on February 18, 2008, the IFIL S.p.A. board of directors approved the start of a Treasury Stock Buyback Program aimed at efficiently managing the Company’s capital from an investment standpoint.

The Buyback Program falls under the resolution for the purchase of treasury stock approved by the stockholders’ meeting held on May 14, 2007 and will be in effect until November 13, 2008. The Program calls for a maximum disbursement of € 150 million and covers the purchase of IFIL ordinary and savings shares on the market at a price of not less than or more than 15% of the price recorded by the stock in the trading session of the day prior to each single purchase transaction.

The purchases will be made on regulated markets and the maximum number of shares purchased daily may not exceed 25% of the average daily trading volumes, respectively, of IFIL ordinary shares and IFIL savings shares, as provided by EC regulation 2273/2003.

Under this Program, during the period February 26 – March 17, 2008, IFIL S.p.A. purchased 4,465,200 ordinary shares (0.43% of the class of stock) at the average cost per share of € 5.07 for a total of € 22.6 million, and also 275,000 savings shares (0.74% of the class of stock) at the average cost per share of € 4.26 for a total of € 1.2 million. The total investment amounts to € 23.8 million (15.9% of the total disbursement stated in the Program).

After these purchases IFIL currently holds, directly and indirectly, the following treasury stock:

	Number	Amount		% of
	of shares	Per share (€)	Total (€ in thousands)	class
Ordinary, held by IFIL S.p.A.	16,868,198	4.05	68,328	1.62
Ordinary, held by subsidiary Soiem S.p.A.	810,262	3.41	2,762	0.08
Total ordinary shares	**17,678,460**	**4.02**	**71,090**	**1.70**
Savings shares, held by IFIL S.p.A.	**275,000**	**4.26**	**1,172**	**0.74**

Dividends approved by the investment holdings from profit for the year ended December 31, 2007

On the basis of the resolutions passed by the boards of directors, the following dividends should be collected:

Holding	Class of stock	Number of shares	Dividends Per share (€)	 Total (€/ml)
Fiat S.p.A.	ordinary	332,587,447	0.40	133.0
Fiat S.p.A.	preferred	31,082,500	0.40	12.4
Intesa Sanpaolo S.p.A.	ordinary	289,916,165	0.38	110.2
Sequana Capital S.A.	ordinary	13,203,139	0.70	9.2
SGS S.A.	ordinary	1,173,400	22.3 (a)	26.2
Banca Leonardo Group	ordinary	25,255,537	0.11	2.8
Total				**293.8**

(a) Equal to CHF 35.

Resolutions passed by the IFIL S.p.A. board of directors' meeting held on March 28, 2008

In its meeting held on March 28, 2008, the board of directors approved the consolidated financial statements and the draft separate financial statements for the year ended December 31, 2007, authorizing their publication starting from March 29, 2008.

A motion will be put forward to the stockholders' meeting fixed for May 13, 2008 (in first call) and May 14, 2008 (in second call) for the distribution of dividends of € 0.10 per ordinary share and € 0.1207 per savings share, for a total amount of € 108.4 million, unchanged compared to the prior year. Taking into account the treasury stock currently in portfolio, the payment should decrease to approximately € 106.6 million. The ex dividend date is May 19, 2008 and the dividends will be paid starting from May 22, 2008.

The board has also voted to put forward a motion to the stockholders' meeting to renew the authorization for the purchase and the disposition of treasury stock. This authorization would allow the board to purchase on the market, for a period of 18 months from the resolution passed by the stockholders' meeting, up to a maximum of 55 million ordinary and/or savings shares, for a maximum disbursement of € 450 million, at a price of not less than or more than 15% of the price recorded by the stock in the trading session of the day prior to each single purchase transaction. The authorization request to purchase treasury stock is considered opportune, among other things, for purposes of efficient capital management, as well as from an investment standpoint, and also for any equity-based compensation plans and for carrying out stock exchanges.

A motion will also be put forward to the special stockholders' meeting to renew the five-year mandate pursuant to articles 2443 and 2420 ter of the Italian Civil Code, to increase capital stock, at one or more times, up to a maximum of € 1,500 million and to issue, at one or more times, convertible bonds up to the same amount. The current mandate is expiring and a new mandate would allow the Company to act quickly so that any future capital transactions would respond to the financial needs deriving from investment transactions.

The board of directors, based on the proposal put forward by the Compensation and Nominating Committee, has approved a stock option Plan that will be submitted to the stockholders' meeting, pursuant to art. 114 bis of Legislative Decree 58/1998 (TUF).

The grantees of the Plan, which is for a period of more than 11 years, are the chief executive officer and general manager, Carlo Barel di Sant'Albano, for 3,000,000 stock options corresponding to the same number of ordinary shares, and employees of the IFIL Group (IFIL S.p.A. and the companies of the "Holdings System") who are or will be regarded as key people in the organization, on the basis of the positions held or activities performed, for a maximum of 12,000,000 stock options. Currently, there are 15 employees with these characteristics.

The adoption of the Plan is aimed at attracting and retaining managerial resources who hold important positions in the company and at the same time have them involved in pursuing operating performance targets and matching the economic incentives to the value of the company for the stockholders. The vesting period of the options granted will start from May 14, 2014 to May 14, 2016 and precisely: the first part, equal to 25% of the options, will vest on May 14, 2014, the second part, again equal to 25% of the options, will vest on May 14, 2015 and the third part, equal to 50% of the options, will vest on May 14, 2016. The exercise price of the options granted will be equal to the arithmetic average of the official stock market prices recorded at Borsa Italiana S.p.A. in the month prior to the date of the stockholders' meeting that will approve the Plan.
The Plan will be implemented by assigning the grantees, gratuitously, options on treasury stock purchased by the company or by companies of the IFIL Group in accordance with existing laws. Details of the Plan will be described in the report prepared by the board of directors which will be made available within the period established by law.
Finally, a motion for payment of a part of the variable compensation of employees (MBO) with treasury stock will also be submitted by the board of directors for approval by the stockholders' meeting, pursuant to art. 114 bis of Legislative Decree 58/1998 (TUF).

Moreover, the ordinary and special stockholders' meeting shall appoint the board of directors and the board of statutory auditors as well as vote on some amendments to the bylaws required to conform to new laws and regulations.

BUSINESS OUTLOOK

For IFIL S.p.A., a profit is expected to be reported for the year 2008.

Taking into account the forecasts formulated by the major holdings, summarized below, a profit is forecast for the IFIL Group for 2008.

Fiat Group
The Fiat Group has confirmed its 2008 targets for a consolidated net income in the range of € 2.4 billion to € 2.6 billion (equal to € 1.9 and € 2 per share).

Cushman & Wakefield Group
Owing to the prolonged difficult market conditions which are particularly affecting the American and English credit markets, the Cushman & Wakefield Group aims to maintain the levels of operating profitability of the past year and thus report a net positive result for 2008.

Sequana Capital Group
For the year 2008, the Sequana Capital Group forecasts a further increase in operating profit.
Antalis, in particular, expects a significant growth in operating profit owing to the synergies generated by the acquisition of Map Merchant Group. Arjowiggins, on the other hand, predicts a reduction in operating profit in the first half of 2008 due to higher external costs and an unfavorable trend in exchange rates. This trend should reverse in the second half, thanks principally to the anticipated price increase policy and another recently introduced program to reduce costs.

Alpitour Group
During the year 2007/2008, the Alpitour Group will aim to consolidate the profitability achieved in 2006/2007 and further improve the financial situation and the return on invested capital.

Juventus Football Club
As a result of the relevant investments made to strengthen the First Team which will produce a significant increase in the related costs, Juventus Football Club expects to close the year 2007/2008 with a loss.

IFIL S.p.A. – REVIEW OF THE RESULTS OF THE SEPARATE FINANCIAL STATEMENTS

The year 2007 shows a profit of € 123.4 million, including a net amount of € 18.8 million deriving from a further partial impairment reversal on Fiat preferred shares (+€ 19.3 million) and the accrual for deferred taxes (-€ 0.5 million) owing to lower taxes charged on such shares.
The year 2006 showed a profit of € 625.3 million including a net amount of € 620.1 million deriving from the impairment reversal on Fiat ordinary and preferred shares (€ 645.3 million) and the accrual for the related deferred taxes (-€ 25.2 million).

The condensed income statement and balance sheet and comments on the most important items are presented below.

IFIL S.p.A. - Condensed income statement

1. Dividends from investments

Dividends from investments in 2007 amount to € 171.4 million, collected from Fiat for € 61.2 million and Intesa Sanpaolo for € 110.2 million. Dividends from investments in 2006 amounted to € 53 million and were entirely collected from Sanpaolo IMI.

2. Impairment reversals on investments

Impairment reversals on investments refer exclusively to 240,583,447 Fiat ordinary shares and 31,082,500 Fiat preferred shares which in 2001, 2002 and 2004 had been written down to their market price.

At December 31, 2006, the carrying amount of Fiat ordinary shares was adjusted by the total impairment reversal up to the original purchase cost, for € 537.1 million. The carrying amount of Fiat preferred shares was adjusted by the partial impairment reversal for € 108.2 million (out of a total of € 135.5 million) to the market price on December 29, 2006 (€ 12.06) which was still below (for € 27.3 million) the original purchase cost. Deferred taxes for € 25.2 million were accrued on these reversals.

At December 31, 2007, the carrying amount of a part of the Fiat preferred shares was adjusted by a further partial impairment reversal for € 19.3 million, up to the stock market price on December 28, 2007 (€ 14.46), which was still below (for € 8 million) the original cost of purchase. In 2007, deferred taxes of € 0.5 million were accrued due to lower tax charges on these shares.
Furthermore, deferred taxes accrued in total in 2006 and 2007 (€ 25.7 million) were reduced by € 4.2 million (credited to the income statement in 2007) following the reduction of the IRES tax rate from 33% to 27.5%.

The per share and total carrying amount of Fiat ordinary and preferred shares are presented in Note 6.

3. Net financial expenses

Net financial expenses of € 39 million increased by € 19.6 million compared to 2006 (€ 19.4 million) due mainly to higher short-term interest rates in the first half and a different composition of funding sources in the second half. In effect, the issue of the 10-year non-convertible bonds for € 750 million allowed the Group to extend the average debt maturities against a higher cost.

4. Net general expenses

Net general expenses amount to € 22.8 million and increased by € 2.7 million compared to € 20.1 million in 2006. The change is due to higher legal fees (+€ 2 million), head office restructuring expenses (+€ 1 million) and sundry expenses (+€ 0.3 million), partially compensated by lower compensation paid (-€ 1.4 million).

5. Net other nonrecurring expenses

Net other nonrecurring expenses in 2007 amount to € 9.2 million and include the income of € 3.5 million originating from the reduction decided by the Court of Appeals of Turin in respect of the pecuniary administrative sanction levied on the company by Consob, as well as the accrual for the current-year cost of € 12.7 million for the stock option plan approved for management of the subsidiary Alpitour.
In 2006, the amount of € 7.6 million included the accrual for the pecuniary administrative sanction of € 4.5 million levied on the company by Consob as well as the accrual for the current-year cost of € 3.1 million in that year for the stock option plan approved for management of the subsidiary Alpitour.

6. Investments

Details are as follows:

€ in millions	**12/31/2007**	12/31/2006	Change

	3,763.8	3,681.6	82.2
Available-for-sale investments			
Intesa Sanpaolo S.p.A. (ordinary shares) (a)	**1,564.7**	1,640.3	(75.6)
Total investments	**5,328.5**	5,321.9	6.6

(a) Measured at fair value on the basis of the market price at the end of the year, with recognition of the unrealized gains or losses in equity.

The net increase of € 6.6 million in the carrying amount of investments is due to the following movements:

€ in millions	
Investments at December 31, 2006	**5,321.9**
Subscription to Juventus Football Club capital stock increase	62.9
Impairment reversal on Fiat preferred shares	19.3
Fair value adjustment of the investment in Intesa Sanpaolo	(75.6)
Change during the year	**6.6**
Investments at December 31, 2007	**5,328.5**

The comparison between carrying amounts and market prices of listed investments is as follows:

				Market price at			
	Number of shares held	Carrying amount		December 28, 2007		March 20, 2008	
		Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)
Fiat S.p.A. (ordinary shares)	332,587,447	7.88	2,619.4	17.50	**5,819.6**	13.06	**4,343.6**
Fiat S.p.A. (preferred shares)	31,082,500	8.06	250.4	14.46	**449.4**	9.78	**303.9**
			2,869.8		**6,269.0**		**4,647.5**
Intesa Sanpaolo S.p.A. (ord. sh.)	289,916,165	5.40	1,564.7	5.40	**1,564.7**	4.22	**1,222.9**
Juventus Football Club S.p.A.	120,934,166	0.61	74.2	0.97	**117.5**	0.76	**91.7**
Total			4,508.7		**7,951.2**		**5,962.1**

7. Equity

Equity at December 31, 2007 is equal to € 4,566.9 million (€ 4,587.5 million at December 31, 2006). The negative change of € 20.6 million is due to the following changes:

€ in millions	
Equity at December 31, 2006	**4,587.5**
Dividends paid out	(107.1)
Fair value adjustment of investment in Intesa Sanpaolo	(75.6)
Deferred taxes released on change in fair value	36.7 (a)
Other net changes	2.0
Profit for the year 2007	123.4
Net change during the year	**(20.6)**
Equity at December 31, 2007	**4,566.9**

(a) Inclusive of the effect deriving from the reduction of the IRES tax rate from 33% to 27.5% (€ 35.7 million).

8. Net financial position

Details are as follows:

€ in millions	**12/31/2007**	12/31/2006	Change
Cash and cash equivalents	**165.6**	0.3	165.3
Financial assets held for trading	**47.8**	0.0	47.8
Other financial assets, current and non-current	**4.6**	2.3	2.3
Non-convertible bonds	**(943.6)**	(199.2)	(744.4)
Bank debt	**0.0**	(274.7)	274.7
Debt with related parties	**0.0**	(208.9)	208.9
Other current financial liabilities	**(23.6)**	(1.4)	(22.2)
Net financial position	**(749.2)**	(681.6)	(67.6)

The negative change of € 67.6 million in 2007 is due to the following cash flows.

€ in millions	
Net financial position at December 31, 2006	**(681.6)**
Dividends collected	171.4
Dividends paid out	(107.1)
Subscription to Juventus Football Club capital stock increase	(62.9)
Net financial expenses	(39.0)
Net general expenses	(22.8)
Payment of Consob administrative sanction	(4.5)
Other net changes	(2.7)
Net change during the year	**(67.6)**
Net financial position at December 31, 2007	**(749.2)**

9. Reconciliation between the separate financial statements of IFIL S.p.A. and the consolidated financial statements of the Group

The following reconciliation of the profit for the year and the equity in the separate financial statements of IFIL S.p.A. for the years ended December 31, 2007 and December 31, 2006 and the corresponding figures in the consolidated financial statements of the IFIL Group at the same dates are presented as required by Consob Communication 6064293 dated July 28, 2006.

	Profit		Equity

IFIL GROUP – REVIEW OF THE CONDENSED CONSOLIDATED RESULTS

IFIL holds some important investments through the Luxembourg subsidiary Ifil Investissements and controls two companies incorporated under Irish law (operating with the aim of optimizing the management of the financial resources of the Group), Soiem (a service company), as well as certain companies contributing to investment activities (Ifil USA, Ifil Asia and Ifil France). The aggregate of these companies constitutes the so-called "Holdings System" (the complete list of these companies is presented in the next table).

In order to facilitate the analysis of the equity and financial position and the results of operations of the Group, it is IFIL's practice to present condensed financial statements (balance sheet and income statement) for the period prepared by applying the "condensed" consolidation criteria. Such condensed consolidated financial statements are presented along with the annual consolidated financial statements and the interim consolidated financial statements for the first-half of each year. The quarterly consolidated data is also presented in the condensed format in the quarterly reports at March 31 and September 30 of each year.

In the preparation of the condensed consolidated balance sheet and income statement, the financial statements or accounting data drawn up in accordance with IFRS by the parent and by the subsidiaries in the "Holdings System" are consolidated line-by-line; the investments in the operating subsidiaries and associates (Fiat, Sequana Capital, Cushman & Wakefield, Alpitour and Juventus Football Club) are accounted for by the equity method, always on the basis of their financial statements or accounting data prepared in accordance with IFRS.

The following table shows the consolidation and valuation methods used for the investments:

	% holding in capital stock outstanding	
	12/31/2007	12/31/2006

(e) Percentage refers to the investment in Sanpaolo IMI S.p.A. merged in Banca Intesa with effect on January 1, 2007.
(f) Sold on September 18, 2007.
(g) Percentage holding in the limited partnership acquired on September 30, 2007.

The condensed consolidated **income statement** and **balance sheet** and notes on the most significant items are presented on the following pages.

IFIL GROUP – Condensed consolidated income statement

The **profit attributable to the equity holders of the company** for the year 2007 is € 671.7 million, with an increase of € 330.2 million compared to the profit reported for the year 2006 (€ 341.5 million). The increase is due to the higher contribution to earnings by investment holdings (+€ 317.7 million) and higher net financial income (+€ 30.9 million), partially compensated by other net negative changes (-€ 18.4 million).

1. Share of the profit (loss) of companies accounted for by the equity method

In 2007, the share of the profit (loss) of companies accounted for by the equity method is a profit of € 610.9 million (€ 293.2 million in 2006). The positive change of € 317.7 million reflects the higher profit contribution by the Fiat Group (+€ 276.4 million), the Sequana Capital Group (+€ 2.4 million, also including the loss of € 54.3 million on the sale of the 22% stake in capital stock), the Alpitour Group (+€ 4.5 million), the result for the nine months following the acquisition of the Cushman & Wakefield Group (+€ 34.9 million), a lower profit contribution by Juventus Football Club (-€ 0.8 million) and other changes (+€ 0.3 million).

(a) Mainly for the assignment of preference dividends to the minority interest.
(b) Of which -€ 54.3 million for losses (including transaction costs of € 0.8 million) realized on the sale of the 22% stake in Sequana Capital and +€ 7.6 million for lower goodwill impairment losses on the AWA Group, since it was partially amortized by IFIL in prior years.
(c) For the elimination of the gain net of taxes on the Sequana Capital/SGS Public Exchange and Purchase Offer (-€ 465.8 million) and for the diluting effect of the reduction in the stake held (-€ 28.3 million).
(d) Data for the period April 1 – December 31, subsequent to acquisition.
(e) Data for the period November 1 – October 31.
(f) Data for the period January 1 – December 31 prepared for purposes of consolidation by IFIL.

For a review of the operating performance of the companies accounted for by the equity method reference should be made to the following sections.

2. Dividends from investments

Dividends from investments in 2007 amount to € 111.6 million and include dividends collected from Intesa Sanpaolo S.p.A. for € 110.2 million (€ 53 million in 2006) and Gruppo Banca Leonardo for € 1.4 million.

3. Net other financial income (expenses)

In 2007, net other financial expenses amount to € 10.1 million whereas, in 2006, the balance of net financial income totaled € 19.2 million. The negative change of € 29.3 million is mainly due to the change in the consolidated net financial position of the "Holdings System" (which over the course of the year went from a cash position of € 386.2 million to a borrowings position of € 104.5 million as a result of significant investments), in addition to an increase in IFIL S.p.A. borrowing costs as described previously.

4. Net other nonrecurring income (expenses)

In 2007, net other nonrecurring expenses amount to € 17.2 million and comprise transaction costs and expenses incurred to close the dispute over the sale of La Rinascente (€ 8 million), the current-year cost of € 12.7 million for the stock option plan approved for management of the subsidiary Alpitour, as well as income of € 3.5 million resulting from the reduction decided by the Court of Appeals of Turin in respect of the administrative sanction levied on the company by Consob.

In 2006, net other nonrecurring expenses amounted to € 0.2 million and included the accrual for the administrative sanction of € 4.5 million levied on the company by Consob in relation to the content of the press release dated August 24, 2005, the current-year cost of € 3.1 million for that year for the stock option plan approved for management of the subsidiary Alpitour, as well as the release of the provision set aside in prior years for the Alpitour stock option plan 2000 which was not exercised by the expiration date of August 31, 2006, equal to € 7.8 million.

5. Investments accounted for by the equity method

Details are as follows:

€ in millions	Carrying amount at **12/31/2007**	 12/31/2006	Change
Fiat Group	**3,125.3**	2,610.6	514.7

8. Equity attributable to the equity holders of the company

Details are as follows:

€ in millions	**12/31/2007**	12/31/2006	Change
Capital and reserves	**6,715.0**	6,270.8	444.2
Treasury stock	**(48.5)**	(48.5)	0.0
Total	**6,666.5**	6,222.3	444.2

The change during the year is analyzed as follows:

€ in millions	
Equity attributable to the equity holders of the company at December 31, 2006	**6,222.3**
Change in fair value of the investments in Intesa Sanpaolo (-€ 75.6 million) and SGS (-€ 21.5 million)	(97.1)
Deferred taxes released on the change in fair value of the investment in Intesa Sanpaolo	36.7 (a)
Share of translation differences (-€ 105.5 million) and other net changes (+€ 45.4 million) shown in the equity of the companies consolidated and those accounted for by the equity method	(60.1)
Dividends paid-out by IFIL S.p.A.	(107.0) (b)
Profit attributable to the equity holders of the company	671.7
Net change during the year	**444.2**
Equity attributable to the equity holders of the company at December 31, 2007	**6,666.5**

(a) Inclusive of the effect deriving from the reduction of the IRES tax rate from from 33% to 27.5% (€ 35.7 million).
(b) Net of € 0.1 million of intragroup dividends.

At December 31, 2007, IFIL S.p.A. holds, directly and indirectly, the following treasury stock:

	Number of IFIL ordinary shares	% of class of stock	Amount Per share (€)	Amount Total (€ ml)
Held by IFIL S.p.A.	12,402,998	1.19	3.68	45.7
Held by the subsidiary Soiem S.p.A.	810,262	0.08	3.41	2.8
Balance at December 31, 2007	**13,213,260**	**1.27**	**3.67**	**48.5**

There were no transactions involving treasury stock during the year 2007.

9. Consolidated net financial position of the “Holdings System”

The consolidated net financial position of the “Holdings System” at December 31, 2007 shows a borrowings position of € 104.5 million with a negative change of € 490.7 million compared to the cash position at the end of 2006 (€ 386.2 million).

The consolidated net financial position of the “Holdings System” is composed as follows:

	12/31/2007			12/31/2006		
€ in millions	**Current**	**Non-current**	**Total**	Current	Non-current	Total
Financial assets and cash and cash equivalents	**862.4**	**0.3**	**862.7**	862.8	0.2	863.0
Bonds 2007-2017		**(744.2)**	**(744.2)**	0.0	0.0	0.0
Bonds 2006-2011		**(199.4)**	**(199.4)**	0.0	(199.2)	(199.2)
Bank debt and other financial liabilities	**(23.6)**		**(23.6)**	(277.6)	0.0	(277.6)
Total financial liabilities	**(23.6)**	**(943.6)**	**(967.2)**	(277.6)	(199.2)	(476.8)
Consolidated net financial position of the “Holdings System”	**838.8**	**(943.3)**	**(104.5)**	585.2	(199.0)	386.2

At December 31, 2007, IFIL S.p.A. has irrevocable credit lines for € 660 million, of which € 150 million is due by December 31, 2008 and € 510 million at later expiration dates.

Standard & Poor's rates IFIL’s long-term debt at “BBB+” and its short-term debt at “A-2”, both with a stable outlook.

The net negative change of € 490.7 million during the year 2007 is due to the following flows:

€ in millions		
Consolidated net financial position of the "Holdings System" at December 31, 2006		**386.2**

(a) In the consolidated financial statements at December 31, 2007, the investment in the Sequana Capital Group has been deconsolidated with effect from July 1, 2007 following the sale of the 22% stake in the company.

The composition of the consolidated net financial position – line-by-line consolidation is presented in Note 35 to the consolidated financial statements of the IFIL Group.

11. Reconciliation between the condensed consolidated financial statements and the IFIL Group consolidated financial statements

The following table presents a reconciliation between the condensed consolidated financial statements and the IFIL Group consolidated financial statements prepared in accordance with IFRS.

The first column ("Condensed consolidation") presents the data that has been commented on in the preceding pages reclassified according to the consolidated financial statement format.

The second column ("Eliminations") shows the adjustments necessary to reverse the carrying amount of the investments accounted for in the condensed consolidated financial statements by the equity method and the share of the results of those investments in order to arrive at the line-by-line consolidation of the respective financial statements or accounting data, which are shown in the next columns.

(a) Direct holding.
(b) Indirect holding through spouse.

Furthermore, on March 7, 2007, there was a communication made pursuant to art. 152-octies, paragraph 7 of Consob Regulation 11971/99 regarding the purchase of 29,000 IFIL ordinary shares on the part of the family of the chief executive officer, Carlo Barel di Sant'Albano.
There are no key managers with strategic responsibilities in IFIL S.p.A..

Annual Report on Corporate Governance 2007

Information concerning the corporate governance of IFIL S.p.A. is presented in the Annual Report on Corporate Governance 2007 which, in accordance with art. 89 bis of Consob Regulation 11971 dated May 14, 1999 and subsequent amendments, will be published on the corporate website www.ifil.it and made available at the corporate head office within the times established by existing laws.

Management and coordination

IFIL Investments S.p.A. is not subject to management and coordination on the part of companies or entities.
In accordance with art. 2497 bis of the Italian Civil Code, the subsidiaries Soiem S.p.A. and Ifil New Business S.r.l. have identified IFIL Investments S.p.A. as the company which exercises management and coordination.

Programming document on security

The company has prepared the programming document on security on December 13, 2007 for the year 2007 according to the provisions of Legislative Decree 196 dated June 30, 2003, attachment B – technical specifications regarding minimum safety measures. The document has been drawn up by the person in charge of the treatment of the data.

REVIEW OF THE OPERATING PERFORMANCE OF THE MAJOR HOLDINGS

FIAT
GROUP

(30.45% of ordinary capital stock and 30.09% of preferred capital stock)

The consolidated results of the Fiat Group can be summarized as follows:

			Change	
€ in millions	**2007**	2006	Amount	%
Net revenues	**58,529**	51,832	6,697	12.9
Trading profit	**3,233**	1,951	1,282	65.7
Operating result	**3,152**	2,061	1,091	52.9
Net result	**2,054**	1,151	903	78.5

Employees at year-end (number)	**185,227**	172,012	13,215

Net revenues

In 2007, the Fiat Group has net revenues of € 58,529 million, up 12.9% from 2006 (€ 51,832 million), mainly driven by higher volumes across all major businesses. A detailed review of net revenues is provided below:

€ in millions	**2007**	2006	Change %
Automobiles (Fiat Group Automobiles, Maserati, Ferrari)	**29,015**	25,577	13.4
Agricultural and Construction Equipment (CNH – Case New Holland)	**11,843**	10,527	12.5
Trucks and Commercial Vehicles (Iveco)	**11,196**	9,136	22.5
Components and Production Systems (FPT, Magneti Marelli, Teksid, Comau)	**13,375**	12,366	8.2
Other businesses (Publishing and Communications, Holding companies and other companies)	**1,378**	1,581	(12.8)
Eliminations	**(8,278)**	(7,355)	-
Net revenues	**58,529**	51,832	12.9

Trading profit

In 2007, trading profit totals € 3,233 million (5.5% of revenues), an increase of 65.7% compared to € 1,951 million in 2006 (3.8% of revenues), with all the major businesses posting significant improvements. Details of trading profit are as follows:

€ in millions	**2007**	2006	Change Amount
Automobiles (Fiat Group Automobiles, Maserati, Ferrari)	**1,093**	441	652
Agricultural and Construction Equipment (CNH – Case New Holland)	**990**	737	253
Trucks and Commercial Vehicles (Iveco)	**813**	546	267
Components and Production Systems (FPT, Magneti Marelli, Teksid, Comau)	**509**	348	161
Other businesses (Publishing and Communications, Holding Companies and other Companies) – Eliminations	**(172)**	(121)	(51)
Trading profit	**3,233**	1,951	1,282

The breakdown of trading profit by Business/Sector is illustrated below:.

Automobiles

The Automobiles businesses have a trading profit of € 1,093 million (+€ 652 million) more than double compared to 2006. Trading margin grew from 1.7% in 2006 to 3.8% in 2007. Fiat Group Automobiles, with a € 512 million increase in trading profit, almost tripled its 2006 result. Ferrari's trading profit rose by 45.4%. Maserati posted a turnaround in results, reporting a trading profit of € 24 million against a trading loss of € 33 million in 2006.

€ in millions	**2007**	2006	Change
Fiat Group Automobiles	**803**	291	512
Maserati	**24**	(33)	57
Ferrari	**266**	183	83
Total	**1,093**	441	652
Trading margin (%)	**3.8**	1.7	

Fiat Group Automobiles has a trading profit of € 803 million (3% of revenues), a sharp improvement (+€ 512 million) from the € 291 million (1.2% of revenues) in 2006. The increase is mainly attributable to higher volumes, a more favorable product mix following the introduction of new models, increased absorption of fixed production costs, net of higher costs for research and development, advertising and network development supporting intensive product program and commercial strategy in both Western Europe and Latin America. The contribution of nonrecurring gains of approximately € 65 million, also positively impacted trading profit.

In 2007, **Maserati** has a trading profit of € 24 million (3.5% of revenues), a sharp improvement (up € 57 million) from the loss of € 33 million in 2006. Higher volumes and cost-containment initiatives enabled Maserati to report a positive trading result for the first time since its entry into the Fiat Group in 1993.

MASERATI

Ferrari closes 2007 with a trading profit of € 266 million, up 45.4% from € 183 million in 2006. The improvement is mainly attributable to higher sales volumes and efficiency gains, offset in part by increased R&D expenses and the unfavorable US dollar exchange rate. Trading margin is 15.9% in 2007 against 12.6% in 2006.

Ferrari

Agricultural and Construction Equipment

In 2007 **CNH – Case New Holland** has a trading profit of € 990 million, representing a trading margin of 8.4%, up from 7% in 2006. The € 253 million improvement (+34.3%; +46.7% in US dollar terms) from the € 737 million of 2006 is mainly due to higher sales volumes, a more favorable mix and pricing (allowing also the recovery of higher raw material costs) as well as benefits deriving from improved product quality.

Trucks and Commercial Vehicles

Iveco has a trading profit of € 813 million (7.3% of revenues), a sharp improvement (+€ 267 million or 48.9%) over trading profit of € 546 million in 2006 (6% of revenues). The increase is mainly attributable to strong growth in sales volumes and better pricing resulting from the competitive repositioning of its products, especially heavy vehicles, partially offset by higher costs both for R&D and for the international expansion initiatives started by Iveco over the last 2 years.

Components and Production Systems

The **Components and Production Systems** businesses post trading profit of € 509 million, for a trading margin of 3.8% (2.8% in 2006). The € 161 million overall improvement reflects higher trading profit at FPT Powertrain Technologies and Magneti Marelli, and the reduced loss at Comau.

€ in millions	**2007**	2006	Change
FPT Powertrain Technologies	**271**	168	103
Components (Magneti Marelli)	**214**	190	24
Metallurgial Products (Teksid)	**47**	56	(9)
Production Systems (Comau)	**(23)**	(66)	43
Total	**509**	348	161
Trading margin (%)	**3.8**	2.8	

In 2007, **FPT Powertrain Technologies** has a trading profit of € 271 million, an increase of € 103 million (+61.3%) over 2006, resulting in an improvement in the trading margin from 2.7% in 2006 to 3.8% in 2007. The improvement is mainly due to efficiencies in the purchasing and manufacturing areas and growth in volumes, while higher costs for international business development negatively impacted trading results.

Magneti Marelli has a trading profit of € 214 million, an increase of € 24 million compared to 2006. Higher sales volumes and efficiency gains compensated price pressures, increased raw material prices and industrial start-up costs for new products. The trading margin is 4.3%, in line with 2006.

Teksid closes 2007 with a trading profit of € 47 million, which was impacted by the trading loss of € 9 million of Teksid Aluminum, against a profit of € 56 million in 2006, which included the positive result of € 16 million relating to sold activities. On a comparable scope of operations, trading profit improved by € 16 million due to efficiency gains, which more than offset higher energy and materials costs.

Comau closes 2007 with a trading loss of € 23 million (reported in the first quarter of 2007 and followed by substantial breakeven in the rest of the year), a substantial improvement from the loss of € 66 million reported in 2006. The improvement is the result of the reshaping plan launched in the second half of 2006, the effects of which are starting to be felt. The most important improvements were reported by the Body-welding operations in Europe.

Other Businesses

The trading loss reported by the **Other Businesses** totals € 172 million, compared with a trading loss of € 121 million in 2006.

€ in millions	**2007**	2006	Change
Publishing and Communications (Itedi)	**12**	11	1
Holding companies, other companies and eliminations	**(184)**	(132)	(52)
Total	**(172)**	(121)	(51)

In 2007, **Itedi** has a trading profit of € 12 million (3.1% of revenues), against a profit of € 11 million in 2006 (2.7% of revenues). The improvement is mainly attributable to general, industrial, distribution and general cost-containment initiatives at Editrice La Stampa (which trading margin rose by 2 percentage points), notwithstanding higher amortization connected to the new rotary press project and the termination of government paper cost subsidies.

The trading loss of **Holding companies, other companies and eliminations** rose from € 132 million in 2006 (which included a profit of € 37 million of the Services Sector) to € 184 million in 2007. The change of € 52 million is attributable to lower volumes of activity for the “Treno Alta Velocità” (T.A.V.) contract (in the first quarter of 2006 there had still been significant income from the Turin-Novara line, which was completed in that period), the change in the scope of consolidation, in particular due to the disposal of B.U.C - Banca Unione di Credito, as well as higher non-cash costs recognized in connection with stock option plans.

Operating result

In 2007, the Fiat Group's **Operating income** totals € 3,152 million, against € 2,061 million in 2006. The € 1,091 million improvement from 2006 reflects higher trading profit for € 1,282 million, partially reduced by lower unusual income for € 191 million. The latter is the effect of lower gains on the disposal of investments for € 417 million, higher other net unusual expenses for € 119 million, offset in part by lower restructuring costs for € 345 million.

The following table illustrates the components of operating result broken down by Sector:

	Trading profit		Gains/Losses on the disposal of investments		Restructuring costs		Other unusual income (expenses)		Operating result	
€ in millions	**2007**	2006	**2007**	2006	**2007**	2006	**2007**	2006	**2007**	2006

Holding companies, other companies and eliminations	**(184)**	(132)	**171**	150	**3**	31	**(2)**	(3)	**(18)**	(16)
Total for the Group	**3,233**	1,951	**190**	607	**105**	450	**(166)**	(47)	**3,152**	2,061

Net gains on the disposal of investments, total € 190 million and mainly include the following gains: € 118 million for the sale of the interest in Mediobanca S.p.A., and € 42 million realized on the completion of the sale of Ingest Facility S.p.A.

In 2006, this item amounted to € 607 million and included the gain of € 463 million resulting from the establishment of the joint venture Fiat Group Automobiles Financial Services, the gains on the sale of B.U.C. – Banca Unione di Credito (€ 80 million), Immobiliare Novoli S.p.A. (€ 39 million), Machen Iveco Holding SA that controlled 51% di Ashok Leyland Ltd (€ 23 million), Atlanet S.p.A. (€ 22 million) and the residual interest in IPI S.p.A. (€ 9 million), as well as the € 29 million loss, at the time an expected loss, in connection with the sale of Meridian Technologies Inc., which was finalized on March 2, 2007.

Restructuring costs total € 105 million and related primarily to Fiat Group Automobiles (€ 40 million), CNH (€ 30 million) and Comau (€ 21 million).

In 2006, restructuring costs totaled € 450 million and were mainly attributable to Comau (€ 179 million) in connection with the restructuring and reshaping of the scope of its operations, CNH (€ 145 million), FPT Powertrain Technologies (€ 60 million), Magneti Marelli (€ 16 million) and Business Solutions (€ 12 million).

Other unusual income (expenses) consists of net expenses of € 166 million, largely in connection with the rationalization of some strategic suppliers of the Group, some of which were acquired in 2007.

The € 47 million in net expenses reported in 2006 included € 26 million attributable to the impairment of the goodwill of certain European companies of Comau, resulting from the restructuring and reshaping of its scope of operations, and € 17 million due to the reorganization and rationalization of relationships with Group suppliers.

Net result

In 2007, **Net income** totals € 2,054 million, against income of € 1,151 million in 2006. **Net income attributable to the equity holders of the parent** amounts to € 1,953 million in 2007 (€ 1,065 million in 2006).

As for equity and financial aspects:

Net (debt) / cash position and consolidated net financial position

At December 31, 2007, consolidated net debt amounts to € 10,423 million, € 1,413 million lower than the € 11,836 million at December 31, 2006. The composition is as follows:

€ in millions	**12/31/2007**	12/31/2006	Change
Net (debt)/cash position of Industrial Activities	**355**	(1,773)	2,128
Net debt position of Financial Services	**(10,778)**	(10,063)	(715)
Total Net debt position	**(10,423)**	(11,836)	1,413

At December 31, 2007, the consolidated net financial position is a positive € 1,764 million (a negative € 231 million at December 31, 2006).

The difference between the net debt balance (-€ 10,423 million) and the consolidated net financial position (+€ 1,764 million) is attributable to the amount of current financial receivables of € 12,187 million.

Group interest in stockholders' equity

The Group interest in stockholders' equity at December 31, 2007 amounts to € 10,606 million (€ 9,362 million at December 31, 2006). The net increase of € 1,244 million is mainly formed by the consolidated net income attributable to the equity holders of the parent (+€ 1,953 million), the net change in the income and expenses recognized in equity (-€ 145 million), the distribution of dividends (-€ 274 million), the purchase of treasury stock (-€ 395 million) and other net changes (+€ 105 million).

CUSHMAN & WAKEFIELD®

(70.18% of capital stock through Ifil Investissements)

The data below refers to the nine-month period April 1 – December 31, 2007 subsequent to acquisition of the control of Cushman & Wakefield, and is taken from accounting data prepared in accordance with IFRS, for purposes of consolidation by IFIL.

$ in millions	9 months to 12/31/2007
Revenues	1,720.1
Net income attributable to the equity holders of the company	66.4
Equity attributable to the equity holders of the company (a)	931.8
Net financial position (a)	3.1

(a) Data at December 31, 2007.

In the nine months ended December 31, 2007, the C&W Group reported revenues of more than $1,720 million. The composition by geographical area is the following: the United States, Canada and Latin America contributed $1,204 million to revenues and Europe and Asia, respectively, $454 million and $62 million. In terms of business segments, Transaction Services represent approximately 75% of revenues, and Capital Markets and Client Solutions, respectively, 18% and 7%.

The net income for the period is $66.4 million after nonrecurring expenses, depreciation and amortization consequent to the IFIL-RGI transaction (fair value adjustments of assets) and accounting adjustments connected with the application of IFRS for the purposes of consolidation by IFIL.

The equity attributable to the equity holders of the company at December 31, 2007 amounts to $931.8 million, while the net financial position shows a cash position of $3.1 million. In the second quarter of 2007, the Cushman & Wakefield Group obtained a revolving line of credit for $350 million to cover seasonal working capital needs which feature in the first part of every year and to support acquisition activities.
To this end, during the nine-month period, the Cushman & Wakefield Group made some important acquisitions for more than $70 million. The most important ones refer to the purchase of the remaining 25% interest in C&W Asia Ltd and the purchase of a 65% stake in Sonnenblick-Goldman, a prominent New York investment bank specialized in transaction services.

With regard to the full-year ended December 31, 2007 (consolidated financial data prepared in accordance with US GAAP), revenues amount to $2,107 million (+19% compared to 2006) and include $265 million ($243 million in 2006) of costs recovered on managed properties on behalf of third parties. Despite the crisis in the American real estate market and the financial turbulence which symbolized the second half of 2007, the organic growth of revenues was substantial across all geographic areas (+12% in the United States, +34% in Europe and +64% in Asia), partly as a result of the acquisitions made during the period.

In terms of profitability, the Cushman & Wakefield Group reported a gross operating margin (EBITDA) of more than $148 million (+25% compared to the previous year) and an operating profit of $113 million (+26% compared to $89.5 million in 2006).

SEQUANA CAPITAL

(26.65% of capital stock through Ifil Investissements)

The highlights of the consolidated results of the Sequana Capital Group in 2007 are as follows:

	Proforma	**Published**	**Restated**		Restated changes vs 2006	
€ in millions	**2007**	**2007**	**2007**	2006	Amount	%
Net sales	**5,391**	**4,290**	**4,042**	3,979	63	1.6
Gross operating profit	**244**	**205**	**205**	195	10	5
Trading profit	**147**	**113**	**116**	93	23	25
Current profit	**87**	**74**	**79**	65	14	22
Profit attributable to the equity holders of the company	**155**	**142**	**153**	958	(805)	-84
Equity attributable to the equity holders of the company		**1,277**		1,233	44	3.6
Net indebtedness		**771**		376	395	105.1

The “Published” 2007 results include the activities of Dalum Papir A/S from July 1, 2007 and Map Merchant from November 1, 2007. The results also include a nonrecurring expense of € 7 million relating to the acquisition of Map Merchant.
The “Proforma” 2007 results include the operations of Dalum Papir A/S and Map Merchant from January 1, 2007.
For purposes of a more meaningful comparison with the 2006 results, the comments that follow and the changes in amounts and percentages in the table are calculated on the “Restated” 2007 results (which exclude the Dalum Papir A/S and MAP activities for 2007).
Gross operating profit is equal to Trading profit net of depreciation and amortization.

Net sales of Sequana Capital amount to € 4,042 million, with an increase of 1.6%. Despite higher raw material and energy prices, the gross operating profit grew by 5% over 2006 to € 205 million. The trading profit increased by 25% over 2006 to € 116 million, equivalent to an operating margin of 2.9%. The current profit rose to € 79 million, gaining 22% compared to 2006 (€ 65 million). The profit attributable to the equity holders of the company is € 153 million and equal to diluted earnings per share of € 3.1.

In 2007, Sequana Capital collected an earn-out of $115 million from Legg Mason for the sale of a 70.5% stake in Permal in November 2005. Sequana Capital sold Legg Mason an additional 5.36% interest in Permal for $78 million, reducing its own holding to 1%.
With regard to the legal action taken by the European Commission against Arjowiggins, the Court reduced the fine by € 42.5 million bringing it to € 141.8 million.

Net debt is equal to € 771 million at the end of December 2007 compared to € 376 million at December 31, 2006. The increase of € 395 million is mainly due to the acquisitions finalized during the year (€ 456 million), the definitive closing of the DG IV legal action (€ 62 million) and the dividend payout (€ 29 million), offset in part by the receipt of the “earn-out” on Permal (€ 137 million including securities sold) and the insurance payment for Fox River (€ 47 million).

The positive results reported by Sequana Capital are in contrast with the performance of the rest of the sector and reflect the unique positioning and effectiveness of the strategies adopted by the group. In a consolidating market and one which was affected by a sharp rise in costs, Sequana Capital has put into place decisive strategic actions aimed at growth.

Approximately € 500 million has been invested by Sequana Capital to place Antalis in the position of the undisputed leader in paper distribution in Europe (the world leader, excluding North America) and to build up Arjowiggins' business in high value-added products and in markets with strong growth.

The board of directors has decided to put forward a motion to the stockholders' meeting called for May 21, 2008 for the payment of dividends of € 0.7 per share (+17%).

(2.45% of ordinary capital stock)

Some of the main indicators of the Intesa Sanpaolo Group for 2007 are presented below.

€ in millions	2007	2006	Change Amount	Change %
Net operating income	**18,008**	17,915	93	0.5
Operating costs	**9,268**	9,628	(360)	-3.7
Operating margin	**8,740**	8,287	453	5.5
Net income – Group	**7,250**	4,707	2,543	54.0
Shareholders' equity – Group	**52,349**	33,702	18,647	55.3
Employees (number)	**96,198**	100,019	(3,821)	-3.8

The results for 2007 highlight **a positive performance**, achieved notwithstanding the negative effects of the financial markets crisis and benefiting only marginally, so far, from merger synergies.

The **Intesa Sanpaolo Group** registers a **net operating income** of € 18,008 million, a growth of 0.5% compared to € 17,915 million in 2006, originating from:

- **net interest income** of € 9,886 million, an increase of 11% compared to € 8,907 million in 2006;
- **net fee and commission income** of € 6,195 million, a 2.9% decrease from € 6,379 million in 2006. The reduction is almost entirely due to the commercial policy geared to the creation of value for customers made possible by the merger, with a decline in commissions on dealing and placement of securities and portfolio management (-9.8%) and current accounts (-9.2%), while growth is recorded in commissions on guarantees given (+14.9%) and the distribution of insurance policies (+4.6%);
- **profits on trading** of € 1,008 million, a decline of 44% compared to € 1,799 million. The decrease is affected mainly by the financial markets' crisis related to structured credit products (equal to € 500 million, of which approximately € 400 million is due to writedowns) and a lower contribution from nonrecurring items of approximately € 125 million (Borsa Italiana/LSE and Banco del Desarollo in 2007 compared to Fiat, Parmalat and IXIS in 2006);
- **income from insurance business**, relating to life and casualty insurance in which EurizonVita and the subsidiary EurizonTutela operate, totaling € 441 million, a decrease of 2% compared to € 452 million in 2006.

Operating costs amount to € 9,268 million, a decrease of 3.7% compared to € 9,628 million in 2006, due to reduced personnel expenses (-4,6%) following recoveries on employee termination indemnities of € 255 million owing to the new legislation which came into force in 2007 and reductions in administrative expenses for 1.2% and depreciation and amortization expenses for 7.3%.

The **operating margin** is € 8,740 million, an increase of 5.5% compared to € 8,287 million in 2006, with a cost/income ratio of 51.5% (a decrease from 53.7% last year).

Net income - Group is € 7,250 million, an increase of 54% compared to € 4,707 million in 2006, due to the combined effect of significant gains from the sale of Cariparma, FriulAdria and 202 branches to Crédit Agricole and three negative factors concentrated in the last quarter of the year:

- the adoption of a strict valuation policy for the assets which translates into prudent accruals and goodwill impairment on former Nextra both connected to the agreement with Crédit Agricole for an overall amount of € 280 million;

- a tax charge of approximately € 375 million due to the redetermination of deferred taxation;
- the contraction in profits on trading which in the last quarter recorded a negative balance of -€ 64 million owing to the negative contribution of approximately € 380 million in structured credit products, almost entirely due to writedowns.

At December 31, 2007, **total assets** of the Intesa Sanpaolo Group are € 572,902 million and **Stockholders' equity** is € 52,349 million.
Capital ratios at December 31, 2007 are: Core Tier 1 ratio at 5.9%, Tier 1 ratio at 6.5% and total capital ratio at 9%.

Loans to customers at December 31, 2007 are € 335,273 million (an increase of 4.4% over € 321,271 million at December 31, 2006). Non-performing loans are € 7,596 million, a decline of 0.5% compared to € 7,634 million in the prior year. In detail, doubtful loans increased from € 2,681 million to € 2,927 million, substandard/restructured loans decreased from € 3,830 million to € 3,702 million and past due positions and those over 180 days decreased from € 1,123 million to € 967 million.

Customer financial assets are € 1,005 billion, an increase of 1.8% compared to December 31, 2006 (direct customer deposits total € 374 billion, an increase of 2.9%, indirect customer deposits are € 658 billion, an increase of 1.3%, assets under management total € 265 billion, a decline of 9.6%, assets under administration and in custody are € 393 billion, a growth of 10.3% and new business for life policies amounts to a total of € 9.3 billion).

The Group's **net risk exposure** to structured credit products with underlying US subprime assets is actually negative – for € 49 million – at December 31, 2007, a result of a “long” position of € 73 million and a “short” position of € 122 million.

At December 31, 2007, the Intesa Sanpaolo Group's **operating structure** (which does not yet include the contribution by Carifirenze, which control was acquired in January 2008) has a total network of 7,329 branches - of which 6,050 in Italy and 1,279 abroad – with about 96,000 employees.

The management board of Intesa Sanpaolo approved the motion for the distribution of dividends (€ 0.38 for each ordinary share and € 0.391 for each savings share) to be submitted for approval to the ordinary stockholders' meeting to be held on April 30, 2008.

SGS

(15% of capital stock through Ifil Investissements)

The highlights of the consolidated results of the SGS Group in 2007 are as follows:

			Change	
CHF in millions	**2007**	2006	Amount	%
Sales	**4,372**	3,821	551	14.4
Operating profit	**690**	624	66	10.6
Profit attributable to the equity holders of the company	**500**	443	57	12.9
Consolidated net financial position	**378**	216	162	-75.0

The sales of the Group increased in 2007 to CHF 4.37 billion, gaining 12.8% over the prior year (at comparable exchange rates). This growth was achieved thanks to the favorable market context which characterized the Group's portfolio. The organic growth for 2007 (12%) was driven by an investment policy focused on expanding the services offering and extending the geographical coverage to support client needs. A further 1% growth in sales can be ascribed to the acquisitions finalized during 2007.

The operating profit went from CHF 624 million to CHF 690 million, with an increase of CHF 66 million (+10.6%). The operating profit before nonrecurring items amounts to CHF 711 million (an increase of CHF 106 million, or 17.5%, compared to 2006) with significant gains in the results of the divisions of Agricultural, Oil Gas & Chemicals, Consumer Testing and Governments & Institutions which benefited from higher volumes, a more favorable mix of services and a better geographical distribution of sales.

The profit attributable to the equity holders of the company rose to CHF 500 million, with an increase of 12.9% compared to 2006.

The consolidated net financial position at December 31, 2007 shows a cash position of CHF 378 million. During 2007, net investments were made for CHF 271 million, acquisitions for CHF 72 million, treasury stock buybacks for CHF 8 million and dividend payouts for CHF 178 million.

The SGS Group continues to focus on growth. Market conditions in 2007 did not allow the group to conclude important acquisitions owing to high asking prices. Better conditions are anticipated for 2008 in which the SGS Group forecasts a growth in sales and profits compared to 2007.

The stockholders' meeting approved the distribution of dividends for CHF 35 per share: the dividend per ordinary share is CHF 25 (38.5% of profit) and the remaining CHF 10 takes into account the group's solid equity structure and its future capacity to generate cash flows and profits.

(100% of capital stock)

In the year 2006/2007, Alpitour Group delivered remarkable profit and financial gains. The efforts by management and its employees, the effectiveness of actions aimed at its reorganization, restructuring and redefinition of the business model undertaken in the last two years have triggered a turnaround in the economic and balance sheet results of the group guaranteeing, among other things, the return to a net cash position at the end of the year.
The investments planned and the development of new business areas are the cornerstone for further strengthening the group's leadership position in the Italian tourism market and thus represents a solid basis on which to build the further future growth of the nation's top tourist operator.

The market in 2006/2007 displayed a good trend during the holidays and over Christmas and, in general, for long-haul destinations, countered by a slowdown which featured in the summer season. Notwithstanding, the consolidated financial statements of the Alpitour Group for the year ended October 31, 2007 record an improvement in absolute terms in all the profit and equity indicators, which can be summarized as follows:

			Change	
€ in millions	**2006/2007**	2005/2006	Amount	%
Net sales	**1,236.0**	1,332.2	(96.2)	-7.2
Contribution margin	**211.0**	204.1	6.9	3.4
Profit from ordinary operations	**24.4**	21.4	3.0	14.2
Profit attributable to the equity holders of the company	**7.5**	3.0	4.5	148.2
Equity attributable to the equity holders of the company	**78.8**	71.2	7.6	10.7
Consolidated net financial position	**17.3**	(29.1)	46.4	n.s.

Net sales for the year 2006/2007 amount to € 1,236 million, compared to € 1,332.2 million reported in the prior year. For purposes of a more meaningful comparison, it should be noted that in the previous year, net sales included revenues of € 142.6 million from the “Turin Winter Olympics 2006” event. Excluding the effect of the revenues from that event, the net sales of the Group for 2006/2007 would have been 3.9% higher than for the same period of 2005/2006 largely owing to the Incoming and Aviation divisions, which significantly increased sales transactions with third-party operators to a high degree.

The contribution margin shows an improvement of € 6.9 million in amount (from € 204.1 million in 2005/2006 to € 211 million in 2006/2007) and represents 17.1% of sales (15.3% in the prior year). This positive performance was considerably impacted by lower costs for services as a result of pursuing policies to rationalize direct costs and render them more flexible (reduction of commitments for guarantees) and putting into place sales policies that favor margins partly at the expense of volumes.

The profit from ordinary operations increased from € 21.4 million in 2005/2006 to € 24.4 million in 2006/2007. The improvement is due to the combined effect of a better contribution margin, lower rent and lease costs, net of higher personnel costs.

The result is a profit attributable to the equity holders of the company of € 7.5 million. This is a notable improvement over € 3 million in the prior year.

Equity attributable to the equity holders of the company rose from € 71.2 million (at October 31, 2006) to € 78.8 million (at October 31, 2007) mainly due to the effect of the profit for the year attributable to the equity holders of the company.

For the first time in ten years, the consolidated net financial position at October 31, 2007 is a cash position of € 17.3 million compared to a net borrowings position of € 29.1 million at October 31, 2006. The positive change of € 46.4 million reflects both the cash flows provided during the year and the improvement in working capital, in addition to the financial effects produced by the receipt of proceeds of € 17 million on the sale of the hotel resort "Kelibia Beach S.A.".

Consolidated sales by division of the Alpitour Group are as follows:

€ in millions	**2006/2007**	2005/2006	Change	
			Amount	%
Tour operating	**879.8**	900.9	(21.1)	-2.3
Hotel	**112.8**	112.4	0.4	0.3
Incoming	**274.1**	260.6	13.5	5.2
Aviation	**153.7**	155.8	(2.0)	-1.3
Distribution	**34.3**	31.1	3.2	10.2
Incentive e Grandi Eventi	**28.6**	172.1	(143.5)	-83.4
Total	**1,483.2**	1,632.9	(149.7)	-9.2
Elimination of intragroup transactions	**(247.2)**	(300.7)	53.5	-17.8
Total	**1,236.0**	1,332.2	(96.2)	-7.2

The Tour Operating business in 2006/2007 reports a contraction in volumes of approximately 6%; the number of passengers, in fact, decreased to 895 thousand from 954 thousand in 2005/2006. Sales, which also comprise the sales of Alpitour Reinsurance, consequently displayed the same trend, although to a lesser degree (-2.3%), arriving at € 879.8 million (€ 900.9 million in 2005/2006). Besides an overall slowdown in demand, these trends have also been influenced by sales policy decisions targeting margins at the expense of sales volumes. Bearing this in mind, the sales mix exhibited a favorable portfolio on long-haul destinations (the Orient and America) to the detriment of destinations featuring average sales prices that are considerably lower (the Canary Islands, the Balearic Islands and Mediterranean Africa).

The Hotel sector recorded sales basically in line with the preceding year (€ 112.8 million in 2006/2007 against € 112.4 million in 2005/2006), including € 41.7 million from tour operators of the group. The excellent sales trend of the Maldives as a destination and the positive effects of the development of the Alpitour World Hotels & Resorts on the Italian market more than offset the impact of excluding the two Tunisian structures from the scope of consolidation when they were sold in September 2006.

The foreign hotel resorts owned, currently marketed under the brands "Villaggi Bravo" by Alpitour and "Sea Club" by Francorosso, reported a presence of 467 thousand during 2006/2007. The Italian hotels operated by Alpitour World Hotels & Resorts registered a presence of 1,241 thousand during the same year, up 6.9% compared to 1,161 thousand in the previous year, mainly due to the positive performance of the four 4-star hotels located in Rome and the opening of a new hotel in Baia di Tindari (ME) in June 2007.

The Aviation division, headed by the Neos airline company, reported sales of € 153.7 million in 2006/2007 (€ 155.8 million in 2005/2006), including sales of € 91.1 million with the group. The year just ended was characterized by the consolidation and further growth of long-haul operations with the addition of new destinations (Brazil, the Seychelles Islands and the Dominican Republic), as well as the acquisition of traffic on behalf of third parties.

The Distribution sector operates through the Welcome Travel Group's network which manages 653 agencies: 59 owned, 32 partnerships, 549 affiliates and 13 full franchising.
During the year 2006/2007, Welcome Travel Group reported sales of approximately € 34.3 million through its direct network, up from € 31.1 million in the prior year.

The Incoming sector (Jumbo Tour Group) registered sales of € 274.1 million during 2006/2007 (€ 260.6 million in 2005/2006), of which € 94.1 million with the Alpitour Group. The increase in sales of 5.2% is mainly the result of the strong growth in volumes from third-party operators.

Finally, for M.I.C.E. (Meeting Incentive Convention Events), the year 2006/2007 featured the continuation of a weak demand. Division sales stand at € 28.6 million, while the number of passengers/clients is approximately 30,743.
For purposes of a meaningful comparison, it should be noted that sales in the prior year included sales of € 142.6 million recorded by Jumbo Grandi Eventi (which was sold in September 2006) and, in February 2006, had provided accommodation services to the entire Olympic family.

(60% of capital stock)

The following data and comments are taken from the first-half report for the financial year 2007/2008.
Since Juventus Football Club's financial year ends on June 30 of every year, and in view of the highly seasonal nature typical of this sector, the data presented should not be construed as representing the basis for a full-year projection.

€ in millions	**I Half 2007**	I Half 2006	Change
Operating revenues	**106.8**	101.5	5.3
Operating income	**5.8**	20.2	(14.4)
Net income (loss)	**0.3**	15.4	(15.1)

	12/31/2007	6/30/2007	Change
Shareholders' equity	**116.4**	116.3	0.1
Net financial position	**7.1**	21.7	(14.6)

In the first half of the year 2007/2008, Juventus Football Club recorded operating revenues of € 106.8 million, an increase of € 5.3 million (+5.2%) compared to the same period of 2006/2007. This increase is mainly due to higher revenues from games, radio and television rights and media income, sponsorships and advertising for a total of € 29.6 million, in addition to lower income from the management of players' registration rights for € 22.3 million and lower other income for € 2 million.

Operating costs in the first half of 2007/2008 totaling € 86.3 million rose by € 15 million from € 71.2 million in the same period of 2006/2007. The increase can mainly be attributed to contract renewals for some players and new contracts signed during the first phase of the Transfer Campaign 2007/2008.

In the first half of 2007/2008, amortization and writedowns of players' rights are € 13.3 million, an increase of € 3.3 million compared to 2006/2007 (€ 10 million), basically due to the net investments made during the transfer campaign 2007/2008.

The net income for the first half of 2007/2008 amounts to € 0.3 million and shows a contraction of € 15.1 million compared to € 15.4 million in 2006/2007, primarily as a result of the above operating costs.

The net financial position at the end of December 2007 is a cash position of € 7.1 million and is lower than the cash position of € 21.7 million at June 30, 2007.

With regard to significant events subsequent to December 31, 2007, these are described in the following paragraphs.

On January 29, 2008, the Mediaset Group exercised the option rights acquired on December 23, 2005 under the agreements for the broadcasting, using any distribution platforms, of home games of the Italian Championship, for Italy (encrypted) and for the rest of the world (also free-to-air) and television broadcasting of a friendly trophy and other rights. As a result of exercising the option rights, the existing contracts will be extended to the 2009/2010 sports season with payment of consideration to Juventus Football Club for that season of a total € 112 million, which will be paid in monthly installments.

On February 1, 2008, the Gazzetta Ufficiale, Issue 27, published Legislative Decree 9 dated January 9, 2008 which governs the ownership and marketing of audiovisual sports rights and the relative distribution of the resources.

The law confirms the validity of contracts in existence up to June 30, 2010.
The company has a commitment with the *Lega Nazionale Professionisti* to collaborate in defining the law during the transition period and also in establishing the guidelines for the marketing of audiovisual rights.

In its meeting held on March 18, 2008, the Juventus Football Club S.p.A. board of directors approved the Stadium Project for the construction of a new stadium that will be built on the site of the present Stadio Delle Alpi for a total estimated investment of € 105 million.
The board of directors has delegated the chief executive officer and general manager, Jean-Claude Blanc, to fulfill all the activities and acts necessary or opportune for the purpose of completing the Project which, in any case, does not envisage a capital increase, including a verification of the feasibility, particularly from an administrative standpoint, and dealing with the competent authorities.

On March 20, 2008, Juventus Football Club S.p.A. and Sportfive Italia S.r.l. sealed a long-term strategic commercial alliance for the exclusive naming and partial promotional and sponsor rights relating to the new stadium.
Sportfive Italia S.r.l., part of the Lagardère Sports Group, the European leader in sports-right marketing, decided to enter into this agreement also in consideration of the strength and international value of the Juventus brand and also to be part of the new stadium project. According to the agreement, Sportfive Italia is entitled to exclusively sell the naming right of the new stadium and to market part of the sky boxes and VIP seats.
The partnership will last until the end of the twelfth year after completion of the construction of the new stadium, currently estimated to be ready in the sports season 2011/2012; therefore the ending contract date should be June 30, 2023.
The agreement provides for base compensation of € 6.25 million per year for 12 years that will be paid during the period of the agreement. The agreement also provides for relevant payments in connection with the construction of the new stadium.

Ifil Investissements S.A. (Luxembourg)

(100% of capital stock directly and through Ifil Investment Holding)

The highlights of the separate financial statements at December 31, 2007, prepared under the laws of Luxembourg, are as follows:

€ in millions	**2007**	2006	Change
Profit for the year	**136.5**	675.8	(539.3)
Equity	**2,469.4**	2,332.9	136.5

ANNUAL REPORT 2008

Report on Operations

Separate Financial Statements of IFIL S.p.A. at December 31, 2008

Consolidated Financial Statements of the IFIL Group at December 31, 2008

This is an English translation of the Italian original document "Relazione Finanziaria 2008" approved by the EXOR S.p.A. board of directors on March 25, 2009 which has been prepared solely for the convenience of the reader.
The version in Italian takes precedence and for complete information about EXOR S.p.A. and the Group, reference should be made to the full original report in Italian "Relazione Finanziaria 2008" containing the Report on Operations and the Separate and Consolidated Financial Statements.

The report is available on the website at http://www.exor.com

INTRODUCTION

On February 20, 2009, the deed was signed for the merger by incorporation of IFIL Investments S.p.A. in IFI – Istituto Finanziario Industriale S.p.A., which assumed the new name of EXOR S.p.A.; the merger is effective from March 1, 2009.

On the same date, the board of directors and the board of statutory auditors of the merged company resigned.

This Annual Report 2008 of IFIL Investments S.p.A. was approved by the board of directors of EXOR S.p.A., the surviving company, in its meeting held on March 25, 2009.

The merger will not modify the Group's programs as EXOR, which already had control of IFIL, will continue the investment activities.

The following are the main investments (held previously by IFIL) and which, as a result of the merger, are now held directly or indirectly by EXOR.

Fiat S.p.A. (about 30% of ordinary and preferred capital stock) is listed on the Electronic Share Market of the Italian Stock Exchange (Blue Chip segment). Founded in 1899, the Fiat Group operates in the sectors of automobiles (Fiat, Lancia, Alfa Romeo, Abarth, Ferrari, Maserati and Fiat Veicoli Commerciali), agricultural and construction equipment (Case and New Holland), trucks and commercial vehicles, buses and special-purpose vehicles (Iveco, Irisbus, Astra and Magirus) and components and production systems (Fiat Powertrain Technologies, Magneti Marelli, Teksid and Comau); it is also active in publishing and communications (La Stampa and Publikompass). Other sectors also offer financial services to the sales networks and the clientele in addition to rental services to customers.

SGS S.A. (15% stake of capital stock) is a Swiss company listed on the Virt-x market. Founded in 1878, the company is today the global leader in verification, inspection, control and certification activities with more than 55,000 employees and a network of more than 1,000 offices and laboratories throughout the world.

Cushman & Wakefield (71.81% of capital stock) is the largest privately held company for real estate services. The C&W Group has its headquarters in New York, where it was founded in 1917, and now has 227 offices and 15,000 employees in 59 countries.

Intesa Sanpaolo S.p.A. (1% of ordinary capital stock) is listed on the Electronic Share Market of the Italian Stock Exchange (Blue Chip segment). It is one of the most important banking groups in Europe and is the foremost bank in Italy with an approximate 20% market share on average in all segments of business (retail, corporate and wealth management).

Alpitour S.p.A. (100% of capital stock) is the largest integrated group in the tourist sector in Italy. It operates with 3,500 employees and has more than 2.4 million customers across all areas of the tourism business: Tour Operating (Alpitour, Francorosso, Viaggidea, Villaggi Bravo, Volando and Karambola), Hotels (Alpitour World Hotel & Resorts), Incoming (Jumbo Tours), Aviation (Neos), Distribution (Welcome Travel Group) and Incentive & Eventi (A World of Events).

Gruppo Banca Leonardo S.p.A. (9.76% of capital stock) is a privately held and independent investment bank offering a complete range of services in investment banking, wealth management, private equity and other activities connected with the financial markets.

Juventus Football Club S.p.A. (60% of capital stock) is listed on the Electronic Share Market of the Italian Stock Exchange (Star segment). Founded in 1897, it is one of the most prominent professional soccer teams in the world.

Vision Investment Management Limited, founded in 2000, is one of the most important hedge fund managers specialized in Asian markets.
Five-year bonds issued by Perfect Vision were subscribed to in April 2008. The bonds give mandatory conversion into shares at maturity which will deliver a 40% stake in Vision Investment Management.

Sequana S.A. (26.65% of capital stock) is a diversified French paper group, listed on the Euronext market, with production and distribution activities operating through:

- **Arjowiggins S.A.** (100% holding), the world leader in the manufacture of high value-added paper products, with 7,300 employees in 82 countries;

- **Antalis S.A.** (100% holding), the leading European group in the distribution of paper and packaging products, with over 7,900 employees in 55 countries.

Banijay Holding S.A.S. (17.17% of capital stock with voting rights) is headquartered in Paris. The company is a new player in European TV production with a strategy aimed at rapid external growth through the acquisition of companies specialized in the production of TV formats and content for distribution via TV, Internet and mobile phones.

For additional information please refer to the Annual Report 2008 of EXOR S.p.A. which is available on the company's website at http://www.exor.com.

Board of Directors [a]

Chairman	John Elkann

Following the merger by incorporation in IFI – Istituto Finanziario Industriale S.p.A. (now EXOR S.p.A.), IFIL S.p.A.'s profit for the year 2008 is entirely allocated to reserves.

CORPORATE GOVERNANCE

In its meeting held on March 25, 2009, the EXOR S.p.A. board of directors approved, among other things, the "Report on Corporate Governance, the Code of Conduct and the stockholder structure" prepared in accordance with art. 89-bis of the Consob Regulation for Issuers and art. IA.2.6 of the Instructions to the Market Rules.

In view of the fact that the merger is now effective, the Report is composed of three sections: the First Section describes the Corporate Governance, the adoption of the codes of ethics and the EXOR stockholder structure as of the date of the Report; the Second Section describes the Corporate Governance, the adoption of the codes of ethics and the stockholder structure of the surviving company IFI during 2008; the Third Section describes the Corporate Governance, the adoption of the codes of ethics and the stockholder structure of the merged company IFIL during 2008. The Report also contains information relating to Direction and Coordination activities.

The Report is available on the website www.exor.com.

MAIN RISKS AND UNCERTAINTIES TO WHICH EXOR S.p.A. AND COMPANIES IN CONSOLIDATION ARE EXPOSED

As a result of the merger by incorporation, the risks profile of the merged company IFIL S.p.A., exactly coincides with that of the surviving company EXOR S.p.A.. Therefore, reported below is the specific section taken from the Report on Operations 2008 of EXOR S.p.A..

Risks associated with general economic conditions

EXOR's earnings and financial position and those of its main subsidiaries are influenced by various macro-economic factors – including increases or decreases in gross national product, the level of consumer and business confidence, changes in interest rates on consumer loans, the cost of raw materials and the rate of unemployment – existing in the various countries in which they operate. During 2008, and particularly in the last quarter, the financial markets were affected by high levels of volatility with significant impacts on many financial institutions and, more generally, on the overall performance of the economy. The significant and widespread deterioration of trading conditions has been compounded by a severe tightening of credit in all major markets, both at the consumer and corporate level, and has begun to create a shortage of liquidity which will ultimately impact the industrial development of the sectors in which EXOR operates and its main holdings.

A growing weakening in the general condition of the economy and in the industries in which the main holdings operate combined with a progressive deterioration of financial markets and a contraction in consumers' available income are reflected, particularly since the third quarter of 2008, in a significant decline in demand in EXOR's key markets.

There can be no certainty that measures taken by governments and financial authorities in response to this situation will succeed in re-establishing the conditions necessary to overcome this situation in a reasonable time. Therefore, uncertainty remains as to the period of time necessary to restore normal trading conditions and many countries are aware that their economies could undergo a severe and protracted recession.

Should the current weakness and uncertainty continue for a sufficiently long period, EXOR's business, strategy and future prospects and those of its main subsidiaries could be negatively affected with consequent negative impacts on its earnings and financial position.

Risks associated with EXOR's activities

EXOR conducts investment activities which involve normal risks such as high exposure to certain sectors or investments, difficulties in identifying new investment opportunities that meet the characteristics of the company's objectives or difficulties in disposing of investments owing to changes in general economic conditions. The potential difficulties connected with making new investments such as unexpected costs or liabilities could have an adverse effect on the company's earnings and financial position.

The ability to access capital markets or other forms of financing and the related costs are dependent, among other things, on the company's credit rating.
Any downgrade by the rating agencies could limit the company's ability to access capital markets and increase the cost of capital, with a consequent adverse effect on its earnings and financial position.
On September 9, 2008, following the announcement of the guidelines for the merger by incorporation of the subsidiary IFIL in IFI, now EXOR, the Standard & Poor's rating agency stated that IFIL's rating and outlook (BBB+/Stable/A-2) remained unchanged and that, when the merger was finalized, it expected to assign EXOR the same ratings.

EXOR's policy and that of the companies in the “Holdings System” is to keep liquidity in demand or short-term deposits and readily negotiable money market instruments and bonds, allocating such investments over an appropriate number of counterparts, with the principal purpose of having investments which can readily be convertible into cash.
The counterparts are chosen according to their creditworthiness and reliability.
However, in consideration of the current financial crisis, market conditions which might negatively affect the normal operations of financial transactions cannot be excluded.

EXOR's earnings not only depend on the market value of its main holdings but also on the dividends they pay and, in the end, reflect their earnings and financial performance and investment and dividend payment policies. A deterioration in the financial market condition and the earnings of the main holdings could affect EXOR's earnings and cash flows.

EXOR mainly operates through its investments in subsidiaries and associates in the motor vehicle market (Fiat Group), in real estate services (C&W Group), in paper (Sequana Group), in tourism (Alpitour Group) and in professional soccer (Juventus F.C.). As a result, EXOR is exposed to the typical risks of the markets and industries in which such holdings operate.

At December 31, 2008, the investment in Fiat (equal to 30.45% of ordinary capital stock and 30.09% of preferred capital stock) represented more than approximately 40% of the current value of EXOR's investment portfolio, calculated on the basis of the Net Asset Value (NAV) described on page 8.
Therefore, the performance of the Fiat Group has a very significant impact on EXOR's earnings and financial position.

EXOR and its subsidiaries and associates are exposed to fluctuations in currency and interest rates and use financial hedging instruments, compatible with the risk management policies adopted by each of them. Despite these hedging transactions, sudden fluctuations in current or interest rates could have an adverse effect on EXOR's earnings and financial position.

The subsidiaries and associates are generally exposed to credit risk which is managed by specific operating procedures. Given its activities, EXOR is not significantly exposed to such risk.

EXOR and its subsidiaries and associates are exposed to risks connected with the outcome of pending litigation for which it sets aside, where necessary, specific risk provisions. However, negative effects on the earnings and financial position of EXOR and/or its subsidiaries and associates connected with such risks cannot be excluded.

The following paragraphs indicate the main specific risks and uncertainties of the companies in consolidation (Cushman & Wakefield Group, Alpitour Group and Juventus F.C.).

Cushman & Wakefield Group (C&W)

The operations of the C&W Group are directly influenced by the general economic scenario and the international and local real estate business and the political situations in the countries in which it operates.

The economic factors which influence operations are the general economic situation, employment levels, interest rates, access to credit to fund transactions and the effects of tax and regulatory policies. Economic recession, increases in interest rates or declines in demand in the real estate sector could have a negative effect on the earnings and financial position of the C&W Group. These adverse conditions would also affect commission fees, which vary in relation to the revenues of the C&W Group. Brokers, in fact, are generally paid on the basis of commissions and compensation correlated to the group's revenues. Consequently, a negative effect on operating margins due to the deterioration of market conditions is partly offset by such a correlation.

During 2008, the earnings of the C&W Group were adversely affected by a weak economy, a decline in confidence by operators and by a continuing worsening of the credit market. Deeming that such negative economic trend will continue into 2009, the C&W Group has initiated a series of measures to eliminate inefficiencies and bring structure costs in line with the current operating situation. Such measures, combined with investments to purchase new market share and talent, will put the C&W Group in a good position when the markets regain vigor.

Management of the C&W Group intends to continue its strategy to diversity by type of service and geography in order to reduce its exposure to the variability of the results of individual factors.

Alpitour Group

The trend in demand for tourism packages is always acutely affected by outside factors such as political risks (conflicts, institutional changes, unilateral acts of government and terrorism), natural disasters and the international economic situation.

The international political situation, especially in situations of war and terrorism threats, could bring about a contraction in the demand for the services offered by the Alpitour Group. Areas located in countries under development or plagued by unstable political and social instability, for example in Kenya, Zanzibar, Madagascar, Egypt and the Middle East, are clearly more exposed to this type of risk.

Another risk factor is caused by the ravages of weather such as tsunamis, hurricanes and earthquakes which could cause a sharp decline in the demand for tourism services to the destinations hit.

In the past, the Alpitour Group has had to confront some of those risks (tsunamis, terrorist attacks and international political and economic crises) which produced a contraction in tourist flows to certain destinations and imposed a temporary closing on others. On those occasions, the Alpitour Group embarked on a series of corrective actions aimed at the diversification of the product portfolio, redirection of clients to new destinations, re-contracting with local suppliers and promotional sales campaigns. These actions, having had an impact on costs, negatively and temporarily affected profitability, without prejudicing Alpitour Group's financial soundness.

The Alpitour Group mostly operates with Italian clientele in that the product offered features qualitative standards that mirror the expectations and requirements of Italian demand. Therefore, the business is strongly influenced by domestic economic conditions and the highly season nature of activities which means that the majority of revenues is concentrated in the summer season.

The normal activities of the Alpitour Group use services provided by third parties, mainly suppliers of air and hotel services and travel agencies whether individual or part of networks. The risk that such services will not be rendered efficiently and without interruption could compromise the earnings of the Alpitour Group and damage its image.
Through its vertical integration, the presence of all the links in the tourism chain, the diversification of key suppliers and the specific sales policies geared to sustaining demand in the low season, the Alpitour Group has laid the groundwork for managing and minimizing such risks.

The tourism sector is strongly anchored to information technology processes which cover the entire business cycle starting from the booking system. The risk of the interruption, even temporarily, of information systems could cause difficulties in operations and supplying services to clients.

By continually updating and providing maintenance to its systems and designing specific disaster recovery plans, as well as writing commercial contracts with leading suppliers of substitute technologies, the Alpitour Group has undertaken the actions necessary to monitor and meet such risks.

Juventus F.C.

In the short term, the earnings and financial position of Juventus F.C. should not be significantly influenced by the current economic crisis since the principal revenue items are for the most part generated by existing multi-year contracts. However, if the weak and uncertain situation continues, the activities, strategies and prospects of the company could be negatively affected especially by the radio and TV rights market (for which the National Professional League is in the process of defining and approving the guidelines which will orient sales at a centralized level assisted by the Infront advisor), sponsorships (renewal of the most important sponsorship) and relative expected revenues from the new stadium project.

Juventus F.C. uses players' registration rights as its main productive factor. Sports activities are subject to risks connected with the physical condition of the players so that any injuries at any point in time could significantly affect the earnings and financial position of Juventus F.C..
Moreover, since activities are centered around the exploitation of the brand and the image of Juventus F.C., events that could reduce their commercial value could have an adverse effect on earnings at any time.
Sports results are also influenced by participation in the different sports events, particularly the UEFA Champions League, therefore not qualifying would have a negative effect effect on Juventus F.C.'s earnings plans.
Lastly, Juventus F.C. has an intangible asset with an indefinite useful life (Library). Its ability to produce earnings could be negatively affected by the economic situation and require an impairment adjustment to be recognized in the financial statements.

Fiat Group

The investment in the Fiat Group is accounted for in the EXOR Group's consolidated financial statements by the equity method (please refer to Notes 5 and 42 to the consolidated financial statements for this purpose). Therefore, the Fiat Group is not included among the companies in consolidation.

Nevertheless, to complete the information presented in this section, the 2008 Report on Operations of the Fiat Group expounded on the exposure to risks in connection with the following:

- general economic conditions
- results of the group
- financing requirements
- group's credit ratings
- fluctuations in currency and interest rates
- policy of targeted industrial alliances
- relationships with employees and suppliers
- management
- high level of competitiveness in the sectors in which the group operates
- sales in international markets and exposure to changes in local conditions
- environmental regulation

Additional information is provided in the 2008 Report on Operations of the Fiat Group, to which reference can be made, which is also available on the website www.fiatgroup.com.

MAJOR EVENTS IN 2008 AND IN THE FIRST TWO MONTHS OF 2009

Subscription to bonds convertible into Vision Investment Management shares

On February 20, 2008, the subsidiary Ifil Investissements S.A. reached an agreement to invest $90 million in 5-year bonds issued by Perfect Vision Ltd with a mandatory conversion into shares at maturity which at the time of conversion will be equal to a 40% holding in the capital stock of Vision Investment Management Limited (Vision), one of the most important alternative asset managers in Asia.
The transaction was executed on April 11, 2008, once approval was obtained from the relevant authorities, for an investment of € 58.1 million. The bonds will guarantee Ifil Investissements a fixed annual yield of 5% until conversion at maturity in spring 2013.

Vision was founded in June 2000 by Jerry Wang, one of the pioneers of the sector in Asia. Vision launched its benchmark product, Vision Asia Maximus Fund, in 2002 and since then has become one of the largest local managers of hedge funds specialized in Asian markets.

The financial resources from the bonds have mainly been used by Vision management to buy back treasury stock from a group of the company's founding financial investors – which held 32% of ordinary capital stock issued by Vision – and to ensure future resources to sustain the development plan in the alternative asset management sector in Asia. Vision management and employees will remain the largest stockholders of the company with a controlling stake.

Investment in Banijay Holding S.A.S. (formerly Mangas Capital Entertainment)

In May 2008, Ifil Investissements reached an agreement to invest € 42.5 million in Banijay Holding S.A.S. (BH) aimed at launching a new player in European TV production.
BH is headquartered in Paris and was founded at the end of 2007 by media entrepreneur Stéphane Courbit, who has an established track record of success in the development of TV formats and the production of audiovisual content.
The investment falls under the framework of a capital increase designed to inject resources in BH for a total amount of approximately € 250 million to financially support BH's medium-term development plans. These entail rapid growth by way of acquisitions of companies specializing in the origination and production of TV formats and content for distribution across a range of media including TV, Internet and mobile phones.

Ifil Investissements' total commitment is equal to € 42.5 million, of which € 21.4 million was paid when the operation was closed at the end of May 2008. Ifil Investissements holds a 17.03% stake in BH (17.17% of capital stock with voting rights) and is represented on the board of directors of the company in which Stéphane Courbit is the chairman and chief executive officer.

Increase in the investment in C&W Group Inc.

On June 27, 2008, Ifil Investissements S.A. purchased 14,538 C&W Group Inc. shares (2.05% of capital stock), carried as treasury stock by the company, for an investment of € 11.6 million.
Currently, Ifil Investissements holds 511,015 C&W Group Inc. shares representing a 71.81% stake in its capital stock.

Other investments

As a result of investment commitments in the NoCo B LP limited partnership, which groups a series of funds managed by Perella Weinberg Partners L.P., during the first half of 2008, Ifil Investissements invested $16.4 million (€ 11 million) and € 1.1 million directly in the Perella Weinberg Real Estate I fund.
At December 31, 2008, the remaining investment commitments in NoCo B LP amount to $46.2 million and € 23.9 million.

Partial sale of the investment in Intesa Sanpaolo S.p.A.

In the second half of 2008, IFIL S.p.A. sold 171,916,165 Intesa Sanpaolo ordinary shares (1.45% of ordinary capital stock) on the market for net proceeds of € 598.4 million and an after-tax gain of € 74.5 million on consolidation (€ 167.5 million in the separate financial statements).

After these sales, IFIL S.p.A. holds 118,000,000 shares equal to 1% of the ordinary capital stock of Intesa Sanpaolo S.p.A..

Purchases of treasury stock

Under the Program for the buyback of ordinary and savings treasury stock voted by the IFIL S.p.A. board of directors on February 18, 2008, during the period February 26, to August 18, 2008, purchases were made for 20,783,200 IFIL ordinary shares (2% of the class of stock) at the average price per share of € 4.8 totaling € 99.8 million, in addition to 917,000 IFIL savings shares (2.45% of the class of stock) at the average cost per share of € 4.3 totaling € 3.9 million, for a grand total of € 103.7 million (69.13% of the maximum disbursement of the € 150 million authorized for the buyback Program).

At December 31, 2008, IFIL S.p.A. held directly and indirectly the following treasury stock:

		% of class	Amount	
	Number of	stock	Per share (€)	Total (€ ml)
Ordinary shares, held by IFIL S.p.A.	33,186,198	3.20	4.38	145.5
Ordinary shares, held by the subsidiary Soiem S.p.A.	810,262	0.08	3.41	2.8
Total ordinary shares held	33,996,460	3.28	4.36	148.3
Savings shares, held by IFIL S.p.A.	917,000	2.45	4.30	3.9
Total treasury stock	**34,913,460**	-		**152.2**

Loan made to the parent, IFI S.p.A.

On October 10, 2008, IFIL granted the parent, IFI, a loan up to a maximum amount of € 200 million which bears interest at the 1-month Euribor with a spread of 0.1%. In the current situation of the markets, this transaction enabled IFIL to eliminate the counterpart risk on that amount, with an interesting remuneration.
Since this is a transaction between related parties, as established in the rules of Corporate Governance of the two companies, the transaction was approved beforehand by the respective boards of directors on October 10, 2008.
At December 31, 2008, the financial receivable from the parent, IFI, amounts to € 199.5 million, including accrued interest.

Merger by incorporation of IFIL S.p.A. in IFI S.p.A.

In line with the announcement to the market in the press releases on September 8, and September 10, 2008, the boards of directors of IFI and IFIL on September 23, 2008 unanimously approved the Merger Project for the incorporation of the subsidiary IFIL in IFI, confirming the exchange ratios approved in the merger guidelines on September 8 which called for (settlements in cash are not envisaged):

- 0.265 of a new IFI ordinary share of par value € 1 each for 1 IFIL ordinary share of par value € 1 each;
- 0.265 of a new IFI savings share of par value € 1 each for 1 IFIL savings share of par value € 1 each.

The boards of directors were assisted by their respective financial advisors, Leonardo & Co. for IFI and Goldman Sachs International for IFIL, which issued fairness opinions on the fairness of the exchange ratios from a financial standpoint and issued documents on the valuation.

As established by existing law, the experts appointed pursuant to art. 2501-sexies of the Italian Civil Code, that is, the audit firms of Reconta Ernst & Young S.p.A. for IFIL and KPMG S.p.A. for IFI, both assigned by the Turin Court on September 17, 2008, issued their reports on the fairness of the exchange ratios on October 28, 2008.

On October 28, 2008, the special sessions of the stockholders' meetings of IFIL and IFI were convened for December 1, 2008 to resolve on the merger and documentation relating to the merger was filed at the corporate headquarters and at Borsa Italiana S.p.A. which includes:

- the Merger Project;
- the descriptive Reports of the boards of directors of IFIL and IFI, prepared in accordance with art. 2501-quinquies of the Italian Civil Code;
- the Reports of the Experts on the fairness of the share exchange ratio, prepared in accordance with art. 2501-sexies of the Italian Civil Code by Reconta Ernst & Young S.p.A. (for IFIL) and KPMG S.p.A. (for IFI).

On November 21, 2008, the Information Document relating to the transaction, prepared in accordance with article 70, paragraph 4 and article 71-bis of Consob Regulation 11971, was made available to the public.

The special session of the stockholders' meeting of IFI, which met on December 1, 2008, approved the Merger Project and, consequently, approved a capital increase to service the merger for a maximum nominal amount of € 82,978,443 by issuing a maximum of 73,809,549 ordinary shares and a maximum of 9,168,894 savings shares of par value € 1 each with dividend rights equal to those of the stock outstanding at the date of the effectiveness of the Merger.

The special session of the stockholders' meeting of IFI also approved, with effect from the date the merger became effective, the new text of the bylaws which provides, among other things, for the company’s name to be changed to “EXOR S.p.A.”, the elimination of the restrictions on the transfer of ordinary shares, the provisions regarding representation in stockholders’ meetings following the listing of the ordinary shares, the increase in the maximum number of members of the board of directors to 19 and the change in the term of office of the same, the reduction in the amount of profit appropriated to the legal reserve to 5% and the elimination of the provision relating to the share of profits (1%) at the disposition of the board of directors for distribution among its members, as well as the changes required as a consequence of the issue on the part of the surviving company of savings shares having the same characteristics as IFIL savings shares (with a change in the savings shares' rights to the assets in relation to the exchange ratio).

The ordinary sessions of IFI stockholders' meetings held on December 1, 2008 also approved:

- the request for admission to listing of ordinary and savings shares of the surviving company (the merger was subordinate to this admission);
- the appointment, with effect from the effective date of the merger, of the following new directors: Carlo Sant'Albano, current CEO of IFIL, and the independent directors, Antonio Maria Marocco, Giuseppe Recchi and Claudio Saracco, current directors of IFIL;

On December 2, 2008, the special session of the IFI preferred stockholders' meeting convened by the common representative Mr Luigi Santa Maria was held and approved the resolution for the merger by incorporation of IFIL in IFI which had been approved in the special session of the IFI stockholders' meeting held on December 1, 2008.

The special session of the IFIL stockholders' meeting approved the Merger Project on December 1, 2008.

On February 16, 2009, Borsa Italiana S.p.A. issued the order to admit the EXOR ordinary and savings shares to trading on the Electronic Share Market.

On February 19, 2009, Consob issued the declaration of equivalence as set forth in art. 57, paragraphs 1, letter d), 1-ter and 1-quater of the Regulation for Issuers; on February 20, 2009, updates were made available on the merger Information Document prepared in accordance with articles 70, paragraph 4 and 71-bis of the Regulation for Issuers, published on November 21, 2008. The updated Information Document can also be accessed on the website www.exor.com.

On February 20, 2009, the deed of merger was signed before the notary public Ettore Morone. The deed establishes that the merger will be effective for legal purposes, pursuant to art. 2504-bis, paragraph 2 of the Italian Civil Code, from March 1, 2009 and the transactions carried out by IFIL in the early months of 2009 will be recorded in the EXOR financial statements, also for tax purposes, pursuant to art. 172, paragraph 9 of D.P.R. 917/96, starting from January 1, 2009.

The registration of the deed of merger in the Companies Register of Turin occurred on February 24, 2009.

The three categories of EXOR shares (ordinary, preferred and savings) have been listed on the Electronic Share Market under the denomination EXOR since March 2, 2009 (the first day of trading subsequent to March 1, 2009, closing day of the Stock Exchange, the effective date of the merger). The IFIL ordinary and savings shares were removed from trading on the Electronic Share Market beginning March 2, 2009.

For additional information on the Merger, please refer to the Information Document on the Merger and updates to that same document on the website www.exor.com.

Other transactions for the simplification of the Group's structure

With a view toward simplifying the group's structure, the following transactions were entered into:

- on September 29, 2008, a decision was taken to put Ifilgroup Finance Limited, an Irish-registered company controlled 100% by Ifil Investissements S.A., into a voluntary wind-up;
- on November 7, 2008, a decision was taken to put Ifil Investment Holding, a Dutch-registered company controlled 100% by IFIL, into a voluntary wind-up. On the same day, Ifil Investment Holding transferred 224,194 Ifil Investissements shares which it held (20.184% of capital stock) to IFIL as an advance on the liquidation. After this transaction, IFIL directly held 100% of the capital stock of Ifil Investissements.

Proceedings relative to the contents of the press releases issued by IFIL and Giovanni Agnelli e C. on August 24, 2005

On February 21, 2006, Consob notified Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone as well as IFIL and Giovanni Agnelli e C. of its objections in respect of the start of a sanctionary proceeding under art. 187-septies of the Consolidated Law on Finance under the assumption that each of those individuals violated art. 187-ter, paragraph 1 (Market Manipulation) of the Consolidated Law on Finance in relation to the content of the press releases diffused by IFIL and Giovanni Agnelli e C. on August 24, 2005 and that the companies violated the responsibility of entities pursuant to art. 187-quinquies of the Consolidated Law on Finance and joint and several responsibility pursuant to art. 6, paragraph 3 of Law 689/1989.

On February 13, 2007, the Consob sanctionary measure (Resolution 15760) was notified which, at the conclusion of the proceeding, applied the following pecuniary administrative sanctions:

- to Gianluigi Gabetti (chairman of IFIL and chairman of Giovanni Agnelli e C.) € 2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL and € 2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to Franzo Grande Stevens (director of IFIL) € 2 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL and € 1 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to Virgilio Marrone (chief executive officer and general manager of IFI) € 500 thousand in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to IFIL € 4.5 million;
- to Giovanni Agnelli e C. € 3 million;

and the additional following administrative sanctions: temporary inability to assume positions of administration, direction and control in listed companies or in companies that are part of the same group of listed companies:

- to Gianluigi Gabetti: for six months
- to Franzo Grande Stevens: for four months
- to Virgilio Marrone: for two months.

The persons and companies involved in the sanctionary measure filed appeals with the Court of Appeals of Turin. In the opposing judgment, the Court of Appeals, in its decision of December 5, 2007, reduced the administrative sanctions from a total of € 16 million to € 6.3 million. The reduction for IFIL was from € 4.5 million to € 1 million and for Giovanni Agnelli e C. from a total of € 3 million to € 600 thousand and for Gianluigi Gabetti from a total of € 5 million to € 1.2 million in addition to a reduction of two months, from six to four months, in respect of the additional administrative suspension.

In July 2008, IFIL filed an appeal with the Court of Cassation against the ruling by the Court of Appeals of Turin. Appeals were also filed with the Court of Cassation by the other parties involved in the Consob sanctionary measure. In October 2008, Consob notified the company that it had filed a counter-appeal and an incidental appeal asking for the rejection of the main appeal and the cancellation of the reduction of the sanctions originally levied. Consob acted in the same manner against the other petitioners. In November 2008, IFIL filed a counter-appeal with the Court of Cassation against Consob's incidental appeal. The other parties referred to in Consob's incidental appeal also filed a counter-appeal with the Court of Cassation.

In the penal proceedings for the same press releases, on November 7, 2008, the Preliminary Hearing Judge of the Turin Court committed Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone to trial for the offense pursuant to art. 185 of the Consolidated Law on Finance, as well as IFIL and Giovanni Agnelli e C., as those responsible administratively under Legislative Decree 231/2001, setting a hearing for March 26, 2009.

REVIEW OF THE RESULTS OF THE SEPARATE FINANCIAL STATEMENTS

The year 2008 shows a profit of € 356.5 million. The increase of € 233.1 million compared to profit of € 123.4 million in 2007 originates from the gain realized on the partial sale of the investment in Intesa Sanpaolo (+€ 167.5 million), the increase in dividends received from investment holdings (+€ 84.2 million) and the positive change in net general expenses (+€ 2.1 million) and other nonrecurring income (expenses) (+€ 12 million). These positive components are partly offset by higher financial income (expenses) (-€ 9.7 million), the absence of impairment reversals on investments (-€ 19.3 million) and deferred tax assets (-€ 3.7 million).
The condensed income statement and balance sheet, as well as comments on the most significant line items are presented below.

IFIL S.p.A. – Condensed income statement

1. Dividends from investments

Dividends from investments in 2008 amount to € 255.6 million, € 145.4 million of which was received from Fiat and € 110.2 million from Intesa Sanpaolo.

Dividends from investments in 2007 amounted to € 171.4 million, collected from Fiat for € 61.2 million and Intesa Sanpaolo for € 110.2 million.

2. Gain on partial sale of the investment in Intesa Sanpaolo

In the second half of 2008, IFIL sold 171,916,165 Intesa Sanpaolo ordinary shares (1.45% of ordinary capital stock) on the market for net proceeds of € 598.4 million and a gain of € 167.5 million. For additional information on the further accounting effects of the transaction, please refer to the following Note 6.

3. Net financial expenses

Net financial expenses amount to € 48.7 million in 2008 and increased by € 9.7 million compared to 2007 (€ 39 million) due to the higher cost of debt relating to the bonds issued in June 2007 and the net result from trading activities.

4. Net general expenses

Net general expenses amount to € 20.7 million in 2008 and decreased by € 2.1 million compared to € 22.8 million in 2007.

5. Net other nonrecurring income (expenses)

Net other nonrecurring income in 2008 amounts to € 2.8 million and includes the income arising from the reduction in the fair value of the liability for the stock option plan approved for management of the subsidiary Alpitour (+€ 7.8 million) and expenses in connected with the special fee approved for Mr Gabetti by the board of directors on May 13, 2008 (-€ 5 million).

In 2007, net other nonrecurring expenses amounted to € 9.2 million and included income of € 3.5 million originating from the reduction decided by the Court of Appeals of Turin in respect of the pecuniary administrative sanction levied on the company by Consob, as well as the expense to increase the liability of the stock option plan approved for management of the subsidiary Alpitour (-€ 12.7 million).

6. Investments

Details are as follows:

€ in millions	**12/31/2008**	12/31/2007	Change
Investments accounted for at cost			
Fiat S.p.A. (ordinary shares)	**2,619.4**	2,619.4	0.0
Fiat S.p.A. (preferred shares)	**250.4**	250.4	0.0
	2,869.8	2,869.8	0.0
Ifil Investissements S.A.	**746.3**	641.5	104.8
Alpitour S.p.A.	**100.0**	100.0	0.0
Ifil Investment Holding N.V. (in a wind-up)	**0.2**	68.3	(68.1)
Juventus Football Club S.p.A.	**74.2**	74.2	0.0
Soiem S.p.A.	**10.0**	10.0	0.0
	3,800.5	3,763.8	36.7
Available-for-sale investments			
Intesa Sanpaolo S.p.A. (ordinary shares) (a)	**297.2**	1,564.7	(1,267.5)
Total investments	**4,097.7**	5,328.5	(1,230.8)

(a) Measured at fair value on the basis of the market price at the end of the year, with recognition of the unrealized gains or losses in equity.

The net decrease of € 1,230.8 million in the carrying amount of investments is due to the following movements:

€ in millions		
Investments at December 31, 2007		**5,328.5**
Partial sale of the investments in Intesa Sanpaolo:		
- Reversal of the original purchase cost	(430.9)	
- Reversal of cumulative fair value	(497.0)	
	(927.9)	
Adjustment of remaining investment in Intesa Sanpaolo to fair value at year-end 2008	(339.6)	(1,267.5)
Ifil Investissements:		
- increase (20.184% of capital stock) from advance on wind-up received from Ifil Investment Holding	104.5	
- accounting for the part of stock option plan relating to Ifil Investissements employees and subsidiaries	0.3	104.8
Reversal of the carrying amount of the investment in Ifil Investment Holding, in a wind-up, up to the remaining amount of equity		(68.1)
Investments at December 31, 2008		**4,097.7**

The reduction of the investment in Intesa Sanpaolo, equal to € 1,267.5 million, is given by the reversal of the carrying amount (-€ 927.9 million) of the stake disposed of and the adjustment of the remaining stake to fair value at the end of the year (-€ 339.6 million).
The reversal of the carrying amount of the investment sold (-€ 927.9 million) comprises the original acquisition cost of € 430.9 million and cumulative fair value of € 497 million.

The gain of € 167.5 million is generated by the difference between the net proceeds of € 598.4 million and the original acquisition cost of € 430.9 million. The cumulative fair value on the interest disposed of, equal to € 497 million, was deducted from the specific equity

reserve, as was the fair value adjustment at the end of the year relating to the remaining interest, equal to € 339.6 million, for a total of € 836.6 million.
The original acquisition cost of the remaining investment held in Intesa Sanpaolo is € 295.7 million; at December 31, 2008, the net positive change in fair value amounts to € 1.5 million.

On November 7, 2008, a decision was taken to put Ifil Investment Holding into a voluntary wind-up. Consequently, the 224,194 Ifil Investissements shares (20.184% of capital stock) held by Ifil Investment Holding were transferred to IFIL as an advance on the liquidation. These shares were accounted for in the IFIL financial statements at the same carrying value at which they were carried in the Ifil Investment Holding financial statements (€ 104.5 million). The carrying amount of the investment in Ifil Investment Holding was then adjusted to the amount of the remaining equity (€ 0.2 million) with a negative change of € 68.1 million. The net difference between the two changes (€ 36.4 million) was recognized as an increase of equity.

The comparison between carrying amounts and market prices of listed investments at December 30, 2008 of listed investments is as follows:

		Carrying amount		Market price at December 30, 2008		Difference
	Number	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)	Total (€ ml)
Fiat S.p.A. (ordinary shares)	332,587,447	7.88	2,619.4	4.59	1,526.2	(1,093.2)
Fiat S.p.A. (preferred shares)	31,082,500	8.06	250.4	2.39	74.2	(176.2)
			2,869.8		1,600.4	(1,269.4)
Intesa Sanpaolo S.p.A. (ord. sh.)	118,000,000	2.52	297.2	2.52	297.2	0.0
Juventus Football Club S.p.A.	120,934,166	0.61	74.2	0.77	93.2	19.0
Total			**3,241.2**		**1,990.8**	**(1,250.4)**

7. Equity

Equity at December 31, 2008 is equal to € 3,916.9 million (€ 4,566,9 million at December 31, 2007). The negative change of € 650 million is due to the following changes:

€ in millions	
Equity at December 31, 2007	**4,566.9**
Reversal of the cumulative fair value on the stake sold in Intesa Sanpaolo	(497.0)
Adjustment of the remaining stake held in Intesa Sanpaolo to fair value at year-end 2008	(339.6)
Purchases of treasury stock	(103.7)
Dividends distributed	(106.3)
Effect of the increase in the investment in Ifil Investissements and the adjustment of the investment in Ifil Investment Holding	36.4
Deferred taxes released on change in fair value	11.5
Other net changes	(7.8)
Profit for the year 2008	356.5
Net change during the year	**(650.0)**
Equity at December 31, 2008	**3,916.9**

8. Net financial position

At December 31, 2008 and 2007, details are as follows:

€ in millions	**12/31/2008**	12/312007	Change
Cash and cash equivalents	**411.4**	165.6	245.8
Loan receivable from the parent, IFI	**199.5**	0.0	199.5
Financial assets held for trading	**170.5**	47.8	122.7
Other financial assets, current and non-current	**1.1**	4.6	(3.5)
Non-convertible bonds	**(944.2)**	(943.6)	(0.6)
Bank debt	**(0.3)**	0.0	(0.3)
Current other financial liabilities	**(28.5)**	(23.6)	(4.9)
Net financial position	**(190.5)**	(749.2)	558.7

The positive change of € 558.7 million in 2008 is due to the following cash flows:

€ in millions	
Net financial position at December 31, 2007	**(749.2)**
Partial sale of the investment in Intesa Sanpaolo	598.4
Dividends received	255.6
Dividends distributed	(106.3)
Purchases of treasury stock	(103.7)
Net financial expenses	(48.7)
Net general expenses	(20.7)
Other net changes	(15.9)
Net change during the year	**558.7**
Net financial position at December 31, 2008	**(190.5)**

9. Reconciliation between the separate financial statements of IFIL S.p.A. and the consolidated financial statements of the group

The following reconciliation of the profit for the year and the equity in the separate financial statements of IFIL S.p.A. for the years ended December 31, 2008 and December 31, 2007 and the corresponding figures in the consolidated financial statements of the IFIL Group at the same dates are presented as required by Consob Communication 6064293 dated July 28, 2006.

	Profit		Equity	
€ in millions	**2008**	2007	**12/31/2008**	12/31/2007
Separate financial statements of IFIL S.p.A.	**356**	123	**3,917**	4,567
Difference between the carrying amounts of investments and corresponding equity at the end of the prior year			**2,100**	1,635
Net balance between the changes during the year in the equity of consolidated companies and companies accounted for by the equity method (excluding the result)			**(420)**	(85)
Share of the profit (loss) of consolidated companies and companies accounted for by the equity method, net of consolidation adjustments	**337**	609	**337**	609

Consolidated financial statements of the IFIL Group (attributable to the equity holders of the parent)	**445**	672	**5,687**	6,666

REVIEW OF THE SYNTHESIZED CONSOLIDATED RESULTS

IFIL holds some important investments through the Luxembourg subsidiary Ifil Investissements and controls some companies which contribute to investment activities (Ifil USA, Ifil Asia and Ifil France) as well as an Irish-registered company (operating with the aim of optimizing the management of the financial resources of the Group). These companies constitute, together with Soiem (a services company) and other minor companies, the so-called “Holdings System” (the complete list of these companies is presented in the next table).

In order to facilitate the analysis of the equity and financial position and the results of operations of the Group, it is IFIL's practice to present synthesized financial statements (balance sheet and income statement) prepared by applying the “synthesized” consolidation criteria. Such synthesized consolidated financial statements are presented along with the annual consolidated financial statements and the interim consolidated financial statements for the first half of each year. The quarterly consolidated data is also presented in the synthesized format in the quarterly reports at March 31 and September 30 of each year.

In the preparation of the synthesized consolidated balance sheet and income statement, the financial statements or accounting data drawn up in accordance with IFRS by IFIL and by the subsidiaries in the “Holdings System” are consolidated line-by-line; the investments in the operating subsidiaries and associates (Fiat, Sequana, Cushman & Wakefield, Alpitour and Juventus F.C.) are accounted for by the equity method, always on the basis of their financial statements or accounting data prepared in accordance with IFRS.

The consolidation and valuation methods used for investments are presented below.

	% holding in capital stock outstanding	
	12/31/2008	12/31/2007

1. Share of the profit (loss) of companies accounted for by the equity method

In 2008, the share of the profit (loss) of companies accounted for by the equity method amounts to € 336.2 million (€ 610.9 million in 2007). The decrease of € 274.7 million reflects:

- the lower contributions by the Fiat Group (-€ 98.3 million) and the Alpitour Group (-€ 4.4 million) which closed 2008 with profit figures below those of 2007;
- the inversion of the results of the Sequana Group and the Cushman & Wakefield Group which produced negative changes for IFIL's share, of € 174.5 million and € 49.9 million, respectively;
- IFIL's share of a lower loss reported by Juventus F.C. (+€ 5.7 million).

	Profit (loss)		IFIL's share

(a) Mainly for the assignment of preference dividends to the minority interest.
(b) Of which -€ 54.3 million for losses realized on the sale of the 22% stake in capital stock and +€ 7.6 million for lower goodwill impairment losses on the AWA Group, since it was partially amortized by IFIL in prior years.
(c) Data for the period April 1 – December 31, subsequent to acquisition (March 31, 2007).
(d) Data for the period November 1 – October 31.
(e) Data for the period January 1 – December 31 prepared for purposes of consolidation by IFIL.

For a review of the operating performance of the companies accounted for by the equity method reference should be made to the following sections.

2. Dividends from investments

Dividends from investments in 2008 amount to € 139.2 million (€ 111.6 million in 2007) and include dividends received from Intesa Sanpaolo S.p.A. for € 110.2 million (unchanged compared to 2007), SGS for € 26.2 million and Gruppo Banca Leonardo for € 2.8 million (€ 1.4 million in 2007).

3. Gains on sales of investments

In 2008, gains on sales of investments include the gain realized on the disposal on the market of a 1.45% stake in Intesa Sanpaolo ordinary capital stock (€ 74.5 million). Additional information is provided in Note 10.

In 2007, this line item included the gain of € 0.9 million realized on the sale of the investment in Turismo&Immobiliare (25% of capital stock).

4. Net impairments of current and non-current financial assets

In 2008, net impairment losses amount to € 67.2 million (€ 2.6 million in 2007), of which € 52.3 million (€ 2.6 million in 2007) relates to current financial assets (equity shares and bonds held for trading by the subsidiary Ifil Investissements for € 41.2 million, and by IFIL for € 11.1 million).

The fair value of current securities is calculated by using the market prices at December 30, 2008 translated, where necessary, at the year-end exchange rates.

It also includes an impairment loss of € 14.9 million on the portion of Junior notes issued by DLMD which is recognized in non-current financial assets.
Additional information is provided in Note 10.

5. Interest income and other financial income

In 2008, this line item amounts to € 68.5 million (€ 39.7 million in 2007) and includes:

€ in millions	**2008**	2007	Change
Bond interest income	**29.3**	30.7	(1.4)
Financial income on securities held for trading	**9.5**	1.1	8.4
Interest income on receivables from:			
- tax authorities	**0.9**	0.9	0.0
- banks	**12.3**	1.4	10.9
- parent, IFI	**1.5**	0.0	1.5
Exchange differences	**10.9**	2.2	8.7
Income from interest rate hedges	**1.9**	0.9	1.0
Other	**2.2**	2.5	(0.3)
Total	**68.5**	39.7	28.8

6. Interest expenses and other financial expenses

In 2008, this line item amounts to € 72.1 million (€ 47.2 million in 2007) and includes:

€ in millions	**2008**	2007	Change
IFIL bond interest expenses	**51.6**	33.2	18.4
Financial expenses on securities held for trading	**18.8**	2.9	15.9
Bank interest expenses and other financial expenses	**1.3**	7.9	(6.6)
Exchange differences	**0.4**	3.2	(2.8)
Total	**72.1**	47.2	24.9

The increase in bond interest expenses (€ 18.4 million) is mainly attributable to the portion of interest accrued on bonds maturing in 2017, issued by IFIL S.p.A. in June 2007, and should be viewed in connection with the reduction in bank interest expenses due to the extinction of debt owed to the banks.

7. Net general expenses

In 2008, net general expenses amount to € 31.8 million. The increase of € 5.9 million compared to the prior year (€ 25.9 million) is due to higher costs incurred to expand the New York and Paris offices (€ 4.3 million), expenses sustained by the subsidiary Ifil Investissements for the investment in Perfect Vision (€ 1.3 million) and other net changes (€ 0.3 million).

8. Net other nonrecurring income (expenses)

In 2008, net other nonrecurring income, equal to € 2.8 million, includes income from fair value changes in the stock option plans voted in favor of management of the subsidiary Alpitour for € 7.8 million, as well as the special fee of € 5 million voted in favor of Mr Gabetti by the IFIL board of directors on May 13, 2008.

In 2007, net other nonrecurring expenses amounted to € 17.2 million and comprised transaction costs and expenses incurred to close the dispute over the sale of La Rinascente (€ 8 million), the current-year cost of € 12.7 million for the stock option plan approved for management of the subsidiary Alpitour, as well as income of € 3.5 million resulting from the reduction decided by the Court of Appeals of Turin in respect of the administrative sanction levied on IFIL by Consob.

9. Investments accounted for by the equity method

Details are as follows:

€ in millions	Carrying amount at **12/31/2008**	 12/31/2007	Change
Fiat Group	**3,062.2**	3,125.3	(63.1)
Sequana Group	**189.9**	341.0	(151.1)
Cushman & Wakefield Group	**482.5**	466.1	16.4
Alpitour Group	**84.2**	78.8	5.4
Juventus Football Club S.p.A.	**65.9**	69.8	(3.9)
Others, in a wind-up	**0.3**	0.0	0.3
Total	**3,885.0**	4,081.0	(196.0)

10. Non-current other financial assets

Details are as follows:

€ in millions	Carrying amount at **12/31/2008**	 12/31/2007	Change
Investments accounted for at fair value			
- Intesa Sanpaolo S.p.A.	**297.2**	1,564.7	(1,267.5)
- SGS S.A.	**869.2**	956.6	(87.4)
- Gruppo Banca Leonardo S.p.A.	**87.6**	82.4	5.2
- NoCo A LP	**19.5**	18.7	0.8
- Banijay Holding S.A.S.	**21.4**	0.0	21.4
Other investments at fair value			
NoCo B LP	**23.8** (a)	11.9	11.9
DLMD bonds	**13.4**	27.6	(14.2)
Other investments at amortized cost			
Perfect Vision Limited convertible bonds	**70.7**	0.0	70.7
Sundry	**0.2**	5.4	(5.2)
Total	**1,403.0**	2,667.3	(1,264.3)

(a) Net of an impairment loss of € 0.2 million.

At December 31, 2008, the reduction of the investment in Intesa Sanpaolo, equal to € 1,267.5 million, is given by the reversal of the carrying amount (-€ 927.9 million) of the stake disposed of (1.45% of ordinary capital stock) and the adjustment of the remaining stake to fair value at the end of the year (-€ 339.6 million).
The reversal of the carrying amount of the investment sold (-€ 927.9 million) comprises the original acquisition cost of € 523.9 million and cumulative fair value of € 404 million.

The gain of € 74.5 million is the difference between the net proceeds of € 598.4 million and the original acquisition cost of € 523.9 million. The cumulative fair value, equal to € 404 million, was deducted from the specific reserve in consolidated equity.

The original acquisition cost of the remaining investment held in Intesa Sanpaolo is € 359.5 million; at December 31, 2008, the net negative change in fair value amounts to € 62.3 million.

The decrease in the investment in SGS, equal to € 87.4 million, is due to the change in fair value at the end of 2008.

The original carrying amount of the investment in SGS is € 469.7 million; at December 31, 2008, the net positive change in fair value amounts to € 399.5 million.

The increase in the investment in Gruppo Banca Leonardo is due to the change in fair value of € 5.2 million. Fair value was estimated by an independent expert using the "warrant equity method".

Bonds issued by DLMD are secured by 10,806,343 Sequana shares and cash collateral of approximately € 7 million.
In July 2008, certain clauses were renegotiated for the DLMD bonds issued which were subdivided into Senior and Junior bond portions. The repayment of the Junior portion in 2010, in exchange for a higher yield, is subordinate to that of the Senior portion.
Ifil Investissements holds a nominal amount of bonds for € 27.2 million, of which € 12.3 million represents Senior bonds and € 14.9 million Junior bonds. At December 31, 2008, an impairment loss was recognized on the Junior portion for its entire nominal amount.

11. Comparison between carrying amounts and market prices of listed investments and other financial assets

Details are as follows:

				Market price			
		Carrying amount		December 30, 2008		February 27, 2009	
	Number	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)

Intesa Sanpaolo S.p.A.	118,000,000	2.52	**297.2**	2.52	**297.2**	1.93	**228.1**
SGS S.A.	1,173,400	740.74	**869.2**	740.74	**869.2**	712.26	**835.8**
Total			**4,484.4**		**2,917.2**		**2,486.9**

12. Equity attributable to the equity holders of the parent

Details are as follows:

€ in millions	**12/31/2008**	12/31/2007	Change
Capital and reserves	**5,839.5**	6,715.0	(875.5)
Treasury stock	**(152.2)**	(48.5)	(103.7)
Total	**5,687.3**	6,666.5	(979.2)

The change during the year is analyzed as follows:

€ in millions	
Equity attributable to the equity holders of the parent at December 31, 2007	**6,666.5**
Reversal of cumulative fair value on the investment in Intesa Sanpaolo disposed of (- € 404 million, net of +€ 6.8 million of deferred taxes)	(397.2)
Fair value adjustment at the end of 2008 on:	
- remaining investment in Intesa Sanpaolo (-€ 339.6 million, net of +€ 4.7 million of deferred taxes)	(334.9)
- SGS	(87.4)
- Other	5.0
Purchases of treasury stock	(103.7)
Exchange gains (losses) on the translation of foreign operations (-€ 103 million) and other net changes shown in the equity of the companies consolidated and those accounted for by the equity method (-€ 297.1 million) (a)	(400.1)
Dividends distributed by IFIL S.p.A.	(106.2) (b)
Profit attributable to the equity holders of the parent	445.3
Net change during the year	**(979.2)**
Equity attributable to the equity holders of the parent at December 31, 2008	**5,687.3**

(a) Mainly for movements in the cash flows hedge reserve of the Fiat Group (-€ 216.2 million).

(b) Net of € 0.1 million of intragroup dividends.

13. Consolidated net financial position of the "Holdings System"

The consolidated net financial position of the "Holdings System" at December 31, 2008 shows a positive balance of € 358.3 million and a positive change of € 462.8 million from a negative balance of € 104.5 million at the end of 2007.

The consolidated net financial position of the "Holdings System" is composed as follows:

	12/31/2008			12/31/2007		
€ in millions	**Current**	**Non-current**	**Total**	Current	Non-current	Total
Financial assets and cash and cash equivalents	**1,131.6**	**0.2**	**1,131.8**	862.4	0.3	862.7
Loan receivable from the parent, IFI	**199.5**	**0.0**	**199.5**	0.0	0.0	0.0
Total financial assets and cash and cash equivalents	**1,331.1**	**0.2**	**1,331.3**	862.4	0.3	862.7
IFIL bonds 2007-2017	**(22.4)**	**(744.7)**	**(767.1)**	(22.7)	(744.2)	(766.9)
IFIL bonds 2006-2011	**(0.6)**	**(199.5)**	**(200.1)**	(0.7)	(199.4)	(200.1)
Bank debt and other financial liabilities	**(5.8)**	**0.0**	**(5.8)**	(0.2)	0.0	(0.2)
Total financial liabilities	**(28.8)**	**(944.2)**	**(973.0)**	(23.6)	(943.6)	(967.2)
Consolidated net financial position of the "Holdings System"	**1,302.3**	**(944.0)**	**358.3**	838.8	(943.3)	(104.5)

At December 31, 2008, IFIL S.p.A. had irrevocable credit lines for € 510 million, of which € 160 million was due by December 31, 2009 and € 350 million at later expiration dates.
At December 31, 2008 Standard & Poor's rated IFIL's long-term debt at "BBB+" and its short-term debt at "A-2", both with a stable outlook.

The positive change of € 462.8 million during the year is due to the following flows:

€ in millions			
Consolidated net financial position of the "Holdings System" at December 31, 2007		**(104.5)**	
Dividends received from investments		293.9	
- Fiat S.p.A	145.5		
- Intesa Sanpaolo S.p.A.	110.2		
- SGS S.A.	26.2		
- Sequana S.A.	9.2		
- Gruppo Banca Leonardo S.p.A.	2.8		
Purchases of IFIL treasury stock		(103.7)	
- 20,783,200 ordinary shares (2% of the class of stock)	(99.8)		
- 917,000 savings shares (2.45% of the class of stock)	(3.9)		
Dividends distributed by IFIL S.p.A.		(106.2)	(a)
Disposal of Intesa Sanpaolo shares (1.45% of ordinary capital stock)		598.4	
Reimbursement of Ocean Club Méditerranée bonds		5.1	
Investments		(103.2)	
- Perfect Vision Limited convertible bonds	(58.1)		
- Banijay Holding (17.03% of capital stock)	(21.4)		
- Cushman & Wakefield (2.05% of capital stock)	(11.6)		
- NoCo B LP	(12.1)		
Other net changes		(121.5)	
- Net general expenses	(31.8)

Net change during the year		**462.8**	
Consolidated net financial position of the "Holdings System" at December 31, 2008		**358.3**	

(a) Net of € 0.1 million of intragroup dividends.
(b) Includes net impairments on securities recognized in current financial assets and included in the net financial position balance.

14. Reconciliation between the consolidated net financial position of the "Holdings System" and the consolidated net financial position of the companies consolidated line-by-line

€ in millions	**12/31/2008**	12/31/2007	Change
Consolidated net financial position of the "Holdings System"	**358**	(104)	462
Net financial position of the companies consolidated line-by-line:			
- Cushman & Wakefield Group	**(108)**	3	(111)
- Alpitour Group	**34**	17	17
- Juventus Football Club S.p.A.	**11**	7	4
Consolidated net financial position - line-by-line consolidation	**295**	(77)	372

The composition of the consolidated net financial position of companies consolidated line-by-line is presented in Note 33 to the consolidated financial statements of the IFIL Group.

15. Reconciliation between the synthesized consolidated financial statements and the consolidated financial statements of the IFIL Group

The following table presents a reconciliation between the synthesized consolidated financial statements and the consolidated financial statements of the IFIL Group prepared in accordance with IFRS.

The first column (“Synthesized consolidation”) presents the data that has been commented on in the preceding pages, reclassified according to the consolidated financial statement formats.

The second column (“Eliminations and consolidation adjustments”) shows the adjustments necessary to reverse the carrying amount of the investments accounted for in the synthesized consolidated financial statements by the equity method and the share of the results of those investments in order to arrive at the line-by-line consolidation of the respective financial statements or accounting data, which are shown in the next columns.

Reconciliation of the consolidated balance sheet

Net revenues

Group revenues for 2008 total € 59,380 million, up 1.5% year-over-year. A positive performance in the first half (+10.9%) was followed by a slowdown in demand in the third quarter and a progressively significant decline in volumes in the closing months of 2008.

Trading profit

Group trading profit is € 3,362 million for 2008, up 4% over 2007, and the trading margin rose to 5.7% from 5.5% with a strong contribution from CNH and improved trading performance at Iveco more than offsetting margin declines in other Sectors.

The breakdown of trading profit by Business/Sector is described below:

Automobiles

The Automobile businesses report trading profit of € 1,102 million for 2008, slightly higher than the € 1,093 million figure for 2007. Trading margin was flat at 3.8%. Lower trading profit at Fiat Group Automobiles (-€ 112 million), reflecting the impact of the market crisis in the last quarter, was more than offset by increases at Ferrari (+27.4%) and Maserati, where trading profit grew from € 24 million for 2007 to € 72 million for 2008.

€ in millions	**2008**	2007	Change
Fiat Group Automobiles	**691**	803	(112)
Maserati	**72**	24	48
Ferrari	**339**	266	73
Trading profit	**1,102**	1,093	9
Trading margin (%)	**3.8**	3.8	

For 2008, **Fiat Group Automobiles** report trading profit of € 691 million (2.6% of revenues), a decline of € 112 million from the € 803 million figure (3% of revenues) recorded in 2007. This decline was entirely attributable to the fourth quarter slump in demand in Western Europe and the economic slowdown in Latin America. The impact on income from the consequent reduction in volumes was only partially compensated by reductions in overheads and production-related costs, including recourse to flexible working arrangements provided under Italian labor legislation. Trading profit for 2007 included a nonrecurring gain of approximately € 65 million (net of nonrecurring charges), while for 2008 it included approximately € 40 million in unabsorbed fixed costs resulting from the two month closure of the Giambattista Vico plant in Pomigliano.

Maserati reports trading profit of € 72 million for the year (8.7% of revenues), representing a significant improvement (+€ 48 million) over the € 24 million figure (3.5% of revenues) for the previous year, due to increased volumes and cost efficiencies.

Ferrari closes 2008 with trading profit of € 339 million (17.6% of revenues), up 27.4% over the € 266 million figure (15.9% of revenues) for 2007. This performance was primarily attributable to cost efficiency gains, which included a decrease in the net cost of Formula 1 racing, and a more favorable sales mix, offset in part by the unfavorable U.S. dollar and Pound sterling exchange rates.

Agricultural and Construction Equipment

CNH – Case New Holland trading profit is € 1,122 million in 2008 (8.8% of revenues), an increase of € 132 million over the € 990 million level (8.4% of revenues) for 2007 (up 21.6% in U.S. dollar terms).

Agricultural equipment sales growth, mix improvements and pricing actions more than offset weakness in the construction equipment industry, higher procurement, manufacturing and shipment costs which were caused by increased agricultural volumes, especially in the first 9 months of the year.

Trucks and Commercial Vehicles

Iveco's trading profit is € 838 million, an increase of € 25 million over the € 813 million figure posted in 2007. The drop in sales volumes was offset by better selling prices achieved from competitive repositioning and a reduced cost of the product. During the year, measures were implemented to contain overheads in prompt response to the perceived fall in demand. The trading margin rose to 7.8% from 7.3% for 2007.

Components and Production Systems

Components and Production Systems report aggregate trading profit of € 402 million (€ 509 million for 2007), with a trading margin of 2.9% (3.8% in 2007). The sharp contraction in demand impacted trading profit at FPT (down € 105 million) and Magneti Marelli (down € 40 million). Teksid's trading profit is down € 6 million (up € 9 million on a comparable basis). Benefiting from the positive effects of the restructuring and repositioning of the business, Comau reports an increase in trading performance of € 44 million.

€ in millions	**2008**	2007	Change
FPT Powertrain Technologies	**166**	271	(105)
Componenti (Magneti Marelli)	**174**	214	(40)
Prodotti metallurgici (Teksid)	**41**	47	(6)
Production Systems (Comau)	**21**	(23)	44
Trading profit	**402**	509	(107)
Trading margin (%)	**2.9**	3.8	

For 2008, **FPT Powertrain Technologies** report trading profit of € 166 million (2.4% of revenues), a € 105 million decrease over the € 271 million figure (3.8% of revenues) for 2007. This decrease was principally the result of a contraction in volumes, worsening of the sales mix and increases in raw materials prices, in addition to start-up costs for new ventures in China and Brazil. There was also a negative impact from costs recognized in the first quarter of 2008 associated with the faulty production of 1.3 Multijet engines as a result of a defective externally provided component. Significant efficiency gains only partially compensated for these negative factors.

Magneti Marelli reports trading profit of € 174 million for 2008 (€ 214 million for 2007). The decrease over 2007 was due to the sharp decline in global demand which prevented the Sector from continuing the positive performance of the first nine months, during which reductions in production costs and positive results in Poland and Brazil compensated for the slowdown in certain regions and an unfavorable product mix. The trading margin for 2008 is 3.2% (4.3% for 2007). On a comparable scope of operations, the trading margin would be 3.7%.

Teksid reports trading profit of € 41 million, down from the € 47 million figure for 2007. On a comparable scope of operations, Teksid would have shown an increase of € 9 million.

Benefiting from the positive effects of the restructuring and repositioning of the business initiated in 2006, **Comau** achieves trading profit of € 21 million for 2008, a significant improvement over the € 23 million loss recorded in 2007. The most significant improvements were for the Body Welding activities in Europe.

Other Businesses

Other Businesses has a trading loss of € 102 million for the year, including the impact of eliminations and consolidation adjustments, a decrease of € 70 million over the € 172 million loss recognized in 2007 primarily attributable to a reduction in costs related to stock option plans.

Operating profit

Operating profit for 2008 is € 2,972 million, compared to € 3,152 million for 2007. The difference is attributable to a € 129 million improvement in trading profit offset by a € 309 million increase in net unusual expense resulting from a € 170 million decrease in gains on disposals of investments, € 60 million in higher restructuring costs and a net increase in other unusual expense of € 79 million.

The breakdown of the principal components of operating profit by Sector is described below:

	Trading profit (loss)		Gains/Losses on the disposal of investments		Restructuring costs		Other unusual income (expenses)		Operating profit (loss)	
€ in millions	**2008**	2007	**2008**	2007	**2008**	2007	**2008**	2007	**2008**	2007

Production Systems (Comau)	**21**	(23)	-	11	**3**	21	**(18)**	-	-	(33)
Other Businesses and Eliminations	**(102)**	(172)	**(4)**	171	**20**	4	**(4)**	(2)	**(130)**	(7)
Total for the Group	**3,362**	3,233	**20**	190	**165**	105	**(245)**	(166)	**2,972**	3,152

Net gains on the disposal of investments total € 20 million in 2008 and include gains of € 14 million on the sale of the interest in the subsidiary S.C.M. Ltda and € 4 million on the sale of Targasys S.r.l.. In 2007, this item totaled € 190 million and mainly consisted of a gain of € 118 million on the sale of the interest held in Mediobanca S.p.A. and a gain of € 42 million following completion of the sale of Ingest Facility S.p.A..

Restructuring costs total € 165 million and mainly relate to Fiat Group Automobiles (€ 62 million) and Magneti Marelli (€ 77 million). In 2007, these costs totaled € 105 million and related primarily to Fiat Group Automobiles (€ 40 million), Agricultural and Construction Equipment (€ 30 million) and Comau (€ 21 million).

Other unusual income (expense) was a negative € 245 million and mainly included costs relating to the rationalization of strategic suppliers (€ 74 million) and additional provisions, associated with the serious and abrupt crisis in the automotive market globally, recognized by FGA and Iveco primarily for residual value risk on both leased vehicles, vehicles sold under buy-back commitments and used vehicles in stock (€ 166 million).
In 2007, this item reflected a net expense of € 166 million which was mainly attributable to rationalization of several strategic suppliers, some of which were acquired in 2007.

Net profit

Net profit (before minority interests) is € 1,721 million for 2008, compared to € 2,054 million for 2007. On a like-for-like basis, and therefore excluding the impact of unusual expenses and the mark-to-market of the equity swaps, net profit for 2008 would be € 2,374 million, a 15% improvement on 2007.
Net profit attributable to equity holders of the Parent Company is € 1,612 million for 2008 (€ 1,953 million for 2007).

As far as the equity and financial situation are concerned, the following data is presented:

Net debt

At December 31, 2008, **net debt** amounts to € 17,954 million, € 7,531 million higher than the € 10,423 million at December 31, 2007, mainly due to higher working capital and the portfolio of the financial services companies.

€ in millions	**12/31/2008**	12/31/2007	Change
Net consolidated debt	**17,954**	10,423	7,531
- Industrial Activities	**5,949**	(355)	6,304
- Financial Services	**12,005**	10,778	1,227

Equity attributable to the equity holders of the Parent Company

Equity attributable to the equity holders of the Parent Company at December 31, 2008 amounts to € 10,354 million (€ 10,606 million at December 31, 2007). The net decrease of € 252 million is formed by the consolidated net income attributable to the equity holders of the parent (+€ 1,612 million), the net change in the income and expense recognized in equity (-€ 1,090 million), the distribution of dividends (-€ 509 million), the purchase of treasury stock (-€ 238 million) and other net changes (-€ 27 million).

Business outlook

As foreseen at the end of the third quarter, the final three months of 2008 confirmed a significant and widespread deterioration of trading conditions across most of the businesses and most of the geographical areas in which the Fiat Group operates. This deterioration has made it even more difficult to forecast with some degree of accuracy the performance of the sectors in 2009. This uncertainty has been compounded by a severe tightening of credit in all major markets, both at the consumer and corporate level, and has begun to create a liquidity squeeze which will ultimately impact the industrial development of most businesses, including and especially the Fiat Group.

It is believed that there will be a continuation of experiencing erratic fluctuations in market sentiments throughout at the least the first semester. For these reasons, the Fiat Group has chosen a strategy of updating the financial markets on a quarterly basis on expected 2009 performance, as evidence materializes about the ultimate shape and quality of the various product demand curves that are being faced.

Notwithstanding this uncertainty, the Fiat Group is of the view that the following conditions will materialize in 2009:

- global demand for its products will decline approximately 20% compared to 2008;
- group trading profit will be in excess of € 1 billion;
- restructuring charges will amount to approximately € 300 million;
- net profit of the group will be in excess of € 300 million;
- group net industrial cash flows will be in excess of € 1 billion, with net industrial debt levels below € 5 billion, at the end of 2009.

While these are yearly objectives, the Fiat Group expects quarter over quarter performance to be uneven, with the first quarter of 2009 being particularly difficult. Improvements should be visible in the remaining three quarters of 2009, as the impact of the restructuring initiatives begins to be felt.

While working on the achievement of these objectives, the Fiat Group will continue to implement its strategy of targeted alliances, in order to optimize capital commitments and reduce risks.

(15% of capital stock through Ifil Investissements)

The highlights of the consolidated results of the SGS Group in 2008 are as follows:

			Change	
CHF in millions	**2008**	2007	Amount	%
Sales	**4,818**	4,372	446	10.2
Operating profit	**937**	690	247	35.8
Profit attributable to the equity holders of the parent	**692**	500	192	38.4
Consolidated net financial position	**248**	378	(130)	-34.4

During 2008, the SGS Group recorded sales of CHF 4.82 billion, with an increase of 17.7% (at the same exchange rate) year-over-year. Organic growth contributed to 15% of the overall growth in sales, while the remaining approximate 3% can be ascribed to the acquisitions made during the period.
All the divisions and geographical areas in which the Group operates registered gains in sales. The Minerals, Oil, Gas and Chemicals, Consumer Testing, Industrial, Environmental, Automotive and Governments & Institutions, in particular, reported increases of more than 10% compared to the prior year, whereas the growth of sales in all geographical areas is in excess of 14%.

The operating profit before nonrecurring items rose by CHF 99 million (+13.9%) to CHF 810 million and operating profit is CHF 937 million, up CHF 247 million (+35.8%) compared to the prior year.

The profit attributable to the equity holders of the parent increased to CHF 692 million, growing 38.4% over 2007. This result includes net nonrecurring income of CHF 113 million relating to the collection of a receivable from the Philippine government.

The net financial position at December 31, 2008 is positive for CHF 248 million. During the course of 2008, net investments were made for CHF 278 million, acquisitions for CHF 184 million, treasury stock purchases for CHF 201 million and dividends were distributed for CHF 267 million.

Despite the difficulty in making forecasts in the current market scenario, the SGS Group expects to continue to grow in 2009, although at lower rates than in previous years, and to confirm its present operating margins.

In view of SGS's good operating performance in 2008 and the nonrecurring receipt of the above-mentioned receivable, the SGS board of directors put forward a motion to the stockholders' meeting for the distribution of dividends of CHF 50 per share, of which CHF 35 represents ordinary dividends (+40% compared to the prior year). The stockholders' meeting approved the motion on March 24, 2009.

(71.81% of capital stock through Ifil Investissements)

The consolidated data presented and commented below is taken from accounting documents prepared in accordance with IFRS.

			Change	
$ in millions	**2008**	2007	Amount	%

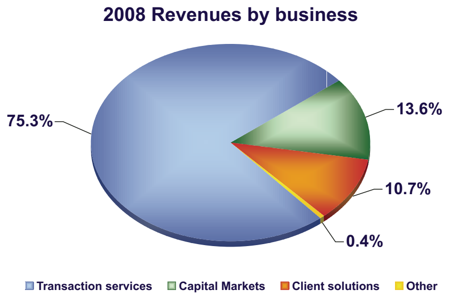
Total	**1,519.8**	1,841.2	(321.4)	(17.5)



2008 Revenues by business

Geographically, the United States, Canada and South America represent 66% of net revenues for the period (with net revenues of $998.7 million, a decrease of 18.5% compared to 2007, in which the group had nevertheless benefited from an exceptionally important transaction for approximately $20 million of revenues in the United States).
Revenue performance declined in Transaction Services and Capital Markets (respectively for -$116.8 million and -$151.7 million) due in part to sharply reduced sales of investment properties and a decline in leasing transactions.

Europe accounts for approximately 29% of consolidated net revenues ($441.2 million, -17.4% compared to 2007). The contraction in revenues is linked in part to the decrease in value of the Pound sterling against the U.S. dollar and in part by the contraction of revenues in all lines of business.

Asia continues to show solid growth with revenues of $78.9 million, +8.8% compared to 2007 and equal to approximately 5% of the consolidated net revenues of the group.
The bulk of this increase, 66%, comes from the excellent growth performance of the Asset Services businesses, particularly Project Management, where revenues increased by 37% compared to 2007, followed by Global Consulting which recorded an increase of +14% on year-over-year revenues. Transaction Services grew by +1%.

As far as global business activities are concerned, Transactions Services revenues represent 75% of total net sales, followed by Capital Markets and Client Services which constitute, respectively, approximately 14% and 11%.

As for operating margins, the Cushman & Wakefield Group reported a gross operating profit of $59 million. This is a sharp reduction compared to approximately $150 million in 2007 (12 months pro-forma) partly due to the worsening of the economic situation in the second part of the year, the period in which the group's activities are traditionally concentrated.

The net result of the group is a loss of $30.9 million, after depreciation and amortization charges for $61.8 million, approximately $38 million of which relates to intangible assets (including the IFIL-RGI transaction in 2007 and the subsequent acquisitions carried out) and after approximately $19 million in goodwill impairments and restructuring costs.

The group has net indebtedness of approximately $150 million at December 31, 2008 compared to net cash of approximately $3 million at the end of 2007.

Business outlook

Owing to the impact of the economic crisis, in the second half of 2008, C&W had already approved cost cutting initiatives and, in the first quarter of 2009, as a result of the continuing deterioration in the global economic conditions, implemented additional initiatives. C&W expects the total savings from these initiatives to be approximately $156 million in 2009.

The actions to be taken to bring structure costs in line with the current operating scenario in concert with further increases in market share and investments in talent will put the C&W Group into a favorable position when the economic picture begins to turn around.
C&W management continues to pursue a strategy aimed at an ever-increasing diversification of activities and geographical areas combined with maintaining an equity structure that is better capitalized than the other operators in the sector, with a view to reducing earnings volatility.

(100% of capital stock)

In a difficult market scenario – marked by the slowdown of the Italian economy and the weakness in demand in the tourism sector – the Alpitour Group closed its financial year at October 31, 2008 with positive results. Reorganization measures and a revision of the business model enabled Alpitour World to strengthen its solid equity and financial base, ensuring an increasing return on invested capital.

In 2007/2008, the tourism segment showed signs of being sharply affected by the difficult global macroeconomic state of affairs. After a winter season featuring extraordinary outside events, such as the temporary closing of the Kenya destination, forced by the problematical local political situation, the summer season evidenced a considerable decline in demand which manifested also itself, contrary to the past, by a noticeable falloff in last-minute bookings.

Despite this scenario, the group's sales recorded a slight increase over the prior year, profit from ordinary operations is € 21.8 million and profit attributable to the equity holders of the parent is € 3 million. At the balance sheet level, a further and significant improvement was recorded in the consolidated net financial position which reached € 33.6 million, almost double that of € 17.3 million at October 31, 2007.

The key profit and equity data for the financial years 2007/2008 and 2006/2007 is as follows:

			Change	
€ in millions	**2007/2008**	2006/2007	Amount	%
Net sales	**1,237.3**	1,236.0	1.3	0.1
Contribution margin	**209.6**	211.0	(1.4)	-0.7
Profit from ordinary operations	**21.8**	24.4	(2.6)	-10.7
Profit attributable to the equity holders of the parent	**3.0**	7.5	(4.5)	-60.0
Equity attributable to the equity holders of the parent	**84.2**	78.8	5.4	6.9
Consolidated net financial position	**33.6**	17.3	16.3	n.s.

Consolidated net sales for the year 2007/2008 total € 1,237.3 million, an amount basically in line with the prior year (€ 1,236 million). The positive effects of the growth in sales of the M.I.C.E. division, and the incoming and aviation divisions which significantly raised their commercial transactions with third-party operators, have been offset by the contraction in sales recorded by the tour operating and hotel segments.

The contribution margin is equal to € 209.6 million, compared to € 211 million in 2007/2008, with the sales ratio at 16.9%, more or less the same as last year. Targeted rationalization policies and flexibility in direct overheads (a reduction in guarantee commitments), combined with sales policies put into place to support margins and sales, led the way to containing and mitigating the negative effects of the increase in the costs of direct services and raw materials (fuel) and protecting sales volumes in a market troubled by widespread weakness.

In 2007/2008, the profit from ordinary operations is € 21.8 million, against € 24.4 million in the prior year.

The profit attributable to the equity holders of the parent is € 3 million, compared to a corresponding profit of € 7.5 million in 2006/2007. Excluding the effect of nonrecurring income from the disposal of investments for € 7.8 million posted in 2006/2007, the profit for the year 2007/2008 would show an increase of approximately € 3.3 million.

Equity attributable to the equity holders of the parent went from € 78.8 million to € 84.2 million in 2007/2008, while the net financial position of the group at October 31, 2008 is positive for € 33.6 million, with an increase of € 16.3 million compared to October 31, 2007. The change is due mainly to operating cash flows during the year.

Consolidated sales by division of the Alpitour Group are as follows:

			Change	
€ in millions	**2007/2008**	2006/2007	Amount	%
Tour operating	**872.9**	879.8	(6.9)	-0.8
Hotel	**98.9**	112.8	(13.9)	-12.3
Aviation	**151.0**	153.7	(2.7)	-1.8
Distribution	**34.6**	34.3	0.3	0.8
Incoming	**271.2**	274.1	(2.9)	-1.1
Incentive e Grandi Eventi	**35.2**	28.6	6.7	23.4
Total	**1,463.7**	1,483.2	(19.5)	-1.3
Elimination of intragroup transactions	**(226.4)**	(247.2)	20.8	-8.4
Total	**1,237.3**	1,236.0	1.3	0.1

As far as Tour Operating is concerned, compared to the prior year, 2007/2008 shows a contraction in volumes of -5.6%. In fact, the number of passengers is 845 thousand against 895 thousand passengers in 2006/2007. Sales, as a consequence, show the same trend, although to a lesser degree, and total € 872.9 million (€ 879.8 million in the year 2006/2007), equal to a reduction of 0.8%. These trends are not only due to an overall slowdown in demand concentrated mainly in the summer season but also to a different sales mix marked by a more favorable portfolio on some long-haul destinations (the Orient, Madagascar and North America) and top-of-the-line products (Viaggidea) as well as a commercial policy aimed at maintaining sales prices the same as those in the catalog.

With the aim of continually protecting margins and maintaining discounted sales at a normal level, the company has again launched an early booking campaign in which customers are offered lower rates. Such actions have indeed made it possible to optimize the costs and the risks related both to services on land and plane seat availability, besides producing benefits in the programming of operations.

In 2007/2008, compared to the prior year, a significant improvement was noted in destinations to Egypt, the Orient, Madagascar and North America, the latter because of the favorable USD/Eur exchange rate. Instead, a decline was noted in destinations to the Caribbean, continental Spain, the Canary Islands, the Balearic Islands, Europe and Italy, as well as Africa. That last destination, in particular, was heavily penalized by the effects generated by political tensions in Kenya.

The hotel sector in 2007/2008 recorded sales of € 98.9 million against € 112.8 million in the prior year, including € 33.4 million from tour operators of the group (€ 41.7 million at October 31, 2007). The decrease in sales from last year (approximately -12.3%) is largely the result of the deconsolidation of the “Kelibia” structure (sold to others in October 2007), “Villaggio Bravo Kiwengwa” (sold to others in January 2008) and “Hotel Mediterraneo” (sold to others in July 2008) and three Italian hotel structures whose leases expired during the previous year. The weakness of the U.S. dollar against the euro also produced a negative effect on the flow of American tourists to Rome. This caused a contraction of revenues from the city hotel structures compared to trends in 2006/2007.

The aviation division, headed by the Neos airline company, reported sales of € 151 million in 2007/2008 (€ 153.7 million in 2006/2007), including € 86.7 million with the group (€ 91.1 million in 2006/2007). The year just ended was characterized by a winter program which included new long-haul destinations (Guadalupe and Madagascar) and an approximate 2.8% increase in traffic with third-party operators. In summer season, on the other hand, lease contracts were signed with two third-party operators using a wet lease formula for two B767-300 aircraft and the addition of some new short-haul charter destinations (Turkey and Tunisia).

The distribution sector operates through the Welcome Travel agency network which manages 740 agencies (63 owned, 38 partnerships and 639 affiliates), 87 more agencies since October 3 ,2007. In 2007/2008, the distribution sector reported sales of approximately € 34.6 million compared to € 34.3 million in 2006/2007. Lastly, during the year 2007/2008, the Welcome Travel agency network registers brokered sales volumes of approximately € 800 million against a corresponding amount of € 700 million in the prior year.

The incoming sector (Jumbo Tours Group), during 2007/2008, posts sales of € 271.2 million (€ 274.1 million in 2006/2007), including € 87.7 million with the Alpitour Group (€ 94.1 in the preceding year). The increase in sales from third-party operators, equal to 1.9%, was more than offset by the contraction in volumes generated by the group which reported a decline mainly over the entire area of Spain (continental Spain, the Balearic Islands and the Canary Islands).

The M.I.C.E. sector, headed by the company AW Events, has sales of € 35.2 million in the year 2007/2008, compared to € 28.6 million in the prior year (+23.4%).
These results, which represent an important inversion of the trend compared to the difficulties experienced in the last two years, can mainly be ascribed to the positive effects of the conferral of the Fiorio Management S.r.l. business segment to FRI M.I.C.E. S.r.l., at the end of the previous year. The marriage of the two leaders in the M.I.C.E. sector has, in fact, brought synergies in terms of know-how, a better rationalization of resources as well as a broader and diversified product offering to the clientele. The increase in sales also led to an inversion of the profit trend so that margins are once again positive.

Business outlook

The onset of the new winter season 2008/2009 is confirming signs of a slowdown that were already evident in the second half of the year ended October 31, 2008.
The overall climate of uncertainty which has clouded the economic scenario has also had a severe impact on the tourism industry. With the exception of New Year's, where the results are considered satisfactory, the early months of the year, compared to the same period of 2007-2008, recorded a decline in sales, including the order portfolio for future travel, and a further focus of the client on the price, a sign of a generalized reduced capacity for spending.
Nevertheless, in the year 2008-2009, the Alpitour Group will be involved in more development and investment activities aimed at consolidating its leadership position in the Italian market with a view to the long term. In light of the difficult economic state of affairs in which the group is operating, all the companies are implementing plans aimed at reducing and containing structure costs without penalizing growth efforts.

The group's objective for the current year is to confirm the profitability achieved in 2008, consolidate the return on invested capital and further improve the financial situation. These objectives, nonetheless, cannot be achieved without a recovery in consumer and market confidence, in addition to a lasting serene international political situation.

(60% of capital stock)

The following data and comments are taken from the half-year report at December 31, 2008. Since Juventus F.C.’s financial year ends on June 30 of every year, and in view of the highly seasonal nature typical of this sector, the data presented should not be construed as representing the basis for a full-year projection.

€ in millions	**I Half 2008**	I Half 2007	Change
Revenues	**124.0**	106.8	17.2
Operating income	**17.8**	5.8	12.0
Net income	**14.6**	0.3	14.3

	12/31/2008	6/30/2008	Change
Shareholders' equity	**109.9**	95.4	14.5
Net financial position	**11.3**	11.3	0.0

Revenues for the first half of 2008/2009 total € 124 million. This is an increase of 16.1% compared to € 106.8 million in the first half of the prior year due mainly to higher income from radio and television rights recorded following participation in the UEFA Champions League games.

Operating costs in the first half totaling € 91.6 million rose by 6.2% compared to € 86.3 million in the corresponding period of the prior year due mainly to higher salaries paid to players.
Amortization and writedowns of players' rights in the six months total € 13.9 million. This is an increase compared to € 13.3 million in the first half of 2007/2008 and is largely the effect of investments and disposals made during the first phase of the Transfer Campaign 2008/2009.

Operating income in the first half is € 17.8 million compared to € 5.8 million in the first six months of 2007 while net income amounts to € 14.6 million against € 0.3 million in the same period of the prior year.

Shareholders' equity at December 31, 2008 is € 109.9 million, an increase compared to € 95.4 million at June 30, 2008, attributable primarily to the net income for the period.

Net financial position at December 31, 2008 is positive for € 11.3 million, unchanged compared to June 30, 2008.

With regard to significant events subsequent to December 31, 2008, these are described in the following paragraphs.

Stadium Project
On February 23, 2009, the PRIN was approved definitively and without observations by the Turin City Council. At the same time, the City Council approved the new agreement that regulates the long-term lease related to the whole area to take into account the variations that have taken place for the new stadium project and related commercial areas. The final approval of the PRIN, after the outcome of the VIA (Environmental Impact Assessment) verification procedure, will make it possible to issue the building permits and construct the new stadium and the adjacent commercial area.

When these building permits are issued, the preliminary sales contract signed with Nordiconad Soc. Coop. on December 19, 2008 will come into force. This envisages the construction of an innovative, modern commercial center integrated into the area surrounding the Stadium. This preliminary contract involves Juventus F.C.'s sale to Nordiconad, by September 30, 2009, of the business segment including part of the areas acquired with the long-term lease, the project for the commercial areas and the commercial authorizations for them, for a sum of € 20.25 million, € 4 million of which has already been received as a deposit, € 4.25 million to be received when

the notary public's deed of sale of the business segment is signed, € 1 million to be received on completion of the work. The remaining € 11 million will be settled by Nordiconad with the City of Turin as the balance of the sum still due by Juventus F.C. to the City for the acquisition of the long-term lease of the area. Nordiconad has also assumed responsibility for the urbanization fees (expenses for the utilities and infrastructures for the commercial areas).
It is estimated that, at the time of the actual transfer of the business segment, the overall economic effect of the sale should be positive for approximately € 3 million.

Sale of Campi di Vinovo S.p.A.
In reference to the sale to Costruzioni Generali Gilardi S.p.A. (hereafter "CGG") of the investment in Campi di Vinovo S.p.A. made in the previous year, news has been received that Campi di Vinovo S.p.A. has concluded the administrative process linked to the commercial authorizations, including the design modifications envisaged by the contract signed on July 26, 2007 between Juventus F.C. and the buyer CGG. On December 22, 2008, Costruzioni Generali Gilardi S.p.A. notified Juventus F.C. that the other company with which it had signed an agreement for the development of the "Mondo Juve" commercial center indicated that it did not wish to execute the contract. As a result of the difficulty in executing the above contract, Costruzioni Generali Gilardi S.p.A. was not able to make the payment by December 31, 2008 as established in the agreements signed with Juventus F.C. on July 26, 2007 (€ 12.5 million). Following Costruzioni Generali Gilardi S.p.A.'s explicit request, on February 5, 2009, Juventus F.C. and Costruzioni Generali Gilardi S.p.A. then signed a private contract for the novation and integration of the previous agreements in order to change the payment terms of the installment due on December 31, 2008 as follows: € 4 million by February 20, 2009 (duly paid) and the remaining € 8.5 million by December 20, 2009, which can be extended by agreement between the parties upon payment of interest to Juventus F.C.. As for the other payment dates fixed in the July 26, 2007 contract (€ 12.5 million at the end of the first year after the commercial center is opened to the public and, in any case, no later than December 31, 2012, and € 17.4 million at the end of the second year after the opening of the commercial center to the public and, in any case, no later than December 31, 2013), these dates may be postponed if and when Costruzioni Generali Gilardi S.p.A. obtains the extension of the commercial permits relating to the initiative (currently expiring in 2013).

Business outlook

Based upon the information currently available and in the absence of any events of an extraordinary nature, Juventus F.C. expects to close the year basically with a breakeven.

SEQUANA

(26.65% of capital stock through Ifil Investissements)

The highlights of the consolidated results of the Sequana Group in 2008 are as follows:

	Reported	Pro-forma	Reported	Change 2008 vs Pro-forma 2007	
€ in millions	**2008**	2007	2007	Amount	%
Net sales	**4,951**	5,158	4,290	(207)	-4.0
Gross operating profit	**221**	232	192	(11)	-4.7
Trading profit	**136**	158	113	(22)	-13.9
Current profit	**68**	99	74	(31)	-31.3
Profit (loss) attributable to the equity holders of the parent	**(428)**	155	142	(583)	n.s.
Equity attributable to the equity holders of the parent	**714**	1,287	1,287	(573)	-44.5
Net indebtedness	**791**	771	771	20	2.6

The 2007 "Pro-forma" results include the Dalum Papir A/S and Map Merchant activities from January 1, 2007 and the reclassification of the Papiers Autocopiants and Décor Asie activities of Arjowiggins to "Profit from discontinued operations".
For purposes of a more meaningful comparison between the two years, the comments that follow and the changes in the income statement figures and percentages in the table are calculated on the "Pro-forma" 2007 results on a like-for-like basis.
Gross operating profit is equal to trading profit before depreciation and amortization charges.

Sequana sales for 2008 amount to € 4,951 million, with a decrease of 4% (0.5% at stable exchange rates).
Higher raw materials and energy prices, combined with a reduction in sales volumes in the second half of 2008, adversely affected gross operating profit which declined by 4.7% from 2007 to € 221 million.
The trading profit is equal to € 136 million, down by 13.9% from 2007, equivalent to an operating margin of 2.7%.
The current profit is equal to € 68 million, down by 31.3% from 2007 (€ 99 million).
The loss attributable to the equity holders of the parent is -€ 428 million (equal to a diluted loss per share of € 8.7) and reflects the recognition of nonrecurring losses in 2008 for € 496 million.

Net debt is equal to € 791 million at the end of December 2008 compared to € 771 million at December 31, 2007.
The increase of € 20 million is largely due to investments, restructuring expenditures and dividends distributed which are offset by a better management of working capital compared to the prior year.

Antalis generated sales of € 3.4 billion in 2008, a decrease of 6.1% compared to 2007 (-2.7% at stable exchange rates).
In the first half, Antalis strengthened its competitive position in Europe following the integration of Map's activities and its presence in geographical areas and business segments in rapid expansion. Conversely, the trend in the second half was severely hampered by the economic crisis, causing a noticeable decline in sales in Europe and, to a lesser degree, in the rest of the world.
Notwithstanding the downturn in sales volumes, the positive effect of the integration of Map allowed Antalis to maintain its operating profit at the same level as 2007 and slightly increase its operating margin to 2.7% (2.6% in 2007).

The greatest benefits from the integration of Antalis with Map are expected to occur during 2009, for an estimated amount of € 28 million, on an annual basis. Moreover, Antalis will continue to pursue its structural plan to cut costs through the disposal of non-strategic assets (the proceeds from the disposal of the Bernard Dumas and Antalis Promotional Products activities, for approximately € 50 million, are expected to be received in 2009).

Arjowiggins reported sales of € 1.8 billion, a decrease of 1.7% compared to 2007, but an increase of 1.5% at comparable exchange rates.
In the first half, the policy raising sales prices was able to compensate the negative impact of higher raw materials and energy costs.
In the second half, the benefit from the reduction of those external costs was thwarted by the sharp fall in demand (especially in the last quarter of the year) which led to a decrease in gross operating profit for the year of 18% compared to 2007.

The restructuring plan begun in 2008 is beginning to bear the first positive results in terms of structure costs, making it possible for Arjowiggins to confront the current market crisis and the difficult prospects of the economic situation in 2009 in the best manner possible.
The objective of maintaining the product pricing policy means that Arjowiggins will introduce further actions aimed at reducing excess production capacity.
The closing of the factories at Dartford and Bor will reduce production capacity by 30% overall, producing a benefit in terms of lower costs equal to € 20 million on an annual basis.

Given the difficult economic scenario, the board of directors has voted not to put forward a motion to the stockholders' meeting convened for May 27, 2009 for the payment of dividends.

Business outlook

In 2009, Antalis should fully benefit from the synergies connected with the acquisition of Map (€ 28 million on an annual basis), a different product mix thanks to the integration of the creation papers business and will continue to pursue strategies to reduce structure costs.
At the same time, the efforts that have already been undertaken by Arjowiggins during 2008 to reduce production capacity and the relative structure costs, will be continued during 2009 with the aim of maintaining the current pricing policy.
Overall, the plans to cut costs should result in savings at the group level estimated in a range of between € 35 million and € 50 million a year.

Notwithstanding the very difficult economic situation in 2009, the group confirms its financial capacity to support the action plans underway, also by way of continuing a vigilant and more efficient management of its working capital.

EXOR S.A. (Luxembourg) (formerly Ifil Investissements S.A.)

(100% of capital stock directly)

The highlights of the financial statements at December 31, 2008, prepared under the laws of Luxembourg, are as follows:

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

1. Notice

On February 20, 2009, the deed was signed for the merger by incorporation of IFIL Investments S.p.A. in IFI – Istituto Finanziario Industriale S.p.A., which assumed the new name of EXOR S.p.A., with effect from March 1, 2009.

On the same date, the board of directors and the board of statutory auditors of the merged company resigned.

This Annual Report 2008 of IFIL Investments S.p.A. was approved by the board of directors of EXOR S.p.A., the surviving company, in its meeting held on March 25, 2009.

The merger will not modify the Group's programs as EXOR, which already had control of IFIL, will continue its investments activities.

2. General information on the activities of the company

Please refer to the Introduction in the Report on Operations.

3. General principles for the basis of presentation of the separate financial statements

Starting from the financial year 2006, the separate financial statements of IFIL S.p.A. have been prepared in conformity with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and recognized by the European Community in accordance with Regulation 1606/2002 of the European Parliament and Council dated July 19, 2002. The designation IFRS also includes all valid International Accounting Standards (IAS), as well as all interpretations of the International Financial Reporting Interpretations Committee (IFRIC), formerly the Standing Interpretations Committee (SIC).

The disclosure required by IFRS 1 – First-time Adoption of IFRS, relative to the effects of the transition to IFRS, was presented in a specific Appendix to the separate financial statements at December 31, 2006.

The separate financial statements have also been prepared in accordance with the provisions contained in Consob Resolutions 15519 and 15520 dated July 27, 2006 and in Communication 6064293 dated July 28, 2006, pursuant to art. 9, paragraph 3, of Legislative Decree 38 dated February 28, 2005.

4. Formats of the separate financial statements and other information

The separate income statement is presented using a classification based on the nature of the revenues and expenses, with the presentation of investment income (charges) and financial income (expenses) taking preference since these items are characteristic of IFIL S.p.A.'s activities.

In the separate balance sheet, the current/non-current distinction has been adopted for the presentation of assets and liabilities.
A specific section of the separate statement of changes in equity presents the total income and expense recognized directly as an increase or decrease of reserves.

The separate statement of cash flows is presented using the indirect method, which reconciles cash and cash equivalents at the beginning and the end of the year.

The year-end closing date is December 31 of each year and covers a period of 12 months.

The Euro is the company's functional currency and presentation currency.

In the separate financial statements, the amounts are present in Euro.
The notes are expressed in thousands of Euro, unless otherwise indicated.

Major events in 2008 and in the first two months of 2009 are presented in a specific section of the Report on Operations. Note should be taken of the fact that on March 1, 2009, the merger by incorporation of IFIL S.p.A. in IFI S.p.A. took effect and IFI S.p.A. assumed the name of EXOR S.p.A..

5. Related party transactions, unusual and/or atypical transactions and significant nonrecurring events and transactions

Related party transactions

The balance sheet and income statement balances generated by transactions with related parties are shown separately in the financial statement formats and commented in Note 39.

Stock option plan with underlying Alpitour stock

At December 31, 2008, the liability in respect of the stock option plan with underlying Alpitour stock amounts to € 8.1 million compared to € 15.9 million at December 31, 2007. The difference of € 7.8 million was recorded in the income statement in "Other nonrecurring income (expenses) from related parties". Additional information is provided in Note 30.

Other than what has been indicated, there are no other significant nonrecurring events or transactions or unusual and/or atypical transactions that require mention pursuant to Consob communication 6064293 dated July 28, 2006.

6. Significant accounting policies

General principle

The financial statements of IFIL S.p.A. are expressed in Euro and are prepared under the historical cost convention, except where the use of fair value is required for the measurement of certain available-for-sale financial instruments and those held for trading, as well as under the going concern assumption insofar as the surviving company, which already held control of IFIL, will continue its activities.
Despite operating in a difficult economic and financial environment, the EXOR S.p.A. directors have in fact assessed that no material uncertainties exist (as defined in paragraph 23 of IAS 1) about EXOR S.p.A.'s ability to continue as a going concern.

Investments accounted for at cost

Investments in subsidiaries and associates are stated at cost and tested for impairment if, and only if, there is objective evidence of an impairment due to one or more events which occurred after initial recognition which have an impact on the future cash flows of the subsidiaries and associates and on the dividends which they could distribute. For IFIL S.p.A., this objective evidence is a significant and prolonged decline in the market prices to below cost of a directly and indirectly owned subsidiary or associate, together with its continuing negative operating performance. In these cases, the impairment is determined as the difference between the carrying amount of the investment and its recoverable amount, usually determined on the basis of the higher of the value in use and fair value.

At each balance sheet date, IFIL S.p.A. assesses whether there is any objective evidence that an impairment loss of an investment recognized in prior years may no longer exist or may have decreased. A significant or prolonged rise in the market price of the subsidiary or associate, together with its continuing positive operating performance is considered as objective evidence. In these cases, the recoverable amount of the investment is re-measured and, if necessary, the carrying amount is increased up to the cost of the investment.

Available-for-sale investments and non-current other financial assets
These are measured at fair value which coincides, for listed investments, with the market price on the last day of the period. Unrealized gains and losses are recognized directly in equity, net of the relevant deferred tax effect. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity is reversed and recognized in the income statement. Such impairment losses may not later be reversed through the income statement.

Upon disposal of the asset, the accumulated gains or losses recorded in equity are credited or debited to the income statement.

Financial assets held for trading
Financial assets held for trading include equity shares, credit instruments and other forms of investment of liquidity, as well as derivative instruments for trading.

Financial assets purchased originally for resale in the short-term are measured at year end at fair value using, for listed securities, the market price translated, if necessary, at the year-end exchange rate; the fair value adjustment is recorded with a corresponding entry in the income statement.

Receivables and payables
Receivables are initially recognized at their nominal amount which substantially coincides with fair value.
If there is objective evidence of an impairment loss or a risk that the company will not be able to collect the contractual amount (principal and interest) at the contractually agreed dates, a provision is set aside which corresponds to the difference between the asset's carrying amount and the present value of estimated recoverable future cash flows, discounted at the effective interest rate.
Payables are initially recognized at their nominal amount, reduced by expenses incurred to assume them and increased by interest expense due, if any. Payables are subsequently measured at amortized cost using the effective interest method.

Treasury stock
The cost of any treasury stock purchased and/or held, also through subsidiaries, as a result of specific stockholder resolutions, is recognized as a deduction from equity and, therefore, the reserve offsetting treasury stock in portfolio is not shown separately. The proceeds from any subsequent sale are recognized as movements in equity.

Employee benefits – Pension plans
The pension plans are currently either defined contribution or defined benefit plans.

Under defined contribution plans the company pays contributions to outside, legally separate entities with administrative autonomy, which frees the employer from any subsequent obligation as the outside entity assumes the commitment to pay what is due to the employee. Following the changes in regulations for employee severance indemnities pursuant to Law 296 dated December 27, 2006 (Budget Law 2007) and later decrees and regulations, defined contribution plans include the portions of employee severance indemnity accruing from January 1, 2007. However, since IFIL S.p.A. has less than 50 employees, the employee severance indemnities are calculated using the customary actuarial method established in IAS 19 and adopted in prior years, except for the exclusion of the pro rata application of the service rendered for employees who transfer the entire amount accrued to the supplementary pension fund.

Consequently, for those who transfer the entire amount accrued to the supplementary pension fund, the company records the contribution paid as an expense and no additional obligation is recognized.

Defined benefit plans include post-employment benefits, other than those under defined contribution plans. Under defined benefit plans, the company has the obligation to set aside the costs relating to the benefits guaranteed to its employees in service. The actuarial risk and the investment risk are thus substantially borne by the company.

Defined benefit plans, which include employee severance indemnities, taking into account what was described above, are measured by actuarial techniques using the Projected Unit Credit Method.

As provided by the amendment to IAS 19 – Employee Benefits, issued by the IASB in December 2004, IFIL S.p.A. has elected to recognize actuarial gains and losses immediately in the period in which they arise, outside the income statement, in a statement of recognized income and expense.

All cumulative actuarial gains and losses that existed at January 1, 2005 have been recognized in equity.

For defined benefit plans, the expenses relating to the increase in the present value of the obligation, due to the fact that the payment date of the benefits is nearing, are recognized in financial expenses.

Payments relative to defined contribution plans are recognized as an expense in the income statement as incurred.

Defined benefit plans may be unfunded or they may be wholly or partly funded by contributions paid by the employer and the employee plan participants to an entity, or fund, that is legally separate from the employer and from which the employee benefits are paid.

The liability for defined benefit plans is calculated on an individual basis and takes into account life expectancy, personnel turnover, salary changes, revaluation of the yields, inflation and the present value of the amounts to be paid.

Employee benefits – Stock option plans

Stock option plans with underlying IFIL S.p.A. stock

Stock-based payments to employees are measured at the fair value of the equity instruments at the grant date.

In accordance with IFRS 2 – Share-based Payment, the full amount of the fair value of stock options at the grant date is recognized in the income statement in personnel costs on a straight-line basis over the period from the grant date to the vesting date with a corresponding entry directly in equity, based upon an estimate of the number of options that is expected to vest. Changes in fair value after the grant date have no effect on the initial measurement.

The cost is recalculated each year based upon a revision of the above-indicated estimate.

The compensation component deriving from stock options plans with underlying IFIL S.p.A. stock but relating to employees of other group companies, under IFRIC 11, is recorded as a capital contribution in favor of the subsidiaries in which the beneficiaries of the stock option plans are employees and consequently recorded as an increase in the relative value of the investments, with a corresponding entry recorded directly in equity.

Stock option plans with underlying stock of the subsidiary Alpitour S.p.A.

This is a stock option plan that requires a monetary payment equal to the increase in the value of the company. The fair value of the liability of the plan is re-measured at each reporting date until its extinction.

The cost is recognized in the income statement in “Other nonrecurring expenses” with a corresponding entry to “Other payables to related parties”.

If the payable to related parties decreases, the resulting income is recognized in the income statement in “Other nonrecurring income from related parties”.

Debt

Interest-bearing debt is recognized at cost which corresponds initially to the fair value of the amount received net of directly attributable costs. Debt is subsequently measured at amortized cost. The difference between amortized cost and the amount to be repaid is recognized in the income statement on the basis of the effective interest rate over the period of the loan.

Debt is classified in current liabilities unless the company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

The amortized cost of a financial liability is the amount at which the financial liability was recognized initially net of principal repayments, increased or decreased by the total amortization on any difference between the initial amount and the maturity amount using the effective interest method.

The effective interest rate is a method for calculating the amortized cost of a financial liability and allocating the interest over the period of reference. The effective interest rate is the rate that exactly discounts future cash flows for estimated payments (including transaction costs paid) over the expected life of the financial instrument or, if appropriate, over a shorter period, to the net carrying amount of the financial liability.

Derivative financial instruments and hedge relationships

Derivative financial instruments are recognized initially at fair value at the date the contracts are entered into and are subsequently measured at fair value at year-end. The resulting gains or losses are recognized in the income statement immediately, unless the derivative is designated and is effective as a hedging instrument, in which case the times for recognition in the income statement depend upon the nature of the hedge relationship. IFIL S.p.A. designates certain derivatives as fair value hedges of certain assets or liabilities recognized in the financial statements or as cash flow hedges of certain highly probable forecast transactions.

A derivative is classified as a non-current asset or liability if the maturity date of the instrument is beyond 12 months and it is not expected to be realized or settled within 12 months. Other derivatives are classified as current assets or liabilities.

Financial instruments qualify for hedge accounting only when there is formal designation and documentation, including the company's risk management objective and strategy, and the hedge, verified periodically, is highly effective.

When financial instruments qualify for hedge accounting, the following accounting treatment applies:

- Fair value hedge: where a derivative financial instrument is designated as a hedge of the exposure to changes in fair value of a recognized asset or liability that is attributable to a particular risk and could affect the income statement, the gain or loss from re-measuring the hedging instrument at fair value is recognized in the income statement, together with the change in fair value of the hedged item. The gain or loss from the change in fair value of the hedging instrument is recognized on the same line of the income statement as the hedged item.

- Cash flow hedge: where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows of a recognized asset or liability or a highly probable forecast transaction and could affect profit or loss, the effective portion of any gain or loss of the derivative financial instrument is recognized directly in equity. The cumulative gain or loss is removed from equity and recognized in the income statement at the same time in which the hedged transaction affects the income statement. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in equity and is recognized in the income statement at the same time the related transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in equity is recognized in the income statement immediately.

If the conditions of IAS 39 are not met, the transactions, even if they have been set up for the purpose of managing risk exposure, are classified and measured as trading transactions. In that case, the difference from fair value is recognized in the income statement.

Financial income and expenses, other revenues and costs

Dividends are recognized in the income statement when they are approved by the stockholders and only from the earnings generated after the acquisition of the investee company. Instead, when the dividends are distributed from reserves generated before acquisition, the dividends are reported as a deduction from the cost of the investment.

Dividends from available-for-sale investments are in any case recognized in the income statement.

Financial income and expenses are recognized according to the accrual principle on the basis of the effective rate of return.

Revenues from services are recognized by reference to the stage of completion of the service at the balance sheet date.

The expenses incurred by IFIL (and by the surviving company EXOR) in 2008 have been recognized in “Current assets – Other receivables” and as a result do not impact the profit for the year. Such expenses together with those incurred in 2009, by EXOR and IFIL, will be charged directly as a deduction from additional paid-in capital which will be generated by recording the capital stock increase carried out to service the exchange ratio of the canceled IFIL shares.

Transactions in foreign currencies

Transactions in foreign currencies are recorded at the foreign exchange rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the foreign exchange rate prevailing at that date. Exchange differences arising on the settlement of monetary items or on reporting monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements are recognized in the income statement.

Income taxes

Current income taxes are calculated according to the tax laws in force.
Taxes on income are recognized in the income statement except to the extent that they relate to items directly charged or credited to equity, in which case the related income tax effect is recognized directly in equity.

Temporary differences between the amounts of assets and liabilities in the financial statements and the corresponding amounts for tax purposes give rise to temporarily deferred tax liabilities on the taxable temporary differences recorded in a specific provision in liabilities. Deferred tax assets relating to the carryforward of unused tax losses, as well as those arising from deductible temporary differences, are recognized to the extent that it is probable that future profits will be available against which they can be utilized.

Deferred tax assets and liabilities are measured at the tax rates expected to apply to taxable income in the periods in which the temporary differences will reverse. Deferred income tax assets and liabilities are offset where there is a legally enforceable right of offset.

Deferred tax assets and liabilities are shown separately from other tax receivables and payables in a specific line item under non-current assets or liabilities.

Principal sources of uncertainty in making financial statement estimates

The preparation of financial statements and related disclosures that conform to IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results could differ from those estimates. Estimates particularly refer to the measurement of investments (impairments and writebacks). Estimates and assumptions are reviewed periodically and the effects of any changes are recognized immediately in the income statement in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

In this respect, the situation caused by the present economic and financial crisis has led to the need to make assumptions regarding future performance which are characterized by significant uncertainty; as a consequence, therefore, it cannot be excluded that, in the surviving company, EXOR, results may arise during the next year which differ from estimates, and which therefore might require adjustments, even significant, to be made to the carrying amount of the items in question, which at the present moment can clearly neither be estimated nor predicted. The line items most affected by these situations of uncertainty relate to investments accounted for at cost and available-for-sale investments. In particular, the following should be noted:

- for the reasons described in Note 19, it is deemed that conditions did not exist at December 31, 2008 for conducting an impairment test on the investment in Fiat S.p.A.;
- the carrying amount of other listed investments, accounted for at cost or at fair value, were below the market prices at year-end 2008;
- for other unlisted investments, accounted for at cost, the assessments carried out did not evidence any factors of impairment.

7. Adoption of new accounting standards, amendments and interpretations issued by the IASB

<u>Interpretations and amendments to standards effective from January 1, 2008 but not applicable to the company</u>

The following interpretations and amendments, applicable for 2008, relate to matters that are not applicable to the company.

- IFRIC 12 – Service Concession Arrangements (applicable from January 1, 2008).
- IFRIC 14 – IAS 19 - The Limit on a Defined Asset and Minimum Funding Requirements (applicable from January 1, 2008).
- Amendment to IAS 39 – Financial Instruments: Recognition and Measurement and IFRS 7 – Financial Instruments: Disclosures that would permit the reclassification of some non-derivative financial assets which are classified under the “fair value through

profit or loss" category in particular circumstances. The amendment also permits the transfer of loans and receivables from the "available-for-sale" category to the "held to maturity" category where the company has the intention and ability to hold such instruments for a specific future period. Although this amendment applies from July 1, 2008, it has had no effect on the financial statements presented herein as none of the reclassifications permitted by the amendment were carried out by the company.

Accounting standards, amendments and interpretations for which the company has not elected early adoption

On March 29, 2007, the IASB issued a revised version of IAS 23 – Borrowing Costs. The standard is applicable from January 1, 2009. The main change from the previous version is the removal of the option of immediately recognizing as an expense borrowing costs that relate to assets that take a substantial period of time to get ready for use or sale. The standard will be applicable prospectively to borrowing costs relating to qualifying assets capitalized starting from January 1, 2009.

On September 6, 2007, the IASB issued a revised version of IAS 1 - Presentation of Financial Statements which applies from January 1, 2009. The revised standard requires an entity to present changes in its equity resulting from transactions with owners in a statement of changes in equity. All non-owner changes (meaning changes in comprehensive income) are required to be presented either in a single statement of comprehensive income or in two statements (a separate income statement and a statement of comprehensive income). Transactions with non-owners may not be presented in the statement of changes in equity.

Adoption of this standard will have no effect on the measurement of items in the financial statements.

On January 17, 2008, the IASB issued an amendment to IFRS 2 – Vesting Conditions and Cancellations which clarifies that for the purpose of share-based payments measurement, vesting conditions are service conditions and performance conditions only. It also specifies that all cancellations, whether by the entity or by other parties, should receive the same accounting treatment. The company will apply this amendment retrospectively from January 1, 2009; no effects are expected from its adoption.

On May 22, 2008, the IASB issued an amendment to IFRS 1 – First Time Adoption of International Financial Reporting Standards and IAS 27 – Consolidated and Separate Financial Statements which allows companies adopting IFRS for the first time from January 1, 2009 and electing to recognize investments in subsidiaries, associates and joint ventures in the separate financial statements at cost, to use one of the following methods:

- cost determined in accordance with IAS 27;
- revalued cost measured on a fair value basis at the date of transition to IFRS or the carrying amount of the investment at the date of transition measured in accordance with local GAAP.

The amendment requires that all dividends received from subsidiaries, joint ventures and associates must be recognized in the parent company's income statement when the right to receive those dividends is established. Revisions to IAS 36 – Impairment of Assets require that, when evaluating whether impairment exists, if an investee company has distributed a dividend, the following must be considered:

- whether the carrying amount of the investment in the separate financial statements exceeds the book value of that company's net assets (including any associated goodwill) as recognized in the consolidated financial statements;
- whether the dividend exceeds the comprehensive income of the investee for the period to which the dividends relate.

The amendments are applicable prospectively from January 1, 2009.

On May 22, 2008, the IASB issued a series of amendments to IFRS ("Improvements"); details are provided in the following paragraphs of those identified by the IASB as resulting in accounting changes for presentation, recognition and measurement purposes, leaving out amendments regarding changes in terminology or editorial changes which are likely to have minimal effects in terms of accounting and effects on the consolidated financial statements.

- IAS 1 – Presentation of Financial Statements (revised in 2007): this amendment, applicable from January 1, 2009, requires an entity to classify assets and liabilities arising from derivative financial instruments that are not classified as held for trading between current and non-current assets and liabilities. Adoption of this improvement will have no effect on the measurement of items in the financial statements.
- IAS 23 – Borrowing Costs: this amendment, applicable from January 1, 2009, revises the definition of borrowing costs.
- IAS 36 – Impairment of Assets: this amendment, applicable from January 1, 2009, requires additional disclosures to be made in the case in which an entity determines the recoverable amount of a cash-generating unit using discounted cash flows.

In November 2008, the IASB also issued IFRIC 17 – Distribution of Non-cash Assets to Owners, establishing that the determination of the value of the distribution of non-cash assets should consider their fair value when it becomes mandatory to record the relative payable to the stockholders.
The amendment is applicable from January 1, 2010, for annual periods beginning on or after July 1, 2009.

In March 2009, the IASB issued an amendment to IFRS 7 – Financial Instruments: Disclosures which is applicable from January 1, 2010, or annual periods beginning on or after July 1, 2009. The amendment requires disclosure about the measurement of fair value (methods used and, if valuations techniques are used, the assumptions adopted in determining the fair value of each class of financial asset or liability) and the liquidity risk (analysis of the maturities of financial liabilities represented by derivatives or other liabilities).

Standards, amendments and interpretations not applicable by the company
The following standards, amendments and interpretations have also been issued but were not applicable to the company at the balance sheet date:

Improvements:
- IAS 16 – Property, Plant and Equipment: this amendment, applicable from January 1, 2009, requires an entity that in the course of its ordinary activities routinely sells items of property, plant and equipment that it has held for rental to others, to transfer such assets to inventories when they cease to be rented and become held for sale. As a consequence, the proceeds from the sale of such assets shall be recognized as revenue. Cash payments to manufacture or acquire assets held for

rental to others or subsequently held for sale are cash flows from operating activities (and not from investing activities).

- IAS 19 – Employee Benefits: this amendment, applicable prospectively from January 1, 2009 to changes in benefits that occur after that date, clarifies the definition of positive/negative past service costs and states that in the case of a curtailment, only the effect of the reduction for future service shall be recognized immediately in the income statement, while the effect arising from past service periods shall be considered a negative past service cost. The Board also revised the definition of short-term employee benefits and long-term employee benefits and the definition of a return on plan assets, stating that this amount should be net of any costs for administering the plan (other than those included in the measurement of the defined benefit obligation).
- IAS 20 – Government Grants and Disclosure of Government Assistance: this amendment, applicable prospectively from January 1, 2009, states that the benefit of a government loan at a below-market rate of interest shall be treated as a government grant and then accounted for in accordance with IAS 20.
- IAS 28 – Investments in Associates, and IAS 31 – Investments in Joint Ventures: these amendments, applicable from January 1, 2009, require specific new disclosures to be made for investments in associates and joint ventures measured at fair value in accordance with IAS 39. IFRS 7 – Financial Instruments: Disclosures and IAS 32 – Financial Instruments: Presentation have accordingly also been amended.
- IAS 29 – Financial Reporting in Hyperinflationary Economies: the previous version of the standard did not reflect the fact that a number of assets and liabilities may or must be measured on the basis of a current value rather than historical value. This amendment, made in order to reflect this, is effective from January 1, 2009.
- IAS 40 – Investment Property: this amendment, applicable prospectively from January 1, 2009, states that property under construction falls within the scope of IAS 40 and not that of IAS 16.

Amendments:

- IAS 27 – Consolidated and Separate Financial Statements: this amendment, which applies prospectively from January 1, 2009, requires that investments recognized in the separate financial statements and measured in accordance with IAS 39 are subject to IFRS 5 – Non-current Assets Held for Sale and Discontinued Operations.
- IAS 32 – Financial Instruments: Presentation and to IAS 1 – Presentation of Financial Statements - Puttable Financial Instruments and Obligations Arising on Liquidation. These amendments require puttable financial instruments and instruments, or components of instruments that impose on an entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation, to be classified as equity instruments. This amendment is effective prospectively from January 1, 2009.
- IAS 38 – Intangible Assets: this amendment, effective retrospectively from January 1, 2009, requires expenditure on advertising and promotional activities to be recognized in the income statement. Further, it states that expenditures incurred to provide future economic benefits to an entity, but where no intangible asset is recognized, must, for the supply of goods, be recognized as an expense when it has the right to access the goods. In the case of the supply of services, an entity shall recognize the expenditure as an expense when it receives the services. Moreover, the standard has been revised in order to allow entities to use the unit of production method for determining the amortization charge for an intangible asset with a finite useful life.

- IAS 39 – Financial Instruments: Recognition and Measurement: this amendment, effective from January 1, 2009, clarifies how to calculate the revised effective interest rate on ceasing fair value hedge accounting and notes additionally that the prohibition on the reclassification of financial instruments into or out of the fair value through profit or loss category after initial recognition should not prevent a derivative from being accounted for at fair value through profit or loss when it does not qualify for hedge accounting and vice versa.
- On July 31, 2008, the IASB issued an amendment to IAS 39 – Financial Instruments: Recognition and Measurement which is to be applied retrospectively from January 1, 2010. The amendment clarifies how the existing principles underlying hedge accounting should be applied in particular situations.

Interpretations:
- IFRIC 13 – Customer Loyalty Programmes (applicable from January 1, 2009).
- IFRIC 15 – Agreements for the Construction of Real Estate (applicable from January 1, 2009 but not yet endorsed by the European Union).
- IFRIC 18 – Transfers of Assets from Customers (applicable from January 1, 2010, for annual periods beginning on or after July 1, 2009).

8. Risk management

IFIL S.p.A. is not in effect subject to credit risk as the counterparts are mainly high-credit-quality leading banking institutions.

IFIL S.p.A. does not have financial liabilities denominated in currencies other than Euro. Some of the assets held for trading and cash and cash equivalents are denominated in currencies other than Euro. These are securities held for trading and cash and cash equivalents which have both been adjusted to the year-end exchange rate.

With regard to liquidity risk, financing needs and cash flows are managed with the aim of optimizing financial resources. In particular, outgoing cash flows from current operations are basically financed by incoming cash flows from ordinary activities.
Liquidity risk could thus arise only for investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or raising of sufficient funds that can be readily used. In this sense, IFIL S.p.A. operates so that it has financial resources obtained from the issue of bonds and irrevocable credit lines with expiration dates and amounts consistent with its investment plans.

IFIL S.p.A. assesses and manages its exposure to interest rate risk consistently with its management policies and uses derivative financial instruments to fix some of the financing obtained with a pre-set interest rate. There were no derivative financial instruments put into place for speculative purposes during the year; the only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on one of the bonds issued.

COMMENTS ON THE PRINCIPAL LINE ITEMS IN THE SEPARATE INCOME STATEMENT

9. Dividends from investments

Dividends amount to € 255,636 thousand (€ 171,355 thousand in 2007) and were collected from the following companies:

€ in thousands	2008	2007
Fiat S.p.A. - Ordinary shares	**133,035**	51,551
Fiat S.p.A. - Preferred shares	**12,433**	9,636
Intesa Sanpaolo S.p.A. - Ordinary shares	**110,168**	110,168
Total dividends	**255,636**	171,355

10. Gains on sales of investments

In 2008, gains on sales of investments include the net gain of € 167,468 thousand from the sale of 171,916,165 Intesa Sanpaolo shares, equal to a 1.45% stake in ordinary capital stock. Net proceeds total € 598,350 thousand.

11. Impairment reversals on investments

At December 31, 2008, no assumptions exist for impairment reversals.

Impairment reversals in 2007 and 2006 related exclusively to 240,583,447 Fiat ordinary shares and 31,082,500 Fiat preferred shares which in 2001, 2002 and 2004 had been written down on the basis of their market prices, also in light of the negative economic trends of the period.

At December 31, 2006, the carrying amount of Fiat ordinary shares was increased by the complete reversal of the impairment loss on Fiat ordinary shares up to the original cost of purchase, for € 537,072 thousand. The carrying amount of Fiat preferred shares was increased by the partial reversal of the impairment loss, for € 108,213 thousand (out of a total of € 135,510 thousand) up to the market price at December 29, 2006 (€ 12.06) which was still below (€ 27,297 thousand) the original purchase cost. Deferred taxes were provided on the impairment reversals for € 25,232 thousand.

At December 31, 2007, the carrying amount of a part of the Fiat preferred shares was increased by an additional impairment reversal of € 19,267 thousand up to the market price at December 28, 2007 (€ 14.46), which was still below (€ 8,030 thousand) the original purchase cost. In 2007, deferred taxes for € 459 thousand were provided to increase the tax charge on these shares.

For information on the per share and total carrying amount of Fiat ordinary and preferred shares, reference should be made to Note 19.

12. Financial expenses from third parties

These include:

€ in thousands	2008	2007	Change
Interest on IFIL bonds 2007/2017	**40,414**	23,078	17,336
Interest on IFIL bonds 2006/2011	**11,162**	10,082	1,080
Interest expenses on bank debt	**19**	5,792	(5,773)
Bank commissions	**1,279**	1,897	(618)
Charges from discounting to present value	**8**	7	1
Financial expenses on securities held for trading (a)	**31,328**	3,081	28,247
Total financial expenses from third parties	**84,210**	43,937	40,273

(a) Includes € 14,312 thousand (€ 2,851 thousand in 2007) for fair value adjustments.

13. Financial income from third parties

This includes:

€ in thousands	2008	2007	Change
Interest income on receivables from:			
- tax authorities	**908**	933	(25)
- banks	**12,233**	1,320	10,913
Interest rate hedging income	**1,942**	887	1,055
Income on securities held for trading (a)	**14,858**	5,026	9,832
Other income	**15**	2	13
Total financial income from third parties	**29,956**	8,168	21,788

(a) Includes € 3,214 thousand (€ 651 thousand in 2007) for fair value adjustments.

The information relating to call options sold on Intesa Sanpaolo shares are described in Note 19.

14. Foreign exchange gains (losses)

Foreign exchange gains (losses) amount to € 4,070 thousand and represent income from the trading of securities held for trading denominated in currencies other than the Euro.

15. Personnel costs

These amount to € 8,653 thousand (€ 9,122 thousand in 2007) and show a total net decrease of € 469 thousand.
Details are as follows:

€ in thousands	2008	2007	Change
Salaries	**5,106**	6,577	(1,471)
Social security contributions	**1,265**	1,217	48
Employee severance indemnities, other long-term benefit plans and defined benefit plans and payments of plan contributions	**891**	662	229
Other personnel costs (a)	**1,391**	666	725
Total personnel costs	**8,653**	9,122	(469)

(a) In 2008, personnel costs mainly include € 554 thousand of compensation (figurative) from stock option plans (no cost in 2007) and € 235 thousand (€ 239 thousand in 2007) of costs from related parties.
Additional information on the stock option plan is presented in Note 30 – Stock option plans.

The decrease in salaries is mainly due to a different composition of the employees and lower nonrecurring bonuses paid to employees in relation to the results achieved.

At the end of 2008, employees number 37 (39 at the end of 2007).
The average number of employees in 2008 was 39, summarized by category as follows:

	2008	2007
Managers	**11**	12
Middle management	**13**	11
Clerical staff	**11**	14
Messengers	**4**	4
Average number of employees	**39**	41

Compensation policies

The overall compensation is composed of a fixed and a variable portion, as well as additional benefits.

The fixed compensation is connected to the responsibilities of the person's role, the level of individual expertise and the experience acquired; the variable compensation is tied to objectives and rewards for the results of the work performed by that person both individually and in a team.
Further discretionary bonuses may be paid for exemplary performance in transactions which create value for the company.
The additional benefits, mainly in reference to personnel with management responsibilities, include supplementary pension plans, health care plans, death and disability insurance coverage, loyalty bonuses and, where provided for, the use of a company car. Additional information on employee benefits is presented in Note 33.

16. Purchases of goods and services from third parties

These amount to € 3,733 thousand and decreased by € 1,735 thousand compared to 2007 (€ 5,468 thousand). The main costs are indicated below:

€ in thousands	**2008**	2007	Change
Legal fees for court and out-of-court assistance	**1,216**	2,490	(1,274)
Consulting	**1,191**	1,413	(222)
Compensation:			
- Board of Statutory Auditors	**145**	145	0
- Supervisory Board	**6**	6	0
- Common representatives of savings stockholders	**3**	3	0
- Supplementary contribution	**8**	6	2
	162	160	2
Travel expenses and entertainment	**359**	592	(233)
Bank expenses, dividend payment expenses and listing fees	**173**	262	(89)
Insurance	**253**	140	113
Audit fees (a)	**76**	74	2
Office management	**107**	90	17
Rentals	**49**	56	(7)
Raw materials and supplies	**51**	47	4
Maintenance, transport and car insurance	**43**	38	5
Gifts	**18**	76	(58)
Other expenses	**35**	30	5
Total purchases of goods and services from third parties	**3,733**	5,468	(1,735)

(a) Includes out-of pocket expenses.

17. Other current operating expenses

These total € 3,118 thousand (€ 2,882 thousand in 2007).
Details are as follows:

€ in thousands	**2008**	2007	Change
Sundry taxes and duties	**2,125**	1,985	140
Association dues	**175**	169	6
Securities listing fees	**263**	265	(2)
Publications of annual, first-half and quarterly financial statements	**348**	291	57
Notary and corporate charges	**15**	7	8
Donations	**128**	101	27
Books, newspapers and magazines	**49**	41	8
Ads	**15**	18	(3)
Dividends statute-barred	**0**	5	(5)
Total other current operating expenses	**3,118**	2,882	236

18. Income taxes

The taxable income calculated by applying tax rules generates a taxable income of € 18 million against which tax loss carryforwards were used. The income taxes shown in the income statement (€ 36 thousand) refer to the separate income taxes of the CFC (Controlled Foreign Companies) paid in 2008. In 2007, deferred taxes accrued in 2006 were released for € 4,206 thousand on the reversal of the impairment loss on the Fiat investment due to the reduction in the IRES tax rate from 33% to 27.5% starting from 2008.

Since the probability of recovery against future taxable income currently is not assured, no deferred tax assets have been booked on the tax losses for the years 2004 to 2008 (€ 427 million, in total).

Details are as follows:

	2008		2007	
€ in millions	**Amount**	**Theoretical tax effect (27.5% rate)**	Amount	Theoretical tax effect (27.5% rate)
Tax losses carryforwards (for a maximum of 5 years)				
- year 2003 (a)			76	
- year 2004	**123**		123	
- year 2005	**117**		117	
- year 2006	**133**		133	
- year 2007	**54**		54	
- year 2008	**0**			
Total tax losses carried forward	**427**	**117**	503	138

(a) At December 31, 2008, the possibility of utilizing the part of tax losses from the year 2003 that was not used against IRES taxable income in 2008 has expired (€ 58 million).

Considering that the Irap taxable base is negative, the following table shows the reconciliation between pre-tax profit and taxable income for Ires purposes.

€ in millions	**2008**	2007
Pre-tax profit	**357**	120
Increases:		
- temporary differences	**2**	4
- permanent differences (a)	**74**	31
Total increases	**76**	35
Decreases:		
- 95% of dividends collected	**(243)**	(163)
- 95% of the gain on the sale of the stake in Intesa Sanpaolo	**(159)**	
- impairment reversal on Fiat preferred shares	**0**	(19)
- portion of impairment losses on investments deductible over 5 years	**0**	(14)
- deductions of permanent differences	**(8)**	
- deductions of prior years' temporary differences (b)	**(5)**	(13)
Total decreases	**(415)**	(209)
Profit (loss) for tax purposes	18	(54)
Utilization of tax losses carried forward (partial utilization of losses generated in the year 2003)	**(18)**	0
Loss for the year for tax purposes	**0**	(54)

(a) Mainly includes non-deductible interest expenses and the higher tax charge of the Ifil Investissements stock received from Ifil Investment Holding.

(b) Includes fees and compensation referring to prior years paid this year and other expenses incurred in previous years and deductible for tax purposes in the current year.

The company has agreed the tax years up to December 31, 2003.

19. Non-current assets – Investments

Details are as follows:

€ in thousands	12/31/2008 % of class of stock	12/31/2008 Amount	12/31/2007 % of class of stock	12/31/2007 Amount	Change

Available-for-sale investments				
Intesa Sanpaolo S.p.A. (ordinary shares)	1,564,677		1,267,435	**297,242**
Total investments	5,328,502	104,762	1,335,550	**4,097,714**

The changes during the year are described in the following paragraphs.

The reduction of the investment in Intesa Sanpaolo, equal to € 1,267.5 million, is given by the reversal of the carrying amount (-€ 927.9 million) of the stake disposed of and the adjustment of the remaining stake to fair value at the end of the year (-€ 339.6 million). The reversal of the carrying amount of the investment sold (-€ 927.9 million) comprises the original acquisition cost of € 430.9 million and cumulative fair value of € 497 million.

The gain of € 167.5 million comes from a comparison between the net proceeds of € 598.4 million and the original acquisition cost of € 430.9 million. The cumulative fair value on the stake sold, equal to € 497 million, was deducted from the specific reserve in equity, as was the adjustment of the remaining stake to fair value at the end of the year, equal to € 339.6 million, for a total of € 836.6 million.

The original acquisition cost of the remaining investment held in Intesa Sanpaolo is € 295.7 million (€ 2.506 per share); at December 31, 2008, the net positive change in fair value amounts to € 1.5 million.

In 2008, the company also sold call options on 22,500,000 Intesa Sanpaolo ordinary shares for € 3.4 million.
In December, call options expired without having been exercised on 3,000,000 shares; the relative premium of € 0.4 million was recognized in the income statement in financial income.

At December 31, 2008, there are still 19,500,000 options remaining that expire in February 2009 at a strike price of between € 4.2 and € 4.4 per share; the fair value adjustment of the options generated income of € 2.7 million.
At the set expiration date the options were not exercised.
The income is presented in financial income from third parties.

On November 7, 2008, a decision was taken to put Ifil Investment Holding into a voluntary wind-up. Consequently, the 224,194 Ifil Investissements S.A. shares (20.184% of capital stock) held by Ifil Investment Holding were transferred to IFIL as an advance on the liquidation. These shares were accounted for in the IFIL financial statements at the same carrying value at which they were carried in the Ifil Investment Holding financial statements (€ 104.5 million). The carrying amount of the investment in Ifil Investment Holding was then adjusted to the amount of the remaining equity (€ 0.2 million) with a negative change of € 68.1 million. The net difference between the two changes (€ 36.4 million) was recognized as an increase of equity.

The investment in IFIL Investissements was increased by a further € 273 thousand to account for the part of the IFIL stock option plan that relates to the employees of Ifil Investissements and subsidiaries. The assessments carried out did not evidence any factors of impairment.

Comparison between the carrying amounts and market prices of listed investments:

				Market price			
		Carrying amount		December 30, 2008		February 27, 2009	
	Number	Per share (€)	Total (€ thsd)	Per share (€)	Total (€ thsd)	Per share (€)	Total (€ thsd)
Fiat S.p.A.							
- ordinary shares	332,587,447	7.88	2,619,379	4.59	1,526,244	3.65	1,214,942
- preferred shares	31,082,500	8.06	250,401	2.39	74,194	2.07	64,434
			2,869,780		1,600,438		1,279,376
Intesa Sanpaolo S.p.A. (ord. sh.)	118,000,000	2.52	297,242	2.52	297,242	1.93	228,106
Juventus Football Club S.p.A.	120,934,166	0.61	74,231	0.77	93,240	0.71	85,259
Total			**3,241,253**		**1,990,920**		**1,592,741**

The carrying amount of the investment in the listed company Fiat S.p.A. at the end of the year is € 1,279 million higher than its market price at the same date (at year-end 2007 it was € 3,399 million lower). The market prices of Fiat S.p.A. shares, which at year-end 2008 were below their par value, were hurt because the sector was particularly penalized, although this does not correspond to the operating performance and financial condition of the company reflected in its 2008 consolidated financial statements. Given the fact that the results of the Fiat Group, which ended the year 2008 with a profit in both the consolidated (€ 1,612 million) and separate (€ 1,199 million) financial statements and that positive operating results are also forecast for 2009, in addition to the fact that the attributable consolidated equity of the Fiat Group per share, € 8.371 at December 31, 2008, is higher than the carrying amount indicated above, and in consideration of the importance of the interest owned and the company's positioning in the stockholder structure, for which measurement at the market price (heavily influenced by the current economic situation) is not very representative, it is deemed that the conditions for conducting an impairment test of the investment held in Fiat S.p.A. do not exist at December 31, 2008.

Furthermore:

- there are no investments requiring the assumption of unlimited responsibility for their obligations (art. 2361, paragraph 2 of the Italian Civil Code);
- there are no investments held as collateral for financial liabilities and contingent liabilities.

The following list of investments held by IFIL S.p.A. presents the additional disclosures required by the Italian Civil Code (art. 2427, paragraph 5) and Consob (Communication 6064293 dated July 28, 2006).

	Capital stock			IFIL Investment					Equity	Profit

(d) Data taken from the half-year report at December 31, 2008.

20. Current assets – Financial assets held for trading

These assets amount to € 170,499 thousand (€ 47,856 thousand at December 31, 2007) and refer to investments in equity shares and bonds listed on the main European and United States markets.

Such shares are measured at fair value at year end using the market price translated, where necessary, at the year-end rate. Changes in fair value are recognized in the income statement under financial income (expenses) from third parties.

Therefore, for the measurement of the securities, the company did not avail itself of the amendment, applicable from July 1, 2008, to IAS 39 – Financial instruments: Recognition and Measurement and IFRS 7 – Financial instruments: Disclosure.

21. Current assets – Cash and cash equivalents

Details are as follows:

€ in thousands	**12/31/2008**	12/31/2007	Change
Bank deposits	**27,398**	23,946	3,452
Time deposits	**384,000**	141,607	242,393
Total cash and cash equivalents	**411,398**	165,553	245,845

These represent current account bank balances in Euro and other currencies besides the Euro, repayable on demand, and liquid assets deposited at leading credit institutions maturing on February 16, 2009.

Cash and cash equivalents approximate fair value at year-end.

The associated credit risks should be considered limited since the counterparts are leading bank institutions.

22. Current assets – Other financial assets

Details are as follows:

€ in thousands	**12/31/2008**	12/31/2007	Change
Fair value of cash flow hedge derivatives	**0**	3,938	(3,938)
Other financial assets	**959**	410	549
Total current other financial assets	**959**	4,348	(3,389)

23. Current assets – Tax receivables

Tax receivables from the tax authorities refer to:

€ in thousands	**12/31/2008**	12/31/2007	Change
Receivables for prior years' taxes, refunds requested	**35,299**	42,778	(7,479)
Receivable for reduction of Consob sanction	**3,578**	3,525	53
Receivables for current and prior years' taxes, carried forward	**4,312**	806	3,506
Total tax receivables	**43,189**	47,109	(3,920)

The change in receivables from the tax authorities for the year 2008 is summarized as follows:

€ in thousands	Refunds requested	Carried forward	Total
Balances at December 31, 2007	46,303	806	47,109
Refunds received	(8,334)		(8,334)
Used for compensation of withholdings and VAT payable		(516)	(516)
Infragroup sale		(114)	(114)
Receivables arising during the year (withholdings paid)		4,136	4,136
Interest earned during the year	908		908
Balances at December 31, 2008	**38,877**	**4,312**	**43,189**

24. Current assets – Other receivables

At December 31, 2008, these amount to € 3,575 thousand, of which € 3,405 thousand is for deferred expenses relating to the merger by incorporation in the parent, IFI S.p.A..

25. Equity – Capital stock

At December 31, 2008, the capital stock of IFIL S.p.A., fully subscribed to and paid-in, amounts to € 1,075,995,737 and consists of 1,038,612,717 ordinary shares (96.53% of capital stock) and 37,383,020 non-convertible savings shares (3.47% of capital stock), with a par value of € 1 each.

At December 31, 2008, capital stock includes € 1,342 thousand from transfers of revaluation reserves set up in the past which, in the event of distribution, would form part of the taxable income of the company.

The objectives identified by IFIL S.p.A. and the companies in the "Holdings System" are to create value for all stockholders, safeguard business continuity, diversify investments by sector and geography and support the growth of investment holdings.

IFIL thus aims to maintain an adequate level of capitalization which allows it to obtain a satisfactory economic return for its stockholders and guarantee economic access to external sources of financing.

IFIL constantly monitors changes in the consolidated debt level of the Holdings System in relation to the current asset value of the investments and expected dividend flows from the operating holdings.

A very prudent approach is adopted with regard to the use of financial leveraging.

26. Equity – Capital reserves

Details are as follows:

€ in thousands	**12/31/2008**	12/31/2007
Additional paid-in capital	**1,004,214**	941,822
Undistributable reserve from cancellation of treasury stock	**65,102**	65,102
Reserve for purchase of treasury stock	**387,608**	450,000
Total capital reserves	**1,456,924**	1,456,924

27. Equity – Retained earnings and other reserves

Details are as follows:

€ in thousands	**12/31/2008**	12/31/2007
Revaluation reserve Law 408/90	**243,894**	243,894
Revaluation reserve Law 413/91	**2,586**	2,586
Legal reserve	**215,199**	215,199
Cash flow hedge reserve	**(5,119)**	3,938
Fair value reserve	**1,475**	826,531
Stock option reserve	**1,203**	0
Extraordinary reserve	**686,741**	669,639
Retained earnings	**33,702**	(2,782)
Total retained earnings and other reserves	**1,179,681**	1,959,005

28. Equity reserves available and distributable

Disclosure required by art. 2427, 7-bis of the Italian Civil Code on the equity reserves available and distributable are as follows:

€ in thousands	**Balance at 12/31/2008**	Possibility of use	Amount available
Capital reserves:			
Additional paid-in capital (a)	**1,004,214**	A,B,C	852,068
Legal reserve	**83,952**	B	0
Undistributable reserve from cancellation of treasury stock	**39,950**	A,B	0
Reserve for purchase of treasury stock	**387,608**	A,B,C	387,608
Earnings reserves:			
Revaluation reserve Law 408/90 (b)	**243,894**	A,B,C	243,894
Revaluation reserve Law 413/91 (b)	**2,586**	A,B,C	2,586
Legal reserve	**131,247**	B	0
Undistributable reserve from cancellation of treasury stock	**25,152**	A,B	0
Cash flow hedge reserve	**(5,119)**		0
Stock option reserve	**1,203**		0
Fair value reserve	**1,475**		0
Extraordinary reserve	**686,741**	A,B,C	686,741
Retained earnings	**33,702**	A,B,C	33,702
Total	**2,636,605**		**2,206,599**

A: For capital increases B: For coverage of losses C: For distribution to stockholders

(a) Since the legal reserve is equal to one-fifth of capital stock (art. 2431 of the Italian Civil Code), the reserve is distributable except to the extent of the portion deriving from the reallocation of the reserve offsetting the stock in portfolio.

(b) The revaluation reserves can be used for free increases of capital stock. If used to cover losses, they must be later replenished, if not, then no dividends can be distributed. They may not be used to set up the reserve for the purchase of treasury stock. The monetary revaluation reserves can be reduced only by resolution of the stockholders' meeting and in observance of the prescriptions indicated in art. 2445, paragraphs 2 and 3 of the Italian Civil Code.

In the years 2005, 2006 and 2007, reserves were not used to absorb losses.
At December 31, 2008, tax-deferred reserves are recorded for a total of € 261,648 thousand, of which € 243,894 thousand relates to the Revaluation Reserve Law 408/90, € 2,586 thousand to the Revaluation Reserve Law 413/91 and € 15,168 thousand to other reserves. In the event of distribution, these reserves would form part of the taxable income of the company. In view of the unlikelihood of their distribution, no deferred taxes have been set aside in respect of such reserves.

29. Equity – Treasury stock

The ordinary stockholders' meeting held on May 13, 2008 authorized the purchase of treasury stock for 18 months, pursuant to art. 2357 of the Italian Civil Code and art. 132 of Legislative Decree 58 dated February 24, 1998, for a maximum of 55 million IFIL ordinary and/or savings shares for a total of € 450 million.

Under the Program for the buyback of ordinary and savings treasury stock voted by the board of directors on February 18, 2008, during the period February 26, to August 18, 2008, IFIL S.p.A. purchased 20,783,200 ordinary shares (2% of the class of stock) at the average price per share of € 4.8 totaling € 99.8 million, in addition to 917,000 savings shares (2.45% of the class of stock) at the average cost per share of € 4.3 totaling € 3.9 million, for a grand total of € 103.7 million (69.13% of the maximum disbursement of the € 150 million authorized for the buyback Program).

After these purchases, IFIL holds, directly and indirectly, the following treasury stock:

		Amount		% of class
	Number	Per share (€)	Total (€ thsd)	of stock
Ordinary shares				
Held by IFIL S.p.A.	33,186,198	4.38	145,440	3.20
Held by the subsidiary Soiem S.p.A.	810,262	3.41	2,762	0.08
Balance at December 31, 2008	**33,996,460**	**4.36**	**148,202**	**3.28**

		Amount		% of class
	Number	Per share (€)	Total (€ thsd)	of stock
Savings shares				
Held by IFIL S.p.A.	917,000	4.30	3,943	2.45
Balance at December 31, 2008	**917,000**	4.30	**3,943**	**2.45**

Changes during the year are as follows:

	Ordinary shares			Savings shares		
		Amount			Amount	
	Number	Per share (€)	Total (€ thsd)	Number	Per share (€)	Total (€ thsd)
Balance at December 31, 2007	13,213,260	3.67	48,450	0	0.00	0
Purchases	20,783,200	4.80	99,752	917,000	4.30	3,943
Balance at December 31, 2008	**33,996,460**	**4.36**	**148,202**	**917,000**	**4.30**	**3,943**

30. Stock option plans

Stock option plans with underlying IFIL stock

The ordinary session of the IFIL stockholders' meeting held on May 13, 2008 approved a stock option plan for the chief executive officer, Carlo Barel di Sant'Albano, for 3,000,000 stock options corresponding to the same number of ordinary shares and for the employees of the IFIL Group (IFIL S.p.A. and the companies in the “Holdings System”) who are or will be regarded as key people in the organization on the basis of the positions held or activities performed, for a maximum of 12,000,000 stock options. At December 31, 2008, a total of 6,525,000 options had been granted to 17 key employees.

The Plan is aimed at attracting and retaining managerial resources who hold important positions in the company while at the same time involving them in achieving performance objectives and aligning the economic incentives to the value of the company for the stockholders. The vesting period of the options granted will start from May 14, 2014 to May 14, 2016 and precisely: the first part, equal to 25% of the options, will vest on May 14, 2014, the second part, again equal to 25% of the options, will vest on May 14, 2015 and the third part, equal to 50% of the options, will vest on May 14, 2016. The exercise price of the options granted is € 5.291 and equal to the arithmetic average of the official stock market prices of IFIL ordinary shares recorded at Borsa Italiana S.p.A. in the month prior to the date of the stockholders' meeting that approved the Plan.

The Plan will be implemented by granting the recipients free options on treasury stock purchased by IFIL S.p.A. or by companies of the “Holdings System” in accordance with existing laws.

From an accounting standpoint, the plan represents an equity-settled stock-based payment transaction discussed under paragraph 10 and subsequent articles of IFRS 2 and requires that the fair value of the services received be measured in reference to the fair value of the equity instruments at the grant date.

The fair value of services received must be recorded during the option vesting period with a corresponding increase in equity.

The valuation was made by an independent expert assuming that the options would be exercised by May 15, 2016 using the Black-Scholes model based on the following parameters:

Valuation date	5/13/2008
IFIL stock price at grant date	€ 5.286
Exercise price	€ 5.291
Volatility calculated using a trend analysis model (%)	30.56%
Vesting period	8 years
Expected dividends (%)	2.15%
Risk-free interest rate	4.1114%
Turnover rate (%)	1%

The fair value of the 9,525,000 options granted was determined to be € 15,263 thousand, divided as follows:

€ in thousands	Number of options granted	Total cost	Cost referring to the year
Chief executive officer IFIL S.p.A.	3,000,000	4,807	376
Key employees IFIL S.p.A. (13)	4,425,000	7,091	554
Total IFIL S.p.A.	7,425,000	11,898	930
Key employees of Ifil Investissements S.A. and other subsidiaries in the Holdings System (4)	2,100,000	3,365	273
Total	**9,525,000**	**15,263**	**1,203**

The cost referring to the year amounts to € 930 thousand of which € 376 thousand is classified as fees of the chief executive offices and € 554 thousand as personnel costs. The cost relating to key employees of Ifil Investissements S.A. and other subsidiaries in the Holdings System was recognized as an increase in the amount of the investment in Ifil Investissements S.A. The corresponding entry for the total of € 1,203 thousand is recorded in the stock option reserve.

Stock option plan with underlying Alpitour stock

On December 15, 2005, in execution of the resolution passed by the board of directors' meeting held on November 11, 2005, the Executive Committee of IFIL S.p.A. approved a stock option plan for two managers of the Alpitour Group designed to promote their loyalty to the IFIL Group and provide an incentive to develop and appreciate the investments of the IFIL Group in the tourism sector.

The plan calls for purchase options on Alpitour shares to be granted to the chairman and chief executive officer, D.J. Winteler, and the general manager, F. Prete, respectively, equal to 6% (2,127,000 shares) and 5% (1,772,500 shares) of Alpitour's capital stock.
After approval on the part of IFIL S.p.A., the Alpitour S.p.A. board of directors may in the future grant purchase options on Alpitour shares to other managers who hold important operating positions equal to 4% of Alpitour's capital (now 1,418,000 shares).
The purchase options may be exercised, at one or more times, during the period between the dates of the approval of the 2006/2007 and 2008/2009 Alpitour financial statements at the price of € 2.24 per share, corresponding to the valuation of the Alpitour Group, equal to € 79.4 million, performed in December 2005 by a specially appointed expert.
IFIL S.p.A. and the managers of Alpitour S.p.A., finally, exchanged reciprocal purchase and sale options, exercisable during the same above period, on Alpitour shares that will have been purchased by the same managers; the exercise price will be established on the basis of the appraisal which will be performed using the same valuation principles applied in the December 2005 valuation.

From an accounting standpoint, the plan is a cash-settled stock-based payment transaction subject to paragraph 30 and subsequent paragraphs of IFRS 2, which requires the liability of the plan to be measured at fair value and, therefore, the options of the plan, at every reporting date, until plan expiration.

At December 31, 2008, the fair value of each option right of the plan is estimated at € 2.07 for a total of € 8,075,164 (€ 15,870,965 at December 31, 2007) recorded in "Other current liabilities to related parties". The reduction of the liability from last year (€ 7,795,801) was recognized in the income statement in "Other nonrecurring income (expenses) from related parties", as the portion relating to the current year.

The estimate was performed by an independent expert who applied a binomial model of valuation to the options based on the following parameters:

1. The exercise price of the options was assumed to be equal to the par value of one ordinary Alpitour S.p.A. share at the grant date, quantified on the basis of an estimate performed by an independent expert, equal to € 2.24 rounded up.
2. The fair value of the underlying share (Alpitour S.p.A. ordinary share) at the date of reference of December 31, 2008, was quantified on the basis of an estimate made by an independent expert prepared by applying valuation principles consistent with those used in December 2005 by the independent expert, equal to € 4.14 rounded up, for each ordinary share.
3. The expiration date of the options was established as the date of the approval of the Alpitour S.p.A. financial statements for the year 2008/2009, fixed, conventionally, as January 31, 2010. At the date of reference of December 31, 2008, the options thus have a remaining life of 13 months (1 year and 1 month).
4. The expected volatility has also been determined by referring to the historical volatility, measured over a period consistent with the remaining life of the shares in the plan, of a sample of listed companies operating in the same sector as Alpitour S.p.A..
5. The application of the valuation model assumes the absence of the payment of dividends.
6. The risk-free interest rate is assumed to be equal to the return on government securities having a residual life consistent with the expiration of the options in the plan.
7. An assumption was also included in the "binomial" model for the early exercise of the option rights during the period between the end of the vesting period and contractual expiration date of the options.

31. Non-current liabilities – Non-convertible bonds

Details are as follows:

Issue date	Maturity date	Issue date	Coupon	Rate	Nominal value (€/000)	Effect of amortized cost valuation (€/000)	**Balance (€/000)**
6/9/2006	6/9/20011	99.900	Quarterly	3-month Euribor + spread	200,000	457	**199,543**
6/12/2007	6/12/2017	99.554	Annually	Fixed 5.375%	750,000	5,364	**744,636**
Total					**950,000**	**5,821**	**944,179**

The bonds are traded on the Luxembourg Stock Exchange.

In order to guarantee fixed interest rates over the entire term of the 2006/2011 bonds, some interest rate swaps were put into place on the full amount; at December 31, 2008, the fair value is negative for € 5,119 thousand, recorded in "Current liabilities – Other financial liabilities", Note 34.

As for the periods in the outgoing cash flows correlated to the interest rate swap contracts reverse, reference should be made to Note 36.

The bonds contain covenants that are common in international practice for bond issues of this type. In particular, they contain negative pledge clauses (the obligation to extend any real present or future guarantees given as collateral on the assets of the issuer on other bonds and other credit instruments to these bonds to the same degree), disallowing a change of control and providing for periodic disclosure. The 2006/2011 bonds also establish other commitments such as respecting a maximum debt limit in relation to the amount of the portfolio and maintaining a rating by one of the major agencies. Non-compliance with these covenants allows the bondholders to ask for the immediate redemption of the bonds. Finally, standard events of default are envisaged in the case of serious non-fulfillment such as, for example, failure to pay interest. These covenants were complied with at December 31, 2008.

Standard & Poor's rated the two bond issues “BBB+”, in line with the current rating of IFIL S.p.A. long-term debt.

32. Non-current liabilities – Deferred tax liabilities

The deferred income taxes originated from temporary differences between the carrying amount and the fiscally recognized amount of the investment held in Intesa Sanpaolo and Fiat.

The analysis of employee benefits is as follows:

Employee severance indemnities

Employee severance indemnities represent the obligation due to employees by Italian law (recently amended by Law 296/06) that has accrued and which will be paid upon termination of employment. In certain circumstances, a portion of the indemnity may be paid as an advance during the employee's service life. This is an unfunded defined benefit plan, considering the benefits almost entirely accrued, with the sole exception of the revaluation.

After the change made to the regulations for employee severance indemnities by Law 296 dated December 27, 2006 (Budget Law 2007), and subsequent decrees and regulations, for those employees who have asked, the portion of employee severance indemnities accruing from January 1, 2007 has been transferred to a complementary pension plan chosen by the employees and these therefore fall under defined contribution plans.

For those employees who did not elect the transfer of the accrued portion of employee severance indemnities, beginning January 1, 2007, the calculation of employee severance indemnities, including the portion accruing, will be made according to the usual actuarial method.

Besides employee severance indemnities, established by art. 2120 of the Italian Civil Code, IFIL S.p.A. guarantees other forms of benefits (termination benefits, loyalty bonuses, health care plans, defined benefit and defined contribution pension plans) under company or individual supplementary agreements, described below.

Termination benefits

This is a fixed amount in addition to employee severance indemnities which will be paid at the time and in relation to the termination of the employment relationship, at the currently expected retirement age, on the basis of existing legislation, at the age of 65 for men and at the age of 60 for women. Any raising of the retirement age for whatsoever reasons will have no effect on the payment of these benefits. In the eventuality of the termination of employment for whatsoever reason prior to the legal retirement age indicated above, the benefits shall be paid for the amount accrued up to the date of termination of employment, compared with and in proportion to the years of service since January 1, 2000 up to the date of the termination of employment. No interest or revaluations of any sort accrues on the amount.

Health care plans

Health care plans, historically offered to management staff, have been extended to all employees since the end of 2007, and require the payment of defined contributions to outside funds and entities which pay the health care benefits.

Pension plans

The company's pension plans are for employees categorized as managers and are covered by company agreements and regulations.
They can be "defined benefit" or "defined contribution" plans and provide for the payment of contributions to outside funds that are legally separate and have autonomous assets.
The plans provide for a contribution by the employer and a contribution by the employee plan participant, also by conferring a part of his/her employee severance indemnity.
The liabilities for contributions payable are included in "Other payables". The contribution cost for the period accrues on the basis of the service rendered by the employee and is recognized in personnel costs.

Other benefits

Other benefits include loyalty bonuses payable to all employees.
Loyalty bonuses accrue and are paid after a certain number of years of service (25, 30, 35 and 40 years).

Other information

The actuarial calculations required to determine the liability of defined benefit plans are performed by an independent actuary at the end of each year. At December 31, 2008 and December 31, 2007, the liability has been calculated on the basis of the following actuarial assumptions:

	12/31/2008	12/31/2007
Discount rate	**4.80%**	4.60%
Expected remuneration increase	**2.2-3.70%**	2-3.50%
Cost-of-living increase	**2.20%**	2.00%

In addition to the above financial indexes, account has also been taken of all the demographic assumptions relating to the probability of events such as death, disability, dismissal and retirement of the employees.

34. Current liabilities – Other financial liabilities

Fair value of financial assets and liabilities and fair value estimation criteria

The fair value of securities listed in an active market is equal to the market price at the balance sheet date.

The fair value of trade receivables and payables and other current assets and liabilities due within the year is not significant as their accounting amount approximates fair value.

Credit risk

IFIL S.p.A. is exposed to credit risk insofar as it invests a portion of its cash in bonds issued by leading bank and corporate counterparts that, in any case, are selected according to their credit worthiness.
At December 31, 2008 and December 31, 2007, there are no financial assets past due and not written down and provisions for the impairment of receivables.

Liquidity risk

The details of residual contract maturities for all financial liabilities which fall under the application of IAS 39 are indicated in the table below.
The table is prepared on the basis of the allocation of the remaining cash flows from existing contracts, including principal and interest; with regard to floating-rate loans, the most recent coupon rate with the bank counterpart was used for the projection of future maturities, taking into account the effect of hedging transactions.
Flows relating to the bonds 2006/2011 are hedged by the interest rate swaps referred to in Note 31.

	2008					
€ in thousands	Within 6 months or until canceled	Between 6 months and 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**

Total	**47,174**	**4,439**	**293,943**	**80,625**	**911,250**	**1,337,431**

	2007					
€ in thousands	Within 6 months or until canceled	Between 6 months and 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
Non-convertible bonds						
IFIL bonds 2011	4,439	4,439	17,758	204,439		**231,075**
IFIL bonds 2017	40,313	0	80,625	80,625	951,563	**1,153,126**
Trade payables and other payables to related parties	467	0				**467**
Trade payables to third parties	1,936	0				**1,936**
Total	**47,155**	**4,439**	**98,383**	**285,064**	**951,563**	**1,386,604**

Outgoing flows from current operations are financed for the most part by incoming flows from ordinary activities and cash availability.

Liquidity risk could thus arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidations of assets or the receipt of suitable sources of financing that can be readily used. In this sense, IFIL S.p.A. operates so as to have irrevocable credit lines available with expiration dates and amounts consistent with its investment plans.

At December 31, 2008, the company has credit lines for € 1,240 million, of which € 510 million are irrevocable.

The expiration dates of the credit lines are as follows:

€ in millions	Lines agreed	Of which, irrevocable
Within 1 year	890	160
Between 2 and 5 years	350	350
Total	**1,240**	**510**

Market risk

IFIL S.p.A. is principally exposed to the following financial risks: currency, interest rate and price.

Currency risk

IFIL S.p.A. does not have financial liabilities denominated in currency other than Euro.
A part of the assets held for trading and cash at December 31, 2008, respectively, € 15,749 thousand and € 13,565 thousand, are denominated in currency other than Euro. Since these are securities held for trading and cash, both are adjusted to year-end exchange rates.

Interest rate risk

The analysis of debt by interest rate shows that the rates are between 4% and 5.5% in 2008 (between 3.5% and 5.5% in 2007).
IFIL S.p.A. has some interest rate swap contracts in place at December 31, 2008, for a total notional amount of € 200 million, to hedge the risk of fluctuations in interest rates on the IFIL bonds 2006-2011 with a negative fair value equal to € 5,119 thousand.

A sensitivity analysis was performed on financial instruments exposed to interest rate risk at the balance sheet date. The analysis assumes that the exposure for floating-rate liabilities at the end of the year has remained unchanged for the entire year. The assumptions used for the model are as follows:

- for debt: a symmetrical change of 50 basis points is applied;
- for interest rate swaps: the fair value is recalculated applying a parallel and symmetrical shift of 50 basis points to the current interest rate curve at the balance sheet date.

The effects of a change with an increase or decrease of 50 basis points in interest rates would be the following:

	12/31/2008		12/31/2007	
€ in thousands	**income statement**	**balance sheet**	income statement	balance sheet
+50 bsp	**3,049**			
cash and cash equivalents/financing			821	
hedging instruments		**229**		252
-50 bsp				
cash and cash equivalents/financing	**(3,049)**		(821)	
hedging instruments		**(229)**		(225)

Price risk

IFIL S.p.A. is exposed to price risk originating from investments in the capital stock of other companies held for trading or for strategic purposes; such investments are classified in the following categories:

- investments accounted for at cost;
- available-for-sale investments;
- assets held for trading.

Sensitivity analysis for price risk

Considering price risk exposure at the balance sheet date, if the prices of securities, classified as available-for-sale investments and assets held for trading are 5% higher or lower, the reserve on available-for-sale securities recorded in equity would be € 14.9 million higher or lower and the amount recognized in the income statement would be € 8.5 million higher or lower.

37. Fees to members of the board of directors and board of statutory auditors

(Art. 78 of Consob Regulation adopted by Resolution 11971 dated May 14, 1999 and subsequent amendments)

All amounts in the following table are expressed in thousands of Euro.

Name	Post held	Term of office	Expiration of term of office (a)	Fee for post held	Non-monetary benefits	Bonuses and other incentives	Other compensation (b)

(a) The term of office would have expired in concurrence with the stockholders' meeting that approved the financial statements for the year ended December 31, 2010; following the Merger, the boards resigned on March 1, 2009, the effective date of the Merger.
(b) Fee for the posts held in companies of the group.
(c) Special fee approved in favor of Mr Gabetti by the board of directors' meeting held on May 13, 2008.
(d) Does not include € 77,000 paid by Fiat S.p.A. and € 17,500 paid by Juventus Football Club S.p.A. not received but collected directly by IFIL S.p.A..

There are no key managers with strategic responsibilities in IFIL S.p.A..

The company signed a third-party liability insurance policy with a group of insurance companies for a maximum claim per incident and per year of € 50 million for coverage in the event of requests for reparation of non-fraudulent acts.

The proposals for the fees of the executive directors are formulated and approved directly by the board of directors which, after a review by the compensation and nominating committee, in accordance with art. 2389, paragraph 2, of the Italian Civil Code, has the power to establish the fees of directors vested with special responsibilities in accordance with the deed of incorporation.

The compensation and nominating committee also assists the board of directors in examining proposals relating to plans for development, for the evaluation and for the functional succession of staff, as well as the salary levels of first-category staff and stock option plans.

The fee of the chairman is not linked to either the economic results of the company or targets set by the board of directors.
A part of the fees of the chief executive officer and general manager, however, is tied to the economic results of the company and the attainment of specific targets.

The meeting of the board of directors held on June 9, 2005 approved the use of a secretarial service and a car with a driver for the chairman, Gianluigi Gabetti, also after his current term of office expires.

The board of directors in its meeting held on May 13, 2008 proceeded to appoint the posts on the board and confer the relevant powers, appoint the members of the audit committee and the compensation and nominating committee as well as the supervisory board pursuant to Legislative Decree 231/2001. Moreover, the board also voted:

- to equally divide among its members the annual fee of € 110,000 established by the stockholders' meeting held on May 13, 2008;
- to reimburse the directors for out-of-pocket expenses incurred in carrying out the activities connected with their posts;
- to fix the annual fee of the chairman at € 500,000;
- to fix the annual fee of the chief executive officer at € 1,150,000 in addition to:
    - variable fee up to a maximum of € 1,250,000 linked to the attainment specific objectives which will be determined by the board of directors based on the proposal of the compensation and nominating committee;
    - the use of accommodations placed at his disposal by the company;
    - the use of two company cars in addition to the one used for company business;
    - death and permanent disability insurance coverage for professional or non-professional-related accidents;
    - health insurance coverage, the same as for company executives;
    - a sum equal to € 2,300,000, corresponding to two years' fixed fee for the post of chief executive officer, to be paid at the end of the term of office, except in the case of the renewal of the post, voluntary resignation or failure to accept the renewal, termination for a just cause or reaching pensionable age.
- annual fee of € 1,500,000 for the special mandate conferred to Mr Gabetti, in addition to confirming the death and permanent disability insurance coverage for professional and non-professional-related accidents voted by the board of directors' meeting held on February 7, 2005;
- to fix the fees of the audit committee at € 14,500 (of which € 7,500 for the chairman and € 3,500 for each of the other two members);
- to fix the fees of the compensation and nominating committee at € 14,500 (of which € 7,500 for the chairman and € 3,500 for each of the other two members);

- to fix the compensation of the supervisory board at € 9,000 to be equally divided among the three members.

Additional information is provided in Note 39.

38. Stock options granted to directors

(Art. 78 of Consob Regulation adopted by Resolution 11971 dated May 14, 1999 and subsequent amendments)

Name	Company	Options held at beginning of year			Options granted (exercised) during year			Options held at end of year		
		Number of options	Average exercise price	Exercise period (month/year)	Number of options	Average exercise price	Exercise period (month/year)	Number of options	Average exercise price	Exercise period (month/year)
Barel di Sant'Albano Carlo	IFIL	0			3,000,000	5.291	5/16-12/19	3,000,000	5.291	5/16-12/19
Winteler Daniel John (a)	Alpitour	2,127,000	2.140	3/08-3/10				2,127,000	2.140	3/08-3/10

(a) In office until the stockholders' meeting that approved the 2007 financial statements.

There are no key managers with strategic responsibilities in IFIL S.p.A..

39. Transactions with related parties

The board of directors has adopted principles of conduct for carrying out transactions with related parties which are described in the Report on Corporate Governance, available also on the website of the company (http://www.ifil.it).

With regard to the year 2008, the transactions between IFIL S.p.A. and the related parties identified in accordance with IAS 24 have been carried out as set forth in existing laws, on the basis of reciprocal economic gain.

Receivables and payables are not guaranteed and are settled in cash. Guarantees have neither been granted nor received.

Losses have not been recognized during the year for uncollectible or doubtful receivables in relation to amounts due from related parties.

A summary of the balance sheet and income statement balances generated by transactions with related parties carried out during 2008 is presented below. All amounts are expressed in thousands of Euro.

Ratio of total transactions with related parties to total of the line items on the income statement %	**4.64%**	**61.22%**	**79.03%**	**100.00%**

The most important transactions are commented below with reference to the notes in the preceding tables.

a) On October 10, 2008, IFIL granted the parent, IFI, a loan up to a maximum amount of € 200 million which bears interest at the 1-month Euribor with a spread of 0.1%. In the current situation of the markets, this transaction enabled IFIL to eliminate the counterpart risk on that amount, with an interesting remuneration.
Since this is a transaction between related parties, as established in the rules of Corporate Governance of the two companies, the transaction was approved beforehand by the respective boards of directors on October 10, 2008.
b) Other liabilities include the measurement of the liability for € 8,075 thousand with respect to the grantees of the Alpitour stock option plan approved at the end of 2005. The reduction of the liability compared to the prior year (€ 7,796 thousand) is included in other nonrecurring income from related parties.
c) Purchases for goods and services from the subsidiary Soiem S.p.A., amounting to € 2,379 thousand, relate to the lease of the offices of the headquarters in Corso Matteotti 26, computer, telephone and logistics services.
d) Fees to directors amount to € 3,040 thousand. The preceding Note 37 presents the information required by art. 78 of Consob Regulation 11971, as amended by Resolution 15520 dated July 2006.
e) Special fees approved in favor of Mr Gabetti by the IFIL board of directors' meeting held on May 13, 2008.
f) of which € 376 thousand represents the figurative cost of the IFIL stock options assigned to the chief executive officer.

On December 15, 2006, IFIL S.p.A. purchased 100% of the capital stock of Alpitour S.p.A. from its subsidiary, Ifil Investissements S.A., at the price of € 100 million, determined on the basis of a specific appraisal performed by an independent expert. In the past, Alpitour S.p.A. was the object of a development initiative with a foreign partner of the sector which had purchased a stake. After the successful conclusion of this initiative, the investment was reacquired by IFIL S.p.A..

At December 31, 2008, Mr Tiberto Brandolini d'Adda holds 304,153 options to subscribe or purchase the same number of Sequana shares between May 2009 and May 2013 at a price per share of € 20.46; moreover, Sequana has allocated 12,340 free shares to Mr Tiberto Brandolini d'Adda, which will available from March 29, 2010.

Furthermore, in 2008, the director, Franzo Grande Stevens, rendered professional services to Fiat S.p.A. for € 1 million (including acting as the secretary to the board of directors).

40. Guarantees, commitments and pending litigation

Besides what has already been described in the Report on Operations regarding the proceedings in respect of the content of the press releases issued by IFIL and Giovanni Agnelli e C. on August 24, 2005 and in the preceding notes, there is no other information to report.

41. Fees paid to the audit firm (art. 149 – duodecies of Consob Regulation 11971 dated May 14, 1999 and subsequent amendments)

The professional services rendered to the IFIL Group by the audit firm in 2008 are the following:

€ in thousands	Party which rendered the service	Parent IFIL S.p.A.	Consolidated subsidiaries	**Total**
Type of services				
Audit	Deloitte & Touche S.p.A.	70	493	**563**
	Rete Deloitte		2,902	**2,902**
Total audit		70	3,395	**3,465**
Other services				
. attestation	Deloitte & Touche S.p.A. Rete Deloitte	7		**7** (a)
. other services	Deloitte & Touche S.p.A. Rete Deloitte	13	4	**17** (b)
Total other services		20	4	**24**
Total		**90**	**3,399**	**3,489**

(a) Confirmation of the financial ratios and limited review of the balance sheet at June 30, 2008, prepared in accordance with art. 2501-quater of the Italian Civil Code.

(b) Agreed upon procedures carried out regarding the completeness and the updating of the Group's IFRS reporting package.

In addition, the fees for professional services paid to the Deloitte & Touche audit firm and its network by the Fiat Group (accounted for using the equity method in the consolidated financial statements of the IFIL Group) was € 22.9 million.

42. Net financial position

In accordance with the provisions of Consob Communication 6064293 dated July 28, 2006, the composition of the net financial position of IFIL S.p.A. is provided below:

€ in thousands	**12/31/2008**	12/31/2007	Change
Non-current financial receivables:			
- from third parties	**196**	285	(89)
Other financial assets held for trading	**170,499**	47,856	122,643

- with related parties		0	0
- with third parties	**(944,179)**	(943,578)	(601)
Current debt:			
- with related parties		0	0
- with third parties	**(28,876)**	(23,624)	(5,252)
Net financial position	**(190,547)**	(749,160)	558,613
- with related parties	**199,456**	0	199,456
- with third parties	**(390,003)**	(749,160)	359,157

43. Approval of the separate financial statements and authorization for publication

The separate financial statements at December 31, 2008 were approved by the board of directors on March 25, 2009 which authorized their publication starting from March 31, 2009.

Turin, March 25, 2009

On behalf of the Board of Directors
The Chairman
John Elkann

IFIL investments

(a) Of which € 58 million is for the subscription to Perfect Vision Limited convertible bonds, € 21 million for the subscription to a 17.03% stake in Banijay Holding and € 12 million for investments in NoCo B.

(b) These mainly refer to forms of investment of liquidity which are classified in cash and cash equivalents.

The reconciliation between cash and cash equivalents in the statement of cash flows and the corresponding line items in the balance sheet is presented in Note 25.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. General information on the activities of the Group

On February 20, 2009, the deed was signed for the merger by incorporation of IFIL Investments S.p.A. in IFI – Istituto Finanziario Industriale S.p.A., which assumed the new name of EXOR S.p.A., with effect from March 1, 2009.

On the same date, the board of directors and the board of statutory auditors of the merged company resigned.

This Annual Report 2008 of the IFIL Group was approved by the board of directors of EXOR S.p.A., the surviving company, in its meeting held on March 25, 2009.

The merger will not modify the Group's programs as EXOR, which already had control of IFIL, will continue the investment activities.
The main subsidiaries and associates operate in different business segments as described in the Introduction to the Report on Operations.

2. Accounting policies used in the preparation of the consolidated financial statements

The 2008 consolidated financial statements have been prepared under the historical cost convention, adjusted as required for the measurement of certain financial instruments and under the going concern assumption. The Group companies, in fact, have assessed that, despite operating in a difficult economic and financial environment, no material uncertainties exist (as defined in paragraph 23 of IAS 1) about its ability to continue as a going concern.

The consolidated financial statements of the IFIL Group at December 31, 2008 have been prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and endorsed by the European Union. The designation IFRS also includes all valid International Accounting Standards (IAS), as well as all interpretations of the International Financial Reporting Interpretations Committee (IFRIC), formerly the Standing Interpretations Committee (SIC).

The consolidated financial statements have also been drawn up in accordance with the provisions contained in Consob Resolutions 15519 and 15520 and in Communication 6064293 dated July 28, 2006, pursuant to art. 9, paragraph 3, of Legislative Decree 38 dated February 28, 2005.

The consolidated financial statements of the IFIL Group are expressed in millions of Euro.

3. Formats of the consolidated financial statements

The consolidated income statement is presented by nature of expense which is considered more representative than the presentation based on the function of expenses used by the operating companies consolidated line-by-line.

The consolidated balance sheet makes a distinction between current and non-current assets, in accordance with IAS 1.

The consolidated statement of changes in equity presents the total income and expense recognized directly as an increase and decrease of reserves in a specific section.
The consolidated statement of cash flows is presented using the indirect method. Income and expenses for the year are adjusted by the effects of non-monetary transactions, by past or future deferrals or accruals of operating collections or payments and by financial elements due to investment or financing activities.

The Euro is the functional currency and presentation currency of the Group.

4. Unusual and/or atypical transactions and significant nonrecurring events and transactions and related party transactions

Pursuant to Consob Communication 6064293 dated July 28, 2006, during 2008, there are no unusual and/or atypical transactions or significant nonrecurring events and transactions, also on the basis of information received from the companies of the Group, which are required to be disclosed as defined by that Communication.

Minor nonrecurring transactions are disclosed in Note 13.

The balance sheet and income statement balances originating from transactions with related parties are summarized and commented in Note 39.

5. Significant accounting policies

Consolidation

The companies in which the Group has the power to exercise control, directly or indirectly, by determining the financial and operating policies of an enterprise so as to gain benefits from its activities are consolidated line-by-line, attributing to the minority interest the share of equity and the net result.

The financial statements of subsidiaries as defined above are included in the consolidated financial statements from the date that control by the Group commences until the date that control ceases.

Pending possible amendments to IAS 27 proposed in the Exposure Draft ED 10 “Consolidated Financial Statements”, that should definitively clarify the criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, the IFIL Group has continued to exclude the Fiat Group, in which the subsidiary IFIL S.p.A. has a 30.45% holding of ordinary capital stock, from line-by-line consolidation consistently with the method followed for the first-time adoption of IFRS and the preparation of the consolidated financial statements at December 31, 2005 and thereafter.
However, in order to provide more meaningful disclosure, Note 42 presents consolidated pro-forma data as if the Fiat Group had been consolidated line-by-line.

The investment in the Fiat Group, the companies controlled and excluded from consolidation, the joint ventures, the associates and the other investments are accounted for according to the criteria indicated in “Investments in unconsolidated companies”.

The results of discontinued operations or assets held for sale which meet the specific requirements of IFRS 5 are shown separately and correspond to the results achieved up to the time of disposal, after taxes and other direct attributable costs, as well as the gains (losses) on their sale.

The share of the equity and the results of operations attributable to the minority interest are disclosed separately. The minority interest in equity is determined on the basis of the fair value attributed to the assets and liabilities at the date of the acquisition of control, excluding any goodwill referring to them.

When losses in a consolidated subsidiary pertaining to the minority interest exceed the minority interest in the subsidiary's capital stock, the excess is charged to the Group, unless the minority interests are expressly committed to reimbursing the losses, in which case the excess is recorded as an asset in the consolidated financial statements. If no such commitment is in place, should profits be realized in the future, the minority interests' share of those profits will be attributed to the Group, up to the amount necessary to recover the losses previously absorbed by the Group.

The effects of subscribing to capital stock increases when there are different issue prices for the various classes of stock are recognized as changes in equity.

Date of reference: investments are consolidated using the financial statements at December 31, the closing date of the parent, which covers a 12-month period, or accounting data prepared as of the same date (when the closing date differs from that of the parent), adjusted, where necessary, to conform with the accounting principles of the Group. The Alpitour Group, which fiscal year ends on October 31 of each year, is consolidated line-by-line on the basis of the consolidated financial statements ended on that date, since it is impossible to obtain the consolidated accounting data at December 31, on a timely basis without disproportionate expense. Between November 1 and December 31, 2007 and 2008, there were no significant transactions or events which would have required adjustments to the consolidated financial statements of the Alpitour Group. This treatment is allowed by IAS 27 – Consolidated and Separate Financial Statements.

Intragroup transactions: intragroup balances and significant transactions and any unrealized gains and losses between companies consolidated line-by-line are eliminated. Unrealized gains and losses arising from transactions with companies accounted for by the equity method are eliminated to the extent of the Group's interest in those companies. Intragroup losses are not eliminated if they are considered representative of an effective lower value of the asset sold.

Business combinations

Acquisitions of companies and business segments are recorded using the purchase method of accounting. The cost of an acquisition is measured as the sum of the fair value (at the acquisition date) of the assets given (consideration paid), liabilities incurred or assumed and any equity instruments issued by the Group in exchange for the acquisition of the control of the acquired company, plus each cost directly attributable to the acquisition. The identifiable assets, liabilities and contingent liabilities of the company acquired, which meet the conditions for recognition under IFRS 3, are recognized at their fair value at the acquisition date, except for non-current assets (or groups of assets held for sale) which are classified as held for sale, in accordance with IFRS 5, and are recognized and measured at fair value net of selling costs.
Goodwill originating on acquisition is recognized in assets and recorded initially at cost, measured as the excess of the cost of acquisition over the Group's interest in the fair value of the recognized identifiable assets, liabilities and contingent liabilities. If this interest exceeds the cost of acquisition, the values are re-examined and if there is still an excess, it is recognized immediately in the income statement.

The share of the minority interest in the company acquired is recognized initially at the fair value of the assets, liabilities and contingent liabilities recognized.

Investments in unconsolidated companies

The investments in the Fiat Group and in associates (principally Sequana) are accounted for by the equity method in the attached consolidated financial statements. Under this method, such investments are stated at cost, increased or decreased by the Group's share of the changes of the post-acquisition movements in the net assets of the company and any impairment of the investment. When the Group's share of any losses in the unconsolidated companies exceeds its interest, the Group only recognizes the losses if it has assumed legal or constructive obligations or has made payments on behalf of these companies.

Any excess of the cost of acquisition over the Group's interest in the fair value of the assets, liabilities and contingent liabilities of the investees recorded at the date of acquisition is recognized as goodwill. Goodwill is included in the carrying amount of the investment and is tested for impairment in accordance with IAS 36.

Intangible assets

Goodwill: in the case of acquisitions of businesses, the acquired identifiable assets, liabilities and contingent liabilities are recorded at fair value at the date of acquisition.
The excess of the cost of acquisition over the Group's interest in the fair value of those assets and liabilities is classified in the assets in the balance sheet. Goodwill relating to the minority interest of subsidiaries acquired is eliminated. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized in the income statement at the date of acquisition.

On disposal of a part or the whole of a business which was previously acquired and which gave rise to the recognition of goodwill, the residual amount of the related goodwill is included in the determination of the gain or loss on disposal.
In the context of IFRS first-time adoption, the Group elected not to apply IFRS 3 – Business Combinations retrospectively to the acquisitions of businesses that occurred before January 1, 2004; as a consequence, goodwill arising on acquisitions before the date of transition to IFRS has been retained at the previous Italian GAAP amounts, subject to being tested for impairment at that date.

Other intangible assets: purchased or internally-generated are recognized as assets in accordance with IAS 38 – Intangible Assets when they are controlled by the enterprise, where it is probable that the use of the asset will generate future economic benefits and where the costs of the asset can be determined reliably.
Such assets are measured at purchase or manufacturing cost and amortized systematically on a straight-line basis over their estimated useful lives, if these assets have finite useful lives, taking into account estimated realizable value and writedowns for impairment losses. Intangible assets with indefinite useful lives and those not yet in production are not amortized, but tested for impairment annually and more frequently, whenever there is an indication that the asset may be impaired. When, subsequently, there is an indication that an impairment loss may no longer exist or may have decreased, the carrying amount of the asset is increased up to the new estimated recoverable amount which cannot exceed the amount which would have been determined had no impairment loss been recognized. The reversal of an impairment loss is recognized immediately in the income statement.

Intangible assets with a finite useful life are amortized from the time they are ready for use on a straight-line basis over the estimated useful life.

Other intangible assets recognized following the acquisition of an enterprise are capitalized separately from goodwill if they meet the definition of intangible asset and if their fair value can be measured reliably. The costs of such intangible assets are represented by their fair value at the date of acquisition.

Amortization plans and any realizable value are reviewed at least annually.

Players' registration rights: are intangible assets with a finite useful life equal to the duration of the players' contracts. The players' registration rights are recorded at cost discounted to present value, including any incidental expenses.

Players' registration rights are amortized on a straight-line basis over the term of the contracts between the company and each individual player. The original amortization plan can be extended following the early renewal of the contract, starting from the same season in which the contract is renewed. For youth players registered as "giovani di serie", amortization is taken over five years on a straight-line basis.

Players' registration rights are recognized on the date affixed by the National Professional League giving execution to the contracts for national transfers and the transfer date indicated by the Italian Soccer Federation for international transfers.

Players' registration rights also include sharing receivables and payables ex. art 102-bis of the N.O.I.F (Internal Organizational Rules issued by the Italian Soccer Federation – F.I.G.C.)".

Player sharing receivables represent the value of the simultaneous repurchase of 50% of the registration rights of the players sold. They are recognized at the adjusted cost and are not amortized as they are used by other companies. Player sharing receivables are written down when the estimated remaining useful life at the end of the sharing period is permanently below the amount recognized. Adjusted cost is the lower of the cost incurred originally under the legal form of agreement between the parties and the actual repurchase value.

Player sharing payables represent the value of the sale of 50% of the registration rights of the players sold. They are recognized at nominal value as a deduction from the value of the registration rights of the player sold to show the actual purchase value. As a result, the amortization of the players' registration rights sold relating to the player sharing agreement is calculated on that lower cost.

When there are indications of an impairment in the players' registration rights (for example, serious injury or significant losses from sales made subsequent to the reporting date) an impairment loss is recorded for the remaining carrying amount.

Property, plant and equipment

Property, plant and equipment are stated at purchase or production cost less accumulated depreciation and impairment losses, if any.

Purchase cost includes all directly attributable costs necessary to make the asset ready for use. When there are current obligations for decommissioning, the carrying amount includes the estimated costs (discounted to present value) to be incurred when the structure is decommissioned which is recognized with a corresponding entry to a specific provision account.

Any capital investment grants are recorded in the balance sheet in liabilities and subsequently allocated systematically to the income statement in relation to the relative depreciation of the assets.

Borrowing costs associated with investments are generally charged to the income statement on an accrual basis.

Assets acquired under finance leases are recognized in property, plant and equipment with a corresponding entry to financial payables to lessors and depreciated on the basis indicated below. Whenever there is reasonable certainty that the asset will not be purchased at the end of lease, depreciation is taken over the period of the lease, if shorter than the useful life of the asset.

If an asset has significant components with different useful lives, these components are recorded and depreciated separately.

Subsequent purchase costs are capitalized only if they increase the future economic benefits of the assets to which they refer. All other costs are recognized in the income statement when incurred.

Property, plant and equipment are depreciated systematically using the straight-line method, from the time they are ready for use, over their estimated useful lives and taking into account estimated realizable value. The carrying amounts are periodically tested for impairment.

The estimated useful lives for the main categories of property, plant and equipment are as follows:

Buildings	from 10 to 40 years
Plant and machinery	from 5 to 20 years
Industrial equipment	from 5 to 20 years
Other assets	from 3 to 25 years

The depreciation plan and the estimate of realizable value are reviewed annually.

The cost of land is recorded separately and is not depreciated since it has an indefinite life.

Impairment losses

At every balance sheet date, the Group reviews the carrying amount of its property, plant and equipment and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If there are indications of impairment, the recoverable amount of those assets is estimated to determine the amount of the impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.
Intangible assets with an indefinite life, including goodwill, are tested annually for impairment or whenever there are indications that the assets might be impaired.

The recoverable amount of the asset is the higher of fair value less costs to sell and the value in use. In assessing the value in use, the pre-tax estimated future cash flows are discounted to present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset.
If the recoverable amount of an asset (or a cash-generating unit) is lower than the relative carrying amount, the asset is reduced to the recoverable amount. An impairment loss is recognized in the income statement immediately unless the asset is represented by land or buildings other than investment property recognized at revalued amounts, in which case the loss is recognized in the respective revaluation reserve.
Where an impairment loss for assets other than goodwill subsequently no longer exists or has decreased, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but not in excess of the carrying amount that would have been recorded had no impairment loss been recognized. A reversal of an impairment loss is recognized in the income statement immediately unless the asset is measured at revalued cost, in which case the reversal is made to the revaluation reserve.

Non-current other financial assets

Financial investments are recognized and reversed on the trade date if the purchase or sale of an investment is made through a contract which terms require the delivery according to the terms established by the reference market and are initially measured at fair value, increased by transaction costs.

Such financial investments are classified in the following categories: available-for-sale investments and securities and other financial assets held to maturity.

Available-for-sale investments: are measured at fair value which coincides, for listed investments, at the market price on the last day of the reporting period translated, if necessary, at the year-end exchange rate. Unrealized gains and losses are recognized directly in equity, net of the relevant deferred tax effect. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity should be reversed and recognized in the income statement. Given the limited number of available-for-sale investments, such evidence is assessed case by case. The reversal of such impairment losses are subsequently only made through equity. Upon disposal of the asset, the cumulative gains or losses previously recognized in a specific equity reserve are transferred to the income statement.

Dividends on investments held for sale are recognized in the income statement when the Group has the right to receive them.

Available-for-sale securities: represented by debt securities, are initially recognized at cost and subsequently measured at fair value. The difference is recognized in equity. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity is reversed and recognized in the income statement. Such impairment losses, when the reasons which gave rise to them no longer exist, are reversed in the income statement but only up to the initial amount.

Securities and other financial assets: held to maturity are recognized and measured at amortized cost.

The amortized cost of a financial asset is the amount at which the financial asset is recognized initially net of principal repayments, decreased by the total amortization of any difference between the initial amount and the maturity amount using the effective interest method, less any writedown (made directly or through the use of an accrual) for impairment or uncollectibility.

The effective interest rate is a method for calculating the amortized cost of a financial asset and allocating the interest over the period of reference. The effective interest rate is the rate that exactly discounts future cash flows for estimated collections (including transaction costs paid) over the expected life of the financial instrument or, if appropriate, over a shorter period.

Bonds with mandatory conversion into stock: are recognized by separating the bond component from the embedded derivative represented by the obligation to convert the bonds into the stock of the issuer at an established maturity date.
At initial recognition, the component represented by the bond is calculated by discounting the cash flows of the instrument to present value using the market rate of a non-convertible bond, recording the embedded derivative as the difference from the price paid.
Subsequently, the bond component is measured at amortized cost whereas the embedded derivative is measured at fair value with a corresponding entry to the income statement.

Current financial assets

Current financial assets include equity shares, credit instruments and other forms of investment of liquidity, as well as derivative instruments for trading.
Financial assets purchased originally for resale in the short-term are measured at year end at fair value using, for listed securities, the market price translated, if necessary, at the year-end exchange rate. The fair value adjustment of current financial assets is recorded with a corresponding entry in the income statement.

Cash and cash equivalents

Cash and cash equivalents represent highly liquid short-term financial investments which can be readily converted into cash and are subject to an insignificant risk of a change in their value.

Inventories

Inventories are stated at the lower of purchase or production cost and estimated realizable value determined using the weighted average cost method or FIFO (First In, First Out).

Inventories of finished and semifinished goods included direct costs of materials and labor and indirect variable and fixed overheads, excluding general and administrative expenses. The market price takes into account writedowns for inventory obsolescence.

Assets held for sale

Assets, or a group of assets and liabilities (that must not be offset), which are highly probable of being sold within the next year and are available for immediate sale in their current condition, are classified on specific lines on the balance sheet. If they represent significant sectors of activities, the relative results are shown separately in the income statement. In order to meet this condition, management must be committed to a plan to sell, which is highly probable of taking place within one year of classification in this category. The disclosure relating to the results of such assets, is shown separately also for the prior year.

Such assets are stated at the lower of the net carrying amount and fair value less costs to sell. Any impairment loss that arises should be recorded in the income statement and, eventually, is reversed subsequently if the reasons for the impairment no longer exist, but only up to the initial amount. From the time the asset is recognized as an asset held for sale, amortization and depreciation cease. Financial expenses and expenses attributable to the liabilities of a disposal group classified as held for sale should continue to be recognized.

When the conditions which led to the recognition of an asset as held for sale no longer exist, it should be reclassified to non-current assets and stated at the lower of the carrying amount before being designated as held for sale and its recoverable amount at the date of the subsequent decision not to sell the asset; the difference is recognized in the income statement.

Receivables and payables

Receivables are initially recognized at their nominal amount which substantially coincides with fair value.

If there is objective evidence of an impairment loss or a risk that the Group will not be able to collect the contractual amount (principal and interest) at the contractually agreed dates, a provision is set aside which corresponds to the difference between the asset's carrying amount and the present value of estimated recoverable future cash flows, discounted at the effective interest rate.

Payables are initially recognized at their nominal amount, reduced by expenses incurred to assume them and increased by interest expense due, if any. Payables are subsequently measured at amortized cost using the effective interest method.

Receivables sold with recourse remain in the balance sheet of the assignor which records a payable to the buyer against collection and the financial expense to be incurred. Receivables sold without recourse are only derecognized if it can be demonstrated that the risks and rewards relating to the asset have been effectively transferred to the assignee.

Consequently, all receivables sold which do not meet IAS 39 derecognition requirements remain in the Group financial statements even though they have been legally sold. A corresponding financial liability is recorded in the consolidated balance sheet in debt. Gains and losses relating to the sale of such assets are not recognized until the assets are removed from the Group balance sheet.

Debt

Interest-bearing debt is recognized at cost which corresponds to the fair value of the amount received net of directly attributable costs. Debt is subsequently measured at amortized cost. The difference between amortized cost and the amount to be repaid is recognized in the income statement on the basis of the effective interest rate over the period of the loan.
Debt is classified in current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

The amortized cost of a financial liability is the amount at which the financial liability was recognized initially net of principal repayments, increased or decreased by the total amortization on any difference between the initial amount and the maturity amount using the effective interest method.

The effective interest rate is a method for calculating the amortized cost of a financial liability and allocating the interest over the period of reference. The effective interest rate is the rate that exactly discounts future cash flows for estimated payments (including transaction costs paid) over the expected life of the financial instrument or, if appropriate, over a shorter period, at the net carrying amount of the financial liability.

Derivative financial instruments and hedge relationships

Derivative financial instruments are recognized initially at fair value at the date the contracts are entered into and are subsequently measured at fair value at year-end. The resulting gains or losses are recognized in the income statement immediately, unless the derivative is designated and is effective as a hedging instrument, in which case the times for recognition in the income statement depend upon the nature of the hedge relationship. The Group designates certain derivatives as fair value hedges of certain assets or liabilities recognized in the financial statements or as cash flow hedges of certain highly probable forecast transactions.

A derivative is classified as a non-current asset or liability if the maturity date of the instrument is beyond 12 months and it is not expected to be realized or settled within 12 months. Other derivatives are classified as current assets or liabilities.

Financial instruments qualify for hedge accounting only when there is formal designation and documentation, including the company's risk management objective and strategy, and the hedge, verified periodically, is highly effective.

When financial instruments qualify for hedge accounting, the following accounting treatment applies:

- Fair value hedge: where a derivative financial instrument is designated as a hedge of the exposure to changes in fair value of a recognized asset or liability that is attributable to a particular risk and could affect the income statement, the gain or loss from re-measuring the hedging instrument at fair value is recognized in the income statement, together with the change in fair value of the hedged item. The gain or loss from the change in fair value of the hedging instrument is recognized on the same line of the income statement as the hedged item.
- Cash flow hedge: where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows of a recognized asset or liability or a highly probable forecast transaction and could affect profit and loss, the effective portion of any gain or loss of the derivative financial instrument is recognized directly in equity. The cumulative gain or loss is removed from equity and recognized in the income statement at the same time in which the hedged transaction affects the income statement. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in equity and is recognized in the income statement at the same time the

related transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in equity is recognized in the income statement immediately.

If the conditions of IAS 39 are not met, the transactions, even if they have been set up for the purpose of managing risk exposure, are classified and measured as trading transactions. In that case, the difference from fair value is recognized in the income statement.

Employee benefits – Pension plans

The companies of the Group offer their employees various forms of pension plans with specific characteristics that vary according to the law, the regulations and the practices in the countries in which they operate.

The pension plans are currently either defined contribution or defined benefit plans.

Under defined contribution plans, contributions are paid to outside, legally separate entities with administrative autonomy, which free the employer from any subsequent obligation as the outside entity assumes the commitment to pay what is due to the employee.

Consequently, the Group companies record the contribution paid as an expense and no additional obligation is recognized.

Defined benefit plans include post-employment benefits, other than those under defined contribution plans. Under defined benefit plans, the Group companies have the obligation to set aside the costs relating to the benefits guaranteed to their employees in service and pay retired employees. The actuarial risk and the investment risk are thus substantially borne by the companies of the Group.

Defined benefit plans, which, for the Italian companies, include employee severance indemnities accrued to December 31, 2006, are measured by actuarial techniques using the Project Unit Credit Method.

As provided by the amendment to IAS 19 – Employee Benefits, issued by the IASB in December 2004, the Group elected to recognize actuarial gains and losses immediately in the period in which they arise, outside the income statement, in a statement of recognized income and expense.

All cumulative actuarial gains and losses that existed at January 1, 2004 have been recognized in equity.

For defined benefit plans without plan assets, the expenses relating to the increase in the present value of the obligation, due to the fact that the payment date of the benefits is nearing, are recognized in financial expenses.

Payments relative to defined contribution plans are recognized as an expense in the income statement as incurred.

The liability for defined benefit plans is calculated on an individual basis and takes into account life expectancy, personnel turnover, salary changes, revaluation of the yields, inflation and the present value of the amounts to be paid. The specific assumptions of each plan take into account the local economic conditions.

Defined benefit plans are in some cases covered by financial assets managed outside the Group companies. In those cases, the amount recognized in the financial statements for such liabilities corresponds to the difference between present value of future services (actuarial liability) and the market value of the assets invested that are intended to cover the liability, increased by losses or decreased by unrecognized (or not yet recorded) gains and, in any case, taking into account the surplus cap limit for assets established by paragraph 58 of IAS 19. When the result of this calculation shows a net obligation it is recognized in a provision under liabilities; in the reverse case, an asset is recognized.

The scheme for the employee severance indemnities of the Italian companies was considered a defined benefit plan up to December 31, 2006. The regulations for the employee severance indemnities scheme was modified by Law 296 dated December 27, 2006 (Budget Law 2007), and subsequent decrees and regulations issued in the early months of 2007. In view of these changes and particularly with reference to companies with at least 50 employees, the employee severance indemnities scheme is now considered a defined benefit plan only for amounts accrued prior to January 1, 2007 (and not yet paid at the balance sheet date) whereas after that date it is considered a defined contribution plan. For Italian companies with less than 50 employees, the employee severance indemnities scheme remains a post-employment benefit under a defined benefit plan. The amount already accrued must be projected to estimate the amount payable upon termination of employment and subsequently discounted to present value using the Projected Unit Credit Method. This actuarial method is based upon demographic and financial assumptions in order to arrive at a reasonable estimate of the amount of benefits which had already been accrued for each employee based on his/her service life.

Using the actuarial calculation, a charge is made to the income statement to “Personnel Costs” for the current service cost which defines the amount of rights accrued during the year by the employee and to “Financial income (expenses)” for the interest cost which constitutes the figurative expense which the company would have incurred by securing a loan on the market equal to the amount of employee severance indemnities.

Employee benefits – Stock option plans

Stock-based payments to employees are measured at the fair value of the equity instruments at the grant date. In accordance with IFRS 2 – Share-based Payment, the full amount of the fair value of stock options at the grant date is recognized in the income statement in personnel costs on a straight-line basis over the period from the grant date to the vesting date with a corresponding entry directly in equity, based upon an estimate of the number of options that is expected to vest. Changes in fair value after the grant date have no effect on the initial measurement.

The cost is recalculated each year based upon a revision of the above-indicated estimate.

In accordance with IFRS 2, the Group has applied this standard to stock options granted after November 7, 2002 and not yet vested at the effective date of IFRS 2 (January 1, 2005).

In the event the plans require a monetary payment equal to the increase in the value of shares of the enterprise, the fair value of the liability of the plan is re-measured at each reporting date until its extinction and the cost is recognized in the income statement.

Provisions for other liabilities and charges

Provisions for other liabilities and charges refer to costs and expenses of a determinate nature which are certain or likely to be incurred but, at the balance sheet date, are uncertain as to the amount or as to the date on which they will arise. Accruals are recorded when there is an obligation, legal or constructive, resulting from a past event, when it is probable that the use of resources will be required to satisfy the obligation and when a reliable estimate of the amount of the obligation can be made.

The amount recognized in the financial statements as the provision for other liabilities and charges expresses the best estimate of the monetary resources necessary to extinguish the current obligation at the balance sheet date, taking into account the risks and uncertainties surrounding the obligation. When the accrual is determined by using estimated cash flows to extinguish the obligation, the carrying amount is represented by the discounted present value of those cash flows.

Changes in estimates are recorded in the income statement in the period in which the change occurs.

The accruals mainly refer to restructuring expenses. An accrual for restructuring operations is booked on condition that a detailed and formal restructuring plan has been approved and that the restructuring has begun or the details of the restructuring plan have been made public and that valid expectations of it have been raised.

Treasury stock

The cost of any treasury stock purchased and/or held, also through subsidiaries, as a result of specific stockholder resolutions are recognized as a deduction from equity. Therefore, the reserve offsetting treasury stock in portfolio is not shown separately. The proceeds from any subsequent sale are recognized as movements in equity.

Income taxes

Current income taxes are calculated according to the tax laws in force in the countries in which the companies of the Group operate on the basis of the taxable income for the year. Taxable income is different from the income expressed in the consolidated financial statements in that it excludes costs and revenues that become taxable or deductible in other years and also excludes items which are never taxable or deductible.

Temporary differences between the amounts of assets and liabilities in the financial statements and the corresponding amounts for tax purposes are recorded in deferred tax liabilities. Deferred tax assets relating to the carryforward of unused tax losses, as well as those arising from deductible temporary differences, are recognized to the extent that it is probable that future profits will be available against which they can be utilized.

Deferred tax assets and liabilities are measured at the tax rates expected to apply to taxable income in the periods in which temporary differences will reverse. Deferred income tax assets and liabilities are offset where there is a legally enforceable right of offset.

Deferred tax assets and liabilities are shown separately from other receivables and tax payables in a specific line item under non-current assets or liabilities.

Current and deferred income taxes are recognized in the income statement except for those relating to items debited or credited directly in equity which are recognized directly in equity. With regard to business combinations, the tax effect is taken into consideration in determining the excess of the cost of acquisition over the fair value of the assets, liabilities and contingent liabilities, while no tax effect is attributed to the residual amount represented by goodwill.

Transactions in foreign currency and consolidation of foreign entities

The financial statements of each Group company are presented in the functional currency of the economic environment in which they operate. For purposes of the consolidated financial statements of the Group, the financial data of these companies is translated into Euro which is the currency of the parent and the presentation currency of the consolidated financial statements.

In the preparation of the financial statements of the individual companies of the Group, the transactions expressed in currencies other than the functional currency are recorded at the exchange rate in effect at the transaction date. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the foreign exchange rate prevailing at that date. Non-monetary items are measured at historical cost and are not translated. Exchange differences arising on the settlement of monetary items or on reporting monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements are recognized in the income statement.

For purposes of the presentation of the consolidated financial statements, the assets and liabilities of foreign companies with functional currencies different from the Euro and which are included in the scope of consolidation are translated using the exchange rate in effect at the balance sheet date (current exchange method). Items in the income statement and cash flows in the statement of cash flows are translated at the average exchange rate for the year. The translation differences resulting from the application of this method are classified in equity until the sale of the investment.
Goodwill and fair value adjustments generated by the acquisition of a foreign entity are recognized in the respective currency and translated at the year-end exchange rates.

Revenue recognition

Revenues are formed mainly by sales of services produced within the major business segments of the Group and are stated net of any adjusting items.

Revenues from services are recognized by reference to the stage of completion of the transaction at the balance sheet date and measured on the basis of the services rendered.

In particular, revenues are recognized in the main business segments as follows:

Cushman & Wakefield Group

The C&W Group's revenues are categorized into transaction services and non-transaction services. Non-transaction services include primarily capital market services and client solutions (financial advisory, asset management, valuation, corporate real estate services, and research). Fees related to transaction services are recognized as revenue at the time the related services are fully performed and the amount can be measured reliably, unless significant material future contingencies exist, in which case they are recognized when the contingency is resolved.
Asset management fees are recognized as revenue when earned, typically on a monthly basis as services are rendered.
Other revenues for fees related to non-transaction services are recognized when the assignment has been completed. Fees for ongoing professional services are recognized as revenue when earned, which is when services are rendered.
The C&W Group recognizes certain reimbursements (primarily salaries and related charges) mainly related to the facilities and property management operations as revenue when the underlying reimbursable costs are incurred.

Alpitour Group

Sales of tourist packages, airplane transportation services and brokering revenues are recognized based on the departure date.
Revenues for hotel services and services rendered in connection with the incoming sector are recognized in the income statement at the service performance date.
Premiums connected with reinsurance activities are recognized in the income statement on the client's departure date since the insurance coverage is strictly related to the travel package.

Juventus F.C.

Revenues from games, from radio and television rights and media income are recognized at the actual moment of the event (when the game is played). Revenues from season tickets are recognized when the tickets are paid even if payment is received at the end of the season preceding the season to which the tickets refer and are deferred on the accrual basis using the same principle (when the game is played).

Revenues from the performance of services (including sponsorships) are recognized on the basis of the stage of completion of the service or upon completion of the service.

Revenues are recorded net of returns, discounts and allowances.

Gains and losses from the sale of players' registration rights are recognized according the date affixed by the National Professional League giving execution to the contracts for national transfers and the transfer date indicated by the Italian Soccer Federation for international transfers.

Gains from the sale of players' registration rights, in which 50% is simultaneously repurchased, are adjusted for 50% of their amount in order to recognize in the income statement the income accrued for the portion of the deferred rights actually transferred through the sale. The remaining amount of the gain, instead, will only be realized upon termination of the player-sharing agreement when the player leaves the company. If there is a loss on the sale of the players' right which precedes the signing of the player-sharing contract, this loss, on the contrary, is not adjusted for IFRS purposes. This is due to the fact that the loss is comparable to the effect of an impairment test of the deferred right, under the assumption that the moment in time in which the right is disposed of represents the moment in which that loss arose.

IFIL Holdings System

Financial income is recognized according to the accrual principle on the basis of the effective rate of return.

Dividends from investments accounted for at cost are recognized in the income statement when they are approved and only from the earnings generated after the purchase of the investment holding. Instead, when the dividends are distributed from reserves generated before acquisition, the dividends are recognized as a deduction from the cost of the investment holding.

Dividends from available-for-sale investments and investments held for trading are recognized in the income statement upon approval of the appropriation.

Commission expenses

Commissions payable to brokers are recorded at the time the Cushman & Wakefield Group recognizes its brokerage commission revenues and are generally not paid until after the collection of the related commissions receivable.

Other nonrecurring income (expenses)

Other nonrecurring income (expenses) includes the gains and/or the losses on the disposal of non-current assets other than discontinued operations or assets held for sale (the results of the latter are included in “Profit (loss) from discontinued operations or assets held for sale”). They may also include impairment losses on assets, restructuring costs, accruals and utilizations of provisions for liabilities.

Earnings per share

Basic earnings per share is calculated by dividing the profit attributable to the equity holders of the parent by the weighted average number of shares outstanding during the year, excluding treasury stock. Diluted earnings per share is calculated by adjusting the weighted average number of shares outstanding to assume conversion of all dilutive potential shares. The profit attributable to the equity holders of the parent is also adjusted to take into account the effects, net of taxes, of the conversion.

Basic and diluted earnings per share are calculated on the result from continuing operations and the result from discontinued operations or assets held for sale.

Segment information

Given the nature of investment companies, IFIL S.p.A. presents segment information which coincides with the consolidated data of each operating subsidiary and associate holding company, each of which represents an investment in a primary reporting segment.

6. Principal sources of uncertainty in making financial statement estimates

The preparation of financial statements and related disclosures that conforms to IFRS requires estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. The estimates and assumptions are based on experience and other factors that are considered to be relevant. Actual results could differ from those estimates. Estimates and assumptions are reviewed periodically and the effects of any changes are recognized in the income statement in the period in which the estimate is revised if the revision only affects that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The situation caused by the present economic and financial crisis has led to the need to make assumptions about future performance which are characterized by significant uncertainty; as a consequence, therefore, it cannot be excluded that results may arise during the next year which differ from estimates, and which therefore might require adjustments, even significant, to be made to the carrying amount of the items in question, which at the present moment can clearly neither be estimated nor predicted.

The following are the critical judgments and the key assumptions concerning the future that have been made in the process of applying the accounting policies and that may have the most significant effect on the amounts recognized in the consolidated financial statements or that have a risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

- the impairment test on goodwill and on the C&W Inc. Group trademarks which resulted in an impairment loss recorded for € 7 million ($9.5 million) at December 31, 2008 (please refer to Note 19 to the consolidated financial statements);
- the impairment loss of € 7 million on the residual amount of the registration rights for the player Andrade, given that it will be impossible for the player to recover to play professionally due to a serious injury (please refer to Note 13 to the consolidated financial statements);
- the impairment loss of € 5 million on the video archives of Juventus F.C., carried out on the basis of the commercial exploitation plan and estimated cash and economic flows acquired and expected (please refer to Note 13 to the consolidated financial statements);
- the fair value adjustment to equity of the remaining investment in Intesa Sanpaolo which, at year-end 2008, showed an original purchase price in excess of the market price for € 62 million; this impairment loss, equal to 17%, was not considered objective evidence of an impairment at December 31, 2008 (please refer to Note 23 to the consolidated financial statements);
- other listed and unlisted investments accounted for at cost or fair value for which their measurement indicated no evidence of impairment.

Recoverable amount of non-current assets

Non-current assets include property, plant and equipment, intangible assets (including goodwill), investments and other financial assets and deferred tax assets. Each consolidated company periodically reviews the carrying amount of non-current assets held and used and assets that must be disposed of when events and circumstances warrant such a review. This review is performed using estimates of future cash flows from the use or disposal of the asset, as established in company plans, and suitable discount rates in order to calculate present value. If the carrying amount of a non-current asset is considered impaired, the companies of the Group record an impairment loss for the amount by which the carrying amount of the asset exceeds its estimated recoverable amount from use or disposal determined by reference to the Group companies' most recent plans.

Pension plans and other post-employment benefits

Group companies sponsor pension plans and other health care plans in various countries. Management uses several statistical and judgmental factors that attempt to anticipate future events in calculating the expense, the liability and the assets related to these plans. These factors include assumptions about the discount rate, expected return on plan assets, rate of future compensation increases and health care cost trend rates. In addition, the Group companies' actuarial consultants also use subjective factors such as resignations and mortality rates in making relevant estimates.

Contingent liabilities

The actions and claims against the companies of the Group are often the result of difficult and complex factual and legal issues, which are subject to many uncertainties and complexities, including but not limited to the facts and circumstances of each particular action and claim, the jurisdiction and the differences in applicable law. The companies of the Group accrue a liability when it is determined that an adverse outcome is probable and the amount of the loss can be reasonably estimated. In the event an adverse outcome is possible or an estimate is not determinable, the matter is disclosed in the Notes.

7. Adoption of new accounting standards, amendments and interpretations issued by the IASB

Interpretations and amendments to standards effective from January 1, 2008 but not applicable to the Group

The following interpretations and amendments, applicable for 2008, relate to matters that are not applicable to the Group.

- IFRIC 12 – Service Concession Arrangements (applicable from January 1, 2008).
- IFRIC 14 – IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction (applicable from January 1, 2008).
- Amendment to IAS 39 – Financial Instruments: Recognition and Measurement and IFRS 7 – Financial Instruments: Disclosures that would permit the reclassification of some non-derivative financial assets which are classified under the “fair value through profit or loss category” in particular circumstances. The amendment also permits the transfer of loans and receivables from the “available-for-sale” category to the “held to maturity” category where the entity has the intention and ability to hold such instruments for a specific future period. Although this amendment applies from July 1, 2008, it has had no effect on the financial statements presented herein as none of the reclassifications permitted by the amendment were carried out by the Group.

Accounting standards, amendments and interpretations not yet effective and not early adopted by the Group

On November 30, 2006, the IASB issued IFRS 8 – Operating Segments that will become effective on January 1, 2009 and supersedes IAS 14 – Segment Reporting. The new standard requires the information provided in segment reporting to be based upon the components of the entity that management uses to make decisions about operational matters. The standard requires these operating segments to be identified on the basis of internal reports that are regularly reviewed by the entity's management in order to allocate resources to the segment and assess its performance. The adoption of this standard will have no effect on the measurement of items in the financial statements.

On March 29, 2007, the IASB issued a revised version of IAS 23 – Borrowing Costs. The standard is applicable from January 1, 2009. The main change from the previous version is the removal of the option of immediately recognizing as an expense borrowing costs that relate to assets that take a substantial period of time to get ready for use or sale. The standard will be applicable prospectively to borrowing costs relating to qualifying assets capitalized starting from January 1, 2009.

On September 6, 2007, the IASB issued a revised version of IAS 1 – Presentation of Financial Statements which applies from January 1, 2009. The revised standard requires an entity to present changes in its equity resulting from transactions with owners in a statement of changes in equity. All non-owner changes (meaning changes in comprehensive income) are required to be presented either in a single statement of comprehensive income or in two statements (a separate income statement and a statement of comprehensive income). Transactions with non-owners may not be presented in the statement of changes in equity.

Adoption of this standard will have no effect on the measurement of items in the financial statements.

On January 10, 2008, the IASB issued a revised version of IFRS 3 – Business Combinations and an amended version of IAS 27 – Consolidated and Separate Financial Statements. The main changes that revised IFRS 3 will make to existing requirements are the elimination of the need to measure at fair value every asset and liability at each step in a step acquisition for the purpose of calculating a portion of goodwill. Instead, goodwill will be measured as the difference at acquisition date between the value of any investment in the business held before the acquisition, the consideration transferred and the net assets acquired. Moreover, for a business combination in which the acquirer achieves control without purchasing all of the acquiree, the remaining (non-controlling) equity interests are measured either at fair value or by using the method already provided in IFRS 3. The revised IFRS 3 also requires acquisition related costs to be recognized as expenses and the acquirer to recognize the obligation to make an additional payment (contingent consideration) as part of the business combination.

In the amended IAS 27, the IASB has added a requirement specifying that changes in a parent's interest in a subsidiary that do not result in the loss of control must be accounted for as equity transactions and recognized within equity. Moreover when a parent loses control of a subsidiary but retains an ownership interest it must initially measure any retained investment at fair value. At the date when control is lost, the difference between the fair value and the carrying amount of the retained interest must be recognized in profit or loss. Finally, the amendment to IAS 27 requires losses pertaining to non-controlling interests to be allocated to non-controlling interest equity, even if this results in the non-controlling interest having a deficit balance. The new rules will apply prospectively from January 1, 2010.

On January 17, 2008, the IASB issued an amendment to IFRS 2 – Vesting Conditions and Cancellations which clarifies that for the purpose of share-based payments measurement, vesting conditions are service conditions and performance conditions only. It also specifies that all cancellations, whether by the entity or by other parties, should receive the same accounting treatment. The Group will apply this amendment retrospectively from January 1, 2009; no effects are expected from its adoption.

On May 22, 2008, the IASB issued a series of amendments to IFRS ("Improvements"); details are provided in the following paragraphs of those identified by the IASB as resulting in accounting changes for presentation, recognition and measurement purposes, leaving out amendments regarding changes in terminology or editorial changes which are likely to have minimal effects in terms of accounting and effects on the consolidated financial statements.

- IFRS 5 – Non-Current Assets Held for Sale and Discontinued Operations: this amendment, applicable prospectively from January 1, 2010, requires an entity that is committed to a sale plan involving loss of control of a subsidiary to classify all the assets and liabilities of that subsidiary as held for sale, regardless of whether the entity will retain a non-controlling interest in its former subsidiary after the sale.
- IAS 1 – Presentation of Financial Statements (revised in 2007): this amendment, applicable from January 1, 2009, requires an entity to classify assets and liabilities arising from derivative financial instruments that are not classified as held for trading between current and non-current assets and liabilities. Adoption of this standard will have no effect on the measurement of items in the financial statements.
- IAS 16 – Property, Plant and Equipment: this amendment, applicable from January 1, 2009, requires an entity that in the course of its ordinary activities routinely sells items of property, plant and equipment that it has held for rental to others, to transfer such assets to inventories when they cease to be rented and become held for sale. As a consequence, the proceeds from the sale of such assets shall be recognized as revenue. Cash payments to manufacture or acquire assets held for rental to others or subsequently held for sale are cash flows from operating activities (and not from investing activities).
- IAS 19 – Employee Benefits: this amendment, applicable prospectively from January 1, 2009 to changes in benefits that occur after that date, clarifies the definition of positive/negative past service costs and states that in the case of a curtailment, only the effect of the reduction for future service shall be recognized immediately in the income statement, while the effect arising from past service periods shall be considered a negative past service cost. The Board also revised the definition of short-term employee benefits and long-term employee benefits and the definition of a return on plan assets, stating that this amount should be net of any costs for administering the plan (other than those included in the measurement of the defined benefit obligation).
- IAS 23 – Borrowing Costs: this amendment, applicable from January 1, 2009, revises the definition of borrowing costs.
- IAS 28 – Investments in Associates: this amendment, applicable from January 1, 2009 with prospective application also permitted, requires that for investments accounted for using the equity method a recognized impairment loss should not be allocated to any asset (and in particular to goodwill) that forms part of the carrying amount of the investment in the associate, but to the carrying amount of the investment overall. Accordingly, any reversal of that impairment loss is recognized in full.
- IAS 36 – Impairment of Assets: this amendment, applicable from January 1, 2009, requires additional disclosures to be made in the case in which an entity determines the recoverable amount of a cash-generating unit using discounted cash flows.
- IAS 38 – Intangible Assets: this amendment, applicable retrospectively from January 1, 2009, requires expenditure on advertising and promotional activities to be recognized in the income statement. Further, it states that expenditures incurred to provide future economic benefits to an entity, but where no intangible asset is recognized, must, for the supply of goods, be recognized as an expense when it has the right to access the goods. In the case of the supply of services, an entity shall recognize the expenditure as an expense when it receives the services. Moreover, the standard has been revised in order to allow entities to use the unit of production method for determining the amortization charge for an intangible asset with a finite useful life.
- IAS 39 – Financial Instruments: Recognition and Measurement: this amendment, applicable from January 1, 2009, clarifies how to calculate the revised effective interest rate on ceasing fair value hedge accounting and notes additionally that the prohibition on the reclassification of financial instruments into or out of the fair value through profit or loss category after initial recognition should not prevent a derivative from being accounted for at fair value through profit or loss when it does not qualify for hedge accounting and vice versa.

On July 31, 2008, the IASB issued an amendment to IAS 39 – Financial Instruments: Recognition and Measurement which is to be applied retrospectively from January 1, 2010. The amendment clarifies how the existing principles underlying hedge accounting should be applied in particular situations.

In November 2008, the IASB also issued IFRIC 17 – Distribution of Non-cash Assets to Owners, establishing that the determination of the value of the distribution of non-cash assets should consider their fair value when it becomes mandatory to record the relative payable to the stockholders.
The amendment is applicable from January 1, 2010, for annual periods beginning on or after July 1, 2009.
In March 2009, the IASB issued an amendment to IFRS 7 – Financial Instruments: Disclosures which is applicable from January 1, 2010, or annual periods beginning on or after July 1, 2009. The amendment requires disclosure about the measurement of fair value (methods used and, if valuations techniques are used, the assumptions adopted in determining the fair value of each class of financial asset or liability) and the liquidity risk (analysis of the maturities of financial liabilities represented by derivatives or other liabilities).

Standards, amendments and interpretations not applicable by the Group
The following standards (already applicable or applicable in the future), amendments and interpretations have also been issued, relating to matters that were not applicable to the Group at the date of the financial statements.

IAS 20 – Government Grants and Disclosure of Government Assistance: this amendment, applicable prospectively from January 1, 2009, states that the benefit of a government loan at a below-market rate of interest shall be treated as a government grant and then accounted for in accordance with IAS 20.

IAS 28 – Investments in Associates, and IAS 31 – Investments in Joint Ventures: these amendments, applicable from January 1, 2009, require specific new disclosures to be made for investments in associates and joint ventures measured at fair value in accordance with IAS 39. IFRS 7 – Financial Instruments: Disclosures and IAS 32 – Financial Instruments: Presentation have accordingly also been amended.

IAS 29 – Financial Reporting in Hyperinflationary Economies: the previous version of the standard did not reflect the fact that a number of assets and liabilities may or must be measured on the basis of a current value rather than historical value. This amendment, made in order to reflect this, is effective from January 1, 2009.

IAS 32 – Financial Instruments: Presentation and to IAS 1 – Presentation of Financial Statements - Puttable Financial Instruments and Obligations Arising on Liquidation: this amendment requires puttable financial instruments and instruments, or components of instruments that impose on an entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation, to be classified as equity instruments. This amendment is effective prospectively from January 1, 2009.

IAS 40 – Investment Property: this amendment, applicable prospectively from January 1, 2009, states that property under construction falls within the scope of IAS 40 and not that of IAS 16.

Interpretations:

- IFRIC 13 – Customer Loyalty Programmes (applicable from January 1, 2009).
- IFRIC 15 – Agreements for the Construction of Real Estate (applicable from January 1, 2009 but not yet endorsed by the European Union).
- IFRIC 16 – Hedges of a Net Investment in a Foreign Operation (issued on July 3, 2008). The main change expected to arise from this interpretation is the elimination of the possibility for an entity to apply hedge accounting for a hedge of the foreign exchange differences between the functional currency of a foreign operation and the presentation currency of the parent's consolidated financial statements. Moreover, the interpretation clarifies that in a hedge of a net investment in a foreign operation the hedging instrument may be held by any entity or entities within the group and that IAS 21 – The Effects of Changes in Foreign Exchange Rates shall be applied to determine the amount that needs to be reclassified from equity to profit or loss for the hedged item when an entity disposes of the investment. This interpretation, effective from January 1, 2009, had not yet been endorsed by the European Union at the date of these consolidated financial statements.
- IFRIC 18 – Transfers of Assets from Customers (applicable from January 1, 2010, for annual periods beginning on or after July 1, 2009).

8. Change in the scope of consolidation

The changes in the scope of consolidation of the Group are presented below.

Cushman & Wakefield Group

In 2008, the C&W Group made some acquisitions for a total investment of $31 million (€ 22 million).
The total net fair value of the property, plant and equipment and intangible assets acquired amounts to $4.4 million (€ 3 million), while the goodwill recorded is equal to $33.2 million (€ 24 million)

Alpitour Group

In 2008, the group sold the entire investment in the subsidiary Kiwengwa Ltd (a company controlled 100% by Horizon Holidays S.A. and Alpiturismo Service of Tourism Lta) for a total equivalent amount of € 4 million. This transaction gave rise to a gain of approximately € 1 million on consolidation.
Moreover, two subsidiaries in the hotel sector were sold: Mediterranean Tourist Company S.A. and Blue Marine Tunisie S.A..
Società a Valore Sicuro S.r.l. was formed. This company is 100% controlled by Alpitour S.p.A. and conducts insurance brokerage activities under a project for the diversification and expansion of the range of insurance services offered directly to the end customer.

Holdings System

With a view toward simplifying the Group's structure, the following transactions were recently entered into:

- on September 29, 2008, a decision was taken to put Ifilgroup Finance Limited, an Irish-registered company controlled 100% by Ifil Investissements S.A., into a voluntary wind-up;
- on November 7, 2008, a decision was taken to put Ifil Investment Holding, a Dutch-registered company controlled 100% by IFIL, into a voluntary wind-up. On the same day, Ifil Investment Holding transferred 224,194 Ifil Investissements S.A. shares which it held (20.184% of capital stock) to IFIL as an advance on the liquidation. After this transaction, IFIL directly held 100% of the capital stock of Ifil Investissements.

Other information

With regard to the balance sheet at December 31, 2007 presented in these consolidated financial statements for comparison purposes, some reclassifications have been made to the data published at December 31, 2007 for a better reading of the balance sheet. Such reclassifications, moreover, do not have any effect on the profit or equity.

9. Segment information

Information by business segment and by geographical area, presented as set forth in IAS 14 – Segment Reporting, is prepared according to the same accounting policies adopted in the preparation and presentation of the consolidated financial statements of the Group.

The primary reporting format consists of the business segments whereas the geographical areas make up the secondary reporting format. This distinction is based upon the nature of the risks and rewards inherent in the Group's activities and reflects the organizational structure.

The segment information presented by the IFIL Group agrees with the consolidated data of each subsidiary and associate holding company, every one of which represents an investment in a major business segment: C&W Group, Alpitour Group, Juventus F.C., Fiat Group, Sequana Group and the IFIL Holdings System.
For an analysis of the performance of the different segments, reference should be made to the "Review of the Operating Performance of the Main Holdings" in the Report on Operations.
The segment information relating to continuing operations is presented in the following tables; the segment information relating to discontinued operations or assets held for sale is presented in Note 26.

The analysis of the income statement by business segment is as follows:

€ in millions	Cushman & Wakefield Group	Alpitour Group	Juventus	Fiat Group	Sequana Group	IFIL Holdings System	**Total**
2008

The following table presents an analysis of the revenues of the group in the various geographical markets, irrespective of the origin of the goods and services, and an analysis of the carrying amount of the segment assets and investments in property, plant and equipment and intangible assets on the basis of the geographical location of the assets.

€ in millions	Revenues	Segment assets	Investments in property, plant and equipment and intangible assets
2008			
Italy	1,266	469	70
Europe excluding Italy	457	426	10
United States	746	516	19
Rest of the world	196	247	5
Total at December 31, 2008	**2,665**	**1,658**	**104**

€ in millions	Revenues	Segment assets	Investments in property, plant and equipment and intangible assets
2007			
Italy	1,223	526	76
Europe excluding Italy	458	155	12
United States	787	779	12
Rest of the world	193	145	5
Total at December 31, 2007	**2,661**	**1,605**	**105**

10. Revenues

Details of revenues are as follows:

€ in millions	**2008**	2007	Change
Revenues from rendering tourist services	**1,237**	1,236	1
Real estate brokerage commissions	**779**	819	(40)
Revenues from property management activities (a)	**196**	149	47
Radio and television rights and media revenues	**137**	115	22
Revenues from financial consulting and property management services	**140**	200	(60)
Corporate real estate business consulting services and research	**110**	81	29
Revenues from sponsorships and advertising (b)	**43**	39	4
Revenues from season tickets and ticket office sales	**13**	9	4
Other services	**10**	13	(3)
Total revenues	**2,665**	2,661	4

(a) These are reimbursements for property management services rendered by the Cushman & Wakefield Group and received from the owners of the properties.

(b) Includes consideration (€ 13 million) for the July 1, 2007 – June 30, 2010 agreement between the Fiat Group and Juventus F.C. which gives the Fiat Group the right to exploit the images of Juventus F. C..

11. Other revenues from current operations

Details of other revenues from current operations are as follows:

€ in millions	**2008**	2007	Change
Gains on the sale of players' registration rights	**16**	19	(3)
Other income (a)	**18**	14	4
Operating grants	**1**	3	(2)
Total other revenues from current operations	**35**	36	(1)

(a) This mainly includes contributions for advertising and promotions, cost recoveries and other income of the Alpitour Group (€ 9 million) and insurance compensation and sundry income of Juventus F.C. (€ 7 million).

12. Personnel costs

Details of the composition of personnel costs are as follows:

€ in millions	**2008**	2007	Change
Salaries and wages	**(879)**	(896)	17
Employee costs relating to the property management activities of the Cushman & Wakefield Group (a)	**(196)**	(149)	(47)
Share of results paid to partners of the EMEA division of the Cushman & Wakefield Group	**(20)**	(48)	28
Social security contributions	**(51)**	(40)	(11)
Health insurance	**(30)**	(21)	(9)
Employee stock options	**(5)**	(12)	7
Other employee costs	**(21)**	(11)	(10)
Temp work costs	**(7)**	(5)	(2)
Employee severance indemnities expense	**(6)**	(5)	(1)
Total personnel costs	**(1,215)**	(1,187)	(28)

(a) The corresponding reimbursement by the owners of the properties is recorded in Revenues.

13. Other nonrecurring income (expenses)

Details are as follows:

€ in millions	**2008**	2007	Change
Impairment losses on assets	**(19)**	(9)	(10)
Net other income (expenses)	**(5)**	(19)	14
Total other nonrecurring income (expenses)	**(24)**	(28)	4

In 2008, impairments losses on assets were recognized by the subsidiaries Juventus F.C. (€ 12 million) and Cushman & Wakefield (€ 7 million) for:

- residual amount of the registration rights of the player Andrade, given that it will be impossible for the player to recover to play soccer professionally following a serious injury which occurred in July 2008, for € 7 million;
- video archives of Juventus F.C., carried out on the basis of the commercial exploitation plan and the estimated cash and economic flows acquired and expected, for € 5 million;
- goodwill recognized on the acquisition of the C&W Group in March 2007 (€ 7 million).

In 2008, net other income (expenses) comprise:

- income of € 8 million relating to the fair value change in the cash settled stock option plan approved on behalf of management of the subsidiary Alpitour;
- special fee on behalf of Mr Gabetti for € 5 million approved by the board of directors' meeting held on May 13, 2008;

- expenses for € 1 million relating to the penalty paid by the subsidiary Alpitour after it withdrew in advance from a rent contract on an Italian hotel structure;
- expenses associated with the C&W Group restructuring plan for € 6 million;
- net expenses of Juventus F.C. for € 1 million, relating to the sale of Campi di Vinovo, formalized in 2007.

In 2007, impairment losses on assets included:

- the impairment loss of € 7 million, relating to the Juventus F.C. archives, carried out on the basis of the commercial exploitation plan and the estimated cash and economic flows acquired and expected;
- the impairment loss of € 2 million, regarding the design costs of the new Stadio delle Alpi that were capitalized in the past and are no longer recoverable in view of subsequent developments on the project.

In 2007, net other income (expenses) included:

- transaction costs and expenses incurred to close the dispute over the sale of La Rinascente for € 8 million;
- accrual for the current-year cost of € 13 million for the stock option plan approved for management of the subsidiary Alpitour;
- income of € 3 million from the reduction ruled by the Court of Appeals of Turin on the pecuniary administrative sanction imposed on IFIL S.p.A. by Consob;
- net loss from the sale of the investment in Campi di Vinovo, a company previously controlled by Juventus F.C., and the “Mondo Juve” business segment for € 1 million.

14. Financial income (expenses)

Details of the composition of financial income (expenses) are as follows:

€ in millions	**2008**	2007	Change
Gains (losses) on sales of investments:			
Intesa Sanpaolo (a)	**75**		75
Turismo&Immobiliare		1	(1)
Kelibia Beach S.A.		6	(6)
Gain on the contribution of the Fiorio Management business to AW Events S.r.l.		2	(2)

Cost of net debt			
Income on current securities and cash and cash equivalents	**26**	33	(7)
Net income on exchange rate and interest rate hedging transactions	**2**	1	1
Exchange differences	**10**	(1)	11
Interest expenses on loan transactions	**(72)**	(62)	(10)
Commissions for unused credit lines	**(1)**	(2)	1
Total cost of net debt	**(35)**	(31)	(4)
Other financial income (expenses)			
Dividends received	**139** (b)	112	27
Interest income on other financial assets	**22**	12	10
Changes in the fair value of financial assets and liabilities	**(67)**	(2)	(65)
Total other financial income (expenses)	**94**	122	(28)
Financial income (expenses)	**134**	100	34

(a) Sale of 1.45% stake in ordinary capital stock.
(b) Received from Intesa Sanpaolo for € 110 million (unchanged compared to 2007), SGS for € 26 million and Gruppo Banca Leonardo for € 3 million (€ 2 million in 2007).

15. Income taxes

Details of income taxes recorded in the income statement are as follows:

€ in millions	**2008**	2007	Change
Current income taxes	**(27)**	(37)	10
Deferred income taxes	**(1)**	(6)	5
Total income taxes	**(28)**	(43)	15

In 2008, national income taxes are calculated at a rate of 27.5% on the estimated taxable income for the year. The income taxes for other jurisdictions are calculated at the enacted tax rates in the various countries.

In 2007, current national income taxes were calculated at 33% and deferred income taxes at 27.5%.

The reconciliation between the tax charge recorded in the consolidated financial statements and the theoretical tax charge (IRES), calculated on the basis of the tax rate in effect in Italy, is the following:

€ in millions	**2008**	2007
Profit before income taxes	**114**	144
Current tax rate in Italy	**27.5%**	33%
Theoretical income taxes	**(31)**	(48)
Effective income taxes	**(28)**	(43)
Difference	**(3)**	(5)
The difference can be analyzed as follows:		
Tax effect of difference between foreign tax rates and the theoretical Italian tax rates	**(1)**	(2)
Effect of tax rate reduction on deferred income taxes	**0**	(2)
Tax effect of other permanent differences	**(19)**	(28)
Deferred tax benefits not recognized	**3**	21
Other differences	**14**	6
Difference	**(3)**	(5)

16. Share of the profit (loss) of companies accounted for by the equity method

Details are as follows:

€ in millions	**2008**	2007	Change
Fiat Group	**467** (a)	566 (a)	(99)
Sequana Group	**(115)**	20 (b)	(135)
Sundry Cushman & Wakefield Group companies	**(1)**	1	(2)
Sundry Alpitour Group companies	**1**	0	1
Total	**352**	587	(235)

(a) Includes net negative consolidation adjustments for € 7 million (-€ 1 million in 2007), mainly for the assignment of preferred dividends to the minority interest.

(b) Includes a positive consolidation adjustment for € 8 million for the lower writedown of goodwill on the AWA Group since it was partially amortized by IFIL in prior years.

For additional information on the companies accounted for by the equity method, reference should be made to Note 22.

17. Profit (loss) from discontinued operations or assets held for sale

In 2008, there were no discontinued operations.

In 2007, the loss from discontinued operations or assets held for sale was € 8 million and included the share of the profit of Sequana for the first half of 2007 (+€ 46 million) and the loss realized on the sale of the 22% stake in the same company (-€ 54 million).

18. Earnings per share

		2008	2007
Average number of ordinary shares outstanding, net of treasury stock		**1,014,154,807**	1,024,180,446
Average number of savings shares outstanding, net of treasury stock		**36,802,687**	37,383,020 (a)
Net earnings attributable to the equity holders of the parent	€ in ml	**445**	672
Earnings attributable to ordinary shares	€ in ml	**429**	647
per ordinary share – basic	€	***0.424***	*0.632*
per ordinary share – diluted (c)	€	***0.423***	n.a.
Earnings attributable to savings shares	€ in ml	**16**	25
per savings share – basic (b)	€	***0.424***	*0.653*
per savings share – diluted (c)	€	***0.423***	n.a.
Earnings from continuing operations	€ in ml	**445**	680
Earnings from continuing operations attributable to ordinary shares	€ in ml	**429**	655
per ordinary share – basic	€	***0.424***	*0.639*
per ordinary share – diluted (c)	€	***0.420***	n.a.
Earnings from continuing operations attributable to savings shares	€ in ml	**16**	25
per savings share – basic (b)	€	***0.424***	*0.660*
per savings share – diluted (c)	€	***0.420***	n.a.
Earnings (loss) from discontinued operations and assets held for sale	€ in ml	**0**	(8)
Earnings (loss) from discontinued operations attributable to ordinary shares	€ in ml	**n.a.**	(8)
per ordinary share	€	**n.a.**	*(0.008)*
Earnings (loss) from discontinued operations and assets held for sale attributable to savings shares	€ in ml	**n.a.**	n.a.
per savings share	€	**n.a.**	n.a.

(a) The Group did not hold any savings treasury stock.

(b) The earnings per share calculation did not take into account the preferential dividends as IFIL's profit for the year, following the merger by incorporation, became part of the reserves of the surviving company IFI. Such reserves, in the event of distribution, will be distributable to all stockholders in an equal amount.

(c) For purposes of the calculation of 2008 earnings per share, the number of ordinary shares outstanding was increased by the average number of "potentially dilutive" ordinary shares which could arise from a hypothetical exercise of stock options. Moreover, the earnings attributable to the equity holders of the parent were adjusted to take into account the dilutive effects arising from the theoretical exercise of stock options granted by subsidiaries and associates of the Group using their own equity instruments.

19. Goodwill

The composition of goodwill by business segment is as follows:

€ in millions	**12/31/2008**	12/31/2007	Change
Goodwill on the acquisition of the C&W Group Inc. (Group's share)	**322**	284	38
Goodwill on other companies of the C&W Group Inc.	**53**	31	22
C&W Group Inc	**375**	315	60
Jumboturismo S.A.	**11**	11	0
Altamarea V&H Compagnia Alberghiera S.p.A.	**8**	8	0
Viaggidea S.p.A.	**6**	6	0
AW Events S.r.l.	**2**	2	0
Alpitour Group	**27**	27	0
Net goodwill	**402**	342	60

The analysis of the changes in goodwill, referring entirely to the C&W Group in 2008, is as follows:

€ in millions	**12/31/2008**	12/31/2007
GROSS AMOUNT		
Opening balance	**346**	964

Exchange differences	**19** (a)	(35)
Increases and other changes	**43**	31
Total changes	**65**	(618)
Closing balance	**411**	346
ACCUMULATED IMPAIRMENT LOSSES		
Opening balance	**(4)**	(204)
Changes		
Exchange differences		
Impairment losses recognized in the income statement (Group's share)	**(5)**	(1)
Deconsolidation of the Sequana Group		200
Other changes		1
Total changes	**(5)**	200
Closing balance	**(9)**	(4)
NET AMOUNT	**402**	342

(a) Of which € 17 million is due to the goodwill originating from the acquisition of the C&W Group Inc.

Goodwill recognized on the acquisition of the C&W Group Inc. is deemed representative of the aggregate of the future economic benefits from the investment and cannot be identified separately.

Impairment test on the goodwill and trademarks of the Cushman & Wakefield Group

The main assumptions used in the calculation of the impairment test are presented below.

For the purpose of impairment testing, the C&W Group allocates the goodwill and trademarks to the Cash-Generating Units (CGU) identified by geographical area, which represent the lowest level within the C&W Group at which these assets are monitored.

The carrying amount of goodwill and trademarks is allocated as follows:

€ in millions	Goodwill	Trademarks	Total
United States	192	94	286
Canada	30	17	47
Latin America	14	7	21
EMEA	107	56	163
Asia	32	9	41
	375	**183**	**558**

in millions	U.S. $	€
United States	130.4	94
Canada	23.5	17
Latin America	10.0	7
EMEA	78.4	56
Asia	12.7	9
Total Cushman & Wakefield Group trademarks	**255.0**	**183**

The recoverable amount of a CGU to which goodwill and trademarks are allocated is the greater of its value in use and its fair value less costs to sell. The impairment testing at December 31, 2008 for all CGUs is based on their estimated fair value less costs to sell.

The estimated fair value less costs to sell for each of the CGUs is determined by an independent expert. The valuation method required the determination of an indicated Total Invested Capital (TIC) amount using both the discounted cash flow method and the market approach methods, which were weighted 60% and 40%, respectively, in determining the indicated fair value of equity less costs to sell for each of the CGUs.

Discounted Cash Flow Method (DCF)

The fair value less costs to sell determined using the DCF method was weighted 60% in determining the final fair value less costs to sell for each of the CGUs. Under the discounted cash flow method, cash flows were projected for each of the CGUs based on their respective revenue and EBITDA assumptions, as outlined above, along with an estimate of a terminal year value, based on market assumptions. The 2009 revenue and EBITDA assumptions were developed in connection with the company’s annual operating plan process, while the projections for 2010 through 2012 were based on the expected growth in those years relative to the 2009 annual plan.

Market Approach Method

The fair value less costs to sell determined under the market approach was weighted 40% in determining the final fair value less costs to sell for each of the CGUs. Under the market approach, the multiple and EBITDA assumptions were used to calculate a fair value for each CGU for each of the years 2008, 2009 and 2010, and then those fair values were weighted to calculate an indicated TIC value for each CGU. The multiple assumptions in these calculations were derived from data publicly available relating to the guideline companies, including information relating to their revenue and EBITDA historical performance as well as that expected in 2009 and in subsequent years.

The key assumptions used to estimate the fair values under both methods are as follows:

Assumptions	USA	CANADA	SOUTH AMERICA	MEXICO	EUROPE	ASIA
Specific CGU assumptions						
Discount rate	15.0%	15.5%	19.5%	17.8%	17.5%	18.8%
CGU specific risk	2.0%	2.0%	1.0%	1.0%	3.5%	3.0%
Tax rate	40.0%	36.5%	25.5%	28.0%	26.4%	30.4%
Working capital %	-1.5%	-1.5%	-1.5%	-1.5%	-1.5%	-1.5%
Long-term growth rate	3.0%	3.0%	4.0%	4.0%	3.0%	4.0%
Terminal value model	fading	fading	fading	fading	fading	fading
Competitive advantage period in years	3	3	3	3	3	5
2008 EBITDA multiple	9.0x	n/a	n/a	n/a	n/a	n/a
2009 EBITDA multiple	7.0x	8.5x	n/a	9.0x	8.5x	9.0x
2010 EBITDA multiple	6.0x	7.0x	8.0x	7.0x	6.3x	8.0x
General assumptions						
Control premium	25.0%					
Consolidated tax rate	33.5%					
Equity risk premium	7.1%					
Cost to sell	1.0%					

The discount rates were established through the assessment of a number of inputs, including the expected return on equity, entity specific risk, country specific premiums, local cost of equity, the local statutory tax rate and debt to equity ratios. The CGU specific risk assumptions were determined after consideration of the execution risk of achieving the forecasted results for 2009 and beyond. The tax rates represent the statutory tax rates in the respective tax jurisdictions. The working capital percentage reflects recent experience and is in line with market participant levels, while the long-term growth rates were based on the estimated long-term gross domestic product and inflation. The terminal value was estimated using a derivation of the fading growth model, which more appropriately measures value during the period over which it is estimated earnings growth will reduce to the stable long-term growth rate. The EBITDA multiples for 2008 through 2010 were determined through an assessment of our guideline company multiples and taking into account local market differences. The control premium, equity risk premium and the cost to sell assumptions were all determined based on recent activity and trends in the market.

In addition to the key assumptions outlined above, the Company developed assumptions with respect to its expected future revenue and EBITDA growth and normalized EBITDA and EBITDA margins, as follows:

UGC	2007	2008 (Partial year)	2009	2010	2011	2012
United States						
Revenue growth	n/a	n/a	3.6%	8.6%	9.1%	8.9%

EBITDA margin	12.0%	13.8%	12.9%	9.6%	10.7%	12.4%
Mexico						
Revenue growth	n/a	n/a	-5.2%	10.0%	10.0%	10.0%
EBITDA growth	n/a	n/a	-61.8%	65.3%	15.8%	15.1%
Normalized EBITDA margin	1.1%	44.1%	8.7%	13.0%	13.7%	14.3%
EBITDA margin	1.1%	44.1%	8.7%	13.0%	13.7%	14.3%
Europe						
Revenue growth	n/a	n/a	-6.5%	10.5%	11.0%	6.0%
EBITDA growth	n/a	n/a	44.9%	42.8%	27.0%	15.0%
Normalized EBITDA margin	12.5%	24.2%	12.0%	14.0%	16.0%	17.3%
EBITDA margin	12.5%	24.2%	10.8%	14.0%	16.0%	17.3%
Asia						
Revenue growth	n/a	n/a	3.9%	15.0%	25.0%	30.0%
EBITDA growth	n/a	n/a	107.7%	17.4%	31.0%	54.4%
Normalized EBITDA margin	19.9%	19.1%	13.6%	13.9%	14.6%	17.3%
EBITDA margin	19.9%	19.1%	13.6%	13.9%	14.6%	17.3%

The resulting fair values less costs to sell and related carrying values of each of the CGUs as of the October 1, 2008 goodwill assessment date are as follows (in millions of U.S.$):

$	USA	CANADA	SOUTH AMERICA	MEXICO	EUROPE	ASIA
Fair value less costs to sell	421.5	40.5	51.1	13.6	375.6	106.5
Book value of equity	431.0	37.6	32.7	7.1	322.1	83.9
	(9.5)	2.9	18.4	6.5	53.5	22.6

Due to the global credit market crisis in 2008 and the resulting impact on the business, which resulted in a significant decline in EBITDA in 2008 as compared to 2007 and the original planned results for 2008, combined with reduced expectations for 2009, the carrying amount of the United States CGU was determined to be higher than its recoverable amount and, therefore, an impairment loss of € 7 million ($9.5 million) was charged to the consolidated income statement of the IFIL Group for the year 2008 in “Other nonrecurring income (expenses)”. This impairment loss was completely allocated to goodwill on the 2007 acquisition of the C&W Group Inc. There were no such impairment losses on goodwill recorded in 2007.

The key assumptions used to determine the fair value less costs to sell represent C&W Group Inc.'s management’s best assessment of future trends in the real estate industry and are based on both external sources and internal sources, including historical data.

The estimated fair values less costs to sell are particularly sensitive to changes in the discount rate and revenue assumptions. For example:

- a 100 basis point increase in the discount rate would increase the impairment for the United States CGU by $26.4 million (€ 19 million); and
- a 10% decrease in future planned revenues would increase the impairment charge by $38.4 million (€ 27.6 million).

The fair value of the Canada CGU is more or less aligned to its carrying amount, therefore:

- a 150 basis point increase in the discount rate would cause the carrying value to exceed the recoverable amount and, therefore, cause an impairment $3 million (€ 2 million); and
- a 10% decrease in future planned revenues would cause the carrying value to exceed the recoverable amount and, therefore, cause an impairment of $3 million (€ 2 million).

C&W Group Inc. management does not believe that it is reasonably possible that a change in a key assumption on which it has based its determination of the CGU's recoverable amount would cause the CGU's carrying amount to exceed its recoverable amount.

20. Other intangible assets

The changes in other intangible assets are as follows:

Closing balance at December 31, 2008	**(46)**	**(175)**	**(85)**	**0**	**(306)**
NET AMOUNT					
At December 31, 2007	217	84	155	0	456
At December 31, 2008	**220**	**93**	**148**	**0**	**461**

The increase in intangible assets refers to the acquisition of players' registration rights by Juventus F.C. (€ 51 million) and investments by the C&W Group (€ 14 million) and the Alpitour Group (€ 1 million).

Impairments of € 12 million are recognized by the subsidiary Juventus F.C. and included in “Other nonrecurring income (expenses)”; additional details are provided in Note 13.

At December 31, 2008, there are no commitments for the purchase of intangible assets.

In 2008, there are no research and development expenditures charged to the income statement.

Intangible assets completely amortized but still in use total € 23 million and refer to the concessions, licenses and trademarks of the Alpitour Group for € 16 million and other intangible assets for € 7 million.

“Concessions, licenses and trademarks” include:

- the amount attributed on acquisition of the C&W Group (March 2007) to the “Cushman & Wakefield” trademark, widely recognized by the market, for $255 million (€ 183 million at December 31, 2008).
  This trademark, which the C&W Group intends to renew continually, is classified as an asset with an “indefinite useful life” in that it will contribute to future cash flows indefinitely and is therefore not amortized but tested annually for impairment (Note 19);
- the government concession rights of the Alpitour Group, amortized over the duration of the original concessions.

Other intangible assets include the C&W Group's customer relationships (amortized over 16 years) and non-compete covenants (amortized over 4 years).

Players' registration rights are amortized on a straight-line basis over the period of the contracts; Juventus F.C. library products are assets with an indefinite life and are therefore tested for impairment.

21. Property, plant and equipment

The changes in property, plant and equipment are as follows:

€ in millions	Land	Buildings	Plant and machinery	Industrial equipment	Other assets	Construction in progress	Advances	Total

At December 31, 2008	**20**	**67**	**11**	**5**	**78**	**17**	**0**	**198**

Increases in property, plant and equipment (€ 37 million) include investments made by the Alpitour Group (€ 16 million) mainly for restructuring work on the Hotel Donna Camilla Savelli in Rome and equipping the aircraft of Neos S.p.A., investments made by the C&W Group for € 17 million and those made by Juventus F.C. for € 4 million.

In 2008, no borrowing costs were capitalized. In 2007, the Alpitour Group had capitalized borrowing costs for € 1 million.

Commitments for the acquisition of property, plant and equipment amounted to € 3 million at December 31, 2007 and related to the C&W Group.

At December 31, 2008, the gross carrying amount of property, plant and equipment completely depreciated but still in use amounts to € 7 million (€ 19 million at December 31, 2007).

Finance lease contracts on property, plant and equipment

The carrying amount of property, plant and equipment includes € 19 million of assets leased under finance contracts at December 31, 2008 by Juventus F.C. for the Vinovo Training Center.

At December 31, 2007, the balance of € 22 million included the assets leased under finance contracts by Juventus F.C. S.p.A. and the Alpitour Group.

Leasing information is as follows:

Total	**1,412**		2,674		**549**	158

(a) Includes goodwill of € 5 million originating from the acquisition of 100% of the capital stock of Ancom USA Inc by the subsidiary Ifil Investissements in 2007.

The original purchase cost of the remaining interest held in Intesa Sanpaolo is € 359 million (€ 3.05 per share); at December 31, 2008, the negative fair value adjustment recognized in equity amounts to € 62 million. Such reduction in value compared to the original cost, equal to 17%, is not considered objective evidence of its impairment at December 31, 2008.

The investment in SGS is measured at fair value on the basis of the market price at December 31, 2008, equal to CHF 1,100 per share, (at the CHF/Euro exchange rate of 1.485), with the unrealized gain of € 399 million recognized in equity. The original carrying amount of the investment in SGS is € 470 million.

The investment in Gruppo Banca Leonardo was adjusted to fair value using the "warrant equity method with excess capital", where the Group is valued through attainment of a

ROE sustainable in the long term in line with the ROE in 2007. The valuation was confirmed by a comparison with the valuation using market multiples.

Non-current financial assets include:

- Perfect Vision Limited convertible bonds, subscribed to by the subsidiary Ifil Investissements, yielding a fixed rate of 5% until conversion of the bonds in 2013, which will give Ifil Investissements a 40% equity stake in Vision Investment Management Limited.
  This is a compound financial instrument issued in U.S. dollars. The principal portion measured using amortized cost at December 31, 2008 is equal to € 67 million and the relative interest recognized in the income statement is € 2 million; the exchange differences resulting from the valuation using the year-end exchange rate recognized in the income statement amount to € 7 million. The embedded derivative was measured at fair value with a corresponding entry to the income statement for € 4 million.
- the bonds issued by DLMD, maturing on July 27, 2010, subscribed to in 2007 by the subsidiary Ifil Investissements as part of the operation for the sale of the 22% stake in Sequana to DLMD. Such bonds are guaranteed by 10,806,343 Sequana shares in addition to cash collateral of approximately € 7 million.
  In July 2008, certain clauses of the bonds were renegotiated as a result of which the bonds were subdivided into Senior and Junior bond portions. The redemption of the Junior portion, in exchange for a higher yield, is subordinate to that of the Senior portion. Ifil Investissements holds a nominal amount of € 27 million, of which € 12 million refers to the Senior portion and € 15 million to the Junior portion.
  At December 31, 2008, the Junior portion was prudently written down for the full nominal amount.

Current financial assets include:

- bonds, and other short-term financial instruments held by foreign subsidiaries of the IFIL Holdings System, which do not meet the conditions for classification as “Cash and cash equivalents”;
- equity shares and bonds held by IFIL for trading, listed on the major European and United States markets, measured at fair value based on market prices translated, where necessary, at year-end exchange rates, with recognition of the change in fair value in the income statement for € 11 million. Therefore, for the measurement of the securities, the company did not avail itself of the amendment, applicable from July 1, 2008, to IAS 39 – Financial Instruments: Recognition and Measurement and IFRS 7 – Financial Instrument: Disclosure;
- securities subscribed to by Alpitour (residual amount of € 36 million) as part of the securitization of trade receivables (for additional information, reference should be made to Note 39);
- loan granted by IFIL to the parent, IFI on October 10, 2008, up to a maximum amount of € 200 million, approved by the respective boards of directors.

The analysis of changes during 2008 is as follows:

	Non-current financial assets		Current financial assets	
€ in millions	**12/31/2008**	12/31/2007	**12/31/2008**	12/31/2007
Opening balance	**2,674**	2,672	**158**	1,106
Increases	**91**	201	**816**	125
Decreases	**(532)**	(12)	**(363)**	(909)
Increases through business combination of the Cushman & Wakefield Group		2		
Fair value recognized in equity	**(422)**	(97)	**(4)**	
Reversal of the accumulated fair value on the stake sold in the investment in Intesa Sanpaolo	**(404)**			
Fair value recognized through the income statement	**(11)**		**(59)**	
Deconsolidation of the Sequana Group		(105)		(172)
Exchange differences	**8**	(1)		(1)
Change in the scope of consolidation		29		2
Other changes and reclassifications	**8**	(15)	**1**	7
Total changes	**(1,262)**	2	**391**	(948)
Closing balance	**1,412**	2,674	**549**	158

Increases in non-current financial assets (€ 91 million) refer to investments made by the subsidiary Ifil Investissements. They include:

- the subscription to Perfect Vision Limited convertible bonds for € 58 million;
- the investment in Banijay Holding S.A.S. (17.03% of capital stock) for € 21 million, as part of the total commitment assumed by Ifil Investissements for € 42 million;
- the investments in NoCo B for € 12 million.

Decreases in non-current financial assets (€ 532 million) refer to:

- sale of the 1.45% stake in Intesa Sanpaolo ordinary capital stock for € 524 million;
- reimbursement of Ocean Club Méditerranée bonds for € 5 million;
- reduction of interest-earning deposits of the Alpitour Group € 3 million.

At December 31, 2008, the negative change in the investment in Intesa Sanpaolo, equal to € 1,268 million, is the result of the reversal of the carrying amount (-€ 928 million) of the stake sold (1.45% of ordinary capital stock) and the adjustment of the remaining interest to fair value at the end of the year (-€ 340 million).
The reversal of the carrying amount of the interest sold (-€ 928 million) includes the original purchase cost of € 524 million and the cumulative fair value of € 404 million.

The negative change in "fair value recognized in equity" (-€ 422 million) comprises the fair value adjustment at year-end 2008 of the investments in Intesa Sanpaolo (-€ 340 million), SGS (-€ 87 million) and Gruppo Banca Leonardo (+€ 5 million).

The change in fair value recognized through the income statement includes the impairment loss on the Junior portion of the bonds issued by DLMD for € 15 million and the positive value on the embedded derivative for € 4 million separated from the Vision bonds.

Increases in current financial assets (€ 816 million) include investments in securities and investments held for trading made by IFIL (€ 398 million) and the subsidiary Ifil Investissements (€ 180 million), securities subscribed to by the subsidiary Alpitour (€ 36 million), the loan made to the parent, IFI S.p.A. (€ 199 million) and other for € 3 million.

Decreases in current financial assets are the result of the realization of investments in which a part of the liquidity was temporarily invested. The remaining balance of liquidity is included in “Cash and cash equivalents”.

The fair value of current securities is calculated using the market price at the balance sheet date.

Non-current other financial assets, excluding investments, by maturity, are as follows:

€ in millions	**12/31/2008**	12/31/2007
Within 1 year	**0**	5
From 1 to 3 years	**15**	31
From 3 to 5 years	**76**	2
Beyond 5 years	**25**	13
Non-current other financial assets, excluding investments	**116**	51

24. Other assets

Details are as follows:

Other receivables from related parties	**1**	2	(1)
Total other receivables	**159**	188	(29)
Total other current assets	**492**	633	(141)
Total other non-current and current assets	**585**	720	(135)

Other assets include receivables from the sale, by the subsidiary Juventus F. C., of the remaining investment in Campi di Vinovo S.p.A. and the “Mondo Juve” business segment for € 34 million (€ 24 million presented in non-current assets and € 10 million in current assets), in addition to receivables from Costruzioni Generali Gilardi S.p.A. for the sale of the investments in Campi di Vinovo S.p.A. for € 8 million (of which € 5 million presented in non-current assets and € 3 million in current assets). The receivables due from Campi di Vinovo were discounted to present value based on an estimate of collections times (various installments from 2009 to 2013) and are guaranteed. If this guarantee is used it would mean that Juventus F.C. would develop the initiative on its own.

In 2008, Campi di Vinovo S.p.A. concluded the administrative procedures connected with the commercial permits, including the design modification envisaged by the contract sealed between Juventus F.C. and the buyer Costruzioni Generali Gilardi S.p.A. on July 26, 2007.

On December 22, 2008, Costruzioni Generali Gilardi S.p.A. notified Juventus F.C. that the other company with which it had signed an agreement for the development of the “Mondo Juve” commercial center indicated that it did not wish to execute the contract. As a result of the difficulty in executing the above contract, Costruzioni Generali Gilardi S.p.A. was not able to make the payment by December 31, 2008 as established in the agreements signed with Juventus F.C. on July 26, 2007 (€ 12.5 million). Following Costruzioni Generali Gilardi S.p.A.'s explicit request, on February 5, 2009, Juventus F.C. and Costruzioni Generali Gilardi S.p.A. then signed a private contract for the novation and integration of the previous agreements in order to change the payment terms of the installment due on December 31, 2008 as follows: € 4 million by February 20, 2009 (duly paid) and the remaining € 8.5 million by December 20, 2009, which can be extended by agreement between the parties upon payment of interest to Juventus F.C.. As for the other payment dates fixed in the July 26, 2007 contract (€ 12.5 million at the end of the first year after the commercial center is opened to the public and, in any case, no later than December 31, 2012, and € 17.4 million at the end of the second year after the opening of the commercial center to the public and, in any case, no later than December 31, 2013), these dates may be postponed if and when Costruzioni Generali Gilardi S.p.A. obtains the extension of the commercial permits relating to the initiative (currently expiring in 2013).

The breakdown of other assets by maturity is as follows:

€ in millions	Within1 year	From 2 to 5 years	Beyond 5 years	**Total**
Other non-current assets	2	89	2	**93**
Trade receivables and commissions receivable	333			**333**
Other receivables	117		42	**159**
Balances at December 31, 2008	**452**	**89**	**44**	**585**
Other non-current assets		80	7	**87**
Trade receivables and commissions receivable	445			**445**
Other receivables	188			**188**
Balances at December 31, 2007	**633**	**80**	**7**	**720**

25. Cash and cash equivalents

The reconciliation of cash and cash equivalents in the statement of cash flows and the corresponding line items in the balance sheet is as follows:

€ in millions	**12/31/2008**	12/31/2007	Change
Cash and cash equivalents	**975**	919	56
Bank overdrafts and bank borrowings	**(1)**	0	(1)
Net cash and cash equivalents	**974**	919	55

Cash and cash equivalents include demand or short-term deposits and readily negotiable money market instruments and bonds; such investments are allocated over an appropriate number of counterparts, with the principal purpose of having investments which can readily be convertible into cash. The counterparts are chosen according to their creditworthiness and reliability.
However, in consideration of the current financial crisis, market conditions which might negatively affect normal operations of financial transactions cannot be excluded.

26. Assets held for sale

At December 31, 2008, assets held for sale amounting to € 3 million include the costs capitalized for the development of the commercial areas outside the Stadio Delle Alpi, following the preliminary contract signed between Juventus Football Club and Nordiconad Soc. Coop. for the purchase and sale of a business segment.

At December 31, 2007, assets held for sale amounting to € 3 million included property, plant and equipment of the companies Kiwengwa Ltd (€ 1 million) and Mediterranean Tourist Company (€ 2 million) held by the Alpitour Group which were sold in April 2008 for a total equivalent amount of € 7 million on the basis of a preliminary agreement signed in December. In addition, the investment in Semana S.r.l., held by Juventus F.C. (€ 30 thousand), was sold on March 4, 2008 to ESE S.p.A., which was already a stockholder of the company.

27. Equity

Equity attributable to the equity holders of the parent – Capital stock

At December 31, 2008, the capital stock of IFIL S.p.A., fully subscribed to and paid-in, amounts to € 1,075,995,737 and consists of 1,038,612,717 ordinary shares (96.53% of capital stock) and 37,383,020 non-convertible savings shares (3.47% of capital stock), all with a par value of € 1 each.

The objectives identified by IFIL S.p.A. and the companies in the “Holdings System” are to create value for all stockholders, safeguard business continuity, diversify investments by sector and geography and support the growth of investment holdings.

IFIL thus aims to maintain an adequate level of capitalization which allows it to generate a satisfactory economic return for stockholders and guarantee economic access to external sources of financing.

IFIL constantly monitors changes in the consolidated debt level of the Holdings System in relation to the current asset value of its investments and dividend flows from the operating holdings.
A very prudent approach is adopted with regard to the use of financial leveraging.

Equity attributable to the equity holders of the parent – Retained earnings and other reserves and Gains (losses) recognized directly in equity

Details are as follows:

Equity attributable to the equity holders of the parent – Treasury stock

The ordinary session of the stockholders' meeting held on May 13, 2008 approved for 18 months, pursuant to art. 2357 of the Italian Civil Code and art. 132 of Legislative Decree 58 dated February 24, 1998, the purchase of a maximum of 55 million IFIL ordinary and/or savings shares for a maximum of € 450 million.

Under the Program for the buyback of ordinary and savings treasury stock voted by the board of directors on February 18, 2008, during the period February 26, to August 18, 2008, IFIL S.p.A. purchased 20,783,200 ordinary shares (2% of the class of stock) at the average price per share of € 4.8 totaling € 99.8 million, in addition to 917,000 savings shares (2.45% of the class of stock) at the average cost per share of € 4.3 totaling € 3.9 million, for a grand total of € 103.7 million (69.13% of the maximum disbursement of the € 150 million authorized for the buyback Program).

After these purchases, IFIL holds, directly and indirectly, the following treasury stock:

		% of	Carrying amount	
	Number	class	Per share (€)	Total (€ ml)
Ordinary shares, held by IFIL S.p.A.	33,186,198	3.20	4.38	145.5

Dividends paid out by IFIL S.p.A.	**2008**	2007	**2008**	2007
Ordinary shares	**-**	0.10	**-**	102.1
Savings shares	**-**	0.1207	**-**	4.5
Total	**-**		**-**	106.6

Following the merger by incorporation in IFI – Istituto Finanziario Industriale S.p.A. (now EXOR S.p.A.), IFIL S.p.A.'s profit for the year 2008 is allocated to reserves.

28. Stock option plans

Stock option plans with underlying IFIL stock

The ordinary session of the IFIL stockholders' meeting held on May 13, 2008 approved a stock option plan for the chief executive officer, Carlo Barel di Sant'Albano, for 3,000,000 stock options corresponding to the same number of ordinary shares and for the employees of the IFIL Group (IFIL S.p.A. and the companies in the "Holdings System") who are or will be regarded as key people in the organization on the basis of the positions held or activities performed, for a maximum of 12,000,000 stock options. At December 31, 2008, a total of 6,525,000 options had been granted to 17 key employees.

The Plan is aimed at attracting and retaining managerial resources who hold important positions in the company while at the same time involving them in achieving performance objectives and aligning the economic incentives to the value of the company for the stockholders. The vesting period of the options granted will start from May 14, 2014 to May 14, 2016 and precisely: the first part, equal to 25% of the options, will vest on May 14, 2014, the second part, again equal to 25% of the options, will vest on May 14, 2015 and the third part, equal to 50% of the options, will vest on May 14, 2016. The exercise price of the options granted is € 5.291 and equal to the arithmetic average of the official stock market prices of IFIL ordinary shares recorded at Borsa Italiana S.p.A. in the month prior to the date of the stockholders' meeting that approved the Plan.

The Plan is implemented by granting the recipients free options on treasury stock purchased by IFIL S.p.A. or by companies of the "Holdings System" in accordance with existing laws.

From an accounting standpoint, the plan represents an equity-settled stock-based payment transaction discussed under paragraph 10 and subsequent articles of IFRS 2 and requires that the fair value of the services received be measured in reference to the fair value of the equity instruments at the grant date.

The fair value of services received must be recorded during the option vesting period with a corresponding increase in equity.

The valuation was made by an independent expert assuming that the options would be exercised by May 15, 2016 using the Black-Scholes model based on the following parameters:

Valuation date	5/13/2008
IFIL stock price at grant date	€ 5.286
Exercise price	€ 5.291
Volatility calculated using a trend analysis model (%)	30.56%
Vesting period	8 years
Expected dividends (%)	2.15%
Risk-free interest rate	4.1114%
Turnover rate (%)	1%

The fair value of the 9,525,000 options granted was determined to be € 15,263 thousand, divided as follows:

€ in thousands	Number of options granted	Total cost	Cost referring to the year
Chief executive officer IFIL S.p.A.	3,000,000	4,807	376
Key employees IFIL S.p.A. (13)	4,425,000	7,091	554
Total IFIL S.p.A.	7,425,000	11,898	930
Key employees of Ifil Investissements S.A. and other subsidiaries in the Holdings System (4)	2,100,000	3,365	273
Total	**9,525,000**	**15,263**	**1,203**

The cost referring to the year amounts to € 1,203 thousand, of which € 376 thousand is classified as fees of the chief executive officer and € 827 thousand as personnel costs. The corresponding entry of € 1,203 thousand is recorded in the stock option reserve.
The plan will continue in EXOR S.p.A.. The adjusted exercise price is € 19.97.

Stock option plan with underlying Alpitour stock
On December 15, 2005, in execution of the resolution passed by the board of directors' meeting held on November 11, 2005, the Executive Committee of IFIL S.p.A. approved a stock option plan for two managers of the Alpitour Group designed to promote their loyalty to the IFIL Group and provide an incentive to develop and appreciate the investments of the IFIL Group in the tourism sector.

The plan calls for purchase options on Alpitour shares to be granted to the chairman and chief executive officer, D.J. Winteler, and the general manager, F. Prete, respectively, equal to 6% (2,127,000 shares) and 5% (1,772,500 shares) of Alpitour's capital stock.
After approval on the part of IFIL S.p.A., the Alpitour S.p.A. board of directors may in the future grant purchase options on Alpitour shares to other managers who hold important operating positions equal to 4% of Alpitour's capital (now 1,418,000 shares).
The purchase options may be exercised, at one or more times, during the period between the dates of the approval of the 2006/2007 and 2008/2009 Alpitour financial statements at the price of € 2.24 per share, corresponding to the valuation of the Alpitour Group, equal to € 79.4 million, performed in December 2005 by a specially appointed expert.
IFIL S.p.A. and the managers of Alpitour S.p.A., finally, exchanged reciprocal purchase and sale options, exercisable during the same above period, on Alpitour shares that will have been purchased by the same managers; the exercise price will be established on the basis of the appraisal which will be performed using the same valuation principles applied in the December 2005 valuation.

From an accounting standpoint, the plan is a cash-settled stock-based payment transaction subject to paragraph 30 and subsequent paragraphs of IFRS 2, which requires the liability of the plan to be measured at fair value and, therefore, the options of the plan, at every reporting date, until plan expiration.

At December 31, 2008, the fair value of each option right of the plan is estimated at € 2.07 for a total of € 8,075 thousand (€ 15,871 thousand at December 31, 2007) recorded in "Other current liabilities". The reduction of the liability from last year (€ 7,796 thousand) was recognized in the income statement in "Other nonrecurring income (expenses)", as the portion relating to the current year.

The estimate was performed by an independent expert who applied a binomial model of valuation to the options based on the following parameters:

Stock price at grant date (€)	(a)	2.24
Exercise price (€)	(a)	2.24
Underlying stock price at 12/31/2008 (€)	(b)	4.14
Estimated volatility (%)	(c)	48.05%
Remaining option life (months)	(d)	13
Estimated dividends (%)	(e)	0.00
Risk-free interest rate (%)	(f)	4.39%

(a) The exercise price of the options was assumed to be equal to the par value of one ordinary Alpitour S.p.A. share at the grant date, quantified on the basis of an estimate performed by an independent expert.
(b) The fair value of the underlying share (Alpitour S.p.A. ordinary share) at the date of reference of December 31, 2008, was quantified on the basis of an estimate made by an independent expert prepared by applying valuation principles consistent with those used in December 2005 by the independent expert.
(c) The expected volatility has also been determined by referring to the historical volatility, measured over a period consistent with the remaining life of the shares in the plan, of a sample of listed companies operating in the same sector as Alpitour S.p.A..
(d) The expiration date of the options was established as the date of the approval of the Alpitour S.p.A. financial statements for the year 2008/2009, fixed, conventionally, as January 31, 2010. At the date of reference of December 31, 2008, the options thus have a remaining life of 13 months (1 year and 1 month). The options vested at the end of the vesting period (January 31, 2008) and can be exercised from that date until the contractual expiration date (January 31, 2010).
(e) The application of the valuation model assumes the absence of the payment of dividends.
(f) The risk-free interest rate is assumed to be equal to the return on government securities having a residual life consistent with the expiration of the options in the plan.
An assumption was also included in the "binomial" model for the early exercise of the option rights during the period between the end of the vesting period and contractual expiration date of the options.

Cushman & Wakefield Group stock option plans

There are two separate stock option plans which are summarized in the following table: "Employee Stock Purchase Plan Options" and "Management Options":

	Employee Stock Purchase Plan			Management Options		
	Tranche 1	Tranche 2	Total	EBITDA	EBITDA Margin	Total
Date of board of directors' meeting	12/19/05	12/19/05		3/30/07	3/30/07	
Number of options granted	11,166	7,385	18,551	8,070	5,380	13,450
Grant date	12/14/05	6/29/06		4/1/07	4/1/07	
Vesting date	1/1/08	1/1/09		2008/2012	2008/2012	
Exercise price at grant date	$548	$782		$1,259	$1,259	
Term of options post-vesting	10 years	10 years		10 years	10 years	
Options forfeit prior to December 31, 2006	(938)		(938)			
Options assumed by C&W Group at April 1, 2007	10,228	7,385	17,613	8,070	5,380	13,450

The Employee Stock Purchase Plan options outstanding at December 31, 2008 have an exercise price in the range of $548 and $782 and an average remaining contractual life of approximately 7 years.

The Management Options outstanding at December 31, 2008 have an exercise price of $1,259 and an average remaining contractual life of approximately 8 years.

	2008			
	Employee Plan		Management Options	
	Number of shares	Average exercise price ($)	Number of shares	Average exercise price ($)
Outstanding at 1/1/2008	12,054	685.91	13,450	1,258.68
Granted during the period	-	-	2,195	1,251.17
Exercised during the period	(16)	548.02	-	1,258.68
Forfeited during the period	(302)	548.02	(950)	1,258.68
Cancelled during the period	(7,092)	782.39	(328)	1,258.68
Outstanding at 12/31/2008	4,644	782.39	14,367	1,279.41
Exercisable at 12/31/2008	4,644	548.02	1,092	1,258.68

	2007			
	Employee Plan		Management Options	
	Number of shares	Average exercise price ($)	Number of shares	Average exercise price ($)
Outstanding at 4/1/2007	17,613	646.29	13,450	1,258.68
Granted during the period	-	-	-	-
Exercised during the period	-	-	-	-
Forfeited during the period	(597)	663.05		
Cancelled during the period	(4,962)	548.02		
Outstanding at 12/31/2007	12,054	685.91	13,450	1,258.68
Exercisable at 12/31/2007	4,962	548.02	-	-

In accordance with the provisions of IFRS 2, the appraisal was based on the Black-Scholes pricing model using the following assumptions:

	Employee Plan		Management Options	
	Tranche 1	Tranche 2	Tranche 1	Tranche 2
Stock price at grant date ($)	578.68	906.73	1.190 – 1.332	1,298.87
Exercise price at grant date ($)	548.02	782.39	1.190 – 1.332	1,258.68
Estimated volatility (%)	35%	35%	40%	35%
Remaining option life (years)	6.5	6.5	10.0	10.0
Expected dividends (%)	1.20	1.22	n.a.	n.a.
Risk-free interest rate (%)	4.22%	5.12%	3.85 – 4.00	4.74

The volatility is based on the historical volatility of comparable public companies.
Because the C&W Group does not have historical exercise data, it used the midpoint between the vesting date and the contractual term to determine the expected term of the stock options.

During 2008, costs of € 5 million were recorded for both stock option plans.

29. Equity attributable to the minority interest

€ in millions	%	**12/31/2008** **Capital and reserves**	**Profit (loss)**	**Total**	12/31/2007 Capital and reserves	Profit (loss)	Total
Cushman & Wakefield Group	28	**61**	**(6)**	**55**	64	13	77
Alpitour Group	(a)	**4**	**1**	**5**	3	1	4
Juventus Football Club S.p.A.	40	**46**	**(2)**	**44**	53	(6)	47
Total		**111**	**(7)**	**104**	120	8	128

(a) Percentage holdings held by minority stockholders in subsidiaries of the Alpitour Group.

30. Provisions for employee benefits

The companies of the Group provide post-employment benefits for their active employees and retirees, either directly or by contributing to independently administered funds. The way these benefits are provided varies according to the legal, fiscal and economic conditions of each country in which the Group companies operate, the benefits generally being based on the employees' remuneration and years of service. Post-employment benefits are provided under defined contribution and/or defined benefit plans.

In the case of defined contribution plans, the Group companies pay contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. Once the contributions have been paid, the Group has no further payment obligations. The contribution cost is recognized when the employee has rendered his/her service and this cost is recorded in the income statement in "Personnel costs".

Defined benefit plans may be unfunded, or they may be wholly or partly funded by contributions by a company, and sometimes by its employees, into a company, or fund, that is legally separate from the employer and from which the employee benefits are paid. Finally, the companies of the Group grant certain other long-term benefits to its employees; these benefits include those generally paid when an employee attains a certain level of seniority or when a specified event occurs. In this case the measurement of the obligation reflects the probability that payment will be required and the length of time for which payment is expected to be made.

Details of the provisions for employee benefits recognized in the financial statements at December 31, 2008 and 2007 are the following:

	Non-current part		Current part	
€ in millions	**12/31/2008**	12/31/2007	**12/31/2008**	12/31/2007
Employee severance indemnities	**22**	22	**2**	4
Pension plans	**13**	10	**0**	0
Total post-employment benefits	**35**	32	**2**	4
Other employee benefits	**5**	11	**40**	109
Total provisions for employee benefits	**40**	43	**42**	113

Post-employment benefits

Employee severance indemnities

Employee severance indemnities relating to the companies of the Group operating in Italy represent the obligation due to employees by law (recently amended by Law 296/06) that has accrued and which will be paid upon termination of employment. In certain circumstances, a portion of the indemnity may be paid as an advance during the employee's service life. This is an unfunded defined benefit plan, considering the benefits almost entirely accrued, with the sole exception of the revaluation.

After the change made to the regulations for employee severance indemnities by Law 296 dated December 27, 2006 (Budget Law 2007), and subsequent decrees and regulations, for those employees who have asked, the portion of employee severance indemnities accruing from January 1, 2007 has been transferred to a complementary pension plan chosen by the employees and these therefore fall under defined contribution plans.

For those employees who did not elect the transfer of the accrued portion of employee severance indemnities, beginning January 1, 2007, the calculation of employee severance indemnities, including the portion accruing, will be made according to the usual actuarial method.

In accordance with IAS 19 – Employee Benefits, the Italian companies of the Group have included employee severance indemnities in defined benefit plans and measure them with actuarial techniques using the Project Unit Credit Method.

Besides employee severance indemnities, established by art. 2120 of the Italian Civil Code, IFIL S.p.A. guarantees other forms of benefits (termination benefits, loyalty bonuses, health care plans, defined benefit and defined contribution pension plans) under company or individual supplementary agreements. These are described in Note 33 to the separate financial statements.

Pension plans

The C&W Group funds a certain number of defined contribution plans set up pursuant to the laws in force in the countries in which it operates.

The European partnership (C&W UK) also provides a form of hybrid pension plan (UK Plan) which has features of both defined contribution and defined benefit plans.

C&W UK ceased its contributions to the plan effective March 31, 2002 and, subject to certain transitional agreements, introduced a defined benefit plan for employees starting from that date.

Changes in the present value of post-employment benefit obligations and the fair value of assets servicing the plans during the course of the last two years are as follows:

€ in millions	Balance at 12/31/2007	Current service cost	Financial expenses	Actuarial gains (losses)	Benefits paid	Losses (gains) on curtailments and/or settlements	Exchange differences	Change in scope of consolidation and other changes	**Balance at 12/31/2008**

Fair value of the plan assets:										
Pension plans		3			(1)	47		(4)		**45**
Total post-employment benefit plans	-	3	-	-	(1)	47	-	(4)	-	**45**
Total net liabilities at December 31, 2007	**25**	**96**	**3**	**(5)**	**(48)**	**96**	**(1)**	**(7)**	**(3)**	**156**

(a) The balances at December 31, 2006 are net of the amounts relating to the Sequana Group which was deconsolidated in 2007.

Post-employment benefits are calculated on the basis of the following actuarial assumptions:

	December 31, 2008		December 31, 2007	
	Employee severance indemnities	**Pension plans**	Employee severance indemnities	Pension plans
Discount rate		**6.00%**	4.6-4.7%	6.00%
Future salary increase (inflation included)	**2.2-3.7%**		2-3.5%	
Inflation rate	**2.20%**		2.00%	
Expected return on plan assets		**7.00%**		7.13%

The assumptions used for the calculation of pension funds are as follows:

- the discount rate is the rate of return at the reporting date on AA credit-rated bonds that have maturity dates approximating the terms of the C&W Group's obligations and that are denominated in the same currency in which the benefits are expected to be paid;
- the mortality rate is based on statistical tables;
- the expected return on assets servicing the plan is based on the total return of the portfolio and not the sum of the expected returns of the individual assets. This rate approximates the historical annual rate of the plan assets.

The "UK Plan" assets include marketable equity securities in both United Kingdom and United States companies and fixed-rate debt securities.
The investment policies and strategies for the plan assets are established to achieve a reasonable balance between risk, likely return and administration expenses, as well as to maintain funds at a level to meet minimum funding requirements. In order to ensure that an appropriate investment strategy is in place, an analysis of the plan's assets and liabilities is completed periodically.

	Fair value of plan assets		**Expected return**	Fair value of plan assets		Expected return
	December 31, 2008		**2008**	December 31, 2007		2007
	Target in %	€ in millions	in %	Target in %	€ in millions	in %
Equity securities	**87.2%**	**11**	**6.00%**	87.2%	38	7.13%
Debt instruments	**7.5%**	**17**	**6.00%**	7.5%	5	7.13%
Cash	**5.3%**	**2**	**6.00%**	5.3%	2	7.13%

The estimated expense for contributions to be paid to the defined benefit plan in 2009 amounts to £ 1.5 million (€ 2 million).

The expected long-term rate of return on assets is 6.16% (7.13% in 2007). The expected long-term rate of return is based on the portfolio as a whole and not on the sum of the returns on individual asset categories. The return is based exclusively on historical returns, without adjustments.

The total amounts recognized in the income statement for post-employment benefits are the following:

€ in millions	**2008**	2007
Current service cost	**5**	6
Financial expenses	**3**	3
Expected return on plan assets	**(3)**	(3)
Losses (gains) on curtailments and/or settlements	**0**	(1)
Total (income) expenses for post-employment benefits	**5**	5

Other employee benefits

Other employee benefits, of which € 5 million is non-current and € 40 million is current, mainly include the liabilities of the C&W Group.

31. Provisions for other liabilities and charges

The composition of the provisions is as follows:

	Current portion		Non-current portion	
€ in millions	**12/31/2008**	12/31/2007	**12/31/2008**	12/31/007
Restructuring provisions	**3**	0	**0**	0
Other risks provisions	**14**	14	**18**	19
Tax provision	**6**	0	**6**	1
Total	**23**	14	**24**	20

During the fourth quarter of 2008, in response to the credit markets' impact on the global economy and the business, the C&W Group announced a number of cost cutting initiatives, including reductions in spending in a number of direct expense categories and a global reduction in workforce. These reduction efforts were necessary to improve the C&W Group's cost structure and its general operating efficiencies.
The C&W Group recorded an accrual for a restructuring charge of approximately € 5 million during the fourth quarter of 2008, primarily attributable to workforce reductions and other related benefits, and utilized the provision account for € 2 million.

The non-current portion of the other risks provision (€ 18 million) mainly includes the charge made by Juventus F.C. for the urbanization fees (expenses for the utilities and infrastructures) for the "Mondo Juve - commercial center", which is expected to be paid after the next year on the basis of the estimated time for the execution of the work.
The current portion of the other risks provisions (€ 14 million) includes amounts set aside for pending disputes of the C&W Group for € 11 million and the Alpitour Group for € 3 million.

The non-current portion of the other risks provision is due within five years.

Changes in the current and non-current provisions in 2008 and 2007 are as follows:

€ in millions	Balance at 12/31/2007	Accruals	Release of provisions used	Other changes	**Balance at 12/31/2008**

32. Pending litigation

IFIL S.p.A. and subsidiaries in the "Holdings System"

Proceedings relative to the contents of the press releases issued by IFIL S.p.A. and Giovanni Agnelli e C. S.a.p.az on August 24, 2005

On February 21, 2006, Consob notified Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone as well as IFIL and Giovanni Agnelli e C. of its objections in respect of the start of a sanctionary proceeding under art. 187-septies of the Consolidated Law on Finance under the assumption that each of those individuals violated art. 187-ter, paragraph 1 (Market Manipulation) of the Consolidated Law on Finance in relation to the content of the press releases diffused by IFIL and Giovanni Agnelli e C. on August 24, 2005 and that the companies violated the responsibility of entities pursuant to art. 187-quinquies of the Consolidated Law on Finance and joint and several responsibility pursuant to art. 6, paragraph 3 of Law 689/1989.

On February 13, 2007, the Consob sanctionary measure (Resolution 15760) was notified which, at the conclusion of the proceeding, applied the following pecuniary administrative sanctions:

- to Gianluigi Gabetti (chairman of IFIL and chairman of Giovanni Agnelli e C.) € 2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL and € 2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to Franzo Grande Stevens (director of IFIL) € 2 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL and € 1 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to Virgilio Marrone (chief executive officer and general manager of IFI) € 500 thousand in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to IFIL € 4.5 million;
- to Giovanni Agnelli e C. € 3 million;

and the additional following administrative sanctions: temporary inability to assume positions of administration, direction and control in listed companies or in companies that are part of the same group of listed companies:

- to Gianluigi Gabetti: for six months;
- to Franzo Grande Stevens: for four months;
- to Virgilio Marrone: for two months.

The persons and companies involved in the sanctionary measure filed appeals with the Court of Appeals of Turin. In the opposing judgment, the Court of Appeals, in its decision of December 5, 2007, reduced the administrative sanctions from a total of € 16 million to € 6.3 million. The reduction for IFIL was from € 4.5 million to € 1 million and for Giovanni Agnelli e C. from a total of € 3 million to € 600 thousand and for Gianluigi Gabetti from a total of € 5 million to € 1.2 million in addition to a reduction of two months, from six to four months, in respect of the additional administrative suspension.

In July 2008, IFIL filed an appeal with the Court of Cassation against the ruling by the Court of Appeals of Turin. Appeals were also filed with the Court of Cassation by the other parties involved in the Consob sanctionary measure. In October 2008, Consob notified the company that it had filed a counter-appeal and an incidental appeal asking for the rejection of the main appeal and the cancellation of the reduction of the sanctions originally levied. Consob acted in the same manner against the other petitioners. In November 2008, IFIL filed a counter-appeal with the Court of Cassation against Consob's incidental appeal. The other parties referred to in Consob's incidental appeal also filed a counter-appeal with the Court of Cassation.

In the penal proceedings for the same press releases, on November 7, 2008, the Preliminary Hearing Judge of the Turin Court committed Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone to trial for the offense pursuant to art. 185 of the Consolidated Law on Finance, as well as IFIL and Giovanni Agnelli e C., as those responsible administratively under Legislative Decree 231/2001, setting a hearing for March 26, 2009.

Alpitour Group

In reference to the damages to the “Bravo Club” resort in Zanzibar caused by the fire in January 2001, a case is pending before the competent authorities in Tanzania to establish the compensation for damages due from Royal Insurance. During 2005, Royal Insurance was sentenced, in the judgment of first instance, to pay the damages requested in addition to interest and legal fees. The insurance company appealed this decision and the case is now being judged in the second instance. Based on available information, it is believed that there is reasonable certainty that the judgment of the first instance will be upheld.

Furthermore, in 2008, the case of the Alpitour Group versus INPS was settled.

Cushman & Wakefield Group

The C&W Group is a party to various matters in litigation. These matters generally relate to disputes and claims involving commission agreements, employment agreements, and other contractual matters.

The Group believes that while some of these matters may be ultimately resolved against it, such claims will not have a material effect on the financial position and results of operations of the Group.

Juventus F.C.

Almeida Gomes De Andrade's registration rights

On July 9, 2008, during a personalized training session at Pinzolo, the player Almeida Gomes De Andrade Jorge Manuel was the victim of another serious injury to his left knee (relapse of the fracture of the rotula) twice operated in the past season. A new osteosynthesis operation was thus needed. The post-surgery prognosis is a number of months.

Given the impossibility for the player to recover to play professionally, the Company has proceeded to fully write down the residual book value of the player's registration rights with a negative effect on income in the 2007/2008 financial year for € 7 million.

As a consequence of this, on August 8, 2008, the company sent a request to terminate the contract to the Arbitration Board of the National Professional League that organized the medical examination of the player, conducted on October 2, 2008, and confirmed the player's inability.

In November, in turn, the player resorted to the Arbitration Board to ask for the termination of the contract as Juventus F.C. had failed to pay the wages due while the arbitration process was pending, asking for the related damages. The company appeared, challenging the unfounded nature of the player's action.

The attempt at conciliation failed and the Arbitration Board must therefore give its ruling relating to the demands for contractual termination by the parties. The first hearing was held on February 13, 2009 and the following hearings were postponed. At the current time it is not possible to predict the outcome of this dispute.

Guardia di Finanza access

On July 3, 2008, the *Guardia di Finanza* entered company headquarters to conduct a general examination of substance as permitted by and pursuant to art. 32 and art. 33 of DPR 600/73, art. 51 and art. 52 of DPR 633/1972 and art. 35 of Law 4/1929, concerning the period from July 1, 2005 to the date of access for direct taxes and from January 1, 2006 to the date of access for VAT and other indirect taxes.

Moreover, following the company's involvement, pursuant to Legislative Decree 231 of 2001, in the proceedings pending at the Turin Courts for financial misrepresentation, the

examination has also been extended to the years 2001/2002, 2003/2004 and 2004/2005, which would otherwise have been partly statute barred.
The examination is currently in progress.

VAT receivables on income from UEFA Champions League

Following resolution 174/E, on May 25, 2004, the Revenue Agency of Turin approved the right to the reimbursement of VAT regarding UEFA competitions for the 2000/2001 and 2001/2002 seasons for a total of € 5 million. Following this approval, the company proceeded to recognize the related receivable with a corresponding entry to extraordinary income. Part of the receivable was received in June 2004 for € 1.2 million.
The remaining amount of approximately € 4 million was sold without recourse to a factoring company in December 2004 and was derecognized from the balance sheet from that date. Of the total amount sold to the factoring company, the Revenue Agency later reimbursed the amount in installments for € 3 million. In July 2008, the Revenue Agency notified Juventus and the factoring company of its refusal to pay the last installment of € 2 million citing disputes over the justification of the request for reimbursement presented by Juventus. This refusal is in contrast with the original acknowledgment of the receivable in May 2004. On October 15, 2008, the company appealed together with the factoring company to the tax authorities to challenge the assertions of the Revenue Agency and in any case reserves the right to take any possible action to protect itself later in civil proceedings.
At this moment in time it is not possible to predict the outcome of this dispute.

Proceedings at the Turin Courts

In reference to the proceedings underway at the Turin Courts for financial misrepresentation, after the original filing of charges only against some former directors, on October 16, 2008, notification was received at the company office of the conclusion of inquiries and the filing of documents also against the company, held to be responsible under Legislative Decree 231 of 2001, limited to some transactions for the sale/purchase of football players. Given the lack of any organizational model, the company proposed the compromise of the payment of € 70,000.
In these same proceedings, on October 29, 2008, the judge for the preliminary investigations, at the request of the public prosecutors, decided instead to close the part of the inquiry regarding the sale of Campi di Vinovo S.p.A..
The preliminary hearing is currently in progress.

Proceedings at the Naples Courts

With regard to the proceedings in course in Naples (R.G. 276585/06), by order of March 24, 2009, the Courts, in upholding the appeals presented by the Juventus F.C. defense, ordered the “exclusion of all civil parties from the process” and consequently the loss of the effectiveness of the constitution of third-party liability”. Juventus F.C. is therefore definitely out of the case pending in Naples.

Como Calcio Bankruptcy

The bankruptcy of Como Calcio in June 2006 led to action brought against Juventus F.C. involving a claim for payment of € 1,580,000 allegedly still due to Como Calcio for the sale of the registration rights of the players Piccolo and Pederzoli.
Juventus F.C. appeared before the courts and requested that the liquidator's demands be rejected as the sum had already been paid and asked that Mr Preziosi be summoned to court so that Juventus could be relieved of responsibility and held unaccountable in the event of a judgment against it. The first hearing in the case was adjourned to March 12, 2008 so that Mr Preziosi could be summoned. Mr Preziosi was summoned and appeared and asked that the demands against him be rejected. The inquiry is closed and a hearing is scheduled to set out the conclusions on July 9, 2009.

33. Consolidated net financial position

The composition of the gross and net financial position of the consolidated companies is as follows:

€ in millions	Gross debt position	Financial assets	Net financial position (debt)/liquidty
IFIL S.p.A. and the "Holdings System"	(973)	1,331	358
Cushman & Wakefield Group	(170)	62	(108)
Alpitour Group	(73)	107	34
Juventus Football Club S.p.A.	(17)	28	11
Total	**(1,233)**	**1,528**	**295**

In accordance with Consob Communication 6064293 dated July 28, 2006, the composition of the net financial position of the IFIL Group is provided below:

€ in millions	**12/31/2008**	12/31/2007	Change
Non-current financial liabilities			
IFIL 2007/2017 bonds	**(745)**	(744)	(1)
IFIL 2006/2011 bonds	**(199)**	(200)	1
Debt	**(198)**	(114)	(84)
Total non-current financial liabilities	**(1,142)**	(1,058)	(84)
Non-current other financial assets	**4**	7	(3)
Non-current net financial position (A)	**(1,138)**	(1,051)	(87)
Current financial liabilities			
Debt	**(49)**	(52)	3
Current portion of medium/long-term debt	**(31)**	(51)	20
Derivative financial instruments	**(11)**	0	(11)
Total current financial liabilities	**(91)**	(103)	12
Current financial assets			
Bonds and equity shares held for trading	**347**	152	195
Derivative financial instruments	**1**	4	(3)
Loan to the parent, IFI	**199**	0	199
Receivables and other financial assets	**2**	2	0
Total current financial assets	**549**	158	391
Cash and cash equivalents	**975**	919	56
Current net financial position (B)	**1,433**	974	459
Consolidated net financial position (A+B)	**295**	(77)	372

On October 10, 2008, IFIL granted the parent, IFI, a loan up to a maximum of € 200 million, after approval by the respective boards of directors on the same date.

34. Bonds and other debt

The composition is as follows:

	Non-current portion		Current portion	
€ in millions	**12/31/2008**	12/31/2007	**12/31/2008**	12/31/2007
IFIL bonds 2007/2017	**(745)**	(744)	**(22)**	(22)
IFIL bonds 2006/2011	**(199)**	(200)	**(1)**	(1)
Debt	**(198)**	(114)	**(57)**	(80)
Derivative financial instruments	**0**	0	**(11)**	0
Total bonds and other debt	**(1,142)**	(1,058)	**(91)**	(103)

The bonds issued by IFIL S.p.A. are traded on the Luxembourg Stock Exchange.
The bonds contain covenants that are common in international practice for bond issues of this type. In particular, they contain negative pledge clauses (the obligation to extend any real present or future guarantees given as collateral on the assets of the issuer on other bonds and other credit instruments to these bonds to the same degree), disallowing a change of control and providing for periodic disclosure. The 2006/2011 bonds also establish other commitments such as respecting a maximum debt limit in relation to the amount of the portfolio and maintaining a rating by one of the major agencies. Non-compliance with these covenants allows the bondholders to ask for the immediate redemption of the bonds. Finally, standard events of default are envisaged in the case of serious non-fulfillment such as, for example, failure to pay interest. These covenants were complied with at December 31, 2008.

Standard & Poor's rated the two bond issues “BBB+”, in line with the current rating of IFIL S.p.A. long-term debt.

The 2007/2017 bonds were issued at a price equal to 99.554% of their nominal value with a 5.375% annual coupon which guarantees a return equal to the 10-year swap rate plus a spread of 80 basis points, at the time of issue.

The IFIL 2006/2011 bonds, issued on June 9, 2006 for a nominal amount of € 200 million, maturing June 9, 2011, pay interest at the 3-month Euribor rate plus a spread of 68 basis points.

Debt recorded in current and non-current liabilities for € 255 million (€ 194 million at December 31, 2007) includes debt of the C&W Group (€ 165 million), the Alpitour Group (€ 73 million) and Juventus F.C. (€ 17 million).

Cushman & Wakefield Group

The debt of the C&W Group amounts to € 165 million (€ 73 million at December 31, 2007) and includes the following categories of debt:

- Senior Revolving Credit Facility secured on May 29, 2007 for $350 million. At December 31, 2008, the outstanding balance is $219 million (€ 157 million), of which $154 million (€ 111 million) at the average rate of 3.97%, $14.1 million (€ 10 million) at the average rate of 5.40% and $8.9 million (€ 6 million) at the average rate of 4.67%;
- Seller Note – Le Page for $5.5 million (€ 4 million) at a rate of 7%;
- Seller Note – Burnham for $2.5 million (€ 2 million).

The Senior Credit Facility is covered by four covenants to be maintained for the entire term of the credit facility including leverage ratios as defined in the contract.
The financial covenants have been complied with from the time the credit facility was secured until December 31, 2008.

Alpitour Group

The debt of the Alpitour Group totaling € 73 million (€ 103 million at December 31, 2007), comprises:

- debt relating to the securitization of trade receivables (€ 45 million);
- syndicated loan, coordinated by BNL and Efibanca (€ 23 million);
- CRS loan (€ 4 million) and other (€ 1 million).

The medium and long-term loan contracts state that the Alpitour Group must comply with the covenants calculated on consolidated equity, economic and financial data (mainly net debt/equity and Ebitda/net debt). In view of the seasonal nature of the business, these ratios, as established by the relevant contracts, are calculated on an annual basis at the year-end closing date.
At October 31, 2008, these ratios were fully within the limits established by the covenants.

Juventus F.C.

Debt of Juventus F.C. refers entirely to the debt with Unicredit Leasing S.p.A., formerly Locat S.p.A., for the lease of the Vinovo Training Center and other minor leases for € 17 million, of which € 9 million is due beyond 5 years.

Derivative financial instruments, equal to € 11 million, comprise some interest rate swap contracts put into place by IFIL S.p.A. to guarantee a fixed interest rate over the entire bond period 2006-2011 (the fair value at December 31, 2008 is negative for € 5 million); as well as foreign exchange forward contracts put into place by the C&W Group to hedge possible changes in exchange rates on intercompany trading transactions (the fair value at December 31, 2008 is negative for € 6 million).

35. Deferred income taxes

The composition and the change in deferred tax assets are as follows:

€ in millions	Property, plant and equipment and intangible assets	Tax losses	Revenues taxed in prior years	Tax-deferred gains	Other	**Total**
Balance at December 31, 2007	2	6	9	0	9	**26**
Income taxes charged (reversed) to the income statement		(5)	(4)	(5)	6	**(8)**
Taxes relating to items credited to equity					(1)	**(1)**
Net other movements						**0**
Balance at December 31, 2008	**2**	**1**	**5**	**(5)**	**14**	**17**

€ in millions	Property, plant and equipment and intangible assets	Tax losses	Revenues taxed in prior years	Tax-deferred gains	Employee benefits	Deferred compensation plan	Other	**Total**
Balance at December 31, 2006	1	51	**12**	**3**	28	0	(48)	**47**
Deconsolidation of the Sequana Group	(1)	(33)			(27)		41	**(20)**
Acquisition of the Cushman & Wakefield Group		2				25	20	**47**
Income taxes charged (reversed) to the income statement	(1)	(9)	(3)	(3)		(2)	8	**(10)**
Exchange differences		(1)				(2)	3	**0**
Net other movements	3	(3)			3		4	**7**
Reclassification to offset deferred tax liabilities		(1)			(4)	(21)	(19)	**(45)**
Balance at December 31, 2007	**2**	**6**	**9**	**0**	**0**	**0**	**9**	**26**

The composition and the change in deferred tax liabilities are as follows:

€ in millions	Property, plant and equipment	Intangible assets	Depreciation and tax charges	Fair Value	Deferred compensation plans	Employee benefits	Actuarial gains (losses)	Tax losses	Other	**Total**
Balance at December 31, 2007	(2)	(107)	7	(11)	21	4	3	1	2	**(82)**
Business combinations		(19)							2	**(17)**
Income taxes (charged) reversed to the income statement		7	(1)		(2)			1	2	**7**
Income taxes relating to items debited to equity				11		(3)	2	1	2	**13**
Exchange differences		(7)			1				1	**(5)**
Net other movements	1								(3)	**(2)**
Balance at December 31, 2008	**(1)**	**(126)**	**6**	**0**	**20**	**1**	**5**	**3**	**6**	**(86)**

€ in millions	Property, plant and equipment	Intangible assets	Depreciation and tax charges	Fair Value	Deferred compensation plans	Employee benefits	Actuarial gains (losses)	Tax losses	Other	**Total**
Balance at December 31, 2006	(81)	0	(30)	(49)	0	0	0	0	59	**(101)**
Deconsolidation of the Sequana Group	76		32	1					(48)	**61**
Acquisition of the Cushman & Wakefield Group		(128)							(7)	**(135)**
Income taxes (charged) reversed to the income statement	4	10	(2)						(1)	**11**
Income taxes relating to items debited to equity				37 (a)					(3)	**34**
Exchange differences	1	13								**14**
Net other movements	(2)	(2)							(7)	**(11)**
Reclassification to offset deferred tax assets			7		21	4	3	1	9	**45**
Balance at December 31, 2007	**(2)**	**(107)**	**7**	**(11)**	**21**	**4**	**3**	**1**	**2**	**(82)**

(a) Relating to taxes on the fair value of the investment in Intesa Sanpaolo S.p.A..

The analysis of unused tax loss carryforwards on which deferred tax assets have not been calculated is as follows:

	Taxable base				Estimated tax
€ in millions	Within 1 year	From 2 to 4 years	Beyond 4 years	Total	benefit
At December 31, 2008					
Current tax losses	134	341	569	1,044	285
At December 31, 2007					
Current tax losses	58	382	621	1,061	281

Deferred tax assets on tax losses are recognized to the extent that their recoverability is highly probable in the following year or in the medium term, taking into account the taxable income forecast in medium-term operating plans.

36. Other liabilities

Details of other liabilities are as follows:

€ in millions	12/31/2008	12/31/2007	Change
Other non-current liabilities			
Other non-current liabilities and other payables	**49**	93	(44)
Other non-current payables to related parties	**2**	1	1
Commissions payable	**6**	6	0
Deferred compensation plans	**1**	1	0

Other current liabilities			
Trade payables			
Trade payables	**208**	234	(26)
Trade payables to related parties	**10**	10	0
	218	244	(26)
Commissions payable	**108**	134	(26)
Total trade payables	**326**	378	(52)
Other current liabilities			
Payables for direct taxes	**25**	17	8
Payables for indirect taxes	**13**	22	(9)
Payables to employees and similar	**56**	33	23
Payables on purchases of property, plant and equipment	**35**	29	6
Other payables	**90**	138	(48)
Other payables to related parties	**8**	18	(10)
Deferred compensation plans	**8**	8	0
Total other current liabilities	**235**	265	(30)
Total trade payables and other current liabilities	**561**	643	(82)
Total other non-current and current liabilities	**619**	744	(125)

For additional information on payables to related parties, reference should be made to Note 39.

Other non-current and current liabilities by maturity are as follows:

€ in millions	Within 1 year	From 2 to 5 years	Beyond 5 years	Total
Other non-current liabilities		47	11	**58**
Trade payables	326			**326**
Other current liabilities	235			**235**
Balances at December 31, 2008	**561**	**47**	**11**	**619**
Other non-current liabilities		91	10	**101**
Trade payables	378			**378**
Other current liabilities	265			**265**
Balances at December 31, 2007	**643**	**91**	**10**	**744**

37. Commitments

Details are as follows:

€ in millions	**12/31/2008**	12/31/2007
Commitments undertaken		
Sureties, guarantees of notes and other guarantees	**76**	137
Commitments for the purchase of investments and financial assets	**78**	71
Commitments for the purchase of property, plant and equipment	**0**	3
Goods on deposit with third parties	**1**	1
Commitments to make loans	**7**	0
Total commitments undertaken	**162**	212
Commitments received		
Sureties, guarantees, guarantees of notes and other guarantees	**158**	187
Other commitments	**59**	63
Total commitments received	**217**	250

Commitments by due date are as follows:

€ in millions	Until canceled	Within 6 months	Between 6 months and 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
At December 31, 2008							
Commitments undertaken	81	28	21	25		7	**162**
Commitments received		110	35	55	17		**217**
At December 31, 2007							
Commitments undertaken	81	60	29	37	5	0	**212**
Commitments received	0	177	41	4	28	0	**250**

Future minimum lease payments relating to operating leases are as follows:

€ in millions	From 0 to 6 months	Between 6 months and 1 year	From 2 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
At December 31, 2008	**48**	**44**	**143**	**98**	**116**	**449**
At December 31, 2007	28	28	81	51	58	246

In 2008, floating-rate lease contracts total € 17 million (€ 18 million in 2007). There are no fixed-rate leases.

Lease expenses recognized in the 2008 income statement amount to € 87 million (€ 75 million in 2007). They refer to lease contracts of the Alpitour Group which include leases of hotel complexes (€ 25 million) and dry-lease installments by the subsidiary Neos (€ 18 million), as well as installments paid by C&W Group for operating leases (€ 44 million).

Commitments undertaken at December 31, 2008 amount to € 162 million and mainly refer to sureties, guarantees of notes and other guarantees for € 76 million, as well as commitments for the purchase of investments and financial assets for € 78 million, and commitments to make loans for € 7 million.

Sureties, guarantees of notes and other guarantees (€ 76 million) mainly include sureties on behalf of suppliers of tourist services, financial offices and public entities provided by the Alpitour Group and other guarantees of the Alpitour Group for € 42 million, in addition to sureties of Juventus F.C. for € 34 million provided by leading credit institutions.

Commitments for the purchase of investments and other financial assets (€ 78 million) refer to commitments undertaken by the subsidiary Ifil Investissements, as follows:

- commitment for a maximum remaining investment of $46 million (€ 33 million) in the limited partnership NoCo B LP which groups a series of funds managed by Perella Weinberg Partners L.P.; as of December 31, 2008 Ifil Investissements S.A. has invested $16 million (€ 11 million);
- commitment to invest € 24 million in the Perella Weinberg Real Estate fund. As of December 31, 2008 Ifil Investissements has invested € 1 million;
- commitment for a further investment of € 21 million in Banijay Holding S.A.S..

Commitments to make loans refers to the commitment undertaken by C&W Group with its employees.

Commitments received amount to € 217 million and refer to sureties, guarantees, guarantees of notes and other guarantees for € 158 million (of which € 155 million is for sureties provided by third parties to Juventus F.C. and € 3 million for sureties provided by public entities and suppliers of tourist services to the Alpitour Group) and sales commitments of the Alpitour Group for € 59 million for travel bookings.

The main sureties relating to Juventus F.C. are as follows:

- surety of € 41 million provided by leading credit institutions on behalf of Sky Italia S.r.l. to guarantee the contract for the sale of television broadcasting rights for championship home games for the 2008/2009 season;
- surety of € 25 million issued by leading credit institutions on behalf of Reti Televisive Italiane S.p.A. to guarantee the contract for the sale of television broadcasting rights for the championship home games for the 2008/2009 season;
- surety of € 42 million provided by Sportfive Italia on behalf of Sportfive S.p.A. to guarantee the commercial contract for the exclusive naming right, as well as some sponsor promotional rights, relating to the new stadium;
- other sureties for € 4 million.

Other guarantees received by Juventus F.C., for € 43 million, refer to guarantees for the receivable from Campi di Vinovo S.p.A. and notes.

Procedures for the identification and control of commitments

The information regarding commitments, in addition to all other data and information used for consolidation purposes, is transmitted to IFIL S.p.A. through the consolidation process under the responsibility of the legal representatives of the individual companies and the holding companies consolidated by IFIL that are required to prepare consolidated financial statements who sign a representation letter addressed to the parent.

On the basis of information known to IFIL S.p.A., no significant commitments have been omitted by the companies of the Group.

38. Additional information on financial instruments and financial risk management policies

The carrying amounts and the relative income (expenses) originating from each category of asset and liability classified in accordance with IAS 39 are presented as follows:

	December 31, 2008		
€ in millions	Carrying amount	Income	Expenses
Financial assets			
At fair value through profit or loss			
- held for trading	348		(55)
- designated initially			
Derivative instruments designated as hedges	1		
Investments held to maturity	8		
Loans and receivables (a)	1,602	47	(3)
Available-for-sale assets	1,319	214	
Total	**3,278**	**261**	**(58)**
Financial liabilities			
At fair value through profit or loss			
- held for trading			
- designated initially			
Derivative instruments designated as hedges	11	2	
Debt at amortized cost	970		(53)
Debt at cost	584		(16)
Total	**1,565**	**2**	**(69)**

(a) Includes cash and cash equivalents for € 975 million.

	December 31, 2007		
€ in millions	Carrying amount	Income	Expenses
Financial assets			
At fair value through profit or loss			
- held for trading	154	4	
- designated initially	0		
Derivative instruments designated as hedges	4		
Investments held to maturity	12		
Loans and receivables (a)	1,381	33	0
Available-for-sale assets	2,635	112	
Total	**4,186**	**149**	**0**
Financial liabilities			
At fair value through profit or loss			
- held for trading	0		
- designated initially	0		
Derivative instruments designated as hedges	0		
Debt at amortized cost	970	2	(32)
Debt at cost	568		(28)
Total	**1,538**	**2**	**(60)**

(a) Includes cash and cash equivalents for € 919 million.

Financial assets and liabilities for which the fair value can not be objectively determined and that are recorded at cost have not been included in the asset and liability categories indicated in IAS 39.

Fair value of financial assets and liabilities and the criteria for the estimation of fair value

Financial assets held for trading represented by listed securities are measured using the market price at year-end and the change in fair value is recognized in the income statement in financial income (expenses).

Available-for-sale financial assets represented by listed securities are measured at fair value using the market price at year-end and the unrealized gains or losses are recognized in equity. For additional information on the measurement of available-for-sale financial assets, reference should be made to Note 23.

Available-for-sale financial assets represented by unlisted securities may be measured by independent experts. To this end, it should be noted that the investment in Gruppo Banca Leonardo was aligned to fair value based on an estimate resulting from the application of the "warrant equity method with excess capital" measurement criteria.

For trade receivables and payables, moreover all due within one year, the fair value is not significant in that their carrying amount approximates fair value.

Derivative financial instruments are measured at fair value using the discounted cash flow method.

Risk management

IFIL Holdings System

IFIL S.p.A. and the companies which form the Holdings System are exposed to credit risk insofar as they invest a portion of their cash in bonds issued by leading bank and corporate counterparts that, in any case, are selected according to their credit worthiness. Instead, the relevant investments denominated in currencies other than the Euro, U.S. dollars in particular, are exposed to currency risks; in view of the permanent characteristics of such investments, transactions to hedge the risk of exchange rate fluctuations on those currencies were not put into place.

As far as liquidity risk is concerned, financing needs and cash flows are managed with the aim of optimizing financial resources. In particular, outgoing cash flows from current operations are substantially financed by incoming flows from ordinary business activities.
Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or difficulties in raising sufficient funds that can be readily used. In this sense, the subsidiary IFIL S.p.A. operates so that it has financial resources available by issuing bonds and acquiring irrevocable credit lines with expiration dates and amounts consistent with its investment plans.

IFIL S.p.A. assesses and manages its exposure to fluctuations in interest rates in accordance with its financial management policies and uses derivative financial instruments to fix some of the financing obtained at a pre-set interest rate. The only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on one of the bonds issued.

Alpitour Group

The Alpitour Group regularly assesses its exposure to various types of risks and manages these risks using traditional and derivative instruments in accordance with its management and control policy. This policy does not allow the use of derivatives for speculative purposes but they are used for the management of fluctuations in exchange rates, interest rates and fuel prices for hedging purposes.

The Alpitour Group, and particularly the aviation division, is subject to the risk of fluctuations in fuel prices largely in connection with international political stability and other outside factors. Since fuel is a primary factor in air transport, price fluctuations could have a significant impact on the Group's margin and, consequently, the fuel price risk exposure is hedged by commodity swaps and zero cost collars.
The exposure to exchange rate risks on commercial transactions in foreign currencies is mainly hedged by forward and zero cost collar contracts.
The exposure to interest rate risks on medium- and long-term loans is mainly hedged by interest rate swaps and zero cost collars.

Cushman & Wakefield Group

Credit risk exposure of the C&W Group is mainly influenced by the characteristics of each individual client. Other risk factors, including the default risk of the industry and country in which customers operate has less of an influence on credit risk. That depends on the type of services rendered and knowledge of the quality of the clients.

Juventus F.C.

Juventus F.C. does not have significant concentrations of credit risk and has appropriate procedures in place to minimize such risk exposure. Receivables from Italian soccer companies are guaranteed by the compensation mechanism of the National Professional League while receivables from foreign soccer companies are largely guaranteed by sureties or other guarantees.
A large part of Juventus F.C.'s transactions (sales and purchases) are in Euro; thus the company is not subject to fluctuations in exchange rates to any relevant degree.
The company manages liquidity risk by keeping the bank loans secured from leading credit institutions at levels that avert financial pressure situations and are sufficient to meet operating and investment needs.

Credit risk

Credit risk exposure is principally represented by trade receivables and the concentration of credit risk, however, is mitigated by a large number of counterparts.

Trade receivables are expressed in the financial statements net of the provision for impairment for the risk that counterparts will be unable to fulfill their contractual obligations, the creditworthiness of the customer and historical data.

Credit risk regarding the other financial assets of the Group, which include cash and cash equivalents, available-for-sale assets, receivables and some derivatives, have a maximum risk equal to the carrying amount of the assets in the case of the insolvency of the counterpart.

The amount of financial assets past due and not impaired, represented by trade receivables in the category "loans and receivables", is detailed as follows:

	Past due and not impaired						
€ in millions	30 days	30 to 60 days	60 to 90 days	90 to 180 days	180 to 360 days	more than 360 days	Total
2008							
Trade receivables	**1**	**20**	**5**	**7**	**3**	**0**	**36**

	Past due and not impaired						
€ in millions	30 days	30 to 60 days	60 to 90 days	90 to 180 days	180 to 360 days	more than 360 days	Total
2007							
Trade receivables	136	20	21	11	3	3	194

Movements in the provision for the impairment of receivables and other financial assets for the years 2008 and 2007 are as follows:

€ in millions	**12/31/2008**	12/31/2007
Beginning balance	**30**	23
Accruals	**9**	8
Uses	**(5)**	(6)
Acquisition of the Cushman & Wakefield Group	**0**	7
Exchange differences	**1**	1
Other changes	**0**	(3)
Ending balance	**35**	30

Information on the credit risk of the IFIL Group is presented below.

IFIL Holdings System

IFIL S.p.A. and the companies in the Holdings System are exposed to credit risk insofar as they invest a portion of their cash in bonds issued by leading bank and corporate counterparts, that are in any case selected according to their credit worthiness.
At December 31, 2008 and December 31, 2007, there are no financial assets past due and not written down.

Alpitour Group

Transactions for the sale of receivables

At October 31, 2008, the balance relating to the monthly securitization program of trade receivables begun by the Alpitour Group in 2006 amounts to € 45 million. The securitization operation formalized by Alpitour S.p.A. with Banca Calyon in Milan provides for a revolving credit line which can be used on a monthly basis up to a net amount of € 55 million against the sale of the trade receivables. Furthermore, in accordance with the contract terms, in exchange for the monthly sale of receivables and the amount of utilization requested (monthly program), Alpitour is obliged to subscribe to short-term securities (30-day maturities) issued by a French-registered associate of the Calyon Group, the amount of which is determined on the basis of the quality of the receivables sold and the relative degree of concentration. At October 31, 2008, short-term securities were subscribed to for an amount of € 36 million against a monthly program of € 45 million; the net use of the securitization line at the year-end closing date is therefore equal to € 9 million against a credit line made available by Calyon for € 55 million.

The Alpitour Group does not have any particular concentrations of credit risk since its credit exposure is distributed over a large number of counterparts and customers.

Trade receivables are expressed net of the provision for receivables impairment which amounts to € 24 million at December 31, 2008 (€ 22 million at December 31, 2007).

Cushman & Wakefield Group

The credit risk of the C&W Group is represented by the carrying amount of financial assets recorded in cash and cash equivalents for $82.2 million (€ 59 million) and the carrying amount of trade receivables for $308 million (€ 221 million).

Trade receivables are expressed net of the provision for receivables impairment which amounts to $14.5 million (€ 10 million) at December 31, 2008.

Liquidity risk

The companies of the Group control the liquidity risk by planning investments of liquidity, monitoring the maturities of financial investments and financial assets and the expected cash flows from operations.

The residual contract maturities for all the financial liabilities which fall under the application of IAS 39 are indicated below.

The table has been prepared by allocating the remaining cash flows from existing contracts, including principal and interest; with regard to floating-rate loans, the most recent fixed-rate coupon rate with the bank counterpart was used for the projection of future maturities, taking into account the effect of the hedging transactions.

	December 31, 2008					
	Nominal amount					
€ in millions	Within 6 months	Between 6 months and 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**

Total	**(517)**	**(11)**	**(107)**	**(381)**	**(962)**	**(1,978)**

Comments in respect of IFIL S.p.A. and the companies forming the Holdings System are presented below.

Outgoing flows from current operations are substantially financed by incoming flows from ordinary business and cash availability.

Liquidity risk could therefore arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidation of assets or difficulties in raising sufficient funds that can be readily used to support operating and investment activities. In this sense, the IFIL Group operates so as to have irrevocable credit lines available with expiration dates and amounts consistent with its investment plans.

At December 31, 2008, the IFIL Group has unused credit lines for € 1,663 million (€ 1,974 million at December 31, 2007).

Overall credit lines of the Alpitour Group total € 290 million, of which € 53 million is used for short-term financing and € 19 million for medium-term financing.

To supplement its internally generated cash flows and the maximum peak of seasonal cash flow demands which arise at the start of the second quarter of the year, the C&W Group secured a $350 million Senior Credit Facility on May 29, 2007. This facility will be used to support acquisition opportunities and fund seasonal cash flow requirements during the year.

The breakdown of maturities by credit line is as follows:

	December 31, 2008						
	Nominal amount						
€ in millions	Until canceled	Between 0 and 6 months	From 6 months to 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
Portion of credit lines utilized	34	5	3	61	161		**264**
Portion of credit lines not utilized	929		160	280	294		**1,663**
Total credit lines	**963**	**5**	**163**	**341**	**455**	**0**	**1,927**

	December 31, 2007						
	Nominal amount						
€ in millions	Until canceled	Between 0 and 6 months	From 6 months to 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	**Total**
Portion of credit lines utilized	30	71	3		93		**197**
Portion of credit lines not utilized	958	89	100	275	552		**1,974**
Total credit lines	**988**	**160**	**103**	**275**	**645**	**0**	**2,171**

Market risk

The IFIL Group is principally exposed to exchange rate and interest rate risks, since the Group operates internationally in different currency areas and uses financial instruments which generate interest, in addition to price risks on equity shares and other listed financial assets.
Financial risks are managed by each subgroup in which the Group's activities are divided. IFIL manages the financial risks of the Holdings System.

Exchange rate risk

An analysis of debt by currency is as follows:

€ in millions	EUR	GBP	USD	Other	**Total**
At December 31, 2008					
IFIL bonds 2007/2017	(767)				**(767)**
IFIL bonds 2006/2011	(200)				**(200)**
Debt	(107)	(35)	(113)	(11)	**(266)**
Total debt	**(1,074)**	**(35)**	**(113)**	**(11)**	**(1,233)**
At December 31, 2007					
IFIL bonds 2007/2017	(766)				**(766)**
IFIL bonds 2006/2011	(201)				**(201)**
Debt	(126)		(58)	(10)	**(194)**
Total debt	**(1,093)**	**0**	**(58)**	**(10)**	**(1,161)**

The Group is exposed to risks from fluctuations in exchange rates which can affect the results of operations and equity.
The transactions put into place by the companies of the Group to hedge the above currency positions are described below.

IFIL Holdings System

IFIL S.p.A. does not have financial liabilities denominated in currencies other than the Euro. Some of the assets held for trading and cash and cash equivalents at December 31, 2008 (respectively, € 16 million and € 14 million) are denominated in currencies other than the Euro. These are securities held for trading and cash and cash equivalents which have both been adjusted to the year-end exchange rate.

The subsidiary Ifil Investissements is exposed to exchange rate risk on bonds issued by Perfect Vision Ltd. in U.S. dollars. A change in the exchange rate of the American currency against the Euro either up or down by 10% would have an effect on the result for € 7 million.

Alpitour Group

The Alpitour Group, since it operates internationally, is exposed to market risk from fluctuations in exchange rates.
Alpitour S.p.A. has forward contracts in place for a total nominal amount of € 5 million to manage the risk of fluctuations in exchange rates hedging the exposure in foreign currencies for the next year. The fair value of IRS at October 31, 2008 is estimated at a positive € 902 thousand.

Cushman & Wakefield Group

Exchange rate risk relating to the operations of the C&W Group is limited since the companies of the Group conduct their operations in their functional currency.
Exposure to currency risk can only come from intercompany commercial transactions. To mitigate this risk, in 2008 the Group has 32 forward exchange rate contracts outstanding on the main currencies to which it is exposed. The fair value of these financial instruments at December 31, 2008 is negative for $6,236 thousand (€ 4,481 thousand).
The exchange risk relating to debt is limited to the foreign currency debt referring to the portion of the Senior Revolving Credit Facility: in Euro for $14.1 million, in GBP for $42 million and in CAD for $14.9 million.
The C&W Group believes that the companies exposed to this risk will generate sufficient cash flows in the future to repay their debt, therefore, no hedging instruments have been put into place.

Sensitivity analysis for exchange rate risk

A sensitivity analysis at the balance sheet date has been carried out in respect of the financial instruments exposed to the exchange rate risk of the Eur/USD, Eur/GBP and risks referring to other currencies represented principally by trade receivables and payables, financial assets and derivative financial instruments of the Alpitour Group and the C&W Group.

Alpitour Group

The sensitivity analysis for the exchange risk of the Alpitour Group used the data of the financial statements at October 31, 2008 and is based on the following assumptions:

- the amount shown in the financial statements for financial assets and liabilities has been adjusted by applying a symmetrical percentage change of 10% to the year-end exchange rate;
- the amount of derivative financial instruments for the management of the fuel risk has been adjusted on the basis of a 5% increase or decrease in the price of fuel;
- for derivative financial instruments (forward purchase of U.S. dollars), the effects have been calculated assuming that the volatility of the markets is unchanged at year-end.

The Alpitour Group is exposed to exchange rate risk on financial assets for € 7 million and on financial liabilities for € 19 million.
A 10% increase or decrease in the exchange rates of the major foreign currencies against the Euro would have an effect on the result for € 1.2 million and a positive effect on equity for € 0.7 million.

Cushman & Wakefield Group

The sensitivity analysis for the exchange rate risk of the C&W Group has been calculated by adjusting the amount shown in the financial statements for financial assets and liabilities by applying a symmetrical percentage change of 10% to the year-end exchange rate. The C&W Group is exposed to exchange rate risk on financial assets for € 167 million and on financial liabilities for € 111 million.
A 10% increase or decrease in the exchange rates of the major foreign currencies against the Euro would affect equity by € 4 million.

Interest rate risk

The companies of the Group use external financial resources obtained in the form of financing and invest available liquidity in monetary and financial market instruments. Any change in market interest rates can affect the cost and yield of the various forms of financing, causing an impact on the level of the Group's financial expenses.
The interest rate risk is managed by the individual consolidated groups which establish the appropriate mix between fixed-rate and floating-rate financing using interest rate swaps and zero cost collars.

The fair value effect of the transactions hedging interest rate risk put into place by the consolidated companies is as follows:

€ in thousands	**12/31/2008**	12/31/2007	Change
IFIL S.p.A. and the Holdings System	**(5,119)**	3,938	(9,057)
Alpitour Group	**13**	168	(155)
Total	**(5,106)**	4,106	(9,212)

IFIL Holdings System

IFIL S.p.A. has some interest rate swap contracts in place at December 31, 2008, for a notional amount of a total of € 200 million to hedge the risk of fluctuations in interest rates on the IFIL bonds 2006-2011 with fair value for a negative € 5,119 thousand (positive for € 3,938 thousand in 2007).

Alpitour Group

Alpitour S.p.A. has interest rate swap contracts and zero cost collars, for a notional amount of a total of € 15 million, to hedge the risk of fluctuations in interest rates on the syndicated loan secured on November 30, 2006. The fair value of these contracts at October 31, 2008 is estimated at a positive € 13 thousand (a positive € 168 thousand at October 31, 2007).

Juventus F.C.

Juventus F.C.'s debt mainly bears interest at floating rates. The company, however, does not believe it necessary to initiate procedures to limit the risks connected with the volatility of interest rates since any impact related to them is considered insignificant.

Cushman & Wakefield Group

The C&W Group is exposed to interest rate risks associated with the Revolving Credit Facility of $350 million. At this time, management has not put into place any form of hedging.

The fair value recorded in the cash flow hedge reserve refers to the hedge of cash flows relating to interest expenses on loans which will arise in the years 2009 to 2011 (approximately € 10 million for the years 2009 to 2010 and approximately € 5 million for the year 2011).

Analysis of debt by interest rate

The analysis of debt by interest rate at December 31, 2008 shows that the rates are mainly between 3% and 4% for € 111 million, between 4% and 5% for € 1,000 million, between 5% and 7.5% for € 115 million, with further debt for € 7 million considered at a 0 rate.

The analysis of debt by interest rate at December 31, 2007 showed that the rates were mainly between 4% and 5% for € 200 million and between 5% and 7.5% for € 958 million.

Sensitivity analysis for interest rate risk

A sensitivity analysis at the balance sheet date has been carried out in respect of financial instruments exposed to interest rate risk. In the case of floating-rate liabilities, the analysis assumes that the exposure at the end of the year remained constant for the entire year. The assumptions used for the model are as follows:

- for debt: a symmetrical change of 50 basis points is applied;
- for interest rate swaps: the change in fair value is recalculated applying a parallel and symmetrical shift of 50 basis points to the current interest rate curve at the balance sheet date. In determining the above effect, account is taken of the consequent impact on the reversal of the cash flow hedge reserve to the income statement.

An increase or decrease in the interest rates of 50 basis points, all other variables remaining constant, would produce a higher or lower pre-tax result of the Group for the year 2008 of € 5.5 million (€ 3.6 million in 2007); the cash flow hedge reserve would be higher or lower by € 0.2 million.

Price risk

IFIL Holdings System

The IFIL Holdings System is exposed to price risk originating from investments in the capital stock of other companies held for trading or for strategic purposes, classified in the categories of available-for-sale and assets held for trading and current securities.

Alpitour Group

The Alpitour Group, particularly the aviation division, is subject to the risk of fluctuations in fuel prices that are largely associated with international political equilibrium and other outside factors. Since fuel is a primary factor in air transport, price fluctuations could have a significant impact on the Alpitour Group's margin. Price risk exposure is hedged by commodity swaps and zero cost collars with high standing Italian and international financial institutions. At October 31, 2008, the subsidiary Neos has commodity swaps and zero cost collars outstanding for a notional amount of € 13 million. The fair value of these hedges is an estimated positive value of € 154 thousand. At October 31, 2007, there were no contracts outstanding since they had been closed during the year.

Cushman & Wakefield Group

The C&W Group is exposed to equity price risk arising from available-for-sale equity securities held for meeting the European (EMEA) pension plan obligations. The investment decisions for this plan are made by the Trustees of the plan, based on consultation with the investment and actuarial advisors of the Trustees.

Sensitivity analysis for price risks

Considering price risk exposure at the balance sheet date, if the prices of securities are 5% higher or lower, the fair value reserve on available-for-sale assets recorded in equity would be € 60 million higher or lower and the amount of fair value recognized in the income statement on the securities and investments included in the category of assets held for trading and cash and cash equivalents would be € 15 million higher or lower.

Details are as follows:

€ in millions	2008			
	+5% change in price		-5% change in price

39. Intragroup and related party transactions

At December 31, 2008, the IFIL Group is directly controlled by IFI S.p.A., a company registered in Italy, listed on the Italian stock exchange, and indirectly controlled by Giovanni Agnelli e C. S.a.p.az., a company registered in Italy which holds the entire ordinary capital stock of IFI S.p.A., and, directly, a further 3% of IFIL ordinary capital stock.

The transactions between the company and its consolidated subsidiaries, which are related parties of the same company, are eliminated in the consolidated financial statements of the IFIL Group and are therefore not presented in this note.

Related party transactions are carried out in accordance with existing laws on the basis of reciprocal economic gain.

Receivables and payables are not guaranteed and are settled in cash. Guarantees have neither been granted nor received.

Costs have not been recognized during the period for non-existent or doubtful liabilities in relation to amounts due from related parties.

The balance sheet and income statement balances generated by transactions carried out in 2008 with related parties, identified in accordance with IAS 24 and communicated by the companies of the Group, are summarized in the following tables. Transactions are indicated only if close to € 1 million, which is the unit of measure for the presentation of the consolidated figures of the IFIL Group.

€ in millions	Trade receivables	Trade payables	Investments	Other assets	Financial assets	Other liabilities	Costs	Revenues
Loan made to the parent, IFI					199 (a)			1 (a)

a) On October 10, 2008, IFIL granted the parent, IFI, a loan up to a maximum of € 200 million; the loan was approved by the respective boards of directors on October 10. Interest income recorded is equal to € 1 million.
b) On June 27, 2008, the subsidiary Ifil Investissements purchased 14,538 C&W Group Inc. shares held as treasury stock by that company, for an investment of € 12 million.
c) Details are presented in Note 37 to the separate financial statements.
d) Income reflects the fair value change in the stock option plan approved by management of the subsidiary Alpitour.
e) Consideration for the July 1, 2007 – June 30, 2010 agreement between the Fiat Group and Juventus F.C. which gives the Fiat Group the right to exploit the images of Juventus F.C..

40. Fees to directors and statutory auditors

In 2008, the fees to the directors and statutory auditors of IFIL S.p.A., to perform their duties in the parent and also in other companies included in consolidation, are as follows:

€ in thousands	IFIL S.p.A.	Subsidiaries (a)	Total
Directors	8,456	1,951	10,407
Statutory Auditors	146	38	184
Total	**8,602**	**1,989**	**10,591**

(a) This does not include the fees paid by Fiat and its subsidiaries since the Fiat Group is not included in the scope of consolidation.

In 2007, fees amounted to € 5,540 thousand, of which € 3,852 thousand was paid by IFIL and € 1,688 thousand by the subsidiaries.

IFIL S.p.A. also signed a third-party liability insurance policy for the directors with a group of insurance companies for a maximum claim per incident and per year of € 50 million for coverage in the event of requests for reparation of non-fraudulent acts.

The proposals for the fees of the executive directors are formulated and approved directly by the board of directors which, after a review by the Compensation and Nominating Committee, in accordance with art. 2389, paragraph 2, of the Italian Civil Code, has the power to establish the fees of directors vested with special responsibilities in accordance with the deed of incorporation.

The Compensation and Nominating Committee also assists the board of directors in examining proposals relating to plans for development, for the evaluation and for the functional succession of staff, as well as the salary levels of first-category staff and stock option plans.

The fee of the chairman was not linked to either the economic results of the company or targets set by the board of directors.
A part of the compensation of the chief executive officer and general manager, however, was tied to the economic results of the company and the reaching of specific targets.

The meeting of the board of directors held on June 9, 2005 approved the use of a secretarial service and a car with a driver for the chairman, Gianluigi Gabetti, also after his current term of office expires.

The board of directors in its meeting held on May 13, 2008 proceeded to appoint the posts on the board and confer the relevant powers, appoint the members of the Audit Committee and the Compensation and Nominating Committee as well as the Supervisory Board pursuant to Legislative Decree 231/2001.
At December 31, 2008, Mr Tiberto Brandolini d'Adda holds 304,153 options to subscribe or purchase the same number of Sequana shares between May 2009 and May 2013 at a price per share of € 20.46; moreover, Sequana has allocated 12,340 of its shares free to Mr Tiberto Brandolini d'Adda, which will available from March 29, 2010.

Moreover, in 2008, the director, Franzo Grande Stevens, rendered professional services to Fiat S.p.A. for € 1 million (including acting as the secretary to the board of directors).

Additional information on fees, as requested by national law (Consob Regulation 11971 dated May 14, 1999 and later amendments), is provided in the Notes to the separate financial statements of IFIL S.p.A..

41. Employees

The breakdown of the average number of employees is provided as follows:

average number of employees	**2008**	2007
Breakdown by category		
Managers	**2,036**	1,524
Middle management and clerical staff	**11,298**	12,244
Pilots and flight attendants	**277**	259
Soccer players	**56**	54
Blue-collar	**4,204**	3,366
	17,871	17,447

42. Pro-forma consolidated data prepared by consolidating the Fiat Group line-by-line

Pending possible amendments to IAS 27 proposed in Exposure Draft ED 10 “Consolidated Financial Statements” that should definitively clarify the criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, the IFIL Group has continued to exclude the Fiat Group, in which IFIL S.p.A. has a 30.45% holding in ordinary capital stock, from line-by-line consolidation consistently with the method followed for the first-time adoption of IFRS and the preparation of the consolidated financial statements at December 31, 2005 and thereafter.

However, the pro-forma consolidated balance sheet, pro-forma consolidated income statement and the composition of the pro-forma consolidated net financial position prepared by consolidating the Fiat Group line-by-line are presented below.

IFIL Group – Pro-forma consolidated income statement prepared by consolidating the Fiat Group line-by-line

€ in millions	Consolidated IFIL Group	Consolidated Fiat Group	Aggregate	Elimination Fiat	Consolidated Pro-forma

43. Translation of foreign currency financial statements

The principal exchange rates used for the translation of the 2008 and 2007 foreign currency financial statements and data to Euro are as follows:

	2008	2007
Year-end exchange rate		
British pound	**0.953**	0.733
U.S. dollar	**1.392**	1.472
Swiss franc	**1.485**	1.655
Average exchange rate		
British pound	**0.796**	0.684
U.S. dollar	**1.471**	1.370
Swiss franc	**1.587**	1.642

44. Approval of the consolidated financial statements and authorization for publication

The consolidated financial statements at December 31, 2008 were approved by the board of directors on March 25, 2009 which authorized their publication starting from March 31, 2009.

Turin, March 25, 2009

On behalf of the Board of Directors
The Chairman
John Elkann

Attestation of the separate financial statements according to art. 154-bis, paragraph 5, of Legislative Decree 58/98

We, the undersigned, Carlo Barel di Sant'Albano, chief executive officer, and Aldo Mazzia, manager responsible for the preparation of the financial reports of EXOR S.p.A. attest, pursuant to the provisions of art. 154-bis, paragraphs 3 and 4, of Legislative Decree 58 dated February 24, 1998:

- the adequacy with respect to the company's structure and
- the effective application

of the administrative and accounting procedures applied in the preparation of the separate financial statements at December 31, 2008 of IFIL S.p.A., the company merged by EXOR S.p.A., effective March 1, 2009.

We also attest that:

- the separate financial statements:
  - have been prepared in accordance with applicable International Financial Reporting Standards recognized by the European Community pursuant to EC Regulation 1606/2002 of the European Parliament and Council, dated July 19, 2002, in addition to the provisions enacted for the implementation of art. 9 of Legislative Decree 38/2005;
  - correspond to the amounts shown in the accounts, books and records;
  - provide a fair and correct representation of the financial conditions, results of operations and cash flows of IFIL S.p.A.;
- the Report on Operations includes a reliable operating and financial review of IFIL S.p.A., as well as a description of the main risks and uncertainties to which it is exposed.

Turin, March 25, 2009

Chief Executive Officer	Manager responsible for the preparation of the financial reports
Carlo Barel di Sant'Albano	Aldo Mazzia

Attestation of the consolidated financial statements according to art. 154-bis, paragraph 5, of Legislative Decree 58/98

We, the undersigned, Carlo Barel di Sant'Albano, chief executive officer, and Aldo Mazzia, manager responsible for the preparation of the financial reports of EXOR S.p.A. attest, pursuant to the provisions of art. 154-bis, paragraphs 3 and 4, of Legislative Decree 58 dated February 24, 1998:

- the adequacy with respect to the company's structure and
- the effective application

of the administrative and accounting procedures applied in the preparation of the consolidated financial statements at December 31, 2008 of IFIL S.p.A., the company merged by EXOR S.p.A., effective March 1, 2009, during the course of the year 2008.

We also attest that:

- the consolidated financial statements:
    - have been prepared in accordance with applicable International Financial Reporting Standards recognized by the European Community pursuant to EC Regulation 1606/2002 of the European Parliament and Council, dated July 19, 2002, in addition to the provisions enacted for the implementation of art. 9 of Legislative Decree 38/2005;
    - correspond to the amounts shown in the accounts, books and records;
    - provide a fair and correct representation of the financial conditions, results of operations and cash flows of IFIL S.p.A. and the aggregate of the companies included in consolidation;
- the Report on Operations includes a reliable operating and financial review of IFIL S.p.A. and the aggregate of the companies included in consolidation as well as a description of the main risks and uncertainties to which they are exposed.

REPORT OF THE INDEPENDENT AUDITORS ON THE FINANCIAL STATEMENTS PURSUANT TO ART. 156 OF LEGISLATIVE DECREE N. 58 OF FEBRUARY 24, 1998

To the Shareholders of
EXOR S.p.A.

1. We have audited the financial statements of IFIL INVESTMENTS S.p.A. as of and for the year ended December 31, 2008, which comprise the balance sheet, the income statement, the statements of changes in equity and cash flows and the related explanatory notes. These financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005 are the responsibility of the Directors of EXOR S.p.A. (formerly IFI – Istituto Finanziario Industriale) following the merger operation described hereinafter in paragraph 4. Our responsibility is to express an opinion on these financial statements based on our audit.

2. We conducted our audit in accordance with the Auditing Standards recommended by CONSOB, the Italian Commission for listed Companies and the Stock Exchange. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the prior year's financial statements, the balances of which are presented for comparative purposes, reference should be made to our auditors' report issued on April 2, 2008.

3. In our opinion, the financial statements present fairly the financial position of IFIL INVESTMENTS S.p.A. as of December 31, 2008 and the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005.

4. As illustrated in the report of operations on March 1, 2009 became effective the merger by incorporation of IFIL INVESTMENTS S.p.A. in the parent company IFI – Istituto Finanziario Industriale S.p.A. which changed its name to EXOR S.p.A. Following the incorporation, the financial statements of IFIL as of December 31, 2008 were prepared by the Directors of EXOR S.p.A.

5. The Directors of EXOR S.p.A. are responsible for the preparation of the report on operations in accordance with the applicable laws and regulations. Our responsibility is to express an opinion on the consistency of the report on operations with the financial statements, as required by art. 156, paragraph 4-bis, letter d), of the Legislative Decree n. 58/98. For this purpose, we have performed the procedures required under Auditing Standard n. 001 issued by the Italian Accounting Profession and recommended by CONSOB. In our opinion the report on operations is consistent with the financial statements of IFIL INVESTMENTS S.p.A. as of December 31, 2008.

REPORT OF THE INDEPENDENT AUDITORS ON THE CONSOLIDATED FINANCIAL STATEMENTS PURSUANT TO ART. 156 OF LEGISLATIVE DECREE N. 58 OF FEBRUARY 24, 1998

To the Shareholders of
EXOR S.p.A.

1. We have audited the consolidated financial statements of IFIL INVESTMENTS S.p.A. and its subsidiaries ("IFIL Group") as of and for the year ended December 31, 2008, which comprise the consolidated balance sheet, the consolidated income statement, the consolidated statements of changes in equity and cash flows and the related explanatory notes. These consolidated financial statements prepared in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005 are the responsibility of the Directors of EXOR S.p.A. (formerly IFI – Istituto Finanziario Industriale), following the merger operation described hereinafter in paragraph 4. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

2. We conducted our audit in accordance with the Auditing Standards recommended by CONSOB, the Italian Commission for listed Companies and the Stock Exchange. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Directors, as well as evaluating the overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the prior year's consolidated financial statements, the balances of which are presented for comparative purposes, reference should be made to our auditors' report issued on April 3, 2008.

3. In our opinion, the consolidated financial statements present fairly the financial position of IFIL Group as of December 31, 2008 and the results of its operations and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of national regulations issued pursuant to art. 9 of Italian Legislative Decree n. 38/2005.

4. For a better understanding of the consolidated financial statements, attention is drawn to the following information:

   (a) On March 1, 2009, became effective the merger by incorporation of IFIL Investments S.p.A. in the parent company IFI - Istituto Finanziario Industriale S.p.A., which changed its name to EXOR S.p.A. Following the incorporation, the consolidated financial statements of the IFIL Group as of December 31, 2008 were prepared by the Directors of EXOR S.p.A.

   (b) IFIL Group, pending possible amendments to IAS 27 proposed in the Exposure Draft ED 10 "Consolidated Financial Statements", that should definitively clarify the criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, has continued to exclude the Fiat Group, in which the subsidiary IFIL Investments S.p.A. had a 30.45% holding of ordinary capital stock, from line-by-line consolidation, consistently with the method followed for the first-time adoption of IFRS and the preparation of the consolidated financial statements at December 31, 2005 and thereafter. However, in note 42 to the consolidated financial statements are presented the pro-forma consolidated financial data prepared consolidating line-by-line the Fiat Group.

5. The Directors of EXOR S.p.A. are responsible for the preparation of the report on operations in accordance with the applicable laws and regulations. Our responsibility is to express an opinion on the consistency of the report on operations with the financial statements, as required by art. 156, paragraph 4-bis, letter d), of the Legislative Decree n. 58/98. For this purpose, we have performed the procedures required under Auditing Standard n. 001 issued by the Italian Accounting Profession and recommended by CONSOB. In our opinion the report on operations is consistent with the consolidated financial statements of the IFIL Group as of December 31, 2008.

IFIL BOARD OF STATUTORY AUDITORS' REPORT ON ACTIVITIES CONDUCTED IN 2008

Stockholders,

Since, as a result of the imminent conclusion of the process leading to the incorporation of IFIL in IFI – which will assume the name of EXOR S.p.A. -, we will no longer be in office at the date of the annual stockholders' meeting of the latter, we refer, pursuant to art. 153 of the Legislative Decree 58 dated February 24, 1998, to the work performed and to any censurable omissions and events which came to light during 2008.

We have participated in the meetings of the board of directors, during which we were informed about the activities and the main operating, financial and balance sheet transactions completed or being undertaken by the company and its subsidiaries. We have obtained assurance that the transactions which the company has approved and undertaken were in compliance with the law and with the company's bylaws, were not in contrast to the resolutions passed by the stockholders' meeting or in conflict of interest and were based upon the principles of good administration.

In the meetings with those in charge of the corporate functions, with the manager responsible for the preparation of the financial reports and with the representatives of Deloitte & Touche S.p.A., we have obtained information as to the company's compliance with the principles of diligent and proper administrative management; from the exchange of information with the auditors, no significant facts or situations came to our attention which necessitated the performance of further controls on our part which we should report to you.

As for our responsibilities and in view of the activities conducted, we have concluded that the company's organizational structure and the internal control system appear adequate in the sense that the internal control system has the task of verifying that the internal operating and administrative procedures are being followed, with such procedures having been adopted for the purpose of ensuring a correct and efficient management, as well as identifying, preventing and managing, where possible, risks of a financial and operating nature and any misrepresentation to the detriment of the company.

Based on what we have ascertained and verified, we have concluded that the administrative and accounting system was capable of representing correctly the company's affairs; we would like to remind you that IFIL had adopted the Model of corporate administrative and accounting control conforming to the contents of art. 154-bis of Legislative Decree 58/98.

With regard to the requirements of art. 114, the directives imparted to the subsidiaries appear to us to be appropriate.

During the stockholders' meeting held on May 13, 2008, the stockholder Marco Bava made a request, under art. 2408 of the Italian Civil Code, to examine everything that has to do with related party transactions; we examined, during our periodical visits, the transactions with group companies and related parties presented to us, ascertaining that the principles and criteria prescribed in this respect have been applied on a continual basis.

With reference to the other matters identified by CONSOB, we observe the following:

- we have been regularly informed of matters falling under our jurisdiction;
- the periodic verifications and the tests to which we have subjected the company have not brought to light any atypical or unusual transactions;
- we have not noted censurable events;
- we have not received nor had notice of any complaints and petitions;
- we have attended ten meetings of the board of directors – and the previous statutory auditors attended the one meeting of the executive committee, that was not subsequently

formed after the renewal of the board of directors – and held nine meetings, three of which were attended by representatives of the audit firm;

- we checked that the company continued to comply with the model of corporate governance described in the Code of Self-discipline and, therefore, also adopted the principles and rules of corporate governance conforming to it, although explaining, in past years, the variation with certain aspects of it;
- we were informed by Deloitte & Touche S.p.A. that, in 2008, in addition to the engagement for the audit of the separate and consolidated financial statements and limited review of the half-year financial statements – for a total fee of Euro 72,000, for a total of 925 hours, excluding the fees and the hours referring to the same work performed in the subsidiaries, whose engagements were conferred separately by them -, it has carried out the following activities:
  - verification relating to the confirmation of the amount of the Financial Ratio, established in the Information Memorandum dated June 6, 2006, relating to the issue by IFIL of “Floating Rate Notes due 2011” for Euro 200 million, for a fee of Euro 5,000;
  - limited audit of the balance sheet position of IFIL Investments S.p.A. at June 30, 2008, prepared in accordance with art. 2501-quater of the Italian Civil Code and drawn up in conformity with the applicable International Financial Reporting Standard (IAS 34 – Interim Reporting), for a fee of Euro 2,000;
  - performance of specific agreed procedures with regard to the verification of the completeness and the correct disclosure content of the half-year Reporting Package of the IFIL Group and the updating, addition and review, where necessary, of the notes to the half-year consolidated financial statements of the IFIL Group, prepared in accordance with International Financial Reporting Standards and in particular in conformity with IAS 34 – Interim Reporting, for a fee of Euro 13,000;

- we did not note engagements conferred during the year to parties related to Deloitte & Touche S.p.A..

We would like to remind you that the draft separate financial statements of IFIL S.p.A. and the consolidated financial statements of IFIL Group will have to be approved by the board of directors of EXOR S.p.A. which will meet on March 25; the next EXOR S.p.A. stockholders' meeting, therefore, will also be called to approve the draft separate financial statements of IFIL S.p.A..

February 19, 2009

THE BOARD OF STATUTORY AUDITORS

Eugenio Colucci

Lionello Jona Celesia

Paolo Piccatti

ADDENDUM TO THE IFIL BOARD OF STATUTORY AUDITORS' REPORT ON ACTIVITIES CONDUCTED IN 2008

During the course of the stockholders' meeting held on December 1, 2008, the stockholder Pier Luigi Zola asked the board, pursuant to art. 2408 of the Italian Civil Code, although discussed in the Rules of Stockholders' Meetings and the Bylaws, to examine the application of the limit indicated therein for remarks during meetings, deeming it to be too strict, asking that it be checked to see whether this was the case in similar previous meetings of IFI.

The undersigned Eugenio Colucci, Lionello Jona Celesia and Paolo Piccatti, statutory auditors of the merged company IFIL at the time of the above stockholders' meeting, duly integrate their report IFIL board of statutory auditors' report on activities conducted in 2008 which, by sheer error, had omitted this matter, and observes the following.

The Italian Civil Code assigns the chairman of the stockholders' meeting the task of governing the conduct of the meeting and the rule adopted for the time limit for remarks – clear, concise and strictly related to the matter at hand –, to invite all those who do not adhere to what has been decided to conclude their remarks in a short period of time, and, finally, to ask such persons to sit down.

As for our responsibilities, the chairman, in our opinion, exercised the duties and powers assigned to him in accordance with what is described in the law and in the rules, using reasonable criteria, in compliance with the practice in use in the stockholders' meeting of other listed companies.

April 6, 2009

THE BOARD OF STATUTORY AUDITORS

Eugenio Colucci

Lionello Jona Celesia

Paolo Piccatti

List of IFIL Group Companies at December 31, 2008

Board of Statutory Auditors

Chairman	Lionello Jona Celesia
Standing Auditors	Giorgio Ferrino (d) Paolo Piccatti (d)
Alternate Auditors	Fabrizio Mosca (d) Lucio Pasquini (d)

Independent Auditors

Deloitte & Touche S.p.A.

(a) Appointed by the ordinary session of the stockholders' meeting held on December 1, 2008, with effect from March 1, 2009 (the effective date of the merger by incorporation of IFIL Investments S.p.A.).

(b) Appointments made by the board of directors' meeting held on March 2, 2009.

(c) Committees established by the board of directors' meeting on March 2, 2009.

(d) Appointed by the ordinary session of the stockholders' meeting held on December 1, 2008, after the standing auditors Gianluca Ferrero and Giorgio Giorgi left their positions on May 15, 2008.

Expiry of the terms of office

The terms of office of the board of directors and the board of statutory auditors will expire concurrently with the stockholders' meeting that will be held to approve the financial statements for the year ending December 31, 2008.

The appointment of the independent auditors will expire concurrently with the stockholders' meeting that will be held to approve the financial statements for the year ending December 31, 2011.

MESSAGE FROM THE CHAIRMAN

To the stockholders,

The year 2008 will certainly be remembered as one of the most important chapters in our history: in a scenario marked by exceptional market conditions, we in fact carried out the merger between IFI and IFIL which, in the early months of this year, became reality with the birth of EXOR.

EXOR takes the name of a subsidiary controlled by Giovanni Agnelli e C. which made many successful investments both in and out of Europe: our wish is that it can do the same in the future, by making the most of the experience of IFI and IFIL, two companies which have contributed to writing the story of almost a hundred years of Italian entrepreneurial vision.

John Elkann

EXOR GROUP PROFILE

EXOR S.p.A. is the new corporate name that IFI – Istituto Finanziario Industriale S.p.A. – assumed on March 1, 2009, the effective date of the deed of merger by incorporation of the subsidiary IFIL S.p.A., signed on February 20, 2009.

EXOR is the sum of experience gained in over a century of investments. It is one of Europe's leading investment companies and is controlled by Giovanni Agnelli e C. S.a.p.az. which holds 59.1% of ordinary capital stock, 39.24% of preferred capital stock and 8.09% of savings capital stock.

Listed on the Italian Stock Exchange (with effect from March 2, 2009, all classes of EXOR shares are traded on the Electronic Share Market), it has a Net Asset Value of approximately € 3.6 billion. EXOR is headquartered in Turin, Corso Matteotti 26, and has offices in New York and Hong Kong.

EXOR is the majority stockholder of the Fiat Group. Balancing risks and expected returns, it invests for the medium- to long-term in various sectors, mainly in Europe, the United States and in the two main emerging markets of China and India.

EXOR places financial resources, experience and the talent of its professionals at the companies' disposal to formulate their long-term strategies and plans.

The following are the main investments which, as a result of the merger of IFIL, are now directly in EXOR's portfolio.

Fiat S.p.A. (about 30% of ordinary and preferred capital stock) is listed on the Electronic Share Market of the Italian Stock Exchange (Blue Chip segment). Founded in 1899, the Fiat Group operates in the sectors of automobiles (Fiat, Lancia, Alfa Romeo, Abarth, Ferrari, Maserati and Fiat Veicoli Commerciali), agricultural and construction equipment (Case and New Holland), trucks and commercial vehicles, buses and special-purpose vehicles (Iveco, Irisbus, Astra and Magirus) and components and production systems (Fiat Powertrain Technologies, Magneti Marelli, Teksid and Comau); it is also active in publishing and communications (La Stampa and Publikompass). Other sectors also offer financial services to the sales networks and the clientele in addition to rental services to customers.

SGS S.A. (15% stake of capital stock) is a Swiss company listed on the Virt-x market. Founded in 1878, the company is today the global leader in verification, inspection, control and certification activities with 55,000 employees and a network of more than 1,000 offices and laboratories throughout the world.

Cushman & Wakefield (71.81% of capital stock) is the largest privately held company for real estate services. The C&W Group has its headquarters in New York, where it was founded in 1917, and now has 227 offices and 15,000 employees in 59 countries.

Intesa Sanpaolo S.p.A. (1% of ordinary capital stock) is listed on the Electronic Share Market of the Italian Stock Exchange (Blue Chip segment). It is one of the most important banking groups in Europe and is the foremost bank in Italy with an approximate 20% market share on average in all segments of business (retail, corporate and wealth management).

Alpitour S.p.A. (100% of capital stock) is the largest integrated group in the tourist sector in Italy. It operates with 3,500 employees and has more than 2.4 million customers across all areas of the tourism business: Tour Operating (Alpitour, Francorosso, Viaggidea, Villaggi Bravo, Volando and Karambola), Hotels (Alpitour World Hotel & Resorts), Incoming (Jumbo Tours), Aviation (Neos), Distribution (Welcome Travel Group) and Incentive & Eventi (A World of Events).

Gruppo Banca Leonardo S.p.A. (9.76% of capital stock) is a privately held and independent investment bank offering a complete range of services in investment banking, wealth management, private equity and other activities connected with the financial markets.

Juventus Football Club S.p.A. (60% of capital stock) is listed on the Electronic Share Market of the Italian Stock Exchange (Star segment). Founded in 1897, it is one of the most prominent professional soccer teams in the world.

Vision Investment Management Limited, founded in 2000, is one of the most important hedge fund managers specialized in Asian markets.
Five-year bonds issued by Perfect Vision were subscribed to in April 2008. The bonds give mandatory conversion into shares at maturity which will deliver a 40% stake in Vision Investment Management.

Sequana S.A. (26.65% of capital stock) is a diversified French paper group, listed on the Euronext market with production and distribution activities operating through:

- **Arjowiggins S.A.** (100% holding), the world leader in the manufacture of high value-added paper products, with 7,300 employees in 82 countries;
- **Antalis S.A.** (100% holding), the leading European group in the distribution of paper and packaging products, with over 7,900 employees in 55 countries.

Banijay Holding S.A.S. (17.17% of capital stock with voting rights) is headquartered in Paris. The company is a new player in European TV production with a strategy aimed at rapid external growth through the acquisition of companies specialized in the production of TV formats and content for distribution via TV, Internet and mobile phones.

The following chart is updated to mid-March 2009 and presents the main business segments in which the EXOR Group holds investments. Percentage holdings refer to ordinary capital stock.

(a) EXOR also holds 30.09% of Fiat preferred capital stock.
(b) Post-conversion of convertible bonds.
(c) Percentage interest held in the NoCo A LP limited partnership.

Main operating and financial data

EXOR Group – Synthesized consolidated data (a) € in millions	**2008**	2007	Change
Profit (loss) attributable to the equity holders of the parent	**301.8**	444.3	(142.5)

Investments and other financial assets	**5,288.7**	6,748.8	(1,460.1)
Equity attributable to the equity holders of the parent	**3,615.6**	4,160.5	(544.9)
Consolidated net financial position of EXOR "Holdings System"	**(11.5)**	(497.2)	485.7

(a) The basis of preparation is presented in the following section "Review of the synthesized consolidated results".

Earnings per share (€) (a)	**2008**	2007	Change
Profit attributable to the equity holders of the parent – basic:			
- ordinary shares	**1.83**	2.79	(0.96)
- preferred shares	**1.88**	2.84	(0.96)
- savings shares	**1.97**	n.a.	n.a.
Profit attributable to the equity holders of the parent – diluted:			
- ordinary shares	**1.81**	n.a.	n.a.
- preferred shares	**1.86**	n.a.	n.a.
- savings shares	**1.95**	n.a.	n.a.
Equity attributable to the equity holders of the parent	**22.62**	26.35	(3.73)

(a) Calculated on shares outstanding at December 31, 2008; details of the calculation are in Note 18 to the consolidated financial statements.

EXOR S.p.A. – Separate financial statement data € in millions	**2008**	2007	Change
Profit	**49.1**	54.5	(5.4)
Equity	**1,889.5**	1,846.8	42.7
Net financial position	**(369.9)**	(392.7)	22.8

The company has not distributed dividends from the profit for the year ended December 31, 2007.

The board of directors' meeting held on March 25, 2009 put forward a motion to the ordinary session of the stockholders' meeting called to approve the separate financial statements for the year ended December 31, 2008 for the distribution of the following dividends:

	Number of shares	**Dividends proposed**	
Class of stock	**outstanding (a)**	**Per share (€)**	**Total (€ ml)**
Ordinary	160,259,496	0.3190	51.1
Preferred	71,441,160	0.3707	26.5
Savings	9,168,894	0.4580	4.2
			81.8

(a) At March 25, 2009.

Net Asset Value

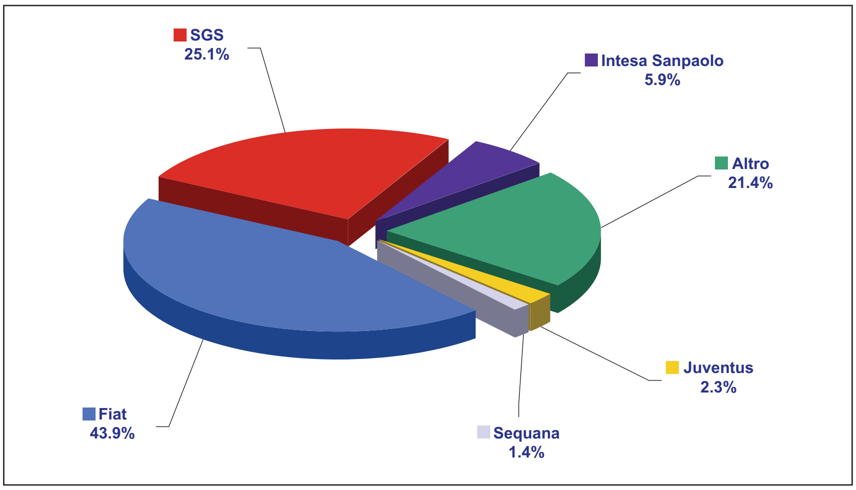
The Net Asset Value is equal to € 3,623.8 million. The composition is as follows:

€ in millions	
Current value of the investment portfolio	3,635.3
Consolidated net financial position – EXOR Holdings System at December 31, 2008	(11.5)
Total	**3,623.8**

The current value of the investment portfolio is calculated by valuing the listed investments (Fiat, Sequana, Intesa Sanpaolo, SGS and Juventus) at the stock market closing prices as of March 20, 2009; unlisted other equity investments and other investments are valued at the fair value determined by independent experts.

NAV is presented with the aim of aiding Analysts and Investors in forming their own assessments.

Investment portfolio at current values



Financial Communications and Investor Relations

Again in 2008, IFIL continued to provide information to investors, financial analysts, as well as the national and international financial Press.

In the second half of the year, special attention was devoted to matters in connection with the merger by incorporation of the subsidiary IFIL so that an in-depth examination could be made of the operation as well as every corporate and financial detail.

In correspondence with the effectiveness of the merger and the name change of the surviving company, a new website was also designed: www.exor.com.
The new website, in both Italian and English, provides information on EXOR, its holdings and corporate governance and gives easy access to all the pertinent facts and figures about IFI and IFIL over the last few years.

CORPORATE GOVERNANCE

On March 1, 2009, the merger by incorporation of the subsidiary IFIL S.p.A. in IFI S.p.A. became effective and on the same date IFI S.p.A. changed its name to EXOR S.p.A.

Prior to that date, IFI had not adopted a Code of Self-discipline for Listed Companies owing to its particular capital structure (the ordinary shares were not listed and were wholly owned by Giovanni Agnelli e C. S.a.p.az.).

As from the date of March 2, 2009, EXOR has adopted a Corporate Governance that is basically the same as the one that IFIL had previously.

In its meeting held on March 25, 2009, the EXOR S.p.A. board of directors approved, among other things, the "Report on Corporate Governance, the Code of Conduct and the stockholder structure" prepared in accordance with art. 89-bis of the Consob Regulation for Issuers and art. IA.2.6 of the Instructions to the Market Rules.

In view of the fact that the merger is now effective, the Report is composed of three sections: the First Section describes the Corporate Governance, the adoption of the codes of ethics and the EXOR stockholder structure as of the date of the Report; the Second Section describes the Corporate Governance, the adoption of the codes of ethics and the stockholder structure of the surviving company IFI during 2008; the Third Section describes the Corporate Governance, the adoption of the codes of ethics and the stockholder structure of the merged company IFIL during 2008. The Report also contains information relating to Direction and Coordination activities.

The Report is available on the website www.exor.com.

MAIN RISKS AND UNCERTAINTIES TO WHICH EXOR S.p.A. AND COMPANIES IN CONSOLIDATION ARE EXPOSED

Risks associated with general economic conditions

EXOR's earnings and financial position and those of its main subsidiaries are influenced by various macro-economic factors – including increases or decreases in gross national product, the level of consumer and business confidence, changes in interest rates on consumer loans, the cost of raw materials and the rate of unemployment – existing in the various countries in which they operate. During 2008, and particularly in the last quarter, the financial markets were affected by high levels of volatility with significant impacts on many financial institutions and, more generally, on the overall performance of the economy. The significant and widespread deterioration of trading conditions has been compounded by a severe tightening of credit in all major markets, both at the consumer and corporate level, and has begun to create a shortage of liquidity which will ultimately impact the industrial development of the sectors in which EXOR operates and its main holdings.

A growing weakening in the general condition of the economy and in the industries in which the main holdings operate combined with a progressive deterioration of financial markets and a contraction in consumers' available income are reflected, particularly since the third quarter of 2008, in a significant decline in demand in EXOR's key markets.

There can be no certainty that measures taken by governments and financial authorities in response to this situation will succeed in re-establishing the conditions necessary to overcome this situation in a reasonable time. Therefore, uncertainty remains as to the period of time necessary to restore normal trading conditions and many countries are aware that their economies could undergo a severe and protracted recession.

Should the current weakness and uncertainty continue for a sufficiently long period, EXOR's business, strategy and future prospects and those of its main subsidiaries could be negatively affected with consequent negative impacts on its earnings and financial position.

Risks associated with EXOR's activities

EXOR conducts investment activities which involve normal risks such as high exposure to certain sectors or investments, difficulties in identifying new investment opportunities that meet the characteristics of the company's objectives or difficulties in disposing of investments owing to changes in general economic conditions. The potential difficulties connected with making new investments such as unexpected costs or liabilities could have an adverse effect on the company's earnings and financial position.

The ability to access capital markets or other forms of financing and the related costs are dependent, among other things, on the company's credit rating.
Any downgrade by the rating agencies could limit the company's ability to access capital markets and increase the cost of capital, with a consequent adverse effect on its earnings and financial position.
On September 9, 2008, following the announcement of the guidelines for the merger by incorporation of the subsidiary IFIL in IFI, now EXOR, the Standard & Poor's rating agency stated that IFIL's rating and outlook (BBB+/Stable/A-2) remained unchanged and that, when the merger was finalized, it expected to assign EXOR the same ratings.

EXOR's policy and that of the companies in the “Holdings System” is to keep liquidity in demand or short-term deposits and readily negotiable money market instruments and bonds, allocating such investments over an appropriate number of counterparts, with the principal purpose of having investments which can readily be convertible into cash.
The counterparts are chosen according to their creditworthiness and reliability.
However, in consideration of the current financial crisis, market conditions which might negatively affect the normal operations of financial transactions cannot be excluded.

EXOR's earnings not only depend on the market value of its main holdings but also on the dividends they pay and, in the end, reflect their earnings and financial performance and investment and dividend payment policies. A deterioration in the financial market condition and the earnings of the main holdings could affect EXOR's earnings and cash flows.

EXOR mainly operates through its investments in subsidiaries and associates in the motor vehicle market (Fiat Group), in real estate services (C&W Group), in paper (Sequana Group), in tourism (Alpitour Group) and in professional soccer (Juventus F.C.). As a result, EXOR is exposed to the typical risks of the markets and industries in which such holdings operate.

In March 2009, the investment in Fiat (equal to 30.45% of ordinary capital stock and 30.09% of preferred capital stock) represented more than approximately 40% of the current value of EXOR's investment portfolio, calculated on the basis of the Net Asset Value (NAV) described on page 8.
Therefore, the performance of the Fiat Group has a very significant impact on EXOR's earnings and financial position.

EXOR and its subsidiaries and associates are exposed to fluctuations in currency and interest rates and use financial hedging instruments, compatible with the risk management policies adopted by each of them. Despite these hedging transactions, sudden fluctuations in current or interest rates could have an adverse effect on EXOR's earnings and financial position.
The subsidiaries and associates are generally exposed to credit risk which is managed by specific operating procedures. Given its activities, EXOR is not significantly exposed to such risk.

EXOR and its subsidiaries and associates are exposed to risks connected with the outcome of pending litigation for which it sets aside, where necessary, specific risk provisions. However, negative effects on the earnings and financial position of EXOR and/or its subsidiaries and associates connected with such risks cannot be excluded.

The following paragraphs indicate the main specific risks and uncertainties of the companies in consolidation (Cushman & Wakefield Group, Alpitour Group and Juventus F.C.).

Cushman & Wakefield Group (C&W)

The operations of the C&W Group are directly influenced by the general economic scenario and the international and local real estate business and the political situations in the countries in which it operates.
The economic factors which influence operations are the general economic situation, employment levels, interest rates, access to credit to fund transactions and the effects of tax and regulatory policies. Economic recession, increases in interest rates or declines in demand in the real estate sector could have a negative effect on the earnings and financial position of the C&W Group. These adverse conditions would also affect commission fees, which vary in relation to the revenues of the C&W Group. Brokers, in fact, are generally paid on the basis of commissions and compensation correlated to the group's revenues. Consequently, a negative effect on operating margins due to the deterioration of market conditions is partly offset by such a correlation.
During 2008, the earnings of the C&W Group were adversely affected by a weak economy, a decline in confidence by operators and by a continuing worsening of the credit market. Deeming that such negative economic trend will continue into 2009, the C&W Group has initiated a series of measures to eliminate inefficiencies and bring structure costs in line with the current operating situation. Such measures, combined with investments to purchase new market share and talent, will put the C&W Group in a good position when the markets regain vigor.

Management of the C&W Group intends to continue its strategy to diversity by type of service and geography in order to reduce its exposure to the variability of the results of individual factors.

Alpitour Group

The trend in demand for tourism packages is always acutely affected by outside factors such as political risks (conflicts, institutional changes, unilateral acts of government and terrorism), natural disasters and the international economic situation.

The international political situation, especially in situations of war and terrorism threats, could bring about a contraction in the demand for the services offered by the Alpitour Group. Areas located in countries under development or plagued by unstable political and social instability, for example in Kenya, Zanzibar, Madagascar, Egypt and the Middle East, are clearly more exposed to this type of risk.

Another risk factor is caused by the ravages of weather such as tsunamis, hurricanes and earthquakes which could cause a sharp decline in the demand for tourism services to the destinations hit.

In the past, the Alpitour Group has had to confront some of those risks (tsunamis, terrorist attacks, international political and economic crises) which produced a contraction in tourist flows to certain destinations and imposed a temporary closing on others. On those occasions, the Alpitour Group embarked on a series of corrective actions aimed at the diversification of the product portfolio, redirection of clients to new destinations, re-contracting with local suppliers and promotional sales campaigns. These actions, having had an impact on costs, negatively and temporarily affected profitability, without prejudicing Alpitour Group's financial soundness.

The Alpitour Group mostly operates with Italian clientele in that the product offered features qualitative standards that mirror the expectations and requirements of Italian demand. Therefore, the business is strongly influenced by domestic economic conditions and the highly season nature of activities which means that the majority of revenues is concentrated in the summer season.

The normal activities of the Alpitour Group use services provided by third parties, mainly suppliers of air and hotel services and travel agencies whether individual or part of networks. The risk that such services will not be rendered efficiently and without interruption could compromise the earnings of the Alpitour Group and damage its image.
Through its vertical integration, the presence of all the links in the tourism chain, the diversification of key suppliers and the specific sales policies geared to sustaining demand in the low season, the Alpitour Group has laid the groundwork for managing and minimizing such risks.

The tourism sector is strongly anchored to information technology processes which cover the entire business cycle starting from the booking system. The risk of the interruption, even temporarily, of information systems could cause difficulties in operations and supplying services to clients.

By continually updating and providing maintenance to its systems and designing specific disaster recovery plans, as well as writing commercial contracts with leading suppliers of substitute technologies, the Alpitour Group has undertaken the actions necessary to monitor and meet such risks.

Juventus F.C.

In the short term, the earnings and financial position of Juventus F.C. should not be significantly influenced by the current economic crisis since the principal revenue items are for the most part generated by existing multi-year contracts. However, if the weak and uncertain situation continues, the activities, strategies and prospects of the company could be negatively affected especially by the radio and TV rights market (for which the National Professional League is in the process of defining and approving the guidelines which will orient sales at a centralized level assisted by the Infront advisor), sponsorships (renewal of the most important sponsorship) and relative expected revenues from the new stadium project.

Juventus F.C. uses players' registration rights as its main productive factor. Sports activities are subject to risks connected with the physical condition of the players so that any injuries at any point in time could significantly affect the earnings and financial position of Juventus F.C..
Moreover, since activities are centered around the exploitation of the brand and the image of Juventus F.C., events that could reduce their commercial value could have an adverse effect on earnings at any time.
Sports results are also influenced by participation in the different sports events, particularly the UEFA Champions League, therefore not qualifying would have a negative effect on the Juventus F.C.'s earnings plans.
Lastly, Juventus F.C. has an intangible asset with an indefinite useful life (Library). Its ability to produce earnings could be negatively affected by the economic situation and require an impairment adjustment to be recognized in the financial statements.

Fiat Group

The investment in the Fiat Group is accounted for in the EXOR Group's consolidated financial statements by the equity method (please refer to Notes 5 and 42 to the consolidated financial statements for this purpose). Therefore, the Fiat Group is not included among the companies in consolidation.

Nevertheless, to complete the information presented in this section, the 2008 Report on Operations of the Fiat Group expounded on the exposure to risks in connection with the following:

- general economic conditions
- results of the group
- financing requirements
- group's credit ratings
- fluctuations in currency and interest rates
- policy of targeted industrial alliances
- relationships with employees and suppliers
- management
- high level of competitiveness in the sectors in which the group operates
- sales in international markets and exposure to changes in local conditions
- environmental regulation

Additional information is provided in the 2008 Report on Operations of the Fiat Group, to which reference can be made, which is also available on the website www.fiatgroup.com.

MAJOR EVENTS IN 2008 AND IN THE FIRST QUARTER OF 2009

Increase of the investment in IFIL

During the first quarter of 2008, IFI purchased on the market 2,950,000 IFIL ordinary shares (0.29% of the class of stock) for an investment of € 16.2 million.

At December 31, 2008, IFI held 726,900,000 IFIL ordinary shares, equal to 69.99% of the class of stock, and 1,866,420 IFIL savings shares, equal to 4.99% of the class of stock. The investment represents 67.73% of total capital stock.

Resolutions passed by the ordinary and special sessions of the IFI stockholders' meeting held on May 14, 2008

On May 14, 2008, the stockholders' meeting approved the separate financial statements at December 31, 2007 and the motion for the appropriation of profit of € 54.5 million to the extraordinary reserve, without distributing dividends and, also:

- the renewal of the authorization for the purchase and disposal of treasury stock for 18 months from the date of the resolution passed by the stockholders' meeting, up to a maximum of 16 million ordinary and/or preferred shares for a maximum disbursement of € 200 million;
- the renewal of the five-year mandate pursuant to article 2443 of the Italian Civil Code to increase capital stock, at one or more times, up to a maximum of € 561.75 million.

End of the term of office of the statutory auditors Gianluca Ferrero and Giorgio Giorgi

Following the appointment of Gianluca Ferrero to the board of general partners of the parent Giovanni Agnelli e C. S.a.p.az., on May 15, 2008, the chairman of the board of statutory auditors, Gianluca Ferrero, and the standing auditor, Giorgio Giorgi, vacated their posts pursuant to art. 148, paragraph 3 of Legislative Decree 58/1998 (for reasons of incompatibility). Accordingly, pursuant to and as a consequence of art. 2401 of the Italian Civil Code, Giorgio Ferrino and Paolo Piccatti, who were already alternate auditors, took over the positions of standing auditors, and Lionello Jona Celesia, who was already a standing auditor, took over as chairman.

Loan from the subsidiary IFIL

On October 10, 2008 IFIL granted IFI a loan of up to a maximum of € 200 million. The loan will earn interest based on the 1-month Euribor with a spread of 0.1%.

Since this is a transaction between related parties, as provided in the rules of Corporate Governance of the two companies, the transaction was approved beforehand by the respective boards of directors on October 10, 2008.

At December 31, 2008, the loan payable to the subsidiary IFIL amounted to € 199.5 million, including accrued interest.

Merger by incorporation of the subsidiary IFIL in IFI

In line with the announcement to the market in the press releases on September 8, and September 10, 2008, the boards of directors of IFI and IFIL on September 23, 2008 unanimously approved the Merger Project for the incorporation of the subsidiary IFIL in IFI, confirming the exchange ratios approved in the merger guidelines on September 8 which called for (settlements in cash are not envisaged):

- 0.265 of a new IFI ordinary share of par value € 1 each for 1 IFIL ordinary share of par value € 1 each;
- 0.265 of a new IFI savings share of par value € 1 each for 1 IFIL savings share of par value € 1 each.

The boards of directors were assisted by their respective financial advisors, Leonardo & Co. for IFI and Goldman Sachs International for IFIL, which issued fairness opinions on the fairness of the exchange ratios from a financial standpoint and issued documents on the valuation.

As established by existing law, the experts appointed pursuant to art. 2501-sexies of the Italian Civil Code, that is, the audit firms of Reconta Ernst & Young S.p.A. for IFIL and KPMG S.p.A. for IFI, both assigned by the Turin Court on September 17, 2008, issued their reports on the fairness of the exchange ratios on October 28, 2008.

On October 28, 2008, the extraordinary sessions of the stockholders' meetings of IFIL and IFI were convened for December 1, 2008 to resolve on the merger and documentation relating to the merger was filed at the corporate headquarters and at Borsa Italiana S.p.A. which includes:

- the Merger Project;
- the descriptive Reports of the boards of directors of IFIL and IFI, prepared in accordance with art. 2501-quinquies of the Italian Civil Code;
- the Reports of the Experts on the fairness of the share exchange ratio, prepared in accordance with art. 2501-sexies of the Italian Civil Code by Reconta Ernst & Young S.p.A. (for IFIL) and KPMG S.p.A. (for IFI).

On November 21, 2008, the Information Document relating to the transaction, prepared in accordance with article 70, paragraph 4 and article 71-bis of Consob Regulation 11971, was made available to the public.

The extraordinary session of the stockholders' meeting of IFI, which met on December 1, 2008, approved the Merger Project and, consequently, approved a capital increase to service the merger for a maximum nominal amount of € 82,978,443 by issuing a maximum of 73,809,549 ordinary shares and a maximum of 9,168,894 savings shares of par value € 1 each with dividend rights equal to those of the stock outstanding at the date of the effectiveness of the Merger.

The extraordinary session of the stockholders' meeting of IFI also approved, with effect from the date the merger became effective, the new text of the bylaws which provides, among other things, for the company's name to be changed to "EXOR S.p.A.", the elimination of the restrictions on the transfer of ordinary shares, the provisions regarding representation in stockholders' meetings following the listing of the ordinary shares, the increase in the maximum number of members of the board of directors to 19 and the change in the term of office of the same, the reduction in the amount of profit appropriated to the legal reserve to 5% and the elimination of the provision relating to the share of profits (1%) at the disposition of the board of directors for distribution among its members, as well as the changes required as a consequence of the issue on the part of the surviving company of savings shares having the same characteristics as IFIL savings shares (with a change in the savings shares' rights to the assets in relation to the exchange ratio).

The ordinary sessions of IFI stockholders' meetings held on December 1, 2008 also approved:

- the request for admission to listing of ordinary and savings shares of the surviving company (the merger was subordinate to this admission);
- the appointment, with effect from the effective date of the merger, of the following new directors: Carlo Sant'Albano, current CEO of IFIL, and the independent directors, Antonio Maria Marocco, Giuseppe Recchi and Claudio Saracco, current directors of IFIL;
- the confirmation of Giorgio Ferrino and Paolo Piccatti as standing auditors and Lionello Jona Celesia as chairman of the board of statutory auditors, as well as the appointment of the alternate auditors in the persons of Fabrizio Mosca and Lucio Pasquini;
- the revocation, with effect from the effective date of the merger, of the authorization for the purchase of treasury stock approved by the ordinary session of the stockholders' meeting held on May 14, 2008, for the unused portion;
- the authorization for the purchase, also through the subsidiaries, of ordinary and/or preferred and/or savings treasury stock of par value € 1 up to a maximum of 16 million shares and for a period of 18 months from the date of the resolution by the stockholders' meeting, fixing an amount of € 200 million for this purpose; the disposal of treasury stock in every manner was also authorized.
  This refers to the extension, to the savings shares, of the authorizing resolution of May 2008 which was approved for the same quantity and maximum theoretical equivalent amount. Afterwards, a program for the purchase of treasury stock will be established for the three classes of stock with the aim of also servicing the current IFIL stock option plan which will continue under EXOR.

On December 2, 2008, the special session of the IFI preferred stockholders' meeting convened by the common representative Mr Luigi Santa Maria was held and approved the resolution for the merger by incorporation of IFIL in IFI which had been approved in the special session of the IFI stockholders' meeting held on December 1, 2008.

The extraordinary session of the IFIL stockholders' meeting approved the Merger Project on December 1, 2008.

On February 16, 2009, Borsa Italiana S.p.A. issued the order to admit the EXOR ordinary and savings shares to trading on the Electronic Share Market.

On February 19, 2009, Consob issued the declaration of equivalence as set forth in art. 57, paragraphs 1, letter d), 1-ter and 1-quater of the Regulation for Issuers; on February 20, 2009, updates were made available on the merger Information Document prepared in accordance with articles 70, paragraph 4 and 71-bis of the Regulation for Issuers, published on November 21, 2008. The updated Information Document can also be accessed on the website www.exor.com.

On February 20, 2009, the deed of merger was signed before the notary public Ettore Morone. The deed establishes that the merger will be effective for legal purposes, pursuant to art. 2504-bis, paragraph 2 of the Italian Civil Code, from March 1, 2009 and the transactions carried out by IFIL in the early months of 2009 will be recorded in the EXOR financial statements, also for tax purposes, pursuant to art. 172, paragraph 9 of D.P.R. 917/96, starting from January 1, 2009.

The registration of the deed of merger in the Companies Register of Turin occurred on February 24, 2009.

The three categories of EXOR shares (ordinary, preferred and savings) have been listed on the Electronic Share Market under the denomination EXOR since March 2, 2009 (the first day of trading subsequent to March 1, 2009, closing day of the Stock Exchange, the effective date of the merger). The IFIL ordinary and savings shares were removed from trading on the Electronic Share Market beginning March 2, 2009.

In order to exactly divide the IFIL ordinary and savings shares to be exchanged for the exchange ratio, in 2009 IFI purchased 119 IFIL ordinary shares. Therefore, 73,809,496 ordinary shares and 9,168,894 savings shares of par value € 1 with dividend rights from January 1, 2009 were issued to service the exchange.
EXOR's capital stock post-merger is therefore equal to € 246,229,850 subdivided in 160,259,496 ordinary shares and 76,801,460 preferred shares and 9,168,894 non-convertible savings shares of par value € 1 each.

The capital increase was recorded at the fair value of the 73,809,496 ordinary shares and 9,168,894 savings shares issued, respectively equal to € 5.36 and € 3.86 corresponding to the opening trade price on March 2, 2009, the first date of trading of those same shares on the Stock Exchange. The total amount of € 431 million includes € 83 million corresponding to par value, recorded in capital stock, and € 348 million recognized in additional paid-in capital.

The total expenses for the operation incurred by IFIL and IFI in 2008 and 2009 currently amount to approximately € 17 million; such expenses have been recorded as a deduction from additional paid-in capital.

For additional information on the Merger, please refer to the Information Document on the Merger and updates to that same document on the website www.exor.com.

Proceedings relative to the contents of the press releases issued by IFIL and Giovanni Agnelli e C. on August 24, 2005

On February 21, 2006, Consob notified Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone as well as IFIL and Giovanni Agnelli e C. of its objections in respect of the start of a sanctionary proceeding under art. 187-septies of the Consolidated Law on Finance under the assumption that each of those individuals violated art. 187-ter, paragraph 1 (Market Manipulation) of the Consolidated Law on Finance in relation to the content of the press releases diffused by IFIL and Giovanni Agnelli e C. on August 24, 2005 and that the companies violated the responsibility of entities pursuant to art. 187-quinquies of the Consolidated Law on Finance and joint and several responsibility pursuant to art. 6, paragraph 3 of Law 689/1989.

On February 13, 2007, the Consob sanctionary measure (Resolution 15760) was notified which, at the conclusion of the proceeding, applied the following pecuniary administrative sanctions:

- to Gianluigi Gabetti (chairman of IFIL and chairman of Giovanni Agnelli e C.) € 2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL and € 2.5 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to Franzo Grande Stevens (director of IFIL) € 2 million in reference to the diffusion of the press release dated August 24, 2005 by the company IFIL and € 1 million in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to Virgilio Marrone (chief executive officer and general manager of IFI) € 500 thousand in reference to the diffusion of the press release dated August 24, 2005 by the company Giovanni Agnelli e C.;
- to IFIL € 4.5 million;
- to Giovanni Agnelli e C. € 3 million;

and the additional following administrative sanctions: temporary inability to assume positions of administration, direction and control in listed companies or in companies that are part of the same group of listed companies:

- to Gianluigi Gabetti: for six months
- to Franzo Grande Stevens: for four months
- to Virgilio Marrone: for two months.

The persons and companies involved in the sanctionary measure filed appeals with the Court of Appeals of Turin. In the opposing judgment, the Court of Appeals, in its decision of December 5, 2007, reduced the administrative sanctions from a total of € 16 million to € 6.3 million. The reduction for IFIL was from € 4.5 million to € 1 million and for Giovanni Agnelli e C. from a total of € 3 million to € 600 thousand and for Gianluigi Gabetti from a total of € 5 million to € 1.2 million in addition to a reduction of two months, from six to four months, in respect of the additional administrative suspension.

In July 2008, IFIL filed an appeal with the Court of Cassation against the ruling by the Court of Appeals of Turin. Appeals were also filed with the Court of Cassation by the other parties involved in the Consob sanctionary measure. In October 2008, Consob notified the company that it had filed a counter-appeal and an incidental appeal asking for the rejection of the main appeal and the cancellation of the reduction of the sanctions originally levied. Consob acted in the same manner against the other petitioners. In November 2008, IFIL filed a counter-appeal with the Court of Cassation against Consob's incidental appeal. The other parties referred to in Consob's incidental appeal also filed a counter-appeal with the Court of Cassation.

In the penal proceedings for the same press releases, on November 7, 2008, the Preliminary Hearing Judge of the Turin Court committed Gianluigi Gabetti, Franzo Grande Stevens and Virgilio Marrone to trial for the offense pursuant to art. 185 of the Consolidated Law on Finance, as well as IFIL and Giovanni Agnelli e C., as those responsible administratively under Legislative Decree 231/2001, setting a hearing for March 26, 2009.

Purchase of the EXOR brand

On January 19, 2009, IFI purchased the EXOR brand from Old Town S.A. (formerly EXOR Group S.A.), a subsidiary of Giovanni Agnelli e C., for a price of € 100 thousand.

Resolutions passed by the board of directors' meeting on March 2, 2009

The board of directors in its meeting on March 2, 2009 named Gianluigi Gabetti honorary chairman, Tiberto Brandolini d'Adda vice chairman and Carlo Barel di Sant'Albano chief executive officer, conferring to them the relative powers. The board also appointed the members of the Internal Control Committee and the Compensation and Nominating Committee. In accordance with art. 2389 of the Italian Civil Code, the following annual fees were established:

- € 500,000 to the chairman;
- € 1,500,000, for the strategic coordination mandate to Gianluigi Gabetti; insurance coverage in the event of death or permanent disability caused by professional and extra-professional accidents and a secretarial service and a car with a driver also subsequent to the expiry of the mandate;
- € 1,150,000 to the chief executive officer in addition to:
  - a variable fee up to a maximum of € 1,250,000 linked to the attainment of specific targets that will be decided by the board of directors upon recommendation of the Compensation and Nominating Committee;
  - the use of an apartment made available by the company;
  - the use of two company cars besides a company service car;
  - insurance coverage in the event of death or permanent disability caused by professional and extra-professional accidents;
  - health care coverage, the same as that provided to company executives;
  - a sum of € 2,300,000, corresponding to two years of the fixed annual fee established for the post, to be paid upon termination of the position, except in the case of the renewal of the post, voluntary resignation or failure to accept the renewal, termination for just cause or reaching retirement age.
- € 14,500 to the Internal Control Committee (of which € 7,500 to the chairman € 3,500 for each of the other two members);
- € 14,500 to the Compensation and Nominating Committee (of which € 7,500 to the chairman and € 3,500 for each of the other two members).

Changes in the name of the companies in the "Holdings Systems"

The Luxembourg subsidiary, Ifil Investissements S.A., took the new name of EXOR S.A. from March 2, 2009.

The Ireland subsidiary, Ifil International Finance Ltd, took the new name of EXOR Capital Ltd. from March 2, 2009.

The subsidiary, IFIL USA Inc., took the new name of EXOR Inc. from March 2, 2009.

Loan made to C&W Group Inc.

In its meeting held on March 25, 2009, the EXOR S.p.A. board of directors approved a 3-year subordinated credit line for $50 million for the subsidiary Cushman & Wakefield. The transaction, which will be finalized shortly, guarantees an interesting return for EXOR that reflects market rates. The purpose of the credit line is to strengthen the subsidiary's financial structure and also enable it to seize any opportunities for growth. At expiration, on May 30, 2012, EXOR will have the right to convert the loan to Cushman & Wakefield shares at a price equal to the lowest of the valuations made quarterly by an independent third party over the period of the credit line, discounted by 30%, in the event of non-payment.

BUSINESS OUTLOOK

In 2009, dividends will not be received from the investment holdings Fiat, Intesa Sanpaolo, Juventus F.C. and Alpitour. Consequently, the result for the year will be determined by the dividends that will be paid by the Luxembourg subsidiary EXOR S.A. (formerly Ifil Investissements).

On a consolidated level, the result will primarily depend on the performance of the main holdings; below is a summary of their forecasts on the basis of which, at this time, it is not possible to formulate reliable forecasts on the consolidated results of the EXOR Group for the year 2009.

Fiat Group

As foreseen at the end of the third quarter, the final three months of 2008 confirmed a significant and widespread deterioration of trading conditions across most of the businesses and most of the geographical areas in which the Fiat Group operates. This deterioration has made it even more difficult to forecast with some degree of accuracy the performance of the sectors in 2009. This uncertainty has been compounded by a severe tightening of credit in all major markets, both at the consumer and corporate level, and has begun to create a liquidity squeeze which will ultimately impact the industrial development of most businesses, including and especially the Fiat Group.

It is believed that there will be a continuation of experiencing erratic fluctuations in market sentiments throughout at the least the first semester. For these reasons, the Fiat Group has chosen a strategy of updating the financial markets on a quarterly basis on expected 2009 performance, as evidence materializes about the ultimate shape and quality of the various product demand curves that are being faced.

Notwithstanding this uncertainty, the Fiat Group is of the view that the following conditions will materialize in 2009:

- global demand for its products will decline approximately 20% compared to 2008;
- group trading profit will be in excess of € 1 billion;
- restructuring charges will amount to approximately € 300 million;
- net profit of the group will be in excess of € 300 million;
- group net industrial cash flows will be in excess of € 1 billion, with net industrial debt levels below € 5 billion, at the end of 2009.

While these are yearly objectives, the Fiat Group expects quarter over quarter performance to be uneven, with the first quarter of 2009 being particularly difficult. Improvements should be visible in the remaining three quarters of 2009, as the impact of the restructuring initiatives begins to be felt.

While working on the achievement of these objectives, the Fiat Group will continue to implement its strategy of targeted alliances, in order to optimize capital commitments and reduce risks.

Cushman & Wakefield Group

Owing to the impact of the economic crisis, in the second half of 2008, C&W had already approved cost cutting initiatives and, in the first quarter of 2009, as a result of the continuing deterioration in the global economic conditions, implemented additional initiatives. C&W expects the total savings from these initiatives to be approximately $156 million in 2009.

The actions to be taken to bring structure costs in line with the current operating scenario in concert with further increases in market share and investments in talent will put the C&W Group into a favorable position when the economic picture begins to turn around.

C&W management continues to pursue a strategy aimed at an ever-increasing diversification of activities and geographical areas combined with maintaining an equity structure that is better capitalized than the other operators in the sector, with a view to reducing earnings volatility.

Alpitour Group

The onset of the new winter season 2008-2009 is confirming signs of a slowdown that were already evident in the second half of the year ended October 31, 2008.
The overall climate of uncertainty which has clouded the economic scenario has also had a severe impact on the tourism industry. With the exception of New Year's, where the results are considered satisfactory, the early months of the year, compared to the same period of 2007-2008, recorded a decline in sales, including the order portfolio for future travel, and a further focus of the client on the price, a sign of an generalized reduced capacity for spending.
Nevertheless, in the year 2008-2009, the Alpitour Group will be involved in more development and investment activities aimed at consolidating its leadership position in the Italian market with a view to the long term. In light of the difficult economic state of affairs in which the group is operating, all the companies are implementing plans aimed at reducing and containing structure costs without penalizing growth efforts.

The group's objective for the current year is to confirm the profitability achieved in 2008, consolidate the return on invested capital and further improve the financial situation. These objectives, nonetheless, cannot be achieved without a recovery in consumer and market confidence, in addition to a lasting serene international political situation.

Juventus Football Club

Based upon the information currently available and in the absence of any events of an extraordinary nature, Juventus F.C. expects to close the year basically with a breakeven.

Sequana Group

In 2009, Antalis should fully benefit from the synergies connected with the acquisition of Map (€ 28 million on an annual basis), a different product mix thanks to the integration of the creation papers business and will continue to pursue strategies to reduce structure costs.
At the same time, the efforts that have already been undertaken by Arjowiggins during 2008 to reduce production capacity and the relative structure costs, will be continued during 2009 with the aim of maintaining the current pricing policy.
Overall, the plans to cut costs should result in savings at the group level estimated in a range of between € 35 million and € 50 million a year.

Notwithstanding the very difficult economic situation in 2009, the group confirms its financial capacity to support the action plans underway, also by way of continuing a vigilant and more efficient management of its working capital.

REVIEW OF THE RESULTS OF THE SEPARATE FINANCIAL STATEMENTS

The year 2008 shows a profit of € 49.1 million. The reduction of € 5.4 million compared to profit of € 54.5 million in the prior year is due to higher net financial expenses (-€ 8 million) and other net negative changes (-€ 2.3 million), offset in part by the increase in dividends received (+€ 4.9 million).

The condensed income statement and balance sheet, as well as comments on the most significant line items are presented below.

EXOR S.p.A. (formerly IFI S.p.A.) – Condensed income statement

€ in millions	Note	**2008**	2007	Change

1. Dividends from investments

Dividends from investments in 2008 amount to € 72.7 million, an increase of € 4.9 million compared to 2007 (€ 67.8 million). In both years, dividends were received almost entirely from the subsidiary IFIL. Dividends received on the IFIL shares purchased since January 1, 2008 (€ 0.3 million) were recorded as a deduction from the purchase cost of these same shares.

2. Net financial expenses

Net financial expenses of € 16.8 million increased by € 8 million compared to 2007 (€ 8.8 million) due to higher debt as a result of the purchases of IFIL ordinary shares in 2007 and during the first quarter of 2008, as well as the trend of interest rates.

3. Net general expenses

Net general expenses amount to € 6.8 million. The increase of € 1.6 million compared to € 5.2 million in 2007 is due to higher non-deductible VAT (€ 0.8 million), expenses in connection with employee cutbacks (€ 0.4 million), lower revenues and cost recoveries (€ 0.3 million) and other net changes (€ 0.1 million).

4. Investments

Details are as follows:

€ in millions	**12/31/2008**	12/31/2007	Change
Accounted for at cost			
IFIL S.p.A. (ordinary shares)	**2,236.1**	2,220.2	15.9
IFIL S.p.A. (savings shares)	**6.4**	6.4	0.0
	2,242.5	2,226.6	15.9
Other investments	**0.3**	0.3	0.0
Total investments	**2,242.8**	2,226.9	15.9

In January 2008, IFI purchased on the market 2,950,000 IFIL ordinary shares (0.29% of the class of stock) for a net investment of € 15.9 million.

The comparison between carrying amounts and market prices of IFIL shares held at the end of 2008 is as follows:

		Carrying amount		Market price December 30, 2008	
	Number	Per share (€)	Total (€ millions)	Per share (€)	Total (€ millions)
IFIL S.p.A.					
- ordinary shares	726,900,000	3.08	2,236.1	1.86	1,354.2
- savings shares	1,866,420	3.42	6.4	1.66	3.1
Total			**2,242.5**		**1,357.3**

5. Equity

Equity at December 31, 2008 is equal to € 1,889.5 million (€ 1,846.8 million at December 31, 2007). The positive change of € 42.7 million is due to the profit for the year (+€ 49.1 million) and other net changes (-€ 6.4 million).

6. Net financial position

Details are as follows:

€ in millions	**12/31/2008**	12/31/2007	Change
Cash and cash equivalents	**0.6**	0.2	0.4
Other financial assets, current and non-current	**0.6**	2.5	(1.9)
Bank debt, current and non-current	**(166.2)**	(394.3)	228.1
Loan from the subsidiary IFIL	**(199.5)**	0.0	(199.5)
Current other financial liabilities	**(5.4)**	(1.1)	(4.3)
Net financial position	**(369.9)**	(392.7)	22.8

The positive change of € 22.8 million in 2008 is due to the following cash flows:

€ in millions	
Net financial position at December 31, 2007	**(392.7)**
Purchase of 2,950,000 IFIL ordinary shares (0.29% of the class of stock)	(16.2)
Dividends received (a)	73.0
Net financial expenses	(16.8)
Net general expenses	(6.8)
Other net changes	(10.4)
Net change during the year	**22.8**
Net financial position at December 31, 2008	**(369.9)**

(a) Of which € 0.3 million was recorded as a deduction from purchases of IFIL shares made in 2008.

7. Reconciliation between the separate financial statements of EXOR S.p.A. (formerly IFI S.p.A.) and the consolidated financial statements of the group

The following reconciliation of the profit for the year and the equity in the separate financial statements of EXOR S.p.A. (formerly IFI S.p.A.) for the years ended December 31, 2008 and December 31, 2007 and the corresponding figures in the consolidated financial statements of the EXOR Group (formerly IFI Group) at the same dates are presented as required by Consob Communication 6064293 dated July 28, 2006.

	Profit		Equity	
€ in millions	**2008**	2007	**12/31/2008**	12/31/2007

REVIEW OF THE SYNTHESIZED CONSOLIDATED RESULTS

Introduction

In order to synthetically represent the results of the group, during 2008, the company has presented along with the annual 2007 consolidated financial statements and the 2008 half-year condensed consolidated financial statements, as well as the quarterly consolidated data for the first and third quarters of 2008, period financial statements (balance sheets and income statements) prepared by accounting for the investment in the IFIL Group using the equity method.

In order to facilitate the analysis of the equity and financial position and the results of operations of the group in its new configuration, presenting data comparable with that of future years, the company has decided to adopt the same presentation criteria for the synthesized consolidated data as those used by the subsidiary IFIL as from December 31, 2008.

Such criteria, described below, will be used for the preparation of the synthesized consolidated financial statements (balance sheets and income statements) which will be presented by the company together with its annual, half-year and quarterly data at March 31 and September 30 of each year.

Basis of preparation

At December 31, 2008, the company holds a controlling investment in IFIL S.p.A. (70% of capital stock outstanding).
At the same date, IFIL S.p.A. holds investments in subsidiaries and associates both directly (Fiat, Alpitour and Juventus F.C.) and through the Luxembourg subsidiary Ifil Investissements (Cushman & Wakefield and Sequana). Furthermore, Ifil Investissements controls certain companies that contribute to investment activities (Ifil USA, Ifil Asia and Ifil France) and to the management of the financial resources of the group (Ifil International Finance). These companies constitute, together with Soiem (a services company controlled directly by IFIL) and other minor companies, the so-called "Holdings System" (the complete list of these companies is presented in the next table).

In the preparation of the synthesized consolidated balance sheet and income statement, the financial statements or accounting data drawn up in accordance with IFRS by IFI, IFIL and the subsidiaries in the "Holdings System" are consolidated line-by-line; the investments in the operating subsidiaries and associates (Fiat, Alpitour, Juventus F.C., Cushman & Wakefield and Sequana) are accounted for by the equity method, always on the basis of their financial statements or accounting date prepared in accordance with IFRS.

The minority interest in the equity and profit of IFIL is recorded in specific line items.

For purposes of comparison with 2008, the figures for 2007 have been restated using the above criteria and are presented in the columns "restated".

The consolidation and valuation methods used for investments are presented below.

The synthesized consolidated **income statement** and **balance sheet** and notes commenting on the most significant line items are presented below.

EXOR GROUP (formerly IFI Group) – Synthesized consolidated income statement

The profit attributable to the equity holders of the parent for 2008 amounts to a € 301.8 million. This is a reduction of € 142.5 million compared to 2007 (€ 444.3 million) and is due to the net decrease in the results of investment holdings (-€ 274.7 million), an increase in net financial income (expenses) (+€ 44.6 million) and other net changes (+€ 8.5 million).

1. Share of the profit (loss) of companies accounted for by the equity method

In 2008, the share of the profit (loss) of companies accounted for by the equity method (held through the subsidiary IFIL) amounts to € 336.2 million (€ 610.9 million in 2007). The decrease of € 274.7 million reflects:

- the lower contributions by the Fiat Group (-€ 98.3 million) and the Alpitour Group (-€ 4.4 million) which closed 2008 with profit figures below those of 2007;
- an inversion of the results of Sequana Group and the Cushman & Wakefield Group which produced negative changes of € 174.5 million and € 49.9 million, respectively;
- the share of a lower loss reported by Juventus F.C. (+€ 5.7 million).

	Profit (loss)		EXOR's share (through IFIL)

- of which IFIL minority interest's share (30%)			**100.9**	193.7	(92.8)

(a) Mainly for the assignment of preference dividends to the minority interest.

(b) Of which -€ 54.3 million for losses realized on the sale of the 22% stake in capital stock and +€ 7.6 million for lower goodwill impairment losses on the AWA Group, since it was partially amortized in prior years.

(c) Data for the period April 1 – December 31, subsequent to acquisition (March 31, 2007).

(d) Data for the period November 1 – October 31.

(e) Data for the period January 1 – December 31 prepared for purposes of consolidation in the EXOR Group.

2. Dividends from investments

Dividends from investments in 2008 amount to € 139.3 million (€ 111.7 million in 2007) and include dividends collected from Intesa Sanpaolo S.p.A. for € 110.2 million (unchanged compared to 2007), SGS for € 26.2 million, Gruppo Banca Leonardo for € 2.8 million (€ 1.4 million in 2007) and Emittenti Titoli for € 0.1 million (unchanged compared to 2007).

3. Gains on sales of investments

In 2008, gains on sales of investments include the gain realized on the disposal on the market of a 1.45% stake in Intesa Sanpaolo S.p.A. ordinary capital stock (€ 85.8 million) by the subsidiary IFIL. On consolidation, for IFIL this gain amounts to € 74.5 million and increases by € 11.3 million for EXOR in order to take into account the partial realization of the gain reversed in 2003 on the contribution of Sanpaolo IMI shares by IFI to IFIL. Additional information is provided in Note 10.

In 2007, this line item includes the gain of € 0.9 million realized on the sale of the investment in Turismo&Immobiliare (25% of capital stock).

4. Net impairments of current and non-current financial assets

In 2008, net impairment losses amount to € 67.2 million (€ 2.6 million in 2007), of which € 52.3 million (€ 2.6 million in 2007) relates to current financial assets (equity shares and bonds held for trading by the subsidiary Ifil Investissements for € 41.2 million, and by IFIL for € 11.1 million).

The fair value of current securities is calculated by using the market prices at December 30, 2008 translated, where necessary, at the year-end exchange rates.

It also includes an impairment loss of € 14.9 million on the portion of Junior notes issued by DLMD which are recognized in non-current financial assets.
Additional information is provided in Note 10.

5. Interest income and other financial income

In 2008, this line item amounts to € 73.5 million (€ 42.9 million in 2007) and includes:

€ in millions	**2008**	2007	Change
Bond interest income	**29.3**	30.7	(1.4)
Financial income on securities held for trading	**9.5**	1.1	8.4
Interest income on receivables from:			
- tax authorities	**1.4**	1.4	0.0
- banks	**12.3**	1.6	10.7
Exchange differences	**10.9**	2.2	8.7
Income from interest rate hedges	**7.9**	3.4	4.5
Other	**2.2**	2.5	(0.3)
Total	**73.5**	42.9	30.6

6. Interest expenses and other financial expenses

In 2008, this line item amounts to € 93.9 million (€ 60 million in 2007) and includes:

€ in millions	**2008**	2007	Change
IFIL bond interest expenses	**51.6**	33.2	18.4
Financial expenses on securities held for trading	**18.8**	2.9	15.9
Bank interest expenses and other financial expenses	**23.1**	20.8	2.3
Exchange differences	**0.4**	3.1	(2.7)
Total	**93.9**	60.0	33.9

The increase in bond interest expenses (€ 18.4 million) is mainly due to the portion of interest accrued on bonds maturing in 2017, issued by IFIL in June 2007.

7. Net general expenses

In 2008, net general expenses amount to € 38.6 million. The increase of € 7.5 million compared to the prior year (€ 31.1 million) is due to higher non-deductible VAT (€ 0.8 million), expenses in connection with employee cutbacks (€ 0.4 million), costs incurred to expand the New York and Paris offices (€ 4.3 million), expenses sustained by the subsidiary Ifil Investissements for the investment in Perfect Vision (€ 1.3 million) and other net changes (€ 0.7 million).

8. Net other nonrecurring income (expenses)

In 2008, net other nonrecurring income, equal to € 5.1 million, includes income from fair value changes in the stock option plans voted in favor of management of the subsidiary Alpitour for € 7.8 million, the € 2.3 million excess of IFIL's consolidated equity attributable to EXOR compared to the cost of IFIL shares purchased in the first quarter of 2008, as well as the special fee € 5 million voted in favor of Mr Gabetti by the IFIL board of directors on May 13, 2008.

In 2007, net other nonrecurring expenses amounted to € 17.2 million and comprised transaction costs and expenses incurred to close the dispute over the sale of La Rinascente (€ 8 million), the current-year cost of € 12.7 million for the stock option plan approved for management of the subsidiary Alpitour, as well as income of € 3.5 million resulting from the reduction decided by the Court of Appeals of Turin in respect of the administrative sanction levied on IFIL by Consob.

9. Investments accounted for by the equity method

Details are as follows:

€ in millions	Carrying amount at **12/31/2008**	 12/31/2007	Change
Fiat Group	**3,062.2**	3,125.3	(63.1)
Sequana Group	**189.9**	341.0	(151.1)
Cushman & Wakefield Group	**482.5**	466.1	16.4
Alpitour Group	**84.2**	78.8	5.4
Juventus Football Club S.p.A.	**65.9**	69.8	(3.9)
Others, in a wind-up	**0.3**	0.0	0.3
Total	**3,885.0**	4,081.0	(196.0)

10. Non-current other financial assets

Details are as follows:

€ in millions	Carrying amount at **12/31/2008**	 12/31/2007	Change
Investments in:			
- Intesa Sanpaolo S.p.A.	**297.2**	1,564.7	(1,267.5)
- SGS S.A.	**869.2**	956.6	(87.4)
- Gruppo Banca Leonardo S.p.A.	**87.6**	82.4	5.2
- NoCo A LP	**19.5**	18.7	0.8
- Banijay Holding S.A.S.	**21.4**	0.0	21.4
Other investments at fair value			
NoCo B LP	**23.8** (a)	11.9	11.9
DLMD bonds	**13.4**	27.6	(14.2)
Other investments at amortized cost			
Perfect Vision Limited convertible bonds	**70.7**	0.0	70.7
Sundry	**0.9**	5.9	(5.0)
Total	**1,403.7**	2,667.8	(1,264.1)

(a) Net of an impairment loss of € 0.2 million.

At December 31, 2008, the reduction of the investment in Intesa Sanpaolo, equal to € 1,267.5 million, is given by the reversal of the carrying amount (-€ 927.9 million) of the stake disposed of (1.45% of ordinary capital stock) and the adjustment of the remaining stake to fair value at the end of the year (-€ 339.6 million).
The reversal of the carrying amount of the investment sold (-€ 927.9 million) comprises the original acquisition cost of € 512.6 million and accumulated fair value of € 415.3 million.

The gain of € 85.8 million comes from a comparison between the net proceeds of € 598.4 million and the original acquisition cost of € 512.6 million. The accumulated fair value, equal to € 415.3 million, was deducted from the specific reserve in consolidated equity.

The original acquisition cost of the remaining investment held in Intesa Sanpaolo is € 351.8 million; at December 31, 2008, the net negative change in fair value amounts to € 54.6 million.

The increase in the investment in SGS, equal to € 87.4 million, is due to the change in fair value at the end of 2008.

The original carrying amount of the investment in SGS is € 469.7 million; at December 31, 2008, the net positive change in fair value amounts to € 399.5 million.

The increase in the investment in Gruppo Banca Leonardo is due to the change in fair value of € 5.2 million. Fair value was estimated by an independent expert using the “warrant equity method”.

Bonds issued by DLMD are secured by 10,806,343 Sequana shares and cash collateral of approximately € 7 million.
In July 2008, certain clauses were renegotiated for the issue of DLMD bonds which were subdivided into Senior and Junior bond portions. The repayment of the Junior portion in 2010, in exchange for a higher yield, is subordinate to that of the Senior portion.
Ifil Investissements holds a nominal amount of bonds for € 27.2 million, of which € 12.3 million represents Senior bonds and € 14.9 million Junior bonds. At December 31, 2008, an impairment loss was recognized on the Junior portion for its entire nominal amount.

11. Goodwill

Goodwill, equal to € 67.6 million, is entirely due to the purchases of IFIL shares in 2007.

12. Comparison between carrying amounts and market prices of listed investments and other financial assets

Details are as follows:

				Market price			
		Carrying amount		December 30, 2008		March 20, 2009	
	Number	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)	Per share (€)	Total (€ ml)
Investments

Total			**4,484.4**		**2,917.2**		**2,857.6**

13. Equity attributable to the equity holders of the parent

Details are as follows:

€ in millions	**12/31/2008**	12/31/2007	Change
Capital and reserves	**3,686.1**	4,231.0	(544.9)
Treasury stock	**(70.5)**	(70.5)	0.0
Total	**3,615.6**	4,160.5	(544.9)

The change during the year is analyzed as follows:

€ in millions	
Equity attributable to the equity holders of the parent at December 31, 2007	**4,160.5**
Attributable reversal of accumulated fair value on the investment in Intesa Sanpaolo sold (-€ 294.1 million, net of + € 4.8 million of deferred taxes)	(289.3)
Attributable change in fair value at the end of 2008 on:	
- remaining investment in Intesa Sanpaolo (-€ 237.7 million, net of +€ 3.3 million of deferred taxes)	(234.4)
- SGS	(61.2)
- Other	3.5
Attributable exchange gains (losses) on the translation of foreign operations (-€ 72.1 million) and other net changes shown in the equity of the companies consolidated and those accounted for by the equity method (-€ 193.2 million) (a)	(265.3)
Profit attributable to the equity holders of the parent	301.8
Net change during the year	**(544.9)**
Equity attributable to the equity holders of the parent at December 31, 2008	**3,615.6**

(a) Mainly for movements in the cash flows hedge reserve of the Fiat Group (-€ 151.3 million).

At December 31, 2008, IFI S.p.A. holds, directly and indirectly, the following treasury stock:

		Carrying amount		% on class
	Number	Per share(€)	Total (€ ml)	of stock
IFI – preferred stock	**5,360,300**	**13.15**	**70.5**	**6.98**

14. Equity attributable to the minority interest

At December 31, 2008, the equity attributable to the minority interest amounts to € 1,706.2 million (€ 2,112.8 million) and represents the attributable consolidated equity of the subsidiary IFIL (30%).

15. Consolidated net financial position of the "Holdings System"

The consolidated net financial position of the "Holdings System" at December 31, 2008 shows a negative balance of € 11.5 million and a positive change of € 485.7 million from a negative balance of € 497.2 million at the end of 2007.

The consolidated net financial position of the “Holdings System” is composed as follows:

	12/31/2008			12/31/2007		
€ in millions	**Current**	**Non-current**	**Total**	Current	Non-current	Total

17. Reconciliation between the synthesized consolidated financial statements and the consolidated financial statements

The following table presents a reconciliation between the synthesized consolidated financial statements and the consolidated financial statements prepared in accordance with IFRS.

The first column ("Synthesized consolidation") presents the data that has been commented on in the preceding pages, reclassified according to the consolidated financial statement formats.

The second column ("Eliminations and consolation adjustments") shows the adjustments necessary to reverse the carrying amount of the investments accounted for in the synthesized consolidated financial statements by the equity method and the share of the results of those investments in order to arrive at the line-by-line consolidation of the respective financial statements or accounting data, which are shown in the next columns.

Programming document on security

The company prepared the programming document on security on December 1, 2008 for the year 2008 according to the provisions of Legislative Decree 196 dated June 30, 2003, attachment B – technical specifications regarding minimum safety measures. The document has been drawn up by the person in charge of the treatment of the data.

REVIEW OF THE OPERATING PERFORMANCE OF THE SUBSIDIARY IFIL INVESTMENTS S.p.A.

IFIL S.p.A. closed the year 2008 with profit of € 356.5 million. The increase of € 233.1 million compared to profit of € 123.4 million in 2007 is due to the gain realized on the partial sale of the investment in Intesa Sanpaolo (+€ 167.5 million), the increase in dividends received from investment holdings (+€ 84.2 million), the positive changes in net general expenses (+€ 2.1 million) and in other nonrecurring income (expenses) (+€ 12 million). The increase was offset in part by higher net financial expenses (-€ 9.7 million), the absence of reversals of impairment losses on investments (-€ 19.3 million) and deferred tax assets (-€ 3.7 million).

Equity of IFIL S.p.A. at December 31, 2008 is € 3,916.9 million (€ 4,566.9 million at December 31, 2007). The negative change of € 650 million is due to changes in the fair value reserve (-€ 836.6 million), purchases of treasury stock (-€ 103.7 million), dividends distributed (-€ 106.3 million), profit for the year (+€ 356.5 million) and other net positive changes (+€ 40.1 million).

At December 31, 2008, the net financial position of IFIL S.p.A. is a negative € 190.5 million. The positive change of € 558.7 million from a negative balance of € 749.2 million at the end of 2007 is due to the partial sale of the investment in Intesa Sanpaolo (+€ 598.4 million), dividends received from investment holdings (+€ 255.6 million), dividends distributed (-€ 106.3 million), purchases of treasury stock (-€ 103.7 million) and other net negative changes (-€ 85.3 million).

In the consolidated financial statements, the IFIL Group closed the year 2008 with profit attributable to the equity holders of the parent of € 445.3 million (€ 671.7 million in 2007), equity attributable to the equity holders of the parent of € 5,687.3 million (€ 6,666.5 million at the end of 2007) and a positive consolidated net financial position of the Holdings System for € 358.3 million (negative for € 104.5 million at the end of 2007).

The most important events during 2008 and in the first two months of 2009 are described below.

Subscription to bonds convertible into Vision Investment Management shares

On February 20, 2008, the subsidiary Ifil Investissements S.A. reached an agreement to invest $90 million in 5-year bonds issued by Perfect Vision Ltd with a mandatory conversion into shares at maturity which at the time of conversion will be equal to a 40% holding in the capital stock of Vision Investment Management Limited (Vision), one of the most important alternative asset managers in Asia.

The transaction was executed on April 11, 2008, once approval was obtained from the relevant authorities, for an investment of € 58.1 million. The bonds will guarantee Ifil Investissements S.A. a fixed annual yield of 5% until conversion at maturity in spring 2013.

Vision was founded in June 2000 by Jerry Wang, one of the pioneers of the sector in Asia. Vision launched its benchmark product, Vision Asia Maximus Fund, in 2002 and since then has become one of the largest local managers of hedge funds specialized in Asian markets.

The financial resources from the bonds have mainly been used by Vision management to buy back treasury stock from a group of the company's founding financial investors – which held 32% of ordinary capital stock issued by Vision – and to ensure future resources to sustain the development plan in the alternative asset management sector in Asia. Vision management and employees will remain the largest stockholders of the company with a controlling stake.

Investment in Banijay Holding S.A.S. (formerly Mangas Capital Entertainment)

In May 2008, Ifil Investissements reached an agreement to invest € 42.5 million in Banijay Holding S.A.S. (BH) aimed at launching a new player in European TV production.

BH is headquartered in Paris and was founded at the end of 2007 by media entrepreneur Stéphane Courbit, who has an established track record of success in the development of TV formats and the production of audiovisual content.

The investment falls under the framework of a capital increase designed to inject resources in BH for a total amount of approximately € 250 million to financially support BH's medium-term development plans. These entail rapid growth by way of acquisitions of companies specializing in the origination and production of TV formats and content for distribution across a range of media including TV, Internet and mobile phones.

Ifil Investissements total commitment is equal to € 42.5 million, of which € 21.4 million was paid when the operation was closed at the end of May 2008. Ifil Investissements holds a 17.03% stake in BH (17.17% of capital stock with voting rights) and is represented on the board of directors of the company in which Stéphane Courbit is the chairman and chief executive officer.

Increase in the investment in C&W Group Inc.

On June 27, 2008, Ifil Investissements S.A. purchased 14,538 C&W Group Inc. shares (2.05% of capital stock), carried as treasury stock by the company, for an investment of € 11.6 million.

Currently, Ifil Investissements S.A. holds 511,015 C&W Group Inc. shares representing a 71.81% stake in its capital stock.

Other investments

As a result of investment commitments in the NoCo B LP limited partnership, which groups a series of funds managed by Perella Weinberg Partners L.P., during the first half of 2008, Ifil Investissements invested $16.4 million (€ 11 million) and € 1.1 million directly in the Perella Weinberg Real Estate I fund.

At December 31, 2008, the remaining investment commitments in NoCo B LP amount to $46.2 million and € 23.9 million.

Partial sale of the investment in Intesa Sanpaolo S.p.A.

In the second half of 2008, IFIL S.p.A. sold 171,916,165 Intesa Sanpaolo ordinary shares (1.45% of ordinary capital stock) on the market for net proceeds of € 598.4 million and an after-tax gain of € 74.5 million on consolidation (€ 167.5 million in the separate financial statements).

After these sales, IFIL S.p.A. holds 118,000,000 shares equal to 1% of the ordinary capital stock of Intesa Sanpaolo S.p.A..

Purchases of treasury stock

Under the Program for the buyback of ordinary and savings treasury stock voted by the IFIL S.p.A. board of directors on February 18, 2008, during the period February 26, to August 18, 2008, purchases were made for 20,783,200 IFIL ordinary shares (2% of the class of stock) at the average price per share of € 4.8 totaling € 99.8 million, in addition to 917,000 IFIL savings shares (2.45% of the class of stock) at the average cost per share of € 4.3 totaling € 3.9 million, for a grand total of € 103.7 million (69.13% of the maximum disbursement of the € 150 million authorized for the buyback Program).

At December 31, 2008, IFIL S.p.A. held directly and indirectly the following treasury stock:

	Number	% of class of stock	Amount Per share (€)	Amount Total (€ ml)
Ordinary shares, held by IFIL S.p.A.	33,186,198	3.20	4.38	145.5
Ordinary shares, held by the subsidiary Soiem S.p.A.	810,262	0.08	3.41	2.8
Total ordinary shares held	33,996,460	3.28	4.36	148.3
Savings shares, held by IFIL S.p.A.	917,000	2.45	4.30	3.9
Total treasury stock	**34,913,460**	-		**152.2**

Such shares were canceled by EXOR S.p.A. after the merger.

Other transactions for the simplification of the group's structure

With a view toward simplifying the group's structure, the following transactions were entered into:

- on September 29, 2008, a decision was taken to put Ifilgroup Finance Limited, an Irish-registered company controlled 100% by Ifil Investissements S.A., into a voluntary wind-up;
- on November 7, 2008, a decision was taken to put Ifil Investment Holding, a Dutch-registered company controlled 100% by IFIL, into a voluntary wind-up. On the same day, Ifil Investment Holding transferred 224,194 Ifil Investissements S.A. shares which it held (20.184% of capital stock) to IFIL as an advance on the liquidation. After this transaction, IFIL directly holds 100% of the capital stock of Ifil Investissements.

MOTION FOR THE APPROVAL OF THE SEPARATE FINANCIAL STATEMENTS AND THE APPROPRIATION OF THE PROFIT FOR THE YEAR

To the stockholders,

We invite you to approve the separate financial statements for the year ended December 31, 2008 and put forward the motion for the appropriation of profit of € 49,137,819 as follows:

€	
- 5% to the Legal Reserve	2,456,890.95
- to the 9,168,894 savings shares currently outstanding, a dividend of € 0.3121, for a maximum	2,861,611.82
- to the 71,441,160 preferred shares currently outstanding, a dividend of € 0.2248, for a maximum	16,059,972.77
- to the 160,259,496 ordinary shares currently outstanding, a dividend of € 0.1731, for a maximum	27,740,918.76
- to the Extraordinary Reserve, the remaining amount, for a minimum	18,424.70
Profit for the year 2008	**49,137,819.00**

If you approve the appropriation of profit for the year 2008, we also propose:

- to increase the Legal Reserve from € 35,107,182.95 to € 49,245,970.00, equal to one-fifth of the new capital stock of € 246,229,850.00, by using the Extraordinary Reserve for € 14,138,787.05;
- to use the Extraordinary Reserve for a maximum € 35,142,867.34 to distribute an additional dividend of € 0.1459 to the savings, preferred and ordinary shares currently outstanding.

The total dividends proposed, € 0.458 to the savings shares, € 0.3707 to the preferred shares and € 0.319 to the ordinary shares are payable to the shares that will be outstanding, therefore excluding those held directly by EXOR S.p.A., at the ex-dividend date.

Turin, March 25, 2009

On behalf of the Board of Directors
The Chairman
John Elkann

EXOR S.p.A. (formerly IFI S.p.A.)
NOTES TO THE SEPARATE FINANCIAL STATEMENTS

1. General information on the activities of the company

EXOR S.p.A. is the new name that IFI S.p.A. assumed on March 1, 2009, the effective date of the deed of merger by incorporation of the subsidiary IFIL S.p.A. signed on February 20, 2009.
EXOR S.p.A. is a corporation organized under the laws of the Republic of Italy. The head office of the company is located in Turin, Italy, Corso Matteotti 26.
Since March 2, 2009, all three categories of EXOR shares (ordinary, preferred and savings) are traded on the Electronic Share Market of the Italian Stock Exchange. Previously, the ordinary capital stock was wholly owned by the parent, Giovanni Agnelli e C. S.a.p.az., and only the preferred shares were listed.

The assets of the company at December 31, 2008 are principally represented by the controlling investment in IFIL S.p.A., equal to 69.99% of ordinary capital stock.

Additional information is presented in the Report on Operations under “EXOR Group profile” and “Merger by incorporation of the subsidiary IFIL in IFI”.

2. General principles for the basis of presentation of the separate financial statements

Starting from the financial year 2006, the separate financial statements of EXOR S.p.A. have been prepared in conformity with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and recognized by the European Community in accordance with Regulation 1606/2002 of the European Parliament and Council dated July 19, 2002. The designation IFRS also includes all valid International Accounting Standards (IAS), as well as all interpretations of the International Financial Reporting Interpretations Committee (IFRIC), formerly the Standing Interpretations Committee (SIC).

The disclosure required by IFRS 1 – *First-time Adoption of IFRS*, relative to the effects of the transition to IFRS, was presented in a specific Appendix to the separate financial statements at December 31, 2006.

The separate financial statements have also been prepared in accordance with the provisions contained in Consob Resolutions 15519 and 15520 dated July 27, 2006 and in Communication 6064293 dated July 28, 2006, pursuant to art. 9, paragraph 3, of Legislative Decree 38 dated February 28, 2005.

3. Formats of the separate financial statements and other information

The separate income statement is presented using a classification based on the nature of the revenues and expenses, with the presentation of investment income (charges) and financial income (expenses) taking preference since these items are characteristic of EXOR S.p.A.’s activities.

In the separate balance sheet, the current/non-current distinction has been adopted for the presentation of assets and liabilities.

A specific section of the separate statement of changes in equity presents the total income and expense recognized directly as an increase or decrease of reserves.

The separate statement of cash flows is presented using the indirect method, which reconciles cash and cash equivalents at the beginning and the end of the year.

The year-end closing date is December 31 of each year and covers a period of 12 months.
The Euro is the company's functional currency and presentation currency.

In the separate financial statements, the amounts are present in Euro.

The notes are expressed in thousands of Euro, unless otherwise indicated.

Major events in 2008 and in the first quarter of 2009, the main risks and uncertainties and the business outlook are presented in specific paragraphs of the Report on Operations.

4. Related party transactions, unusual and/or atypical transactions and significant nonrecurring events and transactions

The balance sheet and income statement balances generated by transactions with related parties are shown separately in the financial statement formats and commented in Note 32.

With regard to the years 2008 and 2007, there are no significant nonrecurring events or transactions or unusual and/or atypical transactions that require mention pursuant to Consob Communication 6064293 dated July 28, 2006.

5. Significant accounting policies

General principle

The financial statements of EXOR S.p.A. are expressed in Euro and are prepared under the historical cost convention, except where the use of fair value is required for the measurement of certain available-for-sale financial instruments and those held for trading, as well as for the going concern assumption.
Despite operating in a difficult economic and financial environment, the directors have in fact assessed that no material uncertainties exist (as defined in paragraph 23 of IAS 1) about its ability to continue as a going concern.

Investments accounted for at cost

Investments in subsidiaries and associates are stated at cost and tested for impairment if, and only if, there is objective evidence of an impairment due to one or more events which occurred after initial recognition which have an impact on the future cash flows of the subsidiaries and associates and on the dividends which they could distribute. For EXOR S.p.A., this objective evidence is a significant and prolonged decline in the market prices to below cost of a directly and indirectly owned subsidiary or associate, together with its continuing negative operating performance. In these cases, the impairment is determined as the difference between the carrying amount of the investment and its recoverable amount, usually determined on the basis of the higher of the value in use and fair value.

At each balance sheet date, EXOR S.p.A. assesses whether there is any objective evidence that an impairment loss of an investment recognized in prior years may no longer exist or may have decreased. A significant or prolonged rise in the market price of the subsidiary or associate, together with its continuing positive operating performance is considered as objective evidence. In these cases, the recoverable amount of the investment is re-measured and, if necessary, the carrying amount is increased up to the cost of the investment.

Receivables and payables

Receivables are initially recognized at their nominal amount which substantially coincides with fair value.

If there is objective evidence of an impairment loss or a risk that the company will not be able to collect the contractual amount (principal and interest) at the contractually agreed dates, a provision is set aside which corresponds to the difference between the asset's carrying amount and the present value of estimated recoverable future cash flows, discounted at the effective interest rate.

Payables are initially recognized at their nominal amount, reduced by expenses incurred to assume them and increased by interest expense due, if any. Payables are subsequently measured at amortized cost using the effective interest method.

Treasury stock

The cost of any treasury stock purchased and/or held, also through subsidiaries, as a result of specific stockholder resolutions, is recognized as a deduction from equity and, therefore, the reserve offsetting treasury stock in portfolio is not shown separately. The proceeds from any subsequent sale are recognized as movements in equity.

Employee benefits – Pension plans

The pension plans are currently either defined contribution or defined benefit plans.

Under defined contribution plans the company pays contributions to outside, legally separate entities with administrative autonomy, which frees the employer from any subsequent obligation as the outside entity assumes the commitment to pay what is due to the employee. Following the changes in regulations for employee severance indemnities pursuant to Law 296 dated December 27, 2006 (Budget Law 2007) and later decrees and regulations, defined contribution plans include the portions of employee severance indemnity accruing from January 1, 2007. However, since EXOR S.p.A. has less than 50 employees, the employee severance indemnities are calculated using the customary actuarial method established in IAS 19 and adopted in prior years, except for the exclusion of the pro rata application of the service rendered for employees who transfer the entire amount accrued to the supplementary pension fund.

Consequently, for those who transfer the entire amount accrued to the supplementary pension fund, the company records the contribution paid as an expense and no additional obligation is recognized.

Defined benefit plans include post-employment benefits, other than those under defined contribution plans. Under defined benefit plans, the company has the obligation to set aside the costs relating to the benefits guaranteed to its employees in service. The actuarial risk and the investment risk are thus substantially borne by the company.

Defined benefit plans, which include employee severance indemnities, taking into account what was described above, are measured by actuarial techniques using the Projected Unit Credit Method.

As provided by the amendment to IAS 19 – Employee Benefits, issued by the IASB in December 2004, EXOR S.p.A. has elected to recognize actuarial gains and losses immediately in the period in which they arise, outside the income statement, in a statement of recognized income and expense.

All cumulative actuarial gains and losses that existed at January 1, 2005 have been recognized in equity.

For defined benefit plans, the expenses relating to the increase in the present value of the obligation, due to the fact that the payment date of the benefits is nearing, are recognized in financial expenses.

Payments relative to defined contribution plans are recognized as an expense in the income statement as incurred.

Defined benefit plans may be unfunded or they may be wholly or partly funded by contributions paid by the employer and the employee plan participants to an entity, or fund, that is legally separate from the employer and from which the employee benefits are paid.

The liability for defined benefit plans is calculated on an individual basis and takes into account life expectancy, personnel turnover, salary changes, revaluation of the yields, inflation and the present value of the amounts to be paid.

Debt

Interest-bearing debt is recognized at cost which corresponds initially to the fair value of the amount received net of directly attributable costs. Debt is subsequently measured at amortized cost. The difference between amortized cost and the amount to be repaid is recognized in the income statement on the basis of the effective interest rate over the period of the loan.

Debt is classified in current liabilities unless the company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

The amortized cost of a financial liability is the amount at which the financial liability was recognized initially net of principal repayments, increased or decreased by the total amortization on any difference between the initial amount and the maturity amount using the effective interest method.

The effective interest rate is a method for calculating the amortized cost of a financial liability and allocating the interest over the period of reference. The effective interest rate is the rate that exactly discounts future cash flows for estimated payments (including transaction costs paid) over the expected life of the financial instrument or, if appropriate, over a shorter period, to the net carrying amount of the financial liability.

Derivative financial instruments and hedge relationships

Derivative financial instruments are recognized initially at fair value at the date the contracts are entered into and are subsequently measured at fair value at year-end. The resulting gains or losses are recognized in the income statement immediately, unless the derivative is designated and is effective as a hedging instrument, in which case the times for recognition in the income statement depend upon the nature of the hedge relationship. EXOR S.p.A. designates certain derivatives as fair value hedges of certain assets or liabilities recognized in the financial statements or as cash flow hedges of certain highly probable forecast transactions.

A derivative is classified as a non-current asset or liability if the maturity date of the instrument is beyond 12 months and it is not expected to be realized or settled within 12 months. Other derivatives are classified as current assets or liabilities.

Financial instruments qualify for hedge accounting only when there is formal designation and documentation, including the company's risk management objective and strategy, and the hedge, verified periodically, is highly effective.
When financial instruments qualify for hedge accounting, the following accounting treatment applies:

- Fair value hedge: where a derivative financial instrument is designated as a hedge of the exposure to changes in fair value of a recognized asset or liability that is attributable to a particular risk and could affect the income statement, the gain or loss from re-measuring the hedging instrument at fair value is recognized in the income statement, together with the change in fair value of the hedged item. The gain or loss from the change in fair value of the hedging instrument is recognized on the same line of the income statement as the hedged item.

- Cash flow hedge: where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows of a recognized asset or liability or a highly probable forecast transaction and could affect profit or loss, the effective portion of any gain or loss of the derivative financial instrument is recognized directly in equity. The cumulative gain or loss is removed from equity and recognized in the income statement at the same time in which the hedged transaction affects the income statement. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in equity and is recognized in the income statement at the same time the related transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in equity is recognized in the income statement immediately.

If the conditions of IAS 39 are not met, the transactions, even if they have been set up for the purpose of managing risk exposure, are classified and measured as trading transactions. In that case, the difference from fair value is recognized in the income statement.

Financial income and expenses, other revenues and costs

Dividends are recognized in the income statement when they are approved by the stockholders and only from the earnings generated after the acquisition of the investee company. Instead, when the dividends are distributed from reserves generated before acquisition, the dividends are reported as a deduction from the cost of the investment.

Dividends from available-for-sale investments are in any case recognized in the income statement.

Financial income and expenses are recognized according to the accrual principle on the basis of the effective rate of return.

Revenues from services are recognized by reference to the stage of completion of the service at the balance sheet date.

The expenses incurred by EXOR (and by the merged company IFIL) in 2008 have been recognized in “Current assets – Other receivables” and as a result do not impact the profit for the year. Such expenses together with those incurred in 2009, by EXOR and IFIL, will be charged directly as a deduction from additional paid-in capital which will be generated by recording the capital stock increase carried out to service the exchange ratio of the canceled IFIL shares.

Transactions in foreign currencies

Transactions in foreign currencies are recorded at the foreign exchange rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the foreign exchange rate prevailing at that date. Exchange differences arising on the settlement of monetary items or on reporting monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements are recognized in the income statement.

Income taxes

Current income taxes are calculated according to the tax laws in force.

Taxes on income are recognized in the income statement except to the extent that they relate to items directly charged or credited to equity, in which case the related income tax effect is recognized directly in equity.

Temporary differences between the amounts of assets and liabilities in the financial statements and the corresponding amounts for tax purposes give rise to temporarily deferred tax liabilities on the taxable temporary differences recorded in a specific provision in liabilities. Deferred tax assets relating to the carryforward of unused tax losses, as well as those arising from deductible temporary differences, are recognized to the extent that it is probable that future profits will be available against which they can be utilized.

Deferred tax assets and liabilities are measured at the tax rates expected to apply to taxable income in the periods in which the temporary differences will reverse. Deferred income tax assets and liabilities are offset where there is a legally enforceable right of offset.

Deferred tax assets and liabilities are shown separately from other tax receivables and payables in a specific line item under non-current assets or liabilities.

Principal sources of uncertainty in making financial statement estimates

The preparation of financial statements and related disclosures that conform to IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results could differ from those estimates. Estimates particularly refer to the measurement of investments (impairments and writebacks). Estimates and assumptions are reviewed periodically and the effects of any changes are recognized immediately in the income statement in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

In this respect, the situation caused by the present economic and financial crisis has led to the need to make assumptions regarding future performance which are characterized by significant uncertainty; as a consequence, therefore, it cannot be excluded that results may arise during the next year which differ from estimates, and which therefore might require adjustments, even significant, to be made to the carrying amount of the items in question, which at the present moment can clearly neither be estimated nor predicted. The line item most affected by these situations of uncertainty relates to the investment in the merged company IFIL S.p.A., accounted for at cost, for which, as described in Note 16, it is deemed that the conditions for conducting an impairment test of the investment do not exist at December 31, 2008.

6. Adoption of new accounting standards, amendments and interpretations issued by the IASB

Interpretations and amendments to standards effective from January 1, 2008 but not applicable to the company

The following interpretations and amendments, applicable for 2008, relate to matters that are not applicable to the company.

- IFRIC 12 – Service Concession Arrangements (applicable from January 1, 2008).
- IFRIC 14 – IAS 19 – The Limit on a Defined Benefit Asset and Minimum Funding Requirements (applicable from January 1, 2008).
- Amendment to IAS 39 – Financial Instruments: Recognition and Measurement and IFRS 7 – Financial Instruments: Disclosures that would permit the reclassification of some non-derivative financial assets which are classified under the “fair value through profit or loss” category in particular circumstances. The amendment also permits the transfer of loans and receivables from the “available-for-sale” category to the “held to maturity” category where the company has the intention and ability to hold such instruments for a specific future period. Although this amendment applies from July 1, 2008, it has had no effect on the financial statements presented herein as none of the reclassifications permitted by the amendment were carried out by the company.

Accounting standards, amendments and interpretations for which the company has not elected early adoption.

On March 29, 2007, the IASB issued a revised version of IAS 23 – Borrowing costs. The standard is applicable from January 1, 2009. The main change from the previous version is the removal of the option of immediately recognizing as an expense borrowing costs that relate to assets that take a substantial period of time to get ready for use or sale. The standard will be applicable prospectively to borrowing costs relating to qualifying assets capitalized starting from January 1, 2009.

On September 6, 2007, the IASB issued a revised version of IAS 1 - Presentation of Financial Statements which applies from January 1, 2009. The revised standard requires an entity to present changes in its equity resulting from transactions with owners in a statement of changes in equity. All non-owner changes (meaning changes in comprehensive income) are required to be presented either in a single statement of comprehensive income or in two statements (a separate income statement and a statement of comprehensive income). Transactions with non-owners may not be presented in the statement of changes in equity.

Adoption of this standard will have no effect on the measurement of items in the financial statements.

On January 17, 2008, the IASB issued an amendment to IFRS 2 – Vesting Conditions and Cancellations which clarifies that for the purpose of share-based payments measurement, vesting conditions are service conditions and performance conditions only. It also specifies that all cancellations, whether by the entity or by other parties, should receive the same accounting treatment. The company will apply this amendment retrospectively from January 1, 2009; no effects are expected from its adoption.

On May 22, 2008, the IASB issued an amendment to IFRS 1 – First Time Adoption of International Financial Reporting Standards and IAS 27 – Consolidated and Separate Financial Statements which allows companies adopting IFRS for the first time from January 1, 2009 and electing to recognize investments in subsidiaries, associates and joint ventures in the separate financial statements at cost, to use one of the following methods:

- cost determined in accordance with IAS 27;
- revalued cost measured on a fair value basis at the date of transition to IFRS or the carrying amount of the investment at the date of transition measured in accordance with local GAAP.

The amendment requires that all dividends received from subsidiaries, joint ventures and associates must be recognized in the parent company's income statement when the right to receive those dividends is established. Revisions to IAS 36 – Impairment of Assets require that, when evaluating whether impairment exists, if an investee company has distributed a dividend, the following must be considered:

- whether the carrying amount of the investment in the separate financial statements exceeds the book value of that company's net assets (including any associated goodwill) as recognized in the consolidated financial statements;
- whether the dividend exceeds the comprehensive income of the investee for the period to which the dividends relate.

The amendments are applicable prospectively from January 1, 2009.

On May 22, 2008, the IASB issued a series of amendments to IFRS ("Improvements"); details are provided in the following paragraphs of those identified by the IASB as resulting in accounting changes for presentation, recognition and measurement purposes, leaving out amendments regarding changes in terminology or editorial changes which are likely to have minimal effects in terms of accounting and effects on the consolidated financial statements.

- IAS 1 – Presentation of Financial Statements (revised in 2007): this amendment, applicable from January 1, 2009, requires an entity to classify assets and liabilities arising from derivative financial instruments that are not classified as held for trading between current and non-current assets and liabilities. Adoption of this improvement will have no effect on the measurement of items in the financial statements.
- IAS 23 – Borrowing Costs: this amendment, applicable from January 1, 2009, revises the definition of borrowing costs.
- IAS 36 – Impairment of Assets: this amendment, applicable from January 1, 2009, requires additional disclosures to be made in the case in which an entity determines the recoverable amount of a cash-generating unit using discounted cash flows.

In November 2008, the IASB also issued IFRIC 17 – Distribution of Non-cash Assets to Owners, establishing that the determination of the value of the distribution of non-cash assets should consider their fair value when it becomes mandatory to record the relative payable to the stockholders.
The amendment is applicable from January 1, 2010, for annual periods beginning on or after July 1, 2009.

In March 2009, the IASB issued an amendment to IFRS 7 – Financial Instruments: Disclosures which is applicable from January 1, 2010, or annual periods beginning on or after July 1, 2009. The amendment requires disclosure about the measurement of fair value (methods used and, if valuations techniques are used, the assumptions adopted in determining the fair value of each class of financial asset or liability) and the liquidity risk (analysis of the maturities of financial liabilities represented by derivatives or other liabilities).

Standards, amendments and interpretations not applicable by the company

The following standards, amendments and interpretations have also been issued but were not applicable to the company at the balance sheet date:

Improvements:

- IAS 16 – Property, Plant and Equipment: this amendment, applicable from January 1, 2009, requires an entity that in the course of its ordinary activities routinely sells items of property, plant and equipment that it has held for rental to others, to transfer such assets to inventories when they cease to be rented and become held for sale. As a consequence, the proceeds from the sale of such assets shall be recognized as revenue. Cash payments to manufacture or acquire assets held for rental to others or subsequently held for sale are cash flows from operating activities (and not from investing activities).
- IAS 19 – Employee Benefits: this amendment, applicable prospectively from January 1, 2009 to changes in benefits that occur after that date, clarifies the definition of positive/negative past service costs and states that in the case of a curtailment, only the effect of the reduction for future service shall be recognized immediately in the income statement, while the effect arising from past service periods shall be considered a negative past service cost. The Board also revised the definition of short-term employee benefits and long-term employee benefits and the definition of a return on plan assets, stating that this amount should be net of any costs for administering the plan (other than those included in the measurement of the defined benefit obligation).

- IAS 20 – Government Grants and Disclosure of Government Assistance: this amendment, applicable prospectively from January 1, 2009, states that the benefit of a government loan at a below-market rate of interest shall be treated as a government grant and then accounted for in accordance with IAS 20.
- IAS 28 – Investments in Associates, and IAS 31 – Investments in Joint Ventures: these amendments, applicable from January 1, 2009, require specific new disclosures to be made for investments in associates and joint ventures measured at fair value in accordance with IAS 39. IFRS 7 – Financial Instruments: Disclosures and IAS 32 – Financial Instruments: Presentation have accordingly also been amended.
- IAS 29 – Financial Reporting in Hyperinflationary Economies: the previous version of the standard did not reflect the fact that a number of assets and liabilities may or must be measured on the basis of a current value rather than historical value. This amendment, made in order to reflect this, is effective from January 1, 2009.
- IAS 40 – Investment Property: this amendment, applicable prospectively from January 1, 2009, states that property under construction falls within the scope of IAS 40 and not that of IAS 16.

Amendments:

- IAS 27 – Consolidated and Separate Financial Statements: this amendment, which applies prospectively from January 1, 2009, requires that investments recognized in the separate financial statements and measured in accordance with IAS 39 are subject to IFRS 5 – Non-current Assets Held for Sale and Discontinued Operations.
- IAS 32 – Financial Instruments: Presentation and to IAS 1 – Presentation of Financial Statements - Puttable Financial Instruments and Obligations Arising on Liquidation. These amendments require puttable financial instruments and instruments, or components of instruments that impose on an entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation, to be classified as equity instruments. This amendment is effective prospectively from January 1, 2009.
- IAS 38 – Intangible Assets: this amendment, effective retrospectively from January 1, 2009, requires expenditure on advertising and promotional activities to be recognized in the income statement. Further, it states that expenditures incurred to provide future economic benefits to an entity, but where no intangible asset is recognized, must, for the supply of goods, be recognized as an expense when it has the right to access the goods. In the case of the supply of services, an entity shall recognize the expenditure as an expense when it receives the services. Moreover, the standard has been revised in order to allow entities to use the unit of production method for determining the amortization charge for an intangible asset with a finite useful life.
- IAS 39 – Financial Instruments: Recognition and Measurement: this amendment, effective from January 1, 2009, clarifies how to calculate the revised effective interest rate on ceasing fair value hedge accounting and notes additionally that the prohibition on the reclassification of financial instruments into or out of the fair value through profit or loss category after initial recognition should not prevent a derivative from being accounted for at fair value through profit or loss when it does not qualify for hedge accounting and vice versa.
- On July 31, 2008, the IASB issued an amendment to IAS 39 – Financial Instruments: Recognition and Measurement which is to be applied retrospectively from January 1, 2010. The amendment clarifies how the existing principles underlying hedge accounting should be applied in particular situations.

Interpretations:

- IFRIC 13 – Customer Loyalty Programmes (applicable from January 1, 2009).
- IFRIC 15 – Agreements for the Construction of Real Estate (applicable from January 1, 2009 but not yet endorsed by the European Union).
- IFRIC 18 – Transfers of Assets from Customers (applicable from January 1, 2010, for annual periods beginning on or after July 1, 2009).

7. Adoption of accounting policies following the merger by incorporation of the subsidiary IFIL S.p.A.

The transactions carried out by IFIL S.p.A. in the early months of 2009 will be recorded in the financial statements of EXOR beginning January 1, 2009 (that is also the effective date of the merger for tax purposes).
EXOR will change the following accounting policies that had been applied by IFIL. These refer to the most significant items in the IFIL financial statements that will flow into EXOR's 2009 financial statements as a result of the merger.

Available-for-sale investments and non-current other financial assets

These are measured at fair value which coincides, for listed investments, with the market price on the last day of the period. Unrealized gains and losses are recognized directly in equity, net of the relevant deferred tax effect. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity is reversed and recognized in the income statement. Such impairment losses may not later be reversed through the income statement.

Upon disposal of the asset, the accumulated gains or losses recorded in equity are credited or debited to the income statement.

Financial assets held for trading

Financial assets held for trading include equity shares, credit instruments and other forms of investment of liquidity, as well as derivative instruments for trading.

Financial assets purchased originally for resale in the short-term are measured at year end at fair value using, for listed securities, the market price translated, if necessary, at the year-end exchange rate; the fair value adjustment is recorded with a corresponding entry in the income statement.

Employee benefits – Stock option plans

Stock option plans with underlying IFIL S.p.A. stock (now EXOR S.p.A. stock)

Stock-based payments to employees are measured at the fair value of the equity instruments at the grant date.
In accordance with IFRS 2 – Share-based Payment, the full amount of the fair value of stock options at the grant date is recognized in the income statement in personnel costs on a straight-line basis over the period from the grant date to the vesting date with a corresponding entry directly in equity, based upon an estimate of the number of options that is expected to vest. Changes in fair value after the grant date have no effect on the initial measurement.
The cost is recalculated each year based upon a revision of the above-indicated estimate.

The compensation component deriving from stock options plans with underlying IFIL S.p.A. stock but relating to employees of other group companies, under IFRIC 11, is recorded as a capital contribution in favor of the subsidiaries in which the beneficiaries of the stock option plans are employees and consequently recorded as an increase in the relative value of the investments, with a corresponding entry recorded directly in equity.

Stock option plans with underlying stock of the subsidiary Alpitour S.p.A.

This is a stock option plan that requires a monetary payment equal to the increase in the value of the company. The fair value of the liability of the plan is re-measured at each reporting date until its extinction.

The cost is recognized in the income statement in “Other nonrecurring expenses” with a corresponding entry to “Other payables to related parties”.

If the payable to related parties decreases, the resulting income is recognized in the income statement in “Other nonrecurring income from related parties”.

8. Risk management

EXOR S.p.A. is not subject to either credit risk or direct currency risks.

Financing needs and cash flows are managed with the aim of optimizing financial resources. Outgoing cash flows from current operations are basically financed by dividends received. Liquidity risk could therefore arise only in respect of investment decisions in excess of cash availability or revocation of existing credit lines. In this sense, EXOR S.p.A., operates so that it has available credit lines, in part irrevocable, with expiration dates and amounts consistent with its requirements.

EXOR S.p.A. assesses and manages its exposure to fluctuations in interest rates in accordance with its financial management policies and uses derivative financial instruments to fix some of the financing obtained at a pre-set interest rate. There were no derivative financial instruments put into place for speculative purposes during 2008; the only derivative financial instruments used to manage fluctuations in interest rate risks were interest rate swaps on some of the existing loans.

COMMENTS ON THE PRINCIPAL LINE ITEMS IN THE SEPARATE INCOME STATEMENT

9. Dividends from investments

Dividends amount to € 72,730 thousand (€ 67,817 thousand in 2007) and include dividends collected from IFIL (€ 72,621 thousand) and Emittenti Titoli (€ 109 thousand). In 2007, dividends included those received from IFIL (€ 67,745 thousand) and Emittenti Titoli (€ 72 thousand).

10. Financial expenses from third parties

Financial expenses from third parties amount to € 21,762 thousand (€ 12,118 thousand in 2007) and include:

€ in thousands	2008	2007	Change
Interest expenses on bank debt	**17,166**	10,998	6,168
Bank commissions	**859**	1,087	(228)
Interest rate hedging charges on bank loans	**3,737**	30	3,707
Charges from discounting to present value	**0**	3	(3)
Total financial expenses from third parties	**21,762**	12,118	9,644

11. Financial income from third parties

This includes:

€ in thousands	2008	2007	Change
Interest income on receivables from:			
- tax authorities	**473**	501	(28)
- banks	**8**	232	(224)
Interest rate hedging income on bank loans	**5,946**	2,544	3,402
Other income	**16**	0	16
Total financial income from third parties	**6,443**	3,277	3,166

12. Personnel costs

These amount to € 3,196 thousand (€ 2,666 thousand in 2007) and show a total net increase of € 530 thousand, of which € 90 thousand is for termination benefit incentives and € 282 thousand for the accrual to the fund under Ministerial Decree 158 dated April 28, 2000.
Details are as follows:

€ in thousands	2008	2007	Change
Salaries	**1,533**	1,592	(59)
Social security contributions	**490**	466	24
Employee severance indemnities, other long-term benefit plans and defined benefit plans and payments of plan contributions	**605**	426	179
Termination benefit incentives	**90**	0	90
Accrual to the solidarity fund (M.D 158 dated 4/28/2000)	**282** (a)	0	282
Other personnel costs	**196**	182	14
Total personnel costs	**3,196**	2,666	530

(a) Additional information is presented in Note 28 “Non-current and current liabilities – Other payables”.

At the end of 2008, employees number 13 (14 at the end of 2007).
The average number of employees in 2008 was 14 (as in 2007), summarized by category as follows:

	2008	2007
Managers	**2**	2
Middle management	**4**	2
Clerical staff	**5**	7
Messengers	**3**	3
Average number of employees	**14**	14

Compensation policies
The overall compensation is composed of a fixed and a variable portion, as well as additional benefits.

The fixed compensation is connected to the responsibilities of the person's role, the level of individual expertise and the experience acquired; the variable compensation is tied to objectives and rewards for the results of the work performed by that person both individually and in a team.

Further discretionary bonuses may be paid for exemplary performance in transactions which create value for the company.
The additional benefits, mainly in reference to personnel with management responsibilities, include supplementary pension plans, health care plans (extended in 2008 to employees and messengers by signing up for an insurance plan taken out with a leading insurance company) death and disability insurance coverage, loyalty bonuses and, where provided for, the use of a company car.

Additional information on employee benefits is presented in Note 27.

13. Purchases of goods and services from third parties

These amount to € 847 thousand and decreased by € 27 thousand compared to 2007 (€ 874 thousand). The main costs are indicated below:

€ in thousands	**2008**	2007	Change
Compensation:			
- Board of Statutory Auditors	**146**	146	0
- Supervisory Board	**6**	6	0
- Common representative of preferred stockholders	**3**	3	0
- Supplementary contribution	**5**	5	0
	160	160	0
Consulting	**317**	331	(14)
Office management	**147**	122	25
Insurance	**65**	62	3
Audit fees	**33**	32	1
Travel expenses, entertainment and transportation	**31**	55	(24)
Rentals	**18**	15	3
Bank expenses and fees	**12**	29	(17)
Other expenses	**64**	68	(4)
Total purchases of goods and services from third parties	**847**	874	(27)

14. Other current operating expenses

In 2008, these total € 1,782 thousand, of which € 1,058 thousand refers to non-deductible VAT (96% of the total). In 2007, these totaled € 1,028 thousand, of which € 272 thousand was for non-deductible VAT (87% of the total). The increase in non-deductible VAT (€ 786 thousand) is due to the invoicing in 2008 of the expenses relating to the merger by incorporation of IFIL.

Details are as follows:

€ in thousands	**2008**	2007	Change
Non-deductible VAT	**1,058**	272	786
Donations	**339**	329	10
Stockholders' meetings expenses	**155**	170	(15)
Securities listing fees	**70**	74	(4)
Publications of annual, first-half and quarterly financial statements	**61**	63	(2)
Association dues	**52**	56	(4)
Sundry	**47**	64	(17)
Total other current operating expenses	**1,782**	1,028	754

15. Income taxes

The taxable base calculated in accordance with tax laws did not generate any current income tax expense for the year 2008.

Since the probability of recovery against future taxable income currently is not assured, no deferred tax assets have been booked on the tax losses for the years 2004 to 2008 (€ 94 million, in total).

Details are as follows:

	2008		2007	
€ in millions	**Amount**	**Theoretical tax effect (27.5% rate)**	Amount	Theoretical tax effect (27.5% rate)
Tax losses carryforwards (for a maximum of 5 years)				
- year 2003			147	
- year 2004	**20**		20	
- year 2005	**33**		33	
- year 2006	**28**		28	
- year 2007	**11**		11	
- year 2008	**2**			
Total tax losses carried forward	**94**	**26**	239	66

Considering that the Irap taxable base is negative, the following tables show the reconciliation between pre-tax profit and taxable income for Ires purposes.

€ in millions	**2008**	2007
Pre-tax profit	**49**	54
Changes up (down):		
- non-deductible net financial expenses	**17**	0
- 95% of dividends received	**(69)**	(64)
- other, net	**1**	(1)
Loss for the year for tax purposes	**(2)**	(11)

The company has agreed the tax years up to December 31, 2003.

COMMENTS ON THE PRINCIPAL LINE ITEMS IN THE SEPARATE BALANCE SHEET

16. Non-current assets – Investments

Details of investments, which only include investments accounted for at cost, are as follows:

€ in thousands	**12/31/2008** **% of class of stock**	**Amount**	12/31/2007 % of class of stock	Amount	Change
Investments accounted for at cost					
IFIL S.p.A. (ordinary shares)	69.99	**2,236,103**	69.70	2,220,167	15,936
IFIL S.p.A. (savings shares)	4.99	**6,384**	4.99	6,384	0
		2,242,487		2,226,551	15,936
Emittenti Titoli S.p.A.	6.43	**272**	6.43	272	0
Deutsche Morgan Grenfell Capital Italy S.A. (a)					
- Class A shares	0.66	**4**	0.66	53	(49)
- Class B shares	1.28	**0**	1.28	1	(1)
Total investments		**2,242,763**		2,226,877	15,886

(a) In a wind-up.

In January 2008, 2,950,000 IFIL ordinary shares (0.29% of the class of stock) were purchased on the market for an equivalent amount of € 15,936 thousand, net of dividends of € 295 thousand received on those same shares which were accounted for as a deduction from the purchase price.

An impairment loss was recorded on Deutsche Morgan Grenfell Capital Italy shares for a total of € 50 thousand on the basis of the equity of that company at December 31, 2007 in the latest approved financial statements.

Comparison between the carrying amounts and market prices of IFIL shares held at the end of 2008:

		Carrying amount		Market price December 30, 2008	
	Number	Per share (€)	Total (€ thsd)	Per share (€)	Total (€ thsd)
IFIL S.p.A.					
- ordinary shares	726,900,000	3.08	2,236,103	1.86	1,354,215
- savings shares	1,866,420	3.42	6,384	1.66	3,096
Total			**2,242,487**		**1,357,311**

The carrying amount of the investment in the listed company IFIL S.p.A. (merged on March 1, 2009) at the end of the year is € 885 million higher than its market price at the same date (€ 2,412 million lower at year-end 2007). The market prices of IFIL S.p.A.'s shares were particularly penalized although this does not correspond to the operating performance and financial condition of the company reflected in its 2008 consolidated financial statements. Given the fact that the results of the IFIL Group, which ended the year 2008 with a profit in both the consolidated (€ 445 million) and separate (€ 356 million) financial statements and that the attributable consolidated equity of the IFIL Group per share, € 5.46 at December 31, 2008, is higher than the carrying amount indicated above, and in consideration of the importance of the interest owned and the company's positioning in the stockholder structure, for which measurement at the market price (heavily influenced by the current economic situation) is not very representative, it is deemed that the conditions for conducting an impairment test of the investment held in IFIL S.p.A. do not exist at December 31, 2008.

Furthermore:

- there are no investments requiring the assumption of unlimited responsibility for their obligations (art. 2361, paragraph 2 of the Italian Civil Code);
- there are no investments held as collateral for financial liabilities and contingent liabilities.

The following details present the additional disclosures required by the Italian Civil Code (art. 2427, paragraph 5) and Consob (Communication 6064293 dated July 28, 2006):

	Capital stock			IFI Investment					Equity	Profit
	Number of shares	Par value	Amount	Number of shares	% ownership of Cap. st.	% ownership of Cl. of st.	Carrying amount Per share (€)	Carrying amount €/000	€/000	€/000
IFIL S.p.A. - Turin									3,917,000 (a)	445,000 (a)
- ordinary shares	1,038,612,717	€ 1	1,038,612,717	726,900,000	67.56	69.99	3.08	2,236,103		
- savings shares	37,383,020	€ 1	37,383,020	1,866,420	0.17	4.99	3.42	6,384		
Total	1,075,995,737		1,075,995,737		67.73			2,242,487		

(a) Data taken from the consolidated financial statements at December 31, 2008.

17. Non-current and current assets – Other financial assets

Details are as follows:

	12/31/2008		12/31/2007	
€ in thousands	**Non-current**	**Current**	Non-current	Current
Fees for opening credit lines	**404**	**197**	228	154
Fair value of cash flow hedge derivatives	**0**	**0**	0	1,776
Accrued financial income from swaps	**0**	**60**	0	312
Total other financial assets	**404**	**257**	228	2,242

18. Current assets – Tax receivables

Tax receivables from the tax authorities refer to:

€ in thousands	**12/31/2008**	12/31/2007	Change
Receivables for prior years' taxes, refunds requested	**19,328**	18,855	473
Receivables for current and prior years' taxes, carried forward	**3**	63	(60)
VAT receivable	**63**	53	10
Total tax receivables	**19,394**	18,971	423

The change in receivables from the tax authorities for the year 2008 is summarized as follows:

€ in thousands	Refunds requested for IRES taxes	Carried forward for IRES taxes	VAT	Total
Balances at December 31, 2007	**18,855**	**63**	**53**	**18,971**
Used for compensation of withholdings	0	(63)	0	(63)
Interest earned during the year	473	0	0	473
Receivables generated during the year	0	3	10	13
Balances at December 31, 2008	**19,328**	**3**	**63**	**19,394**

19. Current assets – Other receivables

At December 31, 2008, these amount to € 3,988 thousand, of which € 3,939 thousand is for deferred expenses relating to the merger by incorporation of the subsidiary IFIL.

20. Equity – Capital stock

At December 31, 2008, the capital stock, fully subscribed to and paid-in, amounts to € 163,251,460 and consists of 86,450,000 ordinary shares (52.96% of capital stock) and 76,801,460 preferred shares (47.04% of capital stock) with a par value of € 1 each. The ordinary capital stock of the company is held entirely by Giovanni Agnelli e C. S.a.p.az. Only preferred shares are listed on the Electronic Share Market of the Italian Stock Exchange (Blue Chip segment).

On March 1, 2009, the capital stock of EXOR was increased from € 163,251,460 to € 246,229,850 through the issue of 73,809,496 ordinary shares and 9,168,894 savings shares, all with a par value of € 1, with dividend rights from January 1, 2008. Such shares were attributed to the stockholders of the merged company IFIL in a ratio of 0.265 EXOR ordinary shares for each IFIL ordinary share and 0.265 EXOR savings shares for each IFIL savings share.

Following the merger, the capital stock of EXOR amounts to € 246,229,850 and consists of 160,259,496 ordinary shares, 76,801,460 preferred shares and 9,168,894 savings shares, all with a par value of € 1.

The directors have the right, for a period of five years from the date of the resolution passed on May 14, 2008, to increase, one or more times, also in divisible form, the capital stock up to an amount of € 561,750,000.

The ordinary and preferred shares are registered shares while the savings shares can either be registered or bearer shares, as elected by the stockholders, or as set out by law. The preferred shares have voting rights only for the resolutions set forth in art. 2365 of the Italian Civil Code and the second paragraph of art. 13 of the bylaws (regulations for conducting stockholders' meetings). The savings shares do not have voting rights in the stockholders' meetings. Pursuant to art. 146 of Legislative Decree 58/98, the savings shares have voting rights in the special stockholders' meetings of the holders of savings shares.

Pursuant to art. 27 of the bylaws, the profit of each year shall be appropriated as follows:

- 5% to the legal reserve until it reaches one-fifth of capital stock;
- the remaining profit, as dividends, unless otherwise resolved by the stockholders' meeting, in accordance with the applicable provisions, taking into account that, in the order of priority (i) the savings shares shall be entitled to a preference dividend, cumulative according to the following second paragraph, equal to 31.21% of their par value and a dividend higher than that of the ordinary shares equal to 7.81% of the same par value, and (ii) the preferred shares shall be entitled to a preference dividend and higher than that of the ordinary shares by 5.17% of their par value, which is not cumulative from one year to the next.

When in any one year, the dividends attributed to the savings shares are lower than that indicated above, the difference shall be added to the preference dividend of the next two years.
In the event the ordinary and/or savings shares are delisted, the preference dividend and the dividend higher than that of the ordinary shares to which the savings shares are entitled, shall automatically be increased to the extent that they are equal to, respectively, 32.15% and 8.75%
In the event of the distribution of reserves, the savings shares shall have the same rights as the other shares.

The board of directors, during the course of the year, to the extent that it considers it appropriate and possible in relation to the results of operations, may resolve to pay interim dividends on the dividends of the same year.

In accordance with art. 28 of the bylaws, dividends that are not claimed within 5 years of the date they become payable will be statute-barred and become the property of the company and appropriated to the Extraordinary Reserve.

In accordance with art. 30 of the bylaws, in the event of a wind-up, the assets of the company shall be distributed in the following order of priority:

- savings shares shall have a pre-emptive right up to the amount of € 3.78 per each savings share;
- preferred shares shall have a pre-emptive right up to the par value of the same shares;
- ordinary shares shall have up to the par value of the same shares;
- all three classes of stock shall have any balance remaining in an equal pro rata amount.

At December 31, 2008, capital stock includes € 1,325 thousand from transfers of revaluation reserves set up in the past which, in the event of distribution, would form part of the taxable income of the company.

The objectives identified by EXOR and the companies in the "Holdings System" are to create value for all stockholders, safeguard business continuity, diversify investments by sector and geography and support the growth of investment holdings.
EXOR thus aims to maintain an adequate level of capitalization which allows it to obtain a satisfactory economic return for its stockholders and guarantee economic access to external sources of financing.
EXOR constantly monitors changes in the consolidated debt level of the Holdings System in relation to the current asset value of the investments and expected dividend flows from the operating holdings.
Although currently insignificant, a very prudent approach is adopted with regard to the use of financial leveraging.

21. Equity – Capital reserves

At December 31, 2008, the balance of € 386,347 thousand, unchanged compared to the end of the prior year, relates only to Additional paid-in capital.

22. Equity – Retained earnings and other reserves

Details are as follows:

€ in thousands	**12/31/2008**	12/31/2007
Revaluation reserve Law 74, 2/11/1952	**157**	157
Revaluation reserve Law 576, 12/2/1975	**16,940**	16,940
Revaluation reserve Law 72, 3/19/1983	**64,265**	64,265
Legal reserve	**32,650**	32,650
Cash flow hedge reserve	**(4,910)**	1,776

Legal reserve	**32,650**	B	**0**
Cash flow hedge reserve	**(4,910)**		**0**
Reserve for purchase of treasury stock	**200,000**	A,B,C	**200,000**
Extraordinary reserve (c)	**1,051,350**	A,B,C	**980,873**
Retained earnings	**331**		**0**
Total	**1,747,588**		**1,649,040**

A: For capital increases B: For coverage of losses C: For distribution to stockholders

(a) Since the legal reserve is equal to one-fifth of capital stock at December 31, 2008, additional paid-in capital is available (art. 2431 of the Italian Civil Code).

(b) The revaluation reserves can be used for free increases of capital stock. If used to cover losses, they must be later replenished, if not, then no dividends can be distributed. They may not be used to set up the reserve for the purchase of treasury stock. The monetary revaluation reserves can be reduced only by resolution of the stockholders' meeting and in observance of the prescriptions indicated in art. 2445, paragraphs 2 and 3 of the Italian Civil Code.

(c) The reserve is freely distributable except to the extent of the amount deriving from the reallocation of the reserve offsetting the stock in portfolio.

In the years 2005, 2006 and 2007, reserves were not used to absorb losses.

At December 31, 2008, tax-deferred reserves are recorded for a total of € 83,394 thousand, of which € 81,362 thousand relates to the monetary revaluation reserves and € 2,032 thousand to the legal reserve. In the event of distribution, these reserves would form part of the taxable income of the company.
In view of the unlikelihood of their distribution, no deferred taxes have been set aside in respect of such reserves.

At December 31, 2008, € 3,939 thousand of deferred expenses relating to the merger by incorporation of the subsidiary IFIL are recorded in current assets – other receivables. This amount is recorded, together with the costs incurred by IFIL, as a deduction from additional paid-in capital at March 1, 2009.

24. Equity – Treasury stock

At December 31, 2008, IFI S.p.A. directly held the following preferred shares of treasury stock:

		Amount		% of class
€ in thousands	Number	Per share (€)	Total (€ in thsd)	of stock
IFI – preferred shares	5,360,300	13.15	70,477	6.98

In 2008, there were no transactions involving preferred shares of treasury stock.

The ordinary session of the stockholders' meeting held on December 1, 2008, which revoked the previous May 14, 2008 resolution with effect on March 1, 2009, authorized the purchase of treasury stock for 18 months, pursuant to art. 2357 of the Italian Civil Code and art. 132 of Legislative Decree 58, for a maximum of 16 million shares, for a maximum amount of € 200 million.

25. Current and non-current liabilities – Bank debt

Non-current bank debt amounts to € 150 million (€ 100 million at December 31, 2007). Interest rate swaps are in place to guarantee fixed interest rates on the entire amount; at December 31, 2008, the fair value on these contracts is negative for € 4.9 million. Bank debt is classified in non-current liabilities in relation to the residual period of the credit line granted and the duration of the relative hedging contracts.

The current portion of bank debt amounts to € 16.2 million (€ 294.3 million at December 31, 2007) and includes a loan for € 14 million due by January 2009 and bank overdrafts for the remaining amount (€ 2.2 million).

With regard to the periods in which the outgoing cash flows relating to interest rate swap contracts will reverse, reference should be made to Note 30.

At December 31, 2008, the company has credit lines for € 1,115.6 million, of which € 495.6 million is revocable and € 620 million is irrevocable. The expiration dates of the latter are as follows:

€ in millions	
Within 1 year	50
Between 2 and 3 years	405
Between 4 and 5 years	165
Total	**620**

The loan contracts relating to irrevocable lines of credit provide for commitments which are common practice in the sector for this type of debt. In particular, some of the main commitments included in certain contracts refer to the obligation of periodic disclosure, not setting up new real guarantees on the assets of the company without the prior consent of the creditors, the non-subordination of the loan, as well as, in some cases, compliance with financial ratios. Finally, there are clauses that could change the duration in the case of serious non-fulfillment such as, for example, failure to pay interest or when extremely important events arise such as a request to place the company under administration.

26. Non-current liabilities – Deferred tax liabilities

At December 31, 2008, deferred tax liabilities amount to € 3,333 thousand, unchanged compared to the prior year.

The deferred income taxes originated from temporary differences between the carrying amount and the fiscally recognized amount of the investment held in the subsidiary IFIL.

27. Non-current liabilities – Provisions for employee benefits

The composition is as follows:

€ in thousands	**12/31/2008**	12/31/2007
Employee severance indemnities	**1,966**	1,918
Other provisions for employees	**47**	227
Total provisions for employee benefits	**2,013**	2,145

Details of the changes during 2008 and 2007 are as follows:

	2008			2007		
€ in thousands	**Employee severance indemnities**	**Other provisions for employees**	**Total**	Employee severance indemnities	Other provisions for employees	Total
Balance at beginning of year	**1,918**	**227**	**2,145**	1,746	64	1,810
Current service cost	**129**	**101**	**230**	113	35	148
Financial expenses	**83**	**3**	**86**	65	38	103
Contributions paid by employees			**0**	0	0	0
Actuarial (gains) losses	**5**	**(250)**	**(245)**	(2)	92	90
Benefits paid	**(169)**	**(34)**	**(203)**	(4)	(2)	(6)
Past service cost			**0**	0	0	0
(Gains) losses on curtailments and/or settlements			**0**	0	0	0
Plan changes			**0**	0	0	0
Balance at end of year	**1,966**	**47**	**2,013**	1,918	227	2,145

The analysis of employee benefits is as follows:

Employee severance indemnities

Employee severance indemnities represent the obligation due to employees by Italian law (recently amended by Law 296/06) that has accrued and which will be paid upon termination of employment. In certain circumstances, a portion of the indemnity may be paid as an advance during the employee's service life. This is an unfunded defined benefit plan, considering the benefits almost entirely accrued, with the sole exception of the revaluation.

After the change made to the regulations for employee severance indemnities by Law 296 dated December 27, 2006 (Budget Law 2007), and subsequent decrees and regulations, for those employees who have asked, the portion of employee severance indemnities accruing from January 1, 2007 has been transferred to a complementary pension plan chosen by the employees and these therefore fall under defined contribution plans.

For those employees who did not elect the transfer of the accrued portion of employee severance indemnities, beginning January 1, 2007, the calculation of employee severance indemnities, including the portion accruing, will be made according to the usual actuarial method.

Besides employee severance indemnities, established by art. 2120 of the Italian Civil Code, EXOR S.p.A. guarantees other forms of benefits (termination benefits, loyalty bonuses, health care plans, defined benefit and defined contribution pension plans) under company or individual supplementary agreements, described below.

Termination benefits

This is a fixed amount in addition to employee severance indemnities which will be paid at the time and in relation to the termination of the employment relationship, at the currently-expected retirement age, on the basis of existing legislation, at the age of 65 for men and at the age of 60 for women. Any raising of the retirement age for whatsoever reasons will have no effect on the payment of these benefits. In the eventuality of the termination of employment for whatsoever reason prior to the legal retirement age indicated above, the benefits shall be paid for the amount accrued up to the date of termination of employment, compared with and in proportion to the years of service since January 1, 2000 up to the date of the termination of employment. No interest or revaluations of any sort accrues on the amount.

Health care plans

Health care plans, historically offered to management staff, have been extended to all employees since the end of 2007, and require the payment of defined contributions to outside funds and entities which pay the health care benefits.

Pension plans

The company's pension plans are for employees categorized as managers and are covered by company agreements and regulations.

They can be "defined benefit" or "defined contribution" plans and provide for the payment of contributions to outside funds that are legally separate and have autonomous assets.

The plans provide for a contribution by the employer and a contribution by the employee plan participant, also by conferring a part of his/her employee severance indemnity.

The liabilities for contributions payable are included in "Other payables". The contribution cost for the period accrues on the basis of the service rendered by the employee and is recognized in personnel costs.

Other benefits

Other benefits include loyalty bonuses payable to all employees.

Loyalty bonuses accrue and are paid after a certain number of years of service (25, 30, 35 and 40 years).

Other information

The actuarial calculations required to determine the liability of defined benefit plans are performed by an independent actuary at the end of each year. At December 31, 2008 and December 31, 2007, the liability has been calculated on the basis of the following actuarial assumptions:

	12/31/2008	12/31/2007
Discount rate	**4.80%**	4.60%
Expected remuneration increase	**2.2-3.70%**	2-3.50%
Cost-of-living increase	**2.20%**	2.00%

In addition to the above financial indexes, account has also been taken of all the demographic assumptions relating to the probability of events such as death, disability, dismissal and retirement of the employees.

Defined benefit plans may be unfunded or they may be wholly or partly funded by contributions paid by the employer and the employee plan participants to an entity, or fund, that is legally separate from the employer and from which the employee benefits are paid.

28. Non-current and current liabilities – Other payables

Details are as follows:

	12/31/2008		12/31/2007	
€ in thousands	**Non-current**	**Current**	Non-current	Current
Payables to INPS for solidarity fund under M.D. 158 dated 4/28/2000	**189**	**77**	0	28
Payables to employees	**0**	**317**	0	380
Payables for contributions	**0**	**202**	0	186
Fees payable to statutory auditors	**0**	**150**	0	150
Sundry	**0**	**2**	0	2
Total other payables	**189**	**748**	0	746

The Ministerial Decree 158 dated April 28, 2000 set up the “Solidarity fund for the support of the earnings, employment, reconversion and professional requalification of credit personnel”, which enjoys autonomous financial and asset management. The fund, in exceptional cases, issues checks to support the earnings of employees, on request of the employer and up to the date of entitlement to the retirement or old age pension, for employees who possess the requisites within a maximum period of 60 months from the date of termination of employment.

The payables relating to the above (€ 266 thousand in total, of which € 77 thousand is current and € 189 thousand is non-current) represent the extraordinary contribution that EXOR shall have to pay to cover the exceptional checks payable to former employees, including the relative contribution.

The difference of € 16 thousand between the total payable to INPS for the Solidarity Fund, equal to € 266 thousand, and the accrual recorded in the income statement (€ 282 thousand, please refer to Note 12 “Personnel Costs”) originated from discounting to present value the non-current portion which was credited to the income statement as financial income.

29. Current liabilities – Other financial liabilities

At December 31, 2008, these amount to € 5,460 thousand (€ 1,036 thousand at year-end 2007) and mainly include the measurement of swap contracts (€ 4,910 thousand) and other financial items (€ 550 thousand).

30. Additional information on financial instruments and financial risk management policies

The carrying amounts and the relative income (expenses) originating from each category of asset and liability classified in accordance with IAS 39 is presented as follows:

	12/31/2008		
€ in thousands	carrying amount	income	expenses
Financial assets			
At fair value through profit or loss			
held for trading

Total	**395,652**	**0**	**12,088**

Fair value of financial assets and liabilities and fair value estimation criteria

For EXOR S.p.A., the carrying amount of financial assets and liabilities approximates their fair value.

The fair value of trade receivables and payables and other current assets and liabilities due within the year is not significant as their accounting amount approximates fair value.

Credit risk

EXOR S.p.A. is not in effect subject to credit risk as the counterparts are mainly high-credit-quality leading banking institutions.

At December 31, 2008 and December 31, 2007, there are no financial assets past due and impaired and provisions for the impairment of receivables.

Liquidity risk

The details of residual contract maturities for all financial liabilities which fall under the application of IAS 39 are indicated in the table below.

The table is prepared on the basis of the allocation of the remaining cash flows from existing contracts, including principal and interest; with regard to floating-rate loans, the most recent coupon rate with the bank counterpart was used for the projection of future maturities.

Flows relating to non-current and current bank debt are hedged by the interest rate swaps referred to in Note 25.

	2008					
€ in thousands	Within 6 months or until canceled	Between 6 months and 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	Total
Bank debt, non-current	3,521	3,482	157,233			164,236
Bank debt, current	16,181					16,181
Payables to related parties (a)	199,687					199,687
Trade payables to third parties	189					189
Derivatives designated as hedges	4,910					4,910
Total	**224,488**	**3,482**	**157,233**	**0**	**0**	**385,203**

(a) This refers to the subsidiary IFIL S.p.A. merged in 2009.

	2007					
€ in thousands	Within 6 months or until canceled	Between 6 months and 1 year	From 1 to 3 years	From 3 to 5 years	Beyond 5 years	Total
Bank debt, non-current	2,422	2,422	109,723			114,567
Bank debt, current	296,756					296,756
Payables to related parties	147					147
Trade payables to third parties	146					146
Total	**299,471**	**2,422**	**109,723**	**0**	**0**	**411,616**

Outgoing flows from current operations are financed for the most part by incoming flows from ordinary activities and cash availability.

Liquidity risk could thus arise only in the event of investment decisions in excess of cash availability that are not preceded by sufficient liquidations of assets or the receipt of suitable sources of financing that can be readily used. In this sense, EXOR S.p.A. operates so as to have irrevocable credit lines available with expiration dates and amounts consistent with its investment plans.

Market risk

EXOR S.p.A. is principally exposed to the following financial risks: currency, interest rate and price.

Currency risk
EXOR S.p.A. does not have either financial assets or liabilities denominated in currency other than Euro and is therefore not subject to direct currency risks.

Interest rate risk
The analysis of debt by interest rate shows that the rates are between 3% and 4% in 2008 (between 3.5% and 5.5% in 2007).

EXOR S.p.A. has some interest rate swap contracts in place at December 31, 2008, for a total notional amount of € 150 million. They are used to hedge the risk of fluctuations in interest rates on bank debt with a negative fair value equal to € 4,910 thousand.

A sensitivity analysis was performed on financial instruments exposed to interest rate risk at the balance sheet date. The analysis assumes that the exposure for floating-rate liabilities at the end of the year has remained unchanged for the entire year. The assumptions used for the model are as follows:

- for debt: a symmetrical change of 50 basis points is applied;
- for interest rate swaps: the fair value is recalculated applying a parallel and symmetrical shift of 50 basis points to the current interest rate curve at the balance sheet date.

The effects of a change with an increase or decrease of 50 basis points in interest rates would be the following:

	12/31/2008		12/31/07	
€ in thousands	**income statement**	**balance sheet**	income statement	balance sheet
+50 bsp				
cash and cash equivalents/financing	**(1,079)**		(721)	
hedging instruments		**188**		417
-50 bsp				
cash and cash equivalents/financing	**1,079**		721	
hedging instruments		**(188)**		(440)

Price risk
EXOR S.p.A. is exposed only to the price risk deriving from its strategic investment in IFIL S.p.A., accounted for at cost, which, however, was merged with effect on March 1, 2009.

Sensitivity analysis for price risk
In view of the characteristics of the main investment of the company, a sensitivity analysis of the price risk would not be meaningful.

31. Fees to members of the board of directors and board of statutory auditors

(Art. 78 of Consob Regulation adopted by Resolution 11971 dated May 14, 1999 and subsequent amendments)
All amounts in the following table are expressed in thousands of Euro.

Name	Post held	Term of office	Expiration of term of office (a)	Compensation for post held	Non-monetary benefits	Bonuses and other incentives	Other compensation (b)
Directors in office							
Elkann John	Chairman	1/1-12/31	2009				947
Teodorani-Fabbri Pio	Vice Chairman	1/1-12/31	2009	100			10
Marrone Virgilio	Chief Executive Officer	1/1-12/31	2009	100			
	General Manager	1/1-12/31	2009		17		582 (c)
Acutis Carlo	Director	1/1-12/31	2009				
Agnelli Andrea	Director	1/1-12/31	2009				77
Brandolini D'Adda Tiberto	Director	1/1-12/31	2009				722

Ferrino Giorgio	Statutory Auditor	5/15-12/31	2009				
Piccatti Paolo	Statutory Auditor	5/15-12/31	2009				192
Total Statutory Auditors in office				**42**	**0**	**0**	**192**
Statutory Auditors no longer in office at December 31, 2008							
Ferrero Gianluca		1/1-5/15		62			13
Giorgi Giorgio		1/1-5/15		42			49
Total Statutory Auditors no longer in office at December 31, 2008				**104**	**0**	**0**	**62**

(a) The term of office expires in concurrence with the stockholders' meeting that will approve the financial statements for the year ended December 31, 2008.
(b) Fee for the posts held in companies of the group.
(c) Does not include € 77 thousand paid by Fiat S.p.A. not received but collected directly by IFI.
(d) Includes the special fee of € 5 million approved in favor of Mr Gabetti by the IFIL board of directors on May 13, 2008.

There are no key managers with strategic responsibilities in EXOR S.p.A..

The company also signed a third-party liability insurance policy for the directors with a group of insurance companies for a maximum claim per incident and per year of € 50 million for coverage in the event of requests for reparation of non-fraudulent acts.

In 2008, the chairman, John Elkann, did not receive any fee for his post. The fees of the directors Gianluigi Gabetti and Pio Teodorani-Fabbri are not linked to either the economic results of the company or targets set by the board of directors.
A part of the fees of the general manager, however, is tied to the economic results of the company and the attainment of specific targets.

Stock options granted to the directors and the general manager
(Art. 78 of Consob Regulation adopted by Resolution 11971 dated May 14, 1999 and subsequent amendments)
At December 31, 2008, no stock option plan had been approved.

32. Transactions with related parties

The board of directors has adopted principles of conduct for carrying out transactions with related parties which are described in the Annual Report on Corporate Governance, available also on the website of the company (http://www.exor.com).

With regard to the year 2008, the transactions between EXOR S.p.A. and the related parties identified in accordance with IAS 24 have been carried out as set forth in existing laws, on the basis of reciprocal economic gain.

Receivables and payables are not guaranteed and are settled in cash. Guarantees have neither been granted nor received.
Losses have not been recognized during the year for uncollectible or doubtful receivables in relation to amounts due from related parties.

A summary of the balance sheet and income statement balances generated by transactions with related parties carried out during 2008 is presented below. All amounts are expressed in thousands of Euro:

Counterpart	Trade receivables	Trade payables	Financial payables	
Giovanni Agnelli e C. S.a.p.az.	10			
G.A. Servizi S.r.l.		52		
IFIL S.p.A.	11	24	199,456	(a)
Soiem S.p.A.		118

- Honorary chairman for special mandates	220 (d)		
Directors for services rendered			66
Total transactions with related parties	**1,149**	**1,456**	**209**
Total transactions with third parties	847	21,762	0
Total of the line items in the income statement	**1,996**	**23,218**	**209**
Ratio of total transactions with related parties to the total of the line items in the income statement %	**57.57%**	**6.27%**	**100.00%**

The most important transactions are commented below and are referenced to the notes in the preceding tables.

a) On October 10, 2008, the subsidiary IFIL granted an interest-bearing loan based on the 1-month Euribor with a spread of 0.1%. At the end of 2008, the debt, inclusive of accrued interest of € 1,456 thousand, amounts to € 199,456 thousand. Since this is a transaction between related parties, as established in the rules of Corporate Governance of the two companies, the transaction was approved beforehand by the respective boards of directors on October 10, 2008.
b) Purchases for goods and services from the subsidiary Soiem S.p.A., amounting to € 401 thousand, relate to the lease of the offices of the headquarters in Corso Matteotti 26, computer, telephone and logistics services.
c) Revenues from group companies derive from the performance of services and fees for the posts held by EXOR S.p.A. staff.
d) The fees to directors in 2008 amount to € 420 thousand. The preceding Note 31 presents the information required by art. 78 of Consob Regulation 11971, as amended by Resolution 15520 dated July 2006.

At December 31, 2008, Mr Tiberto Brandolini d'Adda holds 304,153 options to subscribe or purchase the same number of Sequana shares between May 2009 and May 2013 at a price per share of € 20.46; moreover, Sequana has allocated 12,340 free shares to Mr Tiberto Brandolini d'Adda, which will be available from March 29, 2010.

Furthermore, in 2008, the director, Mr Franzo Grande Stevens, rendered professional services to Fiat S.p.A. for € 1 million (including acting as the secretary to the board of directors).

33. Fees paid to the audit firm

(art. 149 – duodecies of Consob Regulation 11971 dated May 14, 1999 and subsequent amendments)

The professional services rendered to EXOR S.p.A. by the audit firm in 2008 are the following:

€ in thousands	Party which rendered the service	Parent EXOR S.p.A.	Consolidated subsidiaries	**Total**

(a) Confirmation of the financial ratios of IFIL Investments and limited review of the balance sheets of IFI and IFIL at June 30, 2008, prepared in accordance with art. 2501-quater of the Italian Civil Code.

(b) Agreed upon procedures regarding the completeness and the updating of the IFRS reporting package of the IFIL Group.

In addition, the fees for professional services paid to the Deloitte & Touche audit firm and its network by the Fiat Group (accounted for using the equity method in the consolidated financial statements of the EXOR Group) was € 22.9 million.

34. Net financial position

In accordance with the provisions of Consob Communication 6064293 dated July 28, 2006, the composition of the net financial position of EXOR S.p.A. is provided below:

€ in thousands	**12/31/2008**	12/31/2007	Change
Cash and cash equivalents	**548**	166	382

- with related parties	**(199,456)**	0	(199,456)
- with third parties	**(170,432)**	(392,723)	222,291

35. Approval of the separate financial statements and authorization for publication

The separate financial statements at December 31, 2008 were approved by the board of directors on March 25, 2009 which authorized their publication starting from March 31, 2009.

Turin, March 25, 2009

On behalf of the Board of Directors
The Chairman
John Elkann

The reconciliation between cash and cash equivalents in the statement of cash flows and the corresponding line items in the balance sheet is presented in Note 25.

EXOR GROUP (formerly IFI GROUP)
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. General information on the activities of the Group

EXOR S.p.A. is the new name that IFI S.p.A. assumed on March 1, 2009, the effective date of the deed of merger by incorporation of the subsidiary IFIL S.p.A., signed on February 20, 2009.
EXOR S.p.A. is a corporation organized under the laws of the Republic of Italy. The head office of the company is located in Turin, Italy, Corso Matteotti 26.
Since March 2, 2009, all three categories of EXOR shares (ordinary, preferred and savings) are traded on the Electronic Share Market of the Italian Stock Exchange. Previously, the ordinary capital stock was wholly owned by the parent, Giovanni Agnelli e C. S.a.p.az., and only the preferred shares were listed.

The assets of the company at December 31, 2008 are principally represented by the controlling investment in IFIL S.p.A., equal to 69.99% of ordinary capital stock.

Additional information is presented in the Report on Operations under “EXOR Group profile” and “Merger by incorporation of the subsidiary IFIL in IFI”.

2. Accounting policies used in the preparation of the consolidated financial statements

The 2008 consolidated financial statements have been prepared under the historical cost convention, adjusted as required for the measurement of certain financial instruments and under the going concern assumption. The Group companies, in fact, have assessed that, despite operating in a difficult economic and financial environment, no material uncertainties exist (as defined in paragraph 23 of IAS 1) about its ability to continue as a going concern.

The consolidated financial statements of the EXOR Group at December 31, 2008 have been prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and endorsed by the European Union. The designation IFRS also includes all valid International Accounting Standards (IAS), as well as all interpretations of the International Financial Reporting Interpretations Committee (IFRIC), formerly the Standing Interpretations Committee (SIC).

The consolidated financial statements have also been drawn up in accordance with the provisions contained in Consob Resolutions 15519 and 15520 and in Communication 6064293 dated July 28, 2006, pursuant to art. 9, paragraph 3, of Legislative Decree 38 dated February 28, 2005.

The consolidated financial statements of the EXOR Group are expressed in millions of Euro.

3. Format of the consolidated financial statements

The consolidated income statement is presented by nature of expense which is considered more representative than the presentation based on the function of expenses used by the operating companies consolidated line-by-line.

The consolidated balance sheet makes a distinction between current and non-current assets, in accordance with IAS 1.

The consolidated statement of changes in equity presents the total income and expense recognized directly as an increase and decrease of reserves in a specific section.

The consolidated statement of cash flows is presented using the indirect method. Income and expenses for the year are adjusted by the effects of non-monetary transactions, by past or future deferrals or accruals of operating collections or payments and by financial elements due to investment or financing activities.

The Euro is the functional currency and presentation currency of the Group.

4. Unusual and/or atypical transactions and significant nonrecurring events and transactions and related party transactions

Pursuant to Consob Communication 6064293 dated July 28, 2006, during 2008, there are no unusual and/or atypical transactions or significant nonrecurring events and transactions, also on the basis of information received from the companies of the Group, which are required to be disclosed as defined by that Communication.

Minor nonrecurring transactions are disclosed in Note 13.

The balance sheet and income statement balances originating from transactions with related parties are summarized and commented in Note 39.

5. Significant accounting policies

Consolidation

The companies in which the Group has the power to exercise control, directly or indirectly, by determining the financial and operating policies of an enterprise so as to gain benefits from its activities are consolidated line-by-line, attributing to the minority interest the share of equity and the net result.

The financial statements of subsidiaries as defined above are included in the consolidated financial statements from the date that control by the Group commences until the date that control ceases.

Pending possible amendments to IAS 27 proposed in the Exposure Draft ED 10 “Consolidated Financial Statements”, that should definitively clarify the criteria that will permit a verification of the presence of de facto control in accordance with IAS 27, the EXOR Group has continued to exclude the Fiat Group, in which the subsidiary IFIL S.p.A. has a 30.45% holding of ordinary capital stock, from line-by-line consolidation consistently with the method followed for the first-time adoption of IFRS and the preparation of the consolidated financial statements at December 31, 2005 and thereafter.
However, in order to provide more meaningful disclosure, Note 42 presents consolidated pro-forma data as if the Fiat Group had been consolidated line-by-line.

The investment in the Fiat Group, the companies controlled and excluded from consolidation, the joint ventures, the associates and the other investments are accounted for by the equity method as stated according to the criteria indicated in “Investments in unconsolidated companies”.

The results of discontinued operations or assets held for sale which meet the specific requirements of IFRS 5 are shown separately and correspond to the results achieved up to the time of disposal, after taxes and other direct attributable costs, as well as the gains (losses) on their sale.

The share of the equity and the results of operations attributable to the minority interest are disclosed separately. The minority interest in equity is determined on the basis of the fair value attributed to the assets and liabilities at the date of the acquisition of control, excluding any goodwill referring to them.

When losses in a consolidated subsidiary pertaining to the minority interest exceed the minority interest in the subsidiary's capital stock, the excess is charged to the Group, unless the minority interests are expressly committed to reimbursing the losses, in which case the excess is recorded as an asset in the consolidated financial statements. If no such commitment is in place, should profits be realized in the future, the minority interests' share of those profits will be attributed to the Group, up to the amount necessary to recover the losses previously absorbed by the Group.

The effects of subscribing to capital stock increases when there are different issue prices for the various classes of stock are recognized as changes in equity.

Date of reference: investments are consolidated using the financial statements at December 31, the closing date of the parent, which covers a 12-month period, or accounting data prepared as of the same date (when the closing date differs from that of the parent), adjusted, where necessary, to conform with the accounting principles of the Group. The Alpitour Group, which fiscal year ends on October 31 of each year, is consolidated line-by-line on the basis of the consolidated financial statements ended on that date, since it is impossible to obtain the consolidated accounting data at December 31, on a timely basis without disproportionate expense. Between November 1 and December 31, 2007 and 2008, there were no significant transactions or events which would have required adjustments to the consolidated financial statements of the Alpitour Group. This treatment is allowed by IAS 27 – Consolidated and Separate Financial Statements.

Intragroup transactions: intragroup balances and significant transactions and any unrealized gains and losses between companies consolidated line-by-line are eliminated. Unrealized gains and losses arising from transactions with companies accounted for by the equity method are eliminated to the extent of the Group's interest in those companies. Intragroup losses are not eliminated if they are considered representative of an effective lower value of the asset sold.

Business combinations

Acquisitions of companies and business segments are recorded using the purchase method of accounting. The cost of an acquisition is measured as the sum of the fair value (at the acquisition date) of the assets given (consideration paid), liabilities incurred or assumed and any equity instruments issued by the Group in exchange for the acquisition of the control of the acquired company, plus each cost directly attributable to the acquisition. The identifiable assets, liabilities and contingent liabilities of the company acquired, which meet the conditions for recognition under IFRS 3, are recognized at their fair value at the acquisition date, except for non-current assets (or groups of assets held for sale) which are classified as held for sale, in accordance with IFRS 5, and are recognized and measured at fair value net of selling costs.

Goodwill originating on acquisition is recognized in assets and recorded initially at cost, measured as the excess of the cost of acquisition over the Group's interest in the fair value of the recognized identifiable assets, liabilities and contingent liabilities. If this interest exceeds the cost of acquisition, the values are re-examined and if there is still an excess, it is recognized immediately in the income statement.

The share of the minority interest in the company acquired is recognized initially at the fair value of the assets, liabilities and contingent liabilities recognized.

Investments in unconsolidated companies

The investments in the Fiat Group and in associates (principally Sequana) are accounted for by the equity method in the attached consolidated financial statements. Under this method, such investments are stated at cost, increased or decreased by the Group's share of the changes of the post-acquisition movements in the net assets of the company and any impairment of the investment. When the Group's share of any losses in the unconsolidated companies exceeds its interest, the Group only recognizes the losses if it has assumed legal or constructive obligations or has made payments on behalf of these companies.

Any excess of the cost of acquisition over the Group's interest in the fair value of the assets, liabilities and contingent liabilities of the investees recorded at the date of acquisition is recognized as goodwill. Goodwill is included in the carrying amount of the investment and is tested for impairment in accordance with IAS 36.

Intangible assets

Goodwill: in the case of acquisitions of businesses, the acquired identifiable assets, liabilities and contingent liabilities are recorded at fair value at the date of acquisition.

The excess of the cost of acquisition over the Group's interest in the fair value of those assets and liabilities is classified in the assets in the balance sheet. Goodwill relating to the minority interest of subsidiaries acquired is eliminated. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized in the income statement at the date of acquisition.

On disposal of a part or the whole of a business which was previously acquired and which gave rise to the recognition of goodwill, the residual amount of the related goodwill is included in the determination of the gain or loss on disposal.

In the context of IFRS first-time adoption, the Group elected not to apply IFRS 3 – Business Combinations retrospectively to the acquisitions of businesses that occurred before January 1, 2004; as a consequence, goodwill arising on acquisitions before the date of transition to IFRS has been retained at the previous Italian GAAP amounts, subject to being tested for impairment at that date.

Other intangible assets: purchased or internally-generated are recognized as assets in accordance with IAS 38 – Intangible Assets when they are controlled by the enterprise, where it is probable that the use of the asset will generate future economic benefits and where the costs of the asset can be determined reliably.

Such assets are measured at purchase or manufacturing cost and amortized systematically on a straight-line basis over their estimated useful lives, if these assets have finite useful lives, taking into account estimated realizable value and writedowns for impairment losses. Intangible assets with indefinite useful lives and those not yet in production are not amortized, but tested for impairment annually and more frequently, whenever there is an indication that the asset may be impaired. When, subsequently, there is an indication that an impairment loss may no longer exist or may have decreased, the carrying amount of the asset is increased up to the new estimated recoverable amount which cannot exceed the amount which would have been determined had no impairment loss been recognized. The reversal of an impairment loss is recognized immediately in the income statement.

Intangible assets with a finite useful life are amortized from the time they are ready for use on a straight-line basis over the estimated useful life.

Other intangible assets recognized following the acquisition of an enterprise are capitalized separately from goodwill if they meet the definition of intangible asset and if their fair value can be measured reliably. The costs of such intangible assets are represented by their fair value at the date of acquisition.

Amortization plans and any realizable value are reviewed at least annually.

Players' registration rights: are intangible assets with a finite useful life equal to the duration of the players' contracts. The players' registration rights are recorded at cost discounted to present value, including any incidental expenses.

Players' registration rights are amortized on a straight-line basis over the term of the contracts between the company and each individual player. The original amortization plan can be extended following the early renewal of the contract, starting from the same season in which the contract is renewed. For youth players registered as “giovani di serie”, amortization is taken over five years on a straight-line basis.

Players' registration rights are recognized on the date affixed by the National Professional League giving execution to the contracts for national transfers and the transfer date indicated by the Italian Soccer Federation for international transfers.

Players' registration rights also include sharing receivables and payables ex. art 102-bis of the N.O.I.F (Internal Organizational Rules issued by the Italian Soccer Federation – F.I.G.C.)”.

Player sharing receivables represent the value of the simultaneous repurchase of 50% of the registration rights of the players sold. They are recognized at the adjusted cost and are not amortized as they are used by other companies. Player sharing receivables are written down when the estimated remaining useful life at the end of the sharing period is permanently below the amount recognized. Adjusted cost is the lower of the cost incurred originally under the legal form of agreement between the parties and the actual repurchase value.

Player sharing payables represent the value of the sale of 50% of the registration rights of the players sold. They are recognized at nominal value as a deduction from the value of the registration rights of the player sold to show the actual purchase value. As a result, the amortization of the players' registration rights sold relating to the player sharing agreement is calculated on that lower cost.

When there are indications of an impairment in the players' registration rights (for example, serious injury or significant losses from sales made subsequent to the reporting date) an impairment loss is recorded for the remaining carrying amount.

Property, plant and equipment

Property, plant and equipment are stated at purchase or production cost less accumulated depreciation and impairment losses, if any.

Purchase cost includes all directly attributable costs necessary to make the asset ready for use. When there are current obligations for decommissioning, the carrying amount includes the estimated costs (discounted to present value) to be incurred when the structure is decommissioned which is recognized with a corresponding entry to a specific provision account.

Any capital investment grants are recorded in the balance sheet in liabilities and subsequently allocated systematically to the income statement in relation to the relative depreciation of the assets.

Borrowing costs associated with investments are generally charged to the income statement on an accrual basis.

Assets acquired under finance leases are recognized in property, plant and equipment with a corresponding entry to financial payables to lessors and depreciated on the basis indicated below. Whenever there is reasonable certainty that the asset will not be purchased at the end of lease, depreciation is taken over the period of the lease, if shorter than the useful life of the asset.

If an asset has significant components with different useful lives, these components are recorded and depreciated separately.

Subsequent purchase costs are capitalized only if they increase the future economic benefits of the assets to which they refer. All other costs are recognized in the income statement when incurred.

Property, plant and equipment are depreciated systematically using the straight-line method, from the time they are ready for use, over their estimated useful lives and taking into account estimated realizable value. The carrying amounts are periodically tested for impairment.

The estimated useful lives for the main categories of property, plant and equipment are as follows:

Buildings	from 10 to 40 years
Plant and machinery	from 5 to 20 years
Industrial equipment	from 5 to 20 years
Other assets	from 3 to 25 years

The depreciation plan and the estimate of realizable value are reviewed annually.

The cost of land is recorded separately and is not depreciated since it has an indefinite life.

Impairment losses

At every balance sheet date, the Group reviews the carrying amount of its property, plant and equipment and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If there are indications of impairment, the recoverable amount of those assets is estimated to determine the amount of the impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with an indefinite life, including goodwill, are tested annually for impairment or whenever there are indications that the assets might be impaired.

The recoverable amount of the asset is the higher of fair value less costs to sell and the value in use. In assessing the value in use, the pre-tax estimated future cash flows are discounted to present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset.

If the recoverable amount of an asset (or a cash-generating unit) is lower than the relative carrying amount, the asset is reduced to the recoverable amount. An impairment loss is recognized in the income statement immediately unless the asset is represented by land or buildings other than investment property recognized at revalued amounts, in which case the loss is recognized in the respective revaluation reserve.

Where an impairment loss for assets other than goodwill subsequently no longer exists or has decreased, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but not in excess of the carrying amount that would have been recorded had no impairment loss been recognized. A reversal of an impairment loss is recognized in the income statement immediately unless the asset is measured at revalued cost, in which case the reversal is made to the revaluation reserve.

Non-current other financial assets

Financial investments are recognized and reversed on the trade date if the purchase or sale of an investment is made through a contract which terms require the delivery according to the terms established by the reference market and are initially measured at fair value, increased by transaction costs.
Such financial investments are classified in the following categories: available-for-sale investments and securities and other financial assets held to maturity.

Available-for-sale investments: are measured at fair value which coincides, for listed investments, at the market price on the last day of the reporting period translated, if necessary, at the year-end exchange rate. Unrealized gains and losses are recognized directly in equity, net of the relevant deferred tax effect. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity should be reversed and recognized in the income statement. Given the limited number of available-for-sale investments, such evidence is assessed case by case. The reversal of such impairment losses are subsequently only made through equity. Upon disposal of the asset, the cumulative gains or losses previously recognized in a specific equity reserve are transferred to the income statement.

Dividends on investments held for sale are recognized in the income statement when the Group has the right to receive them.

Available-for-sale securities: represented by debt securities, are initially recognized at cost and subsequently measured at fair value. The difference is recognized in equity. If there is objective evidence that the asset is impaired, the cumulative loss that was recognized directly in equity is reversed and recognized in the income statement. Such impairment losses, when the reasons which gave rise to them no longer exist, are reversed in the income statement but only up to the initial amount.

Securities and other financial assets: held to maturity are recognized and measured at amortized cost.

The amortized cost of a financial asset is the amount at which the financial asset is recognized initially net of principal repayments, decreased by the total amortization of any difference between the initial amount and the maturity amount using the effective interest method, less any writedown (made directly or through the use of an accrual) for impairment or uncollectibility.

The effective interest rate is a method for calculating the amortized cost of a financial asset and allocating the interest over the period of reference. The effective interest rate is the rate that exactly discounts future cash flows for estimated collections (including transaction costs paid) over the expected life of the financial instrument or, if appropriate, over a shorter period.

Bonds with mandatory conversion into stock: are recognized by separating the bond component from the embedded derivative represented by the obligation to convert the bonds into the stock of the issuer at an established maturity date.
At initial recognition, the component represented by the bond is calculated by discounting the cash flows of the instrument to present value using the market rate of a non-convertible bond, recording the embedded derivative as the difference from the price paid.
Subsequently, the bond component is measured at amortized cost whereas the embedded derivative is measured at fair value with a corresponding entry to the income statement.

Current financial assets

Current financial assets include equity shares, credit instruments and other forms of investment of liquidity, as well as derivative instruments for trading.

Financial assets purchased originally for resale in the short-term are measured at year end at fair value using, for listed securities, the market price translated, if necessary, at the year-end exchange rate. The fair value adjustment of current financial assets is recorded with a corresponding entry in the income statement.

Cash and cash equivalents

Cash and cash equivalents represent highly liquid short-term financial investments which can be readily converted into cash and are subject to an insignificant risk of a change in their value.

Inventories

Inventories are stated at the lower of purchase or production cost and estimated realizable value determined using the weighted average cost method or FIFO (First In, First Out).

Inventories of finished and semifinished goods included direct costs of materials and labor and indirect variable and fixed overheads, excluding general and administrative expenses. The market price takes into account writedowns for inventory obsolescence.

Assets held for sale

Assets, or a group of assets and liabilities (that must not be offset), which are highly probable of being sold within the next year and are available for immediate sale in their current condition, are classified on specific lines on the balance sheet. If they represent significant sectors of activities, the relative results are shown separately in the income statement. In order to meet this condition, management must be committed to a plan to sell, which is highly probable of taking place within one year of classification in this category. The disclosure relating to the results of such assets, is shown separately also for the prior period.

Such assets are stated at the lower of the net carrying amount and fair value less costs to sell. Any impairment loss that arises should be recorded in the income statement and, eventually, is reversed subsequently if the reasons for the impairment no longer exist, but only up to the initial amount. From the time the asset is recognized as an asset held for sale, amortization and depreciation cease. Financial expenses and expenses attributable to the liabilities of a disposal group classified as held for sale should continue to be recognized.

When the conditions which led to the recognition of an asset as held for sale no longer exist, it should be reclassified to non-current assets and stated at the lower of the carrying amount before being designated as held for sale and its recoverable amount at the date of the subsequent decision not to sell the asset; the difference is recognized in the income statement.

Receivables and payables

Receivables are initially recognized at their nominal amount which substantially coincides with fair value.

If there is objective evidence of an impairment loss or a risk that the Group will not be able to collect the contractual amount (principal and interest) at the contractually agreed dates, a provision is set aside which corresponds to the difference between the asset's carrying amount and the present value of estimated recoverable future cash flows, discounted at the effective interest rate.

Payables are initially recognized at their nominal amount, reduced by expenses incurred to assume them and increased by interest expense due, if any. Payables are subsequently measured at amortized cost using the effective interest method.

Receivables sold with recourse remain in the balance sheet of the assignor which records a payable to the buyer against collection and the financial expense to be incurred.

Receivables sold without recourse are only derecognized if it can be demonstrated that the risks and rewards relating to the asset have been effectively transferred to the assignee.
Consequently, all receivables sold which do not meet IAS 39 derecognition requirements remain in the Group financial statements even though they have been legally sold. A corresponding financial liability is recorded in the consolidated balance sheet in debt. Gains and losses relating to the sale of such assets are not recognized until the assets are removed from the Group balance sheet.

Debt

Interest-bearing debt is recognized at cost which corresponds to the fair value of the amount received net of directly attributable costs. Debt is subsequently measured at amortized cost. The difference between amortized cost and the amount to be repaid is recognized in the income statement on the basis of the effective interest rate over the period of the loan.
Debt is classified in current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

The amortized cost of a financial liability is the amount at which the financial liability was recognized initially net of principal repayments, increased or decreased by the total amortization on any difference between the initial amount and the maturity amount using the effective interest method.

The effective interest rate is a method for calculating the amortized cost of a financial liability and allocating the interest over the period of reference. The effective interest rate is the rate that exactly discounts future cash flows for estimated payments (including transaction costs paid) over the expected life of the financial instrument or, if appropriate, over a shorter period, at the net carrying amount of the financial liability.

Derivative financial instruments and hedge relationships

Derivative financial instruments are recognized initially at fair value at the date the contracts are entered into and are subsequently measured at fair value at year-end. The resulting gains or losses are recognized in the income statement immediately, unless the derivative is designated and is effective as a hedging instrument, in which case the times for recognition in the income statement depend upon the nature of the hedge relationship. The Group designates certain derivatives as fair value hedges of certain assets or liabilities recognized in the financial statements or as cash flow hedges of certain highly probable forecast transactions.

A derivative is classified as a non-current asset or liability if the maturity date of the instrument is beyond 12 months and it is not expected to be realized or settled within 12 months. Other derivatives are classified as current assets or liabilities.

Financial instruments qualify for hedge accounting only when there is formal designation and documentation, including the company's risk management objective and strategy, and the hedge, verified periodically, is highly effective.

When financial instruments qualify for hedge accounting, the following accounting treatment applies:

- Fair value hedge: where a derivative financial instrument is designated as a hedge of the exposure to changes in fair value of a recognized asset or liability that is attributable to a particular risk and could affect the income statement, the gain or loss from re-measuring the hedging instrument at fair value is recognized in the income statement, together with the change in fair value of the hedged item. The gain or loss from the change in fair value of the hedging instrument is recognized on the same line of the income statement as the hedged item.

- Cash flow hedge: where a derivative financial instrument is designated as a hedge of the exposure to variability in cash flows of a recognized asset or liability or a highly probable forecast transaction and could affect profit and loss, the effective portion of any gain or loss of the derivative financial instrument is recognized directly in equity. The cumulative gain or loss is removed from equity and recognized in the income statement at the same time in which the hedged transaction affects the income statement. The gain or loss associated with a hedge or part of a hedge that has become ineffective is recognized in the income statement immediately. When a hedging instrument or hedge relationship is terminated but the hedged transaction is still expected to occur, the cumulative gain or loss realized to the point of termination remains in equity and is recognized in the income statement at the same time the related transaction occurs. If the hedged transaction is no longer probable, the cumulative unrealized gain or loss held in equity is recognized in the income statement immediately.

If the conditions of IAS 39 are not met, the transactions, even if they have been set up for the purpose of managing risk exposure, are classified and measured as trading transactions. In that case, the difference from fair value is recognized in the income statement.

Employee benefits – Pension plans

The companies of the Group offer their employees various forms of pension plans with specific characteristics that vary according to the law, the regulations and the practices in the countries in which they operate.

The pension plans are currently either defined contribution or defined benefit plans.

Under defined contribution plans, contributions are paid to outside, legally separate entities with administrative autonomy, which free the employer from any subsequent obligation as the outside entity assumes the commitment to pay what is due to the employee.
Consequently, the Group companies record the contribution paid as an expense and no additional obligation is recognized.

Defined benefit plans include post-employment benefits, other than those under defined contribution plans. Under defined benefit plans, the Group companies have the obligation to set aside the costs relating to the benefits guaranteed to their employees in service and pay retired employees. The actuarial risk and the investment risk are thus substantially borne by the companies of the Group.
Defined benefit plans, which, for the Italian companies, include employee severance indemnities accrued to December 31, 2006, are measured by actuarial techniques using the Project Unit Credit Method.

As provided by the amendment to IAS 19 – Employee Benefits, issued by the IASB in December 2004, the Group elected to recognize actuarial gains and losses immediately in the period in which they arise, outside the income statement, in a statement of recognized income and expense.
All cumulative actuarial gains and losses that existed at January 1, 2004 have been recognized in equity.
For defined benefit plans without plan assets, the expenses relating to the increase in the present value of the obligation, due to the fact that the payment date of the benefits is nearing, are recognized in financial expenses.
Payments relative to defined contribution plans are recognized as an expense in the income statement as incurred.

The liability for defined benefit plans is calculated on an individual basis and takes into account life expectancy, personnel turnover, salary changes, revaluation of the yields, inflation and the present value of the amounts to be paid. The specific assumptions of each plan take into account the local economic conditions.

Defined benefit plans are in some cases covered by financial assets managed outside the Group companies. In those cases, the amount recognized in the financial statements for such liabilities corresponds to the difference between present value of future services (actuarial liability) and the market value of the assets invested that are intended to cover the liability, increased by losses or decreased by unrecognized (or not yet recorded) gains and, in any case, taking into account the surplus cap limit for assets established by paragraph 58 of IAS 19. When the result of this calculation shows a net obligation it is recognized in a provision under liabilities; in the reverse case, an asset is recognized.

The scheme for the employee severance indemnities of the Italian companies was considered a defined benefit plan up to December 31, 2006. The regulations for the employee severance indemnities scheme was modified by Law 296 dated December 27, 2006 (Budget Law 2007), and subsequent decrees and regulations issued in the early months of 2007. In view of these changes and particularly with reference to companies with at least 50 employees, the employee severance indemnities scheme is now considered a defined benefit plan only for amounts accrued prior to January 1, 2007 (and not yet paid at the balance sheet date) whereas after that date it is considered a defined contribution plan. For Italian companies with less than 50 employees, the employee severance indemnities scheme remains a post-employment benefit under a defined benefit plan. The amount already accrued must be projected to estimate the amount payable upon termination of employment and subsequently discounted to present value using the Projected Unit Credit Method. This actuarial method is based upon demographic and financial assumptions in order to arrive at a reasonable estimate of the amount of benefits which had already been accrued for each employee based on his/her service life.

Using the actuarial calculation, a charge is made to the income statement to “Labor” for the current service cost which defines the amount of rights accrued during the year by the employee and to “Financial income (expenses)” for the interest cost which constitutes the figurative expense which the company would have incurred by securing a loan on the market equal to the amount of employee severance indemnities.

Employee benefits – Stock option plans

Stock-based payments to employees are measured at the fair value of the equity instruments at the grant date. In accordance with IFRS 2 – Share-based Payment, the full amount of the fair value of stock options at the grant date is recognized in the income statement in personnel costs on a straight-line basis over the period from the grant date to the vesting date with a corresponding entry directly in equity, based upon an estimate of the number of options that is expected to vest. Changes in fair value after the grant date have no effect on the initial measurement.

The cost is recalculated each year based upon a revision of the above-indicated estimate.

In accordance with IFRS 2, the Group has applied this standard to stock options granted after November 7, 2002 and not yet vested at the effective date of IFRS 2 (January 1, 2005).

In the event the plans require a monetary payment equal to the increase in the value of shares of the enterprise, the fair value of the liability of the plan is re-measured at each reporting date until its extinction and the cost is recognized in the income statement.

Provisions for other liabilities and charges

Provisions for other liabilities and charges refer to costs and expenses of a determinate nature which are certain or likely to be incurred but, at the balance sheet date, are uncertain as to the amount or as to the date on which they will arise. Accruals are recorded when there is an obligation, legal or constructive, resulting from a past event, when it is probable that the use of resources will be required to satisfy the obligation and when a reliable estimate of the amount of the obligation can be made.

The amount recognized in the financial statements as the provision for other liabilities and charges expresses the best estimate of the monetary resources necessary to extinguish the current obligation at the balance sheet date, taking into account the risks and uncertainties surrounding the obligation. When the accrual is determined by using estimated cash flows to extinguish the obligation, the carrying amount is represented by the discounted present value of those cash flows.

Changes in estimates are recorded in the income statement in the period in which the change occurs.

The accruals mainly refer to restructuring expenses. An accrual for restructuring operations is booked on condition that a detailed and formal restructuring plan has been approved and that the restructuring has begun or the details of the restructuring plan have been made public and that valid expectations of it have been raised.

Treasury stock

The cost of any treasury stock purchased and/or held, also through subsidiaries, as a result of specific stockholder resolutions are recognized as a deduction from equity. Therefore, the reserve offsetting treasury stock in portfolio is not shown separately. The proceeds from any subsequent sale are recognized as movements in equity.

Income taxes

Current income taxes are calculated according to the tax laws in force in the countries in which the companies of the Group operate on the basis of the taxable income for the year. Taxable income is different from the income expressed in the consolidated financial statements in that it excludes costs and revenues that become taxable or deductible in other years and also excludes items which are never taxable or deductible.

Temporary differences between the amounts of assets and liabilities in the financial statements and the corresponding amounts for tax purposes are recorded in deferred tax liabilities. Deferred tax assets relating to the carryforward of unused tax losses, as well as those arising from deductible temporary differences, are recognized to the extent that it is probable that future profits will be available against which they can be utilized.

Deferred tax assets and liabilities are measured at the tax rates expected to apply to taxable income in the periods in which temporary differences will reverse. Deferred income tax assets and liabilities are offset where there is a legally enforceable right of offset.

Deferred tax assets and liabilities are shown separately from other receivables and tax payables in a specific line item under non-current assets or liabilities.

Current and deferred income taxes are recognized in the income statement except for those relating to items debited or credited directly in equity which are recognized directly in equity. With regard to business combinations, the tax effect is taken into consideration in determining the excess of the cost of acquisition over the fair value of the assets, liabilities and contingent liabilities, while no tax effect is attributed to the residual amount represented by goodwill.

Transactions in foreign currency and consolidation of foreign entities

The financial statements of each Group company are presented in the functional currency of the economic environment in which they operate. For purposes of the consolidated financial statements of the Group, the financial data of these companies is translated into Euro which is the currency of the parent and the presentation currency of the consolidated financial statements.

In the preparation of the financial statements of the individual companies of the Group, the transactions expressed in currencies other than the functional currency are recorded at the exchange rate in effect at the transaction date. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated at the foreign exchange rate prevailing at that date. Non-monetary items are measured at historical cost and are not translated. Exchange differences arising on the settlement of monetary items or on reporting monetary items at rates different from those at which they were initially recorded during the period or in previous financial statements are recognized in the income statement.

For purposes of the presentation of the consolidated financial statements, the assets and liabilities of foreign companies with functional currencies different from the Euro and which are included in the scope of consolidation are translated using the exchange rate in effect at the balance sheet date (current exchange method). Items in the income statement and cash flows in the statement of cash flows are translated at the average exchange rate for the year. The translation differences resulting from the application of this method are classified in equity until the sale of the investment.
Goodwill and fair value adjustments generated by the acquisition of a foreign entity are recognized in the respective currency and translated at the year-end exchange rates.

Revenue recognition

Revenues are formed mainly by sales of services produced within the major business segments of the Group and are stated net of any adjusting items.

Revenues from services are recognized by reference to the stage of completion of the transaction at the balance sheet date and measured on the basis of the services rendered.

In particular, revenues are recognized in the main business segments as follows:

Cushman & Wakefield Group

The C&W Group's revenues are categorized into transaction services and non-transaction services. Non-transaction services include primarily capital market services and client solutions (financial advisory, asset management, valuation, corporate real estate services, and research). Fees related to transaction services are recognized as revenue at the time the related services are fully performed and the amount can be measured reliably, unless significant material future contingencies exist, in which case they are recognized when the contingency is resolved.
Asset management fees are recognized as revenue when earned, typically on a monthly basis as services are rendered.
Other revenues for fees related to non-transaction services are recognized when the assignment has been completed. Fees for ongoing professional services are recognized as revenue when earned, which is when services are rendered.
The C&W Group recognizes certain reimbursements (primarily salaries and related charges) mainly related to the facilities and property management operations as revenue when the underlying reimbursable costs are incurred.

Alpitour Group

Sales of tourist packages, airplane transportation services and brokering revenues are recognized based on the departure date.
Revenues for hotel services and services rendered in connection with the incoming sector are recognized in the income statement at the service performance date.
Premiums connected with reinsurance activities are recognized in the income statement on the client's departure date since the insurance coverage is strictly related to the travel package.

Juventus F.C.

Revenues from games, from radio and television rights and media income are recognized at the actual moment of the event (when the game is played). Revenues from season tickets are recognized when the tickets are paid even if payment is received at the end of the season preceding the season to which the tickets refer and are deferred on the accrual basis using the same principle (when the game is played).

Revenues from the performance of services (including sponsorships) are recognized on the basis of the stage of completion of the service or upon completion of the service.

Revenues are recorded net of returns, discounts and allowances.

Gains and losses from the sale of players' registration rights are recognized according the date affixed by the *National Professional League* giving execution to the contracts for national transfers and the transfer date indicated by the Italian Soccer Federation for international transfers.
