

City Planning Coding Extensions

LEVEL UP your coding skills with [Prodigy Learning](#) and their [Coding Credentials](#) program! The agent is an amazing resource in Minecraft that is often under-utilized by students. Consider checking out Prodigy Learning and their coding courses and revisiting the lesson to complete these challenges!

Extensions

Here are some great ideas on ways you can extend this project.

- **Make it an event:** This is a FUN project! Not only are your students going to have a blast doing it, but students outside your classroom would probably love to see what your class has created. Organize a gallery walk to allow the rest of your school community to come see what your students have built. Have your students explain to guests what they built and why and how.
- **In fact... Make the event like a science fair:** You can take this idea even further by having your students display their research on a 3-panel board. Guests can come to your "station" see your research and then sit down and explore your build.
- **Make a Video!:** Have your students create a walk-through video of their world. You can ramp this up a bit by challenging students to make a video like their favourite YouTuber - with an intro and music and everything. This is an awesome video editing/graphic design assignment as well.
