

Zombie-Cranberries (Key of Em)

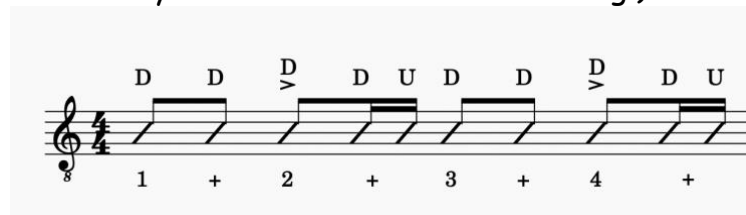

- This song follows the same pattern for the entire song: Em, C, G, D (1 bar each)

| Em | C | G | D

- This song is best played with 8th note down strums!
- If this is too tricky, leave the chord early, perhaps on beat 3
- Don't forget to **accent** beats 2 and 4

- If you're looking for even more of a challenge, try it with 2 extra up strums (this is actually a form of 16th note strumming!)

Classroom Application

- **Dynamics:** By accenting beats 2 and 4, you are demonstrating how effective it can be to increase/decrease the volume of your guitar strumming! It makes the song much more effective.
- **Structure:** If you enjoy the Zombie riff from Module 4, you may decide to play the riff as an introduction before playing the main chord progression! This is the same structure as the original song!
