

Blocklympics - Extensions

LEVEL UP your coding skills with [Prodigy Learning](#) and their [Coding Credentials](#) program! The agent is an amazing resource in Minecraft that is often under-utilized by students. Consider checking out Prodigy Learning and their coding courses, and revisiting the lesson to use the agent to help with design challenges, such as building an elevator or creating a labyrinth in the museum gardens.

Other Extension Ideas:

- In this experience students are asked to design a significant collection of locations. The craftlete village is an area of interest when it comes to coding. The village should be modern and inclusive and could easily benefit from the AGENT coding the exterior of the buildings. Spheres or even more complex shapes can be coded as hollow to support internal more detailed builds by students. Code sometimes generates wildly different results and those results might just add the special modern touch needed for the village.
- Consider running a classroom contest using the Rubrics from the Canadian Minecraft Challenge to determine the winners.
