

Course Title

The Clinical Psychiatry for the Nurse Practitioner Course

Course Description

This course is designed to teach nurse practitioners of all licensures the clinical foundations of psychiatric advanced care. This course will cover the most common mental health conditions seen in practice. This course will cover the evaluation, diagnosis, and treatment of the most common mental health conditions. This course contains an in-depth perspective and review of the most common mental health conditions a nurse practitioner will see in general practice. Additionally, the course will provide a thorough review of common mental health conditions for the PMHNP.

Course Outcomes

By the conclusion of this module, the student should be able to:

- Discuss the foundational clinical knowledge of evaluating, diagnosing, and treating the most common mental health conditions seen in practice.
- Understand how to appropriately monitor patients undergoing psychiatric pharmacological interventions.
- Understand how to integrate basic mental healthcare into their practice which will ultimately improve patient outcomes.

Contact hours awarded: 8 total hours with 4 hours designated as pharmacology hours
