

Extinction! Biodiversity Lab - Extensions

LEVEL UP your coding skills with [Prodigy Learning](#) and their [Coding Credentials](#) program! The agent is an amazing resource in Minecraft that is often under-utilized by students. Consider checking out Prodigy Learning and their coding courses, and revisiting the lesson to use the agent to help with design challenges, such as building an elevator or creating a labyrinth in the museum gardens.

Credentials & Curriculum Pathway

Other Extension Ideas:

- Research the biomes and add other species (plants or animals) in Minecraft to give examples of biodiversity in the prebuilt biomes.
- Go to the Minecraft World Library and download a biome template and create your own example of biodiversity and the interconnectedness of species in Minecraft. You can use boards and slates to explain what you've added and how each species is dependent on the other.
