

TREND FLOWER THE ART OF BLOOM

Flowers as Art: The Sense of Beauty and Design Within Trend Flowers

Since ancient times, people have embraced flowers—marking life’s thresholds and adorning everyday spaces.

A flower is never merely botanical; within its color, form, fragrance, and manner of blooming resides a cultivated Sense of Beauty shaped by each era and culture.

The flowers that now draw your gaze—those called “trends”—are not transient fascinations.

They are mirrors, quietly reflecting the inner prayers and emotional atmosphere of our time.

Why is it that certain curves or colors evoke within you an unspoken serenity... or a sudden joy?

Here, I illuminate trend flowers—symbols of the present moment—while tracing their histories and

philosophies.

Through this exploration, I invite you to discover why you are drawn to them, and what they reveal about your own love.

You may encounter flowers that feel unfamiliar, even slightly unexpected.

Yet when you begin to understand the history and philosophy that lie beyond them—and when you allow your own heart to open—the definition of beauty begins to expand infinitely.

Each chapter offers a quiet work to deepen your Sense of Beauty.

These are not merely for acquiring knowledge, but for entering a dialogue with yourself through beauty.

To know beauty... is to know yourself.

May this serene Journey illuminate your designs, your creations, and your life.
