

WEEK #2 HOMEWORK

your homework this week:

1. Learn about the houses. You will find a PDF handout in your course library. It contains a detailed description of each house (area of influence).

2. Journal about what comes up for you with this archetype and its position. How is this archetype speaking to you? How does it relate to the themes associated with the house in which it falls?

Remember to look at the archetypes and their house position as an observer, with a neutral eye, and not to use the process to judge yourself. This is a highly intuitive process and requires non-judgmental, intuitive approach.

Post your questions to the group prior to the class, so I can provide more answers that will serve everyone.
