

NWT Science 5

Demonstrate an understanding of the effect of forces acting on different structures and mechanisms;

students will: Identify specific considerations in actual manufacture of a product that they have designed and made (e.g., production time; cost and availability of materials);

Describe the consequences of having limited time and materials when making a product;

By the end of Grade 5, students will: Formulate questions about and identify needs and problems related to protection of the natural environment and explore possible answers and solutions

Recognize that energy cannot be created or destroyed but can only be changed from one form into another

Distinguish between a renewable and nonrenewable
