

# Building Word Problems - Extensions

LEVEL UP your coding skills with [Prodigy Learning](#) and their [Coding Credentials](#) program! The agent is an amazing resource in Minecraft that is often under-utilized by students. Consider checking out Prodigy Learning and their coding courses, and revisiting the lesson to use the agent to help with design challenges, such as building an elevator or creating a labyrinth in the museum gardens.

## Other Extension Ideas:

- Create a world where all students could add their own word problems, and the other students could visit and solve the math.
- Change the settings of the world to survival and ask students to add functions with the NPC's such as multiple choices. If the student provides the correct answer, they could receive blocks, food, or material to build something.
- Add other features to the word problems like:
  - Fractions
  - Area and perimeter
  - Shapes
  - Algebra
