

Course Title

The Comprehensive Diabetes Management Course

Course Description

This course is designed to provide Nurse Practitioners with foundational and continuing knowledge regarding evaluating, diagnosing, and treating the diabetic patient. The course is focused on type 2 diabetes but will also cover treatment recommendations for the Type I diabetic. It doesn't matter if you operate a Men's health practice, IV infusion clinic, primary care office, or HRT practice you will encounter these patients. The Nurse Practitioner should be able to step away from this course empowered and knowledgeable to treat the type 2 diabetic and know what to do with the type 1 diabetic to improve patient outcomes and practice performance.

Course Outcomes

By the conclusion of this module, the student should be able to:

- Recognize the types of diabetes, including prediabetes.
- Explain how to diagnose and evaluate the diabetic patient.
- State the various complications of diabetes including their evaluation and treatment
- Distinguish the various types of treatment of diabetes
- Explain how to correctly document and bill for diabetic visits
- Identify correct management and monitoring of the diabetic patient
- Summarize how to integrate diabetic care into a niche practice

Contact hours awarded: 5 total hours with 3 hours designated as pharmacy hours.
